Webster's New Dictionary of Synonyms

A Merriam-Webster®

Thousands of synonyms defined, discriminated and illustrated with quotations. Plus antonyms, analogous words and contrasting words.

To help you use the right word in the right place.

Webster's New Dictionary of Synonyms

"A must for every writer's library."—THE
BOSTON GLOBE

*"An easy-to-use aid to precise word
use."*—THE WRITER

This 942-page volume shows you how to use the right word in the right place, quickly and clearly.

The alphabetical arrangement saves hunting through an index and its easy-to-use cross-reference system pinpoints related words.

Webster's New Dictionary of Synonyms contains synonymies in which words of similar meaning are defined and discriminated and illustrated with thousands of pertinent quotations from both classic and contemporary writers, showing the language in actual precise use.

Antonyms, analogous words, and contrasted words provide additional information on word relationships.

And the introduction presents an informative and helpful survey of the history of synonymy.

FROM MERRIAM-WEBSTER

• THE UNABRIDGED DICTIONARY

Webster's Third New International—A masterpiece of modern defining—more than 460,000 entries, with 200,000 usage examples and 1,000 synonym articles. 3,000 terms illustrated. Simplified pronunciation key and clear, informative etymologies. The standard authority.

• DESK SIZE DICTIONARY

Webster's Ninth New Collegiate—The newest in the famous Collegiate series. Almost 160,000 entries and 200,000 definitions. Entries for words often misused and confused include a clear, authoritative guide to good usage. For an exclusive feature—entries are dated. How old is a word? When was it first used? The answer is here, but in no other American dictionary.

• GEOGRAPHY

Webster's New Geographical Dictionary—World facts at your finger tips! More than 47,000 entries and 217 maps provide basic information on the world's countries, regions, cities, and natural features. A convenient source of detailed information about the world you live in.

• BIOGRAPHY

Webster's New Biographical Dictionary—A unique one-volume reference work providing essential information on more than 30,000 men and women—of all eras, all parts of the world, and from all fields of endeavor. Pronunciation is given for each name and end-of-line division is clearly indicated.

• SPORTS

Webster's Sports Dictionary—The only book of its kind, it explains and defines the equipment, signals, and language used in over 100 sports—from airplane racing to yachting. Filled with actual quotations from athletes and sportswriters, original drawings, and diagrams.

• THE OFFICIAL CROSSWORD PUZZLE DICTIONARY

Webster's Official Crossword Puzzle Dictionary—Over 120 specialized lists that will bring the puzzle solver and the answer word together quickly and easily. Three column format.

Merriam-Webster Inc.

Springfield, MA 01102

These special features make Webster's New Dictionary of Synonyms easier to use, more precise and complete than any reference of its kind:

1

Each discrimination begins with a brief common definition.

persevere

persevere, persist are both used in reference to persons in the sense of to continue in a given course in the face of difficulty or opposition. **Persevere** nearly always implies an admirable quality; it suggests both refusal to be discouraged by failure, doubts, or difficulties, and a steadfast or dogged pursuit of an end or an undertaking <I will *persevere* in my course of loyalty, though the conflict be sore between that and my blood—*Shak.*> <for, strength to *persevere* and to support, and energy to conquer and repel — these elements of virtue, that declare the native grandeur of the human soul—*Wordsworth*> <I do not intend to take that cowardly course, but, on the contrary, to stand to my post and *persevere* in accordance with my duty—*Sir Winston Churchill*> **Persist** (see also **CONTINUE**) may imply a virtue <this is the poetry within history, this is what causes mankind to *persist* beyond every defeat—*J. S. Untermeyer*> but it more often suggests a disagreeable or annoying quality, for it stresses stubbornness or obstinacy more than courage or patience and frequently implies opposition to advice, remonstrance, disapproval, or one's own conscience <*persist* in working when ill> <it is hard to see how they can have *persisted* so long in inflicting useless misery—*Russell*>

Ana *continue, abide, endure, last

Con vary, *change, alter; waver, vacillate, falter, *hesitate

persiflage *badinage, raillery

Ana bantering or banter, chaffing or chaff (see **BANTER**): ridiculing or ridicule, twitting, deriding or derision (see corresponding verbs at **RIDICULE**)

persist 1 *persevere

Ant desist —**Con** discontinue, cease, *stop, quit

2 *continue, last, endure, abide

Ant desist —**Con** *stop, cease, discontinue

2

Special applications and shades of meaning are given for each discriminated word in an article.

3

For quicker reference every discriminated word is listed in alphabetical order.

4

Antonyms and contrasted words are also listed.

5

Quotations from outstanding writers illustrate how a word is and has been used.

6

Convenient cross-reference system aids in locating related words.

7

Detailed discussions of each word in a group show how to use exactly the right word in the right place.

8

Analogous words with closely similar meaning are grouped together.

PREFACE

WEBSTER'S NEW DICTIONARY OF SYNONYMS is newly edited and entirely reset but based upon *Webster's Dictionary of Synonyms*, which rapidly became a favorite book among readers and writers who wish to understand, appreciate, and make nice discriminations in English words that are similar in meaning. The earlier book filled a widespread need for a work devoted to synonymy with accessory material in the form of word lists of various kinds. The editors of this new and revised edition have rewritten and sharpened the discriminations, have increased the number of articles, and have more than doubled the number of authors quoted. Particular attention has been given to updating the quotations so that they accurately reflect today's English.

The core of this book is the discriminating articles. It is not its purpose to assemble mere word-finding lists for consultants with but a vague notion of the sort of word they seek, but rather to provide them with the means of making clear comparisons between words of a common denotation and to enable them to distinguish the differences in implications, connotations, and applications among such words and to choose for their purposes the precisely suitable words. (Compare the discussion of Roget's aims beginning on page 14a following.) In addition to the central core of discriminations this book provides auxiliary information of three types, in the form of analogous words, antonyms, and contrasted words. These three types are explained on pages 26a–31a.

Every word discussed in an article of synonymy is entered in its own alphabetical place and is followed by a list of its synonyms, with a reference (by means of an asterisk or a direction introduced by "see") to the entry where the discussion of these listed words is to be found. The words listed as analogous and those listed as contrasted are always displayed in groups, each group having a clear reference (asterisk or "see") to the term under which an article of synonymy is to be found.

The writing of the articles has been done chiefly by two associate editors of the Merriam-Webster editorial staff: Dr. Philip H. Goepf and Dr. Mairé Weir Kay. Their principal assistants were Miss Ervina E. Foss, in charge of cross-referencing, and Mr. E. Ward Gilman, in charge of proofreading, both assistant editors. Mrs. Betty Meltzer was the principal editorial assistant. Some of the articles on scientific terms were written by Mr. Hubert P. Kelsey, associate editor. All of these editors took part in the editing of *Webster's Third New International Dictionary*. The historical survey and the introductory analysis of the problems and issues in the field of English synonymy are largely the work of the late Rose F. Egan, sometime assistant editor, and have been taken over from the first edition with only minor changes. To her clear analysis and understanding this book still owes much of its quality although all of her discriminations have been revised in varying degrees.

PHILIP B. GOVE
Editor in Chief

INTRODUCTORY MATTER

SURVEY OF THE HISTORY OF ENGLISH SYNONYMY

Consultation of a work on synonyms is made easier if the consultant has a reasonable background of the theory and of the technique that have developed since the first English synonymy was published. The following essay [first published in 1942] is, so far as we know, the first attempt to survey broadly the course of that development from its beginnings to the present. It is not intended to be exhaustive. Some good books have been published which have not been specifically discussed because they have played no essential part in this development or have advanced no new ideas which, by challenging attention or debate, have led to further clarification of the problems involved. The purpose of this article has been primarily not to praise or to denounce but to lead up to the exposition of principles which have dominated the writing of this book. These principles, we believe, are founded upon the practice of those who have seen and known clearly what could be accomplished by a book of synonyms: there are others who disagree, but we have tried to present their case fairly.

It was not until the second half of the eighteenth century that the first book on synonyms appeared in English. The Rev. John Trusler (1735–1820) was its author, *The Difference between Words Esteemed Synonymous* its title, and 1766 its date. Its source is definitely established. In 1718, the Abbé Gabriel Girard (1677–1748) had published in France *La Justesse de la langue françoise ou les Différentes significations des mots qui passent pour être synonymes*, a work which had great vogue not only in France but also abroad, especially in England. That Trusler's book was based upon it is evidenced not only by the likeness of the titles but also (in the first edition) by an English version of Girard's preface and by the admission in the author's preface that he had translated as much of the articles as was in keeping with the peculiar genius of the English language. The second edition of 1783, however, increases the divergence between the two books: the prefaces are consolidated and the result is given as the work of the author, although many passages from Girard are included without being quoted. There are, too, many new articles dealing with peculiarly British terms, such as those which concern the church and daily life in England; but these, although they represent an enrichment of vocabulary, add little to the originality of the work, which still remains an imitation. A clear-cut distinction which sharply reveals the meanings of synonymous French terms often becomes a forced distinction when applied to English. In fact, Trusler never knew whether it was his aim to point out the "delicate differences between words reputed synonymous" or to give the particular idea of each word "which constitutes its proper and particular character." He claims both aims as one, not realizing that often they are divergent.

The next significant work was the *British Synonymy* of Hester Lynch Piozzi (1741–1821), better known as Mrs. Thrale, the close friend of Dr. Johnson. It first appeared in 1794 and was succeeded by at least two editions, the best known of which was published in Paris in 1804. That it was immediately popular is evident from the testimony of its 1804 editors, who asserted its merits on the ground of "the successive editions it has passed through being the best proof of the estimation in which it is held." That it was not written without a knowledge of Girard's work we know on the authority of these same editors.¹ "So great indeed was the estimation" in which the French work was held, "that in a few years after its publication, an imitation of it appeared in England": presumably the "imitation" was Trusler's.

The editors imply, however, that Mrs. Piozzi's work is something better than had yet been given to the public. "But it was only in the year 1794," they continue, in a tone that implies contempt for the "imitation," "that Mrs. PIOZZI (formerly Mrs. THRALE) so well known in the literary world for her different publications, and her intimacy with the learned Dr. Johnson, brought out the work we have now the pleasure of presenting to our Readers, and which is totally grounded on the structure of the English language." There is no reason to suppose, however, that she depended much on the influence of Dr. Johnson, who had died in 1784.

Mrs. Piozzi's book reveals an independence of spirit and a feminine disregard of advice. It is, in fact, never profound: it is full of errors or dubious assertions, and it is often absurdly naïve. More than this, it frequently takes issue with Dr. Johnson or, in a sprightly manner, casts doubt on his judgments. There

¹ Mrs. Piozzi in her own preface (p. vii) mentions Girard and says, "I should be too happy, could I imitate his delicacy of discrimination, and felicity of expression."

is the story of the milliner's apprentice who saved her chicken bones to feed a horse. Johnson contended that such an action showed that she was *ignorant*, but Mrs. Piozzi maintained that it proved her *senseless*. "I thought her an idiot [sic]" was, for her, the last word on the matter.

Great as was her respect for Dr. Johnson in his own field, she believed that she also had her field and that it was incumbent on her to remain within the limits she had set for herself. Her object is very clear. Like Girard and Trusler, she was distinguishing not synonyms (that is, words identical in meaning) but words so similar in meaning as to be "apparently synonymous." The subtitle of her book announces her aim and reveals a further limitation of purpose: "An attempt at regulating the choice of words in familiar conversation." Her preface to the 1794 edition develops these ideas:

If then to the selection of words in conversation and elegant colloquial language a book may give assistance, the Author . . . modestly offers her's; persuaded that, while men teach to write with propriety, a woman may at worst be qualified—through long practice—to direct the choice of phrases in familiar talk.

Her book, she modestly claimed, is "intended chiefly for a parlour window" and is "unworthy of a place upon a library shelf," but it may be of help to others "till a more complicated and valuable piece of workmanship be found to further their research." She wished in particular to help those who desired to converse elegantly and to save foreigners from ridiculous mistakes in speech. "If I can in the course of this little work dispel a doubt, or clear up a difficulty to foreigners . . . I shall have an honour to boast."

For this reason she could not see that her method of discrimination had much in common with that of the lexicographer and the logician. Theirs was to define: hers was to indicate propriety in the use of words. It was not her intent to establish differences in meaning but to indicate the fitness of words for use, often depending on "the place in which they should stand" but sometimes depending on their relative fineness, strength, force, or the like. She makes a distinction between the methods of the definer and the methods of the synonymist by giving, first, two definitions of the word *fondness*, one from "an eminent logician" and one from Dr. Johnson, and, secondly, by an ideal synonymy in which she reveals the same word's meaning by showing it in use along with similar words. This was not invariably her method, but it illustrates what in the main she was trying to achieve.

. . . I have before me the definition of *fondness*, given into my hands many years ago by a most eminent logician. . . .

Fondness," says the Definer, "is the hasty and injudicious determination of the will towards promoting the present gratification of some particular object."

Fondness," said Dr. Johnson, "is rather the hasty and injudicious attribution of excellence, somewhat beyond the power of attainment, to the object of our affection."

Both these definitions may possibly be included in *fondness*; my own idea of the whole may be found in the following example:

Amintor and Aspasia are models of true *love*: 'tis now seven years since their mutual *passion* was sanctified by marriage; and so little is the lady's *affection* diminished, that she sate up nine nights successively last winter by her husband's bed-side, when he had on him a malignant fever that frightened relations, friends, servants, all away. Nor can any one allege that her *tenderness* is ill repaid, while we see him gaze upon her features with that *fondness* which is capable of creating charms for itself to admire, and listen to her talk with a fervour of admiration scarce due to the most brilliant genius.

For the rest, 'tis my opinion that men love for the most part with warmer *passion* than women do—at least than English women, and with more transitory *fondness* mingled with that passion. . . .

It was in her simpler versions of this method that she developed a formula that has been followed by many of her successors in the discriminated synonymy—not always felicitously. We will have opportunity to return to this method later when it becomes an object of attack and will call it for the sake of convenience the Piozzi method. At present let examples of her usage suffice:

TO ABANDON, FORSAKE, RELINQUISH, GIVE UP, DESERT, QUIT, LEAVE . . . though at first sight apparently synonymous, conversing does certainly better shew the peculiar appropriation, than books, however learned; for . . . familiar talk tells us in half an hour—That a man *forsakes* his mistress, *abandons* all hope of regaining her lost esteem, *relinquishes* his pretensions in favour of another. . . .

we say a lad of an active and *diligent spirit*, or else of an *assiduous temper*, or *sedulous disposition*. . . .

we say that reports are *confirmed*, treaties *ratified*, and affairs *settled*.

a hard question *puzzles* a man, and a variety of choice *perplexes* him: one is *confounded* by a loud and sudden dissonance of sounds or voices in a still night; *embarrassed* by a weight of clothes or valuables, if making escape from fire, thieves, or pursuit. . . .

The gentleman who discharges a gaming debt in preference to that of a tradesman, apparently prefers *honour* to another virtue, *justice*. . . .

It seems a fair statement of her aim to say that she was attempting to indicate and establish idiomatic English. However, in determining such English, she had only two tests to apply: the drawing-room usage of her time and her own instinct. To literary use in general she was indifferent. Therefore her judgments are nearly always subjective and sometimes arbitrary. Moreover, she discounted the great help that discrimination of meanings is to the synonymist. "We must not meantime retard our own progress," she wrote in her preface, "with studied definitions of every quality coming under consideration. . . although the final cause of definition is to fix the true and adequate meaning of words or terms, without knowledge of which we stir not a step in logic; yet *here* we must not suffer ourselves to be so detained, as synonymy has more to do with elegance than truth. . . ."

Her judgments are often limited or partial, for they represent her personal feelings or the predilections of her age. Yet, within those limits, she frequently hit upon an exact meaning of a word in a particular sense and gave it life and color. What she seldom saw was that a word might have more meanings than the one which was illustrated (as *honor* in her example of the tradesman) or that a good but narrow instance of use might be taken as idiomatic by her readers (as when by implication *puzzle* suggests a question or problem needing determination and *perplex* a variety of choices). The danger of her work is not in the falsity of the example, for it is usually true or just, but in its inadequacy in suggesting other instances of good use.

Yet in her refusal to accept her age's theory of definition and in her approach to a concept of good usage we must recognize an independent spirit. The time was not ripe for a fully developed conception of the differences between logic and lexicography, yet she was somewhat nearer the present conception than some later and cleverer persons, and she had at least a feeling of rightness in the use of language that suggested, even if it did not consciously approach, the later theory of good usage as a test of such rightness. Besides, her book has an engaging quality, often lacking in books of this character, which is not necessarily a sign of the levity with which critics have charged this book, but rather of a spirited challenge to the ideals of a hidebound age.

Mrs. Piozzi's book was followed by William Perry's *Synonymous, Etymological, and Pronouncing English Dictionary*, published in 1805. On its title page and in its preface the editor explicitly offers his work as derived from *The Dictionary* of Samuel Johnson. Perry was the compiler of the better known *Royal Standard English Dictionary* brought out in England in 1775 and in America in 1788.

The *Synonymous Dictionary*, as we will call the 1805 book, evidently did not achieve the fame or popularity of the *Royal Standard*. Chauncey Goodrich, Noah Webster's son-in-law, referred to it in 1847 in his preface to the royal octavo volume of Webster as "entirely out of print." There is no evidence to show that it passed beyond the first edition. On its title page it is described as "an attempt to Synonymise his [Johnson's] Folio Dictionary of the English Language." In its preface Perry claims that it contains "the only synonymous vocabulary ever offered to the public" and that "To the philological, critical, and other interesting observations of the above learned author [Dr. Johnson], we have superadded two exclusive advantages to our publication; the one—as a *synonymous*, the other—as a *pronouncing* nomenclature. The *former* is new and unique. . . ."

The work, he informs us, was begun in 1797, three years, therefore, after the publication of the first edition of Mrs. Piozzi's *British Synonymy*. Yet there is no indication of knowledge of that work or of the work of Girard; in fact, Perry recognized no predecessor save Johnson. From Johnson, by explicit credit, he extracted his vocabulary and his explanations of meanings. Not so openly, however, did he extract the synonyms themselves: for example, his entry *good* is followed by Johnson's definition of sense 1, but the synonyms are taken from all of Johnson's succeeding twenty-nine senses. Nor does he provide many citations, and these are chiefly in entries at the end of the book; elsewhere, at the end of an entry or in parentheses, he cites the authors Johnson quoted but not the passages.

In addition he adopted an original method of presenting his material. There were two types of entries, one in lowercase and one in capitals. The latter, which he called "radicals," were followed by an exhaustive list; the former were succeeded by a much shorter list, but one word was printed in small capitals to indicate it was the radical. Thus "marches," a lowercase entry, has "borders, limits, confines, BOUNDARIES" as its synonyms: "BOUNDARY," an entry in capitals, has a much longer list which includes "limit, bound, bourn, term, mere, but, abuttal, border, barrier, marches, confines, precinct, line of demarcation, utmost reach or verge of a territory; a landmark, a mere-stone." If, then, one wished all the synonyms of a lowercase entry such as *marches* or *abbreviation*, one must turn to BOUNDARY or ABRIDGMENT, the word entered as the radical.

There are two things to notice here that are important. Perry was not merely greatly extending the traditional definition of *synonym* (as one of two or more words of identical meaning or of apparently identical meaning) and broadening it to include a group of words which have resemblances in meaning, but was doing so in what seems to be a misunderstanding of Dr. Johnson's purposes in adding such words to his definitions and in ignorance of what he supplied as a corrective. The fact

of the matter is that Johnson was aware of the difficulties of his task, that he was conscious that the part of his work on which "malignity" would "most frequently fasten is the *Explanation* [i.e., the definition]."

I cannot hope to satisfy those, who are perhaps not inclined to be pleased, since I have not always been able to satisfy myself. To interpret a language by itself is very difficult; many words cannot be explained by synonymes, because the idea signified by them has not more than one appellation; nor by paraphrase, because simple ideas cannot be described.

That was the difficulty. Synonyms would not perfectly satisfy the need either when the word defined had many meanings or when the word defining had more significations than the one intended, for in either case one must be too broad and the other too narrow. Then, too, "simple ideas" (really those involved in simple words such as *be, do, act*) were beyond definition, as Johnson saw it.

The rigour of interpretative lexicography requires that *the explanation, and the word explained, should be always reciprocal*; this I have always endeavoured but could not always attain. Words are seldom exactly synonymous; a new term was not introduced, but because the former was thought inadequate: names, therefore, have often many ideas, but few ideas have many names. It was then necessary to use the proximate word, for the deficiency of single terms can very seldom be supplied by circumlocution. . . .

So Johnson wrote and so Perry quotes in his preface. But instead of continuing Johnson's statement to its end, Perry broke off with "circumlocution," thereby giving the reader some reason to infer that Johnson thought the method of definition by synonym preferable to that of definition by paraphrase. He had failed to notice or possibly had deliberately ignored that this was not in any sense Johnson's meaning, that both methods were faulty, but that there was a remedy for the imperfections of each. Johnson's addition to this last sentence, "nor is the inconvenience great of such mutilated interpretations, because the sense may easily be collected entire from the examples," makes that point clear. Perry may have been obtuse rather than disingenuous when, for the most part, he omits the examples (citations) of Johnson and enters synonyms, which are not, in Johnson's language, "exactly synonymous" but only "proximate words." But he may have known what Dr. Johnson meant, though his explanation is by no means clear:

. . . we by no means contend, that the whole of the explanations collected under such initial words as . . . we call RADICALS, are all strictly synonymous; neither, on the other hand, can we agree with those who roundly assert, that there are not two words in the whole English language of precisely the same signification; but this we take upon us to say, that we have no less than Dr. Johnson's authority for their selection and disposition as explanatory of their meaning. . . .

Dr. Johnson's example, great as was its authority and prestige at that time, was an unstable prop when his statements were misunderstood. Perry perhaps indirectly rendered a service by raising the issue as to whether the term "synonym" needed redefinition, since it was being broadened in its extension: he may also have done a service in showing to others the values implicit in word-finding lists. But he did not see that he had raised those issues, and what purports to be a dictionary succeeds chiefly in being a word finder.

Between 1805 and 1852 (the latter the date of publication of Roget's *Thesaurus of English Words and Phrases*) several works on synonyms appeared. Some were of the word-finding list type, and among these there was nothing of particular importance. On the other hand, there were as many as five works discriminating synonyms of which at least four stand out for one reason or another: *English Synonymes Discriminated* by William Taylor (1813), *English Synonymes Explained* by George Crabb (1816), *English Synonymes Classified and Explained* by George F. Graham (1846), and *A Selection of English Synonyms* by Miss Elizabeth Jane Whately (1851). Both Crabb's and Whately's books are still influential and have been reprinted in recent years.

William Taylor (1765–1836), the author of the first of these books, is better known as the translator of Burger's *Lenore*, Lessing's *Nathan the Wise*, and Goethe's *Iphigenia in Tauris* and as one of the leading promoters of knowledge of contemporary German literature during the romantic era. His *English Synonymes Discriminated* is the result of his studies in German, French, Italian, and other languages and of his conviction that no English work the equal of certain foreign treatises on synonyms had as yet been written. The work is, as a whole, uneven, but a few articles in it are not only better than any others written up to that time but the equal of any that were to be written for over ninety years. A favorite theory of his was that if one is thoroughly grounded in the original meaning of a term, one "can never be at a loss how to employ it in metaphor." Consequently, etymologies became for him an important means of showing this original meaning. They formed not an invariable part of his discrimination but a very useful part when they were needed. Usually, also, he knew when his etymology was grounded on fact and when it was merely hypothetical. His method at its best is exemplified in the article covering *austere, severe, and rigid*, which we give here in abridged form:

Austerity (says Blair²) relates to the manner of living: severity, of thinking, rigour, of punishing. To austerity is opposed effeminacy; to severity, relaxation; to rigour, clemency. A hermit is austere in his life; a casuist, severe in his decision; a judge, rigorous in his sentence.

In this discrimination there is little exactness. Austerity is applied not only to habit, but to doctrine, and to infliction. Solitary confinement is a severe form of life, and a severe punishment. Rigid observances, rigid opinions, are oftener spoken of than rigid sentences.

A hermit is austere, who lives harshly; is severe who lives solitarily; is rigid who lives unswervingly. A casuist is austere who commands mortification, severe, who forbids conviviality, rigid, whose exactions are unqualified. A judge is austere, who punishes slight transgressions; severe, who punishes to the utmost; rigid, who punishes without respect of persons and circumstances.

Why this? Austerity is an idea of the palate; it means crabbedness. . . . These modes of life which are painful to the moral taste, are called austere. . . . Austerity is opposed to suavity.

Severity is not traced back to the sensible idea in which the word originates. *Se* and *vereor*, to bend down apart, are perhaps the component ideas. The *lying prostrate apart* is not only characteristic of the praying anchorite, and of public penance, but of cruel infliction: and to all these cases severity is accordingly applied. . . . To severity is opposed remissness.

Rigour is stiffness: rigid means frozen: stiff with cold. . . . To rigour is opposed pliancy.

Religious competition renders sects austere, priests severe, and establishments rigid.

With the exception of *severe* (the ultimate origin of which is still doubtful) the words, in the main, conform to their etymology. *Austere* does originally mean something like “bitter-tasting” and *rigid* means “stiff,” though not necessarily “stiff with cold”; also, something that is *austere* is not sweet or suave, and something that is *rigid* is not pliant or flexible. He has caught the essential difference here, and the proper application follows. If Taylor had been able to maintain this method and the penetration it involved, he might have changed the course of synonymizing. But three years later *English Synonymes Explained*, by George Crabb (1778–1851), appeared and caught the public favor. For thirty-seven years Taylor’s book remained unprinted: then between 1850 and 1876 there were three new editions. For a few years it attracted some attention and then disappeared from favor.

Crabb’s book, while still highly regarded by some, meets much adverse criticism from others. In his own day it was thought of generally as the best work available, although Crabb complicated matters somewhat by frequent revisions which changed its character. In his introduction to the first edition he complained of the lack of a work on English synonyms in which the subject is treated “in a scientific manner adequate to its importance.” Englishmen though great in literature and philology had in this field fallen short of the French and Germans, who “have had several considerable works on the subject.” He did not wish “to depreciate the labours of those who have preceded” him; rather he claimed to “have profited by every thing which has been written in any language upon the subject; and although I always pursued my own train of thought, yet whenever I met with any thing deserving of notice, I adopted it, and referred it to the author in a note.”

Crabb’s *English Synonymes Explained* is both the most laborious and the most ambitious work of its kind. In spirit and objective it is a far remove from Mrs. Piozzi’s *British Synonymy*, few as are the years which intervened between their publication. For Mrs. Piozzi represented the old temper where sprightliness, elegance, and ease were paramount and Crabb the new temper in which the world had grown solemn and serious under the influence of many currents, such as the pressure of momentous events, the influence of Continental (especially German) thinkers, and the spread of all the new ideas spoken of collectively as romanticism. When the best philosophers and philosophic poets of the age were seeking to answer the questions what is beauty, what is poetry, what is art, what is genius and were discriminating the beautiful and the sublime, the naïve and the sentimental, imagination and fancy, the ugly and the grotesque, what synonymist could in conscience say that “synonymy has more to do with elegance than truth”?

Crabb was undoubtedly concerned with truth rather than elegance. He was stimulated by the thinking of his age and, like many persons of his time, responded with joy to the new philosophy that deepened and enriched the concepts of beauty, poetry, and truth. Although he was in no sense a philosopher, he had a smattering of philosophical knowledge, a small philosophical vocabulary, and a deep love of philosophical distinctions. He was also interested in philology as it was understood in his time. In the study of synonyms he found satisfaction of all these interests, all the more so since he had come to regard synonyms not as words of the same meaning but as “closely allied” words between which there are “nice shades of distinction.” Discrimination not only gave him profound intellectual satisfaction: it also afforded him great opportunities. In his introduction he wrote:

My first object certainly has been to assist the philological inquirer in ascertaining the force and comprehension of the English language; yet I should have thought my work but half completed had I made it a

² Hugh Blair, rhetorician, 1718–1800.

mere register of verbal distinctions. While others seize every opportunity unblushingly to avow and zealously to propagate opinions destructive of good order, it would ill become any individual of contrary sentiments to shrink from stating his convictions, when called upon as he seems to be by an occasion like that which has now offered itself.

His justification for “the introduction of morality in a work of science” is very ingenious. In answer to anticipated objections he wrote, “a writer, whose business it was to mark the nice shades of distinction between words closely allied, could not do justice to his subject without entering into all the relations of society, and showing, from the acknowledged sense of many moral and religious terms, what has been the general sense of mankind on many of the most important questions which have agitated the world.”

It is not easy to find in Crabb proofs that he was discriminating historical meanings (the interpretation that may be given to his “acknowledged sense”), but one can readily discover evidence that often he was supporting an older conception he favored rather than a new conception he heartily disliked. A good example of this is found in his discrimination of *SOUL* and *MIND*.

There are minute philosophers, who. . . deny that we possess any thing more than what this poor composition of flesh and blood can give us; and yet, methinks, sound philosophy would teach us that we ought to prove the truth of one position, before we assert the falsehood of its opposite; and consequently that if we deny that we have any thing but what is material in us, we ought first to prove that the material is sufficient to produce the reasoning faculty of man. . . . [He continued this line of argument through several sentences.]

But not to lose sight of the distinction drawn between the words *soul* and *mind*, I simply wish to show that the vulgar and the philosophical use of these terms altogether accord, and are both founded on the true nature of things.

Poets and philosophers speak of the *soul* in the same strain, as the active and living principle.³

Arguments of this character were mostly occasional with Crabb, but the method of discriminating things which the words named or to which they were applied was characteristically infixed. He could not, for instance, mark the distinctions between *finical* and *foppish* but between a *finical gentleman* and a *foppish gentleman*.

A *finical* gentleman clips his words and screws his body into as small a compass as possible to give himself the air of a delicate person. . . : a *foppish* gentleman seeks by extravagance in the cut of his clothes, and by the tawdriness in their ornaments, to render himself distinguished for finery.

He could not discriminate *beautiful*, *fine*, *handsome* without determining what is *the beautiful*, *the fine*, *the handsome*.

The beautiful is determined by fixed rules; it admits of no excess or defect; it comprehends regularity, proportion, and a due distribution of colour, and every particular which can engage the attention: the *fine* must be coupled with grandeur, majesty, and strength of figure; it is incompatible with that which is small; a little woman can never be *fine*: the *handsome* is a general assemblage of what is agreeable; it is marked by no particular characteristic, but the absence of all deformity. . . .

Even simple words were so discriminated; each one had an abstract reference which was the test of its right use no matter how little cultivated writers and speakers respected that test.

The gift is an act of generosity or condescension; it contributes to the benefit of the receiver: the *present* is an act of kindness, courtesy, or respect; it contributes to the pleasure of the receiver.

What we *abhor* is repugnant to our moral feelings; what we *detest* contradicts our moral principle; what we *abominate* does equal violence to our religious and moral sentiments. . . . Inhumanity and cruelty are objects of *abhorrence*; crimes and injustice of *detestation*; impiety and profanity of *abomination*. . . .

Crabb’s habitual attitude to words as names of things, or for what he might have called “true concepts of things,” vitiates his entire work. It has made it of negligible value in our time when lexicography has become an independent science with clearly defined objectives and functions, the chief of which is to respect the meanings men have agreed to give words rather than the notions individuals have concerning the things named or described by those words. His concepts, however interesting, are still subjective and have not been tested to any extent by actual written or spoken language. There are many citations in his work, but the sensitive reader often finds little relevancy between the word as used there and the sense defined. For example, in illustrating the meaning of the “soul” as “the active and living principle” he cites Thomson:

“In bashful coyness or in maiden pride,
The soft return conceal’d, save when it stole
In side-long glances from her downcast eyes,
Or from her swelling *soul* in stifled sighs”

³ This paragraph did not appear in the first edition.

But here *soul* as cited means simply and narrowly the rising emotions and not "the active and living principle."

His synonymies are, on the whole, hard reading because confused and inconsistent. As a rule they attempt too much yet do not fully apprehend the greatness of the task and leave the reader without any clear or definite impression or without any remembered distinctions. Also, they excite rebellion in a reader who can give any number of citations to show that Crabb's dogmatic assertions are not justified by usage. Despite these fundamental defects which, with the passage of time and changes in the basic conceptions, have come to be more and more striking, Crabb deserves recognition for some additions to the art of synonymizing. Even these, however, may not be entirely his contributions: a bit here and a bit there may have been done by others. Taylor, for example, gave etymologies when they served his purpose. Moreover, after Crabb the work of perfecting often remained to be done and many others are responsible for deeper insight into the possibilities of the method or the extent to which each possibility is serviceable. The chief contributions are three:

1. The addition of an etymology to the article. Much more, however, needed to be known before certain words could be correctly etymologized and before they could be related to the sense to be defined. In some cases Crabb's etymologies are "learned" additions to the article, in no way reflecting the words' semantic development.

2. The addition of a statement (usually introductory) as to how far the words are equivalent in meaning. There was an approach to this in the work of Mrs. Piozzi, but it was hardly of the same character. Crabb's method was not only clearer and firmer but was much less subject to idiosyncrasies. Since this was his most enduring contribution, a few examples may be given to illustrate his method.

INGENUITY, WIT. . . . Both these terms imply acuteness of understanding, and differ mostly in the mode of displaying themselves. . . .

TO DISPARAGE, DETRACT, TRADUCE, DEPRECIATE, DEGRADE, DECRY. . . . The idea of lowering the value of an object is common to all these words, which differ in the circumstances and object of the action. . . .

DISCERNMENT, PENETRATION, DISCRIMINATION, JUDGMENT. . . . The first three of these terms do not express different powers, but different modes of the same power; namely the power of seeing intellectually, or exerting the intellectual sight. . . .

In clearness of statement, in pointedness, in "hitting the nail on the head" nearly all of these introductions leave something to be desired. Nevertheless, they are historically important because they represent the first tentative formulation of what has proved to be an important and essential part of the discriminated synonymy at its best.

3. In the arrangement of his word lists Crabb claims to have moved from the most comprehensive to the less comprehensive. In such articles as those discussing **form, ceremony, rite, observance**; and **short, brief, concise, succinct, summary** the principle is clear, but in others, such as those for **apparel, attire, array**; and **belief, credit, trust, faith**; and **execute, fulfill, perform**, the procedure is not perfectly clear. In general, however, he seems to have had a plan and to have stuck to it when he could.

There are other devices used by Crabb which in later and defter hands proved valuable, but these three are the ones on which he has exerted his powers and with which he had greatest success. That the success was not complete is not entirely his fault. The English language is not a symmetrical language: it was never intended to be prodded into shape by the pen of the lexicographer or of the synonymist. No method is uniformly successful: every method must achieve a degree of fluidity before it can be turned to use. What was eminently true in Crabb's case is still eminently true, but some writers of today have learned to bow to necessity, a lesson which many early synonymists could not learn easily or gracefully.

His book continued to be held in high regard for many decades. In fact, a centennial edition in honor of the first (1816) was published in 1917 in the United States. Its editors' names are not given, but it contains an eloquent introduction by John H. Finley, then commissioner of education in New York state, which ends with the sentence: "Long life to Crabb and to that for which his name is as a synonym!"

By this time—that is, particularly between the first edition of Crabb's work and the first edition of Whately's book—keen interest was being displayed in the use of synonyms in education. Several texts suitable for use in the schools were prepared. Not necessarily the best of these but the most thoughtful and suggestive was *English Synonymes Classified and Explained with Practical Exercises Designed for School and Private Tuition* by George F. Graham. The emphasis in the book is entirely upon discrimination. Since there is no attempt to supply as many synonyms as possible and every effort to make differences clear, two words only are given in each article. Although this has the effect of making the book seem purely pedagogical, it admits employment of a method of classification which would break down if more words were to be added. It is, therefore, only by courtesy that Graham's book can be called a synonymy.

The study of synonyms ought, according to Graham, to begin in the elementary schools. In the hope of

making this possible, he divides all pairs of synonyms into five classes marking the relationships of these words. He calls his classes *General and Specific*, *Active and Passive*, *Intensity*, *Positive and Negative*, and *Miscellaneous*. The classification is obviously not clean-cut and the classes are not necessarily mutually exclusive. As illustrations of *General and Specific* relationships he compares *answer* and *reply*, *bravery* and *courage*; as instances of *Active and Passive* relationships he discriminates *burden* and *load*, and *actual* and *real*; and as examples of *Intensity* in relationships he considers *agony* and *anguish*, and *intention* and *purpose*. It is needless to say that a rigid classification begets a rigid method of discrimination. Sometimes, it serves to bring out a real distinction between the words, but more often it serves to confuse them by bending them to suit a set purpose. It is the best example we have had so far of the futility of applying a rigid method to the direct study of anything so nonrigid and living as a language.

Crabb's supremacy as a synonymist seems not to have been seriously threatened by a slight book which appeared in 1851, won general praise, and has been listed in practically every bibliography since that time. This book, usually called "Whately's book on synonyms," has never, so far as we know, been properly esteemed for its own values, nor has its true author ever been adequately recognized. Credit for its authorship is often given to the famous logician Richard Whately (1787–1863), Anglican archbishop of Dublin; rightly, it belongs to his daughter, Elizabeth Jane Whately. A modern but undated edition (before 1928) from the Boston house of Lothrop, Lee, and Shepard confuses both details of title and authorship by calling it on the title page "English Synonyms Discriminated, by Richard Whately, D.D." It has two prefaces, one the editor's preface signed, in the characteristic fashion of Anglican bishops, "Richard Dublin"; the other the preface by the author, which is unsigned.

The editor's preface is very short and abstruse but pregnant with meaning. The archbishop took occasion to say that "this little work has been carefully revised by me, throughout" and that though "far from presuming to call it perfect, it is, I am confident, very much the best that has appeared on the subject." Some of its readers will acknowledge its value in the "cultivation of correctness and precision in our expressions." There will be those, however [we are paraphrasing, amplifying, and interpreting his very cryptic statements], who are so blinded by their adoption of "the metaphysical theory of *ideas*" that they will regard words as of little importance in themselves, and the ideas named as of great significance. There are others, such as himself, who regard words as "an indispensable instrument of thought, in all cases, where a process of *reasoning* takes place." Words are the symbols which men use in discourse. For the most part they do not name real things, for abstractions, such as the one called "beauty," or the generalized notion, such as the one called "tree," exist nowhere except in the mind and have not reality. Only in particular things can beauty be found: only particular objects which are classed together under the name "tree" exist. Therefore, if words are to serve as convenient instruments of discourse, they must often be regarded as signs not of real things but of notions of things and must have a fixed and generally accepted content. Otherwise human minds could never come together in discourse. Moreover, actual discourse is often futile because words are loosely or incorrectly used.

The preface by the author, though it avoids all references to philosophy, is in general based on the same premises. The author, as has been said, is the archbishop's daughter, and the proper title of the book is *A Selection of Synonyms*. To her, as well as to her father, words are, for the most part, the names for human ideas or concepts of things. There may be words which name approximately the same thing but which, because of differences in human points of view, are distinguishable by slight differences in meaning. Synonyms, or as she preferred to call them "pseudo-synonyms," have "sufficient resemblance of meaning to make them liable to be confounded together. And it is in the number and variety of these that. . . the richness of a language consists. To have two or more words with exactly the same sense, is no proof of copiousness, but simply an inconvenience." A language, in her estimation, should have no more words than it needs, just as a house should have no more chairs or tables than required for convenience.

Differences in meaning she found even in words which denote exactly the same object, act, process, quality, emotion, and the like. Such words often have different connotations. "*Swine's flesh*," she says, is prohibited by the Mosaic Law, for "it is plain that it presents to the mind a gross idea, which *pork* does not." Some words may denote the same thing but their different origins or their varying historical associations give them a distinct character which better fits one than the other for use in certain contexts. In polite phrases such as "May I take the liberty?" the Latin derivative *liberty* is more suitable than the Saxon *freedom*. A heathen or an atheist may be called *just* but not *righteous* because Biblical use of the latter word has narrowed its application. Much more acute is her observation that two words may name the same thing but differ because they regard that thing from opposite points of view. She instances *inference* and *proof*.

Whoever justly infers, proves; and whoever proves, infers; but the word 'inference' leads the mind from the premises which have been assumed, to the conclusion which follows from them: while the word 'proof' follows a reverse process, and leads the mind from the conclusion to the premises.

In a footnote she refers to Aristotle's admirable parallel between *anger* and *hatred*, but after summing up

his distinctions, she adds significantly:

His [Aristotle's] example. . .has not been followed in this work. . .because, though the two *passions* may often be confounded together, and mistaken one for the other, the two *words* are not liable to be mistaken; and it is with words that we have now to do.

There, one is forced to comment, is the lexicographer speaking and not the would-be philosopher who would use definition or discrimination of words as an instrument for the expression of his own ideas.

Here and there in her preface and in her synonymies, without evident plan or intention, Miss Whately advanced ideas which when brought together indicate a conception of the synonymist's function and equipment far beyond any yet presented. Not only was she, in effect if not by design, distinguishing lexicography from philosophy but she was defining and enriching the concept of the ideal synonymy and the ideal synonymist. And she did so by flying in the face of all Crabb's admirers and imitators.

Although she realized the importance per se of the "history of the *derivation* of words," she omitted etymologies "which are generally appended to every group of synonyms as an almost essential part of it." She questioned the value of "this procedure" because it tends "to confuse the subject it was intended to clear," for "in inquiring into the *actual* and *present* meaning of a word, the consideration of what it *originally* meant may frequently tend to lead us astray." Nevertheless, she made good use of her knowledge of etymology when it helped in the discrimination of words.

'Contentment' may be classed among those words in the English language which adhere strictly to their etymology. Its root was undoubtedly the verb 'to contain,' and the substantive and its adjective have not departed from this meaning. A *contented* person does not indulge in fruitless wishes for what is beyond his reach; his desires are limited by what he possesses.

'Satisfaction' implies more: this word has likewise retained the signification of its root, and means that we have obtained all we want; not that our desires are *limited*, but that they have been *gratified*. A poor and needy man may be '*contented*,' but he cannot feel '*satisfaction*' with his condition.

Her illustrations are many and reveal wide reading, a broad linguistic background, and a deep interest in developments of meaning, in differences in meaning between words of the same origin in different languages (e.g., between the English *defend* and the French *défendre* which means not only to defend but also to forbid), and in English words which have "corresponding origins" yet are "widely different in their significations," such as *substance* (printed as *substantia* in her book), *understanding*, and *hypostasis*. She was interested also in the notions which gave names to things, as " 'Heaven' . . .conveyed with it the idea of something *heaved* or *lifted up*. . . 'Coelum' . . .referred to something hollowed out or vaulted."

All these variations of meaning. . .are valuable and curious; but though they may occasionally help us, they must not be allowed to influence our decisions with respect to the significations of words. Our question is, not what *ought* to be, or formerly was, the meaning of a word, but what it *now* is; nor can we be completely guided by quotations from Shakespeare or Milton, or even from Addison or Johnson. Language has undergone such changes, even within the last sixty or seventy years, that many words at that time considered pure, are now obsolete; while others. . .formerly slang, are now used by our best writers. . .The standard we shall refer to in the present work, is the sense in which a word is used by the purest writers and most correct speakers of our own days.

Although Miss Whately cannot be said to be the first to discriminate meanings of synonyms, she was, so far as we know, the first in England to make that the avowed aim of a book of synonyms and to realize clearly the distinction between the meaning of a word and the thing or idea for which it stood.

Unfortunately, Miss Whately was not so successful in finding a method of synonymizing as she was in expounding its principles. She had, in theory, thrown off the yoke of Crabb, but in practice she occasionally submitted to it. Nor had she, any more than Crabb, been able to discard completely or to transform to her own use what has been called the Piozzi method of illustration. Some of the difficulty arises from her use of other writers and from the reviser (her father) who, though sympathetic in principle, did not always agree with the exposition in detail and made many heavy-handed changes. But these sources of difficulty are superficial: the real but unassignable reason probably has its roots in something that lies in temper and lack of experience. Yet, in spite of everything, she made several significant advances not only in the theory but in the art of synonymizing. Summed up, they are:

1. The principle that knowledge of meanings and all the background that such knowledge implies (derivations, historical development of senses, usage of purest writers and speakers, especially of one's own period, the associations that affect connotations, etc.) are indispensable elements of the synonymist's equipment, to be used or discarded as the occasion warrants.

2. The principle that the synonymist goes beyond the definer, in a difference of purpose. It is the function of the one who would define a word to estimate truly the meanings men have agreed should be given to it: it is the function of the synonymist to point out the differences between words with meanings so nearly alike

that he not only gives help in their correct use but promotes precision of expression so necessary to the thinker and writer.

3. A clearer conception of the ways in which synonyms differ:

(a) Because of differences in implications.

“Both *obstinacy* and *stubbornness* imply an excessive and vicious perseverance in pursuing our own judgment in opposition to that of others; but to be *obstinate* implies the doing what we ourselves chose. To be *stubborn* denotes rather, not to do what others advise or desire.” (Quoted from Sir James Mackintosh.)

A *trifling* matter is one merely of small importance: a *trivial* matter is a small matter made too much of. The word ‘trivial’ implies contempt, which ‘trifling’ does not. By saying, ‘He never neglects a *trifling* matter,’ we are rather supposed to praise; but in blaming a person for frivolity, we often say, ‘He is always engrossed with *trivial* concerns.’

(b) Because of differences in applications.

“*Obstinacy* is generally applied to the superior; *stubbornness* to the inferior. . . *Obstinacy* refers more to outward acts, and *stubbornness* to disposition.” (Quoted from Sir James Mackintosh.)

Strictly speaking, ‘*expense*’ should be applied to the purchaser, and ‘*cost*’ to the thing purchased. . . Many persons are tempted to buy articles. . . because they are not *costly*, forgetting that. . . these purchases may still be too *expensive*.

‘*Delightful*’ is applied both to the pleasures of the mind and those of the senses: ‘*delicious*’ only to those of the senses. An excursion, a social circle, a place of abode, may be ‘*delightful*’; a perfume, or a fruit, ‘*delicious*.’

(c) Because of differences in extension, or range of meaning.

‘*Timid*’ is applied both to the state of mind. . . in which a person may happen to be at the moment, and to the habitual disposition; ‘*timorous*,’ only to the disposition. ‘*Timid*’ is therefore, the more extensive term, and comprehends the meanings of ‘*timorous*.’ . . .

TO UNDERSTAND, TO COMPREHEND. The former of these verbs is used in a much more extended sense than the latter. Whatever we *comprehend*, we *understand*; but ‘*to understand*’ is used on many occasions in which *comprehend* would be inadmissible. . . . It would be quite correct to say, ‘I did not *comprehend* his exposition, or his arguments, although I *understood* the language, and the grammatical import of each sentence.’

(d) Because of differences in association or origin and, therefore, in connotations.

FATHERLY, PATERNAL; MOTHERLY, MATERNAL. . . are formed from corresponding roots in Latin and Saxon. . . the Latin word being the more polite and cold, the Saxon the more hearty and cordial. . . . We speak of ‘a *paternal* government’—‘*maternal* duties’; but of ‘a *fatherly* kindness of manner’—‘a *motherly* tenderness.’

RIGHTEOUS, JUST. . . a Saxon and a Latin term, whose roots exactly correspond in meaning; but they have even more curiously diverged than many other pairs of words. ‘*Righteous*’ is now exclusively applied to rectitude of conduct drawn from *religious* principle, while ‘*just*’ is simply used for moral uprightness. A heathen or atheist may be called *just*, but not *righteous*.

(e) Because of the difference in the point of view from which the same thing is regarded.

‘*Anger*’ is more correctly applied to the inward feeling: ‘*wrath*’ to the outward manifestation. . . . We should not speak of the ‘*anger*,’ but of the ‘*wrath*’ of the elements. We therefore speak of ‘the *wrath* of God,’ more correctly than of his *anger*. We cannot attribute to Him passions like those of men: we can only describe the external effects which in man would be produced by those passions.

In 1852, the year after Whately’s *Selection of Synonyms* was published, appeared the first edition of the *Thesaurus of English Words and Phrases*, by Peter Mark Roget (1779–1869), a book that was to exert very great influence on the development of interest in synonyms and to provoke a new interest in opposite or contrasted terms. The modern consultant of the *Thesaurus*, accustomed to depend on the elaborate index (provided in 1879 by the compiler’s son John L. Roget), has little knowledge of the original plan of the book, though it has in no way been disturbed by revisers of the Roget family. But this plan is obviously hard to use and few consultants of the *Thesaurus*, if any, now avail themselves of it. It depends upon a classification of all words into six main categories, those dealing with Abstract Relations, Space, Matter, Intellect, Volition, and Affections, each of which is divided into smaller and appropriate subdivisions until an appropriate heading, such as *Interpretation* or *Lending*, gives the clue for the left-hand column of nouns, verbs, adjectives, and adverbs gathered under it and an appropriate heading, such as *Misinterpretation* or *Borrowing*, gives the clue for the right-hand column of nouns, verbs, adjectives, and adverbs that are theoretically opposed or in contrast. But Roget did not call these word lists *Synonyms* and *Antonyms* (the latter word indeed had not yet been coined): his usual name was “Analogous Words” for those in the left-hand column and “Correlative Words” for those in the right-hand column. Despite this, other revisers than those of the Roget family have consistently misinterpreted this volume as a book of synonyms and antonyms and have rearranged it or alphabetized it in the hope of making this clear.

It is, therefore, merely because of its historical connections with the treatment of synonyms and antonyms that this book is of immediate significance to us. Only when it is clear that the book purports to be a supplier of words—technically, a “word finder”—and nothing else, are we able to estimate correctly the heresy that has arisen out of its misunderstanding. To reach this end we must know very clearly just what Roget tried to accomplish by this book and just what he ruled out as extraneous to his purpose.

As early as 1805 Roget realized that what he needed for his own writing was a classified list of words in which he might find not only the right words to express his ideas but words that would help him in clarifying or formulating confused or vague ideas. He found the lists he made so useful to himself that he came to believe that they would prove, if amplified, of great value to others. For nearly fifty years he had this project in mind, but only at the age of seventy, after his retirement in 1849 from his position as secretary of the Royal Society of London for the Advancement of Science, was he able to realize it.

He held from the start that what was needed was not a dictionary of synonyms. Roget had in mind a consultant who not only did not know a near word but could not even recall a word somewhat similar in meaning to the word desired or only vaguely apprehended an idea because of the want of the right word or words to help him in formulating it. For example, a geologist who has found a rock, probably hitherto undiscovered, because it fitted into no known classification might be at a loss for the exact terms to describe its peculiar texture. Such a person could hope to find in the section headed “Matter” the concrete adjective he needed (such as *fissile*, *friable*, *splintery*). No word, no phrase, was too narrow in its meaning to serve Roget’s purpose, or too archaic, or too slangy, or too erudite. Whether one was writing a technical treatise or a witty essay, a historical novel or a definition for a dictionary, one might hope to discover in this *Thesaurus* the expressions “which are best suited to his purpose, and which might not have occurred to him without such assistance.” For words, “like ‘spirits from the vasty deep’ . . . come not when we call”; “appropriate terms, notwithstanding our utmost efforts, cannot be conjured up at will.”

More than this, Roget did not call the words he selected *synonyms*, when they were of the same part of speech and belonged in the same column. That he understood “synonyms” as denoting words of equivalent meaning is evident in his reference to the discrimination of “apparently synonymous” terms. There can be no question that he thought word-finding lists of synonyms and of “apparently synonymous” terms would be too meager to suit the purposes he had in mind.

As for the discrimination of synonyms, that was entirely foreign to the purpose of his book. He was very explicit about that:

The investigation of the distinctions to be drawn between words apparently synonymous, forms a separate branch of inquiry, which I have not presumed here to enter upon; for the subject has already occupied the attention of much abler critics than myself, and its complete exhaustion would require the devotion of a whole life. The purpose of this Work, it must be borne in mind, is not to explain the signification of words, but simply to classify and arrange them according to the sense in which they are now used, and which I presume to be already known to the reader. I enter into no inquiry into the changes of meaning they may have undergone in the course of time. I am content to accept them at the value of their present currency, and have no concern with their etymologies, or with the history of their transformations; far less do I venture to thrid [thread] the mazes of the vast labyrinth into which I should be led by any attempt at a general discrimination of synonyms.

It is also important to notice that Roget believed himself without a precursor “in any language.” He may have known Perry and many others who worked in the word-finding field before 1852: like other cultivated men he probably knew Crabb and others working on the discrimination of synonyms; but he always thought of himself as doing something quite distinct from both. In fact, he gave his successors many reasons for refusing to believe that his two series of word-supplying lists were synonyms or antonyms or were capable of discrimination as synonyms or of opposition as antonyms.

Despite that, his purpose was misunderstood and his book misinterpreted. In 1867 appeared a small book called *A Complete Collection of Synonyms and Antonyms*, by the Rev. Charles J. Smith, which gave evidence that here and there men were quietly substituting their judgment of Roget’s work for his own. It is true that there is only one sentence in the preface of Smith’s book to support this inference, and that concerns the reason why its author has chosen the dictionary method of presenting his material, “from finding that the abstract classifications of words, under certain broad ideas, according to the plan of Dr. Roget, seems invalidated by the necessity, in his well-known *Thesaurus*, of numberless cross-divisions, and is practically disregarded in favor of the Alphabetical Index.” Yet, brief as is that statement, it reveals that he thought his work and Roget’s had a common purpose—to give synonyms and their opposites or, to use the word which he now coined, their “antonyms”—and that the difference between the two books was merely a matter of method.

There is no evidence that Smith realized that he was changing the time-honored definition of *synonym*. His chief object in phrasing his definition of *synonym* was to set that term in opposition to *antonym*, which he regarded as its antithesis. Nevertheless, in so doing, he introduced a subtle and important change in the

definition. His statement reads as follows:

Words which agree in expressing one or more characteristic ideas in common [with the entry word] he [i.e., Smith himself] has regarded as Synonyms, those which negative one or more such ideas he has called Antonyms.

The inference that he changed the traditional definition of *synonym* is supported not only by this statement but also by his method of selecting synonyms. One example must suffice:

ACCELERATE, *v.t.* *Ad* and *celer*, quick. To quicken the speed or process of events, objects, or transactions.

SYN. Quicken. Hasten. Urge. Speed. Expedite. Promote. Despatch. Facilitate.

ANT. Delay. Obstruct. Impede. Retard. Clog. Hinder. Drag. Shackle.

The important thing to notice about these lists is not their parallelism, nor even how good or bad the synonyms or antonyms are, but their selection according to a new principle. The synonyms are not all closely allied words differing only in minor ways or words which are essentially alike in meaning, but some, such as *urge* and *promote*, are words which come together only in some part of their meaning and that not necessarily their essential meaning. Nor are the antonyms necessarily opposed to the essential meaning of *accelerate*. It is quite possible that neither Smith nor anyone else at the time fully realized what a radical change in definition he had made. In his *Synonyms Discriminated*, the work with which four years later (1871) he followed his *Synonyms and Antonyms*, he adhered to the orthodox definition of *synonym*. The later work proved the more popular, and it is probable that the inconspicuousness of *Synonyms and Antonyms* helped to obscure its definition of *synonym*, buried as it was in the preface.

Moreover, in the same year as *Synonyms Discriminated* appeared another book of indiscriminated synonyms, Richard Soule's *A Dictionary of English Synonymes and Synonymous or Parallel Expressions* (1871), which attracted far more attention than had Smith's *Synonyms and Antonyms*. New editions appeared in rapid succession, and it was revised in 1891 by Professor George H. Howison and in 1937 by Professor Alfred D. Sheffield.

Although Soule acknowledged help from Roget's *Thesaurus* and a number of other works such as the dictionaries of Webster and Worcester and the books by Crabb, Whately, and others discriminating synonyms, he claims in no particular instance to have followed them strictly or to have been influenced by them in any way. If we judge from the words of Professor Howison, who, nearly twenty years after the first edition, undertook revision at the request of Soule's family, he "found little more to do than to carry out to a greater completeness the lines of Mr. Soule's original design." That Soule's original design was clear and definite and that he saw himself as doing something quite different from Roget, on the one hand, and from Crabb and Whately, on the other, is obvious from what Professor Howison has further to say:

A perfect manual of that sort is impossible within the compass of a single work of convenient size and arrangement. . . . A work on Synonymes may thus have for its purpose either an alphabetic list of all the more important words in the language, with their various meanings or shades of meaning set down under them, each followed by its appropriate synonymes; or a list of general notions, duly named and properly divided and subdivided, with the words and phrases that belong to the expression of each collected under them as fully as possible; or, again, the collocation of words allied in meaning with subjoined disquisitions on the shades of difference between them. The latter conception has been the prevailing one among English makers of synonymic dictionaries, and is represented by the well-known work of Crabb, as well as by any; the second is that of Roget's *Thesaurus*; while the first is that of Soule.

Consequently, we are not surprised to find that Soule's definition of *synonym* approaches the orthodox one. True, he gives us no detailed definition, but he does say enough to show that he does not mistake the relation between words of the same part of speech in the left-hand or the right-hand column of Roget (he is obviously not interested in their cross relation), and he does not show any knowledge—much less any interest—in Smith's definition of a synonym as a word which agrees in expressing one or more characteristic ideas in common with a given word. A synonym, he says, has "the same meaning as" the entry word under which it is listed "or a meaning very nearly the same." Within limits his lists of synonyms are about as good as is possible when they are not submitted to the test of discrimination.

Even though Soule's *Dictionary of Synonyms* has been the model for a great many works issued in imitation of it, some claiming to have improved upon it, it still remains, in both its original and its revised forms, the best dictionary of synonyms that does not provide discriminations. Like Roget's work, within its own limits it has not yet been bettered.

But beyond those limits, both in the realm of books providing discriminating synonymies and in the realm of books providing synonyms and antonyms without discriminations, there has arisen a state of affairs which makes us believe that we are at a point where a stand must be taken if we are to avert chaos in the field.

In the forefront of this battle are the American general dictionaries and certain manuals written by men who have been at one time or another members of their staffs.

The general dictionaries have so far been omitted from this survey. Not that they were inactive—for, almost from the start, they were not. A few ventures were merely tentative, such as that in James Barclay's *Complete and Universal Dictionary* issued in England in 1774. This work Chauncey Goodrich (in his preface to Webster's *A Pronouncing and Defining Dictionary*, 1856, an abridgment of the 1828 Webster) notices with the observation that discriminations of "synonymous words" were "first introduced into a general dictionary by Barclay, though in a very imperfect manner." Goodrich also calls attention to the fact that Noah Webster had often successfully used the method of discrimination as part of his definitions. But these attempts do not merit the honor of being the first discriminating synonymies in the general dictionary. No one in fact laid serious claim to their introduction before Joseph Worcester who, in 1855, issued his *Pronouncing, Explanatory, and Synonymous Dictionary*. The slight foundation for the claim is evident from the following typical examples:

DEFEND. . . .Syn.—*Defend* the innocent; *protect* the weak; *vindicate* those who are unjustly accused; *repel* aggression.

FIGURE. . . .Syn.—A fine *figure*; regular *shape*; circular *form*; a carved *statue*; a graven *image*.—A *metaphor* is a *figure* of speech; a lamb is an *emblem* of innocence; the paschal lamb was a *type* of Christ.

One year later (1856) William G. Webster and Chauncey A. Goodrich, the son and son-in-law of Noah Webster, brought out abridged editions of his *American Dictionary* for school, business, and family use. Short discriminating synonymies were introduced, all of them written by Chauncey Goodrich. A few typical illustrations will indicate how much better a title he had than had Worcester to the claim of having introduced such synonymies into a dictionary:

Things are *adjacent* when they lie near to each other without touching, as *adjacent* fields; *adjoining* when they meet or join at some point, as *adjoining* farms; *contiguous* when they are brought more continuously in contact, as *contiguous* buildings.

Liveliness is an habitual feeling of life and interest; *gayety* refers more to a temporary excitement of the animal spirits; *animation* implies a warmth of emotion and a corresponding vividness of expressing it; *vivacity* is a feeling between liveliness and animation, having the permanency of the one, and, to some extent, the warmth of the other.

The first serious attempt in a general dictionary at discriminating synonymies on a par with those published by Piozzi, Crabb, Whately, and others, came in 1859 with the publication by G. & C. Merriam Co. of a "provisional edition"⁴ of Webster as a preparation for the first complete revision (issued in 1864) of the *American Dictionary*. These also were written by Chauncey A. Goodrich (1790–1860), whose articles in the smaller dictionaries of 1856 had been, according to the publishers' preface of 1859, "so highly appreciated by distinguished scholars" that they had prevailed upon him in his capacity as editor of the 1859 edition to add a treatment of synonyms to this book. For some years Goodrich had been engaged on "a distinct work on this subject" and it was the material gathered for this project that was developed and presented in the table of synonyms as part of the "front matter" of the 1859 edition.

These synonymies, with slight changes in phrasing and many additions, served for the two ensuing complete revisions of Merriam-Webster dictionaries, *Webster's Unabridged Dictionary* of 1864 and *Webster's International Dictionary* of 1890, both under the editorship of Noah Porter. In these books the articles on synonymy, instead of being grouped in the front matter, were distributed through the main vocabulary.

In the publishers' statement in the 1859 edition of the *American Dictionary*, note was made of the great advance in Goodrich's synonymies over those of preceding writers:

This is only an application on a broad scale of one mode adopted by Dr. Webster, for giving clearness and precision to his definitions. It is also peculiarly appropriate in a work like this, which aims at great exactness as a defining dictionary; since it affords an opportunity of giving in connection with the leading terms of our language, those nicer discriminations and shades of thought which it is impossible to reach in the way of ordinary definitions. . . .Unless the distinctive meaning of the several words is previously given, little or no aid is afforded as to their proper use and application, by adducing such passages. This will be seen by turning to such a work as *Platt's Dictionary of English Synonyms*,⁵ which is framed chiefly upon this plan. On the first page, we find under the words *abandon*, *desert*, *leave* &c., such examples as these: "Men are *abandoned* by their friends; we *desert* a post or station; *leave* the country," &c. But these words may be

⁴ As stated in the preface to *Webster's Unabridged Dictionary* (1864).

⁵ A small work for use in schools, published 1825.

equally well interchanged. Men may be *deserted* by their friends; we may *abandon* a post or station, &c. Such examples, therefore, afford no light or guidance as to the proper use of these words. So, if the phrase be given "the officer abandoned his post," the question may arise whether he really *abandoned*, or *deserted*, or *surrendered*, or *left* it. He may have *abandoned* it on the approach of an enemy, or as no longer important to maintain; he may have *deserted* it unworthily or treacherously; he may have *surrendered* it to a superior force; he may have *left* it temporarily.

The criticism clearly shows that the chief defect of the current discriminating synonymy was a defect in method: it was not a defect in the definition of *synonym* or in the selection of synonyms. But in the thirty years following there were signs that Perry's vague conceptions of a synonym, and Smith's freer definition were beginning to enter the minds of synonymists. Neither Perry nor Smith was largely responsible for this change in definition. Roget, because of the enormous popularity of his work, or rather those who misinterpreted Roget's aim, must be considered as originating the trend and be blamed for it. By 1889 the first evidence of its more general acceptance had made its appearance.

In that year was published the first edition of the *Century Dictionary*, and in 1894 followed Funk and Wagnalls' *Standard Dictionary*. Both were new ventures in dictionary making and had the advantage of being in the limelight. Both followed the initiative of the Merriam-Webster dictionaries and introduced discriminating synonymies as an essential part of their contribution. But neither followed Webster in its adhesion to the traditional definition of *synonym*.

Although the *Century Dictionary* attempted many new things in the way of dictionary making, such as an encyclopedic character and a format of several volumes, it placed little stress on its treatment of synonyms. The writer of these articles, Henry Mitchell Whitney, was the brother of the editor in chief, William Dwight Whitney (1827-1894): his work was given only a four-line notice in the editorial preface:

Discussions of synonyms treating of about 7000 words. . . will be found convenient as bringing together statements made in the definitions in various parts of the dictionary, and also as touching in a free way upon many literary aspects of words.

It was probably because of the division of the *Century Dictionary* into several volumes that its editors could entertain the idea that the function of a discriminating synonymy is to assemble definitions of comparable terms from various parts of the dictionary, but such a function, because of its accidental character, has no inherent value. As a matter of fact, the synonymist of the *Century* often depended on cross reference to definitions for support or amplification of his statements and, therefore, invalidated the description (quoted above) by William Dwight Whitney in the editorial preface. Nor do his synonymies "touch in a free way upon many literary aspects of words." In the first place, it is not quite clear what is meant by that statement, and, in the second, there is no consistent proof of anything like it in the articles themselves. As a general rule, with the possible exception of Whately, synonymists had not yet felt strongly any difference between the literary and colloquial use of words.

There is not only the lack of a clearly defined policy in the preface, but there is also the lack of one in the synonymies themselves. Yet Henry M. Whitney seems to have had in him the makings of a good synonymist but to have been suffering from conditions over which he had no control. It may be that his job was too big for one man or for the time set for its completion and that he had little leisure to think through its problems: it may be that what he considered a good synonymy was not in accord with the opinion of the editor in chief. At any rate, his synonymies vary greatly in method, aim, and accomplishment. The most that can be said is that he was experimenting with different methods and aims and that he never reached definite conclusions as to the superiority of one over the other.

The most vital problem which concerned him was the selection of synonyms. Sometimes he provides a very limited selection, as at the noun **adept**, where he gives only *expert*, leaving out such words as *master*, *proficient*, and *specialist*, which might well have been treated as synonyms. In other places he gives a much longer and more heterogeneous list, as at **ample**: *ample*, *copious*, *plenteous*, spacious, roomy, extensive, extended, wide, capacious, abundant, sufficient, full, enough, unrestricted, plenary, unstinted. Only the italicized words are discriminated, it is true, but the others are given as synonyms. The average reader may doubt the justification of many of these words as synonyms, though he will readily find a relationship in meaning.

There was good reason for H. M. Whitney's uncertainty, in that around the eighteen-seventies and eighties synonymists were confronted with a problem that had not particularly concerned their predecessors. The demand then was not only for discriminating synonymies but for word-finding lists more or less in the manner of Roget and Soule. Crabb's work was still influential, but was not satisfying those who wanted more words synonymized and more synonyms for each word. Roget was immensely popular but extremely difficult to use, not only because of his classificatory method but because he supplied no definitions. In 1879 a "new and elaborate Index, much more complete than that which was appended to the previous editions" had been

added by Roget's son, in the belief that "almost every one who uses the book finds it more convenient to have recourse to the Index first." In this way the major difficulty, the classificatory system which the elder Roget had pertinaciously believed in, became no longer an obstacle. The other difficulty, the lack of discrimination, was not touched and, in view of Roget's primary purpose, was not likely to be.

As a result there followed an attempt to provide synonymies which would combine the virtues and value of the discriminating synonymies and yet would deal with word lists that approached in number and variety those of Roget. Henry M. Whitney more or less played with the problem, but James C. Fernald (1838–1918), the editor of synonymies for Funk and Wagnalls' *Standard Dictionary* (1894) and author of a manual, *English Synonyms and Antonyms* (1896), attacked it with vigor and offered what seemed to him a solution.

Fernald and the editors of the *Standard Dictionary* set out to increase markedly the number of synonyms and antonyms at each entry. Hitherto, from two to eight words represented the norm in each of these lists: in the *Standard Dictionary* the average number lies between ten and twenty. First of all, they believed that they were justified in extending the definition of *synonym* to include both words of identical or closely allied meaning (the time-honored definition) and words which agree in some part of their meaning. The definition of *synonym* in the 1894 edition of the *Standard Dictionary* (slightly changed in later editions) reads:

A word having the same or almost the same meaning as some other; oftener, one of a number of words that have one or more meanings in common, but that differ either in the range of application of those meanings or in having other senses not held in common; opposed to antonym. . . . Words of this class may often be used interchangeably, but discrimination in their choice is one of the most important characteristics of a good writer.

The discriminating synonymy given at the entry of *synonymous* in the main vocabulary reads:

Synonyms: alike, correspondent, corresponding, equivalent, identical, interchangeable, like, same, similar, synonymic. In the strictest sense, *synonymous* words scarcely exist; rarely, if ever, are any two words in any language *equivalent* or *identical* in meaning; where a difference in meaning can not easily be shown, a difference in usage commonly exists, so that the words are not *interchangeable*. By *synonymous* words we usually understand words that coincide or nearly coincide in some part of their meaning, and may hence within certain limits be used interchangeably, while outside of those limits they may differ very greatly in meaning and use. It is the office of a work on synonyms to point out these correspondences and differences, that language may have the flexibility that comes from freedom of selection within the common limits, with the perspicuity and precision that result from exact choice of the fittest word to express each shade of meaning outside of the common limits. To consider *synonymous* words *identical* is fatal to accuracy; to forget that they are *similar*, to some extent *equivalent*, and sometimes *interchangeable*, is destructive of freedom and variety.

It is possible that definition and synonymy were designed to avoid provoking criticism from those who adhered to the commonly accepted definition of *synonym* yet at the same time to extend the sense to accord with what was believed to be Roget's practice and to satisfy the demands of those who urged more words. It may be granted that this is a legitimate practice, provided it does not force the issue, but represents a genuine change in conception among a large or even a small class of those who use the term *synonym*. That the growing demand was for more synonyms cannot be questioned but that a change in the conception of *synonym* had occurred, from the one that had been in vogue since Crabb's time, may justly be disputed. At any rate, let us see how it affected the *Standard Dictionary's* choice of synonyms. Two lists will illustrate its practice:

ADEQUATE able, adapted, capable, commensurate, competent, equal, fit, fitted, fitting, qualified, satisfactory, sufficient, suitable.

HARMONY accord, accordance, agreement, amity, concord, concurrence, conformity, congruity, consent, consistency, consonance, symmetry, unanimity, uniformity, union, unison, unity.

The *Standard Dictionary's* definition justifies the selection of such lists of "synonyms." Each is a word which has one or more meanings in common with the introductory word (*adequate* or *harmony*). But if *adequate* means exactly commensurate with the requirements, only *sufficient* and *competent* (in one of its senses) with the addition of *enough* approach it in content. A person may be *adequate* if he is *able*, *capable*, *competent* (in another sense), or *qualified*; a person or thing may be *adequate* if he or it is *adapted*, *fitted*, or *suitable*; a thing may be *adequate* if it is equal to the requirement by being *fit* or *satisfactory*: but in all these cases, he or it may also be more than *adequate* or less than *adequate*, in some way, or the question of adequacy may never arise. *Harmony* in its musical sense may be related to *accord*, *concord*, *consonance*, in its aesthetic sense to *symmetry* and other terms not in this list; but what relation there is between it and *amity*, *uniformity*, *unanimity*, *agreement*, *concurrence*, *congruity*, etc., except as a cause or result or concomitant, needs to be proved. A word-finding list may consist of terms which, by agreeing in some implications and connotations, overlap, for those lists serve their purpose in helping the user to locate his word. But when

the object is discrimination, only those words serve the purpose whose basic likeness can be proved by showing that they have a common denotation as well as not readily discerned differences.

It is true that Fernald found no difficulty here. His clearest expression of the method of discrimination is found in the preface to his *English Synonyms, Antonyms, and Prepositions*:

The great source of vagueness, error, and perplexity in many discussions of synonyms is, that the writer merely associates stray ideas loosely connected with the different words, sliding from synonym to synonym with no definite point of departure or return, so that a smooth and at first sight pleasing statement really gives the mind no definite resting-place and no sure conclusion. A true discussion of synonyms is definition by comparison, and for this there must be something definite with which to compare. When the standard is settled, approximation or differentiation can be determined with clearness and certainty.

What type of synonymy Fernald was criticizing is not clear. It was probably what may be called "the chain-formula type." When a synonymist had made so poor a selection of synonyms that there could be no common ground and his list presented an array of associated rather than synonymous terms, he often fell into the habit of giving a series of definitions with a factitious relation. A repetition of a previous word was usually enough to make a connection. This was the defect of certain synonymies into which all writers of articles, good as well as bad, fell at one time or another and is probably the type to which Fernald referred when he described the "easy sliding from synonym to synonym." Yet it is not always bad: when one word carries a general meaning which serves as a substitute for the common denotation, it is possible to use it with good effect. A short example from *The New Century Dictionary* (1927) must suffice for the good use:

BANTER is good-humored jesting. . . .RAILLERY is often sharp, sarcastic banter; PLEASANTRY, delicate and pleasant banter; BADINAGE, diverting and purposeless banter; PERSIFLAGE, light, frivolous, or flippant banter.

With lists such as Fernald's own it would be impossible to avoid this formula, unchanged. It was necessary for him to find some way of varying "the chain formula" so that he could secure the desired qualities, "unity of the group" and "some point of departure and return." Therefore, he devised the method whereby one word would be selected as the key word and all the other words should be compared or contrasted with it. A good example is afforded by his article at *money*:

MONEY. SYN.: bills, bullion, capital, cash, coin, currency, funds, gold, notes, property, silver, specie. *Money* is the authorized medium of exchange; coined *money* is called *coin* or *specie*. What are termed in England bank-notes are in the United States commonly called *bills*; as, five-dollar *bill*. The *notes* of responsible men are readily transferable in commercial circles, but they are not *money*; as, the stock was sold for \$500 in *money* and the balance in merchantable paper. *Cash* is *specie* or *money* in hand, or paid in hand; as, the *cash* account; the *cash* price. In the legal sense, *property* is not *money*, and *money* is not *property*; for *property* is that which has inherent value, while *money*, as such, has but representative value, and may or may not have intrinsic value. *Bullion* is either *gold* or *silver* uncoined, or the coined metal considered without reference to its coinage, but simply as merchandise, when its value as *bullion* may be very different from its value as *money*. The word *capital* is used chiefly of accumulated *property* or *money* invested in productive enterprises or available for such investment. Compare PROPERTY; WEALTH.

Nothing could be clearer than that these words are not synonyms in the generally accepted sense. They include names of kinds of money (coin, specie, bills), names of material used for money or, in figurative language, meaning money or wealth (gold, silver), and words denoting things that have some intimate association with money (bullion, property, capital). The article keeps more or less consistently before the reader the relation of these to the key word *money*. The reader is bound to see and understand the distinctions and carry away a unified impression. There can be no quarrel with such articles on the ground of their not giving useful information. It may even be argued that a discrimination of terms that coincide in some part of their meaning may be in itself a valuable thing. But neither justification touches the issue raised by the Fernald synonymies. The ground of valid objection to them is that they offer *as synonyms* many words which even by the loosest of definitions cannot be accepted as such. The point of absurdity is reached at *spontaneous*, where the key word is so important that *voluntary* and *involuntary*, *free* and *instinctive*, *automatic* and *impulsive* are included.

By 1909, the date of publication of the next complete revision of the Merriam-Webster® dictionaries (the first edition of *Webster's New International Dictionary*), there had been time for consideration of these matters and for a more sober judgment. The Goodrich synonymies clearly needed revision on account of the growth of the language and, partly, because the synonym lists could be enriched. The work was entrusted to John Livingston Lowes (1867–1945); then at Washington University, St. Louis, but later at Harvard University) under the advisory supervision of George Lyman Kittredge (1860–1941) of Harvard. They were to deal only with general senses, but a few technical articles written by specialists were to be submitted to them, so as to insure uniformity in manner and method. The articles thus prepared were included in

Webster's New International Dictionary and reprinted, with minor changes, in *Webster's New International Dictionary, Second Edition* (1934).

Certain points of agreement were established by Lowes and Kittredge early in the course of their partnership. Very early in the writing of these articles Lowes called Kittredge's attention to the Fernald list at *adequate* and the *Century* list, *adequate, sufficient, enough*. "Is not the *Century's* list adequate?" he wrote. "I did not notice the test my question affords, but none of the other words in the *Standard's* list can be substituted for 'adequate.' Are they not better distributed among other articles? The longer I study the material, the more strongly I feel that more articles, each discriminating fewer words, are advisable. The longer articles are, as a matter of fact, confusing, and seem to have led often to strained attempts to find a single common factor for words which fall more naturally into several groups." Kittredge agreed fully.⁶ Thus, the Webster tradition of discriminating synonyms that are synonyms in the accepted sense was followed. Looser synonyms or closely related words were still given in the word-finding lists, and these also were revised by Lowes, whose interests, however, were concentrated on the articles discriminating synonyms.

By temperament and training Professor Lowes was especially fitted for the task assigned him. He excels all his predecessors in philosophic grasp and powers of analysis, yet he never confuses synonymizing with philosophizing or moralizing; he outstrips them all in the range of his knowledge of literature and of his contacts with language as the medium of expressing ideas and emotions; great scholar though he was, his work is utterly free of the pedantry, dogmatism, and heaviness that so often mar the work of lesser men. Though not a lexicographer by training or experience, he almost perfectly adapted the art of synonymizing to the methods of lexicography, so that whatever can contribute in either to the advantage of the other was brought out in his articles.

It is in the clarification of the differences between terms that are to a large extent equivalent in denotation that Lowes made the greatest advances in the art of synonymizing. Practically every synonymist before him had inklings of the kinds of differences that he saw clearly; many of them, such as Miss Whately, had used the language adopted by him, but no one so fully realized its possibilities. Rambling, persistent missing of the real differences and constant confusion of the content of the word itself with the concept for which that word stood were characteristic and prevalent faults of many earlier writers of synonymies. With Lowes, direct attack at each problem became possible and, with it, swift, sure shafts that rarely fail to make the desired cleavage.

It may be said that as a rule he was careful in his synonymies to state the ground of agreement; but sometimes he neglected to do so when the likeness was obvious. But in regard to differences he was extremely particular and rarely departed from the aim he held before him. His most frequently used method may be illustrated by an excerpt from the article at *foretell* in *Webster's New International Dictionary* (1909):

FORETELL (*Saxon*) and PREDICT (*Latin*) are frequently interchangeable; but PREDICT is now commonly used when inference from facts (rather than occult processes) is involved; as, "Some sorcerer. . . had *foretold*, dying, that none of all our blood should know the shadow from the substance" (*Tennyson*); "Mr. Brooke's conclusions were as difficult to *predict* as the weather" (*G. Eliot*); an astronomer *predicts* the return of a comet. PROPHECY connotes inspired or mysterious knowledge, or great assurance of prediction; as, "ancestral voices *prophesying* war" (*Coleridge*); "Wrinkled benchers often talked of him approvingly, and *prophesied* his rise" (*Tennyson*). FORECAST connotes conjecture rather than inference; PRESAGE implies shrewd forecast, sometimes presentiment or warning; as, "Who shall so *forecast* the years?" (*Tennyson*); "I *presage*, unless the country make an alarm, the cause is lost" (*Scott*). . . . FOREBODE . . . implies obscure prescience or premonition (esp. of evil); PORTEND. . . , threatening or ominous foretokening; as, "His heart *forebodes* a mystery" (*Tennyson*); "My father put on the countenance which always *portends* a gathering storm" (*Richardson*).

If we supply the common denotation of all these words—"to indicate what will happen"—the difference lies in other ideas involved in their meaning. In each case this difference forms part of the word's definition, the other part of which will be the common denotation. Indeed, although the dictionary definition may be presented from another point of view, a good and fair definition may be made according to this method. The synonymist, however, should find it the best method when his job is merely to show how far words agree and then to point out their individual differences. Other methods are conceivable, indeed some are necessary in special cases, but as yet no better method has been devised for the general run of synonyms. Miss Whately is largely responsible for it, but Lowes has greatly improved it.

It was (and is), however, impossible always to be equally exact, clear, and direct. This is especially true when the differences are less a matter of meaning than of coloring, as by historical and literary associations, or a matter of idiomatic usage. The difference in coloring or, in other terms, the difference in connotations—is especially difficult, requiring not only great knowledge but fine perceptions, imagination, and taste. Few

⁶ From manuscript notes in the editorial files of G. & C. Merriam Company.

would dare to attempt to distinguish connotations, but Lowes, whose feeling for these differences is not equaled by any synonymist, is especially successful in their handling. Many of these could not be incorporated in a dictionary definition, but they must be felt if the word is to be used with the accumulated power that has been stored in it. A particularly effective synonym of this type is to be found at **idiot**.

IDIOT, IMBECILE, FOOL, SIMPLETON are here compared esp. in their connotations; for technical distinctions, see defs. IDIOT (a learned word become popular) implies absence, commonly congenital, of intellectual or reasoning powers; it is often less strictly used to characterize one who is felt to have acted with utter stupidity; IMBECILE (less common as a popular term) implies great mental feebleness or (in its looser derogatory sense) entire fatuity; FOOL, the more vigorous word, is wholly popular, and frequently suggests lack of sense or wisdom rather than of brains; from its Biblical use, it still connotes, in elevated style, grave, pitying, or scathing condemnation; in colloquial usage, as a term of contempt, it is strongly offensive; SIMPLETON (also wholly popular) implies silliness or (sometimes) unsophisticatedness; it is often used lightly as a term of indulgent contempt; as, "He said you were. . . a senseless, driveling *idiot*" (*Wycherley*); "What an *idiot* am I, to wait here for a fellow who probably takes a delight in mortifying me" (*Goldsmith*); "custom's *idiot* sway" (*Cowper*); cf. an *idiotic* grin; "The petty passions, the *imbecile* desires. . . , daily moving her contempt" (*G. Eliot*); "She's a *fool* to stay behind her father" (*Shak.*); "*Fools* rush in where angels fear to tread" (*Pope*); "They look upon persons employing their time in making verses. . . as *simpletons* easily to be deceived" (*V. Knox*); poor, innocent little *simpleton*! "The 'Great *simpleton*!'. . . of Mr. Newman, and the 'Thou *fool*!' of the Bible, are something alike: but 'Thou *fool*!' is very grand, and 'Great *simpleton*!' is an atrocity. So too. . . Shakespeare's 'Poor venomous *fool*, be angry and dispatch!' is in the grand style" (*M. Arnold*). . . .

Differences in idiomatic usage are oftentimes not a matter that can easily be presented by definition. Many terms in a dictionary are defined almost in the same words, though written by various editors, the only clue to difference consisting in the illustrations. The consultant is often at a loss, because he does not see that these examples may constitute the only uses of the term, or a few such uses, and are not representative of a large number of uses. It was in such cases that the method which we have called the Piozzi method was first used, but without a full understanding of its dangers and limitations. Lowes avoided this method except where he was dealing with fixed idioms. Then he safeguarded his statement with a parenthetical elimination such as "one *ascends* (not *mounts*) a mountain; one *mounts* (not *ascends*) a horse." The sparing use of this method did not, however, lead to his ignoring the problem presented by such synonyms as are definable in almost identical terms yet are incapable of discrimination in implications and connotations. To get at his method let us examine parts of certain synonymies where his effectiveness is most apparent:

One EXCUSES (either as a superior or as an equal) small faults, minor omissions, or neglects, esp. in social or conventional obligations; one PARDONS (as a superior, or by act of mercy or generosity) serious faults, crimes, or grave offenses, esp. against laws or morals; as, to *excuse* an unintentional oversight, an absence from a required exercise; "*Excuse* my glove" (*Sheridan*); to *pardon* a thief; to *pardon* a theft; "Apollo, *pardon* my great profaneness 'gainst thine oracle" (*Shak.*).

STOP. . . applies primarily to action, or to that which is thought of as *moving*; CEASE applies also to states and conditions, or to that which is thought of as *being*; as, a train *stops*, but does not *cease*; the noise it makes both *stops* and *ceases*; one's love may *cease*, but scarcely *stop*.

Fast and *rapid* are often used without distinction; but *FAST* frequently applies to the moving object, whereas *RAPID* is apt to characterize or suggest the movement itself; as, a *fast* horse, a *fast* train, boat; a *rapid* current, a *rapid* gait, *rapid* progress.

Hateful and *odious* are sometimes used with little distinction. But *HATEFUL* more frequently applies to that which excites actual hatred, *ODIOUS*, to that which is excessively disagreeable, or which awakens repugnance; as, "Why shouldn't we hate what is *hateful* in people, and scorn what is mean?" (*Thackeray*). . . . "There was something more *odious* to him in her friendship than her hatred" (*Thackeray*).

In these discriminations the original contribution of Lowes is the generalization regarding usage or application. An occasional synonymist before him had experimented with it, but no one before him succeeded. He knows how to guard the expression, never claims too much, and yet, in spite of all the difficulties involved, makes statements that are just and therefore convincing. There seems to have been no inclination on his part to overstate the case. If there must be inexactness, he preferred it on the side of understatement. "This is as much as it is safe to say" was a not infrequent comment of his.⁷ Much more could be said about the interesting technique developed by Lowes. Much more could be said also about other excellences and some defects which characterize his work. But when all is said and done there still remains his superiority as a discriminator, as manifested in his selection of methods according to his material. Whether his synonyms differed in implications, in connotations, or in applications or, more probably, some in one way, some in another, he was seldom at a loss.

⁷ In manuscript notes in the editorial files of G. & C. Merriam Company.

Just a word about antonyms. There is no evidence at hand to prove that Lowes was ever asked to enter antonyms in *Webster's New International Dictionary*. He did, however, incorporate a few (though not by that name) in his articles under the general formula of "opposed to . . ." when the difference between synonyms (usually very general ones) could be apprehended more easily by knowing the term which was the direct opposite of each. He does this several times, as at **base**, where *base* is "opposed to *high-minded*," *vile* is "opposed to *pure, noble*," and *mean* is "opposed to *generous, magnanimous*." It is possible to guess his definition of *antonym*, but no more. The antonyms in *Webster's New International Dictionary, Second Edition* (1934) were added by an office editor.

There is no need to go further in the history of synonymy. Further synonymists⁸ there have been, some very good, some not quite so good, and some very bad; but they have all taken sides, either with those who support the traditional definition of *synonym* as one of two or more words having the same essential meaning or with those who favor its extension to one of two or more words which coincide in some part of their meaning. There has been no compromise: it might even be said that the break has scarcely been noticed. Nevertheless, it is apparent that, unless there be some clarification in definitions, especially of *synonym* and *antonym*, the prevailing popular misunderstanding will increase—with what results no one can estimate. This clarification we propose to undertake in the essays that follow.

It is because we firmly believe in the values implicit in the study of synonyms, antonyms, and word-finding lists (in this book divided into analogous words and contrasted words) that this dictionary has been written. We hope, therefore, that it not only carries some steps forward the admirable work accomplished by Goodrich and Lowes but also removes some sources of confusion or perplexity which have arisen outside of their work. The old defect inherent in synonymies, the overuse of illustration without a sufficient background in differences of implications (which we have called the Piozzi method), has not entirely disappeared from more recent writing, but, at least, the snake was scotched by the publishers' preface of the 1859 edition of *Webster's Dictionary*. In its place has come an uncertainty in the definitions of *synonym* and *antonym* which is even more insidious. In the three essays that follow we, therefore, make clear our own position. In the first of these essays we define *synonym* briefly, in order to show what effect that definition has had on our choice of words to be discriminated and on the technique of discrimination. In the second we define *antonym* at length, for the reason that this term has never been clearly examined and that the definitions in the major dictionaries are all at variance with Smith's tentative definition and with the selections of many of his successors. In the third we explain our aims and practices with respect to the word-finding lists.

SYNONYM: ANALYSIS AND DEFINITION

The chief reason for including in this introduction an article on synonyms is not to phrase a new definition of that term. It is rather to make a protest as to the loosening of the definition within the last fifty or sixty years and to restate very clearly what we believe to be the true and generally accepted meaning. In addition we will show briefly the effect of this definition upon our method.

For approximately one hundred years in the history of English synonymy there was very little real difference of opinion as to what a synonym is or as to what words should be the material of discrimination. It is true that John Trusler discriminated "words esteemed synonymous," Mrs. Piozzi "words apparently synonymous," and Miss Whately "pseudo-synonyms." Roget, who held that discrimination was foreign to his purpose, claimed that "the investigation of the distinctions to be drawn between words apparently synonymous forms a separate branch of inquiry." Nevertheless, all four made a distinction between true or actual synonyms (that is, words identical in meaning) and the terms which they discriminated or, in the case of Roget, which were discriminable (that is, terms that are so nearly alike that they appear to be synonyms). For all practical purposes, however, the words which were discriminated were not at all different from the "words closely allied" in meaning between which, according to Crabb, it is the business of the synonymist "to mark the nice shades of distinction"; nor is there any clash with Soule's simple definition

⁸ Some of the best of these are: Francis A. March, sr., and Francis A. March, jr., *A Thesaurus Dictionary of the English Language* (Philadelphia, 1902 [New Supplement by R. A. Goodwin, New York, 1958]); C. O. Sylvester Mawson, *The Standard Thesaurus of English Words and Phrases: a Dictionary of Synonyms and Antonyms* (New York, 1911 [and 1946; revised as *Roget's International Thesaurus*, 3d ed., New York, 1962]); F. Sturges Allen, *Allen's Synonyms and Antonyms* (New York, 1920 [revised and enlarged ed., New York, 1963]); A. C. Baugh and P. C. Kitchen, *Synonyms, Antonyms and Discriminations* (included as an appendix in *The New Century Dictionary*, New York, 1927 [and 1936]); C. O. Sylvester Mawson, *The Roget Dictionary of Synonyms and Antonyms* (New York, 1931).

of a synonym as that which has “the same meaning as” the entry word under which it is listed “or a meaning very nearly the same.”

It is also true that these synonymists did not always agree in their choice of synonyms. In part this was due to some confusion as to the limits of their scope, but mostly it is the result of conditions which still, to a degree, prevail. Some advances have been made in precision, but the truth was and is that there are too many factors entering into the selection of synonyms to make for absolute certainty or perfect accuracy in their choice. But these synonymists were not so far wrong as William Perry, who accepted Johnson’s “proximate words” as synonyms and made no distinction between them in reference to sense. The failure of his *Synonymous . . . Dictionary* may be ascribed to this cause.

The error Perry made has renewed itself, though with slightly more justification. This renewal, also, is initially the result of the misinterpretation of a highly popular work, Roget’s *Thesaurus of English Words and Phrases*, and of a belief that Roget presented two lists of terms, those that were alike (*synonyms*) and those that were opposed. It was to give voice to this interpretation that Charles J. Smith coined the word *antonym* for the opposed terms and gave to the world in 1867 his small book *A Complete Collection of Synonyms and Antonyms*. But because he was not following Roget in the arrangement of his material, choosing the dictionary (alphabetical) method rather than the classificatory method, he defined *synonym* (and *antonym*) in such a way that it would apply to Roget’s lists (so far as they were of the same part of speech) and to his own. Synonyms are, in Smith’s definition, “words which agree in expressing one or more characteristic ideas in common” (with the entered word). It is possible that he believed he was more careful in his selection than Roget. In line with his definition he gives lists of synonyms, such as that at **accelerate**, which are, it is true, less diverse than Roget’s but which are still susceptible of criticism as synonyms. There are, for example, some that are not questionable, such as *speed*, *quicken*, and *hasten*, but there are others, such as *promote*, *urge*, *expedite*, *facilitate*, and *dispatch*, that are open to question. *Accelerate* means to make go faster: so do *speed*, *hasten*, and *quicken*. But *promote*, for example, stresses aid given in attaining an end and only occasionally implies to make go faster; *urge* throws the emphasis upon the force that impels rather than upon the result, which usually, but not always, is to make go faster; *expedite* stresses the removal of impediments so that a progress or process is not delayed longer than is necessary or normal and therefore usually means to make go faster than it might. But in all these three cases a making go faster may or may not be implied; if implied, this notion is subordinate to the main implication of the word. Agreement “in one or more ideas” is a poor basis for the selection of synonyms, for these may or may not form a part of the essential meaning.

As the demand grew for a large number of synonyms, even agreement in one or more characteristic ideas tended to break down. Twenty-five and more years later certain synonymists of repute were offering groups of words as synonyms of one word rather than of one another and were not restricting those words to one sense of their key term. For instance, one synonymist of this period gave as the synonyms of **stain** *blot*, *color*, *discolor*, *disgrace*, *dishonor*, *dye*, *soil*, *spot*, *sully*, *tarnish*, *tinge*, *tint*. It is true that not all are discriminated, *blot*, *disgrace*, *dishonor*, *soil*, *spot*, *sully*, *tarnish*, and *tint* being omitted, but even so, they are all given in alphabetical order as synonyms and without explanation. In the list as it stands some words are synonyms of *stain* in the sense of to discolor, some in the sense of to impart color to or suffuse with color, and some in the sense of to bring reproach upon; but others have only a slight idea in common with *stain* in one of its senses. Such lists are far from rare in the very late nineteenth century or the early twentieth century: to the consultant who seeks another and closer word for the one which occurs to him, they must be hopelessly confusing. They have no value in teaching the precise use of language: their only merit is to indicate some of the words which may be used when one feels the need of a word like *stain* in any of its senses.

It is against a definition so loose as that favored by Smith or implied by others who went even further that this book makes a protest. In line with the tradition of the Merriam-Webster® dictionaries we believe that such a definition is destructive of all the values that have come to be recognized in synonyms. We hold that only by a clear return to something like the time-honored definition can we conserve these values and recognize a synonym when we see it. To emphasize this aim we propose in this dictionary to restate that definition fully and unequivocally so that none of the loopholes may be left through which some synonymists have escaped and to tighten the method of discrimination so that it will be very clear at points where even the best of synonymists have, in the past, unconsciously permitted vagueness.

A synonym, in this dictionary, will always mean one of two or more words in the English language which have the same or very nearly the same essential meaning. This is not a matter of mere likeness in meaning, for words may have some implications (ideas involved in their meaning) in common and yet not be synonymous. It is rather a likeness in denotation, which may be inadequately defined as the meaning which includes all the important implications but which is more strictly defined as the meaning or signification of a term as expressed in its definition. The denotation must include more than a summary of implications: it must indicate the part of speech and the relations of the ideas involved in a term’s meaning.

Synonyms, therefore, are only such words as may be defined wholly, or almost wholly, in the same terms. Usually they are distinguished from one another by an added implication or connotation, or they may differ in their idiomatic use or in their application. They may be and usually are interchangeable within limits, but interchangeability is not the final test, since idiomatic usage is often a preventive of that. The only satisfactory test of synonyms is their agreement in denotation. This agreement is seldom so perfect as to make the words absolutely identical in meaning, but it is always so clear that the two or more words which are synonyms can be defined in the same terms up to a certain point.

Consequently, the statement of this common denotation is of the greatest importance. In the discriminating articles in this dictionary it is, as a general rule, presented in the first sentence, but sometimes when there is need of a preliminary statement it is put in the second sentence. For example, at **nice**, the common denotation of the words to be discriminated (*nice, dainty, fastidious, finicky, finicking, finical, particular, fussy, squeamish, persnickety, pernickety*) is given as "exacting or displaying exacting standards (as in selection, judgment, or workmanship)"; at **object** (where *object, protest, remonstrate, expostulate, kick* are discriminated) it is "to oppose something (as a course, a procedure, a policy, or a project), especially by making known one's arguments against it"; at **delusion** (where *delusion, illusion, hallucination, mirage* are discriminated) it is "something which is believed to be or is accepted as being true or real but which is actually false or unreal." Each of these sentences is so worded that the part of speech of the words discriminated is made clear. For example, the wording is in the form of a definition of an adjective where the words discriminated are adjectives, in the form of a definition of a verb where the words discriminated are verbs. Some of these synonyms have other senses than the one here given, but in each such meaning the word has other synonyms and another common denotation. A distinct attempt, it may be said here, has been made to select synonyms according to their range of meaning. It has not always been possible to do so, since, occasionally, the more general word has no synonyms except more specific words (compare *let* in the list: *let, allow, permit, suffer, leave*). As a rule, however, a division between words of wide range and words of narrow range of meaning has been made, because it permits a more definite denotation for the narrower terms and makes for closer agreement and fewer differences. It is for this reason that we have separated the general terms for a political or legal agreement (*agreement, accord, understanding*) from those that are very explicit (*contract, bargain, compact, pact, treaty, etc.*), and have separated the general terms *large, big, great* from terms which specify unusual size (*huge, vast, immense, enormous, etc.*) and from terms which imply size and impressiveness (*grand, magnificent, imposing, stately, etc.*). But the difference between groups of synonyms is not always dependent on generality: it often implies a different emphasis or a different combination of implications. There have been many times when it was a serious question whether to add a word as a synonym to one group or to another, the arguments on both sides being of equal cogency. In such cases (for example, *hellish* and *fiendish*) the decision has usually depended on many factors, such as basic rather than derived meaning and the fact that, if certain words were treated separately, terms which are synonyms of one but not of the other could be added. Occasionally when a shared meaning makes a word a logical candidate for two synonymy groups but usage, connotation, or implication set the two aspects distinctly apart it has been included in two groups. For many reasons the problem of selecting synonyms has not been an easy one, but we have always tried to base our judgment upon evidence that was not affected by any personal prejudices or predilections.

Not all the words discriminated in this dictionary are synonyms. A few articles discuss a group of words that are sometimes wrongly taken as synonyms because they are confused or their actual meanings are misunderstood or because they once had one or more meanings which made them synonymous. In articles discussing such words the reason for their not being synonyms, whatever it may be, is stated clearly and unambiguously in the first or second sentence of the article. We have added these groups not merely because we believe them useful but because we believe that they come rightly within the province of the discriminator.

The method of discrimination is not invariable, for every set of synonyms presents its own problems. But, in general, the points of distinction are in: (1) implications—here, mostly minor ideas involved in the meaning of the word; (2) connotations—the ideas which color the word's meaning and are the product of various influences, such as etymology, language of origin, and historical and literary association; (3) applications—the restrictions in a word's use as prescribed by idiom or in accordance with the nature of the other words with which it may be associated, as when an adverb may be used to modify only certain kinds of verbs or when a verb may take only certain kinds of nouns as its subject or its object. Not all of the words discriminated in a single article differ in only one of these ways, however; some may differ in implications, some in connotations, some in applications, and some in more than one way. For no method adopted by the discriminator should be so artificial as to foster merely theoretical distinctions. The distinctions drawn should be real distinctions based on the evidence of recorded use—and it is such evidence, we cannot too strongly emphasize, that has guided the editors of this dictionary and has determined the distinctions set forth in its discriminating articles.

ANTONYM: ANALYSIS AND DEFINITION

There are probably few words more generally used with less understanding of their meaning than the word *antonym*. True, all the dictionaries define it, but often in such terms that the definition may be interpreted to include radically different conceptions. Is an antonym theoretically only one word or, at the most, one of two or three words which can be opposed to another word in a definite sense or is it any one of several words which may be opposed to it or to a group of synonymous terms? Probably because the latter conception is the easier one it has gained widespread acceptance, but still the dictionary definitions incline to back up the opinion of those who think of an antonym in the abstract as something more specialized and nearer to the former conception.

No one will dispute the right of a person to coin a term that fills a definite need or to give to that term the meaning he desires, though one may question whether the meaning assigned accords with the term's etymology, as in the case of *antonym*. For C. J. Smith who, in his . . . *Synonyms and Antonyms* (1867), introduced this term (which, in his own phrasing, "he has ventured, not to coin, but to reissue") adopted it primarily because of its analogy to *synonym* and knew that only by considerable stretching could the meaning he proposed for it be made to approach the meaning of what he thought of as its Greek original. Despite his recognition of this fact, the term seemed to Smith preferable to *counterterm*, though he acknowledged that some persons might still prefer the latter. As for definition, he related *synonym* and *antonym*. "Words," he wrote, "which agree in expressing one or more characteristic ideas in common [that is, with a given term] he has regarded as Synonyms, those which negative one or more such ideas he has called Antonyms."

Therefore, no one is likely to dispute the right of a later investigator to examine anew the meaning of a coined word questionably grounded and vaguely defined that has become established in the language. In fact, there is not only the right but a duty on the part of such an investigator when, as in the case of *antonym*, he finds that there is a great difference between the theory, as manifested in the definition, and the practice, as manifested in selection. There will always be strict constructionists and loose constructionists but, in this case at least, the difference is more apparent than real, for many of the latter have been forced into this position by the practical difficulties confronting them in the selection of antonyms, rather than by indifference to the concept involved.

What we propose to do here, then, is to examine the word *antonym*, to determine the concept it involves, and to state its definition in as clear terms as possible. When we find a term like this used frequently with such qualifying words as *exact* and *true* (the "exact antonym" of this word; the "true antonym"), we must suspect an attempt on the part of men to approximate an ideal.

Modern unabridged dictionaries, without exception, define *antonym* with comparative strictness. It is "a word of opposite meaning" (*Webster's New International Dictionary, Second Edition*⁹), "a term which is the opposite or antithesis of another, a counter-term" (*Oxford English Dictionary*), "a word directly opposed to another in meaning; a counterterm: the opposite of *synonym*" (*Funk and Wagnalls New Standard Dictionary*), "a counterterm; an opposite; an antithetical word: the opposite of *synonym*" (*Century Dictionary*), and "a word that is an opposite in meaning of a particular word" (*New Century Dictionary*). In all of these definitions, the burden is on the word *opposite* or *opposed*; and, it should be added, all differences of opinion as to the criteria for determining antonyms are due to uncertainty as to what is meant by *opposite* or *opposed*. The physical connotations of these words always stand in the way of a strict definition of their abstract senses. How complex is the concept of opposition may be seen from the following analysis of its physical connotations.

Opposition is a relation involved when two things are so placed that: (1) they may be connected by a straight line (straightness as distinguished from obliquity being determined by external conditions such as the lines of a room) drawn from one to another (as, *opposite* windows); (2) they lie at either end of an axis, diameter, or the like (as, *opposite* points on the earth's surface); (3) they are contiguous but reversed in position (as, the *opposite* halves of the globe); (4) they face each other, the distance apart being of no consequence (as, partners stand *opposite*); (5) they depart or diverge from each other (as, to go their *opposite* ways); (6) they work against each other (as, *opposite* forces); (7) they cannot exist together, because they reverse or undo each other (as, the *opposite* processes of growth and decay); (8) they represent the obverse and the reverse (as, the *opposite* faces of a coin).

What this relation is both materially and immaterially and in all instances is, frankly, hard to determine. It is not invariably the confrontation of one with another, for "persons who go their *opposite* ways" and "the *opposite* processes of growth and decay," for example, do not respond to this test; it is hardly complete divergence or difference, for "the *opposite* halves of the globe" and "the *opposite* faces of a coin" represent difference only in one or more particulars, otherwise remaining fundamentally alike; it is still

⁹ Same in *Webster's Third New International*.

less antagonism or irreconcilability, for there is no hint of either in the *opposite* position of partners in a dance or in *opposite* windows. Although some of these ideas exist as implications distinguishing meanings of the word *opposite*, they do not yield any fundamental meaning which is involved in every sense. One can go no further than to say that *opposite* represents a setting of one thing against another so as to sharpen their differences or to reveal their divergencies.

It will be necessary, therefore, to get at what is meant by "opposite meaning" in another way. First, let us take the words listed as antonyms in the dictionaries and manuals of synonyms and antonyms and see into what classifications they fall. When possible, we will offer a classification known to logic, but when not possible, we will form our own, naming it in unambiguous terms.

A large number of words listed as antonyms fall into two well-known logical categories, those of *contradictory terms* (or *contradictories*) and *contrary terms* (or *contraries*).

(1) *Contradictory terms* are so opposed to each other that they are mutually exclusive and admit no possibility between them. If either is true, the other must be false; if either is false, the other must be true. Examples:—A thing is either *perfect* or *imperfect*: no matter how slight or how extensive the imperfection, the fact remains that the thing cannot be called *perfect* if any flaw, blemish, or defect exists. If a person is asked for his opinion, he may *agree* with that of others, or he may *disagree*, or *differ*: it is unimportant whether the disagreement is radical or superficial or the difference concerns a major or a very minor point; he cannot be said to *agree*.

(2) *Contrary terms* are so opposed in meaning that the language admits no greater divergence. They are the true "diametrical opposites." But they must be of or must apply to things of the same genus or fundamental kind. Thus, *white* and *black* represent the extremes in color, the former, as popularly understood, implying the absorption of all colors and the latter implying the privation of every vestige of color. *Prodigal* and *parsimonious* represent extremes in expenditure (chiefly of money), but *prodigal* implies excessive extravagance and *parsimonious* excessive frugality. *Superiority* and *inferiority* represent extremes judged by a standard of what is good. Between these extremes represented by each of these pairs of examples, there are many words which may more truly describe or designate the person or thing in question.

Other classes are the following:

(3) Many words are listed as antonyms that normally appear in pairs. Some are what the logician calls *relative terms*, pairs of words which indicate such a relationship that one of them cannot be used without suggesting the other; as, *parent* and *child*, *husband* and *wife*, *predecessor* and *successor*, *employee* and *employer*. Others are *complementary terms* involving, usually, a reciprocal relation or the incompleteness of one unless the other follows; as, *question* and *answer*, *attack* and *defend*, *stimulus* and *response*.

(4) An important class of words sometimes listed in antonyms may be called for want of a better name *reverse terms*: these comprise adjectives or adverbs which signify a quality or verbs or nouns which signify an act or state that reverse or undo the quality, act, or state of the other. Although they are neither contradictory nor contrary terms, they present a clear opposition. Their addition is usually justified in this way: if the antonym of *admit* is *reject*, what shall we do with *eject* which implies not the negative but the reverse of *admit*? if the antonym of *destructive* is *harmless*, must we ignore *constructive*, which goes further and implies either the reverse or the undoing of *destructive*? Many words of the reverse type are often equal in value; sometimes they are even stronger than the first.

(5) There is still a class of words listed as antonyms, which are neither contradictories nor contraries nor reverse terms, which do, however, present a sharp contrast—for example, such pairs as *rich* and *destitute*, *dry* and *moist*, and *keep* and *abandon*. This is one of the most perplexing of classes and one that appears very frequently in antonym lists. Such words may be designated *contrasted terms*. We shall return to them later.

(6) The last class of so-called antonyms is very inclusive. Words in this class might be called "loosely contrasted terms," since, when they are presented side by side with the word of which they are given as antonyms, they never fully clash but show a difference in only a small part of their meaning (as, *abstruse* and *superficial*, *frank* and *hypocritical*, *vigilant* and *careless*). For the sake of uniformity, however, we will call them *incompatibles*, for they usually cannot both at the same time be said of or applied to the same person or thing. *Frank* means open and free in one's talk and uninhibited by any restraints, such as fear, whereas *hypocritical* means presenting an appearance of being other and usually better than one is; *abstruse* means so remote from the range of ordinary human experience that there is difficulty in comprehension, while *superficial*, in this limited sense, means not penetrating below the surface or exterior so as to unveil what lies behind. So put, there is not the slightest sign of a clash in meaning, yet the difference which confuses, though slight, is there, for the person who is called *frank* gives the appearance of sincerity and the person who is called *hypocritical* is adjudged insincere. Similarly, a work that is spoken of as *abstruse* differs from a work that is spoken of as *superficial* in that the one is profound, the other shallow. It is *sincere* and *insincere* (not *frank* and *hypocritical*), and *profound* and *shallow* (not *abstruse* and *superficial*) which clash

in meaning. Since this class is based upon a mistake in analysis, it will be eliminated from the discussion.

If, then, we were to make a definition of *antonym* according to the type of word which dictionaries and manuals select as such, it would be phrased something like this: "An antonym is a word that so differs from another word that it represents its contradictory, its contrary, its relative (or counterpart), its complement, its reverse, its contrasted term, or its incompatible in some way or degree." That this is too inclusive a definition is obvious. No one, it seems fair to state, would define in terms as broad as this the word *antonym* as it is understood in concept; yet everyone who has made it his business to select antonyms is aware of the dangers involved and of the difficulty in avoiding the questionable types. An easygoing attitude is not chiefly responsible for this wide diversity. The English language was clearly not made to measure: it was not devised to show likenesses or differences. The discovery both of words which are closely alike and of words which are sharply different is, for the most part, the product of the need for expressing ideas or of understanding expressed ideas. No mechanical shaping power sets words right before men begin to use them.

It must be remembered that the task of selecting antonyms is imposed upon a living structure, in a desire to know its resources and so far as possible bend it to our needs. The selection not only of antonyms but also of synonyms is similar, at least in aim, to the scientist's classification of animals into orders, families, genera, and species. Both help us in the understanding and mastery of the material involved. When an old system breaks down in its study of the animal world, a new one must arise. None is perfect, but each is a help in bringing within the range of human understanding something that would otherwise be too vast for study and beyond the range of experience of any one man. So we proceed to study synonyms, words which closely resemble each other not in particular ways but in the very heart of their meaning, that we may know them better and use them more wisely, more precisely, and more effectively.

We should like to do the same thing with antonyms. It is good, we feel, to know the exact antonym of a word, for not only will it give us a firmer grasp of the meaning of the word to which it is opposed but inversely, of itself. Is there any test that will help us in discovering such words, that we may be enabled not only to speak and to write more expressively but to have a richer understanding of the pages of men who have known how to express themselves? There is a word in Smith's definition of *antonym* which may give us the clue, "those [words] which *negative* one or more such ideas he has called Antonyms." In fact, even today, some persons argue that an antonym is "the *exact* negative" of a word. It is not clear just what this is intended to mean. Taken quite literally and expressed in the phraseology of logic an "exact negative" is a word's *contradictory term*. But this is too narrow, as even those who vigorously support this definition must agree. By the terms of its definition, a word's contradictory must be the equivalent in meaning of its *not*-compound. Otherwise the two terms (a word and its contradictory) could not be mutually exclusive. Let us see this in tabular form.

<i>word</i>	<i>not-compound</i>	<i>contradictory</i>
colored	not-colored	colorless
perfect	not-perfect	imperfect
agree	not-agree	disagree <i>or</i> differ

So put, it is obvious that there is no disagreement between the *not*-term and contradictory: in this case the negative and the opposite agree. The trouble comes, however, with the naming of the antonym. As a matter of practical policy, if we accept the "exact negative" as the antonym, we must restrict ourselves to the very few contradictories which have an independent form, and to the very few *in-*, *un-*, *dis-* and similar compounds which are obviously contradictory terms. But if we wish completeness, we must supply antonyms for the vast majority of English words by constructing a *not*-form. That might do in logic, but it would not do when greater knowledge of the English language exists as our clear aim. Moreover, we feel the lack of the clash that gives so much savor to the antonym.

On the other hand, it is clear that the other terms listed as antonyms do not equal the "exact negative." The logical contradictory of *white* (*not-white*) may include any chromatic color or any other achromatic color, yet the contrary, or diametrical opposite, is only *black*; the logical contradictory of *parsimonious* (*not-parsimonious*) may include many terms, such as *liberal*, *extravaqant*, *prodigal*, yet the contrary, or diametrical opposite, is *prodigal*; *not-liking* may include both *indifference* and *aversion*, but no one will question that *aversion* is the contrary of *liking*. Even more obvious is the difference between the logical contradictory and the relative or the complementary term, for in this case they neither represent nor include the same thing. *Not-attack*, for example, does not equal *defend*; *not-husband* is not the equivalent of *wife*; and *not-stimulus* does not in any way approach *response*.

More important than relative and complementary terms (most of which may be doubted, with good reason, to be the antonyms of each other) are the terms which take a reverse as the opposite. While the *not-*

term in these cases often equals or includes a word that is called the term's *antonym*, it is never equivalent with what may be called the "reverse antonym." For instance, *not-admit* equals *reject*, but it does not cover the reverse of *admit*, which may be either *eject* or *expel*; *not-abandon* may include *keep*, but it cannot be interpreted to cover the reverse of *abandon*, which is *reclaim*.

One class of words listed as antonyms remains for our consideration, contrasted terms. As has been said, this class covers a large number of words the listing of which as antonyms puzzles rather than enlightens the reader. It is easy to prove that they cannot be "exact negatives." For example, *keep*, which is often given as the antonym of *abandon*, is not its contradictory, for the logical contradictory (*not-keep*) also includes *sell*, *lose*, *give away*, and many other words; *rich* is not the contradictory of *destitute*, for the logical contradictory *not-rich* includes *needy*, *indigent*, *poor*, *comfortable*, and many other terms as well as *destitute*. But this does not get at the heart of the matter and display what is wrong with these terms. Obviously also, they are not contraries, for they do not represent extremes of divergence as do *parsimonious* and *prodigal* or *white* and *black*. What is the matter with them? In answering this question, we will find the clue to the solution of our problem.

Superficially viewed, these contrasted terms differ sharply in some part, but not in all parts, of their meaning. They do not clash full force. One term covers more ground than the other, or one term is more explicit in its implications than the other. The logician would say that they equal each other neither in extension nor in intension. Put more simply, they differ (1) in their range of application or applicability, one being general, the other specific, or one being more inclusive or less inclusive than the other, and (2) in their depth of meaning—that is, in the number and quality of implications contained in the terms. It is clear that *keep* is more general than *abandon* and that to equal it in generality and at the same time to negate (or, much better, to negate) its implications, *relinquish* would be a better choice: it is clear that *abandon* has more specific implications than are found in *keep*, such as surrender of possession or control and relegation to the mercy of others, and that a word which exactly equates these implications in number and quality yet, at the same time, negates them must be the true antonym. There seems to be no term that fills these demands except a "reverse term," one that undoes what has been accomplished by the act of abandoning. That term is *reclaim* in its definite sense of regaining control or possession of something and giving it full care and attention. *Rich* is too broad and general to pair with the very explicit *destitute*. There are many implications in the latter which have no clear parallel in *rich*. Only *poor* could be opposed to *rich* in breadth of extension and in vagueness of intension, because *rich* suggests more possessions than one needs, and *poor* suggests fewer possessions than one requires and so negates in full the meaning of the other. On the other hand, *opulent* could be opposed to *destitute* in narrowness of extension and in explicitness of intension, for *destitute* suggests the miserable condition where one is deprived of all that is needed for bare existence and *opulent* the felicitous condition where everything that is desired is possessed in abundance. Though *rich* and *poor* come close together (the dividing line being marked by such a word as *comfortable*) and *destitute* and *opulent* are very far apart, being in fact "diametrical opposites," each represents the negation of the other.

In this way *wet*, because it equals *dry* in range of meaning and negates *dry* in number and quality of implications, is the antonym of *dry*, whereas *damp* and *moist* are merely contrasted terms to *dry*; *alleviate* for the same reasons is the antonym of *aggravate*, and *mitigate*, *assuage*, and *allay* are nothing more than contrasted terms; *elevation* in the sense of promotion is the antonym of *degradation* in the sense of demotion, for it contains implications not found in *preferment* or *advancement*.

In selecting antonyms, therefore, one should be on guard to match in range of meaning the word from which one starts and to negate every one of its implications so that the opposition is complete. Otherwise the opposing words do not clash full force, one word covering more or less ground than the other or exhibiting differences not apparent in the other. It is for this reason that in this dictionary we have preferred to give *contrasted words* as distinct from *antonyms*, not denying or ignoring the value of the former in word study but emphasizing the unique, disciplinary value of the latter.

It is for a similar reason that we have ruled out relative and complementary terms as antonyms of each other. Pairs of words of this class are, it is true, usually matched in extension, but one of the pair seldom negates the intension of the other. Rather they suggest union, convergence, or completion when taken together. *Husband* and *wife*, *employer* and *employee* are different elements in a combination, which we may call opposites not in the sense of negating each other but of fulfilling each other. The same is true of *stimulus* and *response*, of *question* and *answer*. Without the former the latter could not be: without the latter the former remains incomplete. An occasional instance, however, remains, such as *attack* and *defend*. Since these come as close to reverse terms as they do to complementary terms, they may be treated as the former.

The foregoing analysis would seem to leave us with three classes as possible antonyms: contradictory, contrary, and reverse terms. It is true that, in general, all antonyms may be fitted into each of these classes. But, as the first two classes are the creation of logicians, who are dealing with symbols rather than with

words, they are somewhat too rigid or too artificial for our use. Whether *good* and *bad*, *right* and *wrong*, *true* and *false* are contradictories or contraries might be disputed: it is wiser, for our purposes, not to raise this issue. They still remain antonyms according to our tests. So do a large number of more specific terms, which are equated in range of meaning and are negated in their specific implications, such as *extol* and *decry*, *aboveboard* and *underhand*, *constant* and *fitful* (as applied to things), *adulation* and *abuse*. The designation "reverse term" may also be dropped now that its purpose in exposition has been served. There are only three tests which should be applied to a word selected as the antonym of another word, and these are stated in the following definition:

An antonym is a word so opposed in meaning to another word, its equal in breadth or range of application, that it negates or nullifies every single one of its implications.

It is this definition that has guided the selection of antonyms in this dictionary. Not every entry, of course, exhibits an antonym, for there are many words that have no antonym. In some few cases, moreover, we have been unable to supply any word that meets the three tests of the above definition or have been obliged to resort to an approximation. In such cases, we always welcome intelligent criticism that may enable us to supply these gaps. But, for the most part, where an antonym is listed, the editors rely upon its self-justification to the consultant who will apply these tests.

THE TREATMENT OF ANTONYMS

A few words should be added to clarify the practice of this dictionary in regard to antonyms. They form an important part of its makeup; but, as they do not require much space, their significance may be overlooked. It must be emphasized that each antonym is directly related to its entry word in the special sense in which that word is discriminated. It bears not a loose relation but a very close one to that word, and even though it may also be the antonym of some other word (especially of a synonym of the entry word) it must be judged only by the relation it bears to the entry word with which it is associated. Sometimes, however, the antonym fits that word only when it is used in a narrowed sense or in a narrow application. This limitation is indicated in a parenthetical phrase with words in italics. Thus, at **abet**, we have as antonym "deter (*with a personal subject*)" and at **actuate**, "deter (*with a motive or fear as the subject*)." A simpler instance is the antonym at **brilliant**, in the sense of *bright*, which reads "subdued (*of light, color*)." At other times, the entry word is so inclusive that it takes more than one antonym to cover it. Then some indication is given of the differing collocations in which each antonym appears. Thus, **check**, as a synonym of *restrain*, has for its antonyms "accelerate (*of speed*): advance (*of movements, plans, hopes*): release (*of feelings, energies*)." A cross reference (introduced by "see") following an antonym is merely an indication of the sense in which it is used. Thus, **close**, as a synonym of *silent* and *reticent*, takes *open* as its antonym, but the sense in which *open* is used here is made clear by the cross reference to **FRANK**, where the word *open* is discriminated.

ANALOGOUS AND CONTRASTED WORDS

The essential part of this dictionary consists of the synonyms and their discriminations and of the antonyms of the words thus discriminated. With these, judged from the point of view of one who is interested in the clarification of the differences in meaning between synonyms and in finding their direct opposites, it is a complete work. Yet for those who use this book as a word finder or as a vocabulary builder, there might be something lacking if it went no further. It is in view of the needs of such consultants that we have added lists of *analogous words* and of *contrasted words*.

Some of the analogous words or terms closely related in meaning merit the name of "near synonyms," so close are they to the vocabulary entry: some contain much the same implications as the entry word, but the implication that they emphasize is not the same as that expressed in the common denotation of the discriminated group of which the entry word forms a part. Some are more general than the entry word, some more specific; some come together in only a part of their meaning. But in some important particulars they are all like the word under which they are listed.

So, too, with contrasted words, or terms sharply differing in meaning from the entry word. Some are close synonyms of its antonym, but many are opposed to it only in part of their meaning. Through these lists the

consultant who is seeking a word may find exactly the one he needs or the student may discover a useful means of extending his vocabulary.

These aims are made practical and easy of attainment by an additional aid which no work on synonyms has hitherto given the consultant. Terms listed as *analogous words* and *contrasted words* are arranged in groups, all of which are discriminated in this book. Most of the words are themselves directly discriminated, cross reference to the entry where the article is given being made by means of an asterisk or a reference introduced by "see": a few that are not themselves directly discriminated are closely dependent on words that are, as by being their derivatives or inflected forms, or by being their negatives, and are thereby covered by the article to which a clear cross reference is made. Thus, at **amenity** (in the sense of courtesy) the list of analogous words contains: (1) *civility, politeness, courteousness*, plus a cross reference to the article at CIVIL, where *civil, polite, courteous* are discriminated; (2) *graciousness, affability, cordiality, geniality, sociability* plus a cross reference to GRACIOUS, where *gracious, affable, cordial, genial, sociable* are discriminated. Similarly, among the contrasted words at **banal** are *stimulating or stimulative, provoking or provocative, exciting, piquing*, which, though not discriminated themselves, are fully covered by the article at PROVOKE, where their corresponding verbs are treated. Through the cross reference, then the consultant can find the meaning of every term in the word lists, and can sharpen his sense of their differences.

It is perhaps unnecessary to point out that the selection of words in each of these lists is not determined by the group of synonyms but by the one word at whose entry the list appears. As a result, each vocabulary entry is complete in itself: it has not only its synonyms and antonym or antonyms, but also analogous words which are closely related to it and contrasted words which are sharply opposed to it. It is thus treated as a unit, and all essential information is gathered about it.

EXPLANATORY NOTES

The left-hand column below consists of entries or, usually, parts of entries selected from the main vocabulary to illustrate the principal devices used in this dictionary. The right-hand column provides explanations of these devices.

accustomed wanted, customary, habitual, *usual

1 The vocabulary entry (usually a single word; occasionally a phrase) is printed in boldface type.

acoustic, acoustical *auditory

adamant, adamantine obdurate, inexorable, *inflexible

2 Vocabulary entries which are alphabetically close to each other are sometimes listed together.

adept *n* *expert, wizard, artiste, artist, virtuoso

adept *adj* *proficient, skilled, skillful, expert, masterly

3 The part of speech is indicated (by means of the commonly accepted abbreviations, printed in italic type) where it is desirable or necessary to do so.

affection 1 *feeling, emotion, passion, sentiment

affection *disease, disorder, condition, ailment, malady, complaint, distemper, syndrome

4 Words identical in spelling and part of speech, but of different etymology are given separate entry.

aggravate ① heighten, *intensify, enhance

② exasperate, *irritate, provoke, rile, peeve, nettle

5 Two or more meanings (or senses) of a single vocabulary entry are clearly separated and each meaning is numbered with a boldface numeral.

alarm *n* 1 (**Alarm, tocsin, alert**) agree in meaning a signal that serves as a call to action or to be on guard especially in a time of imminent danger. (**Alarm**) is used of any signal that arouses to activity not only troops, but emergency workers (as firemen, policemen); it suggests a sound such as a cry, a pealing of a bell, a beating of drums, or a siren <sound a fire *alarm*> <the dog's barking gave the *alarm*>

(**Tocsin**) may be either an alarm sounded by bells usually from the belfry of a church or, more often, the bells sounding an alarm <the loud *tocsin* tolled their last alarm—*Campbell*> but is used figuratively for any sort of warning of danger. (**Alert**), a military term for a signal to be on guard and ready for expected enemy action, is often used for any warning of danger <sirens sounded an air-raid *alert*> <the Weather Bureau issued a tornado *alert* in early afternoon . . . The *alert* was cancelled after 5 P.M. (*Springfield Union*)>

6 The words to be discriminated in an article are listed in boldface type at the beginning of the article.

Each word is repeated in boldface type at the point in the article where it is individually discussed.

The meanings or applications of the words discriminated are profusely illustrated by means of familiar examples (often idiomatic or characteristic phrases) or by quotations from named authors or sources. The word illustrated is printed in italic type.

The source of a quotation is also printed in italics. A list of sources quoted is given on pp. 887 ff.

ardor (fervor, enthusiasm, zeal, *passion)

articulation 1 integration, concatenation (see) under INTEGRATE *vb*)

2 *joint, suture

7 Where there is no discriminating article, the first item under an entry is a list of its synonyms or near synonyms. These synonyms are discriminated from one another in an article in this dictionary.

The place where this article is to be found is indicated by an asterisk prefixed to one of the words in the list or by a reference introduced by the word "see."

aspersion reflection, *animadversion, stricture

(**Ana**) *libel, lampoon, pasquinade, squib, skit; *abuse, vituperation, invective, obloquy; *detraction, backbiting, calumny, slander, scandal

(**Con**) praise, laudation, extolling, eulogizing or eulogy (see corresponding verbs at PRAISE); *applause, acclaim, acclamation, plaudite; commendation, complimenting or compliment (see corresponding verbs at COMMEND)

8 Each vocabulary entry is provided (where the facts require or permit) with "finding lists" of two kinds: Analogous Words introduced by the label *Ana* and Contrasted Words introduced by *Con*.

Words given in these finding lists are divided into groups. Each group consists of words discriminated (or related to those discriminated) in a single article.

The groups are separated from one another by boldface colons. Words within each group are separated by commas. The place of entry of the article discussing each group is indicated by an asterisk or a "see" reference (see §7).

assortment see corresponding adjective *assorted* at MISCELLANEOUS

(**Ant**) jumble, hodgepodge

assuage alleviate, *relieve, mitigate, lighten, allay

(**Ant**) exacerbate; intensify

9 The label *Ant* introduces the antonym or antonyms of a vocabulary entry.

In the antonym lists commas are used between words that are synonyms of one another, and boldface colons are used to separate words that do not have such a relationship.

While many of the words listed as antonyms are themselves entered as vocabulary entries and are therefore discussed in the articles in this dictionary, the selection of antonyms has not been restricted to such words. For this reason the antonym lists do not as a rule contain references to discriminating articles.

austere *severe, stern, ascetic

Ant luscious ((of fruits); warm, ardent ((of persons) feelings); exuberant ((of style, quality))

10 In the lists of Antonyms italic notations in parentheses indicate the limited use or application in which the preceding word is to be taken.

A DICTIONARY OF DISCRIMINATED SYNONYMS WITH ANTONYMS

AND ANALOGOUS AND CONTRASTED WORDS

abaft

abaft, aft, astern are nautical terms meaning behind or to or at the rear (of). *Abaft* and *aft* are applied to objects or their positions in a ship. **Abaft** (opposed to *afore*) commonly suggests position relatively nearer the stern or rear part of the ship <his station is *abaft* the foremast> <the wave struck her *abaft* the beam> **Aft** (opposed to *forward*) suggests position actually in that part of the ship to the rear of the midship section <they went *aft* to hoist the mainsail> <a cabin *aft* of the lounge> **Astern** (opposed to *ahead*) chiefly implies position outside and to the rear of a ship <the wake *astern* of a ship> <a brisk breeze *astern*> **Ana** after, rear, back, *posterior, hind, hinder

Ant *afore* —**Con** *ahead, forward, *before*

abandon *vb* 1 **Abandon, desert, forsake** mean to quit absolutely. **Abandon** implies surrender of control or possession often with the implication that the thing abandoned is left to the mercy of someone or something else <the ghost of grandeur that lingers between the walls of *abandoned* haciendas in New Mexico—*Mary Austin*> <in the frantic rush to escape the insane had usually been forgotten and *abandoned* to horrible deaths—*Heiser*> <*abandoning* wife and children, home and business, and renouncing normal morality and humanity—*Shaw*> **Desert** commonly implies previous occupation, companionship, or guardianship and often connotes desolation <*deserted* farms growing up to brush> It often, especially in **deserter, desertion**, emphasizes violation of duty as guardian or protector and extreme culpability <*deserted* by those that should have stood by him> <any person found guilty of *desertion* . . . shall be punished, if the offense is committed in time of war, by death—*Uniform Code of Military Justice*> **Forsake** often retains connotation of repudiation, frequently suggests renunciation, and stresses the breaking off of an association with someone or something <*forsake* the world and all its pleasures> <she was *forsaken* at the altar—*Deland*>

Ana *discard, cast, scrap, junk: reject, repudiate (see DECLINE)

Ant reclaim —**Con** hold, possess, enjoy (see HAVE): shield, safeguard, protect (see DEFEND): redeem, *rescue, save

2 surrender, *relinquish, yield, resign, leave

Ant cherish (*hopes, opinions*): restrain (*oneself*) —**Con**

abase

*keep, retain: treasure, prize (see APPRECIATE): *maintain, assert, defend: inhibit, bridle, curb (see RESTRAIN)

abandon *n* *unconstraint, spontaneity

Ana license, *freedom, liberty: relaxation, laxity or laxness, looseness (see LOOSE)

Ant self-restraint —**Con** repression, suppression (see SUPPRESS): self-possession, aplomb (see CONFIDENCE): poise (see BALANCE, TACT)

abandoned, reprobate, profligate, dissolute fundamentally mean utterly depraved. *Abandoned* and *reprobate* were originally applied to sinners and to their acts. One who is **abandoned** by his complete surrender to a life of sin seems spiritually lost or morally irreclaimable <I disdain . . . to paint her as she is, cruel, *abandoned*, glorying in her shame!—*Cowper*> One who is **reprobate** is abandoned and therefore rejected by God or by his fellows; *reprobate* implies ostracism by or exclusion from a social group for a serious offense against its code <don't count on my appearing your friend too openly . . . remember always that I'm a *reprobate* old clergyman—*Hugh Walpole*> *Profligate* and *dissolute* convey little if any suggestion of divine or social condemnation but both imply complete moral breakdown and self-indulgence to such an extreme that all standards of morality and prudence are disregarded. One who is **profligate** openly and shamelessly flouts all the decencies and wastes his substance in dissipation <rescue the Empire from being gambled away by incapable or *profligate* aristocrats—*Froude*> One who is **dissolute** has completely thrown off all moral and prudential restraints on the indulgence of his appetites <see them spending and squandering and being irresponsible and *dissolute* and not caring twopence for the way two thirds of the world live—*Rose Macaulay*>

Ana depraved, debauched, perverted, debased (see under DEBASE): degenerate, corrupt (see VICIOUS): wanton, lewd, lascivious, libidinous, lecherous (see LICENTIOUS)

Ant redeemed, regenerate —**Con** saved, rescued, reclaimed, delivered (see RESCUE)

abase, demean, debase, degrade, humble, humiliate are synonymous when they denote to lower in one's own estimation or in that of others. **Abase** suggests loss of dignity or prestige without necessarily implying permanency in that loss. When used reflexively it connotes

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.
Ana analogous words **Ant** antonyms **Con** contrasted words See also explanatory notes facing page 1

humility, abjectness, or a sense of one's inferiority; in this reflexive use *humble* is often used interchangeably (who-soever exalteth himself shall be *abased* [DV and RV *humbled*]; and he that *humbleth* himself shall be exalted—*Lk 14:11*) **Demean** implies less humility than *abase* but is stronger in its implications of loss of dignity or social standing (it was . . . Mrs. Sedley's opinion that her son would *demean* himself by a marriage with an artist's daughter—*Thackeray*) **Debase** emphasizes deterioration in value or quality: it is more often used of things (debase the currency) but when used of persons it commonly connotes weakening of moral standards or of the moral character (officeholders *debase* themselves by accepting bribes) (struggle with Hannibal had *debased* the Roman temper—*Buchan*) **Degrade** stresses a lowering in plane rather than in rank and often conveys a strong implication of the shameful of the condition to which someone or something has been reduced (that she and Charlotte, two spent old women, should be . . . talking to each other of hatred, seemed unimaginably hideous and *degrading*—*Wharton*) Often (especially in **degradation**) it connotes actual degeneracy or corruption (it was by that unscrupulous person's liquor her husband had been *degraded*—*Hardy*) **Humble** is frequently used in place of *degrade* in the sense of demote when the ignominy of the reduction in rank is emphasized (we are pleased . . . to see him taken down and *humbled*—*Spectator*) When it is employed without any implication of demotion, it often suggests a salutary increase of humility or the realization of one's own littleness or impotence (it was one of those illnesses from which we turn away our eyes, shuddering and *humbled*—*Deland*) Occasionally it implies a lowering in station (in such a man . . . a race illustrious for heroic deeds, *humbled*, but not degraded, may expire—*Wordsworth*) **Humiliate**, once a close synonym of *humble*, now comes closer to *mortify*, for it stresses chagrin and shame (when we ask to be humbled, we must not recoil from being *humiliated*—*Rossetti*)

Ana cringe, truckle, cower, *fawn, toady: grovel (see WALLOW); abash, discomfit, disconcert, *embarrass: mortify (see corresponding adjective at ASHAMED)

Ant exalt: extol (especially oneself) —**Con** magnify, aggrandize (see EXALT): elevate, *lift, raise: laud, acclaim, *praise

abash discomfit, *embarrass, disconcert, faze, rattle **Ana** fluster, flurry, *discompose, perturb, disturb, agitate: chagrin, mortify (see corresponding adjectives at ASHAMED): confound, dumbfound, nonplus (see PUZZLE)

Ant embolden: reassure

abate 1 *abolish, extinguish, annihilate

Ana end, terminate (see CLOSE): *annul, void, abrogate: cancel, obliterate (see ERASE): *nullify, invalidate

Ant perpetuate —**Con** *continue, last, persist, abide

2 reduce, diminish, *decrease, lessen

Ana retard, slow, slacken, *delay: *moderate, temper: mitigate, lighten, alleviate (see RELIEVE)

Ant augment: accelerate (*pace, speed*): intensify (*hopes, fears, a fever*) —**Con** *increase, multiply, enlarge: aggravate, heighten, enhance (see INTENSIFY): *speed, quicken, hurry

3 **abate, subside, wane, ebb** all mean to die down in force or intensity; all imply previous approach to a high point and present movement or decline towards a vanishing point. **Abate**, however, stresses the idea of progressive diminution in intensity while **subside** suggests falling to a low level and cessation of turbulence or agitation (the wind is *abating*; the waves are *subsiding*) (the revolutionary spirit has *abated*—*Grandgent*) (the child's quick temper *subsided* into listlessness under the fierce Italian heat—*Rep-*

plier) **Wane** adds to *abate* the implications of fading or weakening; it tends, therefore, to be used of things that have value or excellence as well as force and intensity (after the first flush of excitement, the interest of doctors, nurses, and patients all began to *wane*—*Heiser*) **Ebb** adds to *abate* the suggestion of recession or of gradual loss; it is idiomatically associated with things subject to fluctuation (*ebbing* vitality is often a warning of illness) (there were many, many stages in the ebbing of her love for him, but it was always *ebbing*—*D. H. Lawrence*)

Ana dwindle, diminish, *decrease

Ant rise: revive —**Con** *increase, augment: *expand, swell, dilate: mount, soar, tower, surge (see RISE)

abatement *deduction, rebate, discount

Ant addition —**Con** increment, accretion, accession (see ADDITION): increase, augmentation, enlargement (see corresponding verbs at INCREASE)

abbey *cloister, convent, nunnery, monastery, priory

abbreviate *shorten, abridge, curtail

Ana reduce, *decrease, lessen: *contract, compress, shrink, condense: attenuate, extenuate (see THIN)

Ant elongate, lengthen —**Con** *extend, prolong, protract: enlarge, *increase: *expand, amplify, dilate

abdicate, renounce, resign are synonymous when they are used in the sense of to give up formally or definitely a position of trust, honor, or glory, or its concomitant authority or prerogatives. **Abdicate** is the precise word to use when that which is relinquished involves sovereign or inherent power; it is applied specifically to the act of a monarch who gives up his throne, but in extended use it may also be applied to any act involving surrender of an inherent dignity or claim to preeminence (the father image of the chancellor casts a long and overpowering shadow over a people which has in the past *abdicated* its political thinking and social sovereignty to the paternalistic leader—*Handler*) **Renounce** is often used in place of *abdicate* (the king *renounced* his throne) especially when sacrifice for a greater end is intentionally implied. So strong is this implication and also that of finality in *renounce* (see also ABJURE) that it and its derivative **renunciation** often connote self-denial or surrender for the sake of moral or spiritual discipline. Consequently one *renounces* not only a right, a title, an inheritance, but also some desired or desirable possession (she remains . . . the sort of woman who has *renounced* all happiness for herself and who lives only for a principle—*T. S. Eliot*) **Resign** is used in reference chiefly to positions held on tenure and formally relinquished; ordinarily it implies asking permission to leave a position or office before the expiration of a term.

Ana *relinquish, surrender, abandon, leave

Ant assume: usurp —**Con** *arrogate, appropriate, confiscate

abdomen, belly, stomach, paunch, gut are synonyms when naming the front part of the human trunk below the chest (crawl on his *stomach*) (crawl on his *belly*) (an appendectomy scar on his *abdomen*) In technical usage **abdomen** more specifically denotes the cavity below the diaphragm (and sometimes above the brim of the pelvis) together with the structures in that cavity and the walls (often the front wall) enclosing it (a pain in the *abdomen*) (the risks inherent in all surgery on the *abdomen*) **Stomach** in non-technical use is interchangeable with *abdomen* but technically it is restricted to the saccular abdominal organ in which the earlier processes of digestion take place (a blow to the *stomach*) (the digesting mass or chyme in the *stomach* is continually churned . . . by muscular activity of the walls—*Potter*) **Belly** and **paunch** are decidedly informal terms that, when used in place of *abdomen*, suggest roundness and protuberance (fell flat on his *belly* in the

mud) <a comfortable *paunch* swelled out beneath the buttons of his dinner jacket—*Basso*> **Gut** in technical use denotes the alimentary canal or one of its parts <the embryonic *gut* arises from the third germ layer> <the blind *gut* or cecum> In general use it is interchangeable with *belly* or *paunch* but in the plural, especially when designating the abdominal contents (viscera, intestines), it is usually considered vulgar although the corresponding verb is freely used of the evisceration of a carcass for food <*gut* a herring>

abduct, kidnap are sometimes employed without distinction as denoting to carry off (a person) surreptitiously for an illegal purpose. In general use **kidnap** is the more specific term because it connotes seizure and detention for ransom. In law, however, the reverse is true, for the verbs acquire their meanings from the rigid technical definitions of *kidnaping* and *abduction*. **Kidnaping** is the legal term of wider application, implying that a person has been seized by violence or fraud and detained against his will or that of his legal guardian. **Abduction** is the carrying off of a girl (usually one below the legal age of consent), either against her will or with her consent, for marriage or seduction. Consequently in law *kidnaping* and *abduction* and *kidnap* and *abduct* can be used interchangeably only when the person carried off is a girl below a fixed age, or when seizure and detention are against her will and the motive is marriage or rape.

Ana seduce, entice, *lure, inveigle

Con *rescue, ransom, redeem, deliver

aberrant atypical, *abnormal

Ana divergent, *different, disparate: *irregular, anomalous, unnatural: *exceptional: singular, peculiar, odd, *strange, eccentric

Ant true (to a type) —**Con** *usual, wonted, customary: normal, *regular, typical, natural

aberration 1 *deviation, deflection

Ana abnormality, aberrancy (see **ABNORMAL**): *error, blunder, mistake, slip, lapse: *fault, failing; anomaly (see **PARADOX**)

Ant conformity: regularity —**Con** normality (see **REGULAR**): norm, *average, mean: agreement, correspondence, accord (see corresponding verbs at **AGREE**)

2 **aberration, derangement, alienation**, as here compared, denote mental disorder. **Aberration** while usable to designate any form of mental unsoundness typically denotes a minor or transitory disorder insufficient to constitute insanity. **Derangement** applies to any functional mental disturbance whether permanent or not. **Alienation** implies an estrangement from a normal or usual mental or emotional state <I had been two or three nights without sleep, and I had fallen into the state of *alienation* that fatigue brings on—*Webber*> and in forensic use specifically denotes a becoming or being insane.

Ana *insanity, lunacy, mania, dementia: *delusion, hallucination, illusion: *mania, delirium, hysteria, frenzy

Ant soundness (of mind)

abet *incite, foment, instigate

Ana aid, assist, *help: back, *support, uphold: cooperate, concur (see **UNITE**): forward, further, promote (see **ADVANCE**)

Ant deter (with a personal subject) —**Con** *frustrate, thwart, foil, balk, circumvent

abettor accessory, accomplice, *confederate, conspirator

abeyant dormant, quiescent, *latent, potential

Ana deferred, suspended, postponed, stayed, intermitted (see **DEFER**): suppressed, repressed (see **SUPPRESS**)

Ant operative: active: revived —**Con** live, dynamic (see **ACTIVE**): *living, alive: renewed, restored, refreshed (see **RENEW**)

abhor abominate, loathe, detest, *hate

Ana *despise, condemn, scorn: shun, avoid, eschew (see **ESCAPE**)

Ant admire (*persons, their qualities, acts*): enjoy (*things which are a matter of taste*) —**Con** *like, love, relish, dote: cherish, treasure, prize, value (see **APPRECIATE**): court, woo, solicit (see **INVITE**): esteem, respect, regard (see under **REGARD** *n*)

abhorrence detestation, loathing, abomination, hatred, hate (see under **HATE** *vb*)

Ana distaste, repugnance, repellency (see corresponding adjectives at **REPUGNANT**): horror, dismay (see **FEAR**)

Ant admiration: enjoyment —**Con** esteem, *regard, respect: liking, relish (see **LIKE** *vb*): love, affection, *attachment

abhorrent 1 abominable, *hateful, detestable, odious

Ana *contemptible, despicable, scurvy: *execrable, damnable

Ant admirable: enjoyable —**Con** grateful, agreeable, *pleasant, pleasing, gratifying, welcome: *delightful, delectable

2 *repugnant, repellent, obnoxious, distasteful, invidious

Ana *antipathetic: uncongenial, unsympathetic (see **INCONSONANT**): foreign, alien (see **EXTRINSIC**)

Ant congenial —**Con** attractive, alluring, captivating (see under **ATTRACT**): tempting, enticing, seductive (see corresponding verbs at **LURE**)

abide 1 *stay, wait, remain, tarry, linger

Ana dwell, *reside, live, sojourn, lodge: *stick, cleave, cling, adhere

Ant depart —**Con** *go, leave, quit: *move, remove, shift

2 endure, last, persist, *continue

Ana *stay, remain, linger: subsist, exist, live (see **BE**)

Ant pass *vi* —**Con** flee, fly, *escape: *flit

3 endure, *bear, suffer, tolerate, stand, brook

Ana submit, *yield, bow, defer: acquiesce, accede, consent (see **ASSENT**): accept, *receive, take

Con withstand, oppose, combat, *resist: *decline, refuse, spurn: shun, avoid, evade, elude (see **ESCAPE**)

ability, capacity, capability are often confused in use. **Ability** primarily denotes the quality or character of being able (as to do or perform) and is applied chiefly to human beings. **Capacity** in its corresponding sense means the power or more especially the potentiality of receiving, holding, absorbing, or accomplishing something expressed or understood and is said of persons or things. Thus one may speak of a child's *ability* to learn but not of the hall's *ability* to seat 2000 persons; on the other hand, a child's mental *capacity* and the hall has a seating *capacity* of 2000 are both acceptable. In general, *ability* suggests actual power, whether native or acquired, whether exercised or not <once more he had shown his *ability* to handle a delicate situation to the credit of his government and himself—*W. C. Ford*> *Capacity* on the other hand stresses receptiveness, or in reference to man's intellectual, moral, or spiritual nature, more explicitly, responsiveness, susceptibility, or aptitude. *Capacity* therefore suggests potential, as distinguished from actual or, especially, manifest power. Thus, *ability* to weep, the *ability* to work, the *ability* to pay, are not respectively identical in meaning with the *capacity* for tears, the *capacity* for work, the *capacity* for payment. The phrases of the first group mean that one can weep (because his tear glands are normal), one can work (because strong or trained), one can pay (because he has the money): those of the second group indicate, in the first case, a special sensitiveness to what is pathetic; in the second case, a readiness to work as hard as is necessary on any or every

occasion; in the third case, the qualities of mind and character that promise earning power and imply a recognition of one's obligations (if Peter had a *capacity* for friendship, these speechless years had made it dumb—*Deland*) (we do not acquire the ability to do new deeds, but a new *capacity* for all deeds. My recent growth does not appear in any visible new talent—*Thoreau*) (the *capacity* of American idealism to survive a major disillusionment—*MacLeish*) **Capability** is the character in a person (less often, a thing) arising from the possession of the qualities or qualifications necessary to the performance of a certain kind of work or the achievement of a given end (testing the *capability* of the ear to distinguish pitches) (no applicant will be considered who does not offer proof of *capability*) As applied exclusively to persons, *capability* may mean competence, often special competence. This connotation is usually supplied or enforced by the context.

Ana *power, strength, might, force, energy; proficiency, skill, adeptness (see corresponding adjectives at PROFICIENT): aptitude, talent, genius, faculty (see GIFT): competence, qualification (see corresponding adjectives at ABLE) **Ant** inability, incapacity —**Con** impotence, powerlessness (see corresponding adjectives at POWERLESS): incompetence, incapability (see corresponding adjectives at INCAPABLE)

abject *mean, ignoble, sordid

Ana servile, slavish, menial (see SUBSERVIENT): *miserable, wretched; cringing, truckling, cowering (see FAWN): groveling (see WALLOW): abused, demeaned, humbled, humiliated (see ABASE)

Ant exalted (in rank, state, condition, mood, behavior): imperious (in manner speech, attitude) —**Con** arrogant, lordly, overbearing, supercilious (see PROUD): domineering, *masterful: aristocratic, patrician (see corresponding nouns at GENTLEMAN)

abjure, renounce, forswear, recant, retract are synonymous when they mean to abandon irrevocably and, usually, with solemnity or publicity. Except in the extended senses of *abjure*, *renounce*, and *forswear* they all imply the recall of one's word. **Abjure** and **renounce** are scarcely distinguishable when they imply solemn repudiation as of an oath or vow (he shall, before he is admitted to citizenship, declare on oath in open court that he . . . absolutely and entirely *renounces* and *abjures* all allegiance and fidelity to any foreign prince, potentate, state, or sovereignty—*U. S. Code*) In their extended senses, however, *abjure* distinctively suggests deliberate rejection or avoidance while *renounce* specifically connotes disclaiming or disowning (abjure force) (renounce one's principles) (if a man is content to *abjure* wealth and to forego marriage, to live simply without luxuries, he may spend a very dignified gentle life here—*Benson*) (he was later to *renounce* impressionism and to quarrel with most of the impressionists—*Read*) **Forswear** often adds to *abjure* (especially in the reflexive use of the verb or in the participial adjective *forsworn*) the suggestion of perjury or of culpable violation of a solemn engagement (I have sworn to obey the laws, and I cannot *forswear* myself—*Blackie*) It often means little more than to swear off (Mr. Dulles grants by implication that the Peking regime is the government of China. He insists that it *forswear* the use of force in advancing its ambitions—*New Republic*) **Recant** and **retract** stress the withdrawal of something professed or declared; *recant* always and *retract* often imply admission of error. One *recants*, however, something that one has openly professed or taught, as religious or scientific doctrines; one *retracts* something one has written or spoken, as a charge, a promise, an order (if Christians *recanted* they were to be

spared, but . . . if they persisted in their faith they were to be executed—*Latourette*) (a word informs your brother I *retract* this morning's offer—*Browning*)

Ana *forgo, forbear, eschew: abstain, *refrain: reject, repudiate, spurn (see DECLINE): abandon, *relinquish

Ant pledge (*allegiance, a vow*): elect (*a way of life, a means to an end, an end*) —**Con** plight, engage (see PROMISE): *choose, select, opt: own, avow, *acknowledge

able, capable, competent, qualified are close synonyms when they denote having marked power or fitness for work and are used attributively. Placed after the noun, *able* (followed by *to* and infinitive) and *capable* (followed by *of*) suggest mere possession of ability or capacity without any clear indication of its extent or quality (they must be *capable* of living the life of the spirit . . . they must be *able* to cope intelligently with weighty problems of public policy—*Grandgent*) In general *competent* and *qualified* in predicative use suggest mere fitness in the one case and sufficient training in the other (a servant *competent* to take full charge) (headmasters and education authorities want to be able to distinguish between those who are *qualified* to teach . . . and those who are not—*Huxley*) On the other hand all four words are manifestly richer in implications when (especially in attributive use) they are thought of as characterizing persons or their activities. **Able** then suggests ability markedly above the average; it often connotes power of mastery; it does not exclude the connotation of promise even when the emphasis is on performance (*able* boys and girls will . . . submit willingly to severe discipline in order to acquire some coveted knowledge or skill—*Russell*) **Capable** stresses possession of qualities such as adaptability, resourcefulness, versatility, industry, or efficiency and seldom indicates, apart from its context, the specific ability involved (pretty and charming, but stupid . . . because she believes men prefer women to be useless and extravagant; if left to herself she would be a domestic and *capable* person—*Millay*) **Competent** and **qualified** are used especially to characterize a person or his activities in relation to a specific calling (a *competent* housekeeper) (a *qualified* accountant) *Competent* implies the ability to satisfy capably all the special demands or requirements of a particular situation, craft, or profession, but it does not necessarily imply, as *qualified* usually does, compliance with set standards such as special training and the testing of one's competence at the end of such training (a *qualified* engineer) (a *competent* portraitist knows how to imply the profile in the full face—*Huxley*)

Ana skilled, skillful, *proficient, expert: efficient, *effective: clever, brilliant, *intelligent, smart

Ant inept (by nature, training): unable —**Con** *incapable, incompetent, unqualified: inefficient, *ineffective: mediocre, fair, indifferent (see MEDIUM): maladroit (see AWKWARD)

abnegate sacrifice, *forgo, eschew, forbear

Ana renounce, *abdicate: surrender, abandon, *relinquish, waive: abstain, *refrain

Ant indulge (in) —**Con** gratify, delight, regale, rejoice, gladden, *please: *satisfy, content

abnegation self-abnegation, *renunciation, self-denial

Ana forgoing, forbearance, eschewal (see corresponding verbs at FORGO): abstinence, abstemiousness, continence, *temperance: restraining, curbing, bridling (see RESTRAIN)

Ant indulgence, self-indulgence —**Con** intemperance, incontinence (see affirmative nouns at TEMPERANCE)

abnormal, atypical, aberrant mean deviating markedly from the rule or standard of its kind. All are used in the sciences, as in biology and psychology, to express non-

conformity to type. **Abnormal** frequently connotes strangeness or excess and sometimes, as in *abnormality*, deformity or monstrosity (power when wielded by *abnormal* energy is the most serious of facts—*Henry Adams*) In psychology, as applied to persons, *abnormal* often suggests poorer than normal performance or poorer than normal adjustment to the conditions of life and is equivalent to *subnormal*; in general use better than normal powers are often implied (can envision the future in the light of what he remembers of the past. His powers of recollection . . . are *abnormal*—*R. L. Taylor*) **Atypical** stresses divergence upward or downward from the established norm of some group, kind, or stage (as of development) (atypical reactions) (stealing is to be looked upon as atypical behavior . . . not the customarily accepted type of response that we expect from children—*G. E. Gardner*) **Aberrant** seldom loses its literal implication of wandering or straying; in the sciences, where it is applied to departures from type, it carries none of the extra connotations of *abnormal* and is less restricted in its reference than *atypical* (aberrant forms of a botanical species) In general use it often suggests moral deviation (such a choice must argue *aberrant* senses, or degenerate blood—*Kingsley*)

Ana *irregular, unnatural, anomalous; unusual, unwanted, uncustomary, unaccustomed (see affirmative adjectives at **USUAL**): *monstrous, prodigious

Ant normal —**Con** *regular, typical, natural; ordinary, *common, familiar: *usual, wanted, customary

abode dwelling, residence, domicile, *habitation, home, house

abolish, annihilate, extinguish, abate share the meaning to make nonexistent. **Abolish** seldom refers to purely physical objects but rather to such things as are the outgrowth of law, custom, human conception, or the conditions of human existence (attempts to *abolish* slavery) (a proposal to *abolish* the income tax) (no plan will be acceptable unless it *abolishes* poverty—*Shaw*) **Annihilate** distinctively implies destruction so complete that everything involved is wiped out of existence and cannot be revived in any form (the realization that for the first time the homes and cities of the United States itself can be *annihilated* by enemy attack—*Crawley*) **Extinguish** or its related noun **extinction** is often interchangeable with *annihilate* (or *annihilation*) but it stresses the power of the cause to overwhelm and suppress rather than the finality of the result (a religion of their own which was thoroughly and painfully *extinguished* by the Inquisition—*T. S. Eliot*) **Abate** in general use is far weaker in meaning than the foregoing terms and typically denotes a gradual decrease or dwindling rather than an immediate termination (the wind *abated* after sundown) (misfortune had *abated* the grandiosity of the Roman temper—*Buchan*)

In law **abolish** keeps close to its general sense of to make nonexistent; **annihilate** is sometimes used as an emphatic substitute for *abolish* (the appointment cannot be *annihilated*—*John Marshall*) **Extinguish** implies destruction of a right or obligation by some act or decision which nullifies it or makes it void. **Abate** implies termination especially by a legal decision (*abate* a nuisance) (*abate* an action or writ) (summoning me for failing to *abate* a smoky chimney—*Wodehouse*)

Ana extirpate, eradicate, wipe, *exterminate: obliterate, efface, blot out, expunge (see **ERASE**): negate, *nullify, annul, abrogate

Ant establish —**Con** *found, institute: *bear, produce, turn out: create, discover, *invent

abominable detestable, *hateful, odious, abhorrent

Ana *execrable, damnable, accursed, cursed: scurvy, despicable, *contemptible, sorry: loathsome, repulsive, revolting, repugnant, *offensive: horrid, *horrible

Ant laudable (*practices, habits, customs*): enjoyable, delightful —**Con** pleasing, *pleasant, gratifying: commendable, applaudable (see corresponding verbs at **COMMEND**): attractive, charming, enchanting (see under **ATTRACT**)

abominate loathe, detest, abhor, *hate

Ana *despise, contemn, scorn, disdain: *execrate, objugate, curse, damn

Ant esteem: enjoy —**Con** admire, respect, regard (see under **REGARD** *n*): relish, *like, love, dote

abomination 1 abhorrence, detestation, loathing, hatred, hate (see under **HATE** *vb*)

Ana scorn, despite, contempt, disdain (see under **DESPISE**): execration, objugation (see corresponding verbs at **EXECRATE**)

Ant esteem: enjoyment —**Con** admiration, respect, *regard: relish, gusto, zest, *taste

2 **Abomination, anathema, bugbear, bête noire** agree in meaning a person or thing from which one shrinks with intense dislike. Something is an **abomination** that provokes loathing, disgust, and extreme displeasure (lying lips are *abomination* to the Lord; but they that deal truly are his delight—*Prov* 12:22) (a wonderful wooden statue . . . now replaced by the usual metal *abomination*—*Norman Douglas*) Something is **anathema** (or *an anathema*) to one when it is banned from one's presence or dismissed from one's mind as being odious or beyond the pale. The word in this sense is always reminiscent of St. Paul's use (if any man love not the Lord Jesus Christ, let him be *Anathema*—*I Cor* 16:22) (had a flair for new writers. They were as welcome to him as they were *anathema* to most editors of that day—*Repllier*) (all plays are *anathema* to him, and he even disapproves of dancing bears—*Quiller-Couch*) Something is a **bugbear** to one when one anticipates encountering it with detestation and dread and therefore tries to evade or avoid it; often but not invariably the word connotes an imaginary basis for one's fears (what is the dire necessity and "iron" law under which men groan? Truly, most gratuitously invented *bugbears*—*T. H. Huxley*) (but to the world no *bugbear* is so great, as want of figure, and a small estate—*Pope*) One's **bête noire** is one's pet aversion, a person or thing one habitually or particularly avoids, often with superstitious fear (truth . . . the breath of the poet, the vision of the artist and prophet, the quarry of the scientist . . . the toy of the careless, the *bête noire* of the politician—*Forum*)

Ana plague, pest, annoyance (see corresponding verbs at **WORRY**): aversion, *antipathy

Ant joy —**Con** delight, *pleasure, delectation: gratification, regalement (see corresponding verbs at **PLEASE**)

aboriginal indigenous, autochthonous, *native

Ana primitive, primordial, primeval, pristine (see **PRIMARY**): savage, barbaric, *barbarian, barbarous

Con sequent, successive (see **CONSECUTIVE**): advanced, progressive (see **LIBERAL**): civilized, cultured (see corresponding nouns at **CIVILIZATION**)

abortion, miscarriage denote the premature expulsion of a fetus before it is capable of living independently. **Abortion** may connote purposeful induction of the process either illicitly in order to avoid childbearing or therapeutically to protect the life of the mother. In medicine, however, *abortion* sometimes denotes the expulsion of the human fetus through any cause during the first twelve weeks of pregnancy. **Miscarriage** differs from *abortion* in suggesting a natural expulsion rather than one produced artificially. In medicine *miscarriage* is used of any expul-

sion of the fetus occurring between the twelfth and twenty-eighth weeks and before the fetus is capable of living independently.

abortive fruitless, vain, *futile, bootless

Ana *immature, unmatured, unripe; unformed (see FORMLESS): ineffectual, *ineffective, inefficacious; unfortunate, unlucky (see affirmative adjectives at LUCKY)

Ant consummated —**Con** completed, concluded (see CLOSE vb): finished, accomplished, *consummate: effectual, *effective, efficacious

abound overflow, *teem, swarm

Ana predominate, preponderate (see corresponding adjectives at DOMINANT)

Ant fail, fall short —**Con** want, *lack, need, require: scant, skimp, scrimp (see corresponding adjectives at MEAGER)

about, concerning, regarding, respecting are synonymous prepositions when they take an object that names something which is the subject of talk, thought, or interest. **About** is usually interchangeable with any of the others without marked loss of meaning, but it alone may follow its object as well as precede it (talk *about* many things) (there is nothing to complain *about*). **Concerning** is more meaningful because it often retains its verbal implications of affecting and influencing (make laws *concerning* public welfare) *Regarding* and *respecting* suggest little more than *about*: however **regarding** is especially appropriate when its object names the goal or center of attention or thought (they avoided all discussion *regarding* the scandal) **Respecting** is felicitously employed when selectiveness or specification is to be implied (he had nothing to say *respecting* Spain) (there's no outwitting you *respecting* him—*Browning*)

above, over are synonymous prepositions when they indicate elevation in position. They seldom imply contact between that which is higher and that which is lower; as a rule they allow an interval. *Over* and *above* differ in that *over* usually implies verticality while *above* may or may not. Thus the entire second story of a building is *above* but only a small part of it is directly *over* one who stands on the ground floor. Between the extended senses analogous relations hold. *Over* and *above* agree in the idea of superiority but differ in the immediacy of reference. Thus, the rank of ambassador is *above* that of minister but the British ambassador is not *over* the Portuguese minister; he stands in that relation to his own subordinates only. Similarly *above* and *over* indicate a relationship of excess (his strength is *above* the average) (we now have *over* half the amount required) (we shall not be tempted *above* our power to resist) *Above* only, however, implies transcendence (this *above* all, to thine own self be true—*Shak.*)

Ant below

aboveboard *straightforward, forthright

Ana open, *frank, candid: honest, *upright, scrupulous: *fair, impartial, just: ingenuous, unsophisticated, artless (see NATURAL)

Ant underhand, underhanded —**Con** furtive, covert, surreptitious, *secret, clandestine: *dishonest, deceitful, mendacious: *crooked, devious

abracadabra *gibberish, hocus-pocus, mummary

Ana *magic, sorcery, thaumaturgy: amulet, charm (see FETISH)

Con sense, *meaning, significance, import

abrade, excoriate, chafe, fret, gall mean to affect a surface by rubbing, scraping, or wearing away. **Abrade** usually implies rubbing or scraping by something hard or harsh: when the surface rubbed or scraped is soft, injury results, but when it approaches the other in hardness, a smoothing or

polishing (as by grinding) may be achieved (the palms of his hands *abraded* by gravel) (the ship's side was *abraded* in the collision) (loose sand grains . . . may be hurled against projecting masses of rock with such force as to *abrade* . . . their surfaces by a natural sandblast—*Scientific Monthly*) (an abrasive is a substance used in *abrading* steel) **Excoriate** which literally implies a stripping or wearing away of the skin or hide usually suggests a peculiarly painful effect on something soft or tender made by something (as an abrasive or abrasion or a corrosive substance) that removes or destroys a protective layer such as the skin or mucous membrane (the ends of his fingers were *excoriated* by acid) (my lips . . . were *excoriated* as with vinegar and gall—*Brontë*) **Chafe** suggests a slight but persistent and painful or injurious rubbing of one thing upon another (objected to wearing wool which she said *chafed* her skin) (the hawsers were so *chafed* by rubbing against the wharf that they required replacement) **Fret** suggests an eating into or wearing away (the river *frets* away the rocks along its banks—*T. H. Huxley*) (dripping water *fretted* a channel through the stone) **Gall** is used especially with reference to animals and, less often, to persons: it implies a superficial injury such as an abrasion or blister made by friction (an ill-fitting saddle *galled* the horse's back)

All have extended usage with an implication of irritating or wearing. **Abrade** and **chafe** usually suggest a persistent cause (took refuge in a subdued blubbering, which soon *abraded* the teacher's nerves—*Perelman*) (a theater that is so physically uncomfortable as to *chafe* the playgoer's disposition even before the curtain rises—*N. Y. Times*) **Excoriate** is used rather specifically of a censuring so severe as to cause real distress or mental anguish (when his programs fail, the implementation, not the directive will be *excoriated*; the subordinates and volunteers, not the dictator will suffer—*Straight*) (*excoriated* the morality of the Gilded Age and yet was fascinated by some of its surface trappings—*J. D. Hart*) **Fret** and **gall** typically imply a causing of emotional wear and tear (the *galling* frictions are in the world today—*Benedict*) (that hidden bond which at other moments *galled* and *fretted* him so as to mingle irritation with the very sunshine—*George Eliot*)

Ana *scrape, scratch, grate, grind, rasp: *injure, damage, impair, mar: *irritate, exasperate

abridge *shorten, curtail, abbreviate, retrain

Ana condense, *contract, compress, shrink: *cut, slash:

*limit, restrict: reduce, diminish, *decrease

Ant expand: extend —**Con** amplify, swell, distend (see EXPAND): lengthen, elongate, prolong, protract (see EXTEND): enlarge, augment, *increase

abridgment, abstract, epitome, brief, synopsis, conspectus mean a condensation of a larger work or treatment, usually one already in circulation. **Abridgment** implies reduction in compass with the retention of relative completeness (the current acting versions of many of Shakespeare's plays are *abridgments*) (an *abridgment* of a dictionary) **Abstract** implies condensation of a lengthy treatise or of a proposed lengthy treatment and stresses concentration of substance (*abstracts* of state papers) (an *abstract* of a lecture) **Epitome** implies concentration of the essence or pith of something (as a long poem, essay, or treatise) into the briefest possible statement usually so as to acquire a value of its own (the *Paternoster*, Christ's prayer, which is . . . [an] *epitome* . . . of all the psalms and prayers written in the whole scripture—*Hooper*) Both *abstract* and *epitome* are used also in extended senses in reference to persons or things, the former stressing one or other (of the persons or things referred to) as a summary, the latter as a type representing a whole (a man who is the *abstract*

of all faults that all men follow—*Shak.*) <a man so various that he seemed to be not one, but all mankind's *epitome*—*Dryden*> **Brief** is usually narrowly applied in legal use to a concise statement of a client's case made out for the instruction of counsel in a trial (called specifically *trial brief*) or to a statement of the heads or points of a legal argument submitted to the court (*brief of argument*). **Synopsis** and **conspectus** imply the giving of the salient points of a treatise or subject so that it may be quickly comprehended. *Synopsis*, however, often suggests an outline or series of headings and *conspectus* a coherent account that gives a bird's-eye view <provide in advance a *synopsis* of the lectures> <the book will serve as a *conspectus* of Chinese history>

Ana digest, précis, *compendium, sketch, syllabus

Ant expansion —**Con** paraphrase (see TRANSLATION); *development

abrogate 1 *annul, vacate, quash, void

Ana *abolish, extinguish, abate

Ant institute (by *enacting, decreeing*) —**Con** *ratify, confirm: establish, *found

2 *nullify, annul, negate, invalidate

Ana *abolish, annihilate, extinguish: *destroy, demolish: *ruin, wreck: cancel, obliterate, blot out (see ERASE)

Ant establish, fix (a *right, a character, a quality, a custom*) —**Con** settle (see SET); uphold, *support

abrupt 1 *steep, precipitous, sheer

Ana perpendicular, *vertical, plumb

Ant sloping —**Con** *level, flat, plain, plane, even, smooth: slanting, inclined (see SLANT *vb*)

2 sudden, *precipitate, headlong, impetuous, hasty

Ana quick, speedy (see FAST): hurried, hastened (see SPEED); unceremonious (see *ceremonious* under CEREMONIAL): curt, brusque (see BLUFF)

Ant deliberate, leisurely —**Con** *slow, dilatory, laggard: easy, *comfortable, restful

abscess, boil, furuncle, carbuncle, pimple, pustule all denote a localized swollen area of infection containing pus. **Abscess** is the most general term, applying to a collection of pus surrounded by inflammation whether in the skin or in the substance of a part or organ and whether discharging through an opening or fistula or being gradually reabsorbed <an *abscess* at the root of a tooth> <a line of small *abscesses* where his belt had chafed him> **Boil** and **furuncle** both mean a swollen painful nodule in the skin caused by bacteria that enter skin glands or hair follicles and set up a purulent infection which terminates by rupture of the skin and discharge of a core of pus and broken-down tissue cells. Though *boil* is commoner in general use, *furuncle* is often preferred in medical communication. A **carbuncle** is a large and severe boil that occurs especially on the back of the neck, is often accompanied by fever, and ultimately discharges through several openings. A **pimple** or **pustule** is a small superficial pus-containing elevation of the skin that usually subsides without rupturing; more specifically *pimple* is used of the typical lesions characterizing acne while *pustule* implies no specific syndrome.

abscond decamp, flee, fly, *escape

Ana depart, leave, quit, *go

Ant give (*oneself*) up —**Con** stay, wait, remain, abide: confess, *acknowledge

absence *lack, want, dearth, defect, privation

Ana *need, necessity, exigency: deficiency (see corresponding adjective at DEFICIENT); destitution (see corresponding adjective at DEVOID); void, vacuum (see HOLE)

Ant presence —**Con** abundance, copiousness, plenty (see corresponding adjectives at PLENTIFUL)

absent *adj* preoccupied, *abstracted, absentminded,

distraught

Ana engrossed, absorbed, *intent, rapt: heedless, in-advertent (see CARELESS): oblivious, unmindful, *forgetful

Ant attentive —**Con** *thoughtful, considerate: attending, listening, hearkening (see ATTEND)

absentminded absent, *abstracted, preoccupied, distraught

Ana inattentive, thoughtless, inconsiderate (see affirmative adjectives at THOUGHTFUL); heedless, inadvertent (see CARELESS): unobserving, unseeing, unperceiving, unnoticed (see affirmative verbs at SEE)

Ant wide-awake —**Con** *watchful, alert, vigilant: attentive (see THOUGHTFUL)

absolute 1 *pure, simple, sheer

Ana *perfect, whole, entire: *real, true: *abstract, ideal: *consummate, finished

Ant mixed, qualified —**Con** incomplete (see affirmative adjective at FULL): imperfect, unentire, unintact (see affirmative adjectives at PERFECT)

2 **Absolute, autocratic, arbitrary, despotic, tyrannical, tyrannous** mean exercising power or authority without external restraint. **Absolute** does not of itself add any further implication to this general denotation. It is restricted in application chiefly to words for authority or for one in authority <an *absolute* monarch> <*absolute* control> <they held their subjects with an *absolute* hand as all communistic leaders do—*F. M. Brown*> **Autocratic** implies assumption or exercise of absolute power or authority; though it is not necessarily opprobrious, it often connotes egotistical consciousness of power and haughty imposition of one's own will <let the Emperor turn his nominal sovereignty into a real central and *autocratic* power—*Belloc*> **Arbitrary** implies the exercise and usually the abuse of power in accord with one's opinion of the moment, free of such reasoned guides as constitution and laws which make for consistent and reasonably predictable action <all the constitutional safeguards of English freedom were swept away. *Arbitrary* taxation, *arbitrary* legislation, *arbitrary* imprisonment were powers claimed without dispute and unsparingly used by the Crown—*J. R. Green*> **Despotic** and **tyrannical** are stronger than *autocratic, despotic* implying the arbitrary and imperious exercise of absolute power or control and *tyrannical* the abuse of such power or control frequently through harshness, oppression, or severity <the most *despotic* system of government that history has ever known, Bolshevism, parades as the very incarnation of the principles of equality and liberty of all men—*Von Mises*> <proofs . . . that the people, when they have been unchecked, have been as unjust, *tyrannical*, brutal, barbarous, and cruel as any king . . . possessed of uncontrollable power—*Adams*> <how could I have borne to become the slave of her *tyrannical* humors?—*Burney*> **Tyrannous** is more frequently used of things than of persons <a . . . skeptical smile, of all expressions the most *tyrannous* over a susceptible mind—*George Eliot*>

Ana *totalitarian, authoritarian: *dictatorial, magisterial: domineering, imperious, *masterful

Ant restrained: limited —**Con** circumscribed, restricted (see LIMIT *vb*): irresponsible, unanswerable, unamenable (see affirmative adjectives at RESPONSIBLE)

3 *ultimate, categorical

Ana ideal, transcendent, transcendental (see ABSTRACT): independent, autonomous, *free, sovereign: *infinite, eternal, boundless

Ant conditioned —**Con** relative, *dependent, conditional, contingent: circumscribed, limited, restricted (see LIMIT *vb*)

absolution *pardon, amnesty

Ana forgiveness, remission (see corresponding verbs at EXCUSE)

Ant condemnation —*Con* censure, reprobation, reprehension (see corresponding verbs at CRITICIZE)

absolve exonerate, acquit, *exculpate, vindicate

Ana pardon, forgive, remit (see EXCUSE): release, *free, discharge

Ant hold (to a promise, an obligation): charge (with a sin, the blame, the responsibility) —*Con* blame (see CRITICIZE): *sentence, condemn, doom: *punish, discipline, chasten

absorb 1 **Absorb, imbibe, assimilate** can all mean to take (something) in so as to become imbued with it or to make it a part of one's being. The original meaning of **absorb**, to swallow up (both literally and figuratively), has been retained in spite of the development of a later and more common sense, to soak up (both literally and figuratively). When the former idea is stressed, *absorb* implies the loss of identity of that taken in (the trust *absorbed* three small corporations) (in England . . . the aristocracy are subordinate to the middle class, which is gradually *absorbing* and destroying them—*T. S. Eliot*) When soaking up is implied, *absorb* often suggests enrichment of the recipient (the roots of plants *absorb* moisture) (an adult reader with trained habits of attention and concentration will *absorb* the contents of a book with . . . speed and retentiveness—*Eliot*) In its literal sense *imbibe* usually implies drinking or inhaling (imbibe intoxicating liquors) (we did not *imbibe* an undiluted air—*N. E. Nelson*) However *imbibe*, like *absorb*, often connotes soaking up (the ground *imbibes* (or *absorbs*) moisture) In its figurative sense *imbibe*, like *absorb*, implies a process of learning, but it often carries the suggestions that the process has been unconscious and that the effect has been noticeable or profound (the pupils *imbibe* no respect for intellectual values at home, and find none among their schoolfellows—*Inge*) (twelve years he wandered, *imbibing* wisdom from every source, sitting at every shrine, tasting every creed—*Durant*) **Assimilate** implies not only absorption but also the conversion of what is absorbed into the substance of the assimilating body. In its narrow sense it applies especially to physiological processes (the body *assimilates* digested food into its protoplasm) In its figurative use it often suggests lasting enrichment without loss of integrity or unity (poets . . . who *assimilate* a number of influences and construct an original speech from them—*Day Lewis*) Sometimes it stresses completeness of fusion and consequent loss of identity (races incapable of *assimilation*)

Ana *soak, saturate, impregnate: *receive, take: incorporate, embody (see IDENTIFY)

Ant exude, give out —*Con* *eject, expel: *throw, cast 2 engross, *monopolize, consume

Ana fix, *fasten: rivet, *secure: immerse, submerge (see DIP)

Ant dissipate (time, attention, energies) —*Con* *scatter, disperse, dispel: *deplete, drain, exhaust

absorbed *intent, engrossed, rapt

Ana immersed (see DIP): riveted (see SECURE vb): fixed, fastened (see FASTEN)

Ant distracted —*Con* absent, absentminded, distraught, *abstracted: wandering, straying, rambling (see WANDER)

absorbing *interesting, engrossing, intriguing

Ant irksome

abstain *refrain, forbear

Ana *forgo, eschew, abnegate: *decline, refuse, spurn, reject: desist (see STOP)

Ant indulge —*Con* pamper (see INDULGE): *satisfy, sate, surfeit, cloy, gorge, glut: gratify, regale (see PLEASE)

abstemious see under *abstemiousness* at TEMPERANCE

abstemiousness abstinence, *temperance, sobriety, continence

Ana self-denial, self-abnegation (see RENUNCIATION): asceticism, austerity (see corresponding adjectives at SEVERE)

Ant gluttony —*Con* greed, rapacity (see CUPIDITY): epicurism (compare EPICURE)

abstinence *temperance, continence, abstemiousness, sobriety

Ana forbearance, refrainment (see corresponding verbs at REFRAIN): forgoing, eschewal, abnegation (see corresponding verbs at FORGO): *renunciation, self-denial, self-abnegation

Ant self-indulgence —*Con* greediness, covetousness, graspingness, acquisitiveness (see corresponding adjectives at COVETOUS): satisfying, contenting (see SATISFY): gorging, sating, surfeiting (see SATIATE)

abstract *adj* **Abstract, ideal, transcendent, transcendental** are closely analogous rather than synonymous terms. The difference in meaning between *abstract* and *ideal* is not apparent when they are applied to things which are admirable in actuality as well as in idea, as a virtue or a desirable quality or attribute (abstract (or ideal) justice) (ideal (or abstract) morality) When, however, they are applied to the name of a category known through actually existing representatives, they reveal their fundamental differences in meaning; for **abstract** implies the formulation of the idea by *abstraction*, a logical process in which the mind selects the characters common to every known member of a species or every known instance of a quality and builds up a conception (technically, a *concept*) which describes no one actually existing thing or instance, but covers all things of the same kind or marked by the given quality (man in the *abstract*) (to shed tears over *abstract* justice and generosity, beauty, etc., and never to know these qualities when you meet them—*James*) (poetic theory is almost invariably an *abstraction* from poetic practice—*Day Lewis*) **Ideal** may or may not imply abstraction; very often it suggests the exercise of imagination or the adding and the elimination of characteristics as the mind seeks a conception of a thing in its perfection (ideal man) (Plato, in the construction of his *ideal* republic, is thinking . . . of the symmetry and beauty of the whole—*Dickinson*) In general, therefore, *abstract* connotes apartness from reality and often lack of specific application to actual things (algebra . . . is more *abstract* than geometry—*Russell*) On the other hand, *ideal* very frequently connotes superiority to reality or, less often, fancifulness, and, at times, untruth (that lofty order of minds who pant after the *ideal* . . . [whose] emotions are of too exquisite a character to find fit objects among their everyday fellowmen—*George Eliot*) **Transcendent and transcendental**, though often used as equivalents of *ideal*, actually imply existence beyond experience and lack of correspondence to reality as known through the senses. Thus in careful use *transcendent* (or *transcendental*) beauty is not the perfection of the beauty that is known, but a supersensual beauty which has no parallel in experience and which cannot be apprehended through any likeness in actuality (the idea that God is *transcendent* . . . exalted above the world . . . is yielding to the idea of God as immanent in his creation—*Allen*) In Kant's philosophy they are distinguished. What is *transcendent* is both beyond experience and beyond human knowledge; what is *transcendental* is beyond experience yet knowable, because the mind possesses knowledge not derived from experience but inherent in its own constitution and essential to its understanding of experience. Thus space and time, in

Kant's philosophy, are *transcendental ideas*.

Ana *universal, general, generic: specific (see SPECIAL):

*ultimate, absolute, categorical

Ant concrete —**Con** practical (see PRACTICABLE): *material, physical, corporeal, objective, phenomenal

abstract *n* brief, synopsis, epitome, *abridgment, conspectus

Ana sketch, précis, aperçu, *compendium, digest

Ant amplification —**Con** expansion, dilation (see corresponding verbs at EXPAND): enlargement (see corresponding verb at INCREASE)

abstract *vb* *detach, disengage

Ana *separate, part, divorce, divide: purloin, filch, *steal

Ant insert, introduce —**Con** interpolate, insinuate, interpose (see INTRODUCE): *replace

abstracted, **preoccupied**, **absent**, **absentminded**, **distraught** are comparable when they mean inattentive to what presently claims or demands consideration. **Abstracted** implies absorption of the mind in something other than one's surroundings, and often suggests reflection on weighty matters (then he sat and thought . . . in the concentrated, *abstracted way* he has . . . almost forgetting my presence—*Rose Macaulay*) **Preoccupied** implies unreadiness for any new demands on one's attention because one is already busy with other thoughts or occupations (Edna was so *preoccupied* with misgivings as to whether he wanted to marry her that she had never faced squarely the more important problem of whether she wanted to marry him—*Barnes*) **Absent** stresses inability to fix the mind on present concerns; it often connotes mental wandering rather than concentration on other things (Sir Joshua . . . was quite *absent* all the day, not knowing a word that was said to him—*Burney*) **Absentminded** implies that the mind is fixed elsewhere; it suggests abstractedness or preoccupation more than absentness (she would make some *absentminded*, irrelevant remark, as if she had not heard him—*Rölvaaq*) It often implies a mental habit rather than a present mood (*absentminded* professor) **Distraught** suggests inability to concentrate and also implies an agitated state of mind caused by worry or perplexity (Oh, if I wake, shall I not be *distraught*, environed with all these hideous fears?—*Shak.*) (*distraught* with grief for the dead queen—*Millay*)

Ana *intent, engrossed: oblivious, unmindful (see FORGETFUL): ignoring, overlooking, disregarding (see NEGLECT *vb*)

Ant alert —**Con** wide-awake, vigilant, *watchful: attentive, *thoughtful, considerate: observant, noting, noticing, seeing (see corresponding verbs at SEE)

abstruse *recondite, occult, esoteric

Ana *complex, complicated, intricate, knotty: *abstract, ideal: enigmatic, cryptic, dark, *obscure

Ant obvious, plain —**Con** *evident, manifest, clear, palpable: *easy, simple, facile: *clear, perspicuous, lucid

absurd silly, preposterous, *foolish

Ana ludicrous, ridiculous, *laughable, droll, funny, comic: *irrational, unreasonable: asinine, silly, fatuous, *simple

Ant rational, sensible —**Con** reasonable (see RATIONAL): *wise, sane, judicious, prudent: *logical

abundant copious, ample, *plentiful, plenteous

Ana abounding, teeming, overflowing (see TEEM): *profuse, lavish, luxuriant, lush, exuberant

Ant scarce —**Con** *infrequent, rare, uncommon: *meager, scant, scanty, skimpy, exiguous, sparse: *deficient

abuse *vb* **Abuse**, **misuse**, **mistreat**, **maltreat**, **ill-treat**, **outrage** all denote to use or treat a person or thing improperly or wrongfully. *Abuse* and *misuse* are capable of wider use than the others, for they do not invariably imply either

deliberateness or wantonness (I can't *abuse* your generosity to that extent. You're doing more than enough for me already—*Mackenzie*) (it turns a man's stomach to hear the Scripture *misused* in that way—*George Eliot*) **Abuse**, however, commonly suggests perversion of the ends for which something was intended (the constitution leaves them [the states] this right in the confidence that they will not *abuse* it—*John Marshall*) Sometimes it implies excess in use that injures or impairs (abuse one's strength) **Misuse**, by contrast with *abuse*, emphasizes the actual mistreatment or misapplication rather than its results (the intent of this regulation is highly commendable, namely to keep the Indians from being *misused*—*Hitchcock*) **Mistreat**, **maltreat**, and **ill-treat** usually imply a fault or an evil motive in the agent, such as meanness, culpable ignorance, or spitefulness (many more patients die from being *mistreated* for consumption than from consumption itself—*Lytton*) (the meter, though a well-known English critic has *maltreated* it of late, is a very fine one—*Saintsbury*) (have small compunction in *ill-treating* animals, because they have no souls—*Replier*) **Outrage** implies abuse so violent or extreme as to exceed all bounds (an act that *outraged* nature and produced the inevitable tragedy of the play—*Auchincloss*)

Ana hurt, *injure, harm, damage, impair, mar, spoil: *wrong, persecute, oppress: pervert, corrupt, *debase, debauch, vitiate

Ant respect, honor —**Con** esteem (see corresponding noun at REGARD): *revere, venerate, reverence: *commend, applaud, compliment: cherish, treasure, prize (see APPRECIATE)

abuse *n* **Abuse**, **vituperation**, **invective**, **obloquy**, **scurrility**, **billingsgate** can all denote vehemently expressed condemnation or disapproval. **Abuse**, the most general term, implies the anger of the speaker and stresses the offensiveness of the language (the extended vocabulary of barrack-room *abuse*—*Kipling*) (those thunderous combinations, that jeering and *abuse* which make Milton's prose such lively reading—*Huxley*) It may, however, imply hardly more than expression of personal disapproval or displeasure (a vague term of *abuse* for any style that is bad—*T. S. Eliot*) **Vituperation** suggests the overwhelming of someone or something with a torrent of abuse (presidents were nagged beyond endurance, and senators, and congressmen: no one could escape the vials of her *vituperation*—*Pattee*) **Invective** implies vehemence and bitterness in attack or denunciation and, often in distinction from *abuse*, connotes a command of language and skill in making one's points. It is the precise term when the attack is public and made in a good cause (John Bull stopped at nothing in the way of insult; but its blazing audacity of *invective* never degenerated into dull abuse—*Replier*) **Obloquy** suggests defamation and consequent disgrace (those who . . . stood by me in the teeth of *obloquy*, taunt and open sneer—*Wilde*) **Scurrility** stresses coarseness or indecency of language and emphasizes the quality of the abuse rather than the attack in itself (he was . . . interrupted in his defense by ribaldry and *scurrility* from the judgment seat—*Macaulay*) **Billingsgate** stresses more strongly than any of the other words the offensiveness, often foul or obscene, of the language of an attack (the more I humbled myself the more he stormed . . . provoking me with scandalous names that I could not put up with; so that I . . . returned his *billingsgate*—*Smollett*)

Ana aspersion, reflection, stricture, *animadversion: reviling, railing, rating, berating (see SCOLD *vb*): vilification, malignment (see corresponding verbs at MALIGN)

Ant adulation —*Con* praise, laudation, acclaim (see corresponding verbs at PRAISE): *encomium, panegyric, eulogy: commendation, applause, compliment (see corresponding verbs at COMMEND)

abusive, opprobrious, vituperative, contumelious, scurrilous apply chiefly to language or utterances and to persons as they employ such language: the words agree in meaning coarse, insulting, and contemptuous in character or utterance. **Abusive** means little more than this (*abusive* language) <an *abusive* master> <*abusive* satire> All the other terms carry specific and distinctive implications. **Opprobrious** suggests the imputation of disgraceful actions or of shameful conduct: it implies not only abusiveness but also severe, often unjust, condemnation <they desecrate the shrine . . . in every conceivable way . . . and level the most *opprobrious* language at the goddess herself—*Frazer*>. **Vituperative** implies indulgence in a stream of insulting language especially in attacking an opponent <the *vituperative* controversialists of the seventeenth century> <to restrain this employment of *vituperative* language—*J. S. Mill*>. **Contumelious** adds to *opprobrious* the implications of insolence and extreme disrespect and usually connotes the bitter humiliation of its victim <with scoffs and scorns and *contumelious* taunts—*Shak.*> <I . . . expose a chain of causes and effects that Roosevelt himself, if he were alive, would denounce as grossly *contumelious* to his native purity of spirit—and perhaps in all honesty—*Mencken*>. **Scurrilous** often approaches *vituperative* in suggesting attack and abuse but it always implies gross, vulgar, often obscenely ribald language <they never fail to attack the passengers with all kinds of *scurrilous*, abusive, and indecent terms—*Fielding*> <may plaster his clean name with *scurrilous* rhymes!—*Tennyson*>

Ana insulting, affronting, offending, outraging (see OFFEND): aspersing, maligning, vilifying (see MALIGN)

Ant complimentary: respectful —*Con* flattering (see corresponding noun at COMPLIMENT): panegyric, eulogistic (see corresponding nouns at ENCOMIUM): praising, lauding, extolling, acclaiming (see PRAISE *vb*)

abutment pier, *buttress

abutting contiguous, adjoining, *adjacent, tangent, conterminous, juxtaposed

Ana *close, near, nigh, nearby: joining, connecting (see JOIN): *nearest, next: impinging (compare *impingement* under IMPACT)

Con detached, disengaged (see DETACH): disconnected, disjointed, disassociated (see affirmative verbs at JOIN)

abysm *gulf, chasm, abyss

abysmal *deep, profound

Ana illimitable, *infinite

Con *superficial, shallow

abyss *gulf, chasm, abyssm

abyssal pelagic, oceanic, marine (see AQUATIC)

academic 1 scholastic, *pedantic, bookish

Ana *dry, arid: erudite, scholarly, *learned

Con unlettered, uneducated, untaught, unlearned, illiterate, *ignorant

2 *theoretical, speculative

accede acquiesce, *assent, consent, agree, subscribe

Ana concur, cooperate (see UNITE): *yield, submit, defer, relent: allow, permit, *let

Ant demur —*Con* *decline, refuse, reject, spurn: shy, stickle, stick, strain, balk (see DEMUR): *object, protest, kick: oppose, *resist, withstand

accelerate *speed, quicken, hurry, hasten, precipitate

Ana forward, further, *advance, promote: drive, impel (see MOVE)

Ant decelerate: retard —*Con* *delay, slow, slacken:

impede, obstruct, block, *hinder: *hamper, clog

accent *n* 1 stress, accentuation, *emphasis

Ana beat, pulse, throbb, pulsation (see under PULSATE): *rhythm, cadence, meter

2 intonation, *inflection

Ana pronunciation, enunciation, articulation (see corresponding verbs at ARTICULATE)

accentuation accent, stress, *emphasis

Ana *rhythm, cadence, meter: pronunciation, enunciation, articulation (see corresponding verbs at ARTICULATE)

Ant inaccentuation —*Con* evenness, steadiness, uniformity (see corresponding adjectives at STEADY)

accept *receive, admit, take

Ana *adopt, embrace, espouse: acquiesce, *assent, agree, subscribe

Ant reject —*Con* *decline, refuse, repudiate, spurn: disavow, disown, disacknowledge (see affirmative verbs at ACKNOWLEDGE): *deny, contradict, negative: ignore, disregard (see NEGLECT)

acceptance, acceptation have both at one time or another carried the meanings: the act or fact of accepting or the state of being accepted. Present usage, however, restricts their denotations. **Acceptance** only is used to denote the act of accepting <a blind *acceptance* of authority—*Inge*> or the state of one who accepts something, especially something inevitable or inescapable <all settled back into a sad sort of *acceptance* of the situation—*Deland*>. Both *acceptance* and *acceptation* may be used to denote the state of being accepted or especially of being approved or believed <metrical forms are conventional, and therefore rest . . . on *acceptance*—*Lowes*>. **Acceptation** tends, however, to confine itself to denoting the sense in which a word or expression is generally received <not . . . a cultivated man in the ordinary *acceptation* of the words—*Eliot*>

acceptation 1 *meaning, sense, signification, significance, import

2 *acceptance

access 1 ingress, *entrance, entrée, entry

Ana approaching or approach, nearing (see APPROACH *vb*): *admittance, admission: *way, route, passage: *door, portal, gate, gateway

Ant outlet —*Con* departure, withdrawal, retirement (see corresponding verbs at GO): retreat, recession (see corresponding verbs at RECEDE)

2 accession, attack, *fit, paroxysm, spasm, convulsion

Ana onset, onslaught, assault (see ATTACK): seizure, clutch, taking (see corresponding verbs at TAKE): twinge, *pain, stitch, pang, throe

accession 1 *addition, accretion, increment

Ant discard

2 access, attack, *fit, paroxysm, spasm, convulsion

Ana see those at ACCESS 2

accessory *n* 1 appurtenance, adjunct, *appendage

Ana concomitant, *accompaniment: *addition, accretion, increment

2 accomplice, abettor, *confederate, conspirator

Ant principal

accessory *adj* contributory, *auxiliary, subsidiary, adjuvant, ancillary, subservient

Ana secondary, collateral, tributary, *subordinate: concomitant, concurrent, coincident (see CONTEMPORARY): incidental, adventitious (see ACCIDENTAL)

Ant constituent, integral: principal (*in law*) —*Con* *inherent, intrinsic, constitutional, ingrained: essential, indispensable, requisite, *needful, necessary: fundamental, vital, cardinal (see ESSENTIAL)

accident 1 *quality, character, attribute, property

Ana mark, *sign, note, badge, token, symptom: characteristic, peculiarity (see corresponding adjectives at CHARACTERISTIC)

Ant substance (in *philosophy*)

2 *chance, hazard, luck, fortune, hap

Ana contingency, fortuity, adventitiousness (see corresponding adjectives at ACCIDENTAL)

Ant design, intent —**Con** calculation, circumspection (see under CAUTIOUS): *plan, plot, project, scheme: *intention, purpose

3 **Accident, casualty, mishap** are synonyms when they designate chance or a chance event bringing injury or loss. **Accident** is broadest in its application, being used of events that involve persons or things, or injuries or losses, serious or slight (he was crippled by the *accident*) (a railway *accident*) (owing to an *accident* to the machines one department was closed down) **Casualty** commonly implies destruction, especially of life, and is chiefly applied to an individual whose death, serious injury, or even desertion constitutes a loss to a military (or similar) force engaged in hazardous activities (the regiment suffered heavy *casualties*) As applied to insurance *accident* and *casualty* are usually distinguished: *accident insurance* is a provision against injury to oneself through accident; *casualty insurance* is a provision for indemnification for loss from accident (as fire or burglary) and especially for damages incurred through one's liability for injury or loss to others. **Mishap** as a rule is applied only to slight accidents, especially those involving disappointment or frustration (a day seldom passes without one *mishap* or another)

Ana *disaster, catastrophe: mischance, *misfortune, mishap

accidental, casual, fortuitous, contingent, incidental, adventitious. The last five of these words are synonyms of *accidental* but not always of one another. **Accidental** denotes simply either happening by chance (an *accidental* meeting) or not of the real or essential nature of a thing (the essential and the *accidental* values of a college education) *Casual, fortuitous,* and *contingent* come into comparison with *accidental* in the first of these senses; *incidental* and *adventitious* chiefly in the second sense. **Casual** so strongly stresses absence of prearrangement or premeditation that it tends to obscure the implication of chance (a *casual* discovery) (it was no *casual* re-encounter. He had been enticed into the place . . . with some sinister and perhaps deadly purpose—*Froude*) As applied to persons, their actions, their clothes, it often implies heedlessness or indifference (this strange landscape, which seemed so dull to the *casual* view—*Rourke*) ([the rector] had been very *casual* about visiting his parishioners—*Mackenzie*) Sometimes it is the appearance of carelessness or nonchalance and not the reality that is suggested (this sense of an audience made him deliberately *casual* in his bearing—*H. G. Wells*) **Fortuitous** so strongly implies chance that it sometimes connotes the absence, or seeming absence, of a cause (the good frame of the universe was not the product of chance or *fortuitous* concurrence of particles of matter—*Hale*) **Contingent** implies both possibility and uncertainty, the former because that which is so described may come about, the latter because the outcome is unpredictable owing to the possible operation of chance, of unseen causes, or of the possible influence of unforeseen events. *Contingent* is therefore always applied to what may come (the *contingent* advantages of a new law are to be distinguished from those that are immediate and certain) (men are inclined . . . to resist a truth which discloses the *contingent* character of their existence—

Niebuhr) (such arguments yield a provisional and *contingent* justification of moral beliefs—*Sat. Review*) **Incidental** may or may not imply chance; it typically suggests a real and often a designed relationship, but one which is secondary and nonessential. An *incidental* advantage or gain is one that may have been foreseen or sought after but not regarded as of first importance; *incidental* expenses are those that must be provided for in a budget because they are normal contingencies though they cannot be enumerated under any of the usual headings (the Irish question is only *incidental* to the larger question—*J. R. Lowell*) (although a great deal is heard about consumer and real estate credit controls, they are *incidental* to the control of overall bank credit—*Eccles*) *Incidental* sometimes implies contingency that amounts to a strong probability (ills *incidental* to old age) (labor problems *incidental* to rapidly expanding factories—*Amer. Guide Series: Mass.*) **Adventitious** conveys no necessary suggestion of chance but it does imply a lack of essential relationship. Something *adventitious* does not belong to the original and intrinsic nature of a thing but has been added (in works of imagination and sentiment . . . meter is but *adventitious* to composition—*Wordsworth*)

Ana haphazard, *random, hit-or-miss, chance: unintended, undesigned, unpurposed (see affirmative verbs at INTEND): contingent, *dependent, conditional

Ant planned: essential —**Con** intended, designed, purposed (see INTEND): plotted, projected, schemed (see corresponding verbs under PLAN *n*): *inherent, constitutional, intrinsic, ingrained: *innate, inborn

acclaim *vb* extol, laud, *praise, eulogize
Ana *applaud, cheer, root: *exalt, magnify: glorify, honor (see corresponding nouns at FAME)

Ant vituperate —**Con** revile, berate, rate (see SCOLD): *execrate, objurgate, damn: denounce, censure, reprobate (see CRITICIZE)

acclaim *n* acclamation, *applause, plaudits

Ana homage, *honor, reverence: renown, glory, éclat (see FAME): cheer (see corresponding verb at APPLAUD)

Ant vituperation —**Con** obloquy, *abuse, invective: condemnation, denunciation, reprobation, censure (see corresponding verbs at CRITICIZE)

acclamation acclaim, *applause, plaudits

Ana, Ant, Con see those at ACCLAIM *n*

acclimate acclimatize, *harden, season
Ana accustom, *habituate: *adapt, adjust, conform

acclimatize acclimate, *harden, season

Ana see ACCLIMATE

accommodate 1 adjust, *adapt, conform, reconcile

Ana *yield, submit, bow, defer: modify, *change, alter, vary: temper, *moderate, qualify

Ant constrain —**Con** *estrangle, alienate

2 *oblige, favor

Ana *help, aid, assist: gratify, gladden, *please: *indulge, humor

Ant incommode —**Con** *inconvenience, discommode, trouble: annoy, harass, harry, *worry: vex, irk (see ANNOY)

3 hold, *contain

Ana lodge, house, board, shelter, *harbor, entertain: take (in), *receive, admit

accompaniment, concomitant denote in common something attendant upon or found in association with another thing. Both may imply addition, but they vary chiefly in the kind of relationship connoted between the principal and the attendant things. **Accompaniment** often suggests enhancement by the addition of something appropriate (the piano *accompaniment* for a violin solo) (the usual *accompaniments* of a turkey dinner) (fame is not always the accom-

paniment of success) Sometimes it stresses concurrence or coincidence rather than causal connection (a Roman sedition was the all but invariable *accompaniment* of a Roman coronation—*Bryce*) **Concomitant**, by contrast, conveys the idea of customary or necessary association. It does not as a rule need the qualifying words (*invariable, essential, inevitable*) which so often precede it, for it implies in itself the qualities attributed by these words (disruption of routine is the *concomitant* of illnesses in a staff) (unemployment is the *concomitant* of a financial panic) (tuberculosis, hookworm, and infant mortality—the pathological *concomitants* of pauperism—*Handlin*)

accompany, attend, conduct, escort, convoy, chaperon mean to go or be together with; they differ chiefly in their implications as to the nature or purpose of the association. **Accompany** implies companionship and often, with a personal subject, equality of status (accompany a friend) Used of things, it stresses closeness of association (rain accompanied by wind) (the lightheadedness which accompanies fever—*Kipling*) **Attend** commonly implies the subordinate or inferior status of the accompanying person or thing (the prince was attended (rather than accompanied) by an equerry, a secretary, and a courier) Sometimes it suggests a service or courtesy (the General attended her himself to the street door—*Austen*) Sometimes it connotes following or coming in the wake of someone or something (a train of mourning friends attend his pall—*Gray*) (the Nemesis that attends upon human pride—*Dickinson*) **Conduct** usually retains an implication of guidance even when the subject is impersonal (conduct a blind man across the street) (conduct sightseers through a museum) (the pipe conducts water from a trough) Occasionally the emphasis is not on guidance but on conveyance or transmission (metals that conduct heat) **Escort and convoy** add to accompany the implication of protection. Both words and their corresponding nouns often suggest the use of an armed force as a guard, but there is a tendency to prefer *escort* when persons and *convoy* when things are protected. Also, *escort* is more often used for journeys on land and *convoy* for journeys by sea (soldiers escorted the caravan through the desert) (a destroyer convoyed the freighter through the submarine zone) *Escort*, however, often suggests (as *convoy* no longer suggests) attending as a courtesy or honor (three battleships escorted the visiting potentate's ship into the harbor) (escort a lady to her home after a party) **Chaperon** and its corresponding noun suggest propriety or sometimes supervision as the motive of the one who accompanies (agreed to chaperon the school picnic) (as if his intellect were a sort of chaperon to his imagination—*Evans*) In ordinary use they imply the presence of a mature woman or sometimes a married couple as the companion of young people (as at a dance or party) to ensure proper behavior (a literary scavenging party arranged by their English teacher who accompanied them as chaperon—*Morley*)

Ana associate, link, combine, *join: *guide, lead, pilot *Con* forsake, desert, *abandon: leave, quit, withdraw (see GO)

accomplice *confederate, accessory, abettor, conspirator **accomplish** achieve, effect, fulfill, discharge, execute, *perform

Ana complete, finish, conclude (see CLOSE): consummate (see corresponding adjective at CONSUMMATE): implement, *enforce

Ant undo —*Con* thwart, *frustrate, foil, circumvent: defeat, beat, lick (see CONQUER): *nullify, annul, negate

accomplished finished, *CONSUMMATE

Ana *proficient, skillful, skilled, adept, expert, masterly:

*versatile, many-sided, all-around

accomplishment attainment, *acquirement, acquisition

Ana *art, skill, craft: proficiency, adeptness, expertness (see corresponding adjectives at PROFICIENT)

accord *vb* 1 *agree, harmonize, correspond, tally, conform, square, jibe

Ana concur, coincide (see AGREE): blend, fuse, merge, coalesce (see MIX): cohere, adhere (see STICK)

Ant conflict —*Con* clash, collide, jar (see corresponding nouns at IMPACT): *differ, disagree: contrast, *compare 2 *grant, vouchsafe, concede, award

Ana deign, condescend (see STOOP): bestow, present, confer, *give

Ant withhold —*Con* *deny, gainsay: refuse (see DECLINE): hold, hold back, detain, reserve (see KEEP)

accord *n* 1 concord, consonance, *harmony

Ana agreement, acquiescence, consent (see corresponding verbs at ASSENT): union, solidarity, *unity: sympathy, affinity, *attraction

Ant dissension, strife: antagonism —*Con* *discord, conflict, difference, variance, contention: antipathy, animosity, hostility (see ENMITY)

2 *agreement, understanding

Ana pact, compact, treaty, entente, concordat (see CONTRACT)

accordingly so, consequently, *therefore, hence, then

accost *address, greet, hail, salute

Ana *speak, talk, converse: affront, *offend, insult

Con avoid, shun, elude, evade, *escape: ignore, slight, overlook (see NEGLECT)

account *n* 1 *use, service, advantage, profit, avail

Ana benefit (see corresponding verb at BENEFIT): usefulness, utility (see USE): *worth, value

Con futility, vanity, fruitlessness, bootlessness (see corresponding adjectives at FUTILE): unimportance, inconsequence, insignificance (see affirmative nouns at IMPORTANCE)

2 **Account, report, chronicle, version, story** denote a statement of actual events or conditions or of purported occurrences or conditions. An **account** is an oral or written, detailed, often firsthand statement (Lord Mountfalcon asked for an *account* of her passage over to the island; receiving distressingly full particulars—*Meredith*) A **report** is an account, usually of something witnessed or investigated, given to an employer or a superior (spies send in their *reports* in cipher) (the secretary gave a verbatim *report* of the conference) A **chronicle** is a detailed and extended account or report of events in their order of occurrence (for 'tis a *chronicle* of day by day, not a relation for a breakfast—*Shak.*) A **version** or **story** is a statement of purported facts. *Version* always and *story* often imply contrast with another statement of the same events and, usually, difference in details. But whereas *version* commonly implies difference of detail or of interpretation owing to limitations in each point of view, *story* often implies actual or suspected falsification (the Democratic and the Republican *version* of the state of the nation) (the witness had been primed to tell a different *story*) (he returned after a week's absence with a *story* of having been held captive by kidnappers)

account *vb* 1 *consider, deem, regard, reckon

Ana regard, esteem (see under REGARD *n*): rate, appraise, evaluate, assess, *estimate

Con underrate, underestimate, undervalue (see base words at ESTIMATE): disregard, disesteem (see affirmative verbs under REGARD *n*)

2 *explain, justify, rationalize

Ana *answer: expound, elucidate, interpret (see EXPLAIN)

accountable *responsible, answerable, amenable, liable
Ant unaccountable —**Con** *absolute, autocratic, despotic, tyrannical, arbitrary: irresponsible, inamenable, unanswerable (see affirmative adjectives at RESPONSIBLE)
accountant auditor, *bookkeeper
accouter equip, arm, outfit, *furnish, appoint
Ana array, attire, *clothe, dress; deck, *adorn, embellish, decorate
Con *strip, divest, dismantle
accredit 1 certify, *approve, endorse, sanction
Ana recommend, *commend: vouch, attest, *certify
Con reject, repudiate (see DECLINE): *disapprove, deprecate
 2 commission, *authorize, license
 3 credit, charge, assign, *ascribe, attribute, impute
Ana attach, *fasten: connect, link, associate (see JOIN)
accretion *addition, increment, accession
Ana adjunct, *appendage: adhesion, cohesion (see corresponding verbs at STICK): increase, augmentation, enlargement (see corresponding verbs at INCREASE)
Con diminution, dwindling, decrease (see corresponding verbs at DECREASE)
accumulate, amass, hoard imply in both literal and figurative usage a bringing together so as to make a store or great quantity. **Accumulate** implies a piling up by a series of increases rather than by a single complete act; it is applicable to almost anything that may increase in amount (unused books *accumulate* dust) (he will ever be gathering knowledge, *accumulating* experience, as he can—*Gerould*) (true poetry, however simple it may appear on the surface, *accumulates* meaning every time it is read—*Day Lewis*) **Amass** refers usually but not always to things that are regarded as valuable, such as money or treasures (amass a fortune) It frequently implies more imposing results than *accumulate* (scientific knowledge, painstakingly *amassed* by many devotees over an extended period of human history—*Geldard*) **Hoard** always implies storing up and frequently concealment of what is stored (squirrels *hoard* nuts for the winter months) Frequently *hoard* implies greed and, when used of money, avarice (a miser is one who *hoards* gold) (hoarding money is not a safe way of saving—*Shaw*)
Ana *gather, collect: *heap, pile, stack
Ant dissipate —**Con** *scatter, disperse, dispel: diminish, lessen, *decrease: *distribute, dispense, deal, dole
accumulative *cumulative, summative, additive
Ana aggregative, conglomerative (see corresponding nouns at AGGREGATE): multiplicative, augmentative (see corresponding verbs at INCREASE)
Con dissipating, dispelling, dispersing, scattering (see SCATTER): disintegrating, crumbling, decomposing (see DECAY vb)
accurate *correct, exact, precise, nice, right
Ana true, veracious (see corresponding nouns at TRUTH): *impeccable, errorless, flawless, faultless: punctilious, meticulous, *careful
Ant inaccurate —**Con** *careless, heedless, inadvertent: *slipshod, slovenly: fallacious (see under FALLACY)
accursed damnable, cursed, *execrable
Ana abominable, odious, *hateful, abhorrent, detestable: revolting, repulsive, loathsome, *offensive, repugnant
Ant blessed —**Con** admirable, estimable (see corresponding nouns at REGARD): *holy, sacred, divine: *honorable, honorary
accuse, charge, incriminate, indict, impeach, arraign denote in common to declare a person guilty of a fault or offense. **Accuse** is typically immediate and personal and often suggests directness or sharpness of imputation or censure; **charge** frequently connotes seriousness in the offense and

formality in the declaration; one may *accuse* a bystander of trying to pick one's pocket (an *accusation* which may become a formal *charge* before a magistrate); one *accuses* a man of cheating (an offense which one personally re-sents); one *charges* a man with cheating (an infraction of the rules of a game). **Incriminate** may mean to charge with crime or serious offense (your friend thinks he can clear Ken by *incriminating* poor Wayne—*G. V. Williams*) (careful study . . . has failed to show that any of the cultivable bacteria can be *incriminated* as the cause of colds—*Andrewes*) but in current use it more often means to involve or inculpate in crime (*incriminating* evidence) (the answer need not reveal a crime in order to be *incriminating*. It is enough if it . . . leads to proof of an illegal act—*Gressman*) **Indict** adds to *charge* in legal context the implications of a formal consideration of the evidence by a grand jury or in general use by someone acting in the role of jury and of a decision that the accused person should be called to trial or to an accounting (the jury refused to *indict* the men accused of arson) (I *indict* those citizens whose easy consciences condone such wrongdoings—*Roosevelt*) **Impeach** implies legally a charge of malfeasance in office formally brought against a public officer by a branch of the government constitutionally authorized to bring such charges (the House of Representatives *impeached* President Andrew Johnson of high crimes and misdemeanors) In nontechnical language *impeach* or its noun *impeachment* implies a direct charge which demands an answer (any intelligent and noble-minded American can with reason take that side . . . without having either his reason or his integrity *impeached*—*Kenneth Roberts*) ("You buy your loves." . . . he did not plead verbally against the *impeachment*—*Meredith*) **To arraign** is to call or bring a prisoner before a court to answer to the charge of an indictment (I was carried down to the Sessions house, where I was *arraigned*—*Defoe*) Figuratively it means to call a person or thing to public account for something done or omitted (arraigns the monks for teaching grammar rather than things spiritual—*H. O. Taylor*) (a despairing soliloquy . . . in which he *arraigns* the United States policy in relation to China—*Times Lit. Sup.*)
Ana denounce, blame, reprobate, censure, *criticize
Ant exculpate —**Con** exonerate, vindicate, acquit, absolve (see EXCULPATE)
accustom *habituate, addict, inure
Ana *adapt, accommodate, adjust: *harden, season, acclimatize
Ant disaccustom —**Con** alienate, wean, * estrange
accustomed wonted, customary, habitual, *usual
Ana natural, normal, *regular, typical: *common, ordinary, familiar
Ant unaccustomed —**Con** *strange, singular, peculiar, odd, queer, erratic: *infrequent, uncommon, rare, occasional
acerbity *acrimony, asperity
Ana sourness, acidity, tartness (see corresponding adjectives at SOUR): crabbedness, surliness, dourness, saturninity (see corresponding adjectives at SULLEN): bitterness, acidity (see corresponding adjectives at BITTER): harshness, roughness (see corresponding adjectives at ROUGH)
Ant mellowness —**Con** gentleness, mildness, blandness, smoothness (see corresponding adjectives at SOFT): amiableness, good nature, complaisance (see corresponding adjectives at AMIABLE)
ache *n* *pain, pang, throe, twinge, stitch
Ana *distress, suffering, agony, misery: anguish, heart-ache, heartbreak (see SORROW): hurt, *injury: torment, torture, rack (see corresponding verbs at AFFLICT)

Con relief, alleviation, assuagement, mitigation (see corresponding verbs at RELIEVE); ease, comfort (see REST)

achieve 1 accomplish, effect, *perform, fulfill, execute, discharge

Ana complete, finish, conclude (see CLOSE); surmount, overcome, *conquer

Ant fail (*to do something*), fail (in) —*Con* *begin, commence, start

2 attain, *reach, gain, compass

Ana win, secure, obtain, acquire, *get: *realize, actualize: *come, arrive

Ant miss (*getting or attaining*) —*Con* deviate, depart, *swerve: *escape, avoid, elude, shun

achievement *feat, exploit

Ana deed, act, *action: *victory, conquest, triumph: consummation, accomplishment (see corresponding adjectives at CONSUMMATE)

Ant failure —*Con* negligence, *neglect: omission, slighting (see corresponding verbs at NEGLECT); defeat, vanquishment, beating, licking (see corresponding verbs at CONQUER)

achromatic *colorless, uncolored

Ana *neutral, negative

Ant chromatic —*Con* colored, tinted, tinged (see corresponding nouns at COLOR)

acid *adj* acidulous, tart, *sour, dry

Ana acrid, *bitter: *sharp

Ant bland: sweet: alkaline —*Con* *suave, smooth: mild, *soft, gentle: basic (see ALKALINE)

acidulous acid, tart, *sour, dry

Ana *sharp: *pungent, piquant: biting, cutting (see INCISIVE)

Ant saccharine —*Con* mellow, ripe (see MATURE); bland, mild, *soft: *suave, smooth, urbane

acknowledge 1 **Acknowledge, admit, own, avow, confess** are synonymous when they mean to disclose something against one's will or inclination. All usually imply some sort of pressure as that of the law or of conscience leading to the disclosure. **Acknowledge** or its noun *acknowledgment* implies making known something which has been or might have been kept back or concealed (*acknowledged* a secret marriage) (*acknowledged* his complete ignorance of mathematics) (*she did at last extort from her father an acknowledgment that the horses were engaged—Austen*) **Admit**, with less suggestion of possible concealment, stresses reluctance to grant or concede and refers rather to facts than to their implications; *to admit* a charge may involve merely the granting of the fact alleged, not necessarily (as frequently with *acknowledge*) the acceptance of the point of view which the charge implies (*at last the government at Washington admitted its mistake—which governments seldom do—Cather*) **Own** is less formal than *acknowledge* and regards the thing acknowledged in its relation to oneself (*owned* himself at a loss as to what to do next) (*owned* to forty years) (*when a man owns* himself to have been in an error, he does but tell you in other words that he is wiser than he was—*Pope*) **Avow** implies an open or bold acknowledgment or declaration and often one made in the face of hostility (*communists, fascists, and other avowed enemies of parliamentarism—Ogg & Zink*) (*made the idea of democratic nationalism intellectually respectable and thus perhaps made it easier for the Colonel publicly to avow nationalism as his creed—Forcey*) **Confess** usually applies to what one feels to be wrong (*confess* a crime) (*confess* one's sins) but it is often used with no such implication, suggesting merely deference to the opinion of others (*I am not, I confess, fully convinced*)

Ana disclose, divulge, *reveal: *grant, concede, allow:

publish, *declare, proclaim

Ant deny —*Con* conceal, *hide, secrete: disavow, disown (see affirmative verbs at ACKNOWLEDGE); gainsay, contradict, impugn, negative (see DENY)

2 **Acknowledge, recognize** agree in meaning to take cognizance of in some way, usually in a way dictated by custom or convention and implying acceptance or assent. **Acknowledge** is found in certain idioms where the concrete method of taking notice is not stated but connoted; one *acknowledges* a letter by sending a reply; one *acknowledges* a gift by a message indicating the receipt and acceptance of the gift and one's gratitude; one *acknowledges* a greeting by an appropriate conventional response (as a bow, smile, or friendly remark). In freer expression *acknowledge* usually implies definite or formal acceptance, as of a principle as binding or of a claim as rightful or of a person as ruler (*he acknowledged the obligation of a son to support his aged parents*) (*in Italy during the fourteenth and fifteenth centuries there were two acknowledged sources of political power: the Empire and the Church—Huxley*) **Recognize**, though often used interchangeably with *acknowledge*, suggests more strongly authoritative sanction or full admission concerning a given or implied status or suggests actual and manifest, as contrasted with formal or merely verbal, acceptance (*in 1918 England, France, and the United States recognized Czechoslovakia as an independent state*) (*the ladies never acted so well as when they were in the presence of a fact which they acknowledged but did not recognize—Meredith*) *Recognize* sometimes implies, as *acknowledge* never does, full realization or comprehension (*courts . . . have been . . . slow to recognize that statutes . . . may imply a policy different from that of the common law—Justice Holmes*)

Ana accept, *receive: notice, note, remark (see SEE); respond, reply, *answer

Ant ignore —*Con* disregard, slight, *neglect: repudiate, spurn, reject (see DECLINE)

acme apex, zenith, culmination, climax, *summit, peak, apogee, pinnacle, meridian

acoustic, acoustical *auditory

acquaint *inform, apprise, advise, notify

Ana tell, *reveal, disclose, divulge: *teach, instruct, educate, school: accustom, *habituate

Con conceal, *hide: withhold, reserve, hold, hold back (*information*) (see KEEP)

acquaintance *friend, intimate, confidant

Ana *associate, companion, comrade, crony

Con *stranger, outsider

acquiesce consent, agree, *assent, accede, subscribe

Ana accept, *receive: conform, *adapt, adjust, accommodate, reconcile (*oneself*): *yield, submit, bow: concur, coincide (see AGREE)

Ant object —*Con* protest, remonstrate, kick (see OBJECT): *demur, stickle, stick, shy, balk: *differ, dissent

acquiescence compliance, resignation (see under COMPLIANT)

Ana deference, obeisance (see HONOR): submissiveness (see corresponding adjective at TAME)

Ant rebelliousness or rebellion —*Con* insubordination, contumaciousness (see corresponding adjectives at INSUBORDINATE)

acquiescent resigned, *compliant

Ana submissive (see TAME): yielding, submitting, deferring, bowing, relenting (see YIELD)

Ant rebellious —*Con* contumacious, *insubordinate: protesting, objecting, kicking, remonstrating (see OBJECT *vb*): resisting, opposing, combating, conflicting (see RESIST)

acquire obtain, *get, gain, win, secure, procure

Ana attain, achieve, compass, *reach: annex, *add, superadd; *buy, purchase: *take, seize, snatch, grab
Ant forfeit —*Con* alienate, *transfer, convey: *relinquish, surrender, abandon, yield

acquirement, acquisition, attainment, accomplishment denote in common a power or skill that is the fruit of exertion or effort; in this sense they are often used in the plural. **Acquirement** implies achievement as a result of continued endeavor and self-cultivation rather than of natural gifts or talent (a woman of considerable information and literature; *acquirements* not common amongst . . . ladies—*Edgeworth*) **Acquisition** may add to *acquirement* the implications that the thing acquired is an addition or gain and that the endeavor to acquire has been characterized by avidity and stress (perhaps it was a mistake to force her into the rigid groove of classical learning . . . from it she got very unusual *acquisitions*, but overstimulation broke her health—*Parrington*) As applied to an acquired power or skill, *acquisition* usually stresses, as *acquirement* does not, the inherent value of that power or skill (absolute disinterestedness is a rare *acquisition*, even in historians) (no philosopher would resign his mental *acquisitions* for the purchase of any terrestrial good—*Peacock*) **Attainment** commonly refers to distinguished achievements as in the arts, in statesmanship, in science; it suggests fully developed talent (artists of high *attainments*) (remarkable literary *attainments*) **Accomplishment** refers to any acquired power or grace such as may make for agreeable social intercourse (my new *accomplishment* of dancing—*Charles Churchill*) (we found that even for Men of Science this neat clean carving of words was a very necessary *accomplishment*—*Quiller-Couch*) (an *accomplishment* of which he was a perfect exponent, the interchange of humorous and agreeable civilities—*Replier*)

Ana achievement (see FEAT): *addition, accretion

Con *lack, want, dearth, defect, privation

acquisition *acquirement, attainment, accomplishment

Ana *addition, accession, accretion, increment: *possessions, belongings, means, assets: *gift, genius, talent, aptitude: *art, skill, cunning

acquisitive grasping, avaricious, greedy, *covetous

Ana avid, *eager, keen, athirst: possessing or possessive, owning, enjoying (see corresponding verbs at HAVE)

Ant sacrificing, abnegating —*Con* forgoing, forbearing, eschewing (see FORGO): self-denying, renunciative (see corresponding nouns at RENUNCIATION)

acquit 1 absolve, exonerate, vindicate, *exculpate

Ana discharge, *free, release, liberate: *excuse, pardon, forgive, remit

Ant convict —*Con* condemn, *sentence, doom, proscribe, damn: denounce, blame (see CRITICIZE)

2 quit, *behave, conduct, demean, deport, comport

Ana *act, behave, work, operate, react

Con misbehave, misconduct, misdemeanor (see base words at BEHAVE)

acrid 1 *bitter

Ana *pungent, piquant: biting (see INCISIVE): *offensive, repugnant, loathsome

Ant savory —*Con* *palatable, sapid, toothsome, tasty: fragrant, *odorous, aromatic, balmy: delicious, delectable, luscious, *delightful

2 *caustic, mordant, scathing

Ana *sharp, keen: surly, crabbed, morose (see SULLEN): malevolent, malign, spiteful, *malicious: virulent, venomous, *poisonous

Ant benign, kindly —*Con* *suave, urbane, bland, smooth, politic

acrimonious *angry, irate, indignant, wrathful, wroth,

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

mad

Ana testy, splenetic, choleric, *irascible, cranky, cross: rancorous, hostile, antagonistic (see corresponding nouns at ENMITY): quarrelsome, contentious, *belligerent

Ant irenic, peaceable —*Con* *kind, kindly, benign, benignant

acrimony, acerbity, asperity agree in denoting temper or language marked by irritation or some degree of anger or resentment. **Acrimony** implies bitterness or ill will and also greater stinging or blistering power in what is said than the others (the controversial writings of the seventeenth century are notorious for their *acrimony*) (we all know how easy it is to . . . defend a pet theory with *acrimony*—*Quiller-Couch*) **Acerbity** implies sourness as well as bitterness, sometimes as shown in words or mood, but more often as manifested in a morose, embittered nature (the judge's smile seemed to operate on her *acerbity* of heart like sunshine upon vinegar, making it ten times sourer—*Hawthorne*) Often it suggests crabbedness (the Milton of religious and political controversy . . . is not seldom disfigured by want of amenity, by *acerbity*—*Arnold*) **Asperity** retains implications of harshness and roughness chiefly in reference to style (the elderly ladies in his audience had been shocked by the *asperities* of the new style in music—*Copland*) In general use *asperity* stresses quickness of temper or sharpness of resentment but it rarely suggests bitterness (told him with some *asperity* to mind his own business)

Ana bitterness (see corresponding adjective at BITTER): ill will, malignity, malignancy, spite, spleen, *malice, malevolence: rancor, animus, animosity, antipathy (see ENMITY)

Ant suavity —*Con* urbanity, diplomacy (see corresponding adjectives at SUAVE): courtesy, civility, politeness (see corresponding adjectives at CIVIL)

across, crosswise, crossways, athwart are synonymous when they mean so as to intersect the length of something. *Across* and *athwart* may be used as prepositions as well as adverbs but carry the same implications in either part of speech. **Across** usually implies extension or passage from one side to the other (this board will not go *across*) (he could not get *across* the river that night) **Crosswise** and **crossways** stress intersection at right angles and usually suggest a horizontal direction (the stripes run *crosswise*) (the defect lies *crossways* to the grain of the wood) **Athwart** commonly implies obliquity of direction or intersection at an acute angle (the tree fell *athwart* the road) (on the slopes the shadows lie *athwart*) (in some weaves the filling threads run *athwart* those of the warp)

Figuratively, especially with reference to plans, purposes, hopes, *across* and *crosswise* are not always synonymous because they retain and stress their distinguishing implications. **Across** often implies fulfillment (he was able to get his point *across* to his audience) while **crosswise** implies contrariety and therefore frustration (everything goes *crosswise* with us tonight)

act *n* 1 *action, deed

Ana performance, accomplishment, achievement (see corresponding verbs at PERFORM): *feat, exploit

2 statute, law, *bill

act *vb* 1 **Act, behave, work, operate, function, react** are comparable when used with reference to the way in which a person or thing does what is expected or responds to external influences or circumstances. **Act** is not only the most general word of this group but also the most general of all English intransitive verbs except those (as *be, exist, belong*) which assert being, a state of being, or relation. *Act* is therefore used largely in interrogative sentences when knowledge of the specific nature of the action is

sought or in declarative sentences with a qualifying adverb, adverbial element, or adjective complement (how did the child act when you called him?) (he acted as if he were about to cry) (he acted frightened) (how should this powder act when mixed with water?) (this medicine acts as a poison to some persons) **Behave** is widely applied chiefly to persons and their conduct with reference to a standard of what is right or proper or decorous (one must keep one's contracts, and behave as persons of honor and breeding should behave—*Rose Macaulay*) However, in or parallel to technical use *behave* often approaches *act* in generality (study how steel behaves under stress) (how the thyroid gland behaves during emotional excitement) (two men may behave like a crowd . . . when their emotions are engaged—*Conrad*) **Work, operate, function** agree in meaning to act in the way that is natural or intended (the Swiss clock had long since ceased to work—*Bennett*) (but she had not thought. Her brain would not operate—*Bennett*) (they have functioned as observers rather than participants—*J. M. Brown*) In distinction from one another *work* may, especially when qualified, suggest success or effectiveness (the fact that a theory has actually worked is a better recommendation for its soundness than any amount of ingenious dialectic—*Huxley*); *operate* stresses efficient activity rather than achievement except when followed by *on* or *upon* (the revolutionary spirit, ceasing to operate in politics—*Macaulay*); *function* implies activity with reference to the accomplishment of the end or office for which a thing exists or is designed (consciousness ceases altogether at death, when the brain no longer functions—*Grant Allen*) (rules of the game which must be observed, if society is to function at all—*Galsworthy*) **React**, a word of rapidly shifting implications, is often used as though it were a close synonym of the preceding words, especially of *act* or *behave* (at this threat the civil service reacted in the way which is always open to any civil service, under any regime—*C. P. Fitzgerald*) In discriminating use it always suggests recoil or rebound; often more narrowly, but still consistently, it implies reciprocal or counteractive influence or a reverse effect (home and the school react (act reciprocally) on each other) (whilst most people's minds succumb to inculcation and environment, a few react vigorously: honest and decent people coming from thievish slums, and skeptics and realists from country parsonages—*Shaw*) As a result of use in chemistry and psychology, *react* now often implies a favorable or desired response (children react (respond favorably) to kind treatment)

2 Act, play, impersonate are synonyms when they mean to assume the appearance or role of another person or character. **Act** usually and **play** frequently imply feigning for theatrical representation (act Hamlet) (play the melancholy Dane) Even the idiom "to play one's part" has a theatrical origin and still connotes performance and a contribution to an ensemble. Whether **impersonate** implies simulation for the sake of theatrical representation or for deception can be gathered only from the context (an actor who impersonates women) (he was arrested for impersonating an officer)

acting *adj* *temporary, supply, ad interim, provisional

action **1** **Action, act, deed** agree in designating something done or effected. **Action** refers primarily to the process of acting; **act** and **deed** to the result, the thing done. An *action* is usually regarded as occupying some time and involving more than one step; an *act* is more frequently thought of as momentary or instantaneous and as individual (the rescue of a shipwrecked crew is a heroic action; the launching of the lifeboat, a brave act) (a course of action) (the springs of action) (an act of vengeance)

(caught in the act) In the plural *actions* has frequently an ethical connotation and is loosely synonymous with *conduct* (by him [the Lord] actions are weighed—*Sam* 2:3) (only the actions of the just smell sweet and blossom in their dust—*Shirley*) *Deed* refers to a thing as done; it invariably presupposes intelligence and responsibility in the agent and therefore often connotes, as *act* does not, illustriousness or achievement (the deed is worthy doing—*Shak.*) (what, are my deeds forgot?—*Shak.*) (little, nameless, unremembered acts of kindness and of love—*Wordsworth*) *Deed* is frequently opposed to *word*, as *act* to *thought* (take the word for the deed) (I'll endeavour deeds to match these words—*Shak.*) (be great in act, as you have been in thought—*Shak.*)

Ana *process, proceeding, procedure: performance, execution, fulfillment (see corresponding verbs at **PERFORM**): activity, operation, work, behavior, reaction (see corresponding verbs at **ACT**)

2 cause, case, *suit, lawsuit

3 *battle, engagement

Ana combat, conflict, fight, fray, affray, *contest: *encounter, skirmish, brush

activate **1** energize, *vitalize

Ana animate, vivify, *quicken, enliven: *stir, rouse, arouse, rally, awaken

Ant arrest

2 **Activate, actuate, motivate** are sometimes confused when used with reference to persons and the motives which govern their actions. They are not interchangeable, however, because they carry divergent denotations. Some external influence or agent, rather than a motive or desire, **activates** a person or thing when it supplies an effective stimulus to activity; the motive or, at least, a latent desire for such activity being commonly presupposed (Kapteyn's work . . . was not final, but it . . . attracted and activated others—*G. W. Gray*) A motive, a principle, or a desire **actuates** a person (not an action or undertaking) when it governs or determines his actions (the desire for conquest actuated the explorers of the sixteenth century) (individuals actuated by economic self-interest—*Bush*) A dramatist or novelist **motivates** the actions of his characters or the incidents of his plot when he supplies the motives for each (the novelist failed to motivate adequately his hero's surrender to temptation) Also an objective, a desire, a passion **motivates** or gives the underlying motive of an action or undertaking (ambition motivated Macbeth's murder of Duncan)

Ana stimulate, *provoke, excite, galvanize: spur, goad, induce (see corresponding nouns at **MOTIVE**): *incite, instigate, foment, abet: drive, impel, *move

Ant restrain, inhibit —*Con* curb, check, bridle (see **RESTRAIN**): thwart, foil, baffle, balk, *frustrate

active, operative, dynamic, live are synonymous when they mean being at work or in effective action. **Active** in general may be employed wherever the others are applicable, but it is also usable where none of the others would be appropriate. It may qualify anything that shows its nature or its existence in acts, in action, or in work (an active volcano) (an active brain) (active sympathy) and it is applicable to anything which can be worked, operated, manipulated, or wielded (an active pen) (a mine still active after fifty years of mining) It is also applicable to an agent, an operator, an instrument, a means or to something accomplished by any such agency (active enforcement of the law) (an active propagandist) (an active search for truth) *Active* may imply little more action or movement or exertion than shown in a state that is not death, rest, or inertness (his pulse is low, but his heart is still active) or it may, and usually does, imply vigor and

energy in action or movement (an *active* market) (an *active* writer) (the *active* stage of a disease) Often it suggests causation or activation (the *active* principle in a drug) In contrast with *active operative* is applicable only to things (as a principle, motive, emotion) that have a capacity for acting, working, or effecting ends or to those (as laws) that can be put into operation (when strict ethical principles are *operative* in society, men may expect the millennium) (the rule has been *operative* since January first) *Operative* usually is weaker in its implication of effectiveness; one's sense of duty is *operative* when it in any degree influences one's thoughts or actions; it is *active* when it serves as a spur to action or is the determinant of one's actions. *Dynamic* stresses the realization of the potential in something; it therefore often connotes release of great energy and consequent forcefulness; a *dynamic* personality is one that exhibits great power and exerts a great influence; love is a *dynamic* emotion when it sweeps away all that would obstruct its movement. *Live* is also applicable to persons, personalities, principles, laws, emotions, and motives. It stresses vitality and modernity more than forbiddance and, when used of persons, intelligent awareness of present conditions or needs and progressiveness more than effectiveness (Steve had in him the making of a *live* man of affairs—*Anderson*)

Ana *agile, nimble, brisk; alert, wide-awake (see WATCHFUL): *busy, industrious, assiduous, diligent: energetic, strenuous, *vigorous

Ant inactive —*Con* quiescent, *latent, dormant: inert, idle, supine, passive (see INACTIVE): *lazy, indolent, slothful

actor, player, performer, mummer, mime, mimic, thespian, impersonator, trouper denote in common one who, for the entertainment or edification of an audience, takes part in an exhibition simulating happenings in real life. An **actor** makes a profession of taking part in such exhibitions (as in the theater or on television) (an ambition to be an *actor*) A **player** acts in a stage play either as a professional or as an amateur (all the world's a stage, and all the men and women merely *players*—*Shak.*) **Performer** is a wider term than the others of this group. It emphasizes actual participation in an exhibition before an audience and may denote not only an actor or player but any public entertainer (as a dancer or musician) (in theatrical speaking, if the *performer* is not exactly proper and graceful, he is utterly ridiculous—*Steele*) *Mummer, mime, and mimic* may all denote a performer who projects a character by means of body movements, expression, and gesture usually without the use of speech. **Mummer** is used more particularly of comic and amateurish performers or maskers, usually at some festival or holiday celebration (here and there the beat of drums . . . the antics and grimaces of *mummers* held the crowd for a moment before some fantastic festival car—*A. M. Bacon*) When used of the professional actor its connotation is often derogatory (dubbing, that *mummer's* trick with the mouth which has . . . been responsible for an endless succession of vaudeville acts—*Rogow*) **Mime** is used of both the performer and the performance (mime and mimicry are confused in the public mind . . . Chaplin is a *mime*, but those who imitate him are mimics. A *mime* does not copy . . . but invents characters who have their own life . . . quite apart from their creator—*Enters*) and is especially applicable to the stylized gestural language of narrative dance (as ballet) (was a great *mime* and did not follow the then traditional ballet-mime (pantomime), but . . . in ballet gave first-class dramatic performances—*Nicolaeva-Legat*) **Mimic** more particularly stresses imitation and often comic exaggeration of qualities (had accents so grotesque that

not even Molly, an able *mimic*, could copy them—*Stafford*) (mimic . . . Entertains by presenting exaggerated imitations—*Dict. of Occupational Titles*) **Thespian** is equivalent in meaning to *actor* but in connotation is often mock-heroic (the gossip columns, where a well-known Silk might yet be observed in solemn conclave with a distinguished *Thespian*—*Wills*) An **impersonator** is a performer who assumes the character of another (as a public figure, a class of persons, an animal) whom he imitates by makeup and in speech and action (a female *impersonator*) (a noted *impersonator* of Abraham Lincoln) A **trouper** is a member of a group and especially a traveling group of actors staging a play or repertory of plays. The term often connotes the seasoning or the sense of obligation to audience and fellow actors that characterizes an experienced actor (no real *trouper* while conscious will ever confess himself too sick to go on—*Ferber*)

actual *real, true

Ana *material, physical, phenomenal, objective: particular (see SPECIAL)

Ant ideal: imaginary —*Con* *abstract, transcendent, transcendental: spiritual, divine (see HOLY): *theoretical, speculative, academic: fabulous, *fictitious, mythical

actuality *existence, being

Ana realization, actualization, materialization, externalization, incarnation (see corresponding verbs at REALIZE): attainment, achievement (see corresponding verbs at REACH)

Ant potentiality, possibility —*Con* abstraction, ideality, transcendence (see corresponding adjectives at ABSTRACT)

actualize *realize, embody, incarnate, externalize, objectify, materialize, hypostatize, reify

actuate 1 *move, drive, impel

Ana stimulate, *provoke, excite, galvanize, quicken: *stir, rouse, arouse: energize, activate, *vitalize

2 *activate, motivate

Ana influence, *affect, sway: *incline, dispose, predispose: *induce, prevail

Ant deter (with a motive or fear as the subject) —*Con* *hinder, impede, bar: *restrain, inhibit, curb, check

acumen penetration, *discernment, insight, perception, discrimination

Ana shrewdness, sagacity, perspicacity, astuteness (see corresponding adjectives at SHREWD): sharpness, keenness, acuteness (see corresponding adjectives at SHARP)

Ant obtuseness —*Con* dullness, stupidity, slowness, denseness (see corresponding adjectives at STUPID): blindness, purblindness (see corresponding adjectives at BLIND)

acute 1 *sharp, keen

Ana *incisive, trenchant, cutting: penetrating, piercing (see ENTER)

Ant obtuse —*Con* *dull, blunt: *stupid, slow, dull, crass, dense

2 **Acute, critical, crucial.** **Acute** most commonly indicates intensification, sometimes rapid, of a situation demanding notice and showing signs of some definite resolution (intimately associated with Indian affairs was the pressing question of defense . . . Pontiac's rebellion made the issue *acute*—*Morison & Commager*) (when the food shortage became *acute* in New Haven, the junior class of Yale College was moved to Glastonbury—*Amer. Guide Series: Conn.*) **Critical** may describe an approach to a crisis or turning point and may imply an imminent outcome or resolution (the war has reached a new *critical* phase . . . we have moved into active and continuing battle—*Roosevelt*) (the *critical* lack of rubber in the last war was finally beaten by the development of synthetic rubber plants capable of turning out 1,000,000 tons a year—*Collier's Yr. Bk.*) **Crucial** applies to an actual crisis situ-

ation, often one viewed with fear, worry, or suspense, and implies a speedily ensuing decisive or definitive outcome <a continuous evolution, punctuated by the sudden flaming or flowering of a *crucial* moment now and then—*Loves*> <the next few months are *crucial*. What we do now will affect our American way of life for decades to come—*Truman*>

Ana culminating, climactic (see corresponding nouns at SUMMIT): *dangerous, hazardous, precarious, perilous: menacing, threatening (see THREATEN): intensified, aggravated (see INTENSIFY)

adage *saying, saw, proverb, maxim, motto, epigram, aphorism, apothegm

adamant, adamantine obdurate, inexorable, *inflexible **Ana** unyielding, unsubmitting (see affirmative verbs at YIELD): immovable, immobile (see affirmative adjectives at MOVABLE): *grim, implacable, unrelenting

Ant yielding —**Con** submissive, subdued (see TAME): obliging, complaisant (see AMIABLE): relenting, submitting, capitulating (see YIELD)

adapt 1 **Adapt, adjust, accommodate, conform, reconcile** agree in denoting to bring into correspondence. To **adapt** is to fit or suit to something; it distinctively implies modification to meet new conditions, frequently with the added suggestion of pliability or readiness <he knew how to *adapt* himself. To one correspondent he is gay To another he is gravely reflective—*Huxley*> To **adjust** is to bring into as close and exact correspondence or harmony as exists between the parts of a mechanism; in contrast with *adapt*, it suggests less of flexibility or tact in the agent and more of ingenuity or calculation <he must divine what men would welcome and shun what men might resent. He must delicately mold and *adjust* the popular will to his own—*Buchan*> **Accommodate** is used in preference to *adjust* when there exists a somewhat marked variance or discrepancy between the objects brought into often superficial or transitory agreement or harmony <man is no lawyer to nature, he is an absorber. She it is who stands firm; he it is who must *accommodate* himself—*James*> **Accommodate** is used in preference to *adapt* when yielding or compromise is to be suggested <they *accommodate* their counsels to his inclination—*Addison*> To **conform** is to bring into harmony or accordance with a pattern, example, or principle <the liberal . . . does not wish to have to *conform* himself to any program or policy—*Inge*> In current use the reflexive to *conform oneself* is comparatively rare, its place being taken usually by the intransitive *conform* (for another intransitive sense see AGREE) <this officer, as his duties were prescribed by that act, is to *conform* precisely to the will of the president. He is the mere organ by whom that will is communicated—*John Marshall*> Partly because of the association of this word with compulsory legislation regarding religious observances, it often implies compliance or at times slavish acceptance <Mark Twain . . . had *conformed* to a moral regime in which the profoundest of his instincts could not function—*Brooks*> To **reconcile** is to demonstrate to one's own or another's satisfaction the fundamental consistency or congruity of things that are or seem to be incompatible <confidence in her own capacity to *reconcile* conflicting portraits of herself—*Mary Austin*> <the great men among the ancients understood how to *reconcile* manual labor with affairs of state—*Locke*> In reflexive use *reconcile* adds to *adapt* the implication of resignation or of submission <*reconciled* himself to a lonely existence>

Ana temper, qualify (see MODERATE): acclimatize, acclimate (see HARDEN)

Ant unfit

2 *edit, rewrite, revise, redact, compile

Ana fit, *prepare, condition, qualify

adaptable pliant, ductile, *plastic, pliable, malleable

Ana tractable, amenable (see OBEDIENT): supple, flexible, resilient, *elastic

Ant inadaptable, unadaptable —**Con** intractable, refractory (see UNRULY), unaccommodating, nonconforming, irreconcilable (see affirmative verbs at ADAPT)

add 1 **Add, sum, total, tot, cast, figure, foot** share the meaning to find or represent the amount reached by putting together arithmetically a series of numbers or quantities, and are commonly followed by *up*. **Add** is both the common and the technical word; it commonly implies strict adherence to the traditional arithmetical operation. Even in figurative use it implies a similar operation <taken as a whole the vignettes and the stories *add up* to a single effect—*Aldridge*> <the whole undertime trend *adds up* to a major consideration for businessmen and employees—*Lack*> **Sum** stresses the result attained rather than the method followed. In figurative use *sum up* implies a gathering and consolidation into a new whole, especially for the production of a single telling effect <a lawyer in *summing up* summarizes in brief and logical form the evidence favorable to his case or client that has been given> <I *summed up* all the systems in a phrase and all existence in an epigram—*Wilde*> <values they can *sum up* in a few simple formulas—*Croly*> **Total** tends to replace *sum up* in literal use <determined the cost by *totaling* all expenditures> It may also mean to reach the sum or number of <absences due to colds *totaled* 253 last week> **Tot, cast, figure, and foot** are used especially of commercial matters (as accounts and bookkeeping devices). **Tot** and **cast** often imply facility in reckoning <the waiter quickly *totted* the bill> <if you *tot up* all the items that we owed against all the items that foreigners owed us—*Hutton*> <*cast up* an account> **Figure** usually suggests the task or burden involved in reckoning <*figure* the costs of operating an automobile> **Foot** connotes bookkeeping and totals at the bottom of each column of figures <his debts will *foot up* to more than he can ever pay>

2 **Add, append, annex, subjoin, superadd.** **Add**, the most general of these words, means to join one thing to another thing or to a group, series, or combination of other things so as to increase the original unit in numbers, size, amount <*added* ten books to the library> <a little gossip *adds* spice to the conversation> <police action would *add* nothing to the protection that victims of aggression have enjoyed under the old system—*Wolfers*> One **appends** when one adds something that is supplemental and accessory and does not form an integral part of the principal thing <*append* notes to a book> <the final summary of his views which he enjoyed *appending* to his long-winded discourses—*I. V. Morris*> One **annexes** when one adds something that becomes part of the original whole yet bears usually a subordinate or subsidiary relation to it or suffers loss of identity in the merging <*annex* a codicil to a will> <*annex* conquered territory to the kingdom> One **subjoins** when one adds something under another thing or especially to what has already been said or written <*subjoin* a postscript to a letter> <*subjoin* additional matter in an appendix> One **superadds** when one adds something to what is complete in itself or already at its maximum <the phrase "to paint the lily" means to *superadd* decoration to that which in itself is highly decorative> <the horrors of pestilence *superadded* to the horrors of war>

Ana *fasten, attach, affix: augment, enlarge, *increase **Ant** subtract, deduct —**Con** lessen, *decrease, dimin-

ish, reduce: abstract, *detach

addendum supplement, *appendix

addict *vb* *habituate, accustom, inure

Ana *incline, dispose, predispose, bias: devote, apply, address, *direct

Ant wean —*Con* alienate, *estrangle: *detach, disengage: disincline, indispose (see affirmative verbs at INCLINE)

addict *n* **Addict**, **votary**, **devotee**, **habitué** designate a person who by habit and strong inclination indulges in something or the pursuit of something. **Addict** implies excessive, continuous, and often compulsive indulgence typically in harmful but sometimes in harmless things (a drug addict) (a detective-story addict) **Votary** and **devotee** retain some of the implications of their religious senses such as enthusiasm, often amounting to fanaticism, and zeal. They rarely suggest attachment to that which is degrading or debasing but they do not invariably imply attachment to that which is uplifting (a votary of science) (a devotee of vegetarianism) (any worthy object of study, pursued disinterestedly . . . does not permit its votary to be very seriously narrowed by his zeal—*Inge*) **Habitué** implies frequent attendance at a place but it commonly also connotes habitual indulgence in a pleasure (a habitué of the theater is a devotee of the drama) (a habitué of a gambling house is a gambling addict)

addition, **accretion**, **increment**, **accession** agree in denoting a thing that serves to increase another in size, amount, or content. **Addition** implies union with something already existing as a whole or as a unit (he built an addition to his house last year) (the office boy, a recent addition to the staff, was busy with the copying press—*Archibald Marshall*) Sometimes improvement rather than increase is stressed (the paintings were an addition to the room) **Accretion** implies attachment from the outside; it may be used of the process as well as of the thing added (a rolled snowball grows by accretion) It often suggests additions made to an original body over a considerable period of time (the professional historian, whose aim is exact truth, should brush aside the glittering accretions of fiction that have encrusted it—*Grandgent*) Nearly always it implies the addition of unessential or alien matter (all progress in literary style lies in the heroic resolve to cast aside accretions and exuberances—*Ellis*) **Increment** usually implies addition bit by bit in consecutive or serial order (the salaries are raised by annual increments) (one more wave in the endless ebb and flow of action and reaction, the infinitesimal increments of which we call Progress—*Lowes*) Sometimes it signifies increase in value (benefited from an unearned increment in the value of his land resulting from growth of the city) **Accession** denotes something acquired that constitutes an addition to contents, holdings, or possessions (recent accessions to a library) (the greatest accession of positive knowledge has come in our own time—*Inge*)

additive summative, *cumulative, accumulative

Ana aggregative, conglomerative, agglomerative (see corresponding nouns at AGGREGATE): constituent, component, elemental (see corresponding nouns at ELEMENT)

addle muddle, *confuse, fuddle, befuddle

Ana confound, dumbfound, nonplus, bewilder (see PUZZLE): amaze, flabbergast, astound (see SURPRISE): fluster, flurry, agitate, upset (see DISCOMPOSE)

Ant refresh (mentally) —*Con* *quicken, enliven, vivify, animate

address *vb* 1 *direct, devote, apply

Ana bend (see CURVE): appeal, pray, sue, plead (see under PRAYER): aim, point, level (see DIRECT)

2 **Address**, **accost**, **greet**, **salute**, **hail** mean to speak to

or less often to write or make a sign to a person in recognition or in order to obtain recognition. **Address** usually implies formality and definite purpose; it also frequently suggests length of speech or communication (address a petition to Congress) (how does one address a governor?) (it was Franklin, the thick chief mate, who was addressing him—*Conrad*) **Accost** adds to address the idea of speaking first or without being introduced; it implies absence of formality and often suggests boldness or sometimes evil intent (he accosted a passerby and asked for money) (the women . . . were accosted by two men who wanted to walk with them—*Anderson*) **Greet** usually implies friendliness, goodwill, or cordiality; it is the precise word when welcoming it is to be suggested (the whole town appeared at the station to greet them) (my lord, the Mayor of London comes to greet you—*Shak.*) **Salute** commonly stresses ceremoniousness or observance of courtesies demanded by custom (the wife of his brother . . . must be saluted every day; but his paternal and maternal kinswomen need only be greeted on his return from a journey—*William Jones*) (then I salute you with this kingly title: long live Richard, England's royal king—*Shak.*) Specifically salute applies to formal or prescribed acts of recognition (the soldier saluted his superior officer) (the president was saluted with 21 guns) **Hail** implies heartiness, joyousness, and often noisiness (he smiled and nodded and saluted to those who hailed him—*Masefield*) It often stresses the idea of calling out especially from a distance (hail a cab)

Ana *speak, talk, converse: court, woo (see INVITE)

address *n* 1 *tact, savoir faire, poise

Ana dexterity, facility, ease, *readiness: adroitness, cleverness (see corresponding adjectives at CLEVER): graciousness, affability (see corresponding adjectives at GRACIOUS): suavity, urbanity, diplomacy (see corresponding adjectives at SUAVE)

Ant maladroitness, gaucherie —*Con* awkwardness, clumsiness, ineptness (see corresponding adjectives at AWKWARD): boorishness, churlishness (see corresponding adjectives under BOOR)

2 *speech, oration, harangue, lecture, talk, sermon, homily **adduce**, **advance**, **allege**, **cite** may be used interchangeably in the meaning to bring forward by way of explanation, proof, illustration, or demonstration; however, they usually are clearly distinguishable in their implications and in their idiomatic associations. One adduces facts, evidence, instances, passages, reasons, arguments when one presents these in support of a contention (at the close of the chapter Aquinas solves an objection adduced as damaging evidence against his position—*Clark*) (in the light of the parallels which I have adduced the hypothesis appears legitimate—*Frazer*) One advances something (as a theory, a proposal, a claim, an argument) that is in itself contentious when one presents it for acceptance or consideration (once or twice psychoanalysts have advanced that idea to me as a theoretical possibility—*De Voto*) (if such a proposal was not seriously meant, why was it advanced at all?—*Hartmann*) (half a century later when the Bourbon claim to the Spanish succession is advanced—*Belloc*) **Allege** may indicate a bringing forward or stating as if needing no proof (younger scholars nevertheless can allege a very strong point on their side—*H. M. Jones*) It may on the other hand stress doubt about an assertion or convey a warning about or a disclaimer of responsibility for the truth of matter under discussion (those whose senses are alleged to be subject to supernatural impressions—*Le Fanu*) Its participial adjective alleged, especially, often serves as a disclaimer of responsibility for the assertion (an alleged miracle) (the

alleged thief) <the presence, real or *alleged*, of some hostile group—*Dewey*> One *cites* only something concrete and specific (as a passage from a book or a definite instance) when one adduces it in support of a contention; one *cites* by quoting a passage to give an authority; one *cites* an instance that serves as a precedent or illustration; one *cites* definite facts in support of something (as a claim or proposal) advanced <the very real difficulties of modern physical science originate, in large degree, in the facts just *cited*—*Jeans*>

Ana *exemplify, illustrate: *remark, comment, commentate, animadvert

adept *n* *expert, wizard, artiste, artist, virtuoso

Ant bungler —*Con* dabbler, tyro, *amateur, dilettante; apprentice, *novice, probationer

adept *adj* *proficient, skilled, skillful, expert, masterly

Ana *conversant, versed: efficient, *effective: *dexterous, adroit, deft: competent, *able, capable, qualified

Ant inadequate, inept: bungling —*Con* amateurish, dabbling, dilettantist (see corresponding nouns at AMATEUR): *awkward, clumsy, maladroit

adhere *stick, cohere, cling, cleave

Ana *fasten, attach, affix: unite, link, combine, *join

Con *separate, part, sever, divide: *detach, disengage: disunite, disjoin (see affirmative verbs at JOIN)

adherence, **adhesion** are usually distinguished in current use. In spite of exceptions the tendency prevails to use **adherence** when mental or moral attachment and **adhesion** when physical attachment is implied <they gave their *adherence* to the cause of reform> <the *adhesion* of lung tissues to the pleura> Sometimes, however, *adhesion* is used in place of *adherence* when the writer feels that the physical connotations of the former will add emphasis <the iron force of *adhesion* to the old routine—*Arnold*>

Ant inadherence, nonadherence

adherent *follower, disciple, partisan, satellite, henchman, sectary

Ana supporter, upholder, backer, champion (see corresponding verbs at SUPPORT)

Ant renegade —*Con* apostate, recreant (see RENEGADE): deserter, forsaker (see corresponding verbs at ABANDON): adversary, *opponent, antagonist

adhesion *adherence

Ant nonadhesion, inadhesion

ad interim *temporary, provisional, acting, supply

Ant permanent

adjacent, **adjoining**, **contiguous**, **abutting**, **tangent**, **conterminous**, **juxtaposed** mean being in close proximity.

Adjacent does not always imply actual contact but it does indicate that nothing of the same kind comes between; *adjacent* lots are in contact, but *adjacent* houses may or may not be <it is not likely that pure accident caused three *adjacent* windows to take a Spanish tone—*Henry Adams*> Objects are **adjoining** when they meet and touch at some line or point of junction <*adjoining* estates> <*adjoining* rooms> **Contiguous** adds to *adjoining* the implication of meeting and touching on one side or a considerable part of one side <streets lined with rows of *contiguous* houses> It may be used figuratively of events as well as of objects <adjacent events need not be *contiguous*; just as there may be stretches of a string which are not occupied by beads, so the child may experience uneventful periods of time—*Jeans*> **Abutting** is usually applied to something that borders on or is in contact with something else, often with the implication of the termination of one thing by the other <land *abutting* on the road> <the north wall, to which *abutting* rooms were added—*Hussey*> **Tangent** implies contact at a single point. Its literal use is chiefly geometrical <a line *tangent* to a curve> but in figurative and espe-

cially in absolute use it often stresses the general apartness rather than the single point of contact <his critics . . . went off at a *tangent*—*Carson*> <horror of the *tangent*, the extreme, the unconventional—*Norman Douglas*> <that moment when a whistle's final blow shall signal the deploy and we disperse alone, and *tangent* to the universe—*Wolff*> Objects are **conterminous** which border on each other or have a common boundary <defending the side of Germany *conterminous* to France—*Lecky*> **Conterminous** applies also to things having the same bounds, limits, or ends <the civil and the ecclesiastical parishes in England are sometimes, but not always, *conterminous*> Things are **juxtaposed** when they are placed side by side <disputes about water rights were almost inevitable between closely *juxtaposed* communities with expanding populations—*Childe*> especially so as to permit comparison or contrast <*juxtaposed* ideas> <opulence wildly *juxtaposed* to unbelievable poverty—*Vanya Oakes*>

Ana *nearest, next: successive, *consecutive: joining, connecting (see JOIN *vb*)

Ant nonadjacent —*Con* *distant, removed, remote: separated, parted (see SEPARATE *vb*)

adjoining *adj* *adjacent, contiguous, abutting, tangent, conterminous, juxtaposed

Ana joined, connected (see JOIN *vb*): attached (see FASTEN)

Ant detached, disjoined —*Con* removed, *distant, remote, far

adjudge adjudicate, *judge, arbitrate

Ana rule, *decide, determine, settle: award, accord, *grant: *allot, assign

adjudicate adjudge, *judge, arbitrate

Ana determine, settle, rule (see DECIDE)

adjunct *n* *appendage, appurtenance, accessory

Ana *addition, accretion: appanage (see RIGHT): attachment, affix, fixture (see corresponding verbs at FASTEN)

adjure entreat, *beg, beseech, implore, importune, supplicate

Ana pray, plead, appeal (see UNDER PRAYER): request, *ask: bid, enjoin, charge, *command

adjust 1 **Adjust**, **regulate**, **fix** share the meaning to set right or to rights. **Adjust** implies modification to meet a need. To *adjust* a thing one brings it by some change into its exact or proper position or condition or into its right relationship with other things. One *adjusts* a telescope when one changes the distance between its eyepiece and its object glass so as to bring it into focus; one *adjusts* the temperature of a house when one changes the setting of a thermostat. Often *adjust* implies rectification or correction <*adjust* an error in an account> <*adjust* a loose screw in a machine> <*adjust* spectacles that are not properly centered>; frequently it suggests straightening out or settling <*adjust* a difficulty with a neighbor> <*adjust* a claim for insurance> **Regulate**, on the other hand, usually implies the maintenance of something in a desired condition. To *regulate* something (as a mechanism, a device, an organ) one uses or serves as the means of making it work or operate regularly, uniformly, or accurately; thus, one *regulates* a clock when one adjusts its mechanism so that it will keep accurate time <some drugs *regulate* the beat of the heart by slowing it up, others by hastening it, until its rate of speed is normal> One also *regulates* something that is produced or effected by a mechanism or a bodily organ when one uses the means to keep it at a fixed or uniform rate or degree <*regulate* the temperature of the house by setting the thermostat at the desired mark and keeping it there> **Fix** is an informal and imprecise equivalent to these words. It is often used where *adjust* or *regulate* would be more explicit and effective <the optician will

fix her glasses > <please *fix* the clock> <he will *fix* up matters for us> In distinctive use it implies restoration to good order or a state of repair <these shoes are not worth *fixing*> <*fixed* the leak in the roof>

Ana rectify, *correct: trim, steady, *stabilize, balance: *order, arrange: align, *line, line up, range

Ant derange —**Con** disarrange, *disorder, disturb: upset, *discompose

2 *adapt, accommodate, conform, reconcile

Ana *harmonize, attune: correspond, conform, accord, square (see AGREE)

adjuvant *adj* *auxiliary, contributory, ancillary, accessory, subsidiary, subservient

Ana aiding, helping, assisting (see HELP *vb*): supporting, upholding, backing (see SUPPORT *vb*): *effective, efficient, efficacious, effectual

Ant counteractive —**Con** neutralizing, negating (see NEUTRALIZE): obstructing, hindering, impeding (see HINDER *vb*)

administer, dispense come into comparison because they are used in certain idiomatic phrases, similar in wording but not always equivalent in meaning, such as *administer justice* or *dispense justice*; *administer* a medicine or *dispense* medicine; *administer* a sacrament or *dispense* the Sacrament. Both words imply an acting on the behalf of another in or as if in the capacity of a steward. Distinctively *administer* denotes to manage, supervise, or conduct the affairs of another while *dispense* denotes to deal out in portions or equitably to recipients. These divergent significations are often lost and the words used interchangeably especially when the object of the verb is an abstraction such as justice or charity <the citizens disliked the rule of William on account of the strict justice which he *administered*—*Freeman*> <these be the sort to *dispense* justice. They know the land and the customs of the land—*Kipling*> In reference to a sacrament *administer* means to perform the rites and duties prescribed for its proper observance and may be used of any of the sacraments; *dispense*, in contrast, is used only of the Eucharist and retains its underlying implication of dealing out in portions. The two words when used in reference to medicine are precisely distinguished. One *administers* a medicine when he gives the prescribed dose directly to the patient; one *dispenses* medicines when he compounds them according to the prescription of the physician. Similarly, one *administers* a blow or a rebuke when he deals it out directly to the individual. *Dispense*, in comparable phrases, retains its implication of distribution; one *dispenses* advice when he metes it out to those who in his opinion need it; one *dispenses* alms when he manages their distribution.

admiration 1 *wonder, wonderment, amazement

Ana astonishment, surprise (see corresponding verbs at SURPRISE): awe, fear, *reverence: rapture, transport, *ecstasy

Con indifference, unconcern, aloofness (see corresponding adjectives at INDIFFERENT): boredom, *tedium, ennui

2 esteem, respect, *regard

Ana appreciation (see corresponding verb at APPRECIATE): liking, loving, enjoying (see LIKE): adoration, veneration, reverence, worship (see under REVERE)

Ant abhorrence —**Con** loathing, detestation, hate, hatred (see under HATE *vb*)

admire esteem, respect, regard (see under REGARD *n*)

Ana *appreciate, value, prize, cherish: *revere, reverence, venerate, adore, worship

Ant abhor —**Con** *hate, loathe, abominate, detest: *despise, contemn, scorn, disdain

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

admission *admittance

admit 1 *receive, accept, take

Ana allow, permit, suffer (see LET): *harbor, entertain, shelter, lodge, house

Ant eject, expel —**Con** *exclude, debar, shut out: bar, obstruct, block, *hinder

2 *acknowledge, own, confess, avow

Ana concede, *grant, allow: *assent, acquiesce, agree, subscribe: divulge, disclose, *reveal

Ant gainsay: disdain —**Con** *deny, contradict, negate

3 *enter, introduce

Ana induct, *initiate, install: *introduce, insert, interject, interpose

Ant exclude —**Con** debar, shut out (see EXCLUDE): expel, *eject, oust

admittance, admission. **Admittance** is mostly confined to the literal sense of allowing one to enter a locality or building <no *admittance* without a pass> <*admittance* to the grounds> **Admission** has acquired the figurative sense of admitting to rights, privileges, standing, membership <his *admission* to the club> <*admission* of new words into the language> When entrance into a building or a locality carries with it certain privileges, *admission* rather than *admittance* is used <*admission* to a theater> <the *admission* of aliens into a country>

admixture 1 *mixture, composite, blend, compound, amalgam

2 **Admixture, alloy, adulterant** are comparable when they denote an added ingredient that destroys the purity or genuineness of a substance. **Admixture** suggests the addition of the foreign or the nonessential <pure Indian without any *admixture* of white blood> <love with an *admixture* of selfishness> <comic verses with an occasional *admixture* of mild bawdry—*Cowie*> **Alloy** derives its figurative implication of an addition that detracts from the value or perfection of a thing from an old literal application to a base metal added to a precious metal to give it hardness <there's no fortune so good, but it has its *alloy*—*Bacon*> <he had his *alloy*, like other people, of ambition and selfishness—*Rose Macaulay*> **Adulterant**, both literally and figuratively, implies the addition of something that debases or impairs a thing without markedly affecting its appearance. Consequently it usually implies the intent to deceive <interests . . . trying to upgrade consumer thinking on wool by classifying the new textile fibers as *adulterants*—*F. A. Adams*> <piety without any *adulterant* of hypocrisy>

Ana *addition, accretion: *touch, suggestion, streak, dash, spice, tinge, smack, shade: infusion, suffusion, leaven (see corresponding verbs at INFUSE)

admonish chide, *reprove, reproach, rebuke, reprimand

Ana *warn, forewarn, caution: counsel, advise (see under ADVICE *n*): *criticize, reprehend, reprobate

Ant commend —**Con** *approve: applaud, compliment (see COMMENT)

ado fuss, pother, flurry, bustle, *stir

Ana trouble, pains, exertion, *effort

Con quietness, stillness, silence (see corresponding adjectives at STILL): calm, serenity, tranquillity (see corresponding adjectives at CALM)

adolescence *youth, puberty, pubescence

Ant senescence

adopt, embrace, espouse mean in common to make one's own what in some fashion one owes to another. One **adopts** something of which one is not the begetter, inventor, or author or which is not one's own naturally <*adopt* the style of Swinburne> <*adopt* the British pronunciation of a word> <the Ralstons gave up old customs reluctantly,

but once they had *adopted* a new one they found it impossible to understand why everyone else did not immediately do likewise—*Wharton*) **Embrace** implies willingness to accept or it may suggest eager or joyful acceptance (<*embrace* an opportunity) (<*embrace* Christianity) (<she *embraced* with ardor the fantastic ideal of the cleaning up of England—*Rose Macaulay*) One *espouses* that to which one attaches oneself as closely as to a wife, giving it support or sharing the same fortunes and participating in the same experiences (<*espouse* a friend's quarrel) (<the spirit of uncompromising individualism that would eventually *espouse* the principle of democracy in church and state—*Parrington*)

Ana appropriate, *arrogate, usurp; *assume, affect

Ant repudiate: discard —*Con* reject, spurn (see DECLINE): renounce, forswear, *abjure

adoration worship, veneration, reverence (see under REVERE)

Ana *honor, homage, obeisance: praise, laud, extolling (see corresponding verbs at PRAISE)

Ant blasphemy —*Con* execration, cursing (see corresponding verbs at EXECRATE): *profanation, desecration, sacrilege

adore 1 worship, venerate, *revere, reverence

Ana laud, *praise, extol: *exalt, magnify

Ant blaspheme —*Con* *execrate, curse

2 **Adore, worship, idolize** in their nonreligious senses mean to love or admire excessively. **Adore** commonly implies emotional surrender to the charms or attractions of an object of love or admiration; it often connotes extreme adulation if the object of love is a person (<this inability . . . to project his personality is a serious weakness in a country which likes to *adore* its leaders—*Doty*) With other objects it may connote no more than a hearty liking (<like gourmets and yellow flies, sows *adore* eating truffles—*Lauber*) **Worship** usually implies more extravagant admiration or more servile attentions than *adore*; it also commonly connotes an awareness of one's own inferiority or of one's distance from the object of one's love (<he *worships* his wife) (<small boys who *worship* astronauts)

Idolize often implies absurdly excessive admiration or doting love (<*idolizing* money in life and poetry—*New School Bulletin*) Sometimes, however, it comes very close to *adore* (<a spoiled child is often one that has been *idolized* by his parents)

Ana love, dote (see LIKE): admire, esteem (see under REGARD *n*)

Ant detest —*Con* *hate, loathe, abhor, abominate: *despise, scorn, condemn, disdain

adorn, decorate, ornament, embellish, beautify, deck, bedeck, garnish mean to add something unessential in order to enhance the appearance. These words and especially the first five are often used interchangeably; certain distinctions, however, are apparent in precise use especially when the subject of the verb is the thing that enhances rather than the agent or enhancer. An element that **adorns** not only serves to heighten the beauty of its background or setting but also is beautiful in itself (<few nobler poems have *adorned* our time—*Quiller-Couch*) (<the simplicity with which great composers *adorn* their works—*Braithwaite*) One that **decorates** relieves the plainness or monotony of a background by contributing beauty of color or design to it (<the walls are yet to be *decorated*) (<the use of inlaying in *decorating* furniture) Something **ornaments** when it is an adjunct or an accessory which sets off a thing to advantage (<whose bridle was *ornamented* with silver bells—*Scott*) (<a doorway *ornamented* with pillars) **Embellish** more often suggests the act of an agent than the effect of a thing. One who *embellishes* modifies his ma-

terial, especially by adding adventitious or sometimes gaudy or fictitious ornament for the sake of effect (<*embellishes* his style with imagery) (<feats of virtuosity . . . with which she *embellished* the usual routine of the role—*Sargeant*) *Embellish* often suggests disregard for truth (<that theme is then expertly *embellished* by the Communists to prove that Wall Street is on the warpath against the Kremlin—*Fischer*) One that **beautifies** either enhances the beauty of something or counterbalances its plainness or ugliness (<an embankment swathed and *beautified* by clambering roses) (<the eternal orbs that *beautify* the night—*Shelley*) One that **decks** or **bedecks** contributes to the gaiety, splendor, or, especially in the case of *bedeck*, showiness of appearance (<*bedeck* oneself with jewels) (<*decking* with liquid pearl the bladed grass—*Shak.*) (<he likes to *deck* out his little person in splendor and fine colors—*Thackeray*) One **garnishes** something when one gives it the final touch of order or ornament in preparation for use or service (<the drawing room was empty, swept and *garnished*, waiting for the next bout—*Panter-Downes*) The word is used especially in cookery (<*garnish* a broiled fish with lemon slices and chopped parsley)

Ana enhance, heighten, *intensify

Ant disfigure —*Con* *deface: mar, spoil, impair, *injure: *deform, distort, contort

adroit 1 *dexterous, deft, handy

Ana *agile, nimble: expert, masterly, adept, skillful, skilled, *proficient: effortless, smooth, facile, *easy

Ant maladroit —*Con* clumsy, *awkward, inept

2 *clever, cunning, ingenious

Ana *shrewd, astute, perspicacious: *intelligent, quick-witted, smart: artful, crafty (see SLY)

Ant timid —*Con* *impassive, apathetic, phlegmatic: *stupid, slow, dull, dense

adulation flattery, *compliment

Ana praise, laud (see corresponding verbs at PRAISE): *applause, acclaim: fulsomeness, unctuousness (see corresponding adjectives at FULSOME)

Ant abuse —*Con* obloquy, vituperation (see ABUSE): censure, condemnation, reprobation, criticism (see corresponding verbs at CRITICIZE)

adult *adj* *mature, grown-up, matured, ripe, mellow

Ana developed, ripened, aged (see MATURE *vb*)

Ant juvenile: puerile —*Con* *youthful, boyish, virgin, virginal, maiden: adolescent, pubescent (see corresponding nouns at YOUTH)

adulterant *n* *admixture, alloy

adulterate, sophisticate, load, weight, doctor mean to alter fraudulently especially for profit. **Adulterate**, the usual and technical term, especially when used with reference to foodstuffs and drugs, implies either the admixture of ingredients of similar appearance to increase the bulk or of a harmful substance as a preservative or as a restorer or improver of appearance (<*adulterate* maple syrup with beet-sugar syrup) (<lime juice *adulterated* with five percent sulfuric acid, jellies with formaldehyde, peas with copper—*Heiser*) In its extended use *adulterate* implies spuriousness or loss of purity; such implications come out strongly in *unadulterated*, which is the equivalent of *pure* and *sheer* in their hyperbolic senses (<that book is *unadulterated* trash) In meaning **sophisticate** is essentially identical with *adulterate* but its use is restricted almost entirely to raw drug and essential oil trade (<rose oil is *sophisticated* with geraniol—*Shreve*) **Load** implies the admixture of something to add weight whether as an adulterant or in the normal course of manufacture (<numerous adulterants have been used to *load* tea to increase its weight—*Ukers*) (<most kinds of paper are *loaded* in some way or other . . . The process . . . was first practiced . . . to save

pulp . . . but it was found that restricted quantities of loadings improved the paper—*Jennett*) **Weight** is used interchangeably with *load* but is applied more especially to textiles (silk *weighted* with salts of tin) **Doctor** implies tampering sometimes by adulteration but more often by alterations or falsifications which give an illusion of genuineness, of superior quality, or of great value (doctored poor wine with essences and brandy) (doctored his accounts to hide his thefts)

Ana *debase, vitiate, corrupt: pollute, defile, taint (see CONTAMINATE)

Ant refine (*sugar, oil*) —**Con** *improve, better

adultery, fornication, incest designate forms of illicit sexual intercourse which are clearly distinguished in legal use, both civil and ecclesiastical. **Adultery** implies unfaithfulness to one's spouse, and therefore can be applied only to sexual intercourse on the part of a married man with a woman other than his wife, or of a married woman with a man other than her husband. **Fornication** designates sexual intercourse on the part of an unmarried person; when occurring between a married and an unmarried person, the former is involved in *adultery* and the latter in *fornication*. **Incest** designates sexual intercourse between persons so closely related that their marriage is prohibited by church or state and usually by both.

Ana unfaithfulness, inconstancy, untruthfulness (see affirmative adjectives at FAITHFUL): infidelity, disloyalty (see affirmative nouns at FIDELITY)

adumbrate *suggest, shadow

Ana symbolize, typify, emblemize (see corresponding nouns at SYMBOL): signify, denote, *mean

adumbration shadow, umbra, penumbra, *shade, umbrage

Ana *symbol, type, emblem: *sign, token, symptom, note: hint, suggestion, intimation (see corresponding verbs at SUGGEST)

Ant revelation —**Con** disclosure, revealing, divulging, discovering (see corresponding verbs at REVEAL)

advance *vb* 1 **Advance, promote, forward, further** all mean to move or put ahead, but they come into comparison chiefly when they imply help in moving or putting (something) ahead. **Advance** usually implies effective assistance, as in hastening a process (the warm rains greatly *advanced* the spring crops) or in bringing about a desired end (the pact should *advance* peace among nations) or in exalting or elevating a person, especially in rank or in power (Ahasuerus . . . *advanced* him . . . above all the princes—*Esth* 3:1) The implication of moving ahead is dominant in **promote** when the word means to advance in grade or rank, especially in a predetermined order (promote a pupil to the next grade in school) (promote a member of a college faculty from associate professor to full professor) When the dominant implication is assistance, *promote* may suggest open backing or support (the objects for which a corporation is created are universally such as the government wishes to *promote*—*John Marshall*) It may, especially when the subject names a person, his influence, or his acts, imply actual advance by encouraging or fostering (a sound forest economy *promotes* the prosperity of agriculture and rural life—*Gustafson*) It may, when said of a thing such as a practice, a policy, a habit, imply subservience to an end that may not be intended (the habit of regarding the language of poetry as something dissociated from personal emotion . . . was *promoted* by the writing of Greek and Latin verse in school—*Babbitt*) In one or two collocations **forward** implies not assistance but effective carrying out (forward a shipment by express) (please *forward* all letters during my absence) In its more common sense **forward** is often not clearly distinguishable from *advance*, except that it

is seldom if ever used with reference to persons (Marie de Médicis had *advanced* Marillac by marrying him to one of her maids of honor . . . yet . . . she only *forwarded* the marriage because she wanted to do the girl a favor—*Belloc*) **Further**, less than any other word in this group, implies movement ahead and, perhaps more than any other, emphasizes the assistance given, especially in the removing of obstacles, either to a person in an undertaking or to the project he undertakes (her sole object . . . was to *further* him, not as an artist but as a popular success—*Brooks*) (bodies like the French Academy have such power for promoting it [genius], that the general advance of the human spirit is perhaps, on the whole, rather *furthered* than impeded by their existence—*Arnold*)

Ana *help, aid, assist: hasten, accelerate, quicken, *speed: elevate, raise, *lift

Ant retard: check —**Con** *hinder, impede: *restrain, curb: *arrest: *delay, slow

2 **Advance, progress** both as intransitive verbs and as nouns share the meaning to move (or movement) forward in space, in time, or in approach to a material or ideal objective. They are often employed interchangeably; however there are instances in which one is preferable to the other. **Advance** only may be used when a concrete instance is signified; though one may say that at a given time science made no *advance* (or *progress*), one must say that there were no *advances* (not *progresses*) in science at that time. *Advance* is preferable to *progress* when the context implies movement ahead such as that of an army marching to its objective, the distance traveled, or the rate of traveling (bullish sentiment regained fervor . . . and stock prices *advanced* sharply—*N. Y. Times*) (there are some . . . who picture to themselves religion as retreating . . . before the victorious *advance* of science—*Inge*) (holl weevil . . . may have existed in Mexico . . . for centuries . . . it *advanced* north and east at the rate of about 100 miles per year—*Harlow*) **Progress** usually carries implications derived from earlier meanings of a process, a circuit, or a cycle, and so is preferable to *advance* when the movement forward involves these implications, as by suggesting a normal course, growth, or development (the trial is *progressing*) (moon . . . begins . . . her rosy *progress*—*Milton*) ([summer] oft, delighted, stops to trace the *progress* of the spiky blade—*Burns*) Sometimes the word without losing these implications carries additional connotations and often stresses development through a series of steps or stages, each marking a definite change (it would be . . . a dull world that developed without break of continuity; it would surely be a mad world that *progressed* by leaps alone—*Loves*) (the *progress* of an artist is a continual self-sacrifice, a continual extinction of personality—*T. S. Eliot*) *Progress* is the preferable word when development with improvement is implied (there was a general belief in inevitable and universal *progress*—*Berger*)

Ana develop, *mature: *intensify, heighten

Ant recede —**Con** retreat, retrograde (see RECEDE): retire, withdraw (see GO)

3 *adduce, allege, cite

Ana *offer, present, proffer: propose (see corresponding noun at PROPOSAL): broach, *express, air

advance *n* 1 progress (see under ADVANCE *vb* 2)

Ana *development, evolution: improvement, betterment (see corresponding verbs at IMPROVE)

Ant recession, retrogression —**Con** retrograding, retreating (see RECEDE)

2 *overture, approach, tender, bid

Ana *proposal, proposition: offer, proffer (see corresponding verbs at OFFER)

advanced 1 forward, precocious, *premature, untimely
Ant backward —*Con* retrogressive, retrograde, regressive (see BACKWARD)
 2 radical, *liberal, progressive
Ana daring, venturesome, *adventurous
Ant conservative

advancement, preferment, promotion, elevation designate the act of raising a person in grade, rank, or dignity, or the honor that comes to one who is so raised. **Advancement** is the general term of widest application (lose all hope of *advancement*) **Preferment** especially in older use often comes close to *advancement* ('tis the curse of service, *preferment* goes by letter and affection, and not by old gradation, where each second stood heir to the first—*Shak.*) It now more often implies choice, especially from a series of candidates or possibilities (a military record was the surest road to military *preferment* among vigorous frontiersmen—*Coulter*) (obedience spelled *preferment* in the civil service—*Schumpeter*) **Promotion**, usually but not invariably, implies gradation or raising according to a fixed plan, often involving the passing of tests or the meeting of qualifications. It is the specific word in education to designate the end-of-the-term advance of pupils to a higher grade or in any field where members of a force or staff are given positions of higher rank with increased remuneration. **Elevation** is applicable only when the advancement carries marked increase in honor or dignity (the prime minister's *elevation* to the peerage) (the bishop's *elevation* to the cardinalate) (the many men of talent who owed their *elevation* to Wolsey—*Froude*)

Ant degradation: reduction (*in rank or status*)

advantage 1 **Advantage, handicap, allowance, odds, edge** denote a factor or set of factors in a competition or rivalry giving one person or side a position of superiority over the other. **Advantage** is the general term, and implies superiority of any kind (the adult, with trained powers, has an immense *advantage* over the child in the acquisition of information—*Eliot*) A **handicap** is something, typically an artificial advantage, designed to equalize competition; thus, in golf, the *handicap* assigned a player is the difference between the average of a certain number of his best scores and par for the course; for instance, if the player's best-score average is 75 and par is 72, his *handicap* is 3, and when he plays in a *handicap* match the player is allowed to deduct three strokes from his total score. An **allowance** is an advantageous handicap stated as a deduction of some sort. In horse racing an *allowance* is a deduction from the weight that the rules require a horse to carry, granted to a horse considered to be at a disadvantage. **Odds** usually implies a material advantage as in strength, numbers, or resources. It is often used of such an advantage possessed by the opposite side (managed to beat the *odds* against him—*O'Leary*) (the peculiarly British quality . . . of sticking out against *odds*—*Contemporary Review*) **Advantage** is often stated as a difference, *odds* as a ratio (one boxer has an *advantage* of ten pounds in weight) (one army has *odds* of two to one over the other) *Odds* may also denote an equalizing concession made to an inferior competitor; it then differs from *handicap* and *allowance* in that the concession is made by the superior competitor and not assigned by a third party (each side feels that it cannot allow any *odds* to the other—*Bryce*) **Edge** may be an equivalent of *advantage* or *odds* but usually implies a slight but decisive superiority (here we have the *edge* on our rivals, not only because of our superior location, but also because we are reputedly reckless about reducing prices—*Publishers' Weekly*)

Ana preeminence, superlativeness (see corresponding adjectives at SUPREME): *supremacy, ascendancy

Ant disadvantage: handicap (*in extended sense*) —*Con* *obstacle, obstruction, impediment, bar

2 *use, service, account, profit, avail

Ana improvement, betterment (see corresponding verbs at IMPROVE): enhancement, heightening (see corresponding verbs at INTENSIFY): benefit (see corresponding verb at BENEFIT)

Ant detriment —*Con* harm, hurt, damage, *injury

advantageous beneficial, profitable

Ana *expedient, advisable: useful, utilitarian (see corresponding nouns at USE)

Ant disadvantageous —*Con* detrimental, deleterious (see PERNICIOUS): harmful, hurtful, injurious (see corresponding nouns at INJURY)

advent *arrival

Ana coming, arriving (see COME): approaching, nearing (see APPROACH vb): appearing, emerging (see APPEAR)

Ant leaving, passing

adventitious *accidental, incidental, fortuitous, casual, contingent

Ana acquired (see GET): accessory, subservient (see AUXILIARY)

Ant inherent —*Con* constitutional, essential, intrinsic, ingrained (see INHERENT): *innate, inborn, inbred

adventure, enterprise, quest denote an undertaking, an exploit, or an experience involving hazards and requiring boldness. **Adventure** so stresses the excitement or thrills associated with the encountering of risks or hardships that the word is applicable either to the event or to its emotional effect (seek *adventures* for *adventure's* sake) *Adventure* tends to emphasize the pleasurable excitement induced by newness and strangeness as much as that induced by perils or difficulties (the thirst for *adventure* . . . a war, a crusade, a gold mine, a new country, speak to the imagination and offer . . . play to the confined powers—*Emerson*) (why fear death? Death is only a beautiful *adventure*—*Frohman*) **Enterprise** is applied to an undertaking rather than an experience or to the spirit required for such an undertaking. As distinguished from *adventure* it implies arduousness in the undertaking and initiative, resourcefulness, and sustained energy in the one who carries it through (ripe for exploits and mighty *enterprises*—*Shak.*) (fresh news is got only by *enterprise* and expense—*Justice Holmes*) (the nurse of manly sentiment and heroic *enterprise* is gone—*Burke*) **Quest** is used chiefly in poetry or elevated phrases to suggest days of chivalry and romantic adventure and implies a search or pursuit, always of something elusive and often unattainable (the *quest* of the Holy Grail)

Ana exploit, *feat, achievement: hazard, peril, risk (see DANGER)

adventurous, venturesome, daring, daredevil, rash, reckless, foolhardy denote in common courting danger or exposing oneself to danger in a greater degree than is required for courage. One who is **adventurous** is inclined to adventure; the word may or may not imply indiscretion or imprudence in incurring risk or hazard (a mind active, ambitious, and *adventurous* . . . always aspiring—*Johnson*) (*adventurous* boys . . . climbed, shouting and laughing, over the rafters—*Anderson*) **Venturesome** frequently implies an excessive tendency to take chances (in 1919 Alcock and Brown undertook the first and highly *venturesome* crossing of the Atlantic by air—*Manchester Guardian*) **Daring** heightens the implication of fearlessness (a *daring* pilot in extremity, pleased with the danger, when the waves went high—*Dryden*) **Daredevil** implies ostentation in daring and is often specifically applied to

stunts performed for hire as a public spectacle or to their performers (a *daredevil* acrobat) **Rash** implies imprudent hastiness or boldness in word or action; **reckless**, utter heedlessness or carelessness of consequences (we must detain him If we do not I am convinced Austin will do something *rash* that he will for ever repeat—*Meredith*) (a *reckless* disregard of the future) (reckless audacity came to be considered courage—*Derek Patmore*) **Foolhardy** implies a foolish daring or recklessness and may be used of persons or of their acts (the perfectly *foolhardy* feat of swimming the flood—*Sinclair Lewis*)

Ana audacious, bold, intrepid, doughty (see BRAVE); aspiring, panting (see AIM vb); *ambitious, emulous
Ant unadventurous; cautious

adversary *opponent, antagonist

Ana assailant, attacker, assaulter (see corresponding verbs at ATTACK): *enemy, foe; competitor, rival (see corresponding verbs at RIVAL)

Ant ally —*Con* colleague, *partner: supporter, champion, backer, upholder (see corresponding verbs at SUPPORT)

adverse 1 **Adverse, antagonistic, counter, counteractive** mean so opposed as to cause interference, often harmful or fatal interference. All four may be applied to one thing that comes into conflict with another (an *adverse* policy) (an *adverse* wind had so delayed him that his cargo brought but half its proper price—*Lowell*) (an *antagonistic* associate) (a *counter* proposal) (a *counteractive* agency) Only *antagonistic*, *counter*, and, occasionally, *counteractive* are used to express mutual or reciprocal opposition (antagonistic principles) (counter currents) (counteractive poisons) Despite their common ground of meaning, each of these four words has distinct implications which limit its applicability and greatly increase its expressiveness. **Adverse** conveys so strongly the idea of unfavorable or unpropitious opposition that it often means harmful or fatal (adverse criticism) (adverse fortune) (a spirit *adverse* to the existence of democracy) **Antagonistic** usually implies hostility and also, when mutual opposition is suggested, incompatibility or even irreconcilability (neighboring races are often *antagonistic*) (the *antagonistic* principles of aristocracy and democracy—*Parrington*) (some sociologists believe that the welfare of the individual and the welfare of society are *antagonistic* aims) **Counter**, which usually denotes acting, moving, or proceeding from the opposite side or from opposite sides, does not necessarily connote hostility but it does imply inevitable contact, with either resulting conflict or tension (whirlpools are usually caused by *counter* currents in a stream) (the *counter* influences of authority and freedom in shaping the character of youth) **Counteractive**, on the other hand, invariably implies the destruction or nullification of the thing or things opposed (prescribing physicians must know the *counteractive* effects of certain medicines on others) (in the training of delinquents a bad influence is dealt with by the introduction of a *counteractive* good influence)

Ana harmful, hurtful, injurious (see corresponding nouns at INJURY); hindering, impeding, obstructing (see HINDER vb); detrimental, deleterious, *pernicious: fatal, *deadly
Ant propitious —*Con* auspicious, *favorable, benign: *beneficial, advantageous

2 **Adverse, averse** are in origin and in common use contrasted rather than synonymous terms, though they are occasionally used as though similar in meaning. **Adverse** implies opposition that interferes and it is applied to the thing that stands in the way of one's progress or success (the leader would tolerate no *adverse* opinions among his followers) **Averse** implies repugnance in the person

opposed to a thing rather than a quality in the thing which is opposed (the leader is *averse* to all independence of opinion among his followers) However they are sometimes used as synonyms with only this distinction, that *adverse* is chiefly referred to opinion or intention and *averse* to feeling and inclination (I . . . hope that our periodical judges will not be very *adverse* to me, and that perhaps they may even favor me—*Cowper*) (the writer of critical studies . . . has to mediate between the author whom he loves and the public, who are certainly indifferent and frequently *averse*—*Stevenson*) (what cat's *averse* to fish—*Gray*)

adversity *misfortune, mischance, mishap

Ana *trial, tribulation, affliction: *distress, misery, suffering: *poverty, privation, indigence, destitution

Ant prosperity —*Con* felicity, *happiness, bliss; ease, comfort (see REST); wealth, affluence, opulence, richness (see corresponding adjectives at RICH)

advert 1 **Advert, revert** are sometimes confused because of a similar basic meaning when they are used in reference to discourse or contemplation. **Advert** denotes to turn from the point, topic, or incident under consideration in order to take up another. It sometimes suggests an unconscious or an illogical break in the chain of thought, but in highly discriminating use may still retain its primary implication of heeding or taking notice (we are but too apt to consider things in the state in which we find them, without sufficiently *adverting* to the causes by which they have been produced—*Burke*) (the distinction . . . will be rendered more apparent by *adverting* to that provision in the second section . . . of the constitution—*John Marshall*) **Revert** adds to *advert* the implication of return either consciously or unconsciously to a point or topic already discussed or previously in one's mind (he now drops this idea, and *reverts* to his reasoning on death—*Goldsmith*)

2 *refer, allude

Ana remark, notice, note, observe (see SEE)

Con ignore, disregard, overlook, *neglect

advertise publish, announce, proclaim, broadcast, promulgate, *declare

Ana report, recount, *relate: *communicate, impart

Con *suppress, repress; conceal, *hide, bury

advertisement publication, announcement, broadcasting, proclamation, promulgation, declaration (see under DECLARE)

Ana *publicity, ballyhoo, promotion, propaganda

advice 1 **Advice, counsel** and their corresponding verbs **advise, counsel** denote recommendation or to make a recommendation as to a decision or a course of conduct. **Advice** and **advise** imply real or pretended knowledge or experience, often professional or technical, on the part of the one who advises and may apply to any of the affairs of life (advice regarding the choice of books) (the extension specialist assists and *advises* the farmers) (legal *advice*) **Counsel** often stresses the fruit of wisdom or deliberation, and presupposes weightier occasions than *advice* or more authority or a closer personal relationship in the one who counsels (I do in friendship *counsel* you to leave this place—*Shak.*) (seek *counsel* in affairs of state) The noun sometimes suggests instruction or advice of a lofty or ideal character (the Christian *counsel* of perfection)

Ana admonition (see corresponding verb at REPROVE); warning, forewarning, cautioning (see WARN); instruction, teaching (see corresponding verbs at TEACH)

2 intelligence, *news, tidings

advisable *expedient, politic

Ana prudent, *wise, sensible: *beneficial, advantageous, profitable: practical, *practicable

Ant inadvisable

advise 1 counsel (see under **ADVICE** 1)

Ana admonish (see **REPROVE**): *warn, forewarn, caution: *induce, persuade

Con consult, *confer, advise

2 consult, *confer, commune, parley, treat, negotiate

Ana *discuss, debate, argue: converse, talk (see **SPEAK**): deliberate (see **THINK**)

Con counsel (see under **ADVICE** 1)

3 notify, *inform, apprise, acquaint

Ana tell, disclose, *reveal: *communicate (with), impart (to)

advised *deliberate, considered, premeditated, designed, studied

advocate *n* *lawyer, counselor, barrister, counsel, attorney, solicitor

advocate *vb* *support, uphold, champion, back

Ana defend, justify, vindicate, *maintain: espouse (see **ADOPT**): promote, forward, *advance

Ant impugn —*Con* assail, *attack: combat, oppose, fight (see **RESIST**)

aeon age, era, epoch, *period

aerate, **ventilate**, **oxygenate**, **carbonate**. *Aerate* is the general term and interchangeable in certain phrases with any of the others; the last three are specific terms which are not freely interchangeable with each other. *Aerate* means to supply or impregnate with air or to expose to the action of air. It frequently implies a mechanical process (<*aerate* soil by plowing> <*aerate* sewage by agitation in fresh air>). It sometimes, however, implies a natural process (<the blood is *aerated* in the lungs>). *Ventilate* is commonly used when exposure to air especially in large quantities with the object of purifying, freshening, or cooling is implied (<*ventilate* a room by opening windows> <*ventilate* an engine by means of holes in its covering> <the patient is unable adequately to *ventilate* himself with air because air cannot be easily drawn through the air passages, the caliber of which has been diminished by the disease—*Science*>). It may be indistinguishable from *aerate* when applied to the blood but usually suggests rather the exposure to air and *aerate* the resulting gaseous exchange. More exact than either in this relation is *oxygenate* since it is the oxygen in the air that is required by the blood. Technically *aerate* and *carbonate* are not synonyms, for the latter means to impregnate with carbon dioxide but they may overlap when *aerate* is used broadly with the meaning to impregnate with a gas; hence, *aerate* or especially *aerated* is used in certain designations (as *aerated* water or *aerated* bread) where *carbonated* would correctly describe the process.

aerial *adj* *airy, ethereal

Ana immaterial, incorporeal (see **MATERIAL**): impalpable, *imperceptible, imponderable

aeronautics, **aviation** have to do with the operation of aircraft. **Aeronautics** is primarily a science dealing with the operation of any kind of aircraft <engineers specializing in *aeronautics*>. **Aviation** is an art, science, or practice concerned with the operation of heavier-than-air aircraft <skill in *aviation* develops only when theoretical knowledge is supplemented by practical experience>. Unlike *aeronautics* it has extended use in which it may denote aircraft or their manufacture, development, and design <his *aviation* had sunk or damaged 52 . . . vessels—*Newsweek*> <recent advances in American *aviation*>

aesthete, **dilettante**, **connoisseur** all designate a person conspicuous for his enjoyment and appreciation of the beautiful, the exquisite, or the choice. **Aesthete** implies highly developed sensibilities, with acute delight in beauty of color, line, sound, and texture, and violent distaste for

the ugly, shapeless, and discordant <no woman could walk down the street without risk of having her hat torn off . . . by some *aesthete* who happened to think it unbecoming—*Shaw*> <that mystical synthetic sense, of which the modern *aesthete* dreams,—the sense that sees, hears, tastes, smells, touches, all in one—*Babbitt*>). It often carries derogatory connotations of absurdity, extravagance, decadence, or effeminacy <it was perhaps natural for a man who had had to fight his way . . . to a recognized position in scholarly literature to be irritated by the poses of comfortable *aesthetes*—*Renwick*>. **Dilettante** stresses the attitude of the lover of art as distinguished from that of the creative artist. Though its application to amateurs who were neither thoroughly familiar with the technique of their particular form of art nor seriously seeking for mastery, it acquired connotations of desultoriness, dabbling, and superficiality <he is a mere *dilettante*>. However, it may apply to one who pursues an art or studies it merely for his own delight <he would always be by nature a contemplative and a *dilettante*; but he had had high things to contemplate, great things to delight in—*Wharton*> <a generalization with which I find myself (with all the diffidence of an unlearned *dilettante*) disagreeing—*Huxley*>. **Connoisseur** like *dilettante* implies high appreciation of the beautiful in art; unlike it, it implies scholarly knowledge and trained taste. Because of the latter implication *connoisseur* is applied not only to one who knows a work of art when he sees it but also to one who recognizes superiority in other things governed by taste (as foods, wine, or gems). In this relation the word often comes close to *epicure* in its meaning. It is also applied to collectors of beautiful things <supposing also that the material of his *Apologia* was . . . defunct . . . who but a few discerning *connoisseurs* of style would ever read that book now or a century hence?—*T.S. Eliot*> <he has found time to make himself a *connoisseur* of porcelains, one of the most esoteric of collectors' hobbies—*Heiser*>

aesthetic *artistic

Ant unaesthetic

affable *gracious, cordial, genial, sociable

Ana courteous, polite (see **CIVIL**): open, candid, *frank: *amiable, obliging, complaisant: *talkative, loquacious: *suave, urbane

Ant reserved —*Con* uncommunicative, taciturn, reticent, *silent: curt, brusque (see **BLUFF**): surly, glum, crabbed (see **SULLEN**)

affair 1 **Affair**, **business**, **concern**, **matter**, **thing** come into comparison only when they are little more than vague or general terms meaning something done or dealt with. Some or rarely all are used interchangeably in certain similar collocations such as his own *affair*, *business*, *concern*; public and private *affairs*, *concerns*, *matters*, *business*; a sorry *affair*, *business*, *matter*, *thing*; *affairs*, *matters*, *things* are in good condition. However, a degree of precision is possible, for each word carries distinctive implications which are not always obscured. **Affair** suggests action or performance; it may imply a process, an operation, a proceeding, an undertaking, a transaction <seeing a book through the press is a laborious and time-wasting *affair*—*T. H. Huxley*>. In the plural it often denotes transactions of great importance such as those involved in the management of finances or in the carrying on of diplomatic negotiations <men of *affairs*> <he had married a rich woman and administered her *affairs*. He was not supposed . . . to have any *affairs* of his own—*Mary Austin*>. **Business** usually stresses duty or office; sometimes it suggests an imposed task <because a Thing is every Body's *Business*, it is no Body's *Business*—*Steele*> <the flight of his imagination is very swift: the following of it often a breath-

less *business*—*Day Lewis*) **Concern** suggests personal or direct relationship: it often implies an important bearing on one's welfare, success, or interests; thus, something is not one's *concern* because it has no bearing on one's interests, welfare, or success (the simplest way out of the difficulty was to do nothing and dismiss the matter as no *concern* of theirs—*Conrad*) Sometimes *concern* is preferred to *affair* when that which requires attention involves a degree of anxiety or solicitude (the *concerns* of state) **Matter** usually is more objective as well as more vague than the preceding words. It generally refers to something that is merely an object of consideration or that is to be dealt with (he will attend to these *matters* very soon) (this is still one *matter* in dispute) (never insist without carrying the *matter* through—*Russell*) **Thing** is even more indefinite than *matter* and is often intentionally used when there is a desire to be vague or inexplicit (he promised that *things* would be better in the future) (first *things* should come first) (more *things* are wrought by prayer than this world dreams of—*Tennyson*) (these *things* are managed so well in France—*Harte*)

2 *amour, intrigue, liaison

affect simulate, *assume, pretend, feign, counterfeit, sham

affect 1 **Affect, influence, touch, impress, strike, sway** are more or less closely synonymous when they mean to produce or to have an effect upon a person or upon a thing capable of a reaction. **Affect** always presupposes a stimulus powerful enough to evoke a response or elicit a reaction (our eardrums are *affected* by ten octaves, at most, out of the endless range of sounds—*Jeanes*) (even changes of season *affect* the townsman very little—*Huxley*) Often, in addition, *affect* implies a definite alteration or modification (I am afraid . . . that this adventure has rather *affected* your admiration of her fine eyes—*Austen*) When the object of the verb is a person, an intellectual or emotional effect is usually implied (such poetry *affects* one as trite and meaningless) (the sight *affected* her to tears) **Influence** always presupposes an agent that moves a person or thing in some way or to some degree from a course, or effects changes in nature, character, or behavior (the judge was never *influenced* in his decisions by his sympathies or prejudices) (the body *influences* the mind and the mind the body) (the Society of Friends had been *influenced* by Quietism, and adversely affected by the paralyzing rationalism of the reigns of the first two Georges—*Inge*) Sometimes the implication of inducing, or inciting, or persuading, or even bribing is strong (monomaniacs, having first persuaded themselves, contrive to *influence* their neighbors—*Meredith*) **Touch** frequently equals *affect*, but it often carries a more vivid suggestion of close contact or of the force of an impact, and therefore variously connotes stirring, arousing, or harming (he was for the first time powerfully *touched* by the presence of a woman—*Anderson*) (a small object whose exquisite workmanship has *touched* me with its intimate charm—*J. S. Untermyer*) **Touch**, most often, but *impress* and *strike* always, imply a mental or emotional effect. **Impress** usually stresses the depth and the lastingness of the effect, for something that impresses is commonly what is remembered or noticed or is worth remembering or noticing (only one of the speeches that evening *impressed* him) (the men he wanted to *impress* were only amused—*Anderson*) **Strike** is often felt to be more colloquial than *impress* and less rich in its suggestions (a hat that *struck* her fancy) However *strike* connotes suddenness or sharpness of response rather than depth of impression; it may even carry a hint of a swift passing (the remark *struck* him as extremely acute) (they *strike* mine eyes, but not my heart—*Ben Jonson*) **Sway**, which basically means to influence,

differs from the latter word in implying both the pressure or control of some force that is either not resisted or is in itself irresistible, and resulting change or fluctuation in character, opinions, or decisions of the person concerned (the notion . . . of capricious deities, *swayed* by human passions and desires, was incompatible with the idea of fixed law—*Dickinson*) (other conditions than those of classroom have *swayed* him for good or evil—*Suzzallo*) (he is *swayed* by fashion, by suggestion, by transient moods—*Mencken*)

Ana *move, actuate, drive, impel: pierce, penetrate (see ENTER): *thrill, electrify

2 *concern

3 **Affect, effect** are often a source of difficulty because both verbs imply the production of an effect and take as their corresponding noun the same word, *effect*. **Affect**, the verb (see AFFECT 1), distinctively implies the action or operation of an agency rather than of an agent; it therefore means to influence (moisture *affects* steel) (high prices *affect* our pocketbooks) (the climate has *affected* his health) **Effect**, the verb (see PERFORM), implies the achievement of an end in view, and requires as its subject an intelligent agent or the means he uses to attain his end: it therefore means to bring about (the prisoners *effected* their escape) (the new system of accounting will *effect* a reduction in costs) Since the noun *effect* may be applied to any result whether brought about unconsciously or consciously, it serves equally well whether it names a result of the influence of one thing upon another or of directed effort.

affection *pose, air, mannerism

Ana *pretense, pretension: pretentiousness, ostentation (see corresponding adjectives at SHOWY)

Ant artlessness —*Con* naturalness, simplicity, ingenuousness, naïveté, unsophistication (see corresponding adjectives at NATURAL)

affecting *adj* touching, *moving, pathetic, poignant, impressive

Ana stirring, rousing, rallying (see STIR *vb*): distressing, troubling (see TROUBLE *vb*): *pitiful, piteous, pitiable

affection 1 *feeling, emotion, passion, sentiment

Ana propensity, *leaning, penchant: *predilection, bias: inclination, disposition (see corresponding verbs at INCLINE)

Ant antipathy —*Con* aversion (see ANTIPATHY): *hate, hatred

2 love, *attachment

Ana devotion, piety, *fidelity: liking, doting, enjoying (see LIKE *vb*): tenderness, warmth, sympathy (see corresponding adjectives at TENDER)

Ant coldness —*Con* coolness, frigidity (see corresponding adjectives at COLD): hate, detestation, hatred, abhorrence (see under HATE *vb*)

affection *disease, disorder, condition, ailment, malady, complaint, distemper, syndrome

Ana attack, access, paroxysm (see FIT): disorder, derangement (see corresponding verbs at DISORDER)

affectionate *loving, devoted, fond, doting

Ana ardent, fervent, passionate (see IMPASSIONED): *tender, sympathetic, warm

Ant cold: undemonstrative —*Con* apathetic, *impassive, stolid

affidavit deposition, testimony, *evidence

affiliated allied, *related, kindred, cognate

Ana dependent, *subordinate

Ant unaffiliated —*Con* independent, *free, autonomous

affinity 1 *attraction, sympathy

Con repugnance, repellency or repulsion, abhorrence (see corresponding adjectives at REPUGNANT): *antipathy,

aversion

2 resemblance, *likeness, similarity, similitude, analogy
Ana agreement, conformity, correspondence, accord (see corresponding verbs at AGREE)

affirm profess, aver, avow, protest, avouch, declare, *assert, warrant, predicate

Ana attest, *certify, vouch, witness: state (see RELATE)

Ant deny —**Con** contradict, negative, traverse, gainsay (see DENY): dispute, debate (see DISCUSS)

affirmative, **positive** cause difficulties in their extended use, since each term has *negative* for its opposite and since both words may qualify identical or similar nouns. The distinctions are not clearly fixed, but tendencies in usage may be noted. In general **affirmative** implies denial as its opposite, and **positive** implies negation, or the absence of truth, reality, or actuality as its opposite. Something that is not *affirmative* may be destructive; something that is not *positive* may be null, nonexistent, or nugatory. Hence, an *affirmative* philosophy either affirms accepted principles or establishes new ones, and so is opposed to *negative* philosophies (as skepticism and nihilism). A *positive* philosophy (this often equals *positivism*) deduces its principles from something that is evident to the senses or is from the commonsense point of view regarded as real and factual. Metaphysics is from the positivist's point of view a *negative* philosophy. An investigation has an *affirmative* result when it confirms the hypothesis of the investigator; it has a *positive* result if something definite is discovered, whether the result proves or disproves the hypothesis. A person may be said to exercise an *affirmative* influence when he strengthens or improves something that exists or develops something better to take its place; he may be said to exert a *positive* influence when he affects others in definite concrete ways. A defeatist may exert a very *positive* influence which cannot be described as *affirmative*; an optimist's attitude is *affirmative*, but it often fails to exert a *positive* influence.

Ana *effective, effectual, efficacious

Ant negative —**Con** destroying, demolishing (see DESTROY): abolishing, annihilating, extinguishing (see ABOLISH)

affix *vb* *fasten, attach, fix

Ana append, *add, subjoin, annex: *stick, adhere

Ant detach —**Con** disengage (see DETACH)

afflatus *inspiration, fury, frenzy

afflict, **try**, **torment**, **torture**, **rack** mean to inflict upon a person something which he finds hard to bear. Something or someone that causes pain, disability, suffering, acute annoyance, irritation, or embarrassment may be said to **afflict** a person (*afflicted* with heart disease) (blindness *afflicts* many aged persons) (she is *afflicted* with shyness) (he who *afflicts* me knows what I can bear—*Wordsworth*) An affliction or a person or thing that imposes a strain upon one's physical or spiritual powers of endurance or tests one's stamina or self-control may be said to **try** a person, his body, his soul, or his character (a *trying* situation) (his *trying* temper) (the great heat of the sun and the heat of hard labor . . . *try* the body and weaken the digestion—*Jefferies*) An affliction or a person or thing that persecutes and causes continued or repeated acute suffering or annoyance may be said to **torment** one (recurrent stomach pains *torment* him) (other epochs had been *tormented* by the misery of existence and the terror of the unknown—*Glücksberg*) (the horses are *tormented* by flies) (the older boys . . . bullied and *tormented* and corrupted the younger boys—*H. G. Wells*) An affliction or a person or thing that severely torments one physically or mentally and causes pain or suffering under which one writhes may be said to **torture** one (*torture* prisoners of

war) (an idea of what a pulsating sciatica can do in the way of *torturing* its victim—*Bennett*) (the unseen grief that swells with silence in the *tortured* soul—*Shak.*) A person or, especially, a thing (often a painful emotion or disease) that pulls or seems to pull one this way and that beyond endurance and in a manner suggestive of the excruciating straining and wrenching of the body on the rack, an ancient instrument of torture, may be said to **rack** a person (*racked* with pain) (he is *racked* by doubts of his friend's loyalty) (vaunting aloud, but *racked* with deep despair—*Milton*) (how on earth can you *rack* and harry . . . a man for his losings, when you are fond of his wife, and live in the same station with him?—*Kipling*)
Ana *worry, annoy, harass, harry, plague, pester: vex, bother, irk (see ANNOY): distress, *trouble, ail

Ant comfort —**Con** console, solace (see COMFORT): delight, gladden, rejoice, *please

affliction visitation, *trial, tribulation, cross

Ana adversity, *misfortune, mischance, mishap: *distress, suffering, misery, agony: anguish, *sorrow, grief, woe, heartbreak

Ant solace, consolation —**Con** relief, assuagement, alleviation (see corresponding verbs at RELIEVE): joy, delight, *pleasure

affluent wealthy, *rich, opulent

Ana possessing, owning, holding, having, enjoying (see HAVE): acquisitive (see COVETOUS)

Ant impecunious: straitened —**Con** indigent, penurious, destitute, poor (see corresponding nouns at POVERTY): impoverished, bankrupt (see DEplete)

afford *give, confer, bestow, present, donate

Ana *offer, proffer: *furnish: *grant, accord

Ant deny (*something one wants, asks, hopes for*) —**Con** withhold, hold, hold back (see KEEP): refuse, *decline

affray *n* fray, fight, combat, conflict, *contest

Ana *brawl, row, fracas, melee, rumpus: *encounter, skirmish, brush: dispute, *argument, controversy

affray *vb* *frighten, fright, affright, scare, alarm, terrify, terrorize, startle

Ana, **Ant**, **Con** (see those at AFFRIGHT)

affright *vb* *frighten, fright, affray, scare, alarm, terrify, terrorize, startle

Ana daunt, horrify, appall, *dismay: cow, *intimidate, bulldoze: confound, bewilder (see PUZZLE)

Ant nerve, embolden —**Con** animate, fire, inspire (see INFORM)

affront *vb* *offend, outrage, insult

Ana slight, ignore, *neglect: nettle, peeve, provoke, *irritate

Ant gratify (*by an attention*) —**Con** humor, *indulge, pamper: flatter, compliment (see corresponding nouns at COMPLIMENT)

affront *n* **Affront**, **insult**, **indignity** denote a speech or an action having for its intention or effect the dishonoring of something (as a person, a cause, or an institution). An **affront** is a designed and usually an open mark of disrespect (an *affront* to the flag) (an old *affront* will stir the heart through years of rankling pain—*Ingelow*) An **insult** is a personal attack, either by words or actions, meant to humiliate or degrade (it is incredible the *insult* made to the liberty, to the life, to the dignity of the human beings, by other human beings—*Vanzzetti*) An **indignity** is an outrage upon one's personal dignity (whom I beseech to give me ample satisfaction for these deep shames and great *indignities*—*Shak.*) (to nearly all men serfdom was . . . a degrading thing, and they found trenchant phrases to describe the *indignity* of the condition—*Southern*)

Ana slighting, ignoring, overlooking, neglecting (see NEGLECT *vb*): offending, outraging (see OFFEND *vb*): im-

puudence, brazenness (see corresponding adjectives at SHAMELESS)

Ant gratification —*Con* deference, *honor, homage; adulation, *compliment, flattery

afraid *fearful, apprehensive

Ana alarmed, scared (see FRIGHTEN); timorous, *timid

Ant unafraid: sanguine —*Con* *cool, composed, imperturbable, collected: *confident, assured, sure

aft *abaft, astern

Ana *after, behind: rear, back, *posterior, hind

Ant fore —*Con* *before, ahead, forward

after *prep, adj, adv* **After, behind** are synonymous adverbs, prepositions, and adjectives when they mean following upon, especially in place or in time. They are rarely interchangeable, however, without a loss of precision. With reference to place **after** usually implies order of movement or sequence and characteristically goes with verbs or nouns implying motion (the faculty marched in pairs, one *after* another) So used, *after* not only conveys no suggestion of precedence in order of following, but it may, by stressing pursuit, even obscure its common implication of succession; to run *after* a person is to attempt to overtake him. When, as often happens, *after* is used with verbs of rest, the implication of movement or sequence is rarely lost but is transferred to the object or is to be gathered from the context; one stays *after* the others (who have left); one calls *after* a person (who is walking ahead); one looks *after* the children of a friend (who is away, ill, or engaged). In the same connection **behind** characteristically implies a position at the back of something at rest (the chair is *behind* the door) (the men seated themselves *behind* the women) (the garden is *behind* the house) When, however, the reference is to something moving, *behind* usually adds the implications of delay, lagging, or immobility; to run *behind* another is to be outstripped; to be left *behind* is to be outstripped or to remain when others have departed.

With reference to time, **after** is in far more frequent use than *behind* and is the required choice when only subsequence is implied (who ruled *after* James I?) (after one o'clock no one may leave the room) When **behind** is used in this connection, it usually implies a time when someone or something is due according to a schedule, a system, or a normal order of progression. Consequently it implies variously lateness, backwardness, or falling in arrears (you are two hours *behind* schedule) (theory often runs *behind* practice)

Ana *abaft, aft, astern

Ant before —*Con* forward, ahead (see BEFORE)

after *adj* hinder, hind, rear, *posterior, back

Con *preceding, antecedent, prior

aftereffect, aftermath *effect, result, consequence, upshot, sequel, issue, outcome, event

age *n* 1 **Age, senility, senescence, dotage** are comparable when they denote the period in one's life when one is old in years and declining in body or mind or both. **Age** is now usually replaced by *old age* except in literary use (age cannot wither her—*Shak.*) (age, I make light of it, fear not the sight of it—*Higginson*) **Senility** adds to *age* the implication of decay, especially of mental decay (rheumy old man, crumpled together . . . his mind gone down the road to *senility*—*Roberts*) **Senescence** designates the period or the process of the decline which results in senility or old age; it is in the life of the individual the antithesis of youth or adolescence. **Dotage**, even more than *senility*, implies the childishness or mental decline of age and thus indirectly heightens the suggestion of extreme old age (old Daniel begins; he stops short—and his eye, through the lost look of *dotage*, is cunning and sly—*Wordsworth*)

Ant youth

2 *period, era, epoch, aeon

age *vb* *mature, ripen, develop

aged, old, elderly, superannuated when applied to persons mean far advanced in years. **Aged** implies extreme old age with signs of feebleness or, sometimes, senility (the *aged* creature came, shuffling along with ivory-headed wand—*Keats*) **Old** stresses the years of one's life, but in itself carries no connotations of marked decline (a man, *old*, wrinkled, faded, withered—*Shak.*) **Elderly** may imply no more than that the prime of life has been passed (when you see me again I shall be an old man—that was a slip, I meant to say *elderly*—*J. R. Lowell*) **Superannuated** indicates that one has been retired or pensioned because of having reached a certain age (varying in different callings) (*superannuated* teachers) (*superannuated* judges) Sometimes the word implies merely that one has passed the years of usefulness and with this denotation it is applied to things as well as to persons.

Ana infirm, feeble, decrepit (see WEAK)

Ant youthful —*Con* juvenile, puerile, boyish, virgin, virginal, maiden (see YOUTHFUL)

agency *mean, agent, instrumentality, instrument, medium, vehicle, channel, organ

Ana *cause, determinant, antecedent: operation, action, working (see corresponding verbs at ACT): activity (see corresponding adjective ACTIVE): machinery, apparatus, gear, *equipment

agenda *program, schedule, timetable

agent *n* 1 *mean, instrument, agency, instrumentality, medium, vehicle, organ, channel

Ana actor, operator, worker (see corresponding verbs at ACT): activator, energizer (see corresponding verbs at VITALIZE); performer, executor or executive (see corresponding verbs at PERFORM)

Ant patient

2 **Agent, factor, attorney, deputy, proxy** agree in meaning one who performs the duties of or transacts business for another, but differ in specific application. **Agent** is very general and may be used to express this idea in any context where a specific term is not required; distinctively, however, it often implies the activity of a go-between (ambassadors, ministers, emissaries, nuncios are diplomatic *agents* of their governments or sovereigns) (the heads of departments are the political or confidential *agents* of the executive—*John Marshall*) (let every eye negotiate for itself and trust no *agent*—*Shak.*) **Factor** was once a near equivalent of *agent* but is now chiefly employed as a designation for a commercial agent buying and selling goods for others on commission (wool *factor*) (flour *factor*) It is also used specifically to name the official in charge of a trading post of the Hudson's Bay Company. **Attorney**, now chiefly used as a designation for a professional legal agent (see LAWYER), once was applied to one who performed the personal offices of another who was absent, incapacitated, or unqualified for the work (I will attend my husband, be his nurse . . . for it is my office, and will have no *attorney* but myself—*Shak.*) This sense still survives but in a narrower application to a person legally delegated to transact certain specified business for another who is absent or otherwise disqualified. Such a person is often called (in distinction from an attorney-at-law) a "private attorney" or an "attorney-in-fact," and the power delegated him is called "power of attorney." **Deputy** always implies possession through delegation of some or all of the powers of a superior (as a sovereign or a governmental or business executive). Almost always, also,

it connotes responsibility to the person whose powers are deputed, rather than to the organization from which these powers ultimately derive <the governor-general of Canada may appoint *deputies* to exercise his powers or functions locally or temporarily> <a vicar-general is a *deputy* of a bishop> **Proxy** implies a substitution of persons when a promise or pledge is solemnly made or a vote, as at a stockholders' meeting, is to be cast. In a marriage service a *proxy* for the bride or groom or in the baptismal service a *proxy* for a godparent merely utters the promises in the name of the absent person, the latter assuming the obligation of fulfilling them.

Ant principal

agglomerate, agglomeration conglomerate, conglomeration, *aggregate, aggregation

Ana combination, association (see corresponding verbs at JOIN): accumulation (see corresponding verb ACCUMULATE): heap, pile, mass (see under HEAP *vb*)

aggrandize *exalt, magnify

Ana heighten, enhance, aggravate, *intensify: elevate, raise, *lift, boost

Ant belittle —**Con** minimize, depreciate, disparage, *decry, detract, derogate

aggravate 1 heighten, *intensify, enhance

Ana magnify, aggrandize (see EXALT): augment, *increase, multiply, enlarge

Ant alleviate —**Con** lighten, mitigate, allay (see RELIEVE): *palliate, extenuate: lessen, reduce, diminish, abate (see DECREASE)

2 exasperate, *irritate, provoke, rile, peeve, nettle

Ana perturb, upset, disturb (see DISCOMPOSE): vex, irk, *annoy: *anger, incense, infuriate

Ant appease —**Con** *pacify, placate, mollify: tranquilize, calm (see corresponding adjectives at CALM)

aggregate *n* 1 *sum, total, whole, number, amount, quantity

Ant individual; particular

2 **Aggregate, aggregation, conglomerate, conglomeration, agglomerate, agglomeration** denote a mass formed by parts or particles that are not merged into each other.

Aggregate and **aggregation** imply the formation of a whole but without the blending of its constituents <sandstone is a natural *aggregate* of quartz and a cementing substance (as silica or iron oxide)> <we have no communities. Our villages even are apt, rather, to be *aggregations*—*Brownell*>

Conglomerate and **conglomeration** emphasize the heterogeneousness of the components and often suggest their assemblage from a wide variety of sources; sometimes either is applied to a heap of things, sometimes to an aggregate in which the parts are clearly distinguishable <pantheism is generally a *conglomerate* of animism, poetical fancy, and mysticism—*Inge*> <that *conglomeration* of men we call a nation—*Liddon*> **Agglomerate** and **agglomeration** in general use seldom imply coherence of parts; they suggest either a huddling together or often a fortuitous association <a mere *agglomeration* of different races, without national unity, national aims—*Page*> In geology *agglomerate* designates a rock aggregate composed of irregularly shaped fragments scattered by volcanic explosions as distinguished from *conglomerate*, an aggregate composed of rounded, waterworn stones.

Ana union, *unity, integrity: unification, consolidation (see corresponding verbs at COMPACT): complex, *system, organism, network

Ant constituent

aggregation *aggregate, conglomerate, conglomeration, agglomerate, agglomeration

Ana & Ant see those at AGGREGATE 2

aggression *attack, offense, offensive

Ana *invasion, incursion, raid, inroad

Ant resistance

aggressive 1 attacking, offensive (see base words at ATTACK *n*)

Ana invading, encroaching, trespassing (see TRESPASS *vb*)

Ant resisting; repelling

2 **Aggressive, militant, assertive, self-assertive, pushing, pushy** are here compared as applied to persons, their dispositions, or their behavior, and as meaning conspicuously or obtrusively active or energetic. **Aggressive** implies a disposition to assume or maintain leadership or domination, sometimes by bullying, sometimes by indifference to others' rights, but more often by self-confident and forceful prosecution of one's ends <as intolérant and *aggressive* as any of the traditional satirists—*Day Lewis*> <protect themselves against a too *aggressive* prosecution of the women's business—*Shaw*> **Militant**, like *aggressive*, implies a fighting disposition but seldom conveys a suggestion of self-seeking. It usually implies extreme devotion to some cause, movement, or institution and energetic and often self-sacrificing prosecution of its ends <*militant* feminists> <*militant* trade union> <the cause of reform slowly went on gaining adherents—most of them . . . of the acquiescent rather than the *militant* type—*Grandgent*> **Assertive** stresses self-confidence and boldness in action or, especially, in the expression of one's opinions. It often implies a determined attempt to make oneself or one's influence felt <somewhat too diffident, not *assertive* enough—*Bennett*> <to say, with some challenging *assertive* people, that trees are more beautiful than flowers—*Lucas*> **Self-assertive** usually adds to *assertive* the implication of bumpthousness or undue forwardness <*self-assertive* behavior incompatible with cooperativeness> **Pushing**, when used without any intent to depreciate, comes very close to *aggressive* in the current sense of the latter; however, the word is more commonly derogatory and implies, variously, officiousness, social climbing, or offensive intrusiveness <an energetic, *pushing* youth, already intent on getting on in the world—*Anderson*> **Pushy** is very close in meaning to *pushing* but is more consistently derogatory in connotation <his motive power derives from . . . the *pushiest* ambition since Alexander the Great—*R. L. Taylor*> <careful not to sound *pushy* or over-eager—*McClung*>

Ana energetic, strenuous, *vigorous: *masterful, domineering, imperious: fighting, combating or combative (see corresponding nouns at CONTEST)

aggrieve *wrong, oppress, persecute

Ana *afflict, try, torment: harass, harry, plague, annoy, *worry: *injure, hurt, harm

Ant rejoice —**Con** gladden, delight, *please: *benefit, profit

agile, nimble, brisk, spry mean acting or moving with quickness and alacrity. **Agile** implies dexterity and ease in the management of one's limbs or, by extension, one's wits <*agile* as a monkey> <in a flow of racy comment, skimming from one topic to another with an *agile* irrelevance—*Rose Macaulay*> **Nimble** suggests surpassing lightness and swiftness of movement or action, and often implies a darting here and there <*nimble* as a squirrel> <Madame Defarge knitted with *nimble* fingers—*Dickens*> <*nimble* feet scudding over the springy turf—*Webb*> **Brisk** implies liveliness, animation, or vigor of movement <a *brisk* canter> <a *brisk* walking pace> <to have *brisk* and intelligent talk—*Benson*> It is sometimes applied to things that do not move but are invigorating or exhilarating <*brisk* day> <*brisk* reply> <she walked briskly in the

brisk air—George Eliot } **Spry** stresses alacrity arising from vigor or health; however it is frequently applied to those from whom alacrity or briskness of movement is not to be expected (the old lady is as *spry* as a cricket) (she is down one day, and up and *spry* the next)

Ana *dexterous, adroit, deft: quick, fleet, speedy (see FAST): limber, lithesome, *supple: *lively, sprightly

Ant torpid —**Con** *lethargic, sluggish, comatose: inert, *inactive, passive, supine

agitate 1 *shake, rock, convulse

Ana *stir, rouse, arouse: *move, actuate, drive, impel
Ant quiet, lull, still

2 perturb, *discompose, upset, fluster, flurry, disturb, disquiet

Ana *irritate, provoke, rile, exasperate, peeve: *worry, harass, plague: *annoy, vex, irk, bother

Ant calm, tranquilize —**Con** *pacify, placate, appease, mollify

3 argue, dispute, debate, *discuss

Ana controvert (see DISPROVE): assail, *attack: *consider: air, ventilate, broach (see EXPRESS)

agitation *commotion, tumult, turmoil, turbulence, confusion, convulsion, upheaval

Ana *motion, movement: *stir, bustle, ado: disturbance, perturbation, disquiet (see corresponding verbs at DIS-COMPOSE)

Ant tranquillity

agnostic *n* *atheist, deist, freethinker, unbeliever, infidel

agog *eager, keen, anxious, avid, athirst

Ana excited, galvanized, stimulated (see PROVOKE): roused, aroused, stirred (see STIR *vb*): *impatient, restive

Ant aloof —**Con** *indifferent, unconcerned, incurious, detached, uninterested, disinterested

agonize *writhe, squirm

Ana suffer, endure, *bear: torment, rack, torture, *afflict
agonizing *excruciating, racking

Ana torturing, tormenting, racking (see AFFLICT): *intense, vehement, fierce, exquisite, violent

Con *comfortable, easy, restful: comforting, solacing, consoling (see COMFORT)

agony suffering, passion, *distress, misery, dolor

Ana pang, throe, ache, *pain, twinge: *trial, tribulation, affliction, visitation

Con *rest, repose, ease, comfort: solace, consolation (see corresponding verbs at COMFORT): relief, assuagement, mitigation (see corresponding verbs at RELIEVE)

agrarian, **agricultural** are sometimes confused because they carry common implications and are used to qualify like terms (as an *agrarian* or an *agricultural* society, an *agrarian* or an *agricultural* crisis, an *agrarian* or an *agricultural* policy). Both terms have reference to land, the conditions under which it is held, and its profitable use. **Agrarian** usually stresses the economic or political issues involved in the ownership of land, in the conditions of tenancy, and in the right of the individual to the profits of his labor on the land (agrarian crises were frequent in Ireland in the eighteenth and nineteenth centuries when the issue of tenant rights became acute) **Agricultural** stresses rather the successful and profitable use of land for the production of crops and the breeding of animals (agricultural crises are likely to occur when overproduction and a restriction of markets coincide) When, however, agricultural interests are at stake and political action is held to be necessary, a party formed to promote these ends may be called an *agrarian* rather than an *agricultural* party, and a measure advocated as an *agrarian* rather than an *agricultural* measure.

agree 1 *assent, accede, consent, acquiesce, subscribe

Ana *grant, concede, allow: accept, *receive: admit,

*acknowledge

Ant protest (*against*): differ (*with*) —**Con** *object, kick, expostulate, remonstrate: *demur, balk, jib: oppose, *resist, withstand

2 **Agree**, **concur**, **coincide** are comparable when they mean to come into or to be in harmony regarding a matter of opinion or a policy. **Agree** implies unison in thought or a complete accord: even if the context suggests previous discussion, the word usually indicates that argument is ended (this is a point upon which all persons *agree*) (agree upon a price) **Concur** usually implies reference to a specific or definite agreement or suggests a thinking, acting, or functioning cooperatively or harmoniously toward a given end or for a particular purpose (for the creation of a masterwork of literature two powers must *concur*, the power of the man and the power of the moment—*Arnold*) **Coincide** implies an agreement amounting to complete identity of opinion. Only occasionally is it used of persons; more frequently opinions, judgments, wishes, or interests *coincide* (I had hoped that our sentiments *coincided*—*Austen*) (private groups whose interests did not *coincide* with national defense—*T. W. Arnold*) Often *coincide* implies an agreement in time of occurrence (less often an agreement in place occupied) and therefore frequently stresses synchronisness of events (the fall of Granada and the discovery of America *coincided*) (see *coincident* under CONTEMPORARY)

Ana *unite, cooperate

Ant differ: disagree —**Con** *contend, fight, battle: dispute, argue, debate (see DISCUSS): quarrel, wrangle, squabble, bicker (see under QUARREL *n*)

3 **Agree**, **square**, **conform**, **accord**, **harmonize**, **correspond**, **tally**, **jibe** mean to exist or go together without conflict or incongruity. One thing *agrees* with another when their comparison or association reveals no discrepancy, no inequality, or no untoward effects (the conclusion *agrees* with the evidence) (the two accounts *agree* in every particular) (pronouns must *agree* with their antecedents in person, number, and gender) One thing *squares* with another when there is exact, almost mathematically exact, agreement between the two (force facts to *square* with a theory) (the corporation must, if it is to survive, *square* itself with the basic beliefs of the American people—*Lindeman*) One thing *conforms* to or with another when there is likeness or agreement in form, in nature, or in essential character (since theology was philosophy's queen, medieval philosophy *conformed* to that system which Augustine employed in his theology—*H. O. Taylor*) (my views of conduct . . . *conform* with what seem to me the implications of my beliefs—*T. S. Eliot*) One thing *accords* with another when there is perfect fitness in the relation or association as in character, spirit, quality, or tone (the speaker's remarks did not *accord* with the sentiments of those who listened to him) (the common doctrine of liberty *accorded* with the passions released by the Revolution—*Parrington*) One thing *harmonizes* with another when, in spite of their real and often marked differences, their combination or juxtaposition produces an agreeable or aesthetic effect (from the waves, sound . . . broke forth *harmonizing* with solitude—*Shelley*) (the need for the United States to *harmonize* its practices in foreign affairs more closely than in the past with its professed ideals—*Dean*) One thing *corresponds* to or with another when, however far apart or however close the two things may be, they belong together because they match each other, complement each other, or answer to each other. Sometimes *correspond* implies agreement (fulfillment seldom *corresponds* to anticipation) (I should never *correspond* to your pattern of a lady—*George Eliot*) Sometimes it implies an analogous

relation (the bird's wing *corresponds* to the human arm) Sometimes it implies commensurateness (incomes do not always *correspond* with the efforts or skill that appear to be involved—*Hobson*) One thing *tallies* with another when the correspondence is so close that they either complement each other or agree with each other (pain and pleasure no more *tally* in our sense than red and green—*Browning*) *Jibe* is sometimes equivalent to *agree*, sometimes to *harmonize*, and sometimes to *accord* (his actions do not *jibe* with his words) (his looks *jibed* with the stage driver's description of him—*Luke Short*)

Ant differ (*from*) —*Con* negative, counteract, *neutralize: negate, *nullify

agreeable grateful, pleasing, *pleasant, gratifying, welcome

Ana *comfortable, easy, restful: *delightful, delectable: attractive, charming, alluring (see under ATTRACT)

Ant disagreeable —*Con* *repugnant, repellent, obnoxious, distasteful: *hateful, abhorrent, abominable, odious: *offensive, loathsome, repulsive

agreement, accord, understanding are comparable chiefly in their political and legal uses. They agree in designating a settlement reached by parties to a dispute or negotiation. All these terms imply concurrence as to what should be done or not done; all imply reconciliation of differences.

Agreement is the most positive word; it usually implies a final settlement of terms. *An agreement* may or may not be put into writing (as in the form of a contract or treaty); it may or may not be accompanied by a consideration. An **accord** is, in controversies between governments, an informal agreement; use of this term often implies that all details have not yet been settled or that the terms of the agreement are not yet ready for publication, but that the conditions necessary to a final agreement have been fulfilled. In law an *accord* is an agreement between the parties concerned in a case where satisfaction for an injury is demanded. The execution of such an accord bars further litigation. An **understanding** is the least binding of accepted settlements. If the term is used to denote the final stage in a negotiation or in settlement of a dispute, it implies the existence of definite engagements or the exchange of promises, and dependence on the honor of the parties to the agreement for the keeping of such engagements or promises.

Ana pact, entente, concordat, convention, cartel (see CONTRACT)

agricultural *agrarian

agriculture, farming, husbandry mean the science or the business of raising plants and animals useful to man. **Agriculture** is by far the most comprehensive of these terms; in common with *farming* and *husbandry* it implies the cultivation of the soil, the production and harvesting of crops, the care and breeding of livestock; it includes in addition other pursuits that may or may not be connected with farming and husbandry such as horticulture, forestry, dairying, sugar making, and beekeeping. It often stresses the technological as contrasted with the traditional aspects of such activities and may include in varying degrees the preparation of agricultural products for man's use. **Farming**, the term in common use, emphasizes land devoted to the production of crops or animals for the market; it may imply small or extensive holdings, but it usually suggests the inclusion of tilled land bearing crops, of pastureland for cattle, and of meadowland for hay. **Husbandry** usually suggests small holdings and production for the use of a household or community rather than for a distant market. It often suggests more varied employments than farming (as dairying or beekeeping) and often denotes management of a particular branch of farming (animal *husbandry*)

ahead forward, *before

Ant behind —*Con* *after: *abaft, aft, astern

aid *vb* *help, assist

Ana *support, uphold, back: *relieve, lighten, alleviate, mitigate: abet (see INCITE)

Ant injure —*Con* harm, hurt, damage (see INJURE): *hinder, impede, block

aid *n* 1 help, assistance (see under HELP *vb*)

Ana relief, assuagement, alleviation, mitigation (see corresponding verbs at RELIEVE): *remedy, cure, medicine: support, backing (see SUPPORT *vb*)

Ant impediment —*Con* *obstacle, bar, obstruction: restraint, curb, check (see corresponding verbs at RESTRAIN)

2 *assistant, helper, coadjutor, aide, aide-de-camp

aide *assistant, aide-de-camp, coadjutor, helper, aid

aide-de-camp aide, *assistant, aid

ail *vb* *trouble, distress

Ana *afflict, try: *annoy, vex, irk, bother

Con *comfort, solace, console: *relieve, assuage, alleviate, mitigate

ailment disorder, condition, affection, malady, *disease, complaint, distemper, syndrome

aim *vb* 1 point, *direct, level, train, lay

Ana bend, *curve, twist

2 **Aim, aspire, pant** all may mean to have as a controlling desire something beyond one's present power of attainment. **Aim** stresses a clearly defined end toward which one's efforts are directed or which one holds as a goal to be reached through endeavor or striving (men *aiming* to advance in life with glory—*Hardy*) (Christianity *aims* at nothing less than absolute truth—*Inge*) (get honor, and keep honor free from flaw, *aim* at still higher honor—*Browning*) **Aspire**, especially when followed by an infinitive, often adds little to *aim* except the suggestion of ambition (those who do not *aspire* to be scholars—*Crothers*) (aspiring to be the leader of a nation of third-rate men—*Mencken*) It may, however, imply urgency of longing for something that is high, often too high for attainment (since first my thirsting soul *aspired* to know the secrets of their wondrous world—*Shelley*) (what I *aspired* to be, and was not, comforts me—*Browning*) **Pant** comes into comparison with the other words only in its extended sense of biblical origin (as the hart *panteth* after the water brooks, so *panteth* my soul after thee, O God—*Ps* 27:1) Even more than *aspire* it stresses the fervor of the desire and the remoteness of that which is desired. Sometimes it connotes urgent unsatisfied thirst (more happy, happy love! For ever warm and still to be enjoyed, for ever *panting*, and for ever young—*Keats*) It may also suggest not the gasps of one thirsting but of one toiling upward ([the] Brave, and Good, and Wise, for their high guerdon not in vain have *panted!*—*Wordsworth*)

Ana *intend, purpose, propose, design: *attempt, essay, endeavor, try

aim *n* end, goal, objective, purpose, *intention, object, intent, design

Ana aspiration, *ambition: *effort, exertion, pains, trouble

air *n* 1 **Air, atmosphere, ether, ozone.** Air designates the invisible mixture of gases which surrounds the earth and is the impalpable respirable substance essential to life (the *air* we breathe) or that substance mixed with or contaminated by other substances (perfumed *air*) (smoky *air*) **Atmosphere** designates the layers of air which form the envelope of the earth or a similar gaseous envelope of any celestial body (the *atmosphere* of Mars) It may be applied to the portion of air which permeates a particular place or is in a particular state (the stale *atmosphere* of a

room) <a superheated *atmosphere*> **Ether** usually suggests a medium more rarefied than air or one far more delicate or subtle formerly held to fill the upper regions or interstellar space. In technical use it also denotes a hypothetical medium for the transmission of transverse waves which is characterized by continuity and extreme tenuity and which permeates all space. Strictly, **ozone** is a triatomic form of oxygen that is a faintly blue pungent irritating gas found especially in the upper levels of the air and used commercially chiefly in disinfection, in oxidation, and in bleaching. In general use it denotes air that is notably pure and refreshing <the fresh crisp *ozone* of morning—*Halsey*>

2 *pose, affectation, mannerism

Ana mien, *bearing, port, presence: ostentation, pretentiousness, show (see corresponding adjectives at SHOWY): *art, artifice, craft

3 *melody, air, tune

air *vb* ventilate, vent, utter, voice, *express, broach

Ana *reveal, disclose, divulge, tell, discover: publish, proclaim, broadcast, *declare

Con *hide, conceal: *suppress, repress

airport, **airdrome**, **airfield**, **airstrip**, **landing strip**, **flying field**, **landing field** denote a place where airplanes may take off and land in safety. **Airport** implies a well-marked and lighted nonmilitary place, either on land or water, that is used regularly and provides facilities for sheltering passengers, handling cargo, supplying fuel, making repairs, and housing planes. **Airdrome** is practically synonymous with **airport** but is applied to both civil and military places, connotes the physical installation, and has been largely replaced by **airport**. **Airfield** is used of an open area of land with one or more runways and limited or no facilities for shelter or maintenance of planes. However, in strict usage, **airfield** is applied only to the part of an airport on land where planes land and take off. An **airstrip** is a specially prepared usually hard-surfaced strip of land with few or no facilities for sheltering or maintenance of planes and is often located in an advanced military position or in a remote area for occasional or emergency use. **Landing strip** in one of its meanings is synonymous with **airstrip** and in the other meaning with **runway**. A **flying field** is an airport or military airdrome, but the term is sometimes applied especially to a small airfield for privately owned planes or to a temporary airfield. A **landing field** is a land area clear or cleared of tall trees and other obstructions for flying operations.

airy, **aerial**, **ethereal** can all mean as light and insubstantial as air. **Airy** seldom suggests a transcendent quality; in its widest sense it implies little more than immateriality <the poet's pen . . . gives to *airy* nothing a local habitation and a name—*Shak.*> When applied to persons, their words, or their manners, it may imply an affectation of grandeur or putting on airs <replied with *airy* condescension> mere affectation of nonchalance <*airy* refusal to take good advice> When used of motion or movements, it suggests lightness and buoyancy <the slight harebell raised its head, elastic from her *airy* tread—*Scott*> **Aerial** in figurative use is found chiefly in poetry where it usually connotes impalpability, extraordinary delicacy, or elusiveness, and is applied to things rather than to persons <mountains . . . fair of aspect, with *aerial* softness clad—*Wordsworth*> <the *aerial* hue of fountain-gazing roses—*Shelley*> <fine and *aerial* distinctions—*Milman*> **Ethereal** implies not the atmosphere surrounding the earth but the rarefied air once believed to fill the heavenly regions and so imputes a celestial or supramundane character to the person or thing it qualifies. Sometimes it suggests an unearthly translucency <fire . . . without heat, flickering a red gold flame . . . *ethe-*

real and insubstantial—*Woolf*> <so . . . *ethereal* in appearance with its cloud colors, that . . . even . . . the most beautiful golden shades . . . seemed heavy and dull and dead-looking by comparison—*Hudson*> Sometimes, especially when referred to persons, their words, or their thoughts, it suggests disembodied spirit or apartness from material interests <the *ethereal* quality of Shelley's poetry> <at times he tends to fall into excessive subtlety, to be too vaporous and *ethereal*—*Babbitt*>

Ana tenuous, rare, *thin: delicate, dainty, exquisite (see CHOICE): light, volatile, frivolous (see corresponding nouns at LIGHTNESS)

Ant substantial —**Con** *massive, massy, bulky, monumental: *material, corporeal, physical: solid, hard, *firm

aisle *passage, passageway, ambulatory, corridor

akin *like, alike, similar, analogous, comparable, parallel, uniform, identical

Ana *related, kindred, cognate, allied: corresponding, agreeing, harmonizing, according, conforming (see AGREE)

Ant alien —**Con** foreign, extraneous (see EXTRINSIC): divergent, disparate, *different

alacrity *celerity, legerity

Ana eagerness, avidity, anxiety (see corresponding adjectives at EAGER): quickness, promptness, readiness (see corresponding adjectives at QUICK): agility, nimbleness, briskness (see corresponding adjectives at AGILE): expedition, dispatch, *haste

Ant languor —**Con** *lethargy, torpidity, stupor: impassiveness, apathy, stolidity (see under IMPASSIVE): indifference, unconcern, aloofness (see corresponding adjectives at INDIFFERENT)

alarm *n* 1 **Alarm**, **tocsin**, **alert** agree in meaning a signal that serves as a call to action or to be on guard especially in a time of imminent danger. **Alarm** is used of any signal that arouses to activity not only troops, but emergency workers (as firemen, policemen); it suggests a sound such as a cry, a pealing of a bell, a beating of drums, or a siren <sound a fire *alarm*> <the dog's barking gave the *alarm*>

Tocsin may be either an alarm sounded by bells usually from the belfry of a church or, more often, the bells sounding an alarm <the loud *tocsin* tolled their last alarm—*Campbell*> but is used figuratively for any sort of warning of danger. **Alert**, a military term for a signal to be on guard and ready for expected enemy action, is often used for any warning of danger <sirens sounded an air-raid *alert*> <the Weather Bureau issued a tornado *alert* in the early afternoon . . . The *alert* was cancelled after 5 p.m.—*Springfield Union*> It may also denote the state of readiness called for by the signal or warning or the period during which this is maintained <an abandon-ship *alert* was signaled. Warning for that . . . was to be four blasts of the ships whistle—*Lowell Bennett*> <a peacetime round-the-clock *alert* against surprise aerial attack—*N. Y. Times*> 2 fright, *fear, panic, terror, horror, dismay, dread, consternation, trepidation

Ana frightening, scaring, startling (see FRIGHTEN): agitation, perturbation, upset (see corresponding verbs at DISCOMPOSE)

Ant assurance: composure —**Con** calmness, tranquility, serenity (see corresponding adjectives at CALM): self-possession, self-assurance (see CONFIDENCE): *equanimity, sangfroid

alarm *vb* *frighten, fright, scare, startle, terrify, affright, terrorize, affray

Ana appall, daunt, horrify, *dismay: *surprise, astound, amaze, astonish

Ant assure: relieve —**Con** *comfort, solace, console

albeit although, *though

alchemy *magic, thaumaturgy, wizardry, sorcery, witch-

ery, witchcraft

alcoholic *n* *drunkard, inebriate, dipsomaniac, sot, soak, toper, tosspot, tippler

alert *adj* 1 *watchful, wide-awake, vigilant

Ana *agile, nimble, brisk: wary, circumspect, *cautious

Con heedless, *careless: unconcerned, aloof, detached, *indifferent

2 clever, *intelligent, smart, bright, quick-witted, brilliant, knowing

Ana *sharp, keen, acute: *quick, ready, prompt, apt: *shrewd, perspicacious

Con *languid, lackadaisical, listless: *lethargic, sluggish: *stupid, slow, dull, dense

alert *n* *alarm, tocsin

alias *n* *pseudonym, nom de guerre, incognito, nom de plume, pen name

alibi *n* excuse, pretext, plea, *apology, apologia

Ana explanation, justification, rationalization (see corresponding verbs at EXPLAIN)

alien *adj* foreign, extraneous, *extrinsic

Ana external, exterior, outside (see corresponding adjectives at OUTER): adventitious, incidental, *accidental: *repugnant, repellent, abhorrent: incompatible, incongruous, *inconsonant

Ant akin: assimilable —*Con* *relevant, material, pertinent, germane: compatible, *consonant, congruous, congenial: kindred, cognate, *related

alien *n* foreigner, *stranger, outlander, outsider, immigrant, émigré

Ant citizen —*Con* subject, national (see CITIZEN)

alienate 1 *transfer, convey, deed

2 *estrangle, disaffect, wean

Ana convert, proselyte or proselytize (see corresponding nouns at CONVERT): *separate, part, sever, sunder, divorce

Ant unite: reunite —*Con* reconcile, conform, accommodate, adjust, *adapt: associate, link, *join

alienation 1 derangement, *aberration

Ana *insanity, lunacy, mania, dementia: imbecility, idiocy, moronity (see base words at FOOL)

2 *solitude, isolation, seclusion

alienist psychiatrist, psychopathologist, *neurologist, psychotherapist, psychoanalyst

alight *vb* 1 *descend, dismount

Con mount, *ascend, scale, climb

2 **Alight, light, land, perch, roost** share the meaning to come to rest after or as if after a flight, a descent, or a fall.

Alight suggests previous controlled or gentle movement through the air or open space (as of a flying bird or a floating snowflake) <skylarks *alight* on the ground> **Light**, sometimes the equivalent of *alight*, more often presupposes a falling or jumping than flying or floating, and sometimes merely a wandering or roving <he sprang from the roof and *lighted* on his feet> <we came smack down on the animal tent; when we *lit* the tent began to tear—*Sandburg*> **Land** applies to a boat coming to land or an airplane grounding. Though often used interchangeably with *light*, it may connote arrival at a destination and sometimes driving force or power <the airplane *landed* in a swamp> <he fell headlong and *landed* on his face> <his blow *landed* in the spot he aimed at> <he has *landed* where he hoped, in an executive position> **Perch** and **roost** basically imply alighting of birds, but *perch* suggests settling on something elevated to which the claws may cling (as to a pole, bar, or twig) and *roost*, the settling for rest or sleep, especially by domestic fowls, on the perches and in the shelters prepared for them. So *perch* often implies elevation of position and tenuousness of grasp or hold <twenty or more [rooks] *perched* aloft, cawing and con-

versing comfortably—*Jefferies*> <a lofty perpendicular cliff . . . with a castle . . . *perched* on the distant top—*Lucas*> **Roost**, when used of persons, often suggests a position like that of roosting fowls <boys *roosting* on the rail of a fence>

Con *rise, arise, soar, ascend, rocket

align *line, line up, range, array

Ana *order, arrange, marshal: regulate, fix, *adjust

Con *disorder, disarrange, derange, unsettle

alike *like, similar, analogous, comparable, akin, parallel, uniform, identical

Ana *same, selfsame, equivalent, identical

Ant different —*Con* *distinct, separate: *different, divergent, diverse, disparate, various

aliment *food, pabulum, nutriment, nourishment, sustenance, pap

Con *poison, venom, bane

alive 1 *living, animated, animate, vital

Ana *active, dynamic, live, operative: *lively, vivacious, sprightly: being, existing (see BE)

Ant dead, defunct —*Con* lifeless, inanimate, deceased (see DEAD): inert, *inactive: torpid, comatose (see LETHARGIC)

2 *aware, awake, sensible, cognizant, conscious

Ana alert, wide-awake, vigilant, *watchful: *intelligent, knowing, quick-witted

Ant blind (*to*): anesthetic (*to*) —*Con* *indifferent, unconcerned, aloof: insensitive, *insensible, impassible

alkaline, basic are closely related and, in many aspects of their use synonymous terms. Both are opposites or correlatives of the adjective *acid* and denote some aspect of relationship to bases (alkalies). Distinctively, **alkaline** suggests the properties (as neutralizing acids, turning litmus paper blue) of bases <*alkaline* taste> <*alkaline* solution> <*alkaline* earth> <a strong *alkaline* reaction> **Basic** relates more directly to the bases themselves, especially in implying derivation from or capacity to react as a base <a *basic* salt> <*basic* dye>

all *adj* 1 *whole, entire, total, gross

Ana complete, plenary, *full

2 **All, every, each**, when applied to the individuals of a group, imply inclusion of the entire membership with no exceptions. **All** is applied to the aggregate of individuals and implies consideration of it as a unit without regard to the individuals as distinct persons or things <*all* men are mortal> <*all* books are written to be read> **Every** is applied to any of the individuals comprising the group, regarded not as a concrete person or thing but as the type or representative of the entire membership <*every* man is mortal> <*every* book published should be worth reading> **Each** is applied to any or every individual of the group, but unlike *every* it implies reference to him or to it as a distinct, recognizable, and therefore concrete person or thing <he knows the weaknesses of *each* batter on the team> <*each* book on this shelf is worth reading> <*each* person in this club must pay his share of the expense>

Ant no

all-around *versatile, many-sided

Ana complete, *full: apt, ready, *quick

allay *relieve, alleviate, lighten, assuage, mitigate

Ana abate, lessen, *decrease, diminish: mollify, *pacify, appease: *moderate, temper

Ant intensify —*Con* *provoke, excite, stimulate: *stir, rouse, arouse: aggravate, enhance (see INTENSIFY)

allege *adduce, cite, advance

Ana affirm, *assert, declare, profess, avouch, avow: recite, recount, rehearse, state (see RELATE)

Ant contravene: (*in law*) traverse —*Con* *deny, contradict, gainsay, negative, impugn: *disprove, refute,

rebut, controvert

allegiance fealty, loyalty, *fidelity, devotion, piety

Ana faithfulness, steadfastness, constancy, staunchness (see corresponding adjectives at FAITHFUL); obeisance, deference, homage, *honor; obedience (see corresponding adjective OBEDIENT); *obligation, duty

Ant treachery: treason —**Con** traitorousness, perfidy, faithlessness, disloyalty (see corresponding adjectives at FAITHLESS); disaffection, alienation (see corresponding verbs at ESTRANGE)

allegory 1 **Allegory**, **symbolism** designate methods of representation in art. Both characteristically aim to represent concretely something that is abstract or for some other reason not directly representable. **Allegory** is applied to a form of representation found not only in literature but also in painting and sculpture. It evokes a dual interest, one in the story, scene, or characters presented and the other in the ideas they convey or the significance they bear; it demands not only aesthetic enjoyment but intellectual interpretation. The incidents, scenes, or characters may be historical or fictitious or fabulous, but if the artist has given to the historical an added meaning or has invented his material to convey an idea or truth, he has employed *allegory*. **Symbolism** is applied to a form of representation used not only in literature, painting, and sculpture but also in music, architecture, ceremonial, and pageantry. It implies an attempt to represent what by its very nature is incapable of direct representation because it is immaterial, ideal, or spiritual. Originally *symbolism* denoted representation by an accepted sign or symbol (see SYMBOL 1); in painting and sculpture the divinity of Jesus was represented by a nimbus enclosing a cross and sainthood by a simple nimbus usually enclosing rays. In modern use *symbolism* also implies artistic imitation and invention as a means of suggesting not only something that eludes representation because of its nature but also something of which the literal representation is taboo (as by reason of defiance of the generally accepted moral code). Thus, a poet employs *symbolism* when his images, his rhythms, or his words evoke ideas or emotions that escape analysis; a painter employs *symbolism* when he uses arrangements of colors and of lines not to represent definite objects but to suggest something that is impalpable or intangible; a novelist or dramatist employs *symbolism* when his novel or play carries more than its surface meaning or offers hints of an underlying significance. Especially in literature *symbolism* is not always clearly distinguishable from *allegory*. The latter term, however, implies organization and a pattern in which the characters, incidents, and setting serve as symbols.

2 **Allegory**, **parable**, **myth**, **fable** are comparable as literary forms that typically tell a story for the sake of presenting a truth or of enforcing a moral. An **allegory** veils its true meaning (its underlying or allegorical sense) by leaving it to be deduced from the story it tells (the outward or literal sense). Its characters and incidents are therefore either figurative or typical; they serve as a bait to the consideration of dull or unpleasant truths (as in Bunyan's *Pilgrim's Progress*), as a graded approach to the apprehension of ideas too difficult for the ordinary man (as in Dante's *Divine Comedy*), or as a cloak for an attack on persons (as in Dryden's *Absalom and Achitophel*) or for an exposure of vices and follies (as in Swift's *Gulliver's Travels*). When the allegory is very short and simple and narrates or describes a familiar occurrence in nature or life that by analogy conveys a spiritual truth, it is called a **parable**. The term is specifically applied to the brief allegories used by Jesus in his sermons (as the one likening the kingdom of heaven to the growth of a mustard

seed). **Myth** is applied to a type of brief allegory used especially by Plato in expounding a difficult philosophical conception. Such myths are, as a rule, invented and their characters and incidents are purely imaginary. In a **fable** the moral is usually clearly stated at the end. Its characters are animals (as in Orwell's *Animal Farm*) or inanimate things that by talking and acting as human beings reflect the weaknesses and follies of men.

alleviate *relieve, lighten, assuage, mitigate, allay

Ana *moderate, temper: lessen, reduce, diminish, *decrease: remedy, *cure

Ant aggravate —**Con** *intensify, heighten: *provoke, excite, stimulate: arouse, awaken, rouse, *stir

alliance, **league**, **coalition**, **fusion**, **confederacy**, **confederation**, **federation** agree in the idea of combination, chiefly political, for a common object. **Alliance** applies particularly to a joining of interests on the part of families (by marriage) or of states (by compact or treaty); it is also less formally used of a connection for mutual benefit between other bodies, organized or not (<a defensive *alliance*> <an *alliance* between producers and consumers> **League** though often used without distinction from *alliance* typically suggests a more formal compact or more definite object <the Solemn *League* and Covenant> and may frequently (unlike *alliance*) be taken in a bad sense <to be in *league* with the powers of darkness> **Coalition** refers to a temporary alliance of otherwise opposing interests, parties, or factions <Mr. Fox, and his famous *coalition* with Lord North—*Gibbon*> <a *coalition* government> **Fusion** is a coalition of political parties for the purpose of defeating another party in an election <a *fusion* of Republicans and independent Democrats in New York City opposed the Tammany Democratic ticket> **Confederacy** and **confederation** apply specifically to a union by compact or treaty of independent states under a government to which powers are delegated for dealing primarily with common external relations <the Southern *Confederacy*> <the Articles of *Confederation*> <the German *Confederation*> **Federation** in its broad sense includes any union under the terms of a league or covenant <the *Federation* of Labor> but specifically it designates a sovereign state or city formed by the union of other states or cities with a central general government and several local governments <the United States of America constitutes a *federation*> <*federation* was the name given to the scheme for blending the Five Towns into one town—*Bennett*> <the *Federation* of Malaysia>

allied *related, cognate, kindred, affiliated

Ana akin, parallel, similar (see LIKE): linked, associated, united, connected (see JOIN): cooperating, uniting, conjoining (see UNITE)

Ant unallied —**Con** alien, foreign, extraneous (see EXTRINSIC): *different, divergent, diverse, various, disparate

allocate *allot, assign, apportion

Ana *distribute, dispense, divide, deal, dole: *grant, accord, award

Con withhold, detain, retain, hold, hold back, *keep

allot, **assign**, **apportion**, **allocate** mean to give as one's share, portion, role, or place. **Allot** implies more or less arbitrary or haphazard selection and in itself conveys no suggestion of a fair or equal distribution <*allotted* himself an hour a day for exercise> <*allot* 500 square feet to an exhibitor> <he had been *allotted* a small sitting room—*Mackenzie*> <Brutus and Cassius . . . were *allotted* the minor governments of Crete and Cyrene—*Buchan*> **Assign** stresses authoritative and usually fixed allotment; it too carries no hint of an even division <this original and supreme will organizes the government, and *assigns* to different departments their respective powers—*John*

Marshall <to each month there has been assigned by tradition a birthstone considered appropriate to that month—*Nurnberg & Rosenblum*> **Apportion**, on the other hand, implies a principle of fair division, sometimes of equivalence in sharing, but more often of a proportionate distribution <after each decennial census Congress *apportions* the number of representatives to be elected by each state> <his guardians had *apportioned* to him an allowance . . . adequate to his position—*Disraeli*> **Allocate** is used chiefly in reference to money, property, territory, or powers, and suggests definite appropriation to a particular person or group or dedication to a particular use <*allocate* a sum of money for the construction of a bridge> <districts of Czechoslovakia *allocated* to Germany by the Munich Agreement> <the Marine Corps would be *allocated* primary responsibility for amphibious development and doctrine pertaining to landing forces—*Collier's Yr. Bk.*>

Ana divide, dispense, *distribute, deal, dole: *give, bestow

Con *keep, retain, withhold, detain, hold, hold back: confiscate, appropriate, *arrogate

allow 1 permit, suffer, *let, leave

Ana tolerate, endure, stand, brook (see BEAR): accede, acquiesce (see ASSENT): *yield, submit, defer

Ant inhibit —*Con* *forbid, prohibit, enjoin: *prevent, avert, ward

2 *grant, concede

Ana admit, *acknowledge, confess: acquiesce, accede, *assent

Ant disallow —*Con* reject, refuse (see DECLINE): *disapprove, deprecate: *deny, gainsay, contradict, traverse

allowance 1 *ration, dole, pittance

Ana allotment, apportionment, assignment (see corresponding verbs at ALLOT): share (see corresponding verb SHARE): grant, *appropriation, subsidy

2 **Allowance, concession** both signify a change made by way of compromise or adjustment. **Allowance** usually implies a modification or variation of a requirement or a standard made for a good reason (as probable contingencies or mitigating circumstances) <make *allowance* for the current in steering toward the opposite bank> <make *allowance* for his inexperience> <make *allowance* for wear through friction in designing the parts of a machine> <if business imposes its restraints and its silences and impediments, Mr. Darnay as a young gentleman of generosity knows how to make *allowance* for that circumstance—*Dickens*> **Concession** implies that the change has been made reluctantly and usually as a favor or indulgence <they would make no *concession* to a candidate's youth and inexperience> <the sole *concession* to leisure allowed me out of the year was one month on a farm—*Heiser*> <any *concession* to fashion was, they felt, unbecoming to their age—*Sackville-West*>

Ana adjustment, accommodation, adaptation (see corresponding verbs at ADAPT): modification, variation (see under CHANGE *vb*)

3 *advantage, handicap, odds, edge

alloy *admixture, adulterant

allude *refer, advert

Ana *suggest, imply, hint, intimate

allure *vb* *attract, captivate, charm, fascinate, enchant, bewitch

Ana *lure, entice, seduce: *invite, solicit, woo, court: beguile, delude (see DECEIVE)

Ant repel —*Con* alienate, * estrange, disaffect, wean: shun, avoid, elude, eschew (see ESCAPE)

alluring attractive, charming, fascinating, bewitching, enchanting, captivating (see under ATTRACT *vb*)

Ana lovely, fair, *beautiful, pretty, bonny: seductive, enticing, tempting, luring (see corresponding verbs at LURE): beguiling, delusive (see corresponding verbs at DECEIVE)

Ant repulsive —*Con* *offensive, loathsome, repugnant, revolting: repellent, abhorrent, distasteful, obnoxious (see REPUGNANT)

ally colleague, *partner, copartner, confederate

Ana *associate, comrade, companion: supporter, upholder, backer (see corresponding verbs at SUPPORT): cooperator (see corresponding verb at UNITE)

Ant adversary —*Con* *enemy, foe; competitor, rival (see corresponding verbs at RIVAL): *opponent, antagonist

almost *nearly, approximately, well-nigh

alms benefaction, contribution, *donation

Ana *charity, philanthropy: dole, pittance, allowance, *ration

alone *adj* 1 **Alone, solitary, lonely, lonesome, lone, lorn, forlorn, desolate** may all refer to situations of being apart from others or emotions experienced while apart. **Alone** stresses the fact of physical isolation and also may connote feelings of isolation from others <the captain of a ship at sea is a remote, inaccessible creature, something like a prince of a fairy tale, *alone* of his kind—*Conrad*> **Solitary** may indicate a state of being apart that is desired and sought for <Netta loved these *solitary* interludes . . . She could dream things there and tell herself stories there, untroubled—*Powys*> It often connotes sadness at the loss or lack of usual or close connections or consciousness of isolation or remoteness <being *solitary* he could only address himself to the waiter—*Woolf*> <an only child, he was left *solitary* by the early death of his mother . . . whose loss he felt severely—*Fulton*> **Lonely** may simply indicate the fact of being alone but more often suggests isolation accompanied by a longing for company (he was *lonely*, but not in an unhappy sense . . . it was no hardship for him to be *alone*—*Canby*) <his grim look, his pride, his silence, his wild outbursts of passion, left William *lonely* even in his court—*J. R. Green*> <he felt more *lonely* and forsaken than at any time since his father's death—*Archibald Marshall*> **Lonesome**, often more poignant, suggests sadness after a separation or bereavement <you must keep up your spirits, mother, and not be *lonesome* because I'm not at home—*Dickens*> <her flight . . . yet smote my *lonesome* heart more than all misery—*Shelley*> **Lone** especially in poetical use may replace either *lonely* or *lonesome* <in his *lone* course the shepherd oft will pause—*Wordsworth*> <the mother's dead and I reckon it's got no father; it's a *lone* thing—*George Eliot*> **Lorn** suggests recent separation or bereavement <when *lorn* lovers sit and droop—*Praed*> **Forlorn** indicates dejection, woe, and listlessness at separation from someone dear <as *forlorn* and stupefied as I was when my husband's spirit flew away—*Hardy*> <as *forlorn* as King Lear at the end of his days—*G. W. Johnson*> **Desolate** is most extreme in suggesting inconsolable grief at loss or bereavement <fatherless, a *desolate* orphan—*Coleridge*> <for her false mate has fled and left her *desolate*—*Shelley*>

Solitary, lonely, lonesome, desolate are applied to places and locations more than the other words discriminated above. **Solitary** may be applied either to something that is apart from things similar or that is uninhabited or unvisited by human beings <a *solitary* chamber, or rather cell, at the top of the house, and separated from all the other apartments by a gallery and staircase—*M.W. Shelley*> **Lonely** may be applied to what is either far apart from things similar and seldom visited or to what is inhabited by only one person or group and conducive to loneliness <heard not only in the towns but even in *lonely* farmhouses

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

—*Anderson* > **Lonesome** has much the same suggestion <like one that on a *lonesome* road doth walk in fear and dread—*Coleridge*> **Desolate** indicates either that a place is abandoned by people or that it is so barren and wild as never to have attracted them <as if nothing had life by day, in that lifeless *desolate* spot—*Trollope*>

Ana *single, sole, lone, unique: deserted, abandoned, forsaken (see **ABANDON**): isolated, secluded (see corresponding nouns at **SOLITUDE**)

Ant accompanied —**Con** attended, escorted, convoyed, chaperoned (see **ACCOMPANY**): aided, assisted, helped (see **HELP vb**)

2 Alone *adj & adv* *only

aloof *indifferent, detached, uninterested, disinterested, unconcerned, incurious

Ana disdainful, haughty, arrogant, *proud: cool, *cold: reserved, reticent, *silent

Ant familiar, close —**Con** friendly, neighborly (see **AMICABLE**): intimate, confidential, chummy (see **FAMILIAR**)

alp peak, *mountain, mount

also, too, likewise, besides, moreover, furthermore denote in addition and are used when joining (not necessarily in the same sentence) one proposition or consideration to another. **Also** adds to a statement something that may be affirmed equally with what precedes <that where I am, there ye may be *also*—*John* 14:3> <every simile ought not only to be well adapted to the subject, but *also* to include every excellence of description—*Goldsmith*> **Too** is less formal than *also*, and adds with a lighter touch <like *Twilight's, too*, her dusky hair—*Wordsworth*> <I can like now, and admire you *too*, sir—*Thackeray*> **Likewise** is more formal and slightly more explicit than *also*; it sometimes implies specific likeness or connection between the ideas which it unites <have I not seen—ye *likewise* may have seen—*Wordsworth*> <Greek, was your ambition *likewise* doomed to failure?—*Browning*> **Besides, moreover, furthermore** introduce a statement which must be taken into consideration along with the matter which precedes. **Besides** usually introduces a statement that strengthens what has been said <his project is an excellent one; *besides*, it is likely to help a great many persons> **Moreover** is more emphatic than *besides*, and often serves as a transitional word between sentences: it often implies that the stronger of two considerations is yet to be presented <the mountain was steep and rugged; *moreover*, its sides were coated with ice> **Furthermore** is sometimes the most formal of these words; its chief use, however, is in a chain of additions where *besides* or *moreover* has already been used <he is well-liked; moreover, he is absolutely dependable; *furthermore*, there is no one who can take his place>

alter 1 *change, vary, modify

Ana adjust, accommodate, *adapt: qualify, temper (see **MODERATE**): *transform, metamorphose, convert

Ant fix —**Con** *set, settle, establish: preserve, conserve (see **SAVE**): *continue, last, endure, abide, persist

2 *sterilize, castrate, spay, emasculate, mutilate, geld, castrate

alteration change, variation, modification (see under **CHANGE vb**)

Ana adjustment, adaptation, accommodation (see corresponding verbs at **ADAPT**): transformation, metamorphosis, conversion (see under **TRANSFORM**)

Ant fixation: fixity —**Con** permanence, stability, perdurability (see corresponding adjectives at **LASTING**): continuance, endurance, persistence (see corresponding verbs at **CONTINUE**)

altercate *vb* quarrel, wrangle, squabble, bicker, spat, tiff (see under **QUARREL n**)

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

Ana fight, *contend, battle, war: dispute, debate, agitate (see **DISCUSS**)

Ant concur —**Con** *agree, coincide: conform, reconcile, accommodate, *adapt

altercation *quarrel, wrangle, squabble, bickering, spat, tiff

Ana fight, conflict, combat, *contest: *discord, dissension, contention, difference, variance, strife: controversy, dispute, *argument

Ant concurrence: accord —**Con** agreement, coincidence (see corresponding verbs at **AGREE**): *harmony, concord, consonance

alternate *adj* *intermittent, recurrent, periodic

Ana alternating, rotating (see **ROTATE**): *reciprocal, corresponding, complementary

Ant consecutive —**Con** successive, sequent (see **CONSECUTIVE**)

alternate *vb* *rotate

Ana recur, *return, revert: oscillate, fluctuate, sway, waver (see **SWING**)

Con *follow, succeed

alternate *n* *substitute, supply, understudy, double, stand-in, pinch hitter, locum tenens

alternation vicissitude, *change, mutation, permutation

Ana rotation (see corresponding verb **ROTATE**): oscillation, fluctuation, wavering (see corresponding verbs at **SWING**): turning, revolving, rotating, wheeling (see **TURN vb**): recurrence, return, reversion (see under **RETURN vb**)

alternative option, *choice, preference, selection, election

although *though, albeit

altitude *height, elevation

Ana highness, tallness, loftiness (see corresponding adjectives at **HIGH**): *summit, peak, apex

Con depth, profundity (see corresponding adjectives at **DEEP**)

altruistic benevolent, *charitable, humanitarian, philanthropic, eleemosynary

Ana self-abnegating, self-denying (see corresponding nouns at **RENUNCIATION**): generous, bountiful, bounteous, openhanded, *liberal

Ant egoistic —**Con** egotistic, self-loving, self-esteeming, conceited (see corresponding nouns at **CONCEIT**): self-indulging, self-pampering (see base words at **INDULGE**)

amalgam *mixture, admixture, compound, blend, composite

amalgamate blend, commingle, merge, coalesce, fuse, *mix, mingle

Ana combine, unite, link, associate, *join: consolidate, unify, *compact

Con disintegrate, crumble, decompose (see **DECAY**): disperse, dissipate, *scatter: *separate, part, divide

amalgamation *consolidation, merger

amass *accumulate, hoard

Ana collect, *gather, assemble: *heap, pile, mass, stack

Ant distribute —**Con** dissipate, *scatter, disperse: dis-

perse, divide, deal, dole (see **DISTRIBUTE**)

amateur, dilettante, dabbler, tyro denote a person who follows a pursuit without attaining proficiency or a professional status. **Amateur** may denote one who has a taste or liking for something rather than an expert knowledge of it; in this sense it is distinguished from *connoisseur* <an *amateur* of cameos> <affected the pose of the gentleman *amateur* of the arts—*F. H. Ellis*> *Amateur* is also applied to a person whose participation in an activity requiring skill is due to a personal rather than a professional interest. It usually but not invariably implies a lack of mastery. This latter implication is not often found in sports, where a technical distinction between an *amateur*

(one who competes without remuneration) and a *professional* (one who competes for reward) prevails. In other use the word is opposed to *expert* and *adept*, as well as *professional*. Sometimes it suggests lack of experience or apprenticeship (every artist was first an *amateur*—*Emerson*); sometimes it connotes indulgence in a particular pursuit as a pastime or as an avocation (how could an *amateur* venture out and make an exhibition of himself after such splendid rowing!—*Jefferies*) Very often, especially in contrast to *expert* or *adept*, it connotes superficiality, bungling, or indifference to professional standards (it is beginning to be hinted that we are a nation of *amateurs*—*Rosebery*) (the third earl of Shaftesbury . . . illustrated this unsystematic method of thinking. He was an *amateur*, an aristocratic *amateur*, careless of consistency—*Ellis*) **Dilettante** is applied to an amateur (in the older underogatory sense of that word) in the fine arts (see **AESTHETE**). It stresses enjoyment rather than effort, a frittering rather than a concentration of one's energies, and, sometimes, the point of view of the aesthete (the *dilettante* lives an easy, butterfly life, knowing nothing of . . . toil and labor—*Osler*) (we continue to respect the erudite mind, and to decry the appreciative spirit as amateurish and *dilettante*—*Benson*) **Dabbler** implies a lack of serious purpose, but it suggests desultory habits of work and lack of persistence (your *dabblers* in metaphysics are the most dangerous creatures breathing—*Tucker*) (the certainty of touch which marks the difference between an artist and the *dabbler* . . . can come only after patient study—*Wendell*) **Tyro** does not necessarily imply youth but does suggest comparable inexperience or audacity with resulting incompetence or crudeness (it may be fancy on the part of a *tyro* in music to suggest that a change from poetry to prose occurs when Beethoven introduces in the last movement of the Choral Symphony . . . a subject in words—*Alexander*) ("a noble theme!" the *tyro* cried, and straightway scribbled off a sonnet. "A noble theme," the poet sighed, "I am not fit to write upon it"—*Wells*) **Ana** *novice, apprentice, probationer **Ant** professional: expert —**Con** adept, wizard, virtuoso (see **EXPERT**)

amative amorous, amatory, *erotic

amatory *erotic, aphrodisiac, amative, amorous

amaze *vb* astound, flabbergast, astonish, *surprise

Ana dumbfound, bewilder, confound, nonplus (see **PUZZLE**): impress, touch, strike, *affect

amazement *wonder, wonderment, admiration

amazon *virago, termagant

ambassador, legate, nuncio, minister, envoy, internuncio, chargé d'affaires all designate a diplomatic agent serving his sovereign or government in a foreign country and are here compared with reference to their order of precedence as fixed by international regulations and protocol. *Ambassador, legate, and nuncio* designate a diplomatic agent of the first rank who is accredited to the head of the state in which he serves, is considered to represent both the government and the person of the head of state whom he serves, and as the personal representative of his sovereign or chief executive enjoys certain privileges and precedences not shared by diplomats of lesser rank. An *ambassador* (in full *ambassador extraordinary and plenipotentiary*) is almost always a resident agent, though the term may also denote one who goes on a special mission as the chief executive's diplomatic agent. In this case he may be distinguished as an *ambassador-at-large*. The comparable diplomatic agents of the pope are called *legate* and *nuncio*, the difference between them being that a *legate* goes on a special mission and is clothed with authority to act in the name of the pope and a *nuncio* serves as the

accredited resident ambassador of the Holy See at a foreign court or seat of government. **Minister** designates a diplomatic agent of the second or of the third rank. He, too, is accredited to the head of the state to which he is sent but as the representative solely of the government and not of the person of the head of his own state. As an agent of the second rank, he may also be called an *envoy*, for his full title is *envoy extraordinary and minister plenipotentiary*. **Internuncio** is the designation of the papal diplomatic agent of the second rank equivalent to an *envoy extraordinary and minister plenipotentiary*. Agents of the third rank, called more fully *ministers resident* are now uncommon. They perform essentially the same function as the *envoy extraordinary and minister plenipotentiary* but are usually assigned to less important capitals.

A **chargé d'affaires** is an agent of the fourth rank who directs diplomatic affairs in place of an ambassador or minister in the absence or lack of such higher-ranked agent. He is accredited to the head of the department dealing with foreign affairs rather than to the head of the state and his appointment may be on a permanent footing and by his home government or on an interim basis by the head of a mission (an ambassador or minister).

ambiguity, equivocation, tergiversation, double entendre are comparable when they denote expression or, more often, an expression, capable of more than one interpretation. **Ambiguity** is referable to an expression that admits of two or sometimes more interpretations; commonly, however, it suggests the use of a word or phrase rather than a construction that may be taken in either of two senses (where no *ambiguity* arises, the word polygon may be used to refer either to the broken line, or to the part of the plane enclosed by it—*R. R. Smith*) **Ambiguity** does not in itself suggest intentional lack of explicitness; when that idea is to be conveyed or when an attempt to mislead or an indifference to accuracy in statement is to be suggested, **equivocation** is the preferable word (the first cardinal sin from the logician's standpoint is *equivocation*. Thus Hobbes has declared that "in all discourses wherein one man pretends to instruct or convince another, he should use the same word constantly in the same sense"—*Philip Wheelwright*) (*equivocation* is halfway to lying—*Penn*) But *equivocation* may imply that the writer or speaker is himself confused. **Tergiversation** stresses a shifting of senses, especially of a word or words important to an argument. It implies evasion and looseness of thought; more specifically it connotes intentional subterfuge and often a low standard of intellectual honesty (humanism depends very heavily, I believe, upon the *tergiversations* of the word *human*; and in general, upon implying clear and distinct philosophic ideas which are never there—*T. S. Eliot*) **Double entendre** designates an ambiguity which invites or allows a twofold meaning, one sense being a cover for a subtle implication, especially a stinging or an indelicate implication (sometimes with these parliamentary comedies, the humor lay in a kind of *double entendre*, using the phrase in an innocent sense—*Manchester Guardian*) (bedroom farce with many of the *double entendres* . . . that go with that form of entertainment—*McCarten*)

Ant lucidity: explicitness —**Con** clearness, perspicuousness (see corresponding adjectives at **CLEAR**); definiteness, specificity, expressness (see corresponding adjectives at **EXPLICIT**)

ambiguous equivocal, cryptic, enigmatic, vague, *obscure, dark

Ana dubious, *doubtful, questionable

Ant explicit —**Con** lucid, perspicuous, *clear: express, definite, specific, categorical (see **EXPLICIT**)

ambition, aspiration, pretension mean strong desire for advancement. **Ambition** has personal advancement or preference as its end; it may be praiseworthy but is sometimes inordinate (*ambition for fame*) (*ambition to hold office*) (*ambition to acquire wealth*) (*vaulting ambition, which o'erleaps itself—Shak.*) **Aspiration** implies as its object something felt to be above one, the striving after which is uplifting or ennobling (*aspiration after knowledge*) (*that spirit of his in aspiration lifts him from the earth—Shak.*) **Aspiration**, however, is sometimes used especially in the plural in a derogatory sense of ambition which is felt to be unwarranted or presumptuous (*his aspirations must be nipped in the bud*) **Pretension** (see also CLAIM, PRETENSE) may be preferred to *aspiration* in this latter sense, for it carries a hint of presumptuousness and, therefore, of lack of real claim to the powers which fulfillment of the ambition or aspiration requires (*they are always looked upon, either as neglected, or discontented because their pretensions have failed—Montagu*) More often *pretension* implies less driving power than *ambition* or *aspiration* and suggests the guidance of mere desire rather than the possession of the necessary gifts (*it was the undergraduate literary club, whose membership included all nice boys with literary pretensions—Marquand*) **Ana** urge, lust, *desire: eagerness, avidity, keenness, anxiety (see corresponding adjectives at EAGER): spur, goad, incentive, *motive **Con** contentment, satisfaction (see corresponding verbs at SATISFY): resignation, *patience: indolence, faineance, sloth (see corresponding adjectives at LAZY)

ambitious **1** **Ambitious, emulous** both mean extremely desirous of something that will give one power, fame, success, or riches. **Ambitious** often implies inordinate, sometimes presumptuous, eagerness to advance oneself or to attain something beyond one's present reach; it may, in addition, connote aggressiveness in the pursuit of one's ends (*the noble Brutus hath told you Caesar was ambitious: if it were so, it was a grievous fault—Shak.*) **Emulous** stresses the desire to equal or surpass others; it can suggest covetous rivalry or merely the spirit of competition (*men of pedigree . . . emulous always of the nearest place to any throne, except the throne of grace—Cowper*) **Ana** *eager, avid, anxious, keen: aspiring, panting, aiming (see AIM *vb*): daring, venturesome, *adventurous **Ant** unambitious —**Con** apathetic, phlegmatic, stolid (see IMPASSIVE): indolent, faineant, slothful, *lazy **2** **Ambitious, pretentious, utopian** are comparable when they are applied to such matters as plans, designs, programs, or policies and mean straining or exceeding the capacity of their authors or executors. Something is **ambitious** which is either so far beyond what can with certainty be accomplished that its realization or execution is doubtful or which, if realized, is accomplished only by excessive effort or by testing one's powers to the utmost (*the philosopher has the ambitious aim of unifying, or harmonizing, these points of view—Inge*) (*his last novel was his most ambitious and possibly his best*) Something is **pretentious** which so far exceeds one's powers or resources that any attempt to carry it out reveals one's inadequacy, inexperience, or lack of sufficient skill; in this sense it often but not necessarily implies ostentation (*the program was too pretentious for so young a violinist*) Something is **utopian** which is utterly impracticable or unattainable under present or sometimes, any conditions. *Utopian*, if it does not suggest an idealistic approach, invariably implies indifference to actualities (*the reformers started out with an ambitious program which its critics called utopian; time has shown that it was too pretentious*) **Ana** audacious, bold (see BRAVE): daring (see ADVENTUR-

OUS): ostentatious, *showy

Ant modest —**Con** lowly, *humble: *moderate, temperate

amble *vb* *saunter, stroll

Ana loiter, dawdle (see DELAY): meander, ramble, roam (see WANDER)

ambulant ambulatory, peripatetic, *itinerant, nomadic, vagrant

Ant bedridden (*of patients*)

ambulatory *adj* ambulant, peripatetic, *itinerant, nomadic, vagrant

ambulatory *n* *passage, passageway, aisle, gallery, cloister, arcade, hall, hallway

ambuscade *ambush

ambush *vb* *surprise, waylay

Ana *attack, assault, assail: trap, entrap, snare, ensnare, capture, *catch

ambush *n* **Ambush, ambuscade** mean a device to entrap an enemy by lying in wait under cover for an opportune moment to make a surprise attack. **Ambush**, however, is also used to designate an act of lying in wait or in concealment (as for spying, frightening, or obtaining an advantage); when used of nonmilitary activity it sometimes connotes unfairness or cowardliness (*ambushes of cutthroats—Thackeray*) (*when he was a boy he had . . . spied on the Pecos men . . . He had lain in ambush for two nights on the mountain—Cather*) **Ambuscade** usually implies the legitimate strategic disposition of troops in concealment, but in military use is more often applied to the body of troops or to their position than to the trap (*the knights and gentlemen volunteered for an ambuscade to cut off the convoy—Froude*) (*feared in every wavering brake an ambuscade—Tennyson*)

Ana trap, snare, *lure: *attack, onset, onslaught, assault **ameliorate** *improve, better, help

Ana amend, remedy, reform, rectify, *correct: mitigate, alleviate, *relieve, lighten

Ant worsen: deteriorate *vt* —**Con** *injure, harm, hurt, damage, impair, mar, spoil: *intensify, aggravate

amenable **1** answerable, liable, accountable, *responsible **Ana** open, subject, *liable: *subordinate, dependent, subject

Ant independent (*of*): autonomous —**Con** autocratic, arbitrary, *absolute: *free, autarchic **2** tractable, *obedient, docile, biddable

Ana pliant, adaptable, pliable (see PLASTIC): responsive (see TENDER): sensitive, open (see LIABLE): submissive, *tame, subdued

Ant recalcitrant, refractory —**Con** intractable, *unruly, ungovernable, headstrong: truculent, *fierce: *obstinate, stubborn, mulish

amend reform, *correct, rectify, revise, emend, remedy, redress

Ana *improve, better, ameliorate: *mend, repair: elevate, raise, *lift

Ant debase: impair —**Con** corrupt, vitiate, deprave, debauch, pervert (see DEBASE): *injure, mar, spoil, damage, harm, hurt

amends redress, *reparation, indemnity, restitution

Ana compensation, recompense (see corresponding verbs at PAY): atonement, expiation (see under EXPIATE)

amenity **1** **Amenity, luxury** both denote something (as an object, a feature, a quality, or an experience) that gives refined or exquisite pleasure or is exceedingly pleasing to the mind or senses. **Amenity** typically implies a delightful mildness, gentleness, or softness, especially in contrast to an uncomfortable or distressing harshness, roughness, or crudeness (*many English go to the Riviera in the winter because of the amenity of its climate*) It may imply no

more than a vague conducing to physical or material comfort or convenience <every *amenity* . . . including . . . showers, central heating, and first-class cuisine—*H. G. Smith*> **Luxury** stresses keen, often voluptuous, enjoyment and unalloyed gratification of the mind or senses, usually without a special suggestion of opulence in the thing enjoyed or sensuality in the pleasure <and learn the *luxury* of doing good—*Goldsmith*> <Mark decided to walk back by the road . . . instead of indulging himself in the *luxury* of once more rejoicing in the solitude of the green lanes—*Mackenzie*> <a dressing room with a marble bath that made cleanliness a *luxury* instead of one of the sternest of the virtues—*Shaw*>

Ana *pleasure, delight, joy, enjoyment: ease, comfort, relaxation (see REST); mildness, softness, blandness, lenity or leniency, gentleness (see corresponding adjectives at SOFT)

Ant rigor —*Con* harshness, roughness, ruggedness (see corresponding adjectives at ROUGH); disagreeableness, unpleasantness (see affirmative adjectives at PLEASANT); hardship, *difficulty, vicissitude
2 *courtesy, attention, gallantry

Ana civility, politeness, courteousness (see corresponding adjectives at CIVIL); graciousness, affability, cordiality, geniality, sociability (see corresponding adjectives at GRACIOUS); *form, convention, convenience: ceremony, formality (see FORM)

Ant acerbity, asperity: rudeness —*Con* glumness, moroseness, crabbedness, surliness (see corresponding adjectives at SULLEN); *acrimony: *affront, insult, indignity; discourtesy, incivility, impoliteness (see corresponding adjectives at RUDE)

amercer fine, mulct, *penalize

amercement fine (see under PENALIZE)

amiable, good-natured, obliging, complaisant mean having or manifesting the desire or disposition to please. All may refer either to moods or to temperaments. **Amiable** usually implies friendliness, affability, or kindness, qualities that inspire liking <from what he said of Miss Darcy, I was thoroughly prepared to see a proud, reserved, disagreeable girl. Yet he . . . must know that she was as *amiable* and unpretending as we have found her—*Austen*> Often, however, the word suggests little more than a sweet temper <preferred an *amiable* softness to a tragic intensity—*Glasgow*> Occasionally it additionally connotes lack of firmness or strength <she suddenly married a poor, good-for-nothing, *amiable* fellow—*Deland*> **Good-natured** implies a disposition not only to please but to be pleased; consequently it often connotes undue compliance or indifference to imposition <he was too *good-natured* a man to behave harshly—*Macaulay*> <horseplay and practical jokes . . . at weddings . . . require *good-natured* toleration—*Sumner*> **Obliging** stresses a readiness to be helpful, or to accommodate to the wishes of others <Keppel had a sweet and *obliging* temper—*Macaulay*> <he always had the courtesy to answer me, for he was a most *obliging* fellow—*Keith*> **Complaisant** implies a courteous or sometimes a weakly amiable desire to please or to be agreeable <her importunity prevailed with me and I am extremely glad I was so *complaisant*—*Montagu*>

Ana *gracious, cordial, affable, genial: warmhearted, warm, responsive, *tender: kindly, *kind, benignant, benign

Ant unamiable: surly —*Con* ungracious, *rude, ill-mannered, discourteous, impolite: *sullen, glum, morose, crabbed, dour

amicable, neighborly, friendly are applied to the attitudes and actions of persons, communities, and states that have intercourse with each other and mean marked by or exhib-

iting goodwill or absence of antagonism. **Amicable** frequently implies little more than that the parties concerned are not disposed to quarrel or are at peace with each other <an *amicable* adjustment> <the sometimes *amicable* processes of bargaining between a federation of employers and a trade union—*Hobson*> **Neighborly** sometimes suggests goodwill and kindness and a disposition to live on good terms with those with whom one must associate because of their proximity <the only encirclement sought is the encircling bond of good old-fashioned *neighborly* friendship—*Roosevelt*> Very often, however, because of connotations acquired from scriptural uses of *neighbor*, especially in the parable of the Good Samaritan (“which now of these three . . . was *neighbor* unto him that fell among the thieves?”) it implies the duty of helpfulness and the spirit of fellowship <he hath a *neighborly* charity in him—*Shak.*> <he in a very *neighborly* manner admonished me—*Swift*> **Friendly** is more positive in its implications of cordiality than either of the others and often suggests greater warmth of feeling <a *friendly* nod> <a *friendly* call> <their relations are *friendly*> <a *friendly* correspondence as neighbors and old acquaintances—*Franklin*>

Ana peaceful, *pacific, peaceable: harmonious, concordant, accordant (see corresponding nouns at HARMONY); *social, gregarious, cooperative, hospitable

Ant antagonistic —*Con* quarrelsome, contentious, *belligerent, bellicose, pugnacious, combative: hostile, antipathetic (see corresponding nouns at ENMITY)

amiss, astray share the meaning wrong or otherwise than intended. **Amiss** implies failure (as of an arrow) to reach the mark aimed at and frequently suggests a shortcoming or defect (as by failure to reach a standard, an expectation, a definite conclusion, or the point of being useful) <his shafts of wit went *amiss*> <she seemed unconcerned, as though nothing had happened *amiss*> <no information came *amiss* to him> Sometimes *amiss* suggests a divergence from the normal or usual order <whether his general health had been previously at all *amiss*—*Dickens*> <“What’s *amiss* in the Square?” . . . “Just now I saw a man running along Wedgewood Street”—*Bennett*> **Astray** emphasizes wandering from a predetermined path or the right way or course; it usually suggests moral or intellectual errancy <lest in temptation’s path ye gang *astray*—*Burns*> <in many an hour when judgment goes *astray*—*Wordsworth*>

Ana wrong (or wrongly), *bad (or badly)

Ant aright, right

amity *friendship, comity, goodwill

Ana *harmony, concord, accord: amicableness, neighborliness, friendliness (see corresponding adjectives at AMICABLE)

Ant \enmity —*Con* hostility, animosity, antipathy, antagonism (see ENMITY); *discord, strife, contention, dissension, conflict, difference, variance

ammunition artillery, matériel, munitions, *armament, ordnance, arms

amnesty *pardon, absolution

among *between

amoral nonmoral, unmoral, *immoral

amorous amative, *erotic, amatory

Ana passionate, fervid, ardent, *impassioned: *enamored, infatuated: lustful, lascivious (see LICENTIOUS)

Ant frigid —*Con* *indifferent, aloof, detached: *cold, cool: *impassive, apathetic

amount *n* *sum, total, quantity, number, aggregate, whole
amour, liaison, intrigue, affair denote an instance of illicit sexual relationship. **Amour** is particularly applied to the illicit attachment of prominent persons; it stresses passion as the motivating force and often connotes transience.

Liaison implies duration but not necessarily permanence in the attachment; it is commonly used to designate the relation between a man and his mistress. **Intrigue** emphasizes the clandestine element in the relation and is often closer to *amour* than to *liaison* in its other implications. **Affair** is the least specific term and often suggests equivocal rather than definitely illicit relations or may be used without imputation of impropriety.

amour propre self-esteem, self-love, egoism, egotism, *conceit

Ana *pride, vanity, vainglory: complacency, self-complacency, smugness, self-satisfaction (see corresponding adjectives at COMPLACENT)

ample 1 *spacious, capacious, commodious

Ana expanded, distended, swelled or swollen, inflated (see EXPAND): *large, big, great

Ant meager: circumscribed —**Con** limited, restricted, confined (see LIMIT *vb*): contracted, compressed, condensed, shrunken (see CONTRACT *vb*): scant, skimpy, exiguous, spare (see MEAGER)

2 abundant, *plentiful, plenteous, copious

Ana *liberal, generous, handsome, bountiful, bounteous: *profuse, lavish, prodigal

Ant scant, meager —**Con** skimpy, scrimpy (see MEAGER): *stingy, niggardly

amplify *expand, swell, distend, dilate, inflate

Ana develop (see MATURE): enlarge, augment (see INCREASE)

Ant abridge, condense —**Con** *shorten, abbreviate: *contract, compress

amplitude *expanse, spread, stretch

Ana largeness, bigness, greatness (see corresponding adjectives at LARGE): spaciousness, commodiousness, capaciousness (see corresponding adjectives at SPACIOUS): magnitude, extent, *size: *bulk, mass, volume

Ant straitness: limitation —**Con** restriction, circumscription (see corresponding verbs at LIMIT)

amulet charm, talisman, *fetish

amuse, divert, entertain, recreate mean to cause or enable one to pass one's time in pleasant or agreeable occupations. Their corresponding nouns **amusement, diversion, entertainment, recreation** are also synonyms denoting such an occupation or its effect. Although these words are used more or less interchangeably, they have fundamentally different implications. **Amuse** and **amusement** stress the engagement of one's attention, especially during hours of leisure, in a source of interest or engrossment. They do not necessarily imply play or sport; nevertheless they often suggest light, purposeless, trivial, or laughter-provoking pastimes <what he wanted was to be *amused*, to get through the twenty-four hours pleasantly, without sitting down to dry business—*Macaulay*> <I don't write because I've got things to say . . . I write because it *amuses* me—*Rose Macaulay*> <may speculate, for *amusement*, whether it would not have been beneficial . . . to Britain in particular, to have had a more continuous religious history—*T. S. Eliot*> **Divert** and **diversion**, on the other hand, stress the distraction of the attention from something (as routine interests or worry) which is occupying it and its capture by something different, especially by something that enlivens or promotes gaiety <after the novelty of their surroundings had ceased to attract and *divert* the lepers, they often became homesick—*Heiser*> <only men of leisure have the need for beautiful women to *divert* them—*Buck*> <I believe that the drama has something else to do except to *divert* us—*T. S. Eliot*> <there is a place for farce and *diversion* in experience—*Dewey*> **Entertain** and **entertainment** imply the activities of others to provide amusement or diversion. The words therefore suggest more or less formal

expedients or more or less formal circumstances, which are usually implied in the context <Mrs. Brown will *entertain* the Burtons over the weekend> <a church *entertainment*> <*entertainment* is what schoolboys are now led to expect . . . ; they are disappointed if the school is not a hall of unbroken amusement—*Grandgent*> **Recreate** and the far more common **recreation** usually imply a change of occupation or an indulgence in diversions for the sake of relaxation or refreshment of body or mind <the Lord Chancellor was *recreating* himself, after a long stretch of arduous business, with a journey in Scotland—*Martineau*> <just to sit in the sun, to bask like an animal in its heat—this is one of my country *recreations*—*L. P. Smith*>

Ana engross, absorb (see MONOPOLIZE): beguile, *while, wile: enliven, *quicken, animate: *thrill, electrify
Ant bore —**Con** *tire, weary, fatigue: *depress, oppress: irk, vex, *annoy

amusement diversion, entertainment, recreation (see under AMUSE *vb*)

Ana engrossment, absorption (see corresponding verbs at MONOPOLIZE): play, sport, *fun, jest: disporting, frolicking, rollicking, romping (see PLAY *vb*): jollity, *mirth

Ant boredom —**Con** *tedium, ennui: languidness, listlessness, spiritlessness (see corresponding adjectives at LANGUID): languor, *lethargy

anachronism, solecism are occasionally used interchangeably to mean something that does not properly belong to the setting or background in which it is placed and that is incongruous with it. More specifically, **anachronism** implies a mistake in associating things which do not belong to the same time or age <an automobile in a story of American Civil War times would be an *anachronism*> <an eighteenth-century Chippendale chair is an *anachronism* in a seventeenth-century Jacobean room> When applied to something that does exist at the time under consideration, *anachronism* implies that the thing is behind the times or antiquated and useless <born a thousand years . . . too late and an *anachronism* in this culminating century of civilization—*London*> **Solecism**, on the other hand, implies lack of concord or consonance through an association of things that does not accord with some standard (as of decency, propriety, or logic). One who in affectation introduces foreign words into English speech commits a *solecism* in language <I feel certain that a *solecism* of this kind—the introduction into a particular rite of features not sanctioned by the texts—would have seemed a shocking thing to . . . so accurate a scholar—*L. P. Smith*> <it is a *solecism* in Belize to describe people by their color . . . the colony prides itself . . . on absolute freedom from any taint of racial prejudice—*Norman Lewis*>

anagogic *mystical, mystic, cabalistic

Ana allegorical, symbolical (see corresponding nouns at ALLEGORY): occult, esoteric, *recondite

analgesia anesthesia, anodynia (see under ANODYNE 1)

analgesic *anodyne, anesthetic

Ant irritant

analogous *like, alike, similar, comparable, akin, parallel, uniform, identical

Ana corresponding, convertible (see RECIPROCAL): kindred, *related, allied, cognate

analogue counterpart, *parallel, correlate

analogy 1 *likeness, similitude, resemblance, similarity, affinity

2 **Analogy, simile, metaphor** designate a comparison between things essentially or generically different but strikingly alike in one or more pertinent aspects. **Analogy** is the general term since the simile and the metaphor are kinds of analogies: it is, however, usually restricted in its application to a comparison which brings out the analogy (for this

sense see LIKENESS) between two things for the sake of elucidating something hard to understand <God cannot be described except by *analogy*> <the supreme example of *analogy* in English is *Pilgrim's Progress*. This overwhelms us with direct *analogy*, that is to say, the personification of allegory—*Stevens*> A **simile** is an imaginative analogy used largely for the sake of literary effect by carrying over the emotion aroused by one image or idea to the other with which it is compared. A simile (for example, "fishing is at best almost as unpredictable as New England weather," "blue were her eyes as the fairy-flax, her cheeks like the dawn of day," "a job full of more headaches than a case of bourbon") is often brief but it characteristically indicates (as by the use of *like*, *as*, *so*) that comparison is intended <of the *simile*, we say that two essentially unlike things are explicitly compared . . . and we are to understand that, though some likeness is suggested between the two, the likeness is not literally intended—*Margolis*> A **metaphor** differs from a simile in not stating explicitly that it is an analogy: it therefore imaginatively identifies one object with another (as in "a heart of stone," "Thy word is a lamp unto my feet," "the moon was a ghostly galleon") and ascribes to the first one or more of the qualities of the second or invests the former with emotional or imaginative associations attached to the latter <though by *metaphor* we point to objects and convey emotions, what we chiefly do is to convey knowledge by forging new symbols that are themselves patterns of meaning—*Waggoner*>

analysis resolution, dissection, breakdown (see under ANALYZE)

Ana separation, division (see corresponding verbs at SEPARATE); disintegration, decomposition (see corresponding verbs at DECAY)

Ant synthesis —*Con* uniting or union, combining or combination (see corresponding verbs at JOIN); integration, concatenation (see under INTEGRATE)

analytical subtle, *logical

Ana acute, keen, *sharp: profound, *deep: penetrating, piercing (see ENTER): organizing, ordering, marshaling (see ORDER *vb*)

Ant creative, inventive, constructive

analyze, **resolve**, **dissect**, **break down** mean to divide a complex whole or unit into its component parts or constituent elements. When their corresponding nouns (**analysis**, **resolution**, **dissection**, **breakdown**) denote such a division, they are similarly applied and are distinguishable by the same implications. **Analyze** and **analysis** presuppose a personal agent and stress division for the sake of determining a thing's true nature or the inner relationship of its parts <*analyze* a sentence> <*analyze* the plot of a novel> <Liebig, by *analyzing* foodstuffs of every kind, came to the conclusion that the principal elements of food are proteins, fats, and carbohydrates> <he would take a place or a fork or a bell, set it to ringing by a blow, and *analyze* the combination of musical notes which it emitted—*Darrow*> <*analysis* of material objects into electrons and protons—*Inge*> Sometimes these words specifically suggest an intent to discover or uncover qualities, causes, effects, motives, or possibilities often as a basis for action or for a judgment <*analyze* the condition of a business before investing in it> <*analyze* the potential market for cotton> <I could not then so far *analyze* all that is roughly lumped together as "religion" as to disentangle the essential from the accidental—*Ellis*> Often, especially in chemistry and other sciences, the words imply close examination as for detecting impurities or the quantity or quality of each of the constituent elements <*analyze* a city's water supply> <*analyze* a hypothesis> **Resolve** and **resolution** only occasionally

imply a personal agent; they therefore seldom suggest more than the actual division or separation into elements or parts <star clusters . . . so distant that even in telescopes of great power they could not be *resolved*—*Lockyer*> <nothing but death was strong enough to shatter that inherited restraint and *resolve* it into tenderness—*Glasgow*> Sometimes, especially in medicine, *resolve* or *resolution* implies a breaking up or disintegration and usually, as a consequence, a dissipation or scattering <*resolution* of the exudate during recovery from pneumonia> **Dissect** and **dissection** stress the actual and visible separation of parts; thus, one *dissects* or cuts into sections an animal or a plant so that its physical structure can be studied; in extended or figurative use, one *dissects* something when one takes it to pieces and offers it for examination from every angle and in every detail, pleasant or unpleasant <we *dissect* the senseless body, and why not the mind?—*Wordsworth*> <the student who is willing . . . to discipline his mind by the patient correlation of facts and the fearless *dissection* of theories—*Baerlein*> <when you . . . *dissect* the Odyssey, what amazing artifice is found under that apparently straightforward tale!—*Quiller-Couch*> **Break down** and **breakdown** are used chiefly with reference to topics (as financial reports, statements, or estimates) that involve numbers or quantities, or to substances separated by chemical agents. In both situations these words imply reduction to simpler parts or divisions <a consolidated balance sheet is often accompanied by a *breakdown* giving a detailed statement for each of the main items involved> In chemistry division into simpler substances rather than into elements is typically implied <proteins are *broken down* by enzymes into amino acids>

Ana *separate, divide, part: classify, pigeonhole, *assort
Ant compose, compound: construct —*Con* *integrate, concatenate, articulate

anarchic anarchistic, anarchist (see under ANARCHY 1)

anarchism *anarchy

anarchist anarchic, anarchistic (see under ANARCHY 1)

anarchistic anarchic, anarchist (see under ANARCHY 1)

Ant authoritarian

anarchy 1 **Anarchy**, **anarchism** overlap in their implications but are not synonyms because of differing denotations. **Anarchy** may denote a state or condition of society where there is no law or imposed order because social evolution has rendered these unnecessary <first the proletarian revolution . . . then the dictatorship of the proletariat; and lastly, the classless society: that is the Marxian order of advance towards communism and *anarchy*, towards justice, equality and perfect freedom—*Plamenatz*> It may, on the other hand, denote one of complete disorder resulting from the breakdown of normal controls <for our people liberty so often means only license and *anarchy*—*Sulzberger*> **Anarchism** denotes a theory that government is an evil because it imposes limitations upon the freedom of the individual < nihilism is a form of *anarchism*> The same distinctions extend to their respective adjectives **anarchic** and **anarchistic** <*anarchic* disorder> <*anarchic* conditions> <*anarchistic* influences> <*anarchistic* doctrines> **Anarchist** when used adjectivally is often ambiguous since it is related to both *anarchism* and *anarchy* <an *anarchist* plot to assassinate the prime minister>

2 **Anarchy**, **chaos**, **lawlessness** denote in common absence, suspension, breakdown, or widespread defiance of government, law, and order. **Anarchy** is the total absence or suspension of government <by the adoption of the Constitution our country passed from weakness to strength, from *anarchy* to order, from death to life—*Muzzey*>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Chaos is the utter negation of order <a process calculated to reduce the orderly life of our complicated societies to chaos—Huxley> **Lawlessness** signifies a prevalent or habitual disregard of law and order rather than their absence or suspension <the traditional *lawlessness* of the frontier community> When *anarchy* and *lawlessness* (or their adjectives) are used of actions rather than of a state of things, there is often little distinction of meaning <the hydrogen atom was not conforming to the canons of the classical music of physics, and yet it was not *anarchic* in the least, for . . . it was flawlessly obeying the laws of a different music—Darrow> <illusion is not *lawless*. It is a world apart, if you please, but within it are its own necessities, which exact inexorable adherence to their mandates—Lowe>

Ant order: discipline

anathema 1 *abomination, bête noire, bugbear

2 *curse, malediction, imprecation

Ana denunciation, condemnation, reprobation, censure (see corresponding verbs at CRITICIZE)

anathematize curse, damn, *execrate, objugate

Ana denounce, condemn, censure, reprobate (see CRITICIZE): proscribe, *sentence

anatomy *structure, skeleton, framework

ancestor, progenitor, forefather, forebear mean a person from whom one is descended. **Ancestor**, especially in genealogical and in historical use, implies lineal descent through one's father or mother <he had three *ancestors* who were judges> but it is seldom applied to a grandparent. In more general use, *ancestor* (especially in the plural) may imply kinship through collaterals or through race <the gentleman will please remember that when his half-civilized *ancestors* were hunting the wild boar in Silesia, mine were princes of the earth—Benjamin> **Ancestor** often suggests knowledge of identities and family pride in them as persons <*ancestor* worship> <they had plenty of money, but apparently no *ancestors*> **Progenitor** differs from *ancestor* chiefly in its connotations rather than in its implications. It does not exclude parents or grandparents; it usually carries no hint of family or racial feeling, and it often suggests a reference to heredity or the transmission of characters <do as your great *progenitors* have done, and, by their virtues, prove yourself their son—Dryden> <men resemble their contemporaries even more than their *progenitors*—Emerson> Whenever an evolution is suggested, *ancestor* and *progenitor* may be used of living things or of nonliving things (as races, social castes, or literary or artistic forms) that are subject to development; they then often denote one or a kind or group from which a later or a presently existing kind or group has been derived <the wild *ancestors* of our domestic animals> <Fielding was . . . the *progenitor* of the modern realistic novel—New Yorker> **Progenitor**, even more than *ancestor*, names the ultimate source or root <he sang of the nuptials of Janus and Comesena, *progenitors* of the Italian people—Quiller-Couch> **Forefather** is used less often than *ancestor* in historical writing but is probably more common in poetic and in general use, especially when simplicity of life, strength of family feeling, or persistence of a family in one locality is connoted <each in his narrow cell forever laid, the rude *forefathers* of the hamlet sleep—Gray> <think of your *forefathers*! Think of your posterity!—J. Q. Adams> **Forebear** is not only less rich in its implications than *forefather*, but it is also less connotative of sentiment <the land had been owned by his *forebears* for generations> <his *forebears* emigrated from Scotland around 1800>

Ant descendant

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

ancestry, lineage, pedigree mean either one's progenitors collectively or their quality or character as a whole. The words, however, are clearly distinguishable. **Ancestry** in its most restricted use evokes the image of a family tree with its ramification by geometrical progression of branches or roots the further it is traced forward or backward <only by the fusion of two parent cells can an offspring cell enjoy the advantages of joint heredity and pass on the traits of both *ancestries*—La Barre> In broader use *ancestry* often suggests one's progenitors in general, known or unknown, a cause of pride often, but sometimes of indifference or of shame <no one is responsible for his *ancestry*, but his *ancestry* is to a certain extent responsible for his qualities> **Lineage** stresses descent in a line; it evokes therefore the image of a list of the persons who in order of generation are descended from a single ancestor <the evangelist Matthew traced the *lineage* of Jesus by each step from Abraham down> <*lineage* is reckoned through the mother; the Zuñi are matrilineal—Kardiner> For this reason *lineage* is often used as the equivalent of *race* <though of a *lineage* once abhorred—Wordsworth> **Pedigree** is even more definite in its suggestions, for it implies a known and recorded ancestry that is typically distinguished or notable <who proud of *pedigree*, is poor of *virtue*—Pope> <the deference due to a man of *pedigree*—Gilbert> The term is applied to the ancestry of persons, and to that of animals and plants propagated under controlled conditions.

Ant descendants: posterity

anchor *vb* moor, *secure, rivet

Ana *fasten, attach, fix, affix

anchorite hermit, eremite, *recluse, cenobite

Ant alive—**Con** *aware, awake, conscious, cognizant: responsive (see TENDER)

anesthetic *n* *anodyne, analgesic

Ant stimulant

angel backer, *sponsor, patron, surety, guarantor

anger *n* Anger, ire, rage, fury, indignation, wrath denote emotional excitement induced by intense displeasure. **Anger**, the generic term of this group, names merely the emotional reaction; the word in itself suggests no definite degree of intensity and carries no necessary implication of outward manifestation <tried to conceal his *anger*> <easily aroused to *anger*> <self-destroying *anger*> <he saw the calf, and the dancing: and Moses' *anger* waxed hot—Exod 32:19> **Ire** is literary and suggests greater intensity than *anger* unqualified and usually

a display of that feeling in looks, acts, or words <Belinda burns with more than mortal *ire*—*Pope*> <“Then, my lad, ye’ve come to tell me a lie!” Farmer Blaize looked straight at the boy, undismayed by the dark flush of *ire* he had kindled—*Meredith*> **Rage** adds to *anger* the implications of lost self-control and of violent boiling over of feeling; it often connotes variously a sense of frustration, a temporary derangement of the mind, or a determination to get revenge <terrible and impotent *rage*—*Wilde*> <his first hot anger against the beast had changed into a cold *rage*: at all costs now he must get it—*Cloete*> **Fury** is overmastering destructive rage verging on madness <what *fury* drove us into saying the stupid, intolerant, denunciatory things we said?—*L. P. Smith*> <the war against physical evil, like every other war, must not be conducted with such *fury* as to render men incapable of the arts of peace—*Russell*> **Indignation** implies depth and intensity of anger, often righteous or generous anger, aroused by something one considers mean, shameful, or otherwise unworthy of a man or men <whose souls no honest *indignation* ever urged to elevated daring—*Shelley*> <the question now placed before society . . . is this: Is man an ape or an angel? I, my lord, I am on the side of the angels. I repudiate with *indignation* and abhorrence those newfangled theories—*Disraeli*> **Wrath** may imply either rage or indignation as its emotional basis, but more strongly than either of these it suggests existence of a grievance and a desire or intent to avenge or punish or to get revenge <the *wrath* of God> <let not the sun go down upon your *wrath*—*Eph* 4:26> <nursing her *wrath* to keep it warm—*Burns*>

Ana *acrimony, asperity: exasperation, irritation, provocation (see corresponding verbs at IRRITATE)

Ant pleasure, gratification: forbearance —**Con** *patience, longanimity, long-suffering: forgiveness, condonation, pardon (see corresponding verbs at EXCUSE): indulgence, clemency, leniency (see under FORBEARING)

anger *vb* **Anger, incense, enrage, infuriate, madden.** All these verbs carry in common with **anger**, their general term, the denotation to make angry or to rouse to anger <laugh then at any, but at fools or foes; these you but *anger*, and you mend not those—*Pope*> <*angered* by his son’s repeated disobedience> **Incense** implies hotness of anger, especially as provoked by something excessively irritating and offensive <Mr. Critchlow, aged and unaccustomed to interference, had to render accounts of his trusteeship to this young man, and was *incensed*—*Bennett*> <magistrates and populace were *incensed* at a refusal of customary marks of courtesy and respect for the laws—*Inge*> **Enrage** suggests a violent display of wrath or fury <I pray you, speak not . . . question *enrages* him—*Shak.*> **Infuriate** may imply a sense of being outraged or sometimes no more than of being thoroughly irritated or exasperated <how it *infuriates* a bigot, when he is forced to drag into the light his dark convictions!—*L. P. Smith*> <his colleagues and his subordinates had been alternately delighted and *infuriated* by his assumed reluctance to deal with any practical question—*Sackville-West*> **Madden** is often not distinguishable from *infuriate* <can it be fancied that Deity ever vindictively made in his image a mannikin merely to *madden* it?—*Poe*> Like the former it may imply merely excessive annoyance or vexation <*maddening* delays>

Ana *offend, outrage, affront: exasperate, provoke, *irritate, nettle, rile: vex, *annoy, irk

Ant please, gratify: pacify —**Con** placate, mollify, appease, propitiate (see PACIFY): rejoice, delight, gladden, tickle (see PLEASE)

angle *vb* *fish

angle *n* 1 *point of view, viewpoint, standpoint, slant

Ana attitude, *position, stand

2 aspect, facet, side, *phase

Ana *item, detail, particular

angry, irate, indignant, wrathful, wroth, acrimonious, mad mean feeling or showing strong displeasure or bad temper.

Angry is applied to persons or their moods, acts, looks, or words; it is also applied to animals <an *angry* bull> and by extension, because of some of its implications, to things <an *angry* boil> <an *angry* sky> In reference to persons it implies both emotional and physical excitement, usually exhibited as by an inflamed countenance or inflamed words or by threatening looks or speeches <the king is *angry*: see, he bites the lip—*Shak.*> <the adulteress! What a theme for *angry* verse!—*Cowper*>

Irate is applied only to persons or their looks, acts, or words; it often suggests greater exhibition of feeling than *angry* and, as a rule, implies loss of self-control <the men were getting . . . more *irate* and violent in their language—*Trollope*> Often it suggests a comic aspect of anger (as from the disparity between the emotion and its exciting cause) <refractory children, over whom Mr. Spratt . . . exercised an *irate* surveillance—*George Eliot*>

Indignant, in contrast with *irate*, suggests righteousness in the anger and sufficiency of provocation. Often its use imputes injustice or indignity to the cause of the anger <let the sword speak what the *indignant* tongue disdains to brand thee with—*Shelley*> **Wrathful** and the less common **wroth** are capable of being used where *irate* or *indignant* would be more explicit <his partner retreated with a *wrathful* shake of his head—*Sassoon*> However, they usually connote more justification of the anger than *irate* and more vehemence in its expression than *indignant* <the blurring and the blotching of the later Chinese school . . . provoke his *wrathful* condemnation—*Binyon*> <I did not know how greatly they were fools, and this made me *wroth*—*Kipling*> **Wrathful** like *angry* may be extended to things <the *wrathful* thunder of God—*Tennyson*> <a vagrant shaft of sunlight struck the ocean and turned its surface to *wrathful* silver—*London*>

Acrimonious, though sometimes still applied to a person’s temper or mood, is chiefly used to characterize intercourse and utterances. It invariably adds to *angry* the implication of irreconcilable difference of opinion and consequent bitterness of feeling that may be shown in accusations and recriminations <the dispute dragged on, becoming progressively more *acrimonious*, for another eleven years—*Huxley*> **Mad** (see INSANE) as a close equivalent of *angry* is used chiefly in informal speech or writing <I was so *mad* the way father was talking—*O’Flaherty*> <she looked *mad* for a second but then she began to laugh—*Lowry*>

Ana *impassioned, passionate: angered, incensed, enraged, infuriated, maddened (see ANGER *vb*)

anguish woe, heartache, heartbreak, grief, *sorrow, regret

Ana *distress, suffering, dolor, misery, agony: worry, anxiety (see CARE): *pain, pang, throe, ache: torture, torment, affliction (see corresponding verbs at AFFLICT)

Ant relief —**Con** comfort, solace, consolation (see corresponding verbs at COMFORT): assuagement, alleviation, mitigation (see corresponding verbs at RELIEVE): *ecstasy, rapture, transport

angular gaunt, rawboned, lank, lanky, *lean, spare, scrawny, skinny

Ana *thin, slender, slim: *awkward, clumsy: cadaverous, *haggard

Ant rotund —**Con** plump, chubby, *fleshy, stout, portly

animadversion, stricture, aspersion, reflection denote a

remark or statement that is an adverse criticism. **Animadvertion** (compare *animadvert* at REMARK) implies as its motive deep-seated prejudice or ill will or a tendency to carp or cavil (given to *animadversions* on the clergy) (Maty's *animadversions* hurt me more. In part they appeared to me unjust, and in part ill-natured—*Cowper*) **Stricture** implies censure, which may be either ill-natured or judicious (foreign *strictures* on the dress, looks, and behavior of the English abroad—*Arnold*) (the lash of the merciless Porson . . . [whose] *strictures* are founded in argument, enriched with learning, and enlivened with wit—*Gibbon*) **Aspersions** imputes a slanderous character to the criticism (who by *aspersions* throw a stone at th' head of others, hit their own—*Herbert*) (at Cambridge (they tell me) while you speak very well, you write less expertly . . . you will not set the *aspersions* down to me—*Quiller-Couch*) **Reflection** often implies indirect aspersion or a defamatory imputation which may be inferred from what has been said (he cannot restrain himself from *reflections* on kings and priests when he is most contending for them—*Hallam*) (the *reflections* on certain named persons' chastity and honesty—*Geographical Jour.*)

Ana criticism, reprehension, censure (see corresponding verbs at CRITICIZE): observation, comment, *remark: captiousness, faultfinding, caviling, carping, censoriousness (see corresponding adjectives at CRITICAL)

Ant commendation —*Con* praise, laudation, extollation, acclaim (see corresponding verbs at PRAISE): *approbation, approval

animadvert comment, commentate, *remark

Ana *criticize, reprehend, censure, reprobate: deprecate, *disapprove: depreciate, disparage, *decry

Con ignore, disregard, overlook (see NEGLECT): *commend, applaud, compliment

animal *adj* *carnal, fleshly, sensual

Ana physical, corporeal, *bodily: bestial, *brutal

Ant rational —*Con* intellectual, *mental, psychic: spiritual (see HOLY)

animalism *animality

Ana sensualism, voluptuousness (see corresponding adjectives at SENSUOUS): lustfulness, lasciviousness, lecherousness (see corresponding adjectives at LICENTIOUS)

animality, animalism are not always clearly distinguished when they are used to denote animal nature, character, or springs of action in a man or in men. **Animality** is often preferred when it is desired to suggest likenesses between men and animals rather than differences, and **animalism** when one wishes to convey in addition all the derogatory implications of *sensuality* or *sensualism* (he disliked union with a woman whom he had never seen: moreover, when he did see her, she disappointed him, and he begat his first child in mere *animality*—*Forster*) (purtanism was a natural and necessary revolt . . . against that naturalism which threatened to end in sheer *animalism*—*Kingsley*)

Ana virility, maleness, masculinity (see corresponding adjectives at MALE)

animate *adj* *living, alive, animated, vital

Ana physical, corporeal, *bodily: animal, *carnal, fleshly

Ant inanimate —*Con* lifeless, *dead

animate *vb* 1 *quicken, vivify, enliven

Ana *vitalize, activate, energize

2 *inform, inspire, fire

Ana motivate, actuate, *activate: *move, drive, impel, actuate: *stir, rouse, arouse

Ant inhibit —*Con* *restrain, curb, check: *frustrate, thwart

animated I alive, *living, animate, vital

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

Ana *active, live, dynamic: vitalized, energized, activated (see VITALIZE)

Ant inert —*Con* *inactive, passive: lifeless, inanimate, *dead

2 *lively, vivacious, sprightly, gay

Ana buoyant, volatile, effervescent (see ELASTIC): *agile, brisk, spry, nimble: *spirited, high-spirited

Ant depressed, dejected —*Con* *languid, listless, spiritless, enervated: *lethargic, torpid, comatose

animosity animus, rancor, *enmity, hostility, antipathy, antagonism

Ana hatred, hate, detestation, abhorrence (see under HATE *vb*): vindictiveness, revengefulness, vengefulness (see corresponding adjectives at VINDICTIVE): *malice, ill will, malevolence, spite

Ant goodwill —*Con* *friendship, amity, comity: friendliness, neighborliness, amicableness (see corresponding adjectives at AMICABLE)

animus animosity, rancor, *enmity, hostility, antipathy, antagonism

Ana ill will, spite, spleen, grudge (see MALICE): prejudice, bias (see PREDILECTION)

Ant favor —*Con* *predilection, partiality: *sympathy, empathy

annals chronicle, *history

annex *vb* *add, append, subjoin, superadd

Ana *join, unite, connect, link, associate: attach, affix, *fasten

Con *detach, disengage, abstract: divorce, *separate, part

annex *n* Annex, extension, wing, ell designate an addition to a main (and, often, the original) building. An annex may be attached to the main building or it may even not be adjacent to it. When used of an addition to a hotel, an office building, or a commercial or educational establishment it usually implies a provision for expanded activity. An extension is attached to a main or central building; when it projects from the central building and is connected with it at only one point it is called a wing; when it extends at right angles from one end of the building it is called an ell.

Ana *addition, increment, accretion

annihilate extinguish, *abolish, abate

Ana obliterate, efface, expunge, blot out, cancel, *erase: extirpate, *exterminate, eradicate, wipe

Con create, *invent, discover: *make, form, fashion, forge, shape: *renew, restore

annotate, gloss and their corresponding nouns **annotation, gloss** mean, as verbs, to add or append comment, or as nouns, an added or appended comment intended to be helpful in interpreting a passage or text. One **annotates** a text (as of a literary work) when one furnishes it with critical, historical, or explanatory notes (as footnotes, marginal notes, or notes in an appendix) (*annotate* the works of Milton) (an *annotated* edition of Shakespeare's sonnets) The subject of an annotation may be any word, passage, or detail which is capable of being explained to the advantage of the reader or student. One **glosses** a word or phrase which is obscure in meaning because foreign, obsolete, rare, or technical by providing its definition (as in a marginal or interlinear note) or one **glosses** a text when one supplies definitions of its difficult words and phrases (medieval scholars, when they found in a Latin text a word not familiar to them, were accustomed to *gloss* it—*Krutch*) The word sometimes conveys (possibly by confusion with *gloss*, to give a luster to) a derogatory implication of perversion or sophistication of meaning or fact (trying to *gloss* away the irrationalities of the universe—*Edman*) **Ana** elucidate, interpret, construe, *explain, expound: comment, commentate, *remark

annotation gloss (see under ANNOTATE)

Ana commentary, comment, observation, note, *remark
announce publish, proclaim, *declare, promulgate, advertise, broadcast

Ana disclose, *reveal, divulge, tell: *communicate, impart
Con *suppress, repress: conceal, *hide, bury: withhold, hold, hold back, reserve (see KEEP)

announcement publication, proclamation, declaration, promulgation, advertisement, broadcasting (see under DECLARE)

annoy *vb* 1 **Annoy, vex, irk, bother** mean to disturb and nervously upset a person. **Annoy** stresses loss of equanimity or patience as a result of being forced to endure something that one finds obnoxious or offensive or sometimes merely displeasing or distasteful. It seldom implies more than a temporary disturbance or display of irritation (Richard's absence *annoyed* him. The youth was vivacious, and his enthusiasm good fun—*Meredith*) (it was . . . his lack of the ghost of a notion what anyone else was feeling that *annoyed* her, had always *annoyed* her—*Woolf*) **Vex** usually implies greater provocation and a stronger disturbance than *annoy*; it often connotes a degree of anger but at other times it suggests deep perplexity or some worry (faulty translation that so *vexes* teachers—*Grandgent*) (pointlessly *vexing* their minds with insoluble problems) (Mr. Darcy's behavior astonished and *vexed* her. "Why, if he came only to be silent, grave, and indifferent," said she, "did he come at all?"—*Austen*) (such petty details as now *vexed* the brooding soul of the old gentlewoman—*Hawthorne*) **Irk** emphasizes difficulty in enduring and resulting weariness of spirit; it is most often used in reference to something that persists or recurs annoyingly (the speed and the clatter *irk* me—*Kipling*) (the overiterated becomes the monotonous, and the monotonous *irks* and bores—*Lowes*) **Bother** implies a usually mild interference with one's comfort or peace of mind such as may arise on the one hand from something that calls for activity or effort or on the other from something that excites, puzzles, worries, concerns, or confuses (the sight of him *bothered* her and set her heart beating faster) (he would be too accessible and excessively *bothered* with details and complaints—*Crozier*) (let dozens of little matters go, rather than *bother* myself—*Bennett*) (I am not really *bothered* by these questions—the hoary old puzzles of ethics and philosophy—*L. P. Smith*)

Ana *irritate, nettle, aggravate, exasperate, rile: perturb, disturb, upset, agitate (see DISCOMPOSE)

Ant soothe —*Con* *comfort, solace, console: *please, gratify, tickle

2 *worry, pester, plague, tantalize, tease, harass, harry
Ana fret, chafe (see ABRADE): badger, hector, heckle, chivy, *bait: trouble (see INCONVENIENCE)

Con *neglect, ignore, overlook: mollify, appease (see PACIFY)

annul 1 *nullify, negate, invalidate, abrogate

Ana *neutralize, negative, counteract: cancel, efface, obliterate, blot out, *erase: annihilate, *abolish, extinguish

2 **Annul, abrogate, void, vacate, quash** are used chiefly in legal context and mean to deprive of validity, force, or authority. Though varying little in denotation, these words are not always interchangeable, their appropriate selection being dependent on the character or status of the invalidating agent and on the character of the thing invalidated. **Annul** is the most general term, applicable to something (as a right, marriage, charter, or statute) that may be adjudged invalid or void. It implies the exercise of competent legal authority (had parliament, immediately after the emanation of this charter . . . *annulled* the instrument . . .

the perfidy of the transaction would have been universally acknowledged—*John Marshall*) To **abrogate** is the act of one having force and authority, and often legal jurisdiction. A ruler or an arbiter as well as a court may *abrogate* something (as a law, a treaty, or a convention) previously effective and in effect or in intent abolish it (we are not . . . called upon to *abrogate* the standards of values that are fixed, not by you and not by me, but by . . . time—*Lowes*) **Void** in legal context retains much of its basic meaning, to make empty or null. It is often interchangeable with *annul* (the state supreme bench . . . *voided* the referendum—*Aswell & Michelson*) Unlike the latter it need not imply the action of a legally competent authority (it is the insanity of the testator that *voids* his will, not the act of a court) Only competent legal authority can *vacate* or make ineffectual or invalid something that previously was effectual or valid (vacate proceedings after the discovery of fraud) (vacate a grant of crown property) **Quash** is a strictly legal term applied chiefly to indictments thrown out of court as defective.

anodyne 1 **Anodyne, analgesic, anesthetic** all denote something used to relieve or prevent pain, all are freely used both substantively and adjectivally, and all have a related noun, **anodynia, analgesia, anesthesia**, denoting the corresponding state. **Anodyne** is the oldest and most inclusive of these terms; it may be applied to any agent used primarily to relieve pain whether by dulling perception of pain or by altering the pain-causing situation (as by local stimulation of blood flow), often has a literary or popular rather than medical connotation, and is the only one of these terms given broad figurative use (see ANODYNE 2).

Analgesic is narrower in scope; it is applied especially to a medicinal substance or preparation used locally or systemically to dull the perception of pain (as by action on the nervous system) usually without other major disturbance of consciousness. An **anesthetic** is a medicinal agent that produces insensibility both to pain and to all other sensations either of a particular part or area (*local anesthesia*) or of the whole body (*general anesthesia*): *anesthetic* is the one term to use of an agent designed to prevent anticipated pain (as from surgery) as distinct from one designed to assuage existent pain; thus, one is administered an *anesthetic* before a tooth is pulled and given an *analgesic* to relieve pain after the *anesthesia* has worn off.

2 **Anodyne, opiate, narcotic, nepenthe** mean something used to dull or deaden one's senses or one's sensibility and are often used adjectivally. **Anodyne** is frequently used as the opposite of *stimulant* (had . . . made *anodyne* translations from Homer and Sophocles in "rhythmic" and sleepy prose—*Santayana*) It usually suggests something that allays excitement or mitigates mental distress often by inducing forgetfulness or oblivion (this kind of religion cannot be anything better than an *anodyne*; but an *anodyne* is unfortunately just what many people want from their religion—*Inge*) (mutiny among the crews of Columbus was too much of a menace for the comforting daily sight of drifting vegetation not to be a very real mental *anodyne*—*Beebe*)

Opiate usually is applied to something that induces a dream state and a delusion of happiness; it also commonly suggests indifference to actual evils and a false sense of security or well-being with consequent stilling of all disturbing thoughts (price-fixing is a most dangerous economic *opiate*—*T. W. Arnold*) (no military swagger of my mind, can smother from myself the wrong I've done him, —without design, indeed,—yet it is so,—and *opiate* for the conscience have I none—*Keats*) **Narcotic** implies a putting to sleep or into a stupor; in figurative use, it suggests merely a pleasant drowsiness which overcomes one and has a lulling effect on mind and body (many lovers of

the arts find in music, poetry, painting, and the novel escapes, as *narcotic* as they are delightful, from the pressures and exigencies in which we are involved—*Edman* <the promise that religion offers of a larger reward is less likely to serve as a moral stimulant than as a moral *narcotic*—*Garvin*> **Nepenthe**, the designation of a legendary drug or potion of the ancient Greeks, said to allay pain and sorrow, is used in modern English with the implication of something sweet and pleasurable substituted for something painful <after the fiery stimulants, compounded of brimstone and bigotry, offered by the polemic theologians, the gentle sedative of Montaigne's conversation comes like a draft of *nepenthe*—*Preserved Smith*> It is also freely used to denote the state of placid peace resulting from the use of a *nepenthe* <only . . . in idle chatter and consoling gossip and scandal, and in the more unendurable cases in drink, can they find *nepenthe*—*Nathan*>

Ant stimulant; irritant

anodynia analgesia, anesthesia (see under ANODYNE 1)

anoint *oil, cream, grease, lubricate

anomalous *irregular, unnatural

Ana *abnormal, aberrant, atypical: *monstrous, prodigious: singular, unique, peculiar, *strange

Con normal, natural, *regular, typical: *usual, wonted, accustomed, customary

anomaly *paradox, antinomy

answer *n* reply, response, rejoinder, retort (see under ANSWER *vb* 1)

Ana defense, vindication, justification (see corresponding verbs at MAINTAIN): refutation, rebuttal (see corresponding verbs at DISPROVE)

Con question, query, inquiry, interrogation (see corresponding verbs at ASK): summoning or summons, call (see corresponding verbs at SUMMON)

answer *vb* 1 **Answer, respond, reply, rejoin, retort** (and their corresponding nouns **answer, response, reply, rejoinder, retort**) mean to say or write or sometimes to do something (or something that is said, written, or done) in return (as to a question, a call, a request, or a charge). One **answers** or makes an **answer** to a question, call, or appeal, or to the person or thing questioning, calling, or appealing, when one gives the attention or service demanded by one's situation or office or required by courtesy <*answer* a query> <*answer* the telephone> <*answer* the doorbell> In specific collocations the words carry more definite implications; thus, in *answering* an accusation one gives a detailed and sometimes, by suggestion, a successful defense; in having the *answers* to all the problems one has their correct solutions <he could talk; he could assert; produce opinions and information, but he couldn't meet or *answer* arguments—*Rose Macaulay*> One **responds** or makes a **response** to a person who endeavors to elicit an answer or to a thing which serves as a stimulus when one reacts, often spontaneously and usually without resistance, to the influence <*respond* immediately to an appeal for help> <an unsatisfactory *response* to a call for recruits> <when she smiled, even strangers *responded*> <is it true that antiquated legal ideas prevent government from *responding* effectively to the demands which modern society makes upon it?—*Frankfurter*> <a trustful affectionate disposition . . . creates the *response* which it expects—*Russell*> *Respond* and *response* are used in preference to *answer* and *reply* when they refer to the set answers to supplications (as in a litany) or to questions (as in a catechism) <he answered by a deep, gravely accented: "Thanks, I will," as though it were a *response* in church—*Conrad*> One **replies** or makes a **reply** (as to a question, charge, argument, or salute or to a questioner or an accuser) when one answers so as to cover the same

ground as the question or charge; thus, one may *answer* a letter by merely acknowledging its receipt, but one *replies* to it only when one answers all its questions or touches on all points requiring attention; an *answer* to a salute is uncertain in its nature if no details are given; a *reply* to a salute usually indicates that the salute has been returned in the same form or in kind and spirit. Often *reply* is equivalent to *answer back* (as by echoing, protesting, or when the question is rhetorical agreeing) <the nymph exulting fills with shouts the sky; the walls, the woods, and long canals *reply*—*Pope*> <theirs not to make *reply*, theirs not to reason why, theirs but to do and die—*Tennyson*> <who is here so vile that will not love his country? If any, speak; for him have I offended. I pause for a *reply*—*Shak.*> One **rejoins** or makes a **rejoinder** when one answers a reply <the assembly took the governor's reply . . . into consideration, and prepared a suitable *rejoinder*—*Franklin*> The terms are often used to indicate an answer to an unspoken question or to an objection <"He can't sleep comfortably on that ship," she said. "In his present state," *rejoined* Andrew, "he might not sleep comfortably anywhere"—*Douglas*> <to an abstract objection an abstract *rejoinder* suffices—*James*> One **retorts** or makes a **retort** to an explicit or implicit charge, criticism, or attack when one responds with an answer that is in effect a retaliation, or a counter charge, criticism, or attack <it amused me . . . to read the interview and learn that I had . . . uttered a number of trenchant sayings upon female novelists. But the amusement changed to dismay when the ladies began to *retort*—*Quiller-Couch*>

Ana *acknowledge, recognize: *disprove, refute, rebut; defend, justify, vindicate, *maintain

Con question, *ask, interrogate, query, inquire, quiz: *summon, call

2 meet, *satisfy, fulfill

answerable *responsible, accountable, amenable, liable

Ana obliged, constrained, compelled (see FORCE *vb*): subject, *subordinate

antagonism antipathy, *enmity, hostility, animosity, rancor, animus

Ana opposition or opposing, resistance, withstanding, contesting, fighting, combating, conflict or conflicting (see corresponding verbs at RESIST): strife, conflict, difference, variance, dissension, contention, *discord

Ant subsequent: consequent

antediluvian ancient, antiquated, obsolete, antique, venerable, archaic, *old

Ana primordial, primeval, primal, pristine (see PRIMARY): *early

anterior *adj* *preceding, precedent, previous, prior, foregoing, antecedent, former

Ant posterior —*Con* rear, hind, back, hinder, after (see POSTERIOR)

anthropoid, anthropomorphic, anthropomorphous all mean resembling man. **Anthropoid** in its basic meaning is used primarily of certain apes (as the chimpanzee and gorilla) and certain prehuman primate fossils that approach modern man in structure (the *anthropoid* apes of the Miocene) In extended use the reference to manlike apes rather than man predominates; thus, an *anthropoid* pelvis is a human pelvis that in shape and proportions resembles that of an anthropoid ape (the revolutionary thug who has the fine art of bursting Razumov's eardrums . . . is an *anthropoid* forerunner of thousands who have gone one better than that in the police states—*Pritchett*) **Anthropomorphic** and the less common **anthropomorphous** are used interchangeably when implying a physical resemblance to man (the *anthropomorphic* deities of primitive peoples) (an *anthropomorphous* carving) and both may replace *anthropoid* in its basic meaning especially when it is desired to avoid taxonomic implications (anthropomorphous apes—*Darwin*) (Darwin himself carefully described men and apes as having evolved separately from some common "ancient . . . anthropomorphic subgroup"—*High School Biology*) **Anthropomorphic** is the preferable term to modify a noun denoting something immaterial or to attribute human personality or quality as distinct from human physique (expectancy is too *anthropomorphic* a concept . . . its use leads the reader to attribute to animals what in fact only occurs at the level of human beings equipped with language—*Charles Morris*) (the categories of cause, force, law, are *anthropomorphic* in origin and were thus originally metaphors—*Cohen*)

anthropology, ethnology, archaeology are clearly distinguishable sciences, but they are often confused by laymen because the investigations of scholars in these fields are largely concerned with ancient or primitive races. **Anthropology** is a general term covering many sciences which deal with the physical and cultural evolution of the human species from prehistoric times to the present. One branch of anthropology is **ethnology**, which is concerned with the origin, development, geographical distribution, and distinguishing character of the human races and often includes comparative cultural studies of existent peoples. **Archaeology** forms a link between history and anthropology. Its province is the investigation of prehistoric and ancient cultures and civilizations and a study of their material remains (as artifacts, monuments, and traces of agriculture).

anthropomorphic, anthropomorphous *anthropoid

antic n monkeyshine, caper, *prank, dido

Ana *trick, wile, artifice: *caprice, freak, vagary, whim: gambol, frolic, romp (see under PLAY *vb*)

Ana preposterous, absurd, *foolish: ludicrous, ridiculous, comic, comical, farcical, *laughable

Con *serious, solemn, somber, grave, sedate: sensible, prudent, *wise: conventional, formal (see CEREMONIAL)

anticipate 1 forestall, *prevent

Ana introduce, *enter: *foretell, forecast, presage: *frustrate, thwart, balk

Ant consummate —*Con* finish, complete, terminate, *close

2 apprehend, *foresee, foreknow, divine

Ana *foretell, forecast, prognosticate: foretaste (see corresponding noun at PROSPECT): await, *expect

anticipation foretaste, *prospect, outlook

Ana foreseeing, foreknowing (see FORESEE): presentiment, foreboding, *apprehension: forecast, prophecy, prediction, presage (see corresponding verbs at FORETELL): conceiving, envisioning, imagining (see THINK)

Ant retrospect —*Con* recollection, reminiscence, remembrance, *memory: realization, actualization (see corresponding verbs at REALIZE)

antidote *corrective, check, control

Ana counteractive, neutralizer (see corresponding verbs at NEUTRALIZE): nullifier, negator, annuler (see corresponding verbs at NULLIFY): *remedy, medicine, physic

antinomy *paradox, anomaly

Ana opposite, contradictory, contrary, antithesis (see under OPPOSITE *adj*): contradiction, denial (see corresponding verbs at DENY): conflict, variance, *discord

antipathetic, unsympathetic, averse are often used as if they were synonyms. They are, however, not interchangeable if employed in accord with careful usage. Strictly, **antipathetic** is applied to things or to persons objectively considered that are disagreeable, distasteful, uncongenial, abhorrent, or repellent (the whole place and everything about it was *antipathetic* to her—*Trollope*) (settlers to whom this formula was *antipathetic* were asked to go elsewhere—*Replier*) (ushering in the year with a series of calls on the most remote and the most personally *antipathetic* of our innumerable relations—*Huxley*) In broader use the word is applied to persons or groups of persons as though it were the antonym of *sympathetic*; it may imply animosity and not merely the absence of sympathy (he really disliked Sir Theodosius, who was in every way *antipathetic* to him—*Joseph Shearing*) **Unsympathetic**, on the other hand, is with rare exceptions applied to persons or to things personified or thought of as expressing personal feeling and suggests an attitude of indifference or insensitiveness or the absence of a response to an appeal to one's interest or emotions (an *unsympathetic* nurse) (an *unsympathetic* review of a new book) **Averse** (for synonyms in this sense see DISINCLINED) is closer to *unsympathetic* than to *antipathetic* in that it suggests the spirit in which a person meets something objective rather than the effect of a thing upon a person. However, *averse* implies not merely a lack of response but a definite turning away and consequently either avoidance or rejection (averse to a suggestion) (averse to exercise on a hot day) Thus, a man may be *unsympathetic* by nature yet not be *averse* to helping the poor. In general, it may be said that one is *averse* to (or, chiefly British, from) anything which is *antipathetic* to one.

Ana repellent, *repugnant, distasteful, abhorrent, obnoxious: *offensive, loathsome, repulsive, revolting

Ant congenial —*Con* attractive, alluring, charming (see under ATTRACT): sympathetic, compatible, *consonant: agreeable, grateful, gratifying, pleasing, *pleasant

antipathy 1 antagonism, *enmity, hostility, animosity, rancor, animus

Ana repugnance, abhorrence, repellency, distaste (see corresponding adjectives at REPUGNANT): avoidance, evasion, eschewal, escape (see corresponding verbs at ESCAPE)

Ant taste (*for*): affection (*for*) —*Con* *attraction, sym-

pathy: *predilection, partiality, prepossession: *attachment, love

2 Antipathy, aversion are closer synonyms than their corresponding adjectives when they denote the state of mind created by what is antipathetic to one. **Antipathy** distinctly implies an emotional state, often a settled emotion, which prevents reconciliation or contact or which more often definitely implies hostility (see ENMITY). **Aversion** on the other hand suggests a predisposition or an unwillingness to meet, encounter, or entertain, which shows itself in avoidance or rejection rather than in hatred; thus, one has an *antipathy* to cats who is violently repelled by them and drives them from his presence; one has an *aversion* to cats who merely avoids contact with them.

Ana, Ant, Con see those at ANTIPATHY 1

antipode antithesis, contrary, opposite, contradictory, antonym (see under OPPOSITE *adj*)

antiquated archaic, obsolete, antediluvian, antique, *old, ancient, venerable

Ana superannuated, *aged

Ant modernistic: modish —*Con* modern, new-fashioned, novel, newfangled, *new: *stylish, fashionable, smart

antique ancient, *old, venerable, antiquated, antediluvian, obsolete, archaic

Ant modern: current

antiseptic *adj* germicidal, bactericidal, disinfectant (see under ANTISEPTIC *n*)

antiseptic *n* **Antiseptic, germicide, bactericide, disinfectant** all denote an agent that interferes with the growth and activity of microorganisms. An **antiseptic** is an agent that prevents or arrests the growth and activity of microorganisms, especially disease germs, without necessarily killing them. The word is used especially of substances mild enough to be used on living tissue. **Germicide** is used of an agent that kills microorganisms and especially disease germs. It is commonly applied to strong chemicals which cannot safely be used on living tissues. A **bactericide** is a germicide that destroys all kinds of bacteria (but does not necessarily kill bacterial spores). A **disinfectant** is an agent that frees from infection and especially a chemical germicide used to kill disease germs and other harmful microorganisms in sources of infection (as drains, sickrooms, clothing, bedding, laboratories, and stables). *Disinfectant* may be used of substances (as chloride of lime) which destroy disagreeable odors by interfering with the activity of the bacteria causing putrefaction. The same distinctions hold for the corresponding adjectives **antiseptic, germicidal, bactericidal, disinfectant**.

antisocial asocial, *unsocial, nonsocial

Ana anarchic, anarchistic, anarchist (see under ANARCHY): misanthropic, pessimistic, *cynical

Ant social

antithesis 1 contrast, *comparison, parallel, collation 2 opposite, antipode, contradictory, contrary, antonym (see under OPPOSITE *adj*)

antithetical *opposite, contrary, contradictory, antonymous, antipodal, antipodean

antonym opposite, contradictory, contrary, antithesis, antipode (see under OPPOSITE *adj*)

antonymous *opposite, contradictory, contrary, antithetical, antipodal, antipodean

anxiety worry, *care, concern, solicitude

Ana *distress, suffering, misery: *fear, dread, alarm, panic: *apprehension, foreboding, misgiving: doubt, *uncertainty, mistrust

Ant security —*Con* *certainty, assurance, certitude:

*confidence, self-possession, aplomb: composure, *equanimity, sangfroid

anxious 1 worried, concerned, solicitous, careful (see under CARE *n*)

Ana *fearful, apprehensive, afraid: uneasy, jittery, *impatient: perturbed, agitated, upset (see DISCOMPOSE)

Ant composed —*Con* *cool, unruffled, imperturbable, unflappable, collected: *confident, assured, sanguine, sure

2 *eager, keen, agog, avid

Ana desiring or desirous, wishing or wishful, craving (see corresponding verbs at DESIRE): yearning, longing, pining (see LONG *vb*)

Ant loath —*Con* reluctant, hesitant, *disinclined, indisposed, averse

apartment *room, chamber

apathetic phlegmatic, stolid, *impassive, stoic

Ana insensitive, impassible, *insensible, anesthetic: callous, *hardened: unaffected, untouched, unimpressed (see affirmative verbs at AFFECT): listless, spiritless, *languid

Ant alert (sense 1): aghast —*Con* stirred, roused, aroused, awakened (see STIR *vb*): vigilant, *watchful, wide-awake

apathy phlegm, stolidity, impassivity, impassiveness, stoicism (see under IMPASSIVE)

Ana inertness, inactivity, passiveness, supineness (see corresponding adjectives at INACTIVE): indifference, unconcern, aloofness, detachment (see corresponding adjectives at INDIFFERENT): *lethargy, torpidity, torpor

Ant zeal: enthusiasm —*Con* ardor, fervor, *passion: anxiety, concern, solicitude (see CARE *n*)

ape *vb* *copy, imitate, mimic, mock

Ana caricature, burlesque (see under CARICATURE *n*): emulate, *rival

aperçu sketch, précis, survey, digest, pandect, *compendium, syllabus

Ana epitome, brief, abstract, *abridgment

apéritif *appetizer

aperture, interstice, orifice denote an opening allowing passage through or in and out. **Aperture** is applied especially to any opening in a thing that otherwise presents a solid or closed surface or structure; it may be applied both to an opening that is a flaw (as a crack or cleft) or to one that is structurally essential <daylight filtered through small *apertures* in the dungeon's outside wall> <windows are *apertures* to admit light and air> <the *aperture* of a camera> <pores are minute *apertures* in the skin that are the openings of skin glands> **Interstice** is applied to any unfilled space or gap or interval especially in a fabric (in its widest sense) or in a mass. It is especially applicable to any of the openings in something that is loose in texture, coarse-grained, layered, or piled up <the *interstices* between the stones of the wall were not filled with mortar> <a mesh is one of the *interstices* in a fish net> *Interstice* is also used of time in the sense of an empty interval <what . . . do they do . . . in all the mysterious *interstices* of their lives?—L. P. Smith> **Orifice** is applied to any opening that serves chiefly as a mouth or as a vent <the *orifice* of the bladder> <the *orifice* of a chimney> <the *orifice* of a wound> <horror . . . when Mongibello belches forth from all its *orifices* its sulphureous fires—Borrow>

Ana perforation, puncture, bore, prick (see corresponding verbs at PERFORATE): *hole, hollow, cavity: slit, slash, cut (see corresponding verbs at CUT)

apex 1 **Apex, vertex** are so often used interchangeably with reference to the tip or top point of a cone, a pyramid, or a conic section that a fundamental difference in

implications is often ignored. **Apex** has particular reference to the sharpness or angularity of the point or tip; it may or may not in its literal application to things imply that this is the highest point (the *apex* of the heart is its lower and pointed end) (the *apex* of a lung is its upper cone-shaped end) *Apex* may also refer to the converging point of two lines whether they extend in a vertical plane or not (apex of a leaf) (apex of a vein in a mine) **Vertex** as a rule, and apart from some technical senses in mathematics, implies a base (real or assumed) and therefore a top or highest point. This implication is retained when the word is applied to concrete things; thus, the *vertex* of the head or of the skull is the highest point or the upper end of its axis; *vertex* in astronomy is the zenith either with reference to the observer or to the particular body under observation. 2 peak, *summit, culmination, pinnacle, climax, acme, meridian, zenith, apogee

aphorism apothegm, epigram, *saying, saw, maxim, adage, proverb, motto

aphrodisiac *erotic, amatory, amorous
Ant anaphrodisiac

apiece each, severally, individually, respectively

aplomb assurance, self-assurance, self-possession, *confidence, self-confidence

Ana coolness, collectedness, nonchalance, imperturbability (see corresponding adjectives at COOL): *equanimity, composure, sangfroid: poise, savoir faire (see TACT)
Ant shyness —*Con* embarrassment, discomfiture (see corresponding verbs at EMBARRASS): confusion, befuddlement (see corresponding verbs at CONFUSE): perplexity, bewilderment, distraction (see corresponding verbs at PUZZLE)

apocalypse vision, *revelation, prophecy

apocalyptic see under REVELATION

Ana visionary, *imaginary, chimerical, quixotic: *mysterious, arcane, inscrutable: mystic, *mystical, anagogic: grandiose, magnificent, august, *grand

apocryphal mythical, *fictitious, legendary, fabulous
Ana questionable, dubious, *doubtful

Con genuine, *authentic, veritable, bona fide

apogee climax, peak, culmination, apex, acme, meridian, zenith, *summit, pinnacle

Ant perigee

apologia *apology, excuse, plea, alibi, pretext

Ana defense, justification, vindication (see corresponding verbs at MAINTAIN): interpretation, elucidation, explanation (see corresponding verbs at EXPLAIN)

apology, apologia, excuse, plea, pretext, alibi denote the reason or reasons offered in explanation or defense of something (as an act, a policy, or a view). In general use **apology** implies that one has been, at least apparently, in the wrong; it suggests either a defense that brings forward palliating circumstances or a frank acknowledgment of error with an expression of regret, by way of reparation (<“Pardon us the interruption of thy devotion . . .” —“My lord, there needs no such *apology*”—*Shak.*) In its older sense, still found in very discriminating use, it implies no admission of guilt or error but a desire to make clear the grounds for some course, belief, or position that appears wrong to others (apologies for various . . . doctrines of the faith—*Newman*) **Apologia** is often used in place of *apology* in this latter sense (Basil de Selincourt’s *apologia* for Ruskin in the *Contemporary Review*—*The Nation*) (Viscount Grey of Fallodon . . . the other day delivered an *apologia* for democracy—*N. Y. Times*)

Excuse implies an intent to remove or avoid blame (as for a neglect of duty, a failure to accomplish an end, or a violation of a rule, law, or custom) (<“Achilles will not to the field tomorrow”—“What’s his *excuse*?”—*Shak.*)

(we have forty million reasons for failure, but not a single *excuse!*—*Kipling*) (<his pride . . . does not offend me so much as pride often does, because there is an *excuse* for it—*Austen*) **Plea** stresses argument or appeal to others for understanding or sympathy (old Hepzibah’s scowl could no longer vindicate itself entirely on the *plea* of nearsightedness—*Hawthorne*) (he mumbled something about not having a license [for hunting], and was putting that in for a *plea* against the expedition—*Meredith*) **Pretext** invariably suggests subterfuge and the offering of one reason or motive in place of the true one (he made my health a *pretext* for taking all the heavy chores, long after I was as well as he was—*Cather*) **Alibi** in law designates a plea of having been in another place at the time a crime was committed. In its broader use it implies a desire to shift blame or to evade punishment. It commonly connotes plausibility rather than truth in the excuse offered (federal taxes are already being used as an *alibi* for cuts in local school budgets—*Groves*)

Ana defense, justification, vindication (see corresponding verbs at MAINTAIN): extenuation, palliation, glozing, whitewashing (see corresponding verbs at PALLIATE): amends, *reparation

apostasy desertion, *defection

apostate *n* *renegade, turncoat, recreant, backslider

Ana deserter, forsaker, abandoner (see corresponding verbs at ABANDON): *heretic, schismatic, dissenter, non-conformist

Con *convert, proselyte

apothecary pharmacist, *druggist, chemist

apothegm aphorism, epigram, *saying, saw, maxim, adage, proverb, motto

apotheosis *paragon, nonpareil, nonesuch

appall horrify, *dismay, daunt

Ana terrify, affright, *frighten: confound, dumbfound, bewilder (see PUZZLE)

Ant nerve, embolden —*Con* energize, *vitalize, activate: *comfort, solace, console

appalling *fearful, dreadful, terrible, horrible, frightful, shocking, awful, terrific, horrific

Ana dismaying, horrifying, daunting (see DISMAY *vb*): bewildering, dumbfounding, confounding (see PUZZLE *vb*)

Ant reassuring

appanage prerogative, privilege, perquisite, birthright, *right

apparatus 1 *equipment, gear, tackle, outfit, paraphernalia, machinery, matériel

Ana tool, *implement, utensil, instrument: network, *system, scheme

2 *machine, mechanism, machinery, engine, motor

Ana *device, contrivance, contraption, gadget

apparel *vb* *clothe, attire, dress, array, robe

Ana outfit, accouter, appoint, equip (see FURNISH)

Ant divest —*Con* *strip, bare, dismantle, denude

apparel *n* *clothes, clothing, dress, attire, raiment

apparent 1 *evident, manifest, patent, distinct, obvious, palpable, plain, clear

Ana discernible, noticeable (see corresponding verbs at SEE): *perceptible, ponderable, tangible, appreciable

Ant unintelligible —*Con* *obscure, dark, enigmatic, vague, ambiguous, cryptic

2 **Apparent, illusory, seeming, ostensible** mean not really or actually being what it appears to be. Something is **apparent** that, however evident it may be from the point of view of the unaided senses, is not borne out by scientific investigation or by a knowledge of all the facts or circumstances (the *apparent* size of the sun) (the *apparent* loss of weight of a body immersed in water—*Darrow*) (I am anxious to lighten our *apparent*, for it is really more *apparent* than

real, our *apparent* worldliness—*Mackenzie*) Something is **illusory** that is the result of a false impression and acquires a character or appearance other than that found in the real thing or that seems to exist when it is actually non-existent. The deception may be the result of one's sense limitations (as in an optical illusion), of a misleading appearance assumed by certain natural phenomena (as a mirage or will o' the wisp), of one's own state of mind which colors or alters the objective reality, or of the strong stimulation of the imagination (as by a work of art) that causes one to accept as real something purely imaginary (lengthwise stripes give an *illusory* height to the figure) (*illusory* pools of water on a highway) (a lover often attributes an *illusory* beauty to his beloved) (the beautiful is in a certain sense *illusory*, or rather contains an element of illusion—*Alexander*) Something is **seeming** that is so like the reality in appearance that it may be mistaken for it. *Seeming* usually implies a character in the thing observed rather than, as with the two preceding words, a defect of observation. Often it suggests an intent to deceive or delude (Miss Wilmot's reception [of him] was mixed with *seeming* neglect, and yet I could perceive she acted a studied part—*Goldsmith*) (the whole of Burns's song has an air of straight dealing . . . but these *seeming* simplicities are craftily charged . . . with secondary purposes, ulterior intimations—*Montague*) Something (as an aim or motive) is **ostensible** that is explicitly declared, professed, or avowed or that has the outward marks of the character ascribed to it yet has in fact another hidden aim, motive, or character; thus, to say that the *ostensible* purpose of a naval review is the celebration of a national holiday may imply the presence of another, deeper, and more significant purpose not revealed (as mobilization for war) (natives from independent and feudatory courts whose *ostensible* business was the repair of broken necklaces . . . but whose real end seemed to be to raise money for angry Maharanees or young Rajahs—*Kipling*)

Ana *false, wrong; deceptive, delusory, delusive, *misleading; specious, credible, *plausible

Ant real —*Con* actual, true (see REAL); intrinsic, *inherent, essential

apparition, **phantasm**, **phantom**, **wraith**, **ghost**, **spirit**, **specter**, **shade**, **revenant** mean a visible but immaterial appearance of a person or thing, especially a likeness of a dead person or of a person or thing that is not physically present. *Apparition*, *phantasm*, and *phantom* all stress the illusory character of what appears to the sight. **Apparition** often connotes suddenness or unexpectedness of coming (I enter the ghost of Caesar) . . . I think it is the weakness of mine eyes that shapes this monstrous *apparition*—*Shak.*) while **phantasm** often suggests the workings of a disordered or overexcited imagination (horrible forms, what and who are ye? never yet there came *phantasms* so foul through monster-teeming Hell—*Shelley*) and **phantom** a dreamlike character and form without substance or shape without body or mass (so live and laugh, nor be dismayed as one by one the *phantoms* go—*E. A. Robinson*) **Wraith** specifically denotes an apparition of a living person that appears to a friend or relative and portends the former's death but is also used of an apparition of a dead person (she was uncertain if it were the gypsy or her *wraith*—*Scott*) In extended use it stresses the insubstantial and evanescent character of the apparition (O, hollow *wraith* of dying fame, fade wholly, while the soul exults—*Tennyson*) The remaining words in their literal senses all denote an apparition of a dead person. **Ghost** and **spirit** are the familiar and general terms for a disembodied soul; **specter** (not necessarily human) connotes more of the mysterious or terrifying (ghosts, wandering here and there, troop

home to churchyards—*Shak.*) (I am thy father's *spirit*, doomed for a certain term to walk the night—*Shak.*) (grisly *specters*, which the Fiend had raised—*Milton*) (lo! when the service was ended, a form appeared on the threshold . . . why does the bridegroom start and stare at the strange apparition . . . ? Is it a phantom of air . . . ? Is it a *ghost* from the grave . . . ?—*Longfellow*) **Shade** usually connotes impalpability but it stresses personality rather than mode of appearance (mighty heroes' more majestic *shades*—*Dryden*) (followed . . . by the *shade* of their dead relative—*Frazer*) **Revenant**, when it denotes a ghost, carries none of the implications of the other terms for a disembodied spirit except the return from the grave; it is therefore used often in straight prose or where a term without emotional connotations is desirable (thus, our *revenant* from a hundred years ago would find us occupied yet with measuring intensities of force—*Dar-row*) (I felt for a queer moment of hallucination more of a ghost than the ghost I had come to visit—a *revenant* out of a rowdy present into the more stately epoch—*L. P. Smith*) *Ana* illusion, *delusion, hallucination

appeal *n* plea, *prayer, petition, suit

Ana entreating or entreaty, beseeching, supplicating or supplication, imploring (see corresponding verbs at BEG); soliciting or solicitation, requesting or request, asking (see corresponding verbs at ASK)

Con demanding or demand, exacting or exaction, claim (see corresponding verbs at DEMAND); protesting or protest, objecting or objection, kicking (see corresponding verbs at OBJECT)

appeal *vb* plead, pray, sue, petition (see under PRAYER)

Ana implore, *beg, beseech, entreat, supplicate; solicit, request, *ask

Con *demand, exact, claim; protest, kick, *object

appear 1 **Appear**, **loom**, **emerge** mean to come out into view. In use, however, they are only rarely interchangeable. **Appear** is weakest in its implication of a definite physical background or a source; consequently it sometimes means merely to become visible or to become apparent (see EVIDENT) (one by one the stars *appeared* in the sky) (nothing *appears* in the testimony to cause doubt of the defendant's guilt) Sometimes it means to present oneself in public in a particular capacity or to be presented or given out to the public (Clarence Darrow *appeared* as counsel for the defendant) (Booth *appeared* nightly as Hamlet for the last two weeks of his run) (the new biography of Lincoln will *appear* next month) (weeklies usually *appear* on Thursday or Friday) **Loom** means appearing as through a mist or haze (a smear of . . . lead-colored paint had been laid on to obliterate Henchard's name, though its letters dimly *loomed* through like ships in a fog—*Hardy*) (between the bed and the ottoman . . . the cot *loomed* in the shadows—*Bennett*) Because things seen in a fog are often magnified by their indistinct outlines, *loom*, especially when followed in figurative use by *large* or *great* or when followed by *up*, suggests apparent and sometimes appalling magnitude (some mornings it [a mesa] would *loom up* above the dark river like a blazing volcanic mountain—*Cather*) (that which *loomed* immense to fancy low before my reason lies—*Browning*) **Emerge** definitely implies a coming out into the open from something that envelops: the word therefore presupposes a period or condition of concealment, obscurity, gestation, or insignificance (the sun *emerged* from the clouds) (after a long hunt for him, we saw him *emerging* from the crowd) (that part of northern Ohio where the Bentley farms lay had begun to *emerge* from pioneer life—*Anderson*) (Lord Sligo *emerges* from this account as an able and conscientious administrator—*Times Lit. Sup.*)

Ana *come, arrive: issue, emanate, rise, arise, *spring
Ant disappear: vanish —**Con** depart, retire, withdraw,
 *go, leave

2 *seem, look

appearance, look, aspect, semblance denote the outward show presented by a person or thing. **Appearance** often carries no additional implications <judge not according to the appearance—*Jn 7:24*> <in drawing, represent the appearances of things, never what you know the things to be—*Ruskin*> The word, however, frequently implies an apparent as opposed to an actual or genuine character and therefore often connotes hypocrisy, dissembling, or pretense when used of persons or their actions <to be able to tyrannize effectively they needed the title and appearance of constitutional authority—*Huxley*> <they spent their lives trying to keep up appearances, and to make his salary do more than it could—*Cather*> **Look** is often indistinguishable from appearance except that it more often occurs in the plural <never judge a thing merely by its looks> They are not interchangeable, however, in all instances. When a personal impression or a judgment is implied, appearance is the precise word <Aristotle . . . while admitting that Plato's scheme has a plausible appearance of philanthropy, maintains that it is inapplicable to the facts of human nature—*Dickinson*> When the emphasis is upon concrete details (as of color, shape, or expression) observable to everybody, look is a better choice <he had the look of a man who works indoors and takes little exercise> <I choose my friends for their good looks, my acquaintances for their good characters, and my enemies for their good intellects—*Wilde*> Specifically look is often applied to a person's expression as manifest in his face or posture <she had a look about her that I wish I could forget—the look of a scared thing sitting in a net!—*Millay*> **Aspect**, like look, stresses the features of a person or thing but when applied to persons, it usually distinctively suggests the characteristic or habitual appearance and expression, especially facial expression <not risking a landing because of the fierce aspect of the natives—*Heiser*> <he was a very handsome man, of a commanding aspect—*Austen*> Aspect often specifically implies reference to a facet or to the features that give something (as a place, an age, or a situation) its peculiar or distinctive character <the aspect of affairs was very alarming—*Dickens*> <fifty years from now, it may be, the olive tree will almost have disappeared from southern France, and Provence will wear another aspect—*Huxley*> <democracy . . . has different aspects in different lands—*Sulzberger*> **Semblance** basically implies outward seeming without necessarily suggesting a false appearance <it is the semblance which interests the painter, not the actual object—*Times Lit. Sup.*> Nevertheless it is rarely used in this sense without an expressed or implied contrast between the outward appearance and the inner reality <thou, whose exterior semblance doth belie thy soul's immensity—*Wordsworth*> Sometimes, however, the word stresses the likeness of the thing to something else without suggesting deceptiveness in the appearance <a piked road that even then had begun to take on the semblance of a street—*Anderson*>

appease *pacify, placate, mollify, propitiate, conciliate

Ana assuage, alleviate, mitigate, lighten, *relieve: *palliate, extenuate: *satisfy, content

Ant exasperate, aggravate —**Con** perturb, upset, disturb, *discompose: vex, irk, *annoy, bother: *anger, incense, enrage, infuriate

appellation *name, title, designation, denomination, style

append *add, subjoin, annex, superadd

Ana affix, attach, *fasten

Con *detach, disengage: curtail (see SHORTEN)

appendage, appurtenance, accessory, adjunct designate something regarded as additional and at the same time as subsidiary to another object. **Appendage** implies a certain closeness of attachment or connection yet often stresses the idea of subordination or even uselessness <the caudal appendage> <the smaller borough is a mere appendage of the larger> <those graceful and useless appendages, called Directors—*Scott*> **Appurtenance** is applied to something that belongs to the principal object or goes with it customarily yet is not an integral part of it (as the barns, worksheds, garages, gardens on a piece of land or the permanent fixtures in a building) <the bed itself, with all appurtenances of palliasses, mattresses, etc.—*Barham*> **Accessory** is applied usually to something that is dispensable yet contributes to the appearance, usefulness, comfort, or convenience of the principal thing <automobile accessories> <wore a beige suit with brown purse, gloves, and other accessories> **Adjunct** is applied to something that is or may be added or joined to the principal thing without becoming an essential part of it <in the great age of Louis XIV, it [the ballet] became an established institution, still an adjunct of opera—*Ellis*> <meter and rhyme are not mere adjuncts of poetry—*Alexander*>

appendix, addendum, supplement designate additional matter subjoined to a book. **Appendix** is used of appended material which contributes (as by way of illustration, amplification, or citation of documents) to the effectiveness of a treatment that is still relatively complete in itself. **Addendum** and **supplement**, however, agree in implying that the additional matter is essential to completeness of treatment but differ in that *addendum* suggests greater brevity and is frequently used of material added to supply omissions while *supplement* implies larger compass and is often applied to material added after some lapse of time, frequently as a separate publication, to embody later information. When the additional matter of an addendum is a list (as of words or items), the plural *addenda* is often used instead of *addendum*.

apperception assimilation, identification, *recognition

appertain pertain, belong, relate, *bear, apply

appetite *desire, lust, passion, urge

Ana hungering or hunger, thirsting or thirst, yearning, longing (see LONG vb): craving, wishing, coveting (see DESIRE vb): impulse, spring, *motive: *cupidity, greed
Con abnegation, self-abnegation, self-denial, *renunciation: asceticism (see under ASCETIC n): repugnance, distaste (see corresponding adjectives at REPUGNANT)

appetizer, hors d'oeuvre, aperitif. Appetizer is the comprehensive term denoting food or drink served in advance of a meal as a whet to the appetite; it may include cocktails and a savory tidbit served before going to the table or a first course (as of oysters, clams, fruit cocktail, or canapé) served at the table. **Hors d'oeuvre** may be used of a savory, salt, smoked, tart, or uncooked food served with cocktails or as a first course at table. Its more common plural form, *hors d'oeuvres*, generally suggests a tray of such foods from which one selects what pleases one's taste. An **aperitif** is a small drink of liquor and especially of a fortified and usually specially flavored wine taken shortly before lunch or dinner for the purpose of or under the pretext of stimulating the appetite.

appetizing *palatable, relishing, tasty, toothsome, flavorful, savory, sapid

Ant nauseating

applaud 1 **Applaud, cheer, root** mean to demonstrate one's feeling, especially one's approbation or joy, audibly and enthusiastically. **Applaud** specifically and usually implies hand clapping <it is not the custom to applaud preachers> <the audiences at grand opera are asked to applaud only at

the end of an act or scene) <each graduate was *applauded* as he came up to receive his diploma> **Cheer** suggests shouting, usually of meaningful words (as *rah-rah-rah* or *hip-hip-hooray*) or of a set form of words adopted by a school, college, or organization as its own; in one use it implies organized rather than spontaneous effort and includes singing as well as shouting. *Cheer* differs from *applaud* also in its purpose, which is chiefly that of encouraging individuals or a team taking part in a competition or contest; often, however, it suggests jubilation aroused by a successful play or a brilliant feat. **Root** may imply cheering or applauding, but it stresses encouragement as the motive. Consequently it implies strong partisanship and vocal public championship of what one favors <*root* for a candidate> <*root* for the home team>

Ana acclaim, extol (see PRAISE)

Ant hiss: boo —**Con** deride, taunt, *ridicule, mock

2 *commend, compliment, recommend

Ana *praise, eulogize, laud: *approve, endorse, sanction

Ant disparage: criticize —**Con** *decry, depreciate, belittle: censure, reprobate (see CRITICIZE): *disapprove, deprecate

applause, acclamation, acclaim, plaudits denote public expression of approbation. **Applause** usually suggests loudness or liveliness of demonstration and often carries its literal implication of clapping hands <she waited until the *applause* died down> <round after round of *applause* greeted him> However, it may be used to designate any other noisy or emphatic expression of approval (as stamping of feet, cheering, or waving of flags) <*applause* rang out from a hundred thousand throats—*Froude*> **Acclamation** adds to *applause* the implications of eagerness, enthusiasm, and often unanimity of assent: it often retains its basic implication of crying out <he was nominated to the office by *acclamation* without a ballot, and with emphatically voiced approval> <his speech was received with *acclamation*> **Acclaim** is more poetic than *acclamation* though often interchanged with the latter; it sometimes carries implications of loftier deeds and more enduring esteem than *acclamation* <the heroes were hailed with *acclaim*> <his poetry met with universal *acclaim*> **Plaudits**, though literally equal to *applause*, may suggest polite or gracious rather than demonstrative expressions of approval <the colonel bowed and smiled with very pleasant good nature at our *plaudits*—*Thackeray*>

Ana cheering or cheers, rooting (see corresponding verbs at APPLAUD)

Ant hisses: boos —**Con** deriding or derision, taunting or taunts, ridiculing or ridicule, twitting, mocking (see corresponding verbs at RIDICULE)

appliance tool, *implement, instrument, utensil

Ana accessory, adjunct (see APPENDAGE): *device, contrivance, gadget

applicable *relevant, pertinent, apposite, apropos, germane, material

Ana *fit, suitable, appropriate, apt, felicitous, happy, meet, fitting, proper

Ant inapplicable —**Con** *impertinent: inept, *awkward

applicant aspirant, *candidate

application concentration, *attention, study

Ana intentness, engrossment, absorption (see corresponding adjectives at INTENT): toil, grind, drudgery (see WORK): sedulousness, assiduousness, industriousness or industry, diligence (see corresponding adjectives at BUSY)

Ant indolence —**Con** abstractedness or abstraction, absentmindedness (see corresponding adjectives at ABSTRACTED): laziness, slothfulness, faineance (see corresponding adjectives at LAZY)

appliqué vb *overlay, superpose, superimpose

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

Ana ornament, *adorn, decorate: affix, attach, *fasten

apply 1 *use, employ, utilize, avail

2 devote, *direct, address

Ana attend, mind, *tend: addict, accustom, *habituate:

toil, labor, work, grind (see corresponding nouns at WORK)

Con *neglect, slight: divert (see AMUSE)

3 go, turn, *resort, refer

Ana appeal, petition (see under PRAYER): *beg, beseech, implore, supplicate

4 *bear, relate, pertain, appertain

appoint 1 name, *designate, nominate, elect

Ana *choose, select, pick, single: commission, *authorize, accredit

Con *dismiss, discharge, cashier

2 *furnish, equip, accouter, outfit, arm

Ana garnish, beautify, embellish, bedeck, deck (see ADORN): array (see CLOTHE)

Con dismantle, divest, denude, *strip

appointment *engagement, rendezvous, tryst, assignation, date

apportion 1 allocate, *allot, assign

Ana *distribute, divide, dispense, deal, dole: *share, participate, partake

Con *gather, collect, assemble: consolidate, concentrate, *compact

2 **Apportion, portion, parcel, ration, prorate** mean to divide something carefully and distribute it among a number. **Apportion** suggests division on a just, fair, or equitable basis; it does not, however, imply equality in the divisions or in the persons or things affected by the distribution

<*apportioned* his time among various employments>

<*apportion* the residue of an estate according to the terms of a will> <to *apportion* the judicial power between the supreme and inferior courts—*John Marshall*>

Portion (often with *out*) commonly suggests division into more or less equal shares <in the *portioning* out of war resources China had been left at the end of the table—*Feis*> <the country was *portioned* out among the petty chiefs>

Parcel (usually with *out*) does not always imply immediate distribution, but it does imply division for the sake of ultimate distribution (as among purchasers or heirs); it is the preferred word when what is divided is cut into pieces, separated into lots, or distributed in small amounts

<it could be *parceled* out into lots fifty by one hundred feet at five hundred dollars per lot—*Dreiser*> <colonies were estates to be exploited for the benefit of the home merchants, and the world was *parceled* out among privileged companies—*Randall*>

Ration usually implies authoritative allowance and an equal division of necessities (as fuel, food, or clothing) according to some principle (as of adequacy, sufficiency, or dietary variety or, when the available supply is limited or scanty, of fairness to all)

<*ration* the food for the horses> <where capital is short, it must be *rationed* intelligently, in the same way as gasoline and sugar were *rationed* in wartime—*Lans*> <the drinking water was *rationed* during the prolonged voyage>

Prorate implies proportional division (sometimes proportional assessment) for the sake of fairness to those concerned: it may imply an authoritative decision as by a legislature, or an agreement among those concerned

<*prorate* employment among the workers during slack seasons> <*prorate* overhead expenses among the various departments of a company> <the entire field was to be put in truck crops, and the yield *prorated* to the workers—*Lord*>

Ana *grant, accord, award: *give, bestow: *separate, divide, part

apposite pertinent, germane, *relevant, apropos, applicable, material

Ana felicitous, happy, apt, appropriate, suitable, *fit, fitting; pat, timely, opportune, *seasonable

Ant inappreciable, inapt —*Con* *impertinent: *awkward, inept: casual, hit-or-miss, haphazard, *random

appraise value, *estimate, evaluate, assay, rate, assess

Ana *judge, adjudge: determine, ascertain, *discover: inspect, examine, *scrutinize, audit

appraising (see under ESTIMATE *vb*)

appreciable *perceptible, sensible, ponderable, palpable, tangible

Ana apparent, *evident: discernible, noticeable (see corresponding verbs at SEE)

Ant inappreciable —*Con* impalpable, imponderable, *imperceptible, intangible, insensible

appreciate 1 comprehend, *understand

Ana appraise, value, rate, *estimate, evaluate: *judge, adjudge: *apprehend, comprehend

Ant depreciate —*Con* disparage, derogate, detract, belittle, *decry

2 **Appreciate, value, prize, treasure, cherish** mean to hold in high estimation. One **appreciates** what one understands sufficiently to admire critically or to enjoy with discrimination of its values, especially its aesthetic values <relatively few persons are able to *appreciate* the fugues of Johann Sebastian Bach > <he liked to be near people and have his talent as a whittler *appreciated*—*Anderson*>

Appreciate may not always carry this strong implication of intelligent admiration but may stress rather a response of warm approval, keen enjoyment, or gratitude <those who are just beginning to *appreciate* the idea—*Mackenzie*>

<nature actually made him ache, he *appreciated* it so—*Galsworthy*> <children easily *appreciate* justice—*Russell*>

One **values** what one rates highly or as worth more than other persons or things <*value* honor more than life>

<there is nothing he *values* so much as the respect of his children> <the tragedy of plain women; to be *valued*, but not loved—*Mary Austin*>

One **prizes** what one values highly, especially as a possession, and takes deep pride in or sets great store by <the good we never miss we rarely *prize*—*Cowper*>

<what is freedom and why is it *prized*?—*Dewey*>

One **treasures** what one keeps safe from danger of being lost or stolen, especially because one regards it as precious or attaches great sentimental value to it <she *treasures* every memento of her youth>

<those who value money because it makes them independent are the reverse of those who *treasure* every penny they acquire and become slaves to their avarice>

When used in reference to persons, *treasure* implies a clinging to more often than appreciation or love <pay me no homage, Mario, —but if it be I have your friendship, I shall *treasure* it—*Millay*>

Cherish may often be used interchangeably with *prize* and *treasure* but carries a stronger implication of love or affection for what is cherished and often suggests closer, more intimate association or attentions <*cherish* a few books only, and those few chosen not for their fame in the world but wholly for the pleasure that they give you—*Montague*>

<he was a man who *cherished* his friends. He liked to call at the Bishop's house to advise him about the care of his young orchard, or to leave a bottle of homemade cherry brandy for Father Joseph—*Cather*>

Ana admire, esteem, respect, regard (see under REGARD *n*): enjoy, *like, relish

Ant despise —*Con* contemn, scorn, disdain (see DE-SPISE): depreciate, disparage, *decry

apprehend 1 *arrest, detain, attach

Ana seize, *take: capture, *catch

Con release, discharge, liberate, *free

2 **Apprehend, comprehend** mean to lay hold of something with the mind so as to know it but together with their

derivative nouns **apprehension** and **comprehension** are clearly distinguished in psychological use. **Apprehend** and **apprehension** do not imply attainment of full knowledge or of complete understanding but only a glimpsing of the nature, meaning, or significance of the object of thought; **comprehend** (see also UNDERSTAND) and **comprehension** imply an understanding of the object of thought in its entire compass and extent. *Apprehend* may suggest a single act of the mind and *comprehend* a complex and laborious process, but this distinction is not so essential as that between imperfect and perfect understanding; thus, one *apprehends* many things (as infinity or beauty) which one can never *comprehend*; one *apprehends* many things as a child (as mother love) which one does not *comprehend* until late in life <who shall say how quickly the babe *apprehends* the relation between the causative howl and its effect, the demanded ministration?—*Grand-gent*> <the thirteenth century which cared little to *comprehend* anything except the incomprehensible—*Henry Adams*>

Ana *understand, appreciate: grasp (see TAKE 1): perceive, observe, notice, note (see SEE)

3 divine, anticipate, *foresee, foreknow

Ana fear, dread (see corresponding nouns at FEAR): forecast, predict, forebode, *foretell

apprehension 1 arrest, detention, attachment (see under ARREST *vb*)

Ana seizing or seizure, taking (see corresponding verbs at TAKE): capturing or capture, catching (see corresponding verbs at CATCH)

Con releasing or release, discharging or discharge, liberation (see corresponding verbs at FREE)

2 comprehension (see under APPREHEND 2)

Ana understanding, appreciation (see corresponding verbs at UNDERSTAND): perceiving or perception, observing or observation, noticing or notice, noting (see corresponding verbs at SEE)

3 **Apprehension, foreboding, misgiving, presentiment** denote fear (or an instance of it) that something is going wrong or will go wrong. **Apprehension** usually implies fear that obsesses the mind and keeps one anxious and worried <be under *apprehension* concerning a child's health> <peasants who have survived a famine will be perpetually haunted by memory and *apprehension*—*Russell*>

Foreboding particularly designates oppressive anticipatory fear or superstitious, unreasoning, or inadequately defined fear; thus, one may relieve a person's *apprehensions* yet find it hard to dispel his *forebodings* <there was a sadness and constraint about all persons that day, which filled Mr. Esmond with gloomy *forebodings*—*Thackeray*>

Misgiving suggests uneasiness and mistrust rather than anxiety or dread; it is often applied to sudden fears (as a suspicion that one is making a mistake, a doubt of one's capacity to accomplish what one has undertaken, or a disturbing loss of courage) <in the midst of my anecdote a sudden *misgiving* chilled me—had I told them about this goat before?—*L. P. Smith*>

<his self-confidence had given place to a *misgiving* that he had been making a fool of himself—*Shaw*>

Presentiment implies a vague feeling or a dim, almost mystical, perception of something (not necessarily unpleasant) that seems bound to happen; however, because it frequently suggests an element of anticipatory fear and, in many cases, of foreboding, it comes into comparison with the other words of this group <the delicious repose of the soul . . . had been shaken . . . and alarmed with dim *presentiment*—*George Eliot*>

Ana *fear, dread, alarm, panic: worry, anxiety, *care

Ant confidence —*Con* *trust, faith: assurance, self-

possession (see CONFIDENCE): *equanimity, sangfroid, composure

apprehensive *fearful, afraid

Ana anxious, worried, solicitous (see under CARE *n*): nervous, uneasy, jittery (see IMPATIENT)

Ant confident —*Con* assured, sanguine, sure (see CONFIDENT): unruffled, imperturbable, unflappable, composed, *cool, nonchalant

apprentice *novice, novitiate, probationer, postulant, neophyte

Ana beginner, starter (see corresponding verbs at BEGIN): tyro, *amateur

Con *expert, adept, wizard

apprise *inform, advise, notify, acquaint

Ana tell, *reveal, disclose, divulge, discover, betray: publish, proclaim, *declare, announce

approach *vb* 1 **Approach, near, approximate** mean to come or draw close (to). **Approach** is by far the widest in its range of application. Very often it implies a coming close in space (he left the group and *approached* us) (the storm was *approaching*) Often also it suggests a drawing close in time (it was *approaching* three o'clock) (the day of the wedding *approached*) Sometimes a closeness in order of thought or in an intellectual relation (as likeness or identification) is implied (her interest in others sometimes *approaches* intrusiveness) (students are expected to *approach* the standard set for them by their teachers) (many words of distinctly different origin gradually *approach* each other in meaning) Though the word retains its implication of coming close, often it also implies actual or imminent contact; to *approach* a man with a proposal is actually to make advances to him; to *approach* a topic with reluctance is actually to enter upon a discussion of it. Hence, *approach* often stresses the manner or method of beginning, especially one calculated to evoke the response or effect desired (he did not know how to *approach* the subject) (every problem in painting was to Leonardo a problem in science, every problem in physics he *approached* in the spirit of the artist—*Ellis*) In a still more specific sense, when used in reference to persons, *approach* suggests advances made by the agent for some ulterior motive (as diplomatic negotiation, solicitation, or bribery) (the committee awaited a favorable opportunity to *approach* the governor concerning his candidacy) (the attorney for the prosecution declared that two jurors had been *approached* during the trial) **Near** is interchangeable with *approach* only when used in reference to persons or things that draw close in space or time. Because of its simplicity and familiarity it is sometimes preferred to *approach* in poetry but it is not as frequent in speech as might be expected, the expressions “get near” and “come near” often being used in preference (the lark could scarce get out his notes for joy . . . as he *neared* his happy home, the ground—*Tennyson*) (the echoed hoof *nearing* the distant shore—*Wordsworth*) (as the time of the birth of our Lord *neared*—*Pusey*) **Approximate**, on the other hand, is interchangeable with *approach* chiefly in reference to things which come close to each other in some intellectual relation (as the actual to the ideal, the material to the spiritual, or one idea or entity to another) (results that *approximate* perfection) (for law, at any given moment, even under the most favorable conditions, cannot do more than *approximate* to its own ideal—*Dickinson*) (the candidate's memory should closely *approximate* a hypothetical norm—*Armstrong*) **Approximate** is specifically used in reference to a sum, an amount, or a quantity that approaches but does not necessarily equal a given sum or amount (a tablespoonful *approximates* three teaspoonfuls) (their fund now *approximates*

\$5000)

Ana accost, *address: *begin, commence, initiate: consult, *confer, advise, negotiate

Con avoid, elude, shun, evade, *escape: *refrain, abstain, forbear: retreat, *recede: withdraw, retire, depart, leave, *go

2 touch, equal, *match, rival

Con diverge, deviate (see SWERVE)

approach *n* *overture, advance, tender, bid

Ana attempt, endeavor, essay, try (see under ATTEMPT *vb*)

Ant repulse

approbation, approval are closely related in meaning.

Approbation stresses admiration or high favor and is applied either to actual expressions of such feeling or to the state of mind of a person whose favorable opinion is manifest (his speech won general *approbation*) (terms of *approbation*) (feels pleasure in the *approbation* of his superiors) **Approval** requires qualification by words like *warm, hearty, or enthusiastic* to be interchangeable with *approbation*, especially when the latter denotes expression of favor. For *approval*, in itself, implies no greater favor than that involved in giving full consent with no reservations or in sanctioning. It therefore is applied especially to the formal act of approving or to a formal statement of permission, endorsement, or confirmation (no interscholastic games are to be played without the *approval* of the principal) (the president gave his *approval* to the proposed legislation in yesterday's conference with reporters)

Ana admiration, esteem, respect, *regard: *applause, acclaim, acclamation, plaudits

Ant disapprobation —*Con* odium, opprobrium, disrepute (see DISGRACE): hatred, detestation, abhorrence (see under HATE *vb*): censuring or censure, condemning or condemnation, reprehension (see corresponding verbs at CRITICIZE)

appropriate *vb* preempt, *arrogate, confiscate, usurp

Ana *take, seize, grab: annex, *add

appropriate *adj* fitting, proper, *fit, suitable, apt, meet, happy, felicitous

Ana apposite, pertinent, germane, *relevant: pat, timely, *seasonable, opportune

Ant inappropriate —*Con* wrong, *false: incongruous, incompatible, *inconsonant

appropriation, grant, subvention, subsidy mean money or property given or set apart by an authorized body for a predetermined use by others. **Appropriation** is the comprehensive term used in government, business, or an institution controlling large sums of money for the amount formally and officially allotted to any one of its departments, projects, services, or beneficiaries in advance of the expenditure of that money (every department must keep within its *appropriation*) (since the bill just signed carries no *appropriation* for the new bridge, it is obvious that construction will not begin this year) **Grant** usually applies to a gift made by a government or by a corporation (as an educational or charitable foundation) to a beneficiary on the condition that certain terms be accepted or certain engagements fulfilled. The beneficiary may be a specific institution, a corporation, or even an individual; the gift may be a sum of money, but when the government is the benefactor, it is often a tract of land or a valuable franchise (grants of land from the federal government were made to various railroads building new lines and to various colleges and universities providing agricultural and industrial courses in the mid-nineteenth century) (foundations that make *grants* to institutions engaged in health and medical research) **Subvention** is more re-

stricted than *grant* since it always implies pecuniary aid especially to a person or institution in straits; it more often applies to a grant-in-aid to an artistic, literary, or scientific undertaking than a commercial one (opera in many places is possible only because of a *subvention*) **Subsidy** applies to a grant made to an individual or a company to enable him (or it) to carry on some work regarded as advantageous to the public but not for one reason or another self-supporting. *Subvention* is often preferred when the grant is made by an educational or charitable foundation or similar agency; *subsidy*, when it is made by the government (the Carnegie Corporation makes *subventions* to libraries and educational institutions) (the British government provides *subsidies* for mail-carrying vessels)

approval *approbation

Ana commending or commendation, applauding or applause, compliment (see corresponding verbs at COMMENT): endorsing or endorsement, sanction (see corresponding verbs at APPROVE)

Ant disapproval —**Con** criticizing or criticism, reprehension, censure (see corresponding verbs at CRITICIZE): disparagement, depreciation, derogation (see corresponding verbs at DECRY)

approve, **endorse**, **sanction**, **accredit**, **certify** mean to have or to express a favorable opinion of. **Approve** often means no more than this (daring them . . . to *approve* her conduct —*Conrad*) Sometimes, however, it suggests esteem or admiration (Jane secretly *approved* his discernment—*Rose Macaulay*) **Endorse** adds to *approve* the implication of backing or supporting (as by an explicit statement): it is therefore used chiefly in reference to things requiring promotion or publicity (endorse a person's candidacy) (endorse the platform of a new political party) (endorse a brand of cigarette) **Sanction** not only implies approval but also authorization (the school dances were *sanctioned* by the board of education) The one that sanctions may be not only a person or group but something that provides a standard by which something can be approved and authorized or disapproved and discountenanced (proposed laws not *sanctioned* by public opinion) (some churches permit divorce, but do not *sanction* remarriage) (these statements are *sanctioned* by common sense—*Joseph Gilbert*) (the court has also *sanctioned* recently some federal efforts to protect Negroes in the South from violence—*Barth*) **Accredit** and **certify** usually imply official endorsement and conformity with certain standards. Their selection is dependent on idiom rather than on distinctions in meaning (an *accredited* herd of dairy cattle) (certified milk) (an *accredited* school) (a *certified* teacher) (a *certified* public accountant) (labels by which brain merit is advertised and *certified*—medals, honors, degrees—*Woolf*) *Accredited*, however, is sometimes used generally as implying public approval or general acceptance (if any . . . break away from *accredited* custom—*Inge*) (sages so fully *accredited* as Mr. Bertrand Russell—*Montague*)

Ana *commend, applaud, compliment: *ratify, confirm
Ant disapprove —**Con** reject, refuse, repudiate, spurn (see DECLINE): condemn, reprehend, *criticize

approximate *vb* *approach, near**approximately** *nearly, almost, well-nigh

Ant precisely, exactly

appurtenance accessory, adjunct, *appendage

Ana furnishing or furniture, equipment, appointment (see corresponding verbs at FURNISH)

apropos apposite, pertinent, *relevant, germane, applicable, material

Ana pat, timely, opportune, *seasonable: appropriate,

fitting, *fit, suitable, apt, proper, meet, happy

Ant unapropos

apt 1 happy, felicitous, appropriate, fitting, *fit, suitable, proper

Ana apposite, pertinent, *relevant, apropos: pat, timely, opportune (see SEASONABLE): telling, convincing, compelling (see VALID): right, nice, precise, exact (see CORRECT)

Ant inapt, inept —**Con** *awkward, maladroit: wrong, *false

2 **Apt**, **likely**, **liable** are often interchangeable when followed by *to* and the infinitive, but clear differences may be described. **Apt** implies an inherent or habitual tendency (as an inclination, bent, or predisposition); it refers to the past and the present as much as if not more than to the future; it applies commonly to persons, but may apply to things that show a tendency or drift (you are just a little *apt* to let yourself be a slave to that house of yours—*Bennett*) (the upper circles . . . are *apt* to favor a pronunciation derived . . . from that which prevailed in England—*Grandgent*) (long poems are always *apt* to drop in places into what is only not called prose because it is metrical—*Alexander*) **Likely** stresses probability; it refers in time to the future and therefore has its place in predictions (he is *likely* to succeed) (the wedding is *likely* to cost her parents more than they can afford) (it is *likely* to rain today) (<"How now! is Jack Cade slain?" "No, my lord, nor *likely* to be slain; for they have won the bridge"—*Shak.*> **Liable** (see also LIABLE, RESPONSIBLE) implies exposure to a risk or danger; it suggests a chance rather than a probability and is therefore often used in warnings, in cautions, or in the expression of fears (children who play in the street are *liable* to be injured by automobiles) (drivers must remember that cars are *liable* to skid on wet roads) (anyone who disobeys this rule is *liable* to be punished severely) Thus, a person who is *apt* to lose his head under stress knows that he is *likely* to fail when he is put to a test and therefore forms the habit of avoiding situations in which he is *liable* to encounter difficulties.

Ana inclined, disposed, predisposed (see INCLINE *vb*): prone, *liable

Con averse, *disinclined, indisposed, loath

3 *quick, prompt, ready

Ana clever, smart, bright, *intelligent, quick-witted, alert: gifted, talented (see corresponding nouns at GIFT)

Con *slow, laggard: *lethargic, sluggish: *stupid, slow, dull, dense, crass

aptitude bent, turn, talent, faculty, *gift, knack, genius

Ana *taste, gusto, zest: propensity, *leaning, penchant, flair

Ant inaptitude

aquatic, **lacustrine**, **fluvial**, **fluvatile**, **marine**, **oceanic**, **thalassic**, **neritic**, **pelagic**, **abyssal** all refer to water and especially to a body of water but all except *aquatic* are highly specific in their applications and all are more or less technical terms in the geographical and biological sciences and in geology. **Aquatic** may imply a habitat in water, but as applied to animals and plants it often means living in water (but not necessarily submersed) or on the water or around a body of water. It is specifically applicable to any plant (as the water hyacinth and the water lily) that has its roots in or below water. It is also applicable to any animal that frequents the water, especially to a swimming bird or mammal (as a gull or an otter). A frog is more often described as an amphibious animal but as compared to a toad its habits may be said to be *aquatic*. **Lacustrine** relates only to a lake; it is used in biology (lacustrine shells) (lacustrine fauna and flora), in geology (lacustrine deposits), and in archaeology

⟨the *lacustrine* period, a prehistoric period when dwellings were erected over lakes⟩ **Fluvial** and **fluvialite** are used interchangeably to suggest the action, operation, or influence of flowing water though geologists perhaps somewhat prefer *fluvial* and biologists distinctly prefer *fluvialite* ⟨a *fluvial* plain⟩ ⟨*fluvialite* communities generally have a smaller standing crop of phytoplankters—*Park*⟩ When denoting a specific relationship to a particular stream or a relation to streams as such as distinct from their action or effects *fluvial* is the term of choice ⟨international *fluvial* law⟩ ⟨coastal and *fluvial* shipping—*Welles*⟩ ⟨sketched a geographical interpretation of the history of civilization through three stages: the *fluvial*, the *thalassic*, and the *oceanic*—*Sat. Review* (London)⟩ In reference to salt water **marine** (see also **MARINE**) is the comprehensive term, applicable not only to things that pertain to the open ocean but to those that pertain to contiguous salt or brackish waters (as bays, harbors, salt marshes, or salt ponds) ⟨*marine* shells⟩ ⟨*marine* vegetation⟩ ⟨*marine* deposits⟩ When specific reference to the open ocean or to mid ocean is intended, **oceanic** is the preferred word ⟨*oceanic* fauna⟩ ⟨*oceanic* currents⟩ ⟨*oceanic* storms⟩ When reference is to seas or gulfs, as distinguished from the ocean, **thalassic** is often the term preferred especially by historians ⟨*thalassic* empire⟩ These terms, however, are neither so definitely restricted nor so precise as the succeeding terms, which usually name definite zones of the ocean. **Neritic** refers only to the belt of shallow water surrounding a landmass. **Pelagic**, which in general use implies definitely the open sea or the high seas ⟨*pelagic* sealing⟩, in its stricter technical application has reference in its extent only to the realm of the open ocean and in its depth only to so much of the water covering that expanse as is penetrable by light. Below the pelagic zone in the deeper parts of the ocean lies the **abyssal** zone, where no plant life exists and animals are carnivorous and are usually blind or luminescent.

aqueduct *channel, canal, conduit, duct

Arab Arabic, *Arabian

Arabian *adj* **Arabian**, **Arab**, **Arabic** are not freely applicable to the same things and are, consequently, often a source of confusion. **Arabian** is used chiefly with reference to a place, the large peninsula in southwestern Asia which includes the modern kingdom of Saudi Arabia. Thus, one speaks of the *Arabian* peninsula, desert, kingdoms, flora, fauna, history, intending in each case to convey a consciousness of geographic relationship. **Arab** is used chiefly with reference to a people who still dwell in Arabia or their descendants who are common in northern, eastern, and central Africa, in Madagascar, India, and the Malay Archipelago, and in some parts of Syria and Persia. The word, therefore, often implies characteristics or habits associated with Arabs (as a nomadic life, equestrian skill, or Muslim practices) ⟨*Arab* customs⟩ ⟨*Arab* descent⟩ ⟨*Arab* harems⟩ Distinctively, an *Arabian* horse is a particular horse bred in or imported from Arabia whereas the *Arab* horse is the kind of horse bred and used by Arabs; an *Arabian* caravan travels in Arabia, an *Arab* caravan is made up of Arabs. **Arabic** refers usually to a language, originally the language of the Arabs, but now used in several countries whose inhabitants are not exclusively Arab in origin (as Palestine, Syria, Iraq, Egypt, and northern Africa) ⟨the *Arabic* language⟩ *Arabic* is also applicable to a culture associated with the use of the Arabic language or to any manifestations of that culture ⟨*Arabic* architecture⟩ ⟨*Arabic* numerals⟩ Distinctively, *Arab* literature is the literature of Arabs whereas *Arabian* literature is produced specifically in Arabia and *Arabic* literature is written in Arabic.

Arabic Arab, *Arabian

arbitrator *judge, arbitrator, umpire, referee

arbitrary autocratic, *absolute, despotic, tyrannical, tyrannous

Ana *dictatorial, authoritarian, magisterial, oracular: domineering, *masterful, imperious, peremptory, imperative

Ant legitimate —**Con** *lawful, legal, licit

arbitrate adjudicate, adjudge, *judge

Ana mediate, intervene (see **INTERPOSE**): *decide, determine, settle: conciliate, placate, appease (see **PACIFY**)

arbitrator *judge, referee, arbiter, umpire

arc *curve, arch, bow

arcade 1 arcature, *colonnade, portico, peristyle

2 gallery, cloister, ambulatory, *passage, passageway

arcane *mysterious, inscrutable

Ana occult, esoteric, *recondite: cabalistic, anagogic, mystic, *mystical

arcature arcade, *colonnade

arch *n* *curve, bow, arc

arch *adj* *saucy, pert

Ana roguish, waggish, impish, mischievous, *playful: mocking, deriding or derisive, twitting (see corresponding verbs at **RIDICULE**)

archaeology *anthropology, ethnology

archaic obsolete, antiquated, antique, *old, ancient, antediluvian, venerable

Ant up-to-date —**Con** fresh, novel, *new, newfangled, new-fashioned, modern, modernistic: fashionable, modish (see **STYLISH**)

architect *artist, artificer, artisan

architectonic *adj* architectural (see under **ARCHITECTURE**)

architectonics *n* *architecture

architectural architectonic (see under **ARCHITECTURE**)

architecture, **architectonics** and their corresponding adjectives **architectural** and **architectonic** are often indistinguishable, but they tend to diverge in emphasis. The nouns mean the science of planning and building structures (as churches, houses, bridges, and ships) that involve problems of artistic design, engineering, and adaptation to the ends in view. In general use **architecture** and hence **architectural** often suggest that artistry or beauty in design is the end and goal of the architect; in technical use they stress design as the result of attention to practical as well as artistic ends and imply that the profession is both a science and an art. **Architectonics** and its corresponding adjective **architectonic** place the emphasis on constructive skill; they suggest attention to the framework, skeleton, or supporting structure, sometimes without reference to the details necessary for the completion or elaboration of the structure; when one speaks of Chartres Cathedral as a triumph of *architecture*, he calls attention to its beauty of design and ornamentation; but when one speaks of it as a triumph of *architectonics*, he calls attention to it as a great work of engineering where the supporting parts of pillars, props, and ribs are united so as to form a stone skeleton capable of carrying the enormous weight of stone roof and high towers yet permitting many windows in its enclosing walls. *Architectonics* and its adjective are far more common in extended use than *architecture* and *architectural*, for the latter seldom escape their suggestions of building with stone, wood, or steel. *Architectonics* and more especially *architectonic*, on the other hand, often are referable to a system of ideas or philosophy or to a work of art and especially to an epic or a poetic drama where there is not only perfect articulation of parts but their combination into an integral or organic whole ⟨creative energy . . . is . . . *architectonic*, and it imposes upon the lyric impulse an ordered sequence and an organic unity—

Lowes) <Dante's . . . *architectonic*[s] of the relationships of authority and obedience—*Knox*>

archive 1 in plural form **archives** library, *museum, treasury, gallery

2 *document, record, monument

arctic frigid, freezing, frosty, icy, gelid, glacial, *cold, chilly, cool

Ant torrid

ardent passionate, fervid, perfervid, fervent, *impassioned

Ana *intense, fierce; enthusiastic, zealous (see corresponding nouns at **PASSION**): *eager, avid, keen: glowing, flaming (see **BLAZE** *vb*)

Ant cool —*Con* *cold, frigid; composed, imperturbable, nonchalant (see **COOL**): dispassionate, impartial (see **FAIR**): apathetic, *impassive, phlegmatic

ardor fervor, enthusiasm, zeal, *passion

Ana excitement, stimulation, quickening, galvanizing (see corresponding verbs at **PROVOKE**): eagerness, avidity (see corresponding adjectives at **EAGER**): zest, gusto (see **TASTE**)

Ant coolness; indifference —*Con* unconcernedness or unconcern, aloofness, detachment, uninterestedness, disinterestedness (see corresponding adjectives at **INDIFFERENT**): listlessness, languidness or languor, lackadaisicality (see corresponding adjectives at **LANGUID**)

arduous *hard, difficult

Ana laborious, toilsome (see corresponding nouns at **WORK**): exhausting, wearying or wearisome, tiring, fatiguing (see corresponding verbs at **TIRE**): *onerous, exacting, oppressive

Ant light, facile —*Con* *easy, simple, effortless, smooth

area 1 **Area**, **tract**, **region**, **zone**, **belt** mean an extent of space especially of ground or surface that is distinguishable from its surroundings in appearance or in certain distinctive features. **Area** still carries its original implication of clearly marked bounds, but it may be used with reference to a space defined on a map or chart as well as to one the limits of which are actually visible (an oasis is a green or fertile *area* in a desert) (there are vast uncultivated *areas* even in the most populous of the states) (two colors—*aspen* and *evergreen*, not intermingled but lying in solid *areas* of light and dark—*Cather*) **Tract**, on the other hand, stresses extent rather than limits; it is therefore preferred to *area* in designating a space that might otherwise be described as an expanse or is thought of as widespread or far stretching and uniform in character (beyond the *area* of small farms lay larger *tracts* that were immensely productive—*Anderson*) (a *tract* of grass, furze and rushes, stretching away to the western horizon—*Shaw*) **Tract** is often used in an extended sense in reference to anything that has extent or duration (wide *tracts* of life—*Day Lewis*) (a large *tract* of unwritten history—*T. S. Eliot*) **Region** suggests reference to some definite place or locality (as on the earth's surface, in the atmosphere, or in the human body) distinguished from other localities by certain features or by being subject to a particular condition or influence (the upper *region* of the air) (the Finger Lakes *region* of central New York State) (what *region* of the brain is the seat of consciousness?) **Zone** denotes an area or region that suggests a girdle or an encircling band especially on a map or chart (the torrid, arctic, and temperate *zones*) (parcel post *zones*) (the pelagic *zone* of the ocean) In broader use it is often applied to an area that forms a band or strip and is distinctly set off from its environs by some peculiarity of feature (the firing *zone* of a battlefield) (the business *zones* of a city) (that milky way which nightly as a circling *zone* thou seemst powdered with stars—*Milton*) Basically **belt** is a synonym of *zone*; distinctively, it implies an area

characterized by the presence of some distinguishing natural feature (as a particular flora or mineral) (the corn *belt* of the U.S.) (a coal *belt*) In strict technical usage *belt* is applied to an area less extensive than a *zone* (a *belt* of conifers extending into the northern mixed forest zone)

Ana *locality, district: *expanse, stretch

2 extent, *size, dimensions, magnitude, volume

argot cant, jargon, slang, *dialect, lingo, vernacular, patois

argue 1 debate, dispute, agitate, *discuss

Ana *prove, demonstrate: *disprove, refute, rebut, controvert: expostulate, protest, *object, remonstrate

2 bespeak, prove, attest, betoken, *indicate

Ana *show, manifest, evidence, demonstrate, evince:

imply, *suggest, intimate

argument 1 proof, *reason, ground

Ana proving, demonstrating or demonstration (see corresponding verbs at **PROVE**): disproving or disproof, refuting or refutation, rebutting or rebuttal (see corresponding verbs at **DISPROVE**)

2 **Argument**, **dispute**, **controversy** mean a vigorous and often heated discussion of a moot question. **Argument** usually stresses the appeal to the mind and the use of evidence and reasoning to support one's claims; it implies the hope of each side to prove its case and to convince its opponents (if Winthrop had not by force of *argument* . . . obtained the lifting of duties from goods sent to England . . . the Boston colony would have been bankrupt—*Repplier*) In informal use it may be indistinguishable from *dispute* (obeying orders without *argument*) **Dispute** fundamentally implies the contradiction of something maintained by another and therefore a challenge to argument (the decrees of a dictator are not subject to *dispute*) When applied to a verbal contention, *dispute* suggests not only a challenger and one challenged but an effort on the part of each to get the upper hand. Hence it often implies more or less anger or disturbance of the peace (a *dispute* begun in jest . . . is continued by the desire of conquest, till vanity kindles into rage, and opposition rankles into enmity—*Johnson*) (<"You dislike an argument, and want to silence this." "Perhaps I do. Arguments are too much like *disputes*."—*Austen*) **Controversy** emphasizes a profound difference of opinion not so often between persons as between parties; the term is applied chiefly to debates over issues of importance or of widespread interest involving two or more religions, governments, schools of thought, or political parties and carried on mainly by writings addressed to the public or by speeches on public platforms (the Shakespeare-Bacon *controversy*) (when a thing ceases to be a subject of *controversy*, it ceases to be a subject of interest—*Hazlitt*)

Ana *argumentation, disputation, debate: controverting, refuting, rebutting (see **DISPROVE**): contention, dissension (see **DISCORD**)

3 theme, *subject, matter, subject matter, topic, text, motive, motif, leitmotiv

argumentation, **disputation**, **debate**, **forensic**, **dialectic** mean the act or art of argument or an exercise of one's powers of argument. In contrast with *argument*, *dispute*, *controversy* (see **ARGUMENT** 2) they stress formality and a more or less didactic intention. **Argumentation** is the designation given to a form of discourse the aim of which is to prove or disprove propositions or to an oral or written exercise having such proof or disproof for its end (a course in exposition and *argumentation*) (the next theme will be an *argumentation*) **Disputation** and **debate** both imply the handling of a proposition with the intent to sustain one's position not only by advancing arguments in its support but by attacking the position of

one's opponent and by defending one's own from his attacks. *Disputation*, however, is more often applied to a formal exercise common in medieval universities and still found in some modern universities in which a thesis is tested by the ability of its proponent or defender to sustain it in the face of severe critical attack; *debate*, to a two-sided contest between persons or teams which is governed by strict rules of procedure and in which the victory goes to the person or team regarded by the appointed judges as manifesting the greater ability. *Forensic* in its academic use is applied to an argumentative exercise intended to convince its readers or hearers; the word suggests emphasis on the qualities of successful legal argument such as the ability to marshal evidence, to make telling points, to persuade as well as to convince. *Dialectic* is a term more common among philosophers than in general or academic use. It is usually applied to a method of reasoning especially by weighing and resolving contradictory or juxtaposed arguments, the aim of which is to reach the truth by the correct application of the rules of logic, but is sometimes applied to argument or argumentation that merely observes what its writer believes to be the laws of reasoning (Newman's masterly English, and his competent, if not supreme, *dialectic*—*Saintsbury*)

Ana *argument, dispute, controversy

arid *dry

Ana barren, infertile, *sterile, unfruitful: *bare, bald, barren: desiccated, dehydrated, parched (see *DRY*)

Ant moist: verdant —*Con* *wet, damp, dank, humid: *living, alive, vital: lush, luxuriant (see *PROFUSE*): *fertile, fruitful, fecund

Ant recline: slump

2 rise, *spring, originate, derive, flow, issue, emanate, proceed, stem

Ana emerge, *appear, loom: *begin, commence, start: ensue, succeed, *follow

aristocracy 1 plutocracy, *oligarchy

2 **Aristocracy**, *nobility*, *gentry*, *county*, *elite*, *society* denote a body of persons who constitute a socially superior caste. **Aristocracy** often refers to an ideally superior caste and therefore does not invariably apply to a fixed or definite group of persons (there is a natural *aristocracy* among men. The grounds of this are virtue and talents—*Jefferson*) Usually the term connotes superiority in birth, breeding, and social station and is applicable to all those persons generally recognized as first in family and in personal importance (he comes of the Brahmin caste of New England. This is the harmless, inoffensive, untitled *aristocracy*—*Holmes*) However, in countries where there is a privileged and titled class, the *nobility*, *aristocracy* is often used to designate the same group with this difference in implication: that *nobility* stresses rank inferior to that of royalty but superior to that of all other classes, and *aristocracy* stresses the possession of power over the people through ownership of land and through long-established and generally acknowledged superiority (the word *cousin* in the mouth or from the pen of a royalty signified a recognition of rank superior to *nobility*—*Belloc*) (the distinguishing characteristic of an *aristocracy* is the enjoyment of privileges which are not communicable to other citizens simply by anything they can themselves do to obtain them—*Hallam*) However, *nobility* in British use does not include titled commoners (as baronets and knights). These latter are thought of as members of the *aristocracy*. **Gentry** and

county are distinctively British terms applied to a class, essentially a leisured class, who by birth and breeding can be described as gentlemen (in the technical sense) and ladies but who are without hereditary title and are classed as commoners. In British use *gentry* refers to a class in rank just below the nobility but often having in its membership persons of equally high birth or breeding. *County*, however, carries a suggestion of an association of the family with the county or section and usually of ownership of an estate in the country (the *gentry* and the *nobility* were on friendliest terms) (the newcomers were slow in being accepted by the *county*) (the advantage claimed for this plan is that it provides us with a *gentry*: that is, with a class of rich people able to cultivate themselves by an expensive education—*Shaw*) **Elite** is referable not to a social rank but to those members of any group or class who stand out as its flower or the ones most frequently sought after (the *elite* of the nobility) (few others of the mathematical *elite*—*Darrow*) When used without qualification *elite* usually means the group regarded as the highest, especially as judged by social or cultural standards (it is the business of the college to produce an *elite*—superior men—*North American Review*) **Society** is applied to that portion of a community which marks itself apart as a leisured class much given to formal entertainments, fashionable sports, and other pursuits characteristic of an active social life (society is now one polished horde, formed of two mighty tribes, the Bores and Bored—*Byron*) (there are only about four hundred people in New York *Society*—*McAllister*)

Ant people, proletariat

aristocrat patrician, *gentleman

Ant commoner

arm *vb* accouter, outfit, equip, *furnish, appoint

Ant disarm

armament, *matériel*, *munitions*, *arms*, *ordnance*, *artillery*, *ammunition* as used in modern warfare are not all synonyms of one another, but they are frequently confused. In general they mean material used in military, naval, and air operations. **Armament** is by far the most inclusive term, for it comprehends everything that must be considered in determining a nation's military strength, such as trained soldiers, sailors, and fliers, land fortifications, battleships and all other war vessels (as transports, submarines, destroyers), aircraft, guns, provisions, equipment, available manpower and resources. **Matériel** is less inclusive; it comprehends materials only and includes all the requirements of a military establishment other than personnel. **Munitions** is often coextensive with *matériel* but typically stresses supplies of war including military equipment of all kinds, especially all weapons of attack and defense and the missiles, projectiles, and propellants necessary for their use. **Arms** is less definite in its application than either of the preceding words, but in general, when used as an inclusive term, it covers whatever weapons soldiers or sailors need in actual fighting (as cannon, guns, rifles, pistols, swords, and bayonets). **Ordnance** is used in two senses, the more general of which is probably the less common. In that sense the term includes not only everything which is covered by *arms*, but every other weapon of attack or defense (as tanks) and everything needed for the equipment and use of these weapons (as mounts, carriages, projectiles, and missiles) or for their manufacture or repair (as tools and machinery). More narrowly and also more commonly, *ordnance* is a comprehensive term for all kinds of heavy firearms, especially those discharged from mounts (as cannon, guns, howitzers, and mortars). **Artillery** is

a close synonym of *ordnance* in this latter sense, but it suggests actual warfare and therefore implies group service in the management of mounted firearms. It sometimes, like the broader sense of *ordnance*, comprehends also the mounts, ammunition, and other items essential to the work of the branch of an army dealing with the operation of heavy guns (called also the *artillery*). **Ammunition**, though once used as a general term nearly equal to *munitions*, is now restricted in its application to the projectiles used in warfare (as bullets, shells, grenades, or bombs) and their necessary propellants, detonators, fuses, and primers.

Ana *fort, fortress, citadel, stronghold: *bulwark, breast-work, rampart, bastion, parapet

armistice *truce, cease-fire, peace

armory, arsenal, magazine have related but usually distinguishable technical military senses. **Armory** once carried the meanings now associated with *arsenal* and *magazine*, but in current use it has commonly two applications: one, a public building in which troops (as of the National Guard) have their headquarters and facilities (as for drill and storage); the other, an establishment under government control for the manufacture of arms (as rifles, pistols, bayonets, and swords). **Arsenal** in its narrow sense is applied to a government establishment for the manufacture, storage, and issue of arms, ammunition, and related equipment: in popular and especially in figurative use the word usually suggests a store of or a storehouse for weapons and ammunition <weapons from the *arsenal* of poetic satire—*Reed*> <make America the *arsenal* of the democracies> **Magazine** is strictly applied to a storehouse for all sorts of military and naval supplies including especially arms and ammunition. In extended use it often more narrowly suggests a storehouse for explosives <a powder *magazine*> <as when high Jove his sharp artillery forms, and opes his cloudy *magazine* of storms—*Pope*> <an educated man stands, as it were, in the midst of a boundless arsenal and *magazine*, filled with all the weapons and engines which man's skill has been able to devise from the earliest time—*Carlyle*> In extended use *magazine* is applied to a supply chamber (as in a gun for cartridges, in a camera for films, or in a typesetting machine for matrices).

arms ordnance, artillery, matériel, munitions, *armament, ammunition

army host, legion, *multitude

Ana throng, press, crush, *crowd, mob, rout, horde

aroma odor, scent, *smell

Ana *fragrance, perfume, redolence, incense, bouquet: savor (see TASTE)

Ant stink, stench —**Con** stinkingness, rankness, malodorousness (see corresponding adjectives at MAL-ODOROUS)

aromatic balmy, redolent, fragrant, *odorously

Ana spicy, *pungent, piquant: savory (see PALATABLE)

Ant acrid (of odors) —**Con** *malodorous, fetid, musty, fusty, noisome, rank, putrid

arouse rouse, awaken, waken, *stir, rally

Ana stimulate, quicken, galvanize, excite, *provoke: electrify, *thrill: kindle, fire (see LIGHT): *move, drive, impel

Ant quiet, calm —**Con** allay, assuage, alleviate, mitigate, *relieve: *pacify, mollify, placate

arraign charge, *accuse, impeach, indict, incriminate

Ana *summon, cite: try, test (see PROVE)

Con *answer, rejoin, reply, respond: acquit, exonerate, *exculpate, absolve, vindicate: defend, justify (see MAINTAIN)

arrange 1 *order, marshal, organize, systematize, meth-

odize

Ana dispose (see corresponding noun DISPOSAL): *line, line up, range, array, align: *assort, classify, pigeonhole, sort

Ant derange, disarrange —**Con** *disorder, disorganize, unsettle, disturb: disperse, *scatter

2 *negotiate, concert

Ana plan, design, scheme, project (see under PLAN *n*)

arrant out-and-out, *outright, unmitigated

array *vb* 1 *line, line up, range, align

Ana marshal, arrange, *order

Ant disarray

2 *clothe, apparel, attire, robe, dress

array *n* *display, parade, pomp

Ana showing or show, exhibiting or exhibition, exposing or exposition (see corresponding verbs at SHOW): arranging or arrangement, marshaling (see corresponding verbs at ORDER): disposition (see DISPOSAL)

arrear *debt, indebtedness, debit, obligation, liability

arrest *vb* 1 **Arrest, check, interrupt** mean to stop in mid-course. **Arrest** implies a holding fixed in the midst of movement, development, or progress and usually a prevention of further advance until someone or something effects a release <*arrest* the progress of a disease> <discouragement sometimes *arrests* a child's development> <books that *arrest* attention> **Check** (see also RESTRAIN) suggests suddenness and force in stopping as though bringing to a halt sharply or with a jerk <the entrance of the teacher *checked* the disturbance in the schoolroom> <he *checked* himself just as he was about to blurt out his indignation> <he caught her by the arm as she ran past and . . . without trying to *check* her, simply darted in with her and up the stairs—*Conrad*> **Interrupt** stresses a breaking in and a consequent stopping, but it carries no clear suggestion that continuation is impossible or improbable <*interrupt* a lecture with a question> <their talk was *interrupted* by the arrival of visitors> <he was discouragingly *interrupted* at the point when ideas and words were flowing freely>

Ana *interpose, intervene, interfere: *delay, detain, retard: *frustrate, thwart, balk

Ant activate: quicken —**Con** *vitalize, energize: *stir, rouse, arouse, awaken: prolong (see EXTEND)

2 **Arrest, apprehend, attach, detain** mean to seize and hold under restraint or in custody by authority of the law. The same likenesses and differences in meaning are manifest in the comparable use of **arrest, apprehension, attachment, detention**. **Arrest** (verb or noun) is the most widely used of these words for the seizing of a person and holding him in custody. It refers both to civil cases where a person is placed under restraint, and to criminal cases, where **apprehend** and **apprehension** are also used; strictly, one *arrests* a person for debt, but one *apprehends* a thief; witnesses are under *arrest*; the *apprehension* of the rioters is demanded. Ordinarily laymen seldom use *arrest* except in the sense of *apprehend*, for it carries connotations which make its use avoided in reference to witnesses or even suspects. The words commonly used when property is seized and held (as for payment of a debt) are **attach** and **attachment** <*attach* the accounts of a firm suspected of falsification of income tax reports> *Attach* and *attachment* are used in reference to persons chiefly when the intent is to make them appear in court (as to answer for contempt or to serve as a witness). **Detain** and **detention** usually imply holding in custody (as for inquiry or inspection). They are not strictly legal terms but are often used when there is the desire to avoid the stigma associated with the word *arrest* <the health officers *detained* the ship> <*detain* a suspect> <*detain* a witness>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Ana seize, *take: *catch, capture: *imprison, incarcerate, jail

Con discharge, release, liberate, *free

arrest *n* apprehension, detention, attachment (see under ARREST *vb*)

Ana seizing or seizure, taking (see corresponding verbs at TAKE): capturing or capture, catching (see corresponding verbs at CATCH)

Con liberation, discharging or discharge, releasing or release (see corresponding verbs at FREE)

arresting striking, remarkable, *noticeable, outstanding, salient, signal, prominent, conspicuous

Ana impressive, *moving, touching, affecting, poignant: fascinating, attractive, enchanting (see under ATTRACT)

Con *common, ordinary, familiar: hackneyed, stereotyped, *trite

arrival, advent denote in common the reaching of a destination. **Arrival** implies precedent travel or movement (the *arrival* and departure of trains) (the morning of my *arrival*) **Advent** is sometimes applied to an important or even momentous arrival (look forward to the *advent* of the Messiah) Except when it connotes birth, it usually stresses appearance on the scene more than the coming or reaching of the end of a journey (life . . . with the *advent* of an attractive young woman took on acknowledged connotations of interest—*Mary Austin*)

Ana coming (see COME): appearing or appearance, emerging or emergence (see corresponding verbs at APPEAR)

Ant departure —*Con* going, leaving, withdrawing or withdrawal (see corresponding verbs at GO)

arrive *come

Ant depart —*Con* *go, leave, withdraw, retire

arrogant *proud, haughty, lordly, insolent, overbearing, supercilious, disdainful

Ana imperious, domineering, *masterful, peremptory, imperative: pretentious, ostentatious (see SHOWY)

Ant meek: unassuming —*Con* *humble, modest, lowly: yielding, submitting or submissive, deferring or deferential (see corresponding verbs at YIELD)

arrogate *vb* **Arrogate, usurp, preempt, appropriate, confiscate** mean to seize or assume something by more or less high-handed methods. **Arrogate** (commonly followed by *to* and a reflexive pronoun) implies an unwarranted and usually an insolent or presumptuous claim to something assumed, frequently to the exclusion of others (by *arrogating* to himself too much, he was in danger of losing that degree of estimation to which he was entitled—*Johnson*) (he *arrogated* to himself the right of deciding dogmatically what was orthodox doctrine—*Macaulay*) (the exploitation of the tourists was a monopoly which the most active of the children had *arrogated* by force and cunning to themselves—*Huxley*) **Usurp** stresses unlawful or wrongful intrusion of oneself into the place held by another (as through law, custom, or natural right) and the seizure for oneself of the territory, power, authority, prerogatives, or rights pertaining to such place (usurp a throne) (the dictator *usurped* the powers not only of the king but of the parliament) (literature, or culture, tended with Arnold to *usurp* the place of religion—*T. S. Eliot*) **Preempt** implies beforehandness in taking something desired by others and keeping it in one's own possession. Historically it implies the right to purchase or acquire (as land or property) before others and often on more favorable terms: this implication is now sometimes found in discriminating figurative use (prose has *preempted* a lion's share of the territory once held, either in sovereignty or on equal terms, by poetry—*Loves*) In current use it more often suggests arrogation or usurpation than lawful methods

such as purchase (when the townspeople arrived they found that the visitors had *preempted* all the parking places) (the best of the slogans suggested had already been *preempted* by a rival manufacturer) (in the game of bridge, to *preempt* is to make a bid aimed at shutting out shifts by the partner or bids by the opponents) **Appropriate** more often suggests conversion to one's own use than a setting apart for a particular or peculiar use. However, the latter implication is often retained (congress *appropriated* three billion dollars for flood control) It usually suggests an acquiring for oneself or an annexing sometimes by lawful but often by unscrupulous or even by unlawful means (growing plants *appropriate* whatever elements they need from the soil and the air) (a plagiarist *appropriates* the ideas of others) (if we could by any means *appropriate* to our use some of the extraordinary digestive power that a boa constrictor has—*Meredith*) **Confiscate** implies seizure (as of others' property or goods) through an exercise of authority; it does not, like *appropriate*, suggest conversion to the use of the one exercising authority; thus, one might note that the sheriff *appropriated* the liquor *confiscated* when the still was raided, if he took for his own use without authority what had been taken from another in a proper exercise of authority (the teacher *confiscated* all packages of chewing gum) (if miners, or any other sort of workers, find that the local authorities will *confiscate* the incomes of the ratepayers to feed them when they are idle, their incentive to pay their way by their labor will be . . . perceptibly slackened—*Shaw*)

Ana seize, *take, grab

Ant renounce: yield —*Con* *relinquish, surrender, cede, resign

arsenal *armory, magazine

art *n* **1 Art, skill, cunning, artifice, craft** can mean the faculty of performing or executing expertly what is planned or devised. **Art** is not actually a comprehensive term but is so variable in its implications that it is interchangeable with any one of the others and capable of carrying its specific implications; hence the last four words are synonyms of *art*, but they are not always closely synonymous with each other and may even at times be used in distinction from each other. The earliest and still common implications of *art* are those which are now associated specifically with **skill**: technical knowledge, and proficiency or expertness in its exercise or practical application (true ease in writing comes from *art*, not chance, as those move easiest who have learned to dance—*Pope*) (t'is hard to say, if greater want of *skill* appear in writing or in judging ill—*Pope*) Both words are also used concretely with these implications (there's a great *art* in doing these things properly. I have often had to carry off a man of fourteen stone, resting him all the time as if he was in bed—*Shaw*) (able boys and girls will . . . submit willingly to severe discipline in order to acquire some coveted . . . *skill*—*Russell*) **Art** also at times comes close to **cunning** where it adds to *skill* such implications as great or recondite knowledge, inventive or creative power, and capacity for perfection in execution. This sense prevails especially in the phrase "a work of *art*." Sometimes either word may be substituted for the other without change of meaning (high-ribbed vault . . . with perfect *cunning* framed—*Wordsworth*) (praised be the *art* whose subtle power could stay yon cloud, and fix it in that glorious shape—*Wordsworth*) **Art** may be used interchangeably also with **artifice** (see also TRICK) when the later stresses skill and intelligence in contriving, devising, or constructing, and suggests lack of creative power. In this sense both *art* and *artifice* in their emphasis

on contrived skill imply a contrast with power derived from nature or inspiration <gaining his ends by one *art* or another> <when you come to dissect the *Odyssey*, what amazing *artifice* is found under that apparently straightforward tale—*Quiller-Couch*> *Art* and *craft* (see also TRADE) were once close synonyms but now tend to become contrasted terms. Both words still imply ingenuity and subtlety in workmanship <a gem carved with classic *art*> <a bracelet wrought with all the *craft* of a Cellini> <naturalism in prosody . . . is after all only defensible as one element in the *craft*, the artifice of poetry—*Carruth*> Both may suggest, but *art* less often suggests, trickery or guile in the attainment of one's ends <Henry, out of a lifetime of political *craft*, coached Cramer how to turn the tables on his accusers—*Hackett*> Both words are also affected by their use as designations of pursuits, *craft* tending to be applied to a lower kind of skill or inventive power revealing itself in the mastery of materials or technique and in effects that can be analyzed and imitated, and *art* to a higher creative power capable of expressing a personal vision and of achieving results which defy analysis and imitation; thus, an artist may demonstrate his *craft* in painting sunlight but he manifests his *art* in painting a composition that conveys his intent to the spectator <like many of the hard-boiled writers, he will allow himself *craft*, but not art—*Portz*>

2 craft, handicraft, profession, *trade

3 **Art, science** designate a branch of learning. **Art** as it is found in the phrases the liberal *arts*, bachelor of *arts*, master of *arts* refers to one of the fundamental branches of learning regarded as necessary to every educated person and serving as an instrument for his advancement in knowledge not only generally but specifically in his professional studies. In the Middle Ages the liberal arts were grammar, logic, rhetoric, arithmetic, geometry, music, and astronomy; with these as a foundation, a student was ready to proceed with his studies in philosophy, theology, law, or medicine. In modern times the liberal arts, as interpreted by various colleges giving arts degrees, may be the disciplinary or instrumental branches of learning as distinguished from those that are technical or professional in their character or may comprise the cultural as distinguished from the vocational studies. **Science** was also used in the late Middle Ages and the Renaissance of a branch of learning. It was not identical with *art*, however, because it was not restricted to studies giving the rudiments or providing the apparatus for further study but was applied to any branch of learning that was a recognized subject of study <I do present you with a man of mine, cunning in music and the mathematics, to instruct her fully in those *sciences*—*Shak.*> <a gentleman of Tyre; my name, Pericles; my education been in *arts* and arms—*Shak.*> Since the nineteenth century, especially in reference to departments of knowledge or courses given in schools, colleges, and universities, these words show a wider divergence in implications and applications and a tendency (especially in the plural forms) to be used as generic terms. On the one hand, *art* is applied to those courses which have for their end teaching students to make or do something that requires skill and a knowledge of technique and also, usually, special gifts such as inventiveness, taste, or ingenuity <the manual *arts*> <the fine *art* of painting> <instruction in the *arts* of design> On the other hand, *science* is applied only to such courses or studies as deal with the gathering and classification of facts, the drawing of correct inferences from them, and the establishment of verifiable general laws <the *sciences* of physics, botany, and economics> <major in *science*> <teachers of *science*> Still other distinctions are drawn

between the two, when *art* or *science* refers not so much to a branch of learning as to a pursuit for which one is prepared by the study of an art or science; thus, questions arise as to whether architecture is an *art* or a *science*, that is (1) whether its essential demands of the architect are inventiveness, taste, and technical skill, or a knowledge of the principles of physics, engineering, and related sciences; (2) whether the end to be served is to give aesthetic pleasure or to produce something useful <rhetoric was for Rome both an *art* and a *science*. . . . It had obvious utilitarian value, and its materials were not only exact logical concepts, but the sonorous words and the noble rhythms which were the glory of their tongue—*Buchan*> **artery** route, course, *way, passage, pass

artful wily, guileful, crafty, cunning, tricky, *sly, foxy, insidious

Ana adroit, *dexterous: politic, diplomatic, smooth, *suave

Art artless —**Con** simple, *natural, ingenuous, unsophisticated, naive: candid, open, *frank

article *n* 1 clause, plank, count, *paragraph, verse

2 *thing, object

Ana *item, detail, particular

3 *essay, paper, theme, composition

articled indentured, *bound, bond

articulate *adj* 1 *vocal, oral

Ana distinct, clear (see EVIDENT): uttered, voiced (see EXPRESS *vb*)

Art inarticulate, dumb

2 *vocal, fluent, eloquent, voluble, glib

Ana expressing, voicing, uttering, venting (see EXPRESS *vb*): *expressive, meaningful, significant: voluble, glib, *talkative

Art inarticulate, dumb

articulate *vb* 1 *integrate, concatenate

Ana unite, *join, connect, link, relate: organize, systematize, methodize, *order

Con dissect, resolve, *analyze: *separate, part, divide

2 **Articulate, pronounce, enunciate** are comparable when they mean to form speech sounds. To **articulate** is to break up, by manipulation of the vocal organs, an expiration of breath into distinct parts (as phones or words) such that a sequence of these constitutes intelligible speech <his agitation was so great that he could not *articulate*—*Macaulay*> In a precise phonetics use to *articulate* is to close or narrow the vocal organs in such a manner as to produce a sound, especially a consonant, of a language, more specifically by the adjustment of the tongue with relation to the palate, at the place where the tongue has, for that sound, its maximum elevation <many foreigners . . . use a *t* articulated by the tip of the tongue against the upper teeth . . . This articulation produces a very unnatural effect when used in English—*Daniel Jones*> In slightly extended usage *articulate* may also mean to make the manipulations or articulations for the sounds as a whole in one's speech with such care or carelessness that one's speech is distinctly or indistinctly heard. To **pronounce** is to employ articulations, accentuation, and intonation with an acceptability whose yardstick is the usage of others <*colonel* is pronounced the same as *kernel*> <*s* in *his* is pronounced *z*> <*c* at first had the value of hard *g*. During the classical Latin period it was pronounced *k*—*Goudy*> To **enunciate** is to articulate with an effectiveness whose yardstick is a listener's ease of understanding <*enunciating* their words with peculiar and offensive clarity—*Household*>

articulated integrated, concatenated (see under INTEGRATE)

Ana united, joined, connected, linked, related (see JOIN):

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

organized, systematized, methodized, ordered (see ORDER *vb*)

Con dissected, resolved, analyzed (see ANALYZE); separate, *distinct, discrete

articulation 1 integration, concatenation (see under INTEGRATE *vb*)

Ana organization, systematizing, methodizing (see corresponding verbs at ORDER): *system, organism, economy, scheme, complex

2 *joint, suture

artifact product, *work, production, opus

artifice 1 *art, cunning, craft, skill

Ana ingeniousness or ingenuity, cleverness, adroitness (see corresponding adjectives at CLEVER): adeptness, proficiency, expertness (see corresponding adjectives at PROFICIENT)

2 *trick, ruse, wile, stratagem, maneuver, gambit, ploy, feint

Ana *deception, chicanery, chicane, trickery: *deceit, guile, duplicity, dissimulation

Con *mean, instrument, instrumentality, vehicle, channel: *device, contrivance: expedient, shift, makeshift (see RESOURCE)

artificer artisan, *artist, architect

Ana craftsman, handicraftsman, mechanic, workman (see WORKER)

artificial, **factitious**, **synthetic**, **ersatz** mean not brought into being by nature but by human art or effort or by some process of manufacture. They are not often interchangeable because of differences in some of their implications and in their range of application. **Artificial** is far more extensive in scope than the others. It may be applied to anything that is not produced by natural conditions but is in some sense a human creation <most of the inequalities in the existing world are *artificial*—Russell> <the family is a natural society, the state is an *artificial* society> In law a corporation or an institution that may be the subject of rights or duties is called an *artificial* person in distinction from a human being, who is a natural person. *Artificial* is also applicable to something produced by human effort that has its counterpart in nature <civilization may be said to have begun when the *artificial* heat and light of burning fuel were first used to supplement the natural heat and light of the sun> *Artificial* is applied also to things which imitate and sometimes serve the same purposes as something found in nature but which are of quite different origin and constitution and usually of inferior worth <*artificial* flowers of wax> <*artificial* jewels made from colored glass> *Artificial* is also applicable to persons or to their acts, utterances, and behavior; it then implies lack of naturalness or spontaneity and often connotes affectation, conventionality, or formalism <set him to write poetry, he is limited, *artificial*, and impotent; set him to write prose, he is free, natural, and effective—Arnold> <the strained *artificial* romanticism of Kotzebue's lugubrious dramas—Krutch> **Factitious** is applied largely to such intangible things as emotions, states of mind, situations, relations, reasons, which are not naturally caused or are not the product of real circumstances but are invented or worked up for one's own ends or purposes <create a *factitious* demand for shares of a stock> <the vogue was short-lived because *factitious*> <his trick of doing nothing with an air, his salon manners and society smile, were but skin-deep, *factitious*—Watson> <they stood for Parliament and played the game of politics upon *factitious* issues—H. G. Wells> **Synthetic** is applicable to an end product so far removed from its ultimate natural source that it has become a wholly different thing <*synthetic* perfumes originally dug from the ground as coal>

It is preferred to *artificial* when the noun modified denotes a class to which the thing in question actually belongs and it is free from the implication of inferiority that commonly clings to *artificial*; thus, *artificial* silk is not silk since it is woven from *synthetic* fibers which are fibers man-made from substances that are not themselves fibrous. To some degree differences in usage are purely idiomatic; thus, one ordinarily refers to *synthetic* rubber but *artificial* food coloring, *synthetic* fabrics but *artificial* flavoring. **Ersatz** is frequently used as a synonym of *artificial* or *synthetic* always, however, with the implication of use as a substitute; it is used chiefly with the name of a natural product <*ersatz* coffee> <*ersatz* butter> <*ersatz* wool> thereby implying imitation and inferiority and, often, suggesting a cheap or disagreeable origin <the search for *ersatz* . . . materials was unceasing. Sugar from sawdust; flour from potato meal; gasoline from wood and coal—Gunter> *Ana* fabricated, manufactured, fashioned (see MAKE *vb*): simulated, feigned, counterfeited or counterfeit (see corresponding verbs at ASSUME)

Ant natural —*Con* genuine, veritable, bona fide, *authentic: *real, true, actual

artillery ordnance, *armament, matériel, munitions, arms, ammunition

artisan 1 artificer, *artist, architect

2 mechanic, workman, workingman, *worker, operative, craftsman, handicraftsman, hand, laborer, roustabout

artist 1 **Artist**, **artificer**, **artisan**, **architect** mean one who makes something beautiful or useful or both. In their wider senses the words are often confused. The earliest and the continuing implication of **artist** is skill or proficiency (see *artist* under EXPERT); it was formerly applied to anyone who made or did things requiring learning and skill; thus, a teacher, a philosopher, a physician, a scientist, an alchemist, or a craftsman was called an *artist* <the wise and fool, the *artist* and unread—Shak.> <I will give you more directions concerning fishing; for I would fain make you an *artist*—Walton> Gradually, however, the word has come to be associated with those whose aim is to produce something which gives aesthetic pleasure, first with musicians, dancers, actors, and later with poets, painters, and sculptors. The two ideas of skill and the aim to give pleasure were combined, so that since the early nineteenth century *artist* (when it does not mean specifically a painter) is usually applied to a gifted person who works in the fine arts and especially to one who reveals his skill, taste, and power to create beautiful things <of the faults of Scott as an *artist* it is not very necessary to speak—Chesterton> <the counsels of Marcus Aurelius . . . are more fit for a moralist than for an *artist*—Conrad> **Artificer** still retains its earliest meaning of one who makes something by means of art and skill. Originally it was applied especially to mechanics. In current use it suggests craftsmanship and is applied especially to those who work in some plastic material which responds to the exercise of skill, taste, and ingenuity in contrivance <a fine cook and *artificer* of strange English dishes—Bennett> <the teacher has been only one of the *artificers* in the making of this changing personality—H. Suzzallo> **Artisan** was formerly and is still sometimes applied to the practitioner of any art and especially an industrial art chiefly in distinction from an *artist* <the Germans . . . are better *artisans* than artists; better at handicrafts than at head craft—Cotgrave> This difference between *artisan* and *artist* widened as *artist* came to imply the power to create or produce beautiful things and became restricted in its application to a worker in the fine arts. In current use *artisan* is a general term almost equal to *workman* and names one engaged in a craft, a handicraft, or a trade; it comprehends in its range

all the skills often subsumed as skilled labor. In extended use it is still often contrasted with *artist*, the latter now implying imaginative power and a passion for perfection, the former mere mechanical industry <free verse is not yet out of the experimental stage, and the artists who practice it have still the *artisans* in their own craft to reckon with—*Loves*> **Architect** has never lost its basic implication of a master builder, though it has come to stress more the designing of something to be built than actual participation in its erection. Specifically it designates a person whose profession it is to plan buildings or structures in detail and to exercise supervision over their construction in order to see that the design is executed in every particular. In extended use the word usually implies the power to conceive a thing as a whole and in detail in advance of its coming into being as well as to control its execution. It is often applied specifically to God as the Creator. Although it comes close to *artist* in its implications of imaginative power and constructive ability, it differs from the former in its greater emphasis upon design than upon execution <the poet is an artificer by profession, an *architect* experimenting with a variety of materials, concerned with . . . new designs—*Day Lewis*>

Ana craftsman, workman (see **WORKER**): creator, *maker: *writer, composer, author

2 artiste, virtuoso, *expert, adept, wizard

artiste artist, virtuoso, adept, *expert, wizard

artistic, aesthetic are often understood as equivalent terms, especially when used in such collocations as the *artistic* or *aesthetic* temperament; *artistic* or *aesthetic* satisfaction; *artistic* or *aesthetic* standards or values; for *artistic* or *aesthetic* reasons. But *artistic* may stress the point of view of the artist or of one who actually produces a work of art, who thinks in terms of technique, of the relationship of details to the design of the whole, or of the effects to be gained and who therefore regards beauty as a thing that results from his attention to these matters and that is his creation. By extension *artistic* may imply also the point of view of one who studies or judges art objectively from the artist's angle. On the other hand *aesthetic* stresses the point of view of one who contemplates a finished work of art or beauty that exists and who thinks in terms of the effect it has upon him and especially of the sensations it stimulates and the feelings it excites. Strictly, the *artistic* temperament shows itself in an urge to fashion or to express and to create out of materials, words, or sounds the beautiful thing that the artist designs or conceives: the *aesthetic* temperament shows itself in responsiveness to beauty wherever it is found, and by contrast, in aversion to that which is ugly. *Artistic* satisfaction is the gratification that comes to one who can look at a work of art (his own or another's) and call it good: *aesthetic* satisfaction is the content that accompanies the enjoyment of beauty for its own sake and independently of all other considerations. For *aesthetic*, largely because of its connection with *aesthetics*, the branch of philosophy dealing with beauty, usually implies a distinction between that which is beautiful and that which is moral or useful or merely pleasing. *Artistic* standards are therefore the tests of perfection in a work of art which artists and critics have accepted: *aesthetic* standards are the usually subjective criteria which have been set up by aestheticians or by the individual to enable him to distinguish the beautiful from the merely pleasing or gratifying.

artless *natural, simple, ingenuous, naïve, unsophisticated, unaffected

Ana *spontaneous, impulsive: candid, open, plain, *frank: *straightforward, aboveboard, forthright

Ant artful: affected —**Con** *sly, cunning, wily, insid-

ious: designing (see **INTEND**)

as since, *because, for, inasmuch as

ascend 1 *rise, arise, mount, soar, tower, rocket, levitate, surge

Ana elevate, raise, rear, *lift: *advance, progress

Ant descend

2 Ascend, mount, climb, scale mean to move upward to or toward a summit. **Ascend** is the most colorless of these terms, for it implies little more than progressive upward movement <*ascend* a mountain> <the car rapidly *ascended* the steep grade> It may be specifically used of movement along a river in the direction of its source <the Amazon can be *ascended* by seagoing ships 2300 miles> **Mount** usually implies getting up on something above the level of the ground and is therefore preferred to *ascend* in some collocations; thus, one *mounts* or less commonly *ascends* a platform or a scaffold but one may *ascend* or *mount* a throne while one invariably *mounts* a horse. **Climb** usually suggests effort and ascent by the use of various means (as the hands and feet or gears or extra power) <*climb* a tree> <*climb* the social ladder> <to *climb* steep hills requires slow pace at first—*Shak.*> **Scale** adds to *climb* not only the suggestion of progression by steps but that of great difficulty; it is referable therefore to feats of climbing <*scale* a wall> <a ladder quaintly made of cords . . . would serve to *scale* another Hero's tower—*Shak.*>

Ant descend

ascendancy *supremacy

Ana dominance, predominance (see corresponding adjectives at **DOMINANT**): command, sway, dominion, control, *power, authority: sovereignty (see under **FREE adj**)

ascension, ascent denote the act of moving upward or the movement upward. **Ascension** may occur where there is no implication of effort or difficulty in rising, and where there is usually the suggestion of movement activated by some property in the thing which ascends <a balloon *ascension*> In religious use *ascension* refers specifically to the translation of the risen Jesus into heaven. **Ascent**, on the other hand, is preferred when there is any implication of effort or of a human agent or operator <during their *ascent* of the mountain> <the scientists effected an *ascent* to the stratosphere> <her rapid *ascent* in the social scale> <make an *ascent* of three miles in an airplane>

ascent *ascension

ascertain determine, *discover, unearth, learn

Ana inquire, query, interrogate, *ask: study, contemplate, weigh, *consider: observe, survey (see **SEE**)

Con *conjecture, surmise, guess: presume, assume (see **PRESUPPOSE**)

ascetic adj austere, *severe, stern

Ana disciplined, trained, schooled (see **TEACH**): self-denying, self-abnegating (see corresponding nouns at **RENUNCIATION**): abstaining or abstinent, forbearing (see corresponding verbs at **REFRAIN**): abstemious (see corresponding noun at **TEMPERANCE**)

Ant luxurious, voluptuous (see **SENSUOUS**) —**Con** *sensuous, sensual, epicurean, sybaritic: dissolute, *abandoned

ascetic n **Ascetic, mystic** and their derivative nouns **asceticism, mysticism** though not true synonyms are not always clearly distinguished, partly because of overlapping implications but largely because the first two are often applicable to the same person. Historically many of the great mystics have been ascetics. But **ascetic** suggests an austere mode of life in which everything that does not contribute to or may interfere with the end in view (usually spiritual or sometimes intellectual perfection) is sacrificed, and certain acts (as fasting and mortification) are practiced not for their own sake but for their disciplinary effect especially in strengthening one's powers of contemplation. **Mystic**, on

the other hand, suggests the possession of a power (as a high capacity for contemplation) or of an inner revelation, by means of which one overpasses the limits of human reason and by spiritual insight comes to a knowledge of that which is divine or supernatural. *Ascetic* and *mystic*, therefore, when applied to the same person, regard him from different points of view; the former implies that he practices austerities believed favorable to spiritual contemplation; the latter, that he has had the mystical experiences that are the end of contemplation. But the two terms do not necessarily imply each other; *ascetic*, even when applied to those who aim at spiritual perfection, does not connote attainment of mystical knowledge; *mystic*, on the other hand, does not in itself imply a connection with an ascetic life. Although asceticism and mysticism may denote doctrines or practices, their chief differences are apparent when they denote the theory upon which such doctrines and practices are based. *Asceticism* often designates the theory that abstinence from otherwise lawful acts or pleasures and the practice of austerities are conducive to spiritual and intellectual perfection; *mysticism*, the theory that immediate knowledge of God or ultimate reality is attainable through a faculty that transcends the reason and makes no use of ordinary human perceptive or ratiocinative powers (one is sometimes tempted to think that to approve *mysticism* is to preach *asceticism*. Certainly many *mystics* have been *ascetic*. But that has been the accident of their philosophy and not the essence of their religion—*Ellis*)

Ana anchorite, hermit, eremite, cenobite (see RECLUSE); monk, friar, nun, *religious

Ant bon vivant —**Con** *epicure, gourmet, gourmand, glutton: sensualist, voluptuary, sybarite (see corresponding adjectives at SENSUOUS)

asceticism mysticism (see under ASCETIC *n*)

ascribe, **attribute**, **impute**, **assign**, **refer**, **credit**, **accredit**, **charge** mean to lay something (creditable, discreditable, or neutral) to the account of a person or thing. The first four of these words are often used interchangeably without marked loss in precision, but they have distinctions in discriminating use. One **ascribes** to a person or thing something which is not outwardly apparent but which may be inferred or conjectured (as a motive, a feeling, an opinion, or a value) (whatever else might be in her head, it was . . . neither love, nor romance, nor any of the emotions usually ascribed to the young—*Sackville-West*) Also, one **ascribes** something whose origin is unknown or disputed to its conjectured source, cause, or author (a poem formerly ascribed to Chaucer) (that conceit always ascribed to a lack of intelligence—*Brownell*) One **attributes** to a person or thing something (as a quality, a character, or a value) believed, usually on good grounds, to belong to it or to be appropriate to it, or something for which that person or thing is judged to be responsible or accountable (if he disclaimed the virtues attributed to him he should only accentuate his embarrassment—*Mackenzie*) (a combination . . . might have attributed to it . . . the character of a monopoly merely by virtue of its size—*Justice Holmes*) (the French had then given up their conventional trick of attributing Eleanor's acts to her want of morals—*Henry Adams*) One **imputes** when one so definitely ascribes something to a person or, less often, a thing that the ascription is impressed on that person or thing. For this reason **impute** commonly but not invariably implies accusation and, often, its resulting stigma (how dare you, sir, impute such monstrous intentions to me?—*Shaw*) One **assigns** something to a person or thing when one deliberately and often as a result of critical study places it in a class (as of values, things, or occurrences) (more

than one rejoinder declared that the importance I here assigned to criticism was excessive—*Arnold*) (the temple of Baal Lebanon, which is assigned to the eleventh century B.C.—*Clodd*) Also, one **assigns** a reason for something when one definitely fixes or states the ground, excuse, or motive for that thing (it is impossible to assign any reason for his failure) Sometimes **assign** suggests allegation, but this connotation is usually derived from the context (whatever reason of discontent the farmers may assign, the true cause is this—*Coleridge*) One **refers** a thing or rarely a person to the class to which it belongs or to its origin when, after tracing it back, one assigns it to its proper category or to its ultimate cause or source (the aurora borealis is commonly referred to the class of electric phenomena) (I am convinced that at least one half of their bad manners may be referred to their education—*Quiller-Couch*) One **credits** someone with something or something to someone when one ascribes the thing to some person or thing as its author, its agent, its source, or its explanation (people credited Moriarty's queerness of manner and moody ways to the solitude—*Kipling*) (I am sure both parties credited them with too much idealism and too little plain horse sense—*Rose Macaulay*) Sometimes **credit** suggests unwarranted belief (Aunt Rosa had credited him in the past with petty cunning and stratagem that had never entered into his head—*Kipling*) One **accredits** a person (rarely, a thing) with something (as a statement, an accomplishment, or a quality) or **accredits** something to a person when one accepts him as author, agent, or possessor (when a person stimulates us . . . we **accredit** him with an attractive personality—*Weaver*) (savings accumulated in good times . . . must doubtless be **accredited** with some expectation of future . . . dividends—*Hobson*) (several Bangor houses have been **accredited** to Bulfinch—*Amer. Guide Series: Me.*) Like **credit**, **accredit** is typically used of favorable attributions. One **charges** something on or upon a person or thing when one fixes the responsibility for a fault, crime, or evil on him or it (crimes as base as any **charged** on me?—*Cowper*) (the tyrannies . . . **charged** upon the New England oligarchy—*Parrington*)

Ana attach, *fasten, affix: *conjecture, surmise, guess: allege, advance, *adduce, cite

ash, **cinders**, **clinkers**, **embers** mean the remains of combustible material after it has been destroyed by fire. **Ash**, especially as the plural **ashes**, implies perfect combustion and a powdery residue consisting only of incombustible and thoroughly disintegrated mineral or earthy substances (devices used to trap fly ash) (wood **ashes** are used as a fertilizer) (the house and its furnishings were reduced to **ashes**) Sometimes the singular **ash** suggests a solid mass, not yet disintegrated (the **ash** of a cigar) **Cinders** carries the implication of either incomplete combustion or incombustibility and is applied to a residue, usually of a coal fire, consisting of coarse particles which, if the combustion is incomplete, are capable of further burning (sift the ashes from the **cinders**) (or which are the remains of incombustible impurities in the fuel and may also be called **clinkers**. Strictly, a **clinker** is a fused or vitrified stony mass such as is formed in burning impure coal or in smelting metals containing impurities, or is ejected from a volcano; thus, **cinders** composed mainly of small **clinkers** are often used for surfacing paths, driveways, and tracks for footpaths. **Embers** is applied to the still glowing or still smoldering remains of a fire just before it is reduced to ashes or cinders.

ashamed, **mortified**, **chagrined** mean acutely or manifestly conscious of embarrassment and humiliation. One is **ashamed** whose embarrassment and humiliation are mixed

sometimes with a sense of guilt and always with the awareness of being discredited or disgraced by one's own or vicariously another's shameful or indecorous act, behavior, or situation (he sees he has nothing to be *ashamed* of in you—rather everything to be proud of—*Meredith*) (suddenly Joe began to cry. He was *ashamed* and did not want his wife to see—*Anderson*) One is also *ashamed* who by anticipating such feelings is reluctant or unwilling to do something that seems shameful (what shall I do? for my lord taketh away from me the stewardship: I cannot dig; to beg I am *ashamed*—*Lk* 16:3) One is *mortified* whose embarrassment and humiliation are mixed with a strong sense of being put in a false or disagreeable light and who suffers more because of loss of esteem or a hurt to his own pride than because of the shameful or indecorous character of the act, behavior, or situation; thus, one might say that the boy was not *ashamed* of his conduct (because he did not consider it wrong) but he was *mortified* when he was suspended from the team (because others viewed his conduct in a light that resulted in injury to his pride and position) (<"Don't spare him; let the university expel him! . . . Let Robert be ashamed, if you would save his soul alive!" . . . Robert was sullen and *mortified*, but, alas, not ashamed—*Deland*) One is *chagrined* whose embarrassment and humiliation are accompanied by vexation or annoyance (Tony, somewhat *chagrined* at his mistake, said he should like to see the other pictures—*Archibald Marshall*) (I was as much *chagrined* as they were flabbergasted by this involuntary outbreak—*L. P. Smith*)

Ant proud —*Con* vain, vainglorious (see under PRIDE *n*): arrogant, overbearing (see PROUD)

ashen ashy, livid, pallid, wan, *pale

Ana *ghastly, grim, macabre: blanched, bleached, decolorized (see WHITEN)

ashy ashen, livid, pallid, wan, *pale

Ana (see those at ASHEN)

asinine *simple, fatuous, silly, foolish

Ana *stupid, crass, dumb, dense, dull, slow: puerile (see YOUTHFUL): *irrational, unreasonable

Ant sensible, judicious —*Con* *wise, sane, prudent, sapient, sage: *intelligent, clever, knowing, smart: *rational, reasonable

ask 1 **Ask, question, interrogate, query, inquire, catechize, quiz, examine** mean to address a person in an attempt to elicit information. **Ask** is the general or colorless term for putting a question (ask and you will find) (ask the price of an article) (ask your brother if he will join us) (none of them understood how to ask the question which they were trying to answer—*Ellis*) **Question** usually suggests asking one question after another as in teaching or in searching out the ramifications of a topic (question a suspect at length) (Socrates preferred *questioning* his disciples to lecturing them) **Interrogate** stresses formal or systematic questioning (they examined many witnesses . . . whom they *interrogated*, not only upon the express words of the statute, but upon all . . . collateral or presumptive circumstances—*Burnet*) **Query** usually strongly implies a desire for authoritative information or the resolution of a doubt (should not one *query* whether he had not those proofs in his hands antecedent to the cabinet?—*Walpole*) It is specifically so used by proofreaders (do not *query* a misspelled word in ordinary text . . . Never *query* style to the author—*Manual of Style*) **Inquire** has for its fundamental implication a search for the facts or the truth; only when it distinctly implies in addition to such

an intention the asking of a question or questions does it come into comparison with the other words of this group (inquire the best route to New York City) (inquire when the public library would be open) (it was soon evident that this was the ruddleman who had *inquired* for her—*Hardy*) **Catechize** adds to *interrogate* the suggestion of an aim to elicit a certain kind of answer. Often the answers expected are definite statements of doctrine already phrased in a catechism (a book supplying questions and answers concerning the doctrines of a church) (catechize a candidate for the ministry) In extended use, however, there is often the implication of a desire to lead the person who is questioned into making answers that are self-condemnatory or that will reveal his weaknesses (it was their policy to *catechize* every candidate for a doctor's degree at the beginning of his advanced studies) **Quiz** implies an informal but often thoroughgoing interrogation (as of a class) to determine how well a series of lectures has been understood or (as of a murder suspect) to determine the facts of the case. **Examine** implies interrogation or catechizing for the purpose of drawing answers that indicate how much or how little a person knows (as from students when their fitness for promotion is to be decided, from candidates for a position when it is necessary to determine the extent of their preparation and the adequacy of their training, from those giving testimony in a trial, or when the lawyers on each side try to elicit information of value to their clients) (the students in this course are *examined* at the end of the year) (no candidate for a civil service position is considered until he has been *examined* with all other candidates and given a satisfactory rating) (it took the whole day to *examine* and to cross-examine the principal witness)

Con reply, *answer, respond, rejoin, retort

2 **Ask, request, solicit** mean to seek to obtain by making one's wants or desires known. **Ask** implies expectation of a response, often an affirmative response (I am going to ask a favor of you) (he asked the close attention of all his audience) (ask the citizens for their full cooperation) **Request** carries a suggestion of greater courtesy and formality in the manner of asking and is preferable to *ask* when one feels that what one wants may not be granted, whether for lack of power or means or from lack of interest on the other side or when one wishes to be exceedingly polite or ingratiating (request a loan) (request the presence of a person at a reception) (requesting an opportunity to present their opinions) **Solicit** (compare **BEG**) seldom implies earnest entreaty or urging; its most common suggestion is that of calling attention to one's wants and desires in the hope of having them satisfied; (a merchant *solicits* trade by means of letters, or handbills, or advertisements in journals) (a magazine *solicits* subscriptions when it sends an agent to interview possible subscribers)

Ana appeal, petition, plead, pray, sue (see under PRAYER): *address, accost

Con *get, obtain, acquire, secure: *decline, refuse, spurn: *deny, gainsay

askance askew, *awry

Ana mistrustfully, distrustfully (see corresponding verbs at DISTRUST): enviously, jealously (see corresponding adjectives at ENVOUS)

Ant straightforwardly, directly

askew *awry, askance

Ana crookedly, obliquely (see corresponding adjectives at CROOKED)

Ant straight

asocial *unsocial, antisocial, nonsocial

Ant social

aspect 1 look, *appearance, semblance

Ana *face, countenance, visage: *bearing, mien, port, presence

2 *phase, side, facet, angle

Ana angle, slant, *point of view, viewpoint, standpoint

asperity *acrimony, acerbity

Ana sharpness, keenness (see corresponding adjectives at SHARP): causticity, mordancy (see corresponding adjectives at CAUSTIC): snappishness, waspishness, irritability (see corresponding adjectives at IRRITABLE)

Ant amenity —*Con* *courtesy, gallantry: suavity, urbanity, blandness (see corresponding adjectives at SUAVE)

aspersion *vb* vilify, *malign, traduce, calumniate, slander, defame, libel

Ana disparage, depreciate, derogate, detract, *decry: revile, vituperate (see SCOLD): defile (see CONTAMINATE)

Con *praise, extol, laud, acclaim, eulogize: *commend, applaud, compliment

aspersion reflection, *animadversion, stricture

Ana *libel, lampoon, pasquinade, squib, skit: *abuse, vituperation, invective, obloquy: *detraction, backbiting, calumny, slander, scandal

Con praise, laudation, extolling, eulogizing or eulogy (see corresponding verbs at PRAISE): *applause, acclaim, acclamation, plaudits: commendation, complimenting or compliment (see corresponding verbs at COMMEND)

asphyxiate *suffocate, stifle, smother, choke, strangle, throttle

aspirant *candidate, applicant, nominee

aspiration *ambition, pretension

Ana aim, goal, objective (see INTENTION): *desire, passion, lust

aspire *aim, pant

Ana crave, covet, *desire: *long, yearn, hunger, thirst, pine

Con *stoop, condescend, deign: grovel, *wallow

assail bombard, *attack, assault, storm

Ana beset (see INFEST): belabor, pummel, buffet, pound, *beat

assassin, **cutthroat**, **gunman**, **bravo** designate a murderer or one who can be hired to murder in cold blood. **Assassin** stresses secrecy and treachery in operation (like *assassins*, these destructive animals do their work in the dark) It is chiefly applied to murderers of important personages (tyrants always live in dread of *assassins*) (revolutions breed *assassins*) *Cutthroat* and *gunman* usually designate professional hired murderers. *Cutthroat* is chiefly literary or merely figurative because daggers and knives are no longer the weapons usually employed by such criminals, but the word still commonly suggests brutal methods of murder (I am a soldier, sir, and not a *cutthroat* —*Froude*) *Gunman* is used somewhat more broadly than the foregoing terms since it may denote not only one who murders with a firearm but one (as a gangster) who goes armed and is prepared to shoot to prevent interference with his criminal activities or at the orders of a leader or employer. Basically a **bravo** is a blustering unscrupulous ruffian or desperado (a few halfhearted catcalls from young *bravos* of the opposing party—*Barker*) The word is especially applicable in an historical situation and commonly implies a venality sufficient to perform murder for hire (unfolds all of seventeenth-century Italy and its dramas—its predatory noblemen, its murderous *bravos* —*Rolo*) (the hired *bravos* who defend the tyrant's throne —*Shelley*)

Ana murderer, slayer, killer (see corresponding verbs at KILL)

assassinate murder, *kill, slay, dispatch, execute

assault *n* *attack, onslaught, onset

Ana assailing, bombarding or bombardment, storming or storm (see corresponding verbs at ATTACK): *invasion, incursion, raid

assault *vb* storm, *attack, bombard, assail

Ana smite, slug, *strike: *beat, pound, buffet, pummel

Con *resist, withstand, oppose, combat: *defend, protect, shield, guard

assay *vb* assess, evaluate, *estimate, appraise, value, rate

Ana *analyze, resolve: *calculate, compute, reckon: *prove, test, try, demonstrate

assemblage 1 assembly, collection, congregation, gathering (see under GATHER)

Ana *aggregate, aggregation: *crowd, throng, horde, crush, press

2 **Assemblage**, **assembly** are not always interchangeable in concrete use. **Assemblage** may be used freely in reference either to persons or to things (an *assemblage* of farmers from every section of the state) (an *assemblage* of the city's manufactured products for exhibition) It may imply a unit that is a collection of individuals of the same general kind or one that is a whole formed by the union of miscellaneous things (an *assemblage* of logs) (an automobile is an *assemblage* of various distinct parts) It may be applied to something that can be seen as a unit or whole or that can be conceived as such (we have just been picturing nature as an *assemblage* of particles set in a framework of space and time—*Jeans*) **Assembly**, on the other hand, was until recently restricted in its application to a group of persons who gather together in a given place usually for the purpose of acting as a unit or of social enjoyment or, in a more specific sense, in order to serve as a deliberative or legislative body (the mayor decided to call an *assembly* of the citizens) (the New York State *Assembly*) There is a tendency to use *assembly* instead of *assemblage* of a structure or machine and especially of part of a machine that is formed by the union of different parts (a hub *assembly*)

Ana (see those at ASSEMBLY 1)

assemble congregate, collect, *gather

Ana convene, convoke, muster (see SUMMON): combine, associate, unite (see JOIN)

Ant disperse —*Con* *scatter, dissipate, dispel: *distribute, dispense, divide, deal, dole

assembly 1 assemblage, congregation, gathering, collection (see under GATHER)

Ana *company, party, troop, band: *crowd, throng, crush, press

2 *assemblage

Ana (see those at ASSEMBLY 1)

assent *vb* **Assent**, **consent**, **accede**, **acquiesce**, **agree**, **subscribe** and their corresponding nouns express in common the idea of concurrence with what someone else has stated or proposed. **Assent** implies primarily an act of the understanding and applies to opinions or propositions (one was convinced and believed and *assented*—*Webster*) (whatever is expressed with art—whether it be a lover's despair or a metaphysical theory—pierces the mind and compels *assent* and acceptance—*Huxley*) **Consent** involves the will or the feelings and indicates compliance with what is requested or desired; thus, a lady may *assent* to a gentleman's opinion on the weather, but if he makes a proposal of marriage she must either *consent* to or reject his offer (if a thing has been practiced for two hundred years by common *consent*, it will need a strong case for the Fourteenth Amendment to affect it—*Justice Holmes*) Neither *assent* nor *consent* necessarily implies approval (a parent may *assent* against his better judgment) **Accede** implies a yielding either of one's adherence (as to a cause) or of one's assent (as to a statement or proposal) (even if

Americans once worked a revolution of which they are proud, we need not feel so bound by this fact that we demurely *accede* to every other revolution, regardless of its methods, purposes, and consequences—*Yale Review*) <Mr. Bennet could have no hesitation in *acceding* to the proposal before him—*Austen*> **Acquiesce** implies tacit acceptance or forbearance of opposition <no organism *acquiesces* in its own destruction—*Mencken*> **Agree** may or may not imply previous difference of opinion, but it very often carries an implication of this and also of previous discussion, negotiation, or attempts at persuasion <he reluctantly *agreed* that his son be allowed to choose his own college> <post, my lord, to France; *agree* to any covenants—*Shak.*> **Subscribe** denotes assent but it implies in addition hearty approval; it seldom implies actually signing one's name in token of assent, but it does connote a willingness to go on record <no one would *subscribe* at present to the Kantian doctrine, that mathematics derive their validity from their applicability to sensible experience—*Alexander*>

Ana accept, *receive: *adopt, embrace, espouse: believe, credit (see corresponding nouns at BELIEF)

Ant dissent —*Con* *deny, gainsay, impugn: reject, spurn, refuse (see DECLINE): *object, protest

assert 1 **Assert, declare, profess, affirm, aver, protest, avouch, avow, predicate, warrant** agree in meaning to state positively usually either in anticipation of denial or objection or in the face of it. **Assert** implies absence of proof: it usually ascribes to the speaker or writer either assurance of the grounds for his statement or such confidence in his opinions as to make him indifferent to evidence <that rigid sect which *asserts* that all real science is precise measurement—*Ellis*> <Hobart . . . could talk; he could *assert* . . . but he couldn't meet or answer arguments—*Rose Macaulay*> **Declare** and **profess** add to **assert** the implication of open or public statement and are often interchangeable. In precise usage **declare** is somewhat more formal and impersonal than **profess** which is especially suitable for conveying a personal or emotional involvement in what is under discussion; thus, a government **declares** war while a citizen **professes** complete trust in his government; a jury **declares** a man guilty but his mother **professes** continued belief in his innocence <they do not, for the most part . . . *declare* . . . that no war can ever be right—*Inge*> <he talked well, *professed* good opinions—*Austen*> **Profess** but not **declare** may carry a suggestion of insincerity <our princes of darkness . . . have become what they *profess* to scorn—angels of light—*Sullivan*> **Affirm** implies conviction of truth and willingness to stand by one's statement because it is supported by evidence or one's experience or faith <yet, with the evidence before us . . . we cannot *affirm* that this is the later play—*T. S. Eliot*> <politicians more often *affirm* their desire for retirement than show that they really mean it—*Times Lit. Sup.*> **Aver** suggests complete confidence and certainty of truth <for all *averred*, I had killed the bird—*Coleridge*> **Protest** stresses emphasis in affirmation, especially in the face of doubt or contradiction <I here *protest*, in sight of heaven . . . I am clear—*Shak.*> <he *protested* that, except Lady Catherine and her daughter, he had never seen a more elegant woman—*Austen*> **Avouch** usually imputes authority or personal knowledge to the maker of a positive statement <his own deposition, as three Cardinals *avouched* that he had made it before them—*Yonge*> **Avow** implies open and emphatic declaration and personal responsibility for the statement <we affirm and *avow* that the very meanest translation of the Bible in English . . . containeth the word of God—*Bible: Preface to A. V.*, 1611> **Predicate**, though occa-

sionally used as a close synonym of the preceding words, usually implies the affirmation of something as a quality, a property, or a concomitant of something <logic works by *predicating* of the single instance what is true of all its kind—*James*> <to *predicate* of diabolic agencies, which are gifted with angelic intellects, the highly ridiculous activities which are so characteristic of poltergeist visitations—*J. McCarthy*> **Warrant** (see also JUSTIFY 3) carries a strong implication of assurance or positiveness, sometimes suggesting little or no fear that one will be doubted or contradicted, and at other times connoting one's personal guarantee <I *warrant* that's just what will happen> <I'll *warrant* he's as good a gentleman as any—*Buchan*> <as smooth as silk, I *warrant* ye—*L'Estrange*> <cheap-jacks who sell at dockyard gates a pill *warranted* to cure measles, toothache and rupture—*Montague*>

Ana allege, advance, cite, *adduce

Ant deny: controvert —*Con* gainsay, contradict, negate, traverse, contravene (see DENY): *disprove, refute, rebut, confute

2 vindicate, justify, *maintain, defend

Ana proclaim, *declare, publish, advertise: *express, voice, utter

assertive self-assertive, *aggressive, pushing, pushy, militant

Ana positive, *affirmative: blatant, clamorous, *vociferous: cocksure, certain, *sure, positive: *confident, assured, sanguine, presumptuous

Ant retiring: acquiescent —*Con* *shy, bashful, diffident, modest: docile, *obedient, amenable, biddable

assess assay, appraise, value, evaluate, *estimate, rate

Ana *calculate, compute, reckon

asset 1 (in plural form **assets**) resources, means, *possessions, effects, belongings

Ant liabilities

2 *credit

Ant handicap

assiduous sedulous, diligent, industrious, *busy

Ana *indefatigable, tireless, untiring, unwearied

Ant desultory —*Con* *random, haphazard, casual, hit-or-miss, happy-go-lucky: *lazy, slothful, indolent, faineant: remiss, lax, slack (see NEGLIGENT)

assign 1 *allot, allocate, apportion

Ana fix, *set, establish, settle: *distribute, deal, dole, dispense

2 refer, *ascribe, attribute, impute, credit, accredit, charge

Ana attach, *fasten, affix: relate, link, associate (see JOIN): pigeonhole, classify (see ASSORT)

3 *prescribe, define

Ana determine, settle, *decide: consign, relegate, *commit, entrust

assignment rendezvous, tryst, date, *engagement, appointment

assignment *task, duty, job, stint, chore

assimilate 1 *identify, incorporate, embody

Ana *change, alter, modify, vary: *transform, metamorphose, transmute: blend, fuse, merge, commingle, *mix

2 *absorb, imbibe

Ana engross, absorb, *monopolize: *adopt, embrace, espouse: *infuse, imbue, ingrain, suffuse, inculcate, leaven

assimilation apperception, identification, *recognition

assist *help, aid

Ana *support, uphold, back, champion: profit, avail, *benefit: attend, *accompany, escort: cooperate, concur (see UNITE)

Ant hamper: impede —*Con* *hinder, obstruct, block: trammel, clog, fetter (see HAMPER): *prevent, forestall

assistance help, aid (see under HELP 1b)

Ana service, advantage, profit, avail, *use: supporting, upholding, backing (see SUPPORT *vb*): subsidy, grant, subvention, *appropriation: cooperation, concurrence (see corresponding verbs at UNITE)

Ant impediment: obstruction

assistant *n* Assistant, helper, coadjutor, aid, aide, aide-de-camp all denote persons who take over part of the duties of another, especially in a subordinate capacity. Assistant is applicable to a person who meets this description, regardless of the status of his work (a baker's assistant) (a bishop's assistant) (a superintendent's assistant) Helper often implies apprenticeship in a trade or the status of an unskilled laborer (a bricklayer's helper) (a mother's helper often performs the duties of a nursemaid) Coadjutor usually implies equivalence except in authority; it may be used either of a co-worker or a volunteer assistant (in working so complex a mechanism as the government of the empire he must have willing coadjutors—Buchan) (at St. James I met with a kind and cordial coadjutor in my biblical labors in the bookseller of the place—Borrow) (decided to share the government of the Roman world with a coadjutor—R. M. French) In a specific use it names or is applied to a bishop who serves as an assistant to the bishop having jurisdiction over a diocese. Especially in Roman Catholic and Protestant Episcopal use it implies the right of succession. Aid and aide are often interchangeable synonyms of assistant (a laboratory aid) (aides and orderlies . . . assist the professional nurses—Nursing World) Aide frequently but aid rarely denotes a special and often highly qualified assistant able to act as an adviser to his principal (questioned the use of presidential aides in foreign affairs) (with their chief aides they will discuss the problems of the interregnum—N. Y. Times) Aide and aide-de-camp designate a military or naval officer who personally attends a general or a sovereign, a president or a governor, often as an escort but sometimes with definitely prescribed duties.

associate *vb* connect, relate, link, *join, conjoin, combine, unite

Ana merge, mingle, *mix, blend, amalgamate, coalesce: organize (see ORDER *vb*)

Con alienate, *estrangle: *separate, part, divorce, sever, sunder, divide

associate *n* Associate, companion, comrade, crony mean a person frequently found in the company of another. Associate is the general term, referable to anyone whose company one enjoys or tolerates more or less regularly and usually on terms of equality because of a business, social, fraternal, or similar connection or because of a community of interests or aims (a person is known by his associates) (his associates included all the prominent young men of the town) (he became a leader of fashion. Then, to the visible embarrassment of his young associates, he suddenly tired of it all—Day Lewis) Companion refers to a person who actually accompanies or attends one; a person who walks along the street with one or who sits with one at a restaurant table may be called a companion for the time being even if one has never seen him before and never sees him afterwards. However, the word often implies more habitual association and closer personal relationship than associate (his wife was his lifelong companion) (he no longer stood alone; the companions of his youth had become in the full sense his coadjutors—Buchan) (he was her darling brother, her beloved companion in adventure—Rose Macaulay) Sometimes the association is not the result of friendship or of relationship but of a business arrangement (the old lady sought a competent paid companion) Comrade implies association in a common calling or pursuit, and more or less familiarity

in companionship (comrades in arms) (school comrades) Commonly it connotes more sentiment than either associate or companion, even though that sentiment is sometimes no more than a sense of shared fortunes or experiences, or a consciousness of having worked or played together (return to her . . . ? no, rather I abjure all roofs, and choose . . . to be a comrade with the wolf and owl—Shak.) (which weep the comrade of my choice . . . the human-hearted man I loved—Tennyson) Crony is seldom used of a young person, though often applied to an older person who was an intimate friend in school days or with whom one has been on intimate terms for a very long time (an old crony of his turned up after a long absence from England) (the two old ladies are great cronies)

Ana *partner, colleague, ally, confederate: accomplice, abettor, accessory (see CONFEDERATE): *assistant, helper, coadjutor, aide

Con antagonist, adversary, *opponent: *enemy, foe: rival, competitor (see corresponding verbs at RIVAL)

association, society, club, order denote a body of persons who unite in the pursuit of a common aim or object. Association is in general used of an organization which is inclusive in its membership, excluding only those whose personal affiliations, interests, and needs are different from those of the typical member or, if the object of the organization is service of some sort, those who do not belong to the business, the industry, or the profession served (the Young Men's Christian Association) (the Modern Language Association) (the National Association of Manufacturers) Society is often used interchangeably with association, but it tends to suggest a more restricted aim, a closer union of members, and their more active participation, and sometimes a narrower field of choice of membership (the Christian Endeavor Society) (Society for the Prevention of Cruelty to Animals) (a missionary society) (a secret society) (the Philological Society) (Society for Ethical Culture) Club usually suggests such privacy that admission to membership is only through election and invitation; it often also implies quarters for the meeting and entertainment of members and therefore is applied to the buildings or rooms as well as to the organization (going to the country club to play golf) (a political club) (a bridge club) (most large cities have a university club) Order is applied chiefly to a society whose members have common aims and accept common obligations (as of working together in brotherly union and of practicing certain virtues) (a religious order) (a fraternal order) Order usually suggests in addition a ritual, a uniform, and honorary distinctions (the Independent Order of Odd Fellows) (the Benevolent and Protective Order of Elks)

assort, sort, classify, pigeonhole mean to arrange in systematic order or according to some definite method of arrangement or distribution. Assort (see also assorted under MISCELLANEOUS) implies division into groups of like things or of things intended for the same purpose or destination (assort the jumbled contents of an attic) (assorted his bills and papers) When used in reference to homogeneous material, assort usually implies grading (as according to size, condition, or value) (assort oranges for the market) (assort the books by author and subject) Often, additionally, it implies selection, either of what is to be eliminated or of what is to be chosen or preserved (her mind was busily assorting and grouping the faces before her—Glasgow) (the company indeed was perfectly assorted, since all the members belonged to the little inner group of people who, during the long New York season, disported themselves together daily and nightly—Wharton) Sort usually equals assort but is often preferred to it when

the latter would seem too literary or too technical (<sort mail> <sort stockings> <sort yarns>). Frequently, especially with *out*, *sort* implies culling or selection even more than arrangement (<he sorted and re-sorted his cargo, always finding a more necessary article for which a less necessary had to be discarded—*Cather*>). **Classify** is more often used of things that fall into intellectual categories than of those which can be physically grouped. It usually implies a division into kinds or types and an arrangement for convenience in dealing with material that cannot be assembled or that is not before one (<classify bodies of water> <classify poems as epic, lyric, and dramatic> <classify languages according to the way in which words are formed>). **Pigeonhole** suggests an arrangement of small compartments in a writing desk or of boxes in a post office, each compartment being a receptacle for one group of letters or papers that are sorted or classified; it implies the ability to put each of a number of things in its right class or category (<he pigeonholes the wild flowers he meets on a day's walk by assigning each to its proper classification or by being able to give it its proper specific or generic name> <he pigeonholes every bit of information that comes to him by filing it away in his memory properly labeled and in its right place with relation to the rest of his knowledge>).

Ana arrange, methodize, systematize, *order

Con *mix, mingle, commingle: derange, disarrange, disorganize, *disorder

assorted *miscellaneous, heterogeneous, motley, promiscuous

Ana diverse, *different, various, disparate, divergent: selected, picked, chosen, preferred (see CHOOSE): mixed, mingled (see MIX)

Ant jumbled —*Con* *like, similar, identical, uniform

assortment see corresponding adjective *assorted* at MISCELLANEOUS

Ana *mixture, blend, compound: combining or combination, associating or association, uniting or union (see corresponding verbs at JOIN)

Ant jumble, hodgepodge

assuage alleviate, *relieve, mitigate, lighten, allay

Ana temper, *moderate: *comfort, solace, console: mollify, placate, appease, *pacify

Ant exacerbate: intensify —*Con* kindle (see LIGHT *vb*):

aggravate, heighten (see INTENSIFY): *increase, augment

assume 1 Assume, affect, pretend, simulate, feign, counterfeit, sham mean to put on a false or deceptive appearance. Assume often implies a pardonable motive rather than an intent to deceive (<it sometimes happens that by assuming an air of cheerfulness we become cheerful in reality—*Cowper*>). To affect is to make a show of possessing or using something, usually for effect, but sometimes because of one's liking for it (<affect plainness of speech> <affect a gesture, an opinion, a phrase, because it is the rage with a large number of persons—*Hazlitt*> <Jones had really that taste for humor which others affect—*Fielding*>). Pretend implies overt profession of what is false (<that pretended liking called politeness—*L. P. Smith*> <pretend to be insane> <even their clowns had to be learned or to pretend learning—*Hight*>). To simulate is to assume the characteristics of something else by imitating its appearance or outward signs (<trees hewn to simulate formidable artillery pieces were dragged into position all along the ramparts—*Amer. Guide Series: La.*>). Feign implies more invention than pretend, less specific imitation of life than simulate (<I grow angry and I curse them, and they feign penitence, but behind my back I know they call me a toothless old ape—*Kipling*>). But feign and simulate are often interchangeable. Counterfeit implies the highest degree

of verisimilitude of any of the words in this group (<are you not mad indeed? or do you but counterfeit?—*Shak.*> <many noblemen gave the actor-manager access to their collections of armor and weapons in order that his accoutrement should exactly counterfeit that of a Norman baron—*Shaw*>). Sham implies feigning with an intent to deceive; it usually connotes deception so obvious that it fools only the gullible (<sham sickness> <sham sleeping> <when the curtain falls there are more actors shamming dead upon the stage than actors upright—*H. A. L. Craig*>).

Ana dissemble, *disguise, cloak, mask, camouflage

2 *presuppose, postulate, presume, premise, posit

Ana *conjecture, surmise: *grant, concede, allow: *assert, affirm, aver, predicate, profess

assumption presupposition, postulate, posit, presumption, premise (see under PRESUPPOSE)

Ana *hypothesis, theory: *principle, fundamental, axiom, theorem: conjecture, surmise (see under CONJECTURE *vb*)

assurance 1 certitude, *certainty, conviction

Ana *belief, faith, credence, credit: *trust, confidence, reliance, dependence: positiveness, sureness, cocksureness (see corresponding adjectives at SURE)

Ant mistrust: dubiousness —*Con* doubt, *uncertainty, skepticism, suspicion: disbelief, *unbelief, incredulity

2 self-assurance, *confidence, self-confidence, self-possession, aplomb

Ana sangfroid, composure, *equanimity: sureness, sanguineness (see corresponding adjectives at CONFIDENT): mettle, resolution, spirit, *courage, tenacity: effrontery, *temerity, nerve

Ant diffidence: alarm —*Con* timorousness, timidity (see corresponding adjectives at TIMID): shyness, bashfulness, modesty (see corresponding adjectives at SHY)

assure insure, *ensure, secure

Ant alarm —*Con* *frighten, scare, fright, terrify: abash, discomfit, *embarrass: *intimidate, cow

assured *confident, sanguine, sure, presumptuous

Ana fearless, unapprehensive, unafraid (see affirmative adjectives at FEARFUL): *cool, composed, unruffled, imperturbable, unflappable, collected

Ant abashed: timorous —*Con* discomfited, embarrassed, rattled, disconcerted (see EMBARRASS): *fearful, apprehensive, afraid: hesitant, reluctant (see DISINCLINED)

astern *abaft, aft

Ana after, hind, rear, back (see POSTERIOR)

Ant ahead —*Con* *before, forward

astonish *surprise, astound, amaze, flabbergast

Ana nonplus, dumbfound, bewilder, confound (see PUZZLE): impress, strike, touch, *affect

astound *surprise, astonish, amaze, flabbergast

Ana dumbfound, confound, nonplus, bewilder (see PUZZLE): startle, affright, alarm, terrify (see FRIGHTEN)

astral *starry, stellar, sidereal

astray *amiss

astute *shrewd, perspicacious, sagacious

Ana *sharp, keen, acute: discreet, prudent, foresighted (see under PRUDENCE): knowing, *intelligent, clever, smart: wily, crafty, cunning, *sly

Ant gullible —*Con* ingenuous, naïve, simple, unsophisticated (see NATURAL): candid, open, plain, *frank: forthright, *straightforward, aboveboard

asylum *shelter, refuge, retreat, sanctuary, cover

at 1 At, in, on cause difficulty when used in phrases giving the place or locality of an action. When reference to the interior of any place is made prominent, in is used; when a place is regarded as a mere local point, at is more commonly employed; when the direction is indicated, on is sometimes used in place of at (<look for a book in the

library) <meet a friend *at* the library> <sit *on* my right> <the town lies *on* the east coast> <he appointed regular meetings of the States of England twice a year *in* London—*Hume*> <an English king was crowned *at* Paris—*Macaulay*> *In* is commonly employed before the names of countries or districts and *at* before names of institutions, public offices, or business houses (*in* America) <*in* the South> <Milton was educated *at* Christ's College> <*at* the customhouse> <*at* the jeweler's> With names of towns and cities the choice between *in* or *at* usually depends upon whether the place designated is felt respectively (1) as an including area or scene, especially with an implication of destination or permanence of occupancy, or of having familiar associations for the speaker or (2) merely as a point (as along a journey or course) on a map or in space or at a remove from the speaker <on our way to visit *in* Troy we lunched *at* Albany> <after a stopover at Chicago, we arrived *in* Sioux Falls on Friday> <a man born here *in* Zenith is consul *at* Hong Kong> In giving a town address we say *at* 141 Wood Street *in* Springfield. In giving the street without the number, *in* is preferred in Great Britain, *on* in the United States.

2 At, in, on are clearly distinguishable when used to introduce a phrase giving the time of an action. When reference is to time by the clock or to a point of time registered by a clock, *at* is commonly used <*at* two o'clock> <promptly *at* the hour appointed> <*at* three minutes to six> When the reference is not to a point but to a period in the course of which an action occurs, *in* is the usual preposition <*at* two o'clock *in* the afternoon> <September 1st *in* the year 1939> <*in* the month of May> When the reference is to a particular day in the course of which something occurs, *on* is used <*on* July fourth there will be a celebration> <it happened *on* a Sunday> *On* is sometimes used also with reference to a point of time with which there is, or should be, coincidence <be here *on* the hour> <he is always *on* the dot>

atavism *reversion, throwback

atavistic reversionary (see under REVERSION)

atheist, agnostic, deist, freethinker, unbeliever, infidel designate a person who rejects some or all of the essential doctrines of religion and particularly the existence of God. An **atheist** is one who denies the existence of God; an **agnostic** is one who withholds belief (though he may not deny the possible existence of a supreme being) because he does not know and is unwilling to accept as proof the evidence of revelation and spiritual experience; a **deist** is one who rejects the conception of a supreme being as ruler and guide of men and the universe, but still believes in a god who is the creator and the final judge of men. Since deism implies a denial of revelation and supernaturalism, **deist** has often been used as though it were the equivalent of **atheist**. **Freethinker** suggests loss of faith and the rejection of any or all of the tenets of revealed religion in favor of what seems rational or credible. **Unbeliever** is more negative than **freethinker**, because it carries no implication of a substitute for faith. **Infidel** denotes one who is not a Christian or who opposes Christianity; it is used by Christians especially to designate monotheists (as Muslim) who do not subscribe to the Judeo-Christian concept of God and in such usage is distinguishable from **heathen** and **pagan**. From the Mohammedan point of view, especially as presented in English fiction and poetry, **infidel** often means a Christian.

Ant thirst

athirst avid, *eager, keen, anxious, agog

Ana thirsting, hungering, pining, yearning, longing (see LONG vb); craving, coveting or covetous, desiring or desirous (see corresponding verbs at DESIRE)

Con *indifferent, unconcerned, incurious, aloof: *languid, lackadaisical, listless: apathetic, *impassive

athlete, gymnast agree in denoting a person skilled in physical performance requiring agility, powers of endurance, and, often, muscular strength. **Athlete** also usually implies the status of a contender in games or in sports involving a contest, whether outdoor or indoor; school or college **athletes** are the students who participate in school sports (as football, baseball, basketball, or track) <an outstanding **athlete** who had participated in several college sports> A **gymnast** is one who is skilled in bodily exercises and calisthenics performed often with the aid of apparatus for the development of nimbleness, strength, and control in the use of the body <leaping back a yard . . . with the speed and security of a trained **gymnast**—*Stevenson*>

athletic *muscular, husky, sinewy, brawny, burly

Ana *strong, stalwart, sturdy: lusty, *vigorous, strenuous, energetic

Con frail, fragile, *weak

athletics, sports, games denote physical activities engaged in for exercise or play. **Athletics** is a collective term (not used in the singular) for exercises for the performance of which one acquires and maintains agility, skill, stamina by regular and systematic training and practice usually with the aim of competing, singly or as a member of a team, with others similarly trained, whether for pleasure, to keep the body in trim, to win honor for oneself, one's team, school, or club, or to earn a livelihood <college **athletics** include football, basketball, hockey, baseball, rowing, and tennis> <baseball, hockey, football, and tennis are among the better-known professional **athletics**> **Sports** are forms of physical activity, usually outdoor, that afford pleasure or diversion. The term may be used in the singular for any of the various forms of athletics, since whatever the main purpose of athletic activity may be, a certain amount of pleasure is usually derived <football, basketball, hockey, baseball, rowing, and tennis are among the popular **sports** with those who go out for athletics in college> <major-league baseball is a professional **sport**> The idea of training to develop agility, skill, or stamina, prominent in **athletics**, is frequently wanting in **sports**, which may involve so little exertion or be engaged in for so short a period or so infrequently as not to require it; thus, an impromptu baseball game between two pickup teams falls under the head of **sport**, but hardly of **athletics**. So also the idea of competition, usually present in **athletics**, is frequently wanting in **sports** <noncompetitive skating, skiing, canoeing, and swimming are **sports**> The term is wider than **athletics**, including such activities as hunting and fishing (in which the pleasure derives from pursuit of quarry). Since sports contests are often an object of interest to others, the term **sports** is applied also to contests which provide amusement or diversion for spectators as well as or often rather than contestants; horse racing, dog racing, bullfighting, and cockfighting are **sports** <we . . . have every source of amusement open to us, and yet follow these cruel **sports**—*Windham*> **Games** (for singular see FUN) are athletic or sports contests, usually those which are of a somewhat artificial nature and therefore require more extensive rules than such contests as rowing, boxing, wrestling, and skiing. Thus, practically all forms of competition that make use of a ball or similar object are called **games** (as baseball, football, hockey, golf, tennis, and polo). Although the plural **games** may be used interchangeably with **meet** of a competition consisting chiefly or only of track-and-field events <Olympic **games**> the singular **game** is applied to few of the individual events of such a competition.

athwart crosswise, crossways, *across

atmosphere 1 *air, ether, ozone

2 **Atmosphere, feeling, feel, aura** denote an intangible and usually unanalyzable quality or aggregate of qualities which gives something an individual and distinctly recognizable character. **Atmosphere** is used chiefly in reference to places, to groups of persons, or to periods of time that have a definite identity. It frequently denotes a character that accrues to something or that pervades it as a whole and determines the impression it produces on those who come within the range of its influence; thus, a place that has no *atmosphere* is by implication a place that leaves no clear impression of its difference from other places of the same type or kind; a poet who re-creates the *atmosphere* of the Middle Ages is one who by implication gives a true and vivid impression of the life of that time. *Atmosphere* may also denote an environment (regarded as a sum total of physical, social, intellectual, and spiritual conditions) that not only produces a distinct impression but exerts a definite influence (as on the state of mind, habits of work, or views) of those who are encompassed by it (genius can only breathe freely in an *atmosphere* of freedom—*J. S. Mill*) (any judge who has sat with juries knows that . . . they are extremely likely to be impregnated by the enviroing *atmosphere*—*Justice Holmes*) **Feeling** (see also FEELING, SENSATION) may refer either to the character one ascribes to something when one has a clear and unified impression of its distinctive qualities or atmosphere, or to the aesthetic effect of a work of art which not only represents a thing but re-creates its atmosphere or conveys the impression the artist seeks to produce (a collection of scenic wallpapers that . . . have a slight Japanese *feeling*—*New Yorker*) (they bring the notion of the thing described to the mind, they do not bring the *feeling* of it to the imagination—*Arnold*) **Feel** may be used interchangeably with *feeling* and also with *atmosphere*, especially when the quality of a thing is known through frequent experience or intimate knowledge (the factory had a homely *feel*—*D. H. Lawrence*) (the sensitive reader may discover in them, also, something of the quality and *feel* of Shakespeare's own poetry—*Day Lewis*) **Aura** is used chiefly in reference to persons who seem to be enveloped by an ethereal spirit which is an emanation of their inner life or of their secret thoughts; it is also used of things that are invested with a mysterious quality or character (in their company, he was always conscious of an *aura* of disapproval) (there was about her the *aura*, the glow, the roseate exhalation that surrounds the woman in love—*Ferber*) (throughout the Middle Ages the Taunus and the Harz had about them an *aura* of the uncanny as the last haunt of the primeval gods—*Buchan*)

Ana *quality, character, property; peculiarity, individuality, characteristic (see corresponding adjectives at CHARACTERISTIC): *impression, impress

atom 1 *particle, molecule, corpuscle

2 *particle, bit, mite, smidgen, jot, tittle, iota, whit

Ana smack, spice, dash, suspicion, soupçon, *touch, suggestion, tincture, tinge, shade

atone *expiate

Ana compensate, *pay: propitiate, conciliate, appease (see PACIFY)

atonement expiation (see under EXPIATE)

Ana compensating or compensation, offsetting (see corresponding verbs at COMPENSATE): conciliation, propitiation, appeasement (see corresponding verbs at PACIFY): *reparation, amends

atrabilious hypochondriac, *melancholic, melancholy

Ana morose, glum, saturnine, crabbed, *sullen: *despondent, hopeless, forlorn: depressed, dejected, gloomy

(see corresponding nouns at SADNESS)

Ant blithe —**Con** *merry, jocund, jovial, jolly: *glad, happy, cheerful, lighthearted, joyful, joyous

atrocious heinous, monstrous, *outrageous

Ana *flagrant, gross, rank, glaring: nefarious, flagitious, infamous, iniquitous, *vicious: barbaric, savage, barba-rous, *barbarian

Ant humane: noble (see MORAL) —**Con** righteous, virtuous (see MORAL)

attach 1 *arrest, apprehend, detain

Ana seize, *take, grab: capture, *catch

Con release, discharge, deliver, *free

2 *fasten, affix, fix

Ana *join, link, unite, connect: annex, *add, append: *tie, bind

Ant detach —**Con** disengage (see DETACH): disencumber, disentangle, disembarrass (see EXTRICATE): sever, sunder, divorce, part, *separate

attachment 1 arrest, apprehension, detention (see under ARREST *vb*)

2 **Attachment, affection, love** denote the feeling which animates a person who is genuinely fond of someone or something. **Attachment** and **affection** differ in that *affection* usually has for its object a sentient being, whereas that of *attachment* may be even an inanimate thing (an *attach-ment* to his profession) (feels a strong *attachment* to the house in which he lived) *Attachment* implies strong liking, devotion, or loyalty; *affection*, rather warmth and tenderness of sentiment (a profound *attachment* to the King as king—*Belloc*) (it cannot show lack of *attachment* to the principles of the Constitution that she thinks it can be improved—*Justice Holmes*) (widespread American *affection* for France—*George*) *Affection* and *love* differ in that *affection* implies a feeling more settled and regulated, less intense or ardent, than *love*, which alone of the three may connote passion. Thus to one's friends any one of the three terms may be applicable; to the members of one's own family, *love* or *affection*, but usually not *attach-ment*; to God, *love* (in the sense of reverent devotion), but not *affection* or *attachment*; to one's country, *love*, especially if ardent patriotism is implied, *affection*, if the emphasis is upon genuine but not blind devotion, *attachment*, if allegiance and loyalty are definitely connoted.

Ana fondness, devotedness (see corresponding adjectives at LOVING): devotion, piety, fealty, *fidelity, allegiance **Ant** aversion —**Con** *antipathy: estrangement, alienation, disaffection (see corresponding verbs at ESTRANGE)

attack *vb* **Attack, assail, assault, bombard, storm** are comparable not only in their military but also in their extended senses. All carry as their basic meaning to make a more or less violent onset upon. **Attack** originally connoted a fastening upon something as a beast of prey fastens upon its victim. It now implies aggression or aggressiveness in all its senses and usually the initiative in entering into an engagement or struggle (as with a person or thing that is opposed or that one intends to conquer) (plan to *attack* the enemy at dawn) (*attacked* the position of his opponents in a debate) (*attack* a problem in engineering) (they lack the courage to *attack* their other studies with the vigor requisite to success—*Grandgent*) (it had become increasingly apparent that the logical method of eradicating disease was to *attack* it at its source—*Heiser*) **Assail** suggests the action of one who would conquer by force of repeated blows rather than by brute strength. Its chief distinction from *attack* is in this suggestion of repetition of means (as blows, strokes, shots, or thrusts) of breaking down resistance (*assail* an enemy with shells) (*assail* with reproaches) (*assailed* by temptations) (property interests . . . *assailed* by attempts to put industry upon a

more reasonable and more equitable footing—*Hobson*) <old pains keep on gnawing at your heart, old desires . . . old dreams, *assailing* you—*Conrad*> **Assault** implies close contact or a direct confrontation; in contrast with *assail*, it suggests the use of brute strength and an attempt to overpower by suddenness and violence of onslaught <*assault* a person with a club> <*assault* a stronghold on all sides> <while other aircraft *assaulted* supply buildings—*N. Y. Times*> <a universal hubbub wild of stunning sounds . . . *assaults* his ear—*Milton*> **Bombard** literally means to assail continuously and devastatingly with bombs or shells <the advancing German army in 1914 expected to *bombard* Paris and bring a quick end to the war> It is, in its stronger implication of importunity or of continuous pestering, distinguishable from *assail* <he *bombarded* Cicero with letters asking for advice—*Buchan*> <the reporters *bombarded* the district attorney with questions> **Storm** means to assault with the violence, rush, and effectiveness of a sudden and devastating storm or wind; it connotes an attempt to sweep from its path every obstacle to a victory <several of their bravest officers were shot down in the act of *storming* the fortress—*Irving*> <who think to *storm* the world by dint of merit—*Burns*> **Ana** fight, *contend, battle, war: beset, overrun (see INFEST): *surprise, waylay, ambush
Con *defend, shield, guard, protect: *resist, withstand, oppose, combat

attack *n* 1 **Attack, assault, onslaught, onset** denote an attempt made on another or on others to injure, destroy, or defame. An **attack** may be upon the physical person or it may be upon the character, the reputation, or the writings of a person or persons; it often suggests animosity or definite enmity as its cause, but it may imply motives as various as wanton cruelty, partisan feeling, or a critical intention <the victim of a cowardly *attack* by hoodlums> <the speech was a severe *attack* upon the policies of the administration> <the book was the object of *attacks* from all sides> <an unprovoked *attack* upon the fairness of the court> **Assault** implies more violence, more malice or viciousness, and often the infliction of greater damage or less reparable damage than *attack*. However, an *assault* upon the person is legally an apparently violent attempt or a willful offer with force or violence to injure or hurt that person physically. When the hurt has been inflicted, the precise legal term for the act is *assault and battery*. Rape is sometimes specifically called an *assault*. In military language an *assault* is sometimes distinguished from an *attack* upon the enemy, the former term being applied only to the last phase of an *attack* or offensive movement, when the aggressors close upon their opponents and the issue is determined. Usually *assault* and *attack* are not clearly distinguishable except in emphasis; thus, an *assault* upon a person's character suggests violent emotion (as hatred or vindictiveness); an *attack* upon a person's character need not imply strong feeling as its motive <the passage . . . shows how alarmed a Hegelian may be by an *assault* upon the authority of science—*Inge*> **Onslaught** suggests a vigorous and destructive method of attack; it usually implies an attempt to overwhelm by force of momentum or of numbers or by the fury of the assault <the defenders, taken by surprise, were unable to repel the *onslaught*> <no play can withstand such an *onslaught* from the critics> <he sees I am no man to take rebuff. . . . quick to the *onslaught*, out sword, cut and thrust!—*Browning*> **Onset** is applicable not only to the first furious rush that initiates an attack (as an offensive movement, an act of aggression, or a fit of illness) but to any such succeeding rush that marks a renewal of vigor in the attack <at the *onset*, the twelfth regiment bore the brunt of the attack>

<a pause in the fighting gave the officers time to rally their scattered troops and to prepare for a fresh *onset* from the enemy> <at every *onset* of the gale convulsive sounds came from the branches—*Hardy*>

Ana action, *battle: striking, hitting, smiting, slugging (see STRIKE); criticism, condemnation, denouncing or denunciation (see corresponding verbs at CRITICIZE)

Con defending or defense, vindication, justification (see corresponding verbs at MAINTAIN); resistance, opposition (see corresponding verbs at RESIST)

2 **Attack, aggression, offense, offensive** and their corresponding adjectives **attacking, aggressive, offensive** denote or describe action in a struggle for supremacy which must be met with defense or by means of defenses. The terms are used not only of military operations but of competitive games or exhibitions of skill (as in boxing and fencing). **Attack** implies the initiation of action; commonly, also, it suggests an attempt to catch the enemy or opposition off guard and therefore connotes suddenness, and often violence, of onset <the first raiding *attack* was . . . repulsed with heavy losses—*H. G. Wells*> **Aggression**, which also implies initiation of hostile action, stresses rather a lack of provocation and a desire for conquest or domination. **Attack** is applicable to any movement or action in a series of operations; *aggression* is applied chiefly to a war or to a type of fighting that involves invasion or encroachment on another's territory and usually further connotes a determination to maintain the advantage of the attacking side <pledged never to fight in a war of *aggression*> <the business of government is to check *aggression* only—*Smith*> <an *aggressive* war, as distinguished from mere plundering inroads—*Freeman*>

Offense and offensive characterize the position or the methods of the attacking side. The noun is interchangeable with *attack* only when the latter word does not refer to a concrete action; thus, one may speak of methods of *attack* (or of *offense*) as contrasted with methods of defense but one would use "a war of *offense*" (rather than of *attack*) and "readiness for an *attack*" (rather than for an *offense*). Both words are distinguishable from *aggression* and *aggressive*, which in many ways they closely resemble, by their absence of suggestion of any motive or aim other than that of a desire for supremacy. **Offensive** implies vigorously aggressive action especially in war; thus, when taking the *offensive* one carries on *offensive* operations. *Offensive* may also denote a particular campaign or episode marked by such action <an economic *offensive* can often prevent the necessity for a more costly military defense—*Draper*> <to be *offensive* means to carry the war to the enemy. And this as well is the most effective sort of defense—*Ageton*>

3 *fit, access, accession, paroxysm, spasm, convulsion
attacking *adj* aggressive, offensive (see under ATTACK *n*)

attain *reach, compass, gain, achieve

Ana *come, arrive: win, acquire, secure, obtain, *get: accomplish, effect (see PERFORM)

attainment accomplishment, *acquirement, acquisition
attaint *vb* taint, pollute, defile, *contaminate

attempt *vb* **Attempt, try, endeavor, essay, strive, struggle** as verbs mean to make an effort to do something that may or may not be successful and as nouns (the single exception in form being *striving*) mean the effort made to accomplish such an end. **Attempt** implies an actual beginning of or venturing upon something that one hopes to accomplish or carry through and often suggests failure <formed a plan and yet made no *attempt* to execute it> <the troops were driven back when they *attempted* to break through the enemy's line> <after many *attempts* to construct a flying machine the Wright brothers succeeded> <nothing

attempted, nothing gained) <here Shakespeare tackled a problem which proved too much for him. Why he *attempted* it at all is an insoluble puzzle—*T. S. Eliot*> **Try** is often thought of as a simpler equivalent of *attempt*; in discriminating use, however, the two terms are distinguishable by subtle differences in meaning. *Try* seldom loses the implication of effort or experiment directed toward the end of ascertaining a fact or of testing or proving a thing. This implication is especially apparent in some idiomatic phrases; thus, one *tries* a window by attempting to open it so as to find out if it is fastened; one *tries* one's hand at something by attempting to do something new to test one's ability or aptitude; one *tries* one's luck with the horses by betting on horse races in the hope of proving one's luck. *Try* is the word of choice when effort or experiment or testing are stressed rather than a venturing upon or undertaking <*try* to find which of two methods is the better> <make a *try* at solving the problem> <succeed at the first *try*> <freedom in thought, the liberty to *try* and err, the right to be his own man—*Mencken*> **Endeavor** heightens the implication of exertion and should be avoided as too strong when likelihood of success is implied. It often connotes a striving to fulfill a duty or obey a sense of fitness <she walked up and down the room *endeavoring* to compose herself—*Austen*> <the Good, which is the goal of all moral *endeavor*—*Inge*> <in Arnold's phrases the first step for every aspirant to culture is to *endeavor* to see things as they are, or "to learn, in short, the will of God"—*Eliot*> <we all *endeavor*, as Spinoza says, to persist in our own being; and that *endeavor* is, he adds, the very essence of our existence—*L. P. Smith*> **Essay** implies that the thing to be accomplished is especially difficult; otherwise it combines the foremost implications of *attempt* (that is, making a beginning) by suggesting a tentative effort and of *try* (that is, experiment) by suggesting the testing of a thing's feasibility <sculpture which attempted to unite repose and action, the "far off" and the familiar, in a way which Phidias and Donatello were too prudent to *essay*—*Brownell*> <conventions frequently take their rise . . . from the faulty *essays* of an early and as yet undeveloped technique—*Loves*> The last terms of this group, **strive** and **struggle**, not only carry heightened implications of difficulty and of correspondingly greater exertion, but also connote greater opposition to be overcome. *Strive* and *striving* suggest persistent endeavor to surmount obstacles created by one's weaknesses, one's lack of experience, the height of one's ambitions, or the power of resisting forces <*strive* to overcome a bad habit> <a *striving* to reach the top of his class> <*striving* to come out of the filth, the flies, the poverty—*Anderson*> <sick of self and tired of vainly *striving*—*James*> <the bitter, desperate *striving* unto death of the oppressed race—*Rose Macaulay*> **Struggle** literally and figuratively implies straining or stretching that suggests a tussle, a wrestling, or an effort to extricate oneself from what impedes or fetters <*struggled* to free himself from his attackers> <a *struggle* to reach the shore> So strong at times is this implication that the word loses or nearly loses its implication of endeavor <he clambered over half-visible rocks, fell over prostrate trees, sank into deep holes and *struggled* out—*Cather*> <the *struggle* between two strong-willed women to control one weak-willed man is the usual motive of the French drama in the nineteenth century—*Henry Adams*>

Ana *begin, commence, start, initiate, inaugurate
Ant succeed —**Con** accomplish, achieve, effect, fulfill, execute, *perform: attain, compass, *reach, gain
attempt *n* endeavor, essay, try, striving, struggle (see

under **ATTEMPT** *vb*)
Ana trial, test (see under **PROVE**): beginning, commencement, starting or start, initiation (see corresponding verbs at **BEGIN**)

attend 1 *tend, mind, watch
Ana *nurse, foster, nurture, cherish: supervise, oversee (see corresponding nouns at **OVERSIGHT**)
 2 escort, *accompany, chaperon, convoy

attention 1 **Attention, study, concentration, application** can mean the direct focusing of the mind on something, especially on something to be learned, worked out, or dealt with. **Attention** is applicable to the faculty or power as well as to the act <noises that distract one's *attention*> <if we had to think about breathing or digesting . . . we should have no *attention* to spare for anything else—*Shaw*> <every awareness is the simple form of *attention*—*Alexander*> Since the word carries no inherent implications about the power or the act or of the length of the latter's duration, it usually requires qualifying words or phrases <close *attention*> <trained habits of *attention*> <a few moments' *attention*> **Study** stresses continuity and closeness of attention; it usually also implies an aim such as the acquisition of knowledge, or the analysis of something that is complex or confusing, or the working out of a plan (as for action) or of a design (as for a book) <the president said that he would not comment upon the proposal until he had given it further *study*> <of making many books there is no end; and much *study* is a weariness of the flesh—*Eccles* 12:12> **Concentration** emphasizes the centering of the attention on one thing to the exclusion of everything else <amazing powers of *concentration*> <the learning to read poetry takes as much patience and *concentration* as the learning to write it—*Day Lewis*> **Application** usually implies persistence in fixing one's attention, and diligence and assiduity in the performance of all that is required; it suggests therefore a virtue won by effort and sheer force of will rather than (as with *concentration*) a power that has its origin in one's temperament or is the result of profound interest <*application* for ever so short a time kills me—*Lamb*> <her *application* to her studies in school—*Anderson*>

Ana diligence, assiduity, sedulousness, industriousness (see corresponding adjectives at **BUSY**)

Ant inattention —**Con** preoccupation, abstraction, absentmindedness (see corresponding adjectives at **ABSTRACTED**)

2 *courtesy, gallantry, amenity
Ana courting or court, wooing (see corresponding verbs at **INVITE**): deference, homage, *honor, reverence: solicitude (see **CARE**)

Con neglect, *negligence: indifference, aloofness, unconcernedness or unconcern (see corresponding adjectives at **INDIFFERENCE**): rudeness, discourteousness or discourtesy, impoliteness (see corresponding adjectives at **RUDE**)

attentive *thoughtful, considerate
Ana courteous, polite, gallant, chivalrous, *civil: solicitous, concerned (see under **CARE** *n*)

Ant inattentive: neglectful —**Con** *indifferent, unconcerned, aloof: *negligent, remiss: heedless, thoughtless, *careless

attenuate *vb* *thin, rarely, dilute, extenuate
Ana *weaken, sap: reduce, lessen (see **DECREASE**): dissipate (see **SCATTER**): *contract, shrink, constrict, deflate
Ant enlarge: dilate: enrich —**Con** *expand, amplify, swell, distend, inflate: *increase, augment

attest 1 witness, *certify, vouch
Ana *confirm, corroborate, substantiate, verify
Con *disprove, controvert, refute, confute: *deny, con-

tradict, gainsay

2 argue, prove, bespeak, *indicate, betoken

Ana demonstrate, test (see PROVE): *confirm, authenticate, substantiate

Ant belie —**Con** *misrepresent, falsify

attire *vb* *clothe, apparel, array, dress, robe

Ana accouter, appoint, equip, outfit, arm (see FURNISH)

Ant divest —**Con** *strip, bare, denude, dismantle

attire *n* *clothes, clothing, apparel, raiment, dress

attitude 1 *posture, pose

Ana mien, *bearing, port, presence, demeanor

2 *position, stand

Ana *point of view, angle, slant, viewpoint, standpoint: bias, prepossession, prejudice, *predilection

attorney 1 *agent, deputy, proxy, factor

Ana *substitute, supply, alternate

2 *lawyer, solicitor, counselor, barrister, counsel, advocate

attract *vb* **Attract, allure, charm, fascinate, bewitch, enchant, captivate** mean to draw another by exerting an irresistible or compelling influence over him. The same distinctions in implications and connotations are observable in the adjectival forms of these words, **attractive, alluring, charming, fascinating, bewitching, enchanting, captivating**. **Attract** always implies a drawing of one thing to another either because of qualities or properties in the agent or because of an affinity in the one attracted for that which draws it or a susceptibility to its influence (a magnet *attracts* iron) (positive electricity *attracts* negative) (a store of honey *attracts* a bear) (a stimulating new book *attracts* attention) When used in reference to persons of different sexes, it suggests the arousing of strong admiration or the awakening of love or desire in the person attracted (talking, in that beautiful voice which made everything she said sound like a caress, to Papa, who had begun to be *attracted* rather against his will—*Woolf*) **Allure** implies not only attraction but enticement by something that is fair, pleasing, or seductive. It may, like *lure*, suggest enticement into evil or danger (ancient fables of men *allured* by beautiful forms and melodious voices to destruction—*Hudson*) More often the stress is on the overcoming of resistance or indifference by the use of winning methods (as delicate flattery or the enhancement of feminine appeal) or by the bait of a pleasant prospect (an *alluring* advertisement of a summer resort) (she did not naturally attract men, but she became accomplished in *alluring* them) (the prospect of an interesting, vivid life *allures* many young women to the big cities) (young children should rather be *allured* to learning by gentleness and love, than compelled to learning by beating and fear—*Ascham*) **Charm** implies a power in the agent to cast a spell over and so dominate the person or thing affected (only his daughter had the power of *charming* this black brooding from his mind—*Dickens*) In its commonest use *charm* implies a power to evoke or attract admiration, but it usually heightens that implication by retaining the suggestion of casting a spell over the senses or over the mind (there was a grace about him which *charmed*, and a hint of latent power which impressed—*Buchan*) (Cyril, having taken a fancy to his brilliant aunt, had tried to *charm* her as he seldom or never tried to *charm* his mother—*Bennett*) **Fascinate**, like *charm*, implies the casting of a spell, but it usually suggests the ineffectiveness of resistance or helplessness to escape from the one that fascinates (the younger and weaker man was *fascinated* and helpless before the creeping approach of so monstrous a wrath—*G. D. Brown*) (personality . . . so *fascinating* that . . . it would absorb my whole nature, my whole soul, my very art itself—

Wilde) **Bewitch** and **enchant** likewise imply the exertion of a magical influence; the former, in its literal sense, suggesting witchcraft, and the latter, sorcery but these implications are often either exceedingly weak or actually lost. *Bewitch*, in its commonest sense, implies the exertion of a power of fascination that causes another to succumb to one's charms or allurements and to be under one's domination. *Enchant*, on the other hand, usually suggests a power to evoke joy or rapture or ecstatic admiration in the person fascinated (enchanting by the girl's beauty) (bewitched by her charms) (heavens grant that Warwick's words *bewitch* him not!—*Shak.*) (Sophia enjoyed the intimacy with Constance. As for Constance, she was *enchanted*—*Bennett*) **Captivate** is the weakest of these words in its suggestion of an irresistible influence or attraction. It implies a capturing of the fancy or feelings and a holding them in thrall for the time being, but it carries no suggestion of prolonged influence or of enslavement (the child *captivates* everyone with his sunny smile) (just the hero to *captivate* a romantic girl—*Irving*)

Ana *invite, solicit, court: entice, *lure, tempt, seduce: *catch, capture

Ant repel —**Con** *offend, affront, outrage, insult

attraction, affinity, sympathy are comparable when they denote the relationship between persons or things that are involuntarily or naturally drawn together and exert, to some degree, an influence over each other. **Attraction** implies the possession by one person or thing of qualities with the power to draw another person or thing so that the latter moves toward the former or, in the case of things, is brought into contact with it or clings to it. *Attraction* also implies the existence in the thing attracted of susceptibility to the influence of what attracts; in the case of persons it may be a natural inclination for, a predisposition to, or an innate liking of what attracts or, in the case of things, a tendency to unite or combine with the attractant. This natural or constitutional susceptibility is called **affinity**. Therefore *affinity* is the complement of *attraction* and not its synonym; thus, *attraction* is a force whereby a magnet draws iron to it, but iron is one of the few metals that have an *affinity* for the magnet; chemistry has a powerful *attraction* for minds that have an *affinity* for it (he too yearns as they do for something unattained by him. What an *affinity* for Christianity had this persecutor of the Christians!—*Arnold*) The words are interchangeable only when used of persons and things that are mutually attracted or have a reciprocal affinity for each other; even in these cases, however, the fundamental distinction in meaning prevails; thus, two persons may have an *attraction* (or an *affinity*) for each other; atoms remain in combination in a substance because of their *affinity* or *attraction* for each other. It is not by chance that in physics, the science concerned with energy, *attraction* is the word used in reference to atomic cohesion and that in chemistry, the science concerned with the composition of substances, *affinity* is the technical term. **Sympathy** stresses not so much the drawing together of persons or things as their reciprocal influence or their susceptibility to the same influences. When used in reference to things, it commonly implies interaction (the tides rise and fall in *sympathy* with the moon) (there is close *sympathy* between the heart and the lungs) When used in reference to persons, *sympathy* usually connotes spiritual affinity, or compatibility in tastes, interests, or aims (union of hearts, not hands, does marriage make, and *sympathy* of mind keeps love awake—*Hill*)

attractive alluring, charming, fascinating, bewitching, enchanting, captivating (see under ATTRACT)

- Ana** lovely, fair, *beautiful, bonny, pretty, comely: luring, enticing, tempting, seductive (see corresponding verbs at LURE)
- Ant** repellent: forbidding —**Con** *repugnant, abhorrent, distasteful, obnoxious: *offensive, repulsive, revolting, loathsome
- attribute** *n* 1 *quality, property, character, accident
2 emblem, *symbol, type
- Ana** *sign, mark, token, badge, note: *character, symbol, sign
- attribute** *vb* *ascribe, impute, assign, credit, accredit, refer, charge
- Ana** *fasten, attach, fix: predicate (see ASSERT): blame (see CRITICIZE): *accuse, charge
- attrition** contrition, repentance, *penitence, remorse, compunction
- Ana** regret, *sorrow, grief, anguish
- attune** tune, *harmonize
- Ana** *adapt, adjust, accommodate, reconcile, conform: accord, *agree, harmonize: temper (see MODERATE): balance, counterbalance, *compensate
- Con** alienate, *estrangle, wean
- atypical** *abnormal, aberrant
- Ana** *irregular, anomalous, unnatural: divergent, *different: deviating, departing (see SWERVE *vb*): *exceptional
- Ant** typical: representative —**Con** ordinary, *common, familiar: *usual, customary
- audacious** *brave, courageous, unafraid, fearless, intrepid, valiant, valorous, dauntless, undaunted, doughty, bold
- Ana** daring, daredevil, reckless, venturesome, *adventurous, rash, foolhardy: brazen, brash, *shameless
- Ant** circumspect —**Con** *cautious, wary, chary, calculating: prudent, sane, judicious, *wise
- audacity** *temerity, hardihood, effrontery, nerve, cheek, gall
- Ana** intrepidity, boldness, courageousness (see corresponding adjectives at BRAVE): daring, daredevilry, recklessness, rashness, foolhardiness (see corresponding adjectives at ADVENTUROUS): *courage, mettle, spirit: brazenness or brass (see corresponding adjective at SHAMELESS)
- Ant** circumspection —**Con** caution, wariness, calculation (see under CAUTIOUS): timidity, timorousness (see corresponding adjectives at TIMID): fearfulness, apprehensiveness (see corresponding adjectives at FEARFUL)
- audible** *aural, auricular
- Ant** inaudible
- audience** 1 *hearing, audition
2 public, *following, clientele
- Ana** devotees, votaries (see singular nouns at ADDICT)
- audit** *n* examination, inspection, scrutiny, scanning (see under SCRUTINIZE)
- Ana** check, *corrective, control: investigation, probe, *inquiry
- audit** *vb* examine, inspect, *scrutinize, scan
- audition** *hearing, audience
- auditor** *bookkeeper, accountant
- Ana** examiner, inspector, scrutinizer (see corresponding verbs at SCRUTINIZE): verifier, authenticator (see corresponding verbs at CONFIRM)
- auditory**, **acoustic**, **acoustical** mean of or relating to the hearing of sounds. **Auditory** often stresses hearing more than sound <the auditory powers of a dog> <the auditory sensitivity of an individual's organs of hearing> **Acoustic** emphasizes sound with reference to its capacity for being heard or the conditions under which it is heard <the acoustic quality of a person's voice> <acoustic properties of a hall> Both words are used in anatomy with little distinction, except that some human anatomists prefer
- acoustic** <the auditory nerve> <the acoustic area of the brain> **Acoustical** is often interchangeable with **acoustic** but when direct reference to the science of acoustics is intended, the former is preferred <acoustical engineering>
- augment** *increase, enlarge, multiply
- Ana** *intensify, aggravate, enhance, heighten: swell, *expand, amplify, dilate
- Ant** abate (sense 2) —**Con** reduce, diminish, *decrease, lessen, dwindle: curtail, abridge, *shorten
- augur** prognosticate, presage, portend, forebode, prophesy, forecast, *foretell, predict
- Ana** betoken, *indicate, bespeak, argue: apprehend, anticipate, divine, foreknow, *foresee
- augury** omen, portent, presage, prognostic, *foretold
- Ana** *sign, symptom, token, note, badge, mark: precursor, *forerunner, harbinger, herald
- Con** fulfillment, accomplishment, effecting or effect (see corresponding verbs at PERFORM): realization, actualization, materialization (see corresponding verbs at REALIZE)
- August** majestic, imposing, stately, noble, grandiose, *grand, magnificent
- Ana** impressive, *moving: *splendid, sublime, superb: awful, *fearful
- Ant** unimpressive: unimposing
- aura** *atmosphere, feeling, feel
- aural**, **auricular**, **audible** mean heard or perceived by the ear but they are not often interchangeable. **Aural** is applicable to any sensation or impression which affects the auditory sense rather than other senses <insensitivity to aural stimuli> <prefer the aural to the visual method in learning a language> **Auricular** is applicable not only to what is heard as distinguished from what is read but also especially to something communicated privately and addressed to the ear of a particular person; thus, *auricular confession* is used of the private confession of sins to a priest as distinguished from open confession before a congregation <you shall . . . by an *auricular* assurance have your satisfaction—*Shak.*> **Audible** is applicable only to sounds, voices, or conversations which are heard as distinguished from those which are not heard because too faint, too low, or uttered in a whisper <his voice being distinctly *audible* in the street—*Hardy*>
- aureate** *adj* euphuistic, flowery, *rhetorical, grandiloquent, magniloquent, bombastic
- Ana** *ornate, florid, flamboyant, rococo, baroque
- Ant** austere (*in style*)
- auricular** *aural, audible
- auspicious** *favorable, propitious, benign
- Ana** *lucky, fortunate, happy, providential: *hopeful, roseate: indicating or indicative, betokening (see corresponding verbs at INDICATE)
- Ant** inauspicious: ill-omened —**Con** *sinister, baleful, malign, malefic, maleficent: *adverse, antagonistic, counter: *ominous, portentous, unpropitious, fateful
- austere** *severe, stern, ascetic
- Ana** bald, *bare: unembellished, unadorned, unornamented, undecorated (see affirmative verbs at ADORN): dispassionate (see FAIR): rigorous, strict (see RIGID): grave, somber, *serious, sober, earnest
- Ant** luscious (*of fruits*): warm, ardent (*of persons, feelings*): exuberant (*of style, quality*) —**Con** lush, prodigal, *profuse: clement, lenient, indulgent (see FORBEARING): grandiloquent, magniloquent, aureate, flowery, *rhetorical: *impassioned, passionate, fervid, fervent
- autarchic** autarkic, autonomous, independent, *free, sovereign
- autarchy** autarky, autonomy, independence, freedom, sovereignty (see under FREE *adj*)
- autarkic** autarchic, autonomous, independent, *free,

sovereign

autarky autarchy, autonomy, independence, freedom, sovereignty (see under **FREE** *adj*)

authentic, **genuine**, **veritable**, **bona fide** denote being exactly what the thing in question is said to be or professes to be. The prevailing sense of **authentic** is authoritative or trustworthy with the implication of actuality or accordance with fact <confirmed both by legend and *authentic* record—*Froude*> <an *authentic* description of the Great Fire of London> The prevailing sense of **genuine** is real or true (see **REAL**) often with the implication of descent without admixture from an original stock or of correspondence without adulteration to the natural or original product called by that name <*genuine* maple syrup> <a *genuine* Russian wolfhound> <this is real merino, the *genuine* article> Often the stress is on sincerity or lack of factitiousness <*genuine* piety> <true simplicity and *genuine* pathos—*Wordsworth*> Both terms are used—*genuine* more frequently than *authentic*—as opposed to *spurious*, *counterfeit*, *apocryphal* <let them contrast their own fantastical personages . . . with the *authentic* rustics of Burns—*Jeffrey*> <what is *genuine* knowledge, and what is its counterfeit—*Newman*> It is idiomatic to say of a work (as a portrait) “this is an *authentic* portrait of George Washington” (that is, it was painted from life) and “this is a *genuine* Gilbert Stuart portrait of Washington” (that is, it is properly ascribed to Gilbert Stuart, the painter). **Veritable** implies a correspondence with truth; it is seldom used without a suggestion of asseveration or of affirmation of belief <I who am now talking . . . am the *veritable* Socrates—*Blackie*> <though Christ be the *veritable* Son of God—*Quiller-Couch*> It also is applied to words or phrases used figuratively or hyperbolically to assert the justice of the designation or of its truth in essentials <his fits of passion are *veritable* hurricanes> <he is a *veritable* fool> **Bona fide**, though often used as though it were the equivalent of *genuine* or *authentic*, is properly applied when good faith or sincerity is in question <a *bona fide* sale of securities> <a *bona fide* bid for a piece of property>

Ana authoritarian, oracular (see **DICTATORIAL**): *reliable, trustworthy, dependable: *correct, right, exact: true, *real, actual

Ant spurious —**Con** *fictitious, apocryphal, fabulous, mythical, legendary: *false, wrong: deceptive, *misleading, delusive, delusory: *supposed, supposititious, putative, purported, hypothetical

authenticate validate, verify, *confirm, substantiate, corroborate

Ana certify, accredit, endorse, *approve: *prove, try, test, demonstrate: avouch, warrant (see **ASSERT**)

Ant impugn: —**Con** *deny, gainsay, contradict, traverse, negative, contravene: reject, repudiate, spurn (see **DECLINE**)

author 1 *maker, creator

2 *writer, composer

authoritarian 1 dogmatic, *dictatorial, magisterial, doctrinaire, oracular

Ana despotic, autocratic, arbitrary, tyrannical, tyrannous, *absolute: domineering, imperious, *masterful

Ant liberal, libertarian: anarchistic, anarchic

2 *totalitarian

authority 1 *power, jurisdiction, command, control, dominion, sway

Ana ascendancy, *supremacy: government, ruling or rule (see corresponding verbs at **GOVERN**)

2 *influence, weight, credit, prestige

Ana exemplar, ideal, standard, pattern, *model, example: *expert, adept, artist: connoisseur, *aesthete

authorize, **commission**, **accredit**, **license** denote in common to invest with power or the right to act. One **authorizes** a person to act for oneself when he is given the necessary legal right or power with or without instructions of a specific character. Often discretionary powers are implied <*authorize* a friend to make an answer to an attack on one's character> <our clerks are *authorized* to receive contributions for the Red Cross> One **commissions** a person when one not only authorizes but instructs him to perform a definite duty or office <I am *commissioned* to make you an offer which I have told him . . . you would not accept—*Gray*> **Commission** may imply appointment as one's business agent (as in buying, selling, or supplying goods) or it may suggest an order to do a certain kind of work, especially work of a professional or artistic nature <*commissioned* an artist to paint his children's portraits> One **accredits** a person when one sends him, invested with authority and possessed of the proper credentials, as a representative, delegate, or ambassador <John Hay was *accredited* to the Court of St. James's> <the sovereign to whom I am *accredited*—*Motley*> One **licenses** a person or a business, a trade, or a craft when one grants formal legal permission to act in a certain capacity or to carry on a particular business, trade, or craft <*license* a teacher> <*license* medical school graduates to practice medicine> <a *licensed* dental laboratory> **License** sometimes stresses permission so strongly that the implication of authorization is obscured and that of regulation substituted <*license* beggars> <*license* a restaurant to sell liquor>

Ana empower, *enable: permit, allow, *let

Con enjoin, *forbid, prohibit, interdict

autobiography memoir, life, *biography, confessions

autochthonous indigenous, *native, aboriginal, endemic

Ant naturalized

Con foreign, alien, extraneous, *extrinsic

autocratic arbitrary, *absolute, despotic, tyrannical, tyrannous

Ana *dictatorial, magisterial: authoritarian, *totalitarian: *masterful, domineering, imperious: overbearing, arrogant (see **PROUD**)

Con yielding, deferring, submitting, capitulating (see **YIELD** *vb*): tolerant, lenient, *forbearing, indulgent

automatic *adj* 1 **Automatic**, **spontaneous** are not close synonyms but they agree in meaning brought into being or action by an internal as opposed to an external agency. **Automatic** was originally used to describe a thing that was self-acting or self-activated because it contained the principle of motion within itself <in the universe, nothing can be said to be *automatic*—*Davy*> Now it is applied more often to machines and mechanical contrivances which, after certain conditions have been fulfilled, continue to operate indefinitely without human supervision or until the conditions have materially changed; thus, an *automatic* firearm is so constructed that after the first round is exploded the force of the recoil or gas pressure loads and fires round after round until the ammunition is exhausted or the trigger is released; a thermostat is an *automatic* device which maintains the temperature of artificially heated rooms by operating the appropriate parts of a furnace when the temperature exceeds or falls below the point at which it is set. **Spontaneous** (see also **SPONTANEOUS**) applies not so much to objective things as to processes, particularly natural processes, thought of as originating without external agency or without human agency; thus, *spontaneous* generation implies origin of living directly from nonliving matter; *spontaneous* combustion implies a generation of heat through chemical changes in matter causing it to burn; a *spontaneous* growth

refers to vegetation produced neither from humanly sown seed nor from plantings.

2 mechanical, instinctive, *spontaneous, impulsive

Ana trained, disciplined, schooled, instructed (see TEACH); prompt, *quick, ready

Con deliberate, *voluntary, intentional

autonomous independent, sovereign, *free, autarchic, autarkic

autonomy independence, freedom, sovereignty, autarky, autarchy (see under FREE *adj*)

auxiliary, subsidiary, accessory, contributory, subservient, ancillary, adjuvant mean supplying aid or support. **Auxiliary** may imply subordinate rank or position (an *auxiliary* organization) (an *auxiliary* bishop) (the conclusion that the humanistic point of view is *auxiliary* to and dependent upon the religious point of view—*T. S. Eliot*) It often suggests something kept in reserve (an *auxiliary* motor in a sailboat) **Subsidiary** stresses subordinate or inferior status or capacity, often to the obscuring or loss of the notion of supplying aid (sub*subsidiary* streams) (a *subsidiary* company controlled by another company that holds a majority of the shares of its stock) **Accessory** so strongly stresses association or accompaniment that the notion of assistance or support is often obscured or lost; thus, an *accessory* mineral is one present in a rock but not an essential constituent; a person *accessory* to a crime (as the hirer of an assassin or a receiver of stolen goods) need not actively participate in its commission (see also *accessory n* under CONFEDERATE). **Contributory** stresses the assistance rather than the subordinate status of the assistant and usually implies the effecting of an end or result (resentment against the unjust tax was one of the *contributory* causes of the revolt) (contributory negligence on the part of a person suffering an injury may impair his right to recover damages) **Subservient** usually stresses the subordinate nature of the assistance (a catastrophe to which every incident should be *subservient*—*Crabbe*) It may stress the importance or usefulness of the end it serves and the nature of its motive (as commendable self-subordination or a sense of order and due relation) (he has uniformly made his talents *subservient* to the best interests of humanity—*Coleridge*) (those features of a work of art which by themselves would be unattractive or repulsive, like an “ugly” face, but in the work are *subservient* to the total effect and may even heighten its beauty—*Alexander*) **Ancillary** more than the other terms stresses the intimacy of the assistance (some practice in the deft use of words, with its correspondent defining of thought, may well be *ancillary* even to the study of natural science—*Quiller-Couch*) **Adjuvant** differs from *auxiliary*, its closest synonym, in attributing greater importance, more noticeable effectiveness, or a more definite influence to the thing so qualified; an *adjuvant* ingredient in a prescription often modifies the action of the major ingredient so as to make it effective (asceticism is merely an *adjuvant* discipline to . . . pathological forms of mysticism—*Ellis*)

Ana *subordinate, secondary, tributary: supporting, upholding, backing (see SUPPORT *vb*): helping, aiding, assisting (see HELP *vb*): supplementary, complementary (see corresponding nouns at COMPLEMENT)

avail *vb* **1** *benefit, profit

Ana meet, answer, *satisfy, fulfill: *help, aid

Con harm, hurt, *injure, damage

2 utilize, employ, *use, apply

Con *abuse, misuse: *neglect, ignore, slight, overlook: reject, refuse, spurn (see DECLINE)

avail *n* *use, service, account, advantage, profit

avarice greed, *cupidity, rapacity

Ana avariciousness, covetousness, acquisitiveness (see corresponding adjectives at COVETOUS): stinginess, niggardliness, miserliness, parsimoniousness (see corresponding adjectives at STINGY)

Ant prodigality —*Con* extravagance (see corresponding adjective at EXCESSIVE): liberality, generosity, munificence, bountifulness, bounteousness, openhandedness (see corresponding adjectives at LIBERAL)

avaricious *covetous, acquisitive, grasping, greedy

Ana miserly, close, closefisted, parsimonious, *stingy

Ant generous —*Con* *liberal, bountiful, bounteous, openhanded, munificent: lavish, prodigal (see PROFUSE)

avenge, revenge mean to inflict punishment on a person who has wronged oneself or another. Once close synonyms, these verbs are now increasingly divergent in implications. One may *avenge* or *revenge* (oneself or another who is wronged), but **avenge** is to be preferred when the motive is a desire to vindicate or to serve the ends of justice or when one visits just or merited punishment on the wrongdoer (avenge, O Lord, thy slaughtered saints—*Milton*) (I swear on my knees, on these stones, to *avenge* you on Foulon—*Dickens*) (he had *avenged* himself on them by havoc such as England had never before seen—*Macaulay*) On the other hand, one **revenge** oneself or, rarely, another when one inflicts injury on or upon an offender in a desire to exact satisfaction for his offense. *Revenge* may imply a desire for vindication or an aim to serve the ends of justice, but more often it suggests a desire to get even, to pay back in kind or degree, and therefore variously connotes malice, spite, or an unwillingness to forgive (the hope of *revenge*ing himself on me was a strong inducement—*Austen*) (the novelist obsessed with the errors of his past . . . is irresistibly drawn to *revenge* himself on his past by rewriting it—*Rolo*) (he saw that his true policy was not to *revenge* himself by executions and confiscations—*Stubbs*) Also, one may either *avenge* or *revenge* a wrong or injury but *avenge* usually implies that the end is just retribution whether the activity is in one's own or another's behalf, whereas *revenge* implies that the end is retaliation and the compelling spirit of the act hatred or bitterness; thus, Orestes *revenge*d his father's murder by killing the murderer, his mother, but the gods *avenged* his matricide by driving him mad.

Ana requite, recompense, compensate, *pay: vindicate, defend, justify (see MAINTAIN): *punish, chasten, chastise *Con* forbear, *refrain, abstain: remit, pardon, forgive (see EXCUSE)

aver declare, avouch, avow, profess, affirm, *assert, protest

Ana *maintain, defend, justify

Ant deny —*Con* gainsay, negative, contradict, traverse (see DENY)

average *n* **Average, mean, median, norm, par** denote something and usually a number, a quantity, or a condition that represents a middle point between extremes. Of these words **average, mean, median, and par** are also used as adjectives. **Average** is an arithmetical term applied to a quotient obtained by dividing a total by the number of items entering into this total so that the quotient represents the value each item would have if all were alike: thus, the *average* of 10, 12, 14, 16, 18, 20 is 15 (that is, 90 ÷ 6). Such averages are computed to give one a fair estimate of a group or a series in which there are inequalities (his *average* for his high school course was 82) (the *daily average* of the apple pickers was 25 bushels) When (as in sports) the total represents the number of chances taken or of opportunities offered or provided, the *average* is obtained by dividing the number of successes or successful

performances by this total. Such an average may be expressed as a percentage or a permillage and gives a fair estimate of a player's performance and a basis for comparison with others; thus, a baseball first baseman who handles a total of 1114 chances and makes 6 errors has a fielding *average* of .9946 (that is, $1108 \div 1114$); a baseball batter who is credited with 605 appearances at bat and has made 201 hits has a batting *average* of .332 (that is, $201 \div 605$). A similar method is used in estimating probabilities (as the chances of death for a person between given ages and the length of the period between recurrences of an unpredictable phenomenon); thus, the *average* of mortality for persons of a given age is computed from statistics of deaths at that age and of the population group consisting of persons of that age. *Average* also may be applied to a concept of what is the typical or ordinary person or thing of its kind (see also *average*, under MEDIUM) <the boy is above the *average* for his age and background> <the play is below the season's *average* in dramatic interest> **Mean** originally and still in certain idioms named a condition, quality, intensity, or rate that is midway between two extremes <observe a happy *mean* between abjectness and arrogance or between effusiveness and reserve> <he that holds fast the golden *mean*, and lives contentedly between the little and the great—Copper> In its mathematical use *mean* is more general than *average* (for which another name is *arithmetical mean*): it covers also the *geometric mean*, that is, the square root of the product of two numbers or quantities (or the *n*th root of the product of *n* quantities); thus, 10 is the *arithmetical mean* or *average* of 4, 16; while 8 is the *geometric mean* of 4, 16. **Median** refers to a midway point in position; in statistics it names the figure or quantity which represents the point at which there are as many instances below as there are above it; thus, the *average* of a group of 5 workers earning respectively 6, 8, 10, 16, and 20 dollars a day is 12 dollars a day, whereas the *median* for the same group is 10 dollars, because one half of them earn less than 10 dollars a day and one half more. **Norm** suggests a rule for guidance or a definite pattern to be followed; it also denotes especially in such fields as psychology and sociology, an average, whether mathematically computed or estimated, of performance or achievement of a group, class, or category that can be set up as a standard for or a minimum of accomplishment by a similar larger group, class, or category; thus, a course of study for a particular school grade is based upon a *norm* determined by the performance of children of the age, experience, and background commonly found in that grade <crime is merely a name for the most obvious, extreme, and directly dangerous forms of . . . departure from the *norm* in manners and customs—Ellis> <it is everything to have acquired and to possess such a *norm* of Poetry within us that we know whether or not what he wrote was Poetry—Quiller-Couch> **Par** usually refers to an average for an individual that is like the *norm* for a group. It often refers to an individual person's average in health, accomplishment, or performance <I feel below *par* (that is, below my average in health) today> <this theme is above *par* for that student> In British use *par* may be employed in reference to an average in amount <the *par* of crop production for this farm>

Ant maximum: minimum

average *adj* 1 mean, median, par (see under AVERAGE *n*)
2 middling, *medium, indifferent, fair, moderate, mediocre, second-rate

Ana *common, ordinary, familiar: *usual, customary

Ant exceptional: extraordinary —**Con** outstanding, prominent, conspicuous, *noticeable: superlative, *su-

bounty

aware, **cognizant**, **conscious**, **sensible**, **alive**, **awake** mean having knowledge of something, especially of something that for some reason is not obvious or apparent to all. One is **aware** of something through information or through one's own vigilance in observing or in drawing inferences from what one sees, hears, or feels (few, so far as I am *aware*, now claim the free speech to call a knave a knave—*T. S. Eliot*) (would not . . . have been worthy of his reputation had he not been *aware* . . . of the existence of this League. Journalists have to be *aware* of such things—*Rose Macaulay*) (Americans were becoming *aware* that American destiny can be pursued only in a world framework—*Lerner*) One who is **cognizant** of something has had it called to his attention or has become aware of it through his own powers of observation; in careful use the word commonly implies firsthand or certain knowledge (he is not, as yet, fully *cognizant* of the facts) (through the servants, or from other means, he had made himself *cognizant* of the projected elopement—*Trollope*) One is **conscious** of something that he sees, hears, feels, or apprehends when he allows it to enter his mind so that he recognizes its existence or fixes his attention on it; thus, one may or may not be *conscious* of his heartbeat or of someone passing through the room (he stood there motionless and in wonder, dimly *conscious* that Hallward was speaking to him—*Wilde*) (to be happy or miserable without being *conscious* of it seems to me utterly inconsistent and impossible—*Locke*) (lifelong short-sightedness . . . of which he has never ceased to be *conscious*—*Ellis*) One is **sensible** of something who through intuitive feeling or a rational perception realizes its existence (she was disturbing him extremely . . . but he was much too *sensible* of her goodwill to wound her feelings by telling her so—*Mackenzie*) (even he was *sensible* of the decorous atmosphere—*Joyce*) One who is **alive** to something is acutely susceptible to its influence or sensible of its existence (the Spring finds thee not less *alive* to her sweet force than yonder upstarts—*Cowper*) (they were fully *alive* to the danger of thwarting Barbara—*Galsworthy*) One who is **awake** to something is aroused to it or on the alert for developments (the country is not *awake* to the potential evils of a strict censorship)

Ana *sure, certain, positive: informed, acquainted, apprised (see INFORM)

Ant unaware —**Con** *insensible, insensitive, impassible, anesthetic: *ignorant

awe *n* fear, *reverence

Ana respect, esteem, *regard: *wonder, wonderment, admiration, amazement

Con contempt, scorn, disdain, despite (see under DESPISE): insolence, superciliousness, arrogance (see corresponding adjectives at PROUD)

awful *fearful, dreadful, frightful, terrible, horrible, shocking, appalling, terrific, horrific

Ana impressive, *moving: solemn, *serious, grave: imposing, august, majestic (see GRAND): sublime, superb, *splendid: *ominous, portentous

awkward, **clumsy**, **maladroit**, **inept**, **gauche** mean not adapted by constitution or character to act, operate, or achieve the intended or desired ends with ease, fitness, or grace. *Awkward* and *clumsy* are by far the widest of these terms in their range of application. *Awkward* often involves the idea of unfitness for easy handling or dexterous management. It may suggest unhandiness or inconvenience (an *awkward* tool) (awkward arrangement of controls) It may suggest embarrassment or discomfiture (an *awkward* situation) (an *awkward* silence) (an *awkward* meeting) (how earnestly did she then wish that her former

opinions had been more reasonable, her expressions more moderate! It would have spared her from explanations . . . which it was exceedingly *awkward* to give—*Austen*) When applied to persons, their build, their movements, or their manners, *awkward* usually implies a lack of ease or grace and often suggests inadequate muscular coordination or deficiency in poise; thus, an *awkward* gait implies lack of muscular control; an *awkward* greeting implies want of tact or address (an *awkward* dancer) (I, sitting in silence, felt *awkward*; but I was too shy to break into any of the groups that seemed absorbed in their own affairs—*Maugham*) (his manners were *awkward* and unconciliatory—*Buchan*) **Clumsy** stresses stiffness or heaviness with consequent want of flexibility or dexterity and is often applied to something so constructed or contrived as to be lumbering or ponderous (a boy of *clumsy* build) (a bear is the most *clumsy* of animals) (a *clumsy* narrative style) (clumsy boots) (when a great writer . . . creates a speech of his own which is too *clumsy* to be flexible and too heavy to be intimate—*Ellis*) (a great play in spite of . . . the *clumsy* machinery of the plot—*T. S. Eliot*) Often, and especially when applied to persons and their acts, it implies a lack of expertness or adroitness in manipulation often with a suggestion of bungling (the *clumsy* attempts of governments or other social bodies to interfere . . . will only make matters worse—*Hobson*) (he was a *clumsy* dissector because of his injury—*H. G. Wells*) **Maladroit** and **inept** imply awkwardness or clumsiness in managing whatever requires mental or social dexterity and are applicable only to persons and their acts or utterances. **Maladroit** implies a lack of tact or of skill in avoiding difficult situations in human intercourse and is often opposed to *politic* or *diplomatic* in their extended senses (a *maladroit* reply to a letter) (a *maladroit* remark) (it was more correct to “break” a piece of bad news to a person by means of a (possibly *maladroit* and unfeeling) messenger—*Thackeray*) **Inept** stresses inappropriateness or lack of aptness especially in a person's acts or utterances; often, in addition, it carries a suggestion of futility or absurdity; thus, a remark may be *inept* because it is so out of keeping with the topic under discussion as to seem pointless and also *maladroit* if it gives an awkward turn to the conversation (the conviction that the British were everywhere so *inept* that they deserved to lose—*Abend*) (one of the most often encountered weaknesses in the trial of criminal cases is the *inept* and unconvincing testimony of the law enforcement officer—*Paul Wilson*) (the sharp-eyed and penetrating critic for whom . . . this extraordinary and extraordinarily *inept* society has in fancied security unwittingly been waiting—*Brownell*) **Gauche** suggests a lack of social graces that makes for clumsiness or ineptness: it may imply also shyness, inexperience, or ill breeding (this journey . . . tended to reduce my shy, taciturn, and somewhat *gauche* manner—*G. G. Scott*)

Ana *stiff, wooden, rigid: embarrassing, discomfiting, disconcerting (see EMBARRASS)

Ant handy, deft: graceful —**Con** adroit, *dexterous: skillful, adept, *proficient: *easy, simple, facile, effortless

awry, **askew**, **askance** mean deviating from a straight line or direction. They may all imply divergence from what is straight or straightforward, direct, symmetrical, or orderly, but they are seldom applicable to the same things. **Awry** carries a strong implication of disorderliness, of disarrangement, or of confusion (the blinds all hang *awry*) (everything in the kitchen was *awry*) (their plans went *awry*) **Askew** stresses crookedness or distortion. It implies that the thing so described is set at a wrong angle, is twisted out of its proper position, or goes off in the wrong direc-

tion <every chair in this room is *askew*> <since the hurricane many of the trees are *askew*> <the seam in the front of your skirt runs *askew*> **Askance** is used chiefly in the set phrases "to look, or eye, or view *askance*" which all mean to observe or examine with mistrust, suspicion,

disfavor, jealousy, or disapproval <aside the Devil turned for envy; yet with jealous leer malign eyed them *askance*—Milton> <both . . . were viewed *askance* by authority—Gladstone>

axiom *principle, fundamental, law, theorem

B

babble *vb* gabble, jabber, prattle, chatter, patter, prate, gibber, gab, *chat

Ana *gossip, blab, tattle: converse, talk, *speak

babel hubbub, clamor, racket, *din, uproar, hullabaloo, pandemonium

Ana clamorously or clamor, vociferousness (see corresponding adjectives at VOCIFEROUS): *confusion, disorder

Con stillness, quietness or quiet, silentness or silence, noiselessness (see corresponding adjectives at STILL)

baby *vb* mollycoddle, humor, pamper, *indulge, spoil

bacillus bacterium, virus, *germ, microbe

back *n* *spine, backbone, vertebrae, chine

back *adj* *posterior, rear, hind, hinder, after

Ant front

back *vb* 1 *support, uphold, champion, advocate

Ana assist, aid, *help: favor, accommodate, *oblige: abet (see INCITE)

Con *advance, progress

backbiting *n* *detraction, slander, scandal, calumny

Ana aspersion, *animadversion, reflection, stricture: *abuse, invective, obloquy, vituperation: vilifying or vilification, defaming or defamation (see corresponding verbs at MALIGN)

Ant vindication (see corresponding verb at MAINTAIN)

—*Con* *compliment, flattery, adulation: praising or praise, eulogizing or eulogy, extolling (see corresponding verbs at PRAISE)

backbone 1 back, *spine, vertebrae, chine

2 grit, guts, sand, *fortitude, pluck

Ana *courage, resolution, tenacity, mettle, spirit: courageousness, intrepidity, dauntlessness, valiancy (see corresponding adjectives at BRAVE): nerve, *temerity, hardihood

Ant spinelessness

backdrop *background, setting, milieu, mise-en-scène, environment

backer *sponsor, surety, guarantor, patron, angel

background, setting, environment, milieu, mise-en-scène, backdrop are comparable when they refer to persons and their actions as found in real life or as represented in art and denote the place, time, circumstances, and conditions in which those persons live or carry on their activities. However they vary widely in their derivations and are not always interchangeable. **Background** refers primarily to a dramatic performance and to the back and usually dimly lighted part of the stage as distinguished from the better-lighted foreground where the main action usually takes place; it may be used similarly of pictorial art to denote that part of a picture which seems most remote from the spectator and against which the figures or principal objects represented seem to be projected (many of the Renaissance painters preferred a natural *background*, such as

mountain peaks and blue sky, others preferred an architectural *background*, such as a group of buildings or an interior) In its common extended use the term is often widened in scope to include the whole aspect of the environment of something (as an historical event, a movement, a career, or a phase of a person's or a people's development) that is capable of being seen in perspective and that may be viewed as antecedent, causal, or intimately related to the fundamental quality of what it environs <to know a person well one needs to know his *background*> <students of English literature must have as *background* a knowledge of English history> <landscape is treated as an accessory to human life and a *background* to human events—Binyon> **Setting** also derives its basic implications from the arts, originally from the jewelers' art, where the term is used of the framework of precious metal in which a gem is mounted, and later from the dramatists' art, where it is used of the framework (as scenic paintings and furniture) which indicates to the spectator the surroundings in which the action of a play takes place. Hence *setting* is preferred to *background* as a designation of the element in a novel, a play, or other literary representation of human life which is distinguished from the plot and the characters and which is the author's imaginative reconstruction of the time, place, and conditions in which his characters live and act. When used in reference to real life, *setting* commonly connotes the standpoint of one who looks at human beings and their activities as though they were dramatic or literary representations <what a social *setting* it was, that little world into which Mark Twain was born! It was drab, it was tragic—Brooks> **Environment** basically denotes the surroundings and especially the natural surroundings (as of a town, a body of water, or an individual) <relaxed . . . in a cozy *environment* of apple-green furniture and art linoleum—Punch> When relating to a person or a living being *environment* commonly suggests not only natural surroundings but any or all external factors (as social or economic conditions, nutrient supply, or crowding) that are important in the physical, mental, and moral development of the species or the individual or as formative influences <the *environment* which produced Jonathan Edwards and Cotton Mather—Brownell> When the formative influences in a person's development are the result of heredity or nature, *background* is the preferred term; when they are the product of his surroundings or his nurture, *environment* is the more likely choice; thus, one may say that, although it is impossible to change a child's *background*, he may turn out well if brought up in a different *environment*. **Milieu** carries none of the scientific implications of *environment*, yet it also means surroundings and is used chiefly in reference to the physical and social surroundings of a person or group of persons. It is preferred to *environment* when there is the intent to evoke a clear picture or to suggest the specific character or atmosphere of such surroundings; it may be used in reference to imagined as well as to actual

persons and therefore is often interchangeable with *setting* (his chief object . . . is not to make an isolated study of this or that *milieu*, or to describe a particular social sphere—*Athenaeum*) **Mise-en-scène** is the equivalent of *setting*, especially as referred to a theatrical performance. However its stronger suggestion of the use of properties to achieve a given atmosphere or theatrical effect is the reason for its preference by some writers when the reference is not specifically to a dramatic performance or even to invented scenes (in *The Scarlet Letter* how truly in the spirit of art is the *mise-en-scène* presented . . . The material investiture of the story is presented . . . by the reserved, fastidious hand of an artist, not by the gaudy fingers of a showman or the mechanical industry of a department-store window dresser—*Cather*) **Backdrop** denotes a drop curtain at the rear of the stage which provides the decorative or realistic background for the action of a play and brings players and their movements into relief; it is increasingly common in an extended sense as a substitute for *background* or *setting* or *milieu* when there is the intent to stress pictorial effect rather than social influence or spiritual significance (against the multitowered *backdrop* of New York he has pictured . . . the passions and hopes, the dreams and desolations, the greeds and corruptions, of the seven million souls that are its lifeblood—*Atlantic*)

backslide *vb* relapse, *lapse

Ana revert, *return: deteriorate, degenerate, decline (see corresponding nouns at DETERIORATION): *recede, retreat, retrograde

backslider *renegade, apostate, recreant, turncoat

backsliding *n* relapse, lapse (see under LAPSE *vb*)

Ana retrogressiveness or retrogression, retrogradation (see corresponding adjectives at BACKWARD): abandoning, deserting, forsaking (see ABANDON)

backward, retrograde, retrogressive, regressive all involve the idea of not moving or going ahead, or forward, or in advance. Only when applied to motion or a movement does **backward** imply the reverse of forward motion (a *backward* thrust of a hand) (the *backward* swimming of a crayfish) Its commonest implication is failure to move ahead; in this sense it is chiefly applied to human beings who do not or cannot progress or develop with others of their age, kind, or class or to persons or things that hold back or are held back from doing what is normal or to be expected; thus, a child who is unable to keep up with others of his age in school because of some degree of mental deficiency is described as *backward*; a person who holds back from expressing his appreciation, or in urging his candidacy for a position, because of shyness or self-distrust is also describable as *backward*; when cold weather and frosts delay the development of vegetation beyond the normal or usual time, the season may be called *backward* (England, throughout the middle ages, was one of the *backward* countries of Europe: it was on the outskirts of the great continental civilization—*Mumford*) **Retrograde** is not only applicable to backward motion and backward movement but also to any moving or seemingly moving thing that proceeds in a direction which is contrary to the direction usually followed by things of its kind (retrograde motion of a wheel) (a *retrograde* planet seemingly moving from east to west) It is also applicable to a process (as of natural development) in which the events occur in an order contrary to the usual or progressive; thus, an animal that passes from a more complex to a simpler and often degenerate state during development is said to manifest *retrograde* development. *Retrograde* when applied to races, cultures, institutions, or movements differs from *backward* in implying decline or degeneration; thus, a

backward society is one that does not progress, while a *retrograde* society is one that is relapsing into barbarism or sinking into an inferior state. **Retrogressive** implies opposition to *progressive*. Like *retrograde*, and unlike *backward*, it implies movement in the direction that is the reverse of forward; unlike *retrograde*, however, it is seldom applied to physical movement; thus, one speaks of a *retrograde* (but not a *retrogressive*) movement or rotation, but one might speak of *retrogressive* (or *retrograde*) cruelties or behavior when stressing decline from some higher or more progressive level. *Retrogressive* is sometimes preferred as a milder term when the reverse of improvement or betterment rather than positive decline from an improved or better state is implied (a *retrogressive* policy) (objections were made to the proposed legislation on the ground of its probable *retrogressive* effect) **Regressive** carries a stronger implication of going backward by steps or degrees and often, also, a weaker implication of failure to progress or move ahead than any of the others. Consequently it is often the preferred term when a colorless or uncolored statement of fact is intended; thus, when one infers a cause from an effect or a principle from a number of facts he follows a *regressive* process of reasoning; the process of growing old may be described as a *retrograde* development when the emphasis is on its backward direction, as a *retrogressive* development when the stress is on the absence of progress, and a *regressive* development when the intent is to indicate that it is marked by an inversion of order in its stages; a *regressive* loss of memory implies that the most recent memories disappear first and the earliest linger longest.

Ana laggard, dilatory, *slow: *stupid, slow, dull, dense: *lethargic, sluggish: *abnormal, atypical

Ant advanced—**Con** civilized, cultured (see corresponding nouns at CIVILIZATION): cultivated, cultured, refined (see corresponding nouns at CULTURE): educated, instructed (see TEACH)

bactericidal *adj* germicidal, antiseptic, disinfectant (see under ANTISEPTIC *n*)

bactericide germicide, *antiseptic, disinfectant

bacterium *germ, microbe, bacillus, virus

bad 1 **Bad, evil, ill, wicked, naughty** are comparable when they mean not meeting with the approval of the ethical consciousness. **Bad** is a very general term and applies to anyone or anything reprehensible, for whatever reason and to whatever degree (almost as *bad*, good mother, as kill a king, and marry with his brother—*Shak.*) (Johnnie's been a *bad* boy today: he's emptied the cookie jar) (bad dog! you've torn up my scarf) **Evil** is a stronger term than *bad* and usually suggests the sinister or baleful as well as the reprehensible (evil deeds) (the *evil eye*) (he knew nothing bad about him, but he felt something *evil*—*Cather*) (an *evil* and treacherous folk, and they lied and murdered for gold—*Morris*) (the *evil* counselors who . . . abused his youth—*J. R. Green*) **Ill** is close to *evil* in basic meaning and may suggest an active malevolence or vicious intent (an *ill* deed) (it was *ill* counsel had misled the girl—*Tennyson*) Often *ill* may be used in a weaker sense to suggest the imputing or implying of evil or sometimes of mere objectionableness or inferiority to someone or something (held in *ill* repute by his fellows) (attached an *ill* significance to the statement) (had an *ill* opinion of their abilities) **Wicked** implies the actual often conscious or deliberate contravention or violation of moral law (God is angry with the *wicked* every day—*Ps* 7:11) (wicked designs) It is sometimes used with weakened, even playful, force (you are the *wickedest* witty person I know—*Lytton*) **Naughty** was once serious (a most vile flagitious man, a sorry and *naughty* governor as could be—*Barrow*)

but is now trivial in its application. Mostly it implies mischievousness on the part of a child too young to have a lively sense of right and wrong <Charles never was a *naughty* boy. He never robbed birds' nests, or smoked behind the barn, or played marbles on Sunday—*Deland*> Sometimes it expresses charitable censure of a person of responsible age who has done wrong (it was only one *naughty* woman out of the world. The clergyman of the parish didn't refuse to give her decent burial—*Meredith*) Often it is applied to what is impolite, impudent, or amusingly risqué <the still popular, and still *naughty*, and perpetually profane *Decameron*—*Higley*>

Ana iniquitous, *vicious, villainous: *base, low, vile: *immoral, unmoral, amoral

Ant good —**Con** righteous, virtuous, *moral, ethical, noble

2 Bad, poor, wrong are comparable when they mean not measuring up to a standard of what is satisfactory. **Bad** implies a failure to meet one's approval; it need not imply positive condemnation, but it always suggests that the thing so described falls below the mark or is not up to what one would call good (he is a *bad* correspondent) <her handwriting is very *bad*> (it's a *bad* day for a long walk) It often also implies positive harmfulness (a *bad* light for the eyes) (<*bad* food for the young) <a *bad* book for a depressed person) <a *bad* environment) (it is *bad* for her to live alone) Sometimes it suggests corruption or pollution (this meat is *bad*) (<*bad* air) (<*bad* water) Often also it may suggest unpleasantness in any degree, in this sense ranging from the merely displeasing to the strongly offensive or painful or distressing (it leaves a *bad* taste in the mouth) (<have *bad* news) (<he always comforted himself when things were *bad* by thinking how much worse they might have been) **Poor** also implies a failure to reach a satisfactory point or level, but it usually imputes to the thing so described a deficiency in amount or in returns or a lack of a quality or qualities essential to excellence; thus, a *poor* crop is one that is relatively scanty; *poor* land is wanting in fertility, while *bad* land lacks the potentiality for agricultural development; a *poor* book may be devoid of interest or artistic quality, but a *bad* book is commonly offensive to one's sense of propriety; a *poor* carpenter is one lacking in skill (business was *poor* this year) (<a *poor* dancer) (<*poor* bread) (<a *poor* return for one's effort) **Wrong** (see also **FALSE**) implies a failure to conform to a strict standard; it suggests deviation from a standard of what is satisfactory or, more specifically, fit, appropriate, proper, or orderly (I know that something is *wrong* with this suit) (<do not make a *wrong* choice in selecting your profession) (<hang a picture in the *wrong* light) (<there is nothing *wrong* in this arrangement of the furniture)

Ant good —**Con** excellent, perfect, meritorious (see corresponding nouns at **EXCELLENCE**); right (see **GOOD**)

badge *sign, token, mark, note, symptom

badger *vb* *bait, hound, chivy, hector, ride, heckle

Ana *annoy, vex, bother, irk: harass, harry, *worry, pester, plague, tease

badinage, persiflage, raillery denote a kind of banter. **Badinage** is applied to banter that is playful and delicate, **persiflage** to banter that is derisive but not cutting, and **raillery** to banter that is keen and often sarcastic in its ridicule (love . . . permits itself even gentle mocking and friendly *badinage*—*Ward*) (I have the fresh and charming letter she wrote to her husband on the occasion . . . with a trace of *gay persiflage* of all the old people at Sudbury and their meetinghouse—*Ellis*) (<a company in which you have been galled by the *raillery* of some wag by profession—*Beresford*)

Ana bantering or banter, chaffing, kidding, joshing, jolly-

ing (see corresponding verbs at **BANTER**): *fun, game, jest, sport

badlands *waste, desert, wilderness

baffle balk, circumvent, outwit, foil, thwart, *frustrate

Ana *puzzle, mystify, confound, dumbfound: discomfit, rattle, faze, *embarrass, disconcert: *confuse, addle, muddle: *hamper, fetter, hog-tie: *hinder, impede, obstruct, block

bag *n* **Bag, sack, pouch** denote a container made of a flexible material (as paper, cloth, or leather) and open or opening at the top. **Bag** is the widest in its range of application and is referable to anything that comes under this general description and is used to hold something (money *bag*) (traveling *bag*) (paper *bag*) (saddlebag) (mailbag) **Sack** is usually more restricted in its application than *bag*; within these limits, however, the terms are interchangeable. **Sack** commonly suggests oblong shape, a coarse material and, often, crude workmanship (gunny-sack) (paper sack) (flour sack) It is probably more often used than *bag* when it refers to containers and their contents (deliver 1000 sacks of grain) (sacks of potatoes) (sell coal by the sack) **Pouch** is applied chiefly to a small bag carried on the person or in the hand and used as a substitute for a pocket; it often specifically designates a bag that is opened or closed by means of a gathering string, zipper, or flap (tobacco pouch) (pouch for bullets) (pouch-shaped handbag) (mail pouch)

bag *vb* capture, trap, snare, entrap, ensnare, *catch

bail *n* bond, surety, security, *guarantee, guaranty

bail *vb* *dip, ladle, scoop, spoon, dish

balliwick province, domain, territory, *field, sphere

bait *vb* **Bait, badger, heckle, hector, chivy, hound, ride** mean to persist in tormenting or harassing another. **Bait** derives its implications from its basic reference to the action of dogs set on to bite and worry an animal (as a chained bear, boar, or bull). Both in this and in extended use it suggests wanton cruelty or malicious delight in persecution (the diversion of *baiting* an author has the sanction of all ages—*Johnson*) **Badger** is more specific than *bait*. Basically it suggests the baiting of a badger that has been trapped in a hole or barrel and can neither escape nor adequately defend itself from attack; in reference to persons it implies pestering or persecuting that drives the victim into a hopelessly confused or frenzied state of mind (<*badger* a witness being cross-examined) (<the mill foreman so taunted the workers, so *badgered* them and told them that they dared not quit—*Sinclair Lewis*) **Heckle** implies persistent questioning of a speaker (as a candidate for election, a legislator discussing a bill before the house, or a person advocating or condemning a movement or cause) and an attempt to bring out his weaknesses or to destroy the effect of his argument. It suggests an intent to harass and confuse a speaker by frequent interruptions and by inconvenient or embarrassing questions (<the advocates of any unpopular cause must learn to endure *heckling*) (<infuriates some of his fellow Justices by *heckling* lawyers who appear before the Court—*Sat. Review*) **Hector** always carries a suggestion of bullying and implies a spirit-breaking scolding or maddeningly domineering treatment (<we are . . . not to be *hected*, and bullied, and beat into compliance—*Fielding*) (<they had hard times when they were little . . . and were *hected* and worried when they ought to have been taking some comfort—*Stowe*) **Chivy** and **hound** both stress relentless chasing and pursuing. **Chivy**, however, often also suggests teasing or annoying past the endurance of the victim (<having seen two successive wives of the delicate poet *chivied* and worried into their graves—*Conrad*) **Hound** implies persistent and long-continued persecution till the tormentor's

end is achieved or the victim acknowledges himself defeated (he was *hounded* by reporters until he made his stand known) (grandfather had been *hounded* out of his congregation because he couldn't hold her to their standards of behavior for a minister's wife—*Mary Austin*) **Ride** implies persistent goading or spurring (as by unfair criticism, ridicule, or onerous impositions) (a hard taskmaster *rides* those who serve him) (he was *ridden* so hard by the coach that he was no longer fit to remain on the team)

Ana *worry, annoy, harass, harry: torment, rack, torture, try, *afflict

bait *n* *lure, snare, trap, decoy

Ana allurements, attraction (see corresponding verbs at ATTRACT): enticement, temptation (see corresponding verbs at LURE)

bake *parch*, *dry, desiccate, dehydrate

balance *n* 1 **Balance**, **equilibrium**, **equipoise**, **poise**, **tension** are comparable when denoting the stability or efficiency resulting from the equalization or exact adjustment of opposing forces. **Balance** suggests a steadiness that results when all parts are properly adjusted to each other, when no one part or constituting force outweighs or is out of proportion to another (kept her *balance* on the icy street) (keeping his emotional *balance* under stress) (the *balance* between civilian and military needs—*Collier's Yr. Bk.*) (establish an acceptable *balance* between satisfactions and frustrations—*Kardiner*) (I doubt that Thoreau would be thrown off *balance* by the fantastic sights and sounds of the 20th century—*E. B. White*) **Equilibrium** may be interchangeable with *balance* (retain physical and emotional *equilibrium* under stress) but is more often restricted to a mechanically produced or producible property deriving from a thing's construction, support, or relation to external forces and then often suggests a tendency to return to an original position after disturbance (a ship's *equilibrium*) (an *equilibrium* of opposing human impulses—*Sinclair Lewis*) (establishing an *equilibrium* between the Western forces and a possible aggressor—*Current History*) (a fundamental lack of *equilibrium* between different aspects of the constitutional distribution of power—*R. M. Dawson*) **Equipoise** suggests perfection of balance or stability of equilibrium (to maintain . . . *equipoise* among contending interests—*Butterfield*) (the structure remains upright, a marvel of *equipoise*—*Norman Douglas*) (the *equipoise* of intellectual and pietistic interests in him—*H. O. Taylor*) **Poise** denotes an equality of opposing or different things or forces and often implies a state or an appearance of perfect balance or serenity especially of mind (the condition of a *poise* between widely divergent impulses and emotions that produces a strange serenity—*Leavis*) (the main characteristic of their blond gray-eyed colleague is quiet *poise* that stands her in good stead in the exciting, high-pressure work—*Newsweek*) **Tension** in this relation implies strain, either a pull from both ends or an outward pressure in every direction, of such equality that there results a tautness without undue strain at any point; applied to a mental condition it implies an inner balanced vital opposition of moral or intellectual forces, powers, or qualities (indolent as he was on all occasions which required *tension* of the mind, he was active and persevering in bodily exercise—*Macaulay*) (the whole *tension* of Gide's work is characterized in those sentences: the incessant dialectic of a man who knows no peace but the precarious equilibrium of opposites—*Times Lit. Sup.*) (in letting the whole physical system lose tone, for lack of the *tension* which gaiety imparts—*Brownell*)

2 *symmetry, proportion, harmony

3 *remainder, rest, residue, residuum, leavings, remnant, remains

balance *vb* 1 counterpoise, counterbalance, *compensate, countervail, offset

Ana attune, *harmonize, tune: correspond, accord, square, *agree

2 poise, ballast, trim, *stabilize, steady

Ana settle, *set: waver, sway, oscillate, fluctuate (see SWING): rock, *shake

Con *overturn, upset, capsize

bald *bare, barren, naked, nude

Ana austere, *severe: unembellished, unadorned, unornamented (see affirmative verbs at ADORN): *colorless, uncolored

Con *ornate, florid

balderdash *nonsense, twaddle, drivel, bunk, poppycock, gobbledygook, trash, rot, bull

bale *n* *bundle, package, pack, parcel, bunch, packet

baleful maleficent, malefic, malign, *sinister

Ana threatening, menacing (see THREATEN): *ominous, portentous, fateful: hellish, *infernal: diabolical, *fiendish, devilish

Ant beneficent —*Con* *beneficial, advantageous: salutary, wholesome, *healthful: benign, *favorable, propitious, auspicious

balk *vb* 1 *frustrate, thwart, foil, baffle, circumvent, outwit

Ana defeat, beat, lick, *conquer, overcome: block, obstruct, impede, *hinder: *prevent, forestall

Ant forward —*Con* further, promote, *advance: abet (see INCITE): assist, aid, *help: *support, uphold, back

2 jib, shy, boggle, stickle, scruple, *demur, strain, stick

Ana *hesitate, falter, waver: refuse, *decline: shrink, flinch, quail, *recoil

Con *yield, submit, capitulate, succumb, relent

balky *contrary, restive, perverse, froward, wayward

Ana hesitant, reluctant, averse, loath, *disinclined, indisposed: *obstinate, stubborn, mulish: refractory, recalcitrant, *unruly

Con amenable, docile, tractable, *obedient, biddable: submissive, subdued, *tame

ballast *vb* *stabilize, steady, balance, trim, poise

ballot *n* vote, *suffrage, franchise

ballyhoo *n* *publicity, promotion, propaganda

Ana advertisement, broadcasting (see under DECLARE)

balmy 1 aromatic, fragrant, *odorous, redolent

Ana refreshing, restoring, rejuvenating (see RENEW): pleasing, grateful, welcome, *pleasant

Ant rank, noisome —*Con* *malodorous, fetid, stinking, fusty, musty, putrid

2 *soft, gentle, smooth, bland, mild, lenient

Ana agreeable, *pleasant, gratifying, grateful: gladdening, delighting, rejoicing, regaling (see PLEASE): assuaging, allaying, lightening, relieving (see RELIEVE): salubrious, salutary (see HEALTHFUL)

Con *intense, vehement, fierce, exquisite, violent: vexing, bothering or bothersome, irking or irksome, annoying (see corresponding verbs at ANNOY)

bamboozle trick, hoodwink, *dupe, gull, hoax, befool

Ana delude, *deceive, beguile, mislead: outwit, circumvent (see FRUSTRATE): defraud, cozen, overreach, *cheat, swindle

ban *vb* prohibit, *forbid, interdict, inhibit, enjoin

Ana bar, block, *hinder: *prevent, preclude: *exclude, debar, rule out

Con allow, permit, suffer, *let: tolerate, abide, suffer (see BEAR)

banal flat, jejune, inane, vapid, wishy-washy, *insipid

Ana *trite, hackneyed: *simple, fatuous, silly, asinine: commonplace, platitudinous, bromidic (see corresponding

nouns at COMMONPLACE)

Ant original: *recherché* —**Con** fresh, *new, novel: pithy, terse, succinct (see CONCISE): stimulating or stimulative, provoking or provocative, exciting, piquing (see corresponding verbs at PROVOKE)

band *n* 1 *bond, tie

Ana connection, link, joining (see corresponding verbs at JOIN): *joint, articulation, suture

2 *strip, stripe, ribbon, fillet

3 troop, troupe, *company, party

Ana coterie, clique, *set, circle: horde, mob, *crowd: society, club, *association, order

bandy *vb* *exchange, interchange

bane *poison, venom, virus, toxin

baneful *pernicious, noxious, deleterious, detrimental

Ana harmful, injurious, mischievous, hurtful (see corresponding nouns at INJURY): malign, *sinister, baleful: *poisonous, venomous, toxic

Ant beneficial —**Con** advantageous, profitable (see BENEFICIAL): salutary, wholesome, *healthful

banish, exile, expatriate, ostracize, deport, transport, extradite are comparable when denoting to remove by authority or force from a country, state, or sovereignty. To **banish** is to compel one, usually by public edict or sentence, to leave a country or section, although not necessarily one's own, either permanently or for a fixed time and with or without restriction to a given place (<*banish* an enemy of the King> <the Newtonian scheme of the universe does not *banish* God from the universe—*Times Lit. Sup.*> To **exile** is to banish or cause to depart under constraint from one's own country; it may connote either expulsion by formal sentence or decree or the compulsion of circumstances and an enforced absence or sometimes a prolonged voluntary absence; thus, Russians and foreigners alike may be *banished* from Russia, but only Russians can be *exiled* to Siberia; Dante was *banished* from his native Florence because of political troubles, but he *exiled* himself for the rest of his life as a protest against conditions there. **Expatriate** differs from *exile* sometimes in its implication of loss of citizenship in one's own country (<*expatriate* Jews from Germany> but oftener in its implication of voluntary exile or naturalization in another country <Henry James *expatriated* himself from the United States> *Exile* often suggests a possibility of return with full rights to one's own country; *expatriate*, however, may imply the exclusion of that possibility. In historical context **ostracize** denotes a temporary banishment by popular vote from one of the cities of ancient Greece; the term is used more commonly in an extended sense which implies not expatriation, but a forced exclusion by common consent, from recognition or acceptance by society <the dangers inherent in *ostracizing* from public service men of eminence—*Kimmis Hendrick*> <exposed as a cheat and *ostracized* by his fellow officers> To **deport** is to send a person out of a country of which he is not a citizen either because his presence is considered inimical to the public welfare or because he has not lawfully entered that country. It often implies return to the country of which the deported person is a citizen or subject or from which he has emigrated, especially if he is without funds to go where he chooses. To **transport** is to banish to a penal colony a person convicted of a crime <convicts were *transported* to Australia> To **extradite** is to deliver over an alleged criminal at the request of the sovereignty or state having jurisdiction to try the charge <since no treaties existed between the Allied Control Commission and neutral states, it follows that no duty to *extradite* existed among the latter—*Neumann*> <the escaped prisoner was *extradited* by the State of Illinois at the request of the State

of Georgia>

Ana *eject, expel, oust: *exclude, debar, eliminate, shut out

Con admit, *receive, accept: *harbor, shelter, entertain: protect, shield (see DEFEND)

bank *n* 1 *shoal, bar, reef

2 *shore, strand, coast, beach, foreshore, littoral

3 mass, heap, pile, stack, shock, cock (see under HEAP *vb*)

Ana *aggregate, aggregation, conglomerate, conglomeration: assemblage, assembly, collection, gathering (see under GATHER)

bank *vb* mass, *heap, pile, stack, shock, cock

Ana collect, assemble, *gather

Con *scatter, disperse

bank *vb* *rely, count, reckon, trust, depend

bankrupt *vb* impoverish, exhaust, *deplete, drain

Ana denude, *strip, bare: sap, cripple, disable, undermine (see WEAKEN)

banner *n* *flag, standard, ensign, color, streamer, pennant, pendant, pennon, jack

banquet *dinner, feast

banter *vb* **Banter, chaff, kid, rag, rib, josh, jolly** are comparable when denoting to make fun of good-naturedly (as by reminding one of an actual fault, foible, failure, or shortcoming, by exaggerated praise obviously remote from the truth, or by playful imputation of undeserved success). The same distinctions in implications and connotations are found in their corresponding nouns. **Banter** is the generic term and may usually be substituted for any of the others, though not without loss of specificity <"Why didn't you get tipsy, Sir? Don't you ever intoxicate yourself but at lawful marriages? . . ." Ripton endured his *bantering* that he might hang about Richard—*Meredith*> To **chaff** is to nuzzle with rough banter <they *chaffed* me for leaving so early—*Price*> **Kid** is frequently as general in meaning as *banter* <he is very fond of placing his hand on his heart and declaiming about his warm virtues. He gets a lot of *kidding* for it—*Gunther*> More often than perhaps any other word in this group, however, it specifically implies an attempt at good-natured imposition on one's gullibility; thus, "No *kidding*?" is a common way of asking "Are you serious?" of one who has made a statement that sounds incredible <she says he's going to do a portrait of her. I think he's *kidding* her—*Harper's*> Used with a reflexive pronoun, *kid* implies a shutting one's eyes to the truth <if you think you can avoid hard work and long hours and yet write something memorable, you are just *kidding* yourself> To **rag** is to banter repeatedly or persistently and often annoyingly to the victim <there were, even, no unpleasantnesses (aside from a bit of *ragging* about his galoshes . . .)—*Bergen Evans*> **Rib** implies bantering under conditions which make it impossible or inadvisable for the butt to retort or defend himself and also may imply specifically the enactment of a role on the part of the ribber <high government officials are *ribbed* in the skits presented yearly before the Gridiron Club in Washington> <*ribs* her fellow Russians as the temperamental ballerina who introduces her equals as her "supporting cast"—*Time*> **Josh** and especially **jolly** imply transparent good humor in the funmaker. **Josh** usually suggests homeliness and unsophistication <for children he has jokes and candy. He cheers the men . . . and *joshes* the women—*Time*> <running the chatty, homespun, *joshing* sort of thing that actually goes on in a town—*S.R.L.*> **Jolly** often implies an ulterior aim such as putting the person bantered into good humor so that he will grant a favor <he was a good salesman who *jollied* his customers, but not too obviously> <*jollied* and joked with sailors in the street—*Wecter*>

Ana twit, rally, deride, *ridicule

baptize, **christen** mean to make one a Christian or to admit one to a Christian communion by a ceremony in which water is poured or sprinkled on the head or in which the body is immersed in water. **Baptize** is at once the precise and the general term for this ceremony because it implies both the rite and its ends, and it may be used in reference to both infants and adults. **Christen** is the popular word, but for several centuries it has so emphasized the giving of a name, which is in some churches a part of the ceremony of baptism, that it now is used at times without any reference to the religious ceremony and even with reference to inanimate objects which are formally named, often with a ceremony analogous to that of baptism; thus, "the baby has not yet been *christened*" may mean either "not yet baptized" or "not yet named," though both are commonly implied; a ship is *christened* by performing the ceremony of breaking a bottle of liquid (as champagne) against its sides while pronouncing its name.

bar *n* **1 Bar, barrier, barricade** mean something which hinders or obstructs. Both *bar* and *barrier* apply to something that prevents free communication or passage; more specifically, **bar** frequently suggests a restriction of ingress or egress, while **barrier** suggests an obstacle to advance, progress, or attack; *bar* also may suggest a simple structure and *barrier* a more extensive or elaborate one (the *bars* of a prison) (a harbor *bar*) (a mountain *barrier*) (erect dikes as a *barrier* against the sea) (a *barrier* reef) (religious myths may come to be a *bar* to progress in science—*Inge*) (a perpetual and impassable *barrier* . . . between the white race and the one which they had reduced to slavery—*Taney*) **Barricade** is chiefly used in the sense of an obstruction thrown across a street or way to check a hostile advance (the fighting at the *barricades* in Paris during the Commune)

2 *obstacle, obstruction, impediment, snag

Ana hindrance, block, dam (see corresponding verbs at HINDER): *difficulty, hardship, vicissitude

Ant advantage —*Con* odds, edge (see ADVANTAGE): help, aid, assistance (see under HELP *vb*)

3 *shoal, bank, reef

bar *vb* obstruct, block, dam, impede (see HINDER)

Ana shut out, debar, *exclude: *prevent, preclude, obviate: *forbid, prohibit, interdict: *close, shut

Ant admit: open —*Con* accept, *receive, take

barbarian *adj* **Barbarian, barbaric, barbarous, savage** are comparable when applying to people or characteristics of people that are not fully civilized. **Barbarian** frequently applies to a state about midway between full civilization and tribal savagery (some *barbarian* peoples have brought their mores into true adjustment to their life conditions and have gone on for centuries without change—*Sumner*) **Barbaric** and **barbarous** may also be used to express this notion (they had passed the *barbaric* stage when they invaded Chaldea. They knew the use of metals; they were skillful architects and . . . good engineers—*Clodd*) (Caesar's short sketch of the Germans gives the impression of *barbarous* peoples . . . they had not yet reached the agricultural stage, but were devoted to war and hunting—*H. O. Taylor*) **Savage** implies an even less advanced and more primitive state (for *savage* or semicivilized men . . . authority is needed to restrain them from injuring themselves—*Eliot*) **Barbarous** and **savage** are somewhat more commonly used than *barbaric* and *barbarian* to indicate uncivilized cruelty, but all may be so used (he required as a condition of peace that they should sacrifice their children to Baal no longer. But the *barbarous* custom was too inveterate—*Frazer*) (the King's greed passed into *savage* menace. He would hang all, he swore—man,

woman, the very child at the breast—*J. R. Green*) (they had further traits and customs which are *barbaric* rather than specifically Teutonic: cruelty and faithlessness toward enemies, feuds, wergeld—*H. O. Taylor*) (for him those chambers held *barbarian* hordes, hyena foeman, and hot-blooded lords—*Keats*)

Barbaric and **barbarous** are more common in relation to taste and refinement. **Barbaric** suggests a wild, profuse lack of restraint (this audacious and *barbaric* profusion of words—chosen always for their color and their vividly expressive quality—*Symons*) (the march became rather splendid and *barbaric*. First rode Feisal in white, then Sharraf at his right in red headcloth and henna-dyed tunic and cloak, myself on his left in white and scarlet, behind us three banners of faded crimson silk with gilt spikes—*T. E. Lawrence*) **Barbarous** implies an utter lack of cultivated taste and refinement (a race of unconscious spiritual helots. We shall become utterly *barbarous* and desolate—*Lewisohn*) (but this deeply *barbarous* book may, in its very vulgarity of expression, be in advance of its time—*Dorothy Thompson*)

Ant civilized

barbarian *n* *obscurantist, philistine

barbaric *barbarian, savage, barbarous

Ana *showy, ostentatious: florid, *ornate, flamboyant: *gaudy, garish, flashy, meretricious

Ant restrained: refined: subdued

barbarism, barbarity are frequently confused. **Barbarism** is used chiefly of a state of society or of a culture that may be described as *barbarian*, or as neither savage and crude nor civilized and highly refined (the savage mystic is also the savage man of science, the priest and the doctor are one. It is so also for the most part in *barbarism*—*Ellis*) (the human race . . . is as yet only a little bit civilized and . . . in time of serious trouble . . . has a very strong tendency to stampede back into *barbarism*—*Lippmann*) **Barbarity** is used chiefly in reference to a temper or to practices that may be described as barbarous, or uncivilized, brutal, and inhumane (barbarity seldom equaled by the fiercest of savages) (his dream of eating pâtés de foie gras to the sound of trumpets ignored the calculated barbarity which produced the food he loved—*Replier*) Sometimes, however, *barbarity* denotes a taste that is barbaric (the supposed influence of Seneca on the barbarity of Elizabethan tragedy—*T. S. Eliot*)

Ant civilization —*Con* *culture, cultivation, refinement

barbarity *barbarism

Ana barbarousness, savagery, ferociousness or ferocity, cruelty, inhumanity (see corresponding adjectives at FIERCE)

Ant humaneness —*Con* gentleness, mildness, smoothness, lenity or leniency (see corresponding adjectives at SOFT)

barbarous **1** savage, barbaric, *barbarian

Ana *rough, harsh: untutored, untaught, uneducated, illiterate, *ignorant: *rude, rough, crude

Ant civilized: humane

2 savage, inhuman, ferocious, *fierce, cruel, fell, truculent *Ana* pitiless, ruthless, uncompassionate (see corresponding nouns at SYMPATHY): atrocious, monstrous, *outrageous

Ant clement —*Con* merciful, *forbearing, tolerant, lenient: *tender, compassionate, sympathetic: humane, humanitarian, benevolent (see CHARITABLE)

bard *n* *poet, minstrel, troubadour, rhymer, rhymester, versifier, poetaster

bare *adj* **1 Bare, naked, nude, bald, barren** are comparable when they mean destitute or divested of the naturally or conventionally appropriate covering or clothing. **Bare**

strongly suggests the removal or, often, the rejection of something additional, superfluous, dispensable, or acquired; thus, a *bare* head is one without a hat; *bare* legs suggest lack of socks or stockings; *bare* trees have lost all their leaves; one takes another's *bare* word for a thing when one demands no confirmation or documentary proof; a *bare* room may be empty of furniture or may have only such furniture as is indispensable (the *bare* statement that "art is useless" is so vague as to be really meaningless, if not inaccurate and misleading—*Ellis*) **Naked** suggests absence of all covering, especially in the way of protective or ornamental covering. When used with regard to persons and implying absence of clothing, the word is not uniform in its pictorial and emotional evocations; it may suggest many conditions, such as a state of nature and of physical beauty, a state of destitution and of pitiful suffering, a state of privacy and of admirable modesty or purity, a state of shameful publicity or of wanton exhibitionism (Eve . . . in *naked* beauty more adorned, more lovely, than Pandora, whom the gods endowed with all their gifts—*Milton*) (poor *naked* wretches, wheresoe'er you are, that bide the pelting of this pitiless storm—*Shak.*) In extended use, therefore, *naked* is preferred to *bare* when the emphasis is on revelation or exposure, or on the power of revealing or exposing something as it is in its severe outlines or structure, in its plain truth or without disguise, or in its hidden weakness or strength (craft must have clothes, but truth loves to go *naked*—*Fuller* d. 1734) (it is not asked that poetry should offer *naked* argument—*Day Lewis*) (the power of striking out, in a few *naked*, simple words, a picture which is ineffaceable—*Lowes*) **Nude** and *naked* are very close synonyms when they are used in reference to persons, but *nude*, because of its association with the representation of undraped figures in art, tends to suggest little more than the absence of covering and to be comparatively a colorless word with little extended use and with few, if any, significant and distinctive implications. Because of its unequivocal meaning, *nude* is preferred to *naked* when the mere fact of being without clothing is indicated and there is no intent to convey an aesthetic or ethical implication (three *nude* statues in the exhibition) (residents of the houses along the river objected to *nude* swimmers) **Bald** implies absence of the hair of the head or, sometimes, actual or apparent absence of another covering (as of foliage, feathers, or vegetation); thus, the *bald* eagle is the common eagle after it has reached an age when its head and neck feathers are white and inapparent at a distance; a *bald* tree is one that no longer bears leaves at its top; a *bald* mountain is one whose peak is bare of vegetation. In extended use *bald* implies austere or colorless bareness and a conspicuous absence of qualities that might add charm, vividness, or interest; thus, a *bare* style is one that employs economy of means or a meagerness of ornament; a *naked* style is one that disguises nothing and shows not the slightest obscurity or hesitancy in presenting the thought; a *bald* style is bare and plain to the point of severity (his expression may often be called *bald* . . . but it is *bald* as the bare mountaintops are *bald*, with a baldness which is full of grandeur—*Arnold*) **Barren** (see also **STERILE**) implies a lack of fertility or productive power and therewith also implies absence of natural or appropriate covering as an outward sign of impoverishment, impotence, or aridity; thus, *barren* lands are not only bare but they are waste, desolate lands incapable of producing crops; a *barren* style is the style of a person who has not the mind, heart, or imagination to give his style any signs of life or vitality or any coloring of fancy (without social history,

economic history is *barren* and political history is unintelligible—*Trevelyan*)

Ana stripped, divested, denuded (see **STRIP vb**): unclothed, undressed, unrobed (see affirmative verbs at **CLOTHE**)

Ant covered

2 *mere

bare vb denude, divest, *strip, dismantle

Ant cover —**Con** *clothe, dress, apparel, robe, attire: *disguise, cloak, mask, dissemble, camouflage

barefaced brazen, *shameless, brash, impudent

Ana open, plain, *frank, candid; indecent, unseemly, *indecorous

Ant furtive —**Con** covert, surreptitious, stealthy, *secret

bargain n *contract, compact, pact

bark vb **Bark**, **bay**, **howl**, **growl**, **snarl**, **yelp**, **yap** mean to make the sound of or a sound suggestive of a dog. **Bark** implies the sharp, explosive utterance characteristic of dogs; it may be used not only of them and of another animal (as a seal) that produces a similar noise but also of a person or a sonorous thing that gives the same effect (heard the *barking* of wolves in the distance) (the guns *barked* all night long) (they [critics] had . . . *barked* at you, foamed at you day after day, now you were ended. They praised you . . . and laid you away—*Lindsay*) (thunder . . . *barked* in the distance—*McFee*) **Bay** implies a repeated or almost continuous barking in deep prolonged tones that is characteristic of hounds in pursuit of quarry (I had rather be a dog, and *bay* the moon, than such a Roman—*Shak.*) (dogs *baying* and driving him up a tree—*Darwin*) **Bay** is seldom used of any animals other than members of the dog family (including mythical ones such as Cerberus) and is infrequently used in reference to men. When it is so used, it generally implies the action not of an individual but of a group (as a mob) that acts like a pack of dogs baying (I dare avouch you'd stand up for yourself, though all the world should *bay* like winter wolves—*Tennyson*) **Howl** implies a long, loud, mournful cry made by dogs seemingly in distress and often interpreted as evidence of hunger or loneliness. The term implies also similar sounds made by other animals, but its strongest association has been with dogs and wolves (a dog *howled* each night) (pursued by *howling* wolves) **Howl** (see also **ROAR**) may be used in reference to human beings to imply loud crying, laughing, or derisive calling, and to other sounds that suggest the howling of animals (as in loudness and prolongation). **Growl** applies to the long, low rumbling sound suggesting a threat that is made by an angry dog; less often it is used in reference to other animals (as the bear or cat). Like *howl*, it is applied to persons and to inanimate things (as thunder and winds). When used of persons, it suggests utterance in a surly or grumbling mood (he *growled*, "What are you doing there?") (he's no business to *growl* . . . about money—*Holland*) **Snarl** implies not only a growling but a snapping and baring of fangs; it, too, is used typically of dogs and suggests an aggressive or infuriated state (the dog never *snarled* until he was mistreated) (children run from a *snarling* dog) **Snarl** when used of a person's manner or speech implies a highly disagreeable quality and usually suggests spite or malignity and a menacing attitude (the midwife wondered and the women cried "O, Jesus bless us, he is born with teeth!" And so I was; which plainly signified that I should *snarl* and bite and play the dog—*Shak.*) **Yelp** has as its basic implication the utterance of short, shrill barks by a dog (as in eagerness, in pain, or in fear); when used in reference to men, the word often implies a number of short, shrill utterances, especially indicating surprise, fear, or excitement (a . . . huntsman

clad for the field, with his fresh pack *yelping* . . . about him—*Dickens*) <the nominations have accordingly furnished something to *yelp* on—*Jefferson*> <“Look out,” *yelps* the crowd and the high walls fall—*Lindsay*> **Yap** comes close to *yelp*, but it chiefly implies the short, shrill barking of a small dog or excited, staccato sounds that are comparable <half a dozen little *yapping* dogs . . . assailed me—*Braddon*> It may suggest excessive talking that conveys little but is usually uttered in an insistent or offensive and often high-pitched voice.

Ana bellow, vociferate, bawl, *roar: yell, *shout, scream, shriek

bark *n* *skin, rind, peel, hide, pelt

baroque *adj* *ornate, florid, rococo, flamboyant

barren 1 *sterile, unfruitful, infertile, impotent

Ant fecund —**Con** *fertile, prolific, fruitful

2 bald, *bare, naked, nude

Ana arid, *dry: desolate, forlorn (see ALONE); impoverished, exhausted, depleted (see DEplete): austere, *severe, stern

Con luxuriant, lush, *profuse: opulent, *luxurious, sumptuous

barricade *n* barrier, *bar

barrier *n* barricade, *bar

barrister *lawyer, counselor, counsel, advocate, attorney, solicitor

basal basic, underlying, *fundamental, radical

base *n* **Base, basis, foundation, ground, groundwork** are comparable when meaning something on which another thing is reared or built or by which it is supported or fixed in place. **Base** may be applied to the lowest part or bottom of something without strong implication of purpose as a support or prop <the *base* of a tree> <*base* of a mountain> but more often it implies specific reference to a broad bottom or to a substructure on which a thing rests or seems to rest for support or by which it is kept upright or stable <the *base* of a pyramid> <the *base* of a lamp> <the *base* of a triangle> <the first of four cabinets the liberal leader was to form . . . in attempts to achieve a combination of ministers with a wide enough *base* to ensure effective support—*Current Biog.*> The word may fail to stress an underlying and then applies to something which serves either as a starting point of a development, an operation, or a process <a *base* of operations> <a submarine *base*> <coal tar is the *base* from which whole families of useful compounds are derived> or as a necessary ingredient that carries or contains the active ingredient of a mixture <lanolin is the *base* of many cosmetics> <dynamite often has an absorbent *base* such as sawdust> **Basis** like *base* may be used in reference to something that underlies and supports or to something that serves as a starting point, but the term is rarely applied to a physical or material thing; thus, one may speak of the *base* (but not the *basis*) of a monument, or of the *basis* (not the *base*) for a certain belief <implicit trust is the *basis* of a lasting friendship> <phrase a question as a *basis* for discussion> <tradition forms a *basis* for the acquiring of literary taste—*Day Lewis*> **Foundation** usually implies solidity in what underlies and supports and fixity or stability in whatever is erected on that support; thus, a house has a *base* even if it rests directly on the ground but it may properly be said to have a *foundation* only when it rests on a substructure (as a wall of stones or bricks lining an excavation and usually rising above the surface of the ground); a report may be said to have its *basis* (not *foundation*) in speculation, but a report that is said to be without *foundation* has no *basis* in fact <let me pry loose old walls; let me lift and loosen old *foundations*—*Sandburg*> <as the happiness of the people is the sole end

of government, so the consent of the people is the only *foundation* of it—*Adams*> <how firm a *foundation*, ye saints of the Lord, is laid for your faith in His excellent Word!—*Old Hymn*> **Ground** implies something solid or firm beneath, or a substratum comparable to the earth or ground in its firmness and capacity for support; the term is therefore applied to a material, a substance, or a surface upon which another thing is built or against which it is displayed; thus, a piece of net may serve as a *ground* upon which a pattern is worked in lacemaking; before a decorative design is applied to a wall, the *ground*, or wall surface, must be treated and colored so that it will take the pattern and display it properly. **Groundwork** is applied not to a substratum but to a substructure; like *foundation*, the term suggests something built up before the superstructure is erected, but, unlike *foundation*, it is used chiefly in a figurative sense <early training is the *groundwork* of good habits> <lay a *groundwork* in college for one's professional studies> <the *groundwork* of all happiness is health—*Hunt*>

Ant top —**Con** *summit, peak, apex

base *vb* **Base, found, ground, bottom, stay, rest** are comparable when they mean to supply or to serve as a basis. **Base** now rarely suggests a material support upon which a material superstructure is built <the pile . . . I reared up to the cloud . . . *based* on the living rock—*Browning*> but rather something material or immaterial that underlies a nonmaterial superstructure (as a belief, a system, a judgment, a hope or an action) <is it not the conviction that action should be *based* . . . on solid fact?—*Eliot*> <shares, or bonds, or other pieces of paper, the value of which is *based* upon the estimated future earnings or profits—*Hobson*> **Found** comes so close to *base* as often to be indistinguishable from it and, therefore, to be interchangeable with it <and the rain descended, and the floods came, and the wind blew . . . and it fell not: for it was *founded* upon a rock—*Mt* 7:25> Often, however, it suggests not what merely underlies but what is consciously advanced as support (as for an opinion, a principle, a judgment, a belief, or an affection) <a man that all his time hath *founded* his good fortunes on your love—*Shak.*> <certain fixed laws and principles which he proceeds to *found* upon Aristotle—*Babbitt*> <this criticism is *founded* in misconception—*Cardozo*> **Ground** denotes an implanting (as into the earth) that gives solidity and firmness; it may apply to something (as personal virtue, education, or an institution) which can grow and thrive only when it is firmly based (as if by deep roots) <that ye, being rooted and *grounded* in love, may be able to comprehend with all saints . . . and to know the love of Christ, which passeth knowledge—*Eph* 3:17-19> <ofttimes nothing profits more than self-esteem, *grounded* on just and right—*Milton*> But *ground* may be used, less strictly, in a sense approaching that of *base* and *found* <he *grounds* his theory on evidence gathered over a long period of time> <their quarrel was *grounded* on a dispute over petty matters> **Bottom** implies a broad or strong base <*bottomed* upon solid principles of law and policy—*Burke*> **Stay** implies a support that keeps upright or prevents from falling and may suggest adding a supplementary support to correct an observed or anticipated tendency <*stay* a weakened wall with props> <his nature looked coldly upon its early faith and sought to *stay* itself with rational knowledge—*H. O. Taylor*> **Rest** stresses reliance or dependence on something as a base or fundamental support <their academic reputations *rest*, quite largely, upon their academic power—*Mills*> <metrical forms are conventional, and therefore *rest*, like all matters of usage, on acceptance—*Loves*> <if the Germans are to justify the high claims

they make for Lessing as a critic, they must *rest* them on other grounds than his intellectual originality or the fineness of his taste—*Babbitt*)

Ana *support, sustain: *set, establish, fix, settle

base *adj* **Base, low, vile** mean contemptible because beneath what is expected of the average man. What is **base** excites indignation because devoid of all nobility or even of humanity; the term usually implies the setting (as through cowardice or avarice) of self-interest ahead of duty to others <peace had brought only the shabby, dispiriting spectacle of Versailles, with its *base* greeds and timidities—*Montague*> What is **low** outrages one's sense of decency or propriety. The term, when implying moral contemptibility, often suggests a taking advantage (as by cunning, deceit, or other devious practice) of a person who is helpless or not in a position to defend himself <no one thought he could be *low* enough to steal a nickel from a blind beggar's cup> <whenever a dramatist wished to introduce intrigue, chicanery, or other dirty work, his *dramatis personae* included a *low* attorney—*Law Times*> **Low** also is often used of persons, thoughts, language, or actions that strongly offend one's sense of propriety <*low* humor> <they were *low*, those sensual feelings; they were ignoble—*Huxley*> What is **vile** is inexpressibly base or low; the word often implies disgusting foulness or depravity <it was *vile* indeed to unaccustomed and unhardened senses. Every little habitation . . . left its own heap of refuse on its own landing, besides flinging other refuse from its own windows—*Dickens*> <the *vilest* epithet in the English language—*Freeman*> *Ana* *mean, ignoble, abject, sordid: *bad, evil, ill, wicked: ignominious, infamous, disgraceful (see corresponding nouns at DISGRACE)

Ant noble —*Con* *moral, ethical, virtuous, righteous: honorable, *upright, honest, just

baseless, groundless, unfounded, unwarranted mean not justified or justifiable in any way. **Baseless** implies an entire lack of foundation; it imputes to a thing lack of actuality in itself or in the events or facts upon which it is supposedly based <the *baseless* fabric of this vision—*Shak.*> <he proved the rumors *baseless*> <no claim could have been more utterly *baseless*—*J. R. Green*> **Groundless** stresses the absence of a cause or reason; it is applied especially to thoughts, emotions, or feelings that arise seemingly from nothing and have no perceptible or justifying cause <*groundless* fears> <*groundless* suspicions> **Unfounded** sometimes implies baselessness but more often suggests lack of support or want of evidence, authority, or proof <his theory is not entirely *unfounded*> <an *unfounded* belief> **Unwarranted** emphasizes the fact of exceeding the bounds of what is authorized, sanctioned, believable, or reasonable <the *unwarranted* proceedings of a lower court> <take *unwarranted* liberties> <an *unwarranted* assumption>

Ana *false, wrong: unsupported, unsustained (see corresponding affirmative verbs at SUPPORT)

Con true, actual, *real: *authentic, veritable, bona fide, genuine

bashful *shy, diffident, modest, coy

Ana shrinking, recoiling (see RECOIL *vb*): timorous, *timid: embarrassed, abashed (see EMBARRASS)

Ant forward: brazen —*Con* brash, barefaced, impudent, *shameless: bold, intrepid (see BRAVE)

basic 1 basal, *fundamental, underlying, radical

Ana principal, capital, *chief, main: primordial, *primary

Ant top: peak

2 *alkaline

basis *base, foundation, ground, groundwork

Ana *principle, fundamental, axiom, law, theorem:

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

premise, postulate, presupposition, presumption, assumption (see under PRESUPPOSE)

baste *vb* *beat, pummel, thrash, buffet, pound, belabor

Ana chastise, castigate, *punish, discipline

bastion breastwork, parapet, *bulwark, rampart

bathos *pathos, poignancy

Ana mawkishness, maudlinism, sopiness, mushiness (see corresponding adjectives at SENTIMENTAL)

batter *vb* mangle, *maim, mutilate, cripple

Ana *beat, pound, pummel, thrash, buffet, belabor, baste

batter *n* *dough, paste

battle *n* **Battle, engagement, action** denote a hostile meeting between opposing military forces. **Battle** is commonly used of a general and prolonged combat and is distinguished, therefore, from such terms as *skirmish* or *brush* (see ENCOUNTER). **Engagement** stresses the actual encountering of forces and may be applied to either a general encounter (as between entire armies) or a minor encounter (as between subdivisions or outposts). **Action** is often employed in place of *battle* or *engagement* when the stress is on the idea of active, frequently sharp offensive and defensive operations <clear the warship's decks for *action*> <Gustavus Adolphus, King of Sweden, was killed in *action* at Lutzen, 1632> <a brisk *action* between scouting patrols>

Ana *encounter, skirmish, brush: *attack, assault, onslaught, onset: combat, conflict, fight, *contest

battle *vb* war, fight, *contend

Ana combat, oppose, *resist, withstand, fight: *attack, assail, assault, bombard: kick, protest, *object

bawl *vb* 1 *roar, bellow, bluster, vociferate, clamor, howl, ululate

Ana yell, *shout, scream, shriek: bay, *bark, growl, yelp: *cry, wail

2 rate, berate, tongue-lash, upbraid, *scold, chew out, wig, rail, revile, vituperate

Ana reprimand, rebuke, reproach, *reprove, chide: censure, denounce, condemn, reprehend, reprobate (see CRITICIZE)

bay *vb* *bark, howl, growl, snarl, yelp, yap

Ana bellow, vociferate, clamor, *roar: yell, holler (see SHOUT)

be *vb* **Be, exist, live, subsist** are comparable when they mean to have actuality or reality. **Be** applies to whatever has a place in the realm of things describable as real in a material or immaterial sense; only its context makes clear whether it asserts physical or spiritual reality <to *be*, or not to *be*: that is the question—*Shak.*> <I think, therefore I *am*—*translation*> <whatever *is*, is right—*Pope*> **Exist** adds to *be* the implication of continuance in time; it also commonly implies a place in the realm of things which are describable as entities or as having independent, objective being <a fact which has *existed* cannot be made never to have *existed*—*John Marshall*> <everybody saw the drawings of the temples, strange walls and columns, but nobody believed these things *existed*—*Stark Young*> **Live** basically implies existence in the realm of things possessing the character called *life*, which distinctively characterizes plants and animals and is manifest especially in metabolism, growth, and reproduction <many men *live* to be threescore and ten> <plants cannot *live* without moisture> <whatever *lives* must have sustenance> **Live**, however, is often applied in an extended sense to immaterial entities (as ideas or beliefs); in this use it may carry a suggestion of qualities associated with life (as persistent existence, vigor, activity, and development) <his name will *live* as long as his country *lives*> <poems that *live*> **Subsist** may be used in place of *be*, or *exist*, or *live* because it may imply the kind of reality or actuality connoted by

one of those terms, but it (or more particularly its related adjective, *subsistent*) often additionally suggests a relation to or dependence on something; thus, a thing that *subsists* by itself (a self-*subsistent* thing) is independent and self-contained; an idea *subsists* or maintains its existence only so long as it appeals to the mind of thinking men (those secret distributions without which the body cannot *subsist* in its vigor—*Addison*) In philosophical use *subsist* is used often in reference to purely mental conceptions and implies logical validity or the character of being true or logically conceivable (the round square . . . is an object, which neither exists, nor *subsists*, nor has any kind of being at all—*Chisholm*)

beach *n* strand, coast, foreshore, *shore, bank, littoral

beak *bill, neb, nib

beam *n* *ray

Ana flash, gleam, glint, scintillation, coruscation (see corresponding verbs at FLASH)

beaming *adj* radiant, refulgent, effulgent, *bright, brilliant, luminous, lustrous, lambent, lucent, incandescent

Ana flashing, gleaming, glittering, glistening, glinting, sparkling, coruscating, scintillating (see FLASH *vb*): glowing, flaming (see BLAZE *vb*)

bear *vb* 1 *carry, convey, transport, transmit

Ana *move, remove, shift, transfer: hold, *contain

2 **Bear, produce, yield, turn out** are comparable when they mean to bring forth as products. **Bear** usually implies a giving birth to offspring or a bringing of fruit to maturity, though it may be extended to something which tends to reproduce itself or to aid reproduction (she *bore* three children) (the apple trees *bear* every year) (the soil is not rich enough to *bear* crops) (the seed he sowed *bore* fruit) (the bank deposit *bears* a low interest) **Produce** is far wider in its range of application, for it, unlike *bear*, carries no clear implication of a carrying during a period of development prior to the bringing forth; it may be used of almost any bringing forth or into view whether by human or natural agency (he *produced* the book for his friends' inspection) (nobody could *produce* the desired witness) It may apply more specifically to the bringing forth of something as issue of one's body, one's mind, or one's imagination or as an output of labor or effort (it is necessary for the colleges to *produce* straight thinkers) (the plantation *produces* a vast amount of cotton) (the factory *produces* more shoes than ever) (Raphael *produced* an unusual number of widely known paintings) (he feels he can never *produce* another book as good as the one he has just written) (the glands *produce* secretions) **Yield** (see also RELINQUISH, YIELD) fundamentally implies a giving out (as of something within the confines of a thing or within one's power of production); it therefore stresses the outcome, result, return, or reward and not the previous effort or endurance (land that could be counted on to *yield* good crops year after year) (two kinds of classics . . . those that *yield* their meaning at the first encounter and those that we have to discover by effort and insight—*Brooks*) (the discovery of . . . its [calcium carbide's] reaction with ordinary water to *yield* a highly flammable gas, acetylene—*Morrison*) **Turn out**, like *yield*, stresses the outcome or result, but it implies previous and especially mechanical labor or effort (the company promises to *turn out* 300 airplanes a month) (the main object is to *turn out* good Englishmen—*Inge*)

Ana reproduce, propagate, breed, *generate

3 **Bear, suffer, endure, abide, tolerate, stand, brook** denote to sustain something trying or painful. *Bear* and *suffer* are also synonyms in their more comprehensive denotation, to sustain whatever is imposed (this theory will *bear* examination) (the stone *suffers* no alteration in a

colder climate) Both verbs, however, are more often used in their specific senses because of their customary reference, with *bear*, to things that are heavy or difficult or, with *suffer*, to things that are painful or injurious. **Bear** suggests more the power to sustain than the manner in which something is sustained (water as hot as one can *bear* it) (his decency which has made him *bear* prolonged and intolerable humiliation with control and courtesy—*Mannes*) (bear affliction) **Suffer** more often implies acceptance of infliction than patience or courage in bearing (I am waylaid by Beauty . . . Oh, savage Beauty, *suffer* me to pass—*Millay*) (being a man of uncommon spirit, he never *suffered* the least insult or affront to pass unchastised—*Smollett*) **Endure** and **abide** usually refer to long-continued trials or sufferings borne without giving in. **Endure** usually connotes stamina or firmness of mind, while **abide** suggests patience and submission (I am able now, methinks . . . to *endure* more miseries and greater far—*Shak.*) (what fates impose, that men must needs *abide*—*Shak.*) **Tolerate** and **stand** imply overcoming one's own resistance to what is distasteful or antagonistic. **Tolerate** often connotes failure to resist through indifference or, sometimes, through a desire for peace or harmony (tolerate differences in opinion) (Archer's New York *tolerated* hypocrisy in private relations; but in business matters it exacted . . . impeccable honesty—*Wharton*) **Stand** is often used in place of *bear*, but distinctively it implies the ability to keep from flinching (he can *stand* teasing) (he *stood* the attack well) **Brook** occurs chiefly in negative constructions and implies self-assertion and defiance (restraint she will not *brook*—*Milton*) (he is not well-born enough to succeed there, and his sense of intellectual superiority did not *brook* subordination—*Laski*) The other verbs are also used commonly in negative clauses but with weakened emphasis. In such constructions *bear* (with the negative) commonly implies dislike, *suffer* rejection, *endure* intolerance, *abide* impatience, *tolerate* contempt, and *stand* repugnance.

Ana accept, *receive: *afflict, try, torment, torture

4 *press, bear down, squeeze, crowd, jam

Ana weigh, oppress, *depress: *burden, encumber, load, saddle

5 **Bear, relate, pertain, appertain, belong, apply** are comparable when used intransitively with the meaning to have a connection, especially a logical connection. One thing *bears on* or *upon* another thing when the first touches so directly upon the second (usually something in question) as to carry appreciable weight in its solution or in the understanding of issues it involves (ignore all facts except those that *bear upon* this particular case) (this situation *bears* directly upon the question under discussion) One thing *relates to* another thing when there is some connection between them which permits or, more often, requires them to be considered together with reference to their effect upon each other. The connection implied is usually closer in the intransitive than in the transitive verb (see JOIN), being commonly one of dependence or interdependence (in an organism each part *relates to* every other part) (show how the demand *relates to* the supply) (each incident *relates to* the plot) (a detail in a painting *relates to* the design of the whole) (the duties of the citizen, as he understood them, *related* not only to acts, but also to thoughts—*Mencken*) One thing *pertains* or *appertains* to another when there is a connection that permits their association in practice or thought. Both of these words are more widely applicable than *bear* and *relate*, for they cover not only the connections specifically implied in those words but also those close connections implied by *belong* and those remote connections

implied by *have to do with*; thus, the things that *pertain* to happiness are all the things that can be thought of as causing, contributing to, preventing, or affecting the quality of happiness (moral philosophy is the branch of philosophy that deals with all problems *pertaining* to morals or ethics) *Pertain* more often implies a necessary connection or a very close relation than the more formal *appertain*, which commonly suggests an incidental or acquired connection (a . . . faithful high priest in things *pertaining* to God—*Heb 2:17*) (the crown and all wide-stretched honors that *pertain* by custom and the ordinance of times unto the crown of France—*Shak.*) (to that simple object *appertains* a story—*Wordsworth*) **Belong**, usually with *to*, implies a relation in which one thing is a part or element without which another cannot exist, function, have its true character or being, or be complete. In this sense a thing that *belongs* is a property, an attribute, a duty, or a proper concern (the Government of the United States . . . does not possess all the powers which usually *belong* to the sovereignty of a nation—*Taney*) (nor does value *belong* to what concerns man only—*Alexander*) But *belong* also may be used of things as they pertain to persons, then implying possession (the watch *belongs* to James) (this land *belongs* to the government) or informally of persons with reference to their qualifications for fitting into a group, especially a social group (she's smart and jolly and everything, but she just doesn't *belong*—*Ferber*) **Apply**, also with *to*, implies a relation in which a more inclusive category (as a law, a principle, a rule, a theory, a general term) covers a less inclusive specific instance, usually also explaining, interpreting, or describing the latter or having some clear bearing upon it (the rules of addition *apply* to our debts as rigorously as to our assets—*James*) (he really was the one child to whom the "spare-the-rod" precept did not *apply*—he was naturally good—*Deland*)

Ana *concern, affect: touch, influence, *affect: weigh (see DEPRESS)

beard *vb* *face, brave, challenge, dare, defy

Ana confront, *meet, encounter

bear down *press, bear, squeeze, crowd, jam

bearing *n* **Bearing**, deportment, demeanor, mien, port, **presence** are comparable when they denote the way in which or the quality by which a person outwardly manifests his personality and breeding. **Bearing** is the most general of these words; it may imply reference to a person's mental attitude to others, his conduct in society, or his characteristic posture or way of holding himself (if 'twere so, she could not sway her house, command her followers . . . with such a smooth, discreet and stable bearing—*Shak.*) ("You should have seen him as a young man," she cried . . . drawing herself up to imitate her husband's once handsome bearing—*D. H. Lawrence*) **Deportment** applies especially to a person's actions in their relations to the external, often conventional amenities of life; it so strongly suggests the influence of breeding or training that in current use it often means little more than *behavior* (lessons in *deportment*) (naturalism is limited to neurasthenics; while Style means a British *deportment*—stiff upper lip, stiff limbs, and stiffer backbone—and an elocutionary Oxonian delivery—*Bentley*) **Demeanor** applies rather to one's attitude as shown in one's behavior in the presence of others (his *demeanor* in public was still, silent, almost sepulchral. He looked habitually upon the ground when he conversed, was chary of speech, embarrassed—*Motley*) (the child who has been treated wisely and kindly has a frank look in the eyes, and a fearless *demeanor* even with strangers—*Russell*) **Mien** implies reference both to bearing and demeanor,

often as suggestive of mood (for truth has such a face and such a *mien*, as to be loved needs only to be seen—*Dryden*) (his *mien* of settled woe—*Robertson Davies*) **Port** implies reference to physique and, especially through long association with such adjectives as *majestic*, *regal*, and *proud*, to a stately or dignified physique (pride in their *port*, defiance in their eye, I see the lords of human-kind pass by—*Goldsmith*) (people with a dignity of *port*, an amplitude of back, an emphasis of vocabulary—*L. P. Smith*) **Presence** is more explicit than *bearing*; it denotes a person's bearing with reference to its power to impress his personality on others or to attract their attention, interest, or admiration (in mature life he became "a bulky person," with strong health and a commanding *presence*—*Inge*) (a small, birdlike person, of no *presence*—*Rose Macaulay*) (by a *Port*, one may understand them to indicate something unsympathetically impressive; whereas a *Presence* would seem to be a thing that directs the most affable appeal to our poor human weaknesses—*Meredith*)

Ana *posture, attitude, pose: *behavior, conduct: attitude, stand, *position: poise, address (see TACT)

beastly bestial, *brutal, brute, brutish, feral

Ana abominable, detestable, *hateful: loathsome, repulsive, revolting, *offensive: disgusting, sickening, nauseating (see DISGUST)

Con agreeable, gratifying, grateful, *pleasant, pleasing: delicious, *delightful, delectable

beat *vb* **1 Beat**, pound, pummel, thrash, buffet, baste, belabor are comparable when they mean to strike repeatedly. **Beat**, the usual and general word of this group, may imply no more than the simple action of repeated striking (as with one's hands or an implement). The purpose is usually suggested by the object beaten, even when the manner of beating or the kind of implement used is not specifically stated (clean a rug by *beating* it) (beat his breast in anguish) (the shocking increase in the battered child syndrome, the physical result of viciously *beating* a young child) (the horse restlessly *beat* the ground with his hooves) **Pound** suggests beating with a weight or pestle to crush or reduce to a pulp or powder (as in grinding meal). More often the term implies heavier, more damaging blows than *beat*; it may suggest repeated striking (as by a heavy hammer, strong doubled fists, the hooves of horses, bombs, or shells), and it often also suggests rhythmical, loud, and heavy sounds (the big boys who sit at the tables *pound* them and cheer—*Hughes*) (the hooves of the horses *pounding* on the bridge—*Anderson*) (he could hear his own heart *pounding*) (he *pounded* on the door in an effort to rouse the sleeping family) (night after night the port was *pounded* by bombs) **Pummel** implies the beating of a person with one's fists: although it does not suggest as heavy blows as *pound*, it carries a stronger suggestion of continuous raining of blows and, often, of the infliction of injury than *beat* (a desire to *pummel* and wring the nose of the aforesaid Stiggins—*Dickens*) (he *pummeled* and slapped and scrubbed the somewhat obese nudity of his companion—*Buchan*) **Thrash** in its basic sense means to separate the grain (as of wheat) from the husks and straw, originally by beating or striking again and again (as with a flail). Consequently *thrash* usually means to strike repeatedly in a manner suggestive of strokes with a flail and usually with an implement (as a stick or whip) (*thrash* a hedge with a cane in order to drive out the rabbits) (propelled himself through the water with wildly *thrashing* arms) (everyone fought fire. Everyone went to the woods and *thrashed* out some new blaze—*Vorse*) **Buffet** implies a repeated striking with or as if with an open hand: it there-

fore suggests a slapping rather than a pounding and in extended use is employed chiefly with reference to something which dashes against the face or the body in the manner of a slap or which one fights as if by slapping <the two hands of Madame Defarge buffeted and tore her face—*Dickens*> <buffeted by high waves> **Baste** implies a sound vigorous thrashing with any weapon (including the tongue) <I took a broom, and basted her, till she cried extremely—*Pepys*> <if you will give me the loan of a horsewhip, I'll baste the backs of these lazy fellows of yours—*Wheelwright*> **Belabor** implies a prolonged and mighty basting or buffeting <he saw Virago Nell belabor, with Dick's own staff his peaceful neighbor—*Swift*> <a group of demonstrating Egyptians being belabored by police—*Doty*>

Ana slug, clout, swat, punch, *strike, hit, smite, slap, box, cuff

2 defeat, lick, *conquer, vanquish, subdue, subjugate, reduce, overcome, surmount, overthrow, rout

Ana surpass, excel, outstrip (see EXCEED): confound, nonplus (see PUZZLE)

3 *pulseate, throb, pulse, palpitate

Ana quiver, quaver, quake (see SHAKE): vibrate, oscillate, fluctuate, pendulate (see SWING)

beat *n* pulsation, pulse, throb, palpitation (see under PULSATE)

Ana accent, accentuation, stress (see EMPHASIS): *rhythm, cadence

beatitude blessedness, bliss, felicity, *happiness

Ana rapture, *ecstasy, transport: joy, fruition, enjoyment, *pleasure

Ant despair: dolor —*Con* tribulation, affliction, *trial, cross: anguish, woe, *sorrow, grief: suffering, agony, misery, *distress

beau *n* *fop, exquisite, dandy, coxcomb, dude, buck

beau ideal ideal, exemplar, pattern, *model, example, mirror, standard

beauteous pulchritudinous, fair, good-looking, handsome, pretty, comely, bonny, lovely, *beautiful

Ana alluring, attractive, fascinating, charming (see under ATTRACT)

beautiful *adj* Beautiful, lovely, handsome, pretty, bonny, comely, fair, beauteous, pulchritudinous, good-looking are comparable when they express judgment of a person or a thing perceived or contemplated with sensuous or aesthetic pleasure. Although they differ widely not only in their implications and connotations but also in their range of reference, they carry in common the meaning very pleasing or delightful to look at. Of all these adjectives **beautiful** is usually the richest in significance; since the abstraction it represents (*the beautiful*) has been for many centuries the subject of discussion by philosophers, artists, and aestheticians, its content in a particular context often depends upon the speaker's or writer's cultural background, his chosen philosophy, or his own peculiar definition. In general, however, both in learned and in ordinary use **beautiful** is applied to what excites the keenest pleasure not only of the senses but also through the medium of the senses of mind and soul. It also suggests an approach to or a realization of perfection, often specifically the imagined perfection associated with one's conception of an ideal. That is why **beautiful** is applicable not only to things that are directly perceived by the senses <a beautiful woman> <a beautiful scene> <the beautiful "Winged Victory"> <an exquisitely beautiful painting> but to things that are actually mental constructions formed in the mind through the instrumentality of language or as a result of inferences from certain outward manifestations <a beautiful poem> <a beautiful plan> <a

beautiful character> **Lovely**, like **beautiful**, usually suggests a more than sensuous pleasure, but it implies keen emotional delight rather than profound intellectual or spiritual pleasure. It is applied therefore to what is so pleasant to look upon, to hear, to smell, or to touch that the person affected dwells delightedly, sensuously, or amorously upon it or the sensations it produces (why ever wast thou lovely in my eyes?—*Shak.*) <in after years . . . thy mind shall be a mansion for all lovely forms—*Wordsworth*> <a sailing ship—that loveliest of human creations—*Ellis*> **Handsome**, on the other hand, carries little connotation of emotional or spiritual pleasure; it implies rather a judgment of approval occasioned by something that is pleasant to look upon because it conforms to one's conception of what is perfect in form and detail or in perfect taste, and pleasing because of its due proportions, symmetry, or elegance. It is applied chiefly to what can be regarded unemotionally and with detachment; thus, a woman who is described as **handsome** rather than as **beautiful** or **lovely** is by implication one whose appearance aesthetically satisfies the observer but does not markedly stir his deeper feelings <a handsome dress> <a handsome house> <a handsome table> ("They say I'm handsome." "You're lovely, Bella!" She drank in his homage—*Meredith*) **Pretty**, in contrast to **handsome**, is applied largely to what pleases by its delicacy, grace, or charm rather than by its perfection or elegance of form or style. It is seldom used to describe something large or impressive; consequently it often connotes diminutiveness, daintiness, or exquisiteness <a group of pretty girls> <a very pretty child> <a pretty cottage> **Pretty** is often used depreciatively to suggest mere pleasingness of appearance and the absence of qualities that make for beauty, grandeur, or strength <a pretty poem> <a pretty view> **Bonny**, which is more common in British and especially Scottish use, implies approbation of a person's or thing's looks but it may also imply various pleasing qualities (as sweetness, simplicity, healthiness, plumpness) <a bonny day> <a great actress and a bonny girl—*Donn Byrne*> <a bonny baby> <what the sentimental women of the neighborhood called a "bonny man." His features were remarkably regular, and his complexion was remarkably fair—*G. D. Brown*> **Comely** implies an opposition to what is homely and plain and suggests pleasant wholesomeness with a measure of good looks or physical attractiveness <a comely barmaid> <the comeliest woman in the club> <Jack was so comely, so pleasant, so jolly—*Dibdin*> <once a moorland Helen, and still comely as a blood horse and healthy as the hill wind—*Stevenson*> **Fair** applies especially to something which gives delight because of the purity, the flawlessness, or the freshness of its beauty <fair as a star, when only one is shining in the sky—*Wordsworth*> <forever wilt thou love, and she be fair—*Keats*> **Beauteous** and **pulchritudinous** are used especially in ironic or journalistic prose where they often carry a suggestion of derogation or imply an emphasis on mere physical attractiveness <beauteous candidates for the title of "Miss America"> <a beauteous platinum blonde> <pulchritudinous chorus girls> **Beauteous** in poetical and dignified use often carries a stronger implication of opulence of charms than **beautiful** (how beauteous mankind is! O brave new world, that has such people in't!—*Shak.*) **Good-looking** is a less expressive word than **handsome** or **pretty** but is often used as a close synonym <the children of that family are all good-looking> **Ana** *splendid, resplendent, glorious, sublime, superb: exquisite, elegant, *choice

Ant ugly —*Con* repulsive, repugnant, revolting, *offensive

beautify embellish, deck, bedeck, *adorn, ornament, decorate, garnish

Ana enhance, heighten (see INTENSIFY)

Ant uglify —*Con* *deface, disfigure: *deform, distort, contort; mar, spoil, *injure, damage

because, for, since, as, *inasmuch* as are the chief causal conjunctions in English. **Because** assigns a cause or reason immediately and explicitly; as, I hid myself, *because* [=for the express reason that, or as caused to do so by the fact that] I was afraid; he must have passed this way, *because* [=owing to the specific fact that] there is no other road or *because* [=as is directly proved by the fact that] his footprints are here. **For** is a particle of less immediate reference than *because*; it regards the statement to which it is subjoined as relatively independent and proceeds to adduce for it some ground, reason, evidence, proof, explanation, or justification; as, I hid myself, *for* [=as I may add by way of explanation] I was afraid; he must have passed this way, *for* [=as you may readily see] here are his footprints; I like him, *for* [=I ask, in justification of the fact] who can help it? **Since** is less formal and more incidental than *because*; as assigns a reason even more casually than *since*; each of them frequently begins its sentence; as, *Since* (or *As*) I was afraid, I hid myself <I will come, *since* you asked me> <as I knew him to be out of town, I did not call> **Inasmuch** as assigns a reason in a somewhat concessive or qualified fashion; as, *Inasmuch* as [=in view of, or considering, the fact that] I was afraid, I hid myself; I am ready to accept your proposal, *inasmuch* as [=seeing that] I believe it is the best you can offer.

becloud cloud, eclipse, fog, befog, dim, bedim, *obscure, darken, obfuscate

Ana *confuse, muddle, addle, befuddle: *puzzle, perplex, distract

bedeck deck, garnish, embellish, beautify, decorate, ornament, *adorn

bedim dim, eclipse, cloud, becloud, fog, befog, obfuscate, *obscure, darken

Ana cloak, mask, *disguise: conceal, *hide, screen

beetle *vb* overhang, jut, project, *bulge, protuberate, protrude, stick out

Ana menace, *threaten

befall betide, occur, *happen, chance, transpire

befog fog, cloud, becloud, eclipse, *obscure, darken, dim, bedim, obfuscate

Ana *puzzle, perplex, distract, bewilder, dumbfound: *confuse, muddle, addle

befool trick, hoax, hoodwink, *dupe, gull, bamboozle

Ana *cheat, cozen, overreach: *deceive, delude, beguile, mislead: blandish, cajole, wheedle, *coax

before, **ahead**, **forward** are comparable when they mean in advance, especially in place or in time. **Before** is more commonly used in reference to time than to place. Its most frequent implication is previousness or priority (I have heard that *before*) <not dead, but gone *before*—*Rogers*> <dreams no mortal ever dared to dream *before*—*Poe*> Sometimes, however, it implies futurity <we look *before* and after, and pine for what is not—*Shelley*> This use is not a contradiction of the temporal sense, but an extension of the adverb in its less frequent meaning of in front or in the van <thou art so far *before* that swiftest wing of recompense is slow to overtake thee—*Shak.*> **Ahead** and **forward** are the commonest adverbs indicating position in advance or in front of something and have practically supplanted *before*; **ahead**, however, usually implies a position outside of a thing, often a moving thing, and **forward** frequently implies a front position in the thing itself. Thus, to send a group of scouts *ahead* im-

plies their detachment from an advancing body of troops; to send a company *forward* usually means to send them to a position nearer the front or in the van of a regiment. In nautical context *ahead* (opposed to *astern*) indicates a position or direction in front of and outside of the ship <breakers *ahead*> <a sail *ahead*> <full speed *ahead*> while *forward* (opposed to *aft*) indicates one in front of the midships section of the vessel <the guns were placed *forward*> The same distinction is often found in extended use; thus, one who looks *ahead* can foresee the remote consequences of a decision and ignore the immediate results, while one who looks *forward* anticipates something likely or bound to occur <no longer *forward* nor behind I look in hope or fear—*Whittier*> There is no difference between *ahead* and *forward* in reference to mechanisms which can be reversed or the opposite, except as determined by idiom <set a clock *ahead*> <drive an engine *forward*> *Forward*, unlike *ahead*, is rarely used in reference to time except in its sense of onward (see ONWARD) <from that time *forward* I believed what he told me> *Ahead*, on the other hand, comes close to *before* in its implication of previousness or priority. Thus, a person finds himself *forward* of an appointment when he arrives *ahead* of time; idiomatically, one puts the clock *forward* (or sets it *ahead*) when he changes the position of the hands so that they record a later time.

Ant after —*Con* behind (see AFTER): *abaft, aft, astern

beforehand *early, betimes, soon

Ant behindhand

befoul foul, dirty, sully, *soil, smirch, besmirch, grime, begrime, tarnish

Ana *spot, spatter, sprinkle

befuddle fuddle, addle, muddle, *confuse

Ana bewilder, distract, confound, perplex (see PUZZLE); intoxicate, inebriate (see corresponding adjectives at DRUNK)

Ant clarify, clear

beg, **entreat**, **beseech**, **implore**, **supplicate**, **adjure**, **importune** mean to ask or request urgently. **Beg** suggests earnestness or insistence especially in asking a favor <why, boy, before I left, you were constantly *begging* to see Town—*Meredith*> **Entreat** implies an attempt to persuade or to overcome resistance in another especially by ingratiating oneself <he was accustomed to command, not to *entreat*—*Cather*> **Beseech** implies great eagerness and often anxiety or solicitude <she *besought* him, for his soul's sake, to speak the truth—*Kipling*> **Implore**, often used interchangeably with *beseech*, at times suggests even greater urgency in the plea or more manifest anguish <the last look of my dear mother's eyes, which *implored* me to have mercy—*Dickens*> **Supplicate** adds to *entreat* the suggestion of fervent prayer or of a prayerful attitude <invite, *entreat*, *supplicate* them to accompany you—*Chesterfield*> <fall on his knees and *supplicate* the God of his fathers—*Terrien*> **Adjure** implies an injunction as well as a plea and is strengthened by the expressed or implied invocation of a sense of responsibility or duty or of something sacred <I *adjure* thee by the living God, that thou tell us whether thou be the Christ—*Mt* 26:63> It may sometimes suggest little more than urgency or peremptoriness <so E company . . . doubled for the dear life, and in the rear toiled the perspiring sergeant, *adjuring* it to double yet faster—*Kipling*> **Importune** commonly suggests repeated attempts to break down resistance and often connotes annoying pertinacity <a valued adviser who was wont to *importune* me with the dear old doctrines of the church—*Emerson*>

Ana solicit, request, *ask: plead, pray, petition, sue (see under PRAYER): *demand, exact

beget get, *generate, sire, procreate, engender, breed, propagate, reproduce

Ana *bear, produce, yield

beggarly cheap, scurvy, shabby, sorry, *contemptible, despicable, pitiable

Ana paltry, measly, *petty, trifling; *mean, abject, sordid

begin, commence, start, initiate, inaugurate are comparable when they mean to set something going or in progress or to take the first step in a course, process, or operation. *Begin, commence,* and *start* are also used intransitively with the activity, work, or instrument as the subject in the sense of to get going or in progress (he *began* the letter) (play *begins* when the whistle blows) (start a race) (the race *starts* at ten) **Begin** (implying opposition to *end*) and **commence** (implying opposition to *conclude*) are identical in meaning; the former is often preferred because less formal than the latter (begin work) (the lecture *began* with an apology) (well *begun* is half done) (things never *began* with Mr. Borthrop Trumbull; they always *commenced*—*George Eliot*) Traditional usage often supports the choice of *commence* in reference to court proceedings, religious or other ceremonies, or industrial, commercial, or military operations (commence a lawsuit) (divine service *commences* promptly at eleven) (will *commence* drilling for new wells) (directs the commission to *commence* its work not later than thirty days from the adoption of this resolution—*Current History*) **Start** is often used as though it also were identical in meaning with *begin* and *commence*; the term, however, carries implications which distinguish it sharply from the other words. *Start* implies opposition to *stop*; it therefore suggests a setting out from a particular point (as on a journey, a race, or a course) often after inaction or waiting (the horses are ready to *start* (that is, to begin the race)) (the children like to see the train *start* (that is, set out from the station at which it has stopped)) (conversation *started* and stopped and after a pause *started* again) *Start* also frequently takes as its subject not the person or agency that begins a process or course but the one that causes, enables, or permits him or it to begin (his father *started* him in business) **Initiate** (see also INITIATE) suggests reference to the first step in a process and carries no implication of an end or ending; it often suggests a contrast with *carry on, continue, or maintain*; thus, a person *initiates* (more precise than *begins* or *starts* except in informal speech) a custom or practice when he is its originator; a diplomat *initiates* negotiations between the government he represents and another when he takes the first step leading to future discussions in which he may or may not take part, but he *begins* negotiations on behalf of his government when he enters into actual discussions which in the natural course of events will end only when there is agreement or hopeless disagreement (Taft had to make himself popular as a necessary incident to *initiating* a civil government—*Heiser*) **Inaugurate** retains, from its more frequent sense of to induct into office (see INITIATE), a hint of a ceremonial beginning. Often it is an inflated term for *begin* or *commence* (the Curies *inaugurated* a new era in science by their discovery of radium) (inaugurate proceedings on behalf of the heirs) The word sometimes takes as its subject the act, action, or incident that serves as the first step in a course or procedure (the discovery of radium *inaugurated* a new era in science) (prayers and scripture *inaugurated* the official day—*H. G. Wells*) *Ana* *found, institute, establish, organize; introduce, admit, *enter; originate, derive, *spring, arise, rise *Ant* end —*Con* *close, terminate, conclude, finish, complete; *stop, cease, quit, discontinue, desist; achieve,

accomplish, effect, fulfill (see PERFORM)

beginning, genesis, rise, initiation are comparable when they mean the first part or stage of a process or development. Although **beginning**, often in the plural form **beginnings**, may mean the point at which a person or thing commences its existence (compare BEGIN) it is more often used as denoting the period when something takes form or shape (the *beginning* of justice is the capacity to generalize and make objective one's private sense of wrong, thus turning it to public account—*Earl Warren*) Often, especially when applied to something whose entire course can be viewed, *beginning* or *beginnings* is contrasted with middle and end or with end alone (a drama, according to Aristotle, is composed of three parts, a *beginning*, a middle, and an end) (he eschews speculation on first *beginnings* and ultimate ends, on the ground that no theory about them will assist him to produce . . . an end to suffering—*Humphreys*) (Canada has had a dramatic and colorful history, particularly in her *beginnings*—*J. D. Adams*) (in the *beginning* God created the heaven and the earth—*Gen 1:1*) **Genesis** is usually distinguished from *origin* (see ORIGIN) in that the latter applies to the point at which or from which a thing started, and the former to the stage in which a thing came into its distinctive form or shape or was brought into being; usually, therefore, *genesis* suggests the gradual formulation, formation, or unfolding, but not the full development or evolution of the thing in question; thus, one speaking of the *origin* of the phrase "art for art's sake" gives the first use discoverable of the phrase, whereas one speaking of the *genesis* of the theory of "art for art's sake" dwells upon what happens between the origin of the phrase and its attachment to definite ideas, or upon the period when the theory is receiving its first formulation (the *genesis* and growth of his ideas and attitudes—*G. L. Kline*) (the *genesis* of personality is in all probability determined largely by the anatomical and physiological makeup of the individual—*Sapir*) (the little theater movement . . . had its *genesis* in small groups of idealists eager to experiment with new methods and new media—*Amer. Guide Series: Va.*) **Rise**, although sometimes used in place of *genesis*, usually denotes the upward course of a new thing as opposed to its downward course or decline. It differs, therefore, from *genesis*, which represents a period comparable to gestation, in commonly representing a period comparable to that between a man's birth and his full maturity or prime of life (the *rise* and fall of a great state) (this use of an old word in a slightly new sense took its *rise* out of the same milieu that led . . . to the addition of *lynch law*—*Mathews*) (the *rise* of large newspapers brought special problems, for their power of inflicting injury was enormous—*Plucknett*) *Rise*, however, is sometimes more limited in its significance, often being referred to that part of a growth or development which precedes its full flowering (the greater French novelists . . . chronicle the *rise*, the regime, and the decay of the upper bourgeoisie in France—*T. S. Eliot*) **Initiation** may refer to the period of indoctrination (as in the mysteries, rites, and ordeals of a religion or state of life or in the performance of one's duties or functions); usually this indoctrination is by instructions which follow a system or it may be the unconscious result of many influences, but in any event it is felt as the beginning of a new period or state characterized by maturity fully attained (that universal preoccupation among men everywhere with *initiation*, that mysterious male rebirth of the youth into full membership in the society of men—*La Barre*) (such a love is the *initiation* into the higher life, the spring at once of virtue, of philosophy, and of religion—*Dickin-*

son) But often *initiation* loses this clear suggestion of attained maturity and is then essentially interchangeable with *beginning* (resolutely opposed the *initiation* and development of the researches that lead to the thermo-nuclear bomb—*Times Lit. Sup.*) (the platform . . . called for civic reform . . . and for the *initiation* of the city-manager form of government—*Current Biog.*)

Ana *origin, source, inception, root: rise, derivation, emanation (see corresponding verbs at SPRING): emergence, appearance (see corresponding verbs at APPEAR) *Con* termination, ending, *end: conclusion, completion, closing (see corresponding verbs at CLOSE)

begrime grime, smirch, besmirch, dirty, sully, *soil, foul, befool, tarnish

Ana *spot, spatter, sprinkle

begrudge *covet, envy, grudge

beguile 1 delude, *deceive, mislead, betray, double-cross

Ana *dupe, gull, befool, trick, hoax, hoodwink, bamboozle: cajole, wheedle, blandish, *coax: *cheat, cozen: *lure, entice, seduce

2 *while, wile, beguile, fleet

Ana divert, *amuse, entertain: *comfort, solace: *speed, hasten, hurry

behave 1 **Behave, conduct, comport, demean, deport, acquit, quit** are comparable when they mean to act or to cause or allow (oneself) to act in a specified way or in a way that evokes comment. **Behave** denotes the performing of various actions or the saying of various things in the manner indicated by modifiers (one must keep one's contracts, and *behave* as persons of honor and breeding should *behave*—*Rose Macaulay*) (you will bitterly reproach him in your own heart, and seriously think that he has *behaved* very badly to you—*Wilde*) Used without modifiers, it indicates action and conduct adjudged proper and seemly; in this use it is common in relation to children and adolescents (the average parent is likely to say that the child *behaves* if the child conforms to what the parent thinks is right—*Fishbein*) **Conduct** often applies to actions showing direction or control of one's actions or bearing with command, will, knowledge, and resolution (he *conducted* himself with patience and tact, endeavoring to enforce the laws and to check any revolutionary moves—*W. E. Stevens*) **Comport**, in this sense always reflexive, is somewhat more formal than *behave* and *conduct* but usually lacks any other special suggestion though it sometimes may convey the notion of conformance to the expected (as of one's class) or suitable (as to one's position) (the missionaries . . . *comported* themselves in a way that did not rouse general antagonism or they could have been easily ousted—*Spicer*) (a man is judged now by how well he *comports* himself in the face of danger—*Aldridge*) (after having seen him thus publicly *comport* himself, but one course was open to me—to cut his acquaintance—*Thackeray*) In this sense **demean** and **deport** are close synonyms for *comport*; the former is becoming rare (it shall be my earnest endeavor to *demean* myself with grateful respect towards her—*Austen*) The latter may suggest *deportment* according to a code (Dido and Aeneas, in the *Roman d'Eneas*, *deport* themselves in accordance with the strictest canons of courtly love—*Lowes*) **Acquit** and **quit**, the latter archaic, are always used reflexively in this sense; they are likely to apply to action deserving praise or meeting expectations (I trust we *acquit* ourselves worthily as custodians of this sacred mystery—*Wylie*) (he then *acquitted* himself well as a hardworking and level-headed chairman of the judiciary committee of the House—*Pearson*) (the endless heroes of life and death who still bravely meet their separate

hours . . . and *quit* themselves like men—*Yale Review*) (a border action in which the Dogra companies of the Loodhiana Sikhs had *acquitted* themselves well—*Kipling*) *Ana* bear, *carry: manage, control, direct (see CONDUCT) *Ant* misbehave

2 *act, react, operate, work, function

behavior, conduct, deportment are comparable when denoting a person's actions in general or on a particular occasion, so far as they serve as a basis of another's judgment of one's qualities (as character, temperament, mood, manners, or morals). **Behavior** may be used in reference to a human being regardless of status (as in age, development, or social standing), for it need not imply consciousness of what one is doing. *Behavior* may be thought of as instinctive or as voluntary and, hence, as either a spontaneous expression of personality or character or as the result of training or breeding (the captain's *behavior* to his wife and to his wife's father . . . was as if they had been a pair of not very congenial passengers—*Conrad*) (courageous *behavior* is easier for a man who fails to apprehend dangers—*Russell*) (grandfather had been hounded out of his congregation because he couldn't hold her to their standards of *behavior* for a minister's wife—*Mary Austin*) Since *behavior* is increasingly used in the various sciences in reference to animals and even substances, the term as referred to human beings tends in present usage to become more sharply differentiated from **conduct** than in the past. The latter term consistently carries a hint of moral responsibility and is less likely to confuse or mislead than *behavior* when this thought is prominent; thus, one dismisses a servant because of his *conduct* (better than *behavior* because it implies violation of principles) (no animal's *behavior* is controlled by moral principles. Generally speaking, they do not rise from *behavior* to *conduct*—*Clarke*) **Deportment** (see also BEARING) is often used of behavior as taught or as the result of discipline; its strongest implication is that of degree of conformity to the accepted code of good manners or the conventions governing one's relations to one's fellows, one's superiors, or one's inferiors (children held up as models of *deportment*) (his old-fashioned *deportment* marked him out from others)

Ana demeanor, mien, deportment, *bearing: *action, act, deed

behest *n* bidding, dictate, injunction, *command, order, mandate

Ana precept, rule, *law: request, solicitation (see corresponding verbs at ASK)

behind *after

Ant ahead

behindhand *tardy, late, overdue

Ana dilatory, laggard, *slow: delayed, retarded, detained (see DELAY *vb*)

Ant beforehand —*Con* *early, soon, betimes: punctual (see CAREFUL): *quick, prompt

behold *see, view, survey, observe, descry, esp. notice, perceive, discern, remark, note, contemplate

Ana watch, look, *see: regard, *consider

beholder onlooker, looker-on, observer, witness, eye-witness, *spectator, bystander, kibitzer

being 1 *existence, actuality

Ana personality, individuality, character (see DISPOSITION)

Ant becoming: nonbeing

2 *entity, creature, individual, person

Ana *thing, object, article: *idea, concept, thought

belabor *beat, pound, pummel, thrash, buffet, baste

Ana *strike, hit, smite, slug, clout, swat, punch, box, cuff, slap

belch *vb* **Belch, burp, vomit, disgorge, regurgitate, spew, throw up** are comparable when they mean to eject matter (as food or gas) from the stomach by way of the mouth or, in extended use, from a containing cavity by way of an opening. **Belch** denotes the noisy voiding of gas from the stomach and may be extended to something ejected in volume and often with noise (as smoke and fire from a cannon or a volcano) <there stood a hill not far, whose grisly top *belched* fire and rolling smoke—*Milton*> <the war-fiend shrieks and *belches* out his fury—*Capern*> **Burp** in its basic sense is interchangeable with *belch* <mopping his face solemnly with his cologne-scented handkerchief, and *burping* surreptitiously under it—*Mencken*> but in extended use is much less forceful and usually refers to something sounding like a human belch <the engine *burped* and ran out of gas—*Road and Track*> **Vomit** is the usual word for the ejection through the mouth of what has been eaten or swallowed; ordinarily it implies nausea, but it may suggest a previous gorging or surfeiting or the use of an emetic <and the Lord spake unto the fish, and it *vomited* out Jonah upon the dry land—*Jonah* 2:10> It is often used to suggest a forcible rejection or an emission or a discharge of contents <that huge black-mouthed sewer, *vomiting* its pestilential riches across the mud—*Kingsley*> **Disgorge**, though close to *vomit*, more specifically implies an ejection of something swallowed, in essentially its original state <Jonah was *disgorged* by the whale after three days and three nights> Especially in extended use it may suggest an ejection or yielding up (as of something held or secreted) that is induced by force or pressure from without <make the French generals *disgorge* the church plate which they have stolen—*Wellington*> Basically **regurgitate** implies a flowing or gushing back, typically of food from the stomach to the esophagus or mouth <cattle *regurgitate* small cuds of herbage for further chewing> In extended use *regurgitate* may reflect quite neutrally its basic meaning <“Mind you,” he said *regurgitating* his article slowly phrase by phrase, “the subject doesn’t make the work of art”—*Huxley*> but more often it carries some suggestion of the unpleasantness of the physiological phenomenon <Henry was incapable of reversing himself or of *regurgitating* Cromwell’s wealth—*Hackett*> <read greedily and without abatement, and *regurgitated* his formal culture in the same feverish spasms—*Curko*> **Spew** is rare in modern usage as a synonym for *vomit* but has extended use as connoting a pouring forth in a stream that cannot be restrained or, sometimes, a spurting or spitting forth <the steer . . . dying *spews* a flood of foamy madness, mixed with clotted blood—*Dryden*> It also may imply specifically a pouring forth of something offensive (as abusive or foul language) <Thersites *spews* over everything that we had deemed high and sacred, his foul . . . insults—*Dowden*> Basically **throw up** is closely equivalent to *vomit*, though it may stress the matter ejected rather than the physiological process. In extended use it is distinctly less vigorous than *vomit* and usually implies no more than a producing or bringing forth of something <all the voluminous information *thrown up* by successive . . . investigations—*Bemis*>

Ana *eject, expel

beleaguer *besiege, invest, blockade

Ana *surround, environ, encircle, encompass, hem, gird: *enclose, envelop: harass, pester, *worry, annoy

belie *misrepresent, falsify, garble

Ana contradict, contravene, negative (see DENY): controvert, *disprove

Ant attest —*Con* *reveal, discover, disclose: *indicate, bespeak, betoken

belief 1 **Belief, faith, credence, credit** are comparable when they mean the act of one who assents intellectually to something proposed or offered for acceptance as true or the state of mind of one who so assents. **Belief** is less restricted in its application than the other terms, for it may or may not imply certitude or certainty in the one who assents; it may even suggest nothing more than his mere mental acceptance <his conclusions are beyond *belief*> <the theory merits *belief*> <nothing could shake his *belief* in the Bible as the word of God> <hope is the *belief*, more or less strong, that joy will come—*Sydney Smith*> <*belief* consists in accepting the affirmations of the soul; unbelief, in denying them—*Emerson*> **Faith** implies full assent of the mind and therefore certitude, but it adds to this a strong implication of complete trust or confidence in the source (as the divinity, the institution, or the person) that proposes something or offers itself for belief and confidence. Consequently, although *belief* may represent the mind’s act or state when something is assented to, regardless of whether it is or is not fully supported by evidence, *faith* characteristically represents the mind’s act or state only when something is assented to on grounds other than merely those of the evidence of one’s senses or of conclusions entirely supported by reason <*faith* is the substance of things hoped for, the evidence of things not seen—*Heb* 11:1> <to believe only possibilities is not *faith*, but mere philosophy—*Browne*> <such tales, whether false or true, were heard by our ancestors with eagerness and *faith*—*Macaulay*> *Faith* often carries a strong suggestion of credulity or overreadiness to accept authority <he takes everything on *faith*> **Credence** stresses mere intellectual assent without implying weak or strong grounds for belief and without suggesting credulity or its absence. Consequently it is seldom used in reference to religious or philosophical doctrines and is commonly employed in reference to reports, rumors, and opinions <there is no superstition too absurd to find *credence* in modern England—*Inge*> <we are not now concerned with the finality or extent of truth in this judgment. The point is that it gained a widespread *credence* among the cultured class in Europe—*Day Lewis*> **Credit** (see also INFLUENCE) carries a weaker implication than any of the preceding words of certitude or of acceptance as a result of conviction; often it specifically suggests as its ground a reputation for truth in the person who offers something for acceptance <anything he will tell you about the circumstances is entitled to *credit*> <full faith and *credit* shall be given in each State to the public acts, records, and judicial proceedings of every other State—*U. S. Constitution*>

Ana certitude, assurance, *certainty, conviction: assenting or assent, acquiescing or acquiescence (see corresponding verbs at ASSENT)

Ant unbelief, disbelief —*Con* incredulity (see UNBELIEF): *uncertainty, doubt, mistrust

2 conviction, persuasion, view, *opinion, sentiment

Ana *doctrine, dogma, tenet: *principle, fundamental: conclusion, judgment (see under INFER)

believable credible, *plausible, colorable, specious

Ana *probable, possible, likely

Ant unbelievable —*Con* fabulous, mythical (see FICTITIOUS): *doubtful, dubious, questionable

belittle depreciate, disparage, derogate, detract, minimize, *decry

Ana underestimate, undervalue, underrate (see base words at ESTIMATE): diminish, reduce, lessen, *decrease

Ant aggrandize, magnify —*Con* *exalt: heighten, *intensify, enhance, aggravate: vaunt, gasconade, brag, *boast, crow

bellicose *belligerent, pugnacious, combative, contentious, quarrelsome

Ana militant, *aggressive, assertive: antagonizing or antagonistic, combating or combative (see corresponding verbs at RESIST): fighting, warring, battling, contending (see CONTENT); rebellious, factious, seditious, mutinous (see INSUBORDINATE)

Ant pacific: amicable —*Con* peaceful, pacifist, peaceable (see PACIFIC)

belligerent *adj* **Belligerent, bellicose, pugnacious, combative, quarrelsome, contentious** mean having or taking an aggressive or fighting attitude. **Belligerent** usually implies actual engagement in hostilities (the *belligerent* powers in the World War) (define a nation's status as not neutral yet not *belligerent*) When applied to such things as tones, speeches, or gestures, the term implies an actively hostile mood or warlike temper (a *belligerent* reply to a diplomatic note) **Bellicose** applies usually to a state of mind or temper; it suggests a desire or readiness to fight or sometimes a disposition to stir up a fight (a *bellicose* tribe) (an intoxicated man in a *bellicose* mood) (an editorial in a *bellicose* vein) **Pugnacious** and **combative** differ from *bellicose* (which is sometimes given an ironic or mock-heroic turn) in applying more commonly to disposition or character; they need not, however, convey the impression of pettiness or ill nature or of readiness to fight without genuine cause, so frequently implied in **quarrelsome** (the Scotch are certainly a most *pugnacious* people; their whole history proves it—*Borrow*) (combat in the field of sports . . . [is] generally approved. The *combative* impulses in human nature may thus find an expression—*Cohen*) (soon every father bird and mother grew *quarrelsome*, and pecked each other—*Cowper*) (on the days they worked they were good-natured and cheerful . . . on our idle days they were mutinous and *quarrelsome*—*Franklin*) **Contentious** frequently suggests perversity of temper and wearisome persistence in dispute (a very kind woman, though saying what she liked about her neighbors, and *contentious* toward all antireformers—*Canby*)

Ana hostile, antagonistic (see corresponding nouns at ENMITY): fighting, warring, battling, contending (see CONTENT); warlike, *martial

Ant friendly —*Con* neighborly, *amicable: *neutral, indifferent

below *vb* *roar, bluster, bawl, vociferate, clamor, howl, ululate

Ana yell, *shout, scream, shriek: bay, *bark, yelp: *cry, wail, keen

belly *abdomen, stomach, paunch, gut

belong pertain, appertain, relate, apply, *bear

belongings *possessions, effects, means, resources, assets

below, under, beneath, underneath mean in a lower position relatively to some other object or place. **Below** (opposed to *above*) applies to something which is anywhere in a lower plane than the object of reference; **under** (opposed to *over*) to something which is below in a relatively vertical line, and it may imply actual covering (below sea level) (the valley far below us) (under a tree) (under the bed) (hide one's light under a bushel) (the Whirlpool Rapids are below, and the Cave of the Winds is under Niagara Falls) (the whole visible landscape is below, but only a small portion of it under, an observer in a balloon) **Beneath** is an equivalent of both *below* and *under* (heaven above, or . . . the earth beneath—*Exod* 20:4) (beneath the spreading tree—*Goldsmith*) **Underneath** is often employed in place of *under* or *beneath*. It is, however, the preferred term when there is the intent to imply complete or nearly complete concealment (mines

underneath the city) (garments worn underneath a dress)

In their extended senses *below* and *under* agree in expressing inferiority but differ (like *above* and *over*) in the immediacy of the relation expressed; thus, one officer may be *below* another in rank without being *under* him in immediate subordination. Similarly, with reference to deficiency, *below* is commonly used in general, *under* in more specific, relations (below the accepted standard) (below normal temperatures) (under six years of age) **Beneath** frequently suggests social, moral, or general inferiority (married beneath herself) (criticism beneath his notice) (beneath contempt) **Underneath** suggests, not inferiority, but something underlying and not indicated clearly by what is outwardly manifest (underneath his ingratiating manner one felt a sinister intention) (there is something underneath this announcement, I am sure)

Ant above —*Con* over (see ABOVE)

belt zone, *area, tract, region

bemoan bewail, lament, *deplore

Ana *grieve, mourn, sorrow

Ant exult

bemuse *daze, stun, stupefy, benumb, paralyze, petrify

Ana *confuse, muddle, addle, fuddle, befuddle

Con *illuminate, enlighten: arouse, rouse, *stir, awaken: excite, stimulate, *provoke

bend *vb* *curve, twist

Ana contort, *deform: deflect, divert (see TURN)

Ant straighten

beneath underneath, under, *below

Ant above, over

benefaction *donation, contribution, alms

Ana *gift, present, largess, boon: endowment (see corresponding verb at DOWER): grant, subvention (see APPROPRIATION): *charity, philanthropy

beneficent *benevolent

Ana *charitable, humanitarian, philanthropic, eleemosynary, altruistic: munificent, bountiful, bounteous, openhanded, generous (see LIBERAL)

Ant maleficent

beneficial, advantageous, profitable are applied to what brings good or gain. **Beneficial** refers to what promotes health or well-being; **advantageous**, to what more directly conduces to relative superiority or subserves a desirable end; **profitable**, to what yields useful or lucrative returns (a climate *beneficial* to rheumatism) (measures . . . *beneficial* to the kingdom—*J. R. Green*) (the enemy were in an *advantageous* position on the hill) (you see . . . how swift and *advantageous* a harbinger it [a good reputation] is, wherever one goes—*Chesterfield*) (a *profitable* study) (profitable investments)

Ana salutary, *healthful, wholesome: *favorable, benign, propitious

Ant harmful: detrimental —*Con* *pernicious, deleterious, baneful, noxious

benefit *vb* **Benefit, profit, avail** mean to do good or to be of advantage to someone. **Benefit** usually implies personal betterment or improvement (as of one's physical, intellectual, moral, or spiritual condition), but it may suggest enrichment or a furtherance of one's ends (a summer at the seashore *benefits* the entire family) (we all *benefit* greatly by lighthouses, even those of us who have never seen the sea and never expect to—*Shaw*) (the expansion of the city's industries *benefits* everyone indirectly) **Profit** carries a strong implication of gain, especially material gain. It is therefore preferred to *benefit* when an increase or yield, as opposed to a decrease or loss, in one's store (as of wealth, power, or knowledge) is to be suggested; thus, he always *profits* (not *benefits*, unless one wishes to imply a salutary effect) by the misfortunes of

others; no one *benefits* from a war except those who seek to *profit* by it (it will *profit* you as a congressman to pay more attention to your constituency's wishes) (what is a man *profited*, if he shall gain the whole world, and lose his own soul?—*Mt 16:26*) (do we not lose something . . . when we hurry by and disregard what does not seem to *profit* our own existence?—*Binyon*) **Avail**, which has an archaic and literary flavor that makes it rare in speech except in historical novels or in sermons or orations, stresses efficacy (ah wretched shepherd, what *avails* thy art, to cure thy lambs, but not to heal thy heart!—*Pope*) (say not the struggle nought *availeth*, the labor and the wounds are vain—*Clough*)

Ana better, *improve, ameliorate: *help, assist, aid
Ant harm —*Con* *injure, hurt, damage, impair

benevolent 1 *charitable, philanthropic, eleemosynary, humanitarian, humane, altruistic

Ana benign, benignant, kindly, *kind: generous, *liberal, bountiful, bounteous, openhanded: obliging, complaisant, *amiable

Ant malevolent —*Con* *malicious, malignant, malign, spiteful: *stingy, close, miserly

2 **Benevolent, beneficent** are closely related rather than strictly synonymous terms. **Benevolent**, which applies primarily to persons, means kindly in feelings and disposed to be generous or charitable, thereby emphasizing the will to do good, while **beneficent**, which applies to persons and things, means doing or effecting good, thereby emphasizing the fact of doing good. Consequently *benevolent* is not only applied to a person, a group, or an institution, but to matters (as looks, attitudes, intentions, manners, and tones) that suggest a kindly disposition or a wish to help (beloved old man! *benevolent* as wise—*Pope*) (the mild precepts of a *benevolent* religion—*John Moore*) (the heart *benevolent* and kind the most resembles God—*Burns*) *Benevolent* may sometimes take on a new connotation either seriously or ironically and suggest the attitude of a person on the outside who is little more than a well-wisher (the mission of the United States is one of *benevolent* assimilation, substituting the mild sway of justice and right for arbitrary rule—*McKinley*) (few persistent novelists, I suppose, have ever received in one lifetime so generous a measure of *benevolent* neglect—*Glasgow*) *Beneficent* heightens the implication of doing good. It is therefore preferred when the emphasis is upon accomplishment rather than upon intention (a *beneficent* economic policy) (a *beneficent* sovereign) (the stars were no longer regarded as malignant or *beneficent* powers—*L. P. Smith*) (certain influences appear, specifically that of Lipchitz, but these are *beneficent*, and they suggest no feeling of constraint in the artist—*Coates*) Unlike *benevolent*, *beneficent* may be used without any hint of volition and is then applicable to the benefits produced by things (overflows its banks and leaves *beneficent* layers of fertile soil—*Mumford*) (the *beneficent* Gulf stream prevents things from really getting cold—*Joseph*)

Ana, Ant, Con see those at BENEVOLENT 1

benign 1 benignant, kindly, *kind

Ana *gracious, genial, cordial, affable: sympathetic, *tender, compassionate: *suave, urbane, bland

Ant malign —*Con* malignant, malevolent, *malicious, spiteful: *caustic, acrid, mordant

2 auspicious, *favorable, propitious

Ana fortunate, happy, providential, *lucky: gentle, mild (see SOFT): benevolent, humane, *charitable: merciful, clement, *forbearing

Ant malign —*Con* *sinister, baleful, malefic, maleficent: threatening, menacing (see THREATEN)

benignant benign, *kind, kindly

Ana benevolent, humane, *charitable, humanitarian, philanthropic, eleemosynary: *gracious, affable: compassionate, *tender, sympathetic

Ant malignant —*Con* malevolent, spiteful, *malicious: merciless, unrelenting, implacable, relentless, *grim

bent *n* turn, talent, aptitude, knack, *gift, faculty, genius

Ana propensity, penchant, *leaning, proclivity, flair: *predilection, bias, prepossession, prejudice, partiality: capacity, *ability, capability

Con disinclination, indisposition, reluctance (see corresponding adjectives at DISINCLINED): aversion, *antipathy

benumb *daze, stun, bemuse, stupefy, paralyze, petrify

Ana chill, freeze (see corresponding adjectives at COLD): congeal (see COAGULATE): dumbfounded, confound, nonplused, bewildered (see PUZZLE)

Con rouse, arouse, *stir, rally: kindle, fire (see LIGHT)

bequeath *will, devise, leave, legate

Ana *give, present, bestow: *distribute, dispense

berate rate, tongue-lash, upbraid, jaw, bawl, chew out, *scold, wig, rail, revile, vituperate

Ana censure, denounce, condemn, reprehend, reprobate, *criticize: rebuke, reprimand, reproach, *reprove, chide

berth 1 *room, play, elbowroom, leeway, margin, clearance

2 *wharf, dock, pier, quay, slip, jetty, levee

beseech entreat, implore, supplicate, *beg, importune, adjure

Ana pray, petition, sue, plead, appeal (see under PRAYER)

beset overrun, *infest

Ana *worry, annoy, harass, harry, pester, plague: assail, *attack, assault

beside, besides are occasionally interchangeable. More often **beside** is employed as a preposition in a local sense, meaning by the side of (he stood *beside* her) (the house *beside* the river) On the other hand, **besides** has almost entirely replaced *beside* as a preposition in the sense of other than (a man knowing little *besides* the basic skills of his trade) and as a preposition in the sense of in addition to (he received other gifts *besides* the watch) and as an adverb in the senses of otherwise and moreover (see ALSO).

besides *adv* moreover, furthermore, *also, too, likewise

besides *adv & prep* *beside

besiege, beleague, invest, blockade mean to surround an enemy in a fortified or strong position so as to prevent ingress or egress. **Besiege** implies a sitting down before the entrances to a fortified place (as a castle or a walled town), and it may be used to denote the operation of attackers of a strongly fortified or naturally protected position of the enemy and usually implies the surrounding of it and frequent assaults upon it in order to break down the resistance of the enemy (Troy was *besieged* by Greek armies for ten years) **Beleague** does not materially differ from *besiege* in meaning, although it springs from a different type of warfare, one where fortifications are less the objects of attack than open cities or occupied positions. **Beleague** suggests the presence of camps and therefore of great numbers of troops; often it carries the connotations of besetting or harassing rather than of confining or imprisoning (a *beleaguered* garrison) (but Richelieu's general, Harcourt, *besieged* the town from the outside, himself surrounded and *beleaguered* by the Spanish governor of Milan—*Belloc*) (as in a *beleaguered* city there spread circumstantial rumors of happenings in the world outside—*Eddington*) In extended use *besiege* stresses a blocking up (they will *besiege* your doors) or an assailing with importunities (I was *besieged* by four small Bedouin children who had been whimpering for money as I read the papers—*Lieblich*) and *beleague* emphasizes a pestering or annoying (the girl

is . . . *beleaguering* . . . a worthy gentleman—*Richardson*) <the family is *beleaguered* by peddlers> **Invest** comes very close to *besiege*, but it does not, by comparison, carry as strong an implication of strength or of persistence in attack. In many cases it implies the use of men and weapons to prevent ingress or egress, but it carries little suggestion of frequent assaults upon the position <Astorga is *invested*, but has not been vigorously attacked—*Wellington*> <Charleston was never besieged nor was any serious effort made . . . to *invest* it on the land side—*Spaulding*> **Blockade** usually stresses a closing of all sea-lanes to those who wish to enter or leave hostile territory. The term usually implies the use of ships or mines to attain this end, but if the attacking country is sufficiently strong, it may imply prohibition of neutral or enemy vessels entering or leaving and efforts to seize or detain those that disobey. The object of blockading is usually to starve the enemy or to prevent the entrance of essential supplies <in any showdown the West's ultimate power to *blockade* might make the Russians think twice—*Time*>

Ana *enclose, envelop, pen: *surround, environ, encircle, encompass, hem: beset (see INFEST): assail, *attack, assault

besmirch smirch, dirty, sully, *soil, foul, befoul, grime, begrime, tarnish

Ana *spot, spatter, sprinkle

Ant cleanse

besotted infatuated, *fond, insensate

Ana fatuous, asinine, foolish, silly, *simple: *drunk, drunken, intoxicated, inebriated: *stupid, slow, dull, dense, crass

Con sensible, sane, *wise, judicious, prudent: *rational, reasonable: sober, *serious, earnest

bespangle spangle, *spot, spatter, sprinkle, mottle, fleck, stipple, marble, speckle

Ana *illuminate, illumine, lighten, light: glow, *blaze, flame: *flash, gleam, sparkle, scintillate, twinkle

bespangled spangled, spotted, spattered, sprinkled, mottled, flecked, stippled, marbled, speckled (see under SPOT *vb*)

Ana *bright, brilliant, radiant, luminous: illuminated, illumined, lighted (see ILLUMINATE)

bespeak betoken, attest, *indicate, argue, prove

Ana manifest, evidence, *show, evince, demonstrate: imply, hint, *suggest

bestial brutish, brute, *brutal, feral, beastly

Ana debased, depraved, corrupted or corrupt (see under DEBASE): degenerate, *vicious: degraded (see ABASE): sensual, fleshly, *carnal

bestow confer, present, donate, *give, afford

Ana *distribute, dispense, divide: *grant, award

bet *n* **Bet**, **wager**, **stake**, **pot**, **ante** denote in common something of value, usually money, risked in the confidence or hope that something is true or will turn out in a certain way, something else of value being risked by at least one other party in support of an opposing confidence or hope. **Bet** and **wager** are used with little distinction of meaning either of what is risked or of the act of risking it. **Stake** implies money or valuables bet and actually produced and entrusted to a neutral party (stakeholder) or placed in the pot in a card game. By extension a stake is anything material or nonmaterial that one stands in jeopardy of losing <and will probably always have the largest commercial *stake* in the African continent—*Livingstone*> <with my most affectionate wishes for Dr. Johnson's recovery, in which his friends . . . have so deep a *stake*—*Dick*> A **pot** is an aggregate of the bets made by all the bettors or players especially in poker <won several big *pots* in successive deals> **An ante** typically is a stake which each player in a poker game who

wishes to continue a particular hand puts up after he has seen his original five cards but before he draws other cards, but in some games of stud or draw poker and in blackjack the ante is a compulsory stake put up by each player before the cards are seen. By extension an ante is a share or amount which must be put up, usually as a price or as a prelude to a joint venture <considerations that tend to raise the *ante* so as to discourage all but the most efficient producers—*Amer. Fabrics*> <the *ante* of these shareholders and other private sources of financing the steel expansion will come to about 1.7 billion dollars—*Atlantic*>

bête noire *abomination, bugbear, anathema

bethink recollect, remind, *remember, recall, reminisce, mind

betide befall, *happen, chance, occur, transpire

betimes *early, soon, beforehand

Ant unseasonably, inopportunistly

betoken bespeak, attest, *indicate, argue, prove

Ana presage, augur, portend, forebode (see FORETELL): import, signify, denote, *mean: evidence, manifest, *show, evince, demonstrate

betray 1 mislead, delude, *deceive, beguile, double-cross

Ana trap, entrap, snare, ensnare (see CATCH): *dupe, trick, befool, hoodwink, gull

2 discover, *reveal, disclose, divulge, tell

Ana manifest, evidence, evince, *show, demonstrate: attest, betoken, bespeak, argue, *indicate

Con shield, guard, safeguard, protect, *defend

better *adj* **Better**, **superior**, **preferable** mean more worthy or more pleasing than another or others. **Better**, which often serves as the comparative of *good*, in this sense implies a quality or character in a person or thing that surpasses or exceeds that in the one or ones called good <the theme is good, but I think you can write a *better* one> <he proposed a *better* scheme than any that had been discussed> Often, however, *better* is used in comparison or contrast with something that can be described as bad <give him time to show his *better* nature> <looking upon myself as no *better* than a dead man—*Steele*> or with something that may be good, bad, or indifferent yet from the point of view of the speaker or writer is to be rejected as totally undesirable in comparison <it is *better* for him that a millstone were hanged about his neck, and he were cast into the sea—*Mk* 9:42> <*better* to reign in Hell than serve in Heaven—*Milton*> **Superior** in all its uses retains some feeling of its basic meaning, higher in physical position, which is now largely restricted to technical contexts in which it implies opposition to what is below (*inferior*); thus, the upper jaw or maxilla is sometimes distinguished as the *superior* maxilla from the lower jaw or mandible which is then designated the *inferior* maxilla. *Superior* often implies a scale (as of values or ranks) and emphasizes height (as of status, quality, or worth); thus, if a student is doing good work one might suggest that he could do *better* (as compared with his previous accomplishment) if he tried, and might hope that his added efforts would produce a truly *superior* result (as compared either with any relevant accomplishment or with a scale of possible accomplishments); one might like an author's new book *better* than his last but rate it *superior* to anything he had previously written <a sergeant is *superior* to a corporal> <certain rights are *superior* to constitutions and to statute laws—*Lippincott*> <the *superior* durability of parchment—*Coulton*> <*superior* wisdom derived from experience—*Trewartha*> **Preferable** implies a choice between two things or one thing and all others usually on the ground that the thing chosen is better by comparison or is superior in quality, status, or kind. But its chief emphasis is upon relative desirability, and the other implications may be greatly

obscured or lost upon occasion <he finds a walk in the country *preferable* to reading a book>

Ana *choice, delicate, dainty: selected, culled, picked, preferred (see CHOOSE)

better *vb* *improve, ameliorate, help

Ana *correct, amend, reform, rectify, remedy, redress: enhance (see INTENSIFY)

Ant worsen —*Con* impair, mar, harm, damage, *injure: *debase, vitiate, corrupt

between, among are comparable when they take as object two or more persons or things and indicate their relation (as in position, in a distribution, or in participation). **Between** in its basic sense applies to only two objects <*between* Scylla and Charybdis> <*between* two fires> When this word is used of more than two objects, it brings them severally and individually into the relation expressed (a treaty *between* three powers) <the three survivors had but one pair of shoes *between* them> <I hope that *between* public business, improving studies, and domestic pleasures, neither melancholy nor caprice will find any place for entrance—*Johnson*> **Among** always implies more than two objects which it brings less definitely into the relation expressed <*among* so many candidates one must find a good one> <*among* the survivors were two boys> <five barley loaves, and two small fishes: but what are they *among* so many?—*Jn* 6:9>

bewail lament, *deplore, bemoan

Ana sorrow, *grieve, mourn: wail, weep, *cry

Ant rejoice

bewilder mystify, perplex, distract, *puzzle, confound, nonplus, dumbfound

Ana *confuse, addle, fuddle, muddle: fluster, flurry, perturb, agitate, upset (see DISCOMPOSE): baffle, foil (see FRUSTRATE)

bewitch enchant, captivate, fascinate, charm, allure, *attract

Ana *thrill, electrify: delight, *please: infatuate, enamor (see corresponding adjectives at ENAMORED)

bewitching enchanting, captivating, fascinating, charming, alluring, attractive (see under ATTRACT)

biannual, biennial, semiannual, though not synonymous, are frequently confused. The chief source of confusion is **biannual**, which is used to mean either twice a year or every two years. If no clue to its meaning is given by the text, the reader will often be at a loss to determine the time represented. Because of this ambiguity there is a tendency to avoid *biannual* and use the other two terms to express the two meanings. **Biennial** unequivocally means existing for two years or happening every two years <*biennial* plants> <a *biennial* convention> <a *biennial* reunion> **Semiannual** is also unequivocal, since it means half-yearly, that is, twice a year <a *semiannual* publication> <*semiannual* payments>

bias *n* prejudice, prepossession, partiality, *predilection

Ana slant, standpoint, *point of view, viewpoint, angle: *leaning, propensity: inclining or inclination, predisposition, disposition (see corresponding verbs at INCLINE)

Con fairness, justness, impartiality, dispassionateness (see corresponding adjectives at FAIR)

bias *vb* *incline, dispose, predispose

Ana sway, influence, *affect, impress

bicker squabble, spat, tiff, quarrel, wrangle, altercation (see under QUARREL *n*)

Ana *contend, fight, battle, war

bickering spat, tiff, squabble, *quarrel, wrangle, altercation

Ana *discord, contention, dissension, strife, conflict

bid *vb* 1 *command, order, enjoin, direct, instruct, charge

Ana *summon, summons, call, cite

Ant forbid —*Con* prohibit, enjoin, interdict, inhibit (see FORBID)

2 *invite, solicit, court, woo

Ana *ask, request

bid *n* tender, *overture, advance, approach

Ana offering or offer, proffering or proffer (see corresponding verbs at OFFER): *proposal, proposition: inviting or invitation, soliciting or solicitation (see corresponding verbs at INVITE)

biddable docile, amenable, tractable, *obedient

Ana *compliant, acquiescent: obliging, complaisant, good-natured, *amiable: submissive, *tame

Ant willful —*Con* intractable, refractory, recalcitrant, headstrong, ungovernable, *unruly: *obstinate, stubborn, stiff-necked, mulish

bidding behest, *command, order, injunction, mandate, dictate

Ana direction, instruction (see corresponding verbs at COMMAND): summoning or summons, calling or call, citing or citation (see corresponding verbs at SUMMON)

biennial *biannual, semiannual

big *large, great

Ana *grand, magnificent, imposing, grandiose, majestic, august: *huge, immense, enormous, gigantic, colossal

Ant little —*Con* *small, diminutive, wee, tiny, petite, minute, microscopic, miniature

bigot fanatic, *enthusiast, zealot

bigoted *illiberal, narrow-minded, narrow, intolerant, hidebound

Con tolerant, *forbearing, lenient: *liberal, progressive, advanced, radical

bill *n* **Bill, beak, neb, nib** denote the jaws of a bird together with their projecting horny covering. **Bill** is the general term and is used inclusively by ornithologists for such a structure; in popular usage, however, *bill* suggests a structure that is straight and often flattened or long and slender (as in the duck, swan, hummingbird, crane, heron, sandpiper, or snipe) or one that is short, stout, and conical (as in the cardinal bird or hawkfinch). **Beak** is associated with striking or tearing and is the usual term for a structure, characteristic especially of birds of prey, in which the tip of the upper mandible has a sharp downward curvature and overhangs the lower mandible (as in the eagle, vulture, or hawk) <although the kite soar with unbloodied *beak*—*Shak.*> **Neb** and **nib** are equivalent to *bill* or *beak* chiefly in dialect or poetry but derive from this use their commoner extended sense of a jutting or pointed thing or part <the *nib* of a pen>

bill *n* **Bill, act, statute, law** are frequently confused when used to designate a legislative measure. **Bill** is properly applied only to the draft of a measure submitted to a legislature for its acceptance or rejection. The other terms are properly applied only to bills which have been passed. In actual use they are practically identical. Strictly, however, a bill becomes an act when it is passed and duly signed by an executive officer; an act becomes a **statute** when it is legally effective and a part of the written law of the state; a statute is one kind of law (see LAW).

billingsgate scurrility, vituperation, *abuse, invective, obloquy

bind *tie

Ana *fasten, attach: *join, link, unite, connect

Ant loose: unbind

biography, life, memoir, autobiography, confessions are comparable when they mean a more or less detailed account of the events and circumstances of a person's life. **Biography** is the technical, neutral term for this kind of writing or for an example of it; the term suggests neither length nor brevity of treatment, neither factuality nor in-

terpretation of facts, neither partisanship nor detachment, for it may be characterized by any of these qualities, but it does imply that the course of a career is covered at least in its main events (the official *biography* . . . written by his son is still in print and easily available—*Nock*) (Lytton Strachey's *biography* of Queen Victoria restricts itself to the facts which develop his conception of her) *Life* usually suggests a fuller and more intimate treatment than *biography*; a work so designated may, however, be written on a brief scale or be drawn out so that very little is escaped. *Life* is often used in place of *biography* when the author especially wishes to suggest a vivid or graphic or interpretive account or to imply the addition of firsthand material (as letters or a journal); the term is also often used in the combination "life and times" as the title for a biography placing the subject in the background of his period (Boswell's *Life of Dr. Johnson*) (Ray Stannard Baker's *Life and Letters of Woodrow Wilson*) (Life and Times of Jesus by J. F. Clarke) *Memoir* (or often the plural *memoirs*) refers to a biography written by one who has intimate knowledge of its details; although it does not necessarily imply that the subject of the biography is the writer, it very frequently does so. Also, *memoir* may suggest reminiscences of a whole or of part of a life; the term therefore carries no promise of completeness, or fullness, but it does connote a more personal approach than *biography* or, usually, than *life* (Hallam Tennyson's biography of his father is called *Alfred, Lord Tennyson: A Memoir*) (its spirit is so devout as to make it almost more a *memoir* than a biography—*Nock*) *Autobiography* refers to a biography of oneself typically written toward the end of one's life or at the completion of one's active career. *Autobiography* usually implies some distinction in the writer and a demand for or the desire to give information about the personalities and events of his time or about the background of the events in which he has played a part. The term is seldom used in the titles of books and is preferred as a designation of a type (My *Life* is Havelock Ellis's *autobiography*) (what would we give for such an *autobiography* of Shakespeare—*Carlyle*) *Confessions* as a type belong to the genre of autobiography. *Confessions* are usually written by a person who desires to avow fully the experiences of his life, both shameful and creditable. The motive of such a book is as varied as the books themselves; thus, to give extremes, the *Confessions* of St. Augustine were written for the glorification of God, who has brought him out of a life of sin; the *Confessions* of Rousseau were written to reveal truly and sincerely all his experiences without reference to the opinions of men (De Quincey's *Confessions of an English Opium-Eater*)

biologic *n* *drug, simple, medicinal, pharmaceutical

biotype *habitat, range, station

birthright 1 *right, appanage, prerogative, privilege, perquisite

2 patrimony, *heritage, inheritance

bisexual *adj* Bisexual, hermaphroditic, hermaphrodite, androgynous, epicene are comparable when meaning combining male and female qualities. The first four of these terms may be used interchangeably to mean being structurally or functionally both male and female; they may apply to all kinds of living beings and may designate a normal or an abnormal state. Bisexual also is applied to human mental or behavioral qualities (careers catastrophically broken by the vagaries of bisexual personality—*New Republic*) and, more precisely, designates the individual who responds sexually to members of both sexes (the ancient Greeks who were notoriously bisexual (women for breeding and boys for pleasure)—*Gerber*) Such use need not imply abnormality (the author accepts

the notion of the bisexual character of man—*Mullahy*) **Hermaphroditic** and **hermaphrodite** when applied to human beings usually indicate primarily the presence of physical characteristics and especially of actual gonads of both sexes in the same individual and imply an abnormal state (hermaphroditic children, where both ovaries and testes are present—*Newsweek*) *Hermaphrodite* frequently or *hermaphroditic* occasionally has extended use in which it suggests the combination of two readily distinguishable and often more or less incongruous elements; thus, a *hermaphrodite* wagon is one made up of a two-wheeled cart with an extra pair of wheels and a rack added; *hermaphrodite* calipers have one caliper and one divider leg (a young Königsberg architect, a Balt (that is to say a kind of *hermaphrodite* Russian and Prussian too)—*Clare Sheridan*) (everybody in every war, barring the *hermaphrodite* soldier who wears a uniform but doesn't fight, lives in a sort of hell—*Kenneth Roberts*) **Androgynous** in reference to human beings or to qualities or characteristics rarely connotes abnormality but rather suggests a congruous and pleasing blending (has the *androgynous* Greek beauty which suits a youth or a goddess equally well, combining the vigor of one sex with the grace of the other—*The Critic*) (if one is a man, still the woman part of the brain must have effect; and a woman must also have intercourse with the man in her. Coleridge perhaps meant this when he said that a great mind is *androgynous*—*Woolf*) *Androgynous* is also the preferred term for use in respect to deities, their attributes or appearances (a somewhat *androgynous* Apollo—*Grigson*) (the *androgynous* character of the Bodhisattva: masculine Avalokiteshvara, feminine Kwan Yin—*Joseph Campbell*) Unlike the preceding terms, *epicene* has no technical application to physical or functional status; however, in its often allusive reference to sex in characterizing human beings, their attributes, or the products of their being it may approach the other terms in meaning (decapitated by a hero disguised as a woman . . . his brothers suspect the *epicene* wife because of her masculine arms—*Lowie*) More often *epicene* suggests deficient sexuality and may imply intersexuality, effeminacy, or sexlessness (the hearty sportsman who is really *epicene* beneath his tweeds—*Gibbs*) (if only all this messy business of sex could be done away with and we could all remain . . . happy, *epicene* Peter Pans—*Dwight Macdonald*) In some contexts *epicene* loses all direct reference to sex and suggests rather the weakness inherent in deficiency which may be expressed on the one hand in extreme delicacy (something dreamy, ambiguous, almost *epicene*—*Norman Douglas*) or on the other in utter decadence (the glass of fashion and the mold of form, so dainty a figure, indeed, that he turned Mark Twain's stomach and appears as an *epicene* clown in the American's robust story—*G. W. Johnson*)

bit *particle, mite, smidgen, whit, atom, iota, jot, tittle

Ana piece, fragment, detail, fraction, *part, portion

bite, **gnaw**, **champ**, **gnash** are comparable when they mean to attack with or as if with the teeth. **Bite** fundamentally implies a getting of the teeth, especially the front teeth, into something so as to grip, pierce, or tear off (bite an apple deeply) (bite into a cookie) (bite off a piece of molasses candy) Sometimes *bite* denotes to wound by biting (the dog has bitten a boy) (unable to fight with hands or feet, he savagely bit his antagonist) In extended use *bite* implies unusual power of penetration or power of cutting into something so that it stings or pricks, or gives support to a good grip or hold (scissors that snip sheet steel and bite off heavy bars—*Shaw*) (bite an etching plate with acid) (saws . . . as they . . . bite the

wood—*Frost*) <heel nails *bit* on the frozen ruts—*Hemingway*> <a summer *bitten* into Joan's memory—*H. G. Wells*>
Gnaw, on the other hand, implies an effort to bite something hard or tough; it implies repeated action and a slow wearing away, sometimes stressing one in preference to the other <the dog *gnaws* a bone> <rats have *gnawed* the rope into shreds> <*gnaw* at a crust of bread> <life goes on forever like the *gnawing* of a mouse—*Millay*> Therefore *gnaw* is used of what eats, frets, or corrodes something that is strong, resistant, or not easily affected <old pains keep on *gnawing* at your heart—*Conrad*> <they were both . . . *gnawed* with anxiety—*D. H. Lawrence*> **Champ** implies vigorous and noisy action of the teeth and jaws as they attempt to penetrate something hard or, sometimes, inedible. The word usually is associated with animals (as horses) and connotes impatience or extreme hunger, but it is also used of men who avidly apply themselves to the task of biting with their teeth and crushing with their jaws: often it suggests the flow and foaming of saliva <the horse *champed* at its bit until its mouth was covered with foam> <he ate in a ruthless manner, *champing* his food—*Waugh*> <others, devoted themselves to the sodden and lee-dyed pieces of the cask, licking, and even *champing* the moister wine-rotted fragments with eager relish—*Dickens*> **Gnash** usually implies the striking of the teeth against each other or a grinding of them (as in anguish, despair, or extreme rage); it often emphasizes this action as the visible sign of an overpowering emotion or distress (but the children of the kingdom shall be cast out into outer darkness: there shall be weeping and *gnashing* of teeth—*Mt* 8:12) Sometimes, however, it implies a savage biting that rends a thing in two or tears it apart <I strove . . . to rend and *gnash* my bonds in twain—*Byron*> <the tiger *gnashed* the fox, the ermine and the sloth—*Landor*>

Ana *eat, consume, devour

biting cutting, crisp, trenchant, *incisive, clear-cut

Ana *caustic, mordant, acrid: *pungent, poignant, piquant, racy

bitter, **acid** are applied to things with an unpleasant taste (also smell, in the case of *acid*) that is neither sweet nor bland yet seldom distinctly sour or really sickening. **Bitter** is traditionally associated with the repellent taste of wormwood, quinine, and aloes, but it is also used to describe the taste of beer, unsweetened chocolate, and the rind of citrus fruits. Something *bitter* usually lacks the pleasant tang and freshness of an acid flavor (as of lemon juice) and has a penetrating and persistent quality difficult to mask. **Acrid** implies a bitterness in taste that has an astringent or irritating effect (as the taste of chokecherries, various unripe fruits, or alum). It is also applied to something both bitter and salty (as sweat). An *acid* smell is a penetrating, suffocating, repugnant odor. It is especially associated with certain fumes (as from burning sulphur) or with certain noxious vapors (as of a heavy city fog).

Ana *sour, acid, acidulous, tart: *pungent, piquant

Ant delicious —*Con* delectable, luscious, *delightful

bizarre grotesque, *fantastic, antic

Ana outlandish, erratic, eccentric, *strange, singular, odd, queer, curious: extravagant, extreme (see **EXCESSIVE**)

Ant chaste: subdued

blab tattle, *gossip

Ana babble, gabble, chatter, prate, *chat: divulge, disclose, betray (see **REVEAL**)

blackball *vb* debar, shut out, *exclude, eliminate, rule out, disbar, suspend

Con admit, accept, *receive

blackguard *villain, scoundrel, knave, rascal, rogue,

scamp, rascal, miscreant

blame *vb* reprehend, reprobate, condemn, denounce, censure, *criticize

Ana *accuse, charge, indict, impeach: impute, attribute, *ascribe: implicate, *involve

Con exonerate, vindicate, *exculpate, absolve, acquit: *excuse, remit, forgive

blame *n* **Blame, culpability, guilt, fault** are comparable when they mean responsibility for misdeed or delinquency.

Blame is a term of shifting denotations, sometimes meaning the reprehension, criticism, or censure of those who find fault or judge one's work or acts <I have never desired praise . . . I have been indifferent to, if not indeed contemptuous of, *blame*—*Ellis*> or sometimes a charge or accusation of some fault, misdeed, or delinquency <fear of incurring *blame* in Wiltstoken for wantonly opposing her daughter's obvious interests—*Shaw*> When the term denotes responsibility for wrongdoing or delinquency, it also implies the meriting of reproof, censure, or the appropriate penalty <he took on himself all the *blame* for the project's failure> <they tried to shift the *blame* for their defeat> Often the term means ultimate rather than immediate responsibility <the *blame* [for backwardness in American education] has sometimes been put, and with some justice, upon our migratory habits and upon the heterogeneous character of our population—*Grandgent*> **Culpability** usually means little more or no more than the fact or the state of being responsible for an act or condition that may be described as wrong, harmful, or injurious <they could not prove his *culpability* for the accident> (as if the estrangement between them had come of any *culpability* of hers—*Dickens*) <an inescapable responsibility rests upon this country to conduct an inquiry . . . into the *culpability* of those whom there is probable cause to accuse of atrocities and other crimes—*R. H. Jackson*> **Guilt** usually carries an implication of a connection with misdeeds of a grave or serious character from the moral and social points of view. Also it usually implies a deserving of severe punishment (as condemnation, loss of freedom, or, in the case of sin, loss of salvation) or of a definite legal penalty (as a fine, imprisonment, or death). Therefore, when the term denotes responsibility for a crime or sin, it also carries implications of need of proof before punishment can be determined or forgiveness granted <though she was strongly suspected of murder, her *guilt* was not established until after her death> <since he admitted his *guilt*, he saved the state the cost of a trial> <to confess one's sins is to acknowledge one's *guilt* for those sins> **Fault** (see also **FAULT** 2) is often used in place of *culpability* as a simpler word <the *fault* is her parents', not the child's> <the *fault*, dear Brutus, is not in our stars, but in ourselves, that we are underlings—*Shak.*>

Ana responsibility, accountability, answerability (see corresponding adjectives at **RESPONSIBLE**): censure, condemnation, denunciation, reprehension (see corresponding verbs at **CRITICIZE**)

Con commendation, compliment (see corresponding verbs at **COMMEND**): *applause, acclaim, plaudits, acclamation

blameworthy, guilty, culpable are comparable when they mean deserving reproach and punishment for a wrong, sinful, or criminal act, practice, or condition. One (as a person or his act or work) is **blameworthy** that deserves blame or criticism and must suffer or receive reproach, censure, or even more severe punishment <thee therefore still, *blameworthy* as thou art . . . thee I account still happy, and the chief among the nations, seeing thou art free—*Cowper*> A person is **guilty** who is justly chargeable with responsibility for a delinquency, crime, or sin,

either in his own knowledge or in that of others, by his confession or by proof (often legal proof) of his responsibility; the term may stress either the fact that guilt has been proved or the fact or the fear of resulting punishment (the defendant was found *guilty*) (suspicion always haunts the *guilty* mind; the thief doth fear each bush an officer—*Shak.*) (let no *guilty* man escape, if it can be avoided—*Grant*) Often the term suggests merely a state of mind (as a consciousness that one has committed a sin or a crime or a fear that one is justly suspected of wrongdoing or of a misdeed) (a *guilty* conscience) (there is no use in making the refractory child feel *guilty*—*Russell*) A person is *culpable* who has been shown to be blameworthy and open to severe censure or condemnation (the judge . . . remarked that those whom Smith had gulled were almost as *culpable* as he—*Altick*) The term is also applicable to a blameworthy act, condition, or practice for which one is responsible or which leads to wrong or harm (culpable ignorance) (culpable neglect) (is it not . . . culpable and unworthy, thus beforehand to slur her honor?—*Shelley*)

Ant blameless —*Con* faultless, *impeccable, flawless

blanch *vb* *whiten, bleach, decolorize, etiolate

bland *adj* 1 smooth, *suave, urbane, diplomatic, politic
Ana benign, benignant, *kind, kindly: *amiable, complaisant, obliging, good-natured: slick, unctuous (see FULSOME)

Ant brusque —*Con* *bluff, blunt, gruff, curt, crusty
2 mild, gentle, smooth, *soft, balmy, lenient

Ana *neutral, indifferent: temperate, *moderate: *insipid, flat, vapid, wishy-washy

Ant *pungent, piquant: savory, tasty (see PALATABLE)
Con stimulating, exciting, quickening (see PROVOKE): thrilling, electrifying (see THRILL *vb*)

blandish wheedle, cajole, *coax

Ana allure, charm, bewitch, captivate (see ATTRACT): *lure, entice, seduce: beguile, delude (see DECEIVE)

Con constrain, oblige, coerce, compel, *force: drive, impel (see MOVE): *intimidate, cow, bulldoze, browbeat, bully

blank *adj* void, *empty, vacant, vacuous

Ana *bare, barren: *clean

Con *expressive, meaningful, significant, pregnant

blasé *sophisticated, worldly-wise, worldly, disillusioned
Ana *indifferent, unconcerned, incurious: nonchalant, imperturbable, unruffled (see COOL)

blasphemous *impious, profane, sacrilegious

Ana cursing, damning, excreting, anathematizing, ob-jurgating (see EXECRATE): *irreligious, ungodly, godless
Ant reverent

blasphemy 1 **Blasphemy, profanity, swearing, cursing** are comparable when meaning impious or irreverent speech. **Blasphemy**, the strongest term (see also PROFANATION), applies strictly to an intentional or malicious utterance in which the Supreme Being is defied or offered indignity; as such it is regarded as a serious sin in theology and as a crime at the common law (genuine *blasphemy*, genuine in spirit and not purely verbal, is the product of partial belief and is as impossible to the complete atheist as to the perfect Christian—*T. S. Eliot*) **Profanity** has a wider range and includes all irreverent reference to holy things; it is particularly applied to speech in which the names of God, Jesus, and the Virgin Mary are used lightly and irreverently, especially in expressing rage or passion in oaths, curses, and imprecations (he had what one might call a preliminary recourse in his *profanity*, those “scorching, singeing blasts” he was always directing at his companions—*Brooks*) **Swearing** and **cursing** are forms of profanity, the former stressing indulgence in profane and

often meaningless oaths; the latter, indulgence in profane curses or imprecations (as by calling on God to damn or punish the object of one’s wrath or hatred) (among laborers and others, that ungodly custom of *swearing* is too frequently heard, to the dishonor of God and contempt of authority—*Wren*) (why, what an ass am I! . . . that I . . . must . . . unpack my heart with words, and fall *acursing*—*Shak.*)

Ana insult, *affront, indignity: scurrility, vituperation (see ABUSE *n*)

Ant adoration —*Con* worship, reverence, veneration (see under REVERE)

2 *profanation, desecration, sacrilege

Ana debasement, corruption, perversion (see corresponding verbs at DEBASE): misrepresentation, falsehood, untruth, *lie

blast *n* blight, nip (see under BLAST *vb*)

Ana destruction (see corresponding verb at DESTROY): extermination, extirpation, wiping out (see corresponding verbs at EXTERMINATE): ruin, wreck (see RUIN *vb*)

blast *vb* **Blast, blight, nip** mean as verbs, to ruin or to

injure severely, suddenly, or surprisingly and as nouns, the effect of such ruin or injury. **Blast** which basically implies a violent onrush (as of wind) carries the implication of something pernicious that comes with sweeping force to destroy or demolish or to bring with it complete frustration (I’ll cross it, though it *blast* me—*Shak.*) (O fairest flower, no sooner blown but *blasted*—*Milton*) (the thunder cracked again. It is terrifying in the tropics, that sound. . . . You expect to be annihilated, *blasted*, burned to a crisp—*McFee*) (our shelter from the stormy *blast*—*Watts*) (the East bowed low before the *blast*—*Arnold*)

Blight primarily implies a withering and killing of plant tissue by some natural agency (as disease, pests, or adverse weather) (dahlias *blighted* by an unseasonable frost) (late *blight* of potatoes) Similarly in extended use the term implies a destructive altering (as of a plan, a hope, or a life) by some external but relevant agency (a secret marriage . . . was a *blight* on his life—*George Eliot*)

(when the true scholar gets thoroughly to work, his logic is remorseless, his art is implacable, and his sense of humor is *blighted*—*Henry Adams*) (a Peloponnesian or a European war lays its *blight* on whole peoples—*Montague*) (The *Moonstone* is very near to *Bleak House*. The theft of a diamond has some of the same *blighting* effect on the lives about it as the suit in Chancery—*T. S. Eliot*)

Nip may imply a squeezing, a pinching, or more specifically, a cutting off between two edges, surfaces, or points; in extended use, it implies the acting of something comparable (as a killing frost or a bitter wind) that has power to damage, to check, or to distress (so have I seen some tender slip saved with care from winter’s *nip*—*Milton*) (the wind that blows between the worlds, it *nipped* him to the bone—*Kipling*) (most of the flowers had been *nipped* by a heavy frost) In the idiomatic phrase “to nip in the bud” *nip* harks back to the implication of cutting off and suggests a terminating or destroying of something before it has fully developed or matured (the plans for an uprising were *nipped* in the bud) (nip a scandal in the bud)

Ana *destroy: *ruin, wreck: *exterminate, extirpate, wipe: *injure, damage, spoil

blatant clamorous, *vociferous, strident, boisterous, obstreperous

Ana assertive, self-assertive, pushing, *aggressive, militant: *vocal, articulate, voluble, glib: vulgar, *coarse, gross

Ant decorous: reserved —*Con* *silent, uncommunicative, reticent, taciturn: subdued, *tame: discreet, prudent (see under PRUDENCE)

blaze *n* flare, flame, glare, glow (see under BLAZE *vb*)

Ana firing or fire, kindling, igniting or ignition (see corresponding verbs at LIGHT): effulgence, refulgence, radiance, brilliance or brilliancy (see corresponding adjectives at BRIGHT)

blaze *vb* **Blaze, flame, flare, glare, glow** are comparable both as verbs meaning to burn or appear to burn brightly and as nouns denoting a brightly burning light or fire. **Blaze** implies great activity in burning, the thorough kindling of the burning substance or material, and the radiation of intense light and often heat (the sun *blazed* down upon them with a crushing violence—*Forester*) (everyone fought fire. Everyone went to the woods and thrashed out some new *blaze*—*Vorse*) (her eyes *blazing* in her white face—*Stevenson*) **Flame** suggests a darting tongue or tongues of fire formed by rapidly burning gas or vapor; it therefore often connotes less steadiness than *blaze* and sometimes less intense heat and light (the burning house was soon a mass of *flames*) (the torches *flamed* in the wind) (the dry fuel soon burst into *flame*) (dimmed hope's newly kindled *flame*—*Shelley*) **Flare** implies flame, especially a flame darting up suddenly against a dark background or from a dying fire (torches that guttered and *flared*—*Hewlett*) (he . . . lighted a cigarette and then remembered that the *flare* of the match could probably be seen from the station—*Anderson*) **Glare** (see also GAZE) emphasizes the steady emission or reflection of bright light; it sometimes connotes an almost unendurable brilliancy (dazed by the lantern *glare*—*Kipling*) (the snow *glares* in the sunlight) (the *glare* of a forest fire in the sky) (he . . . lets the fire *glare* on the sullen face for a moment, and it sears itself into the memory forever—*J. R. Lowell*) (his days were passed in the *glare* of publicity—*Buchan*)

Glow also stresses the emission of light, but it suggests an absence of flame and therefore connotes steadiness, intensity, radiance without brilliance, and often warmth and duration (the *glow* of coals) (her fine effect of *glowing* from within as a lamp glows—*Mary Austin*) (the fire that burned within him, that *glowed* with so strange and marvelous a radiance in almost all he wrote—*Huxley*)

Ana *illuminate, illumine, light: *burn: *flash, gleam, glance

bleach *vb* *whiten, etiolate, decolorize, blanch

Ant dye

bleak cheerless, dispiriting, *dismal, dreary, desolate

Ana *cold, chilly, frigid, freezing: barren, *bare, bald: stripped, denuded (see STRIP *vb*)

blemish *n* **Blemish, defect, flaw** all denote an imperfection.

Blemish applies to something (as a spot or stain) that is external or superficial and mars or disfigures the appearance of an object (on their sustaining garments not a *blemish*—*Shak.*) (he studiously perfected nature by correcting all the little *blemishes* of manner and little weaknesses of character in order to produce an immaculate effect—*Parrington*) (a reputation without a *blemish*) **Defect** implies the lack or want of something which is essential to completeness or perfection but which is not necessarily superficially apparent (a *defect* in a mechanism) (a *defect* in the organs of vision) (the *defects* of this poem are not obvious) (defects of understanding based on ignorance and unfamiliarity—*Oppenheimer*) A *flaw* is a defect in continuity or cohesion (as a break, a crack, or a fissure), that may either mar a perfect surface or cause a weakness in structure (a *flaw* in a crystal) (or some frail China jar receive a *flaw*—*Pope*) (my love to thee is sound, sans crack or *flaw*—*Shak.*) (style is not a sheet of glass in which the only thing that matters is the absence of *flaws*—*Ellis*) (we most enjoy, as a spectacle, the downfall of a good man, when the fall is justified by some *flaw* in his

being—*Guérard*)

Ana blot, stain, *stigma: tainting or taint, pollution, defilement (see corresponding verbs at CONTAMINATE): *fault, failing, frailty: *lack, want, privation

Ant immaculateness —*Con* purity, simplicity (see corresponding adjectives at PURE): cleanness, cleanliness (see corresponding adjectives at CLEAN): clearness, transparency, pellucidness (see corresponding adjectives at CLEAR)

blench quail, shrink, *recoil, flinch, wince

Ana evade, elude, avoid, shun, eschew, *escape: tremble, quiver, shudder, quake, *shake

Con *bear, suffer, endure, abide, stand

blend *vb* fuse, *mix, merge, coalesce, mingle, commingle, amalgamate

Ana combine, unite, conjoin (see JOIN): *integrate: consolidate, unify, *compact

Ant resolve —*Con* *analyze, break down: *separate, part, divorce: decompose, disintegrate (see DECAY)

blend *n* *mixture, admixture, compound, composite, amalgam

blessed *holy, sacred, divine, spiritual, religious

Ant accursed

blessedness beatitude, bliss, *happiness, felicity

Ana enjoyment, fruition, joy, *pleasure

Ant misery, dolor —*Con* suffering, *distress, agony: woe, anguish, *sorrow, grief

blight *n* blast, nip (see under BLAST *vb*)

Ana *injury, damage, hurt, harm: frustration, thwarting (see corresponding verbs at FRUSTRATE)

blight *vb* *blast, nip

Ana *injure, damage, hurt, harm, spoil: *maim, cripple, batter: *frustrate, thwart

blind *adj* **Blind, sightless, purblind** mean lacking or deficient in the power to see or to discriminate objects. **Blind** is used to imply absence or deprivation or gross restriction of the power of vision, either by congenital defect or as a result of disease or of an injury to the organs of vision (the very years when the *blind* Milton was dictating the last books of *Paradise Lost* to his amanuensis—*Atlick*) (if the *blind* lead the *blind*, both shall fall into the ditch—*Mt* 15:14) It is as often employed in an extended sense, especially as implying a lack of the mental, moral, or spiritual vision essential to the perception or discernment of what actually exists or what is really true (His divine power hath given unto us all things that pertain unto life and godliness . . . But he that lacketh these things is *blind*—*2 Pet* 1:3-9) (expound the merits to me if you think me *blind*—*Justice Holmes*) **Blind** is also applicable to things devoid of intelligence or of ability to know whether they are moving or tending (blind, mechanical forces of society—*Wilde*) or to acts, emotions, and attitudes which are the result of or which produce mental, moral, or spiritual blindness (blind error) (blind acceptance of authority) or to something (as a space or a structure) that is so dark or obscure or obstructed that one cannot see through, into, or around it (a *blind* wall) (blind alley) (a *blind* corner) **Sightless** is sometimes the preferred term when permanent total blindness is implied (the *sightless* Homer) (rehabilitation of the *sightless* and partially blind—*Current Biog.*) **Purblind** is disused in the sense of totally blind (purblind Argus, all eyes and no sight—*Shak.*) but it persists in the sense of nearly blind, or without sight enough to do one's work or make one's way successfully (purblind with cataracts, he gets a living by misprinting, by hand, a four-page paper—*Gerald Kersh*) More usually, *purblind* implies the imperfection or even the absence of mental, moral, or spiritual vision and usually connotes obtuseness or shortsightedness that comes from ignorance, stupidity, or indifference

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

<the intolerable narrowness and the *purblind* conscience of the society—*George Eliot*> <in Washington *purblind* congressmen, sensitive only to the demands of big business, fastened . . . the McKinley tariff—*Nevens & Commager*>
Con seeing, perceiving, discerning, noticing, noting (see SEE): *aware, alive, conscious, sensible, cognizant, awake

blind *n* **Blind, shade, shutter** mean a device that serves as a screen for a window. **Blind** is used especially in British countries to designate a window covering, usually of fabric and operating on a roller, that shuts out the sunlight or at night prevents those outside from seeing in. In this sense **shade** is more usual in the United States. The use of the term *blind* as an element of or as a shortened form for *venetian blind* is common both in American and British countries. *Venetian blind* refers to a flexible inside curtain composed of light and narrow laths fixed on tapes which may be raised or lowered as desired and whose laths may be opened or closed according to the amount of light needed. But *blind* (or *blinds*, since a pair of the devices is usually fitted to a single window) is used chiefly for a device fitted on the outside or on the inside of a window, made of a wooden frame with slats that are movable or fixed, and typically hinged at the side so that when opened it lies flat against the outside wall or folds into an inner recess of the window frame. This device is also called a **shutter**. But *shutter* is actually a more inclusive term and implies a device that can be shut (as to exclude light, rain, or wind, to insure privacy, or to make safe against intruders). The term therefore includes such devices as those made of solid panels whether used singly or in pairs or sets to each window, and whether left permanently in place or hung when desired <storm *shutters*> <hurricane *shutters*> <each night the shopkeeper put up his *shutters*>

blink *vb* *wink

Ana ignore, disregard, overlook, slight, *neglect: evade, elude, avoid, shun (see ESCAPE)

Con *see, note, notice, observe, remark

bliss beatitude, blessedness, felicity, *happiness

Ana enjoyment, joy, delectation, fruition, *pleasure: rapture, *ecstasy, transport

Ant anguish: bale —**Con** misery, suffering, *distress, agony, dolor: woe, *sorrow, grief: gloom, dejection, melancholy, *sadness

blithe jocund, *merry, jovial, jolly

Ana gay, *lively, animated, vivacious, sprightly: joyful, joyous, lighthearted, *glad, happy, cheerful: buoyant, effervescent, volatile (see ELASTIC)

Ant morose: atrabilious —**Con** sad, depressed, dejected, gloomy (see corresponding nouns at SADNESS): *sullen, glum, dour, saturnine: *melancholic, melancholy

bloc party, *combination, faction, ring, combine

block *vb* obstruct, bar, dam, impede, *hinder

Ana check, *arrest, interrupt: *hamper, clog, trammel: prohibit, *forbid, inhibit: *frustrate, thwart, foil: *prevent, forestall

Con *advance, forward, further, promote

blockade *n* **Blockade, siege** are comparable when denoting an attempt of a belligerent force to break down the resistance of the enemy by preventing egress or ingress of men or entrance of supplies over a considerable period of time. **Blockade** is used chiefly of an attempt made to close a port, harbor, or coast, especially by effectively investing it with warships or with mines so that fresh supplies (as of food, fuel, and ammunition) are cut off from the enemy <run a *blockade*> <raise a *blockade*> <the allied *blockade* of the North Sea avenues to the German coast during the war> **Siege** is applied chiefly to a military as opposed to a naval attempt. The term implies investment with troops on all sides of a fortified place (often a city). It also suggests, as

blockade does not, frequent assaults by the besieging forces as efforts to compel surrender <the *siege* of Troy> <the *siege* of Vicksburg in the American Civil War>

blockade *vb* *besiege, beleague, invest

Ana *close, shut: block, impede, obstruct (see HINDER): *enclose: *surround, environ, encircle

bloodless anemic, *pale

Ana *colorless, uncolored: wishy-washy, vapid, inane (see INSIPID)

Ant sanguine: plethoric —**Con** vital, alive, *living: vivid, *graphic: *vigorous, lusty, nervous

bloody, sanguinary, sanguine, sanguineous, gory are comparable when they mean affected by or involving the shedding of blood. **Bloody** may be used in place of any of the succeeding words, but it specifically and distinctively applies to that which is covered with blood or is actually or apparently made up of blood <a *bloody* knife> <*bloody* hands> <a *bloody* discharge from a wound> **Sanguinary** usually and **bloody** also when a simpler, more forcible word is desired apply to something attended by or someone bent upon bloodshed <a *sanguinary* conflict> <*sanguinary* deeds> <my thoughts be *bloody*, or be nothing worth—*Shak.*> <a *bloody* battle> **Sanguine** and **sanguineous** are used chiefly in a literary context in place of either of the preceding words or in specifically implying an association with bleeding or bloodthirstiness or the color of blood <to find his way through the *sanguine* labyrinth of passion through which he was wandering—*Wilde*> <his passion, cruel grown, took on a hue fierce and *sanguineous*—*Keats*> **Gory** sometimes suggests clotted blood, but more often it suggests a profusion of blood that testifies to slaughter <a *gory* fight> <never shake thy *gory* locks at me—*Shak.*>

bloom *n* flower, blow, blossom (see under BLOSSOM *vb*)

bloom *vb* flower, blow, *blossom

Ana flourish, thrive, prosper (see SUCCEED)

blossom *n* flower, bloom, blow (see under BLOSSOM *vb*)

blossom *vb* **Blossom, bloom, flower, blow** are comparable as verbs when meaning to become florescent and as nouns when meaning the period or state of florescence or (except for *blow*) meaning the florescent part itself. **Blossom** may be used of a plant that reaches the condition of florescence, but typically it applies to trees, shrubs, and herbaceous plants (and to their florescent parts) that normally proceed to bear what is ordinarily (not technically) called a fruit <the cherry trees are in *blossom*> <the apple trees will *blossom* next month> <the tomatoes have shed their *blossoms*> **Bloom**, though sometimes employed interchangeably with *blossom*, is typically used of such herbaceous plants, shrubs, or trees (or their florescent parts) as have reached the height of their beauty during the period of florescence <the roses are in *bloom*> <the iris is *blooming*> <the rhododendron has *blooms* in early June in this locality> **Flower** in technical use as a noun refers to the part of a seed plant which normally bears reproductive organs; in popular use it is usually restricted to such part when its gross structure is showy and conspicuously colored or white. Fragrance, freshness, shortness of life or of beauty are the implications in the popular use of the noun and the verb that distinguishes *flower* from *bloom* chiefly but also from *blossom*; also *flower* is often thought of as apart from the plant where it has grown <a bouquet of *flowers*> <the rambler's period of *flowering* is short> <one after another the garden plants *flowered*, but always in the meantime some had faded> <as for man, his days are as grass: as a *flower* of the field, so he flourisheth—*Ps* 103:15> <full many a *flower* is born to blush unseen, and waste its sweetness on the desert air—*Gray*> <there can be no perfect *flower* without fragrance—*Symons*> **Blow**, in this

sense, has an archaic or poetic flavor except in the combination *full-blown*. Usually it suggests a bursting into flower or bloom and often, especially in the noun, connotes a great display of blooms (I know a bank where the wild thyme *blows*—*Shak.*) (the blossoms *blow*; the birds on bushes sing—*Dryden*) (such a *blow* of tulips, as was not to be matched—*Addison*)

All of these words have extended use. **Blossom** usually suggests something analogous to a natural blossom (as in freshness or rich development) (after a shy girlhood she is *blossoming* out in college) **Bloom** usually suggests a time or period of perfection, vigor, or beauty (the *bloom* of perfect manhood—*Hamerton*) (the hills are full of marble before the world *blooms* with statues—*Phillips Brooks*) **Flower** implies the choicest part, specimen, or product of something or its coming into being (the *flower* of a nation died in that war) (always the *flower* of courtesy—*Cather*) (I think it [Greek literature] one of the brightest *flowers* of the human spirit—*Benson*) (art, he thought, should *flower* from an immediate impulse towards self-expression or communication—*Huxley*) **Blow**, by far the least frequent of these terms in such use, implies a bursting into beauty or perfection.

blot *n* *stigma, brand, stain

Ana taint, defilement, pollution (see corresponding verbs at CONTAMINATE): *blemish, flaw, defect: shame, *disgrace, ignominy, obloquy

blot *out* *vb* delete, obliterate, expunge, *erase, cancel, efface

Ana *abolish, annihilate, extinguish: wipe, *exterminate, extirpate

Con preserve, *save, conserve: imprint, print, impress, stamp (see corresponding nouns at IMPRESSION)

blow *vb* *blossom, bloom, flower

Ana *expand, swell: enlarge, augment (see INCREASE)

blow *n* blossom, bloom, flower (see under BLOSSOM *vb*)

blowsy frowzy, *slatternly, dowdy

Ana flashy, tawdry, *gaudy, garish: slovenly, sloppy, disheveled, unkempt, *slipshod: florid, flamboyant (see ORNATE): vulgar, *coarse

Ant smart, spruce: dainty —*Con* *neat, tidy, trim, trig: fastidious, particular, *nice

blubber *vb* *cry, weep, wail, keen, whimper

bluejacket *mariner, sailor, seaman, tar, gob

blueprint *n* sketch, draft, tracing, plot, diagram, delineation, outline (see under SKETCH *vb*)

blueprint *vb* *sketch, draft, trace, plot, diagram, delineate, outline

blues dejection, depression, melancholy, gloom, dumps, *sadness

bluff *adj* **Bluff**, **blunt**, **brusque**, **curt**, **crusty**, **gruff** mean abrupt and unceremonious in speech or manner. **Bluff**, the only term of the group used in a complimentary sense, connotes outspokenness, rough good nature, and unconventionalality which bespeak a sincerity that scorns the forms of politeness (bluff King Hal—*Scott*) (bluff good humor) (a bluff, burly, hearty-looking man in a short blue jacket—*Kenneth Roberts*) **Blunt** (see also DULL) implies such directness and plain speaking as to suggest lack of consideration for the feelings of others and some disregard for the amenities of life (a blunt reply) (the petition was rejected in a blunt, one-sentence letter of refusal—*Blانشard*) (a blunt man. He is often brutal. He has never seemed to me to be devious—*Welles*) **Brusque** suggests a certain sharpness of manner and ungraciousness of speech (a brusque refusal) (I was nettled by her brusque manner of asserting her folly—*Conrad*) (Markham was forthright, brusque, and, on occasion, domineering, taking life with grim and serious conscience—*S. S. Van Dine*) **Curt** im-

plies disconcerting shortness or rude conciseness (a curt answer) (a curt message . . . bade her return at once to Rome—*Buchan*) **Crusty** implies a forbidding exterior and a manner marked by asperity or acerbity that sometimes belies real kindness of heart (he was a crusty old fellow, as close as a vise—*Hawthorne*) **Gruff** carries a stronger implication of surliness and roughness than *crusty* and distinctively suggests curt and hoarse or guttural utterance but like the former may suggest an underlying kindness (gruff, disagreeable, sarcastic remarks—*Thackeray*) (covered his essentially warm and friendly nature with a gruff exterior—*Bliven* b.1889)

Ana hearty, *sincere: plain, open, *frank, candid: abrupt, *precipitate

Ant suave, smooth —*Con* urbane, diplomatic, bland (see SUAVE): courteous, courtly, gallant, polite, *civil **blunder** *vb* lurch, flounder, *stumble, trip, lumber, galumph, lollop, bumble

Ana stagger, *reel, totter: *wallow, welter

blunder *n* mistake, *error, bull, howler, boner, slip, lapse, faux pas

Ana *fault, failing, frailty, vice: *anachronism, solecism: aberration, *deviation: transgression, violation, *breach

blunt **1** *dull, obtuse

Ant keen, sharp —*Con* acute (see SHARP): penetrating, piercing, probing (see ENTER)

2 brusque, curt, *bluff, gruff, crusty

Ana plain, candid, *frank: *rude, discourteous, ungracious, uncivil, impolite: *forthright, downright

Ant tactful: subtle —*Con* diplomatic, politic, smooth, *suave, urbane

blurb puff, review, critique, *criticism

blush *vb* **Blush**, **flush** are comparable as verbs primarily when meaning to turn or grow red in the face and as nouns when meaning a turning or growing red in the face. **Blush** implies a sudden heightening of color usually as the result of shame or embarrassment (caused Mrs. Tolliver to blush as if it were herself who had sinned—*Bromfield*) (she blushed to a crisp when she found her mistake—*White*) (Lucy blushed, as one who has something very secret to tell, very sweet, very strange, but cannot quite bring herself to speak it—*Meredith*) **Blush** is often extended to matters (as the dawn, the sunset, or a fresh growth of pink in the garden) that suggest a delicate glow or warmth of color (a faint blush of color tinged the eastern sky) (in the hedges there were bushes of faintly blushing dog rose in full blossom—*David Garnett*) (full many a flower is born to blush unseen—*Gray*) **Flush** basically suggests a flooding (as by a rush of water) or a sudden brilliant flashing or glowing. In reference to the face both of these ideas are involved, for *flush* may imply a reddening of the face that brightens or floods the countenance sometimes transiently like a flame or it may imply the more or less persistent redness of the face that is associated with robust health, anger, elation, fever, or hard drinking. *Flush*, therefore, connotes modesty or shame much less often than does *blush* (the hard dull flush of the steady heavy drinker—*Wolfe*) (no one could look more beautiful . . . when she was flushed from the fire—*D. H. Lawrence*) (a flush of anger came to his cheeks—*Anderson*) (flushed with a new humane glow, he would go singing on his way—*Lucas*) In extended usage *flush* refers to lights or colors that flash and dart and glow (straying beams . . . in copper-colored patches flush the sky—*Clare*)

Ana color, tint, tinge (see corresponding nouns at COLOR)

blush *n* flush (see under BLUSH *vb*)

Ana *color, tint, tinge, hue

bluster *vb* *roar, bellow, bawl, vociferate, clamor, howl, ululate

Ana *boast, brag, vaunt, crow: *threaten, menace

board *vb* house, lodge, *harbor, shelter, entertain

Ana *feed, nourish

boast *vb* Boast, brag, vaunt, crow, gasconade mean to give vent in speech to one's pride in oneself or something (as family, connections, race, or accomplishments) intimately connected with oneself. *Boast* and *vaunt* are often used transitively as well as intransitively; the other words are chiefly intransitive. **Boast** is the general term; it may or may not carry a suggestion of contempt or impute exaggeration, ostentation, or vaingloriousness to the boaster (what folly then to *boast* what arms can do!—*Milton*) (the wretch . . . abhors the craft he *boasted* of before—*Cowper*) (he was childishly anxious to *boast* that he had walked the whole of the six or seven miles—*Mackenzie*) **Brag** is more forceful than *boast* and carries a stronger implication of exaggeration and conceit; it often also implies glorying in one's superiority or in what one can do as well as in what one is, or has, or has done (nor shall death *brag* thou wander'st in his shade—*Shak.*) (even when they *brag*, their eyes are generally self-mocking, mildly wise—*Lord*) (that we may *brag* we hae a lass, there's nane again sae bonie—*Burns*) **Vaunt** is more literary than either of the preceding terms; it usually connotes more pomp and bombast than *boast* and less crudeness or naïveté than *brag* (charity *vaunteth* not itself, is not puffed up—*1 Cor* 13:4) (and ye *vaunted* your fathomless power, and ye flaunted your iron pride—*Kipling*) **Crow** usually implies exultant boasting or especially blatant bragging in a manner suggestive of the triumphal crowing of a cock (the barrister *crowed* with triumph but the professor was in no way put out—*Kersh*) **Gasconade** is the least common of these terms and implies habitual or extravagant self-vaunting (an enlightened statesman and not a *gasconading* militarist—*Bowers*)

Ana flaunt, parade (see SHOW): *pride, plume, pique, preen: *exalt, magnify, aggrandize

Ant depreciate (*oneself, one's accomplishments*) —**Con** *decry, disparage, belittle, minimize: deprecate (see DISAPPROVE)

boat, vessel, ship, craft are comparable when they denote a floating structure designed to carry persons or goods over water. **Boat** is sometimes used as a general designation of such a structure but more specifically it is applicable to a small, typically open structure operated by oars, paddles, or poles (a *rowboat*) or by sails or a power mechanism (a *sailboat*) (a *motorboat*) **Vessel** suggests a purpose as well as a form, the term in general applying to anything hollowed out so as to serve as a receptacle. Hence, *vessel* is appropriate when the containing and transporting of goods and persons is stressed; it is applied chiefly to large boats, especially seagoing boats, in the business of carrying passengers or freight or serving as a base of operations at sea (as in fishing or in war) (steam *vessels*) (a fleet of war *vessels* including dreadnoughts, cruisers, destroyers, and submarines) (fishing *vessels*) **Ship** is the preferred term for the large seagoing vessel, especially when its navigation rather than its business is emphasized (a sailing *ship*) (a *steamship*) (a *battleship*) (the captain stands by his *ship*) *Ship* also suggests more personality, more romance, and more beauty than the other words and therefore is far more common in poetry and in figurative use (sailing, like a stately *ship* . . . sails filled, and streamers waving—*Milton*) (O Captain! my Captain! our fearful trip is done! The *ship* has weathered every wrack, the prize we sought is won—*Whitman*) **Craft** may be used as a singular or collective noun and is now applicable to any type of boat or ship that plies the water. Originally it was found only in the phrase *small craft* and was applied to smaller vessels,

especially to those in the service of ships (as lighters, tugs, and fireboats) or to those forming part of a navy or fleet (when the winds increased the Coast Guard sent out small *craft* warnings) The word may still be used in the sense of *small craft* but it tends to become a comprehensive term covering all kinds of boats and vessels (the harbor is filled with *craft*) As a singular, *craft* unqualified is often a vague and general term (for me, my *craft* is sailing on, through mists today, clear seas anon—*Bangs*) However, for that very reason, *craft* is often, when it is qualified, a better choice than *boat, ship, or vessel* (a huge, lumbering *craft*) (for she is such a smart little *craft*—*Gilbert*)

bodily, physical, corporeal, corporal, somatic are comparable when used narrowly to mean of or relating to the human body. **Bodily** suggests opposition to *mental* or *intellectual* (so engrossed in thought as to be unaware of his *bodily* needs) (he has never known *bodily* pain) (*bodily* illness is more easy to bear than *mental*—*Dickens*) **Physical** (see also MATERIAL), though often used interchangeably with *bodily*, does not carry so strong a suggestion of organic structure; thus, *bodily* suffering implies some disturbance within the organism or, if external, some stimulus directly affecting the organism; *physical* suffering may also mean this, but often it is vaguer and less explicit in its implications or reference (bodily pains induced by *physical* exhaustion) (a sense of *physical* well-being is often the result of freedom from bodily ailments) **Corporeal** refers more specifically to the substance or matter of which the body is composed; like *physical* it has a more inclusive sense (see MATERIAL) but when used with reference to the human body, it implies an opposition to *immaterial* or to *spiritual* as applied to substance or nature (our notion of man, for instance, necessarily includes its specific parts, rational soul and *corporeal* body—*Connally*) (until, the breath of this *corporeal* frame . . . almost suspended, we are laid asleep in body, and become a living soul—*Wordsworth*) **Corporal** applies almost exclusively to things that have for their object an often painful effect upon the body (subjected to *corporal* punishment) In some contexts (as in "corporal works of mercy") it may stand in contrast to *spiritual*. **Somatic**, because of its freedom from theological and poetic connotations, is now preferred to *bodily* and *corporeal* by physiologists, psychologists, and physicians with an implied opposition to *psychical* (*somatic* reactions to a stimulus) (a *somatic* disturbance) (*somatic* behavior)

Ana *carnal, fleshly, animal, sensual

Con *mental, psychic, intellectual: spiritual (see HOLY)

body, corpse, carcass, cadaver denote the physical organism of a man or animal (especially one of the larger animals). **Body** refers to the animal organism, living or dead; but its commonest use is in reference to man, then often implying an opposition to *mind* or *soul* (absent in *body*, but present in spirit—*1 Cor* 5:3) (women take great care of their *bodies*) (they removed the *body* to a morgue) **Corpse** and **carcass** (of man and animal respectively) refer to the dead body (make a ring about the *corpse* of Caesar—*Shak.*) (there was a swarm of bees and honey in the *carcass* of the lion—*Judg* 14:8) *Carcass* is also used as a term of contempt for the human body, dead or alive (on the bleak shore now lies th' abandoned king, a headless *carcass*, and a nameless thing—*Dryden*) **Cadaver** (compare *cadaverous* at HAGGARD) applies to a corpse used for the purpose of dissection in a laboratory. The term is sometimes applied to living men and then suggests extreme emaciation or the appearance of a skeleton.

Con *soul, spirit: *mind, intellect, psyche, intelligence

boggle *vb* stickle, stick, strain, scruple, *demur, balk, jib,

shy

Ana *object, protest, kick, remonstrate, expostulate: *recoil, shrink, flinch, wince, blench, quail

Ant subscribe (*to*) —*Con* acquiesce, accede, *assent, agree: accept, admit, *receive

bogus *adj* *counterfeit, spurious, fake, sham, pseudo, pinchbeck, phony

Ana fraudulent, deceitful, deceptive (see corresponding nouns at IMPOSTURE): duping, hoaxing, gulling, hoodwinking (see DUPE)

Con *authentic, genuine, bona fide, veritable

boil *n* *abscess, furuncle, carbuncle, pimple, pustule

boil *vb* **Boil, seethe, simmer, parboil, stew** mean to prepare (as food) in a liquid heated to the point where it emits considerable steam. **Boil** implies the bubbling of the liquid and the rapid escape of steam; it may be applied to the liquid alone, but usually it suggests a fast method of accomplishing an end (as cooking or cleansing) <*boil water*> <the water is *boiling*> <*boil eggs*> <*boil clothes*> **Seethe** differs only slightly from *boil*. It emphasizes the subjection of something to the influence of a boiling liquid in order to cook it thoroughly or to make an infusion of it <tomorrow is the rest of the holy sabbath unto the Lord: bake that which ye will bake today, and *seethe* that ye will *seethe* —*Exod* 16:23> This difference, though slight, is also apparent in extended senses of *boil* and of *seethe*, for *boil* suggests a sudden rise and ebullition <he *boiled* with anger> and *seethe* suggests the agitation and turmoil which follows a cause of excitement <the crowd was *seething* with excitement> **Simmer** suggests that the liquid is at the point of boiling; it implies less steam and less bubbling than *boil* and is used, therefore, to denote a gentle and slower form of cooking <corned beef should be *simmered*, not boiled> <*simmer milk*> **Parboil** usually implies boiling for a limited time to prepare some food for further cooking (as by roasting or frying) <*parboil* potatoes prior to roasting them with beef> <*parboil* a chicken before frying it> **Stew** implies long slow simmering, usually in a closed vessel; it is used especially in reference to meats or fruits cooked until they are tender or broken up <*stew* beef and kidneys together> <*stew* fruit for dessert>

boisterous obstreperous, clamorous, blatant, *vociferous, strident

Ana sporting, disporting, rollicking, frolicking, gamboling (see PLAY *vb*): *unruly, ungovernable: *indecorous, unseemly

Con quiet, noiseless, *still: peaceful, *calm, tranquil, serene, placid: staid, sedate, *serious, sober

bold *brave, courageous, unafraid, fearless, intrepid, valiant, valorous, dauntless, undaunted, doughty, audacious
Ana daring, reckless, venturesome, *adventurous, daredevil, rash, foolhardy: mettlesome, *spirited: fearless, unapprehensive, unafraid (see affirmative adjectives at FEARFUL)

Ant cowardly —*Con* *timid, timorous: quailing, flinching, shrinking, recoiling (see RECOIL)

bolster *vb* prop, *support, sustain, buttress, brace
Ana *strengthen, reinforce, fortify: uphold, champion (see SUPPORT)

bombard assail, storm, assault, *attack

bombast, rhapsody, rant, fustian, rodomontade all designate a style of speech or writing characterized by high-flown pomposity or pretentiousness of language disproportionate to the thought or subject matter. All of them are derogatory in some degree; some of them are frankly contemptuous. **Bombast** does not necessarily connote emptiness of thought, but it implies inflation or a grandiosity or impressiveness in language and style which so outruns the thought that the attention is distracted from the matter and

concentrated upon the manner of expression. When used in description rather than in censure, *bombast* often additionally suggests a soaring eloquence or a kind of oratorical grandeur, such as is found in Marlowe's *Tamburlaine the Great* or is characteristic of Elizabethan drama in comparison with modern realistic drama; when used in depreciation, it suggests padding, windiness, verbosity, and exaggeration <to outrave better pens with the swelling *bombast* of a bragging blank verse—*Nash*> <their eloquence is all *bombast*—*Kingsley*> <it looks like mere "rhetoric," certainly not "deeds and language such as men do use." It appears to us, in fact, forced and flagitious *bombast*—*T. S. Eliot*> **Rhapsody**, like *bombast*, may be scarcely or obviously derogatory. It designates an ecstatic or effusive utterance or writing in which the language or style is governed by the feelings rather than by logical thought. It may, at one extreme, suggest inspired utterance (as in rapture) or, at the other, a maudlin loquaciousness <O then my breast should warble airs, whose *rhapsodies* should feast the ears of seraphims—*Quarles*> <his characters . . . are excellently drawn, but he writes as though he had uncovered a new religion and thought it deserved a *rhapsody*—*New Yorker*> In scholarly and critical use it is often applied to a kind of writing that has no perceptible argument and is seemingly incoherent, yet moves by a kind of logic of its own from one expression of feeling or one image to another <the traditional assumption that it [Kubla Khan] was a *rhapsody* of enchanting images which "led to nothing"—*Times Lit. Sup.*> **Rant** and **fustian** are definitely terms of derogation. Both are applicable to *bombast* and *rhapsody* at their worst, but *rant* stresses its extravagance or violence of expression or utterance and *fustian* the banality of its quality or the preposterousness of its character <the hoarse *rant* of that demagogue fills the air and distracts the people's minds—*Ascoli*> <he, whose *fustian's* so sublimely bad, it is not poetry but prose run mad—*Pope*> <romantic *fustian*; which may be defined as the enormous disproportion between emotion and the outer object or incident on which it expends itself. Victor Hugo abounds in *fustian* of this kind—*Babbitt*> **Rodomontade** is applied especially to the rant of the braggart, of the demagogue, or of anyone given to bluster and magniloquence <the brothers set about abusing each other in good round terms and with each intemperate sally their phrases became more deeply colored with the tincture of Victorian *rodomontade*—*Marsh*>

Ana grandiloquence, magniloquence, rhetoric (see corresponding adjectives at RHETORICAL): inflatedness, turgidity, tumidity, flatulence (see corresponding adjectives at INFLATED)

Con temperateness or temperance, soberness or sobriety, unimpassionedness (see corresponding adjectives at SOBER): dispassionateness, justness (see corresponding adjectives at FAIR)

bombastic grandiloquent, magniloquent, *rhetorical, aureate, flowery, euphuistic

Ana *inflated, turgid, tumid: verbose, diffuse, *wordy: eloquent, voluble, fluent, articulate, *vocal

Con temperate, unimpassioned, *sober: *sincere: unaffected, *natural, simple, artless: dispassionate, just, impartial, *fair

bona fide *authentic, genuine, veritable

Ana true, *real, actual: *reliable, dependable, trustworthy: *pure, absolute, simple, sheer

Ant counterfeit, bogus —*Con* simulated, feigned, pretended, affected, shammed, assumed (see ASSUME)

bond *adj* *bound, indentured, articulated

Ant free —*Con* emancipated, manumitted, liberated, freed (see FREE *vb*): independent (see FREE *adj*)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

bond *n* 1 **Bond, band, tie** all denote something which serves to bind or bring two or more things firmly together, but they differ from each other not only in implications but in their specific applications. **Bond** often retains its basic implication of restraint upon the freedom of the individual. It may be applied to a restraining device (as a rope, a chain, a fetter, or a manacle) which prevents a prisoner from escaping or, more broadly, to something that interferes with one's liberty and holds one down (it has been said that only the dying man is free, for death breaks every *bond*) But *bond* is equally applicable to something that connects or brings together two individuals (persons or things) or all the individuals comprising a group or mass into a stable union. In this sense the term may and often does refer to a connection that is primarily spiritual; occasionally, especially when the plural is used, there is also a hint of restraint or constraint (the *bond* (or *bonds*) of marriage) (the *bond* of faith) (the *bond* of fellowship) (the *bonds* of a common tradition) (the religion of the Greeks [was] . . . the *bond* of their political life—*Dickinson*) **Band** (see also **STRIP**) may imply, like *bond*, a restraint, a fastening, or a connection, but it more usually also implies something material in the form of a flat and narrow piece of material, often one that forms a hoop or ring; thus, a *band* around the hair is worn to confine the hair and may be a ribbon with ends tied together or a hoop or half hoop (as of metal or plastic); an endless strip of rubber or elastic material is called a rubber *band*; a hooplike piece which holds together two parts of a structure (as the barrel and stock of a gun or two sections of a pillar) is called a *band*; also, a straight member of a wall (as continuous molding, a frieze, or a strip of brickwork in a different pattern) often serves not only as an ornament but also as a union or connection between two sections of the wall or structure, and is therefore called in architecture a *band*. **Tie** basically applies to a bond or band for fastening or restraining which is of a flexible substance (as rope, cord, or string) and can be secured by knotting the loose ends together or one end to the thing fastened and the other to its support. Consequently, in extended use, *tie* tends to suggest a less integral union and often more flexibility in the connection than *bond*, which it otherwise closely resembles; thus, one breaks the *bond* of friendship but one severs the *tie* of friendship; the *ties* of blood suggest the pull exerted by blood relationship, but the *bond* of blood suggests an obligation or a duty. *Tie*, as applied to specific fastenings or connections, is used chiefly when the object of the connection is not (as in *bond*) to form into an integral unit or (as in *band*) to keep closely united or together but to bring together two things that are affected by common forces so that when they are subjected to strain or tension they will not spread or pull apart; thus, the transverse bars on which rails rest and which serve to keep the rails equidistant from each other are called *ties*; a piece (as a beam, a post, or a rod) which connects two parts or sides of a structure (as the ribs of a vessel or the two sides of a pointed arch) and serves to brace and stay the whole is called a *tie*.

2 surety, security, bail, *guarantee, guaranty

bondage *servitude, slavery

boner blunder, mistake, *error, howler, bull, slip, lapse, faux pas

bonny comely, pretty, good-looking, fair, lovely, *beautiful, handsome, beautiful, pulchritudinous

Ana pleasing, agreeable, *pleasant: attractive, charming, captivating (see under **ATTRACT**)

Ant homely

bonus bounty, *premium, reward, guerdon, award, prize, meed

bon vivant gastronome, gourmet, gourmand, *epicure, glutton

Ant ascetic

bookish academic, scholastic, *pedantic

bookkeeper, accountant, auditor. A **bookkeeper** keeps a regular, concise, and accurate record of business transactions by making the proper entries in the various books of account for that purpose. An **accountant** is a person skilled in the art of bookkeeping and may be employed either to organize and set up a system of records suitable to the needs of a particular organization or to investigate and report upon the financial condition of an organization by a study and analysis of its books of record. An **auditor** is an examiner who checks and verifies the financial records of an organization to see that these records correctly represent its condition.

boon favor, *gift, present, gratuity, largess

Ana benefaction, *donation, contribution

Ant calamity —*Con* *misfortune, mischance, mishap: *trial, cross, tribulation, affliction

boor, churl, lout, clown, clodhopper, bumpkin, hick, yokel, rube are comparable when meaning an uncouth, ungainly fellow. Most of these words may be applied to rustics, but they tend increasingly to imply reference to breeding, manners, and appearance rather than to origin or social status. The same distinctions in connotations and implications are apparent in the adjectives derived from the first four of these nouns, **boorish, churlish, loutish, clownish.**

Boor implies an opposition to *gentleman*, especially in respect to characteristics indicative of good breeding and fineness of feeling. As a rule *boor* and *boorish* imply variously rudeness of manner, insensitiveness, lack of ceremony, or unwillingness to be agreeable in the presence of others (love makes gentlemen even of *boors*, whether noble or villain—*Henry Adams*) (to the European mind, with all its goodwill, the very things that make us more powerful make us also more *boorish*—*Lerner*) **Churl** may suggest low birth or social status but more often ill-bred surly meanness of expression or attitude. The latter implication is far more common in the adjective *churlish*, which characteristically implies surliness, irresponsiveness, or ungraciousness (warns all whom it concerns, from King to *churl*—*John Morley*) (by what magic was it that this divine sweet creature could be allied with that old *churl*—*Meredith*) (they object to the dairymaids and men crossing the elm vista . . . It seems *churlish*—*Shaw*)

Lout and *loutish* apply especially to hulky youths or men without regard to origin and usually suggest stupidity, clumsiness, and sometimes, abjectness of bearing or demeanor. Both words are terms of contempt frequently applied to idlers or loafers of particularly unprepossessing appearance (it was inevitable that the older boys should become mischievous *louts*; they bullied and tormented and corrupted the younger boys because there was nothing else to do—*H. G. Wells*) **Clown** and *clownish* come close to *lout* and *loutish* in connotation. Instead of stupidity, however, the terms often connote ignorance or simplicity and instead of hulksiness they suggest the ungainliness of a person whose body and movements reveal hard plodding labor (the *clown*, the child of nature, without guile—*Cowper*) When used in reference to those who are not countrymen the terms still imply general uncouthness and awkwardness and often, by association with the other sense of *clown*, a propensity for absurd antics (he was the sort of boy that becomes a *clown* and a lout as soon as he is not understood, or feels himself held cheap—*D. H. Lawrence*) **Clodhopper** distinctively suggests the frame and the heavy movements generally associated with plowmen but is not restricted in application to rustics (though hon-

est and active they're most unattractive and awkward as awkward can be—can be. They're clumsy *clodhoppers*—*Gilbert* **Bumpkin** implies a loutishness suggestive of unfamiliarity with city ways and manners (<bashful country *bumpkins*—*Irving*) **Hick** comes close to *bumpkin* and suggests the unsophisticated simple rustic (<*hicks* of the hinterlands mistrusting city politicians) **Yokel** and **rube** more particularly suggest a rustic lack of polish or an obtuse gullibility (<his mouth was agape in *yokel* fashion—*Crane*) <always a new crop of *rubes* waiting to be tricked out of their money>

Ant gentleman

boorish loutish, clownish (see under **BOOR**)

Ana *awkward, clumsy, maladroit, inept: *rude, discourteous, ungracious, uncivil, impolite, ill-mannered
Ant gentlemanly —**Con** *suave, urbane, smooth: courteous, courtly, gallant, polite, *civil

boost *vb* *lift, raise, elevate, hoist, rear, heave

Ana *exalt, aggrandize: heighten, enhance (see **INTENSIFY**): mount, soar, levitate, surge, ascend, *rise

bootleg *smuggled, contraband

bootless fruitless, *futile, vain, abortive

Ana idle, empty, hollow, nugatory, *vain, otiose

Con *beneficial, advantageous, profitable

bootlicker sycophant, toady, lickspittle, hanger-on, *parasite, favorite, leech, sponge, sponger

booty *spoil, loot, plunder, prize, swag

border *n* **Border**, margin, verge, edge, rim, brim, brink mean the line or relatively narrow space which marks the limit or outermost bound of something. A **border** is the part of a surface which is just within its boundary line (<the *border* of a rug) or it may be the boundary line itself (<I had at last reached the *border* of the forest—*Hudson*) **Margin** denotes a border of definite width usually distinguished in some way from the remaining surface; it also applies to the space immediately contiguous to a body of water (<the *margin* of a page) (<the *margin* of a lake or river) (<they wandered onward till they reached the nether *margin* of the heath, where it became marshy, and merged in moorland—*Hardy*) **Verge** applies to the line or to a very narrow space which sharply marks the limit or termination of a thing (as a surface or an expanse) (<the sky was clear from *verge* to *verge*—*Hardy*) **Verge** may also be applied to the extreme limit of something with an implication that it is being approached either from within or from without (<it is not enough that a statute goes to the *verge* of constitutional power. We must be able to see clearly that it goes beyond that power—*Justice Holmes*) (<he is on the *verge* of ruin) An **edge** is a sharply defined terminating line made by the converging of two surfaces (as of a blade, a dish, a plank, or a box). **Edge** often implies sharpness (as opposed to bluntness) and therefore power to cut (<a tool with a fine *edge* may do mischief—*Godwin*) (<put an *edge* on this knife) It is this implication that comes out strongest in extended use where it often suggests asperity, trenchancy, or keenness (<there was an *edge* in his tone) (<his calming words took the *edge* off their fear) **Rim** usually applies to the verge or edge of something circular or curving (<the *rim* of the moon) (<the *rim* of a bucket) (<the *rim* of a wheel) **Brim** applies to the inner side of the rim of a hollow vessel (<fill the pot to the *brim*) or to the topmost line of the basin of a river, lake, or other body of water (<the river has risen to the *brim*) **Brink** denotes the edge of something steep (as a precipice); thus, one would speak of the river's *brink* when stressing the abruptness of the bank or shore but of the river's *brim* when the notion of the close approach of the water to the basin's rim is uppermost in mind. **Brink** may also be used of immaterial things with the implication

of a possibility or risk of abrupt transition (as from one state to another) (<a policy that brought the nation to the *brink* of war) (<on the *brink* of a horrible danger—*Wilde*)
Ana *limit, bound, confine, end

Con inside, interior (see corresponding adjectives at **INNER**)

bore *vb* *perforate, drill, puncture, punch, prick

Ana penetrate, pierce, *enter

boredom *tedium, ennui, doldrums

Ant amusement —**Con** diversion, entertainment, recreation (see under **AMUSE**)

boring *irksome, tiresome, wearisome, tedious

Ana *dull, humdrum, monotonous, dreary, stodgy, pedestrian

Con *interesting, absorbing, engrossing, intriguing: exciting, stimulating, provoking or provocative (see corresponding verbs at **PROVOKE**)

botch *vb* **Botch**, bungle, fumble, muff, cobble mean to handle or treat awkwardly or unskillfully. **Botch** may imply repairing or mending, but it frequently implies a making or forming by patching or by putting together out of pieces. It consistently suggests incompetence and a spoiling or marring of the thing produced, whatever its character (<*botch* a job) (<an assemblage of ill-informed gentlemen who have *botched* every business they have ever undertaken—*Shaw*) (<the suit was vilely *botched* and skimped . . . and now it was too late to remedy the defect—*Wolfe*)

Bungle implies ignorance, ineffectualness, or clumsiness in design or execution or an inability to use materials with skill or competence (<the plans were badly *bungled*) (<he has completely *bungled* the matter) (<some singularly excellent recordings side by side with some pretty *bungled* ones—*P. H. Lang*) (<some Occupation officials said and did stupid things, and inexperience led to *bungling*—*Sat. Review*) **Fumble** stresses clumsy or unskillful use of the hands especially in uncertain attempts to reach, take, or grasp something or in groping in the dark for something (<a football player who seldom *fumbles*) (<recovered himself, *fumbled* with his cap, and made a bow—*Dickens*) (<his old fingers *fumbling* absently for the beard which wasn't there—*Mary Austin*) (<so she *fumbled* about in the dim light, and brought her brother his bread and butter and meat—*Deland*) Occasionally it suggests the awkward uncertainty not of hands or fingers but of mind or soul (<a hesitant speaker *fumbling* for the right words) (<never *fumbling* with what she has to say, never . . . imperfectly presenting her thought—*Arnold*) **Muff**, a word much used in sports, especially implies an unskillful performance or a bad play (as in catching a ball, firing a shot, or wielding a golf stick) (<*muff* a stroke) (<he *muffed* the ball) Consequently *muff* in more general use often means to fail by bungling or fumbling (<*muff* an opportunity) (<he *muffed* his chances for the nomination) **Cobble** is much like *botch*, though it basically implies the mending or patching of shoes; in more general use it stresses a patching or putting together of something in a crude or clumsy manner (<even generous critics . . . attribute to him a limit in narrative stamina . . . his wind gave out too soon, forcing him to *cobble* things up out of tone—*J. C. Furnas*)

Ana patch, *mend, repair: *treat, handle: mutilate (see **MAIM**): wreck, *ruin

bother *vb* vex, *annoy, irk

Ana *worry, harass, harry, pester, tease, tantalize: interfere, *meddle, tamper: *puzzle, perplex, distract: trouble, *inconvenience, incommode, discommode

Ant comfort —**Con** solace, console (see **COMFORT**): appease, placate, *pacify, mollify, propitiate

bottom *vb* *base, found, ground, stay, rest

Ana *support, sustain: *set, fix, establish

bough branch, limb, *shoot

bounce *vb* *dismiss, drop, sack, fire, discharge, cashier

bound *n* *limit, confine, end, term

Ana *border, verge, edge

bound *adj* **Bound, bond, indentured, articed** are comparable when they mean obliged to serve a master or in a clearly defined capacity for a certain number of years by the terms of a contract or mutual agreement. **Bound** not only stresses the obligation, but it also often connotes a condition of or approaching servitude. It frequently implies the status of an apprentice, one obliged to serve a master for an agreed term in return for being taught a trade, a craft, an art, or a profession. It may, however, imply the status of an unskilled laborer (as a domestic servant) who agrees to serve (as in a distant colony) in return for transportation, keep, and, sometimes, a wage (he emigrated from England to the American colonies as a *bound* servant) When the condition of servitude is emphasized and service without a wage is implied, **bond** (placed before the noun) is often used in place of *bound* (<*bond* servant) <a *bond*woman) **Indentured** implies apprenticeship and emphasizes the fact that the agreement is in writing, has been executed in duplicate, and has legal validity. Usually it carries the implication of fairness and equity to both parties to the agreement (<a tailor's *indentured* employees) <a solicitor's *indentured* clerk) Sometimes, especially in reference to an apprentice in a law office, **articed** is preferred to *indentured*, though there seems to be no clear distinction between the two (he started out as an *articed* clerk in an attorney's office)

bound *n* jump, leap, spring, vault (see under **JUMP** *vb*)

Ana advance, progress (see under **ADVANCE** *vb*): *haste, hurry, speed, expedition

bound *vb* 1 *jump, leap, spring, vault

Ana *advance, progress: *speed, precipitate, hasten, hurry

2 *skip, ricochet, hop, curvet, lope, lollop

Ana dart, skim, skud (see **FLY**): *rebound, recoil, resilie

bounder *cad, rotter

boundless *infinite, uncircumscribed, illimitable, eternal, sempiternal

Ana vast, immense, enormous (see **HUGE**): *monstrous, prodigious, tremendous, stupendous

Con circumscribed, limited, confined, restricted (see **LIMIT** *vb*)

bountiful, bounteous generous, openhanded, munificent, *liberal, handsome

Ana *charitable, philanthropic, benevolent: prodigal, lavish (see **PROFUSE**)

Ant niggardly —*Con* *stingy, parsimonious, penurious, close, miserly: avaricious, *covetous, greedy, grasping: frugal, *sparing, economical

bounty award, reward, meed, guerdon, prize, *premium, bonus

Ana gratuity, largess, *gift, boon: grant, subvention, subsidy (see **APPROPRIATION**)

bouquet perfume, *fragrance, redolence, incense

Ana odor, aroma, *smell, scent

bout *n* stint, turn, trick, tour, *spell, shift, go

bow *vb* defer, *yield, submit, capitulate, succumb, relent, cave

bow *n* arc, arch, *curve

bow *vb* *flex, crook, buckle

Ana bend, *curve, twist

box *vb* *strike, hit, smite, punch, slug, slog, swat, clout, slap, cuff

boyish *youthful, juvenile, puerile, maiden, virgin, virginal

brace *n* *couple, pair, yoke

brace *vb* *support, sustain, buttress, prop, bolster

Ana *strengthen, reinforce, fortify, energize, invigorate

brag *vb* *boast, vaunt, crow, gasconade

Ana plume, pique, *pride, preen: flaunt, parade (see **SHOW**)

Ant apologize —*Con* extenuate, *palliate, whitewash, gloze, gloss

braid *vb* plait, *weave, knit, crochet, tat

brain *mind, intellect, intelligence, wit, psyche, soul

branch *n* limb, bough, *shoot

brand *n* 1 mark, stamp, label, tag, ticket (see under **MARK** *vb*)

Ana *impression, impress, imprint, print

2 *stigma, blot, stain

Ana sear, burn, scorch (see **BURN**): tainting or taint, defilement (see corresponding verbs at **CONTAMINATE**): *blemish, defect, flaw

brand *vb* *mark, stamp, label, tag, ticket

brandish flourish, shake, *swing, wave, thrash

Ana wield, swing, *handle, manipulate, ply: flaunt, parade, display, exhibit, *show

brash *adj* brazen, barefaced, impudent, *shameless

Ana bold, audacious (see **BRAVE**): rash, reckless (see **ADVENTUROUS**): impetuous, headlong, abrupt, *precipitate: intrusive, officious, *impertinent

Ant wary —*Con* *cautious, chary, circumspect: *timid, timorous: reserved (see **SILENT**): discreet (see under **PRUDENCE**)

brave *adj* **Brave, courageous, unafraid, fearless, intrepid, valiant, valorous, dauntless, undaunted, doughty, bold, audacious** are comparable when they mean having or showing no fear when faced with something dangerous, difficult, or unknown. **Brave** usually indicates lack of fear in alarming or difficult circumstances rather than a temperamental liking for danger (the *brave* soldier goes to meet Death, and meets him without a shudder—*Trollope*) (he would send an explosion ship into the harbor . . . a *brave* crew would take her in at night, right up against the city, would light the fuses, and try to escape—*Forester*) **Courageous** implies stouthearted resolution in contemplating or facing danger and may suggest a temperamental readiness to meet dangers or difficulties (I am afraid . . . because I do not wish to die. But my spirit masters the trembling flesh and the qualms of the mind. I am more than brave, I am *courageous*—*London*) (a man is *courageous* when he does things which others might fail to do owing to fear—*Russell*) **Unafraid** simply indicates lack of fright or fear whether because of a courageous nature or because no cause for fear is present (enjoy their homes *unafraid* of violent intrusion—*MacArthur*) (a young, daring, and creative people—a people *unafraid* of change—*MacLeish*) **Fearless** may indicate lack of fear, or it may be more positive and suggest undismayed resolution (joyous we too launch out on trackless seas, *fearless* for unknown shores—*Whitman*) (he gives always the impression of *fearless* sincerity . . . one always feels that he is ready to say bluntly what every one else is afraid to say—*T. S. Eliot*) **Intrepid** suggests either daring in meeting danger or fortitude in enduring it (with the *intrepid* woman who was his wife, and a few natives, he landed there, and set about building a house and clearing the scrub—*Maugham*) (the *intrepid* guardians of the place, hourly exposed to death, with famine worn, and suffering under many a perilous wound—*Wordsworth*) **Valiant** suggests resolute courage and fortitude whether in facing danger or in attaining some end (this *valiant*, steadfast people [of Yugoslavia], whose history for centuries has been a struggle for life—*Sir Winston Churchill*) **Valorous** suggests illustrious bravery and, more often than *valiant*, qualifies accomplishments rather than persons or their exertions; thus,

one might refer to the *valorous* deeds of a *valiant* band of knights (the regiment itself is a proud one, with a *valorous* record—*Infantry Jour.*) **Dauntless** emphasizes determination, resolution, and fearlessness despite danger or difficulty (the *dauntless* English infantry were receiving and repelling the furious charges—*Thackeray*) (nothing appalled her *dauntless* soul—*Beckford*) **Undaunted** indicates continued courage and resolution after danger, hardship, or defeat (he watched them at the points of greatest danger falling under the shots from the scorpions, and others stepping *undaunted* into their places to fall in the same way—*Froude*) **Doughty** combines the implications of *formidable*, *sturdy*, and *brave* but may have an archaic or humorous suggestion (when Fisk reached the head of the stairs leading to the boardroom, the *doughty* president of the endangered railway knocked him down to the ground floor—*Charles & Mary Beard*) (so *doughty* a warrior must break a lance—*Parrington*) **Bold** may indicate a forward or defiant tendency to thrust oneself into difficult or dangerous situations (it was a *bold* man who dared to walk alone through hundreds of miles of lion-infested country with nothing but a spear in his hand to seek work and adventure—*Cloete*) (these fellows who attacked the inn tonight—*bold*, desperate blades, for sure—*Stevenson*) (he knew a *bold* and a tyrant in high places, and was *bold* to call them by their true names—*Parrington*) When used of immaterial things (as plans, experiments, or deeds) *bold* suggests a disregard for danger, risk, or convention (a *bold* scheme to corner the wheat market) **Audacious** implies spirited and sometimes reckless daring (the place where the fiery Ethan Allen first sketched his *audacious* move against Ticonderoga—*Schulberg*) (hitherto no liberal statesman has been so *audacious* as to . . . lay profane hands on the divine right of nations to seek their own advantage at the cost of the rest—*Veblen*)

Ana daring, venturesome, daredevil, *adventurous: heroic, gallant (see corresponding nouns at HEROISM): plucky, gritty (see corresponding nouns at FORTITUDE)
Ant craven —*Con* *timid, timorous: shrinking, flinching, blenching (see RECOIL *vb*)

brave *vb* dare, defy, beard, *face, challenge

Ana confront, *meet, encounter: oppose, combat, *resist, fight

bravo *assassin, cutthroat, gunman

brawl *n* **Brawl, broil, fracas, melee, row, rumpus, scrap** are comparable when meaning a noisy fight or quarrel. **Brawl** implies angry contentions, blows, and a noisy racket; it usually suggests participation by several persons (a family *brawl* that kept the neighbors awake) (street *brews*) (a howling *brawl* amongst vicious hoodlums—*Stafford*) **Broil** stresses disorder, confusion, and turmoil among the combatants more than the disturbance they cause others. The term may be used contemptuously in place of *war*, *conflict*, or *controversy* (plunging us in all the *broils* of the European nations—*Jefferson*) but it is more often used of a violent fight or quarrel where the issues are not clear or significant or where the opposing parties are not clearly distinguished (but village mirth breeds contests, *broils*, and blows—*Shelley*) **Fracas** is applicable to a noisy quarrel or excited disturbance whether leading to blows or not; the term does not suggest as much vulgarity or as many participants as *brawl*, but it may imply as much noise and excitement (they were hot-tempered, frequently embroiled in quarrels. John Adams, after such a *fracas*, listed his new enemies in his diary—*C. D. Bowen*) **Melee** is applied to a more or less disorganized hand-to-hand conflict or to a dispute which resembles such a combat. In many instances the emphasis is so strongly on confusion and mix-up that the implication

of combat or contention is weakened or lost (the calmness of the platform was transformed into a *melee*. Little Constance found herself left on the fringe of a physically agitated crowd which was apparently trying to scale a precipice surmounted by windows and doors—*Bennett*) **Row** is applicable to a demonstration or fight, whether a quarrel, a squabble, or a dispute, that is so public or so noisy as to attract attention (during the recent *row* over atomic-energy legislation their feuding was epic—*Friendly*) **Rumpus** suggests even greater agitation and disturbance than *row*, for it usually connotes an uproar (you incur my serious displeasure if you move one inch in this contemptible *rumpus*—*Scott*) **Scrap** usually suggests a physical tussle but often implies little more than a noisy, sharp quarrel (the boys are good friends, but they have many a *scrap*)

Ana conflict, fight, fray, affray (see CONTEST): contention, dissension, strife, *discord: wrangle, altercation, *quarrel, squabble: uproar, racket, *din, hubbub, clamor

brawny *muscular, burly, husky, sinewy, athletic
Ana stalwart, *strong, sturdy, stout, tough: *fleshy
Ant scrawny —*Con* lanky, lank, gaunt, rawboned, *lean, spare, skinny: *thin, slender, slight, slim

brazen *shameless, brash, impudent

Ana callous, *hardened, indurated: insolent, arrogant (see PROUD): rash, reckless (see ADVENTUROUS): bold, audacious (see BRAVE)

Ant bashful —*Con* *shy, diffident, modest, coy: *timid, timorous: stealthy, surreptitious, underhand, *secret

breach *n* 1 **Breach, infraction, violation, transgression, trespass, infringement, contravention** are comparable when denoting the act or the offense of one who fails to keep the law or to do what the law, one's duty, or an obligation requires. **Breach** occurs rarely by itself except in phrases such as "a law more honored in the *breach* than in the observance." The word is usually followed by *of* and a noun or pronoun which indicates the thing which is broken or not kept (his action constitutes a *breach* of faith) (he was found guilty of *breach* of the peace by reason of his noisy, disorderly, and annoying conduct) (sued for *breach* of contract) **Infraction** is now more often used than *breach* (except in certain time-honored idioms) for a breaking of a law or obligation (an *infraction* of the school rules) (an *infraction* of a treaty) (an *infraction* of canon law) (we have scrutinized the case, but cannot say that it shows an *infraction* of rights under the Constitution of the United States—*Justice Holmes*) **Violation** adds to *breach* and *infraction* the implication of flagrant disregard of the law or of the rights of others and often suggests the exercise of force or violence; thus, the *violation* of a treaty suggests positive, often aggressive and injurious action, while its *infraction* may imply a mere failure strictly to adhere to its terms (a *violation* of military discipline) (the police interference was a *violation* of the right to free assembly) (when more of the people's sustenance is exacted through the form of taxation than is necessary to meet the just obligations of Government . . . such exaction becomes ruthless extortion and a *violation* of the fundamental principles of a free Government—*Cleveland*) **Transgression** is applied to any act that goes beyond the limits prescribed by a law, rule, or order; often the term is used specifically of an infraction of the moral law or of one of the commandments (for sin is the *transgression* of the law—*1 Jn* 3:4) ("I was forgetting," she said. "I am forbidden tea." . . . She looked at the cup, tremendously tempted. . . . An occasional *transgression* could not harm her—*Bennett*) **Trespass** also implies an overstepping of prescribed bounds, but it carries in addition a strong implication of encroachment upon the rights, the comfort, or the prop-

erty of others. In Scriptural and religious use a *trespass* is particularly an offense against God or one's neighbor <if ye forgive not men their *trespasses*, neither will your Father forgive your *trespasses*—Mt 6:15> In law a *trespass* is an unlawful act, involving some degree of force or violence, committed against the person, the property, or the rights of another <the passing through another's premises against his wish or without his invitation constitutes a *trespass*> <a burglar who is frightened away before he actually enters a house is liable to arrest for *trespass*> **Infringement** is sometimes used as though it were identical in meaning with *infraction* <an *infringement* of the law> <an *infringement* of a treaty> More often it implies *trespass* rather than *violation* and therefore is the idiomatic term when trespass involving an encroachment upon a legally protected right or privilege is at issue; thus, the unauthorized manufacture of something which has been patented constitutes an *infringement* (rather than an *infraction* or *violation*) of a patent <the unauthorized reproduction and sale of matter already copyrighted constitutes an *infringement* of the copyright> <an *infringement* on the liberty of the American people> **Contravention** applies specifically to a going contrary to the intent of the law or to an act in defiance of what is regarded as right, lawful, or obligatory <warrants in *contravention* of the acts of Parliament—Macaulay> <if there is in a work of art a *contravention* of nature—Lowe>

Ant observance

2 Breach, break, split, schism, rent, rupture, rift are comparable when they mean a pulling apart in relations or in connections. **Breach**, the most general in application of any of these terms, is capable of being referred to any such pulling apart without in itself, as apart from the context, throwing light on its cause, its magnitude, or its seriousness <a *breach* in unity> <widen the *breach* between old friends> <having followed the high banks of the Tom to the furthest extremity . . . they happily found a *breach* in the inclosure—Kingston> <it may be one man's privilege and duty to heal the *breach* between the Arab and the Jew—Douglas> **Break** (see also **BREAK n**) is often substituted for *breach* when one wishes to emphasize the strain that is inducing or has induced a disruption (as between persons or groups) <efforts to avoid an open *break* with the conservative faction> <the *break* was final, and there was no course open for the nation except war> **Split** usually implies a complete breach, suggesting a division such as would be made by an ax or knife; often, also, it hints at the impossibility of bringing together again the two parts (as parties or factions) that once formed a whole. **Split** often implies a division of friends or friendly groups into opposing parties or factions <a major *split* between the United States and most of the rest of the free world—Bundy> <I fear the *split* betwixt Constable and Cadell will render impossible what might otherwise be hopeful enough—Scott> **Schism** implies a clear-cut separation between divisions of an original group and consequent discord and dissension between the two parts; typically the term is used of such a division in a religious communion, but it may be applied to any union of rational beings (as a political party or a philosophical school) <he succeeded in dividing the American Quakers into two bodies; and this *schism* . . . lasted on till the present year—Inge> <a school of literalists arose with all the mad consequence of *schism* and heresy—Blackmur> **Rent** suggests an opening made by tearing or rending and may impute characteristics (as irregularity, jaggedness, and narrowness) to a break to which it is applied <thy stately mansion, and the pride of thy domain, strange contrast do present to house and home in many a craggy *rent* of the wild Peak—Words-

worth> <through the wide *rent* in Time's eternal veil, hope was seen beaming—Shelley> <a *rent* in the social fabric—Millstein> **Rupture** approaches *breach* in meaning, but it carries a more clearly defined stress upon a break in relations between people or groups; in addition, it frequently is affected by its special medical use and then often suggests an actual but not always clearly apparent break <mother and son avoided an open *rupture* by never referring to their differences—Santayana> (it was still the policy of the Cardinal . . . to carry on the convention that he had not provoked any direct *rupture* with Vienna—Belloc) **Rift** implies a breach that is made usually by some natural process (as one that produces a separation of rocks in a mountain or a cracking of the earth); consequently it is often applied to a breach that is small at first and is in danger of growing larger <this little *rift* it was that had widened to a now considerable breach—H. G. Wells> <it is the little *rift* within the lute, that by and by will make the music mute—Tennyson> <it was, I believe, the terrible Wars of Religion that made the fatal *rift* between religion and science which we are now trying to close—Inge>

Ana division, severance, separation (see corresponding verbs at **SEPARATE**): dissension, *discord, difference, variance, strife; estrangement, alienation (see corresponding verbs at **ESTRANGE**)

Con union, *unity, solidarity, integrity; accord, *harmony, concord

bread, bread and butter sustenance, *living, livelihood, subsistence, maintenance, support, keep

break *vb* **Break, crack, burst, bust, snap, shatter, shiver** are comparable as general terms meaning fundamentally to come apart or cause to come apart. **Break** basically implies the operation of a stress or strain that will cause a rupture, a fracture, a fissure, or a shattering either in one spot or in many <*break* a dish by dropping it> <*break* a bone> <the column *broke* when subjected to too great a weight> <a flood resulted when the dam *broke*> But *break* goes much further than this. Often, with or without the help of an adverb, it suggests the disruption of something material or immaterial, either in whole or in part. It may then imply a collapsing or causing to collapse <the wagon *broke* down> <*broke* the enemy by the only methods possible—starvation, attrition, and a slow, deadly . . . envelopment—Buchan> <his spirit was *broken*> Similarly it may imply a destruction of completeness, integrity, or wholeness; thus, one *breaks* a set of china by losing or destroying one or more pieces of the set; one *breaks* a ten-dollar bill by spending part of it and getting the remainder in smaller bills or coins <*break* a solid group into factions> With the same underlying notion it may imply a destruction of continuity (as by interrupting, terminating, or disintegrating) <*break* a circuit> <*break* a journey> <*broke* his silence> <*break* up a friendship> <it was the only time that day he saw her pale composure *break*—Cather> Sometimes the sense of disruption is not obvious, and the idea of piercing so as to let someone or something make entrance or exit predominates <*broke* his way through the crowd> <*break* a new path> <*break* the news gently> <she had just *broken* into her fifty-second year—Woolf> Most common of the senses that bear only a slight relation to the primary sense of *break* is one that implies violation or transgression <*break* the law> <*break* the Sabbath> <all rules, in education, should be capable of being *broken* for special reasons—Russell> Basically **crack** means to make the sudden, sharp sound characteristic of a breaking of something brittle (as ice, bone, or glass). It is often applied with this denotation to things which make a similar sound yet do not necessarily break <*crack* a whip> <the

thunder *cracks*) <his voice *cracked*> *Crack* more frequently implies a breaking of something hard or brittle or of something also hollow, often with a sudden sharp sound and usually without a separation of the parts <the dish was *cracked*, not broken> <*cracking* nuts between two stones> <the mirror was *cracked* by the explosion> <the sound of *cracking* glass> <the thin ice *cracked* under the skater's weight> Occasionally it implies merely the breaking of something that has grown dry or parched <fever has made his lips *crack*> <the prolonged drought has caused the earth to *crack*> **Burst** usually implies a breaking (as into pieces) with a scattering of contents by the force of internal pressure <*burst* a blood vessel> <the boiler *burst* under too great pressure> <bombs *bursting* in air—*Key*> <the willow scarce holds the sap that tightens the bark and would *burst* it if it did not enlarge to the pressure—*Jefferies*> Sometimes the implication is merely the sudden release or the likelihood of such release of something seeking utterance but hitherto suppressed or held back <*burst* into laughter> <*bursting* with suppressed merriment> <*burst* into tears> Sometimes a breaking under tension, under concussion, or through limitations is the only implication that the word carries <*burst* the bonds which tied him> or it may stress the violence of the force that opens <*burst* open the doors> or the suddenness with which someone or something comes out or in <the lilacs *burst* into bloom> <she *burst* into the living room> <the news of the attack *burst* upon the nation> **Bust** may be used informally in place of *burst* especially in the sense of to break under the strain of pressure, of tension, or of concussion <this westernmost province . . . is beginning to *bust* its industrial britches—*Wall Street Jour.*> **Snap** fundamentally implies a quick, sudden effort to seize (as by biting or by snatching at), but usually this action is accompanied by a short sharp sound (as a report or a click). Hence *snap* is often used to imply the action of breaking or bursting when the intent is to suggest a quick, clean-cut break and the sharp sound which accompanies it <branch after branch *snapped* during the storm> <a string of his violin *snapped*> <sharp the link of life will *snap*—*Housman*> **Shatter** literally implies a breaking into many pieces, but unlike *burst*, which emphasizes the cause, it stresses the effect, a scattering of the pieces far and wide, and a total destruction of the thing involved <the flying debris *shattered* the window> <*shatter* a rock by an explosion of dynamite> <a bolt of lightning *shattered* the oak tree> Consequently, especially as applied to intangible things, *shatter* consistently implies a far more devastating and destructive effect than *break*; thus, "his health was *broken* by the experience" means that it was seriously impaired, but "his health was *shattered* by the experience" means that it was impaired beyond the point of complete recovery <the *shattering* of his illusions> <the pathetic gropings after the fragments of a *shattered* faith—*Day Lewis*> <the Great War shook civilization to its base; . . . another conflict on the same scale would *shatter* it—*Inge*> <the legend of Rome's invincibility had been *shattered*—*Buchan*> **Shiver**, a chiefly rhetorical term, implies a shattering by dashing, smashing, or any usually external force and a wide scattering of fragments or splinters; in extended use it ordinarily preserves a context approaching the literal and so has never acquired a detached secondary sense <the knight's lance *shivered* against his opponent's shield> <as he crossed the hall, his statue fell, and *shivered* on the stones—*Froude*> <the upshot of which, was, to smash this witness like a crockery vessel, and *shiver* his part of the case to useless lumber—*Dickens*>

Ana disintegrate, crumble (see DECAY): *detach, disen-

gage: demolish, *destroy

Ant cleave (*together*): keep (*of laws*) —**Con** cohere, cling, *stick: unite, *join, combine: observe (see KEEP)

break *n* 1 **Break, gap, interruption, interval, interim, hiatus, lacuna** all denote a lapse in continuity. **Break** applies not only to a lapse in continuity in something material or substantial <a *break* in geological strata> <a *break* in the clouds> <he tried to find a *break* in the fence> but also in things (as a course of action or something having extension in time) that may be considered in reference to their continuity <he ran the long race without a *break*> <the book was written with no *breaks* except for eating and for sleeping> <a holiday makes a pleasant *break* in routine> <there was no *break* in the long, cold winter> <yet he felt that he was going away forever, and was making the final *break* with everything that had been dear to him—*Cather*> **Gap** basically applies to an opening (as in a wall or fence) made either by natural decay or by deliberate effort as a means of ingress or egress; the term may also include an opening (as a gorge between mountains) that serves as a passage inward or outward <the Delaware Water *Gap*> or that seems like a chasm or void, in representing either a break in continuity or in leaving an unfilled or unfillable space <here's our chief guest. If he had been forgotten, it had been as a *gap* in our great feast—*Shak.*> <so that the jest is clearly to be seen, not in the words—but in the *gap* between—*Cowper*> <a fatal *gap* in our security structure—*Truman*> <one would like to cling to the old-fashioned theory that there is a *gap* between accusation and proof—*Schlesinger* b. 1917> **Interruption** implies a break that not only makes for a lapse in continuity but that disturbs the procedure (as of an action, a work, or a discourse) and causes a temporary stop or that, less often, makes a void or gap in space or order <the growing infirmities of age manifest themselves in nothing more strongly, than in an inveterate dislike of *interruption*—*Lamb*> <those who hope to render themselves . . . oblivious to the harsh *interruptions* of reality—*Day Lewis*> <the mountain range continues without *interruption* until it meets the sea> **Interval** refers to the distance (as in time or in space) that exists between two things that are basically alike; the term often serves simply as a basis for measuring or suggesting this distance <at present, perhaps, it was as well to be asunder. She was in need of a little *interval* for recollection—*Austen*> <how soft the music of those village bells falling at *intervals* upon the ear in cadence sweet—*Cowper*> <there stretches on either side of the rivers . . . a region of hills and lakes and swamps among which the farms are only upland *intervals*—*Canby*> **Interim** applies to the interval between two events (as the death or abdication of a sovereign and the accession of his successor or the discarding of one method and the instituting of another) <many contended that the child born to Lucrezia in the *interim* between her divorce from Pesaro and her marriage to Bisceglie was sired by Cesare—*Beuf*> <in a healthy mind there is an *interim* between one duty and another—*Crothers*> **Hiatus** applies mainly to an interruption or lapse in time or continuity, and so implies that something important or essential is missing <Charles II had been restored to his kingdom . . . after an enforced *hiatus* of twelve years—*Abernethy*> <we are likely to be disconcerted by . . . *hiatuses* of thought, when certain links in the association of ideas are dropped down into the unconscious mind—*Edmund Wilson*> <"The war," they said, "has caused a *hiatus*, and thought has broken with tradition"—*Rose Macaulay*> **Lacuna** may stress the vacuity of a gap or void <fills a *lacuna* in our knowledge as to the whereabouts of many manuscripts—*Gohdes*> <one of the rare *lacunae* in this map—*Lebon*> and is often

used specifically of a blank in a text (as of a manuscript or inscription) where a few words have been omitted or effaced <translated the whole work anew, and succeeded in filling many *lacunae* in the text—*Mezger*> In anatomical use the term more often stresses the minuteness than the vacuity of a gap (as a pit or chamber) <cartilage cells are isolated in scattered *lacunae*>

Ana division, separation, severance (see corresponding verbs at SEPARATE); falling, sinking, dropping (see FALL); respite, lull, intermission, recess, *pause

2 *breach, split, schism, rent, rupture, rift

Ana, Con see those at BREACH 2

3 chance, *opportunity, occasion, time

break down *analyze, resolve, dissect

Con concatenate, articulate, *integrate

breakdown *n* analysis, resolution, dissection (see under ANALYZE)

breastwork *bulwark, bastion, parapet, rampart

breed *vb* *generate, engender, propagate, reproduce, procreate, beget, sire, get

breed *n* *variety, subspecies, race, cultivar, strain, clone, stock

breeding cultivation, *culture, refinement

Ana *tact, address, poise, savoir faire: *courtesy, amenity, gallantry: grace, dignity, *elegance

Ant vulgarity —**Con** boorishness, churlishness (see corresponding adjectives under BOOR); grossness, coarseness (see corresponding adjectives at COARSE); rudeness, discourteousness or discourtesy, ungraciousness (see corresponding adjectives at RUDE)

breeze *wind, gale, hurricane, zephyr

bridle *vb* 1 check, curb, *restrain, inhibit

Ana repress, *suppress: *govern, rule: control, direct, manage (see CONDUCT)

Ant vent —**Con** *express, utter, air, voice, ventilate

2 bristle, *strut, swagger

Ana plume, preen, pique, *pride

Con grovel, *wallow: cringe, cower (see FAWN); wince, flinch (see RECOIL)

brief *adj* **Brief, short** are the most comprehensive adjectives in English meaning not long. **Brief** refers primarily to duration; **short**, to either duration or linear extent <a *brief* interview> <a *short* sermon> <a *short* distance> <*short* legs> As applied to duration, *brief* and *short* are sometimes complete synonyms <a *brief* struggle> <a *short* battle> But *short* frequently suggests incompleteness, curtailment, or sudden stoppage, and *brief* sometimes implies condensation <he cut his speech *short*> <he made his speech as *brief* as possible> As applied to linear extent, *brief* is facetious and means extremely short <a *brief* skirt>

Ana *transient, fleeting, passing, momentary, short-lived: *concise, terse, succinct, laconic, pithy: compacted or compact, concentrated (see corresponding verbs at COMPACT): shortened, abbreviated, abridged, curtailed (see SHORTEN)

Ant prolonged, protracted —**Con** lengthened or lengthy, extended or extensive, elongated (see corresponding verbs at EXTEND)

brief *n* abstract, epitome, *abridgment, synopsis, prospectus

bright *adj* 1 **Bright, brilliant, radiant, luminous, lustrous, effulgent, refulgent, beaming, lambent, lucent, incandescent** are comparable when they mean actually or seemingly shining or glowing with light. **Bright** implies an opposition to *dim* or *dull*; it applies chiefly to things that vary in the degree in which they shed light or are pervaded by light, according to circumstances; thus, when used in reference to a fire or burning material (as coals), it sug-

gests a good draft and flames; when used in reference to a day, it implies lack of clouds, fog, smoke, or other obstacles to the passage of sunlight <a *bright* sky> <a *bright* star> <a *bright* sword> <*bright* eyes> <a *bright* color> **Brilliant** (see also INTELLIGENT) implies conspicuous or intense brightness; it also often connotes scintillating or flashing light <a well-cut diamond is the most *brilliant* of gems> <the sun is too *brilliant* for the human eye> <a *brilliant* smile> <Madame Olenska's face grew *brilliant* with pleasure—*Wharton*> <what one saw when one looked about was that *brilliant* blue world of stinging air and moving cloud—*Cather*> **Radiant**, in contrast with *bright* and *brilliant*, stresses the emission or seeming emission of rays of light; it suggests, therefore, a property or power possessed by a thing rather than a quality ascribed to it because of its effect on the vision; thus, a celestial body is properly described as *radiant* only when it emits rays of light; a planet, no matter how bright it appears to the eye, is preferably described as *bright* or *brilliant* because it shines by reflected light <Virtue could see to do what Virtue would by her own *radiant* light, though sun and moon were in the flat sea sunk—*Milton*> The term, however, is sometimes used of anything that seems to give out light in the manner of the sun or a star <in warlike armor drest, golden, all *radiant*!—*Shelley*> **Luminous**, like *radiant*, suggests emission of light, but, unlike it, implies the sending forth of steady suffused glowing light; it is applicable to anything that shines by reflected light or that glows in the dark because of some special quality (as of physical state or chemical activity); thus, all celestial bodies are *luminous*, but only self-*luminous* bodies (stars in the strict astronomical sense) are also *radiant* <phosphorus is a *luminous* substance> As applied to color or to colored things the term implies more than *bright*, for it usually suggests a jewel-like quality <the *luminous* green of the emerald> or iridescence <the blue off Nantucket is not the miracle of *luminous*, translucent color off Sardinia—*Lowe*> As applied to ideas or their expression, the term implies crystalline clearness and the absence of all obscurity <a *luminous* treatment of a subject> <a *luminous* statement—*Brougham*> **Lustrous** is applied only to an object whose surface reflects light; it therefore seldom implies pervading light but, rather, a brilliant or iridescent sheen or gloss <the *lustrous* brass of a burnished lamp> <a *lustrous* enameled surface> <*lustrous* satin> **Effulgent** and **refulgent** indicate resplendent or gleaming brilliance, and the latter implies further that the brilliance is reflected, sometimes from an unseen source <*effulgent* loveliness> <a chandelier of *refulgent* crystal> <in arms they stood of golden panoply, *refulgent* host—*Milton*> **Beaming** literally implies emission of a beam (see *beam* under RAY) <rising moon, fair *beaming*, and streaming her silver light the boughs amang—*Burns*> In its commonest use (as applied to looks or expression) *beaming* suggests a display of happiness, satisfaction, or benevolence <the *beaming* eyes of children greeting Santa Claus> <broad *beaming* smile—*George Eliot*> **Lambent** is applied to a thing (as a flame or a luminous body) which throws a play of light over an object or surface without rendering it brilliant or lustrous <the *lambent* flame of genius . . . lights up the universe—*Hazlitt*> <*lambent* lightning-fire—*Shelley*> Often *lambent* suggests the emission of soft gleams of light <kind, quiet, nearsighted eyes, which his round spectacles magnified into *lambent* moons—*Deland*> **Lucent** is a highly poetical or literary adjective that approaches *luminous* or, less often, *lustrous* in its meaning; it is usually applied to something transfigured by light (as from the sun or a fire) <the *lucent* fume of

the city's smoke rising up—*Mackenzie*) <till every particle glowed . . . and slowly seemed to turn to lucent amber—*Gibson*) **Incandescent** suggests intense glowing brightness of or as if of an intensely heated body <pots *incandescent* in the kiln> <an *incandescent* lamp> <set thoughts aglowing in *incandescent* language—*Iglesias*) **Ana** illuminated, illumined, lighted, lightened, enlightened (see ILLUMINATE): flashing, gleaming, glistening, sparkling (see FLASH *vb*): glowing, flaming (see BLAZE *vb*)

Ant dull: dim —**Con** dusky, murky, gloomy, *dark, obscure: *colorless, uncolored: *pale, pallid, ashen, livid
2 smart, quick-witted, brilliant, clever, *intelligent, knowing, alert

Ana *sharp, keen, acute: *quick, ready, prompt, apt: precocious, advanced (see PREMATURE)

Ant dense, dull —**Con** *stupid, slow, crass, dumb: *lethargic, sluggish: phlegmatic, stolid, *impassive

brilliant 1 radiant, luminous, *bright, effulgent, lustrous, refulgent, beaming, lambent, lucent, incandescent

Ana flashing, scintillating, sparkling, gleaming, glittering, coruscating (see FLASH *vb*): blazing flaming, flaring, glowing (see BLAZE *vb*)

Ant subdued (*of light, color*) —**Con** gloomy, murky, obscure, dim, dusky (see DARK)

2 *intelligent, clever, bright, smart, alert, quick-witted, knowing

Ana erudite, *learned, scholarly: sage, sapient, *wise

Ant crass —**Con** *stupid, slow, dull, dense, dumb

brim rim, edge, brink, *border, verge, margin

bring, take, fetch are comparable but not interchangeable when used in the sense of to convey from one place to another. **Bring** implies carrying, leading, or transporting from a distance to the point where the speaker or agent is or will be; **take**, a carrying, leading, or conducting to a point away from the one where the speaker or agent is or will be; thus, a mother asks her boy setting out for school to *take* a note to the teacher and to *bring* home a reply; a farmer *takes* his cattle to the market and *brings* back a supply of sugar, flour, and fresh meat. **Fetch** implies going to a place where something is to be found, getting it, and bringing it back to the starting point <please *fetch* me a chair from the next room> <I shall *fetch* whatever you need> <he called to her, and said, *Fetch* me, I pray thee, a little water in a vessel, that I may drink. And as she was going to *fetch* it, he called to her, and said, *Bring* me, I pray thee, a morsel of bread in thine hand—*I Kings* 17:10-11>

Ana bear, *carry, convey: obtain, procure, *get
Ant withdraw, remove

brink verge, edge, *border, rim, margin

Ana *limit, bound, end, confine: *shore, strand, coast

brisk nimble, *agile, spry

Ana *fast, quick, rapid, fleet, swift, speedy: ready, prompt, *quick: dynamic, live, *active

Ant sluggish —**Con** *lethargic, torpid, comatose: *lazy, indolent, slothful, faintant: *inactive, inert, idle

bristle *vb* bridle, *strut, swagger

Ana preen, plume *pride, pique: evince, manifest, *show, evidence: flaunt, parade, display, exhibit (see SHOW)

Con conceal, *hide, bury

brittle crisp, *fragile, fragile, short, friable

Ana *hardened, indurated

Ant supple —**Con** *elastic, resilient, springy, flexible: tough, tenacious, *strong, stout

broach *vb* voice, utter, *express, vent, air, ventilate

Ana *reveal, disclose, divulge: *introduce, interject, interpose

broad *adj* **Broad, wide, deep** are comparable chiefly when

they refer to horizontal extent. **Broad** and **wide** apply to surfaces or areas as measured from side to side <a picture two feet *wide*> and **deep** (see also DEEP) to those as measured from front to back <a closet that was narrow but *deep*> **Broad** and **wide** always and **deep** in some instances may be used of surfaces that spread away from one; thus, a river may be *wide* or *broad* (but not *deep*, which would here refer only to vertical distance) at a given point, but a flower border may be four feet *wide*, *broad*, or, if the far side is not ordinarily accessible, *deep*. When a plot of ground or similar area is measured, *broad* or, especially, *wide* is used of the distance from one side to the other and *deep* of that from front line to back line <the lot is 70 feet *wide* and 100 feet *deep*> **Broad** and **wide** are frequently interchangeable when used descriptively to mean having relatively great extent across or from side to side <a *broad* or *wide* street, ribbon, margin> But **broad** commonly applies only to surfaces or areas as such <a *broad* leaf> <a *broad-headed* tack> <*broad-shouldered*> **Wide** applies also to apertures or to something that opens or spreads. **Wide**, therefore, is the preferred term when the emphasis is upon the distance between limits rather than on the extent of the intervening surface <a *wide* gash in his arm> <a *wide* opening> <a *wide* view> <the doorway is four feet *wide*> **Deep** in similar descriptive use, when it carries an implication only of horizontal extent, is applicable only to something that has great extent backward (as from an opening or from the front) <a *deep* forest> <a *deep* cavern> <a *deep* lot>

Ana extended or extensive (see corresponding verb at EXTEND): *spacious, capacious, commodious, ample: vast, immense (see HUGE): expanded, dilated (see EXPAND)

Ant narrow —**Con** confined, circumscribed, limited, restricted (see LIMIT *vb*)

broadcast *vb* 1 *strew, straw, scatter, sow

Ana *spread, circulate, disseminate, propagate

2 promulgate, publish, advertise, announce, *declare, proclaim

broadcasting promulgation, publication, advertisement, announcement, declaration, proclamation (see under DECLARE)

Broddingnagian *huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic

Ant lilliputian

broil *n* fracas, melee, row, *brawl, rumpus, scrap

Ana fray, affray, fight, conflict, combat, *contest: altercation, wrangle, *quarrel: contention, strife, dissension, conflict (see DISCORD)

bromide cliché, platitude, truism, *commonplace

brook *vb* stand, abide, *bear, tolerate, suffer, endure

brovbeat bulldoze, bully, *intimidate, cow

Ana terrorize, terrify, *frighten, scare

Con *coax, cajole, wheedle, blandish

bruise *vb* *crush, mash, smash, squash, macerate

Ana batter, mangle, *maim: *press, squeeze

bruise *n* *wound, contusion, trauma, traumatism, lesion

brush *vb* **Brush, graze, glance, shave, skim** are comparable when they mean to touch lightly in passing. **Brush** implies a movement like the flick of a brush upon a surface: sometimes it suggests no more than an almost impalpable touching, but sometimes it suggests a light touching or rubbing that disperses something that it touches <ye tinsel Insects! whom a court maintains . . . The Muse's wing shall *brush* you all away—*Pope*> <fair dewy roses *brush* against our faces—*Keats*> <trees, filled with birds, *brushed* the roof—*Pollet*> <their eyes met and *brushed*

like birds' wings—*F. S. Fitzgerald*) **Graze** implies the swift passage of a bullet or any rapidly moving object so that it touches a person or thing abrading the surface or, in the case of a person, the skin <whose solid virtue the shot of accident nor dart of chance could neither graze nor pierce—*Shak.*> <the bullet grazed the young lady's temple—*Scott*> <the missile grazed the spot where the shrike sat, and cut the ends of his wings—*Burroughs*> **Glance** (see also **FLASH**) basically implies a blow (as from a sword, a spear, or an ax) that owing to the hardness or resistance of what is struck turns aside or slips and so fails of its full effect; hence *glance* in its participial form *glancing* is often used to describe such a blow either in its course or effect (he struck a *glancing* blow) <the blow *glanced* off his shoulder without even jarring him> <the blade *glanced*, I did but shear a feather—*Tennyson*> **Shave** implies a touching as lightly and closely as a razor that passes over the face; although it comes near to *graze*, it carries no implication of abrasion but rather in some contexts suggests a dangerous approach or a narrow escape <now *shaves* with level wing the deep, then soars up to the fiery concave—*Milton*> <three hansom *shaved* him by an inch—*Barrie*> **Skim** (see also **FLY**) also implies a light touch in passing <kingfishers . . . darted across the water, their wings just *skimming* the surface—*Walden*> but it never suggests the action of anything (as a bullet, a razor, or a weapon) that is even slightly dangerous; rather it suggests an avoidance of depths by someone or something that touches upon the surface or dips only into shallows <*skim* a book in reading> <am pleased to *skim* along the surfaces of things—*Wordsworth*>

Ana touch, contact (see corresponding nouns at **CONTACT**): *scatter, disperse, dispel: *slide, slip, glide

brush *n* skirmish, *encounter

Ana *contest, conflict, combat, fight, fray; engagement, action, *battle: *attack, assault, onset, onslaught

brusque curt, blunt, gruff, *bluff, crusty

Ana ungracious, *rude, impolite, uncivil, discourteous: *rough, harsh

Ant unctuous: bland —*Con* *suave, urbane, smooth: *gracious, cordial, affable, genial: courteous, gallant, polite, *civil

brutal, **brute**, **brutish**, **bestial**, **bestly**, **feral** are not close synonyms, though all suggest a likeness to or the nature of a lower animal and all, especially as applied to persons, tend to express strong derogation. **Brutal** is almost exclusively applied to men or their acts, characters, or words; it implies qualities (as sensuality, lack of intelligence or feeling, or inhumanity) that relate them to the lower animals <a *brutal* beating> <a senseless and *brutal* war> <the consistently *brutal* ways of the English-speaking peoples in dealing with native populations—*Mumford*> **Brute** is sometimes employed in distinguishing an animal from a man <a *brute* creature> <*brute* beings> <why am I shut out like a *brute* beast?—*Shaw*> but more often it applies to something inanimate that can be likened to the lower animals (as in its soullessness, its irrationality, its blindness, its immobility, or its inflexibility) <*brute* matter> <*brute* force> <as we proceed in an inquiry we adjust our laws to the *brute* facts—*Alexander*> <words are . . . the careless, unfeeling *brute* mass that will not respond—*Montague*> **Brutish**, like *brutal*, is usually applied to men or their acts, their minds, and their passions; it differs from *brutal* in that it rarely suggests cruelty and inhumanity but stresses likeness to an animal in stupidity, in lack of control over appetites, or in government by instinct <how *brutish* is it not to understand—*Spenser*> <the English mistrust of the intellectual, the *brutish* aesthetic apathy and contempt for the creative artist

must go—*Connolly*> <whoso loveth instruction loveth knowledge: but he that hateth reproof is *brutish*—*Prov* 12:1> **Bestial** likewise applies to men and their acts, their minds, and their manners, but it usually stresses neither inhumanity nor a low-grade mind but a depravity or state of degradation unworthy of man and fit only for beasts and is therefore usually a term of severe reprobation <*bestial* habits> <living in *bestial* filth> <inclined to describe any sexual indulgence of which he does not approve as *bestial*—*Krutch*> **Bestly** may come close to *bestial* in its suggestion of utter depravity or abominable character <*bestly* cruelty> but more often it is weakened and implies no more than disapprobation of something unpleasant or distasteful to a greater or less degree <a *bestly* stench pervaded the house> <a *bestly* day> <*bestly* weather> **Feral**, when applied to men, suggests savagery or ferocity <the *feral* instincts of men> <her wrath, savage and *feral*, utterly possessed her. She was like a wild animal, cornered and conscious of defeat—*S. S. Van Dine*>

Ana sensual, animal, fleshly, *carnal: *coarse, gross, vulgar: *stupid, dull, dense, crass: barbarous, savage (see **BARBARIAN**)

Con humane, humanitarian (see **CHARITABLE**): gentle, mild (see **SOFT**): chivalrous, courteous (see **CIVIL**)

brute *adj* *brutal, brutish, bestial, bestly, feral

Ana inanimate, lifeless, *dead: inert, supine, *inactive: impotent, *powerless

brutish *brutal, brute, bestial, bestly, feral

Ana dull, dense, crass, *stupid: sluggish, comatose, *lethargic: stolid, *impassive, apathetic

Con *intelligent, alert, quick-witted: responsive, sensitive, impressionable (see **SENTIENT**)

buccaneer *pirate, freebooter, privateer, corsair

buck *n* dude, *fop, dandy, beau, coxcomb, exquisite

buckle *vb* *flex, crook, bow

Ana *break, crack, snap, burst: bend, twist, *curve

bucolic pastoral, *rural, rustic

Ana boorish, loutish, clownish, churlish (see under **BOOR**): *natural, simple, naïve, ingenuous

Ant urbane

buffet *vb* baste, pummel, *beat, pound, belabor, thrash

Ana *strike, smite, hit, slap, slug: batter (see **MAIM**)

bugbear bête noire, *abomination, anathema

build *vb* **Build**, **construct**, **erect**, **frame**, **raise**, **rear** are comparable when they mean to form or fashion a structure or something comparable to a structure. **Build** strictly implies a fitting together of parts and materials to form something which may be large (as a house, a factory, a church, or a bridge) or small (as a bird's nest, a fence, or a child's toy) but of which the forming must involve some measure or degree of complication in the bringing together of parts and materials <*build* a cathedral> <*build* a shack> <the robins *built* their nest in the fork of a tree> <*build* a battleship> When used in reference to something immaterial *build* (often followed by *up*) may suggest an analogy between the immaterial thing and an edifice especially by implying an adding of part to part or bit to bit in the attainment of an end <*build up* a man's ego> <*built up* a fortune bit by bit> <*build* a theory on slight evidence> **Construct** comes close to *build* in its implication of the putting together the material given or at hand to form something. But it is not quite equivalent, for it stresses not the labor, especially the manual labor, involved but the problem involved in the fitting together of parts. **Construct** therefore emphasizes the discovering by the mind of how the parts or the materials should be combined in order to gain the desired end. To *build* is the work of men who use their hands or by analogy their brains to bring something into being;

to *construct* is the work of men who use their brains, though sometimes their hands in obedience to their brains, to solve the problem of how a thing should be or is built or made or brought into being; hence *construct* implies composition or design and may take as its object anything brought into material or immaterial existence by one or the other process (<*construct* a plot) (<*construct* a dam) (the mind of the scientist *constructs* its own world—*Inge*) (<each *constructed* and consolidated a realm—*Belloc*) *Construct* is also often used as the opposite of *destroy* without a specific reference to these implications (<it is proverbially easier to destroy than to *construct*—*T. S. Eliot*) (<roughly speaking, we *construct* when we increase the potential energy of the system in which we are interested, and we destroy when we diminish its potential energy—*Russell*) **Erect** basically means to set upright. Although the term may carry this as its essential meaning (<*erect* a flagpole) (<the cobra *erected* itself to strike) it was early applied to high structures and has accordingly come to imply building in its most usual sense. The word is often used in place of *build* without any marked implication of putting together parts and materials (<many huge factories *erected* during the war now stand idle) but it always carries some suggestion of the sense of to set up (as by building or establishing) (<*erect* a statue to his memory) (<*erect* a scaffold) (<a very much denser obstruction is in the process of being *erected* now by literary critics—*Day Lewis*) **Frame** approaches *construct* but in respect to physical structures more specifically applies to the bringing together and joining of parts (as sills, plates, and joists) that define the form of the final structure (<a cottage *framed* of pine and sheathed with cedar) In extended use it throws the stress upon a forming or fashioning to suit a design, an intention, a purpose, or the facts and may be applied to anything so constructed (<*frame* an answer) (<*frame* a hypothesis) (<picture him excuses *framing*—going from her far away—*Gilbert*) (<all those who have *framed* written constitutions contemplate them as forming the fundamental and paramount law of the nation—*John Marshall*) (<it is in order to overcome these obstacles that the notes and questions in this volume have been *framed*—*Notes and Queries on Anthropology*) **Raise** and **rear** (see also LIFT) often replace *build*, especially when the idea of height is emphasized (<now after this he built a wall without the city . . . and *raised* it up a very great height—2 *Chron* 33:14) (<those arts which were destined to *raise* our Gothic cathedrals—*Coulton*) (<this tower; it is my own; though it was *reared* to Beauty—*Millay*)

Ana fabricate, fashion, manufacture (see MAKE): produce, turn out, yield, *bear

Ant unbuild, destroy —**Con** demolish, raze (see DESTROY): *ruin, wreck

build *n* *physique, habit, constitution

Ana *form, figure, shape, conformation, configuration: *structure, framework: contour, *outline: style, *fashion

building *n* **Building, edifice, structure, pile** are comparable when they mean a construction (as of wood, brick, or stone) intended to house a family, a business, or an institution. **Building** is the common and in most cases the adequate term (<a school *building*) (<a new *building* going up) (<the *buildings* of the temple—*Mt* 24:1) **Edifice** usually applies to large and elegant buildings (<should I go to church and see the holy *edifice* of stone . . . ?—*Shak.*) **Structure** retains more frequently than the others the sense of something constructed, often in a particular way (<a tumbledown *structure*) (<a modern steel *structure*) Like *edifice, structure* is often used of buildings of some size or magnificence (<the civic auditorium . . . is the city's most important public *structure*—*Amer. Guide Series*:

Mich.) **Pile** is a somewhat literary term for a very large building or sometimes a cluster of buildings especially of stone; it usually suggests a public or official structure (as a palace, a cathedral, or a government building) (<contrast between the vast *pile* of the cathedral and the pygmy men in the street—*Laski*)

bulge *vb* **Bulge, jut, stick out, protuberate, protrude, project, overhang, beetle** mean to extend outward beyond the usual and normal line. **Bulge** suggests a swelling out in an excessive or abnormal fashion; it may be used when the impression to be given is that there is an imperfection, a defect, or a cause of strain that explains the swelling (<the wall *bulged* in the center) (<above her boots . . . the calves *bulged* suddenly out—*Bennett*) (<good little Fyne's eyes *bulged* with solemn horror—*Conrad*) **Jut** (often with *out*) and **stick out** do not imply abnormality as a rule but construction, formation, or position that permits a thing to extend outside or beyond the flat line of a surface (<rocks *jutting* from the water) (<the nun took Father Latour to a window that *jutted* out and looked up the narrow street—*Cather*) (<one building *stuck out* from the straight line made by the rest) **Protuberate**, which is currently much less used than the corresponding adjective *protuberant* and the corresponding noun *protuberance*, implies a swelling or sticking outward (as in a rounded or angular prominence); it does not differ greatly from *bulge*, but it often carries less implication of something radically wrong (<the point of his elbows markedly *protuberated*) **Protrude** implies a thrusting forth especially in an unexpected place; it applies especially to something that does not seem to belong or that sticks out obviously (<whenever a small tuft of heather . . . *protruded* itself through the grass . . . and entangled her feet—*Hardy*) (<through the leaves . . . a slender dead stem *protruded*, and from a twig at its summit depended a broken spider's web—*Hudson*) (<the great rollers piled up on the sandy beach where great boulders *protruded* here and there—*Heiser*) In literal use **project** is more often intransitive, though in extended uses it is chiefly transitive. Intransitively it may mean to jut out or to protrude (<the eaves usually *project* far beyond the roof in semitropical and tropical climates) (<this great rimrock, which *projected* out over the erosions like a granite shelf—*Cather*) In its transitive use, however, it carries implications of throwing or casting forward both in literal use (<*project* a shadow) (<*project* the colors from a prism upon a wall) and especially in extended use when it refers to thoughts, conceptions, or feelings; thus, one *projects* not only his ideas or thoughts but his powers (as of imagination or comprehension), as if by throwing them out, so that they reach their goal effectively (<one couldn't formulate and express one's ideas and *project* them into that spate of charming, in-consequent talk, that swept on gaily over anything one said—*Rose Macaulay*) (<all the knowledge we possess . . . is of the past, and the further back we can *project* our vision, the more comprehensive, the more thorough, the more efficient is that knowledge—*Grandgent*) Often the idea of extending beyond the usual and normal line gives way to other implications derived especially from psychology, mathematics, and magic, and the word then means simply to externalize or to free oneself from (<*project* one's thoughts) (<she *projected* her own guilt into the other person—*Overstreet*) Both *overhang* and *beetle* imply a jutting out over the support or base; **overhang** sometimes connotes a threatening position, while *beetle* often suggests precariousness or ominousness (<then lend the eye a terrible aspect . . . let the brow o'erwhelm it as fearfully as doth a galled rock o'erhang

and jutting his confounded base—*Shak.*) <an overhanging roof> <beetling brows> <the dreadful summit of the cliff that beetles o'er his base—*Shak.*> <an isolated hill that beethled over the western edge of the ridge—*Cather*>
Ana swell, distend, dilate, *expand

bulge *n* protuberance, *projection, protrusion

Con cavity, hollow, *hole, pocket

bulk *n* **Bulk, mass, volume** mean a body of usually material substance that constitutes a thing or unit. **Bulk** is applied mainly to what is or appears to be inordinately large or heavy <the *bulk* of ancient minster—*Wordsworth*> and often more or less shapeless or unshapely <on the living sea rolls an inanimate *bulk*—*Shelley*> <a blue night set with stars, the *bulk* of the solitary mesas cutting into the firmament—*Cather*> <Dr. Lanskill sank his gouty *bulk* into the armchair behind his desk—*Wharton*> **Mass** is applied mainly to something, whether material or immaterial, that is or gives the appearance of being built up by the piling or gathering together of things of the same kind so that they cohere and have a real or apparent unity <the towering *mass* of the Sierras> <pieces of obsolete science, imprisoned . . . in the solid *mass* of a religious creed—*Inge*> <the *mass* [of people] never comes up to the standard of its best member, but on the contrary degrades itself to a level with the lowest—*Thoreau*> **Volume** usually applies to something that flows and is therefore without outline and often continuous in extent <a tremendous *volume* of water> <a *volume* of gas poured into the room> <it [the voice] rose through progressive gradations of sweetness and power, until its *volume* seemed to envelop her—*Hawthorne*> These three terms also come into comparison when they designate quantity or amount. But *bulk* and *mass* mean the greater part or a large majority of something objective <some must know medicine, but for the *bulk* of mankind it is sufficient to have an elementary knowledge of physiology and hygiene—*Russell*> <the great *mass* of the articles on which impost is paid is foreign luxuries—*Jefferson*> **Volume**, however, may denote either the total amount or quantity especially of something subject to seasonal, periodic, or other fluctuations <the *volume* of travel increases greatly in the vacation season> <enlarge the *volume* of the currency> <the *volume* of business has decreased recently> or a considerable or relatively great amount <profits are made by selling *volume* at market price—*Wall Street Jour.*> <crops will fail unless we soon get rain in *volume*>

Ana *form, figure, shape

bulky *massive, massy, monumental, substantial

Ana *huge, gigantic, colossal, mammoth, elephantine, enormous; corpulent, obese, portly, *fleshy: burly, husky (see MUSCULAR)

Con petite, diminutive, *small, little

bull *n* 1 blunder, howler, boner, mistake, *error, slip, lapse, faux pas

2 *nonsense, twaddle, drivel, bunk, balderdash, poppycock, gobbledygook, trash, rot

bulldoze *vb* bully, browbeat, *intimidate, cow

Ana *threaten, menace: terrorize, terrify, *frighten: *worry, harass, hary

Con cajole, wheedle, blandish, *coax

bulheaded pigheaded, stiff-necked, stubborn, mulish, *obstinate, dogged, pertinacious

bully *vb* bulldoze, browbeat, *intimidate, cow

Ana torment, rack, torture (see AFFLICT): *threaten, menace: terrorize, terrify, *frighten, scare

Ant coax —*Con* wheedle, cajole, blandish (see COAX):

*lure, entice, inveigle, decoy

bulwark *n* **Bulwark, breastwork, rampart, parapet, bastion**

are comparable when they denote a structure above the ground that forms part of a fortification and is specifically intended for purposes of defense. **Bulwark** is the most general and the least technical of these terms. It is or has been applied to various defensive structures (as a wall intended to keep out an enemy, a structure of logs, earth, or stones from behind which defenders can safely attack besiegers or an assaulting force, and a breakwater or sea wall). The term is also extended to a person or a thing regarded as a firm, steadfast, or powerful defense or defender <he stood, the *bulwark* of the Grecian band—*Pope*> <the support of the State governments in all their rights, as the most competent administrations for our domestic concerns, and the surest *bulwarks* against anti-republican tendencies—*Jefferson*> **Breastwork** applies chiefly to a structure of earth, often hastily thrown up and usually only a few feet in height, behind which defenders may crouch or stand so as to fire their guns from a protected position <the mud *breastworks* had long been leveled with the earth—*Irving*> **Rampart** and **parapet** are the common technical terms especially when fortifications of the type that prevailed before World War I are under consideration. In this sense a **rampart** is an embankment round a place often, especially in old castles, built inside a moat and rising high enough to conceal forces lying behind it yet broad enough on its top level to permit the movement of men and of guns when they are needed in action. A **parapet** is a structure rising above the top level of a rampart and serving as a breastwork for those aiming and firing guns and as a bulwark against the missiles of the enemy. But in less technical use **rampart** is applied to a wall or to an elevation or level on which defenders may operate when in action or which may be thought of as suitable for such action, and **parapet** is applied to a structure (as a low wall or a balustrade) resembling a parapet of a fortification <popular No, that was situate among the rivers, that had the waters round about it, whose *rampart* was the sea—*Nah* 3:8> <on a summer's day Wolstanbury Hill is an island in sunshine; you may lie on the grassy *rampart*, high up in the most delicate air—*Jefferies*> <the terrace surrounded with a stone *parapet* in front of the house—*George Eliot*> **Bastion** applies to a projection extending from the main wall of a fortification; typically a bastion is a four-sided projection ending in an acute angle and providing a means whereby the enemy may be covered in several directions and the fortification protected from at least four angles. In extended use **bastion** may differ from **rampart** in carrying a stronger suggestion of attack than of defense <they build each other up . . . as *bastions* set point-blank against God's will—*Cowper*>

Ana stronghold, fortress, *fort, citadel

bum *n* *vagabond, vagrant, tramp, hobo, truant

bumble *vb* *stumble, trip, blunder, lurch, flounder, lumber, galumph, lollop

bump *vb* **Bump, clash, collide, conflict** are comparable when they mean to come or cause to come into violent contact or close or direct opposition. **Bump** is used primarily of physical matters and then implies a forceful knocking or running against, typically with thudding impact <the ferry *bumped* into the mooring post> <he *bumped* his foot on the stove> It may also suggest encountering an obstacle or difficulty <the builder *bumped* up against the problem of shoring up the wall> **Clash** may suggest hitting, knocking, or dashing together or against with sharp force and jangling metallic din <the swords *clashed*> <where ignorant armies *clash* by night—*Arnold*> or sharp, although sometimes short-lived, variance, incompatibility, or opposition <Cavour and

Victor Emmanuel *clashed* sharply, and on these occasions it was usually the King who won—*Times Lit. Sup.*) <when the new demands of our changing economic life *clash* with the old dogmas—*Cohen*> **Collide** denotes a more or less direct running together or against with a definite and often destructive force or shock <the tanker sank after it *collided* with the freighter> or it may indicate a forceful direct disagreement or opposition <an English East India Company was using the Portuguese route around Africa and *colliding* with the Portuguese in India—*Barr*> **Conflict** is archaic in senses involving physical contact and is used to convey the notion of variance, incompatibility, or opposition <*conflicting* testimony by two witnesses> <to stand up amid *conflicting* interests—*Wordsworth*>

Ana hit, *strike, smite: impinge, jolt, jar (see corresponding nouns at IMPACT)

bumpkin hick, yokel, rube, clodhopper, clown, lout, *boor, churl

bunch *n* 1 *group, cluster, parcel, lot

Ana see those at BUNCH 2

2 *bundle, bale, parcel, pack, package, packet

Ana collection, assemblage, gathering (see under GATHER): quantity, number, aggregate (see SUM)

bundle *n* **Bundle, bunch, bale, parcel, pack, package, packet** denote things done up for storage, sale, or carriage. A **bundle** is a collection of articles bound or rolled together <a *bundle* of papers> <a *bundle* for the laundry> <a *bundle* of old clothes> A **bunch** is a collection of things, usually of the same sort, fastened closely together in orderly fashion <a *bunch* of violets> <a *bunch* of radishes> A **bale** is a large bundle of goods bound up for storage or transportation and especially one composed of materials (as rags, hay, straw, cotton, or wool) which are closely pressed together so as to form a mass, usually rectangular, tightly bound with stout cord or wire, and often wrapped in paper or burlap. Because there is in various localities a uniform size for a bale of a certain commodity, the word often also implies an average or approximate weight <a United States *bale* of cotton weighs approximately 500 pounds> **Parcel** (see also PART) implies a state of being wrapped and tied and a small or moderate size, and it carries no suggestion of the number or kind of things so wrapped and tied <a shopping bag for *parcels*> <loaded down with *parcels*> <send *parcels* through the mail> **Pack** implies more careful and more compact arrangement than *bundle*; specifically it denotes a conveniently packed bundle of goods or supplies that is carried on the back (as by a peddler, a soldier on the march, or a mule). A **package** is specifically something packed (as in a box or receptacle of moderate size or in a compact bundle) especially for convenience in sale or transportation <an express *package*> <a *package* of envelopes> <candy in the original *package*> <*package* goods> It may also be applied to a group of intangibles (as contracted services or performances) forming, offered, or dealt with as a unit <sell them a . . . complete *package* (lot, house, equipment and financing in a single transaction)—*Gutheim*> <a series of treaties and agreements forming a single *package*—*Fay*> A **packet** is a small package or parcel <a *packet* of letters or dispatches>

Ana collection, assemblage, gathering (see under GATHER): *bag, sack

bungle *vb* *botch, fumble, muff, cobble

Ana *confuse, muddle, addle, befuddle: confuse, confound, *mistake: *disorder, disarrange, disorganize, derange: *entangle, enmesh

bunk *n* *nonsense, twaddle, drivel, balderdash, poppycock, gobbledygook, trash, rot, bull

buoyant volatile, expansive, resilient, effervescent, *elastic

Ana *spirited, high-spirited, mettlesome, gingery: *lively, vivacious, animated, sprightly: jocund, blithe, *merry: optimistic, *hopeful

Ant depressed, dejected —*Con* doleful, lugubrious, *melancholy: *sullen, morose, glum, dour: *despondent, despairing, hopeless, forlorn

burden *n* *load, cargo, freight, lading

burden *vb* **Burden, encumber, cumber, weigh, weight, load, lade, tax, charge, saddle** are comparable when they mean to lay a heavy load upon or to lie like a heavy load upon a person or thing. **Burden** implies the imposition or the carrying of a load that makes one conscious of its weight and that is therefore regarded as grievous, trying, or oppressive. The term often suggests something that is or seems to be too much to be borne by the mind or spirit <*burdened* with too many responsibilities> <exorbitant taxes that *burden* the workingman> <but this murder—was it to dog him all his life? Was he always to be *burdened* by his past?—*Wilde*> <when the aesthetic sense deviates from its proper ends to *burden* itself with moral intentions . . . it ceases to realize morality—*Ellis*> **Encumber** specifically suggests the presence of something that impedes, obstructs, hampers, or embarrasses. Even when the term connotes too great a weight, it stresses the fact that the weight is an annoyance or a clog to one's progress <he was *encumbered* by mountains of luggage> Consequently it is oftener used of things than of persons <the father had left his inheritance *encumbered*—*Belloc*> <the vast quantity of mere survivals (customs and beliefs) which *encumber* modern life—*Inge*> <awaiting release from the . . . *encumbering* bulk of gross matter—*Montague*> **Cumber** is close to *encumber* but it is less likely to stress motion and more likely to stress what perplexes, worries, discommodes, or inconveniences <he *cumbers* himself never about consequences, about interests: he gives an independent, genuine verdict—*Emerson*> <such an enterprise might well have seemed to him beyond the power of Rome, *cumbered* already with so many duties—*Buchan*> **Weight** suggests a load of something (as sorrow, fears, or anxiety) that lies upon the heart, the spirit, or the mind so that it oppresses or depresses it <canst thou not . . . with some sweet oblivious antidote cleanse the stuffed bosom of that perilous stuff which *weighs* upon the heart—*Shak.*> <mortality *weighs* heavily on me like unwilling sleep—*Keats*> **Weight** differs from *weigh* in suggesting not a load that oppresses or depresses the heart, mind, or spirit but one that serves as a handicap in a struggle or a disadvantage to be met; the term may be so used that the handicap or disadvantage either may be thought of as residing in the person or thing considered or in the person or thing set against it <*weighted* as he was with faults . . . he fought his battle bravely—*Froude*> <it wants to have a House of Commons which is not *weighted* with nominees of the landed class—*George Eliot*> **Load** and **lade** carry an implication of overloading but may imply an overabundance that is agreeable as well as one that entails a burden or impresses one as a superfluity <a store *loaded* with merchandise of every sort> <*load* human life with frustration and grief—*Cort*> <*load* one with reproaches> <the butler entered with a *laden* tea tray—*Wilde*> <come unto me, all ye that labor and are heavy *laden*, and I will give you rest—*Mt* 11:28> **Tax** in its relevant sense means to place an exacting burden or demand upon; it suggests something that strains one to the uttermost <it may *tax* the highest wisdom of the race to preserve civilization at all—*F. N. Robinson*> <the war severely *taxed* the resources of the country> **Charge** basically means to load a thing up to its

capacity to receive <charge a battery> To this sense have been added new connotations especially of loading beyond a capacity to receive or to contain so that the word now often implies a burdening, an overloading, or a weighing down <the youth was too *charged* with emotion to speak—*Meredith*> <songs . . . must not be too *charged* with meaning . . . or they will fail of their effect—*Binyon*> <all the . . . elemental processes of nature, all the changing, yet abiding physiognomy of earth and sky, were *charged* for psalmist and prophet with spiritual significance—*Loves*> **Saddle** usually implies the imposition of a burden or encumbrance, ordinarily by another, though sometimes as a result of one's own fault <he is *saddled* with cares because of a hasty marriage> <by what mismanagement . . . had a project like this been *saddled* with Lord Cromfrey as chairman?—*Jan Struther*> <*saddling* the nation with restrictive laws—*New Republic*>

Ana oppress, *depress, weigh: *crush, mash

Con lighten, alleviate, mitigate, *relieve: *moderate, temper

burden *n* *substance, purport, gist, core, pith

Ana *subject, matter, subject matter, theme, text, topic

burdensome oppressive, *onerous, exacting

Ana *heavy, ponderous, cumbersome, cumbrous, weighty: *irksome, wearisome: fatiguing, exhausting, fagging, tiring (see **TIRE**): arduous: *hard, difficult

Ant light —**Con** *easy, facile, simple, smooth, effortless

burglar thief, robber (see under **THEFT**)

Ana stealer, pilferer, filcher, purloiner (see corresponding verbs at **STEAL**): plunderer, looter, rifler (see corresponding verbs at **ROB**)

burglarize *rob, plunder, rifle, loot

Ana *steal, pilfer, filch, purloin, lift, pinch, snitch, cop, swipe: sack, pillage, *ravage, despoil

burglary *theft, larceny, robbery

burlesque *n* *caricature, parody, travesty

Ana mimicry, mockery, imitation (see corresponding verbs at **COPY**): *fun, jest, sport, game: satire, sarcasm, humor, *wit: derision, ridicule (see corresponding verbs at **RIDICULE**)

burlesque *vb* caricature, parody, travesty (see under **CARICATURE** *n*)

Ana mimic, ape, mock, imitate, *copy: *ridicule, deride

burly husky, *muscular, brawny, athletic, sinewy

Ana corpulent, *fleshy, portly: bulky, substantial, *massive: *vigorous, lusty: *powerful, forceful, potent

Ant lanky, lank —**Con** *lean, spare, gaunt, rawboned, angular, scrawny, skinny

burn *vb* **Burn**, **scorch**, **char**, **sear**, **singe** mean to injure by exposure to fire or intense heat. **Burn** is the most comprehensive of these terms, for it is applicable regardless of the extent of injury or of whether fire or heat is the destructive agency <the cake was *burned* to a crisp in the oven> <only the lower edge of his coat was *burned* by the flames> <the grass was badly *burned* by the sun> <the child *burned* his hand by touching the hot stove> **Burn** is also applicable when a similar injury or effect is produced by another agency <*burn* plants by using too strong a fertilizer> <a sharp wind *burns* the face> **Scorch** implies superficial burning that changes the color (especially to brown or black) or texture of something <*scorch* a dress in ironing it> <the paint of the house was badly *scorched* by the flames from the grass fire> **Char** usually implies total or partial reduction to carbon or charcoal by fire <*charred* wood> <*char* coffee beans in roasting them> <the lower parts of the rafters were *charred* in the fire> **Sear** applies basically to the burning or scorching of animal tissues by fire or intense heat (as in cauterizing a wound, branding an animal, or quickly browning the out-

side of meats so that they will retain their juices in later and slower cooking) <*seared* the damaged tissue with an electric needle> <many cooks still *sear* beef before roasting it> **Singe** implies a very superficial burning <the fire next door merely *singed* our house> Sometimes such burning is intentional, especially when the short hairs or bristles covering a carcass being prepared for market or for cooking are quickly destroyed by a flame <*singe* a chicken before broiling it>

Ana kindle, fire, ignite, *light: *blaze, flame, glow

burst *belch, vomit, disgorge, regurgitate, spew, throw up

burst *vb* *break, crack, bust, snap, shatter, shiver

Ana distend, swell, *expand: *push, shove, thrust, propel

bury secrete, cache, *hide, conceal, screen, ensconce

Con expose, display, parade, flaunt, exhibit, *show:

unearth, *discover, ascertain, learn, determine

business *n* 1 *work, occupation, pursuit, calling, employment

Ana *trade, craft, handicraft, art, profession

2 *affair, concern, matter, thing

Ana *function, office, duty, province: *task, job, assignment, chore, stint

3 **Business**, **commerce**, **trade**, **industry**, **traffic** are comparable chiefly when they denote one of the forms or branches of human endeavor which have for their objective the supplying of commodities. **Business** specifically applies to the combined activities of all those who are engaged in the barter, purchase, or sale of commodities of any sort either as wholesale or retail transactions or in financial transactions connected with such activities; in this sense *business* is thought of as the combined activities of all kinds of dealers (as merchants) and financiers (as bankers) as opposed to those of all kinds of producers (as manufacturers and farmers). The term is also used more broadly to include the activities of producers and transporters of goods as well as of merchants and bankers, since all these have for their ultimate aims the supplying of commodities and the increase of private wealth (there should be no conflict between government and *business*) <*business* is greatly depressed throughout the world> **Commerce** and **trade**, on the other hand, apply to the activities of those who are engaged in the exchange of commodities, especially such exchange as involves transactions on a large scale and the transportation of goods from place to place. The words are often used interchangeably; thus, in the United States the Interstate **Commerce** Commission regulates common carriers of all kinds (rail, water, motor) engaged in interstate transportation of passengers or goods; the Federal **Trade** Commission was created to prevent use of unfair methods of competition in interstate *commerce* and to investigate *trade* conditions in and with foreign countries. But in general *commerce* is preferred when different countries or states are involved, when transportation is across seas or by sea, and when the dealings are not only in merchandise but also in media of exchange (as money, bills of exchange, and notes) and *trade*, when different business organizations in the same country are involved or when the dealings are in merchandise <laws regulating interstate *commerce*> <ships engaged in *commerce* with the West Indies> <a slump in the sale of automobiles has adversely affected the *trade* between the manufacturers and the steel companies> <free *trade* designates a policy of permitting entry of natural and manufactured products from foreign countries without duties or tariff restrictions> **Industry** applies chiefly to the activities of those who are engaged in production, especially in the processing of natural products, the manufacture of artificial products, the erection of buildings and other structures, on so large a scale that problems of capi-

tal and labor are involved. The term may be used generally to include all activities covered by this definition (automation is rapidly revolutionizing *industry*) It may also be used more narrowly of any branch of industry as determined by the thing produced (the sugar *industry* comprises all business organizations engaged in the processing and refining of sugar) (the steel *industry*) (the automobile *industry*) **Traffic** (see also INTERCOURSE) applies to the activities of those who are engaged in the operation of public carriers (as ships, railroads, bus lines, and systems of trucking) and who are therefore primarily responsible for the transportation not only of commodities and articles of manufacture but also of persons from one part of a country or of the world to another (the *traffic* interests were also represented at the conference)

bust *vb* *break, crack, burst, snap, shatter, shiver

Ana see those at BURST

bustle *n* flurry, *stir, ado, fuss, pother

Ana *business, commerce, trade, industry, traffic: movement, *motion: hubbub, clamor, racket, babel, *din

Con inactivity, idleness, inertness, passiveness, supineness (see corresponding adjectives at INACTIVE)

busy, **industrious**, **diligent**, **assiduous**, **sedulous** mean actively engaged or occupied in work or in accomplishing a purpose or intention. **Busy** may imply nothing more than that the person or thing referred to is not idle, that is, that he is at work or that it is in use (the doctor is *busy* just now) (the telephone is *busy*) In attributive use and some predicative use *busy* usually implies habitual or temporary engrossment in activity or the appearance of such engrossment (the *busy* bee) (a *busy* life) (nowhere so *busy* a man as he there was, and yet he seemed *busier* than he was—*Chaucer*) (busy offices full of bustling clerks—*Nevins & Commager*) **Industrious** applies to one who is characteristically attentive to his business, work, or avocation; it implies habitual or continual earnest application (a willing, *industrious* boy ever striving to please) (at once the most *industrious* and the least industrial of the great nations—*Brownell*) **Diligent** may stress care, constancy, attentiveness, and thoroughness, but it often implies application of these to some specific object or pursuit; thus, one may be *diligent* in seeking some favorite end without being in general *industrious* (the Yankee's boots were missing, and after a *diligent* search were not to be found—*Melville*) (a *diligent* student of the scriptures) **Assiduous** implies studied and unremitting, and **sedulous**, painstaking and persevering application to a business or enterprise (acquire the power to speak French fluently by *assiduous* practice) (an *assiduous* nurse) (a *sedulous* but not brilliant student) (attempted to gain his end by *sedulous* flattery) (even the most *assiduous* critic can scarcely hope to keep abreast of the growing flood of translated books—*Times Lit. Sup.*) (I read with *sedulous* accuracy . . . the metrical romances—*Coleridge*) (she would never fail in *sedulous* attention to his wants—*M. E. Freeman*)

Ana engrossed, absorbed, *intent: working, toiling, laboring, traving (see corresponding nouns at WORK)

Ant idle; unoccupied —*Con* *inactive, inert, passive: indolent, slothful, *lazy: slack, relaxed (see LOOSE)

butchery slaughter, *massacre, carnage, pogrom

Ana murdering or murder, slaying, killing (see corresponding verbs at KILL)

butt in *vb* *intrude, obtrude, interlope

Ana interfere, *meddle, intermeddle: *interpose, intervene, interfere, mediate, intercede

Con withdraw, retire (see GO): *refrain, abstain, forbear

butress *n* **Butress**, **pier**, **abutment** are architectural terms for auxiliary structures designed to serve as a prop, shore, or support for a wall (as of a building). A **butress** is a structure (as of masonry) projecting from and supporting a wall and often designed especially for receiving and carrying the outward pressure or thrust exerted on the wall by the weight of an arch or vault. In a *flying butress* the pressure or thrust is carried over an open space. A **pier** is a thickened piece of masonry designed to stiffen a wall. A pier may be built as a part of the wall or it may be a detached mass used as the vertical part of a flying butress and carrying the thrust of a masonry bar or rod extending between it and the wall. An **abutment** is the particular section of either a butress or a pier which actually receives the pressure or thrust exerted by the weight of an arch or vault.

In bridge building an **abutment** is the support at either extreme end of the structure or, by extension, the anchorage of the cables for a suspension bridge; a **pier** is any intermediate support between the ends of a bridge.

butress *vb* *support, sustain, prop, bolster, brace

Ana uphold, back, champion (see SUPPORT): *strengthen, reinforce, fortify: *defend, protect, shield, guard

buy, **purchase** mean to acquire something for money or an equivalent. **Buy** is at once the more general and the homelier word; consequently, while it may be freely used of any such transaction, it is distinctly the word of choice in respect to small, casual, or day-to-day exchanges of money for goods. **Purchase**, on the other hand, frequently implies a transaction of some dignity or importance and negotiations or other efforts to obtain it. Thus, one *buys* (rather than *purchases*) a dozen eggs, a glass of beer, or a new hat, but one *purchases* (or *buys*) a yacht or a country estate (peace, how oft, how dearly *bought*—*Pope*) (thou hast thought that the gift of God may be *purchased* with money—*Acts* 8:20) Whereas *buy* may almost always be substituted for *purchase* without disadvantage, the use of *purchase* instead of *buy* often weakens the effect or strikes a jarring note.

Ana obtain, acquire, procure, *get: *pay, compensate, remunerate

by, **through**, **with** are comparable as prepositions followed by a word or phrase naming the agent, means, or instrument. **By** is followed commonly by the agent or causative agency (a wall built *by* the Romans) (a novel *by* Scott) (destroyed *by* fire) (devoured *by* wolves) (blessed *by* a priest) (inflamed *by* the jibes of officers) (impressed *by* the evidence) **Through** implies intermediacy; it is followed by the name of the person or thing that serves as the medium or the means by which an end is gained or an effect produced (speak *through* an interpreter) (procure a rare book *through* a friend) (express ideas *through* words) (acquire a position *through* influence) (an opportunity lost *through* indecision) **With**, on the other hand, is often followed by the name of the instrument which accompanies the action (write *with* a pen) (eat *with* a fork) (defend oneself *with* a stick) It may, however, take for its object something not consciously used as an instrument but serving as the instrumentality by which an effect is produced (he amused the crowd *with* his anecdotes) (do not kill us *with* kindness)

bystander onlooker, looker-on, witness, eyewitness, *spectator, observer, beholder

byword *catchword, shibboleth, slogan

Ana proverb, *saying, saw, motto: *abuse, invective: legend, caption (see INSCRIPTION)

C

cabal intrigue, conspiracy, machination, *plot
cabalistic anagogic, mystic, *mystical

Ana occult, esoteric, *recondite, abstruse: cryptic, enigmatic, *obscure: arcane, *mysterious

Con plain, clear, obvious, manifest, *evident, palpable, apparent

cache *vb* secrete, bury, *hide, conceal, ensconce, screen
Con expose, exhibit, display, *show: unearth, *discover

cad, **bounder**, **rotter** mean one who shows himself to be no gentleman. Usually they are somewhat vague terms of contempt for bad behavior or manners. **Cad** is applied especially to a man who violates in some way or another the code of morals or of manners by which he has been brought up and is supposed to be guided (Napoleon III—in whom the *cad*, the coward, the idealist, and the sensualist were inextricably mixed—*Birrell*) (I pretended to gloat over the sight . . . I have rarely in my life felt such a *cad*—*Buchan*) **Bounder** usually applies to a man who apes the gentleman but who in some definite way (as undue stylishness of dress or faulty habits of speech) marks himself as a mere imitation; the term condemns him as ignorant, obtrusive, or vulgar in a measure that puts him beyond the pale of good society (that is an antisocial proceeding, the conduct of a *bounder*—*Archer*) (this breezy, cocksure, self-assertive Englishman was what we today should be inclined to call a *bounder*—*Cyril Robinson*) **Rotter** may be applied to a man who is extremely objectionable especially on moral grounds (a regular *rotter*; that man is about as bad as they make them—*George Moore*) The term is sometimes used of one who is felt as objectionable because of some failure, however great or small, to conform and then may suggest no more than mild disapprobation (there were a few *rotters* among the schoolboys, but fortunately not very many) (he's a bit of a *rotter* but a jolly good fellow for all that)

cadaver corpse, *body, carcass

cadaverous wasted, pinched, *haggard, worn, careworn
Ana gaunt, skinny, scrawny, angular, rawboned, lank, lanky, *lean, spare

Ant plump, stout —*Con* *fleshy, fat, corpulent, obese, portly, rotund

cadence *rhythm, meter

Ana accentuation, accent, stress, *emphasis: beat, pulse, throb, pulsation (see under PULSATE)

cage *vb* *enclose, envelop, fence, pen, coop, corral, wall

Ana confine, circumscribe (see LIMIT): *imprison, incarcerate, jail: *surround, environ, encompass, hem

cajole wheedle, blandish, *coax

Ana entice, inveigle, seduce, decoy, *lure: beguile, delude, *deceive: tease, tantalize (see WORRY)

Con browbeat, bully, bulldoze, cow, *intimidate: constrain, oblige, compel, coerce, *force

cake *vb* *harden, solidify, indurate, petrify

Ana *compact, consolidate: *contract, compress, condense, shrink

calamitous *unlucky, disastrous, ill-starred, ill-fated, unfortunate, luckless, hapless

calamity *disaster, catastrophe, cataclysm

Ana *accident, casualty, mishap: *misfortune, mischance, adversity, mishap: tribulation, visitation, affliction, *trial, cross: ruin, wreck (see RUIN)

Ant boon —*Con* fortune, luck (see CHANCE): favor, *gift: beneficence (see DONATION)

calculate, **compute**, **estimate**, **reckon** mean to determine

something (as cost, speed, or quantity) by mathematical and especially arithmetical processes. **Calculate** is usually preferred when highly advanced, intricate, or elaborate processes are followed with precision and care and when the result arrived at is not readily proven by a physical confirmation (as by measuring or enumerating) (<calculate the distance between the sun and the earth> <calculate the number of atoms in a cubic centimeter of hydrogen> **Compute** is preferred where the data are given or the actual figures involved are known and at hand and not arrived at indirectly; it therefore commonly implies the use of simple though often lengthy arithmetical processes (<compute the interest due> <compute the cost of running a business during a given year> **Estimate** carries so strong an implication from its more common sense (see ESTIMATE) of an evaluation based on one's experience and good judgment that even when it implies careful calculation or computation it still connotes a result that is not necessarily exact but approximates the exact result; for he who *estimates* deals with data or figures that are to some extent unsatisfactory. Hence *estimate* is preferred to *calculate* and *compute* when the cost of a piece of work to be done is computed at present prices (a contractor's bid on a projected building is based on its *estimated* cost to him) (a printer *estimates* a printing job when he names the price he will probably ask for doing it) **Reckon** is used in place of *compute* and usually connotes simpler mathematical processes especially such as can be carried on in one's head or aided by the use of counters (<reckon the cost of a trip to the city> <reckon the number of eggs laid by the hens during the month>)

Ana weigh, study, *consider: *ponder, ruminare: determine, ascertain, *discover

Con guess, *conjecture, surmise

calculating circumspect, *cautious, wary, chary

Ana *deliberate, designed, considered, studied, premeditated: designing, scheming, plotting (see corresponding verbs under PLAN *n*): wily, guileful, crafty, artful, cunning, *sly

Ant reckless, rash —*Con* foolhardy, daring, venturesome, *adventurous: improvident, imprudent, indiscreet (see affirmative adjectives at PRUDENT)

calculation circumspection, caution, wariness, chariness (see under CAUTIOUS)

Ana *prudence, forethought, foresight, providence, discretion: *care, concern, solicitude: astuteness, perspicacity, sagacity, shrewdness (see corresponding adjectives at SHREWD)

Ant recklessness, rashness

caliber *quality, stature

Ana capability, capacity, *ability: force, *power

call *vb* *summon, summons, cite, convoke, convene, muster

Ana assemble, *gather, collect: *invite, bid

call *n* *visit, visitation

caller *visitor, visitant, guest

calling occupation, pursuit, business, *work, employment

Ana profession, *trade, craft, art, handicraft

callous *hardened, indurated

Ana tough, tenacious, stout, *strong: *firm, solid, hard: *inflexible, adamant, obdurate, inexorable: insensitive, impassible, *insensible, anesthetic

Ant tender —*Con* *soft, lenient, gentle, smooth: yielding, submitting, relenting (see YIELD): compassionate,

responsive, sympathetic (see TENDER): sensitive, susceptible, open, exposed, subject, *liable

callow green, crude, raw, *rude, rough, uncouth

Ana puerile, boyish, juvenile, *youthful: naïve, ingenuous, simple, unsophisticated, artless, *natural: adolescent, pubescent (see corresponding nouns at YOUTH)

Ant full-fledged, grown-up —*Con* *mature, adult, matured

calm *adj* **Calm, tranquil, serene, placid, peaceful, halcyon** mean quiet and free from all that disturbs or excites. **Calm** is primarily applied to sea or weather, usually conveys an implicit contrast with its opposite, *stormy*, and suggests freedom, real or assumed, from agitation of whatever sort (as men for ever temp'rate, *calm*, and wise—*Pope*) **Tranquil** implies a more settled composure, a more inherent quiet, than *calm* with less suggestion of previous agitation overcome (farewell the *tranquil* mind! farewell content!—*Shak.*) (the *tranquil* beauty of Greek sculpture—*Fitz-Gerald*) (a *tranquil* trust in God amid tortures and death too horrible to be related—*Motley*) **Serene** suggests a lofty and unclouded tranquillity (regions mild of calm and *serene* air, above the smoke and stir of this dim spot which men call Earth—*Milton*) (the *serene* monotony that so often wears the aspect of happiness—*Glasgow*) **Placid** connotes lack of excitement and suggests an unruffled and equable aspect or temper or even sometimes, in derogatory use, a hint of stupidity (to confirm by *placid* silences the fact that the wine had been good—*Henry James*) (the *placid* common sense of Franklin—*J. R. Lowell*) (she is as *placid* as a cow) **Peaceful** (see also PACIFIC) implies repose or the attainment of undisturbed tranquillity (I am grown *peaceful* as old age tonight—*Browning*) (they harried his hitherto *peaceful* domains—*Irving*) **Halcyon** implies an almost magic or golden calmness especially of weather or of spirit (soft blue stone, the color of robins' eggs, or of the sea on *halcyon* days of summer—*Cather*) (the long uproar over the passage of the Reform Bill compared to which the stormiest days of the New Deal were *halcyon*—*Dwight Macdonald*) *Ana* *still, quiet, stilly, noiseless: *pacific, peaceable: *impassive, stoic: unruffled, composed, collected, imperceptible, unflappable, *cool

Ant stormy: agitated —*Con* shaken, rocked, convulsed (see SHAKE): disturbed, perturbed, discomposed, upset (see DISCOMPOSE)

calm *vb* **Calm, compose, quiet, quieten, still, lull, soothe, settle, tranquilize** are comparable when they relate to persons and their feelings and moods and mean essentially to bring to an end or relieve from whatever distresses, agitates, or disturbs. **Calm** implies a previous disordered state and denotes a returning to inner quietude especially as aided by judgment, fortitude, or faith (Christian faith *calmed* in his soul the fear of change and death—*Wordsworth*) (her also I with gentle dreams have *calmed*—*Milton*) **Compose**, often reflexive, retains its basic notion of arranging in order, specifically in an order that results in repose; it may heighten suggestions of conscious effort, resolution, and fortitude (my child, if ever you were brave and serviceable in your life . . . you will *compose* yourself now—*Dickens*) (a most *composed* invincible man; in difficulty and distress, knowing no discouragement—*Carlyle*) **Quiet** and **quieten** may connote a temporary external calmness in speech or demeanor rather than lasting inner calm (the most unreasonable of Franklin's impulses had now been *quieted* by this most reasonable of marriages—*Van Doren*) These terms are likely to be used in indicating the effect of actions of persons in authority on others (threats to the physical well-being of the unborn baby can *quieten* a noisy and uncooperative

patient in labor—*Lancet*) **Still** is somewhat literary or poetic and stresses the fact of cessation of agitation (flattened, silenced, *stilled*—*Woolf*) (a voice *stilled* by death) It may suggest more peremptory action than the other terms compared and often connotes a return to quietude induced by power, authority, or awe (the debate was *stilled* by the crash of guns) (it was Mary who *stilled* the hideous bawling of Peter—*H. G. Wells*) **Lull** suggests the somnolence of *lullaby*, to which it is related (Aiken has *lulled* the reader with a seductive music and has transported him into the dreamworld of Freudian fantasy—*Matthiessen*) It may, on the one hand, apply to the gentle easing of an infant into sleep (as by song or rocking) or, on the other hand, imply a sleepy relaxation into repose, complacency, unawareness, or apathy when one should be vigilant (we must not let a year or two of prosperity *lull* us into a false feeling of security—*Truman*) **Soothe** suggests bland, gentle mitigation, assuagement, or solace (cooled their fevered sleep, and *soothed* them into slumbers full and deep—*Keats*) (when they [babies] wake screaming and find none to *soothe* them—*Lamb*) **Settle** (see also DECIDE) stresses the subsiding of swirling agitation and implies a stabilizing and easing of a mind or body previously upset (as by emotional excitement, illness, or intoxication) (*settled* her stomach with peppermint tea) (I'll read a bit before supper to *settle* my mind—*Turnbull*) (if I can't *settle* my brains, your next news of me will be that I am locked up—*Montagu*) **Tranquilize** in general use stresses the serenity and depth of peace achieved (when contemplation . . . sends deep into the soul its *tranquilizing* power—*Wordsworth*) but in recent years it has acquired a more specific though closely related medical application in which it implies a relieving of mental tension and agitation by means of medication (tranquilizers will calm nervous cows for milking . . . The most hopeful prospect in *tranquilizing* the animal world lies in the possibility it may change the attitude of some dogs toward postmen—*Sacramento Bee*)

Ana allay, assuage, mitigate, alleviate, *relieve: mollify, placate, appease, *pacify

Ant agitate, arouse —*Con* upset, perturb, disturb, disquiet, *discompose

calumniate defame, slander, asperse, traduce, *malign, vilify, libel

Ana revile, vituperate (see SCOLD): *decry, derogate, detract, belittle, disparage

Ant eulogize: vindicate —*Con* extol, laud, *praise, acclaim: defend, justify (see MAINTAIN)

calumny slander, *detraction, backbiting, scandal

Ana aspersion, reflection, *animadversion, stricture: defaming or defamation, maligning, traducing, vilifying or vilification, libeling or libel (see corresponding verbs at MALIGN *vb*)

Ant eulogy: vindication —*Con* *encomium, panegyric, tribute: *compliment, adulation, flattery

camouflage *disguise, cloak, mask, dissemble

can *vb* **Can, may** are often confused in use. In its commonest sense **can** expresses ability, whether physical or mental (he *can* climb this pole) (he is only four, but he *can* read) (he will do it if he possibly *can*) (when Duty whispers low, thou must, the youth replies, I *can*—*Emerson*) But **can** may imply ability that is granted (as by the will of the people or one in authority) (the law does all that is needed when it does all that it *can*—*Justice Holmes*) **May** fundamentally expresses not ability but possibility (he *may* go if the day is pleasant) (you *may* be right) When the possibility depends for its fulfillment on the permission or sanction of another, **may** is the usual term (I shall call tomorrow if I *may*) (you *may* go, if you

wish) <may we take your coach to town?—*Thackeray*>
The use of *can* for *may* in asking or granting permission is widespread.

canal *channel, conduit, duct, aqueduct

cancel efface, obliterate, expunge, delete, *erase, blot out
Ana invalidate, annul, *nullify: void, *annul, abrogate:
*deface, disfigure: *neutralize, counteract, negative

Con confirm, *ratify: *enforce, implement

cancer *tumor, neoplasm, malignancy

candid open, *frank, plain

Ana truthful, veracious (see corresponding nouns at TRUTH): *fair, dispassionate, impartial, unbiased, just: *sincere: honest, scrupulous, *upright

Ant evasive —*Con* *dishonest, deceitful, lying, mendacious, untruthful

candidate, aspirant, nominee, applicant denote one who seeks an office, honor, position, or award. **Candidate** is applied not only to a seeker but to one who is put forward by others or is considered as a possibility by those whose function it is to make a choice. It implies therefore an examination of qualifications and is applicable wherever selection is dependent upon others' judgment of one's fitness (the Republican *candidate* for governor) <*candidates* for the degree of doctor of philosophy> <*candidates* for holy orders> Since the word often implies previous training or grooming for a position or honor, it is sometimes used more widely of a person whose career is such that he seems headed for a certain place or end (a grafter is a *candidate* for prison) **Aspirant** definitely implies that one seeks an office, honor, post, or promotion because of one's own desire or decision; it therefore often connotes ambition or laudable efforts to improve one's state or condition (the preliminary physical examination was so rigid that twelve *aspirants* were promptly ruled out—*Heiser*) <in consequence of the resignations . . . the way to greatness was left clear to a new set of *aspirants*—*Macaulay*> **Nominee** is applied to a candidate for office who has been chosen to represent a party or a faction in a coming election or who has been proposed as the appropriate person to fill a particular office (the president's *nominee* to the post was approved by the Senate) **Applicant** is applied to one who definitely or formally submits himself as a possibility for a post or position. It is often used interchangeably with *candidate* when personal solicitation is implied in the latter, but unlike *candidate*, it conveys no suggestion of consideration by those who make the selection (weed out *applicants* without experience) <there are plenty of unemployed seamstresses and laborers starving for a job, each of them trying to induce you to give it to her or him rather than to the next *applicant*—*Shaw*>

canon *law, precept, regulation, rule, statute, ordinance
Ana *principle, fundamental, axiom: criterion, *standard, yardstick, touchstone, gauge

cant *n* 1 jargon, argot, *dialect, lingo, vernacular, slang, patois

Ana phraseology, vocabulary, diction, *language: idiom, speech (see LANGUAGE)

2 *hypocrisy, sanctimony, pharisaism

canting hypocritical, sanctimonious, pharisaical (see under HYPOCRISY)

capability *ability, capacity

Ana competence, qualification or qualifications (see corresponding adjectives at ABLE): proficiency, adeptness, expertness, skillfulness (see corresponding adjectives at PROFICIENT): *art, skill, cunning

Ant incapability, incompetence —*Con* *inability, disability

capable competent, qualified, *able

Ana efficient, *effective, effectual, efficacious

Ant incapable —*Con* incompetent, unqualified (see INCAPABLE)

capacious *spacious, commodious, ample

Ana *broad, wide: extended or extensive (see corresponding verb EXTEND): expanded or expansive (see corresponding verb EXPAND)

Ant exiguous (of quarters, spaces, containers) —*Con* circumscribed, limited, confined, restricted (see LIMIT *vb*)

capacity *ability, capability

Ana amplitude, *expanse, spread: extent, magnitude, *size, volume: aptitude, *gift, faculty, talent, bent, turn, knack

Ant incapacity —*Con* powerlessness, impotence (see corresponding adjectives at POWERLESS)

caper *n* *prank, monkeyshine, antic, dido

Ana gamboling or gambol, rollicking or rollick, romping or romp, frolicking or frolic (see corresponding nouns under PLAY *vb*): skipping or skip, hopping or hop, bounding or bound (see SKIP)

capital *adj* *chief, principal, main, leading, foremost

Ana *primary, primordial, primal: *fundamental, basic, radical, underlying: cardinal, vital, *essential

capitulate submit, *yield, succumb, relent, defer, bow, cave

Ana surrender, abandon, waive, cede (see RELINQUISH)

capitulation *surrender, submission

Ana yielding, relenting, succumbing, caving in (see YIELD): *truce, cease-fire, armistice, peace

caponize *sterilize, castrate, spay, emasculate, alter, mutilate, geld

caprice, freak, fancy, whim, whimsy, conceit, vagary, crotchet are comparable when denoting an arbitrary notion that usually lacks a logical basis and therefore may be unsound, impractical, or even irrational. **Caprice** emphasizes the lack of apparent motivation and implies a certain willfulness or wantonness (they . . . without reason or judgment, beyond the *caprice* of their good pleasure, threw down the image from its pedestal—*Byron*) <my cousin's pet *caprice* is to affect a distaste for art, to which she is passionately devoted—*Shaw*> **Freak** suggests an impulsive, seemingly causeless change of mind, like that of a child or a lunatic (a light word flung in the air, a mere *freak* of perverse child's temper—*Thackeray*) <follow this way or that, as the *freak* takes you—*Stevenson*> **Fancy** stresses casualness and lack of reflection in forming an idea and may sometimes suggest a kind of harmless perverseness in the idea formed (coddle ourselves into the *fancy* that our own [life] is of exceptional importance—*Stevenson*) <consoled myself with *fancies* of doing good—curing sick friends by an occult exploration plus pure willpower—*Gold*> **Whim** and **whimsy** suggest not so much a sudden as a quaint, fantastic, or humorous turn or inclination, but *whim* often stresses capriciousness, and *whimsy* fancifulness (a young lady of some birth and fortune . . . who had strange *whims* of fasting—*George Eliot*) <Mr. Wilder is unconcerned with fads, with *whims* of the moment; he is attempting to write permanently about permanent things—*Fadiman*> <Augustus was as free as any man who ever lived from *whimsies* about his own divinity—*Buchan*> (now and again a *whimsy* seized my master and he declared that we must work and earn our daily bread by the sweat of our brows—*W. J. Locke*) **Conceit** suggests more strongly than *whim* or *whimsy* the quaint, fantastic, or erratic character of the notion formed and also may suggest the firmness and persistence with which it is held (it is one of Freud's quaint *conceits* that the child in his mother's womb is the happiest of living creatures—*Krutch*) <fortified him in the *conceit* that in

dealing perfect justice to his son he was doing all that was possible—*Meredith*) *Vagary* suggests still more strongly the erratic, extravagant, or irresponsible character of the notion or fancy (straight they changed their minds, flew off, and into strange *vagaries* fell—*Milton*) (a great force of critical opinion controlling a learned man's *vagaries*, and keeping him straight—*Arnold*) *Crotchet* implies even more perversity of temper or more indifference to right reason than *vagary*; it often is applied to a capriciously heretical opinion on some frequently unimportant or trivial point (the impracticable *crotchets* you are fond of airing are not recognized in England as sane political convictions—*Shaw*) (this political view may now seem to have been the *crotchet* of a particular set of historical scholars—*Dewey*)

Ana humor, *mood, temper, vein: notion, *idea: impulse (see MOTIVE): irrationality, unreasonableness (see corresponding adjectives at IRRATIONAL): perverseness, contrariness (see corresponding adjectives at CONTRARY)
Con intent, purpose, *intention, design: project, scheme, *plan: deciding or decision, determining or determination, resolving or resolution (see corresponding verbs at DECIDE)

capricious mercurial, unstable, *inconstant, fickle

Ana *changeable, changeful, protean, variable: moody, humorsome (see corresponding nouns at MOOD): volatile, effervescent (see ELASTIC)

Ant steadfast —*Con* constant, resolute, staunch, loyal, *faithful: *steady, constant

capsize *vb* upset, *overturn, overthrow, subvert

caption *inscription, legend

captious caviling, carping, *critical, hypercritical, fault-finding, censorious

Ana *contrary, perverse: exacting, demanding (see DEMAND *vb*): peevish, petulant, snappish, *irritable: testy, choleric, *irascible

Ant appreciative —*Con* reasonable, *rational: judicious, *wise, sensible

captivate fascinate, bewitch, enchant, charm, allure, *attract

Ana delight, *please, gratify: win, gain (see GET)

Ant repulse

captivating fascinating, bewitching, enchanting, charming, alluring, attractive (see under ATTRACT)

Ana pleasing, *pleasant, agreeable, grateful: *delightful, delectable: lovely, bonny, fair, *beautiful

Ant repulsive —*Con* repellent, *repugnant, distasteful, obnoxious: *offensive, loathsome, revolting

captive *n* prisoner

capture *vb* *catch, trap, snare, entrap, ensnare, bag

Ana seize, *take, grasp, clutch, snatch: *arrest, apprehend

Con release, *free, liberate: surrender, yield, *relinquish

carbonate *vb* *aerate, ventilate, oxygenate

Ant decarbonate

carbon copy copy, duplicate, transcript, *reproduction, facsimile, replica

carbuncle *abscess, boil, furuncle, pimple, pustule

carcass corpse, cadaver, *body

cardinal *adj* vital, *essential, fundamental

Ana requisite, necessary, indispensable, *needful: radical, *fundamental, basic: capital, principal, *chief, main, leading: important, significant, momentous (see corresponding nouns at IMPORTANCE)

Ant negligible

care *n* Care, concern, solicitude, anxiety, worry are comparable when meaning either a state of mind in which one is engrossed and troubled by something pertinent to oneself or another, or the pertinent thing that engrosses and

troubles one. The same distinctions in implications and connotations are evident in their corresponding adjectives (careful, concerned, solicitous, anxious, worried) when they mean engrossed and troubled by a particular matter. Care and careful (which is archaic in this sense; see also CAREFUL 2) imply preoccupation and oppression of mind because of heavy responsibilities or disquieting fears or apprehensions (the king . . . most sovereign slave of care—*Thoreau*) (her face was worn with care) (she was free . . . to go where she liked and do what she liked. She had no responsibilities, no cares—*Bennett*) (be careful for nothing; but in every thing . . . let your requests be made known unto God—*Phil* 4:6) Concern and concerned stress absence of indifference, but they also imply a degree of care because of one's interest, affection, respect, or responsibility (his child's future was his greatest concern) (an adult who falls on the street is the object of concern and commiseration—*Replier*) (it was quite characteristic of the state of mind of England in the summer of 1914 that Mr. Britling should be mightily concerned about the conflict in Ireland, and almost deliberately negligent of the possibility of a war with Germany—*H. G. Wells*) Solicitude and solicitous imply profound concern; sometimes they connote extreme apprehensiveness, but more often they suggest thoughtfulness for another's welfare, well-being, or success and sometimes an almost hovering attentiveness in another's misfortune (they . . . tended the wounded man with the gentlest solicitude—*Dickens*) (with motherly solicitude, he insisted that Tom get to his feet—*Anderson*) (they . . . were as solicitous to see it through for me as though I had been an only child among a lot of maiden aunts—*Mary Austin*)

The last two pairs of words in this group imply far more agitation and depression than the first three. Anxious and anxious stress the anguish of fear coupled with uncertainty or of the anticipation of impending failure, misfortune, or disaster (poor Miss Maria! she was anxious, no doubt . . . over my matters. Ladies ought not to have such anxieties—*Deland*) (the child's inner life is often a turmoil of terrors and anxieties of which his parents know almost nothing—*Inge*) Worry and worried usually suggest more mental activity, often futile, than anxiety and anxious or more fretting or stewing over problems or situations or persons that are a cause of solicitude or anxiety (because the list of her worries is too long, it is difficult to feel as sorry for her as one ought—*Moorehead*) (the high command . . . had begun to wrinkle their brows. They were perplexed, vexed and worried—*Pyle*) (worried . . . by the need for keeping up their social positions—*Shaw*)

Ana trouble, pains, *effort, exertion: disquieting or disquiet, perturbing or perturbation, discomposing or discomposure (see corresponding verbs at DISCOMPOSE): vigilance, watchfulness, alertness (see corresponding adjectives at WATCHFUL)

careful 1 solicitous, anxious, worried, concerned (see under CARE *n*)

Ana disquieted, perturbed, discomposed, disturbed, upset (see DISCOMPOSE): troubled, distressed (see TROUBLE *vb*): *watchful, vigilant, alert

2 Careful, meticulous, scrupulous, punctilious, punctual are comparable in their basic sense of showing or revealing close attention to details or care in execution or performance. Careful implies great concern for the persons or things in one's charge or for the way in which one's duties or tasks are performed. With regard to the former, the term implies solicitude or watchfulness (a careful mother) (a careful nurse) (a careful spender of money) and with regard to the latter, it usually implies painstaking efforts, thoroughness, cautiousness in avoiding errors, and

a desire for perfection <a *careful* piece of work> <a *careful* examination by the doctor> <a *careful* mapping out of the plan of battle> All of the other words mean exceedingly careful, but they vary in their implications of the motives which inspire such carefulness and, to a less extent, in regard to the objects of attention. **Meticulous** usually suggests timorousness lest one make the slightest error or fall short of a high standard; in addition, it implies extreme fussiness or fastidiousness in attention to details <Mr. Prufrock . . . like most converts, *meticulous* over points of ritual—*Day Lewis*> <the *meticulous* care with which the operation in Sicily was planned has paid dividends. For our casualties . . . have been low—*Roosevelt*> <there were men who ploughed clumsily . . . leaving banks of land untouched . . . but Hendrik was not one of these, his work was *meticulous*—*Cloete*> **Scrupulous** (see also UPRIGHT) implies the promptings of conscience, not only of one's moral conscience but of one's sense of what is right and wrong (as in fact, in logic, or in aesthetics); it therefore also implies strict or painstaking adherence to what one knows to be true, correct, or exact <*scrupulous* fairness of statement> <*scrupulous* observation of details> <Bradley, like Aristotle, is distinguished by his *scrupulous* respect for words, that their meaning should be neither vague nor exaggerated—*T. S. Eliot*> **Punctilious**, on the other hand, implies knowledge of the fine points (as of law, etiquette, ceremony, or morality) and usually connotes excessive or obvious attention to the details or minutiae of these <I am sorry . . . to see you so *punctilious* as to stand upon answers, and never to come near me till I have regularly left my name at your door—*Gray*> <the *punctilious* gods who judged them according to the principles laid down in some celestial Book of Etiquette—*Krutch*> **Punctual** may occasionally come close to *punctilious* in its stress on attention to the fine points of a law or code, but in such use the term carries a much stronger implication than *punctilious* of emphasis on their observance and a weaker implication of concentration upon the minutiae <we are not altogether so *punctual* as the French, in observing the laws of comedy—*Dryden*> <his *punctual* discharge of his duties—*Froude*> More usually the term implies near perfection in one's adherence to appointed times for engagements or in following a schedule and then means punctiliously prompt <I made Mr. Middleditch *punctual* before he died, though when he married he was known far and wide as a man who could not be up to time—*Mackenzie*> <*punctual*, commonplace, keeping all appointments, as I go my round—*L. P. Smith*>

Ana *cautious, circumspect, wary; provident, foresighted, prudent (see under PRUDENCE); accurate, precise, nice, exact (see CORRECT); studied, *deliberate

Ant careless —**Con** heedless, thoughtless, inadvertent (see CARELESS); neglectful, *negligent, lax, slack, remiss

careless *adj* Careless, heedless, thoughtless, inadvertent mean showing lack of concern or attention. Careless often implies the absence of such cares as responsibilities or worries; it then usually connotes casualness, spontaneity, and lightheartedness and carries little or no suggestion of culpability <her *careless* refinement of manner was so different from the studied dignity and anxious courtesy of the actor-manager—*Shaw*> <he presented to the world the appearance of a *careless* and hospitable millionaire strolling into his own drawing room with the detachment of an invited guest—*Wharton*> Often, however, the term implies a more or less culpable indifference which at its best is the product of independence or of concentration on other and more important things <raise all kinds of hope, *careless* of the disillusionment that will certainly

follow—*Hicks*> and at its worst is the result of laziness or negligence and manifests itself in blameworthy lack of pains or thought <a *careless* bookkeeper> <a *careless* piece of work> <*careless* errors> **Heedless** also implies indifference, but it stresses inattentiveness or a failure to see, observe, take note of, or remark rather than laziness or negligence; the term often also connotes light-mindedness, frivolousness, or flightiness <heaps of flies . . . fell dead. . . Their decease made no impression on the other flies out promenading. . . Curiously to consider how *heedless* flies are!—*Dickens*> <discreetly *heedless*, thanks to her long association with nobleness in art, to the leaps and bounds of fashion—*Henry James*> **Thoughtless** may emphasize lack of reflection or of forethought <*thoughtless* of tomorrow and God—*Guthrie*> More frequently it suggests lack of thoughtfulness or consideration for others <now and then, however, he is horribly *thoughtless*, and seems to take a real delight in giving me pain—*Wilde*> **Inadvertent** usually implies heedlessness; the term is rarely applied to persons or their minds but is used in qualifying their acts and especially such of their mistakes, errors, or blunders as ensue from heedlessness or inattention resulting from concentration on other things rather than from ignorance or intention <an *inadvertent* waking of a person who is asleep> <an *inadvertent* error in spelling or in pronunciation> <they are in a bad fix . . . and sometimes with an *inadvertent* child or two to support—*Rand*>

Ana *negligent, neglectful, lax, slack, remiss; casual, desultory, haphazard, *random, hit-or-miss, happy-go-lucky

Ant careful —**Con** meticulous, scrupulous, punctilious, punctual (see CAREFUL); accurate, precise, exact, nice (see CORRECT)

caress *vb* **Caress, fondle, pet, cosset, cuddle, dandle** mean to show affection or love by touching or handling. **Caress** implies an expression of tender interest (as by soft stroking or patting) or of affection ordinarily without undue familiarity <soothing with a touch the wild thing's fright . . . *caressed* it into peace with light, kind palms—*Edwin Arnold*> <the little Isaac . . . leans . . . against his father's knee . . . while Abraham's left hand quiets him and *caresses* the boy's face—*Henry Adams*> **Fondle** implies doting fondness and frequently lack of dignity; it usually suggests attentions (as hugging or kissing) more obvious and less gentle than caressing <*fondle* a baby> <all that he was good for, she said, was to *fondle* and fumble and kiss—*Graves*> <dwarf trees that had to be *fondled* and humored—*Brooks*> **Pet**, sometimes, and **cosset** imply special attentions and indulgences including more or less fondling <the *petted* child of the family> <died . . . in the newest and largest of hospitals *petted* by all her nurses—*Jarrell*> <soothed and *cosseted* by his aunt—*Cather*> In recent use *pet* more often stresses flirtatious or amorous fondling and sometimes suggests undue familiarity <a *petting* party> **Cuddle** chiefly suggests the action of a mother or nurse in drawing a child close to her breast to keep it warm, happy, and quiet <little boys . . . who have kind mammas to *cuddle* them—*Kingsley*> The term may be extended to other attentions which imply a desire to protect and keep warm and contented <Temple seems . . . to have been coaxed, and warmed, and *cuddled* by the people round about him—*Thackeray*> <we might *cuddle* up to the world in a comfortable attitude—*Langer*> **Dandle** suggests playful handling of a child (as by moving him up and down lightly on one's knee) <the mother *cuddles*, but the father *dandles*, their little boy> In its extended use *dandle* usually implies toying with especially in a playful but pampering manner <editors, scholars, mer-

chants, even the noble lords and ladies feted and *dandled* him—*Eastman*)

Ana *trifle, toy, dally, flirt, coquet; cherish, *nurse
careworn worn, *haggard, pinched, wasted, cadaverous
Ana troubled, distressed (see TROUBLE *vb*): *lean, gaunt, scrawny, skinny: exhausted, fagged, jaded, tucked (see TIRE *vb*)

Ant carefree

cargo burden, *load, freight, lading

caricature *n* Caricature, burlesque, parody, travesty are comparable as nouns meaning a grotesque or bizarre imitation of something and as verbs meaning to make such an imitation. **Caricature** implies ludicrous exaggeration or distortion (often pictorial) of characteristic or peculiar features (as of a person, a group, or a people) for the sake of satire or ridicule (cartoonists who *caricature* prominent politicians) (that propensity to *caricature* which tempts clever writers . . . to transform into objects of derision the venerated Great—*L. P. Smith*) (his portrait of Addison, for example . . . depends upon . . . the apparent determination not to exaggerate. The genius of Pope is not for *caricature*—*T. S. Eliot*) **Burlesque** implies mimicry (especially of words or actions in the theater) that arouses laughter. The term usually also suggests distortion (as by treating a trifling subject in mock-heroic vein or by giving to a serious subject a frivolous or laughable turn) for the sake of the comic effect (in *Don Quixote* Cervantes *burlesques* the old romances of chivalry) (*burlesque* is . . . of two kinds; the first represents mean persons in the accouterments of heroes; the other describes great persons acting and speaking like the basest among the people—*Spectator*) **Parody** basically denotes a writing in which the language and style of an author or work are closely imitated for comic effect or in ridicule (*parody* may be regarded as an unique combination of both creative and cognitive criticism. At its best, it is creative because it is genuine self-expression through imitation of another's self-expression. It debunks aesthetic illusion by means of a mock-aesthetic illusion of its own—*J. L. Davis*) **Parody**, like *caricature*, may involve exaggeration or, like *burlesque*, distortion but ordinarily is more subtle and sustained than the first and quieter and less boisterous than the second (burlesque or *parody* may be aimed at the most august object, but surely it must imply an understanding of that object—*Bentley*) (one of the richest sources of their humor lies in their ability to *parody* the most solemn efforts of radio and television as these media attempt the dramatic slush known as soap operas—*G. S. Perry*) In extended use *parody* may apply, often with more than a hint of bitterness or disgust, to a feeble or inappropriate imitation (his art had become *parody*, his body a gutted edifice—there was nothing left but to drink in the company of friends and to hope to die with dignity—*Rogow*) or to a poor inadequate substitute (subsidized football results in some queer *parodies* of education—*Eaton*) (the mechanically produced *parodies* of period designs hitherto offered by the furniture trade—*Gloag*) **Travesty** is usually a harsher word than others of this group; it implies a palpably extravagant and often debased or grotesque imitation and more often and more intensely than parody suggests repulsion (it should never be the object of a satirist to make a *travesty* of a genuine work of art—*Kitchell*) (racist explanations of the fall of Rome are a *travesty* of the facts—*Benedict*) (later examples of the Greek revival *travestied* the classic style rather than copied it—*Amer. Guide Series: Mass.*)

Ana satire, humor, sarcasm (see WIT); grotesqueness, fantasticality, bizarreness (see corresponding adjectives at FANTASTIC); lampoon, *libel, skit, squib, pasquinade

caricature *vb* burlesque, parody, travesty (see under CARICATURE *n*)

Ana mimic, mock, ape, imitate, *copy: distort, *deform: simulate, counterfeit (see ASSUME): *ridicule, deride

carnage slaughter, butchery, *massacre, pogrom

carnal, fleshly, sensual, animal are comparable when they are used in reference to human beings, their acts, works, desires, and interests and mean having or showing a physical rather than an intellectual or spiritual character or origin. Both *carnal* and *fleshly* imply a connection with the body or flesh especially when thought of as distinct from the spirit. **Carnal** need not in itself imply condemnation (armed against ghostly as well as *carnal* attack—*Stoker*) Often it is a purely descriptive or classificatory term (a . . . flier with a lyrical gift for conveying the *carnal* élan of men fighting, was the first writer ever to treat air combat in epic style—*Flanner*) but through its frequent opposition to the spiritual it has come to suggest not merely man's bodily but his lower nature and appetites (the superiority of the spiritual and eternal over the *carnal* and temporal had to be vindicated—*H. O. Taylor*) (medieval Christianity tended to restore the conviction that sex, being *carnal* and not spiritual, is low, lascivious, and wicked—*Garvin*) and ultimately to be applied more or less specifically and usually derogatorily to the sexual and the lustful as the most bodily of appetites and the most antithetical to the spiritual nature (to make herself a *carnal* object, the prey of another, is in contradiction to her self-worship: it seems to her that embraces blight and sully her body or degrade her soul—*Parshley*) (he has also three partner antagonists: his wife Lucy and his two mistresses, one a *carnal* affair, the other "idealistic"—*Bentley*) (who more *carnal* than a recent virgin—*Steinbeck*) (had an instant succès du scandale. It titillated the prurient with the frankness of its *carnal* detail—*S. H. Adams*) **Fleshly**, though it implies a connection with the flesh thought of as man's lower nature, is often less suggestive of condemnation than *carnal* (turn to Bernard's love of God, and rise with him from the *fleshly* to the spiritual—*H. O. Taylor*) (the godly dame, who *fleshly* failings damns—*Pope*) **Sensual** implies a connection with sensations, but it further implies an indulgence in bodily sensation for its own sake rather than for an aesthetic end (his feet and hands were always cold and there was for him an almost *sensual* satisfaction to be had from just lying perfectly still . . . and letting the hot sun beat down on him—*Anderson*) Very often the word carries implications of grossness marked by concentration on bodily satisfaction and the absence of intellectual or spiritual qualities (a sloping meaty jaw, and large discolored buckteeth which showed unpleasantly in a mouth . . . always half open . . . that gave his face its *sensual*, sly, and ugly look—*Wolfe*) **Animal** implies a connection with man's physical nature as distinguished chiefly from his rational nature. It comparatively seldom implies an intent to depreciate (he could never find his Nirvana in mere sensuousness; he could not sink into the mud of *animal* existence—*Parrington*) (the first mood at any war's end is sheer *animal* joy in survival—*Wecter*) (he taught the boy boxing, and shooting, and . . . superintended the direction of his *animal* vigor—*Meredith*) **Ana** physical, *bodily, corporeal, corporal, somatic: *sensuous: gross, *coarse, vulgar, obscene: *earthly, earthy, worldly, mundane: lustful, lewd, wanton, lascivious (see LICENTIOUS)

Ant spiritual: intellectual —**Con** *moral, ethical, virtuous, noble, righteous: ethereal, aerial (see AIRY): pure, *chaste, modest, decent

carol *vb* *sing, troll, descant, warble, trill, hymn, chant,

intone

carping *adj* caviling, faultfinding, captious, *critical, hypercritical, censorious

Ana blaming, reprehending, reprobating, criticizing (see CRITICIZE); upbraiding, jawing, railing (see SCOLD); depreciating or depreciative, disparaging, decrying (see corresponding verbs at DECRY)

Ant fulsome —*Con* commending or commendatory, applauding, complimenting (see corresponding verbs at COMMEND); praising, lauding, extolling (see PRAISE *vb*); approving, endorsing (see APPROVE)

carry *vb* Carry, bear, convey, transport, transmit are comparable when they mean to be or to serve as the agent or the means whereby something or someone is moved from one place to another. Carry often implies the use of a cart or carriage or more recently of a train, ship, automobile, or airplane, but it may imply a personal agent or a beast of burden or some natural or artificial passage (as an artery or a pipe) (the ship carries a heavy cargo) (airplanes carry mail) (a bus built to carry sixty passengers) (carry news) (please carry the basket to the house) (the arteries carry the blood from the heart to the various parts of the body) Bear stresses the support of the weight of whatever is being moved; in its extended senses, even though actual weight may not be implied, bear is preferred to carry when effort is suggested or the importance or the significance of what is carried is to be connoted (let four captains bear Hamlet, like a soldier, to the stage—*Shak.*) (over his head was borne a rich canopy—*Johnson*) (then came the envoys bearing rich gifts) (Come bearing good news) Convey is more often used than carry of things that move continuously or in the mass or that pass through natural or artificial channels or mediums (an endless belt for conveying dirt from an excavation to the trucks removing it) (freight cars for conveying coal from the mines to the various cities and towns) (pipelines to convey natural gas from one section to another) (language conveys thought) Transport is used in place of carry or convey when the stress is on the movement of persons or goods especially in numbers or bulk and typically over a considerable distance and by a professional carrier (as a railway or steamship line) (fast liners were used to transport troops to France) (trucks transporting farm produce to market) (most modern well-to-do Englishmen and Americans, if they were transported by magic into the Age of Elizabeth, would wish themselves back in the modern world—*Russell*) Transmit emphasizes the causative power in an agent or instrument; it implies either an actual sending by some means of conveyance or transportation (the telegraph company transmits messages to all parts of the world) (the steamship company will transmit your baggage whenever it receives the word) or the power or the property of permitting passage through or from one place to another (glass transmits light) (metals transmit electricity)

Ana take, *bring, fetch: *move, remove, shift, transfer: drive, *ride

cartel 1 compact, pact, convention, *contract, bargain, concordat, treaty, entente

2 pool, syndicate, corner, *monopoly, trust

Ana combine, *combination: *consolidation, merger, amalgamation

carve 1 *cut, slit, hew, chop, slash

Ana shape, fashion, form (see MAKE): *separate, divide, part

2 Carve, incise, engrave, etch, chisel, sculpture, sculpt, sculp are comparable when they denote to cut an outline or a shape out of or into some substance (as stone, wood,

or metal). They are, however, not close synonyms, for few of the terms keep within the limits of this meaning. Carve (see also CUT) suggests working with an instrument (as a knife or a chisel) in order to adorn a surface or to fashion a solid figure; the term may connote an artistic purpose (as representation or decoration) and a method of work involving the cutting of a pattern into a surface (*intaglio carving*) or the cutting away of parts of the original surface so as to leave a raised design or raised figures upon a new ground (*relief carving*) or the fashioning of a whole or partial figure by cutting or chipping away excess material (carve an inscription on a tombstone) (the legs of chairs and table were carved with oak leaves) (a figure carved in stone is fine carving when one feels that not the figure, but the stone . . . has come to life—*Sweeney*) Incise implies cutting into with an instrument (as a knife) that leaves traces; more specifically it implies a cutting into some hard or resistant material so that figures, letters, or devices are marked upon its surface (incise an epitaph upon a monument) (the gem had been incised with his coat of arms and was used as his seal) Engrave often implies a cutting into and may be used as an equivalent of incise; in general use, however, it more often implies a cutting (as upon wood, stone, or metal) with a graving tool in order to form an inscription or a pictorial representation that can be printed either from the incised lines, spaces, or points (as in *copperplate engraving*) or from parts of the surface left in relief (as in *wood engraving*). The noun engraving denotes a picture printed from a plate or block thus made, but the verb usually emphasizes the work of the one who actually cut the plate or block (was asked to engrave a portrait of Daniel Webster) (prints made from an engraved copper plate) Engrave also may be used to connote an indelible impression upon the heart, mind, or memory (no stone stands over where he lies. It is on our hearts that his life is engraved—*Galsworthy*) Etch differs from engrave only in implying that the lines and dots which form a picture are incised not upon the metal but through a hard, acid-resisting surface (as of varnish) covering the metal of a plate and are then eaten into the plate by coating this surface with acid. Chisel, though used widely by workers in stone and wood to suggest the various processes (as of cutting or shaping) that are executed with a chisel, is in general use more often employed to suggest either literally or figuratively the process of carving an image from resistant material; the emphasis in such use is upon the skill of the maker and the artistic quality of the product (it was a great artist who chiseled the vital figure of the Winged Victory out of stone) (finely chiseled features) Sculpture and the related sculpt and sculp imply the formation of primarily three-dimensional figures especially in stone or metal. Basically sculpture suggests carving or chiseling out of some hard substance, but all three terms stress the end result over the technique and may be extended to include the making of three-dimensional art forms by such diverse methods as modeling and molding, welding, or construction as well as by the traditional carving and chiseling, and all three, but especially sculpture, may be further extended to processes and results suggesting the work of a sculptor (a sculptured bronze head) (because it was God Who had sculptured the mountains . . . while it was men who had bricked the cities and that was why they were sometimes so ugly—*Bruce Marshall*) (does not so much sing Mozart's phrases as sculpt them, with the sure instincts of a master craftsman—*Gelatt*) (Brancusi . . . sculps what Plato had in mind by the idea of form—*Time*)

Con *victory, triumph
catch *vb* 1 **Catch, capture, trap, snare, entrap, ensnare, bag** are comparable when meaning to get into one's possession or under one's control either by taking or seizing

or by means of skill, craft, or trickery. **Catch**, the ordinary and general term of this group, distinctively implies that the thing laid hold of has been in flight, in concealment, or in constant movement and that possession has been gained by pursuit, force, strategy, or surprise or by means of a device or accident which brings it within one's reach physically, visually, or mentally <after several days' search the detectives *caught* the murderer> <not able to *catch* the man who snatched her purse> <*catch* fish> <*catch* a ball> <*catch* a pupil cheating in an examination> <his eyes *caught* the skirt of her dress—*Dickens*> <Yancey Cravat *caught* the word beneath his teeth and spat it back—*Ferber*> <he smiled back like a child *caught* in a lie—*Steinbeck*> Sometimes the power of laying hold of is ascribed not to a person, his vision or other sense, or his mind, heart, or imagination but to the thing which draws to itself his attention, his eye, or his fancy <the fact *caught* her interest, just as sometimes a point in a wide dull landscape *catches* the eye—*Deland*> <two recent imports . . . offer striking new surprises which may *catch* unaware even the veteran reader—*Anthony Boucher*> **Capture** implies heavier odds (as greater opposition or difficulty or more competition) than does *catch* and suggests a taking possession that amounts to an overcoming or a victory <*capture* a stronghold of the enemy> <*capture* a company of retreating soldiers> <he was making plans . . . to *capture* the banking of the country—*Belloc*> <no artist can set out to *capture* charm; he will toil all the night and take nothing—*Benson*> **Trap, snare, entrap, and ensnare** imply catching by a device which holds the one caught in a position that is fraught with danger or difficulty or from which escape is difficult or impossible. *Trap* and *snare* imply the use of a trap or snare (see LURE *n*), but *entrap* and *ensnare* suggest trickery in capture more often than the use of an actual trap or snare: all four terms impute craft to the catcher and unwariness or lack of caution to the one that is caught. Distinctively, *trap* and *entrap* suggest a being held in a position where one is at the mercy of the captor and his designs, and *snare* and *ensnare* a being held so that the more one struggles the more desperate becomes one's situation <*trap* an animal> <*snare* a bird> <*trap* a detachment of soldiers with an ambush> <themselves in bloody toils were *snares*—*Scott*> <as if he would clear away some entanglement which had *entrapped* his thoughts—*Bromfield*> <*entrap* a person by a sudden question into making a dangerous admission> <sympathetic to the regime that *ensnared* them in its monstrous net—*B. D. Wolfe*> **Bag** carried a double implication of catching (as game or specimens) and of putting into a container (as a game bag) for transportation or storage <he *bagged* several rare butterflies within the last month> <*bag* pheasants> So strong is the implication of catching and killing game in this use that the word is often employed without suggestion of putting in a bag <they *bagged* three bears on their last hunting expedition> <*bagged* the British rights to John Hersey's *Hiroshima* while other English publishers were asleep—*Cerf*>
Ana seize, *take, grasp, grab, clutch, snatch: apprehend, *arrest
Ant miss
 2 *incur, contract
catching contagious, *infectious, communicable
catchword, byword, shibboleth, slogan mean a phrase that catches the eye or the ear and is repeated so often that it becomes a formula. **Catchword** usually applies to a phrase that serves as the formula or identification mark of an emotionally charged subject (as a school of thought, a political party, or a cause) and that is often used by those who have only a superficial knowledge of the subject and

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

its philosophy and basic tenets (<"the new deal" became the *catchword* of supporters and critics of Franklin Roosevelt as "the square deal" was that of the friends and the enemies of Theodore Roosevelt) <man is a creature who lives not upon bread alone, but principally by *catchwords*—*Stevenson*) <these *catchwords* which you repeat when people ask you for intelligence—*Masefield*) **Byword** sometimes denotes a significant phrase that is repeated far and wide until it has become a proverb <the old *byword* of necessity being the mother of invention—*Kroeber*) The more usual sense is a person or thing that has become proverbial as the type of certain evil, ludicrous, or shameful characteristics and whose name, therefore, has become the object of concentrated scorn or contempt (<I had disgraced that name eternally. I had made it a low *byword* among low people—*Wilde*) <even those public departments that were *bywords* for incompetence and red tape were far more efficient than the commercial adventurers who derided them—*Shaw*) <Emerson . . . was still an impossible puzzle in the popular mind, even a national joke, a *byword* of the country paragraphers—*Brooks*) **Shibboleth** was the word which, in *Judges* 12, the Ephraimites fleeing from the Gileadites could not correctly pronounce when tested, thus giving away their identity to Jephthah as his enemies; it typically applies to a fixed usage (as a word, phrase, or speech sound) whose employment identifies a person as belonging to a particular party, class, profession, ethnic group, or time. The term basically stresses help in placing a person <a child who . . . has not yet learned sufficiently well the phonemic *shibboleths*, the arbitrary sound-gamuts, which his society insists upon—*La Barre*) <our listeners type us—stereotype us—according to the impression they gain from our verbal habits . . . every word we speak is a *shibboleth*—*G. A. Miller*) but may also imply the emptiness and triteness of such usage and then approach *platitude* in meaning <some truth in the *shibboleth* that crime does not pay—*Rogow*) **Slogan**, originally a cry used in battle, has come to mean a phrase that is a shibboleth of the party or group using it <that was in fact the position that the Dadaists took up. "Art is a private matter: the artist does it for himself" was one of their *slogans*—*Day Lewis*) It may be a phrase deliberately invented for the sake of attracting attention to a party or group <a *slogan* . . . is a short message designed to be repeated over and over again, word for word—*Kleppner*) <traditional schoolbook platitudes and campaign *slogans*—*Frankfurter*) or it may be an eye-catching or ear-catching bit used as an advertising device <the Heinz "57 Varieties" label . . . provided the company with both a trademark and an advertising *slogan*—*Current Biog.*)

Ana caption, legend (see INSCRIPTION): *phrase, expression, idiom: *commonplace, platitude, truism, bromide, cliché

catechize interrogate, quiz, examine, question, *ask, query, inquire

categorical 1 *ultimate, absolute

Con hypothetical, conjectural, supposititious (see SUPPOSED): conditional, contingent, relative, *dependent

2 express, definite, *explicit, specific

Ana positive, certain, *sure: *forthright, downright

Con ambiguous, equivocal, vague, cryptic, enigmatic, *obscure: dubious, *doubtful, questionable, problematic

category *class, genus, species, denomination, genre
Ana division, section, *part: classification (see corresponding verb at ASSORT)

cater *vb* **Cater**, **purvey**, **pander** are comparable when they mean to furnish with what satisfies the appetite or desires. **Cater** basically implies the provision of what is needed in

the way of food and drink <he that doth the ravens feed, yea, providently *caters* for the sparrow—*Shak.*) The term especially implies provision of food and drink ready for the table <a firm that *caters* for dinners, weddings, and receptions) In extended use *cater* often implies the provision of something that appeals to a specific appetite <*catering* to the national taste and vanity—*Thackeray*) Often, especially when followed by *to*, the term implies a certain subserviency (as to popular standards or uncultivated tastes) <too many movies, novels, and comic books do *cater* to an appetite for violence—*Sisk*) <*cater* to the public demand for the sensational) **Purvey** usually suggests the provision of food but sometimes of such other material necessities as lodgings and clothes. In contrast with *cater*, however, it suggests service as a source of supply, either as an agent through whom what is wanted may be found or as a merchant who sells the needed articles <merchants who *purveyed* to the troops during the Seven Years' War) In extended use, especially when followed by *for*, *purvey* implies the provision of whatever is needed to satisfy, delight, or indulge <the function of the eye is now merely ministerial; it merely *purveys* for the ear—*Lanier*) **Pander**, which basically means to act as a procurer or as a go-between in an illicit amour, in its frequent extended use may imply a purveying of something which will gratify desires and passions that are degrading or base <*pander* to depraved appetites) <*pander* to morbid tendencies) or may connote mere servile truckling <denounced legislative *pandering* to special interests—*Time*) <institutions which *pandered* to the factory workers . . . —a movie house, a quick-lunch wagon—*F. S. Fitzgerald*) or even no more than a deferring to or a reasonable indulgence of tastes <choose a plan to suit your type of land and to *pander* to your own particular tastes—*Sydney Bulletin*) <such things, as being traditional, may *pander* to your sense of the great past. Historically, too, they are good—*Beerbohm*)

Ana *furnish, equip, appoint, accouter: pamper, *indulge, humor: *satisfy, content

catholic *adj* *universal, cosmic, ecumenical, cosmopolitan

Ana *whole, entire, total: all-around, many-sided, *versatile: prevalent, *prevailing, current

Ant parochial: provincial —**Con** bigoted, fanatic, enthusiastic (see corresponding nouns at ENTHUSIAST)

catnap nap, snooze, *sleep, slumber, drowse, doze

cause *n* 1 **Cause**, **determinant**, **antecedent**, **reason**, **occasion** are comparable when denoting what in whole or in part produces an effect or result. **Cause** is applicable to an agent (as a circumstance, condition, event, or force) that contributes to the production of an effect or to any combination (as of circumstances, conditions, or events) that inevitably or necessarily brings about a result <one of the *causes* of the French Revolution was the bankruptcy of the government) <every effect must have an adequate *cause*) <what was the *cause* of this outbreak?) <water and soil pollution are the root *causes* of mortality in the tropics—*Heiser*) **Cause** is sometimes used of a personal agent whose activities are instrumental in bearing consequences <he is the *cause* of all our troubles) or of the motive which prompts one to action <he claimed to have just *cause* for his attack) A **determinant** is a circumstance, factor, element, quality, or motive that by itself or in combination with other factors conditions or fixes the nature of a result and especially of a product or outcome <environment is an important *determinant* of character) <the ideals and the character of citizens are the final *determinants* of their form of government) <"imponderables," which in philosophy as in politics are the most important factors of experience and *determinants* of action—*Inge*)

<strength of organization, shelter from foreign or other distant competition, command of markets in key industries—these . . . are the main direct *determinants* of wage rates—*Hobson*> **Antecedent** is applicable to a person or thing (as an object or a circumstance, condition, or event) that is responsible, usually in part, for a later existing person or thing, most often as a progenitor, precursor, or predeterminant (it is certainly true that these twelfth-century windows . . . had no *antecedent*, and no fit succession—*Henry Adams*) <the *antecedents* of emperor-worship lay far back in history—*Buchan*> <phenomena like these have other social, cultural, or superorganic phenomena as their immediate causes or *antecedents*—*Kroeber*> **Reason** is interchangeable with *cause* when it means specifically a traceable or explainable cause; it always implies, therefore, that the effect is known or has actually been brought about (there was a *reason* for Mark Twain's pessimism, a *reason* for that chagrin That bitterness of his was the effect of a certain miscarriage in his creative life, a balked personality, an arrested development—*Brooks*) **Occasion** applies to a situation or to a person, place, or event which provides such a situation that serves to set in motion causes already existing or to translate them into acts; thus, the *cause* of a war may be a deep-rooted enmity between two peoples, the *occasion* of it such a relatively unimportant incident as the murder of a citizen of one country within the confines of the other; an *occasion* of sin may be a visit to a place (as a saloon) where the real *cause*, a propensity to drink, is not resisted (a formula that has been the *occasion* for a considerable amount of misunderstanding—*Richards*)

Ana *motive, spring, incentive, inducement, spur, goad, impulse: motivation, activation, actuation (see corresponding verbs at **ACTIVATE**): agent, agency (see **MEAN**): *origin, root, source, prime mover

Con *effect, result, consequence, outcome, issue

2 *suit, lawsuit, action, cause, case

caustic, **mordant**, **acrid**, **scathing** are comparable when they mean stingingly incisive. **Caustic** usually implies a biting wit, a ready tongue or pen, and the power to drive disagreeable truths home (<"I really do not know what to do with my books," he said, and looked round for sympathy. "Why not read them?" said a . . . *caustic* Fellow opposite—*Benson*) **Mordant** is not always clearly distinguishable from *caustic*. In distinctive use it suggests perhaps greater blighting power or deadlier effectiveness in the thrusts of wit (the *mordant* humor of G. B. Shaw) (the *mordant* things you try to say to listeners, cruelties invariably regarded as merely gently whimsical—*Edman*) **Acrid** adds to *caustic* the implications of bitterness and, often, malevolence (most satirists are indeed a public scourge Their *acrid* temper turns . . . the milk of their good purpose all to curd—*Cowper*) (an *acrid* denunciation of the use of the House floor to broadcast falsehoods—*Roy*) **Scathing** retains its basic implication of injuring chiefly in its suggestion of a deliberate intent to scorch or blister. It seldom implies, as the other words of this group often imply, insensitiveness or maliciousness, and it often connotes both righteous indignation and fierce and withering severity (<*scathing* satire) (a *scathing* exposure of graft) (young Wendell Phillips, aristocratic, handsome, ironical, *scathing*, bitter . . . with the bitterness of a man in anguish—*Sandburg*)

Ana biting, cutting, *incisive, trenchant: *bitter: *sharp, keen, acute: *sarcastic, satiric, ironic

Ant genial —**Con** *suave, urbane, bland, diplomatic: *gracious, cordial: gentle, mild (see **SOFT**)

caution *n* circumspection, wariness, chariness, calculation (see under **CAUTIOUS**)

Ana watchfulness, vigilance, alertness (see corresponding adjectives at **WATCHFUL**): *prudence, providence, foresight, forethought, discretion

Ant temerity: adventurousness —**Con** audacity, hardihood, nerve (see **TEMERITY**): rashness, recklessness, foolhardiness, daring, daredeviltry (see corresponding adjectives at **ADVENTUROUS**)

caution *vb* *warn, forewarn

Ana admonish (see **REPROVE**): counsel, advise (see under **ADVICE**)

cautious, **circumspect**, **wary**, **chary**, **calculating** are comparable when meaning prudently attentive to the dangers one may encounter or the risks one may face, or revealing such attentiveness. The same differences in implications and connotations are apparent in the nouns **caution**, **circumspection**, **wariness**, **chariness**, **calculation** when they denote the quality of the character or the mental processes of one who is so attentive. **Cautious** and **caution** usually imply both the prompting of fear, especially of fear of failure or of harm to oneself or others, and the exercise of forethought in planning or of prudence in proceeding so that the dangers of failure or the risks of disaster may be avoided or minimized (the troops advanced with great *caution*) (a *cautious* investor) (for the most part, he generalizes with a sobriety and a *caution* worthy of the highest praise—*Huxley*) (the old man, *cautious* in all his movements, always acting as if surrounded by invisible spies, delayed setting out until an hour after dark—*Hudson*) **Circumspect** and **circumspection** frequently imply less fear than *cautious* and *caution*; commonly, however, they suggest the exercise of great prudence and discretion, especially in making decisions or in acting, and the surveying of all possible consequences, lest moral, social, business, or political harm may inadvertently occur (and in all things that I have said unto you be *circumspect*—*Exod* 23:13) (they do not live very happy lives, for they even more than the others are restricted in their movements, and they must live the most *circumspect* of lives—*Steinbeck*) (the . . . *circumspection* with which it approaches the consideration of such questions—*John Marshall*) **Wary** and **wariness** usually carry a far stronger suggestion of suspiciousness than *cautious* and *caution* and sometimes, as a result, connote less well-grounded fear. Often, also, the terms imply alertness in watching out for difficulties or dangers or cunning in escaping them (they . . . had a *wary* eye for all gregarious assemblages of people, and turned out of their road to avoid any very excited group of talkers—*Dickens*) (we must always be *wary* of those who with sounding brass and a tinkling cymbal preach the "ism" of appeasement—*Roosevelt*) (our domestic dogs are descended from wolves . . . they may not have gained in cunning, and may have lost in *wariness*—*Darwin*) **Chary** and **chariness** imply the cautiousness of those who are careful of what they have or what they can give, say, or do and proceed with great reserve or discretion (I am *chary* of admitting native differences between the sexes, but I think that girls are less prone than boys to punish oddity by serious physical cruelty—*Russell*) (my business experience has taught me to be *chary* of committing anything of a confidential nature to any more concrete medium than speech—*Faulkner*) (there was no fastidious overrefined *chariness* in the use of that name—*F. W. Robertson*) **Calculating** and **calculation** imply the caution of one who carefully and deliberately plans the way to attain his own and often selfish end taking into account every possible danger and the way in which it can be met (some day the American boy's outlook upon the future may be as clear and *calculating* as that of his European brother—*Grandgent*)

<only in regard to la France do they [the French] permit themselves illusions. Only here does sentiment triumph freely and completely over *calculation*—*Brownell*> The suggestion of selfish prudence that disregards the cruelty of the means, provided the end is attained, is often so strong in these words that the implication of cautiousness is lost and that of coldhearted scheming or of deliberate cruelty takes its place <the terrible men are the men who do everything in cold blood, icily, with *calculation*—*Hearn*>

Ana *watchful, vigilant, alert: prudent, provident, foresighted, forethoughtful, discreet (see under PRUDENCE): heedful, careful (see negative adjectives at CARELESS)

Ant adventurous, temerarious —*Con* venturesome, daring, rash, reckless, foolhardy (see ADVENTUROUS): *precipitate, impetuous, headlong

cavalcade *procession, parade, cortege, motorcade

Ana *succession, progression, chain, train: array, *display

cease-fire *truce, armistice, peace

cede surrender, abandon, waive, resign, yield, *relinquish, leave

Ana *grant, concede, award, accord, vouchsafe

Con withhold, hold, hold back, keep back, retain (see KEEP)

celebrate commemorate, solemnize, observe, *keep

celebrated renowned, *famous, famed, eminent, illustrious

Ana prominent, conspicuous, outstanding, signal (see NOTICEABLE)

Ant obscure

celebrity *fame, renown, glory, honor, éclat, reputation, repute, notoriety

Ana prominence, conspicuousness (see corresponding adjectives at NOTICEABLE)

Ant obscurity

celerity, **alacrity**, **legerity** are comparable when they are used in reference to human beings and denote quickness in movement or action. **Celerity** stresses speed in moving or especially in accomplishing work <she could, when she chose, work with astonishing *celerity*—*Bennett*> <the human brain, we are reminded, acts at times with extraordinary *celerity*—*Cardozo*> **Alacrity** emphasizes promptness in response more than swiftness in movement, though the latter is usually implied <“You must wait till she sends for you—” and she winced a little at the *alacrity* of his acceptance—*Wharton*> Very often, also, it connotes eagerness or cheerful readiness <working away at his subject with the *alacrity* . . . of a man . . . fulfilling the very office . . . for which nature had designed him—*L. P. Smith*> **Legerity**, a less common word than the others, refers more

to the quality than to the rate of speed and implies nimbleness and ease <cover the ground with the *legerity* of a trained runner> <when the mind is quickened . . . the organs . . . newly move, with . . . fresh *legerity*—*Shak.*> <the *legerity* of the French mind made the Gallic visitor quick to comprehend his desire for solitude—*Wylie*> *Ana* expedition, dispatch, speed, hurry, *haste: quickness, rapidity, swiftness, fleetness (see corresponding adjectives at FAST): velocity, *speed: agility, briskness, nimbleness (see corresponding adjectives at AGILE)

Ant leisureliness —*Con* slowness, deliberateness or deliberation, dilatoriness (see corresponding adjectives at SLOW): *lethargy, languor

celestial *adj* **Celestial**, **heavenly**, **empyrean**, **empyrean** mean of, relating to, or fit for heaven or the heavens. **Celestial** (opposed to *terrestrial*) may refer either to the visible heavens (the region surrounding the earth and seemingly enclosed by the sky) or to the religious conception of heaven or the heavens (in Christian use, the abode of God, the angels, and the blessed dead); thus, a *celestial* globe is one on whose surface the stars, planets, comets, and nebulae are depicted; a *celestial* body is a star, planet, or other aggregation of matter that forms a unit for astronomical study; a *celestial* visitant is an angel or other spirit from the spiritual heaven; *celestial* bliss is the happiness enjoyed by the residents of heaven <angels by Raphael . . . whose serene intelligence embraces both earthly and *celestial* things—*Hawthorne*> **Heavenly**, although it is applicable, especially in nontechnical use, to the visible heavens <*heavenly* bodies—*Bacon*> or to pagan conceptions of Olympus or other abodes of the gods <the immortal sun, who, borne by *heavenly* steeds his race doth run—*Shelley*> is far more often applied to heaven as conceived by Jews and Christians and is apt, therefore, to suggest spiritual qualities <your *heavenly* Father—*Mt* 6:14> <they desire a better country, that is, an *heavenly*—*Heb* 11:16> <I thought that liberty and heaven to *heavenly* souls had been all one—*Milton*> **Empyrean** and **empyrean** suggest association with the empyrean, either as thought of in ancient and medieval cosmology as the highest celestial sphere, a region of light or fire <from the courts of the *empyrean* dome came forth . . . a fiery car—*Praed*> or, more often, as conceived by various theologians and poets as the highest of the spiritual heavens, where God is and reigns in spiritual light the fire <into the Heaven of Heavens I have presumed . . . and drawn *empyrean* air—*Milton*> The words are often weakened in idiomatic use to mean little more than outstanding of its kind <well-meaning ineptitude, that rises to *empyrean* absurdity—*Dworkin*> <*empyrean* aplomb—*Basso*>

Ana ethereal, aerial, *airy: divine, spiritual, *holy

Ant terrestrial —*Con* *earthly, mundane, earthy, worldly, sublunary: *infernal, hellish, chthonian

celibate *adj* *unmarried, single, virgin, maiden

cenobite *recluse, eremite, hermit, anchorite

Ana monk, friar, *religious, nun

censorious faultfinding, *critical, hypercritical, captious, carping, caviling

Ana reproaching or reproachful, chiding (see corresponding verbs at REPROVE): condemning or condemnatory, denouncing or denunciatory, reprehending (see corresponding verbs at CRITICIZE)

Ant eulogistic —*Con* praising, extolling, lauding or laudatory, acclaiming (see corresponding verbs at PRAISE): complimenting or complimentary, flattering, adulatory (see corresponding nouns at COMPLIMENT)

censure *vb* *criticize, reprehend, blame, condemn, denounce, reprobate

Ana reprimand, rebuke, reproach, *reprove: upbraid, berate, tongue-lash (see SCOLD)

Ant commend —*Con* applaud, compliment, recommend (see COMMENT); eulogize, laud, *praise

center *n* **Center, middle, midst, core, hub, focus, nucleus, heart** are comparable when meaning the point, spot, or portion of a thing which is comparable to a point around which a circle is described. **Center** approximates more or less closely its strict geometrical sense as the point within a circle or sphere that is equidistant from every other point on the circumference or is the average distance from the exterior points of a body or figure (the *center* of a table) (the *center* of the earth) *Center* may be extended to a thing or a part of a thing which suggests a geometrical center especially in being the point around which the rest rotates or revolves (each airy thought revolved round a substantial *center*—*Wordsworth*) (the old school was the *center* of our lives, somehow: dances, socials, Sunday services—*McCourt*) or at which all lines (as of activity) converge (draw to one point, and to one *center* bring beast, man, or angel, servant, lord, or king—*Pope*) or from which every line, or branch radiates (a railroad *center*) (a power *center*) or which lies midway between extremes (in Europe a party of moderate views, neither conservative nor radical, is often called the *center*) **Middle** is less precise than *center* and suggests a space rather than a point; it is the part of an object which includes and surrounds the center; thus, the *middle* of a room is the central portion of it (they have what they call a central depot here, because it's the *middle* of England—*Bennett*) **Middle**, unlike *center*, also applies to what has duration (the *middle* of the night) and to merely linear extension (the *middle* of the road) **Middle** may be applied freely to something which lies between the beginning and end (as of a process, a course, or a piece of work) (in this, as in most questions of state, there is a *middle*—*Burke*) (he was stopped in the *middle* of his speech) (a play should have a beginning, *middle*, and end) **Midst** is often used in place of *middle* for a point or spot well within a group or number of enveloping persons or objects or of things (as duties, affairs, and burdens) that surround or beset one; however it seldom occurs except in a prepositional phrase introduced by *in, into, from, out of* (he stood in the *midst* of a crowd) (he penetrated into the *midst* of the forest) (why it was he should feel in the *midst* of all these people so utterly detached and so lonely—*Bromfield*) (sense of right, uppermost in the *midst* of fiercest strife—*Wordsworth*) **Core** basically denotes the central portion of certain fruits (as the apple) which is made up of papyry or leathery envelopes containing seeds and is often extended to something that similarly lies at the center of a thing and that resembles an apple core in being unconsumed or unused (the *core* is the unburnt portion of a coal or of a lump of lime) or in forming a firm central mass in a growth (the *core* of a boil) or in having a different character from that which surrounds or encloses it (a corn cob is the *core* of an ear of Indian corn) (in cabinetmaking soft wood on which veneers are glued is called a *core*) or often in being the very center of a thing's life, significance, or power (I will wear him in my heart's *core*, ay, in my heart of heart—*Shak.*) (the Romans . . . proved rebellious to the idea that living is an art; yet it may well be that they still retained that idea at the *core* of their morality—*Ellis*) (a hard *core* of perhaps ten percent who have been in the Party for fifteen years—*Schlesinger* b. 1917) **Hub**, which primarily denotes the central and usually solid part of a wheel from which the spokes radiate and which rotates on (or with) the axle, is often extended to a place, person, or thing on which other places, persons,

or things depend for their life, activity, ideas, or progress (Boston Statehouse is the *hub* of the solar system—*Holmes*) **Focus** is applicable to a point of convergence or concentration or, sometimes, in nontechnical use, of emanation; thus, the point at which rays of light meet after reflection or refraction is called a *focus*; a person to whom all eyes are turned is the *focus* of attention (a place of exchange for the merchandise of East and West . . . the *focus* of a network of trade routes—*Buchan*) **Nucleus** applies especially to a vital and usually small and stable center about which matter is gathered or concentrated or to which accretions are made (the *nucleus* of a cell) (the *nucleus* of an atom) (a small but good collection of books as a *nucleus* for his library) (unable to re-create a satisfactory social group from the *nucleus* of his own individuality—*Day Lewis*) **Heart** applies to a place or thing that lies well within something (as a region or system) and which determines the essential character of the whole or serves as a vital, positive, or motivating part (the economic *heart* of the nation has gradually shifted to the west) (exploits done in the *heart* of France—*Shak.*) (Rome was the *heart* and pulse of the empire—*Buchan*) (the discernment and understanding with which he penetrates to the *heart* and essence of the problem—*Cardozo*)

Con *circumference, periphery, perimeter, compass: bounds, confines, limits (see singular nouns at LIMIT)

center *vb* **Center, focus, centralize, concentrate** are comparable (though not closely synonymous) because all mean to draw to or fix upon a center. **Center** strongly implies a point upon which things turn or depend; typically the term is followed by a prepositional phrase (as with *in, on, or upon*) that names the thing (or sometimes the person) upon which all responsibility or all attention is placed or around which anything or everything of a specified kind (as hopes, fears, or joys) turns (the authority was *centered* in one person) (the incident upon which the plot *centers*) (a common belief about art is that it *centers* about emotion—*Alexander*) (the man whose hopes and fears are all *centered* upon himself can hardly view death with equanimity, since it extinguishes his whole emotional universe—*Russell*) **Focus** implies a point at which a number and usually the total number of things of the same sort (as rays of light, waves of sound, attentions, or interests) converge and become one (the attention of the audience was *focused* upon the speaker) (the essential characteristic of poetry is its power of *focusing* the whole range of our sensibilities—*Binyon*) (how to get the sense of equity or fair play which prevails in many other spheres of action to *focus* upon these . . . disturbing economic questions is thus distinctively a moral issue—*Hobson*) **Centralize** is used of things (as government, authority, or administrative procedure) that may be either gathered about a center or divided, distributed, or diffused; it especially implies the placing of power and authority under one head or in one central organization or the bringing together of similar things at one point (authority is said to be *centralized* wherever a manager tends not to delegate authority to his subordinates—*Koontz & O'Donnell*) (the supporters of reorganization point out that the *centralized* type of administrative organization has worked well with the national government, with the better-governed cities, and with American business—*Dimond & Pflieger*) (by *centralizing* . . . the reserves of the member banks within a district, the Federal Reserve System builds up a large sum of money and credit upon which any member bank may call—*Goodman & Moore*) **Concentrate** differs from the other words not only in being more widely applicable but also in its greater emphasis upon human

skill and human methods, discipline, or effort in effecting its purpose; the word may be used not only with reference to what may be centralized or focused and to much that may be centered but is applicable also to material substances that can be reduced in volume (as by dehydration or evaporation), thereby gaining in strength or intensity (see also *COMPACT*) <here Hannibal . . . *concentrated* the forces which had been gathered from such distant countries—*R. B. Smith*> <but neither of the men paid much attention to these things, their eyes being *concentrated* upon the little flat stone—*Hardy*> <I think that it is a test which we may apply to all figure-painters . . . if we ask whether the figures are really occupied by what they are doing, if the movements of the body are *concentrated* on the particular business of the moment—*Binyon*>

Ana *depend, hinge, hang, turn: rest, *base, ground

central, **focal**, **pivotal** are more closely comparable when they mean dominant or most important than when they refer to a literal or material point (as a center, focus, or pivot). **Central** applies to what is regarded as the center because more important than all the rest in that everything else of the same kind depends on it or derives from it <the *central* virtues . . . courage, honor, faithfulness, veracity, justice—*Lippmann*> <the *central* character in a story> <the *central* policy of a nation> <the *central* trouble with America is conformity, timorousness, lack of enterprise and audacity—*Mencken*> **Focal** implies usually a center that is a focus (as of interest, concern, or significance) or that becomes the point on which or in which every or all attention, interest, or activity is concentrated <the *focal* position of the president as formulator or expositor of the nation's opinion is obvious—*Rossiter*> <if we are to make some sense out of this galaxy of recorded experience we are in need of some *focal* ideas about which to organize the material—*Kardiner*> The term occurs frequently in the phrase *focal point* which equals *focus* <quite unaccustomed to being a *focal* point of interest on the part of such highbrows, I made the most of the situation, and was very extravagant in my replies—*Sidney Lovett*> **Focal** may shift its emphasis and attribute such importance to the thing qualified as to suggest that it deserves to be the focus (as of attention or interest) <Miss Grau's tendency to blur or confuse her own point of view with that of her *focal* characters—*Peden*> <the other *focal* elements in American policy toward Europe—*Bundy*> **Pivotal** implies an importance that equals that of pivot (a fixed pin or axis upon which something turns) and suggests that the item so qualified is one on which some larger issue is wholly dependent and that it is therefore cardinal or vital <so we return to the president as the *pivotal* point, the critical element in reaching decisions on foreign policy—*Acheson*> <something important is about to happen . . . a succession of events that will be *pivotal* in her experience—*DeVoto*> <the *pivotal* issue in this controversy> <the presidential election will be decided by the vote in a few *pivotal* states>

Ana *dominant, paramount, predominant, preponderant: outstanding, salient, signal (see *NOTICEABLE*): important, significant (see corresponding nouns at *IMPORTANCE*)

centralize *center, focus, concentrate

Ana *gather, collect, assemble: *accumulate, amass: *compact, consolidate, unify

Con *scatter, disperse, dispel, dissipate: *distribute, divide: apportion, *allot, allocate

cerebral *mental, intellectual, psychic, intelligent

ceremonial *adj* **Ceremonial**, **ceremonious**, **formal**, **conventional**, **solemn** are comparable when they mean characterized or marked by attention to the forms, procedures, and details prescribed as right, proper, or requisite. Both

ceremonial and **ceremonious** imply strict attention to and regard for what is prescribed by the etiquette or tradition of a court or of polite society, by the ritual of a church, or by the formalities of the law for a ceremony or a proceeding. They are sometimes interchangeable <Duncan dropped back, whether from reverence or ridicule his father had never discovered, into the *ceremonial* usages of the past—*Glasgow*> <an age in which no lady was too frail to attend a play alone . . . seemed to her, on the whole, better worth living in than the *ceremonious* era that had witnessed her fall—*Glasgow*> <its worship is not highly *ceremonious*—*Shepherd*> but more often **ceremonial** distinctively suggests the existence of and conformance to an elaborate, prescribed, and usually ritualistic code of procedures, while **ceremonious** stresses elaborate, often punctilious and dignified procedures or, in reference to persons, a tendency to formality and ceremony; thus, a wedding is a **ceremonial** occasion but not one at which the participants need be excessively **ceremonious** <grave **ceremonial** occasions, like birth and death and the assumption of manhood—*Buchan*> <the president is . . . the **ceremonial** head of the American government . . . He greets distinguished visitors, lays wreaths on the tomb of the Unknown Soldier, bestows the Medal of Honor on flustered pilots—*Rossiter*> <the Zuñi are a **ceremonious** people, a people who value sobriety and inoffensiveness above all other virtues. Their interest is centered upon their rich and complex **ceremonial** life—*Benedict*> <wine is a **ceremonial** drink in Normandy, where none is grown or made. It is not expected to taste good—*Liebling*>

Formal in comparison to **ceremonial** suggests set form or procedure rather than external ceremonies <a **formal** call> <**formal** dress> and in comparison to **ceremonious**, **formal** suggests stiffness, restraint, decorousness rather than impressive dignity or punctiliousness <rules are an integral part of German life, rules for behavior . . . for persons of every status, for every **formal** situation—*Mead*> <the habits of the family . . . may be termed **formal**, and old-fashioned by such visitors as claim to be the pink of the mode—*Scott*> **Conventional** applies to whatever is in accord with or governed by recognized, frequently artificial conventions or standards; it connotes lack of originality or independence <a **conventional** expression of regret> <the **conventional** white tie with men's full evening dress> <a highly **conventional** person> <a skillful . . . journalist, **conventional** and conformist except in a strong bent toward liberal humanitarianism—*Canby*> **Solemn** is used in relation to religious observances or services and to certain acts the conduct of which is prescribed by law. The term implies, usually, strict attention to every detail that is prescribed or allowed by the ritual of the church or by the formalities of the law; thus, a **solemn** Mass is one in which the full liturgy is followed; a **solemn** feast is one celebrated not only by the full liturgy but by such other ceremonial observances as processions and pageants <funerals . . . were as much social events as **solemn** obsequies—*Schlesinger* d. 1965> <having taken the **solemn** oath of office in the presence of my fellow countrymen—in the presence of our God—*Roosevelt*> **Ana** liturgical, ritualistic (see corresponding nouns at *FORM*)

ceremonial *n* ceremony, ritual, rite, liturgy, *form

ceremonious *ceremonial, formal, solemn, conventional
Ana impressive, *moving: *decorous, seemly, proper: stately, imposing, majestic, grandiose (see *GRAND*)
Ant unceremonious, informal

ceremony ceremonial, ritual, liturgy, rite, *form, formality

certain *adj* **1** positive, *sure, cocksure

Ana *confident, assured, sanguine

Ant uncertain —*Con* *doubtful, dubious, questionable
2 Certain, inevitable, necessary are comparable when they mean bound to follow in obedience to the laws of nature or of thought. What is **certain** does not admit of being described as probable even in the highest conceivable degree and is beyond question or dispute (death is the only future event we can regard as *certain*) <it is *certain* that effects must have a cause—*Bp. Butler*> What is **inevitable** (see also **INEVITABLE**) is as it must be (sometimes should be) according to some unchangeable law (as of nature, of logic, or of beauty). *Inevitable* often carries little suggestion of unavoidability but stresses finality (as in truth or rightness) or an ultimate character (as perfection) <the results obtained in an actual experiment . . . seem nonsensical . . . when we picture light as bullets, but perfectly natural and *inevitable* when we picture it as waves—*Jeans*> <the design is, indeed, so happy, so right, that it seems *inevitable*; the design is the story and the story is the design—*Cather*> What is **necessary** is logically or naturally inevitable and cannot be denied without resulting contradiction or frustration <most of the distinctions of law are distinctions of degree. If the states had any power it was assumed that they had all power and that the *necessary* alternative was to deny it altogether—*Justice Holmes*> <his plays are the *necessary* expression of his mind and character, not the *necessary* conditions of his existence—*Inge*>
Ant probable: supposed —*Con* possible, likely (see **PROBABLE**); precarious (see **DANGEROUS**)

certainty, certitude, assurance, conviction are comparable when denoting a state of mind in which one is free from doubt. **Certainty** and **certitude** both imply the absence of all doubt as to the truth of something; they are not always distinguishable in use, although philosophers and psychologists have often tried to distinguish the states of mind which they designate. The psychological differentiation of *certainty* as the state of mind induced by something of which there is objectively as well as subjectively not the slightest question, from *certitude* as the state of mind of one whose faith or belief is so strong that it resists all attack, has indubitably affected the meanings and the use of these terms in general use <some philosophies tend to destroy man's *certainty* of his own existence> <one has *certainty* of nothing in the future, even that the sun will rise tomorrow, but that does not weaken one's *certitude* that the world will go on indefinitely> <*certitude* is not the test of *certainty*. We have been cocksure of many things that were not so—*Justice Holmes*> *Certitude* is usually more personal and less objective than *certainty* and suggests deeper roots for one's freedom from doubt and less likelihood of a change of belief <one thing, however, we feel with irresistible *certitude*, that Mark Twain's fate was once for all decided there—*Brooks*> In its greater objectivity *certainty* also provides a term that may logically designate the quality of a thing believed <*certitude* is a mental state: *certainty* is a quality of propositions—*Newman*> <the suspense which was more terrible than any *certainty*—*Glasgow*> **Assurance** (see also **CONFIDENCE 2**) stresses sureness and confidence rather than certainty; the grounds of such sureness need not be objective proofs or the evidence of one's senses, for something of which one has assurance is typically something that is indemonstrable or is yet to happen; the word usually suggests implicit reliance on oneself or on one's powers, one's intuitions, or one's methods or complete trust in another (as a source of information, a supporter, a sovereign, or God) <I'll make *assurance* double sure, and take a bond of fate—*Shak.*> <faith is the *assurance* of things hoped for—

Heb 11:1 (RV)> <rather, it might be said that he went beyond hope to the *assurance* of present happiness—*More*>
Conviction usually implies previous doubt or uncertainty. It involves the idea of *certitude* but is not its equivalent, for *certitude* may or may not imply a rational basis for one's freedom from doubt, and *conviction* (see also **OPINION**) usually does. It differs from *certainty* in stressing one's subjective reaction to evidence rather than the objective validity of the evidence itself. *Conviction* is therefore commonly applied to the state of mind of one who has been or is in the process of being convinced <have lost the old American *conviction* that most people are good and that evil is merely an accident—*Malcolm Cowley*> <she does not wish me to go unless with a full *conviction* that she is right—*Conrad*>

Ana *belief, faith, credence: proof, demonstration (see under **PROVE**)

Ant uncertainty —*Con* doubt, skepticism, mistrust (see **UNCERTAINTY**)

certify 1 Certify, attest, witness, vouch are comparable when they mean to testify to the truth or genuineness of something. **Certify** usually implies a statement in writing, especially one that carries one's signature or seal or both or one that is legally executed; thus, a *certified* check carries the guarantee of a bank that the signature is genuine and that there are sufficient funds on deposit to meet it <they said their chemists . . . could *certify* on their honor that their extract contained no salicylic acid—*Heiser*>
Attest (see also **INDICATE**) implies oral or written testimony from a person in a position to know the facts, usually but not invariably given under oath or on one's word of honor; thus, when one says that something is well *attested*, he implies that there is sufficient documentary or oral testimony from competent persons to warrant its acceptance <the pleader . . . had witness ready to *attest* . . . that every article was true—*Swift*> <Washington's strong natural love of children, nowhere *attested* better than in his expense accounts—*Fitzpatrick*> In technical legal use *attest* is used chiefly in reference to the official authentication of a document (as a will, a deed, or a record) or to the guaranteeing of the genuineness of a signature or a statement or an oath by a qualified public agent (as a notary public or a commissioner of deeds) <an *attested* copy of the marriage record—*Cather*> **Witness** implies attestation, not necessarily official or notarial, of a signature (as of a statement, a will, or a bond) by one who has seen that signature actually made and who subscribes his own name to the document as evidence of its genuineness <he called in two of his servants to *witness* the signature to his will> **Vouch** (usually with *for*) rarely implies official or legal proof, which the other words in this group usually do imply, but it suggests that the one who testifies is a competent authority or a reliable person who will stand behind his affirmation and support it further if necessary <for the exactness of this story [of a purported miracle] in all its details, Bishop James of Voragio could not have *vouched*, nor did it greatly matter. What he could *vouch for* was the relation of intimacy and confidence between his people and the Queen of Heaven—*Henry Adams*>

Ana avouch, avow, aver, *assert, profess

2 endorse, accredit, *approve, sanction

Ana vouch (see **CERTIFY**): *authorize, commission, license

Con reject, repudiate, refuse (see **DECLINE**)

certitude *certainty, assurance, conviction

Ana *belief, faith, credence, credit: sureness, positiveness, cocksureness (see corresponding adjectives at **SURE**)

Ant doubt —*Con* *uncertainty, skepticism, mistrust

chafe *abrade, excoriate, fret, gall
Ana *injure, hurt, damage, impair; flay, *skin, peel:
 *abuse, maltreat, outrage: *irritate, exasperate
chaff *vb* *banter, kid, rag, jolly, rib, josh
Ana tease, tantalize, *worry: *ridicule, deride, twit, taunt
chagrined mortified, *ashamed
Ana discomfited, abashed, embarrassed, disconcerted
 (see EMBARRASS): humiliated (see ABASE): discomposed, perturbed, upset (see DISCOMPOSE)
chain *n* series, train, string, sequence, *succession, progression
challenge *vb* *face, brave, dare, defy, beard
Ana question (see ASK): dispute (see DISCUSS): claim, *demand, require: *invite, solicit
chamber *room, apartment
champ *vb* *bite, gnaw, gnash
Ana *crush, smash, mash, macerate
champion *n* vanquisher, *victor, winner, conqueror
champion *vb* back, advocate, uphold, *support
Ana *contend, fight, battle: espouse (see ADOPT): defend, justify, vindicate, *maintain: aid, assist, *help
Ant combat —*Con* oppose, *resist, withstand, fight: condemn, denounce (see CRITICIZE)
chance *n* 1 Chance, accident, fortune, luck, hap, hazard denote something that happens without an apparent or determinable cause or as a result of unpredictable forces. Chance serves often as a general term for the incalculable and fortuitous element in human existence and in nature and is usually opposed to law (see PRINCIPLE) (it is incorrect to say that any phenomenon is produced by chance; but we may say that two or more phenomena are conjoined by chance . . . meaning that they are in no way related by causation—*J. S. Mill*) Chance often retains implications derived from its early association with the casting of dice or lots and the selection of one out of many possibilities by this means; consequently it may mean determination by irrational, uncontrollable forces (leave things to chance) or it may mean degree of probability (his chance of success is one in ten) or it may mean one possibility of success among many possibilities of failure (he is always willing to take a chance) Accident is interchangeable with chance only when a particular event or situation is in mind (it happened by accident (or by chance)) It differs from chance mainly in its emphasis on lack of intention (buildings are not grouped like that by pure accident—*Cather*) (meeting by accident, we hovered by design—*Emily Dickinson*) Fortune, owing to its historical connection with the ancient Roman goddess of chance, Fortuna, often designates the hypothetical cause of what happens fortuitously (fortune favored him in his first attempt) It also often suggests qualities ascribed to the goddess (as variability, fickleness, and malignity) (I may conquer fortune's spite by living low, where fortune cannot hurt me—*Shak.*) (vicissitudes of fortune—*Gibbon*) Fortune is also applied to the issue or outcome of an undertaking the success of which is problematical (the fortunes of war) (the country virtually drops everything . . . to follow the fortunes of the two teams engaged in the World Series—*Harold Rosenthal*) Luck differs from fortune chiefly in its connotations. It not only lacks the dignity accruing to fortune through the latter's mythological associations, but it is somewhat colored by its association with gambling. It is preferable in contexts where fortune would seem bookish (bad luck followed him all his days) (it was just our luck to miss that train) (the fisherman had good luck today) Luck unqualified can, however, imply success or a happy outcome, as fortune unqualified rarely does

(I wish you luck) (he had luck in all his adventures) (with luck and the help of atomic research our children may be safe from this grim disease—*A. E. Stevenson*) Hap is rather neutral and commonly denotes what falls or, more often, has already fallen to one's lot (lives that had known both good and evil hap) (by some bad tide or hap . . . the ill-made catamaran was overset—*Melville*) Hazard, which basically denotes a game of dice in which the chances are complicated by arbitrary rules, is often used in place of accident, especially when there is the traceable but not predictable influence of existing conditions or of concomitant circumstances (men and women danced together, women danced together, men danced together, as hazard had brought them together—*Dickens*) (the choice [of examples] has been determined more by the hazards of my recent reading than by anything else—*Huxley*)

Ana contingency, emergency, pass, *junction, exigency
Ant law (see PRINCIPLE) —*Con* inevitableness or inevitability, necessariness or necessity, certainty (see corresponding adjectives at CERTAIN)

2 *opportunity, occasion, break, time
Ana possibility, likelihood, probability (see corresponding adjectives at PROBABLE): *prospect, outlook, foretaste, anticipation

chance *vb* 1 *happen, befall, betide, occur, transpire
 2 *venture, hazard, risk, jeopardize, endanger, imperil
Ana dare, beard, *face: *meet, encounter, confront

chance *adj* *random, haphazard, chancy, casual, desultory, hit-or-miss, happy-go-lucky

chancy haphazard, chance, hit-or-miss, happy-go-lucky, *random, casual, desultory

change *vb* Change, alter, vary, modify (and their corresponding nouns change, alteration, variation, modification) are comparable when denoting to make or become different (or when denoting a difference effected). Change and alter are sometimes interchangeable; thus, conditions may change (or alter) for the better. Change, however, usually implies either an essential difference, even a loss of identity, or the substitution of one thing for another (can the Ethiopian change his skin, or the leopard his spots?—*Jer* 13:23) (and Earth be changed to Heaven, and Heaven to Earth—*Milton*) (this chamber changed for one more holy—*Poe*) while alter stresses difference in some particular respect (as in form or detail) without implying loss of identity (one may alter a coat without changing its style) (the whole existing order must be, if ever so slightly, altered—*T. S. Eliot*) (external circumstances may change catastrophically, as during a war; or gradually, as when means of production are altered—*Huxley*) Vary frequently implies a difference or a series of differences due to change (as by shifting, diversification, or growth) (the temperature varies greatly during the day) (any intelligent effort to vary or improve the effect—*Henry Adams*) Sometimes it implies a deviation from the normal, the conventional, or the usual (the prospect tendered by the Communists to the peasants varies with the type of discontent in the particular area—*W. O. Douglas*) (this is not a proceeding which may be varied . . . but is a precise course . . . to be strictly pursued—*John Marshall*) Modify suggests a difference that limits or restricts; thus, an adjective is said to modify a noun because it definitely reduces the range of application of that noun (as old in "old men" and red in "a red rose"). Often the word implies moderation (as of severity) or toning down (as of excess) (the proximity of the ocean modifies the temperature—*Amer. Guide Series: R. I.*) (Sophia was at first set down as overbearing. But in a few days this view was modified—*Bennett*) Modify may

sometimes suggest minor changes or absence of radical changes <history shows you men whose master-touch not so much *modifies* as makes anew—*Browning*> <the *aeroplane*—as it was called for many years before the word was *modified* to *airplane*—*Harlow*>

Ana *transform, metamorphose, transmute, convert, transmogrify: *exchange, interchange: fluctuate, oscillate (see SWING *vb*)

Con settle, *set, establish, fix: endure, abide, *continue, persist

change *n* 1 alteration, variation, modification (see under CHANGE *vb*)

Ana *variety, diversity: divergence, *deviation, aberration

Ant uniformity: monotony

2 Change, mutation, permutation, vicissitude, alternation are comparable especially in their concrete senses. **Change**, the inclusive term, denotes not only any variation, alteration, or modification in a thing (as in its form, substance, or aspect) but also any substitution of one thing for another <he could detect no *change* in her when they met again> <the body undergoes *changes* during puberty> <a *change* of season> <a *change* of clothes often makes a *change* in one's appearance> <poor faithful dogs, lovers of novelty and *change* of scene—*Replier*> **Mutation** and **permutation** are applied to a change within a thing or in a combination of things regarded or functioning as a unit. **Mutation** stresses lack of permanence or stability; it has been applied to variations or alterations that are expected only because they are inherent in the nature of things but are otherwise fortuitous or unaccountable <O world! But that thy strange *mutations* make us hate thee, life would not yield to age—*Shak.*> More typically the term connotes suddenness and unpredictableness but seldom implies impossibility of explanation; often also it implies orderly change <so far as reality means experienceable reality, both it and the truths men gain about it are everlastingly in process of *mutation*—*mutation* towards a definite goal, it may be—*James*> **Permutation** implies transposition within a group or combination of things without change in the constituent elements or parts of that group or combination. It is now used largely in reference to a change in position within a group of differentiable items (as digits, letters, colors, or sounds) <the 26 letters of the alphabet are capable of endless combinations and *permutations*> It may imply a rearrangement of constituent elements that effects a change in relations, emphasis, or significance and so gives a new form to what is substantially the same material <conventions beget conventions, to be sure, and their ramifications and *permutations* are endless—*Loves*> <by whatever *permutations* and combinations may be necessary, we may gradually move somewhat nearer to that reign of law—*Davis*> **Vicissitude** (see also DIFFICULTY) implies a change so great as to seem a substitution for, or a reversal of, what has been. Sometimes it is applied to such changes as occur in natural succession or from one extreme to another <Nature indeed vouchsafes for our delight the sweet *vicissitudes* of day and night—*Cowper*> <like walking in a wood where there is . . . a constant *vicissitude* of light and shade—*J. R. Lowell*> More often it is applied to a sweeping and unpredictable change that overturns what has been and so has the character of a revolution or an upheaval <the place and the object gave ample scope for moralizing on the *vicissitudes* of fortune, which spares neither man nor the proudest of his works, which buries empires and cities in a common grave—*Gibbon*> This implication of reversal is now so strong that the original implication of succession in turn is disappearing. **Alternation**, though logically used

only of the succession of two things in turn, is also used, as *vicissitude* once was, of two or more things <the *alternation* of the seasons>

Ana metamorphosis, transformation, conversion, transmutation, transmogrification (see under TRANSFORM): substitute, surrogate, shift (see RESOURCE)

changeable, changeful, variable, mutable, protean are comparable when meaning having or showing a marked capacity for changes or a marked tendency to alter itself or be altered under slight provocation. **Changeable**, the ordinary and most comprehensive term of this group, usually suggests this as a characteristic or property that is the result of such reactions as inconstancy, fickleness, an unsettled state, a ready responsiveness to certain influences, or a roving habit <*changeable* weather> <she was a fresh, cool, dewy thing . . . fitful and *changeable* with the whim of the moment—*Hawthorne*> <a *changeable* silk is one that seems to change its color with each change of position or point of view> **Changeful** is a more poetic term than *changeable*; it throws greater stress on the fact of changing frequently than on the underlying characteristic or property which manifests itself in such changes <the *changeful* April day—*Southey*> <he felt that life was *changeful*, fluid, active, and that to allow it to be stereotyped into any form was death—*Wilde*> <all your charms more *changeful* than the tide—*Millay*> **Variable** carries an implication of subjection to frequent and often deeper changes than either of the preceding words; it stresses shifting or fluctuation as a characteristic or property and therefore usually connotes uncertainty or unpredictability <a region of *variable* winds> <man himself was a *variable*, mixed and transitory creature; he could not escape the law of his own being—*L. P. Smith*> <the methods of statistics are so *variable* and uncertain . . . that it is never possible to be sure that one is operating with figures of equal weight—*Ellis*> **Mutable** also implies subjection to change, but it suggests an opposition to *unchanging, fixed, or permanent* and therefore is less often applied to something fluctuating and variable than to something living, growing, or developing that shows changes due to progression or retrogression or to external influences or conditions over which the thing affected has no control <my lord, you know what Virgil sings, woman is various and most *mutable*—*Tennyson*> <our view of any of these concepts, say justice, is *mutable*, changing from century to century, from place to place—*G. W. Johnson*> <our valuation of poetry . . . depends upon several considerations, upon the permanent and upon the *mutable* and transitory—*T. S. Eliot*> **Protean** suggests a capacity for assuming many different forms or shapes without loss of identity; the term therefore implies changeability with respect to outer manifestations rather than inner character or nature <an amoeba is a *protean* animalcule> <the *protean* genius of Shakespeare> <for poetry is *protean* in its moods and dispositions, and its diction changes with its bents and its occasions—*Loves*> <but an idea is a misty, vague object that takes on *protean* shapes, never the same for any two people—*Dwight Macdonald*>

Ana unstable, *inconstant, mercurial, capricious, fickle: mobile, *movable

Ant stable: unchangeable —**Con** set, fixed, settled, established (see SET *vb*): unceasing, *everlasting: enduring, abiding, persisting or persistent (see corresponding verbs at CONTINUE)

changeful *changeable, variable, protean, mutable

Ana fluid (see LIQUID *adj*): *active, dynamic, live: progressing, advancing (see ADVANCE *vb*): declining, deteriorating, degenerating (see corresponding nouns

at DETERIORATION)

Ant changeless; stereotyped —**Con** constant, uniform, *steady; stable, *lasting, durable, perdurable

channel 1 passage, *strait, narrows, sound

2 **Channel, canal, conduit, duct, aqueduct** all mean something through which a fluid (as water) is led or flows. **Channel** implies the natural bed of a stream of running or moving waters; the term is also applied to a deep portion of a stream or body of water either where the main current flows or where a good passage for boats exists <the brook's *channel* is nowhere more than three feet deep> <the *channel* for ships into the harbor needs to be dredged frequently on account of the drifting sands> **Channel** often applies also to a natural or an artificial passageway (as a tube, a gutter, a ditch, or a trough) through which something (as waste) flows or (as chain or wire) runs <the poison *channel* in a snake's fangs> <the *channel* of a tackle block through which the rope runs> **Canal** is used for an artificial waterway which connects two bodies of water <the New York State Barge *Canal* connecting Lake Erie and the Hudson river> <the Panama *Canal* connecting the Atlantic and Pacific oceans> It is also used in designations of various anatomical grooves or tubular channels (as for the containing of some structure or the passage of some substance) <blood vessels of bone occupy the haversian *canals*> <the alimentary *canal* through which food passes in the course of digestion> **Conduit** may be applied to an artificial or natural passageway that serves to convey or transmit a fluid <volcanoes . . . made by discharge of material through a more or less cylindrical *conduit* in the earth's crust—*Howell Williams*> but the term is more often used specifically for a large heavy pipe which conveys water from a reservoir to a point where it is distributed or for a pipe that carries the wires or cables of an electric system <into it through underground arteries of *conduits* and pipes, are fed the electric power, gas, and water supply—*Science*> **Duct** has specific application to one of the small anatomical tubes through which a secretion is conveyed to where it is needed or is excreted from the organism <thoracic *duct*> <bile *duct*> The term is also used in reference to any of the pipes of a furnace or an air-conditioning system through which air is taken in, circulated, or discharged. **Aqueduct** is applied to an artificial channel for water (as a conduit) and especially to an artificial structure, in appearance like a bridge, for carrying water over a river, or over a gorge or gap between elevations.

Ana passage, pass (see WAY)

3 vehicle, *mean, instrument, instrumentality, organ, agency, agent, medium

chant *vb* *sing, troll, carol, descant, warble, trill, hymn, intone

chaos 1 *confusion, disorder, disarray, jumble, clutter, snarl, muddle

Ant system —**Con** ordering or order, organization (see corresponding verbs at ORDER)

2 *anarchy, lawlessness

chaperon *vb* *accompany, attend, escort, convoy, conduct

Ana protect, shield, guard, safeguard (see DEFEND)

char *vb* *burn, scorch, sear, singe

character *n* 1 **Character, symbol, sign, mark** are comparable in the specific sense of an arbitrary or conventional device that is used in writing and in printing, but is neither a word nor a phrase nor a picture. **Character** suggests the distinctive form or shape of such a device <an inscription in runic *characters*> It is applicable to a letter of an alphabet, to a digit in arithmetical notation, to a note in musical notation, or to a single and simple figure or

diagram which is the conventional representation of such a directive or indicative value as a comma (,), a direction to delete (Ø), a minute in degree (′), or an indication of G clef in music (G). **Symbol** may be used interchangeably with *character* in this sense; more typically it is employed when the meaning or significance of the character rather than its shape is stressed; thus, for each letter in the English alphabet there are various *characters* (as small letter and capital or italic and boldface) for use in writing and printing but each letter, whatever the *character* used to express it, is a *symbol* for a speech sound; the *character* ? is the *symbol* used to indicate that a question has been asked. *Symbol* is sometimes extended to other devices than those strictly called *characters*, such as abbreviations <O is the *symbol* for oxygen>, as diagrams or schematic figures <☉ is the *symbol* for full moon in calendars>, or as more or less arbitrary arrangements of numerals, letters, or other characters <12mo or 12° is the *symbol* for duodecimo> **Sign**, like *symbol*, stresses the meaning rather than the form of the device; unlike *symbol*, however, it is seldom interchangeable with *character*, either because it may be a complicated device involving many characters or because it is less arbitrary and actually suggests through its shape or form the thing which it signifies. There is a tendency therefore to prefer *sign* to *symbol* when the device is complicated or in its form gives a hint of what it represents, either because it is a schematic representation of the thing <N is a highway *sign* for double right curves> or because it has figurative associations with the idea represented <→, an arrow, or *sign* indicating direction> **Sign**, however, is used idiomatically of characters indicating a mathematical operation <the plus *sign* +> <the minus *sign* —> and of those indicating one of the twelve divisions of the zodiac <♈ is the *sign* of Aries, the Ram> **Mark** comes closer to *character* than *symbol* or *sign*, because it carries little, if any, suggestion of reference to an idea. It is the ordinary designation of any of various characters that are used to make clear the meaning of a passage but that add nothing to that meaning <punctuation *marks*, such as the comma , or the question mark ?> or that indicate to the eye how words should be pronounced <pronunciation *marks* such as the acute accent ´ or the cedilla ç> <diacritical *marks* such as ¨ over the vowel a>

2 *quality, property, attribute, accident

Ana characteristic, peculiarity, distinctiveness or distinction, individuality (see corresponding adjectives at CHARACTERISTIC)

3 individuality, personality, complexion, temperament, temper, *disposition

Ana *mind, intellect, soul, intelligence: *soul, spirit: *courage, mettle, spirit, resolution

4 nature, description, *type, kind, ilk, sort, stripe, kidney

5 reference, recommendation, testimonial, *credential

characteristic *adj* **Characteristic, individual, peculiar, distinctive** are comparable when they mean indicating or revealing the special quality or qualities of a particular person or thing or of a particular group of persons or things. **Characteristic** stresses the indication or revelation not only of what is essential or typical, but of what distinguishes and serves to identify the person, the thing, or the group; the word, however, fixes the attention on the thing considered more as it is in itself than as it seems in contrast or relation to other things <he answered with *characteristic* courtesy> <it was *characteristic* of the relationship between these two that, in all the pleadings and protests of the poor deferred lover, Sally never made the offer of convention and custom to release him—*Deland*> <a fertile oasis possesses a *characteristic* color scheme of its own—*Huxley*> **Individual** (see also

SPECIAL) not only implies a reference to a particular person or thing but also places much more stress on qualities that distinguish him or it from all other members of the same class or kind than does *characteristic*; it therefore usually applies to something that indicates or reveals a personality or a nature that is different from others (that singularly *individual* voice of Tom's—mature, confident, seldom varying in pitch, but full of slight, very moving modulations—*Cather*) (the *individual* idiosyncrasies of each member of the great family—*Anderson*) **Peculiar** (see also STRANGE) comes close to *individual*; it usually implies a reference to a person or thing as he or it is in himself or itself and as differentiated from all others of the same kind. It may, however, apply to such a class as a sex, a race, or a people. In this use, the term does not, as in its more common derived sense, necessarily carry any hint of strangeness or oddness; rather it suggests private and undisputed possession (as of a quality, a character, an emotion, or a significance) (a grief that was private and *peculiar*—*Meredith*) (a drowsy fervor of manner and tone which was quite *peculiar* to her—*Hardy*) (in these aspects . . . of his work we pretend to find what is individual, what is the *peculiar* essence of the man—*T. S. Eliot*) (habits both universal among mankind and *peculiar* to individuals—*Allport*) **Distinctive** implies the possession of an individuality or peculiarity that marks the thing so described as apart from all others of its class or type and often, therefore, as worthy of special recognition or praise (it is this . . . *distinctive* vision of the world as a whole which seems to give Leonardo that marvelous flair for detecting vital mechanism in every field—*Ellis*) (it is . . . the exquisite craftsmanship . . . that has given to free verse, alike in England and America, its most *distinctive* qualities—*Lowes*)

Ana *special, especial, specific, particular: typical, natural, normal, *regular

characteristic *n* **Characteristic, trait, feature** mean something that marks or sets apart a person or thing. **Characteristic** designates a constant property or quality that stands out in such a way as to distinguish a person or thing from others or to reveal him or it as he or it is; the term is applicable not only to persons and concrete objects but to things which are immaterial, intangible, or the product of abstraction (here we must note in the man one very striking *characteristic* . . . he appreciated the singularity of his talent—*Belloc*) (what was only an incidental and local damage . . . became a widespread *characteristic* of Western civilization—*Mumford*) (a constant alternation of lyricism and flatness . . . is the salient *characteristic* of postwar verse technique—*Day Lewis*) **Trait** applies especially to persons, peoples, or types and to their sharply accented qualities of character or of mind; otherwise, the term differs from *characteristic* only in its suggestions of clear definition and of distinctiveness (Marino Lucero had not one *trait* in common with Martinez, except the love of authority—*Cather*) (what they like to do . . . not at all what they are fitted to do, is the rule of their effort. And it is the unfulfilling *trait* of the amateur—*Brownell*) **Feature**, on the other hand, suggests not a quality or property, but a part or detail of a thing (as a face, a view, an object, or a character) which attracts and holds the attention by reason of its shape or form or by reason of its importance, its conspicuousness, or its being pressed upon one's attention (her eyes are her most admirable *feature*) (the great *feature* of the exposition is the new coliseum) (though the gloom had increased sufficiently to confuse the minor *features* of the heath, the white surface of the road remained almost as clear as ever—*Hardy*) (*Features* so un-Egyptian

that they practically prove that her cult was a local one—*G. W. Murray*) In the United States the term *feature* is often applied specifically to something exhibited or advertised as particularly attractive and especially to the principal attraction in a motion-picture entertainment or to a distinctive or prominent article, story, or cartoon in a periodical (a *feature* writer)

Ana *quality, property, character: peculiarity, individuality (see corresponding adjectives at CHARACTERISTIC)

characterize, distinguish, mark, qualify are comparable when they mean to be a peculiar or significant quality or feature of something. **Characterize** stresses that quality or feature (or those qualities or features) which stands out and identifies the person or thing considered; often an obvious or striking feature rather than a fundamental or basic quality is implied (metaphor *characterizes* the language of poetry—*R. M. Weaver*) (that mien of assured authority, of capacity tested in many a crisis, which *characterized* Mrs. Baines—*Bennett*) **Distinguish** (see also DISTINGUISH), on the other hand, stresses a feature, a quality, or a characteristic that makes a person or thing different from others or that sets him or it apart from and sometimes above others (a peculiar sort of sweet pudding . . . *distinguished* the days of his coming—*Lamb*) (was *distinguished* for ignorance; for he had only one idea, and that was wrong—*Disraeli*) (once writers were a class apart, *distinguished* by ink-stained fingers, unkempt hair, and a predilection for drinking cheap wine in cellars—*Uhlán*) **Mark** (see also MARK *vb*) implies the presence of noteworthy qualities or features that are the outward signs of an inward character (no triumph—no exaltation . . . *marks* her manner—*Cowden Clarke*) (are we so sure that the qualities that *mark* successful climbers—self-assertion, acquisition, emulation—are highly desirable?—*Ellis*) **Qualify** (see also PREPARE, MODERATE) occasionally implies a quality, characteristic, or description that is attributed by the immediate writer or speaker to a person or thing as fitted to him or it (the "Devil's drawing room," as some have *qualified* that wondrous place—*Byron*) (cannot *qualify* it as . . . either glad or sorry—*T. S. Eliot*) *Ana* *distinguish, differentiate, demarcate: individualize, peculiarize (see corresponding adjectives at CHARACTERISTIC)

charge *vb* 1 *burden, encumber, cumber, weigh, weight, load, lade, tax, saddle

2 direct, instruct, bid, enjoin, *command, order

Ana request, solicit, *ask: adjure (see BEG)

3 *accuse, incriminate, indict, impeach, arraign

Ana denounce, blame, censure, condemn (see CRITICIZE)

Ant absolve—*Con* *exculpate, exonerate, vindicate, acquit: pardon, remit, forgive, *excuse

4 *ascribe, attribute, impute, assign, refer, credit, accredit

Ana *fasten, attach, fix, affix: *join, connect, link

5 *rush, dash, tear, shoot

Ana impel, drive (see MOVE): *fly, dart, scud

charge *n* *price, cost, expense

chargé d'affaires *ambassador, legate, nuncio, minister, envoy, internuncio

chariness circumspection, caution, wariness, calculation (see under CAUTIOUS)

Ana *prudence, providence, discretion, foresight, forethought

charitable, benevolent, humane, humanitarian, philanthropic, eleemosynary, altruistic are comparable when they mean having or showing interest in or being concerned with the welfare of others. **Charitable** stresses either active generosity to the poor or leniency and mercifulness in one's judgments of others, but in each case it

usually retains in some degree the implications of fraternal love or of compassion as the animating spirit behind the gift or the judgment (generous and *charitable*, prompt to serve—*Wordsworth*) (Mrs. Hawthorne had been rude . . . to a friend of his, but that friend, so much more *charitable* and really good than she was, had made excuses for her—*Archibald Marshall*) (it is more *charitable* to suspend judgment—*Glasgow*) **Benevolent** also stresses some inner compulsion (as native kindliness, a desire to do good, or an interest in others' happiness and well-being). In contrast with *charitable*, however, it more often suggests an innate disposition than an inculcated virtue (his intentions are *benevolent*) (old Dimple with his *benevolent* smile—*H. G. Wells*) (my mother . . . always employed in *benevolent* actions while she uttered uncharitable words—*Wharton*) (the administrator of the future must be the servant of free citizens, not the *benevolent* ruler of admiring subjects—*Russell*) **Humane** implies tenderness and compassion, sometimes as qualities of one's temperament, but sometimes as required qualifications of enlightened and sensitive human beings; it is referable chiefly, but not exclusively, to methods and policies affecting the welfare of others (*humane* treatment of prisoners or of animals) (with reasonable men, I will reason; with *humane* men I will plead; but to tyrants I will give no quarter, nor waste arguments where they will certainly be lost—*Garrison*) **Humanitarian** suggests an interest in the welfare or well-being of mankind or of a particular class or group of men more than of the individual; it is applied especially to acts, outlooks, and policies (as of institutions, rulers, or governments) (as a nation we have been sharing our abundance with the world's hungry people . . . primarily from a *humanitarian* standpoint—*Hope*) (such *humanitarian* issues as the repeal of the brutal debtor laws—*Parrington*) (a part of the nation became *humanitarian*, and with a tender conscience turned . . . toward the perfectibility of man—*Canby*) (to use the A-bomb . . . was . . . wrong . . . on *humanitarian* grounds—*Zacharias*) **Philanthropic** and **eleemosynary** also suggest interest in humanity rather than in the individual, but they commonly imply (as *humanitarian* does not) the giving of money on a large scale to organized charities, to institutions for human advancement or social service, or to humanitarian causes (*philanthropic* foundations) (found time to devote to church, civic, and *philanthropic* affairs—*Silveus*) (*eleemosynary* institutions) (contractors, rarely known for wearing *eleemosynary* halos, cheerfully pocketed a loss . . . while they waited for the self-help workers . . . to catch up—*Olivier*) (an institution of higher education is not a commercial enterprise . . . Its character is *eleemosynary*, strictly *eleemosynary*—*Himstead*) **Altruistic** presupposes the guidance of an ethical principle: that the interests of others should be placed above those of self; it usually implies the absence of selfishness and often indifference to one's own welfare or interests (if it is assumed that the objectives of American policy are wholly *altruistic*, it follows that non-Americans who participate . . . must be wholly virtuous—*Muggeridge*) (*altruistic* motives) (an *altruistic* physician)

Ant uncharitable —**Con** merciless, relentless, implacable (see GRIM); *stingy, close, closefisted, parsimonious, niggardly, cheeseparing

charity 1 *mercy, clemency, grace, lenity

Ana love, affection, *attachment: benevolence, humane-

ness, altruism (see corresponding adjectives at CHARTABLE): benignity, benignancy, kindness, kindliness (see corresponding adjectives at KIND); generosity or generosity, liberalness or liberality, bountifulness or bounty, openhandedness (see corresponding adjectives at LIBERAL); goodwill, amity, *friendship

Ant malice, ill will —**Con** malevolence, malignity, malignancy, spite, spleen (see MALICE)

2 Charity, philanthropy are comparable in several of their meanings. Both words denote basically a love for one's fellowmen and a disposition to help those who are in need. But **charity** in this sense tends to suggest a Christian virtue and the will to help, as well as the deed, whenever the occasion arises (alas for the rarity of Christian *charity* under the sun!—*Hood*) (melt not in an acid sect the Christian pearl of *charity*—*Whittier*) **Philanthropy** in this sense is much vaguer because it usually implies a love of mankind and a disposition to help the community or one's fellowmen rather than the individual (this *philanthropy* . . . is everywhere manifest in our author—*Dryden*) Consequently there is a tendency to think of charity as benevolence manifested especially in public or private provision for the relief of the poor, and of philanthropy as benevolence manifested in efforts to promote the welfare or well-being of one's fellowmen; thus, out of *charity* one provides for the support of a destitute orphan; out of *philanthropy* one sends a large gift of money to an educational institution (in benevolence, they excel in *charity*, which alleviates individual suffering, rather than in *philanthropy*, which deals with large masses and is more frequently employed in preventing than in allaying calamity—*Lecky*) The terms also may be applied to what is done or given out of charity or philanthropy or to an institution or cause which is the object of such benefaction (the cold *philanthropies*, the ostentatious public *charities* . . . he exposed with utter and relentless scorn—*Wilde*) (many *charities* and many *philanthropies* were aided by him during his lifetime)

charlatan mountebank, quack, *impostor, faker

Ana humbug, fraud, cheat, fake (see IMPOSTURE); pretender, feigner, counterfeiter (see corresponding verbs at ASSUME)

charm *n* talisman, amulet, *fetish

charm *vb* fascinate, allure, captivate, enchant, bewitch, *attract

Ana delight, rejoice, *please, gratify

Ant disgust

charming fascinating, alluring, captivating, enchanting, bewitching, attractive (see under ATTRACT *vb*)

Ana *delightful, delectable, delicious: pleasing, agreeable, grateful, *pleasant

Ant forbidding

chart *n* **Chart, map, graph** are comparable as nouns meaning a graphic and explanatory representation by means of lines, dots, colors, and symbols of something incapable of verbal or pictorial representation (because too large, too detailed, or too abstract) and as verbs meaning to make such a representation of something. **Chart** is the most inclusive of these terms; it implies the aim of making clear to the mind through the eye by graphic projection of data something (as solutions of an equation, points on the face of the earth, or values of a variable at specified times and places) that cannot be viewed directly (a *chart* of coastal rainfall) (a nomographic conversion *chart* for an equation relating two variable quantities consists of two scales and a pivot point—*French & Vierck*) (a star *chart*) (*charting* the shifting channel of a river) (at 30,000 feet, in clear skies above the boiling cloud cap of a hurricane, an Air Force plane *charts* the size

of the disturbance—*N. Y. Times*) *Chart* often specifically denotes a map designed as an aid to air or water navigation by stressing features and hazards of the area depicted (the modern nautical *chart* is the end product of all the field operations. Into its construction enter the results of the geodetic, topographic, hydrographic, tidal, and magnetic work of the Survey—*Shalowitz*) (an uncharted rock) **Map** usually implies a representation of the earth's surface or of a part of it that shows directly according to some given scale or projection the relative position and size of cultural features (as streets, buildings, cities, towns, villages, counties, states, provinces, or countries) as well as the shape and proportionate extent of natural features (as bodies of water, mountain ranges, and coasts) (a map of Europe) (map a newly explored country) It may also be used in reference to a representation of the celestial sphere or of a particular heavenly body (mapping the surface of the moon) (a map of the northern heavens) **Graph** applies specifically to a chart or diagram in which two variable factors (for example, the prices of a commodity and the times at which these varying prices were asked) are so represented as to indicate their interrelationship. The usual method of preparing a graph is to locate by means of coordinates a series of points and often to join them with a curve or a series of straight lines (a graph of a patient's fever) (graph the course of business since 1962)

Ana *plan, plot, scheme, design, project

chart *vb* map, graph (see under **CHART** *n*)

Ana see those at **CHART** *n*

charter *vb* *hire, let, lease, rent

chary *cautious, circumspect, wary, calculating

Ana prudent, discreet, provident (see under **PRUDENCE**):

*sparing, economical, frugal, thrifty; reluctant, hesitant, loath, *disinclined

chase *vb* *follow, pursue, trail, tag, tail

Con flee, fly, *escape: elude, evade, *escape: *abandon, forsake, desert

chasm *gulf, abyss, abysm

chaste *adj* **Chaste, pure, modest, decent** are comparable when they mean free from all taint of what is lewd or salacious. **Chaste** fundamentally implies an opposition to *immoral* in the sense of that word in which it connotes lustfulness and licentiousness. The term therefore suggests a refraining from all acts or thoughts that incite desire or are not in accordance with virginity or marriage vows (strew me over with maiden flowers, that all the world may know I was a *chaste* wife to my grave—*Shak.*) It particularly stresses restraint and an avoidance of anything thought to defile or make unclean not only the love of man and woman but whatever should be free from cheapness, debasement, or vulgarization (a *chaste* style) (the *chaste* beauty of a work of art) (one of the most striking characteristics of a man who is really in love, is that his conversation is *chaste*. He is willing to analyze sentiment, but not sensation—*Dimnet*) (the *chaste* and abstracted intellect of the scholar—*Wylie*) **Pure** differs from *chaste* mainly in its suggestion of freedom from all taint of evil thought or immoral desires; it implies innocence and absence of temptation rather than, as *chaste* implies, control over one's impulses and actions (come, pensive nun, devout and *pure*—*Milton*) (blessed are the *pure* in heart: for they shall see God—*Mt* 5:8) (it may have been that . . . he had never known any woman, that he had been *pure* as a saint—*Bromfield*) **Modest** and **decent** are frequent in this sense as applied especially to behavior and to dress as outward manifestations of an inward chastity or purity. *Modest* usually also implies an absence of brazenness, boldness, or other

characteristics unbefitting one who is by nature chaste or pure; *decent*, a due concern for what is regarded as seemly or proper (see also **DECOROUS**) (fair, sweet, and *modest* maid forgive my thoughts—*Beaumont & Fletcher*) (dressing in so *modest* a way and behaving with such decorum—*Graves*) (<*decent* men leading *decent* lives> (a paper *decent* people don't see—*Rose Macaulay*)

Ana virtuous, *moral, righteous, ethical: *faithful, true, constant, loyal: austere, *severe

Ant lewd, wanton, immoral: bizarre (*of style, effect*)

—**Con** obscene, gross, *coarse, vulgar, ribald: *licentious, lustful, lascivious, lecherous: *fantastic, grotesque

chasten discipline, correct, *punish, chastise, castigate

Ana humble, humiliate, *abase: try, *afflict: test, try, *prove

Ant pamper, mollicoddle —**Con** *indulge, humor, baby, spoil

chastise *punish, discipline, correct, castigate, chasten

Ana *beat, thrash, pummel, baste, belabor

chat *vb* **Chat, gab, chatter, patter, prate, prattle, babble,**

gabble, jabber, gibber denote to emit a loose and ready flow of inconsequential talk or as nouns the talk so emitted.

To **chat** is to talk in light, easy, and pleasant fashion (in easy mirth we *chatted* o'er the trifles of the day before—*William Whitehead*) (passed an hour in idle *chat*) To

gab is to talk trivia glibly and long, often tiresomely (came in to tea and sat there *gabbing* till ten o'clock—*J. W. Carlyle*) (luncheon *gab* among women—*Portz*)

To **chatter** is to talk aimlessly, incessantly, and (often) with great rapidity (it was she who *chattered, chattered,*

on their walks, while . . . he dropped a gentle word now and then—*Conrad*) (my *chatter* was as gay and sprightly as birdsong—*Warren*) To **patter** is to speak or repeat

rapidly and mechanically (<*pattering* prayers half inaudibly) or glibly and volubly often without much regard to sense (they're college-reared and can *patter* languages

—*Buchan*) (the *patter* of an auctioneer) To **prate** is to talk idly and boastfully (a *prating* fool shall fall—*Prov* 10:8)

The word is often specifically used in reproach implying platitudinous or fulsome boasting or a readiness to talk at length about things of which the speaker is really ignorant or has only superficial knowledge (we may *prate*

of democracy, but actually a poor child in England has little more hope than had the son of an Athenian slave to be emancipated into that intellectual freedom of which great writings are born—*Quiller-Couch*) To **prattle** is

to talk like a child (as in artlessness and freedom or sometimes in lack of substance and sense) (<*prattled* on . . .

in this vein, spewing up the squalid confusion of his thoughts—*Anthony West*) (we are . . . charmed with the pretty *prattle* of children—*Sidney*) **Babble, gabble,**

jabber, and gibber basically imply a making of sounds suggestive of speech but lacking the meaning content, intelligibility, and articulateness of normal adult human

speech (a brook *babbled* among the stones) (the noisy *gabble* of geese) (monkeys *jabbering* in the trees) (an idiot mewing and *gibbering*) As applied to human

speaking or speech all four terms are somewhat derogatory and especially suggest lack of clarity in both articulation and content (the *babble* of four or more voices going on at once—*G. A. Miller*) (saying nothing comprehensible, just *babbling* and *gabbling*, half unconsciously

—*Bennett*) (subjected to *gabble* about fifteenth-century politics—*McCarten*) (must we fall into the *jabber* and

babel of discord—*Sir Winston Churchill*) (listened to *gibber* about . . . our present form or methods of government—*The Nation*) (the sheeted dead did squeak and

gibber in the Roman streets—*Shak.*)

Ana converse, talk, *speak: *gossip

chatter *vb* *chat, gab, patter, prate, babble, gabble, jabber, gibber

Ana see those at **CHAT**

cheap beggarly, shabby, pitiable, sorry, *contemptible, despicable, scurvy

Ana *mean, ignoble, sordid, abject: paltry, *petty, measly, trifling: meretricious, tawdry (see **GAUDY**): low, *base, vile: poor, *bad, wrong

Ant noble

cheat *n* fraud, fake, deceit, deception, *imposture, counterfeit, sham, humbug

Ana hoaxing or hoax, bamboozling or bamboozlement (see corresponding verbs at **DUPE**): *deception, trickery, chicanery, chicanes: charlatan, quack, mountebank, faker, *impostor: swindler, defrauder, cozeners (see corresponding verbs at **CHEAT**)

cheat *vb* Cheat, cozen, defraud, swindle, overreach are comparable when meaning to obtain something and especially money or valuables from or an advantage over another by dishonesty and trickery. Cheat suggests deceit and, usually, tricks that escape or are intended to escape the observation of others <cheat at cards> <cheat in a written examination> <she and her husband had cheated every one with whom they had dealings—Anderson> <he is not cheated who knows he is being cheated—Coke> Cozen implies more artfulness or craft and often more allurements than cheat; it usually suggests the victim's loss of something of value to him whether of real worth or not <soldiers cozened of their pay by clever girls> <cousins, indeed; and by their uncle cozen'd of comfort, kingdom, kindred, freedom, life—Shak.> <the Popular Front—that famous opportunity for men of goodwill to be cozened by the Communists—Poore> Defraud implies depriving another of something that is his by right whether by taking it from him or by withholding it; the word, however, implies misleading statements or deliberate perversion of the truth more often than it implies craft, artfulness, or wiles <defraud a widow of a piece of property> <the stockholders held that they had been defrauded by those who reorganized the company> <thou shalt not defraud thy neighbor, neither rob him—Lev 19:13> <freedom of speech and press does not include . . . the right to deceive or defraud—Neill> Swindle implies either gross cheating or defrauding especially by imposture or by gaining the victim's confidence; it usually implies the obtaining of money or something quickly or easily convertible into money by false pretenses <the forger swindled the merchants of the city out of large sums of money> <the despised Chinese, who were cuffed and maltreated and swindled by the Californians—Brooks> Overreach implies getting the better of a person with whom one is dealing or negotiating or bargaining by unfair or dishonest means; often it implies cheating or defrauding or swindling <he never made any bargain without overreaching (or, in the vulgar phrase, cheating) the person with whom he dealt—Fielding>

Ana *dupe, gull, hoax, hoodwink, bamboozle, trick, befool: *deceive, delude, beguile, double-cross, mislead

check *n* *corrective, control, antidote

Ana *oversight, supervision, surveillance

check *vb* 1 *arrest, interrupt

Ana stay, suspend (see **DEFER**): *stop, cease, discontinue, desist: repress, *suppress: *frustrate, thwart, foil, circumvent

2 bridle, curb, *restrain, inhibit

Ana *hinder, impede, obstruct, block: *prevent, preclude, obviate: baffle, balk (see **FRUSTRATE**): control, manage (see **CONDUCT** *vb*)

Ant accelerate (of speed): advance (of movements, plans,

hopes): release (of feelings, energies)

checked, checkered *variegated, parti-colored, motley, pied, piebald, skewbald, dappled, freaked

cheek nerve, effrontery, hardihood, gall, *temerity, audacity

Ana boldness, intrepidity (see corresponding adjectives at **BRAVE**): impudence, brazenness, shamelessness, brashness (see corresponding adjectives at **SHAMELESS**)

Ant diffidence —Con shyness, modesty, bashfulness (see corresponding adjectives at **SHY**): timorousness, timidity (see corresponding adjectives at **TIMID**): reservedness or reserve, reticence (see corresponding adjectives at **SILENT**)

cheep *vb* *chirp, chirrup, peep, tweet, twitter, chitter

cheep *n* chirp, chirrup, peep, tweet, twitter, chitter (see under **CHIRP** *vb*)

cheer *vb* 1 *encourage, inspirit, hearten, embolden, nerve, steel

Ana *comfort, console, solace: gladden, gratify (see **PLEASE**): stimulate, excite, quicken, *provoke

Ant deject: dismay —Con *discourage, dishearten, dispirit

2 root, *applaud

Ana acclaim, laud, *praise

Con deride, mock, *ridicule, taunt

cheerful lighthearted, joyful, joyous, *glad, happy

Ana jolly, jovial, *merry, blithe, jocund: mirthful, gleeful (see corresponding nouns at **MIRTH**): gay, vivacious, *lively, animated

Ant glum, gloomy —Con *sullen, saturnine, dour, morose: dejected, depressed, melancholy, sad (see corresponding nouns at **SADNESS**): doleful, lugubrious, rueful (see **MELANCHOLY**)

cheerless *dismal, dreary, dispiriting, bleak, desolate

Ana discouraging, disheartening, dejecting (see **DISCOURAGE**)

Ant cheerful

cheeseparing *stingy, close, closefisted, tight, tightfisted, niggardly, penny-pinching, parsimonious, penurious, miserly

chemist *druggist, apothecary, pharmacist

cherish 1 prize, treasure, value, *appreciate

Ana love, enjoy, *like: esteem, respect, regard (see under **REGARD** *n*): *revere, venerate, reverence: protect, *defend, shield, safeguard, guard

Ant neglect —Con ignore, overlook, slight, disregard, forget (see **NEGLECT**): desert, forsake (see **ABANDON**)

2 foster, *nurture, nurture, cultivate

Ana preserve, conserve, *save: *harbor, shelter, entertain

Ant abandon —Con repudiate, scorn, reject (see **DECLINE** *vb*): contemn, *despise, disdain

chew out *scold, upbraid, rate, berate, tongue-lash, jaw, bawl, wig, rail, revile, vituperate

chic *adj* smart, fashionable, modish, *stylish, dashing

chicane, chicanery trickery, double-dealing, *deception, fraud

Ana artifice, stratagem, maneuver, ruse, feint, *trick, wife, gambit, ploy: intrigue, machination, *plot: underhandedness, furtiveness, surreptitiousness (see corresponding adjectives at **SECRET**)

Con straightforwardness, forthrightness (see corresponding adjectives at **STRAIGHTFORWARD**): *honesty, integrity, probity, honor

chide reproach, *reprove, rebuke, reprimand, admonish

Ana *criticize, reprehend, censure, blame, condemn, denounce: *scold, upbraid, rate, berate

Ant commend —Con applaud, compliment (see **COMMEND**): *praise, laud, extol

chief *n* **Chief, chieftain, head, headman, leader, master** are comparable when they mean the person in whom resides authority or ruling power but they differ in their applications and associations. **Chief** is the most comprehensive of these terms, being applicable as a general term to anyone from an absolute monarch to one's immediate superior (the *chief* of a court of inquisition was called the grand inquisitor) (the *chargé d'affaires* reports daily to his *chief*) Usually, however, the term is applied specifically to one who is supreme in power or authority over a tribe or clan (an Indian *chief*) or to the superior officer in a civil department (fire *chief*) (chief of police) or to one who is vested with authority and power to act by the organization over which he presides (the chairmen of the national committees of the leading political parties are virtually party *chiefs*) The phrase *in chief* is often added to a title, held by two or more, to indicate the one who is the first in authority (commander *in chief*) (editor *in chief*) **Chieftain** has never obtained the generality of *chief*, and still usually carries implications derived from its early and still leading application to the chief of a tribe, a clan, or of a primitive, savage, or barbaric group (the *chieftain's plaid*) (a robber *chieftain*) **Head**, though seemingly as comprehensive as *chief*, is applied most frequently to the person of a group who serves as its chief executive or on whose shoulders the responsibility finally rests (the *head* of the family) (the *head* of a school) (the British prime minister is actually the *head* of the government) (the *head* of a department) **Headman** comes close to *chieftain* in that it usually applies to the person who serves as the chief of his tribe or village; the term, even more than *chieftain*, implies a condition of savagery or barbarism. **Leader** implies headship, sometimes of a nation or people but more often of an organized body (as a political party, a society, or a band of musicians) or of an informal assembly (as of persons or animals) (a rangy red steer was the *leader* of the stampede) The term usually implies a capacity for guidance, direction, or for the assumption of full control and of winning the support of those under one (the *leader* of an orchestra) (the *leader* of the opposition in the British parliament) **Master**, on the other hand, applies to a head who has another or others under him subject to his direction or control and necessarily obedient to his will: the term stresses his authority rather than his capacity for guidance (a man cannot serve two *masters*) In general use the term is applied as a designation to an employer of servants and to the head of a school or of a class. It is also applied generally to anyone who exerts great and controlling influence over others or who is regarded as one to be followed or obeyed. The chief specific use of *master* is as the title of the person qualified to command a merchant vessel; in this use it is commonly superseded by *captain* as a courtesy title.

Ana governor, ruler (see corresponding verbs at GOVERN)

Con *follower, disciple, henchman, adherent, satellite

chief *adj* **Chief, principal, main, leading, foremost, capital** mean first in importance or in standing. **Chief** is applicable to a person that serves as the head of his class or group or to a thing that stands out as above all the rest of its class or kind in rank, importance, dignity, or worth; the term therefore usually implies the subordination of all others (chief justice of the supreme court) (president of a republic is its *chief* magistrate) (the cathedral is the *chief* church of a diocese) (the *chief* topic of conversation) (duty, not pleasure, is the *chief* aim of living—*Glasgow*) **Principal** is applicable to whatever is the first in order of power or importance, and so is applied chiefly to a person to whom is given direction, control, or government of others or to a thing (or person thought of as a

thing) that, because of its size, its position, or its intrinsic importance precedes all others of its class or kind (the *principal* dancer in a ballet) (the *principal* keeper in a prison) (the *principal* gate to the grounds of an institution) (the *principal* streets of a city) (the *principal* witness against the accused) (a chicken stew of which the *principal* ingredient was not chicken but sea cucumber—*Steinbeck*) **Main** is applicable to something (often a part, unit, or division of a large or extensive thing) that excels all the others of its class or kind in size, potency, or importance (the *main* line of a railroad) (the *main* street of a small city) (the *mainland*) (words have been used so long as the *main* channel for communication—*Day Lewis*) (the literary critic . . . will yet find, like the historian, his *main* subject matter in the past—*L. P. Smith*) **Leading**, like *principal*, implies precedence, but it often distinctively implies, in addition, a capacity or fitness for drawing others, for guiding them, or for giving a particular quality or character to a movement (the *leading* men of the city) (he had been the *leading* counsel for the seven Bishops—*Macaulay*) (the *leading* automobile in a procession) (another *leading* object in education for efficiency is the cultivation of the critical discernment of beauty and excellence in things and in words and thoughts, in nature and in human nature—*Eliot*) **Foremost** differs from *leading*, which it otherwise closely resembles, in its stronger implication of being first in an advance or progressive movement; it is preferable for that reason whenever there is a suggestion of the person's or thing's having forged ahead to that position (one of us, that struck the *foremost* man of all this world—*Shak.*) ("handedness," of course, is the *foremost* primate characteristic—*La Barre*) **Capital** is applicable to a thing that stands at the head of its class or kind because of its importance, its significance, its excellence, or its seriousness (a *capital* plan) (his *capital* offense was that he had omitted to mention her at all) (the seven *capital* sins are the most important sins theologically not because they are the worst sins but because they lead to other sins and are fatal to spiritual progress) (with a little managing . . . she would have gained every point as easily as she had gained the *capital* one of taking the foundling baby under her wing—*Wharton*)

Ana *dominant, paramount, sovereign, predominant, preponderant, preponderating: *primary, prime: *supreme, preeminent

Ant subordinate —*Con* secondary, dependent, subject (see SUBORDINATE): subservient, ancillary, subsidiary, *auxiliary

chiefly *largely, greatly, mostly, mainly, principally, generally

chieftain *chief, head, leader, master

childish *childlike

Ana puerile, boyish, *youthful: *simple, foolish, silly, fatuous, asinine

Ant mature, grown-up —*Con* adult, matured (see MATURE): manly, manful, virile, manlike (see MALE): womanly, womanlike (see FEMALE)

childlike, **childish** agree in meaning having or showing the manner, spirit, or disposition of a child. Both are applicable to adolescents and to adults as well as to children. **Childlike**, however, usually suggests such qualities of childhood as innocence, simplicity, or straightforwardness which are worthy of admiration or emulation; **childish** suggests such less pleasing and less admirable characteristics as helplessness, peevishness, or undeveloped mentality (her arias have the *childlike* quality Puccini wanted—*Hume*) (the same thought which clothed

in English seems *childish*, and even foolish, assumes a different air in Latin—*Cowper* <was angry with himself for his *childish* petulance—*Hersey* <to lose sight of such distinctions is to show one's self, not *childlike*, but *childish*—*Babbitt* <the earnestness of the young people endows their sketches with a certain charm lacking in their imitators, whose pictures are *childish*, not *childlike*—*Argus*>

Ana naïve, unsophisticated, ingenuous, artless (see NATURAL): docile, *obedient, tractable, biddable

chilly cool, *cold, frigid, freezing, frosty, gelid, icy, glacial, arctic

Ant balmy

chimerical fantastic, fanciful, visionary, *imaginary, quixotic

Ana utopian, *ambitious, pretentious: illusory, *apparent: delusive, delusory, *misleading, deceptive: fabulous, mythical (see FICTITIOUS): preposterous, absurd (see FOOLISH)

Ant feasible —**Con** *possible, practicable: reasonable, *rational: sensible, sane, *wise, prudent

chine backbone, back, *spine, vertebrae

chink *crack, cleft, fissure, crevasse, crevice, cranny

Ana *break, gap, interruption: split, rift, *breach

chirp *vb* **Chirp, chirrup, cheep, peep, tweet, twitter, chitter** can all mean as verbs to make the little sounds characteristic of small animals and as nouns the little sounds so made, and all can be extended to sounds and the making of sounds (as by human beings) that suggest such small animal sounds. **Chirp** implies the short, sharp, and thin sound that is made by practically all small birds and some insects; it regularly connotes cheerfulness but often also busyness and immaturity <there was no sound save the *chirping* of birds> <the linnets . . . *chirps* her vernal song of love—*Southey*> <one of these birds . . . began to ascend, by short hops and flights, through the branches, uttering a sharp, preliminary *chirp*—*Burroughs*> <someone turned on the water down the hall and all the second-floor faucets *chirped* at once, like so many crickets—*Algren*> <wait until the boldest *chirps*: "It was tonight, dear, wasn't it?"—*MacLeish*> **Chirrup** implies a more sustained effect than *chirp*, as though a bird is singing or is learning to sing; it also often heightens the connotations of cheerfulness or liveliness <untucked his head from under his wing and *chirruped* drowsily—*Sinclair*> <the shrill persistent *chirrup* of a fledgling sparrow> <there is a new *chirrup* in their talk, feeling that they shall feel livelier in a livelier land—*O'Casey*> <made her little *chirruping* sound of welcome—*Woolf*> <the bullets *chirruped* by in the soft buzzing sound of insects on the wing—*Mailer*> **Cheep** implies feebleness yet shrillness of sound such as that made by a very young bird or by a mouse, a bat, or a squirrel <the persistent *cheep* of a crate of new-hatched chicks> <a brood of ducklings, which had lost their mother, filed into the barn, *cheeping* feebly—*George Orwell*> <fog seemed to rise from his raincoat and his shoes *cheeped*—*Dorothy Parker*> **Peep** differs from *cheep* chiefly in stressing the weakness of the sound and so suggesting its faintness or the animal's helplessness <the *peep* of a chick just struggling from the shell> <a worrisome mother . . . hovers over her child. Every time he *peeps*, she jumps to see what's the matter—*Spock*> <all the little boats *peeped* their klaxons, and the bells . . . suddenly burst into crashing, bashing peals—*Panter-Downes*> <consisted for the most part of odd little squeals from the woodwinds. These *peeps* . . . added up to a fairly meaningless and silly score—*Philip Hamburger*> **Tweet** usually implies the monosyllabic note of a very small bird or the call of small game birds (as the quail or bob-

white) <a redstart . . . sat on the fence near my hut till dusk, *tweeting* rather plaintively on one note—*Kingdon-Ward*> <the referee checked the play with sharp *tweets* of his whistle> **Twitter** implies a succession of notes or sounds, uttered tremulously or excitedly; when applied to persons or their utterances or doings it can suggest feverish or disorderly excitement <the trees *twittered* feverishly, and cool winds swept the ground—*Peggy Bennett*> <the swallow *twittering* from the straw-built shed—*Gray*> <these youngest girls . . . stood around *twittering*, trying to appear prim, but only succeeded in looking more and more excited—*Styron*> The noun, especially, is often used to express a state of agitation <in a *twitter* of excitement> <a nerve-racking place full of the *twitters* and colors and smells and giggles and screeches of too many unlovely shoving girls—*Wouk*> **Chitter**, like *twitter*, implies a succession of sounds, but distinctively it can imply a briskness and sharpness of tone that belong also to chattering and then may carry such connotations as alarm, irritation, or fear <heard a squirrel *chitter* in alarm, as if it had scurried around the trunk of a tree after something had startled it—*Frazer*> <the cawings of jackdaws, the *chittering* of sparrows—*Powys*> <from close by came the *chitter* of a screech owl—*Saxon*> <some teeth in angry fit may *chitter*—*Alexander Boswell*>

chirp *n* chirrup, cheep, peep, tweet, twitter, chitter (see under CHIRP *vb*)

chirrup *vb* *chirp, cheep, peep, tweet, twitter, chitter

chirrup *n* chirp, cheep, peep, tweet, twitter, chitter (see under CHIRP *vb*)

chisel *vb* sculpture, sculpt, sculp, *carve, incise, engrave, etch

Ana *cut, chop: produce, turn out (see BEAR): shape, fashion, form (see MAKE)

chitter *vb* *chirp, chirrup, cheep, peep, tweet, twitter

chitter *n* chirp, chirrup, cheep, peep, tweet, twitter (see under CHIRP *vb*)

chivalrous gallant, courtly, courteous, polite, *civil

Ana *spirited, mettlesome, high-spirited

Ant churlish —**Con** *rude, ungracious, discourteous: boorish, loutish, clownish (see under BOOR)

chivy *vb* *bait, badger, heckle, hector, hound, ride

Ana *worry, annoy, harry, harass, tease: chase, pursue, trail, *follow: torment, try, *afflict

choice *n* **Choice, option, alternative, preference, selection, election** are comparable when they mean the act or opportunity of choosing or the thing chosen. **Choice** usually implies the right or the privilege to choose freely from a number (as of persons, things, or courses) <take your *choice* of rooms> <he had no *choice* in the determination of his profession> <everyone admires his *choice*, for she is a very attractive young woman> **Option** stresses a specifically given right or power to choose one from among two or more mutually exclusive actions or courses of action <the state constitution gives local *option* to the cities and towns in the matter of granting or withholding licenses for the sale of intoxicants> <the court sentenced the convicted speeder to one month's imprisonment with the *option* of a fine> <the students have no *option* in the matter of vacations> In business transactions, an *option* is usually purchased and enables one to demand during an agreed length of time fulfillment of a contract to sell (as a specified quantity of a commodity) or buy (as a particular parcel of real estate) at a price and on terms agreed upon when drawing the option <acquire an *option* on a tract of land> <buying and selling *options* on the stock exchange> **Alternative** typically stresses restriction of choice between two mutually exclusive things (as propositions, theories, courses, or

policies). Commonly it implies that all other comparable things are ruled out by force of circumstances (the *alternatives* before the country were peace with dishonor or war with honor) or by unconquerable personal aversion (the only *alternative* to liberty, in Patrick Henry's estimation, was death) or by logical necessity (if the States had any power it was assumed that they had all power and that the necessary *alternative* was to deny it altogether—*Justice Holmes*) *Alternative*, however, is sometimes used of more than two possible choices. **Preference** emphasizes the guidance of one's choice by one's bias or predilections or by one's judgment of values or of desirability (he was promised his *preference*) (he said he had no *preference* and would wait until others had declared their *preferences*) **Selection** implies a wide range of choice and the need of discrimination or taste in choosing (he was commended for his *selection* of books) (she did not have time for the careful selection of a hat) **Election** adds to *selection* the implication of an end or purpose which necessitates the exercise of judgment (the students will make their *election* of courses before returning to college) (the doctrine of predestination holds that men are destined to heaven or hell by divine *election*)

choice *adj* **Choice**, **exquisite**, **elegant**, **recherché**, **rare**, **dainty**, **delicate** are comparable when they mean having qualities that appeal to a fine or highly refined taste. **Choice** stresses preeminence in quality or kind rather than careful selection of the best, although the latter may also be connoted; consequently, the word usually suggests an appeal to a highly cultivated and discriminating taste (the *choice* and master spirits of this age—*Shak.*) (when education in America began, it was intended for the fit and was designed to produce a *choice* type—*Grandgent*) **Exquisite** implies consummate perfection in workmanship, in choice, in quality, or in impression produced—a perfection so fine and unobtrusive that it attracts only the most sensitive and fastidious (he paints with *exquisite* art the charm of the deep country and the lure of the simple life—*Buchan*) (angels, supporting, saluting, and incensing the Virgin and Child with singular grace and *exquisite* feeling—*Henry Adams*) **Elegant** differs widely from *exquisite*; it implies either an impressive richness or grandeur restrained by fine taste, or grace and dignity characterized by a noble simplicity (whoever wishes to attain an English style . . . *elegant* but not ostentatious, must give his days and nights to the volumes of Addison—*Johnson*) (charming to look at and *elegant* to her fingertips—*John Martin*) (the handsomest man of the company, very *elegant* in velvet and broadcloth—*Cather*) **Recherché** like the preceding terms implies care in selection; it often suggests a studied exquisiteness or elegance (the sangfroid, grace, abandon, and *recherché* nonchalance with which Charles Yates ushers ladies and gentlemen to their seats in the opera house—*O. Henry*) (giving long and *recherché* dinners—*Saintsbury*) Very frequently, however, it implies a search for the novel or fresh as well as the choice, and it may carry a connotation of artificiality or of straining for effect (the word *devastating* . . . was thought to be *recherché*; the discerning reader is likely to call it affected—*Beach*) **Rare** derives from its ordinary senses (see INFREQUENT, THIN) connotations of uncommonness and of a fineness associated with the rarefied air of the upper regions; nevertheless, its major implication is distinction in merit or excellence or a superlative quality (the *rarest* cordials old monks ever schemed to coax from pulpy grapes—*Lowell*) (he [W. H. Hudson] is, of living writers that I read, the *rarest* spirit—*Galsworthy*) **Dainty** (see also NICE 1) may come close to *choice*, but is then used chiefly

to describe things which give delight to the fastidious taste, especially to the eye, and often also the palate (her house is elegant and her table *dainty*—*Johnson*) More often, however, the term implies smallness and exquisiteness (those *dainty* limbs, which Nature lent for gentle usage and soft delicacy—*Milton*) (the spirit of romance, gross and tawdry in vulgar minds, *dainty* and refined in the more cultivated—*Parrington*) **Delicate**, like *dainty*, implies exquisiteness and an appeal to a fastidious taste, but it ascribes fineness, subtlety, and often fragility to the thing rather than smallness, and it implies an appeal not only to the eye or palate, but to any of the senses or to the mind or spirit (the more *delicate* perfume of the pink-flowering thorn—*Wilde*) (not, however, an effervescing wine, although its *delicate* piquancy produced a somewhat similar effect—*Hawthorne*) (I have, alas! only the words we all use to paint commoner, coarser things, and no means to represent all the exquisite details, all the *delicate* lights, and shades—*Hudson*) (an irony so quiet, so *delicate*, that many readers never notice it is there . . . or mistake it for *ivâveté*—*Priestley*)

Ana preeminent, surpassing, peerless, incomparable, *supreme, superlative: picked, selected, culled, chosen (see CHOOSE)

Ant indifferent (see MEDIUM) —*Con* mediocre, second-rate, middling, fair, average, *medium: *common, ordinary

choke *suffocate, asphyxiate, stifle, smother, strangle, throttle

choleric splenetic, testy, *irascible, touchy, cranky, cross

Ana *irritable, fractious, huffy, querulous, petulant, peevish: *angry, acrimonious, wrathful, wroth, indignant, mad, irate: fiery, peppery, spunky (see SPIRITED); captious, carping, faultfinding (see CRITICAL)

Ant placid: imperturbable —*Con* *calm, tranquil, serene: *cool, composed, nonchalant

choose, **select**, **elect**, **opt**, **pick**, **cull**, **prefer**, **single** are comparable when they mean to fix upon one of a number of things as the one to be taken, accepted, or adopted or to make such a determination. **Choose** commonly implies both an act of judgment and the actual taking or adoption of what is fixed upon (that he may know to refuse the evil, and *choose* the good—*Isa* 7:15) (between them . . . we can see little to *choose*—*Henry Adams*) (the disinterested search for truth is certainly one of the highest and noblest careers that a man can *choose*—*Inge*) **Select** usually implies a wide range of choice and discrimination or discernment of values in making one's choice (one particular nation to *select* from all the rest—*Milton*) (the difficult task of *selecting* a presidential candidate—*H. D. Jordan*) (his temperament was *selecting* the instances he should narrate, his mind *selecting* the words to employ—*F. M. Ford*) **Elect** often implies a deliberate choice, especially between alternatives, or a careful selection of some out of many possibilities; ordinarily, it carries a stronger implication of the rejection of that not chosen than either of the preceding words (elect a president) (according to the doctrine of predestination, God *elects* those who are to be saved) (will it not look a little odd . . . when you have so many devoted children, that you should *elect* to live alone—*Sackville-West*) (having *elected* deliberately . . . that stern land and weather—*Faulkner*) **Opt** (often with *for*) implies an election between alternatives (give the people an opportunity to *opt* for statehood—*Rupert Emerson*) often specifically, in the case of inhabitants of territory transferred by treaty, between retaining one's former citizenship or acquiring citizenship in the new state (opt

to remain a British subject) **Pick** implies a careful selection, often on personal grounds; **cull**, a nice or fastidious choice (attempts to *pick* an exact synonym—*Johnson O'Connor*) (pick an all-star team from the players in the city) (pick a winner) (his dictionary had no vulgar word in it, no harsh one, but all *culled* from the luckiest moods of poets—*J. R. Lowell*) **Prefer** implies choice that indicates what one favors or desires; it does not, however, always carry an implication of taking or adopting what one chooses or of getting one's choice (prefer the blue dress to the brown one) (certain colors were preferred . . . for reasons of association and tradition—*Binyon*) (experience has taught me, when the versions of the same story . . . differ materially, to prefer the less exciting—*Davis*) **Single** (usually with *out*) implies choice or election usually of an individual person or thing from a number (singles out for special praise the guidebook to Wells cathedral—*Pyke Johnson*)

Ana *adopt, espouse, embrace: *desire, wish, crave

Ant reject: eschew —**Con** *forgo, forbear, abnegate: refuse, *decline, spurn, repudiate

chop *vb* hew, *cut, slit, slash, carve

Ana split, cleave, rive (see **TEAR** *vb*)

chore *task, duty, assignment, job, stint

Ana *work, occupation, employment, business

christen *baptize

chronic *inveterate, confirmed, deep-seated, deep-rooted

Ana established, fixed, settled (see **SET**): *hardened, indurated, callous

Ant acute (*of illness*)

chronicle 1 *history, annals

2 *account, story, report, version

Ana narration, recital, recountal (see corresponding verbs at **RELATE**)

chthonian *infernal, Hadean, stygian, hellish, Tartarean

chubby rotund, plump, fat, *fleshy, stout, portly, corpulent, obese

Ana chunky, stubby, dumpy, squat (see **STOCKY**)

Chum slim

chummy intimate, close, thick, confidential, *familiar

chunky *stocky, thickset, thick, stubby, squat, dumpy

Ana rotund, chubby (see **FLESHY**)

church *religion, denomination, sect, communion, creed, faith, cult, persuasion

churl *n* *boor, lout, clown, clodhopper, bumpkin, hick, yokel, rube

Ant *gentleman, aristocrat

churlish boorish, loutish, clownish (see under **BOOR**)

Ana ungracious, ill-mannered, discourteous, *rude, uncivil, impolite: curt, blunt, brusque, gruff, crusty (see **BLUFF**): surly, dour (see **SULLEN**)

Ant courtly —**Con** *civil, polite, courteous, gallant: urbane, *suave, diplomatic, bland, politic, smooth

cinders clinkers, embers, *ash

circadian *daily, diurnal, quotidian

circle *n* *set, coterie, clique

Ana friends, acquaintances, intimates (see singular nouns at **FRIEND**): associates, companions, comrades (see singular nouns at **ASSOCIATE**)

circle *vb* 1 *surround, environ, encircle, encompass, compass, hem, gird, girdle, ring

Ana *enclose, envelop: circumscribe, restrict (see **LIMIT**)

2 revolve, rotate, *turn, gyrate, wheel, spin, twirl, whirl, eddy, swirl, pirouette

circuit compass, *circumference, perimeter, periphery

Ana route, course, *way: tour, *journey

circuitous roundabout, *indirect

Ana *winding, serpentine, sinuous, tortuous, flexuous

Ant straight

circulate *spread, disseminate, diffuse, propagate, radiate

Ana revolve, rotate (see **TURN**): interchange, *exchange

circumference, **perimeter**, **periphery**, **circuit**, **compass** are comparable because all in their basic senses denote a continuous line enclosing an area or space. They differ, however, in the extent to which they retain this meaning and in the number and character of their acquired implications and connotations. Precisely, **circumference** designates either the line that describes a circle or an ellipse or the length of such a line; in extended use it is applied to something felt as having a center (see **CENTER**) (nature set from center to *circumference*—*Milton*) (that mysterious intellectual magnetism that enlarges the *circumference* of his ego—*Powys*)

Perimeter is more comprehensive than *circumference*; it includes not only the line that bounds any circular figure or area, but also the broken line that encloses any polygon; moreover it may designate the whole outer boundary of a body, especially a more or less spherical body (the *perimeter* of a hexagon) (the *perimeter* of the globe) **Periphery** is sometimes interchangeable with *perimeter* but it is more frequently used in an extended sense. More often than any other word in this group it is referred to the actual edge or border or boundaries of something concrete (the sections of an orange extend from the center to the *periphery*) (we had just time enough to explore the *periphery* (the encircling shore) of the island) (the *periphery* (the wall) of a blood vessel) Occasionally it suggests limits which cannot be exceeded (stimuli beyond the *periphery* of consciousness) (the fixed stars at the *periphery* of the universe were stationary—*S. F. Mason*)

Circuit has become so tied up with the idea of a journey round the periphery of something that the two ideas are fused (the hour hand of a clock covers its *circuit* every twelve hours) (he also completed the great *circuit* of coast highways—*Buchan*) On the other hand, **compass** usually refers to the area or space within an enclosing line or the ground that figuratively might be covered by the leg of a compass describing such a line (within thy crown, whose *compass* is no bigger than thy head—*Shak.*) (another soldier . . . followed his trail, went on to make a wide *compass*, and got as far as Zuni—*De Voto*)

Ana *outline, contour

circumlocution periphrasis, pleonasm, *verbiage, redundancy, tautology

Ana prolixity, diffuseness, wordiness, verbosity (see corresponding adjectives at **WORDY**)

Con compactness (see corresponding adjectives at **CLOSE**): conciseness or concision, terseness, succinctness, pithiness (see corresponding adjectives at **CONCISE**)

circumscribe confine, *limit, restrict

Ana *restrain, inhibit, curb, check: *hamper, trammel, fetter

Ant expand, dilate —**Con** distend, amplify, inflate, swell (see **EXPAND**): enlarge (see **INCREASE** *vb*)

circumspect *adj* *cautious, wary, calculating, chary

Ana *careful, punctilious, punctual, meticulous, scrupulous: vigilant, *watchful, alert

Ant audacious —**Con** venturesome, rash, reckless, daring, daredevil, foolhardy, *adventurous: bold (see **BRAVE**): heedless, *careless

circumspection caution, wariness, calculation, chariness (see under **CAUTIOUS**)

Ana carefulness or care, punctiliousness, punctuality, meticulousness, scrupulousness (see corresponding adjectives at **CAREFUL**): discretion, forethought, foresight, providence, *prudence

Ant audacity —*Con* venturesomeness, rashness, recklessness, daring, daredeviltry, foolhardiness (see corresponding adjectives at ADVENTUROUS); boldness (see corresponding adjective at BRAVE); heedlessness, carelessness (see corresponding adjectives at CARELESS)

circumstance *occurrence, event, incident, episode

Ana *item, detail, particular: factor, constituent, component, *element

circumstantial, **minute**, **particular**, **particularized**, **detailed**, **itemized** are comparable when they mean dealing with a matter point by point. **Circumstantial** applies especially to accounts of events or to narratives, but it is applicable also to the persons who recount or narrate or to their memories. The term implies full and precise reference to the incidents or circumstances attending an event (a *circumstantial* account of the battle has not yet been written) (generally speaking, a historical novel . . . must be documented with the news of what once happened, and full of *circumstantial* life—*Garrigue*) (my memory is exact and *circumstantial*—*Dickens*) **Minute**, in addition, applies to investigations, researches, inspections, and descriptions; it stresses interest in or inclusion of every detail, no matter how trivial or insignificant. It therefore usually connotes exhaustiveness or meticulous exactness (he prolonged the flower-picking process by *minute* and critical choice—*Deland*) (Plato . . . in the *Laws* . . . provides for the state a perfect jungle of *minute* regulations—*Buchan*) (she was interested in the little details and writes with *minute* care about the change of fashion—*Bradford*) **Particular** differs little from *circumstantial* except in being applicable also to descriptions and lists; it may therefore imply attention to every feature or item rather than to every incident or circumstance (a *particular* description of every musical instrument in the collection) (it is as *particular* as the four-sheet maps from which it is taken—*Jefferson*) (I think myself obliged to be very *particular* in this relation, lest my veracity should be suspected—*Swift*) **Particularized** often replaces *particular* as applied to narratives, descriptions, and lists; it is not used of those who so narrate, describe, or list, but it may be applied to the circumstances, features, and items that they present (Scott's *particularized* descriptions of his characters) (a most concrete, *particularized*, earthy series of small diurnal recognitions—*Powys*) **Detailed** applies to a circumstantial or minute account, description, study, or representation; it implies, however, abundance of rather than exhaustiveness in detail (Perera in the sixteenth century . . . presents a *detailed* picture of Chinese life—*Ellis*) (the *detailed* study of history should be supplemented by brilliant outlines—*Russell*) **Itemized** implies complete enumeration of details, especially of those that indicate the separate purchases or separate credits in a mercantile account, or of those that indicate the articles or groups of articles in the possession of a person or business (as in an inventory) (an *itemized* bill) (itemized list of his expenditures) The term is also applicable to descriptions, narratives, or accounts which in addition to being particularized have something of the formality of an inventory (an *itemized* description of a room)

Ana precise, nice, exact, accurate (see CORRECT): *full, complete, replete

Ant abridged: summary —*Con* succinct, terse, laconic, *concise, pithy, compendious: shortened, abbreviated, curtailed (see SHORTEN)

circumvent outwit, baffle, balk, *frustrate, thwart, foil
Ana forestall, anticipate, *prevent: evade, *escape, elude, avoid: trick, befool, hoodwink, *dupe

Ant conform (to laws, orders): cooperate (with persons)
—*Con* promote, further, *advance, forward: abet (see

INCITE)

citadel stronghold, fortress, *fort, fastness

citation *encomium, eulogy, tribute, panegyric

Ana commendation, recommendation, complimenting or compliment (see corresponding verbs at COMMEND): award, guerdon, reward (see PREMIUM)

cite *vb* 1 *summon, summons, call, convoke, convene, muster

Ana bid, *invite: *arrest, detain, apprehend: *praise, extol, eulogize, laud, acclaim: award, accord (see GRANT)

2 *quote, repeat

3 *adduce, advance, allege

Ana enumerate, tell, *count, number: recount, recite, narrate, rehearse (see RELATE)

citizen 1 *inhabitant, resident, denizen

Con *stranger, outsider

2 **Citizen**, **subject**, **national** are comparable when denoting a person who is regarded as a member of a sovereign state, entitled to its protection, and subject to its laws. **Citizen** implies *alien* as its opposite. It is applicable to a native or naturalized person, regardless of sex or age, who owes allegiance to a government and is entitled to its protection of his life, liberty, and property at home or abroad. Ordinarily (as in the United States) citizenship does not imply possession of all political rights (as the right to vote). *Citizen* often implies allegiance to a government in which the sovereign power (theoretically or absolutely) is retained by the people; it is usually the preferred term in designating those persons in a republic whose status is not that of aliens (American *citizens* living in Mexico) (all persons born or naturalized in the United States, and subject to the jurisdiction thereof, are *citizens* of the United States and of the State wherein they reside—*U. S. Constitution*) **Subject** is applicable to a person, no matter where he resides, who by right of birth or naturalization owes allegiance to a personal sovereign (as a king or emperor) whether this sovereign rules directly or is a figurehead in whose name an often representative government is conducted; thus, *subject* is the preferred term in the British Commonwealth of Nations largely for historical reasons in spite of the limitations on the power of the sovereign and in spite of the representative form of government in Great Britain and in its dominions (British *subjects* living in the United States) (the millions of *subjects* of Queen Elizabeth) The term is also applicable to any person residing in territory governed by another state that has gained power over it by force of arms or by conquest, whether the sovereign power in that state is vested in a person or in the people (the line of distinction between the citizen and the *subject*, the free and the subjugated races—*Taney*) **National** belongs with this group of terms in spite of its shifting significance and more or less conflicting implications. It is applicable chiefly to any of a body of persons of the same nation or people living in a country other than the one in which they have or have had the status of citizen or subject. In diplomatic use the term is often applied to one's fellow countrymen (the consul in each of the large cities is responsible for protecting the rights of his own *nationals*) Still other denotations, not so common, have come into use. Chief among these is the definition of a *national* as anyone who has been born in the territory of a given government, even though he now resides in another country, either as an alien or, by naturalization, as a citizen or subject of that country (some European governments claim authority over their *nationals* in North and South America) There is also a tendency to prefer *national* to *subject* or *citizen* in some countries where the sovereign power is not clearly vested in a monarch or ruler or in the people or where theories of racism

A colon (:) separates groups of words discriminated. An

asterisk (*) indicates place of treatment of each group.

prevail. In some use, especially in international law, *national* is applied to anyone entitled to the protection of a government regardless of whether his status is that of citizen or not; in this sense, the Filipinos were formerly *nationals*, though never *citizens*, of the United States.

Ant alien —**Con** foreigner (see STRANGER)

civic, **civil**, **civilian** are not close synonyms but rather words whose meanings lend themselves to confusion. In a sense they have a common meaning: of, relating to, or characteristic of a citizen—but in each case the word *citizen* has a specific or particular meaning. **Civic** implies some relation to a city and its citizens; *city*, however, is used loosely so as to cover any community having closely related interests (as a town, a village, or a city proper) or any municipality or corporation having powers of local self-government: in this sense *civic* is used in distinction from *state*, *federal*, and *national* (London took the lead in this new development of *civic* life—*J. R. Green*) (civic interests gave way to national interests) (organizations for civic betterment) Often the word comes close in meaning to *public* when used to modify acts, functions, obligations, or qualities, the chief distinction consisting in its closer application to the life of the community (his personal virtues were no less outstanding than his *civic* virtues) (for the theme of her life is that we are public as well as private beings and that civilization depends on the spread of *civic* virtue—*Bentley*) **Civil**, in general, has reference to a citizen as a member of the state, or to citizens as members of the state. In this sense *state* denotes usually a larger organized unit than that denoted by *city* and comes close in meaning to *country*, *nation*, and *people*. The term *civil* implies reference to this organization; thus, *civil* liberty is the liberty permitted to a citizen by the laws of the state or exemption from arbitrary government interference; a *civil* war (as opposed to a foreign war) is a conflict between citizens of the same state. More specifically, there is often a definitely implied contrast in the use of *civil*; the *civil* authorities are those that prevail in all affairs except where ecclesiastical authorities or military authorities have the final say; *civil* service denotes service of the state in any capacity that does not distinctively belong to the military organization; thus, *civil* architecture applies to architecture which is neither ecclesiastical nor military; in law, *civil* actions are distinguished from criminal actions as relating to proceedings in connection with the private or individual rights of citizens; also, in law, a *civil* death implies not a natural (that is, actual) death, but the loss or renunciation of all legal rights or status (saw the Bible as . . . containing the complete, final, and absolute code for all matters spiritual and *civil*—*J. D. Hart*) (a program to make of the Atlantic Alliance a *civil* and not merely a military Community—*Ascoli*) **Civilian** refers to persons who are not members of the armed forces and is used chiefly in contrast to *military* (civilian personnel) (civilian duties in time of war) (rationing of gasoline among civilian consumers) (glad to get back to civilian clothes)

civil *adj* 1 *civic, civilian

2 **Civil**, **polite**, **courteous**, **courtly**, **gallant**, **chivalrous** are comparable as applied to persons or their words and acts when in intercourse with others with the meaning observant of the forms required by good breeding. **Civil** commonly suggests the bare fulfillment of the ordinary requirements of social intercourse; it frequently implies little more than forbearance from rudeness (it was an entirely *civil* greeting, but that was all you could say of it—*Christopher La Farge*) (this man . . . cut short one of our party, and addressed a silly remark to Spencer . . . Spencer's answer was *civil*, but brief and not inviting—*Fiske*)

Polite, while sometimes suggesting a merely perfunctory attitude, is more positive than *civil*; it commonly implies thoughtfulness for the feelings of others, united with polish of manners and address (nothing was ever so serene as his countenance, so unembarrassed as his manner, so *polite* as his whole demeanor—*Landor*) (the Bishop seldom questioned Jacinto about his thoughts or beliefs. He didn't think it *polite*—*Cather*) **Courteous** implies more considerate and dignified, **courtly**, more stately and ceremonious, observance of due civilities (owns a fine old historical painting in Châtelon and he was *courteous* enough to permit me to view it—*Upton Sinclair*) (be *courteous* to all, but intimate with few—*Washington*) (his great-uncle, a *courtly* and stately old gentleman—*Symonds*) **Gallant** and **chivalrous** imply courteous attentiveness to women. But **gallant** suggests spirited and dashing or ornate and florid expressions of courtesy (the General attended her himself to the street door, saying everything *gallant* . . . admiring the elasticity of her walk, which corresponded exactly with the spirit of her dancing—*Austen*) (the qualities . . . of surface chivalry and *gallant* attentiveness in her brilliant American friend had for a moment seemed to reveal a lack in me—*Ellis*) (in a moment he was all *gallant* anxiety and solicitude—*Wylie*) **Chivalrous** suggests high-minded, disinterested, sometimes self-sacrificing attentions (nothing can beat a true woman for a clear vision of reality; I would say a cynical vision if I were not afraid of wounding your *chivalrous* feelings—*Conrad*) (with what *chivalrous* accents would he address . . . those witty and wise women of old worlds—*L. P. Smith*) (she had fainted from weakness and he had felt strangely *chivalrous* and paternal—*Glasgow*)

Ana complaisant, obliging, *amiable; *gracious, affable, cordial; politic, diplomatic, bland, urbane, *suave
Ant uncivil, rude —**Con** churlish, boorish, loutish (see under BOOR); ill-mannered, impolite, discourteous, ungracious (see RUDE)

civilian *adj* *civic, civil

civilization, **culture** are comparable when meaning the particular state or stage of advancement in which a race, a people, a nation, a specific class, or an integrated group of these finds itself at a given period. **Civilization** always implies a definite advance from a state of barbarism; often it suggests the absence of all signs of barbarism or a divorce from all the ways of living, all the beliefs, all the conditions that distinguish a primitive from a civilized society (the *civilization* of France has been for centuries and is still the central and dominating *civilization* of Europe—*L. P. Smith*) (this mesa had once been like a beehive; it was full of little cliff-hung villages, it had been the home of a powerful tribe, a particular *civilization*—*Cather*) **Culture** (see also CULTURE), on the other hand, suggests rather the complex of attainments, beliefs, customs, and traditions which forms the background of a particular people or group, which distinguishes them from all other peoples or groups, and which gives their particular civilization, no matter how little or how far advanced, its peculiar quality or character (Greece for our purposes means not a race, but a *culture*, a language and literature, and still more an attitude towards life, which for us begins with Homer, and persists, with many changes but no breaks, till the closing of the Athenian lecture rooms by Justinian—*Inge*) (it would no doubt have been more satisfactory to select a people like the Fijians rather than the Lifuans, for they represented a more robust and accomplished form of a rather similar *culture*, but their *culture* has receded into the past—*Ellis*)

Ana cultivation, *culture, breeding, refinement

Ant barbarism —**Con** barbarity (see BARBARISM):

barbarousness, savagery (see corresponding adjectives at BARBARIAN)

claim *vb* *demand, exact, require

Ana *maintain, assert, defend, vindicate, justify; allege, *adduce, advance

Ant disclaim: renounce —*Con* disavow, disown, disacknowledge (see affirmative verbs at ACKNOWLEDGE); reject, repudiate, refuse (see DECLINE *vb*): concede, allow, *grant; waive, cede, *relinquish; *forgo, abnegate

claim *n* **Claim, title, pretension, pretense** are comparable when they denote an actual or alleged right to demand something as one's possession, quality, power, or prerogative. **Claim** carries the strongest implication of any of these terms of a demand for recognition; only the context can indicate whether that demand is regarded as justifiable or not or whether the right is actually asserted by the person involved (though the house was legally the daughter's, the father, as the one who had paid for it and had taken care of all taxes and insurance, had a moral *claim* to live there the rest of his life) (intelligent persons cannot accept the *claims* made for many patent medicines) (he advanced no *claim* to scholarly knowledge) (searching for truth as against all the *claims* and all the counterclaims of all the partisans—*Lippmann*) (liberty itself became . . . a principle of anarchy rather than a body of *claims* to be read in the context of the social process—*Laski*) *Claim* also occurs in a more concrete sense as denoting the property or possession for which one sets up a claim (stake out a *claim* in an oil field) **Title** (see also **NAME**), on the other hand, distinctively imputes validity or justice to the claim, or its substantiation in law or in reason (his distinguished success as the governor of a great state gives him a *title* to our support of his candidacy for president) (many of the people who masquerade under the name of "men of science" have no sort of *title* to that name—*Ellis*) (they were discussed by men each of whom, in his own way, had some *title* to speak on them—*Sat. Review*) **Pretension** (see also **PRETENSE, AMBITION**) is sometimes used in place of *claim* (gifts and excellences to which Wordsworth can make no *pretension*—*Arnold*) and less often, in place of *title* (the courtier, the trader, and the scholar, should all have an equal *pretension* to the denomination of a gentleman—*Steele*) Very often, however, *pretension* connotes a lack of warrant or a weakness in the claim and may attribute to it a measure of hypocrisy or deceit (this court disclaims all *pretensions* to such power—*John Marshall*) (his *pretension*, deftly circulated by press agents, was that he was a man of brilliant and polished mind—*Mencken*) **Pretense** has become rare in the sense of *claim* (see **PRETENSE**). Usually the term applies to an asserted claim (Marlborough calmly and politely showed that the *pretense* was unreasonable—*Macaulay*) but it may apply to a claim that is tacitly made in that one is assumed by another to be something that one is not or to have a right that one does not actually possess (she knew that she was in the house under false *pretenses*, for her host and hostess had warmly welcomed her as a daughter of old friends of the same name)

Ana assertion, affirmation, protestation, declaration (see corresponding verbs at **ASSERT**): *right, prerogative, birth-right, privilege

clamor *n* *din, uproar, pandemonium, hullabaloo, babel, hubbub, racket

clamor *vb* *roar, bellow, bluster, bawl, vociferate, howl, ululate

Ana *shout, yell, scream, shriek, screech, holler: agitate, dispute, debate (see **DISCUSS**): *demand, claim

clamorous *vociferous, blatant, strident, boisterous, obstreperous

Ana importuning or importunate, begging, imploring, adjuring (see corresponding verbs at **BEG**): *vocal, articulate, voluble, eloquent: protesting, expostulating, remonstrating (see **OBJECT** *vb*)

Ant taciturn —*Con* *silent, reserved, uncommunicative, close-lipped: *still, noiseless, quiet

clandestine *secret, covert, surreptitious, furtive, underhand, underhanded, stealthy

Ana concealed, hidden (see **HIDE**): *sly, artful, foxy; illicit, illegitimate (see affirmative adjectives at **LAWFUL**)

Ant open —*Con* aboveboard, *straightforward, forthright: obvious, manifest, *evident, clear, patent

clash *vb* *bump, collide, conflict

Ana *contend, fight, battle, war: compete, vie, *rival: *resist, combat, withstand, oppose: disagree, *differ

Ant blend

clash *n* collision, *impact, impingement, shock, concussion, percussion, jar, jolt

Ana conflict, strife, *discord: noise, *sound: incompatibility, incongruousness, discordance (see corresponding adjectives at **INCONSONANT**)

Con concord, accord, consonance, *harmony

class *n* **Class, category, genus, species, denomination, genre** are compared here only in their general, nonspecialized use, and the following comments may be inapplicable to such technical fields as philosophy and the sciences. **Class** is a very general term for a group including all individuals with a common characteristic (as soon as we employ a name to connote attributes, the things . . . which happen to possess those attributes are constituted ipso facto a *class*—*J. S. Mill*) *Class* consistently implies division which may involve abstraction of a single group from a greater unclassified mass or the separation of a larger group into discrete subgroups; the basis of such a division may be strictly logical or a mere matter of convenience, and often it involves a value judgment (Hickey is the first *class* of English memoirists—*Times Lit. Sup.*) (the *class* of nominal Christians for whom there might be a chance—*Lovett*) **Category** may be interchangeable with *class* but is sometimes more precise in suggesting classification or grouping on the basis of a certain readily perceived criterion or on a predication, often an explicit one (we cannot approach a work of art with our laws and *categories*. We have to comprehend the artist's own values—*Ellis*) (none of the writings of the fathers of the English Church belongs to the *category* of speculative philosophy—*T. S. Eliot*) **Genus** and **species**, scientific in their suggestion, differ in that the first implies a larger less specific group, the latter a smaller more specific one (English society, in other words, is . . . a *species* of a larger cultural *genus*—*Watnick*) (the word *infringement* is almost never used to describe acts of the *genus*, unfair competition. It is applied only to the *species*, namely trademark misuse—*Pattishall*) **Denomination** usually indicates that the group under consideration has been or may be named explicitly and clearly; it is common in religious use (Methodist, Presbyterian, and other *denominations*) and use with a series of closely related units (denominations of currency) **Genre** refers to a specific, named type; its use is mainly restricted to literature and art (some of his prose poems, a *genre* . . . which he invented—*Sat. Rev.*) (the larger literary types or *genres*, such as the drama or novel—*Lerner & Mims*)

Ana division, section (see **PART**): classification (see corresponding verb at **ASSORT**): grade, rank, gradation, rating (see corresponding verbs at **CLASS**)

class *vb* **Class, grade, rank, rate, graduate, gradate** are synonyms in that they all involve the idea of ordering a number of things according to a scale or of placing a thing in

its due order. **Class** usually presupposes a division of a number of things of the same nature into groups; it implies, therefore, an arranging based upon some such principle as age, advancement, quality, or convenience, and a placing of items within one of the resulting groups <class Shakespeare among the greatest dramatists of all time> <men who are *classed* as low in the human scale> <"She has nothing of me that matters," rather inaccurately *classing* under the head of what did not matter, his children, his name, and the right to his bed and board—*Rose Macaulay*> What *class* presupposes, **grade** definitely implies as a fact or a possibility: *grade* also carries a clearer implication of division into groups based on an ascending or descending order (as of quality, merit, advancement, or social status) <*grade* the schools of the state according to certain standards for equipment and teaching> <*grade* oranges according to their size> <we must have instruction *graded* to suit the recipients—*Grandgent*> **Rank** primarily means to arrange in rows or in any serial formation; it, like *class*, presupposes a division, but, more specifically than *class*, it implies a division based upon merit, proved worth, or social standing, and a placing of any one person or type or sometimes thing in its proper place or in order of precedence <the artisan, for example, *ranks* . . . lower than the professional man; but no one maintains that he is . . . incapable by nature . . . of the characteristic excellence of man—*Dickinson*> <the coast road from Egypt to Syria has some claim to *rank* as the most famous of all the roads of history—*Buchan*> <he cannot *rank* Leonardo as an artist higher than Botticelli—*Ellis*> **Rate** (see also ESTIMATE, DESERVE) suggests a determination of the class, or grade, or rank and is used especially of ships and of seamen or ships' officers or of motors or generators with respect to units of power <the ship is *rated* a heavy cruiser> <on board that ship I was *rated* as surgeon—*Besant*> **Graduate** like *grade* implies the existence of an ascending or descending order by which something may be classified or into which it may be fitted; the term, however, stresses rather the existence of differences than an actual division into classes <the hierarchy of officialdom *graduated* like a vast family—*Owen & Eleanor Lattimore*> <the Alhambra possesses retreats *graduated* to the heat of the weather—*Irving*> <specialists whose interest in branches of the law was nicely *graduated*—*Radin*> **Gradate** carries further the trend of *graduate* and implies a changing or passing usually by imperceptible degrees in the direction of either an ascending or a descending scale. The verb is used especially of colors and is less common than the related noun **gradation** which is of far wider application <retiring shades, which *graduate* or go off by degrees—*Hogarth*> <Rembrandt used large areas of delicately *gradated* darks and Veronese large areas of delicately *gradated* lights—*Charles Johnson*> <endless *gradations* in the balance between the denotation of words and their connotation—*Lowes*> <through every *gradation* of increasing tenderness—*Austen*>

Ana divide, *separate, part: assign, *allot: *distribute

classify pigeonhole, *assort, sort

Ana *order, arrange, systematize, methodize, marshal

clause *paragraph, verse, article, plank, count

clean *adj* **Clean**, **cleanly** are often confused. **Clean** is applied to a person or thing that is actually free from dirt; **cleanly** to a person or animal whose habit or tendency is to be clean; thus, one who is *cleanly*, though not always able to keep *clean*, will never remain dirty by choice <an ant is a very *cleanly* insect—*Addison*>

Ana cleaned, cleansed (see CLEAN *vb*): pure, decent, *chaste

Ant dirty —*Con* filthy, foul, nasty, squalid (see DIRTY)

clean *vb* **Clean**, **cleanse** mean to remove whatever soils, stains, or contaminates from someone or something. **Clean** is the word in common and literal use for the removal of foreign matter (as dirt, litter, and debris) typically by washing, sweeping, dusting, or clearing away <*clean* a dress> <*clean* a room> <*clean* off a table> **Cleanse** in this relation seldom wholly loses some hint of its basic notion of making morally or spiritually pure; it is, therefore, the term of choice when the matter to be removed is or is felt as foul, polluting, or noxious or the action is rather one of purifying than of merely restoring to order, freshness, or neatness; thus, one would *clean* a house but, more often, *cleanse* a sickroom; one would *cleanse* a wound but *clean* one's teeth <*cleanse* the bowels with a laxative> Unlike *clean*, *cleanse* is common in essentially metaphoric extension in which it always retains the suggestion of removing what is vile, harmful, or obnoxious <the brilliant campaign which *cleansed* Havana from yellow fever—*S. H. Adams*> <young soldiers who are now being *cleansed* of subversive ideas at Valley Forge Army Hospital—*D. H. Gillis*> <take part in an attempt to *cleanse* the public life of the country—*Ewer*> <the air was purer for the *cleansing* rain—*Macdonald*>

Ant soil

cleanly *adj* *clean

Ana spick-and-span, *neat, tidy, trim, snug: *orderly: dainty, fastidious, fussy, *nice

Ant uncleanly —*Con* slovenly, unkempt, disheveled, sloppy, *slipshod

cleanse *clean

Ana *sterilize, disinfect, sanitize

Ant defile, besmirch

clear *adj* **1 Clear**, **transparent**, **translucent**, **lucid**, **pellucid**, **diaphanous**, **limpid** are comparable when they mean having the property of being literally or figuratively seen through. Something is **clear** which is free from all such impediments to the vision as clouds, mist, or haze <*clear* air> <a *clear* day> or from muddiness, cloudiness, or turbidity <*clear* glass> <*clear* crystals> <the launch moved slowly through water *clear* as air—*Nordhoff & Hall*> or from obscurity, vagueness, or indistinctness of any sort <*clear* thinking> <a *clear* mind> <a *clear* style> <a *clear* vision of reality—*Conrad*> Something is **transparent** which is either so clear or so thin that objects can be easily seen or perceived through it <the water . . . is as *transparent* as the air, so that the stones and sand at the bottom seem, as it were, trembling in the light of noonday—*Shelley*> <*transparent* gauze> <guavas, with the shadows of their crimson pulp flushing through a *transparent* skin—*Melville*> <rushing away from the discussion on the *transparent* pretense of quieting the dog—*Conrad*> <his writings . . . are so flat, so *transparent*, so palpably taken from the nearest authorities—*H. O. Taylor*> Something is **translucent** which admits the passage of light through it but which does not permit a clear sight of what lies beyond <frosted glass is *translucent*> <under the glassy, cool, *translucent* wave—*Milton*> <*translucent* amber that cages flies—*Wylie*> <*translucent* phrases, which mirror . . . the woodland lights and shadows—*L. P. Smith*> Something is **lucid** (see CLEAR 2) which is both transparent and luminous; this use is chiefly literary <gods, who haunt the *lucid* interspace of world and world where never creeps a cloud, or moves a wind—*Tennyson*> <the thought may be obscure, but the word is *lucid*, or rather translucent—*T. S. Eliot*> Something is **pellucid** which is clear as crystal <more *pellucid* streams, an ampler ether, a diviner air—*Wordsworth*> <[Goldsmith's] *pellucid* simplicity—*Harrison*> Something is **diaphanous** which is so delicate and gossamerlike in texture that it is almost transparent or is actually translucent

⟨a *diaphanous* veil⟩ ⟨I like *diaphanous* illusions, with the shapes of things as they are showing not too faintly through them—*L. P. Smith*⟩ Something is **limpid** which has the soft clearness of or as if of pure water ⟨the whole atmosphere has a luminous serenity, a *limpid* clearness—*Ward*⟩ ⟨that . . . simple, *limpid* style which is the supreme style of all—*Arnold*⟩ ⟨Archer's New York . . . in business matters . . . exacted a *limpid* and impeccable honesty—*Wharton*⟩

Ana *bright, luminous: *liquid: *pure, sheer
Ant turbid: confused —**Con** dim, obscure, murky, dusky, gloomy (see **DARK**): muddy, roily (see **TURBID**): muddled, addled, fuddled, befuddled (see **CONFUSE**)

2 Clear, perspicuous, lucid are comparable, as used in reference to qualities of thought or style with the meaning, quickly and easily understood. **Clear** implies freedom from obscurity, ambiguity, or the danger of being misunderstood ⟨“many are called,” there is a *clear* truth: “few are chosen,” there is an obscure truth—*Arnold*⟩ ⟨there are more obscure poems written and printed every year than *clear* ones—*R. B. West*⟩ **Perspicuous** lays more stress than *clear* upon the medium of expression regarded for itself; it frequently connotes a certain simplicity and elegance of style ⟨extreme conciseness of expression, yet pure, *perspicuous*, and musical, is one of the grand beauties of lyric poetry—*Gray*⟩ ⟨the ode is not wholly *perspicuous*. Wordsworth himself seems to have thought it difficult—*Trilling*⟩ **Lucid** especially implies clearness of order or arrangement ⟨he thought little of recasting a chapter in order to obtain a more *lucid* arrangement—*G. O. Trevelyan*⟩ ⟨his descriptions of the most complicated organic structures are astonishingly *lucid*—*Huxley*⟩
Ana express, *explicit, definite: *graphic, vivid: clear-cut, *incisive, trenchant

Ant unintelligible: abstruse —**Con** vague, *obscure, ambiguous, equivocal, cryptic, enigmatic: turgid, tumid (see **INFLATED**): *recondite, occult, esoteric

3 manifest, *evident, obvious, distinct, apparent, patent, palpable, plain

Con *doubtful, dubious, questionable, problematic

clear *vb* *rid, unburden, disabuse, purge

Ana *free, release, liberate, deliver: *clean, cleanse: eliminate, rule out (see **EXCLUDE**)

clearance *room, berth, play, elbowroom, leeway, margin

clear-cut trenchant, *incisive, cutting, biting, crisp

Ana distinct, plain, clear, manifest, *evident: definite, *explicit, express: precise, exact, nice (see **CORRECT**)

Con confused, muddled (see **CONFUSE**): hazy, misty, fogged (see corresponding nouns at **HAZE**)

cleave cling, *stick, adhere, cohere

Ana *fasten, attach, fix, affix: unite, *join, associate, link, combine, conjoin

Ant part —**Con** *separate, divorce, divide, sever, sunder: *detach, disengage: *estrangle, alienate

cleave split, rive, rend, *tear, rip

Ana *separate, divide, sever, sunder, part, divorce: *cut, hew, chop, slit

Con *join, unite, link: attach, *fasten

cleft *n* *crack, fissure, crevasse, crevice, cranny, chink

Ana split, rift, *breach: gap, *break, interruption

clemency 1 lenity, *mercy, charity, grace

Ana compassion, pity, commiseration, *sympathy, ruth: gentleness, mildness (see corresponding adjectives at **SOFT**): fairness, equitableness, justness (see corresponding adjectives at **FAIR**)

Ant harshness —**Con** severity, sternness, austerity (see corresponding adjectives at **SEVERE**): rigorousness, strictness, rigidity (see corresponding adjectives at **RIGID**):

inflexibility, obduracy, inexorableness (see corresponding adjectives at **INFLEXIBLE**)

2 mercifulness, leniency, indulgence, forbearance, tolerance (see under **FORBEARING**)

Ana, Ant, & Con see **CLEMENCY** 1

clement merciful, lenient, indulgent, *forbearing, tolerant
Ana compassionate, *tender, sympathetic: benign, bountiful, kindly, *kind: humane, benevolent, *charitable
Ant harsh: barbarous —**Con** *severe, stern, austere: *rigid, rigorous, strict, stringent: implacable, merciless, relentless, unrelenting, *grim

clemently forbearingly, tolerantly, mercifully, leniently, indulgently (see under **FORBEARING**)

clever 1 *intelligent, quick-witted, brilliant, bright, smart, alert, knowing

Ana *quick, apt, ready, prompt: *versatile, all-around, many-sided: capable, competent, *able: *sharp, keen, acute

Ant dull —**Con** *stupid, slow, dense, crass: *simple, foolish, fatuous, asinine

2 Clever, adroit, cunning, ingenious are comparable when they mean having or showing a high degree of practical intelligence or of skill in contrivance. **Clever** often carries an implication of physical dexterity but it usually stresses mental quickness or resourcefulness ⟨I became so *clever* with the gloves that Ned matched me against a lightweight—*Shaw*⟩ ⟨but Jane's mother had been too *clever* for him. . . she had come to the dinner table primed to do just that thing—*Mary Austin*⟩ ⟨his judgments were wise rather than *clever*, his appreciations scholarly rather than sophisticated—*Hilton*⟩ ⟨Lowell was too *clever* to be sound—*Brooks*⟩ Sometimes it suggests a native aptitude or knack ⟨a dull fellow but very *clever* with horses⟩

Adroit usually suggests greater shrewdness and astuteness than *clever* and often implies the skillful (sometimes the crafty) use of expedients to attain one's ends in the face of difficulties ⟨the *adroit* William Penn . . . found means to stand well at the court of the persecuting James the Second—*Montague*⟩ ⟨one of the most *adroit* technicians ever to have employed the English language—*J. M. Brown*⟩ **Cunning** (see also **SLY**) may retain its older implications of learning and expert knowledge and is then chiefly applied to craftsmen or artists whose work exhibits a high degree of constructive or creative skill ⟨gnomes and brownies: the *cunning* little people who know how to use the bellows, the forge, the hammer, and the anvil—*Mumford*⟩ ⟨he knew how . . . to construct a plot, he was *cunning* in his manipulation of stage effects—*T. S. Eliot*⟩ **Ingenious** stresses inventive power or skill in discovery; sometimes it implies brilliancy of mind, sometimes little more than cleverness ⟨powerful and *ingenious* minds . . . may, by a course of . . . refined and metaphysical reasoning . . . explain away the constitution of our country—*John Marshall*⟩ ⟨this *ingenious* Yankee, quick to adapt himself everywhere, easily extricating himself from situations—*Josephson*⟩

Ana *dexterous, deft, handy: nimble, *agile: *proficient, skillful, skilled, adept, expert, masterly

Con inept, maladroit, *awkward, clumsy, gauche: *slow, laggard, dilatory

cliché platitude, truism, *commonplace, bromide

clientele *following, public, audience

climax *n* culmination, peak, apex, acme, zenith, apogee, *summit, pinnacle, meridian

climb *vb* *ascend, mount, scale

Ant descend

cling cleave, *stick, adhere, cohere

Ana depend, *rely, trust, count, bank, reckon: attach, affix, *fasten: *hang, dangle, suspend

Con desert, forsake, *abandon: *relinquish, leave, resign, yield

clinkers cinders, *ash, embers

clip *vb* *shear, poll, trim, prune, lop, snip, crop

Ana *cut, chop, slash, slit: curtail (see **SHORTEN**): sever, *separate

clique *set, circle, coterie

Ana party, faction, bloc, ring, combine, *combination

cloak *vb* mask, *disguise, dissemble, camouflage

Ana conceal, *hide, screen

Ant uncloak —*Con* *reveal, disclose, discover, betray

clodhopper bumpkin, hick, yokel, rube, *boor, lout, clown, churl

clog *vb* fetter, hog-tie, shackle, manacle, *hamper, trammel

Ana impede, obstruct, *hinder, block: balk, baffle, *frustrate: check, curb (see **RESTRAIN**)

Ant expedite, facilitate —*Con* *free, liberate, release: forward, further, *advance, promote

cloister *n* 1 **Cloister, convent, monastery, nunnery, abbey, priory.** *Cloister* and *convent* are general terms denoting a place of retirement from the world for members of a religious community; they may apply to houses for recluses of either sex. In such use **cloister** stresses the idea of seclusion from the world; **convent**, of community of living. Basically a **monastery** is a cloister for monks; in actual use it is often applied to a convent for men or occasionally for women who combine the cloistered life with teaching, preaching, or other work. **Nunnery**, which specifically denotes a cloister for nuns, is often displaced by *convent* with the same specific meaning. A monastery or nunnery governed by an abbot or an abbess is called an **abbey**; by a prior or prioress, a **priory**. A priory is subordinate in rank to, but often independent of, an abbey.

2 arcade, *passage, passageway, ambulatory, gallery, corridor, aisle, hall, hallway

clone *variety, subspecies, race, breed, cultivar, strain, stock

close *vb* 1 **Close, shut** are very close synonyms in the sense of to stop or fill in an opening by means of a closure (as a door, a gate, a lid, or a cover) and are often used interchangeably. However, they may have distinctive nuances of meaning and quite different implications in idiomatic use. **Close** is the more general term, usually implying both the act of stopping an opening and the result produced by such an act but stressing exclusion of those who would enter or pass through. **Shut** stresses the act or process and the means employed in this process; it not only carries a more emphatic implication or a more vivid suggestion of drawing a door, gate, lid, or window into a position which closes the opening, but it often also evokes an image of fastening securely (as by drawing a bar or a bolt or locking); hence, in *closing* a door or gate one merely draws it into a position which bars entrance or egress until it is again opened but in *shutting* a door or gate one pushes or pulls it into the position where it is closed. Idiomatically, one *closes* (not *shuts*) an opening or a gap or one *closes* (not *shuts*) a park or a church to the public, because in neither case is the use of a door, gate, or other means of exclusion clearly or definitely implied. On the other hand, in idiomatic use *shut*, especially when followed by *up*, *out*, or *against*, carries a stronger and often a more direct and emphatic suggestion than *close* of the interposition of a barrier or obstacle (often an immaterial one) that effectually prevents ingress or egress (he found every road to the accomplishment of his desires *shut* against him) (he *shut* his eyes to everything he did not wish to see) (closed his

eyes in death) (he was warned to *shut* his mouth)

Ana *exclude, debar: block, bar, dam (see **HINDER**)

Ant open

2 **Close, end, conclude, finish, complete, terminate** are comparable as transitive verbs meaning to bring something to a stopping point or to its limit, or, with the exception of *complete*, as intransitive verbs meaning to come to that point. **Close** usually has latent in it the idea of action upon something which may be regarded as in some sense *open* as well as unfinished (see **CLOSE** *vb* 1) (close an account, a debate, or a subscription list) (recall those nights that *closed* thy toilsome days—*Pope*) (the Peace of Westphalia . . . which *closed* the Thirty Years' War—*Barr*) **End** conveys a stronger sense of finality; it frequently has implicit reference to a progress or development which is thought of as having been carried through (the harvest is past, the summer is *ended*, and we are not saved—*Jer* 8:20) (ended his life) (ended his labors upon a book) **Conclude** is a more formal term and applies particularly to transactions, proceedings, or writings that have a formal or special close (concluded his speech with a peroration) (conclude a meeting with a benediction) (I shall *conclude* this essay upon laughter with observing that the metaphor of laughing . . . runs through all languages—*Spectator*) **Finish** implies that what one set out to do is done; often, therefore, it connotes the completion of the final act in a process of elaboration (as polishing or perfecting) (gave the festive table a *finishing* touch) (I have *finished* the work which thou gavest me to do—*Jn* 17:4) (it wants but seventeen lines of having an end, I don't say of being *finished*—*Gray*) (I shall *finish* with a Chopin nocturne—*Hellman*) **Complete** implies the removal of all deficiencies or a finishing of all that has been attempted (when Blondel paused about the middle, the king began the remainder, and *completed* it—*Warton*) (complete their education in Europe) (art partly *completes* what nature is herself sometimes unable to bring to perfection—*Ellis*) (he may well have thought that his days would be few on earth, and that it would be foolish to put his hand to a task which he could not *complete*—*Buchan*) **Terminate** implies the setting of a limit in time or space (Ben Lomond *terminates* the view—*Dorothy Wordsworth*) (the age at which the youth of each nation *terminates* full-time education—*Conant*) (he had never seen the instrument that was to *terminate* his life—*Dickens*) (hostilities *terminate* at sundown)

Ana *stop, cease, quit, desert

Con *begin, commence, start, inaugurate, initiate

Close *adj* 1 **Close, near, nigh, nearby** are comparable both as adjectives and as adverbs when they mean not far (as in place, time, or relationship) from the point, position, or relation that is indicated or understood. **Close** (see also **CLOSE** *adj* 2) commonly implies so slight a difference that the two things (sometimes persons) under consideration may be said to be almost in contact if the difference is in distance or almost coincident if the difference is in time, to be of the immediate family if the difference is in relationship, or to be very like the original if the difference is in a copy (the houses on this street are *close* together) (close relatives) (close friends) (hold one *close*) (the more accurately we use words the *closer* definition we shall give to our thoughts—*Quiller-Couch*) (a *close* shave) (give *close* attention to a problem) (a *close* translation of a passage) **Near** may often be used in place of *close* (events that come *near* to each other) (near relatives) but it carries a much less explicit suggestion of contiguity or adjacency and may be used of persons or things that, though not far off (as in place, time, or relationship) are not almost in contact, almost coincident, or of the

immediate family <come *near* where I can see you> <a *near* concern of all of us> *Near* also is applied to things reproduced (as by copying, imitating, or translating) that more or less closely resemble but are far from replicas of the original; in this sense the term is often used in depreciation <*near* beer> <a *near* translation> <*near* silk> <*near*-leather upholstery> *Nigh* is somewhat outmoded or poetic in the sense of *near*. As an adverb it, even more often than *near*, is followed by *to*, *unto*, *about*, *on*, *upon* <he was sick *nigh* unto death—*Phil* 2:27> <now the day is over, night is drawing *nigh*—*Baring-Gould*> As an adjective it differs little from *near* except in sometimes being given preference in the comparative and superlative degrees to *nearest* and *nearest* <friend, brother, *nearest* neighbor—*Whitman*> *Nearby* indicates a position near in distance or close at hand <*nearby* towns> <the *nearby* houses> <there is no hotel *nearby*>

Ana adjoining, *adjacent, contiguous, abutting: *related, kindred

Ant remote or remotely —*Con* *distant, removed, far, faraway, far-off

2 *close*, *dense*, *compact*, *thick* are comparable when they mean having constituent parts (as filaments, particles, cells, or atoms) that are massed tightly together. *Close* may apply to the texture or weave of something <between the *close* moss violet-inwoven—*Shelley*> <a paper of fine, *close* texture> <a cloth of *close* weave> More often, however, the term applies to something that is made up of a number of single things pressed or seemingly pressed together <he writes a *close* hand> <the troops fought in *close* formation> Especially as applied to literary expression, *close* implies a compression of what is to be said into the fewest and most telling words possible <it is a relief to turn back to the austere, *close* language of *Everyman*—*T. S. Eliot*> *Dense* applies to something in which the arrangement of parts or units is exceedingly close <*dense* clouds> <a *densely* populated district> <a *dense* star> <a *dense* flower spike> The term commonly implies impenetrability <a *dense* thicket> and in extended use may lose the basic notion of close packing of parts <a *dense* mind> <*dense* stupidity> <*dense* silence> <*Proust*'s book is a gigantic *dense* mesh of complicated relations—*Edmund Wilson*> *Compact* suggests close and firm union or consolidation of parts, especially within a small compass; it often also implies neat or effective arrangement <he was all *compact* and under his swart, tattooed skin the muscles worked like steel rods—*Melville*> <small, *compact*, homogeneous communities such as the Greek city state or Elizabethan England—*Day Lewis*> *Thick* (see also *STOCKY*) usually applies to something which is condensed or is made up of abundant and concentrated parts <make the gruel *thick* and slab—*Shak.*> <a *thick* swarm of bees> <a *thick* grove> <a *thick* head of hair>

Ana compressed, condensed, constricted (see *CONTRACT vb*): concentrated, compacted (see *COMPACT vb*)

Ant open —*Con* scattered, dispersed (see *SCATTER*): expanded (see *EXPAND*)

3 close-lipped, closemouthed, tight-lipped, secretive, reserved, taciturn, reticent, uncommunicative, *silent

Ant open (see *FRANK*) —*Con* *frank, candid, plain: garrulous, loquacious, *talkative, voluble, glib

4 intimate, confidential, chummy, thick, *familiar

Ant aloof

5 closefisted, tight, tightfisted, niggardly, parsimonious, penurious, *stingy, cheeseparing, penny-pinching

Ana *sparing, economical, frugal, thrifty

Ant liberal —*Con* generous, bountiful, bounteous, openhanded (see *LIBERAL*): lavish, prodigal (see *PROFUSE*)

closefisted

*stingy, close, tight, tightfisted, niggardly,

parsimonious, penurious, miserly, cheeseparing, penny-pinching

Ana, *Ant*, & *Con* see those at *CLOSE adj* 5

close-lipped close, closemouthed, uncommunicative, taciturn, reserved, reticent, secretive, *silent, tight-lipped

Ant & *Con* see those at *CLOSE adj* 3

closemouthed close, close-lipped, tight-lipped, reticent, reserved, uncommunicative, *silent, taciturn, secretive

Ant & *Con* see those at *CLOSE adj* 3

clot *vb* congeal, curdle, *coagulate, set, jelly, jell

clothe, **attire**, **dress**, **apparel**, **array**, **robe**. *Clothe*, the least specific of these terms, means to cover or to provide what will cover (one's body or whatever is bare) with or as if with garments <*clothe* the child warmly> <*clothe* your thoughts in words> <rugged hills *clothed* and softened with snow> The other words convey the same meaning but each one adds to it distinctive implications and connotations. *Attire* suggests a more careful process and more formality than *clothe* and therefore is avoided except when the context requires that note <he said it was for the honor of the Service that he *attired* himself so elaborately; but those who knew him best said that it was just personal vanity—*Kipling*> *Dress* is far less formal than *attire* and much richer in its connotations than *clothe*. It often suggests care in the choice and arrangement of clothes and sometimes, especially in *dress up*, preening and prinking or selection of one's best or choicest clothes <children warmly but simply *dressed* for school> <every afternoon she *dresses up* and goes out> <*dressed up* in his Sunday clothes> *Dress up* sometimes distinctively implies an assuming of the dress of or a dress suitable to another <*dress up* as Cleopatra> while *dress*, especially in its intransitive or reflexive forms, often implies a change of clothes to those that are appropriate for a special occasion; thus, to *dress* for dinner implies a change into dinner or evening clothes <I shall not have time to *dress*> The idea of decking or adorning is frequently associated with *dress* especially in its extended senses <*dress* the hair with flowers> <*dress* the table for an elaborate dinner> <yet shall thy grave with rising flow'rs be *dressed*—*Pope*> *Apparel* and *array* are chiefly literary words used when there is the intent to connote splendor, elegance, or gorgeousness in what a person or thing is clothed with <she had a garment of divers colors upon her: for with such robes were the king's daughters . . . *appareled*—2 *Sam* 13:18> <a time when meadow, grove, and stream . . . to me did seem *appareled* in celestial light—*Wordsworth*> <consider the lilies of the field, how they grow; they toil not, neither do they spin: and yet I say unto you, that even Solomon in all his glory was not *arrayed* like one of these—*Mt* 6:28, 29> <I rode with him to court, and there the Queen *arrayed* me like the sun—*Tennyson*> *Robe* implies a dressing with or as if with a robe and has the same wide range of use as the noun but it typically suggests the enveloping apparel worn by a king, queen, or noble on state occasions, by a judge or a professor when the conventions of his office demand it, or by a bishop or other high ecclesiastic when formally but not liturgically attired <helped to *robe* him . . . in a quilted robe of scarlet silk—*Waln*> <love *robed* her in a blush—*Lynch*>

Ant unclothe —*Con* *strip, divest, dismantle

clothes, **clothing**, **dress**, **attire**, **apparel**, **raiment** are comparable when they denote a person's garments considered collectively. *Clothes* and *clothing* are general words which do not necessarily suggest a wearer or personal owner but sometimes a manufacturer or a merchant <evening *clothes*> <summer *clothing* for men> <her *clothes* are always immaculate> <each child has ample *clothing*>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Dress is used with reference only to a wearer's outer clothes; it is not only far less inclusive than *clothes* and *clothing* but less concrete in its suggestions except when qualified <both men and women are expected to wear full *dress*> <the actors will be costumed in the *dress* of the period> <a man of sense carefully avoids any particular character in his *dress*—*Chesterfield*> <in pilgrimage *dress* on his way to Mecca—*Doty*> **Attire** usually stresses the appearance or the total impression produced by one's clothes; it is therefore rarely used with reference to one's own clothes except in affectation or humorously; when applied to another person's, it is as a rule qualified <our speech, our color, and our strange *attire*—*Pope*> <his unfashionable *attire* and clumsy manners—*Cole*> **Apparel** (often specifically *wearing apparel*) carries a weaker suggestion of the effect produced and a stronger implication of a collection or assemblage of clothes than *attire*, which otherwise it closely resembles in meaning; therefore one says an article of *apparel* (rather than *attire*) and the richness of her *attire* (rather than *apparel*) <a blue serge suit, a grey shirt, a blue and red necktie, a gray homburg, and black shoes and gloves comprised his *apparel*> <the *apparel* oft proclaims the man—*Shak.*> <his daily *apparel* was rough and shabby—*Cather*> **Raiment** is a more or less literary term that is nearly as comprehensive as *clothes*, for it includes everything that is worn for decency, comfort, and adornment and therefore suggests reference to undergarments as well as to outer garments <brought a change of *raiment* with him> When the quality or the texture of the clothing is to be indicated, *raiment* is the appropriate word <fine *raiment*> <the coarse *raiment* of a penitent pilgrim> <but what went ye out for to see? A man clothed in soft *raiment*? behold, they that wear soft clothing are in kings' houses—*Mt 11:8*> <if these strangers were of important air and costly *raiment*—*O'Nolan*>

clothing *clothes, dress, attire, apparel, raiment

cloud *vb* *obscure, dim, bedim, darken, eclipse, becloud, fog, befog, obfuscate

Ana *confuse, muddle, addle, befuddle: *puzzle, perplex, distract

clout *vb* *strike, hit, smite, punch, slug, slog, swat, slap, cuff, box

Ana *beat, pummel, thrash, baste, belabor

clown *boor, clodhopper, lout, bumpkin, hick, yokel, rube, churl

Ana simpleton, natural (see **FOOL**)

clownish loutish, boorish, churlish (see under **BOOR**)

Ana *awkward, clumsy, gauche: *rude, rough, raw, green, uncouth

Ant urbane —*Con* *suave, bland, smooth, polite

cloy *vb* *satiatate, sate, surfeit, pall, glut, gorge

Ant whet —*Con* stimulate, pique, excite, *provoke

club society, *association, order

clumsy *awkward, gauche, maladroit, inept

Ana *rude, rough, green, callow, uncouth: loutish, clownish, boorish (see under **BOOR**): *stiff, wooden, tense, rigid

Ant dexterous, adroit: facile —*Con* deft (see **DEXTEROUS**): graceful, dignified, elegant (see corresponding nouns at **ELEGANCE**): *elastic, resilient, flexible, supple, springy: *easy, effortless, smooth

cluster *n* *group, bunch, parcel, lot

Ana collection, assemblage (see under **GATHER**): aggregate, number, quantity (see **SUM**)

clutch *vb* grasp, grab, *take, seize, snatch

Ana capture, *catch: hold, *have, possess, own

clutch *n* *hold, grip, grasp

Ana seizing, grabbing, taking (see **TAKE**)

clutter *n* *confusion, disorder, disarray, jumble, chaos, muddle, snarl

coadjutor *assistant, helper, aid, aide, aide-de-camp

coagulate, **congeal**, **set**, **curdle**, **clot**, **jelly**, **jell** are comparable when meaning to form or cause to form a stiff mass that is solid or at least cohesive. **Coagulate** implies a thickening or solidification of a liquid and usually the making insoluble (as by chemical reaction) of something that was soluble <fresh blood exposed to air rapidly *coagulates*> <heat *coagulates* the white of egg> <waterborne impurities which *coagulate* when aluminum sulfate is added can be removed by filtration> **Congeal** specifically implies a thickening or solidification by means of cold; the mass thus affected may dissolve or become liquid when the temperature rises again <freezing temperatures have *congealed* the surface waters of the river> <here no hungry winter *congeals* our blood—*Longfellow*>

Set (see also **SET**) carries no implication of how the stiffening, or making solid or viscid, occurs but only of the nature of the effect <rennet may be used in *setting* milk for cheese> <give the jelly time to *set* before adding a paraffin cover> **Curdle** basically implies the coagulation of milk (as through souring or the addition of rennet) into a soft but solid part (the curd) from which cheese is made, and the separation of this part from the watery part (the whey); in more general use the term connotes a thickening and sometimes a souring <Mark Twain was expressing his true opinions, the opinions of the cynic he had become owing to . . . the constant *curdling* as it were of the poet in him—*Brooks*> <envy soon *curdles* into hate—*Froude*> **Clot** implies the coagulation or congealing of a liquid into lumps or masses or, less often, the gathering of something light and diffuse into hard accumulations or lumps <the blood not yet had *clotted* on his wound—*Southey*> <*clotted* cream> <the bed becomes uneasy by the feathers *clotting* together into hard knobs—*Tucker*> **Jelly** specifically implies the setting during cooling of a cooked liquid (as broth or juice of meats) containing gelatin from animal tissue or one (as fruit juice and sugar) containing the pectin of acid fruits <the *jellied* juice of the veal roast> <jellies and marmalades *jelly* readily if pectin is added to the boiling juice> **Jell** is basically identical to *jelly* <the jelly won't *jell*—*Alcott*> but unlike the latter it is often used especially in negative constructions to imply the state when nonmaterial things (as ideas or plans) attain fixity or cohesiveness <public opinion has not yet *jelled* on this question> <his ideas for the story would not *jell*, no matter how much he kept turning them over in his mind>

Ana solidify, *harden: cohere, *stick: coalesce, fuse, blend (see **MIX**): concentrate, consolidate, *compact

coalesce merge, fuse, blend, mingle, commingle, *mix, amalgamate

Ana *compact, consolidate, concentrate, unify: *contract, condense, compress: cohere, adhere, *stick, cleave, cling: mass (see **HEAP**)

Con disintegrate, crumble, decompose (see **DECAY**): *separate, part, divide: deliquesce (see **LIQUEFY**): dissipate, disperse (see **SCATTER**)

coalition fusion, confederacy, confederation, federation, *alliance, league

coarse, **vulgar**, **gross**, **obscene**, **ribald** are comparable when applied to persons, their language, or behavior and mean offensive to a person of good taste or moral principles. **Coarse** is opposed to *fine* not only with reference to material things (as fiber, texture, or structure) but also with reference to quality of mind, spirit, manners, or words; it implies roughness, rudeness, crudeness, or insensitivity <whose laughs are hearty, though his jests are

coarse—*Pope* <simple parables of the *coarse* businessman and the sensitive intellectual—*De Voto*> <some of the royal family were as *coarse* as the king was delicate in manners—*Henry Adams*> **Vulgar** (see COMMON 3) suggests something that is offensive to good taste or decency, frequently with the added implication of boorishness or ill breeding <Caliban is coarse enough, but surely he is not *vulgar*—*Hazlitt*> <Burns is often coarse, but never *vulgar*—*Byron*> <it was, in fact, the mouth that gave his face its sensual, sly, and ugly look, for a loose and *vulgar* smile seemed constantly to hover about its thick coarse edges—*Wolfe*> **Gross** (see FLAGRANT) is opposed to *fine* in the sense of delicate, subtle, ethereal; it implies either a material, as contrasted to a spiritual, quality or a bestiality unworthy of man <the *grosser* forms of pleasure—*Wharton*> <*gross* habits of eating> <Caliban . . . is all earth, all condensed and *gross* in feelings and images—*Coleridge*> <my anger and disgust at his *gross* earthy egoism had vanished—*Hudson*> **Obscene** stresses more strongly the idea of loathsome indecency or utter obnoxiousness <the war to him was a hateful thing . . . waged for the extension of the *obscene* system of Negro slavery—*Parrington*> <an *obscene* allusion> <the jest unclean of linkboys vile, and watermen *obscene*—*Pope*> <the rabble of Comus . . . reeling in *obscene* dances—*Macaulay*> <it was, of course, easy to pick out a line here and there . . . which was frank to indecency, yet certainly not *obscene*—*Canby*> **Ribald** suggests vulgarity and often such impropriety or indecency as provokes the laughter of people who are not too fastidious <a *ribald* folksong about fleas in straw—*Loves*> <their backs . . . shaking with the loose laughter which punctuates a *ribald* description—*Mary Austin*> <we stare aghast, as in the presence of some great dignitary from behind whom, by a *ribald* hand, a chair is withdrawn when he is in the act of sitting down—*Beerbohm*> *Ana* rough, crude, *rude, raw, green, callow, uncouth: *rank, rampant: boorish, loutish, clownish (see under BOOR)

Ant fine: refined —*Con* delicate, dainty, exquisite, *choice: cultivated, cultured (see corresponding nouns at CULTURE)

coast *n* *shore, strand, beach, bank, foreshore, littoral
coast *vb* toboggan, *slide, glide, slip, skid, glissade, slither

coax, **cajole**, **wheedle**, **blandish** mean to use ingratiating art in persuading or attempting to persuade. **Coax** implies gentle, persistent efforts to induce another or to draw what is desired out of another <in a *coaxing* voice, suited to a nurse soothing a baby—*Burney*> It most often suggests artful pleading or teasing in an attempt to gain one's ends <little by little, he *coaxed* some of the men whom the measure concerned most intimately to give in their views—*Kipling*> <one . . . who can linger over and taste a phrase, *coaxing* its flavor to the palate as if it were an old wine—*Moody*> <his skill in *coaxing* . . . the attention of the variable human mind to divine objects—*T. S. Eliot*> but it may be extended to other situations in which persevering yet careful efforts are used to attain an end <*coax* embers into a blaze> **Cajole** may stress deceit (as by flattering or making specious promises) <they . . . should be treated as they themselves treat fools, this is, be *cajoled* with praises—*Pope*> It more often implies enticing or alluring and suggests beguilement rather than duplicity <I think a vein of sentiment . . . induced me to take the journey, and to *cajole* a reluctant friend into accompanying me—*Replier*> **Wheedle** suggests more strongly than *cajole* the use of soft words, artful flattery, or seductive appeal <she could *wheedle* the soul out of a saint—*Hewlett*> <he had *wheeled* the Abeyta woman out

of her geraniums, and left her pleased with herself for surrendering them—*Mary Austin*> <no hucksters to *wheedle* you into buying souvenirs—*Nebel*> **Blandish** implies less artfulness than *wheedle* and more open flattery and a more apparent desire to win over by charming or alluring <would the *blandishing* enchanter still weave his spells around me—*Dickens*> <found herself being *blandished* by millionaires—*Rogow*>

Ana *induce, persuade, prevail, get: tease, pester (see WORRY): inveigle, entice, tempt, *lure

Ant bully —*Con* bulldoze, browbeat, *intimidate, cow: *threaten, menace: compel, coerce, oblige, *force, constrain

cobble *vb* *botch, bungle, fumble, muff

Ana patch, *mend, repair: fabricate, forge, manufacture (see MAKE): impair, mar, spoil (see INJURE)

cock *vb* stack, shock, pile, *heap, mass, bank

Ana *gather, collect, assemble

Con *scatter, disperse

cock *n* stack, shock, pile, heap, mass, bank (see under HEAP *vb*)

cocksure positive, certain, *sure

Ana *confident, assured, sanguine, presumptuous: pretentious (see SHOWY): *decided, decisive

Ant dubious, doubtful —*Con* modest, diffident (see SHY)

coerce compel, *force, constrain, oblige

Ana *intimidate, bulldoze, bully, browbeat, cow: *threaten, menace: drive, impel (see MOVE): terrorize (see FRIGHTEN)

Con *induce, persuade, prevail, get: *coax, cajole, wheedle, blandish: *lure, entice, tempt, seduce, inveigle

coercion compulsion, *force, violence, duress, constraint, restraint

Ana *power, might, puissance, strength: intimidation, bulldozing, bullying, browbeating (see corresponding verbs at INTIMIDATE): threatening or threat, menacing or menace (see corresponding verbs at THREATEN)

coetaneous coeval, contemporaneous, *contemporary, synchronous, simultaneous, coincident, concomitant, concurrent

coeval coetaneous, synchronous, concurrent, simultaneous, coincident, concomitant, *contemporary, contemporaneous

cogent convincing, compelling, telling, *valid, sound

Ana forceful, forcible, potent, *powerful, puissant: compelling, constraining (see FORCE *vb*): inducing, persuading or persuasive (see corresponding verbs at INDUCE): proving, demonstrating (see PROVE): *effective, effectual

cogitate *think, reflect, deliberate, reason, speculate

Ana *ponder, ruminare, meditate, muse: *consider, excogitate, weigh, contemplate, study: *think, conceive, imagine, envisage, envision

cognate *related, allied, kindred, affiliated

Ana akin, alike, identical, similar (see LIKE): common, generic, general, *universal

Con diverse, *different, divergent, disparate, various

cognizant *aware, conscious, sensible, alive, awake

Ana *conversant, versed: informed, acquainted, apprised (see INFORM)

Ant ignorant —*Con* *insensible, insensitive, impassible, anesthetic: ignoring, overlooking, slighting, neglecting (see NEGLECT): oblivious, unmindful, *forgetful

cohere *stick, adhere, cleave, cling

Ana coalesce, fuse, merge, blend (see MIX): *fasten, attach, affix: *join, combine, unite, connect, associate
Con *detach, disengage: disentangle, untangle, disembarass (see EXTRICATE)

coherence, **cohesion** mean the quality or character of a whole all of whose parts cohere or stick together. **Coherence** usually implies a unity of such immaterial or intangible things as the points of an argument, the details of a picture, or the incidents, characters, and setting of a story, or of material or objective things that are bound into unity by a spiritual, intellectual, or aesthetic relationship (as through their clear sequence or their harmony with each other); it commonly connotes an integrity which makes the whole and the relationship of its parts clear and manifest (to treat the subject with the clearness and *coherence* of which it is susceptible—*Wordsworth*) (is there or is there not a spiritual *coherence* in Christianity, or is it only a gathering of laws and precepts, with no inherent connected spiritual philosophy?—*Galsworthy*) (scientific work . . . may indeed possess the appearance of beauty, because of the inner *coherence* which it shares with fine art—*Alexander*) (no more *coherence* than the scattered jangle of bells in the town below—*Quiller-Couch*) **Cohesion** more often implies a unity of material things held together by such a physical substance as cement, mortar, or glue or by some physical force (as attraction or affinity) (a house stands and holds together by the natural properties, the weight and *cohesion* of the materials which compose it—*T. H. Huxley*) (what am I, Life? A thing of watery salt held in *cohesion* by unresting cells which work they know not why, which never halt—*Masefield*) *Cohesion* may also be used of either material or immaterial things when the emphasis is on the process by which things cohere rather than on the resulting unity (a state composed of discordant races incapable of *cohesion*)

Ana *unity, integrity, solidarity, union: clearness, perspicuousness, lucidity (see corresponding adjectives at CLEAR)

Ant incoherence

cohesion *coherence

Ana unification, consolidation, concentration, compacting (see corresponding verbs at COMPACT): coalescence, fusing or fusion, blending or blend, merging (see corresponding verbs at MIX)

Con disintegration, decomposition, crumbling (see corresponding verbs at DECAY): deliquescence (see corresponding verb at LIQUEFY)

coil *vb* *wind, curl, twist, twine, wreath, entwine

Ana *turn, revolve, rotate, circle

coin *n* coinage, currency, specie, legal tender, cash, *money

coinage coin, currency, cash, specie, legal tender, *money

coincide concur, *agree

Ana accord, correspond, jibe, harmonize, tally (see AGREE): *match, equal

Ant differ —*Con* diverge (see SWERVE)

coincident synchronous, simultaneous, concurrent, concomitant, coeval, coetaneous, contemporaneous, *contemporary

cold, **cool**, **chilly**, **frigid**, **freezing**, **frosty**, **gelid**, **icy**, **glacial**, **arctic** mean having a temperature below that which is normal or comfortable. **Cold** is the general term, often implying nothing more than a lack of warmth (a cold day) (a cold hand) (cold meat) It may also connote discomfort (shivering in her cold room) (battered by a cold wind) **Cool** suggests moderate and often refreshing coldness (a cool breeze) (a cool hand on a fevered brow) (a cool drink) but when hotness or warmth is desirable it, too, connotes something disagreeable (cool soup) (a cool radiator) **Chilly** implies coldness that makes one shiver (a chilly morning) (a chilly room) *Frigid*, *freezing*, and *frosty* imply temperatures below 32° Fahrenheit. **Frigid**

stresses the intensity of the cold (a frigid climate) (frigid weather) and **freezing** its congealing effect (as on man, vegetation, and water) (a freezing wind) (freezing temperature) while **frosty** applies rather specifically to times or conditions in which fine ice crystals are deposited from atmospheric moisture onto a cold surface (frosty nights are usually clear and cold with little wind) **Gelid** is equivalent to *freezing*, but it somewhat more often stresses the resultant discomfort (so the leaden hours passed in the gelid darkness—*Sitwell*) (while sea-born gales their gelid wings expand—*Goldsmith*) **Icy**, when used to indicate a kind of coldness, implies frigidity so great as to be painful and cutting; it is applicable chiefly to winds, storms, and water (an icy rain) (an icy northeast wind) Basically **glacial** is very close to *icy* (the air in the cave was glacial, penetrated to the very bones—*Cather*) but its later association with *glacier* has given it an ambiguous cast in many locations; thus, a glacial lake might be, according to context, either a painfully cold lake or one formed by the action of a glacier. **Arctic** is the strongest of these words in its suggestion of intense coldness. It connotes the frigidity of the polar regions and is usually a hyperbolic rather than an exact term (a winter notable for its arctic temperatures)

When applied to persons, their temperaments, their acts and words, and their responses to stimuli, these words are also marked by differences in implications. **Cold** suggests absence of feeling or emotion, or less than normal human sympathy, friendliness, sensitiveness, or responsiveness (his plea left us cold) (cold words) (he treated us with cold justice) (their cold intelligence, their stereotyped, unremitting industry repel me—*L. P. Smith*) (Okio, in spite of his unerring eye and his incomparable cunning of hand, was of too cold a temperament to infuse a powerful current of life into the old tradition—*Binyon*) **Cool** (see also COOL 2) stresses control over one's feelings or emotions, and therefore absence of excitement or agitation (this wonder, that when near her he should be cool and composed, and when away from her wrapped in a tempest of desires—*Meredith*) (both looked at life with a cool realism which was not allowed to become cynical—*Buchan*) **Chilly**, **frosty**, and **freezing** usually stress the effect of another's coldness: **chilly** connotes a depressing or repressive influence (a chilly greeting) (a chilly reception) while **frosty** connotes a checking or restraining of advances (a frosty smile) and **freezing** connotes a blighting or repelling (a freezing reply to a letter) (many . . . had been repelled by his freezing looks—*Macaulay*) **Frigid** suggests such a deficiency of natural feeling as is abnormal or repellent; it is specifically applicable to persons who are sexually passionless and averse to sexual intercourse, but it is often applied to things which are not, but by their nature should be, impassioned or infused with feeling or warmth (frigid verse) (a frigid religion) (frigid hospitality) **Gelid** and **icy** suggest a discomfiting chill (as in manner or conduct), the former sometimes stressing the power to numb, the latter the power to pierce or stab (immediately, the long gelid, nightly silence fell between us—*Spina*) (sweeping her sympathizers with a gelid gaze—*Patton*) (her voice dropped into an icy gravity—*Yerby*) (a lady of the most arresting beauty and icy good breeding—*Max Peacock*) **Glacial** suggests a chilling lack of vitality or animation (Boston, for all its glacial perfection, has no intimacy at all—*Virgil Thomson*) (his manner more glacial and sepulchral than ever—*Motley*) **Arctic** frequently adds to *frigid* a connotation of remoteness from all that is human or referable to humanity (exact and arctic justice—*Mencken*)

Ant hot

collate *compare, contrast

collateral *adj* *subordinate, secondary, dependent, subject, tributary

Ana *related, allied, kindred, cognate: correlative, complementary, corresponding, *reciprocal

collation *comparison, parallel, contrast, antithesis

Ana corroboration, verification, confirmation, authentication (see corresponding verbs at CONFIRM): emending or emendation, revising or revision, correcting or correction (see corresponding verbs at CORRECT)

colleague *partner, copartner, ally, confederate

Ana *associate, companion, comrade

collect *gather, assemble, congregate

Ana mass, *heap, pile: *accumulate, amass, hoard: consolidate, concentrate, *compact

Ant disperse: distribute —*Con* *scatter, dissipate, dispel: dispense, divide, deal, dole (see DISTRIBUTE): *separate, part, sever, sunder: *assort, sort

collected composed, *cool, unruffled, imperturbable, unflappable, nonchalant

Ana *calm, placid, tranquil, serene: quiet, *still: assured, *confident, sure, sanguine: *complacent, smug, self-satisfied

Ant distracted, distraught —*Con* agitated, perturbed, upset, disturbed, flustered, flurried (see DISCOMPOSE)

collection assemblage, assembly, gathering, congregation (see under GATHER *vb*)

Ana heap, pile, mass, stack (see under HEAP *vb*): accumulation, hoarding or hoard (see corresponding verbs at ACCUMULATE)

collide *bump, clash, conflict

Ana hit, *strike: impinge, impact (see corresponding nouns at IMPACT): dash, charge, *rush

collision *impact, impingement, clash, shock, concussion, percussion, jar, jolt

Ana striking, hitting (see STRIKE *vb*): wrecking or wreck, ruining or ruin, dilapidation (see corresponding verbs at RUIN): demolishment, destruction (see corresponding verbs at DESTROY)

colonnade, arcade, arcature, portico, peristyle are discriminable as used in architecture. A **colonnade** is a row of columns (typically on the outside of a building) spaced at regular intervals and carrying an architrave or horizontal member lying directly across their capitals, so that the opening between each pair of columns is square-topped. *Colonnade* is usually applied not only to the columns but to the entire structure consisting of columns, roof, and pavement or to the space which they enclose. The word is used especially in reference to classical architecture. An **arcade** is a long series of arches with their supporting columns and piers together with the other members that complete the structure as an architectural feature. An arcade may be either inside or outside of a building; it may be a purely decorative feature or a means of admitting light and air. When purely decorative, the spaces between the arches and the piers may be filled in (sometimes providing niches for statues); this type of arcade is also called an **arcature**. An arcade may take the place of an outer wall (as of a gallery or cloister). *Arcade* is used especially of types of architecture (as the late Romanesque and the Gothic) in which the arch is an essential feature. *Portico* and *peristyle* are used in reference to architectural features employing the colonnade. When the colonnade extends across, or nearly across, one side of a building and serves as an entrance, it is called a **portico**; when it is continued so as to extend along three or, usually, all four sides of a building, it is called a **peristyle**.

color *n* 1 **Color, hue, shade, tint, tinge, tone** are comparable when they mean a property or attribute of a visible thing

that is recognizable only when rays of light fall upon the thing and that is distinct from properties (as shape or size) apparent in dusk. **Color** is the ordinary term and, in precise use, the only generic term of this group. It may apply to the quality of blood which one describes as redness, of grass as greenness, of the sky as blueness, of snow as whiteness, or of ebony as blackness, or to the optical sensation which one experiences when one sees these things respectively as red, green, blue, white, and black. It may refer to any of the bands of the spectrum or to any of the variations produced by or as if by combination of one or more of these with another or with white, black, or gray (Walden is blue at one time and green at another. . . . Lying between the earth and the heavens, it partakes of the *color* of both—*Thoreau*) *Color* is also specifically applicable to the attribute of things seen as red, yellow, blue, orange, green, purple (the chromatic *colors*) as distinct from the attribute of things seen as black, white, or gray (the achromatic *colors*) (give a white house touches of *color* by painting the window sashes and shutters green) **Hue**, especially in poetry or elevated prose, is often synonymous with *color* (as brown in *hue* as hazelnuts and sweeter than the kernels—*Shak.*) (All the gradational *hues* of the spectrum from red through yellow, green, blue, to violet—*Scientific Monthly*) More specifically, *hue* suggests some modification of color (their shining green has changed to a less vivid *hue*; they are taking bluish tones here and there—*Hearn*) **Shade** is often used in the sense of one of the gradations of a color, especially as its hue is affected by its brilliance (seek a darker *shade* of blue) (a brighter *shade* of green) (various *shades* of gray) (the dark ultramarine of the west turns a *shade* paler—*J. C. Van Dyke*) **Tint** is also used as meaning a gradation of color in respect to brilliance, but it always suggests hue and is commonly used in reference to light colors that seem to be given by a light or delicate touching; thus, what are often called “pastel *colors*” or “pastel *shades*” are known also as *tints*. The term is not infrequently used in contrast to *shade*, especially when the latter word connotes comparative darkness or dullness (the flags by the shore were turning brown; a *tint* of yellow was creeping up the rushes—*Jefferies*) (dark it appeared, but the precise *tint* was indeterminate—*Hudson*) (the sprays of bloom which adorn it are merely another *shade* of the red earth walls, and its fibrous trunk is full of gold and lavender *tints*—*Cather*) **Tinge** implies more of interfusion or stain than *tint* (autumn bold, with universal *tinge* of sober gold—*Keats*) (the water . . . imparts to the body of one bathing in it a yellowish *tinge*—*Thoreau*) **Tone** is a rather general word, sometimes equivalent to *color* but more often suggesting *hue* or a modification of hue (as a *tint* or *tinge*) (from strand to cloud-capped peak, the *tone* was purple—*Beebe*) (tone, which he plays with as has no other of the moderns, modifying color brightness to achieve his foreseen tonal harmony—*Cheney*)

Nearly all of these terms carry extended meanings derived from or related to the senses previously considered. **Color** usually suggests an outward character or aspect such as may be changed by circumstances (your love for him has changed its *color* since you have found him not to be the saint you thought him—*Hardy*) (it had been an essentially aristocratic movement But . . . it took on a strongly democratic *color*—*Mencken*) or may be imparted to a thing to brighten and vivify it (people talk of matters which I had believed to be worn threadbare by use, and yet communicate a rich *color* . . . to them—*Benson*) **Hue** is less often so used than *color*; it usually suggests a character rather than an aspect, but it does not necessarily imply an ingrained character (our

mental *hue* depends . . . completely on the social atmosphere in which we move—*Horace Smith* > **Tint** applies to a character that is not dominant but imparted as if by contact or influence <our inborn spirits have a *tint* of thee—*Byron*> **Shade** and **tinge** are used in the sense of *trace, touch, trifle* (for this sense, see TOUCH) <eyes that . . . had some *tinge* of the oriental—*Edmund Wilson*> <a *shade* less cordial than usual> <a *tinge* of sadness>

2 usually in plural **colors** *flag, ensign, standard, banner, streamer, pennant, pendant, pennon, jack

colorable *plausible, credible, believable, specious
Ana convincing, compelling, telling, cogent, sound, *valid

colorless uncolored, achromatic mean without color. However, they are not freely interchangeable. **Colorless** is applied to something that is transparent <water is a *colorless* liquid> or to something that is bleached, blanched, or pallid <*colorless* leaves> <*colorless* cheeks and lips> **Uncolored** is applied to something that is left in its natural state or is not dyed or stained <*uncolored* oranges> or to objects which have not been touched or touched up with color <an *uncolored* photograph> **Achromatic** is applied to something that is free from any of the hues in the spectrum or from any hues formed by combinations of these or that gives images which are free from extraneous colors produced by refraction (an *achromatic* color) <an *achromatic* telescope> A color (in its inclusive sense) may be *chromatic* or *achromatic*: if the former, it has a hue; if the latter, it has not and is, therefore, white, black, or a pure gray.

Ana *pale, pallid, ashen, wan: whitened, blanched, bleached, decolorized (see WHITEN)

Ant colorful

colossal *huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, gargantuan, Herculean, cyclopean, titanic, Broddingnagian

Ana monumental, stupendous, tremendous, prodigious, *monstrous

column *pillar, pilaster

comatose torpid, sluggish, *lethargic

Ana *languid, languorous, listless, languishing: phlegmatic, *impassive: *insensible, anesthetic, impassible: inert, passive, supine (see INACTIVE)

Ant awake

comb *vb* *seek, search, scour, hunt, ferret out, ransack, rummage

Ana *scrutinize, inspect, examine: investigate, probe (see corresponding nouns at INQUIRY)

combat *vb* *resist, withstand, contest, oppose, fight, conflict, antagonize

Ana fight, *contend, battle, war: *attack, assail, assault, bombard, storm

Ant champion: defend —*Con* protect, shield, guard (see DEFEND): *support, uphold, advocate: *maintain, justify, vindicate

combat *n* conflict, fight, *contest, affray, fray

Ana *battle, engagement, action: *encounter, skirmish, brush: controversy, dispute, *argument: contention, strife, conflict, *discord

combative *belligerent, bellicose, pugnacious, quarrelsome, contentious

Ana *aggressive, militant: strenuous, energetic, *vigorous: virile, manly, manful (see MALE)

Ant pacifistic

combination, combine, party, bloc, faction, ring denote a union, either of individuals or of organized interests, for mutual support in obtaining common political or private ends. **Combination** is the most comprehensive of these terms, being applicable to any such union whether a trust, an alliance, or simply an association for the purpose of

urging demands or resisting claims <a *combination* of citizens devoted to holding down taxes> <a *combination* of railroads to maintain existing rates> **Combine** is often interchangeable, especially in informal use, with *combination* <(the coal *combine*)> Often it may connote a combination with an improper or illegal aim in view <how the Mafia operates has been duplicated . . . in Ed Reid's book of that infamous . . . *combine*—*Kogan*> <a *combine* that understands it must destroy . . . if it is actually to control—*The Commonwealth*> A **party** is a number of persons united in support of some opinion, cause, or principle; it usually implies a similar body in opposition, especially when used in reference to a political organization built up to continue the action and policies of government through election of its candidates to office <in the United States there are usually only two strong *parties*> <(the Labour *party* in England)> <he who draws his pen for one *party* must expect to make enemies of the other—*Dryden*> <who, born for the universe, narrowed his mind, and to *party* gave up what was meant for mankind—*Goldsmith*> **Bloc** implies a combination of persons or groups who otherwise differ in party or in interests for the sake of achieving a common and often temporary end; thus, in France and in Italy, a *bloc* is a combination of members of two or more political parties; in the United States, a *bloc* is a combination not of parties but of members of different parties who have a common end <(the farm *bloc* formed by members from the agricultural states wishing to secure legislation helpful to their constituents)> **Faction** frequently suggests a smaller body than *party* and commonly implies selfish ends and the use of unscrupulous or turbulent means <so several *factions* from this first ferment work up to foam and threaten the government—*Dryden*> <(the Whigs and Tories in Rome, Athens, and Jerusalem never forgot national points with more zeal, to attend to private *faction*, than we have lately—*Walpole*)> **Ring** is applicable to an exclusive, often more or less secret, combination for a selfish and often corrupt or criminal purpose (as the control of a market, of political patronage, or of distribution of narcotics) <(the Tweed *Ring* was in control of New York City politics for six years)> <innocent women were frequently framed by a *ring* consisting of police officers, stool pigeons, bondsmen and lawyers—*Ploscowe*>

Ana *monopoly, corner, pool, cartel, syndicate, trust

combine *vb* 1 unite, associate, link, conjoin, *join, connect, relate

Ana *mix, mingle, commingle, blend, fuse, amalgamate: consolidate, unify (see COMPACT *vb*)

Ant separate —*Con* part, divide, sever, sunder, divorce (see SEPARATE): *detach, disengage

2 *unite, cooperate, concur, conjoin

Ana coalesce, merge (see MIX): coincide, *agree, concur

combine *n* *combination, party, bloc, faction, ring

Ana see those at COMBINATION

combustible *adj* **Combustible, inflammable, flammable, incendiary, inflammatory**, which are not close synonyms, since they apply to different types of nouns, are comparable because they mean showing a tendency to catch or be set on fire. **Combustible** applies chiefly to material which is of such a nature that it catches fire easily and usually burns quickly <excelsior is very *combustible*>

<a *combustible* roof of pine shingles> **Inflammable** applies to materials ready to flame up at the slightest cause; the term, however, suggests more than the ease with which a thing burns, for it stresses a capacity for flaring up dangerously <(the fire soon gutted the attic, which had been full of old papers and other *inflammable* materials)>

Inflammable as applied to persons, their natures, their

hearts, and their temperaments stresses the danger as well as the ease in arousing them (as to anger, excitement, or passion); it applies also to a subject or situation that can induce such arousal (the vision of a single young woman is said to have overcome the *inflammable* monk—*Meredith*) <“Don’t trouble about it, Clym. They may get to be friends.” He shook his head. “Not two people with *inflammable* natures like theirs”—*Hardy*> <a very *inflammable* subject to be raised at election time> **Flammable** is equivalent to *inflammable* and used chiefly in respect to materials dangerously likely to flare up or explode (gasoline is a highly *flammable* substance requiring special care in storage and transportation) **Incendiary** not only stresses a capacity for starting up or causing a conflagration but a malicious intent to do the same. Therefore the term applies not only to something that is designed to cause fire but to fire that is caused by intent or design (an *incendiary* bomb) (an *incendiary* conflagration) The term may be extended to something (as an act, practice, speech, or publication) that tends to arouse something (as sedition, evil passions, or violence) that acts as destructively or disastrously as fire (<*incendiary* ideas) (an *incendiary* policy) While the adjective is seldom applied to persons, the noun *incendiary* chiefly, except when used as short for such phrases as *incendiary* bomb, designates a person who maliciously or willfully sets fire to a building or other property or who deliberately incites quarrels, unrests, sedition, or violence. **Inflammatory**, like *incendiary*, emphasizes the power to cause a fire, especially in the hearts or minds of people, but it carries less suggestion of a malicious intent (taking to politics, he became a Chartist, and was found to be a capable *inflammatory* speaker—*Lucas*) (this gentleman . . . having been imprisoned fourteen months for *inflammatory* language anent the Federal Government—*Replier*)

Ana burnable (see corresponding verb at BURN): kindling, firing, igniting (see LIGHT *vb*)

come, arrive are comparable because both basically mean to get to one point from another more or less distant in space, time, relation, or development. *Come* (with *to*) and *arrive* (with *at*) are synonyms of *reach* (see REACH); thus, one *comes* to or *arrives* at the end of a journey; one *comes* to or *arrives* at a decision. *Come* is one of the elementary intransitive verbs of motion, always implying movement toward, and may be used wherever such movement, actual or apparent, physical or spiritual, is implied. **Arrive**, however, stresses rather the reaching of and the end of movement toward a destination. *Come*, therefore, may be used with or without the implication that the destination is reached; *arrive* consistently carries that implication (I can see them *coming*) (they will *arrive* at three o'clock) When used in reference to things that move or progress without an agent or agency (as because of some law of nature or in obedience to some inner law or principle) *come* is usually preferable unless a definite end or termination or, often, fulfillment (as of expectation) is suggested (the days *come* and go) (at last the day of departure *arrived*) (the longed-for breeze was slow in *coming*, but when it *arrived* it brought joy to all) (success never *comes* to those who await it idly; it usually *arrives* only after years of patient endeavor) *Come* often suggests or requires statement of a source of place from which a thing has issued; *arrive*, on the other hand, often suggests or requires a statement of an end, a goal, or a climax to a progress or development (the family *comes* from peasant stock) (the family *arrived* socially when the grandfather of the present baron was elevated to the peerage) In such cases *come* and *arrive* are not inter-

changeable, for the former is loosely synonymous with *issue*, *emanate*, *originate*, or *arise* and the latter with *succeed*, *triumph*, or (when followed by *at*) with *acquire*. **Ana** *approach, near: rise, arise, *spring, proceed, emanate, issue, stem

Ant go —**Con** leave, depart, quit, withdraw, retire (see GO)

comely *adj* fair, pretty, bonny, handsome, lovely, *beautiful, good-looking, beauteous, pulchritudinous

Ant homely

comestibles provisions, viands, victuals, *food, feed, provender, fodder, forage

comfort *n* ease, *rest, repose, relaxation, leisure

Ana contentedness or content, satisfaction (see corresponding adjectives under SATISFY *vb*): enjoyment, joy, fruition, *pleasure: relief, assuagement, alleviation (see corresponding verbs at RELIEVE)

Ant discomfort —**Con** *distress, suffering, misery

comfort *vb* **Comfort, console, solace** are comparable when meaning to give or offer a person help or assistance in relieving his suffering or sorrow. **Comfort**, the homelier, more intimate word, suggests relief afforded by imparting positive cheer, hope, or strength as well as by the lessening of pain and distress (he hath sent me . . . to *comfort* all that mourn—*Isa* 61:1-2) (a mother *comforts* her sobbing child) (but there was about him a certain reserve, and she dared not *comfort* him, not even speak softly to him—*D. H. Lawrence*) **Console**, the more formal term, emphasizes rather the alleviation of grief or the mitigation of the sense of loss than the communication of pleasure; it frequently implies some definite source of relief (the presence of his friend *consoled* him) (console oneself by philosophic reflections) (if you really want to *console* me, teach me rather to forget what has happened—*Wilde*) (his father’s letter gave him one of his many fits of melancholy over his own worthlessness, but the thought of the organ *consoled* him—*Butler* d.1902) **Solace** frequently suggests relief from distressful emotions (as weariness, despondency, chagrin, loneliness, or dullness) rather than from grief or pain, and often, specifically, a lift of the spirits; the source of that relief is more often things than persons (solace oneself with books) (though you rail against the bar and the imperfect medium of speech, you will be *solaced*, even in your chagrin, by a sense of injured innocence—*Cardozo*)

Ana delight, gladden, rejoice, *please: *relieve, assuage, mitigate, alleviate: refresh, restore (see RENEW)

Ant afflict: bother —**Con** *distress, trouble: torment, torture, try (see AFFLICT): vex, *annoy, irk

comfortable, cozy, snug, easy, restful are comparable when they mean enjoying or providing conditions or circumstances which make for one’s contentment and security. **Comfortable** usually implies the absence of whatever gives trouble, pain, or distress in any degree or of any kind to the body or mind (a *comfortable* chair) (a *comfortable* room both in summer and in winter) (he is never *comfortable* except in his own home) (a makeshift arrangement not altogether agreeable or *comfortable* for either of us—*Ellis*) but it often applies to persons or things that encourage in one serenity of mind, tranquility, a sense of well-being, or complacency (the family was left in *comfortable* circumstances) (a *comfortable*, motherly woman) (diverted from senseless controversy into *comfortable* monologue—*Jan Struther*) **Cozy** suggests comfortableness derived from warmth, shelter, ease, and friendliness (a *cozy* fire) (a *cozy* armchair) (close all the windows and doors so as to make the house *cozy*) (the *cozy* talk by the fireside—*J. R. Green*) (Wimsey gratefully took in the *cozy* sitting room, with

its . . . fire roaring behind a chaste canopy of velvet overmantel—*Sayers*) **Snug** (see also NEAT) suggests the state or the frame of mind of one who has as much room, or responsibility, or freedom, or money as is essential to his well-being but no more than he actually needs to be cozy, content, or secure; the term usually connotes such comfort as is associated with small but comfortable quarters as distinguished from those that are spacious or with a quiet, restricted, but pleasant way of life as distinguished from one where there is little time for one's own interests or where one is driven by ambitions or restlessness; often, specifically, the term emphasizes protection from the elements, and warmth and dryness, as contributions to one's comfort (all the gypsies and showmen . . . lay *snug* within their carts and tents—*Hardy*) (Arnold the heartbroken outcast from the *snug* household of faith, wearing in spiritual wastes of sand and thorns—*Montague*) **Easy** (see also EASY 2) implies relief from all that makes for discomfort or hardships, with the result that one is happy or free from care, anxiety, trouble, or doubt (he is in *easy* circumstances for the first time in his life) (she could now enjoy herself with an *easy* conscience) (people of the right sort are never *easy* until they get things straight—*Shaw*) (Mrs. Struthers's *easy* Sunday hospitality—*Wharton*) **Restful** usually suggests a state of mind of one who is comfortable, cozy, or easy, as well as relaxed, or a quality in a thing that induces such a state of mind (it's *restful* to arrive at a decision, and *restful* just to think about New Hampshire—*Frost*) (a *restful*, friendly room, fitted to the uses of gentle life—*Mary Austin*)

Ana comforting, consoling, solacing (see COMFORT *vb*): content or contented, satisfied (see under SATISFY): grateful, welcome, agreeable, gratifying (see PLEASANT) **Ant** uncomfortable: miserable —**Con** wretched (see MISERABLE): distressing, troubling (see TROUBLE *vb*): annoying, vexing, irking, bothering (see ANNOY)

comic *adj* comical, *laughable, farcical, funny, droll, risible, ludicrous, ridiculous

Ana diverting, amusing, entertaining (see AMUSE): *witty, humorous, facetious: grotesque, antic, *fantastic **Ant** tragic —**Con** *serious, solemn, grave, sober: pathetic, touching, poignant, *moving, affecting

comical comic, farcical, ludicrous, ridiculous, *laughable, risible, droll, funny

Ana absurd, silly, *foolish: jocular, jocose, humorous (see WITTY): waggish, impish, roguish, sportive (see PLAYFUL): deriding or derisive, ridiculing, mocking (see corresponding verbs at RIDICULE)

Ant pathetic —**Con** *melancholy, doleful, lugubrious, dolorous: *moving, poignant, touching, affecting

comity amity, goodwill, *friendship

Ana *association, society: companionship, comradeship (see base words at ASSOCIATE): concord, accord, *harmony

command *vb* **Command, order, bid, enjoin, direct, instruct, charge** mean to issue orders to someone to give, get, or do something. **Command** and **order** agree in stressing the idea of authority, *command* implying its more formal and official exercise (the chairman *commands* the undertaking—*Kefauver*) and *order*, its more peremptory, sometimes even arbitrary, exercise; thus, a king, a military officer, the captain of a ship, *commands*; a landowner *orders* a trespasser off his premises; one is apt to resent being *ordered*, except by those who have a right to *command*. But *order* is used by a physician with no such connotation (the doctor *ordered* outdoor exercise) **Bid** in this sense is usually somewhat literary or informal; it usually implies an ordering or directing (often with a

suggestion of peremptoriness) directly and by speech (she *bade* him be seated) (he seized him by the collar and sternly *bade* him cease making a fool of himself—*Shaw*) **Enjoin, direct, and instruct** are all less imperative than *command* or *order*, but they all connote expectation of obedience. **Enjoin** adds to the idea of authority the implication of urging or warning; **direct** and **instruct** suggest especially business, official, or diplomatic relations, *direct* being perhaps the more mandatory, *instruct* the more formal, of the two (a parent *enjoins* his children to be quiet) (the church *enjoins* certain duties) (the editor *directed* his secretary to admit no callers during a conference) (instruct an assistant to gather certain information) (St. Peter . . . *enjoins* us to be ready always to give an answer to every man that asks us a reason for the faith that is in us—*Lowe*) (why otherwise does it [the Constitution of the United States] *direct* the judges to take an oath to support it?—*John Marshall*) **Charge**, chiefly a literary term, implies not only enjoining but the imposition of a task as a duty (Mrs. Yeobright gave him the moneybags, *charged* him to go to Mistover—*Hardy*) (Gustavus . . . considered himself *charged* by God with the defense of the true Lutheran faith—*Barr*)

Ana control, manage, *conduct, direct: exact, *demand, require: *force, compel, coerce, constrain, oblige **Ant** comply, obey

command *n* 1 **Command, order, injunction, bidding, behest, mandate, dictate** mean a direction, that must or should be obeyed, to do or not do something. **Command** imputes to the person who issues the directions either unquestioned authority (the *commands* of a general) or complete control of a situation (at the *command* of the intruder he held up his hands) The term usually connotes either peremptoriness or imperativeness (at the *command* of his father he returned to the house) (every request of hers he interpreted as a *command*) (encroachment to some extent there is by every *command* or prohibition—*Cardozo*) **Order** is not always clearly distinguishable from *command*; it is, however, the preferred word for directions to subordinates that are instructions as well as commands; in such use it commonly implies explicitness in detail (the troops were awaiting *orders* from headquarters) (in response to the principal's *order*, the pupils maintained silence while passing through the corridors) (refusal to recognize the authority of the emperor amounted to a refusal to take *orders*—*Pharr*) **Injunction** carries a weaker implication of imperativeness than the preceding words except in legal use, where it is applied to a court order commanding a person to do or more often to refrain from doing something on the penalty of being adjudged guilty of contempt of court. In general use the word stresses admonition without losing the implication of expected or demanded obedience (the high *injunction* not to taste that fruit—*Milton*) (she carefully obeyed the *injunctions* laid upon her by her physician) (delivered stern *injunctions*) **Bidding**, chiefly literary, usually implies the status of master or parent in the person who issues the orders and therefore stresses expected obedience or the fact of being obeyed (thousands at his *bidding* speed—*Milton*) (at the ghostly *bidding* of the cloud, . . . the surly summons of the sun—*Aiken*) **Behest** is also distinctly literary and equivalent to *bidding* in its implications (do his master's high *behest*—*Scott*) (during the war, it is true, at the *behest* of government agencies, many writers worked into their serials incidents and dialogue of a worthy sociological nature—*Thurber*) **Mandate** (see also MANDATE 2) carries the strongest implication of imperativeness of all of these words, for it denotes a command or order issued by a

very high, often the highest, authority. It has or has had specific applications, such as an order from a superior court or official to an inferior one or from a Roman emperor to the commander of his military forces. It is often applied to something inexorably demanded (as by the exigencies of the situation) rather than actually or verbally commanded (he accepted the nomination, believing that his huge majority indicated a *mandate* from his party) (it was a bold step, for he had no legal military command, and no *mandate* from senate or people—*Buchan*) (Poe's doctrine of brevity, as a *mandate* laid upon poetry by the inflexible nature of things—*Loves*) **Dictate** basically denotes a command given orally (he . . . received his suggestions, and bowed to his *dictates*—*Meredith*) More often it applies to a command or authoritative judgment uttered by an inner voice (as of the conscience) or formulated in a principle or law (the government which has a right to do an act, and has imposed on it the duty of performing that act, must, according to the *dictates* of reason, be allowed to select the means—*John Marshall*) (a suspicion that . . . the moral law speaks in equivocal tones to those who listen most scrupulously for its *dictates*—*L. P. Smith*)

Ana direction, instruction, charging or charge (see corresponding verbs at **COMMAND**): precept, ordinance, *law, statute, canon, rule

2 control, authority, *power, jurisdiction, sway, dominion

Ana ascendancy, *supremacy: sovereignty (see under **FREE adj**)

commemorate *vb* celebrate, observe, *keep, solemnize

commence *begin, start, initiate, inaugurate

Ana institute, *found, organize, establish

Con finish, complete, conclude, terminate, end, *close

commend, recommend, applaud, compliment are comparable when they mean to voice or otherwise manifest to others one's warm approval. **Commend** usually implies judicious or restrained praise, but it suggests as its motive a desire to call attention to the merits of a person or a thing (the police commissioner publicly *commended* the officers who made the arrest) (his wife seriously *commended* Mr. Collins for having spoken so sensibly—*Austen*) (it is always dangerous and impertinent to *commend* a poem for anything but its poetry—*Day Lewis*) (embodying in his work the qualities of righteousness which will *commend* it to men of other times and places—*Cohen*) **Recommend** adds to *commend* the implication of offering something that is praised for acceptance, use, or employment by another (the physician *recommended* the treatment of bruises with alternating cold and hot applications) (his present employers highly *recommended* him to his prospective employers) (for a spare hour, I can *recommend* no more diverting pursuit—*Skinner*) **Applaud** implies an enthusiastic expression of approval; it usually suggests approval by a large number of persons or by the public (the president was *applauded* for his closing of all banks in the crisis) (everybody *applauded* the mayor's proposed entertainment, especially when it became known that he meant to pay for it all himself—*Hardy*) **Compliment** stresses either courtesy in the commendation or, sometimes, flattery in the manner or words of praise (the visitors to the convention *complimented* the townspeople on the arrangements made for their comfort) ("Marvelous cognac this, madame!" It was the first time it had ever been so *complimented*, and Madame Defarge knew enough of its antecedents to know better—*Dickens*)

Ana *praise, laud, extol, eulogize, acclaim

Ant censure: admonish —**Con** *criticize, reprehend,

reprobate, blame: *reprove, reproach, rebuke, reprimand, chide

commensurable commensurate, proportionate, *proportional

Ana equivalent, equal, identical, tantamount (see **SAME**):

*reciprocal, corresponding

Ant incommensurable

commensurate commensurable, proportionate, *proportional

Ana corresponding or correspondent, according or accordant, squaring, conforming (see corresponding verbs at **AGREE**): balancing, counterbalancing, compensating, offsetting (see **COMPENSATE**)

Ant incommensurate

comment *n* commentary, *remark, observation, note, obiter dictum

Ana interpreting or interpretation, elucidation, explication, expounding or exposition, explaining or explanation (see corresponding verbs at **EXPLAIN**): annotation, gloss (see under **ANNOTATE**)

comment *vb* commentate, *remark, animadvert

Ana interpret, elucidate, expound, *explain, construe, explicate: *annotate, gloss: *criticize: illustrate, *exemplify

commentary comment, *remark, observation, note, obiter dictum

Ana see those at **COMMENT** *n*

commentate *vb* comment, *remark, animadvert

Ana see those at **COMMENT** *vb*

commentator see under **commentate** at **REMARK** *vb*

commerce **1** trade, *business, industry, traffic

2 traffic, *intercourse, dealings, communication, communion, conversation, converse, correspondence

commercial *adj* **Commercial, mercantile** are comparable when they mean of, relating to, or dealing with the supplying of commodities. **Commercial** is the more widely applicable term: it may be used in reference to anything which has to do with the buying or selling of commodities for profit, with their transportation, and sometimes, even, with their production, or with business affairs in general; thus, a *commercial* transaction is any piece of business involving a buyer and seller of goods or property that is for the financial benefit of the seller; *commercial* law deals with all matters (as contracts, negotiable papers, liens, payment of debts, and partnerships) that have reference to business; a *commercial* attaché is, in the United States, an officer of the Department of Commerce attached by the Department of State to an embassy or legation in a country where trade is important. Also, *commercial* is used to describe whatever has for its aim financial profit or is guided by the methods or practices of business (the *commercial* theater) (commercial aviation) (commercial sports) (commercial radio programs are programs paid for by advertisers) **Mercantile** is often used interchangeably with *commercial* with little difference in meaning; thus, a *mercantile* transaction is not ordinarily distinguishable from a *commercial* transaction, nor *mercantile* law from *commercial* law. The term, however, more often suggests actual buying and selling (the occupation of a merchant) than commerce in general including production and transportation and is therefore more restricted in its application; thus, a *commercial* house is a business or company engaged in foreign or domestic commerce; a *mercantile* house is a business, usually wholesale, engaged in merchandising (mercantile agent) (mercantile establishment)

commingle mingle, blend, *mix, merge, coalesce, fuse, amalgamate

Ana combine, unite, conjoin, associate (see **JOIN**):

*integrate

commiseration compassion, pity, condolence, *sympathy, ruth, empathy

Ana compassionateness, tenderness, warmheartedness (see corresponding adjectives at TENDER): mercifulness, clemency (see under FORBEARING): lamenting or lamentation, bewailing, bemoaning (see corresponding verbs at DEPLORE): pitifulness, piteousness, pitiableness (see corresponding adjectives at PITIFUL)

Ant ruthlessness, pitilessness

commission *vb* *authorize, accredit, license

Ana appoint, *designate, name, nominate: empower, *enable: instruct, enjoin, charge, bid, order, *command

commit *vb* 1 **Commit, entrust, confide, consign, relegate**

are comparable when they mean to assign to a person or place for some definite end or purpose (as custody or safekeeping). **Commit** is the widest term; it may express merely the general idea of delivering into another's charge <commit the management of an estate to an agent> <on landing in Boston in 1872, my father and I were able safely to commit our trunk to the expressman—*Santayana*> or it may have the special sense of a transfer to a superior power or to a place of custody <into thine hand I commit my spirit—*Ps* 31:5> <we therefore commit his body to the ground; earth to earth, ashes to ashes, dust to dust—*Book of Common Prayer*> <commit a person to prison> <commit one's thoughts to paper> To **entrust** is to commit with trust and confidence; to **confide** is to entrust with entire reliance and assurance <entrusted him with her secret> <a government, entrusted with such ample powers . . . must also be entrusted with ample means for their execution—*John Marshall*> <the right of naturalization was therefore, with one accord, surrendered by the States, and confided to the Federal Government—*Taney*> <never to those bloodstained accursed hands will the future of Europe be confided—*Sir Winston Churchill*> **Consign** implies a more formal act and frequently suggests such transfer or delivery as removes its object from one's immediate control <consign goods to an agent for sale> <he must now . . . consign him to a living tomb again—*Hawthorne*> <the barber and the curate of La Mancha . . . felt bound to wall up Don Quixote's library, and consigned to the flames many of the volumes which had so unsettled the poor knight's wits—*Muggeridge*> To **relegate** is to consign to some particular class, position, or sphere usually with the implication of setting aside or getting rid of <[man] is relegated to his place in a classification—*Newman*> <he supposed that he had disappointed the Bishop and that he was being relegated into the limbo of moderately satisfactory young parsons—*Mackenzie*>

Ana transfer, shift, remove, *move: assign, *allot

2 **Commit, perpetrate** mean to be responsible for or to be guilty of some offense or mistake. **Commit** is the term regularly used in prohibiting (as in some of the Ten Commandments) or to describe engaging in an action that is counted a sin, crime, or offense <commit murder> <commit adultery> <commit blasphemy> In less specific use the word may mean little more than *do* or *perform*, but it retains to a greater or less degree its implication of reprehensibility <commit a stupid blunder> <commit needless errors> **Perpetrate** basically implies the committing of a crime <perpetrate arson> <perpetrate treason> and often so strongly carries the notion of crime or offense that a neutral word can be used as the object of the verb without any doubt as to its offensive character <the deed was perpetrated at midnight> However, *perpetrate* is also freely used of acts or actions which though not criminal are morally, socially, intellectually, or artistically reprehensible and which may range from the utterly out-

rageous to the mildly deplorable <hastened to *perpetrate* the partition of your country before the Polish nation could consolidate its position—*Sir Winston Churchill*> <the colossal waste they *perpetrate* probably does not exceed the financial blunders and stuffed overhead in big corporations—*Paul*> <Peter Cornelius, who at Munich was quite successfully *perpetrating* . . . about the worst art of the century—*Mather*> <went away feeling I had *perpetrated* a delightful fraud—*L. P. Smith*>

Ana offend, sin, scandalize (see corresponding nouns at OFFENSE): transgress, trespass, violate, contravene (see corresponding nouns at BREACH)

commodious capacious, *spacious, ample

Ana *comfortable: *large, big, great: *broad, wide, deep **Con** circumscribed, confined, limited, restricted (see LIMIT *vb*): inconvenient, incommodious (see corresponding verbs at INCONVENIENCE)

common *adj* 1 *universal, general, generic

Ana shared, partaken, participated (see SHARE *vb*): joined or joint, united, conjoined, connected, associated (see corresponding verbs at JOIN): merged, blended, amalgamated (see MIX)

Ant individual

2 mutual, *reciprocal

Ana & *Ant* see those at COMMON 1

3 **Common, ordinary, familiar, popular, vulgar** are comparable when they mean being or having the character of what is generally or usually met with and not in any way special, strange, or unusual. **Common** implies the lack of distinguishing, conspicuous, or exceptional qualities; positively, it suggests usualness, everyday character or quality, or frequency of occurrence <the common people> <a common soldier> <the common chickweed> <a common error> <he lacks common honesty> <for common men and women two or three of the common loves will suffice—the love of family and home, of school and church, of mountain and sea—*Eliot*> Often the term also connotes inferiority, coarseness, lack of breeding, or low station <the common herd> <of common clay> <O hard is the bed . . . and common the blanket and cheap—*Housman*> <a common fellow with no notion of politeness or manners> **Ordinary** expresses more definitely accordance with the regular order or run of things <the ordinary intercourse of man with man—*Newman*> <it is not an ordinary war. It is a revolution . . . which threatens all men everywhere—*Roosevelt*> It usually implies qualities not above, and frequently below, the average <choice word and measured phrase, above the reach of ordinary men—*Wordsworth*> <let others expatiate on trivial objects, ordinary characters, and uninteresting events—*Landor*> As a term of depreciation *ordinary* is similar to but less contemptuous than *common* <a very ordinary-looking person> <his ability is no more than ordinary> **Familiar** stresses something that is generally known and easily recognized because of its frequency of occurrence or one's constant association with it rather than because of its lack of distinguishing qualities <the tyranny of familiar surroundings over the imagination—*Russell*> <to remind you of what is so familiar as to be frequently forgotten—*Frankfurter*> <the doctrine of Einstein, which sweeps away axioms so familiar to us that they seem obvious truths, and substitutes others which seem absurd because they are unfamiliar—*Ellis*> **Popular** and **vulgar** (see also COARSE) imply commonness that arises from use or acceptance by or prevalence among the vast majority of persons, often specifically among the common people of a country or an age <popular fallacies> <the vulgar tongue> *Popular* more often stresses the implication of widespread prevalence, currency, or favor among the

people than does *vulgar*, which even in this sense nearly always carries derogatory connotations (as of inferiority or coarseness) <a popular song> <dancing . . . of all the arts . . . most associated in the popular mind with pleasure—*Ellis*> <this mode of interpreting Scripture is fatal to the *vulgar* notion of its verbal inspiration—*Arnold*> <a popular instead of an accurate and legal conception of what the word *monopolize* in the statute means—*Justice Holmes*> <we were reluctant to expose those silent and beautiful places to *vulgar* curiosity—*Cather*>
Ana prevalent, *prevailing, rife, current: *usual, customary: *plentiful, abundant, ample

Ant uncommon: exceptional —**Con** rare, *infrequent, occasional: singular, unique, peculiar, odd, *strange

commonplace *n* **Commonplace**, **platitude**, **truism**, **bromide**, **cliché** mean an idea or expression lacking in originality or freshness. A **commonplace** is a stock idea or expression which is frequently little more than the obvious, conventional, and easy thing to think or say on a given subject <the machinery as well as the characters of those novels became the *commonplaces* of later romancers—*Raleigh*> <the superficial *commonplaces* which pass as axioms in our popular intellectual milieu—*Cohen*> **Platitude** adds to *commonplace* the suggestions of flatness or triteness and, often, utterance with an air of importance or novelty <what is that sentimental *platitude* of somebody's . . . about the sun being to flowers what art is to life?—*Hewlett*> <traditional schoolbook *platitudes* and campaign slogans—*Frankfurter*> A **truism** is a self-evident truth; it differs from an axiom (see *axiom* at PRINCIPLE) in frequently implying a somewhat superfluous insistence upon the obvious <Pope's palpitant *truism* "The proper study of mankind is man"> <it is a *truism* that a sound society makes for sound individuals—*Day Lewis*> **Bromide** applies to a commonplace, platitude, or truism that strikes the listener or reader as especially dull or hackneyed and, often, as an evidence of its maker's low-grade mentality <despite the silly old *bromide*, the fat man is more often than not the best loved of men—*McClure's Mag.*> <under the circumstances the usual, indeed the expected, Chamber of Commerce *bromides* would have been acceptable—*J. M. Brown*> **Cliché** applies to an expression which when new was fresh and full of meaning but which by constant iteration has become not only dull but hackneyed and stereotyped <the *cliché* is merely the sometime novel, that has been loved not wisely but too well—*Loves*> <the pathetic *cliché*, "for the sake of the children," has perpetuated many unsuccessful marriages—*D. B. Lewis*>

Ana expression, *phrase, idiom, locution: banality, jejuneness, inanity, wishy-washiness (see corresponding adjectives at INSIPID): triteness, threadbareness (see corresponding adjectives at TRITE)

common sense see SENSE 2

commotion, **agitation**, **tumult**, **turmoil**, **turbulence**, **confusion**, **convulsion**, **upheaval** are comparable when they designate great physical, mental, or emotional excitement. All carry this general meaning yet have applications which fit them for narrower use in specific senses. **Commotion** always implies movement to and fro that may be violent and disturbing or that may be merely sharply in contrast to a usual calm. It is used physically of storms, especially as they affect the movement of the seas <beneath the endless surges of the deep . . . a host of mariners perpetual sleep, too hushed to heed the wild *commotion's* roar—*Channing* d. 1901> and of unusual bustle or hubbub <there was *commotion* all over the house at the return of the young heir—*Meredith*> Even when *commotion* represents mental or emotional excitement, it indirectly suggests

movement in heightening the ideas of unrest and perturbation <eighteen years of *commotion* had made the majority of the people ready to buy repose at any price—*Macaulay*> **Agitation**, on the other hand, suggests a stirring up or a shaking up comparable physically to that accompanying a fermentation or to boiling or seething <the *agitation* of the earth's crust during an earthquake> Usually it describes strong emotional excitement that, whether controlled or not, causes distress or pain to the person involved <that sickening *agitation* of the heart which arises from hope deferred—*Scott*> <"Pray," said Mr. Lorry . . . bringing his left hand . . . to lay it on the supplicatory fingers that clasped him in so violent a tremble, "pray control your *agitation*"—*Dickens*> It also may refer to the stirring up of men's minds and emotions on some usually emotionally charged matter or question <political *agitation* by foreign agents> <an anti-Catholic *agitation* that was marked by the destruction of churches—*Amer. Guide Series: N. Y.*> **Tumult** may mean, generally, either commotion or agitation that is characterized by uproar, din, or great disorder <the *tumult* and the shouting dies, the captains and the kings depart—*Kipling*> It also may apply specifically to a riot or fracas or to an insurrection or rebellious outbreak <the *tumults* and disorders of the Great Rebellion had hardly been subdued—*T. S. Eliot*> but it is equally applicable to other things (as a violent disturbance of the elements or an agitating conflict of passions) that suggest in combination noise, disorder, and intense excitement (it thunders and lightens . . . what *tumult's* in the heavens?—*Shak.*) <the gods approve the depth, and not the *tumult*, of the soul—*Wordsworth*> **Turmoil** implies a state where nothing is at rest and where everything seethes with excitement. It is applicable to a state of physical commotion or to a condition of mental or emotional agitation, but in all cases it carries a suggestion of harassment and of ferment from which there seems no escape. In fact, it often connotes the point of view of a person who loves peace and hates disturbance <her life had been calm, regular, monotonous . . . now it was thrown into . . . indescribable *turmoil*—*Bennett*> <the child's inner life is often a *turmoil* of terrors and anxieties of which his parents know almost nothing—*Inge*> <the great peace beyond all this *turmoil* and fret compassed me around—*L. P. Smith*> **Turbulence** implies an excitement that cannot be easily put down or allayed; it may suggest impetuosity, insubordination, unruliness, lack of discipline, or comparable qualities in inanimate things <yon foaming flood seems motionless as ice; its dizzy *turbulence* eludes the eye, frozen by distance—*Wordsworth*> <it required all the personal influence of the king to check the *turbulence* of his irritated followers—*Pattison*> <the rest exhibited plenty of the *turbulence* of passion, but none of the gravity of thoughtful emotion—*Quiller-Couch*> **Confusion** (see also CONFUSION) applies chiefly to a mental state which may affect one person or many and which is marked by such a condition that the mind is at sea and unable to function; usually it suggests perturbation and inability to think coherently often as a result of embarrassment or discomfiture <the crown was thrown into *confusion* by the news> <overcome with *confusion*, and unable to lift up her eyes—*Austen*> <she was slowly emerging from the mental *confusion* which followed the fall—*Ellis*> <to cover his *confusion*, he half turned away—*Anderson*> **Convulsion** and **upheaval** suggest large-scale violent activity, commotion, or agitation. More particularly **convulsion** implies a sudden, surging, confused, or spasmodic action (as in the earth's crust, the individual's mind, or the body politic) <flourishing cities were demolished by the earth's *convulsion*—*Martin*

Gardner <a convulsion of wild laughter> <the vast social convulsions of a continent in travail—*Niebuhr*> while **upheaval** implies a violent and forceful thrusting that results in a heaving up or overthrowing <an emotional upheaval as shattering as an earthquake—*Goudge*> <there had also been social upheavals before the Reformation—*J. R. Lowell*>

Ana hubbub, racket, *din, uproar, pandemonium; *motion, movement: *stir, bustle, flurry, ado

Con calmness or calm, placidity, tranquillity (see corresponding adjectives at CALM); quietness or quiet, silence or silence, stillness (see corresponding adjectives at STILL)

commune *vb* *confer, consult, advise, parley, treat, negotiate

Ana converse, talk, *speak: *discuss, debate, argue

communicable *infectious, contagious, catching

communicate, impart mean to convey or transfer something (as information, feelings, or qualities) neither tangible nor concrete; they differ chiefly in emphasis, *communicate* stressing the result, *impart* rather the process, of the transfer. To **communicate** (the more general term) is to make common to both parties or objects involved the knowledge or quality conveyed; to **impart** is to share with another what is regarded as primarily one's own <his courage communicated itself to his men> <the smoke imparted its odor to his clothes> <teaching is essentially an imparting of one's knowledge or skill to others> <I wonder do we ever succeed really in communicating our thoughts to one another—*Shaw*> <you are worth to society the happiness you are capable of imparting—*Holland*>

Ana acquaint, apprise, *inform, advise, notify: tell, disclose, *reveal, divulge, discover: convey, *transfer

Con conceal, *hide: *suppress, repress: withhold, hold, hold back, keep back, reserve (see KEEP)

communication *intercourse, commerce, traffic, dealings, conversation, converse, correspondence, communion

Ana exchanging or exchange, interchanging or interchange (see corresponding verbs at EXCHANGE): conversing, talking (see SPEAK): *news, tidings, advice, intelligence

communio 1 *intercourse, commerce, traffic, converse, dealings, communication, conversation, correspondence

Ana empathy, *sympathy: mysticism (see under ASCETIC): contemplation (see corresponding verb at CONSIDER): *ecstasy, rapture, transport

2 *religion, denomination, faith, church, creed, sect, cult, persuasion

compact *adj* dense, *close, thick

Ana compressed, condensed, contracted (see CONTRACT *vb*): concentrated, consolidated, compacted (see COMPACT *vb*): solid, *firm, hard: *tight

Con *loose, slack: diffuse, prolix, verbose, *wordy: tenuous, rare, *thin

compact *vb* **Compact, consolidate, unify, concentrate** are comparable when meaning to bring or gather together the parts, particles, elements, or units of a thing so as to form a close mass or an integral whole. **Compact** stresses the process more than the effect. It usually suggests a packing or pressing together of many things so as to form a closely arranged mass or a dense substance and may be used in reference both to material and immaterial things; sometimes it carries so strong an implication of solid formation or construction that it fundamentally means to build firmly or to strengthen <heat and lack of rain have compacted the soil> <compact matted fibers of wool and hair into felt by rolling and pressing> <sweet spring . . . a box where sweets compacted lie—*Herbert*> <it

is based on solid facts, nay, is *compact* of solid facts from the first sentence to the last—*Times Lit. Sup.*>

Consolidate implies a merging or uniting, often in an exceedingly close union, of previously distinct but usually homogeneous or complementary things. The term may take as its object such a whole as a nation, a people, or an empire or as a substance or material and may imply a process which promotes the binding together of the parts, elements, or individuals so that solidarity or solidity is achieved <war tends to consolidate a people> <organize state leagues for political action in order to consolidate the labor vote—*Watkins*> <rolling and cooling consolidated the newly laid asphalt into a firm smooth pavement> But *consolidate* can also take as its objects the units (as parts, elements, individuals, or groups) which have been brought together in close union <these organizations worked independently, and subsequently they were partially consolidated—*Heiser*> <two marriages with the Dutch Vandergraves had consolidated these qualities of thrift and handsome living—*Wharton*>

Unify implies a union of heterogeneous or homogeneous parts, elements, or individuals that results in the making or producing of a thing that has oneness and integrity and that stands by itself as a thing apart; the term does not, however, carry as strong an implication of solidarity as does *consolidate* but, on the other hand, it places stress on the integration of parts so that each does its appointed work or serves its own purpose to the benefit not only of itself but of the whole; thus, a dramatist *unifies* (not *consolidates*) the play he composes; after a civil war, the task of the government is to *unify* (rather than *consolidate*) a nation; the imagination of a great poet *unifies* a mass of images and impressions; the Homeric poems may have been originally a collection of narrative poems, but it seems likely that one person *unified* them <would now be technically possible to *unify* the world and abolish war—*Russell*> **Concentrate** usually carries the implication of bringing together a number of things that are scattered or diffused and of massing them around a point or center; <concentrate troops at places where an attack is expected> <concentrate one's efforts on a single piece of work> <the science of that age was all divination, clairvoyance . . . seeking in an instant of vision to concentrate a thousand experiences—*Pater*> **Concentrate** may be extended to imply the fixing of the mind or attention on one thing so that all distracting objects or thoughts are eliminated <her excitement made her unable to concentrate on the task> A similar implication of eliminating whatever weakens, dilutes, or adulterates is found in technical use; thus, the chemist *concentrates* a solution by evaporating the solvent; a miner *concentrates* ores (i. e., separates the base from the precious metals) by a machine or by washing.

Ana compress, condense, *contract: bind, *tie: unite, combine (see JOIN): knit, *weave

Con dissipate, disperse, *scatter: *separate, part, divide

compact *n* pact, entente, convention, concordat, treaty, cartel, *contract, bargain

companion *n* comrade, *associate, crony

Ana *friend, confidant, intimate, acquaintance: *partner, colleague: attendant, escort, chaperon (see corresponding verbs at ACCOMPANY)

companionable *social, cooperative, convivial, gregarious, hospitable

Ana friendly, neighborly, *amicable: *amiable, obliging, complaisant, good-natured: sociable, affable, *gracious, cordial

Con uncongenial, unsympathetic (see INCONSONANT): reserved, taciturn, uncommunicative (see SILENT)

company, party, band, troop, troupe are comparable when they denote a group of persons who are associated in a joint endeavor or who are assembled for a common end. **Company** is the general term for either a temporary assemblage or a permanent association of individuals who join forces (the glorious *company* of the apostles—*Book of Common Prayer*) (the whole *company* of thinkers who have written philosophy—*Sullivan*) A **party** is a company assembled temporarily for a common purpose (search *party*) (dinner *party*) (a *party* of visitors from the country) A **band** is a company united by a common tie or purpose; the term implies closer organization and a less casual coming together than does *company* (the robbers worked in *bands*) (a *band* of musicians) (that small, transfigured *band* . . . whose one bond is, that all have been unspotted by the world—*Arnold*) A **troop** is a company or band that works or acts together in close formation or in unanimity; the term frequently suggests a throng or multitude (there entertain him all the saints above, in solemn *troops*, and sweet societies—*Milton*) (a mobile and dynamic *troop* whose major aims are the improvement of the mind—*Hauser*) In specific use *troop* is applied to a band of soldiers or, in the plural *troops*, to soldiers collectively (farewell the plumed *troop*, and the big wars—*Shak.*) (British *troops*) When the reference is to a company of performers (especially on the stage) **troupe** is the preferred spelling (a circus *troupe*)

Ana *set, circle, coterie, clique: *association, society, club, order: *crowd, throng, mob, horde

comparable *like, alike, similar, analogous, akin, parallel, uniform, identical

Ant disparate —*Con* *different, divergent, diverse, various

compare, contrast, collate mean to set two or more things side by side in order to show likenesses and differences. **Compare** implies as an aim the showing of relative values or excellences or a bringing out of characteristic qualities, whether they are similar or divergent; **contrast** implies as the aim an attempt to emphasize their differences; thus, one may *compare* the movement of the *Odyssey* with that of the *Aeneid* to arrive at their distinctive qualities; one may thereupon *contrast* the buoyancy and rapidity of the one with the stateliness and dignity of the other. One object is *compared with* another, as above: it is *compared to* another when it is formally represented on the basis of a real or imagined similarity as being like that other; thus, Pope *compares* Homer *with* (not *to*) Vergil; he *compares* Homer *to* (not *with*) the Nile, pouring out his riches with a boundless overflow, Vergil *to* (not *with*) a river in its banks, with a gentle and constant stream. **Collate** suggests a minute or critical comparison in order to note points of agreement and divergence; it applies especially to the minute comparison of books and manuscripts containing different versions of the same work for the sake of ascertaining or establishing the correct text (he has visited all Europe . . . not to collect medals, or *collate* manuscripts: but . . . to compare and *collate* the distresses of all men in all countries—*Burke*) *Ana* *match, equal, approach, touch, rival

comparison, contrast, antithesis, collation, parallel mean a setting of things side by side so as to discover or exhibit their likenesses and differences, especially their generic likenesses and differences. **Comparison** is often used as the comprehensive term; it is preferred when the differences are obvious, and an intent to lay bare resemblances and similarities for the sake of expounding or judging is implied (despite the fact that Communism and Fascism are antagonistic ideologies, there is ground for

a *comparison* between them) (students who make a *comparison* of Shakespeare's *Hamlet* and the play which was its source acquire intimate knowledge of the great dramatist's indebtedness to others) Because measuring one thing in terms of another is usually implied by *comparison*, the word often imputes an offensive character either to the association (the *comparison* of "the colonel's lady" and "Judy O'Grady") or to the judgment (*comparisons* are odious) (a tactful person never makes *comparisons*) (he will lose nothing by the *comparison*) (make no *comparisons*; and if any of the company be commended for any brave act of virtue, commend not another for the same—*Washington*) **Contrast** more specifically implies an intent to distinguish or discriminate things which are so much alike that their differences are not obvious (the correct use of close synonyms can be shown only by *contrast*) (you cannot value him alone; you must set him, for *contrast* and comparison, among the dead—*T. S. Eliot*) **Contrast** often also suggests an aesthetic rather than an expository aim or an artistic effect gained by the exhibition of startling differences (in physical appearance that *contrast* is glaring . . . the square, full-blooded, blunt face of the one, the pointed chin and finely cut, pale features of the other—*Belloc*) **Antithesis** also implies contrast for the sake of revealing startling differences, but it distinctively suggests such opposition in the things contrasted that they either represent balancing extremes or negate each other. The word may imply an expository intent; it then presupposes that the true nature of one thing is fully understood only when it is presented as opposed to what is unlike it in every particular (the century-old *antitheses* of heavenly justice and earthly fallibility, sin and innocence, Heaven and Hell, God and the Devil dominate Melville's mind—*Weir*) **Collation** and **parallel** denote a kind of comparison for the purpose of revealing both likenesses and differences. Both imply a close study and usually a specific aim. **Collation** more specifically implies a comparison of different versions, accounts, editions, texts, or manuscripts of the same thing for the purpose of verification, coordination, correction, or selection of the original (make a *collation* of the Scriptural accounts of the Resurrection) (of these [corrupt passages in Shakespeare] the restoration is only to be attempted by *collation* of copies or sagacity of conjecture—*Johnson*) and **parallel** usually a minute comparison of passages, articles, or works which are believed to have a different origin in order to detect correspondences, or of accounts, records, or stories told at different times which ought to agree, in order to detect discrepancies; thus, by what is often called "the deadly *parallel*," a comparison of two articles may reveal such correspondences in language and thought as to give ground for a charge of plagiarism, or a comparison of testimony given by the same witness on two occasions may reveal discrepancies that make him liable to arrest for perjury.

Ana *likeness, similarity, resemblance, analogy, similitude, affinity: *parallel, counterpart, analogue, correlate

compass *vb* 1 *surround, environ, encircle, circle, encompass, hem, gird, girdle, ring

Ana *enclose, envelop: confine, circumscribe, restrict (see LIMIT)

2 gain, attain, achieve, *reach

Ana effect, fulfill, accomplish, *perform: complete, finish (see CLOSE *vb*)

compass *n* 1 *circumference, perimeter, periphery, circuit

Ana area, extent, magnitude, *size: *field, sphere, domain

2 *range, gamut, reach, radius, sweep, scope, orbit,

horizon, ken, purview

Ana circumscription, limitation, restriction (see corresponding verbs at LIMIT): limits, bounds, confines (see singular nouns at LIMIT)

compassion pity, commiseration, ruth, *sympathy, empathy, condolence

Ana tenderness, compassionateness, responsiveness, warmth (see corresponding adjectives at TENDER): *mercy, charity, grace, lenity, clemency

Con indifference, aloofness, unconcern (see corresponding adjectives at INDIFFERENT): mercilessness, relentlessness, implacability (see corresponding adjectives at GRIM)

compassionate *tender, sympathetic, warmhearted, warm, responsive

Ana *pitiful, piteous: merciful, *forbearing, clement, lenient: humane, benevolent, *charitable

Con merciless, unrelenting, relentless, implacable, *grim: obdurate, inexorable, *inflexible, adamant

compatible congruous, *consonant, consistent, congenial, sympathetic

Ana suitable, appropriate, proper, meet, fitting, *fit: harmonizing, corresponding or correspondent, according or accordant (see corresponding verbs at AGREE): harmonious (see corresponding noun HARMONY)

Ant incompatible —*Con* incongruous, *inconsonant, inconsistent, ungenial, discordant, discrepant: *adverse, antagonistic, counter

compel *force, coerce, constrain, oblige

Ana impel, drive, *move: *command, order, enjoin

Con prevail, *induce, persuade, get: *coax, cajole, wheedle, blandish

compelling telling, convincing, cogent, sound, *valid

compendious summary, pithy, succinct, *concise, terse, laconic

Ana compact, *close: condensed, contracted (see CONTRACT *vb*): abridged, abbreviated, shortened (see SHORTEN)

Con amplified, expanded, inflated (see EXPAND): *full, complete: diffuse, prolix (see WORDY)

compendium, **syllabus**, **digest**, **pandect**, **survey**, **sketch**, **précis**, **aperçu** are comparable when they mean a treatment of a subject or of a topic in brief compass. A **compendium** gathers in brief, orderly, and intelligible form, sometimes outlined, the facts, principles, or details essential to a general understanding of some matter; the word typically implies compilation rather than original investigation (<*A Treatise on Epidemic Cholera* which contained little original matter but was published as a *compendium* of the existing knowledge of this disease—Steiner> A **syllabus**, often presented with a series of headings, points, or propositions, gives concise statements affording a view of the whole and an indication of its significance <no party program, no official *syllabus* of opinions, which we all have to defend—Inge> A **digest** presents a body of information gathered from many sources and arranged and classified for ready accessibility, often alphabetized and indexed; the word also indicates a condensed easy-to-read version <the only hope of gaining such knowledge lies in a summarization and thorough *digest* of the huge body of county statistics already available—Bogue> <the *Current Digest of the Soviet Press*, now in its fifth year of uninterrupted weekly appearance, a seventy-thousand word a week *digest* of forty Russian newspapers and periodicals—Mortimer Graves> A **pandect** is a systematic digest covering the whole of a monumental subject <no printed body of modern social history, either by purpose or accident, contains a richer *pandect* of the efficient impulses of its age—Morley> A **survey** is a brief comprehensive presen-

tation giving main outlines, often as a preliminary aid to thorough study or more detailed treatment <the policy of the Board and its founder being to make first of all a . . . *survey* of the educational needs of the country—J. D. Greene> <an essay on the Renaissance, not a history of the Renaissance. It omits mention of many interesting details of that vast transformation in an effort to determine, through a broad *survey* of its more salient features, the fundamental nature of the movement—Sellery> A **sketch** is a slight tentative preliminary presentation subject to later change, emendation, and amplification <to give anything but the most fragmentary *sketch* of the winter of '94 and '95 in Berlin is impossible—Fairchild> <*The American Chancery Digest*, including state and federal equity decisions, with an introductory *sketch* of equity courts and their jurisdiction—Wilkinson> A **précis** is a concise clear-cut statement or restatement of main matters, often in the form of a report or a summary that suggests the style or tone of an original <a carefully prepared critical text of Guido, with a short critical introduction, a full critical apparatus, and English *précis* printed concurrently—Times Lit. Sup.> An **aperçu** is a sketch giving a very brief and sometimes impressionistic compression of the whole, with all details omitted <popular books which give an *aperçu* of recent research, in order to have some idea of the general scientific purpose served by particular facts and laws—Russell>

Ana conspectus, epitome, brief, abstract (see ABRIDGMENT)

compensate *vb* 1 **Compensate**, **countervail**, **balance**, **offset**, **counterbalance**, **counterpoise** are comparable when meaning to make up for or to undo the effects of. **Compensate** is by far the broadest of these terms both in mode of use and scope of application. It may be used transitively and especially passively with either the one to be made up to or the thing to be made up for as object, or it may be used intransitively. In either case it is commonly modified by a phrase governed by *for* denoting a cause, by *with* specifying an equivalent, or by *by* indicating an action. It is freely applicable to the purely physical <*compensate* a pendulum for the effects of temperature change> <a weakened heart *compensated* by muscular hypertrophy> to the economic (see also PAY) <*compensate* a wounded soldier with a pension> <the Assembly put through this Bill, *for compensating* persons who had suffered losses through the Rebellion of 1837—Sandwell> or to the immaterial <an air of dignity and distinction *compensated* the deficiencies of beauty—Bromfield> <dreams, drives, and yearnings . . . which may be pleasant or unpleasant in themselves but which at all events console and *compensate*—Bentley> <*compensate* for his feelings of loneliness by assertions of superiority—Auden> One thing **countervails** another, or *against* another, when the former is sufficiently strong, powerful, or efficient to counteract the influence exerted or the harm or damage done by the latter or suffered in consequence of it <so shall my credit *countervail* your shame—Browning> <the absence of fuss . . . *countervailed* any tendency to self-importance—S. T. Warner> <the fact . . . shall, in the absence of strong *countervailing* testimony, be deemed conclusive evidence—Lincoln> One thing **balances** another, or two things **balance** (or *balance* each other) when both are so adjusted that they are either equal or properly proportioned (as in numbers, quantity, size, importance, or effectiveness) and the combination is harmonious because neither one outweighs the other or can exert a harmful influence on the whole <in sentencing prisoners, the judge *balanced* justice and mercy> <in the healthy human body the salt intake and the salt loss through excretion *balance*>

⟨the general tendency to the degradation or dissipation of energy is *balanced* . . . by a building-up process in the cell and in the organism—*Inge*⟩ ⟨that, like a ground in painting, *balances* all hues and forms, combining with one tone whatever lights or shades are on it thrown—*Bridges*⟩ ⟨the pressures of business, labor, and farmers . . . manage to check and *balance* each other—*Ascoli*⟩ One thing *offsets* another (this and the following terms have no intransitive use) when the former, as the exact opposite of the latter and its equal (as in importance, in effectiveness, in power, or in numbers), neutralizes the latter's good or evil effect, gain or loss, or benefit or harm ⟨his loss of thousands of votes from his own party was *offset* by his gain in independent votes⟩ ⟨the disadvantages of the plan are sufficient to *offset* its clear advantages⟩ ⟨the benefits of favorable climatic environment are oftentimes more than *offset* by the inconveniences of travel, loneliness, and homesickness—*Heiser*⟩ ⟨it is difficult to see any need for it that *offsets* in the slightest all the trouble it may cause—*Chafee*⟩ One thing *counterbalances* another when the former serves or is intended to serve to offset some quality (as an excess, a deficiency, or an evil) in the latter ⟨in his second book, there has to be rather more about religion to *counterbalance* the detailed, joyless descriptions of the heroine's sex life—*Punch*⟩ or when the former acts as a corrective of any tendency in the latter to loss of equilibrium or proper balance, especially when it, or one of its parts, is subjected to undue pressure, strain, or tension ⟨a heavy weight suspended on a cable which is attached to an elevator and passes over a pulley at the top of the shaft serves to *counterbalance* the increased load when the elevator carries passengers or freight⟩ ⟨mine hoists are often operated by the *counterbalancing* of an ascending and a descending car⟩ One thing *counterpoises* another when the former provides the equivalent of the latter in weight or value (physical, spiritual, artistic) and insures the balance of the whole ⟨like scales, in which the weight on one side must be *counterpoised* by a weight in the other—*Jefferies*⟩ ⟨the new tower is a little wanting in repose for a tower whose business is to *counterpoise* the very classic lines of the old one—*Henry Adams*⟩

Ana counteract, *neutralize, negative: *nullify, negate, annul, abrogate, invalidate: complement, supplement (see under COMPLEMENT *n*): correspond, square, tally, jibe, *agree

2 remunerate, *pay, recompense, repay, reimburse, satisfy, indemnify

compete 1 **Compete, contend, contest** are comparable especially in their intransitive senses when they mean to strive to gain the mastery or upper hand. **Compete** (see also RIVAL) implies a struggle to overcome or get the better of in an activity requiring two or more participants and involving rivalry (as an athletic match or a debate); the term may sometimes connote an additional incentive or inducement (as a prize or reward) ⟨the two classes *competed* in a spelling bee⟩ ⟨*compete* for places on the football team⟩ ⟨there were several boys anxious to *compete* for the scholarship⟩ **Contend**, which may suggest a straining or stretching (see **CONTEND**), usually implies opposition that has equal or better chances of succeeding and therefore a vigorous endeavor to win or to attain or to down or to frustrate; the term usually connotes competition, but it stresses the need of fighting or struggling ⟨strength of shade *contends* with strength of light—*Pope*⟩ ⟨the passions and hopes which he had excited had become too strong for him to *contend* against—*Froude*⟩ ⟨forced to *contend* with an army that outnumbered them⟩ **Contest** usually implies a competing but, since the word may

be qualified with respect to the way in which the rivalry manifests itself, it often suggests a contending. The term may be used in reference to a debate, dispute, or controversy, a race or an athletic competition, or a physical fight or struggle but it invariably involves the idea of proving one's mastery or superiority (the election for the office of district attorney was hotly *contested*) ⟨the rivals *contested* lukewarmly for the crown⟩

Ana battle, fight (see **CONTEND**): *rival, vie: oppose, combat, withstand (see **RESIST**)

2 vie, *rival, emulate

Ana *contend, fight: *match, rival, approach, equal, touch

competent capable, qualified, *able

Ana *proficient, skillful, skilled, adept, expert, masterly: efficient, *effective

Ant incompetent —*Con* *incapable, unqualified: inefficient, *ineffective

compile *edit, revise, redact, rewrite, adapt

complacent, self-complacent, self-satisfied, smug, priggish are comparable when they mean feeling or showing satisfaction especially in one's own possessions, attainments, accomplishments, or virtues. **Complacent** implies that a feeling of pleasure accompanies this satisfaction; it may suggest merely a sense of well-being that comes from having no complaint to make, or, at the other extreme, it may imply gloating over the success of something for which one is in some way or in some degree responsible ⟨Mrs. Baines laughed with the *complacent* ease of obesity—*Bennett*⟩ ⟨“nothing in my brain I bring”—he seems to hymn with a pious and *complacent* humility his freedom from intellectual baggage—*Montague*⟩ ⟨*complacent* when they should have been self-critical—*Nevens & Commager*⟩ Although *complacent* usually suggests an attitude toward oneself, it does not carry that implication so clearly that there is left no room for doubt. For this reason **self-complacent** or **self-satisfied** is often preferred when an unequivocal or an unambiguous word is desired; both carry a strong implication either of a comparison made between oneself and others to the great disadvantage of the others or of a feeling that one can rise no higher ⟨all nature may be represented as groaning and travailing to produce at last her consummate masterpiece, our noble selves. There is a certain provincialism about this last assumption, characteristic of a *self-complacent* age—*Inge*⟩ ⟨the strong, *self-complacent* Luther declares . . . that “God himself cannot do without wise men”—*Emerson*⟩ ⟨no bandit fierce, no tyrant mad with pride, no caverned hermit, rests *self-satisfied*—*Pope*⟩ **Smug** usually implies a habitual self-satisfaction that arouses in some degree dislike or contempt; the term often implies both self-satisfaction and conscious respectability, and it may additionally connote narrowness or provinciality or a degree of self-righteousness ⟨his worldwide sympathy . . . with everything but the *smug* commonplace—*Birrell*⟩ ⟨a *smug* . . . quality . . . had crept into that stern piety—*Bates*⟩ ⟨those late Georgian days which were the *smuggest* known to fame—*Repplier*⟩ **Priggish**, like *smug*, is difficult to confine to any one sense or to any constant emphasis on certain implications; while it typically connotes either self-satisfaction, self-sufficiency, or self-righteousness, it usually also suggests either a more or less conscious assumption of one's own superiority or an obvious effort to live up to what one considers one's high principles or one's high ideals ⟨a serious, earnest lad who gave many the impression that he was *priggish*⟩ ⟨that unpromising young man with high collar and pince-nez whose somewhat *priggish* air of superiority infuriated most of the

Democrats—*Schlesinger* b. 1917)

Ana self-assured, self-confident, self-possessed, assured, confident (see corresponding nouns at CONFIDENCE); conceited, egotistic, egoistic (see corresponding nouns at CONCEIT); proud, vain, vainglorious (see under PRIDE *n*)

Con *humble, modest; diffident, *shy

complaint ailment, *disease, disorder, condition, affection, malady, distemper, syndrome

complaisant obliging, good-natured, *amiable

Ana affable, genial, cordial, *gracious: courteous, courtly, gallant, polite, *civil: *suave, urbane, politic, diplomatic, smooth, bland; agreeable, *pleasant, pleasing

Ant contrary, perverse —**Con** disagreeable, unpleasant (see affirmative adjectives at PLEASANT): uncongenial, unsympathetic (see INCONSONANT): *cold, chilly, frigid

complement *n* **Complement, supplement** are comparable both as nouns meaning one thing that makes up for a want or deficiency in another thing and as verbs meaning to supply what is needed to make up for such a want or deficiency. **Complement** implies a completing; it may suggest such a relation between two things or two groups of things that if they are put together they form a whole, or the full number, amount, or quantity necessary for a given purpose; thus, a grammatical *complement* is a word or phrase which must be added to a predicate if the latter is to make a definite assertion (as *well* in "he feels well," *free* in "to set him free," *of no use* in "it proved of no use") <bought a farm complete with its complement of implements and livestock> <you need two more chairs to complement those you already have in the room> However, the term even more often suggests such disparity in two things that what is supplied by either one is lacking in the other, with the result that their actual or theoretical combination gives a completeness that constitutes or approaches perfection <had found someone whose . . . masculinity was the very complement of his own fragile graces—*Horace Gregory*> <no adequate conception of the pictorial art of Asia can be attained without taking account of these wonderful works [of Japanese figure painting], complementing, as they do, the philosophic and poetic art which culminated in the Chinese painting of the Sung era—*Binyon*> <the chief products of Belgium and the Netherlands appeared to complement more than to duplicate one another—*Valentine*> **Supplement** implies an addition to something relatively complete but capable of improvement, enrichment, or enhancement by such an addition; thus, a *supplement* to a newspaper (often, a "book supplement" or "literary supplement") is an additional section which enriches the character of the issue. Usually the term means exactly this <a year of foreign travel is an excellent supplement to a college education> <supplement a work with an index> <the detailed study of history should be supplemented by brilliant outlines—*Russell*> Sometimes, however, the term carries the implication of needless addition <the policy of apartheid is only a political supplement to an economic policy—*Ross*> Sometimes, on the other hand, it comes close to *complement* in suggesting essential differences or a need of combination if perfection is to be attained <physics, history, and religion have their different valuations of experience A complete philosophy would find room for all and would show how they supplement each other—*Inge*> <the settle, which is the necessary supplement to a fire so open that nothing less than a strong breeze will carry up the smoke—*Hardy*> **Ana** counterpart, correlate, *parallel

complement *vb* supplement (see under COMPLEMENT *n*)

Ana complete, finish, *close

complementary, complemental *reciprocal, correlative,

corresponding, convertible

Ana complementing, supplementing (see corresponding verbs under COMPLEMENT *n*): completing, finishing (see CLOSE *vb*); related, associated (see JOIN)

Con *different, diverse, divergent, disparate: *inconsonant, incompatible, incongruous, inconsistent

complete *adj* *full, plenary, replete

Ana entire, *whole, total, all: *perfect, intact, whole, entire

Ant incomplete

complete *vb* finish, conclude, *close, end, terminate

Ana effect, fulfill, achieve, execute, accomplish, *perform, discharge

Con initiate, inaugurate, start, *begin, commence

complex *adj* **Complex, complicated, intricate, involved, knotty** are comparable when they mean having parts or elements that are more or less confusingly interrelated. Something is **complex** which is made up of so many different interrelated or interacting parts or elements that it requires deep study or expert knowledge to deal with it <the complex mechanism of a watch> <our general failure to grasp the need of knowledge and thought in mastering the complex modern world—*Russell*> <the complex details of naval, ground, and air activities—*Roosevelt*> Something is **complicated** which is so complex that it is exceedingly difficult to understand, solve, explain, or deal with <a complicated problem in mathematics> <his descriptions of the most complicated organic structures are astonishingly lucid—*Huxley*> Something is **intricate** which, because of the intertwining or interlacing of its parts, is perplexing or hard to follow out <the intricate tracery of an arabesque> <nature utilizes the sunshine, the air and the earth as raw materials for creating myriad perfumes, but so intricate are her processes . . . that man cannot follow precisely in her footsteps—*Morrison*> <the economic situation is so complex, so intricate in the interdependence of delicately balanced factors—*Dewey*> Something is **involved** in which the parts are or are thought of as so intertwined or interwoven or so turned upon themselves as to be separated or traced out only with difficulty; the term, therefore, in reference especially to financial affairs, implies extreme complication or disorder <the involved patterns of heraldic knots> <an involved sentence or argument> <her husband . . . at his death . . . had left his affairs dreadfully involved—*Austen*> <public issues are so large and so involved that it is only a few who can hope to have any adequate comprehension of them—*Dickinson*> Something is **knotty** which is not only complicated but is so full of perplexities, difficulties, or entanglements that understanding or solving seems almost impossible <that brings up at last the knotty question, what is enough?—*Shaw*> <the knotty problems of a complex society—*Parrington*> The same object may often be regarded from more than one of the above points of view; a sailor's knot may be intricate and complicated, as well as involved; a network of railroad tracks may be complicated as well as intricate, though not involved.

Ana mixed, mingled, blended, merged, fused, amalgamated (see MIX); composite, compound (see corresponding nouns at MIXTURE)

Ant simple (see PURE)

complex *n* *system, scheme, network, organism, economy

Ant component —**Con** member, *part, portion, piece: constituent, *element, factor: *item, particular, detail

complexion temperament, temper, *disposition, character, personality, individuality

Ana humor (see WIT): *mood, humor, vein, temper: nature, kind, *type, sort

compliance acquiescence, resignation (see under COM-

PLIANT)

Ana obedience, docility, amenableness, tractableness (see corresponding adjectives at OBEДИENT); submitting or submission, yielding, deferring or deference (see corresponding verbs at YIELD)

Ant frowardness —**Con** obstinacy, stubbornness (see corresponding adjectives at OBSTINATE)

compliant, **acquiescent**, **resigned**, and their corresponding nouns **compliance**, **acquiescence**, **resignation**, are comparable when used in reference to a person, a mood, or a disposition that manifests acceptance (as of another's will or of something disagreeable or hard to endure). **Compliant** suggests a flexibility or lack of firmness in mood or temperament and frequently implies readiness to accept meekly and without question (educational methods that make children *compliant*) <a naturally *compliant* race> **Acquiescent** implies acceptance without protest or rebellion; it often also connotes a temperamental lack of self-assertiveness (the cause of reform slowly went on gaining adherents—most of them . . . of the *acquiescent* rather than the militant type—*Grandgent*) **Resigned** usually presupposes a disposition or a temperament neither compliant nor acquiescent and implies deliberate but not necessarily happy acceptance and resolute forbearance from repining (he had become *resigned* to her perpetual lamentation—*Meredith*) <*resignation* to inevitable evils is the duty of us all—*Austen*>

Ana *obedient, amenable, tractable, docile: submissive, *tame, subdued: accommodating, conforming, adapting or adaptable (see corresponding verbs at ADAPT)

Ant froward —**Con** *contrary, perverse, balky, restive, wayward: refractory, recalcitrant, *unruly, ungovernable, intractable, willful, headstrong

complicated intricate, involved, *complex, knotty

Ana difficult, arduous, *hard: abstruse, *recondite: perplexing, puzzling, mystifying (see PUZZLE *vb*)

Ant simple (see EASY) —**Con** *easy, facile, light

compliment *n* **Compliment**, **flattery**, **adulation** all denote praise addressed directly to a person. A **compliment** is a courteous expression of commendation and may be either sincere or merely formal (in the noble dedication . . . to the Duchess of Ormond we have an example of Dryden's most polished and magnificent style in elaborate personal *compliment*—*Gosse*) <pay the craftsmen the *compliment* of making a study of their language—*Ulyett*> **Flattery** implies insincerity in compliment or a play upon self-love or vanity by means of artful or obsequious praise (when one is flagging, a little praise (if it can be had genuine and unadulterated by *flattery*) . . . is a cordial—*Scott*) <it is better to leave genuine praise unspoken than to expose yourself to the suspicion of *flattery*—*Shaw*>

Adulation adds to *flattery* the implications of servility or fulsomeness (he fascinated others into believing him a superior being; feasted his self-esteem on their *adulation* until it swelled to monstrous proportions—*Huxley*)

Ana *encomium, tribute, panegyric, eulogy: praise, lauding or laudation, extolling or extollation (see corresponding verbs at PRAISE)

Ant taunt —**Con** *affront, insult, indignity: depreciation, disparagement (see corresponding verbs at DECRY): criticism, censure, reprehension, reprobation, denunciation (see corresponding verbs at CRITICIZE)

compliment *vb* *commend, applaud, recommend

Ana *praise, laud, extol, eulogize, acclaim

Con *criticize, censure, reprehend, condemn, denounce: *decry, depreciate, disparage

comply *obey, mind

Ana accede, consent, agree, acquiesce (see ASSENT):

*yield, submit, defer, bow

Ant command, enjoin —**Con** *resist, withstand: thwart, balk, *frustrate

component constituent, ingredient, *element, factor

Ana member, *part, detail, portion, piece: *item, particular

Ant composite: complex —**Con** *mixture, compound, blend, admixture, amalgam

comport acquit, quit, demean, *behave, conduct, deport

compose *calm, quiet, quieten, still, lull, soothe, settle, tranquilize

Ana *pacify, mollify, propitiate, conciliate: *moderate, temper

Ant discompose —**Con** disquiet, disturb, perturb, agitate, upset (see DISCOMPOSE)

composed collected, *cool, unruffled, imperturbable, unflappable, nonchalant

Ana quiet, *still: serene, placid, tranquil, *calm: sedate, staid, *serious: repressed, suppressed (see SUPPRESS)

Ant discomposed: anxious —**Con** agitated, perturbed, upset, disquieted, flustered, flurried (see DISCOMPOSE): worried, concerned (see under CARE *n*)

composer *writer, author

Ana *maker, creator, author: *artist, artificer

composite admixture, blend, compound, amalgam, *mixture

Ana combining or combination, uniting or union (see corresponding verbs at JOIN)

composition theme, paper, article, *essay

composure *equanimity, sangfroid, phlegm

Ana coolness, collectedness, imperturbability, nonchalance (see corresponding adjectives at COOL): self-possession, aplomb (see CONFIDENCE): placidity, serenity, calmness (see corresponding adjectives at CALM)

Ant discomposure, perturbation —**Con** agitation, disquieting or disquiet, flustering or fluster (see corresponding verbs at DISCOMPOSE): alarm, consternation, terror, *fear, panic: discomfiture, embarrassment (see corresponding verbs at EMBARRASS)

compound *n* *mixture, amalgam, composite, admixture, blend

Ana combining or combination, uniting or union (see corresponding verbs at JOIN): coalescence, fusing or fusion, merging or merger (see corresponding verbs at MIX)

Ant element

comprehend 1 *understand, appreciate

Ana seize, grasp (see TAKE): conceive, envisage, envision (see THINK)

2 *apprehend

Ana see those at COMPREHEND 1

3 embrace, involve, *include, imply, subsume

Ana *contain, hold: classify, pigeonhole (see ASSORT)

comprehension apprehension (see under APPREHEND)

Ana understanding, appreciating or appreciation (see corresponding verbs at UNDERSTAND): *knowledge, science, learning, erudition

compress *vb* constrict, deflate, *contract, condense, shrink

Ana *compact, concentrate, consolidate: bind, *tie

Ant stretch: spread —**Con** *expand, dilate, distend, swell, inflate: disperse, *scatter, dissipate

compulsion coercion, constraint, duress, *force, violence, restraint

Ana impelling or impulsion, driving or drive (see corresponding verbs at MOVE): pressure, *stress: necessity, exigency, *need

Con persuasion, inducement (see corresponding verbs at INDUCE): *choice, option, election, preference

compunction 1 remorse, *penitence, repentance, contrition, attrition

Ana regret, *sorrow: conscientiousness, scrupulousness or scrupulosity (see corresponding adjectives at UPRIGHT) 2 scruple, demur, *qualm

Ana *hesitation, hesitancy: reluctance, disinclination (see corresponding adjectives at DISINCLINED)

compute *calculate, reckon, estimate

Ana *count, enumerate, number: sum, total, tot, figure, cast, *add

comrade *associate, companion, crony

Ana *friend, intimate, confidant: colleague, *partner, confederate, ally

conation *will, volition

Ana *effort, exertion: *action, act: *choice, selection, option

concatenate *vb* articulate, *integrate

Ana link, connect, relate, unite, combine, *join, associate: fuse, blend, merge, coalesce (see MIX): organize, systematize (see ORDER *vb*)

Con break down, resolve, *analyze, dissect

concatenated articulated, integrated (see under INTEGRATE *vb*)

Ana *cumulative, accumulative, additive: linked, connected, united, related (see JOIN): organized, systematized (see ORDER *vb*)

concatenation articulation, integration (see under INTEGRATE *vb*)

Ana sequence, *succession, chain, train

conceal *hide, screen, secrete, bury, cache, ensconce

Ana cloak, mask, *disguise, dissemble, camouflage

Ant reveal —*Con* disclose, discover, divulge, betray (see REVEAL): expose, exhibit, display, *show, parade, flaunt: manifest, evidence, *show, evince

concede 1 *grant, allow

Ana admit, *acknowledge: waive, cede (see RELINQUISH)

Ant dispute —*Con* argue, debate, *discuss, agitate

2 *grant, vouchsafe, accord, award

Ana *yield, submit: surrender, resign, cede, *relinquish

Ant deny (*something to somebody*) —*Con* refuse (see DECLINE)

conceit 1 Conceit, egotism, egoism, self-esteem, self-love, amour propre mean an attitude of regarding oneself with favor. Conceit implies a conviction of superiority in one or more lines of achievement or an overweeningly favorable opinion of one's powers or accomplishments. It often connotes a failure to see oneself truly or an offensive, bumptious manner (<to have lost the godlike conceit that we may do what we will, and not to have acquired a homely zest for doing what we can, shows a . . . mind that . . . forswears compromise—Hardy> <conceit may puff a man up, but never prop him up—Ruskin> <it was part of the author's formidable conceit that he wrote only for the most learned of his professional colleagues—Galbraith> Egotism stresses the tendency to attract attention to and center interest on oneself, one's thoughts, and one's achievements. The word sometimes implies contempt for but more often an overriding or disregard for others' interests or opinions (<a man and a boy of ten are perhaps better company than a man and a boy of fifteen. There's so much less egotism between them—H. G. Wells> <egotism resides more in a kind of proud isolation, in a species of contempt for the opinions and aims of others—Benson> Egoism emphasizes concentration on oneself, one's interests, and one's needs. It seldom suggests a tendency to display oneself or to attract attention to oneself, but it commonly implies self-interest, especially as opposed to altruism or interest in others, as the inner spring of one's acts or as the measure by which all things are judged (<she preferred to be herself, with the egoism of women—Meredith> <the essence of a self-reliant and

autonomous culture is an unshakable *egoism*. It must not only regard itself as the peer of any other culture; it must regard itself as the superior of any other—Mencken> Self-esteem implies a proper and balanced pride in oneself <oftimes nothing profits more than *self-esteem*, grounded on just and right—Milton> <love, hope, and *self-esteem*, like clouds depart and come, for some uncertain moments lent—Shelley> <woman had the feeling of being a constructive factor in the economic process; thus she was provided with a sound basis for *self-esteem*—Horney> Self-love usually implies an abnormal regard for oneself that excludes or overshadows all other interests or affections. On the other hand it occasionally designates that degree of love for oneself or interest in one's well-being which is the proper and necessary complement of one's love for others <but 'tis not easy with a mind like ours . . . to bid the pleadings of *self-love* be still—Cowper> <*self-love* but serves the virtuous mind to wake, as the small pebble stirs the peaceful lake . . . friend, parent, neighbor, first it will embrace; his country next; and next all human race—Pope> Amour propre comes closer to *self-esteem*, for it stresses pride, usually pardonable pride, in oneself. It is therefore used when the idea of sensitiveness to others' opinions is indicated <the *amour propre* of the French people had been outraged—Holt & Chilton> <she flattered his *amour propre* by asking that from his generosity which she could have taken as a right—Reade> *Ana* *pride, vanity, vainglory: arrogance, superciliousness, insolence (see corresponding adjectives at PROUD): complacency, smugness, priggishness (see corresponding adjectives at COMPLACENT)

Ant humility —*Con* humbleness, modesty, meekness, lowliness (see corresponding adjectives at HUMBLE): diffidence, shyness, bashfulness (see corresponding adjectives at SHY)

2 *caprice, freak, fancy, whim, whimsy, vagary, crotchet

conceive *think, imagine, fancy, realize, envisage, envision

Ana *consider, excogitate: speculate, cogitate, *think: *ponder, ruminate, meditate

concentrate *vb* 1 *center, focus, centralize

Ana fix, *set, settle, establish: muster, convoke, convene (see SUMMON)

2 *compact, consolidate, unify

Ana *gather, collect, assemble: mass, *heap, pile: fix, *fasten, attach: engross, *monopolize, absorb

Ant dissipate —*Con* disperse, dispel, *scatter: dilute, *thin, attenuate, extenuate, rarefy: *distribute, divide, dispense, deal

concentration application, *attention, study

Ana intentness, raptness, engrossment, absorption (see corresponding adjectives at INTENT)

Ant distraction

concept *idea, conception, notion, thought, impression

Con percept, sense-datum, sensum, image, *sensation

conception concept, *idea, thought, notion, impression

Ana *opinion, view, belief, conviction, persuasion, sentiment: theory, *hypothesis

concern *vb* Concern, affect are sometimes confused.

Concern implies the bearing or influence, affect, the direct operation or action, of one thing on another; thus, a piece of legislation may concern (that is, have to do with, have reference or relation to) certain vested interests without affecting them (that is, producing an effect upon them, changing them in any way).

Ana *bear, pertain, appertain, apply, relate, belong: influence, sway, *affect, touch

concern *n* 1 *affair, business, matter, thing

2 solicitude, *care, anxiety, worry

Ana thoughtfulness, considerateness or consideration,

attentiveness or attention (see corresponding adjectives at THOUGHTFUL)

Ant unconcern —*Con* indifference, aloofness, incuriousness, uninterestedness, disinterestedness (see corresponding adjectives at INDIFFERENT)

concerned solicitous, careful, anxious, worried (see under CARE *n*)

Ana engrossed, absorbed, *intent: impressed, affected, influenced, touched (see AFFECT *vb*): troubled, distressed (see TROUBLE *vb*)

Ant unconcerned —*Con* *indifferent, incurious, aloof, detached, uninterested, disinterested: *negligent, neglectful, remiss

concerning regarding, respecting, *about

concert *vb* *negotiate, arrange

Ana *discuss, debate, argue: concur, cooperate, *unite, conjoin, combine

cession *allowance

Ana favor, boon, *gift: indulgence, leniency, tolerance, forbearance (see under FORBEARING)

conciliate *pacify, appease, placate, propitiate, mollify

Ana arbitrate, adjudicate (see JUDGE *vb*): mediate, intervene (see INTERPOSE): persuade, prevail (see INDUCE): calm, tranquilize (see corresponding adjectives at CALM): adjust, accommodate, reconcile, *adapt

Ant antagonize —*Con* *strange, alienate, disaffect: *provoke, excite, stimulate, pique: *incite, foment

concise, **terse**, **succinct**, **laconic**, **summary**, **pithy**, **compendious** are comparable when meaning briefly stated or presented or given to or manifesting brevity in statement or expression. A person is *concise* who speaks or writes briefly; a thing is *concise* that is brief because all superfluities have been removed and all elaboration avoided (<a *concise* report> <I hadn't known Jane spoke so well. She has a clever, coherent way of making her points, and is *concise* in reply if questioned—*Rose Macaulay*> A thing is *terse* that is both concise and finished; the word often implies both pointedness and elegance (<pure, *terse*, elegant Latin—*Edwards*> <*terse* headlines are another part of the *Tribune's* campaign to save newsprint—*New Yorker*> A person or thing is *succinct* that compresses or is marked by compression into the smallest possible space; the term suggests great compactness and the use of no more words than are necessary (<*succinct* directions> <a strict and *succinct* style is that where you can take away nothing without loss, and that loss to be manifest—*Ben Jonson*> <a book must have a title, and today it must have a *succinct* title; therefore this book appears as *Richelieu—Belloc*> A person or thing is *laconic* that is characterized by such succinctness as to seem curt, brusque, unperturbed, or mystifying (<this *laconic* fool makes brevity ridiculous—*Davenant*> <I cannot exactly say with Caesar, "Veni, vidi, vici": however, the most important part of his *laconic* account of success applies to my present situation—*Byron*> <*laconic*, these Indians—*La Barre*> A thing is *summary* that presents only the bare outlines or the main points without details (<a *summary* account of the year's events under a few main headings> The term often suggests almost rude curtness or extreme generality (<the terms I use here are exceedingly *summary*. You may interpret the word *salvation* in any way you like—*James*> <her diary and her letters continued to be mainly the swift and *summary* record of crowded and delightful days—*Ellis*> A thing is *pithy* that is not only terse or succinct but full of substance and meaning and therefore especially forcible or telling (<*pithy* epigrams> <a brief, *pithy*, and, as it then appeared to him, unanswerable argument against the immortality of the human soul—*Hawthorne*> <his speech

was blacksmith-sparked and *pithy—Masefield*> Something is *compendious* which is concise, summary, and weighted with matter; the word suggests the type of treatment that distinguishes the typical compendium (<a *compendious* account of the Reformation> <a *compendious* style> <the *compendious* scholarly words which save so much trouble—*T. E. Brown*>

Ana condensed, compressed (see CONTRACT *vb*): compacted, concentrated (see COMPACT *vb*): abridged, abbreviated, shortened (see SHORTEN): *brief, short

Ant redundant —*Con* prolix, diffuse, verbose, *wordy

conclude 1 *close, finish, terminate, end, complete

Ant open —*Con* commence, *begin, start, initiate, inaugurate

2 judge, gather, *infer, deduce

Ana reason, speculate (see THINK): *conjecture, surmise, guess

concluding *adj* *last, final, terminal, latest, ultimate

Ana closing, terminating, ending, finishing, completing (see CLOSE *vb*)

Ant opening —*Con* beginning, commencing, starting, initiating or initial, inaugurating or inaugural (see corresponding verbs at BEGIN)

conclusion judgment, deduction, inference (see under INFER)

conclusive, **decisive**, **determinative**, **definitive** are comparable when they mean having or manifesting qualities that bring something to a finish or end. **Conclusive** applies most frequently to an argument, evidence, or reasoning that is irrefutable or so convincing that it compels certainty or certitude and puts an end to question or debate concerning a matter (<there is one very convincing text which so strongly supports the tradition that it seems *conclusive—Belloc*> <a very persuasive if not a *conclusive* argument—*John Marshall*> **Decisive** (see also DECIDED) applies to something (as an act, event, influence, or argument) that puts an end to controversy or competition, to vacillation, to uncertainty, or to insecurity; it often comes close in meaning to *critical* (<the *decisive* battle of the war had not yet been fought> <my words had been *decisive*. At least they put an end to the discussion—*London*> **Determinative** applies especially to matters (as decisions, judgments, operative causes, or influences) which put an end to uncertainty, wavering, and fluctuation and serve to give a fixed direction, goal, or character (as to a life, a course, or a movement) (<the *determinative* influence in shaping his career> <an appeal covering similar merchandise is pending . . . which will be *determinative* of this issue—*U. S. Treasury Decisions*> **Definitive**, which is often opposed to *tentative* and, sometimes, to *provisional*, applies to whatever is put forth as final and as serving to make further questioning, dispute, uncertainty, or experiment needless or as serving to put an end to an unsettled state or condition where temporary measures have been necessary (<the decisions of the Supreme Court of the United States are *definitive*> <a *definitive* treaty> <a *definitive* edition of an author's works is one that claims to have said the last word on all textual problems> <not until there is a settled and *definitive* world order can there be such a thing as a settled and *definitive* version of human history—*Huxley*>

Ana convincing, compelling, telling, cogent (see VALID): *certain, inevitable, necessary

Ant inconclusive —*Con* *doubtful, dubious, questionable, problematic: *theoretical, speculative, academic: *plausible, credible, specious

concoct *contrive, devise, invent, frame

Ana *make, fabricate, fashion, manufacture: create, discover (see INVENT): conceive, envisage, envision,

*think

concomitant *adj* coincident, concurrent, synchronous, simultaneous, contemporaneous, *contemporary, coeval, coetaneous

Ana attending or attendant, accompanying (see corresponding verbs at ACCOMPANY): associated, connected, related, linked (see JOIN)

Con antecedent, *preceding, foregoing, previous, precedent: following, succeeding, ensuing (see FOLLOW)

concomitant *n* *accompaniment

concord *harmony, consonance, accord

Ana agreement, concurrence, coincidence (see corresponding verbs at AGREE): peacefulness or peace, tranquillity, serenity, placidity, calmness (see corresponding adjectives at CALM): amity, comity, goodwill, *friendship
Ant discord —*Con* strife, conflict, dissension, contention, difference, variance (see DISCORD)

concordat compact, pact, treaty, entente, convention, cartel, *contract, bargain

concourse *junction, confluence

concur 1 conjoin, *unite, combine, cooperate

Ana accord, harmonize, *agree, jibe

2 *agree, coincide

Ana consent, *assent, accede, acquiesce, agree

Ant contend: altercation —*Con* fight, battle, war (see CONTENT): quarrel, wrangle (see under QUARREL *n*): dispute, debate, argue (see DISCUSS)

concurrent coincident, simultaneous, synchronous, concomitant, contemporaneous, *contemporary, coeval, coetaneous

concussion shock, percussion, *impact, impingement, collision, clash, jar, jolt

Ana beating, pounding, buffeting (see BEAT *vb*): striking, smiting, swatting, slapping (see STRIKE *vb*)

condemn 1 denounce, censure, blame, reprobate, reprehend, *criticize

Ana *judge, adjudge: *decry, belittle, depreciate, disparage: *disapprove, deprecate

Con *commend, applaud, compliment: *praise, laud, extol, acclaim, eulogize: condone, *excuse, pardon, forgive

2 *sentence, doom, damn, proscribe

Con *free, release, liberate, discharge: acquit, absolve, exonerate, *exculpate, vindicate: *rescue, redeem, save, deliver

condense *contract, shrink, compress, constrict, deflate

Ana abridge, abbreviate, *shorten, curtail: reduce, diminish, *decrease: *compact, concentrate, consolidate

Ant amplify (*a speech, article*) —*Con* *expand, swell, distend, dilate, inflate

condescend *stoop, deign

Ana favor, accommodate, *oblige: vouchsafe, concede, *grant

Ant presume

condign *due, rightful

Ana just, equitable, *fair: merited, deserved (see corresponding nouns at DUE)

condition *n* 1 **Condition, stipulation, terms, provision, proviso, reservation, strings** are comparable when meaning something that is established or is regarded as the prerequisite of a promise or agreement being fulfilled or taking effect. **Condition** implies the laying down of something as a prerequisite which must be observed or satisfied if the validity of the whole agreement, promise, dispensation, or gift is not to be destroyed (he was to go to Oxford or Cambridge . . . if he succeeded in gaining a scholarship. . . . That was the *condition* his father had laid down—*Archibald Marshall*) (though they regarded the diplomatic service as a preserve for their younger sons, they attached

to it the *condition* that no youth should be eligible for it without a private income of four hundred a year—*Shaw*) (just had to keep writing—writing was a profession, a way of life, a *condition* of his survival—*Anderson*) **Stipulation** differs from *condition* chiefly in implying a formal, explicit, and often written statement (as a contract) binding a party thereto to a specified course (he made the *stipulation* that payments be in gold) (one consequence of this contract by the law that governed it and by the *stipulation* of the lessor was that if the lessee held over he held over for a year—*Justice Holmes*) (a *stipulation* is a statement of conditions that are agreed to in the conduct of some affair—*Kaufmann*) **Terms** indicates conditions offered or agreed upon by one or both parties to a contract, agreement, or deal; thus, two parties may come to *terms* (i.e., may agree upon such a matter as work to be done, prices to be paid, or a division of property) (only a general of repute could get recruits, and for that service he could make his own *terms*—*Buchan*) (the *terms* of the lease are not harsh—*Montague*) (a certain despair of her ever understanding . . . the *terms* of a contract—*Mary Austin*) **Provision** applies chiefly to a documentary statement which provides measures for the treatment of certain matters legally (the admission of Arkansas with a *provision* in its constitution forbidding the abolition of slavery without the consent of the slaveowners—*L. B. Evans*) (according to the *provisions* of the constitution the state courts have no jurisdiction in this controversy) It may be specifically used of a clause or of a part of such a document or of a document that is comparable in laying down a condition or making a stipulation (into his will he wrote a *provision* that all of his children should accept his decision regarding the disposal of his property on pain of being disinherited) **Proviso** denotes a condition or a stipulation, especially one that is clearly stated and binding (passionate feeling is desirable, provided it is not destructive; intellect is desirable, with the same *proviso*—*Russell*) (it is because the practical businessman always forgets this *proviso* that he is such a hopeless idiot politically—*Shaw*) **Reservation** indicates a qualification or modification of the terms of an agreement or statement, often to cover contingencies. It may become a stipulation or proviso if the other party or parties concerned agree or acquiesce (she [Spain] had already in the treaty of Madrid promised to leave the Valtelline, but with such *reservations* that she could still hold on—*Belloc*) or it may be avowed only to oneself (*mental reservation*) in evading the generally understood sense of a promise or an oath or other statement that one is impelled to make for reasons of necessity or expediency (the issues that won him most votes were issues that, at bottom, he didn't believe in; there was always a *mental reservation* in his rhetoric—*Mencken*) **Strings** suggests strands which the maker of a promise, a proposal, or an offer keeps in his hands so that he may pull them back if what he lays down as a condition or imposes as a stipulation is not kept; the term usually denotes conditions or provisos, often unexpected or concealed, that may radically alter or even annul an agreement (make me a cash offer, with no *strings*)
Ana prerequisite, requisite, *requirement
2 *state, situation, mode, posture, status
Ana circumstance, *occurrence, event: occasion, antecedent, *cause: *phase, aspect, side, facet, angle
3 *disease, disorder, affection, ailment, malady, complaint, distemper, syndrome

condition *vb* *prepare, fit, qualify, ready

conditional *dependent, contingent, relative

Ana problematic, questionable (see DOUBTFUL): *provisional, tentative: subject, prone, *liable, open: *acci-

dental, fortuitous, incidental

Ant unconditional

condolence *sympathy, pity, commiseration, compassion, ruth, empathy

Ana consoling or consolation, solacing or solace, comforting (see corresponding verbs at COMFORT)

Con felicitation, congratulation (see corresponding verbs at FELICITATE)

condone *excuse, forgive, pardon, remit

Ana disregard, overlook, forget, ignore (see NEGLECT *vb*): *exculpate, absolve, acquit

Con *punish, chastise, discipline, castigate, correct: condemn, denounce, censure, reprobate, reprehend (see CRITICIZE): *disapprove, deprecate

conduct *n* *behavior, deportment

Ana act, deed, *action: demeanor, mien, deportment, *bearing

conduct *vb* 1 escort, convoy, *accompany, attend, chaperon

Ana *guide, lead: convey, transmit, *carry

2 **Conduct, manage, control, direct** are comparable when they mean to use one's skill, authority, or other powers in order to lead, guide, command, or dominate persons or things. **Conduct** may imply the act of an agent who is both the leader and the person responsible for the acts and achievements of a group having a common end or goal <conduct an orchestra> <the minister conducts the prayer meetings> <Douglas conducted conferences and studies which led to a reorganization of the Stock Exchange—*Current Biog.*> but often the idea of leadership is lost or obscured and the stress is placed on a carrying on by all or by many of the participants <debates, conducted seriously with a view to ascertaining the truth, could be of great value—*Russell*> <it was judged desirable for him to see how affairs were conducted in the United States—*Heiser*> **Manage** usually implies the handling, manipulating, or maneuvering of a person or persons or a thing or things so as to bring about a response or submission to one's wishes or attempts to use, guide, lead, or command <he manages the sailboat admirably> <he cannot manage himself, so how can he be expected to manage others> <manage a refractory child> <the boy . . . could not yet manage his "r's" and "th's" right—*Kipling*> <the first condition for an artist in glass is to know how to manage blue—*Henry Adams*> <now do you leave this affair in my hands. Only tell me which woman it is and I will manage the affair—*Buck*> But *manage* is also often used to imply the action of one who is in authority and charged with the handling of the details of a business or industry or of one of its departments or of any complex or intricate system or organization <he manages a theater> <manage the financial affairs of a company> <the delight she would take in managing a real house, not in any sense as its drudge, but magnificently as its mistress—*Dell*> <manage a chain of restaurants> **Control** stresses the idea of authoritative guidance and suggests a keeping within set or desired bounds (as of accuracy, efficiency, propriety, or discipline); it implies a regulating or a restraining often by getting or keeping the upper hand <no attempt was made . . . to control by public authority the production and distribution of wealth—*Dickinson*> <in order to make its highways most useful, the business traffic upon them must be controlled—*Justice Holmes*> <he started things moving and then was caught up in the repercussions of the movement. He mounted an act as if it were a horse, found himself unable to control it—*Cloete*> Sometimes, however, *control* implies little more than domination or the complete subjection of the dominated person or thing to one's will <he has learned

to control himself> <the struggle between two strong-willed women to control one weak-willed man is the usual motive of the French drama in the nineteenth century—*Henry Adams*> <pirates at one time practically controlled the coasts of Florida—*Amer. Guide Series: Fla.*> **Direct** (see also COMMAND, DIRECT 1, DIRECT 2) implies a regulation of the activities (as of a group of persons) or of the course or courses to be followed; it carries no suggestion of a desire or aim to dominate, but of an intent or purpose to keep the persons or things involved straight, well organized, or properly administered <the president and trustees direct the affairs of the institution> <the architect directed the building of the bank> <direct American taste and mold the genius of the young republic—*Brooks*>

Ana supervise, oversee (see corresponding nouns at OVERSIGHT): *govern, rule: engineer, pilot, steer, lead (see GUIDE *vb*): operate, work, function (see ACT *vb*)

3 demean, deport, *behave, comport, acquit, quit

conduit *channel, canal, duct, aqueduct

confederacy, confederation federation, coalition, fusion, *alliance, league

confederate *n* 1 *partner, copartner, colleague, ally

Ana, Ant, & Con see those at ALLY

2 **Confederate, conspirator, accessory, abettor, accomplice.**

As used in law these words all convey the idea of complicity or common guilt in a wrongful act. **Confederate** is the general term applied to any person who in conjunction with others intentionally contributes to the commission of an unlawful act, whether the act be a crime or a civil injury. For civil joint wrongdoers the specific term is **conspirator**. An **accessory** is neither the chief actor (*principal*) in an offense nor a person present at its performance but one who accedes to or becomes involved in its guilt by some act (as of instigating, encouraging, aiding, or concealing) either previous or subsequent to the commission of the offense. In the case of certain classes of offenses (as treason or misdemeanors) the law ordinarily recognizes no distinction between an accessory and a principal. An **abettor** is one who is actually or constructively present at the commission of the deed and contributes to it by moral or physical force. An **accomplice** is one who with criminal intent participates in the commission of an offense whether as principal, abettor, or accessory. Legal usage does not recognize the distinction made by laymen between *principal* and *accomplice*.

confer 1 bestow, present, *give, donate, afford

Ana accord, award, vouchsafe, *grant

2 **Confer, commune, consult, advise, parley, treat, negotiate** are synonyms when they are used intransitively and bear the meaning to carry on a conversation or discussion especially in order to reach a decision or settlement. **Confer** implies comparison of views or opinions and, as a rule, equality in those participating in the discussion <the executives confer weekly about important business affairs> <the Dauphin and his train approacheth, to confer about some matter—*Shak.*> **Commune**, once a close synonym of *confer*, now is rare in this sense <we were communing on important matters—*Walpole*> In current use it usually implies spiritual intercourse (as in prayer or meditation or in a close union of minds and spirits) <there, sitting on the ground, the two [mother and child] would commune with each other by the hour—*Hudson*> **Consult** adds to *confer* the implication of seeking or taking counsel <the president will not make his reply to the ambassador until he has consulted with the cabinet> <the three powers would consult on how to ameliorate the internal political conflict—*Vucinich*> **Advise** often is not clearly distinguishable from *consult* except that it is more suitable for use regarding personal matters on which one seeks advice <before he makes his decision, he will

advise with his friends) *Parley, treat, and negotiate* all imply conference for the sake of settling differences or of coming to an agreement on terms. *Parley* stresses the talk involving the discussion of terms (they are at hand, to *parley* or to fight—*Shak.*) (the . . . government was forced to *parley* with the rebels—*Harrington*) *Treat* adds to *parley* the implication either of a common will to adjust differences or of the need of diplomacy (the warring nations were ready to *treat* for peace) (the commander in chief . . . was to *treat* for an armistice—*Pares*) *Negotiate* implies compromise or bargaining (after the preliminaries were over, they proceeded to *negotiate*) *Ana* converse, talk, *speak: *discuss, debate, argue

confess avow, *acknowledge, admit, own

Ana *grant, concede, allow: disclose, divulge, *reveal, discover: *declare, proclaim, publish

Ant renounce (*one's beliefs, principles*)

confessions *biography, life, memoir, autobiography

confidant intimate, *friend, acquaintance

Ana comrade, crony, companion (see ASSOCIATE *n*)

confide entrust, *commit, consign, relegate

Ana bestow, present, *give: *grant, vouchsafe, accord, award

confidence 1 *trust, reliance, dependence, faith

Ana certitude, assurance, conviction, *certainty: credence, credit, *belief, faith

Ant doubt: apprehension —*Con* *distrust, mistrust: despair, hopelessness (see under DESPONDENT)

2 **Confidence, self-confidence, assurance, self-assurance, self-possession, aplomb** are comparable when denoting either a state of mind free from diffidence, misgivings, or embarrassment or the easy, cool, or collected bearing or behavior resulting from this attitude. **Confidence** stresses faith in oneself and in one's powers; it does not as a rule imply conceit nor preclude the suggestions of support from external agencies or influences or of modest recognition of that assistance (far better that the task should be entrusted to one who had . . . a sincere *confidence* in his power of dealing with the difficulties of the situation—*Benson*) (the *confidence* that springs from complete mastery of his subject—*Grandgent*) When self-sufficiency is connoted, **self-confidence** commonly replaces *confidence* (he has the *self-confidence* of one who has made money—*Shaw*) (in extreme youth one has to be secondhand . . . one lacks *self-confidence*—*Rose Macaulay*) **Assurance** is distinguishable from *confidence* only by its far stronger implication of certainty and its frequent suggestion of arrogance; thus, one meets a situation with *confidence* when one's belief in one's powers is strong, but with *assurance* when one never questions the outcome or the rightness of what one is saying or doing (there was indeed in the personality of that little old lady the tremendous force of accumulated decision—the inherited *assurance* of one whose prestige had never been questioned—*Galsworthy*) (no experience so far served to reveal the whole offensiveness of the man's *assurance*—*Mary Austin*) **Self-assurance** implies an assured self-confidence (the serene *self-assurance* . . . of the Abbey is unlike the baffling compound of modesty and self-assertiveness in a Nonconformist chapel—*Sperry*) (he wrote with that pleasing *self-assurance* which the civilized man occasionally shares with the savage—*Replier*) **Self-possession** implies an ease or coolness arising from command over one's powers; it connotes, usually, controlled but not repressed emotions and actions, or speech free from flurry and appropriate to the situation (she was rather afraid of the *self-possession* of the Morels, father and all . . . It was a cool, clear atmosphere, where everyone was himself, and in harmony

—*D. H. Lawrence*) (had that carefully cultivated air of quiet *self-possession*, suggesting inner repose and serenity —*Strauss*) **Aplomb** describes the behavior or, less often, the bearing of one whose assurance or self-possession is conspicuously but not necessarily disagreeably evident (ignoring with admirable *aplomb* the fact that we are tardy—*Loves*) (it is native personality, and that alone, that endows a man to stand before presidents and generals . . . with *aplomb*—*Whitman*)

Ana *courage, resolution, mettle, spirit, tenacity

Ant diffidence —*Con* modesty, bashfulness, shyness (see corresponding adjectives at SHY): misgiving, *apprehension

confident, assured, sanguine, sure, presumptuous are comparable as applied to a person or to his temperament, looks, manner, acts, or utterances with the meaning not inhibited by doubts, fears, or a sense of inferiority. **Confident** may imply a strong belief in oneself or one's powers but it nearly always implies freedom from fear of failure, frustration, or attack and, as a corollary, certitude of success, fulfillment, or approval. As a rule, it is not a depreciative term, and often is complimentary (his voice was manly and *confident*) (the happy and joyous temper which characterizes a fresh and *confident* faith—*Inge*) (do you grapple the task that comes your way with a *confident, easy* mind?—*Guest*) (a *confident* feeling of immense reserves in strength and endurance—*T. E. Lawrence*) **Assured** suggests the absence of question in one's mind as to whether one is right or wrong, secure or insecure in one's position, or likely to fail or to succeed; it may also imply certitude of one's rightness, security, success, but this is not one of its consistent or emphatic implications (talking with *assured* authority about places we have not visited, plays we have not seen—*Lucas*) (the *assured* gaze of one who is accustomed to homage—*Bennett*) (she had the casual, *assured* way of speaking —*Wolfe*) **Sanguine** implies a greater measure of optimism than *confident*, sometimes suggesting this as a weakness rather than as a virtue (Mr. Britling's thoughts were quick and *sanguine* and his actions even more eager than his thoughts—*H. G. Wells*) (*sanguine* and very susceptible to flattery, Haydon was always ready to believe that the smallest stroke of good fortune must be the herald of complete success—*Huxley*) (a surgeon's commission for the doctor, and a lieutenancy for myself, were certainly counted upon in our *sanguine* expectations—*Melville*) **Sure** implies that one's freedom from doubts or fears is rather the consequence of certainty or of complete confidence in one's skill than of temperament or health. The word also often connotes a steady and disciplined mind, mental or emotional stability, or unfailing accuracy (a *sure* scholar) (a *sure* craftsman) (as he is slow he is *sure*—*Steele*) (she tempted the young man into kissing her, and later lay in his arms for two hours, entirely *sure* of herself—*Anderson*) **Sure** is applicable also to any part of the body equipped to do a certain kind of work under the control of the brain, or to the work itself; thus, a *sure* hand works with unflinching skill and accuracy; *sure* feet pick their way fearlessly over slippery rocks; a *sure* eye is necessary for a *sure* aim (the *sure* rhythm of their tiny moccasins feet—*Cather*) **Presumptuous** implies an excess of confidence that is usually displayed boldly or insolently. The term is distinctly depreciative and suggests that the one so characterized is lacking in courtesy, judgment, and savoir faire (she enforced the doctor's orders in a way which seemed . . . loud and *presumptuous*—*Wescott*)

Ana courageous, intrepid, *brave, bold, dauntless, undaunted, valiant, fearless, unafraid: positive, certain,

*sure
Ant apprehensive; diffident —**Con** *fearful, afraid; nervous, uneasy, jittery (see IMPATIENT): *shy, bashful, modest; dubious, *doubtful

confidential close, intimate, *familiar, chummy, thick
Ana *secret: trusty, tried, trustworthy (see RELIABLE)

configuration conformation, figure, shape, *form
Ana *outline, contour, silhouette, profile, skyline

confine *vb* circumscribe, *limit, restrict
Ana bind, *tie: *restrain, curb, inhibit, check: *hamper, trammel, fetter, shackle, hog-tie, manacle: *imprison, incarcerate, immature, intern, jail

confine *n* bound, *limit, end, term
Ana verge, edge, *border: *circumference, periphery, compass

confirm 1 *ratify
Ana *assent, consent, acquiesce, accede, subscribe: validate (see CONFIRM 2): sanction, *approve, endorse
Con reject, refuse, *decline

2 **Confirm, corroborate, substantiate, verify, authenticate, validate** mean to attest to the truth, genuineness, accuracy, or validity of something. *Confirm* and *corroborate* are both used in reference to something doubtful or not yet proved. **Confirm**, however, usually implies the resolving of all doubts typically by an authoritative statement or by indisputable facts (his failure to pay his debts *confirmed* their suspicion that he was not to be trusted) (there is a rumor—which cannot of course be *confirmed*—*Gorrell*) (it was expectation exquisitely gratified, superabundantly *confirmed*—*Henry James*) **Corroborate** suggests particularly the strengthening of one statement or piece of evidence by another (the bystanders *corroborated* his story) (in general the material illustrates and *corroborates* what has already become known from other sources—*Kennan*) **Substantiate** presupposes something needing to be demonstrated or proved and implies the offering of evidence sufficient to sustain the contention or to create a strong presumption in its favor (they were able to *substantiate* their claim to the property when the long-lost deed was found) (Darwin spent nearly a lifetime in gathering evidence to *substantiate* his theory of the origin of species) (no proof had to be brought forward to *substantiate* the claims they made—*Anderson*) **Verify** has for its distinctive implication the established correspondence of the actual facts or details to those that are given in an account or statement. When what is in question is a suspicion, a fear, or a probability, it can be *verified* only in the result, event, or fulfillment (the prediction of a severe storm was *verified* in every detail) (it [faith] begins as a resolution to stand or fall by the noblest hypothesis . . . ; but it is *verified* progressively as we go on—*Inge*) In more general use *verify* implies a deliberate effort to establish the accuracy or truth of something usually by comparison (as with ascertainable facts, an original, or a series of control experiments) (verify all the citations in a book) (statements of accounts due are not sent out until they are *verified*) (the careful scientist *verifies* every step in an experiment) (he has explored most of Trans-Jordan, *verified* biblical accounts by his findings and excavations—*Current Biog.*) (a government survey party was *verifying* the neighboring landmarks—*Furphy*) **Authenticate** presupposes question of a thing's genuineness or validity and therefore implies a demonstration of either of these by someone (as an expert or the proper authority) in a position to know or to determine (the collector refused to purchase the manuscript until it had been *authenticated* by experts) (the bank *authenticated* the signatures on the note) (an *authenticated* copy of the Declaration—*Dumas Malone*) **Validate** is more often used than *authenticate* when applied to legal papers requiring an official signature or seal before becoming valid (validate a passport) It is, however, also used when the soundness of a judgment, of a belief, or of a policy is in question (the expansion of demand which alone can *validate* the policy—*Hobson*) (he *validated* his conclusion when he demonstrated that his facts and his reasoning were correct in every detail)

Ana *support, uphold, back: vouch, attest, *certify
Ant deny: contradict —**Con** gainsay, traverse, impugn, contravene, negative (see DENY): confute, refute, controvert, *disprove

confirmed *inveterate, chronic, deep-seated, deep-rooted
Ana established, fixed, set, settled (see SET *vb*): *hardened, indurated, callous

confiscate appropriate, *arrogate, usurp, preempt
Ana seize, *take, grab: condemn, proscribe (see SENTENCE *vb*)

conflagration *fire, holocaust

conflict 1 **conflict** *n* 1 combat, fight, *contest, affray, fray
Ana engagement, *battle, action: *encounter, skirmish, brush: controversy, dispute, *argument
 2 strife, contention, dissension, difference, variance, *discord
Ana clash, collision, impingement, *impact: antagonism, hostility, *enmity: incompatibility, incongruousness, inconsistency, in consonance, discordance (see corresponding adjectives at INCONSONANT)
Ant harmony —**Con** consonance, concord, accord (see HARMONY): comity, amity, *friendship: compatibility, congruity (see corresponding adjectives at CONSONANT)

conflict *vb* 1 *resist, withstand, contest, oppose, fight, combat, antagonize
 2 *bump, clash, collide
Ana *contend, fight: *differ, vary, disagree
Ant accord —**Con** harmonize, *agree: *match, equal, touch, rival

confluence *junction, concourse

conform 1 *adapt, adjust, accommodate, reconcile
Ana *harmonize, tune, attune: *assent, accede, acquiesce: accept, *receive
 2 *agree, accord, harmonize, correspond, square, tally, jibe
Ant diverge —**Con** *differ, disagree

conformation configuration, *form, shape, figure
Ana *structure, anatomy, framework, skeleton

confound 1 dumbfound, nonplus, bewilder, mystify, *puzzle, perplex, distract
Ana flabbergast, amaze, astound, astonish, *surprise: discomfit, faze, rattle, abash, *embarrass, disconcert
 2 confuse, *mistake
Ana muddle, addle, *confuse: *mix, mingle
Ant distinguish, discriminate

confront *vb* *meet, face, encounter
Ana defy, beard, challenge, brave, dare (see FACE): oppose, withstand, *resist
Ant recoil from

confuse 1 **Confuse, muddle, addle, fuddle, befuddle** mean to throw one out mentally so that one cannot think clearly or act intelligently. **Confuse** usually implies intense embarrassment or bewilderment (you *confuse* me, and how can I transact business if I am *confused*? Let us be clear-headed—*Dickens*) **Muddle** often suggests stupefaction (as by drink) and usually implies blundering, aimless, but not necessarily unsuccessful attempts to deal with ideas, situations, or tasks beyond one's powers of analysis or one's capacity (a subject so abstruse as to *muddle* the brains of all but exceptional students) (we have

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

muddled through so often that we have come half to believe in a providence which watches over unintelligent virtue—*Inge*) **Addle** suggests staleness or emptiness of mind and resulting mental impotence (I have *addled* my head with writing all day—*Dickens*) **Fuddle** and the more common **befuddle** imply confusion from or as if from tipping or indulgence in a drug that clouds the mind and makes one's thinking and speech absurdly incoherent (Shakespeare's Falstaff is most amusing when he is completely *befuddled*) <corridors, archways, recesses . . . combined to *fuddle* any sense of direction—*Elizabeth Bowen*) <perhaps his best would be a little better if he didn't *befuddle* his mind with . . . slander—*Frank*)

Ana confound, bewilder, mystify, perplex, *puzzle: discomfit, disconcert, faze, rattle (see EMBARRASS): fluster, flurry (see DISCOMPOSE)

Ant enlighten

2 *mistake, confound

Ant differentiate

confusion 1 **Confusion, disorder, chaos, disarray, jumble, clutter, snarl, muddle** are comparable when they mean the state or a condition in which things are not in their right places or arranged in their right relations to each other, or an instance of such a state or condition. **Confusion** suggests such mixing or mingling as obliterates clear demarcation or distinction; **disorder** (see also DISEASE) implies lack or more frequently disturbance or breach of due order or arrangement; thus, a busy worker might leave his desk in *confusion* with objects mingled together and no arrangement apparent to an observer, but a burglar searching it for money would probably leave it in *disorder* with contents thrown about and out of their normal (though not necessarily orderly) arrangement (the dark *confusion* of German history—*Guérard*) <mid the misery and *confusion* of an unjust war—*Shelley*) <cowardice has succeeded to courage, *disorder* to discipline—*Dickinson*) <our last chance to substitute order for *disorder*, government for anarchy—*E. B. White*) **Chaos** suggests an absolute or sometimes hopeless confusion suggestive of the ancient Greek conception of Chaos as the unorganized state of primordial matter before the creation of distinct and orderly forms; the term therefore more often implies innate lack of organization rather than disturbance of an existent order (the Essays of Montaigne . . . a *chaos* indeed, but a *chaos* swarming with germs of evolution—*J. R. Lowell*) When *chaos* does imply a disturbing, it usually suggests a reducing to the utter confusion of primordial matter <back not merely to the dark ages but from cosmos to *chaos*—*Baruch*) **Disarray**, more even than *disorder*, implies disarrangement; it is therefore preferable when the breaking up of order or discipline is to be suggested (the *disarray* into which society had been thrown by this deplorable affair made their presence in town more necessary than ever—*Wharton*) **Jumble** implies the mixing of incongruous things with resulting confusion (the house they lived in . . . was a heterogeneous architectural *jumble*—*Meredith*) **Clutter** implies confusion and crowding and often suggests a disagreeable or more or less messy state (Lord, what a mess this set is in! If there's one thing I hate above everything else . . . it's *clutter*—*Millay*) **Snarl**, basically applied to a tangle of filaments (as hairs or threads), implies confusion and entanglement and suggests great difficulty in unraveling and ordering (his affairs are in a *snarl*) <held up by a traffic *snarl*) **Muddle** (compare *muddle* at CONFUSE 1) also implies confusion and entanglement, but in addition it suggests the influence of bungling and a more or less hopeless condition (we both grub on in a *muddle*—*Dickens*) <the world's been confused and poor, a thorough

muddle; there's never been a real planned education for people—*H. G. Wells*)

Ana derangement, disarrangement, disorganization, disturbance (see corresponding verbs at DISORDER): *din, babel, pandemonium, hullabaloo: *anarchy, lawlessness

Con ordering or order, systematization, organization (see corresponding verbs at ORDER): system, *method 2 *commotion, agitation, tumult, turmoil, turbulence, convulsion, upheaval

Ana disorder, disorganization, disturbance (see corresponding verbs at DISORDER): perturbation, agitation, disquiet, upset (see corresponding verbs at DISCOMPOSE): discomfiture, embarrassment (see corresponding verbs at EMBARRASS)

confute controvert, refute, *disprove, rebut

congeal *vb* *coagulate, set, curdle, clot, jelly, jell

Ana solidify, *harden: *compact, concentrate, consolidate: cool, chill, freeze (see corresponding adjectives at COLD)

Con melt, *liquefy, deliquesce

congenial *consonant, consistent, compatible, congruous, sympathetic

Ana companionable, cooperative, *social: sociable, genial, cordial, *gracious, affable: pleasing, *pleasant, agreeable

Ant uncongenial: antipathetic (*of persons*): abhorrent (*of tasks, duties*)

congenital inborn, *innate, hereditary, inherited, inbred

Ana *inherent, constitutional, ingrained: *native

Con acquired (see GET): *accidental, adventitious

conglomerate, conglomeration agglomerate, agglomeration, *aggregate, aggregation

Ana mass, heap, pile, stack (see under HEAP *vb*): accumulation, amassment, hoarding or hoard (see corresponding verbs at ACCUMULATE)

congratulate *felicitate

Con console, solace, *comfort: commiserate, condole with, pity (see corresponding nouns at SYMPATHY)

congregate *gather, assemble, collect

Ana swarm, *teem

Ant disperse

congregation assembly, assemblage, gathering, collection (see under GATHER *vb*)

Ana audience, *following, public: *crowd, throng, press, crush

congruous compatible, congenial, *consonant, sympathetic, consistent

Ana harmonizing or harmonious, according or accordant, corresponding or correspondent, agreeing or agreeable (see corresponding verbs at AGREE): seemly, proper (see DECOROUS): meet, appropriate, fitting, *fit

Ant incongruous —**Con** incompatible, uncongenial, *inconsonant, discordant, discrepant

conjectural hypothetical, suppositious, *supposed, supposititious, reputed, putative, purported

Ana presumed, assumed, postulated (see PRESUPPOSE): *theoretical, speculative: alleged (see ADDUCE)

Con proved, demonstrated (see PROVE)

conjecture *vb* **Conjecture, surmise, guess** are comparable as verbs, meaning to draw an inference from slight evidence, and as nouns, denoting an inference based upon such evidence. **Conjecture** implies formation of an opinion or judgment upon what is recognized as insufficient evidence (Washington *conjectured* that at least 300 of the enemy were killed—*Amer. Guide Series: Pa.*) < mysteries which must explain themselves are not worth the loss of time which a *conjecture* about them takes up—*Sterne*) **Surmise** implies still slighter evidence, and exer-

cise of the imagination or indulgence in suspicion (what thoughts he had beseems not me to say, though some surmise he went to fast and pray—*Dryden*) (just how long the small multiplied impressions will take to break into surmise . . . nobody can tell—*Quiller-Couch*) (we are not told what their business was but we may surmise it was the fur trade—*G. F. Hudson*) **Guess** implies a hitting upon or an attempting to hit upon either at random or from insufficient, uncertain, or ambiguous evidence (you would never guess from meeting them that anyone would pay them for their ideas—*Rose Macaulay*) (my daughter Lucie is . . . such a mystery to me; I can make no guess at the state of her heart—*Dickens*)

Ana *infer; gather, conclude, judge, deduce: speculate, reason, *think: imagine, fancy, conceive (see THINK) **Con** ascertain, determine, learn, *discover: *prove, demonstrate, test, try

conjecture *n* surmise, guess (see under CONJECTURE *vb*)

Ana theory, *hypothesis: *opinion, view, belief, sentiment: inference, deduction, conclusion, judgment (see under INFER)

Ant fact

conjoin 1 *join, combine, unite, connect, link, associate, relate

2 combine, *unite, concur, cooperate

conjugal *matrimonial, marital, connubial, nuptial, hymeneal

Ant single

connect *join, link, associate, relate, unite, conjoin, combine

Ana attach, *fasten, affix: articulate, concatenate, *integrate

Ant disconnect —**Con** sever, sunder, divorce, *separate, part, divide: *detach, disengage

connoisseur dilettante, *aesthete

Ana *epicure, gourmet, bon vivant: *expert, adept

Con *amateur, tyro, dabbler

connotation denotation (see under DENOTE)

Ana suggestion, implication, intimation (see corresponding verbs at SUGGEST): evoking or evocation (see corresponding verb at EDUCE): import, signification, *meaning, significance, sense

connote *denote

Ana *suggest, imply, intimate, hint: *express, voice, utter: import, signify, *mean, denote

connubial conjugal, *matrimonial, marital, nuptial, hymeneal

conquer, **defeat**, **vanquish**, **overcome**, **surmount**, **subdue**, **subjugate**, **reduce**, **overthrow**, **rout**, **beat**, **lick** all mean to get the better of or to bring into subjection whether by the exercise of force or of strategy. **Conquer** and **defeat** are perhaps the most general. **Defeat** usually signifies merely the fact of getting the better of or winning against and may imply no more than a temporary checking or frustrating (the enemy were successfully *defeated*) (he *defeated* the older man in the tennis tournament) (a distortion of the news picture which *defeats* the whole purpose to which our system is committed—*Mott*) **Conquer**, however, usually implies a large and significant action (as of a large force in war) or an action involving an all-inclusive effort and a more or less permanent result (Caesar *conquered* most of Gaul) (culture *conquers* more surely than the sword—*A. M. Young*) (science has *conquered* yellow fever—*Amer. Guide Series: La.*) (the 21-year-old Englishman who *conquered* the most dangerous river in the world—*N. Y. Times Book Rev.*) **Vanquish** suggests a significant action of a certain dignity usually in the defeat of a person rather than a thing and usually carrying the suggestion of complete defeat (to

overthrow the enemy solely by his own strength—to *vanquish* him solely by his own effort—*Hearn*) (vanquish an opponent in a championship match at tennis) **Overcome** usually implies an opposing, more or less fixed obstacle to be dealt with and a high degree of effectiveness in dealing therewith whether by direct conflict or perhaps more often by indirect means (as evasion or substitution) (overcome the enemy's shore fortifications) (overcoming difficult legal obstacles—*Americana Annual*) (using the airlift to overcome the blockade—*Collier's Yr. Bk.*) (overcome a speech defect) **Surmount**, like *overcome*, implies an opposing, more or less fixed obstacle but carries the idea of surpassing or exceeding rather than overcoming in face-to-face conflict (the technical problems to be surmounted—*K. F. Mather*) (many petty faults which he is apparently unable to surmount—*New Republic*) (Simon . . . has an inner force that is capable of surmounting conditions—*Malcolm Cowley*) **Subdue**, **subjugate**, and **reduce** all throw emphasis upon the condition of subjection resulting from defeat. **Subdue** signifies to bring under control by or as if by overpowering (in 1803 Commodore Edward Preble *subdued* the Barbary Coast pirates—*Amer. Guide Series: Me.*) (in their last century of conquest they almost succeeded in *subduing* the whole island—*Blanshard*) (all violence or recklessness of feeling has been finally *subdued*—*Cather*) (the wilderness had been almost completely *subdued* by cutting down the forests and building roads and cities) **Subjugate** signifies to bring into and keep in subjection, often as a slave is in subjection (authoritarian reaction which overwhelmed Italy and *subjugated* it for two centuries—*R. A. Hall*) (the heart and imagination *subjugating* the senses and understanding—*Arnold*) **Reduce** signifies surrender and submission but usually of a town or fortress under attack or siege (the town and finally the province were *reduced* by the invaders) **Overthrow** is much like *overcome* but carries the strong idea of disaster to the overthrown (overthrow the established government by violence) (get swiftly through the field of fire and pierce and overthrow the enemy lines—*Wintringham*) (a huge body of evidence . . . completely *overthrows* the older view—*Comfort*) **Rout** always suggests a defeat so complete as to cause flight or the complete dispersion of the opposition (twelve hundred French and a large force of Indians . . . were intercepted . . . and utterly *routed*, only 200 of the French escaping capture or death—*Bingham*) (Weaver with the assistance of two other gunboats *routed* a large force of Texas cavalry when they attacked Fort Butler—*Bolander*) **Beat** and **lick** are characteristic of a less formal style of expression or level of usage than the preceding verbs. Both come close to *defeat* in meaning but distinctively **beat** (see also BEAT 1) is rather neutral in this sense, except that occasionally it may imply the finality though not the scope of *vanquish* (the local ball team won the state championship by *beating* all comers) while **lick** usually implies a complete humbling or reduction to impotency and ineffectiveness of the one defeated (the fighter must be confirmed in the belief that he can *lick* anybody in the world—*Liebling*) (with the problem growing, the railroads have redoubled their efforts to *lick* it—*Faulkner*)

Ana *frustrate, thwart, foil, circumvent, outwit, baffle, balk

Con surrender, submit, capitulate (see corresponding nouns at SURRENDER): *yield, succumb, bow, cave

conqueror vanquisher, *victor, winner, champion

conquest *victory, triumph

Ana subjugation, subdual, defeating or defeat, overthrowing or overthrow, routing or rout (see corresponding verbs

at CONQUER)

conscientious scrupulous, honorable, honest, *upright, just

Ana righteous, virtuous, ethical, *moral: strict, *rigid: particular, fastidious, finicky, *nice: meticulous, punctilious, *careful

Ant unconscientious, unscrupulous —*Con* slack, lax, remiss, *negligent, neglectful: *careless, heedless, thoughtless

conscious sensible, *aware, cognizant, alive, awake

Ana attending or attentive, minding or mindful, watching (see corresponding verbs at TEND): *watchful, alert, vigilant: perceiving, noticing, noting, remarking, observing (see SEE)

Ant unconscious —*Con* ignoring, overlooking, disregarding (see NEGLECT *vb*): *forgetful, unmindful, oblivious

consecrate hallow, dedicate, *devote

Con desecrate, profane (see corresponding nouns at PROFANATION): defile, pollute (see CONTAMINATE)

consecutive, successive, sequent, sequential, serial are comparable when meaning following one after the other in order. *Consecutive* and *successive* apply to objects which follow one another without interruption or break. But *consecutive* is somewhat more emphatic, stressing the immediacy of the succession, the regularity or fixedness of the order, and the close connection (as in time, space, or logic) of the units while *successive* is applicable to things that follow regardless of differences (as in duration, extent, or size) or of the length of the interval between the units; thus, one would speak of nine, ten, and eleven as *consecutive* numbers since they follow one another in immediate and regular order, but of flashing the *successive* numbers three, eleven, and nine on a screen since the order would then be neither immediate nor regular; one would speak of *successive* (not *consecutive*) leap years since the order though regular is not immediate and of *successive* strokes of a piston since, though immediate, it need not be regular <the most important cause . . . has run throughout our post-Conquest history like a *consecutive* thread—*Coulton*> <the product of the *successive* labors of innumerable men—*Mumford*> *Consecutive* is also applicable to a person or to thought that manifests logical sequence <*consecutive* thinking absolutely requires personal initiative—*Eliot*> *Sequent* and *sequential* apply to an arrangement or to things (sometimes a thing) following a sequence (as a causal, logical, or chronological sequence) or some settled order <the events of the narrative do not follow in *sequent* order> <the galleys have sent a dozen *sequent* messengers this very night at one another's heels—*Shak.*> <changes which proceed with *sequential* regularity> <combination of two *sequential* courses into one—*Pressey*> *Serial* implies that the thing or things so qualified form a series or will appear as a series; it therefore suggests likeness or uniformity in the units and, usually, a prearranged order especially in time or space <the fifth of the *serial* concerts> <from the publisher's point of view mystery stories make good *serial* narratives> <wrote her a *serial* account of his adventures—*Krutch*>

Ana following, succeeding, ensuing (see FOLLOW): continual, *continual, incessant: coherent (see corresponding noun COHERENCE): *logical

Ant inconsecutive —*Con* alternate, *intermittent, recurrent, periodic: desultory, *random, haphazard, hit-or-miss

consent *vb* *assent, accede, acquiesce, agree, subscribe

Ana *yield, submit, defer, relent: permit, allow, *let: *approve, sanction: concur (see AGREE)

Ant dissent —*Con* refuse, *decline: *disapprove, deprecate: *demur, balk, stick, strain

consequence 1 result, *effect, upshot, aftereffect, aftermath, sequel, issue, outcome, event

Ant antecedent —*Con* *cause, determinant, reason, occasion: *origin, source, root

2 *importance, moment, weight, significance, import

Ana necessity, *need, exigency: *worth, value: renown, honor, reputation, repute, *fame: eminence, illustriousness (see corresponding adjectives at FAMOUS)

consequently *therefore, hence, then, accordingly, so

conserve *vb* preserve, *save

Ana protect, shield, safeguard, guard, *defend

Ant waste, squander

consider 1 *Consider, study, contemplate, weigh, excogitate* are comparable chiefly as transitive verbs meaning to fix the mind for a time on something in order to increase one's knowledge or understanding of it or to solve a problem involved in it. *Consider* often suggests little more than an applying of one's mind <a proposal so unreasonable that one does not need to *consider* it> but sometimes it also carries such a restricting implication as that of a definite point of view <in the last paragraphs we have *considered* science as a steadily advancing army of ascertained facts—*Inge*> or as that of thinking over <the publishers told him they would *consider* his book> <marriage is an action too freely practiced and too seldom adequately *considered*—*Rose Macaulay*> <in Florida *consider* the flamingo, its color passion but its neck a question—*Warren*> or as that of casting about in order to reach a suitable conclusion, opinion, or decision <when I came to *consider* his conduct, I realized that he was guilty of a confusion—*T. S. Eliot*> *Study* implies greater mental concentration than *consider*; usually it also suggests more care for the details or minutiae and more of an effort to comprehend fully or to learn all the possibilities, applications, variations, or relations <the president said that the bill must be *studied* before he reached a decision regarding the signing or vetoing of it> <a work of architecture that deserves to be *studied* closely> <*study* a patient's reactions to a new treatment> <I like very naturally to think that I am being read; but the idea that I am being *studied* fills me, after the first outburst of laughter, with a deepening gloom—*Huxley*> <Bryce, who had *studied* the matter so thoroughly, was wont to insist it is the smallest democracies which today stand highest in the scale—*Ellis*> *Contemplate* (see also SEE) implies, like *meditate* (see under PONDER), the focusing of one's attention upon a thing and a close dwelling upon it; the term, however, does not always carry a clear implication of the purpose or result. When the object on which the mind rests is a plan, a project, or an imaginative conception, the word usually suggests its formulation in detail or its enjoyment as envisioned <Henchard bent and kissed her cheek. The moment and the act he had *contemplated* for weeks with a thrill of pleasure—*Hardy*> <the poet "has an idea," and in the course of *contemplating* it he draws up from his subconscious a string of associated ideas and images—*Day Lewis*> When the object contemplated lies outside the mind and has either material or immaterial existence, the term suggests an attempt to increase one's knowledge and comprehension of it through minute scrutiny and meditation <nature is beautiful only to the mind which is prepared to apprehend her beauty, to *contemplate* her for her own sake apart from the practical delight she brings—*Alexander*> <the opinion . . . widely held, that while science, by a deliberate abstraction, *contemplates* a world of facts without values, religion contemplates values apart from facts—*Inge*> *Weigh* (compare PONDER) implies evaluation of something and especially of one thing in respect to another and relevant thing or things; it suggests an attempt to get at

the truth by a balancing (as of counterclaims, contradictory data, or conflicting evidence) <in teaching the young to think hard, any subject will answer. The problem is to get them to weigh evidence, draw accurate inferences . . . and form judgments—*Eliot*> <it is not enough to count, we must evaluate; observations are not to be numbered, they are to be weighed—*Ellis*> **Excogitate** is often replaced by *think out* and implies the application of the mind to something so that one may find the solution of the problems involved <*excogitate* a plan whereby poverty may be relieved without unduly burdening the taxpayers> <there may have been a time when the scientific inquirer sat still in his chair to *excogitate* science—*Dewey*>

Ana *ponder, meditate, ruminate, muse: reflect, cogitate, *think, reason, speculate: inspect, examine, *scrutinize, scan

Con ignore, *neglect, overlook, disregard, slight

2 Consider, regard, account, reckon, deem denote to hold the view or opinion that someone or something is in fact as described or designated. They are often used interchangeably, but there are shadings of meaning that allow them to be discriminated. **Consider** suggests a conclusion reached through reflection <he *considers* exercise a waste of energy> <it seems, however, best to *consider* as literature only works in which the aesthetic function is dominant—*René Wellek & Austin Warren*> **Regard** may retain its primary implication of looking upon. Sometimes it suggests a judgment based on appearances <I was . . . plainly *regarded* as a possible purchaser—*L. P. Smith*> Often it implies a point of view, sometimes merely personal, sometimes partisan <the regulations of the state were not *regarded* by the Greeks—as they are apt to be by modern men—as so many vexatious, if necessary, restraints on individual liberty—*Dickinson*> <a church . . . which *regarded* all dissentients as rebels and traitors—*Inge*> **Account** and **reckon** to some extent retain their basic implications of counting or calculating, and in comparison with the other terms they stress such value-related factors as evaluation and differentiation <these trees were not *reckoned* of much value> <another field where the dominance of the method of sociology may be *reckoned* as assured—*Cardozo*> <I *account* the justice which is grounded on utility to be the . . . most sacred and binding part of all morality—*J. S. Mill*> **Deem** is somewhat literary. It is often used as the equivalent of *consider*, but it distinctively stresses judgment rather than reflection <behind the economic problem lies a psychological or ethical problem, that of getting persons to recognize truths which they *deem* it to their interest to avoid—*Hobson*> <the first time he made a helmet, he tested its capacity for resisting blows, and battered it out of shape; next time he did not test it, but *deemed* it to be a very good helmet—*Russell*> <investigation of all the facts which it *deems* relevant—*Truman*>

Ana *think, conceive, imagine, fancy: judge, gather, *infer, conclude

considerate *thoughtful, attentive

Ana kindly, *kind: *tender, sympathetic, warmhearted, compassionate: obliging, complaisant, *amiable

Ant inconsiderate —**Con** *forgetful, unmindful, oblivious: *careless, heedless, thoughtless

considered *deliberate, premeditated, advised, designed, studied

Ana intentional, *voluntary, willful: planned, projected, schemed (see corresponding verbs under **PLAN** *n*)

Ant unconsidered —**Con** *precipitate, impetuous, headlong: impulsive, *spontaneous, instinctive

consign *commit, entrust, confide, relegate

Ana transfer, *move, remove, shift: assign, allocate,

*allot: resign, surrender, yield (see **RELINQUISH**)

consistent congruous, *consonant, compatible, congenial, sympathetic

Ana conforming or conformable, tallying, jibing, squaring (see corresponding verbs at **AGREE**): matching, equaling (see **MATCH** *vb*): identical, alike, similar, *like

Ant inconsistent —**Con** discrepant, discordant, incongruous, *inconsonant, incompatible: contradictory, contrary, *opposite, antithetical

console *vb* *comfort, solace

Ana assuage, alleviate, mitigate, *relieve, allay: calm, tranquilize (see corresponding adjectives at **CALM**): *satisfy, content

Con *trouble, distress: *discompose, disturb, perturb, agitate, upset, disquiet

consolidate *compact, unify, concentrate

Ana *integrate, articulate, concatenate: amalgamate, merge, fuse, blend (see **MIX**): condense, compress (see **CONTRACT** *vb*): *weave, knit

Con melt, *liquefy: *separate, sever, sunder, part: *distribute, dispense, divide: dissipate, *scatter, disperse

consolidation, merger, amalgamation are comparable when denoting a union of two or more business corporations.

Consolidation is often used as a general term; more precisely it implies a unification of the companies or corporations with dissolution of their separate corporate identities and transference of their combined assets, franchises, and goodwill to a single new corporate unit, often under an entirely new name. **Merger** usually implies a unification in which one or more companies or corporations are absorbed by another and the assets (as property, franchises, and goodwill) of the former are transferred to or merged into the latter whose corporate status and name remain unchanged. In a merger additional shares of stock may be issued by the absorbing company or corporation to replace on an agreed basis the shares of the units absorbed or a monetary transaction may be involved. **Amalgamation** is often used interchangeably with *consolidation* in its general sense and applied to any form of consolidation or merger. It is sometimes restricted to a consolidation in which a new corporation with an entirely new name and corporate identity results or, in British use, to a union of the merger type.

Ant dissolution

consonance *harmony, concord, accord

Ana agreement, conformity, correspondence (see corresponding verbs at **AGREE**): concurrence, coincidence (see corresponding verbs at **AGREE**): compatibility, congruity (see corresponding adjectives at **CONSONANT**)

Ant dissonance (*in music*): discord —**Con** inconsonance, discordance, incompatibility, incongruity, discrepancy (see corresponding adjectives at **INCONSONANT**)

consonant *adj* **Consonant, consistent, compatible, congruous, congenial, sympathetic** are comparable when they mean being in agreement one with another or agreeable one to the other. **Consonant** implies agreement with a concurrent circumstance or situation, or conformity to an accepted standard, or harmony between two things that must come into contact or comparison with each other; the term suggests absence of discord <Fijians possessed a physical endurance *consonant* with their great stature—*Heiser*> <it is . . . more *consonant* with the Puritan temper to abolish a practice than to elevate it and clear away abuses—*Quiller-Couch*> <to pursue callings more *consonant* with Buddha's teaching—*Binyon*> <nature has no ends *consonant* with . . . the desires of man which would make it possible for him to accord himself to her—*Krutch*> **Consistent** suggests such agreement or harmony between things or between the details of the same thing as implies

the absence or avoidance of contradiction <that their letters should be as kind as was *consistent* with proper maidenly pride—*De Quincey*> <did not think it to be *consistent* with his dignity to answer this sally—*Trollope*> <no one has yet imagined a *consistent* picture of what the electron and proton really are—*Jeans*> **Compatible** implies a capacity for existing or coming together without disagreement, discord, or disharmony; the term does not necessarily suggest positive agreement or harmony, but it does imply the absence of such conflict between two or more things as would make their association or combination impossible or incongruous <with all the eagerness *compatible* with . . . elegance, Sir Walter and his two ladies stepped forward to meet her—*Austen*> <to combine, in the highest measure in which they are *compatible*, the two elements of refinement and manliness—*Froude*> <many bad qualities are of course *compatible* with vitality—for example, those of a healthy tiger. And many of the best qualities are *compatible* with its absence—*Russell*> **Congruous** implies more positive agreement or harmony than *compatible* does; ordinarily it implies the fitness, suitability, or appropriateness of one thing to another so that their association or combination, no matter how much they are in contrast, produces a pleasing or at least a not disagreeable impression <*congruous* furnishings of a room> <not *congruous* to the nature of epic poetry—*Blair*> <thoughts *congruous* to the nature of their subject—*Cowper*> The negative form *incongruous* is currently far more common than *congruous*. **Congenial** is most often used of persons or things that are in such harmony with the taste of a person that they afford him pleasure or delight or satisfaction <a *congenial* companion> <a pair of not very *congenial* passengers—*Conrad*> <the reticence and understatement of the method made it specially *congenial* [to the Chinese]—*Binyon*> <[Hobbes's] theory of government is *congenial* to that type of person who is conservative from prudence but revolutionary in his dreams—*T. S. Eliot*> <the ideal of a Greek democracy was vastly *congenial* to his aristocratic temperament—*Parrington*> Occasionally *congenial* is used of things in the sense of wholly and satisfyingly congruous <all such introduced ideas are *congenial* to the subject—*Alexander*> <statement, overstatement, and understatement in letters given a *congenial* context, every one of them is right—*Montague*> **Sympathetic** (see also TENDER), like *congenial*, usually suggests qualities in the person or thing so described that make him or it in agreement with another person's likings or tastes, but, in contrast with *congenial*, it suggests a more subtle appeal and often a less hearty acceptance <every author who is *sympathetic* to them—*Bradley*> <Arnold does still hold us. . . . To my generation . . . he was a more *sympathetic* prose writer than Carlyle or Ruskin—*T. S. Eliot*> <a tête-à-tête with a man of similar tastes, who is just and yet *sympathetic*, critical yet appreciative—*Benson*> **Ana** conforming or conformable, harmonizing or harmonious, agreeing or agreeable, according or accordant (see corresponding verbs at AGREE); concurring or concurrent, coinciding or coincident (see corresponding verbs at AGREE)
Ant in consonant: dissonant (*in music*) —**Con** discordant, discrepant, inconsistent, incompatible, incongruous (see INCONSONANT)

conspicuous synopsis, epitome, *abridgment, abstract, brief
Ana *compendium, syllabus, digest, survey, sketch, précis, aperçu

conspicuous prominent, salient, signal, *noticeable, remarkable, striking, arresting, outstanding

Ana patent, manifest, *evident, distinct, obvious: eminent, celebrated, illustrious (see FAMOUS)
Ant inconspicuous —**Con** *common, ordinary: *obscure, vague: lowly, *humble, modest: hidden, concealed (see HIDE): *secret, covert

conspiracy cabal, intrigue, machination, *plot
Ana *sedition, treason: treacherousness or treachery, perfidiousness or perfidy, disloyalty, faithlessness, falseness or falsity (see corresponding adjectives at FAITHLESS)
conspirator *confederate, accessory, accomplice, abettor

constant *adj* 1 *faithful, true, loyal, staunch, steadfast, resolute
Ana abiding, enduring, persisting or persistent, lasting (see corresponding verbs at CONTINUE): dependable, trustworthy, *reliable, trusty, tried
Ant inconstant, fickle —**Con** unstable, capricious, mercurial (see INCONSTANT): disloyal, *faithless, false, perfidious

2 *steady, uniform, even, equable
Ana established, settled, set, fixed (see SET *vb*): invariable, immutable, unchangeable (see affirmative adjectives at CHANGEABLE): *regular, normal, typical, natural
Ant variable —**Con** *changeable, changeful, mutable, protean: fluctuating, wavering (see SWING)

3 *continual, incessant, unremitting, continuous, perpetual, perennial
Ana persisting or persistent, persevering (see corresponding verbs at PERSEVERE): pertinacious, dogged, *obstinate, stubborn: chronic, confirmed, *inveterate
Ant fitful —**Con** *intermittent, alternate: spasmodic (see FITFUL): occasional, sporadic, *infrequent

consternation panic, terror, alarm, fright, *fear, dread, dismay, horror, trepidation
Ana confusion, muddlement or muddle (see corresponding verbs at CONFUSE): bewilderment, distraction, perplexity (see corresponding verbs at PUZZLE): agitation, perturbation (see corresponding verbs at DISCOMPOSE)
Con sangfroid, composure, *equanimity, phlegm: aplomb, self-possession (see CONFIDENCE)

constituent *n* component, *element, ingredient, factor
Ana *part, portion, piece, detail, member: *item, particular
Ant whole, aggregate —**Con** *system, complex, organism, economy: composite, compound, blend, amalgam (see MIXTURE)

constitution *physique, build, habit
Ana temperament, temper, personality (see DISPOSITION): organism, *system: *structure, framework, anatomy

constitutional *adj* *inherent, intrinsic, essential, ingrained
Ana congenial, *innate, inborn: *native: natural, normal (see REGULAR): *characteristic, individual, peculiar
Ant adventitious —**Con** *accidental, adventitious, fortuitous: unnatural, *irregular, anomalous: foreign, alien, extraneous, *extrinsic

constrain oblige, coerce, compel, *force
Ana impel, drive, *move, actuate: require, exact, *demand

constraint compulsion, coercion, duress, restraint, *force, violence
Ana suppression, repression (see corresponding verbs at SUPPRESS): impelling or impulsion, driving or drive (see corresponding verbs at MOVE): goad, spur, *motive, spring: *obligation, duty

constrict compress, *contract, shrink, condense, deflate
Ana *tie, bind: restrict, confine, circumscribe, *limit: *restrain, curb
Con *expand, dilate, distend, swell, inflate: enlarge, *increase

construct *build, erect, frame, raise, rear

Ana fabricate, manufacture, fashion, *make: produce, turn out, yield (see BEAR)

Ant demolish: analyze —*Con* *destroy, raze: *ruin, wreck

constructive *implicit, virtual

Ana inferential, ratiocinative (see under INFERENCE): implied, involved (see INCLUDE)

Ant manifest —*Con* express, *explicit, definite: *evident, patent, obvious

construe *vb* explicate, elucidate, interpret, expound, *explain

Ana *analyze, resolve, break down, dissect: *understand, comprehend, appreciate

consult *confer, advise, parley, commune, treat, negotiate

Ana *discuss, debate: deliberate, cogitate (see THINK): counsel, advise (see under ADVICE)

consume 1 *waste, squander, dissipate, fritter

Ana exhaust, *deplete, drain: dispel, disperse, *scatter

Con *save, preserve, conserve

2 *eat, swallow, ingest, devour

3 engross, absorb, *monopolize

consummate *adj* Consummate, finished, accomplished are

comparable when meaning brought to completion or perfection. Their distinctions lie chiefly in the degree of perfection, in the means by which this perfection is attained, and, at times, in their application; *consummate* and *finished* apply to persons or to things; *accomplished*, as a rule, to persons only. Something is *consummate* which attains the highest possible point or degree of perfection or which possesses the highest possible qualities, whether natural or acquired (<*consummate* skill> <*consummate* happiness> <a *consummate* hypocrite> <the little band held the post with *consummate* tenacity—*Motley*> <a man of perfect and *consummate* virtue—*Addison*> <Pope . . . is . . . one of the most *consummate* craftsmen who ever dealt in words—*Loves*> <Something which is *finished* (see also *finish* at CLOSE *vb* 2) manifests such care and exquisiteness in performance or workmanship that nothing additional is required to perfect it or to increase its technical excellence <a *finished* gentleman is always courteous> <*finished* actors usually give *finished* performances> <he's the most *finished* blackmailer in America—*Donn Byrne*> <written with the *finished* workmanship which always delights us—*Edward Sackville-West*> <One is *accomplished* who is distinguished for his skill, his versatility, and his finesse; the word often suggests mastery in whatever is attempted <an *accomplished* musician> <an *accomplished* villain> <they . . . are more *accomplished* and ingenious in this sort of rationalizing than Arnold was—*T. S. Eliot*> <*Accomplished* sometimes implies merely the acquirement of social arts and graces or accomplishments <*accomplished* young ladies>

Ana *perfect, whole, entire, intact: complete, *full: flawless, *impeccable, faultless: *supreme, superlative, transcendent, peerless, surpassing

Ant crude —*Con* rough, *rude, callow, green, raw, uncouth: primitive, primeval (see PRIMARY): defective, *deficient

contact *n* **Contact, touch** mean the state or fact of coming into direct connection or close association with someone or something. **Contact** implies the mutual relation between two bodies that impinge upon each other <the tangent at its point of *contact* with the circle> <the two boats are coming into *contact*> <break the *contact* in an electric circuit> **Touch** primarily implies the action involved when a tactile organ, especially of a human being, comes in contact with someone or something or the sensation involved when one feels through a tactile organ the presence of another person or object <one *touch* of the snake was

enough to make her scream> <ruffian! let go that rude uncivil *touch*—*Shak.*> <but O for the *touch* of a vanished hand—*Tennyson*> Although these two words are often interchangeable in general use, *contact* may be preferable when the intent is to stress a connection or association whether between bodies, between persons, or between persons and things and the sensation or emotional response is not emphasized, or when an impersonal or unexplicit word without clearly defined connotations is wanted <the New York firm established business *contacts* in Australia> <an adult with whom a child is in constant *contact* may easily become . . . dominant in the child's life—*Russell*> <it was her first *contact* with the nether side of the smooth social surface—*Wharton*> <his mind turned away from the hunger for human *contact*—*Anderson*> On the other hand *touch* is usually preferable when the idea of the sensation or of the emotion involved is more important than the abstract or literal idea of coming into contact or when lightness or delicacy is to be implied <the whole secret . . . lay in the development of the sense of *touch* in the feet, which comes with years of night rambling in little-trodden spots—*Hardy*> <she felt his nearness intimately, like a *touch*—*Conrad*> <lost *touch* with all his old friends>

Ana impingement, *impact: connection, association, relation (see corresponding verbs at JOIN): union, *unity: closeness, nearness (see corresponding adjectives at CLOSE)

Con separation, division, severance (see corresponding verbs at SEPARATE): *breach, split, rupture, rift

contagious *infectious, communicable, catching

Ana toxic, pestilential, pestilent, virulent, mephitic, miasmatic (see POISONOUS)

contain, hold, accommodate denote to have or be capable of having within. To **contain** is to have within or to have as an element, fraction, or part; to **hold** is to have the capacity to contain or to retain; thus, a bookcase that *holds* (is capable of containing) one hundred volumes may *contain* (actually have in it) only fifty; a bushel *contains* (not *holds*) four pecks but a bushel basket *holds* (not *contains*) four pecks of potatoes <these boxes *contain* apples> <his philosophy *contains* some elements of truth> <of Plato himself we know nothing . . . that could not be *held* in a single sentence—*Ellis*> But the distinction between *hold* and *contain* is often inconsiderable or disregarded. To **accommodate** (see also OBLIGE 2) is to hold without crowding and inconvenience <thirty passengers were crowded into a bus built to *accommodate* twenty> <the parking lot *accommodates* fifty cars> <the earth can *accommodate* its present population more comfortably than it does or ever did—*Shaw*> <the hotel was unable to *accommodate* all who applied for rooms>

Ana *receive, admit, take: *harbor, shelter, lodge, house

contaminate, taint, attain, pollute, defile mean to debase by making impure or unclean. **Contaminate** implies the presence or the influence of something external which by entering into or by coming in contact with a thing destroys or may destroy the latter's purity <the city's water supply was in danger of being *contaminated* by surface drainage> <refused to allow her children to play with other children for fear their manners and morals might be *contaminated*> <air *contaminated* by noxious gases> <dispersing from the sky vast quantities of radioactive dust particles . . . *contaminating* entire cities—*Cousins*> **Taint** differs from *contaminate* in stressing the effect rather than the cause; something *contaminated* has been touched by or mixed with what will debase or corrupt; whatever is *tainted* is no longer pure, clean, unspoiled, or wholesome but is in some measure or degree sullied

or stained or in process of corruption or decay <*tainted* meat> <his unkindness may defeat my life, but never *taint* my love—*Shak.*> <the Claudii, brilliant, unaccountable, *tainted* with some deep congenital madness—*Buchan*> <directed toward the purge from the public service rolls of those *tainted* with fascism—*Taylor Cole*> The less common *attaint* may be closely synonymous with *taint* <our writers have been *attainted* by the disease they must help to cure—*Frank*> More often it retains a hint of its primary meaning of to sentence to outlawry or death and then suggests a sullyng (as of one's name) or a degrading especially as a result of actual or reputed misconduct <wherein a good name hath been wrongfully *attainted*—*Milton*> <no breath of calumny ever *attainted* the personal purity of Savonarola—*Milman*> *Pollute* implies that the process which begins with contamination is complete and manifest and that what was pure and clean has lost its clearness or fairness and has become muddy or filthy or poisoned <the nuisance set forth in the bill was one which would be of international importance—a visible change of a great river from a pure stream into a *polluted* and poisoned ditch—*Justice Holmes*> *Pollute* is especially apt when the reference is to something that ideally is clean, clear, or bright <*pollute* the minds of children by obscenities> <you . . . are *polluted* with your lusts—*Shak.*> *Defile* strongly implies befouling of something which ought to be kept clean and pure or held sacred. It usually suggests violation, profanation, or desecration and is highly opprobrious in its connotations <an evil bird that *defiles* his own nest—*Latimer*> <scenes such as these, 'tis his supreme delight to fill with riot, and *defile* with blood—*Cowper*> <cruelty is not only the worst accusation that can be brought against a man, *defiling* the whole character—*Belloc*>

Ana *debase, vitiate, corrupt, deprave: impair, spoil, *injure, harm

contemn *despise, disdain, scorn, scout

Ana repudiate, reject (see DECLINE): slight, *neglect, disregard; flout, *scoff, jeer

Con venerate, *revere, reverence: respect, esteem, admire, regard (see under REGARD n)

contemplate 1 study, *consider, weigh, excogitate

Ana *ponder, meditate, muse, ruminate: reflect, cogitate, speculate, *think

2 observe, survey, notice, remark, note, perceive, discern, *see, view, behold, descry, espy

Ana *scrutinize, inspect, examine, scan

contemplative meditative, reflective, *thoughtful, speculative, pensive

Ana *intent, rapt, engrossed, absorbed: musing, ruminating, pondering (see PONDER): reflecting, cogitating, reasoning, thinking (see THINK)

contemporaneous *contemporary, coeval, coetaneous, synchronous, simultaneous, coincident, concomitant, concurrent

Con *preceding, antecedent, previous, prior, foregoing: following, ensuing, succeeding (see FOLLOW)

contemporary *adj* Contemporary, contemporaneous, coeval, coetaneous, synchronous, simultaneous, coincident, concomitant, concurrent are comparable when they mean existing, living, or occurring at the same time. In **contemporary** and **contemporaneous** (of which *contemporary* is applied somewhat more frequently to persons, *contemporaneous* to events), the time regarding which agreement is implied is determined only through the context <Shakespeare was *contemporary* with Cervantes, who died in the same month> <Shelley's last year was *contemporaneous* with Matthew Arnold's first> <the reign of Louis XIV was *contemporaneous* with the Commonwealth in

England and also with the Restoration and the revolution of 1688> <a recent history of the 15th century based on *contemporary* accounts> <love of school is not *contemporaneous* with residence therein; it is an after product—*Grandgent*> *Contemporary*, but not *contemporaneous*, may imply reference to the present; it then means of the same time as that of the speaker or writer <we are not without *contemporary* talent—*Wharton*> <most *contemporary* novels Jane found very bad—*Rose Macaulay*> *Coeval* usually implies contemporaneousness for a long time or at a remote time <everyone knows that the Roman Catholic religion is at least *coeval* with most of the governments where it prevails—*Burke*> <the theory requires that these *coeval* stars should be of nearly the same mass and brightness—*Eddington*> *Coetaneous* is a close synonym of *coeval*, but it may more specifically suggest contemporaneity of origin <the maturation of Veblen's thought led him to note two forces . . . whose *coetaneous* presence acted first in the promotion of reason and then in its derangement—*Rosenberg*> <ancient and *coetaneous* mountain ranges> *Synchronous* implies an exact correspondence between the usually brief periods of time involved; *simultaneous* more frequently denotes agreement in the same point or instant of time <two pendulums so adjusted that their movements are *synchronous*> <the two shots were *simultaneous*> <French speech has run a similar and almost *synchronous* course with English—*Ellis*> <it was proposed that there should be *simultaneous* insurrections in London . . . and at Newcastle—*Macaulay*> *Coincident* applies to events that are regarded as falling or happening at the same time; it ordinarily minimizes the notion of causal relation <the discovery of America was almost *coincident* with the capture of Granada> <the growth of the mine union movement was *coincident* with the growth of business and manufacturing—*Hay*> *Concomitant* carries so strong an implication of attendance or association that it often imputes a subordinate character; however, only when it implies coincidence or synchronosness is it truly a synonym of the other words <the *concomitant* circumstances of this event cannot be ignored> <as the beauty of the body always accompanies the health of it, so certainly is decency *concomitant* to virtue—*Spectator*> *Concurrent* adds to *synchronous* the implication of parallelism or agreement (as in length of existence or in quality or character) <*concurrent* terms in prison> <the *concurrent* operation of many machines> <great cultural achievements have not been inevitably, or even generally, *concurrent* with great material power—*Bryson*>

Ana living, existing, subsisting (see BE)

Con see those at CONTEMPORANEOUS

contempt despite, disdain, scorn (see under DESPISE *vb*)

Ana abhorrence, detestation, loathing, hatred, hate (see under HATE *vb*): aversion, *antipathy: repugnance, distaste (see corresponding adjectives at REPUGNANT)

Ant respect —*Con* esteem, admiration, *regard: *reverence, awe, fear

contemptible *adj* **Contemptible**, **despicable**, **pitiable**, **sorry**, **scurvy**, **cheap**, **beggarly**, **shabby** are comparable when they mean arousing or deserving scorn or disdain. **Contemptible** applies to whatever inspires such scorn or disdain for any reason however great or small <with that property he will never be a *contemptible* man—*Austen*> <the one disgraceful, unpardonable, and to all time *contemptible* action of my life was to allow myself to appeal to society for help and protection—*Wilde*> **Despicable** is a stronger term and frequently implies both keen and scornful, sometimes indignant, disapprobation and a sufficient cause for such a reaction <the immorality of James's Court was hardly

more *despicable* than the imbecility of his government—*J. R. Green*) (even excellent science could and did often make *despicable* morality—*Gauss*) **Pitiable** (see also PITIFUL) implies the inspiring of pity mixed with contempt (a *pitiable* show of weakness) (a *pitiable* attempt at reform) (the resorting to epithets . . . is a *pitiable* display of intellectual impotence—*Cohen*) **Sorry** is often used interchangeably with *pitiable* without marked loss, but it often distinctively implies contemptible or ridiculous inadequacy, wretchedness, or sordidness (sorry accommodations for the travelers) (mounted . . . upon a lean, *sorry*, jackass of a horse—*Sterne*) **Scurvy** implies extreme despicability and meanness and the arousing of disgust as well as scornful contempt (a *scurvy* trick) (a *scurvy* impostor) (what difference betwixt this Rome and ours . . . between that *scurvy* dumbshow and this pageant sheen . . . ?—*Browning*) **Cheap** often implies contemptibility that results from undue familiarity or accessibility (had I so lavish of my presence been . . . so stale and *cheap* to vulgar company—*Shak.*) More often, however, *cheap* and **beggarly** imply contemptible pettiness, *cheap* by falling far below the standard of what is worthy, *beggarly* by its remoteness from what is adequate (cheap politics) (a *cheap* and nasty life—*Shaw*) (about his shelves a *beggarly* account of empty boxes—*Shak.*) (the South in 1800 was a land of contrasts, of opulence and squalor . . . fine mansions, *beggarly* taverns—*Brooks*) **Shabby** comes close to *cheap* and *beggarly* in implying contemptible pettiness and to *scurvy* in implying meanness and the arousing of disgust; distinctively it may stress the poverty, the paltriness, or the ungenerous nature of what is so characterized (the *shabby* way in which this country . . . treated a poet so deeply devoted to it—*Engle*) (the explorer's mistress shows up with the *shabby* truth of the man's life—*Hewes*)

Ana detestable, abominable, abhorrent, odious, *hateful; vile, low, *base; abject, *mean, sordid, ignoble
Ant admirable, estimable; formidable —**Con** *splendid, sublime, glorious, superb

contend 1 **Contend, fight, battle, war** come into comparison when they mean to strive in opposition to someone or something. **Contend**, the most general of these words, always implies a desire or an effort to overcome that which is opposed, but it may imply rivalry rather than animosity, the use of argument rather than the exercise of physical strength or skill or the employment of weapons, a nonhuman rather than a human antagonist (the river was stronger than I, and my arms could not for many hours *contend* with the Thames—*Jefferies*) (since they had left the Española country behind them, they had *contended* first with wind and sandstorms, and now with cold—*Cather*) (the Manichean theory of a good and an evil spirit *contending* on nearly equal terms in the arena—*Inge*) **Fight** in its earliest and still most common sense implies a struggle involving physical strength or prowess, originally between men with the fists or with weapons and later also between animals (fight, gentlemen of England! *fight*, bold yeomen!—*Shak.*) (fight fiercely, Harvard—*Lehrer*) (a dog that will *fight* other dogs larger than himself) In extended use (see also RESIST) *fight* differs from *contend* not so much in its range of application, for both may imply other than a human adversary, as in its stress on a rigorous effort to achieve one's ends, and in its suggestion of a struggle against odds or great difficulties (fight for the defeat of a bill) (fight for breath) (fight against a growing evil) (he had *fought* like a demon every inch of the way against poverty and discouragement—*Long*) **Battle** and **war** are more picturesque or more poetic terms than *fight*; they are used

chiefly in an extended sense, the first to suggest a continuous assailing or attacking of the enemy or other method characteristic of open battle, and the second to suggest the noise, fury, or tumult of war (he found he must *battle* his way to success) (sometimes a patriot, active in debate, mix with the world, and *battle* for the state—*Pope*) (he *Wars* with darkling powers (I *war* with a darkling sea)—*Kipling*)

Ana quarrel, wrangle, altercation, squabble (see under QUARREL *n*): *resist, combat, withstand, oppose, fight: compete, vie, *rival

2 *compete, contest

Ana battle, war (see CONTEND): oppose, *resist, withstand, combat, fight

contest, contended satisfied (see under SATISFY)

Ana gratified, pleased (see PLEASE): sated, satiated, cloyed, surfeited (see SATIATE): replete (see FULL)

contest *vb* *satisfy

Ana gratify, *please: sate, *satiare, surfeit, cloy

Con tantalize, tease (see WORRY): pique, stimulate, *provoke, excite

contention dissension, difference, variance, strife, *discord, conflict

Ana *quarrel, wrangle, altercation, squabble: controversy, dispute, *argument: contending, fighting, warring (see CONTEND)

Con agreement, concurrence, coincidence (see corresponding verbs at AGREE): *harmony, accord, concord, consonance

contentious quarrelsome, bellicose, *belligerent, pugna-cious, combative

Ana *contrary, perverse, froward: captious, faultfinding, caviling, carping (see CRITICAL): *aggressive, militant

Ant peaceable —**Con** *pacific, peaceful, irenic: serene, tranquil, *calm: *amiable, good-natured, complaisant, obliging

contermious contiguous, abutting, adjoining, *adjacent, tangent, juxtaposed

contest *vb* 1 *compete, contend

Ana struggle, strive, endeavor (see ATTEMPT): fight, battle (see CONTEND)

2 *resist, withstand, oppose, fight, combat, conflict, antagonize

contest *n* **Contest, conflict, combat, fight, affray, fray** denote a battle between opposing forces for supremacy, for power, or for possessions. **Contest** is the broadest term; originally it referred solely to strife in argument but it is now applicable to any struggle, whether friendly or hostile, for a common object that involves a test of ability, strength, endurance, or strategic skill (a swimming *contest*) (a *contest* of wits) (what mighty *contests* rise from trivial things—*Pope*) (boundary controversies or other *contests* between states—*Frankfurter*) **Conflict** implies discord and warfare; it also suggests a closer engagement than *contest* (arms on armor clashing brayed . . . dire was the noise of *conflict*—*Milton*) **Conflict** may be extended to denote a struggle (often spiritual or mental) between opposing or contradictory principles or forces (there is [in a Shakespearean tragedy] an outward *conflict* of persons and groups, there is also a *conflict* of forces in the hero's soul—*Bradley*) **Combat** is less commonly used in an extended sense (a *combat* against despair) It implies an encounter, especially an armed encounter, between two (individuals, parties, or forces), frequently for the determination of a dispute (let these have a day appointed them for a single *combat* in convenient place—*Shak.*) (these progressive leaders in both parties rose only after bitter struggle. They were the product of more than a lively *contest*. Sometimes the

contests were *combats*—*White*) **Fight** usually implies a hand-to-hand conflict and therefore emphasizes the individual participants. It ranges in dignity from a spiritual struggle (fight the good *fight* of faith—*1 Tim 6:12*) to actual blows with fists or weapons (a prizefight) **Affray** commonly refers to a tumultuous disturbance (as a street fight between mobs or factions) that inspires terror. Legally an affray is a fight that disturbs the public peace; in literary use the word is often applied to an unseemly or acrimonious dispute (the suppressing of riots and *affrays*—*Burke*) (days of European crises, diplomatic *affrays*, hecatombic accidents—*Montague*) (some bloody *affray* between scholars—*Quiller-Couch*) **Fray** is usually either a literary term, often with more dignified connotations than *affray* of which it is otherwise a very close synonym, or it is a poetic or hyperbolic substitute for *battle*, *contest*, or *game* (“Where are the vile beginners of this *fray*?” “O noble prince, I can discover all the unlucky manage of this fatal brawl”—*Shak.*)

Ana *encounter, skirmish, brush; competition, emulation, rivalry (see corresponding verbs at RIVAL); *battle, engagement, action

contiguous adjoining, abutting, conterminous, *adjacent, tangent, juxtaposed

Ana *nearest, next; *close, near, nigh, nearby

contenance *temperance, abstemiousness, sobriety, abstinence

Ana chasteness or chastity, purity (see corresponding adjectives at CHASTE); moderateness or moderation, temperateness (see corresponding adjectives at MODERATE)

Ant incontinence —**Con** lecherousness, lustfulness, lewdness, lasciviousness, licentiousness, wantonness (see corresponding adjectives at LICENTIOUS); excessiveness, inordinateness (see corresponding adjectives at EXCESSIVE)

continent *adj* temperate, unimpassioned, *sober

Ana restrained, bridled, curbed, inhibited (see RESTRAIN); decent, *chaste, pure: self-denying, self-abnegating (see corresponding nouns under RENUNCIATION)

Ant incontinent

contingency emergency, exigency, pinch, *juncture, pass, strait, crisis

Ana chance, break, *opportunity, occasion, time

contingent 1 *accidental, fortuitous, casual, incidental, adventitious

Ana possible, *probable, likely; unforeseen or unforeseeable, unanticipated (see affirmative verbs at FORESEE)

Con inevitable, necessary, *certain

2 conditional, *dependent, relative

Ana subject, *liable, open, exposed

Con absolute, *ultimate, categorical

continual, **continuous**, **constant**, **incessant**, **unremitting**, **perpetual**, **perennial** are comparable when meaning characterized by continued occurrence or recurrence over a relatively long period of time. **Continual** implies a close or unceasing succession or recurrence; **continuous**, an uninterrupted continuity or union (as of objects, events, or parts) (ensure a *continual* supply of provisions at regular intervals) (continual and regular impulses of pleasurable surprise from the metrical arrangement—*Wordsworth*) (analytic studies are *continuous*, and not to be pursued by fits and starts, or fragmentary efforts—*De Quincey*) (the *continual* suggestion of the landscape . . . entering . . . into the texture of *continuous* intelligent narration—*Stevenson*) As applied to a single object, *continual* also stresses frequently the idea of going on indefinitely, though not without interruptions, in time rather than (like *continuous*) that of unbroken connection or substance; thus, *continual* industry implies that one is always at it; *continuous* labor, that the work itself is per-

formed at a stretch (he that is of a merry heart hath a *continual* feast—*Prov 15:15*) (that dull and *continuous* burden of the sea heard inland before or after a great storm—*J. R. Lowell*) **Continuous** refers to both time and space, *continual* only to time; thus, one may speak of a *continuous* (not *continual*) expanse, but of a *continual* (or *continuous*) noise (humanism has been sporadic, but Christianity *continuous*—*T. S. Eliot*) **Constant** implies uniform, steady, or persistent occurrence or recurrence and usually connotes lack of change or variation (as in character, degree, or rate (constant throbbing of the engine) (such a career meant *constant* toil—*Buchan*) (unfortunately, perhaps, experience does not grow at a *constant*, but at an accelerated, rate—*Krutch*) **Incessant** implies ceaseless or uninterrupted activity; **unremitting**, unceasing activity without slackening or halting; and **perpetual** (see also LASTING), unfailing repetition or lasting duration (an *incessant* cough) (a life of *unremitting* toil) (perpetual colds) (sporadic outbursts are converted by the rationalization into purposive and *unremitting* activity—*Huxley*) (the *perpetual* fuel of controversy—*Newman*) (sins unatoned for and uncondoned bring purgatorial or *perpetual* torment after death—*H. O. Taylor*) (his *incessant* talking and shouting and bellowing of orders had been too much—*London*) **Perennial** carries the implication of existence over an indeterminate number of years; especially in older use this idea may be stressed and that of exhaustlessness often connoted (the *perennial* beauty and heroism of the homeliest human nature—*J. R. Lowell*) (the *perennial* feeling of silent worship—*Carlyle*) In current use, probably because of the application of the term to plants that die down to the roots and spring up again seasonally over a number of years, the implication of continual recurrence or constant renewal is perhaps more common (revolt is *perennial*—*Lowes*) (the *perennial* question of the relation between *ought* and *is*, of obligation and fact—*Alexander*)

Ana unceasing, endless, interminable, *everlasting; eternal (see INFINITE); *lasting, permanent, perdurable **Ant** intermittent —**Con** recurrent, periodic, alternate (see INTERMITTENT); *fitful, spasmodic

continuance *continuation, continuity

Ana endurance, persistence, lasting (see corresponding verbs at CONTINUE); perseverance, persistence (see corresponding verbs at PERSEVERE); remaining, staying, tarrying (see STAY)

continuation, **continuance**, **continuity** are often confused, especially when meaning the quality, the act, or the state of continuing or of being continued or an instance revealing such a quality, action, or state. **Continuation** suggests prolongation or resumption (the *continuation* of a line) (it's the *continuation* of a philosophic plan—*Meredith*) (the boy from a good classical school finds that his college Latin, Greek, and mathematics are the natural *continuation* of what he has already acquired—*Grandgent*) **Continuance** implies duration, perseverance, or stay (eleven years' *continuance*—*Shak.*) (patient *continuance* in well doing—*Rom 2:7*) (our *continuance* in the city depends on our boy's health) (the idleness and vice of many years *continuance*—*Austen*) **Continuity** stresses uninterrupted or unbroken connection, sequence, or extent (the *continuity* of a series) (continuity of attention) (the entire breach of *continuity* in your history made by the Revolution—*Arnold*) (space and time are thus vehicles of *continuity* by which the world's parts hang together—*James*) In the technical language of those engaged in making motion pictures or in radio and television broadcasting, *continuity* denotes material written in advance (as the scenario of a motion picture or the

lines to be spoken in a radio broadcast) as provision for perfection in sequence and in timing of the performance. *Ana* extending or extension, prolonging or prolongation, protracting or protraction (see corresponding verbs at EXTEND)

Ant cessation

continue, **last**, **endure**, **abide**, **persist** are comparable when meaning to remain indefinitely in existence or in a given condition or course. **Continue** distinctively refers to the process and stresses its lack of an end rather than the duration of or the qualities involved in that process. Often, in addition, it suggests an unbroken course <what a man is as an end perishes when he dies; what he produces as a means *continues* to the end of time—*Russell*> <the illusion *continues* that civilization can somehow be reconciled with atomic war—*Fleming*> **Last** especially in its derivative *lasting* (see LASTING) when unqualified usually stresses length of existence exceeding what is normal or expected <the anger of slow, mild, loving people has a *lasting* quality—*Deland*> When qualified, *last* often loses this distinctive implication <the work that Michelangelo did complete has *lasted* well—*Barr*> <the refrigerator is guaranteed to *last* five years> <the tire *lasted* only three months> **Endure** adds to *last* the implication of resistance, especially to destructive forces or agencies <for living things, who suffer pain, may not *endure* till time can bring them ease—*Lowell*> <an art . . . which *endured* . . . until man changed his attitude toward the universe—*Henry Adams*> **Abide** and its derivative *abiding* imply stability or constancy, especially in opposition to mutability or impermanence <though much is taken, much *abides*—*Tennyson*> <notwithstanding the countless features of London's living which were *abiding*, the changes made themselves felt—*J. M. Brown*> **Persist** adds to *continue* the implication of outlasting the appointed or normal time; it often also connotes recurrence, especially in sporadic instances <an attitude towards life, which . . . *persists*, with many changes but no breaks, till the closing of the Athenian lecture rooms by Justinian—*Inge*>

Ana remain, *stay; survive, *outlive, outlast

Con *arrest, interrupt, check: *stop, cease, desist, quit, discontinue; suspend, stay, intermit, *defer, postpone

continuity *continuation, continuance

Ana *succession, sequence, chain, train, progression

Con intermittence, recurrence, alternation, periodicity (see corresponding adjectives at INTERMITTENT): fitfulness (see corresponding adjective at FITFUL)

continuous constant, perpetual, perennial, *continual, incessant, unremitting

Ana connected, related, linked (see JOIN): successive, *consecutive, sequent, serial: *steady, constant, uniform
Ant interrupted —*Con* *intermittent, recurrent, periodic, alternate

contort distort, warp, *deform

Ana twist, bend, *curve

contour *outline, silhouette, skyline, profile

Ana configuration, shape, *form, conformation, figure

contraband *adj* *smuggled, bootleg

contract *n* **Contract**, **bargain**, **compact**, **pact**, **treaty**, **entente**, **convention**, **cartel**, **concordat** designate an agreement reached after negotiation and ending in an exchange of promises between the parties concerned. **Contract** applies especially to a formal written agreement, often of a business nature, couched in such explicit terms as to be enforceable at law <a regular *contract* to the above effect was drawn up by a lawyer, and signed and sealed in the presence of witnesses—*Hawthorne*> **Bargain** applies especially to an agreement regarding purchase and sale <this *bargain* provides for an exchange of so much Ameri-

can wheat and cotton for so much British rubber and tin> A **compact** is an earnest or solemn exchange of promises, sometimes between state or political groups and often between persons. A compact may be unwritten or undocumented, the only assurance of its execution being the trust which each party places in the honor of the other. The word is used when a keen sense of the obligation which it imposes is assumed of each of the parties <men and women . . . marry and promise loyalty to some one person. They can keep that *compact* and yet not shut themselves away from other men and other women—*Rose Macaulay*> <let us make a *compact*. I shall do everything to please you, and you must promise to do everything to please me—*Hudson*> <the National Assembly, inspired by Thiers's patriotism, adopted . . . the "*Compact of Bordeaux*," whereby it was agreed that political differences should be put aside in order to carry through expeditiously the work of reconstruction—*Schapiro*> **Pact** as used of an agreement between persons or groups is usually interchangeable with *compact* <suicide *pact*, an agreement between two persons to commit suicide> <an unvoiced *pact* between us to read him with . . . skepticism—*Horace Gregory*> Perhaps because of its popularity with newspaper headline writers which its brevity won for it, *pact* is used with increasing frequency in the (often unofficial) title of agreements between states <the *Pact of Corfu* was a constitutional *pact* wherein leaders of the southern Slavs agreed to join in a unitary kingdom—*The Nation*>; in this use it is frequently interchanged with *treaty*, which is the generic term for an agreement between states made by negotiation or diplomacy <the Lateran *Pact* or *Treaty* establishing Vatican City> <a nonaggression *pact*> <a trade *pact*> <a commercial *treaty*> <the president . . . shall have power, by and with the advice and consent of the Senate, to make *treaties*—*U. S. Constitution*> *Treaty*, and never *pact*, however, is the term for an agreement establishing peace after a period of armed hostility <the *Treaty of Versailles*> An **entente** is a cordial or amicable agreement between nations in regard to their foreign affairs, usually involving a promise of joint military action in case of aggression against an adherent to the entente <the Triple *Entente* between France, Great Britain, and Russia> An *entente* may be in writing set forth in a published document or it may be based simply on an exchange of promises between heads of government, or may be merely a state of mind of the peoples concerned <it changes the *entente* into an alliance, and alliances . . . are not in accordance with our traditions—*Grey*> The word is also used of an understanding between groups (as of economic competitors) <a broader "peace treaty" between leaders of industry, labor, and agriculture governing both price and wage adjustments. This kind of *entente* would seem to be central to the management of an economy such as ours—*L. G. Reynolds*> A **convention** is usually an agreement which is either less formal or more specific than a treaty; it may be an agreement between several states regulating matters affecting all of them (as postage, copyright, or the conduct of war) or an agreement between commanders of armies in respect to military operations <the *conventions* for suspending hostilities agreed upon by me with Marshals Soult and Suchet—*Wellington*> A **cartel** (see also MONOPOLY) is a written agreement or convention between opposing nations, usually for the regulation of intercourse between them in view of or during war. *Cartels* provide for such matters as the treatment and exchange of prisoners, postal and telegraphic communication, the mode of reception of bearers of flags of truce, and the treatment of the wounded. **Concordat** usually applies to

an agreement between the pope and a secular government for regulating the relations between church and state (the *Concordat of Worms* was an agreement with Germany (1122) regulating investiture of bishops and abbots) Less often the term is used for an agreement regulating ecclesiastical matters (the prospect of a union of the Protestant Episcopal church and the Presbyterian Church . . . which a *concordat* proposed a year ago—*Springfield Republican*)

contract *vb* 1 pledge, covenant, engage, *promise, plight 2 catch, *incur

Con *escape, avoid, evade, elude, shun, eschew: avert, ward, *prevent

3 **Contract, shrink, condense, compress, constrict, deflate** denote to decrease in bulk, volume, or content, but they vary widely in their suggestion as to how this decrease is effected and what consequences it has. **Contract** means to draw together the sides or the particles of, especially by a force from within, with a consequent reduction in compass or a compacting of the mass (the heart, by *contracting* and dilating rhythmically, keeps up the circulation of the blood) (molten iron *contracts* as it cools) **Shrink** means to contract so as to fall short of an original length, bulk, or volume (*shrink* cloth) (his assets have *shrunk*) (apples often *shrink* before rotting) **Condense** denotes reduction, usually of something more or less homogeneous, to greater compactness without material loss of content (*condense* a gas to a liquid) (*condense* a speech into a few paragraphs) **Compress**, which also means to reduce to a compact state, differs from *condense* in that it connotes a pressing or squeezing of something formless or diffused into definite shape or into a small compass (*compress* air) (*compress* cotton into bales) (*compress* the events of a lifetime into a play taking three hours to present) **Constrict** means to make narrow or smaller in diameter either by contraction or by squeezing (the pores of certain bodies are *constricted* under the influence of cold) (the throat is *constricted* by too tight a collar) **Deflate** means to cause to shrink by exhausting of a gas, air, or something insubstantial (*deflate* a balloon) (*deflate* a wild rumor) (*deflate* an undeserved reputation)

Ana dwindle, diminish, *decrease, reduce

Ant expand —**Con** dilate, swell, distend, inflate (see EXPAND)

contradict *deny, gainsay, negative, contravene, traverse, impugn

Ana dispute (see DISCUSS): controvert, *disprove, refute, confute: belie, falsify, garble (see MISREPRESENT)

Ant corroborate —**Con** *confirm, verify, authenticate, substantiate

contradictory *n* contrary, antithesis, opposite, antonym, antipode (see under OPPOSITE *adj*)

Ana *converse, reverse

contradictory *adj* contrary, antithetical, *opposite, antonymous, antipodal, antipodean

Ana negating, nullifying (see NULLIFY): counter, counteractive, antagonistic, *adverse

Con agreeing, squaring, tallying, jibing (see AGREE)

contraption gadget, *device, contrivance

Ana appliance, tool, instrument, *implement, utensil: *machine, mechanism, apparatus: expedient, makeshift (see RESOURCE)

contrary *n* antithesis, opposite, contradictory, antonym, antipode (see under OPPOSITE *adj*)

Ana *converse, reverse

contrary *adj* 1 antithetical, *opposite, contradictory, antonymous, antipodal, antipodean

Ana divergent, disparate, *different: counter, antagonis-

tic, *adverse: negating, nullifying (see NULLIFY)

2 **Contrary, perverse, restive, balky, froward, wayward** are comparable when they mean given to opposing or resisting wishes, commands, conditions, or circumstances. A person is **contrary** who by nature or disposition is so self-willed that he cannot or will not accept dictation or advice (she is the most *contrary* child I have ever seen) or who vigorously objects to any arrangements or plans made by others (they've been in your way all these years, and you've always complained of them, so don't be *contrary*, sir—*Cather*) A person or sometimes one of his acts, utterances, or desires is **perverse** when he or it as a result of temperament or disposition, or sometimes of physical constitution or moral character, runs counter to what is right, true, correct, or in keeping with human nature, especially as determined by the moral law, by custom, or by the laws of nature or the state. Like *contrary*, the term may suggest obstinate willfulness, but even then it usually carries a stronger suggestion of wrongheadedness (*perverse* disputings of men of corrupt minds, and destitute of the truth—1 Tim 6:5) (they will not be resolute and firm, but *perverse* and obstinate—*Burke*) More often, however, the term suggests defiance of or disobedience to the law, especially the moral law or the established proprieties (Rimbaud was the rebel incarnate . . . he was *perverse*, untractable, adamant—until the very last hour—*Henry Miller*) (the poet's sense of responsibility to nothing but his own inner voice is perhaps his only way of preserving poetic integrity against the influences of a *perverse* generation—*Day Lewis*) *Perverse* sometimes suggests perversion or a sexual maladjustment that reveals itself in aberrant or abnormal desires or acts (the presence of a small minority of abnormal or *perverse* persons . . . affords no excuse for restricting the liberty of the many to the standard of the few—*Ellis*) (the last *perverse* whim which has taken possession of the debauchee—*Krutch*) A person is **restive** (see also IMPATIENT) who obstinately refuses to obey the commands or the will of another; the term may imply inaction or a turning in another direction but more often it suggests intractability or unruliness (the common man . . . is increasingly *restive* under the state of "things as they are"—*Veblen*) (your colonies become suspicious, *restive*, and untractable—*Burke*) A person or, more often, an animal (as a horse) is **balky** when he or it stops short and refuses to go further in the desired direction or in the performance of something undertaken (the horse was never *balky* unless he was overloaded) (a child may become *balky* when he is confused by too many orders) (examination of witnesses, mostly reluctant if not downright *balky*—*The Nation*) A person (often a child) is **froward** who is so contrary or so prone to disobedience that he will not comply with the most reasonable of requests or suggestions; the term usually suggests a characteristic rather than an occasional or a justifiable reaction (all the words of my mouth are in righteousness; there is nothing *froward* or perverse in them—*Prov* 8:8) (I never entered on disobedience without having settled with myself that the fun of it would be worth the pains, scorned repentance, and endured correction with a philosophy which got me the reputation of being a hardened and *froward* child—*Mary Austin*) A person is **wayward** who is so perverse that he is incapable of government by those in authority over him and therefore goes his own way, however wanton, capricious, or depraved it may be (an institution for *wayward* girls) (I have been wild and *wayward*, but you'll forgive me now—*Tennyson*) Things that are erratic or follow no clear law or principle are also describable as *wayward* (*wayward* fancies) (a *wayward* breeze)

Ana refractory, recalcitrant, intractable, headstrong, *unruly: contumacious, rebellious, *insubordinate

Ant good-natured, complaisant —*Con* *amiable, obliging: *compliant, acquiescent: amenable, tractable (see OBEDIENT)

contrast *n* *comparison, collation, parallel, antithesis

Ana distinction, difference, divergence, divergency, *dis-similarity, unlikeness: conflict, *discord

contrast *vb* *compare, collate

contravene *deny, contradict, traverse, impugn, negative

Ana oppose, combat, *resist, fight: controvert, *disprove: *trespass, encroach, infringe

Ant uphold (*law, principle*): allege (*right, claim, privilege*)

contravention trespass, transgression, violation, infringement, *breach, infraction

Ana *offense, vice, sin, crime

Con compliance, acquiescence (see under COMPLIANT)

contribution *donation, benefaction, alms

Ana grant, subvention, subsidy, *appropriation: *gift, present, largess, boon

contributory *auxiliary, ancillary, adjuvant, subservient, accessory

Ana concurring, cooperating (see UNITE): helping or helpful, aiding, assisting or assistant (see corresponding verbs at HELP)

contrition attrition, repentance, *penitence, compunction, remorse

Ana *sorrow, grief, regret

contrivance *device, gadget, contraption

Ana invention, creation, discovery (see corresponding verbs at INVENT): *implement, tool, instrument, appliance, utensil: *machine, mechanism, apparatus

contrive, devise, invent, frame, concoct mean to find a way of making or doing something or of achieving an end by the exercise of one's mind. **Contrive** implies ingenuity or cleverness in planning, designing, or in scheming; it is a matter of indifference whether the end or object is good or bad, since the word stresses the manner of making, doing, or achieving rather than the character of the end (in every deed of mischief he had a heart to resolve, a head to *contrive*, and a hand to execute—*Gibbon*) (if we were perfectly satisfied with the present, we should cease to *contrive*, to labor, and to save with a view to the future—*Macaulay*) (she was forced to hurry. And she had risen that morning with plans perfectly *contrived* for the avoidance of hurry—*Bennett*) (contrive a way of helping them without their knowing it) **Devise** often comes very close to *contrive*, but in general it throws more stress upon mental effort than upon ingenuity; the term often implies the serious reflection and experimentation that precedes the bringing of something into being, especially something new or quite different (*devise* new and dainty dishes for a fastidious taste) (*devise* an engine of triple the power) (*devise* a plan of campaign) (*devise* a new method of teaching a subject) (grossly *contriving* their dear daughter's good—poor souls, and knew not what they did, but sat ignorant, *devising* their own daughter's death—*Tennyson*) (Leonardo was a child even . . . in *devising* fantastic toys and *contriving* disconcerting tricks—*Ellis*) **Invent**, though often used interchangeably with *devise*, commonly retains from its primitive senses some notion of finding, but the term comes closer in its implication to originating, especially after thought and reflection, but sometimes more quickly, as the result of a happy accident (the telescope was *invented* by Galileo in 1609) (Huxley claims to have *invented* the term *agnostic*) (his pains to *invent* a complete, generally unlovely terminology of his own—*Muller*) (she was tired of *inventing* means for making the days and nights pleasant and capriciously

variable for others—*Van Vechten*) **Frame** (see also BUILD) implies the exact fitting of one thing to another (as in devising or inventing a story, a theory, or a rule); usually the term suggests an exact fitting (as of the words to the thought, or of the plot, character, and actions to the story as a whole, or of the expression to the spirit, or of the means to the end) (it will take me some time to *frame* a proper reply to this letter) (statutes . . . which must needs have been *framed* for some purpose or other—*Kingsley*) (never, it may be safely asserted, was a plan of society *framed* so consistent, harmonious and beautiful in itself—*Dickinson*) **Concoct** especially suggests a bringing together of ingredients in new or unexpected combinations, arrangements, or order so as to enhance their effectiveness (as in writing, in imagining, or in fashioning) (from the scraps of conversation he had overheard he *concocted* a plausible and amusing yarn) (the most horrible monsters and tortures . . . his fervid imagination could *concoct* out of his own bitter experiences and the manners and customs of his cruel times—*Eliot*)

Ana plan, scheme, project (see under PLAN *n*): manipulate, ply, swing (see HANDLE)

control *vb* direct, manage, *conduct

Ana *govern, rule: regulate, *adjust: *guide, lead, pilot, engineer, steer: *restrain, curb, check

control *n* 1 command, dominion, authority, *power, jurisdiction, sway

Ana ascendancy, *supremacy: might, puissance, *power, force: management, direction (see corresponding verbs at CONDUCT)

Con mutiny, revolt, *rebellion

2 *corrective, check, antidote

Ana regulation, *law, ordinance, rule, precept, statute, canon

controversy dispute, *argument

Ana contention, dissension (see DISCORD): disputation, *argumentation, forensic, debate

controvert *vb* rebut, refute, *disprove, confute

Ana contravene, traverse, impugn, *deny, gainsay: oppose, combat, fight (see RESIST): dispute, debate, agitate, argue, *discuss

Ant assert —*Con* defend, justify, *maintain, vindicate

contumacious rebellious, *insubordinate, mutinous, seditious, factious

Ana *contrary, perverse, froward: refractory, recalcitrant, intractable, ungovernable, *unruly, headstrong

Ant obedient —*Con* *compliant, acquiescent, resigned: amenable, tractable, docile (see OBEDIENT)

contumelious *abusive, opprobrious, vituperative, scurrilous

Ana insolent, overbearing, arrogant, disdainful (see PROUD): humiliating, demeaning, debasing, abasing (see ABASE): flouting, scoffing, jeering, sneering (see SCOFF)

Ant obsequious —*Con* complimenting or complimentary, commending or commendatory, applauding (see corresponding verbs at COMMENT)

contusion bruise, *wound, trauma, traumatism, lesion

conundrum puzzle, riddle, enigma, problem, *mystery

convalesce *improve, recover, recuperate, gain

Ana progress, *advance: *strengthen, invigorate: *cure, heal, remedy

convenance convention, usage, *form

convene convoke, muster, *summon, summons, call, cite

Ana *gather, congregate, assemble, collect

Ant adjourn —*Con* disperse, *scatter: dismiss, *eject

convent *cloister, nunnery, monastery, abbey, priory

convention 1 entente, compact, pact, treaty, cartel, concordat, *contract, bargain

Ana *agreement, accord, understanding

2 *form, convenience, usage

Ana custom, practice (see HABIT): canon, precept, rule, *law: etiquette, propriety, *decorum

conventional formal, ceremonious, *ceremonial, solemn
Ana *decorous, proper, seemly, decent: *correct, right, precise

Ant unconventional —*Con* *negligent, slack, lax, remiss: *natural, simple, unsophisticated, ingenuous, naïve, artless

conversant, versed are comparable when they mean being familiar with something; they are seldom found in attributive use. **Conversant** (usually followed by *with*) implies a familiarity with a subject or a field of knowledge or with the writings on that subject or in that field that comes from long association, long experience, frequent intercourse, or many dealings with them (like Walpole . . . he was thoroughly *conversant* with questions of finance—*Lecky*) (The *Pilgrim's Progress* is known not only to everyone who is *conversant* with the other writings of the period, but to thousands, the world around, who never heard of . . . [Bacon's] *Essays*—*Lowes*) (British officers . . . must be *conversant* with the ways of a dozen or more castes—*Rand*) **Versed** (followed by *in*) may be used interchangeably with *conversant* or it may be used distinctively to convey not only an implication of familiarity with something, but of skill, adeptness, or proficiency (as in an art or a profession); thus, a person *versed* in law need not be *conversant* with the laws of all European countries; a specialist in forensic medicine though *versed* in medicine may not be *conversant* with all the new methods of treating pneumonia. Because of this added implication, *versed* is often used in combination (well-*versed*) (ill-*versed*) (poorly *versed*) (I don't think him deeply *versed* in life—*Byron*) (political minutemen excited by the issues of the day, informed on these issues and at the same time fully *versed* in the problems of the community—*Humphrey*) (*versed* in all the arts of procrastination, indolence, and evasion—*A. R. Williams*)

Ana intimate, *familiar: informed, acquainted (see INFORM): *learned, erudite: adept, *proficient, skilled, expert, skillful, masterly

Ant ignorant

conversation, converse communion, communication, *intercourse, commerce, traffic, dealings, correspondence
Ana conversing, talking or talk, speaking or speech (see corresponding verbs at SPEAK)

converse *vb* talk, *speak

Ana *express, voice, broach, air, ventilate, vent, utter: *chat, chatter, gabble: *gossip, tattle: *discourse, descant, expatiate, dilate

converse *n* see CONVERSATION

converse *n* **Converse, obverse, reverse** are frequently confused when they mean something which is the opposite of another thing. **Converse** applies chiefly to statements or to propositions; typically it implies an interchange or transposition of the important terms (the relation of wife to husband is called the *converse* of the relation of husband to wife—*Russell*) (the *converse* of "none but the brave deserves the fair" is "none but the fair deserves the brave") **Converse** is not to be confused with *contradictory* (see under OPPOSITE *adj*); so long as the important terms are transposed, one proposition is the *converse* of another whether or not it is its opposite (the feeling that society needs protection against the individual rather than the *converse*—*Brownell*) **Obverse** and **reverse** specifically apply to the two faces of a coin or medal, *obverse* applying to the one containing the head or principal inscription, *reverse* to the other; in more general use, *obverse* refers

to the more, *reverse* to the less, apparent or intentionally conspicuous side or face of something (looking at the fair tapestry of Life, with its royal and even sacred figures, he dwells not on the *obverse* alone, but here chiefly on the *reverse*; and indeed turns out the rough seams, tatters, and manifold thrums of that unsightly wrong side—*Carlyle*) *Ana* opposite, contrary, antithesis, contradictory (see under OPPOSITE *adj*)

conversion transformation, metamorphosis, transmutation, transmogrification, transfiguration (see under TRANSFORM)

convert *vb* *transform, metamorphose, transmute, transmogrify, transfigure

Ana manufacture, fabricate, forge, *make: apply, utilize, employ, *use

convert *n* **Convert, proselyte** are synonyms only in being applicable to the same person. Both denote a person who has embraced another creed, opinion, or doctrine than the one he has previously accepted or adhered to. **Convert** commonly implies a sincere and voluntary change of belief; it is, therefore, the designation preferred by the church, the party, or the school of thought of which such a person becomes a new member (the first American novelist to become a . . . *convert* to naturalism—*Malcolm Cowley*) **Convert** is also applied to a person who undergoes the religious experience called *conversion* or a turning from a life of sin or indifference to one guided by religious (specifically, Christian) principles and motives. **Proselyte** basically denotes a convert to another religion. It is still used in reference to a convert to Judaism who manifests his sincerity and fidelity by strict adherence to religious laws and practices. In general use, however, the term may suggest less a reverent or convicted and voluntary embracing than a yielding to the persuasions and urgings of another, be it an earnest missionary or zealot or someone with less praiseworthy motives (ye compass sea and land to make one *proselyte*—*Mt 23:15*) **Proselyte** is often the designation chosen by the members of a church for one formerly of their number who has been converted to another faith. The term is also applied to a person won over to a party, a cause, or a way of life in which he has formerly expressed disbelief or disinterest (you agree with the rest of the married world in a propensity to make *proselytes*—*Shenstone*)

Ana neophyte, *novice

Con apostate, *renegade, backslider, recreant, turncoat

convertible *reciprocal, corresponding, correlative, complementary, complementary

Ana interchangeable, exchangeable (see corresponding verbs at EXCHANGE)

convey 1 transport, *carry, transmit, bear

Ana *move, remove, shift, transfer: take, fetch, *bring
2 *transfer, deed, alienate

Ana consign, *commit, relegate

convict *n* *criminal, felon, malefactor, culprit, delinquent
Ana miscreant, blackguard, scoundrel, *villain: offender, sinner (see corresponding nouns at OFFENSE)

conviction 1 assurance, certitude, *certainty

Ana faith, *belief, credence, credit

Con doubt, *uncertainty, dubiety, dubiosity, skepticism: disbelief, *unbelief, incredulity

2 belief, persuasion, *opinion, view, sentiment

Ana tenet, dogma, *doctrine: judgment, conclusion (see under INFER)

convincing compelling, telling, cogent, *valid, sound

Ana proving, demonstrating (see PROVE): persuading or persuasive, inducing (see corresponding verbs at INDUCE): forceful, forcible, potent, *powerful

convivial companionable, *social, gregarious, hospitable, cooperative

Ana sociable, genial, cordial, affable, *gracious: gay, *lively, vivacious: *merry, jocund, jolly, jovial: hilarious, mirthful (see corresponding nouns at MIRTH)

Ant taciturn: staid —*Con* reserved, reticent, *silent: *serious, sober, grave, sedate, solemn, somber: asocial, *unsocial

convoke convene, muster, *summon, summons, call, cite
Ana assemble, *gather, congregate, collect: *invite, bid
Ant prorogue, dissolve —*Con* disperse, *scatter

convoy *vb* escort, conduct, *accompany, attend, chaperon
Ana protect, shield, guard, safeguard, *defend: *guide, lead, pilot

convulse rock, *shake, agitate

Ana *discompose, disturb, disquiet, perturb

convulsion 1 spasm, paroxysm, *fit, attack, access, accession

2 *commotion, agitation, tumult, turmoil, turbulence, confusion, upheaval

Ana shaking, rocking (see SHAKE): quaking, trembling, tottering (see SHAKE): revolution, revolt, *rebellion: cataclysm, *disaster

convulsive spasmodic, *fitful

Con *steady, uniform, even, equable, constant

cool 1 chilly, *cold, frigid, freezing, frosty, gelid, icy, glacial, arctic

Ant warm

2 Cool, composed, collected, unruffled, imperturbable, unflappable, nonchalant are comparable when applied to persons, their manners, appearance, temper, or acts, in the sense of showing or seeming to show freedom from agitation or excitement. Cool (see also COLD) basically implies such self-control that no hint is given of any emotion or motive that might warm, inflame, excite, or impassion. Specifically, it may further imply detachment or dispassionateness (modest youth, with cool reflection crowned—*Pope*) (my work, I am often told, is cool and serene, entirely reasonable and free of passion—*Ellis*) or calm courage in assault or under attack (soldiers cool under fire) or deliberateness or determination in gaining one's ends (the coquette [Queen Elizabeth I] of the presence chamber became the coolest and hardest of politicians at the council board—*J. R. Green*) or calm assurance or effrontery (the sudden change in her voice, from cool imperial arrogance to terrified pleading—*Graves*) or actual or seeming indifference (a cool lover)

Composed implies the freedom from signs of agitation or excitement that is characteristic of a decorous sedate temperament or is the result of self-discipline (in her composed, schooled manner she despised and disliked both father and daughter exceedingly—*Conrad*) (she was composed without bravado, contrite without sanctimoniousness—*Replier*) (she was pale, and looked as if she hadn't slept, but composed, as she always is—*Rose Macaulay*) Collected stresses a concentration of the mind or spirit with resulting elimination of all distractions; otherwise it differs little from composed (be collected: no more amazement—*Shak.*) (Mrs. Hawthorne wore her collected Sunday expression, and Tony knew that she did not allow them to talk of mundane affairs on these expeditions to and from church—*Archibald Marshall*) (the Queen . . . remained, as she herself said, "very much collected; civil and high, and betrayed no agitation"—*Sitwell*) Unruffled implies coolness, placidity, and often, poise, in the midst of excitement or when there is cause for agitation (while others fretted and fumed, he remained unruffled) (her mind was unruffled by the spiritual problems which were vexing the minds around her—*J. R. Green*) (an efficient organizer, smooth and unruffled—*Flora Lewis*) Imperturbable implies such coolness

and assurance that one cannot be abashed, annoyed, disconcerted, alarmed, or otherwise disturbed; it usually implies a temperamental rather than an acquired frame of mind (Franklin's imperturbable common sense—*Arnold*) (a very good-looking, rosy little man with . . . a soft voice and a manner of imperturbable urbanity—*H. G. Wells*)

Unflappable is a somewhat informal synonym of imperturbable, and like the latter stresses ability to resist what tends to disturb (from his encounters with lions and hippos . . . Mr. Hillaby emerges unflappable and subtly triumphant—*Times Lit. Sup.*) (un unflappable debater, he never let a Soviet accusation go unanswered—*Newsweek*) (an unflappable management of affairs that might otherwise become bothersome—*Wicker*) Nonchalant stresses an easy coolness of manner or casualness that suggests indifference or unconcern; it often connotes lightheartedness or offhandedness (God . . . knows, if he is not as indifferent to mortals as the nonchalant deities of Lucretius—*Byron*) (at the back [of the ambulance], haughty in white uniform, nonchalant on a narrow seat, was The Doctor—*Sinclair Lewis*) (he walked in a nonchalant fashion—*D. H. Lawrence*)

Ana *calm, tranquil, serene, placid: detached, aloof, *indifferent: *impassive, stoic, phlegmatic

Ant ardent: agitated —*Con* fervid, fervent, passionate, perfervid, *impassioned: perturbed, discomposed, disturbed, upset, flustered, flurried (see DISCOMPOSE)

coop *vb* *enclose, envelop, fence, pen, corral, cage, wall
Ana confine, circumscribe, *limit, restrict: *hinder, impede, obstruct, block, bar

cooperate conjoin, *unite, combine

Ana coincide, *agree, concur

Ant counteract —*Con* *neutralize, negative: *nullify, negate, annul

cooperative *social, companionable, gregarious, convivial, hospitable

Ana sociable, cordial, genial, affable, *gracious: helping or helpful, aiding, assisting (see corresponding verbs at HELP)

Ant uncooperative —*Con* *unsocial, asocial

cop *vb* *steal, filch, pinch, snitch, swipe, lift, pilfer, purloin

copartner *partner, colleague, ally, confederate

Ana *associate, companion, comrade

copious *plentiful, abundant, ample, plenteous

Ana *profuse, lavish, exuberant, prodigal, luxuriant, lush
Ant meager —*Con* scanty, scant, scrimpy, sparse, exiguous, spare (see MEAGER): *thin, slight, tenuous, slim, slender

copy *n* *reproduction, duplicate, carbon, carbon copy, transcript, facsimile, replica

Ana counterpart, *parallel: imprint, print, *impression, impress: *image, effigy

Ant original

copy *vb* Copy, imitate, mimic, ape, mock mean to make something like an already existing thing in form, appearance, or obvious or salient characteristics. Copy implies duplication of an original and thereby as close a resemblance as is possible under the circumstances (copy a letter) (copy Da Vinci's "Mona Lisa") (copy the clothes of a fashionable designer) (later examples of the Greek revival travestied the classic style rather than copied it—*Amer. Guide Series: Mass.*) Imitate stresses following something as a pattern or model; it does not therefore preclude variations from the original; thus, a writer who imitates Keats may merely reecho enough of that poet's rhythms, images, or sentiments to produce poetry reminiscent of Keats. Imitate may imply emulation (she slept for hours in the daytime, imitating the cats—*Stafford*) (imitated the example of his elders) or it may imply

representation in another medium (<art *imitates* nature) (<the dramatist *imitates* life) (<the music *imitates* a storm) or it may imply simulation (<fabrics that *imitate* leather) (<their pots seemed to *imitate* leather vessels—*Childe*) **Mimic** usually implies an exact copying, especially of a person's movements, gestures, voice, mannerisms, sometimes for the sake of making sport of them, but often with the intention of giving a lifelike representation of them (<I am sure I repeat her words, though I cannot *mimic* either the voice or air with which they were spoken—*Fielding*) The word sometimes suggests a counterfeiting clever enough to seem real; it therefore often implies the skill of an actor (<I might *mimic* a passion that I do not feel, but I cannot *mimic* one that burns me like fire—*Wilde*) (<he learned to call wild turkeys with a piece of bone through which he was able to *mimic* the notes of the bird—*Brooks*) **Ape** also implies close copying sometimes seriously, sometimes in the spirit of mimicry (<in dress and habits, *ape* the Arabs around them—*G. W. Murray*) Often it suggests an attempt to emulate what one admires and then may connote such failure of the attempt as is likely to subject one to contempt (<clods *aping* their betters) (<the lower classes *aped* the rigid decorum of their "betters" with laughable results—*Harrison Smith*) **Mock** commonly adds to *mimic* the implication of a derisive intent. It often distinctively suggests immediate repetition of the words or actions mimicked (<*mocked* his teacher) (<the babbling echo *mocks* the hounds—*Shak.*) (<her shadow still glowered about . . . as though . . . to *mock* behind her back—*Keats*) (<she contended every point, objected to every request, shirked her work, fought with her sisters, *mocked* her mother—*Mead*)

Ant originate

coquet *vb* flirt, *trifle, dally, toy

cordial genial, affable, *gracious, sociable

Ana warm, warmhearted, responsive, sympathetic, *tender: *sincere, heartfelt, hearty, wholehearted

Con cool, *cold, frosty, frigid: *indifferent, aloof, detached, disinterested: reserved, taciturn, *silent

core *n* 1 *center, middle, midst, hub, focus, nucleus, heart 2 *substance, purport, gist, burden, pith

Ana import, significance, *importance, consequence: *center, heart, nucleus

corner pool, *monopoly, syndicate, trust, cartel

corporal *adj* corporeal, *bodily, physical, somatic

Ana fleshly, *carnal, animal, sensual

corporeal 1 *material, physical, sensible, phenomenal, objective

Ana actual, *real: tangible, palpable, ponderable, *perceptible

Ant incorporeal —**Con** intangible, impalpable, *imperceptible, insensible, imponderable

2 *bodily, physical, corporal, somatic

Ana see those at **CORPORAL**

corpse carcass, cadaver, *body

Ana remains (see **REMAINDER**)

corpulent *fleshy, portly, fat, stout, obese, rotund, plump, chubby

Ana burly, husky, brawny, *muscular: thickset, chunky, stubby, dumpy (see **STOCKY**)

Ant spare —**Con** *lean, gaunt, rawboned, angular, lanky, lank, skinny, scrawny: slender, slim, slight, *thin

corpuscule *particle, atom, molecule

corral *vb* *enclose, envelop, fence, pen, coop, cage, wall

correct *vb* 1 **Correct**, **rectify**, **emend**, **remedy**, **redress**, **amend**, **reform**, **revise** mean to set or make right something which is wrong. One **corrects** something which is inaccurate, untrue, or imperfect or which contains errors, faults, or defects, when one by substitutions brings it into con-

formity with a standard or rule of accuracy, truth, or perfection (<**corrected** his mistakes in pronunciation) (<**correct** printers' proofs) (<appellate jurisdiction . . . revises and **corrects** the proceedings in a cause already instituted—*John Marshall*) Also, one **corrects** a person when one points out his errors or faults for disciplinary purposes (see also **PUNISH**) (<she's been with me such a long time . . . She takes liberties. I've **corrected** her once or twice—*Bennett*) One thing **corrects** another thing when the former serves to counteract or neutralize the bad effect of the latter (<alkaline tablets to **correct** stomach acidity) (<his head **corrects** his heart in the choice of friends) One **rectifies** something which requires straightening out or ordering because it deviates from the rule or standard of what is right, just, equitable, or properly controlled or directed (<**rectify** a mistake in an account) (<**rectify** an error of judgment) (<reason is here no guide, but still a guard: 'tis hers to **rectify**, not overthrow, and treat this passion more as friend than foe—*Pope*) (<an incredible, disgraceful blunder, which should be **rectified** at the earliest possible moment—*New Republic*) One **emends** a thing when one frees it from error or defects; specifically an editor **emends** a corrupt text when he replaces doubtful readings with others that are judged to be closer to the original or to the intention of the author (<the eighteenth-century editors of Shakespeare freely **emended** the texts of his plays) One **remedies** something which is a source of evil or harm when one makes such corrections as will either bring about its eradication or restore what is harmed to a normal, sound, or prosperous condition (<the crime can never be **remedied**, it can only be expiated—*Day Lewis*) (<**remedy** an abuse of a privilege) (<**remedy** the maldistribution of relief) (<**remedy** a social evil) One **redresses** something which involves unfairness, injustice, or lack of proper balance; the word usually suggests reparation or compensation (<there is no calamity which right words will not begin to **redress**—*Emerson*) (<the wrongs that were to be righted, the grievances to be **redressed**, the abuses to be done away with—*Muggeridge*) One **amends** something when one makes such corrections or changes in it that it is bettered or raised to a higher standard (<**amend** his life) (<the work once done he could not or would not **amend** it—*Yeats*) (<laws that are not repealed are **amended** and **amended**—*Shaw*) One **reforms** something when one makes drastic changes in it in an attempt to eliminate imperfections; the word usually implies a new form or character (<**reform** the church) (<the fact is that the world does not care to be **reformed**. . . This makes the way of the improver hard—*Crothers*) One **revises** something when one looks it over to discover where it requires correction or amendment and makes the necessary changes (<**revise** a book before its second printing) (<**revise** a state constitution) (<there can be no doubt as to the jurisdiction of this court to **revise** the judgment of a Circuit Court—*Taney*)

Ana *improve, better, ameliorate: offset, *compensate, countervail, counterbalance, balance: *neutralize, counteract: *adjust, regulate, fix: *reprove, reprimand, admonish, chide

Con impair, spoil, mar, *injure, damage, harm, hurt: aggravate, *intensify

2 discipline, *punish, chastise, chasten, castigate

Con *indulge, pamper, spoil, humor, baby: condone, *excuse

correct *adj* **Correct**, **accurate**, **exact**, **precise**, **nice**, **right** are comparable when meaning conforming to standard, fact, or truth. **Correct**, the most colorless term, implies scarcely more than freedom from fault or error, as judged by some (usually) conventional or acknowledged standard

<socially *correct* dress> <*correct* school department> <a supposed center of *correct* information, *correct* judgment, *correct* taste—*Arnold*> <it is our custom at Shangri-La to be moderately truthful, and I can assure you that my statements about the porters were almost *correct*—*Hilton*> *Accurate* implies more positively fidelity to fact or truth attained by the exercise of care <an *accurate* statement> <an *accurate* observer> <a reasonably *accurate* and refined use of the mother tongue—*Eliot*> *Exact* emphasizes the strictness or rigor of the agreement, which neither exceeds nor falls short of the fact, a standard, or the truth <an *exact* likeness> <the *exact* value> <his *exact* words> <the acquisition of *exact* knowledge . . . is essential to every kind of excellence—*Russell*> *Precise* stresses sharpness of definition or delimitation, or scrupulous exactness <*precise* statements of principles—*Benson*> <she did not . . . understand . . . the *precise* nature of what she was doing—*Conrad*> *Nice* implies great, occasionally excessive, precision and delicacy (as in discrimination, adjustment, or statement) <a *nice* calculation> <an *overnice* distinction> <overbalance the *nice* adjustment on either side of the scale, and loss is the inevitable result—*Lowes*> <it was a time of revolution, when *nice* legal distinctions are meaningless—*Buchan*> *Right* (see also *GOOD*) stresses an absence of deviation from and, therefore, a strict accordance with the facts, the truth, or a standard. Often it is so close in meaning to *correct* that it is only in collocations where the latter's stress on freedom from error or fault is set up against *right's* emphasis on strict accordance with the facts, truth, or a standard that one can determine which word is preferable; thus, an answer to a problem in arithmetic may be said to be either *correct* or *right*; a gentleman of faultless manners and dress is said to be *correct* (not *right*); one seeking a friend in conformance with some socially or personally acceptable standard watches for the *right* (not *correct*) person <though he gave an assumed name the police know his *right* name> <the *right* man for the job—*Redman*>

Ana *impeccable, faultless, flawless: punctilious, punctual, scrupulous, meticulous, *careful

Ant incorrect —*Con* *false, wrong: fallacious, casuistical (see under *FALLACY*)

corrective *adj* remedial, restorative, sanative, *curative
Ana helping, aiding, assisting (see *HELP* *vb*): salutary, hygienic, *healthful

corrective *n* *Corrective*, *control*, *check*, *antidote* are comparable in their extended senses where they denote something which serves to keep another thing in its desired place or condition. *Corrective* is applied to an agency or influence which keeps true a thing that is subject to aberration or deviation, or which rectifies or remedies a departure in it from truth, balance, soundness, or health <the sight of the product [of our work] put to its full uses. . . is the best *corrective* to our blunders—*Suzzallo*> <a salutary *corrective* to the sometimes facile optimism and mass-hypnotized rhetoric of the revolutionary poets—*Day Lewis*> *Control* is applied to a predetermined device, rule, agency, or procedure which sets a guard upon a person or thing so as to prevent his or its overpassing prescribed limits or so as to enable him or it to be discovered if in error <the Constitution of the United States sets up various *controls* for the three branches of government, such as the veto power of the president> <a scientific investigator sets up a *control* for an experiment when he provides a means (usually a similar experiment identical in all but one factor) for testing the accuracy of his findings> <the only government *controls* authorized by law are marketing quotas—*New Republic*> *Check* is applied

to something which affords a means of securing or insuring accuracy, uniformity in quality, or the maintenance of a standard <duplicate records are kept by different clerks as a *check* upon each other> <by means of statewide examinations of pupils, the regents keep a *check* on the efficiency of the schools> <any arbitrary formula too rigidly adhered to may endanger good writing, but a good set of principles used as a *check* and an aid may be very helpful—*Mot*> *Antidote*, basically a remedy that counteracts a poison, implies that harm has been done and that a corrective which will neutralize or nullify these effects is necessary <there is no *antidote* against the opium of time—*Browne*> <the whole truth is the best *antidote* to falsehoods which are dangerous chiefly because they are half-truths—*Coleridge*>

correlate *n* *parallel, analogue, counterpart

correlative *adj* corresponding, complementary, complementary, *reciprocal, convertible

correspond *agree, square, accord, tally, jibe, harmonize, conform

Ana approach, touch, *match, rival, equal

correspondence *intercourse, communication, conversation, converse, communion, commerce, traffic, dealings

corresponding *adj* correlative, complementary, complementary, *reciprocal, convertible

Ana similar, analogous, *like, parallel, comparable

corridor passageway, *passage, hall, hallway, gallery, arcade, cloister, aisle, ambulatory

Ant provincial: insular: parochial

cosmos universe, macrocosm. *earth, world

cosset *caress, fondle, pet, cuddle, dandle

cost *n* expense, *price, charge

costly *adj* *Costly*, *expensive*, *dear*, *valuable*, *precious*, *invaluable*, *priceless* mean having a high value or valuation, especially in terms of money. *Costly*, *expensive*, *dear* refer to the expenditure or sacrifice involved in obtaining or procuring a thing. *Costly* applies to something which actually costs much; it usually implies such justifi-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

fiction as sumptuousness, rarity, or fine workmanship (their home is filled with *costly* furniture) (I took a *costly* jewel from my neck. A heart it was, bound in with diamonds—*Shak.*) (they are clad in very *costly* robes of silk; they are girdled like queens—*Hearn*) *Expensive* applies chiefly to something which is high-priced, especially with the implication of a cost beyond the thing's value or the buyer's means (an *expensive* suit of clothes) (the father . . . was unable to give the child as *expensive* an education as he had desired—*Froude*) Both *costly* and *expensive* may also be applied to whatever involves great losses or is a drain upon one's resources, not only in money but in such matters as time, effort, or health (an *expensive* error) (costly litigation) (expeditions which might prove *costly* in lives as well as money—*Stefansson*) (the rat is *expensive* to get rid of, but even more *expensive* to maintain—*Heiser*) *Dear* is opposed to *cheap* and commonly suggests a high, often an exorbitant, price or excessive cost; usually it implies a relation to other factors than the intrinsic worth of a thing (butter is cheap when it is plentiful, and *dear* when it is scarce—*Shaw*) (relatively high wages of building labor bring *dearer* housing—*Hobson*) (their stout resistance was destined to cost them *dear*. . . . Many thousand citizens were ruined—*Motley*) *Valuable* when applied to things which have monetary value usually suggests the price they will bring in a sale or exchange (the most *valuable* dog in the kennel) (he stores away all his *valuable* effects when he goes on a tour) (a *valuable* piece of property) *Valuable*, however, often suggests worth that is not measured in material goods, but in such qualities as usefulness, serviceableness, or advantageousness (a *valuable* citizen) (the most *valuable* course in a college career) (a *valuable* piece of evidence) (food is *valuable* to the animal and moisture to the plant—*Alexander*) (beauty which is humanly *valuable* but biologically useless—*Krutch*) *Precious* originally came closer in meaning to *costly* than to *valuable*, of which it is now a very close synonym. But it carries a heightened implication of worth and often applies to something or someone whose value can scarcely be computed in terms of money (precious friends hid in death's dateless night—*Shak.*) (happy is the man who findeth wisdom . . . she is more *precious* than rubies—*Prov* 3:13-15) (to any one who has ever looked on the face of a dead child or parent the mere fact that matter could have taken for a time that *precious* form, ought to make matter sacred ever after—*James*) (and these two things, judgment and imagination, are, with knowledge itself, the most *precious* results of well directed schooling—*Grandgent*) When applied to a thing of monetary value, *precious* usually means that it is one of the rarest and most costly of the class that is named (precious stones) (an alabaster box of very *precious* ointment—*Mt* 26:7) but it may mean that the thing so described is too scarce and therefore, often, too expensive to use freely or generally (be careful of the butter; it's too *precious* to waste) *Invaluable* and *priceless* imply worth that cannot be estimated. In practice they are sometimes used when *precious* is actually meant but would seem not quite in keeping for one reason or another (an *invaluable* servant) (this *invaluable* liquor was of a pale golden hue, like other of the rarest Italian wines—*Hawthorne*) (a *priceless* jewel) (the colleges of this country have been a *priceless* element in the making of the freedom and might of this nation—*L. M. Chamberlain*) Therefore their use tends to be hyperbolic and often, especially in the case of *priceless*, intensive (I've just heard a *priceless* story) (isn't that dress *priceless*?)

Ana exorbitant, extravagant, *excessive: sumptuous,

*luxurious, opulent

Ant cheap —*Con* beggarly, sorry, scurvy, *contemptible: poor, *bad

coterie circle, *set, clique

couchant recumbent, dormant, supine, *prone, prostrate

counsel *n* 1 *advice

Ana admonishing or admonition, chiding, reproaching or reproach (see corresponding verbs at REPROVE): warning, forewarning, cautioning or caution (see corresponding verbs at WARN): precept, rule (see LAW)

2 *lawyer, counselor, barrister, advocate, attorney, solicitor

counsel *vb* advise (see under ADVICE)

Ana admonish, chide (see REPROVE): *warn, forewarn, caution: remonstrate, expostulate (see OBJECT *vb*): instruct, direct (see COMMAND *vb*)

counselor *lawyer, barrister, counsel, advocate, attorney, solicitor

count *vb* 1 **Count, tell, enumerate, number** are comparable when they mean to ascertain the total of units in a collection by noting one after another or one group after another. **Count** (see also RELY) implies computation of a total by assigning to each unit or each group of units as noted its proper numeral in succession, such as one, two, three . . . or three, six, nine . . . (they were *counting* the books one by one when he told them it would be quicker to *count* them by fives) (as many as thirty bonfires could be *counted* within the whole bounds of the district—*Hardy*) **Tell**, which is somewhat old-fashioned in general use, usually stresses a counting one by one (look now toward heaven, and *tell* the stars, if thou be able to number them—*Gen* 15:5) (all *told* there were 27 public schools—*Jones*) or it may suggest a lingering counting interspersed with meditation on each unit counted (thus will he *tell* like beads the memories of his days—*Powys*) **Tell** is more common in current use in the collocation *tell off* which adds to the notion of counting that of setting apart the units counted (told off a detail and put them to opening a trench—*Dobie*) **Enumerate** implies a listing or mentioning of each one in a series not only that their total may be ascertained, but that they may be individually known or specified (enumerate the powers of the supreme court) (enumerate the species of plants found on an island) (enumerate the various dishes served at a dinner) **Number** is a somewhat literary equivalent of either *count* or *enumerate*; in some uses it carries an additional suggestion of allotment or limit (the days of every man are *numbered*) (number the flowers of the field) (but even the very hairs of your head are all *numbered*—*Lk* 12:7) (his hosts of blind and unresisting dupes the despot *numbers*—*Shelley*)

Ana *calculate, compute, reckon, estimate: *add, sum, figure, total, tot, cast, foot

Ana contrary, *opposite, antithetical, antipodal, antipodean, antonymous, contradictory: hostile, inimical (see corresponding nouns at ENMITY)

counteract *neutralize, negative

Ana *correct, rectify: offset, counterbalance, countervail, counterpoise, balance, *compensate

Ant cooperate —*Con* conjoin, concur, *unite, combine

counteractive counter, *adverse, antagonistic

Ana countervailing, counterbalancing, counterpoising, compensating, offsetting, balancing (see COMPENSATE): correcting (see CORRECT *vb* 1): neutralizing (see NEUTRALIZE)

counterbalance *vb* offset, *compensate, countervail, balance, counterpoise

Ana *stabilize, steady, poise: *correct (sense 1)

Con *overturn, upset, capsize

counterfeit *vb* feign, sham, simulate, pretend, *assume, affect

Ana *copy, imitate, mimic, ape: dissemble, *disguise

counterfeit *adj* Counterfeit, spurious, bogus, fake, sham, pseudo, pinchbeck, phony are comparable when meaning not at all what it is said to be or purports to be. Counterfeit implies that what is so qualified is an imitation of something else and usually of something finer, rarer, or more valuable and that the imitation is intended to deceive or defraud; thus, play money intended for the use of children at play is imitation but not counterfeit money; a clipped coin, though intended to defraud, is a real coin and not counterfeit; but a false banknote is both imitation and intended to deceive or defraud and is counterfeit (planned to substitute a counterfeit gem for the historic original) (the austere word of genuine religion is: save your soul! The degenerate counsel of a counterfeit religion is: salve your soul!—*Sullivan*) Spurious designates something as false rather than true or genuine; it carries no strong implication of being an imitation; thus, a spurious painting is one that is falsely attributed to a well-known painter; spurious writings attributed to Shakespeare are those thrown out of a canon of his work; a spurious condition is one which only superficially resembles the genuine condition (spurious pregnancy) The word does not necessarily connote a fraudulent purpose; it may suggest an honest mistake, confusion, or lack of scholarship (it is certain that the letter, attributed to him, directing that no Christian should be punished for being a Christian, is spurious—*Arnold*) (it would have been unfair to call his enthusiasm for social reform spurious. It was real enough in its way—*Galsworthy*) (no spurious argument, no appeal to sentiment . . . can deceive the American people—*Roosevelt*) Bogus carries the implications of fraudulence or deceit and applies to whatever may be passed off on one or may attempt to deceive one as to its true nature (bogus certificates) (bogus statesmen) (bogus legal actions) (he had figured . . . the night before, in red cambric and bogus ermine, as some kind of a king—*Mark Twain*) (Herman Melville made a habit of breaking out, whenever he was excited, into bogus Shakespeare—*Huxley*) Fake and sham are often equal to the past participial adjectives faked and shammed, both usually implying a more or less obvious imitation of something real. But fake emphasizes the idea of a false fabrication or of fraudulent manipulation (give fake news) (Americans who cling to illusions about communism and its fake Utopia—*A. E. Stevenson*) (sell a fake medicine) (a fake diamond) and sham stresses the thinness and obviousness of the disguise, the naïveté of the deception, or often the lack of intent to imitate exactly (a sham battle) (sham jewelry) (a sham crown) (a garden adorned with sham ruins and statues—*L. P. Smith*) Pseudo actually means false in any way; as an adjective modifying a noun or in the combining form joined with a separate noun it frequently implies pretense rather than fraud or spuriousness rather than counterfeiting (these pseudo evangelists pretended to inspiration—*Jefferson*) (luxuries which, when long gratified, become a sort of pseudo necessities—*Scott*) (o'er taste awhile these pseudo-bards prevail—*Byron*) Pinchbeck implies

a cheap, tawdry, or worthless imitation often of something precious, costly, or grand; it rarely implies an intent to deceive and is therefore closer to sham than to counterfeit (a pinchbeck age of poetry—*Symonds*) (pinchbeck imitations of the glory of ancient Rome—*Manchester Guardian*) Phony stigmatizes something which does not impose but puzzles or perplexes since it has a dubious appearance of reality (a phony message) (a phony examination) (journalists described as a phony war the period of relative inactivity near the beginning of World War II) Ana simulated, feigned, pretended (see ASSUME): fraudulent (see corresponding noun at DECEPTION): deceptive, *misleading, delusive, delusory

Ant bona fide, genuine —*Con* *authentic, veritable: true, *real, actual

counterfeit *n* fraud, sham, fake, *imposture, cheat, humbug, deceit, deception

Ana *reproduction, copy, facsimile

counterpart correlate, *parallel, analogue

Ana *complement, supplement: duplicate, copy, facsimile, replica, *reproduction

Con antithesis, opposite, contradictory (see under OPPOSITE *adj*)

counterpoise *vb* balance, countervail, counterbalance, *compensate, offset

Ana poise, *stabilize, steady, balance, ballast, trim

Con upset, capsize, *overturn

countervail *vb* offset, balance, *compensate, counterbalance, counterpoise

Ana *correct (sense 1): counteract, *neutralize, negative: overcome, surmount (see CONQUER): foil, thwart, *frustrate

county gentry, *aristocracy, elite, nobility, society

coup, coup d'état *rebellion, revolution, uprising, revolt, insurrection, mutiny, putsch

couple *n* Couple, pair, brace, yoke are comparable when meaning two things of the same kind. Couple applies to two things of the same sort, regarded as in some way associated, but not necessarily (except in the case of a married or mated pair) matched or belonging together; it frequently means no more than two (a couple of hours) (a couple of dollars) Pair applies to two things that belong or are used together, frequently so that one is useless or defective without the other; it also applies to a single object (as trousers, spectacles, scissors, or tongs) composed of two corresponding or complementary parts (a pair of compasses) (a matched pair of carriage horses) Brace applies especially to a couple of certain animals (a brace of pheasants) (a brace of greyhounds) or occasionally, to a couple of inanimate objects (a brace of pistols) or rarely and usually with contemptuous connotations to persons (a brace of dukes—*Goldsmith*) Yoke applies to two animals linked together (a yoke of oxen) It is used of persons only in contempt (a yoke of his discarded men—*Shak.*)

courage *n* Courage, mettle, spirit, resolution, tenacity are comparable when they mean a quality of mind or temperament which makes one resist temptation to give way in the face of opposition, danger, or hardship. Courage stresses firmness of mind or purpose and a casting aside of fear (for courage meaning courageousness, see courageous under BRAVE); it implies a summoning of all one's powers in order that one's desires or ends may be achieved (a reformer must have the courage of his convictions) (but screw your courage to the sticking place, and we'll not fail—*Shak.*) (the unconquerable will . . . and courage never to submit or yield—*Milton*) (courage to act on limited knowledge, courage to make the best of what is here and not whine for more—*Time*) Mettle suggests an

ingrained or characteristic capacity for meeting strain or stress in a manner suggestive of a finely tempered sword blade <the challenge put him on his *mettle*> It often implies qualities (as resiliency, ardor, fearlessness, fortitude, or gallantry associated less with physical strength than with mental or spiritual vigor <now I see there's *mettle* in thee, and even from this instant do build on thee a better opinion than ever before—*Shak.*> <doing one's bit, putting one's shoulder to the wheel, proving the *mettle* of the women of England, certainly had its agreeable side—*Rose Macaulay*> *Spirit*, like *mettle*, refers to a temperamental quality but suggests something more volatile or fragile. It implies an ability to hold one's own, to assert oneself or one's principles, or to keep up one's morale when opposed, interfered with, frustrated, or tempted <I do not think I can forgive you entirely, even now—it is too much for a woman of any *spirit* to quite overlook—*Hardy*> <to quit a comrade on the road, and return home without him: these are tricks which no boy of *spirit* would be guilty of—*Meredith*> <successive crop failures had broken the *spirit* of the farmers—*Cather*> *Resolution*, like *courage*, implies firmness of mind and purpose, but it stresses determination to achieve one's ends in spite of opposition or interference of men or of circumstances rather than a casting aside of fear of danger or a dread of hardship <good-humored-looking on the whole, but implacable-looking, too; evidently a man of a strong *resolution* and a set purpose; a man not desirable to be met rushing down a narrow pass with a gulf on either side, for nothing would turn the man—*Dickens*> <the General . . . had no *resolution*, no will of his own, was bullied into the favors he bestowed—*Pargellis*> <he saw that England was saved a hundred years ago by the high spirit and proud *resolution* of a real aristocracy—*Inge*> *Tenacity* adds to *resolution* the implications of stubborn persistence and of unwillingness to acknowledge defeat <the *tenacity* of the bulldog breed> <this is not to say that the French lack *tenacity*. . . Having determined upon a thing, the French character tends to exceed in its pursuit, and, while fighting for it, to hold out to the death—*Belloc*> <maintained this conviction with a fearless *tenacity*—*Kirk*>

Ana bravery, boldness, audacity, dauntlessness, intrepidity, doughtiness, fearlessness (see corresponding adjectives at BRAVE): valor, *heroism, gallantry: *fortitude, grit, pluck, guts, backbone, sand

Ant cowardice —*Con* timorousness, timidity (see corresponding adjectives at TIMID)

courageous *brave, unafraid, fearless, intrepid, valiant, valorous, dauntless, undaunted, doughty, bold, audacious
Ana mettlesome, *spirited, high-spirited, fiery: resolute, staunch (see FAITHFUL): stout, tenacious, *strong
Ant pusillanimous —*Con* *fearful, apprehensive, afraid: *timid, timorous

course *n* *way, route, passage, pass, artery
Ana circuit (see CIRCUMFERENCE): orbit, scope (see RANGE *n*): drift, trend, *tendency: procedure, *process
court *vb* *invite, woo, bid, solicit

Ana allure, *attract, captivate, charm: toady, truckle, *fawn, cringe

courteous polite, *civil, courtly, gallant, chivalrous
Ana *gracious, affable, cordial: *suave, urbane, politic, diplomatic: considerate, *thoughtful, attentive: obliging, complaisant (see AMIABLE)

Ant discourteous —*Con* *rude, impolite, uncivil, ill-mannered, ungracious: curt, brusque, gruff, blunt (see BLUFF): insolent, supercilious, overbearing (see PROUD)

courtesy, *amenity*, *attention*, *gallantry* are comparable when they denote a manner or an act which promotes

agreeable or pleasant social relations. *Courtesy* suggests consideration for others or deference (as to their rank, sex, or age); it usually implies good breeding and acquired graces but it sometimes connotes innate gentleness or instinctive politeness rather than social training <the beauty of an inherited *courtesy* . . . of a thousand little ceremonies flowering out of the most ordinary relations and observances of life—*Binyon*> <rising to receive him . . . with all the engaging graces and *courtesies* of life—*Dickens*> *Amenity* implies a disposition to make easy the approach to or the continuance of pleasant social relations; when used concretely it may be applied not only to words or acts but to pursuits, interests, or facilities that bring men into rapport <he was . . . a charming letter-writer; above all, an excellent and delightful talker. The gaiety and *amenity* of his natural disposition were inexhaustible—*Arnold*> <he is a man of informed tastes who happens to prize the *amenities*. A snob, however, he is not and never has had to be—*J. M. Brown*> <would she be interested to read it? Might he send it to her? Joan's chaperon . . . put no bar upon these *amenities*—*H. G. Wells*> *Attention* implies a singling out of a particular person for special favor or consideration, or as the recipient of courtesies showing one's admiration or love (as in courting) <the elder son is paying *attention* to his roommate's sister> <many of his visitors were busily deferential toward the young lord, and evidently flattered by his *attentions*—*Carlos Baker*> <she loved her children, but did not unduly spoil them or turn their heads with injudicious *attentions*—*Rose Macaulay*> *Gallantry* stresses devoted attention, sometimes amorous attention, to a lady; it also often connotes ingratiating personal qualities (as ease of address, a dashing style, or a polished manner) <"Now despise me if you dare." "Indeed I do not dare." Elizabeth, having rather expected to affront him, was amazed at his *gallantry*—*Austen*> <Cashel, in a businesslike manner, and without the slightest air of *gallantry*, expertly lifted her and placed her on her feet—*Shaw*>

Ana graciousness, cordiality, affability, geniality (see corresponding adjectives at GRACIOUS): politeness, courteousness, courtliness, chivalrousness or chivalry, civility (see corresponding adjectives at CIVIL): considerateness or consideration, attentiveness, thoughtfulness (see corresponding adjectives at THOUGHTFUL)

Ant discourtesy —*Con* churlishness, boorishness (see corresponding adjectives under BOOR): rudeness, impoliteness, ungraciousness, incivility (see corresponding adjectives at RUDE)

courtly courteous, gallant, chivalrous, polite, *civil
Ana ceremonious, formal, conventional, *ceremonial: elegant, dignified, graceful (see corresponding nouns at ELEGANCE): finished, *consummate

Ant churlish —*Con* ungracious, discourteous, ill-mannered, impolite, *rude, uncivil: *coarse, vulgar, gross: boorish, loutish (see under BOOR)

covenant *vb* pledge, engage, *promise, plight, contract
Ana *agree, concur, coincide: *unite, combine, conjoin, cooperate

cover *vb* *Cover*, *overspread*, *envelop*, *wrap*, *shroud*, *veil* are comparable when meaning to put or place or to be put or placed over or around. *Cover* may imply the putting or placing by a conscious agent or unconscious agency of something on top <*cover* a box> <*cover* a garbage pail> <the lid *covers* the kettle tightly> or on or over a surface (as of a circumscribed area or body) <snow *covered* the ground> <*cover* a table with a cloth> <clothes that *cover* the entire body> <*cover* the shore with wreckage> In these uses *cover* often carries an additional implication of hiding, enclosing, protecting, or sheltering; indeed, in some use

the emphasis is upon one of these implications, the basic idea being obscured (their advance was *covered* by squadrons of airplanes) (he *covered* his anxiety by joining in the laugh) (there is nothing *covered*, that shall not be revealed—*Mt* 10:26) In still another sense *cover* implies an extending so far as to include, embrace, or comprise something (left scarcely enough money to *cover* his debts) (this point has already been *covered* in the argument) (Chaucer's life *covered* the last sixty years of the fourteenth century) (I think your statement *covers* the matter completely) (a situation not *covered* by the rules) **Overspread** usually implies a covering by something that diffuses itself or spreads over a surface; the word carries no clear implication of concealing, sheltering, or protecting, but it does suggest the activity of something that flows, expands, or scatters until the entire surface is covered (clouds *overspread* the sky) (the ground is *overspread* with weeds) (a blush *overspread* his face) (the rising waters quickly *overspread* the valley) **Envelop** suggests the presence or addition of something that surrounds and therefore covers or nearly covers a person or thing on all sides; it is often used of a gas or a liquid or of clothing (enveloped in a fur overcoat) (enveloped in water up to his chin) (till the sweet . . . incense-laden atmosphere . . . enveloped her like a warm and healing garment—*Rose Macaulay*) *Envelop* lends itself to extension and often connotes something impalpable or immaterial as the enveloping element (words stir our feelings . . . through their *enveloping* atmosphere of associations—*Lowe*) (we are surely justified in . . . calling the spiritual presence which *envelops* us the spirit of Christ—*Inge*) **Wrap** comes very close to *envelop* in meaning, but it suggests something that folds or winds about so as to enclose rather than surround; the difference, although sometimes slight, is usually important to idiomatic usage; thus, one *wraps* (better than *envelops*) oneself in blankets or one *wraps* up (not *envelops*) several bars of soap (a closely *wrapped* female figure approached—*Hardy*) In extended use *wrap* usually suggests something that enfolds, enshrouds, or entangles (all the household were *wrapped* in slumber) (the place was suddenly *wrapped* in darkness when the lights gave out) (he found the roots of the poplar *wrapped* closely about the drainpipe) (the mother was *wrapped* up in the welfare of her son) *Shroud* and *veil*, in their extended senses, imply a covering that protects, conceals, or disguises, but *shroud* usually emphasizes the density and *veil* the comparative tenuity of the surrounding element (the queen, *shrouded* in deepest mystery—*Carlyle*) (its proceedings were impenetrably *shrouded* from the public eye—*Prescott*) (the hills, *shrouded* in grey mist—*Buchan*) (their [women's] beauty, softened by the lawn that thinly *veiled* it—*Radcliffe*) (her eyes were quick under a faint dimness that merely *veiled* their vigor—*Roberts*)

Ana *hide, conceal, screen: *close, shut: *enclose, envelop: shield, protect, *defend

Ant bare —*Con* expose, exhibit, display (see *SHOW*): evince, demonstrate, manifest, *show

cover *n* *shelter, retreat, refuge, asylum, sanctuary

Ana hiding or hiding place, concealment, screening or screen (see corresponding verbs at *HIDE*): safety, security (see corresponding adjectives at *SAFE*)

Ant exposure

covert *secret, clandestine, surreptitious, underhand, underhanded, stealthy, furtive

Ana hidden, concealed, screened (see *HIDE*): disguised, dissembled, masked, cloaked, camouflaged (see *DISGUISE* *vb*)

Ant overt —*Con* open, plain, candid, *frank: plain,

clear, manifest, patent, *evident, obvious

covet 1 *Covet, envy, grudge, begrudge* though not closely synonymous all carry the implication of a selfish desire to have something for one's own enjoyment or possession. To *covet* (for fuller treatment see *DESIRE*) is to long inordinately for something which belongs to another (covet a neighbor's piece of property because of its fine view) To *envy* is to regard another with more or less chagrin, repining, jealousy, or hatred because he possesses something one covets or feels should have come to oneself (envy a person his good fortune or his promotion) To *grudge* or *begrudge* implies reluctance or hesitation (often through selfishness, meanness, or stinginess) in giving another what he (or it) ought to have because it is his (or its) due or need (surely you wouldn't *grudge* the poor old man some humble way to save his self-respect—*Frost*) (begrudges every penny he spends on taxis) (she *grudges* every moment spent on housekeeping chores)

2 *crave, *desire, wish, want*

Ana yearn, *long, pine, hanker, thirst, hunger: pant, aspire, *aim

Ant renounce (something desirable) —*Con* resign, *relinquish, yield, surrender: *abjure, forswear: *decline, refuse, reject

covetous, greedy, acquisitive, grasping, avaricious mean having or manifesting a strong desire for possessions, especially material possessions. *Covetous* implies inordinateness of desire; very often, with allusion to the Ten Commandments, it implies longing for something that is rightfully another's (covetous of Shakespeare's beauty—*Cowper*) (first settlers brought fine hunting dogs . . . of which the Indians were so *covetous* that a day was set each year when settlers traded dogs—*Amer. Guide Series: Va.*) It is, however, used with derogatory intent or effect only when envy is implied or wrongful means of acquiring possession are suggested (is not thy kindness subtle, *covetous* . . . expecting in return twenty for one?—*Shak.*) **Greedy** emphasizes absence of restraint in desire; it is a censorious term only when the object of longing is evil either in itself or in immoderation, or cannot be possessed without harm to oneself or to others (greedy for gold) (exploitation [of provinces] by *greedy* proconsuls—*Buchan*) (he loved learning; he was *greedy* of all writings and sciences—*Coulton*) **Acquisitive** implies not only eagerness to possess but the capacity for acquiring and retaining what is desired. Thus, an *acquisitive* mind is not only greedy for knowledge but is capable of absorbing it in large amounts; the *acquisitive* classes of society not only covet possessions but have the means whereby they can constantly add to their possessions (one of those strenuous, *acquisitive* women—*Weeks*) **Grasping** implies eagerness and capacity to acquire wealth and selfishness in its acquisition and often suggests use of wrongful or unfair means (people who are hard, *grasping* . . . and always ready to take advantage of their neighbors, become very rich—*Shaw*) **Avaricious** also implies eagerness and capacity to acquire wealth, but especially wealth in a form (as money) which can be hoarded. It, more than any of the others, emphasizes extreme stinginess (an unremitting, *avaricious* thrift—*Wordsworth*)

Ana *envious, jealous: desirous, lustful (see corresponding nouns at *DESIRE*): avid, athirst, *eager: rapacious, ravaging, gluttonous, ravenous, *voracious

Con self-denying, self-abnegating (see corresponding nouns at *RENUNCIATION*): renouncing, abjuring, forswearing (see *ABJURE*)

cow *vb* *intimidate, browbeat, bulldoze, bully

Ana *frighten, terrorize, terrify: daunt, *dismay, appall: abash, discomfit, rattle, faze, disconcert, *embarrass

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Con animate, *quicken, vivify, enliven: cringe, cower, *fawn

cower cringe, truckle, *fawn, toady

Ana shrink, quail, flinch, blench, wince, *recoil

Con cow, bully, bulldoze, browbeat, *intimidate: *strut, swagger, bristle

coxcomb *fop, dandy, beau, exquisite, dude, buck

coy bashful, *shy, diffident, modest

Ana nice, proper, seemly, *decorous, decent: aloof, detached (see INDIFFERENT): *cautious, wary, chary

Ant pert —*Con* *saucy, arch: brazen, brash, impudent (see SHAMELESS)

cozen *cheat, defraud, swindle, overreach

Ana *dupe, bamboozle, gull, trick, hoax, hoodwink, befool: delude, beguile, *deceive, mislead

cozy *comfortable, snug, easy, restful

Ana sheltering, harboring, housing, lodging (see HARBOR *vb*): *safe, secure: contenting, satisfying (see SATISFY)

Con *miserable, wretched

crabbed *sullen, surly, glum, morose, gloomy, sulky, saturnine, dour

Ana crusty, gruff, brusque, blunt (see BLUFF): testy, choleric, cranky, cross, splenetic, *irascible: snappish, huffy, *irritable

Con *amiable, good-natured, obliging, complaisant: kindly, *kind, benign, benignant: *pleasant, agreeable: genial, affable, *gracious

crack *vb* *break, burst, bust, snap, shatter, shiver

Ana split, rend, cleave, rive (see TEAR)

crack *n* 1 **Crack**, **cleft**, **fissure**, **crevasse**, **crevice**, **cranny**, **chink** are comparable when meaning an opening, break, or discontinuity made by or as if by splitting or rupture. **Crack** basically applies to substances or structures that are subjected to drying, slow disintegration, or shrinking or are fragile or brittle (a *crack* in dry earth) (a *crack* in the plaster) (a *crack* in a china plate) (little rifts and *cracks* are beginning to appear in the whole bland, ecclesiastical facade of Victorian England—*Day Lewis*) **Cleft** implies an opening or break wider and deeper than a crack and often in a natural structure; it may suggest a defect that is constitutional or an opening that is left by nature (a *cleft* in a great rock) (a *cleft* in a palate) (this belief in an irremediable *cleft* within our intelligence must destroy our confidence that either our facts or our values are anywhere near the truth—*Inge*) **Fissure** does not differ materially from *cleft* except that it usually suggests a narrow and deep opening and does not carry so strong an implication of inherent defect. The term may denote a normal structural feature (the *fissures* of the brain are deep dividing lines between certain of its lobes) or an abnormal condition (a *fissure* in the earth's crust) (painful *fissures* at the corners of the mouth—*JAMA*) In extended use it usually suggests something abnormal or undesirable (the loss of Illyria would have made a dangerous *fissure* between East and West—*Buchan*) **Crevasse** is applied generally and usually in its extended use to a fissure or cleft that is broad and deep (an angry clamor which rang down the *crevasse* of Wall Street—*Fortune*) but is particularly applicable to a deep break in the surface of a glacier or a wide breach in a levee (a glacier, riven with deep *crevasses*, yawning fifty or sixty feet wide—*King*) (where the current of a flood locally and violently breaks across a levee a *crevasse* is cut—*von Engeln*) **Crevice** and **cranny** apply especially to a space made by a break or crack (as in a wall or a cliff) that forms a place for dirt to gather or for plants to root and grow (a pile of purple rock, all broken out with red sumac and yellow aspens up in the high *crevices* of the cliffs—*Cather*) (the log church whose *crannies* admitted the drifting snow—*Everett*) **Cranny**

Ana analogous words

ing or acceptance, admitting or admission, receiving or reception (see corresponding verbs at RECEIVE): assenting or assent, acquiescing or acquiescence (see corresponding verbs at ASSENT): reliance, confidence, *trust, faith *Con* doubt, *uncertainty, skepticism: mistrust, *distrust: disbelief, *unbelief, incredulity

credential, **testimonial**, **recommendation**, **character**, **reference** mean something presented by one person to another in proof that he is what or who he claims to be. **Credential** (usually in the plural **credentials**) implies material evidence and especially a letter or document indicating that a person (occasionally a thing) is what he claims (or it seems) to be; the term was originally and is still used of the letter from the sovereign or head of one state to another carried by a new envoy or ambassador and formally presented to the sovereign or head of the state in which he is to serve (an envoy extraordinary from Savoy . . . presented his *credentials* in the Banqueting House—*Macaulay*) The term is often used of a letter presented to show competency or to attest identity, or of statements made or acts performed that serve as proof of what is to follow (if we turn out to be poor managers of our own affairs, we will have inferior *credentials* to present abroad—*W. O. Douglas*) (the putative Professor Moriarty of the fight business, who may or may not die of old age before his *credentials* as an archfiend are established—*Lardner*) (these statements I put forward by way of *credentials* for a comparison which I purpose to make—*Grandgent*) **Testimonial** usually implies a written statement from a person competent to judge the character, qualifications, or merits of another and to testify to his fitness to hold or to fill an office or a position (six *testimonials* were received affirming his fitness for the ministry) (selected what seemed to me from the *testimonials* to be the two best men—*Crofts*) However, the word is often used as an equivalent of **recommendation**, a term which implies that the statement comes from one (as a former employer or teacher) who commends a person to the notice of a possible employer (armed with several *recommendations* he started out to seek a job) **Character**, which in this sense is used chiefly in Great Britain, is the designation given to a statement furnished by a former employer about the qualities and habits of a person as manifested while in his employ (then came . . . the coachman, the grooms, the sweeper. For each and all of these I had to write *characters*—*John Lang*) Although **reference** may imply no more than the giving of the name of a person from whom information regarding another may be obtained (as by a possible employer or landlord) it increasingly tends to be employed as a synonym of *recommendation* or *character* (Mrs. Blank told the woman she would let her know when she had examined her *references*) (she had lost all her *references* and was afraid to apply for a job)

Ana certification, accreditation, endorsement, sanction (see corresponding verbs at APPROVE)

credible believable, *plausible, colorable, specious *Ana* *probable, likely, possible: reasonable, *rational: trustworthy, *reliable, dependable *Ant* incredible —*Con* fabulous, mythical, apocryphal, *fictitious: dubious, *doubtful, questionable

credit *n* 1 *belief, faith, credence

Ana reliance, *trust, confidence, faith: assurance, certainty, conviction, *certainty

Con *unbelief, disbelief, incredulity: *distrust, mistrust: doubt, *uncertainty

2 prestige, authority, *influence, weight

Ana reputation, repute, *fame, renown: authority,

*power, sway

Ant discredit —*Con* opprobrium, obloquy, ignominy, disrepute (see DISGRACE)

3 **Credit**, **asset** are comparable when they mean a person or a thing that enhances another. Someone or something is a **credit** to another when he or it is a source of honor or of increase in good repute (the boy is a *credit* to his school) (his integrity is a *credit* to his upbringing) Someone or something is an **asset** to another when he or it adds to the usefulness, the worth, the advantages, or the attractiveness of another (the new teacher is an *asset* to the school) (his knowledge of how to deal with people made him an *asset* to his employer)

credit *vb* accredit, *ascribe, assign, attribute, impute, refer, charge

credulity gullibility (see under CREDULOUS)

Ana credence, credit, *belief

Ant incredulity: skepticism —*Con* *uncertainty, doubt, suspicion, mistrust

credulous, **gullible** both mean unduly trusting or confiding but they differ significantly in their implications as do their corresponding nouns **credulity** and **gullibility**. **Credulous** and **credulity** stress a tendency to believe readily and uncritically whatever is proposed for belief without examination or investigation; typically they suggest inexperience, naiveté, or careless habits of thought rather than inherent incapacity (far from being unconscious of heredity . . . men were insanely *credulous* about it; they not only believed in the transmission of qualities and habits from generation to generation, but expected the son to begin mentally where the father left off—*Shaw*) (Hess, who was as deeply interested in psychic matters as Lanny, and far more *credulous*—*Upton Sinclair*) (we know from the satiric comments of Lucian and from the ingenuousness of Pliny the deep *credulity* of the average Roman—*Buchan*) **Gullible** and **gullibility**, on the other hand, stress the idea of being duped; they suggest more the lack of necessary intelligence than the lack of skepticism, and connote the capacity for being made a fool of (it was discovered that this man who had been raised to such a height by the credulity of the public was himself more *gullible* than any of his depositors—*Conrad*) (that any of us may be so *gullible* and so forgetful as to be duped into making “deals” at the expense of our Allies—*Roosevelt*) (monstrous was the *gullibility* of the people. How could an overcoat at twelve and sixpence be “good”—*Bennett*)

Ana assenting, acquiescing or acquiescent, agreeing, subscribing (see corresponding verbs at ASSENT): believing, crediting (see corresponding nouns at BELIEF)

Ant incredulous: skeptical —*Con* uncertain, doubtful, suspicious, mistrustful (see corresponding nouns at UNCERTAINTY)

creed faith, persuasion, *religion, denomination, sect, cult, communion, church

creep *vb* **Creep**, **crawl** mean to move slowly along a surface in a prone or crouching position. **Creep** is more often used of quadrupeds or of human beings who move on all fours and proceed slowly, stealthily, or silently (a baby *creeps* before it walks) (crouching down . . . in a corner . . . he made out the three fishermen *creeping* through some rank grass—*Dickens*) and **crawl** of elongated animals with no legs (as snakes and some worms) or with many small legs (as centipedes) that seem to move by drawing the body along the ground or a surface, or of human beings who imitate such movement (when she saw the snake *crawling* along the path, she screamed) (he was so badly injured that he could only *crawl* to the open door) In extended use both words often imply

intolerable slowness <tomorrow, and tomorrow, and tomorrow, *creeps* in this petty pace from day to day—*Shak.*> <that sad, disappointing, disillusioning . . . war *crawled* through that bitter winter of defeat—*Rose Macaulay*> Both often imply a slow movement of a person, especially into another's favor or into a given status or position, but *creep* usually suggests stealthy and insinuating methods <*creep* along the hedge-bottoms, an' thou'll be a bishop yet—*Tennyson*> <even in later and more enlightened times, the study of literature has *crept* its way into official Cambridge—*Quiller-Couch*> and *crawl*, procedure by abjectness, servility, cringing, or groveling <*Cranmer* . . . hath *crawled* into the favor of the king—*Shak.*> <pomp-fed king . . . art thou not the veriest slave that e'er *crawled* on the loathing earth?—*Shelley*> Both also imply a sensation such as might be produced by lice, fleas, or other human or animal parasites, but *creep* suggests a shivering, nervous reaction, and *crawl*, an intense feeling of distress and discomfort <something in their countenances that made my flesh *creep* with a horror I cannot express—*Swift*> <his flesh was *crawling* with the need of alcohol—*Doherty*>

crevasse *crack, cleft, fissure, crevice, cranny, chink
Ana chasm, *gulf: *breach, split, rent, rift

crevice *crack, cleft, fissure, crevasse, cranny, chink
Ana *breach, split, rift, rent: *break, gap

crime *offense, vice, sin, scandal
Ana *fault, failing, frailty, foible, vice
Con virtue, *excellence, merit, perfection

criminal *n* Criminal, felon, convict, malefactor, culprit, delinquent mean, in common, one guilty of a transgression or an offense especially against the law. **Criminal** designates one who commits some serious violation of the law, of public trust, or of common decency, as vicious unwarranted attack, embezzlement, or murder. **Felon**, the legal term for one popularly called a criminal, designates one guilty of a felony, which used with legal exactness covers all lawbreaking punishable by death or prolonged confinement (as in a state penitentiary) and is distinguished from a misdemeanor <men were transported with the worst *felons* for poaching a few hares or pheasants—*Shaw*> <the casual or accidental *felon* who is impelled into a misdeed by force of circumstances—*Banay*> **Convict** basically denotes one convicted of a crime or felony but has come more generally to signify any person serving a long prison term <the stranger turned out to be a *convict* who had escaped on the way to prison> <a riot among *convicts* in a state penitentiary> **Malefactor** signifies one who has committed an evil deed or serious offense but suggests little or no relation to courts or punishment <most of our *malefactors*, from statesmen to thieves—*T. S. Eliot*> <a *malefactor* robbing small stores at night and setting fire to them> **Culprit** often carries the weakened sense of one guilty of a crime <after the series of crimes, the police tried for several weeks to find the *culprit*> but more generally either suggests a trivial fault or offense, especially of a child <the *culprits* were two boys, one about twelve years old, the other about ten—*Green Peyton*> or applies to a person or thing that causes some undesirable condition or situation <another group of supposed *culprits* who are being blamed for the present inflationary situation—*Waage*> <the *culprit* holding up world peace and understanding—*Lydgate*> **Delinquent** applies to an offender against duty or the law especially in a degree not constituting crime; in its present semilegal use, in application to juvenile offenders against civil or moral law, it usually implies a habitual tendency to commit certain offenses and contrasts with *criminal* in implying a sociological or psychological rather than

judicial attitude toward the offender <whether a customer who has missed a payment is . . . a habitual *delinquent*—*Phelps*> <we label as *delinquents* those who do not conform to the legal and moral codes of society—*Federal Probation*>

Ana offender, sinner (see corresponding nouns at OFFENSE); transgressor, trespasser, violator (see corresponding nouns at BREACH)

cringe cower, truckle, *fawn, toady
Ana *recoil, quail, flinch, blench, wince: bow, cave, *yield, submit, defer

cripple *vb* 1 *maim, mutilate, batter, mangle
Ana *injure, hurt
2 disable, *weaken, enfeeble, debilitate, undermine, sap

Ana damage, harm, impair, mar (see INJURE)

crisis exigency, emergency, pinch, *juncture, pass, contingency, strait

crisp 1 brittle, short, friable, *fragile, frangible
Con *limp, flabby, flaccid
2 clear-cut, cutting, *incisive, trenchant, biting
Ana terse, pithy, laconic, succinct, *concise: piquing, stimulating, provoking or provocative (see corresponding verbs at PROVOKE)

criterion *standard, touchstone, yardstick, gauge
Ana test, proof, trial, demonstration (see under PROVE): *principle, axiom, law: judging or judgment, adjudgment, adjudication (see corresponding verbs at JUDGE)

critical 1 **Critical**, **hypercritical**, **faultfinding**, **captious**, **caviling**, **carping**, **ensorious** are comparable when they mean exhibiting the spirit of one who detects and points out faults or defects. **Critical**, when applied to persons who judge and to their judgments, is the one of these terms that may imply an effort to see a thing clearly, truly, and impartially so that not only the good in it may be distinguished from the bad and the perfect from the imperfect, but also that it as a whole may be fairly judged or valued <a tête-à-tête with a man of similar tastes, who is just and yet sympathetic, *critical* yet appreciative . . . is a high intellectual pleasure—*Benson*> **Critical** may also imply a keen awareness of faults or imperfections with often the suggestion of loss of fairness in judgment <the attitude of Euripides towards the popular religion is . . . clearly and frankly *critical*—*Dickinson*> <the vast audience . . . was wont to be exceedingly *critical*. Bungling work drew down upon the headsman the execrations of the mob, and not infrequently placed his own life in danger—*Replier*> When this loss of fairness is to be implied or when the judge's undue awareness of defects and overemphasis of them is to be suggested, writers often prefer **hypercritical** to **critical** <the audience that night was, as the actors soon knew, *hypercritical*> <he was . . . exceedingly difficult to please, not . . . because he was *hypercritical* and exacting, but because he was indifferent—*Bennett*> <constant *hypercritical* belittling of the efforts of others—*Rosen & Kiene*> **Faultfinding** sometimes takes the place of **critical**, sometimes of **hypercritical**, but usually suggests less background, less experience, or less fastidiousness than either; it is therefore frequently used when an unreasonably exacting or a querulous temperament is also to be suggested <a continually *faultfinding* reviewer of books> <a *faultfinding* parent> <Mrs. Stebbins's book would be better throughout for a more critical (I don't mean *faultfinding*) account of her authors' works—*Bentley*> **Captious** implies a readiness, usually a temperamental readiness, to detect trivial faults or to take exceptions on slight grounds, because one is either unduly exacting or perversely hard to please <is it *captious* to say that, when Manoah's

locks are called "white as down," whiteness is no characteristic of down?—*Landon*) <after reading a work of such amplitude it seems *captious* to protest that the motivating forces . . . are inadequately analyzed—*Bruun*> **Caviling** usually implies a captious disposition but stresses the habit or act of raising picayune or petty objections <*caviling* legislators who delay the passage of a bill> <the most *caviling* mind must applaud their devoted sense of duty—*Willis*> <those *caviling* critics who snipe from the musty back rooms of libraries—*Ramsdell*> **Carping**, far more than *hypercritical* or *faultfinding*, implies ill-natured or perverse picking of flaws and often in addition suggests undue emphasis upon them as blameworthy <and to that end we wished your lordship here, to avoid the *carping* censures of the world—*Shak.*> <that *carping* spirit in which she had been wont to judge of his actions—*Trollope*> **Censorious** implies a disposition or a tendency to be both severely critical and condemnatory of what one criticizes <such is the mode of these *censorious* days, the art is lost of knowing how to praise—*Sheffield*>

Ana judicious (see WISE); *judicial: fastidious, finicky, particular, *nice, fussy, squeamish: discriminating, discerning, penetrating (see corresponding nouns at DISCERNMENT): understanding, comprehending, appreciating (see UNDERSTAND)

Ant uncritical —**Con** *superficial, shallow, cursory
2 crucial, *acute

Ana decisive, determinative, *conclusive: momentous, consequential, weighty, significant, important (see corresponding nouns at IMPORTANCE)

criticism, critique, review, blurb, puff are comparable when meaning a discourse (as an essay or report) presenting one's conclusions after examining a work of art and especially of literature. None of these terms has a clearly established and narrowly delimited meaning, but, in general, each can be distinguished from the others with reference to its leading implications and its place in usage. **Criticism** is of all these terms the most nearly neutral and the least capable of carrying derogatory connotations. The proper aim and the content of a criticism have never been definitely fixed and are still subjects of controversy, but the term usually implies an author who is expected to have expert knowledge in his field, a clear definition of his standards of judgment, and an intent to evaluate the work under consideration <read every *criticism* of a new play the day following its first performance> **Criticism** is more often applied to the art, craft, or collective writings of such writers or speakers than to the individual article <this feeling, that contemporary judgments are apt to turn out a little ludicrous . . . has converted much *criticism* of late from judgment pronounced into impression recorded—*Galsworthy*> <I go on the assumption that a review is simply a short piece of *criticism*, and that it should be as good criticism as its writer can make it—*Matthiessen*> Because of this tendency to restrict the use of *criticism* to its general sense, **critique** is sometimes preferred as a designation of a critical essay, especially of one dealing with a literary work; but currently it is often avoided as an affectation <Jeffrey's *critiques* in the *Edinburgh Review*> **Review** is now the common designation of a more or less informal critical essay dealing particularly with new or recent books and plays. The term is frequently preferred by newspaper and magazine critics as a more modest designation of their articles than *criticism* or *critique* and as permitting less profound or exhaustive treatment or as requiring only a personal rather than a final judgment of the merits and faults of the work. **Review** gener-

ally suggests literary criticism of a less pretentious kind, giving in general a summary of a book's contents and the impressions it produces on the reviewer <the Sunday editions of many newspapers have a supplement devoted to book *reviews*> **Blurb** is applied chiefly to a publisher's description of a work printed usually on the jacket of a book for the purposes of advertisement (as a term of reprobation for fulsome on the "jackets," or dust-cloaks, of new books, *blurb* is a peach of the first order—*Montague*) **Puff**, a word once common for any unduly flattering account (as of a book or play), in current use applies especially to a review that seems obviously animated by a desire to promote the sale of a book or the success of a play regardless of its real merits or to one that is markedly uncritical in its flattering comments <*puffs* . . . with which booksellers sometimes embroider their catalogs—*John Carter*>

criticize, reprehend, blame, censure, reprobate, condemn, denounce are comparable when they mean to find fault with someone or something openly, often publicly, and with varying degrees of severity. **Criticize** in its basic sense does not carry faultfinding as its invariable or even major implication; rather it suggests a discernment of the merits and faults of a person or thing <know well each ancient's [classic poet's] proper character; his fable, subject, scope in ev'ry page; religion, country, genius of his age: without all these at once before your eyes, cavil you may, but never *criticize*—*Pope*> In ordinary use, however, the word does commonly imply an unfavorable judgment or a pointing out of faults and is probably the term most frequently used to express this idea <*criticize* a play severely> <averse to being *criticized*> <avoid *criticizing* a person's errors in speech> <it is foolish . . . to *criticize* an author for what he has failed to achieve—*Huxley*> <we are trying to get away from the word "management" because it has been lambasted, ridiculed, *criticized*, and blasted—*Personnel Jour.*> **Reprehend** in present-day English takes a person as an object far less often than a thing, a quality, or an action. In such use it not only explicitly suggests the approach of a critic and his disapproval but implies a more or less severe rebuke <*reprehend* not the imperfection of others—*Washington*> <the thing to be *reprehended* is the confusing misuse of the word "verse"—*Grandgent*> **Blame** fundamentally implies speaking in dispraise of a person or thing rather than in his or its favor; in general it also suggests the mental approach of a critic or detector of faults <some judge of authors' names, not works, and then nor praise nor *blame* the writings, but the men—*Pope*> <Heine . . . cared . . . whether people praised his verses or *blamed* them—*Arnold*> <Aristotle, while *blaming* the man who is unduly passionate, *blames* equally the man who is insensitive—*Dickinson*> **Blame** sometimes loses much of its opposition to *praise* and then may strongly convey an imputation or accusation of wrongdoing <one cannot *blame* starving children who steal food> or of guilt <there is no one to *blame* but yourself> Again *blame* may connote ultimate responsibility rather than actual guiltiness and then can take a thing as well as a person for its object <the German family, whose patriarchal authoritarianism has been *blamed* . . . for militarism and despotism—*Padover*> <the drugfiend will get drugs somewhere: if he finds his poppy and mandragora in poetry, you must *blame* his habit, not the poet—*Day Lewis*> Since *blame* no longer invariably implies the simple reverse of commendation, **censure** is usually preferred to *blame* as the antonym of *praise*. This word carries a stronger suggestion of authority or competence in the critic or judge than does

blame, as well as a clearer connotation of reprehension or, sometimes, of a reprimand (the judge *censured* the jury for their failure to render a verdict on the evidence) (the official was not dismissed until after he had more than once been severely *censured* for his mistakes of judgment) (I lose my patience, and I own it too, when works are *censured*, not as bad but new—*Pope*) (it is not one writer's business to *censure* others. A writer should expound other writers or let them alone—*F. M. Ford*) **Reprobate** is often used as though it were a close synonym of *reproach* or *rebuke* ("I put it to you, miss," she continued, as if mildly *reprobating* some want of principle on Lydia's part—*Shaw*) Distinctively, however, it may imply not only strong disapproval and, usually, vigorous censure but also a rejection or a refusal to countenance (he *reprobated* what he termed the heresies of his nephew—*Irving*) (that wanton eye so *reprobated* by the founder of our faith—*L. P. Smith*) **Condemn** carries even stronger judicial connotations than *censure*, for it implies a final decision or a definitive judgment; it commonly also suggests an untempered judgment which is wholly unfavorable and merciless (condemn the fault, and not the actor of it? Why, every fault's *condemned* ere it be done—*Shak.*) (the freedom with which Dr. Johnson *condemns* whatever he disapproves, is astonishing—*Burney*) (no conceivable human action which custom has not at one time justified and at another *condemned*—*Krutch*) **Denounce** adds to *condemn* the implication of public declaration or proclamation (in all ages, priests and monks have *denounced* the growing vices of society—*Henry Adams*) (nothing . . . makes one so popular as to be the moral denouncer of what everybody else *denounces*—*Brooks*) *Ana* inspect, examine, *scrutinize, scan: *judge, adjudge: appraise, evaluate, assess (see ESTIMATE)

critique *criticism, review, blurb, puff

crochet *vb* knit, *weave, plait, braid, tat

crony comrade, companion, *associate

Ana intimate, *friend, confidant

crook *vb* *flex, bow, buckle

Ana *curve, bend, twist: contort, *deform

crooked, **devious**, **oblique** mean not straight or straightforward. **Crooked** may imply the presence of material curves, turns, or bends (a *crooked* back) (a *crooked* road) (the *crooked* trunk of a tree) In its frequent extended use it applies especially to practices (as fraud, cheating, or graft) involving marked departures from rectitude (*crooked* dealings) (a *crooked* politician) (*crooked* policies) (they are a perverse and *crooked* generation—*Deut* 32:5) **Devious** implies departure from a direct, appointed, regular, or fixed course and hence suggests wandering or errancy and, often, circuitousness (we sought with relief the empty roads of the fens, and, by *devious* routes, wound our way between golden buttercups and brown cattle—*Lucas*) (he went by *devious* ways, a little proud of himself for knowing the shortcuts, through a building used as a thoroughfare from one street to another, through what had once been the churchyard of an ancient church—*Archibald Marshall*) The term as applied to persons and their acts or practices usually implies unreliability and often trickiness or shiftiness (the *devious* policies of the administration) (he had been a *devious* rascal—*Bennett*) (the marks of the thoroughbred were simply not there. The man was blatant, crude, overly confidential, *devious*—*Mencken*) **Oblique** implies a departure from the perpendicular or horizontal direction, or a slanting course (an *oblique* tower) (an *oblique* sunbeam) and in extended use suggests indirection or lack of perfect straightfor-

wardness (an *oblique* glance) (all censure of a man's self is *oblique* praise—*Johnson*) (their rebellion was an act of *oblique* homage—*Collet*) (people . . . who think that . . . the Japanese people are maddeningly *oblique*—*Faubion Bowers*)

Ana *awry, askew: twisted, bended or bent (see corresponding verbs at CURVE); distorted, contorted, deformed, warped (see DEFORM); tortuous, *winding; corrupt, nefarious, iniquitous, *vicious: stealthy, furtive, underhand (see SECRET)

Ant straight —**Con** *straightforward, aboveboard, forthright: *upright, honest, scrupulous, conscientious, honorable, just

crop *vb* *shear, poll, clip, trim, prune, lop, snip

Ana *cut, chop, hew, slash: *detach, disengage

cross *n* trial, tribulation, affliction, visitation

cross *adj* cranky, testy, touchy, choleric, splenetic, *irascible

Ana captious, carping, caviling, faultfinding (see CRITICAL); *irritable, fractious, peevish, petulant, snappish, waspish, querulous

crosswise, **crossways** *across, athwart

crochet *caprice, freak, fancy, whim, whimsy, conceit, vagary

crow *vb* *boast, brag, vaunt, gasconade

crowd *vb* 1 *press, bear, bear down, squeeze, jam

Ana *push, shove, thrust, propel: *force, compel, constrain

2 *pack, cram, stuff, ram, tamp

Ana compress (see CONTRACT): *compact, consolidate, concentrate

crowd *n* **Crowd**, **throng**, **press**, **crush**, **mob**, **rout**, **horde** are comparable when they mean a more or less closely assembled multitude usually of persons. **Crowd** basically implies a close gathering and pressing together (the *crowd* came pouring out with a vehemence that nearly took him off his legs—*Dickens*) It often implies a merging of the individuality of the units into that of the mass (study the psychology of *crowds*) (no one in European art has rivalled Keion in the mastery of *crowds* of men each individually alive yet swept along by a common animating impulse, whether the raging passion of the victors or the panic of the routed—*Binyon*) (all our ideas are *crowd* ideas—*Ferril*) **Throng** varies so little in meaning from *crowd* that the two words are often used interchangeably without loss. **Throng** sometimes carries the stronger implication of movement and of pushing and the weaker implication of density (*throngs* circulating through the streets) (so they went northward . . . past droves and droves of camels, armies of camp followers, and legions of laden mules, the *throng* thickening day by day—*Kipling*) (sailors hung from yards and bowsprits to shout the names of vessels to the bewildered, harried *throng*—*Kenneth Roberts*) **Press** differs from *throng* in being more often applied to a concentrated mass in which movement is difficult because of the numbers, but otherwise it also suggests pushing or pressing forward (perched on the folded-down top of a convertible, to roll down the boardwalk with a *press* of people following her car—*Pete Martin*) **Crush** carries a stronger implication than either *crowd* or *throng* of compactness of the group, of offering difficulty to one who wishes to make his way through it, or of causing discomfort to one who is part of it (the *crush* was terrific for that time of day . . . for the street was blocked—*Woolf*) (a *crush* of dancing couples packed the floor—*Basso*) **Mob** strictly applies to a crowd or throng bent on the accomplishment of riotous or destructive acts (the citizens were terrorized for weeks by *mobs*)

⟨a *mob* . . . which pulled down all our prisons—*Burke*⟩ Especially in the United States and in Australia *mob* may be employed as an intensive of *crowd*, sometimes implying more disorganization (it is the tendency of a large crowd to become a *mob*) but at other times denoting merely an extremely large crowd (you could scarcely call it a crowd; it was a *mob*) In theatrical use *mob* applies to any large and manifestly agitated crowd of persons that has to be directed as a unit to achieve the proper or the intended effects. **Rout** applies to an especially disorderly or tumultuous mob (a hiring *roust* scraped together from the dregs of the people—*Milton*) (the busy *rout* of the street could be seen. He loved the changing panorama of the street—*Dreiser*) **Horde** usually applies to an assemblage or to a multitude massed together. It is sometimes preferred to *crowd*, *throng*, *mob*, or *rout* when a contemptuous term is desired, especially one that suggests the rude, rough, or savage character of the individuals who constitute the multitude or mass (hordes of small boys roving through the streets) (the horde of excursionists took possession of the beach) (hordes of sturdy rogues and vagrants—*Fussell*)
Ana *multitude, army, host, legion

crucial critical, *acute

Ana threatening, menacing (see THREATEN): trying, afflicting, torturing or torturous (see corresponding verbs at AFFLICT)

crude *rude, rough, uncouth, raw, callow, green

Ana primitive, primeval (see PRIMARY): *immature, unmatured: *coarse, vulgar, gross

Ant consummate, finished —*Con* cultivated, refined, cultured (see corresponding nouns at CULTURE): *mature, mellow, adult: matured, developed, ripened (see MATURE *vb*)

cruel inhuman, fell, *fierce, truculent, ferocious, barbarous, savage

Ana atrocious, *outrageous, monstrous, heinous: *brutal, bestial: merciless, relentless, implacable, *grim
Ant pitiful —*Con* compassionate, *tender, sympathetic: merciful, clement, *forbearing, lenient: humane (see CHARITABLE)

cruise *n* voyage, tour, trip, *journey, jaunt, excursion, expedition, pilgrimage

crumble disintegrate, decompose, *decay, rot, putrefy, spoil

crush *vb* 1 **Crush, mash, smash, bruise, squash, macerate** are comparable when they mean to reduce or be reduced to a pulpy or broken mass. **Crush** implies a compressing between two hard or resistant surfaces that succeeds, usually, in destroying the shape and integrity of the mass; the result depends on the texture of what is crushed, whether it is permanently deformed and destroyed, broken into fragments, or capable of springing back into shape (crushed her fingers between the rollers of a mangle) (the ostrich leaveth her eggs in the earth . . . and forgetteth that the foot may crush them—*Job* 39:14-15) (many persons were crushed to death in the panic) (this hat crushes easily) (the crushed leaves of mint have a strong smell) **Mash** implies the beating or pounding of something, often deliberately, to a soft pulp; in this sense *mash* may come close to *crush* in meaning (this hand shall . . . mash all his bones—*Pope*) but it is more often used in reference to the preparation of certain vegetables and fruits in the kitchen by similar means (mash cooked potatoes) (mash strawberries for jam) **Smash** carries a stronger implication of violence in implying a force that shatters or batters; it also often suggests the uselessness for all purposes of what is smashed (smash a bottle to bits) (the upshot of which, was, to

smash this witness like a crockery vessel, and shiver his part of the case to useless lumber—*Dickens*) (his hair was black and close-cut; his skin indurated; and the bridge of his nose smashed level with his face—*Shaw*) **Bruise**, though more commonly used in reference to an injury of the flesh, also carries a sense related to that of *crush*, *smash*, or *mash* in which it implies the pressing or beating of something so as to break it down with the effect of setting the juices running or of softening the fibers (nor bruise her flowerets with the armed hooves of hostile paces—*Shak.*) (some scatt'ring pot-herbs . . . bruised with vervain—*Dryden*) **Squash** differs from the preceding words chiefly in its applicability to objects that are very soft (as through overripeness or immaturity) or that require little effort to crush by pressure (every pear that fell from the tree was squashed) (he squashed under his foot every beetle he could find) **Macerate** is used chiefly in reference to a process of steeping something in a liquid so as to soften or detach its fibers or to wear away its soft parts; the softening or detachment of fibers is chiefly emphasized, and *macerate* often refers to a step in an industrial process or to a part of a digestive process (macerate rags as the first step in papermaking) (corn is macerated in the gizzard of a fowl) The term may, however, imply a wearing away of the soft part from whatever cause; it particularly suggests a wasting away of the body (as through fasting or worry) (the fierce unrest, the deathless flame, that slowly macerates my frame—*Martin*)

Ana *press, squeeze, crowd, jam: batter, mangle, *maim: *beat, pound

2 **Crush, quell, extinguish, suppress, quench, quash** are comparable when they mean to bring to an end by destroying or defeating. **Crush** in this sense retains from its basic meaning the implication of being destroyed or injured severely by pressure from without, but it differs in being more often applied to immaterial than to material things and in implying a force at work that makes for the destruction of effective opposition or operation especially by preventing resistance or by depriving of the freedom necessary for expansion or thriving (truth, crushed to earth, shall rise again—*Bryant*) (the free play of passion and thought, the graces and arts of life . . . were crushed out of existence under this stern and rigid rule—*Dickinson*) (the mere volume of work was enough to crush the most diligent of rulers—*Buchan*) **Quell** means to overwhelm completely and reduce wholly to submission, to inactivity, or to passivity; the term may be used in respect to people or animals or to (usually immaterial) things; thus, one may quell a riot or the rioters; quell a mutiny or the mutineers (the nation obeyed the call, rallied round the sovereign, and enabled him to quell the disaffected minority—*Macaulay*) (had some difficulty in quelling the tumult that arose when the bell was answered—*Shaw*) **Extinguish** (see also ABOLISH) implies an end as sudden or as complete as the blowing out of a candle or the putting out of a fire with water (the sudden and soon extinguished genius of Marlowe—*T. S. Eliot*) (lives that were to be extinguished in Hitler's gas chambers—*Deutscher*) **Suppress** differs from *crush* especially in implying conscious action, in more strongly suggesting a power or force that openly quells or extinguishes, and in more often taking as its object a definite objective person or thing (suppress a political organization) (one purpose of the purchase was to suppress competition between the two roads—*Justice Holmes*) (deeply as the Cistercians disliked and distrusted Abelard, they did not violently suppress him—*Henry Adams*) **Quench**, which is close to *extinguish*

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

in its basic meaning, differs from it in extended use in stressing a satisfying, dampening, cooling, or decreasing (as of ardor) as the cause of extinction. Although it is used specifically of thirst, it is also frequently referred to emotions, sensations, and desires <many waters cannot *quench* love—*Song of Solomon* 8:7> <to be damned by the praise that *quenches* all desire to read the book—*T. S. Eliot*> <he then turns to those who do not belong to the leisure class, and *quenches* their aspirations after wisdom—*Crothers*> **Quash** basically implies a shaking or dashing that destroys; in the present sense (see also ANNUL) it implies a sudden and summary extinction <*quash* a rebellion> <he foresaw that the dreadful woman . . . would *quash* his last chance of life—*Dickens*> <the lady, together with her family, was dispatched to the safe distance of the Far East. . . . Thus was *quashed* an idyll—*S. H. Adams*>

Ana *destroy, demolish: *ruin, wreck: annihilate, *abolish: obliterate, blot out, efface (see ERASE)

crush *n* press, throng, *crowd, horde, mob, rout

Ana *multitude, army, legion, host

crusty brusque, gruff, blunt, curt, *bluff

Ana snappish, waspish, *irritable: choleric, splenetic, cranky, testy, *irascible: crabbed, surly, saturnine, dour (see SULLEN)

cry *vb* **Cry, weep, wail, keen, whimper, blubber** mean to show one's grief, pain, or distress by tears and utterances, usually inarticulate utterances. *Cry* and *weep* (the first the homelier, the second the more formal term) are frequently interchanged. *Cry* is more apt to stress the audible lamentation, *weep*, the shedding of tears (if you hear a child *cry* in the night, you must call to the nurse—*Shak.*) <*weep* not, sweet queen; for trickling tears are vain—*Shak.*> <*wept* unseen, unheeded *cried*—*Millay*> **Wail** usually implies expressing grief without restraint, in mournful and often long-drawn-out cries, moans, and lamentations <"Where is my father, and my mother, nurse?" "Weeping and *wailing* over Tybalt's corpse"—*Shak.*> <hear him, o'erwhelmed with sorrow, yet rejoice; no womanish or *wailing* grief has part—*Cowper*> <soon as she . . . saw the lifeblood flow . . . *wailing* loud she clasped him—*Shelley*> **Keen** implies the wailing lamentations or dirges of a professional mourner <*keen* [means] hideous, dismal wailing or howling practiced in Ireland among the humbler classes in token of grief, at funerals, and on hearing news of a death or other calamity—*Wylde*> <*keened* our sorrow—*Punch*> <*keened* like a squaw bereft—*M. H. Moody*> **Whimper** implies low, whining, broken cries (as made by a baby or puppy) <*whimpering* in fright> <had seen the old general *whimper* like a whipped dog—*F. M. Ford*> **Blubber** implies scalding, disfiguring tears and noisy, broken utterances (as of a child who cannot have his way) <he always *blubbers* until those who oppose him give in to him> <tears came easy to him; he could *blubber* like a child over a slight or a disappointment—*S. H. Adams*>

Ana lament, bewail, bemoan, *deplore: sob, moan, *sigh, groan

cry *n* vogue, rage, *fashion, style, mode, fad, craze, dernier cri

crying *adj* *pressing, urgent, imperative, importunate, insistent, exigent, instant

Ana outstanding, conspicuous (see NOTICEABLE): compelling, constraining (see FORCE vb)

cryptic enigmatic, *obscure, dark, vague, ambiguous, equivocal

Ana puzzling, perplexing, mystifying (see PUZZLE *vb*): occult, esoteric, *recondite: *mysterious, arcane

cuddle fondle, dandle, pet, cosset, *caress

cuff *vb* *strike, hit, smite, punch, slug, slog, swat, clout, slap, box

cull *vb* pick, single, *choose, select, elect, opt, prefer
culmination peak, climax, apex, acme, *summit, pinnacle, meridian, zenith, apogee

culpability *blame, guilt, fault

Ana responsibility, accountability (see corresponding adjectives at RESPONSIBLE)

culpable guilty, *blameworthy

Ana *responsible, accountable, answerable, amenable, liable

culprit *criminal, felon, convict, malefactor, delinquent
Ana *prisoner: offender, sinner (see corresponding nouns at OFFENSE): scoundrel, blackguard, miscreant, rogue, rascal (see VILLAIN)

cult sect, denomination, *religion, communion, faith, creed, persuasion, church

cultivar *variety, subspecies, race, breed, strain, clone, stock

cultivate nurture, *nurture, foster, cherish

Ana develop, *mature, ripen: raise, rear (see LIFT): educate, train, instruct, *teach: *improve, better, ameliorate
Con *neglect, ignore, disregard, slight

cultivation breeding, *culture, refinement

culture *n* 1 **Culture, cultivation, breeding, refinement** are comparable when they denote a quality of a person or group of persons which reflects his or their possession of excellent taste, manners, and social adjustment. **Culture** implies a high degree of enlightenment that has been acquired by familiarity with what is best in the civilized life of many ages and lands; in addition, it usually suggests fineness of taste, delicacy of perception, and gracious urbanity of manners <a man of *culture*> <*culture*, the acquainting ourselves with the best that has been known and said in the world—*Arnold*> **Cultivation** is often preferred to *culture* because it suggests the continuous pursuit of culture and the self-discipline which accompanies such pursuit, rather than its achievement, and is therefore more modest and often more appropriate <he has found many persons of *cultivation* in the city to which he has recently moved> <gratitude is a fruit of great *cultivation*; you do not find it among gross people—*Johnson*> <a work of prose fiction written by one who not only possesses obvious *cultivation* but is also a distinguished practicing poet—*Stegmuller*> **Breeding** implies such training or lifelong experience in courtesy and the amenities of gracious living that one is never at a loss how to act or what to say; moreover the word often suggests poise, tact, an ability to come forward or to retire at will or at need, and other social qualities which mark one out even among one's social equals <I am a gentleman of blood and *breeding*—*Shak.*> <as men of *breeding*, sometimes men of wit, t'avoid great errors, must the less commit—*Pope*> <politely learned, and of a gentle race, good *breeding* and good sense gave all a grace—*Cowper*> **Refinement** implies not only the absence (often the eradication) of all that is gross, vulgar, or merely common but also the presence of fineness of feeling, delicacy of perception or understanding, and fastidiousness <he had true *refinement*; he couldn't help thinking of others, whatever he did—*Galsworthy*>

2 *civilization

cumber *burden, encumber, weigh, weight, load, lade, tax, charge, saddle

Ana see those at ENCUMBER

cumbersome, cumbrous ponderous, *heavy, weighty, hefty

Ana burdensome, *onerous: *awkward, clumsy: *irk-some, wearisome, tiresome

Con compact, *close: *easy, light, facile

cumulative, **accumulative**, **additive**, **summative** are comparable when meaning increasing or produced by the addition of like or assimilable things. Something is **cumulative** which is constantly increasing or is capable of constant increase (as in size, amount, power, or severity) by successive additions, successive accretions, or successive repetitions; thus, the *cumulative* effect of a drug may be harmful even though the immediate effect of each dose has, apparently, been beneficial; terror is *cumulative* because one fear tends to inspire another (groupings of fact and argument and illustration so as to produce a *cumulative* and mass effect—*Cardozo*) Something is **accumulative** which is constantly increasing in amount or bulk through successive additions or which has reached its sum total or magnitude through many such additions (the art of nations is to be *accumulative* . . . the work of living men not superseding, but building itself upon the work of the past—*Ruskin*) (such persons cannot understand the force of *accumulative* proof—*Whately*) *Cumulative* is now used more often than *accumulative* especially where increasing severity or enhancement in influence or power are to be suggested. Something is **additive** which is of such a nature that it is capable either of assimilation to or incorporation in something else or of growth by additions. An *additive* detail, element, or factor is one that has such affinity for another thing that it becomes a constituent part of that thing; thus, red, green, and blue-violet are the *additive* colors and are used in color photography because they blend to form any color (this new hypothesis assigns to the atom properties which are in no way inconsistent with the inverse-square attraction of its electrons and protons; rather they are *additive* to it—*Jeans*) (this pluralistic view, of a world of *additive* constitution, is one that pragmatism is unable to rule out from serious consideration—*James*) Something is **summative** which is capable of association or combination with other things so as to produce such a sum total as an additive whole or a cumulative effect (the *summative* action of a drug and its adjuvant) (if the student could not add up his achievements, if there was nothing *summative* in his education—*Educational Review*)

Ana accumulated, amassed (see ACCUMULATE): multiplying, increasing, augmenting (see INCREASE)

Con dissipated, dispersed, scattered (see SCATTER)

cunning *adj* 1 ingenious, *clever, adroit

Ana skillful, skilled, adept, *proficient, expert, masterly
2 crafty, tricky, artful, *sly, foxy, insidious, wily, guileful
Ana devious, oblique, *crooked: *sharp, acute, keen: *shrewd, astute: knowing, smart (see INTELLIGENT)

Ant ingenuous —*Con* artless, unsophisticated, naïve (see NATURAL)

cunning *n* 1 skill, *art, craft, artifice

Ana dexterity or dexterity, adroitness, deftness (see corresponding adjectives at DEXTEROUS): proficiency, adeptness, expertness (see corresponding adjectives at PROFICIENT): ingeniousness or ingenuity, cleverness (see corresponding adjectives at CLEVER)

2 guile, *deceit, duplicity, dissimulation

Ana craftiness, insidiousness, wiliness, guilefulness, trickiness or trickery, artfulness, slyness (see corresponding adjectives at SLY): stratagem, ruse, maneuver, feint, *trick, wile, gambit, ploy

Ant ingenuousness

cupidity, **greed**, **rapacity**, **avarice** are comparable when meaning intense desire for wealth or possessions. **Cupidity** stresses the intensity and compelling nature of the desire and often suggests covetousness as well (the sight of so much wealth aroused his *cupidity*) (the vast *cupidity* of

business in preempting the virgin resources of California—*Parrington*) **Greedy**, more than *cupidity*, implies a controlling passion; it suggests not strong but inordinate desire, and it commonly connotes meanness as well as covetousness (a low, incessant, gnawing *greedy* . . . for power, for money, for destruction—*White*) **Rapacity** implies both cupidity and actual seizing or snatching not only of what one especially desires but of anything that will satisfy one's greed for money or property; it often suggests extortion, plunder, or oppressive exactions (the *rapacity* of the conquerors knew no bounds) (the woman's *greedy* and *rapacity* . . . disgusted me—*Thackeray*) (the *rapacity* of the warlords—*Peffer*) **Avarice**, although it involves the idea of cupidity and often carries a strong suggestion of rapacity, stresses that of miserliness and implies both an unwillingness to let go whatever wealth or property one has acquired and an insatiable greed for more (such a stanchless *avarice* that, were I king, I should cut off the nobles for their lands, desire his jewels and this other's house: and my more-having would be as a sauce to make me hunger more—*Shak.*) (they scrimped and stinted and starved themselves . . . out of *avarice* and the will-to-power—*Mumford*)

Ana covetousness, avariciousness, greediness, acquisitiveness (see corresponding adjectives at COVETOUS): avidity, eagerness (see corresponding adjectives at EAGER): lust, *desire

curative, **sanative**, **restorative**, **remedial**, **corrective** are comparable when they mean returning or tending to return to a state of normalcy or health. **Curative** is applicable to whatever effects or, sometimes, seeks or tends to effect a complete recovery especially from disease of body or of mind (a *curative* drug) (curative regimens) (most medicines are alleviative in their action and not definitely *curative*. Rather, they overcome the symptoms of disease and give the patient a chance to recover—*Morrison*) **Sanative** is a general term applicable to whatever is conducive either to the restoration of or the maintenance of health, whether of body and mind or of spirit or morals; the term often comes close to *salutary* in meaning (the *sanative* virtue of action . . . to dispel doubt and despair—*Masson*) **Restorative** is occasionally applicable to what restores to health but more often to what revives someone unconscious or renews or refreshes someone or something overstrained or exhausted (the *restorative* effect of rain on parched fields) (take a *restorative* drink before dinner) (that voyage proved entirely beneficial and *restorative*—*Ellis*) **Remedial** is much the broadest term of this group and like the related noun (see REMEDY *n*) and verb (see CURE *vb*) is applicable not only to whatever alleviates or cures disease or injury of body or mind but to whatever tends to relieve or correct a faulty or evil condition (as of the community, the law, or the body politic) (while . . . the teacher's greatest contribution lies in the prevention of maladjustment, he must also assume a major responsibility in *remedial* work with the student who has become poorly adjusted—*C. C. Dunsmoor & L. M. Miller*) (whatever action the court takes towards a convicted offender . . . is in fact a punishment; and it does not cease to be so because it may also be used as a form of *remedial* treatment, adapted to the personality of the offender and directed to his social rehabilitation—*Fox*) (with poverty and humility she overcame the world, and cast down the devil with prayer and *remedial* tears—*H. O. Taylor*) (the communities affected entered upon a patient course of *remedial* action and successfully labored to prevent a recurrence of these disorders—*Handlin*) **Corrective** (compare CORRECTIVE *n*) in many of its uses comes close to *remedial*, but, unlike the latter, it cannot ordinarily re-

place *curative*, specifically it applies to what is designed to restore something to a norm or standard or bring it up (or down) to a desirable level from which it has deviated. In this relation the term is peculiarly applicable to material objects that supplement or compensate for a defective function or part, but it may be used interchangeably with *remedial* in most contexts, though the emphasis may be more on making good a defect or deficiency than (as in *remedial*) on relieving the distress it causes; thus, one would speak of *corrective* (rather than *remedial*) shoes for the relief of weak ankles, but one could say that among *remedial* (or *corrective*) measures for weak ankles are shoes with special lifts in the soles <constantly called upon by their *corrective* lenses to decipher documents—*Ace*> <such *corrective* declines need not, necessarily, represent the end of this greatest of all bull markets—*Van Loan*> <there is today special need for the balancing and *corrective* sanity of not taking ourselves and our time over-seriously—*Alain Locke*>

Ana healing, curing, remedying (see CURE vb)

curb vb check, bridle, *restrain, inhibit

Ana repress, *suppress: shackle, manacle, fetter, *hamper, hog-tie: thwart, foil, balk, *frustrate

Ant spur —**Con** *indulge, pamper, humor

curdle vb *coagulate, congeal, set, clot, jelly, jell

cure n *remedy, medicine, medicament, medication, specific, physic

cure vb **Cure, heal, remedy** mean to rectify an unhealthy or undesirable condition especially by some specific treatment (as medication). **Cure** and **heal** may apply interchangeably to both wounds and diseases <pierced to the soul with slander's venomous spear, the which no balm can *cure*—*Shak.*> <physician, *heal* thyself—*Lk* 4:23> Often, however, they tend to be differentiated in such applications, *cure* more frequently implying restoration to health after disease, *heal* implying restoration to soundness of an affected part after a wound or lesion <the treatment failed to *cure* his headache> <the salve will *heal* slight burns> <his fever . . . might *cure* him of his tendency to epilepsy—*Byron*> <I . . . must not break my back to *heal* his finger—*Shak.*> In extended use a similar distinction often holds, with *cure* applicable when a condition (as a state of mind or a habit of behavior) is under discussion and *heal* when a specific incident or event is involved; thus, one would seek to *cure* (not *heal*) mistrust but to *heal* (rather than *cure*) a breach between friends <if you can compass it, do *cure* the younger girls of running after the officers—*Austen*> <we are denied the one thing that might *heal* us . . . that might bring balm to the bruised heart, and peace to the soul in pain—*Wilde*> **Remedy** (see also REMEDY n) applies to the using of whatever will correct or relieve an abnormal condition (as of body or mind) whether affecting physical or mental health or causing mere local or occasional discomfort <who . . . may likeliest *remedy* the stricken mind—*Southey*> In extended use (see also CORRECT vb 1) *remedy* is often used in reference to evil conditions corrected, relieved, or counteracted by any means <*remedy* an abuse> <*remedy* the breakdown of international prestige—*Ascoli*>

curious 1 **Curious, inquisitive, prying, snoopy, nosy** are comparable when meaning interested in finding out or in a search for facts that are not one's personal concern. **Curious** need not imply objectionable qualities such as intrusiveness or impertinence, but it suggests an eager desire to learn, especially to learn how or why things have happened or are happening <children are naturally *curious* about almost everything> <*curious* onlookers were held back by the police> <she did not wish to seem *curious* about her neighbor's affairs> <a Latin poet whose reputa-

tion would deter any reader but the most *curious*—*T. S. Eliot*> <Edgar was a rationalist, who was *curious*, and had a sort of scientific interest in life—*D. H. Lawrence*> **Inquisitive** implies habitual and impertinent curiosity and usually suggests the asking of many questions regarding something secret or unrevealed <they grew *inquisitive* after my name and character—*Spectator*> <we had no lack of visitors among such an idle, *inquisitive* set as the Tahitians—*Melville*> **Prying** adds to *curious* and *inquisitive* the implications of busy meddling and of officiousness <the world might guess it; and I will not bare my soul to their shallow *prying* eyes—*Wilde*> **Snoopy** and **nosy** are somewhat informal terms highly expressive of contempt. **Snoopy** adds to *prying* suggestions of slyness or sneaking <a *snoopy* legal investigator> <everyone felt that she was *snoopy* and soon refused to welcome her as a visitor> **Nosy** suggests the methods of a dog pursuing a scent and implies a desire to discover the ins and outs of every situation that arouses one's curiosity <a *nosy*, disagreeable child> <doesn't want *nosy* state officials or city slickers prying into its manners and morals—*Fortnight*>

Ana meddling, intermeddling, interfering, tampering (see MEDDLER): scrutinizing, inspecting, examining (see SCRUTINIZE): intrusive, meddlesome, *impertinent

Ant incurious: uninterested —**Con** *indifferent, aloof, detached, unconcerned: apathetic, stolid, *impassive, phlegmatic

2 singular, *strange, peculiar, unique, odd, queer, quaint, outlandish, eccentric, erratic

curl vb *wind, coil, twist, twine, wreath, entwine

Ana *curve, bend: *flex, crook

currency cash, *money, legal tender, specie, coin, coinage

current adj *prevailing, prevalent, rife

Ana general, *universal, common: popular, ordinary, familiar, *common: *usual, customary

Ant antique, antiquated: obsolete

current n stream, *flow, flood, tide, flux

curse n **Curse, imprecation, malediction, anathema** are comparable when they denote a denunciation that conveys a wish or threat of evil. **Curse** (opposed to *blessing*) usually implies a call upon God or a supernatural power to visit punishment or disaster upon a person; in dignified use it commonly presupposes a profound sense of injury and a plea to a divine avenger for justice. No other word in this group suggests so strongly the certainty of the threatened evil <the untended woundings of a father's *curse* pierce every sense about thee!—*Shak.*> <an orphan's *curse* would drag to hell a spirit from on high—*Coleridge*> **Imprecation** also implies an invocation of evil or calamity, but it often suggests as its provocation wrath rather than a sense of injury and a desire for revenge rather than for justice as its aim <with *imprecations* thus he filled the air, and angry Neptune heard the unrighteous prayer—*Pope*> Both *curse* and *imprecation* are applied to profane swearing involving blasphemy, but, again, the latter is the weaker in its implications. **Malediction** (opposed to *benediction*) is applied chiefly to bitter reproaches or denunciations publicly proclaimed and bringing disgrace or ignominy to their object <my name . . . to all posterity may stand defamed, with *malediction* mentioned—*Milton*> <Cleopatra has long ago passed beyond the libels with which her reputation was blackened by a terrified Rome—even the *maledictions* of great poets—*Buchan*> <a passage in one of the recently discovered Ras Shamra poems . . . pronounces a *malediction* . . . “may Horon break thy head”—*Mercer*> **Anathema** basically denotes a solemn authoritative ecclesiastical ban or curse accompanied by excommunication <the third letter to Nestorius . . . con-

tained the *anathemas*—*R. M. French*) In more general use the term applies to a strong or violent denunciation by one in authority or in a position to judge of something as grossly wrong, as productive of evil, or as accursed (the Pope . . . has condemned the slave trade—but no more heed is paid to his *anathema* than to the passing wind—*Gladstone*) (continued openly . . . to flaunt their beauties, in spite of the *anathemas* from the pulpits—*Wellman*) or it may be used in a much weakened sense to mean no more than a vigorous denunciation (no *anathema* pronounced by any psychologist against such words as “purpose” will exorcise this initiative as a distinctive and observable character of certain modes of conscious doing—*C. I. Lewis*) ([people] of self-respect who would like to teach our children . . . are afraid to hire themselves out to communities and states . . . where they may be under the continuous censorship of politicians, petty moralists, and those businessmen for whom the mere subscription to a liberal journal is a reason for *anathema*—*Ulich*)

Ana execration, objurgation (see corresponding verbs at EXECRATE); profanity, *blasphemy, swearing

Ant blessing

curse *vb* damn, anathematize, *execrate, objurgate

Ana condemn, denounce, reprobate (see CRITICIZE); blasphemy, swear (see corresponding nouns at BLASPHEMY)

Ant bless

curse *adj* accursed, damnable, *execrable

Ana, Ant, & Con see those at ACCURSED

cursing profanity, swearing, *blasphemy

Ana *curse, imprecation, malediction, anathema: execration, objurgation (see corresponding verbs at EXECRATE)

cursor *superficial, shallow, uncritical

Ana hasty, speedy, quick, rapid, swift, *fast: *brief, short: casual, desultory, *random, haphazard

Ant painstaking —**Con** meticulous, *careful, scrupulous, punctilious

curt brusque, blunt, crusty, gruff, *bluff

Ana laconic, terse, summary, *concise: *brief, short: snappish, waspish, *irritable: peremptory, imperious (see MASTERFUL)

Ant voluble

curtail *shorten, abbreviate, abridge, retrench

Ana reduce, *decrease, lessen: *cut, slash

Ant protract, prolong —**Con** *extend, lengthen, elongate

curve *vb* **Curve, bend, twist** are comparable when they mean to swerve or cause to swerve or deviate from a straight line or a normal direction or course. **Curve** is the word of widest application, and it may describe any deviation or swerving from the straight or level that suggests an arc of a circle or an ellipse (his lips were *curved* in a smile—*Kenneth Roberts*) (over the roof a few swallows were *curving*—*Glasgow*) **Bend** is likely to refer to an angular turning or a curving at a certain point under a degree of force or pressure (bend the steel strips as required) (bend the glass tube at the point indicated) In extended use *bend* may imply some forcing or distortion of materials or of facts or some pressure on or persuasion of people (was somewhat prone to *bend* logic to meet the demands of argument—*E. S. Bates*) (not all prescriptive speech aims purely and typically at *bending* the hearer's attitudes to those of the speaker—*Falk*) **Twist** is likely to suggest a force having a spiraling effect throughout the object involved rather than an effect at one point, and it may imply, especially in extended use, a wrenching out of shape or distorting rather than a giving of a desired or desirable shape (the light steel rods *twisted* together by

the explosion) (hands gnarled and *twisted* with age) (mend a break in a fence by *twisting* two wires together) (an unconquerable confidence . . . which understates, or *twists* into a wry joke, the fatal moment of war—*Times Lit. Sup.*)

Ana deflect, divert, *turn: *swerve, veer, deviate

curve *n* **Curve, arc, bow, arch** mean a line or something which follows a line that is neither straight nor angular but rounded. **Curve** is the general term and the most widely applicable. It may be used in reference to a line, edge, outline, turn, or formation that keeps changing its direction without interruption or angle (the *curve* of a ship's side) (the deep *curve* of the back of a wing chair) (a serpentine *curve*) (the *curve* of the greyhound is not only the line of beauty, but a line which suggests motion—*Jefferies*) **Arc** is used specifically to denote a part or section of the circumference of a circle; in more general use it is applied to things that have or assume a strongly curved form (with eyebrows raised in a quizzical *arc*) **Bow**, unlike the preceding words, has always designated concrete things that are curved, and draws its implications especially from its reference to the archer's bow with its long, gradually curving strip of wood that may be bent almost into a **U**. Hence many things which resemble an archer's bent bow are describable or designatable as a *bow* (the *bows* of spectacles) (an *oxbow*) (bowlegs) (the moon, like to a silver *bow*, new-bent in heaven—*Shak.*) **Arch**, though once equivalent to *arc* in denotation, is now basically applied to a supporting structure built up of wedge-shaped pieces of stone or other substance in such a way that they form a semicircular curve with a keystone at the apex or two opposite curves with a joint at the apex and provide an opening underneath (as for a window, a door, or a passageway). Hence *arch* is applied to any similarly curved structure (the *arch* of the eyebrow) (the *arch* of the foot) (an *arch* formed by meeting tree-tops)

Ana circuit, compass, *circumference

curvet *vb* *skip, bound, hop, lope, lollap, ricochet

custom *n* usage, habitude, *habit, practice, use, wont

Ana convention, *form, usage, convenience: rule, precept, canon, *law

customary *usual, wonted, accustomed, habitual

Ana *regular, normal, typical, natural: *prevailing, prevalent, current: familiar, ordinary, *common: general, *universal

Ant occasional —**Con** *infrequent, uncommon, rare, sporadic: *exceptional

cut *vb* **Cut, hew, chop, carve, slit, slash** mean to penetrate and divide something with a sharp-bladed tool or instrument (as a knife, ax, or sword). **Cut** is by far the most comprehensive term, for it is not only interchangeable with any other word in the group but also with any of a large number of verbs that suggest use of a specific instrument (as *knife, shear, reap, or mow*) or dividing in a certain way (as *mince or shred*) or an operation having a definite end (as *prune, lop, or amputate*). Often it requires an adverb to describe the process or purpose more clearly (cut down a tree) (cut off dead branches) (cut up a carcass of beef) (cut out a paper doll) Its extended uses are many: usually it implies a result (as separation or isolation) similar to one produced by cutting (cut off a member of the family) (she is cut off from all her friends) or one (as distress or pain) suggestive of a stabbing or hurting (the remark cut her to the heart) **Hew** is not only more restricted in its application than *cut* but it carries far more explicit implications. It usually suggests the use of a heavy tool (as an ax, a sword, or chisel) which calls for the expenditure of much effort in

the cutting or shaping of large, difficult, or resistant objects or material < *hew* them to pieces, hack their bones asunder—*Shak.* > < a wall of *hewn* stones > < and now also the axe is laid unto the root of the trees: every tree . . . which bringeth not forth good fruit is *hewn* down, and cast into the fire—*Lk* 3:9 > < there's a divinity that shapes our ends, rough*hew* them how we will—*Shak.* > **Chop** implies a cleaving or dividing by a quick, heavy blow (as of an ax, a cleaver, or a hatchet) or, more often, a dividing into pieces by repeated blows of this character < *chop* off branches of a tree > < *chop* the trunk of a tree into firewood > < *chop* meat into small pieces > **Carve** has come to be restricted to two types of cutting. The first requires the use of special tools (as chisels and gouges) and has for its end the artistic shaping, fashioning, or adornment of a material (as stone, ivory, or wood) < a sculptor *carves* a statue out of marble > < the back and legs of the chair were elaborately *carved* > < an exquisite ivory box *carved* with figures > The second requires a sharp knife and has for its end the cutting up and especially the slicing of meat at table in pieces suitable for serving < *carve* a roast of beef > < the head of the family *carves* the turkey > **Slit** implies the making of a lengthwise cut; except that it suggests the use of a sharp clean-cutting instrument (as scissors, a scalpel, a sword, or a knife) it carries no clear connotations as to the extent of the cut in depth or in length < the surgeon *slit* the abdominal wall in front of the appendix > < the long skirt was *slit* to the knee > < *slit* a sealed envelope > **Slash** also implies a lengthwise cut but usually suggests a sweeping stroke (as with a sharp sword, knife, or machete) that inflicts a deep and long cut or wound: very frequently it connotes repeated cuts and often furious or rough-and-tumble fighting < *slashing* desperately at his circling enemies > < tires *slashed* by vandals > **Ana** split, cleave, rive (see **TEAR**): sever, sunder (see

SEPARATE *vb*): curtail (see **SHORTEN**)

cutthroat *assassin, gunman, bravo

cutting *incisive, trenchant, clear-cut, biting, crisp

Ana *sharp, keen, acute: piercing, penetrating, probing (see **ENTER**)

cyclone *whirlwind, typhoon, hurricane, tornado, water-spout, twister

cyclopean *huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, titanic, Brobdingnagian

cynical, misanthropic, pessimistic, misogynic are comparable when meaning deeply and often contemptuously distrustful. **Cynical** implies a sneering disbelief in sincerity and integrity < the ease with which she asserted or denied whatever suited her purpose was only equaled by the *cynical* indifference with which she met the exposure of her lies—*J. R. Green* > < but people are nowadays so *cynical*—they sneer at everything that makes life worth living—*L. P. Smith* > **Misanthropic** implies a rooted dislike and distrust of one's fellowmen and aversion to their society < Swift was of an unhappy, *misanthropic* state of mind > < he . . . viewed them not with *misanthropic* hate—*Byron* > < his loathing . . . hardened into a *misanthropic* mania—*Powys* > **Pessimistic** suggests a distrustful and gloomy view of things in general < the *pessimistic* philosophy of Schopenhauer > < of kindly heart, though of violent speech . . . and of *pessimistic* temperament—*Ellis* > **Misogynic** implies a deep-seated aversion to, and a profound distrust of, women < his *misogynic* soul—*Meredith* > < a *misogynic* old bachelor >

Ana sneering, girding, flouting, scoffing (see **SCOFF**): captious, caviling, carping, censorious, *critical: disbelieving, unbelieving (see corresponding nouns at **UNBELIEF**)

Con *hopeful, optimistic, roseate

D

dabbler tyro, *amateur, dilettante
Con adept, *expert, wizard, artist

daily, diurnal, quotidian, circadian mean of each or every day. **Daily** is used with reference to the ordinary concerns and customary happenings of life < *daily* wants > < *daily* visits > < the *daily* newspaper > Sometimes however it implies an opposition to *nightly* < the *daily* anodyne, and *nightly* draught—*Pope* > **Diurnal** is commonly either astronomical (with special reference to the movements of the heavenly bodies) or poetic in its use < the *diurnal* revolution of the earth > < rolled round in earth's *diurnal* course—*Wordsworth* > **Diurnal** also implies opposition to *nocturnal* < the *diurnal* and *nocturnal* offices of the monks > < hunting dogs are mainly *diurnal* animals—*Stevenson-Hamilton* > **Quotidian** adds to *daily* the implication of recurrence each day < a *quotidian* fever > It often suggests also a commonplace, routine, or everyday character or quality < that quality of strangeness which puts a new light on all *quotidian* occupations—*Bennett* > < he has found in *quotidian* interests and affections and appetites so complete an escape from the labors and the struggles of the creative spirit—*Brooks* > < as *quotidian* as catching the 8:52 from Surbiton to go to business on a Monday morning—*Huxley* > **Circadian** is a chiefly technical term of recent coinage that differs from *daily* or *quotidian* in implying only approximate

equation with the twenty-four hour day < *circadian* rhythms in insect behavior >

Con *nightly, nocturnal: periodic, alternate, recurrent, *intermittent: occasional, *infrequent, sporadic

dainty 1 delicate, exquisite, *choice, elegant, recherché, rare

Ana petite, diminutive, little, *small: pretty, bonny, fair, lovely, *beautiful: *delightful, delectable, delicious
Ant gross — **Con** *coarse, vulgar: *common, ordinary

2 fastidious, finicky, finicking, finical, *nice, particular, fussy, squeamish, persnickety, pernickety

Ana *careful, meticulous, punctilious, scrupulous: discriminating, discerning (see corresponding nouns at **DISCERNMENT**)

dally flirt, coquet, toy, *trifle

Ana *play, sport, frolic, gambol: *caress, fondle, pet

dam *vb* bar, block, obstruct, *hinder, impede

Ana clog, *hamper, trammel, shackle, fetter, hog-tie: *suppress, repress

Con *advance, forward: *express, vent, utter, air

damage *n* harm, *injury, hurt, mischief

Ana impairment, marring (see corresponding verbs at **INJURE**): ruining, dilapidation, wrecking (see corresponding verbs at **RUIN**): detriment, deleteriousness (see corresponding adjectives at **PERNICIOUS**)

Con improvement, betterment (see corresponding verbs at IMPROVE): benefiting or benefit, profiting or profit (see BENEFIT *vb*): advantage, service, *use
damage *vb* harm, *injure, impair, mar, hurt, spoil
Ana *ruin, dilapidate, wreck: *deface, disfigure: *abuse, misuse, mistreat, ill-treat, maltreat, outrage
Con *improve, better, ameliorate: *benefit, profit, avail; repair, *mend
damn *vb* 1 doom, condemn, *sentence, proscribe
Ana *judge, adjudge: *punish, castigate, discipline
Ant save (from eternal punishment) —*Con* redeem, ransom, *rescue, deliver
 2 curse, *execrate, anathematize, objurgate
Ana denounce, condemn (see CRITICIZE): revile, vituperate (see SCOLD)
damnable accursed, cursed, *execrable
Ana atrocious, *outrageous, monstrous, heinous: *hateful, abominable, detestable, odious, abhorrent
Con admirable, estimable (see corresponding verbs at REGARD *n*): laudable, praiseworthy (see corresponding verbs at PRAISE)
damp *adj* moist, dank, humid, *wet
Con *dry, arid
dandle cuddle, pet, cosset, fondle, *caress
Ana *trifle, toy, dally: *play, sport, disport: *handle, swing
dandy *n* *fop, beau, coxcomb, exquisite, dude, buck
Ant sloven
danger *n* Danger, peril, jeopardy, hazard, risk mean either the state or fact of being threatened with loss of life or property or with serious injury to one's health or moral integrity or the cause or source of such a threat. Danger is the general term and implies contingent evil in prospect but not necessarily impending or inescapable <to win renown even in the jaws of danger and of death—*Shak.*> <where one danger's near, the more remote, tho' greater, disappear—*Cowley*> <troubled by the danger that the manuscript might be lost—*Van Doren*> <a frame of adamant, a soul of fire, no dangers fright him—*Johnson*> Peril usually carries a stronger implication of imminence than danger and suggests even greater cause for fear and a much higher degree of probability of loss or injury <in perils of waters, in perils of robbers . . . in perils in the city, in perils in the wilderness, in perils in the sea—2 Cor 11:26> <he lived in constant peril—*Buchan*> <the perils which threaten civilization—*Ellis*> Jeopardy implies exposure to extreme or dangerous chances <why stand we in jeopardy every hour?—1 Cor 15:30> The term is much used in law in reference to persons accused of serious offenses, being tried in court, and therefore exposed to the danger of conviction and punishment <nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb—U. S. Constitution> <it seems to me that logically and rationally a man cannot be said to be more than once in jeopardy in the same cause, however often he may be tried—*Justice Holmes*> Hazard implies danger from something fortuitous or beyond one's control; it is not so strong a term as jeopardy <the amusements . . . of most of us are full of hazard and precariousness—*Froude*> <there would have been no triumph in success, had there been no hazard of failure—*Newman*> <travel on the thoroughfares of Manila was not without its hazards—*Heiser*> Risk, more frequently than hazard, implies a voluntary taking of doubtful or adverse chances <no adventure daunted her and risks stimulated her—*Ellis*> <life is a risk and all individual plans precarious, all human achievements transient—*Edman*>
Ana threatening or threat, menacing or menace (see corresponding verbs at THREATEN): precariousness (see

corresponding adjective at DANGEROUS): emergency, exigency, pass (see JUNCTURE)
Ant security —*Con* safety (see corresponding adjective SAFE): immunity, *exemption: safeguarding or safeguard, guarding or guard, protection, defending or defense, shielding or shield (see corresponding verbs at DEFEND)
dangerous, **hazardous**, **precarious**, **perilous**, **risky** all mean attended by or involving the possibility of loss, evil, injury, harm; however, they are frequently not freely interchangeable in usage. Dangerous applies to persons, things, or situations that should be avoided or treated with exceeding care because contact with them or use of them is unsafe and exposes one or causes one to expose others at least to danger <a dangerous weapon> <a dangerous occupation> <a dangerous practice> <a dangerous doctrine> <conditions dangerous to health> <the child discovers that grown-ups lie to him, and that it is dangerous to tell them the truth—*Russell*> <a wide circuit must be made to avoid a fierce and dangerous tribe called Snake Indians—*Parkman*> Hazardous carries a far stronger implication of dependence on chance than dangerous carries: it is often the preferred term when the chances of loss, death, or severe injury are comparatively great; thus, a hazardous occupation (especially from the point of view of insurability) is one in which the worker must run significantly greater than average risks of accident or loss of life; a hazardous enterprise is one which has as many (if not more) chances of failing as of succeeding <no one should be deluded into believing that we can ever have completely assured lives. Living is a hazardous business at the best—*Furnas*> <the hazardous game of secret service in enemy country—*Alexander Forbes*> Precarious is often used inaccurately where dangerous or even hazardous would be the better word. The basic meaning of this word is uncertain or insecure; therefore, it may be used without implication of threatened danger or of possible hazards; in strict use precarious health is uncertain health rather than a physical condition threatening death; a precarious occupation is one that may be neither dangerous nor hazardous but uncertain (as in its tenure or remunerativeness) <whoever supposes that Lady Austen's fortune is precarious is mistaken. . . . It is . . . perfectly safe—*Cowper*> <a National Church in the early Caroline sense depended upon the precarious harmony of the king, a strong archbishop, and a strong first minister—*T. S. Eliot*> The term often carries also an implication of attendance by danger or hazards especially as a factor in or source of insecurity or uncertainty; thus, a precarious hold or footing is one that is so insecure that it involves danger <the precarious track through the morass—*Scott*> <keeping a precarious and vital balance, like a man walking on high on a tightrope—*Montague*> Perilous carries a stronger implication of the immediacy of a threatened evil than dangerous <after all their intolerable toils, the sounding tumult of battle, and perilous sea-paths, resting there . . . amid the epitaphs and allegorical figures of their tombs—*L. P. Smith*> <we all know how perilous it is to suggest to the modern woman that she has any "sphere"—*Babbitt*> Risky comes close to perilous in suggesting high possibility of harm or loss, but it is usually applied to an action or activity which a person undertakes voluntarily and often with knowledge of the perils or risks to which it exposes him <undertake a risky job> <make a risky investment> <so risky was travel that the Indiana legislature specifically permitted travelers to carry concealed weapons—*Sandburg*>
Ana unsafe, insecure (see affirmative adjectives at SAFE): chancy, chance, haphazard, *random, hit-or-miss

Ant safe, secure

dangle suspend, *hang, sling

Ana oscillate, sway, pendulate, fluctuate (see SWING): *swing, wave

dank damp, humid, moist, *wet

Ana soaked, saturated, sopped or soppy, drenched (see corresponding verbs at SOAK)

dappled *variegated, parti-colored, motley, checkered, checked, pied, piebald, skewbald, freaked

dare *vb* *face, brave, challenge, defy, beard

Ana *venture, risk, chance, hazard

daredevil *adj* daring, rash, reckless, foolhardy, venturesome, *adventurous

Ana & Con see those at DARING

daring rash, reckless, daredevil, foolhardy, venturesome, *adventurous

Ana bold, intrepid, audacious (see BRAVE)

Con *timid, timorous: *cautious, wary, circumspect, chary: prudent, sensible, sane, *wise, judicious

dark *adj* 1 **Dark**, **dim**, **dusky**, **obscure**, **murky**, **gloomy** mean partly or wholly destitute of light. **Dark**, the ordinary word and the most general of these terms, implies a lack of the illumination necessary to enable one to see or to identify what is before him. It may imply lack of natural illumination (as by the sun or moon) <a *dark forest*> <a *dark night*> or of artificial illumination (as by gas or electricity) <a *dark room*> or a lack of immaterial light (as cheerfulness) <a *dark mood*> <a *dark countenance*> or of moral or spiritual light <a *dark deed*> or of brilliance—that is, the quality of lightness in color <a *dark blue*> **Dim** suggests just so much darkness that the things before one cannot be seen clearly or in their distinct or characteristic outlines: it may be applied equally to things viewed or to a source of illumination <the light has grown *dim*> <*dim stars*> <he could just make out *dim* figures in the distance> It may designate a usually bright thing that is dulled or softened <a . . . *dim* and tender red—*Hudson*> <a *dim* image of their glorious vitality—*Krutch*> or a place or time that is nearly dark <scrambled over to join the other ghosts out on the *dim* common—*Galsworthy*> <the hazy light . . . reminded him of the *dim* distances of his own . . . country—*Anderson*> **Dim** as applied to eyes, sight, or insight suggests a loss of functional keenness <eyes *dim* with tears> <*dim eyesight*>

Dusky suggests the halfway state between light and dark characteristic of twilight: like *dim* it implies faintness of light but unlike that word definitely connotes grayness and an approach to darkness <*dusky winter evenings*> <the *dusky* windowless loft> <*dusky clouds*> <but comes at last the dull and *dusky* eve—*Cowper*> **Obscure** is more often used in its extended senses (see OBSCURE) than in its literal sense, but it is employed literally when there is a suggestion of darkening by covering, concealment, or overshadowing that deprives a thing of its lightness, brightness, or luster <*obscurest* night involved the sky—*Cowper*> <*obscure stars*> <an *obscure* corner of the attic> **Murky** originally implied and still sometimes implies intense darkness or a darkness in which things are not even faintly visible <Hell is *murky*!—*Shak.*> In current use, the term more often suggests a thick, heavy darkness suggestive of smoke-laden fogs or of air filled with mist and dust <an atmosphere *murky* with sand—*Cather*> <as if its [London's] low sky were the roof of a cave, and its *murky* day a light such as one reads of in countries beneath the earth—*L. P. Smith*>

Gloomy (see also SULLEN) implies imperfect illumination owing to causes that interfere seriously with the radiation of light (as dense clouds or the heavy shade of many closely set trees): in addition, it often connotes pervading

cheerlessness <the day was especially *gloomy* for June> <the *gloomiest* part of the forest> <the room was *gloomy* and depressing with only a dim light from a small candle> <their *gloomy* pathway tended upward, so that, through a crevice, a little daylight glimmered down upon them—*Hawthorne*>

Ant light —*Con* *bright, brilliant, radiant, luminous: illumined, illuminated, enlightened, lighted (see ILLUMINATE)

2 *obscure, vague, enigmatic, cryptic, ambiguous, equivocal

Ana abstruse, occult, *recondite, esoteric: *mystical, mystic, anagogic, cabalistic: intricate, complicated, knotty, *complex

Ant lucid —*Con* *clear, perspicuous: simple, *easy, light, facile

darken *obscure, dim, bedim, eclipse, cloud, becloud, fog, befog, obfuscate

Ant illuminate —*Con* enlighten, illumine (see ILLUMINATE): elucidate, *explain

dart *vb* *fly, scud, skim, float, shoot, sail

Ana *speed, precipitate, hasten, hurry

dash *vb* *rush, tear, shoot, charge

Ana dart, *fly, scud

dash *n* 1 *vigor, vim, spirit, esprit, verve, punch, élan, drive

Ana force, energy, might, *power: vehemence, intensity (see corresponding adjectives at INTENSE): impressiveness (see corresponding adjective at MOVING)

2 *touch, suggestion, suspicion, soupçon, tincture, tinge, shade, smack, spice, vein, strain, streak

dashing smart, *stylish, fashionable, modish, chic

date *n* *engagement, rendezvous, tryst, appointment, assignation

daunt appall, *dismay, horrify

Ana cow, *intimidate, browbeat: discomfit, disconcert, faze (see EMBARRASS): foil, thwart, baffle (see FRUSTRATE): *frighten, alarm, scare, terrify

Con rally, rouse, arouse, *stir, waken, awaken: impel, drive, *move, actuate: activate, *vitalize, energize

dauntless *brave, courageous, unafraid, fearless, intrepid, valiant, valorous, undaunted, doughty, bold, audacious

Ana indomitable, unconquerable, *invincible: heroic, gallant (see corresponding nouns at HEROISM)

Ant poltroon —*Con* *fearful, afraid, apprehensive

dawdle *delay, procrastinate, loiter, lag

Ana linger, tarry, wait, *stay: *trifle, toy, dally: *play, sport, disport

Con *stir, rally, rouse, arouse: hurry, hasten, *speed

daydream *n* dream, *fancy, fantasy, phantasy, phantasm, vision, nightmare

Ana imagining or imagination, conceiving or conception, fancying (see corresponding verbs at FANCY): illusion, *delusion, hallucination

daze *vb* **Daze**, **stun**, **bemuse**, **stupefy**, **benumb**, **paralyze**, **petrify** all mean to dull or deaden the powers of the mind through some disturbing experience or influence. **Daze** may imply any of numerous causes (as a blow on the head, an excess of light, or a physical or mental shock) which prostrates one's powers and leaves one confused or bewildered or dazed <till I felt I could end myself too with the dagger—so deafened and *dazed*— . . . with the grief that gnawed at my heart—*Tennyson*> <the cattle gather and blare, roused by the feet of running men, *dazed* by the lantern glare—*Kipling*> **Stun** usually suggests a sudden deprivation of one's powers of thought or a loss of consciousness as a result of a heavy blow or a violent fall, but it is also used in an extended and often hyperbolic sense to describe the devastating effect

of noise, surprise, or astonishment <stunned his assailant with the butt of his rifle> <stunned by the news of his son's drowning> <where wild Oswego spreads her swamps around, and Niagara stuns with thundering sound—*Goldsmith*> <ye little children, stun your grandame's ears with pleasure of your noise!—*Wordsworth*> <or has the shock . . . confused . . . and stunned me from my power to think—*Tennyson*> **Bemuse** implies an addling or muddling of the mind whether through intoxication or through employment, preoccupation, or engrossment that dulls or abstracts the mind <a Prussian was regarded in England as a dull beer-bemused creature—*M'Carthy*> <his senses so bemused in the intensity of calculation—*Scott*> <people with brains and intelligence . . . play cards until they are bemused and stupid—*McClure's Mag.*> **Stupefy** heightens the implication of stupor or stupidity by weakening not only the implication of shock or surprise but that of overwork or fatigue; it therefore usually implies something (as an injury, an illness, a grief or anxiety long-continued, or intoxication) that dulls both the senses and the mind <sun elated them; quiet rain sobered them, weeks of watery tempest stupefied them—*Hardy*> **Benumb** is used chiefly of the effect of cold in deadening or immobilizing the muscles, but it is used also of anything that becomes so inert that it seems as if frozen <it is so cold, so dark, my senses are so benumbed—*Dickens*> <Mrs. Ralston drew back a step or two. Charlotte's cold resolution benumbed her courage, and she could find no immediate reply—*Wharton*> **Paralyze** is often used figuratively to imply an inability to act or to function, on the part of a thing as well as of a person, that comes as the result of a dire event, a burden too heavy to be borne, or an astounding disclosure <in these wild places . . . a snowstorm . . . does not . . . paralyze traffic as London permits itself to be paralyzed under similar circumstances—*Jefferies*> <a certain helplessness in the presence of what is unfamiliar that fairly paralyzes even Gallic curiosity—*Brownell*> **Petrify** (see also **HARDEN**) emphasizes the immediate effect of fear, amazement, shock, or awe and suggests complete inability to move, to think, or to act, as though one were turned to stone <the spectators were petrified with horror> <she was too petrified to answer the question> More than any other word in this group, *petrify* is often used hyperbolically <I was too petrified to pay any attention to him>

Ana confound, bewilder, mystify (see **PUZZLE**): *confuse, muddle, befuddle; dazzle, dizzy (see corresponding adjectives at **GIDDY**)

dazzled *giddy, dizzy, vertiginous, swimming
Ana confused, addled, befuddled, muddled (see **CONFUSE**): confounded, bewildered, puzzled, perplexed (see **PUZZLE**)

dead *adj* **Dead, defunct, deceased, departed, late, lifeless, inanimate** all mean devoid of life. **Dead** applies strictly to anyone or to anything that has been deprived of life and has therefore ceased to grow or to function <a *dead* person> <a *dead* animal> <a *dead* tree> <every plant in the garden is *dead* as a result of the intensely severe winter> **Dead** is also applicable to things which have not had life (in its literal sense) but have existed for a time and have been used or accepted or have proved effective or influential; thus, a *dead* language is no longer in spoken use by any people; a *dead* belief no longer has any acceptance; a *dead* journal no longer is printed and circulated; a *dead* issue or question no longer arouses interest or debate. Figuratively the term implies lack or loss of sensation, consciousness, feeling, activity, energy, or any of the qualities associated with life <*dead*

fingers> <a *dead* engine> <a *dead* cigar> <the *dead* season in a business> **Defunct** differs little in its literal sense from *dead*, except that it is somewhat bookish <Charlotte had entered society in her mother's turned garments, and shod with satin sandals handed down from a *defunct* aunt—*Wharton*> The term is more often applied to a thing that by failure or dissolution has ceased to function or to operate <a *defunct* newspaper> <a *defunct* corporation> **Deceased** applies only to a person and especially to one who has died comparatively recently or who, though dead, is at the moment under consideration especially in some legal context <laws prohibiting the marriage of a man with his *deceased* wife's sister> <the legal heirs of the *deceased* millionaire were never found> **Departed** is distinctly euphemistic (especially in religious use) <pray for the souls of *departed* relatives and friends> **Late** is used in place of *deceased* or *departed* especially when stressing a relationship to a surviving person or an existent institution <under the terms of his *late* father's will> <the *late* chairman of the board of directors> <the *late* master of the house> **Lifeless**, unlike the preceding words, does not necessarily imply deprivation of life, for it is applicable not only to something literally dead but also to something which never had life or is incapable of life. In comparison with *dead*, however, *lifeless* stresses the absence (sometimes, when loss of consciousness is implied, the apparent absence) of the phenomena characteristic of being alive; thus, one speaks of a *dead* man, but a *lifeless* body (that is, a body that shows no signs of life) <there in the twilight cold and grey, *lifeless*, but beautiful, he lay—*Longfellow*> In its extended use *lifeless* is especially applicable to things (far less often to persons) that have not or never have had vitality, power, or spirit <a *lifeless* color> <a *lifeless* poem> <she has been *lifeless* since her recovery from a prolonged illness> <dull *lifeless* mechanical systems that treat people as if they were things—*Wilde*> <monochrome is a starved and *lifeless* term to express the marvellous range and subtlety of tones of which . . . Chinese ink is capable—*Binyon*> **Inanimate** is more consistently used than *lifeless* in describing something which never had life; it is the preferred term when a contrast between that which is devoid of life and that which possesses life is expressed or implied <objects which consist of *inanimate* matter—*Jeans*> <a transition . . . from the inorganic to the organic, from the *inanimate* to the living—*Inge*> <harnessing *inanimate* power to carry us and our burdens—*Furnas*> But *inanimate* is also applicable in extended use to that which is spiritless, inactive, or not lively, and therefore dull <an *inanimate* style> <her *inanimate* movement when on the stage—*Yeats*>

Ant alive —**Con** *living

deadlock *n* *draw, tie, stalemate, standoff

Ana situation, condition, *state, posture: *predicament, plight, dilemma, quandary

deadly *adj* **1** **Deadly, mortal, fatal, lethal** mean causing or causative of death. **Deadly** may imply an extremely high degree of probability rather than a certainty of death; the term therefore applies to something with the capacity of or a marked potentiality for causing death; a *deadly* disease is one usually ending fatally; a *deadly* weapon is one capable of inflicting death; the seven *deadly* sins in theology are those sins which must be avoided because they are the source of other sins and are destructive of spiritual life and progress <two brave vessels matched in *deadly* fight, and fighting to the death—*Wordsworth*> <poisons more *deadly* than a mad dog's tooth—*Shak.*> <the neglect of form . . . was even *deadlier* to poetry—*Viereck*> **Mortal** implies that death has

occurred or is certain to occur; the term therefore is applicable only to that which actually has caused or is about to cause death; a *mortal* disease is one that ends fatally; a *mortal* wound is one that caused or will inevitably cause death; a *mortal* sin (in contrast with a *deadly* sin) is a grievous sin deliberately committed and actually inflicting spiritual death. *Deadly* applies to the instrument that deals the wound or blow that proves mortal (a *deadly* lance) (a *mortal* stab) (Gigi took off his mask and hid it under a rock; it would be no help to him now, but on the contrary a *mortal* danger—*Upton Sinclair*) **Fatal** stresses inevitability and applies to a potential or actual result of death, destruction, or disaster. The term is often used in place of *mortal* as applied to wounds, blows, or illnesses especially when some time has intervened between the wounding or sickening and the dying. *Fatal* rather than *mortal* is used in predictions (to remove him to the hospital would be *fatal*) (at her age . . . it [diabetes] was not speedily or necessarily *fatal*—*Ellis*) (I will not repeat your words . . . because the consequences to you would certainly be *fatal*—*Henry Adams*) **Lethal** applies only to something which by its very nature is bound to cause death or which exists for the purpose of destroying life (the morphia he gave was a full *lethal* dose, and presently the body on the deck found peace—*Nevil Shute*) (a *lethal* gas) (a *lethal* chamber for the execution of those condemned to death) (a *lethal* weapon) All of these terms except *lethal* may be used in a lighter sense not implying physical or spiritual death, but something dreaded or greatly feared; a *deadly* shaft of irony causes complete discomfiture; *mortal* terror always suggests extreme terror, but only occasionally the terror of losing one's life; a *fatal* error or a *fatal* slip may imply the destruction of one's plans or hopes rather than of one's life.

Ana destroying or destructive (see DESTROY): killing, slaying (see KILL *vb*): malignant, malign (see MALICIOUS): baneful, *pernicious: toxic, virulent, *poisonous, pestilential, pestilent: ruinous (see corresponding verb at RUIN)

2 Deadly, deathly are frequently confused although in precise use they are not synonyms. **Deadly** applies to an agent which is bound or extremely likely to cause death (see DEADLY 1); in one of its extended senses, it applies to something which is so implacable or virulent or so relentless that it can result only in death, destruction, or ruin (a *deadly* enmity existed between them) (the two railroads are engaged in a *deadly* conflict over rates) *Deadly* may imply no more than an extreme of something (a *deadly* monotony) (why are you in such *deadly* haste?) or it may suggest a disgusting extreme of some depressing or spirit-destroying quality (the city is *deadly* in summer) **Deathly** applies only to that which suggests the appearance or the presence of death (his *deathly* pallor) (the *deathly* stillness of the place)

deal *vb* 1 *distribute, divide, dispense, dole

Ana apportion, *allot, assign, allocate: *share, participate, partake

Con collect, *gather, assemble: *receive, take: *keep, retain, withhold, hold, hold back, detain, reserve

2 *treat, handle

Ana manage, control, *conduct, direct: *rid, clear, unburden

dealings *intercourse, commerce, traffic, communication, communion, conversation, converse, correspondence

dear expensive, *costly, precious, valuable, invaluable, priceless

Ana exorbitant, *excessive, extravagant, inordinate
Ant cheap

dearth *lack, want, absence, defect, privation

Ana scarcity, infrequency, rareness, uncommonness (see corresponding adjectives at INFREQUENT): scantiness, meagerness, scantness (see corresponding adjectives at MEAGER)

Ant excess

death, decease, demise, passing denote the end or the ending of life. **Death** is the general word and is used for the termination of plants and animals as well as of men and also of inanimate things marked by continuity or development (the *death* of an enterprise) **Decease** and **demise** apply only to human beings except in figurative use. *Decease* is preferred in legal context but in ordinary use conveys a slightly euphemistic or rhetorical quality. *Demise* in literal use has become somewhat pompous or affected (the lady's *demise* had been ascribed to apoplexy—*Hynd*) In figurative use it frequently lacks such connotation (organized labor, which promised his political *demise* if he signed the bill against jurisdictional strikes—*Beverly Smith*) **Passing** is a euphemism for the death of a person.

Ant life

deathless *immortal, undying, unfading

Ana *everlasting, endless: eternal (see INFINITE): enduring, abiding, persisting (see CONTINUE)

Con ephemeral, *transient, transitory, evanescent, passing

deathly *deadly

Ana *ghastly, macabre, gruesome, grisly

Ant lifelike

debar *exclude, blackball, disbar, suspend, shut out, eliminate, rule out

Ana preclude, obviate, *prevent: *forbid, prohibit, ban, interdict

Con *invite, court, woo, solicit, bid: permit, allow, *let

debase 1 **Debase, vitiate, deprave, corrupt, debauch, pervert** mean to cause a person or thing to become impaired and lowered in quality or character and share certain distinctions in implications and connotations with the adjectives (usually participial adjectives) corresponding to the verbs, **debased, vitiated, depraved, corrupted** (but more often, **corrupt**), **debauched, perverted**. **Debase** (see also ABASE) and **debased** imply a loss of worth, value, or dignity and are widely applicable (plays that *debase* the taste of the people) (a *debased* coinage) (the life-and-death struggle with Hannibal . . . had permanently *debased* the Roman temper and left in it a core of hard inhumanity—*Buchan*) (success permits him to see how those he has converted distort and *debase* . . . his teaching—*Huxley*) (the fine old language which has been slowly perfected for centuries, and which is now being . . . *debased* by the rubbishy newspapers which form almost the sole reading of the majority—*Inge*) (human values cruelly and systematically *debased* by the Nazis—*Dean*) **Vitiate** and **vitiated** imply impairment through the introduction of a fault, a defect, or anything that destroys the purity, validity, or effectiveness of a thing (a style *vitiated* by exaggeration) (inappropriate and badly chosen words *vitiate* thought—*Huxley*) (the fox . . . *vitiated* his line of scent with the gas fumes on the macadam highways—*Heinold*) (the *vitiated* air of a crowded hall) (party jealousies *vitiated* the whole military organization—*Times Lit. Sup.*) (a final decree . . . *vitiated* by the judge's assumption that he was bound by the master's findings of fact—*Justice Holmes*) **Deprave** and **depraved** usually imply pronounced moral deterioration; thus, a person who has a *debased* taste cannot enjoy what is really good or beautiful if it lacks showy surface qualities which catch his attention, but a person with a *de-*

praved taste finds satisfaction only in what is wholly or partly obscene or prurient (the belief that a witch was a person who leagued herself with the Devil to defy God and *deprave* man—*The Spectator*) (the servants, wicked and *depraved*, corrupt and *deprave* the children—*Henry James*) **Corrupt** (both verb and adjective: for the latter see also *vicious*) and **corrupted** imply a loss of soundness, purity, integrity through forces or influences that break down, pollute, or destroy: the terms are applicable to things which are subject to decay, disintegration, or irreparable contamination of any sort (lay not up for yourselves treasures upon earth, where moth and rust doth *corrupt*—*Mt* 6:19) (we must not so stain our judgment, or *corrupt* our hope—*Shak.*) (the idea of beauty has been *corrupted* by those who would make it purely impressionistic or expressive—*Babbitt*) (our schools teach the morality of feudalism *corrupted* by commercialism—*Shaw*) Often also, the terms imply seduction, bribery, or influence as leading to a moral breakdown or to an immoral act (they were not able to *corrupt* the new legislators) (corrupted courts) (at sixteen the girl was further *corrupted* by a “perverse and wicked” young man—*Edmund Wilson*) **Debauch** and **debauched** imply a demoralizing and depraving through such corrupting influences as a life of pleasure, ease, or sensual indulgence: they suggest the weakening, more often than the loss, of such qualities as loyalty to one’s allegiance or duties, fitness for responsibility or high endeavor, and moral purity or integrity, and they often also connote dissoluteness or profligacy (to betray their master and *debauch* his army—*Mill*) (she takes them to an enchanted isle, where she *debauches* them with enervating delights and renders them oblivious to their duty—*R. A. Hall*) (the gay, *debauched*, quite inconsequent lad was managed like a puppet—*Bello*) **Pervert** and **perverted** imply a twisting or distorting of something (sometimes someone) from what it is in fact or in its true nature, so as to debase it completely or make it incapable of proper or correct application; to *pervert* the meaning of a text is to twist that meaning in interpreting it so that it will serve one’s own ends or seem to prove one’s thesis; to *pervert* the facts in a case is to give a distorted and, usually, personally advantageous view of them; to *pervert* the ends of nature is to use one’s appetites or natural desires for other ends than those which are normal and in accordance with nature (subjugation of the eternal to the temporal in a *perverted* set of values—*Times Lit. Sup.*) (these nothings which . . . people are so prone to start a row about, and nurse into hatred from an idle sense of wrong, from *perverted* ambition—*Conrad*) (the truth to him . . . is not only not to be spoken at all times, but it is now and then to be *perverted*—*Brownell*)

Ana defile, pollute, taint, *contaminate: *adulterate, sophisticate, load, weight, doctor: impair, spoil, mar, damage, harm, *injure

Ant elevate (*taste, character*): amend (*morals, way of life*) —**Con** enhance, heighten (see **INTENSIFY**): raise, *lift: *improve, better, ameliorate

2 degrade, demean, *abase, humble, humiliate

Ana *weaken, undermine, sap, enfeeble, debilitate, cripple, disable

Con *vitalize, energize, activate: vivify, enliven, *quicken: *renew, restore, refresh, rejuvenate

debased vitiated, depraved, corrupted, debauched, perverted (see under **DEBASE** 1)

Ana deteriorated, degenerated or degenerate, decadent (see corresponding nouns at **DETERIORATION**)

Con improved, bettered, ameliorated (see **IMPROVE**): raised, elevated, lifted (see **LIFT** *vb*)

debate *n* disputation, forensic, *argumentation, dialectic **Ana** controversy, *argument, dispute: contention, dissension (see **DISCORD**)

debate *vb* dispute, argue, *discuss, agitate

Ana *contend, fight, battle, war: wrangle, altercate, quarrel (see under **QUARREL** *n*): controvert, refute, confute, rebut, *disprove: *prove, demonstrate

debauch corrupt, deprave, pervert, *debase, vitiate **Ana** *injure, harm, damage, spoil, mar: seduce, inveigle, decoy, tempt, *lure: pollute, defile, taint (see **CONTAMINATE**)

debauched corrupted, depraved, perverted, debased, vitiated (see under **DEBASE**)

Ana dissolute, reprobate, *abandoned, profligate: *licentious, libertine, lascivious, libidinous, lecherous, lewd, wanton

debilitate enfeeble, *weaken, undermine, sap, cripple, disable

Ana impair, *injure, damage, harm, hurt, mar, spoil **Ant** invigorate —**Con** energize, *vitalize: *renew, restore, rejuvenate, refresh

debit indebtedness, liability, *debt, obligation, arrear **Ant** credit

debris *refuse, waste, rubbish, trash, garbage, offal

debt, indebtedness, obligation, liability, debit, arrear mean something, and especially a sum of money, that is owed another. **Debt** usually implies that the amount is owed in return for goods, property, or services and can be definitely computed or, if something other than money is owed, that it equals in value if not in kind the thing sold or the service given (incur a heavy *debt* for repairs to his house) (pay one’s social *debts*) (this *debt* is now due) (the firm has no *debts* at present) **Indebtedness** is applied either to the total amount owed one’s creditors or a single creditor (the *indebtedness* of the city exceeds the legal limit) (his *indebtedness* to his father fell just short of a thousand dollars) **Obligation**, which is chiefly a legal term in this sense, implies a formal agreement to pay a certain amount or to do something or an acknowledgment of such an agreement (as by a contract or a bond) (a contract is said to be “performed” . . . when all the *obligations* have been fulfilled on both sides—*Rubinstein*) **Liability** is an accountant’s term used chiefly in reference to general balance sheets of a company or corporation and is the opposite of *asset*. It is also used of the affairs of individuals especially in bankruptcy actions. It applies to any amount which constitutes an item of indebtedness. Liabilities include accounts payable, accrued interest, taxes, such obligations as notes, bonds, and debentures, and even capital stock. **Debit** is also a term in accounting for any item shown on the left side of an account; it usually designates a purchase and its price and is opposed to *credit*, or any entry on the right side (that is, for an article returned or an amount paid on account). **Arrear** especially in its plural *arrears* usually implies that some of a debt, but not all, has been paid, but it always implies that the amount owed is overdue (pay off the *arrears* of one’s rent) (the servants found it difficult to obtain the *arrears* of their wages)

decadence decline, declension, *deterioration, degeneration, devolution

Ana retrogressiveness or retrogression, regressiveness or regression or regress, retrograding or retrogradation (see corresponding adjectives at **BACKWARD**)

Ant rise: flourishing —**Con** advance, progress (see under **ADVANCE** *vb*): *progress, progression

decamp *escape, flee, fly, abscond

Ana depart, quit, leave, *go: elude, evade, *escape, shun, avoid

decay *vb* Decay, decompose, rot, putrefy, spoil, disintegrate, crumble mean to undergo or, in some cases, to cause something to undergo destructive dissolution. Decay implies change, commonly a natural and gradual change, from a state of soundness or perfection; it may or may not suggest the certainty of complete destruction (teeth *decaying* from lack of care) (infirmary, that *decays* the wise—*Shak.*) (as winter fruits grow mild ere they *decay*—*Pope*) (nor shall I discuss the causes why science *decayed* and died under the Roman Empire—*Inge*) **Decompose** stresses the idea of breaking down by separation into constituent parts or elements (as by chemical action in the laboratory or, in respect to animal and vegetable matter in nature, by the action of living microorganisms) (whenever molecules combine or *decompose* or atoms change partners, it is chemistry—*Furnas*) (the action of bacteria in *decomposing* the organic products contained and forming gases useful for power and heat—*Morrison*) (the odor of *decomposing* meats) (after slaying his colleague, he chemically *decomposed* the body—*Guild*) **Rot** implies decay and decomposition, usually of or as if of animal or vegetable matter; the term may or may not imply offensiveness or foulness; figuratively it differs from *decay* in stressing stagnation or corruption rather than decline (blossoms . . . which fall before they wither rather than cling *rotting* to the stalk—*Binyon*) (there shall they *rot*, ambition's honored fools!—*Byron*) (it was this garrison life. Half civilian, half military, with all the drawbacks of both. It *rotted* the soul, robbed a man of ambition, faith—*Irwin Shaw*) **Putrefy** not only suggests the rotting of or as if of animal matter but also stresses its extreme offensiveness to sight and smell (corpses *putrefying* on the sun-drenched battlefields) (flesh in that long sleep is not *putrefied*—*Donne*) **Spoil** (see also INJURE) is often used in place of *decay*, *rot*, or *putrefy* when foodstuffs, especially in the home or the market, are referred to (roasted pork *spoils* quickly if not kept in a refrigerator) **Disintegrate** implies either a breaking down or a breaking apart so that the wholeness or integrity of the thing or the cohesiveness of its particles is destroyed or is in process of destruction (the London atmosphere tends to *disintegrate* bricks) (Rutherford and Soddy found that radioactive substances *disintegrate* in a way they described as "spontaneous"—the rate of decay cannot be expedited or retarded by any known physical process—*Jears*) (the other great civilizations with which it was once contemporary have passed away or been *disintegrated* and transformed—*Ellis*) **Crumble** implies disintegration of or as if of a substance that breaks into fine particles; neither it nor *disintegrate* need imply, as the remaining terms almost inevitably do, an alteration at the chemical level (*crumbled* a piece of bread in his fingers) (winter rains had washed and washed against its . . . old bricks until the plaster between them had *crumbled*—*Deland*) (great periods of human culture which flourished at their height just as the substructure *crumbled*—*Krutch*)

Ana *weaken, undermine, sap, debilitate, enfeeble; taint, *contaminate, defile, pollute; dilapidate, *ruin, wreck; deliquesce (see LIQUEFY)

decease *death, demise, passing

deceased departed, late, *dead, defunct, lifeless, inanimate

deceit 1 Deceit, duplicity, dissimulation, cunning, guile mean the quality, the habit, the act, or the practice of imposing upon the credulity of others by dishonesty, fraud, or trickery. Deceit usually implies the intent to mislead or delude; otherwise, it is the most comprehensive of these terms, for it may imply deliberate mis-

representation or falsification, the assumption of a false appearance, the use of fraud or trickery or craft (the fox barks not when he would steal the lamb. No, no, my sovereign! Gloucester is a man unsounded yet and full of deep *deceit*—*Shak.*) (no! there my husband never used *deceit*—*Browning*) (there is an element of sham and *deceit* in every imitation—*Dewey*) **Duplicity** commonly implies double-dealing or bad faith; usually it suggests a pretense of feeling one way and an acting under the influence of another and opposite feeling (I should disdain myself as much as I do him, were I capable of such *duplicity* as to flatter a man whom I scorn and despise—*Burney*) The word may sometimes imply no more than the appearance of deceit arising out of a complexity of motives or a lack of singlemindedness (it was chiefly that the simplicity and openness of their lives brought out for him the *duplicity* that lay at the bottom of ours—*Mary Austin*) **Dissimulation** implies deceit by concealing what one truly is or what one actually feels and therefore often suggests duplicity (Archer looked at her perplexedly, wondering if it were lightness or *dissimulation* that enabled her to touch so easily on the past at the very moment when she was risking her reputation in order to break with it—*Wharton*) (the levity of Hamlet, his repetition of phrase, his puns, are not part of a deliberate plan of *dissimulation*, but a form of emotional relief—*T. S. Eliot*) **Cunning** implies deceit by the use of trickery, wiles, or stratagems; it often connotes a perverted intelligence and almost vicious shrewdness in attaining one's end (surely the continual habit of dissimulation is but a weak and sluggish *cunning*, and not greatly politic—*Bacon*) (he . . . had come to the belief that I was incapable of the *cunning* and duplicity they practiced . . . to deceive with lies and false seeming was their faculty and not mine—*Hudson*) **Guile** carries an even stronger implication of lack of obviousness in the arts practiced or tricks used than does *cunning*; in strict use it carries a strong implication of insidiousness or treacherousness (we now return to claim our just inheritance of old . . . by what best way, whether of open war or covert *guile*, we now debate—*Milton*) (but Father Vaillant had been plunged into the midst of a great industrial expansion, where *guile* and trickery and honorable ambition all struggled together—*Cather*) The word has, however, so long been used in such phrases as "without *guile*" and "devoid of *guile*" that it often is used in a very much weaker sense than *cunning*, sometimes implying little more than artfulness or the use of wiles (her heart innocent of the most pardonable *guile*—*Conrad*) (there is a note of unconscious *guile*, the *guile* of the peasant, of the sophisticated small boy, in the letter he wrote—*Brooks*)

Ana *deception, fraud, trickery, double-dealing, chicanery, chicanery; craft, artifice (see ART); cheating, cozening, defrauding, overreaching (see CHEAT *vb*)

Con honesty, uprightness, scrupulousness (see corresponding adjectives at UPRIGHT); openness, candor, frankness (see corresponding adjectives at FRANK); straightforwardness, forthrightness (see corresponding adjectives at STRAIGHTFORWARD)

2 *imposture, cheat, fraud, sham, fake, deception, counterfeiting, humbug

Ana ruse, wile, *trick, feint, stratagem, maneuver, artifice, gambit, ploy

deceitful *dishonest, mendacious, lying, untruthful
Ana crafty, tricky, wily, guileful, foxy, insidious, cunning, *sly, artful; underhand, underhanded, stealthy, furtive, clandestine (see SECRET): *crooked, devious, oblique; delusory, deceptive, delusive, *misleading
Ant trustworthy —*Con* *reliable, dependable, trusty

deceive, **mislead**, **delude**, **beguile**, **betray**, **double-cross** mean to lead astray or into evil or to frustrate by underhandedness or craft. A person or thing **deceives** one by leading one to take something false as true, something nonexistent as real, something counterfeit as genuine, something injurious as helpful: the term may imply no more than a chance or inadvertent confusing or it may suggest a deliberate ensnaring or entrapping for the agent's own and often evil ends <deceived by a chance resemblance into the belief that he had seen his dead sister's spirit> <"No woman's safe with him." "Ah, but he hasn't deceived me, Mrs. Berry. He has not pretended he was good"—*Meredith*> <a person who first subconsciously **deceives** himself and then imagines that he is being virtuous and truthful—*Russell*> A person or thing **misleads** one by causing one to follow a wrong path, way, or course or to fall into error <misled by a confusing traffic signal> <we never find them **misled** into the conception that such gifts are an end in themselves—*Dickinson*> <nor is there any safeguard against the nations being **misled** and deceived by their governments into sanctioning another great war—*Inge*> <Thrasylus never told lies but he loved **misleading** people—*Graves*> A person or thing **deludes** one by deceiving or misleading one so completely as to make one a fool, a dupe, or so befuddled as to be incapable of distinguishing the false from the true <I began to wonder whether I, like the spider that chased the shadow, had been **deluded**, and had seemed to hear a sound that was not a sound—*Hudson*> <did he, did all the people who said they didn't mind things, know that they really did? Or were they indeed **deluded**?—*Rose Macaulay*> A person or, less often, a thing, **beguiles** one by using such subtle and usually agreeable or alluring devices as to mislead, deceive, or delude one <the male propensity to be **beguiled**—*Mary Austin*> <I recalled some of the Indian beliefs, especially that of the . . . man-devouring monster who is said to **beguile** his victims into the dark forest by mimicking the human voice—*Hudson*> <marsh-lights to **beguile** mankind from tangle goods and immediate fruitions—*Mumford*> A person or thing **betrays** one by using deception or treachery to deliver one into the hands of an enemy or put one in a dangerous or false position <verily I say unto you, that one of you shall **betray** me—*Mt 26:21*> <knowing that nature never did **betray** the heart that loved her—*Wordsworth*> <so, times past all number deceived by false shows, deceiving we cumber the road of our foes, for this is our virtue: to track and **betray**—*Kipling*> A person **double-crosses** another and usually a friend, partner, or accomplice by deceiving or betraying him, especially by double-dealing or duplicity <said he had been **double-crossed** by his partner> <De Valera charged that his own trusted negotiators had **double-crossed** him by signing an agreement to take the detested oath of loyalty to the British king—*Blanshard*> **Ana** *cheat, cozen, defraud, overreach: outwit, circumvent (see FRUSTRATE): *dupe, gull, befool, trick, hoax, hoodwink, bamboozle

Ant undecieve: enlighten

decency *decorum, propriety, dignity, etiquette

Ana seemliness, decorousness (see corresponding adjectives at DECOROUS): fitness, suitability, fittingness, appropriateness (see corresponding adjectives at FIT)

decent 1 *decorous, seemly, proper, nice

Ana fitting, *fit, appropriate, suitable, meet: conventional, formal, ceremonious (see CEREMONIAL)

Con *awkward, gauche, inept, maladroit, clumsy: crude, rough, *rude, uncouth

2 modest, pure, *chaste

Ana virtuous, *moral, ethical, noble: pleasing, grateful,

welcome, agreeable, *pleasant

Ant indecent: obscene —**Con** lewd, lascivious, wanton, libertine, *licentious: ribald, gross, *coarse, vulgar: dissolute, profligate, reprobate, *abandoned

deception 1 **Deception**, **fraud**, **double-dealing**, **trickery**, **chicane**, **chicanery** mean the act or practice of, or the means used by, one who deliberately deceives in order to accomplish his ends. **Deception** may or may not imply blame-worthiness, for it may be used not only of cheating, swindling, and tricking but also of many arts or games in which the object is illusion or mystification <he is incapable of **deception**> <there is, as the conjurers say, no **deception** about this tale—*Kipling*> <magicians are adepts in **deception**> **Deception** also may be used for the state of being deceived <fall into **deception**> <he is surely greedy of delusion, and will hardly avoid **deception**—*Browne*> **Fraud**, on the other hand, except in casual use, always implies guilt, often criminality, in act or practice. Distinctively, it usually suggests the perversion of the truth for the sake of persuading someone to surrender some valuable possession or a legal right <the elder brother gained control of the property by **fraud**> <he will never stoop to **fraud**, no matter how much he desires to get rich> The term may suggest an act or practice involving concealment of truth, violation of trust and confidence, or nonperformance of contracted acts by which one (as an agent, an attorney, an executor, an employer, or an employee) gains an advantage over another to the injury of the latter <according to one legal decision "silence where necessity requires speech may sometimes constitute **fraud**"> <I think that obtaining money by **fraud** may be made a crime as well as murder or theft; that a false representation, expressed or implied at the time of making a contract of labor, that one intends to perform it and thereby obtaining an advance, may be declared a case of fraudulently obtaining money—*Justice Holmes*> **Double-dealing** usually implies duplicity in character and in actions, for it frequently suggests an act that in its essence is contrary to one's professed attitude <one does not always believe them . . . they often say one thing and mean another, so that we may fairly accuse them of **double-dealing**—*Jernigan*> The term may imply secret treating with each of two opposed persons or groups as though one were friendly to that person or group and inimical to the other <Saville . . . by his **double-dealing** with the King and the Scots, proved himself a political traitor—*D'Israeli*> **Trickery** implies acts or practices that are intended to dupe or befool others; it often implies sharp practice or actual dishonesty <we rely not upon management or **trickery**, but upon our own hearts and hands—*Jowett*> <they held that the basest **trickery** or deceit was not dishonorable if directed against a foe—*Amer. Guide Series: R. I.*> **Chicane** and **chicanery** imply petty or paltry trickery and often subterfuge especially in legal proceedings <to wrest from them by force, or shuffle from them by **chicane**—*Burke*> <many scenes of London intrigues and complex **chicanery**—*De Quincey*> <making a tremendous fight, chiefly by **chicane**—whooping for peace while preparing for war, playing mob fear against mob fear—*Mencken*> **Ana** *deceit, duplicity, dissimulation, cunning, guile: cheating, cozening, defrauding, overreaching (see CHEAT): duping, gulling, hoaxing, hoodwinking, bamboozling, befooling (see DUPE)

2 *imposture, cheat, fraud, sham, fake, humbug, counterfeit, deceit

Ana illusion, *delusion, hallucination, mirage

deceptive *misleading, delusory, delusive

Ana specious, *plausible, colorable: *false, wrong

Con genuine, *authentic, veritable, bona fide: true, *real,

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

actual

decide, **determine**, **settle**, **rule**, **resolve** mean to come or to cause to come to a conclusion. **Decide** presupposes previous consideration of a matter causing doubt, wavering, debate, or controversy and implies the arriving at a more or less logical conclusion that brings doubt or debate to an end: the word may take as its subject the person or persons arriving at such a conclusion or the thing or things that bring them to the conclusion (the time for deliberation has then passed. He has *decided*—*John Marshall*) (this exordium, and Miss Pross's two hands in quite agonized entreaty clasping his, *decided* Mr. Cruncher—*Dickens*) (the . . . mistress of the household referred to her whether we should have another round or go in to supper. Of course, she always *decided* as she supposed the hostess wished—*Jefferies*) (it should disturb the complacency of those network officials who *decided* . . . that not enough people were watching to justify the expense—*Seldes*) **Determine** (see also DISCOVER 2) may mean to set limits or bounds to: when it means basically to decide, this implication of definitely fixing something so that its identity, its character, its scope, its direction is clear and beyond doubt distinguishes it from *decide*; one *decides* to give a dinner party but *determines* the guests to be invited; a legislature *decides* that the state constitution should be revised and appoints a committee with power to *determine* what changes shall be made. In a slightly different sense *determine* implies the arrival at a conclusion that either is a fixed and unalterable purpose or intention (can you weep [i.e., move by weeping] fate from its *determined* purpose?—*Middleton*) (she was . . . obviously tormented by shyness, but as obviously *determined* to conquer it—*Mackenzie*) or is the inevitable result, outcome, or end of what precedes (what we notice *determines* what we do; what we do again *determines* what we experience—*James*) (their civilization was one of "city-states," not of kingdoms and empires; and their whole political outlook was necessarily *determined* by this condition—*Dickinson*) **Settle** implies the arrival at a conclusion, often a mental or logical conclusion but sometimes a termination for which no individual is responsible, that brings to an end all doubt, all wavering, all dispute (the Supreme Court of the United States has power to *settle* all questions of law) (time has *settled* few or none of the essential points of dispute—*Henry Adams*) (death *settled* all their problems) **Rule** (see also GOVERN) implies a decision or determination by authority, especially by the authority of the court (the judge *ruled* that the question was inadmissible) **Resolve** implies an expressed or clear decision or determination to do or refrain from doing something (resolve to get up earlier in the mornings) (resolve to give up smoking) (he was *resolved* to win through to fortune, but he must first discover his tools—*Buchan*) **Ana** conclude, judge, gather (see INFER): *judge, adjudge, adjudicate

Con vacillate, waver, *hesitate, falter

decided, **decisive** are often confused, especially when they mean positive and leaving no room for doubt, uncertainty, or further discussion. In this sense the words are applied chiefly to persons, their natures, their utterances or manner of utterance, their opinions, or their choices. **Decided** implies a contrast with what is undetermined, indefinite, and neither this nor that; thus, a *decided* blue raises no question of its greenness or blackness; a *decided* success so far overpasses the line between success and failure that no one can question its favorable termination; a *decided* answer leaves no doubt of a person's meaning, wishes, or intentions. When applied to a person's char-

acter, expression, or movements *decided* suggests such qualities or outward signs of qualities as determination, resolution, and lack of all hesitation or vacillation (the mother was a *decided* person to whose will everyone in the family submitted) (he has very *decided* opinions) (I see too many ways of saying things; a more *decided* mind hits on the right way at once—*Ward*) (then with a *decided* step she turned toward home—*Wharton*) **Decisive**, on the other hand, implies an opposition to what is unsettled, uncertain, or wavering between this and that (for this sense as applied to things see CONCLUSIVE). When used in reference to persons it implies ability or intent to settle or success in settling a controverted matter once and for all (this was enough to determine Sir Thomas, and a *decisive* "Then so it shall be" closed that stage of the business—*Austen*) (she stood up and surveyed herself in the pier glass. The *decisive* expression of her great florid face satisfied her—*Joyce*)

Ana *definite, definitive: determined, resolved (see DECIDE): positive, cocksure, certain, *sure: categorical, *explicit, express

Con dubious, *doubtful, questionable, problematic

decipher *vb* *solve, resolve, unfold, unravel

Ana interpret, construe, elucidate (see EXPLAIN): translate, paraphrase (see corresponding nouns at TRANSLATION)

decisive 1 *conclusive, determinative, definitive

Ana critical, crucial, *acute: momentous, significant, consequential, important (see corresponding nouns at IMPORTANCE)

Ant indecisive

2 *decided

Ana peremptory, imperative, *masterful, imperious: certain, *sure, positive, cocksure: resolute, steadfast (see FAITHFUL)

Ant irresolute —**Con** wavering, fluctuating (see SWING); hesitant, reluctant (see DISINCLINED)

deck *vb* bedeck, *adorn, decorate, ornament, garnish, embellish, beautify

Ana array, apparel, attire, dress, *clothe

declaration announcement, publication, advertisement, proclamation, promulgation, broadcasting (see under DECLARE 1)

declare 1 **Declare**, **announce**, **publish**, **advertise**, **proclaim**, **promulgate**, **broadcast** (and their corresponding nouns **declaration**, **announcement**, **publication**, **advertisement**, **proclamation**, **promulgation**, **broadcasting**) denote to make known (or a making known) openly or publicly. To **declare** is to make known explicitly or plainly and usually in a formal manner (if Lord Wolseley should **declare** his preference for a republic—*Brownell*) (the law . . . **declares** all such marriages absolutely null and void—*Taney*) (here the results of research are presented, here the progress of knowledge is **declared**—*De Voto*) To **announce** is to declare especially for the first time something presumed to be of interest or intended to satisfy curiosity (announce a discovery) (announced his candidacy for the mayoralty) (announce a forthcoming book) (she could not live without **announcing** herself to him as his mother—*Hardy*) To **publish** is to make public especially through the medium of print (he was . . . exercising great self-denial, for he was longing to **publish** his prosperous love—*Austen*) (there were no newspapers to **publish** every mystery—*Leland*) To **advertise** is to call public attention to by repeated or widely circulated statements. In its general sense it often connotes unpleasant publicity or extravagance in statement (an issue which **advertised** me . . . throughout the Church as a supporter of heresy—*William Lawrence*) (deliberately

advertising his willingness to make concessions—*Time*) In its specific sense, as implying publicity for the sake of gaining patronage or support for an article of merchandise, it implies the use of communication media (as the press, the radio, handbills, or billboards); so used, it is devoid of unfavorable connotation <*advertise* a new model of automobile> To **proclaim** is to announce orally, sometimes by means of other sound (as of a trumpet), and loudly in a public place; by extension, to give wide publicity to, often insistently, proudly, boldly, or defiantly <a lie is as much a lie, when it is whispered, as when it is *proclaimed* at the market cross—*Wollaston*> <you *proclaim* in the face of Hellas that you are a Sophist—*Jowett*> To **promulgate** is to make known to all concerned something that has binding force (as a law of the realm or a dogma of the church) or something for which adherents are sought (as a theory or doctrine) <the Doctrine of the Immaculate Conception was *promulgated* in December 1854—*Robertson*> <that for the training of the young one subject is just as good as another . . . is surely . . . an amazing doctrine to *promulgate*—*Grandgent*> To **broadcast** is to make known (as by radio or television) in all directions over a large area <the doctrine of missionary zeal . . . has been *broadcast* over Christendom—*Isaac Taylor*> <the largest . . . wireless station that can *broadcast* to the world—*Daily Mail*> <the book he has written to *broadcast* this conviction—*Gordon Harrison*>

Ana *inform, apprise, acquaint, advise, notify; impart, *communicate: *reveal, disclose, discover, divulge

2 *assert, profess, affirm, aver, avouch, avow, protest, predicate, warrant

Ana *express, voice, utter, vent, broach, air, ventilate
Con *suppress, repress: *hide, conceal

declass *degrade, demote, reduce, disrate

declension decline, decadence, *deterioration, degeneration, devolution

Ana decaying or decay, disintegration, crumbling (see corresponding verbs at DECAY): retrogressiveness or retrogression, regressiveness or regression (see corresponding adjectives at BACKWARD)

Con ascent, *ascension: rising or rise (see corresponding verb RISE): advance, progress (see under ADVANCE vb): *progress, progression

decline vb **Decline, refuse, reject, repudiate, spurn** are comparable when they mean to turn away something or someone by not consenting to accept, receive, or consider it or him. **Decline** is the most courteous of these terms and is used chiefly in respect to invitations, offers (as of help), or services <*decline* an invitation to dinner> <she *declined* the chair the Judge pushed toward her—*Cather*> <I am very sensible of the honor of your proposals, but it is impossible for me to do otherwise than *decline* them—*Austen*> **Refuse** is more positive, often implying decisiveness, even ungraciousness <meats by the law unclean . . . young Daniel could *refuse*—*Milton*> <the employers *refused* to “recognize” the unions—*Shaw*> **Refuse**, however, may imply, as *decline* does not, the denial of something expected or asked for <*refuse* a child permission to go out> <Mark knew that Mrs. Pluepott only lived to receive visitors, and he had not the heart to *refuse* her the pleasure of a few minutes—*Mackenzie*> **Reject** stresses a throwing away, a discarding, or abandoning; it implies a refusal to have anything to do with a person or thing <those who accepted the offer and those who *rejected* it—*Montague*> <Plotinus definitely *rejects* the notion that beauty is only symmetry—*Ellis*> <the poor man must be forgiven a freedom of expression, tinged at rare moments with a touch of bitterness, which magnanimity as well as caution would *reject* for one triumphant—*Cardozo*>

<common sense, *rejecting* with scorn all that can be called mysticism—*Inge*> **Repudiate** implies a casting off (as of a wife whom one refuses any longer to recognize or accept); it usually connotes either a disowning or a rejection with scorn as untrue, unauthorized, or unworthy of acceptance <*repudiate* a son> <the state has *repudiated* its debts> <*repudiate* a religious doctrine or a scientific theory> <I do not see how the United States could accept the contract and *repudiate* the consequence—*Justice Holmes*> <it is the law of nature that the strong shall rule; a law which everyone recognizes in fact, though everyone *repudiates* it in theory—*Dickinson*> **Spurn** carries an even stronger implication of disdain or contempt in rejection than *repudiate* <the proposals which she had proudly *spurned* only four months ago—*Austen*> <he would be *spurned* out of doors with a kick—*Snaith*> <must *spurn* all ease, all hindering love, all which could hold or bind—*Lowell*>

Ana *demur, balk, shy, boggle, jib, stick, stickle, scruple
Ant accept —**Con** take, *receive: consent, *assent, acquiesce, accede

decline n declension, decadence, *deterioration, degeneration, devolution

Ana & Con see those at DECLENSION

decolorize blanch, bleach, etiolate, *whiten

decompose *decay, rot, putrefy, spoil, disintegrate, crumble

Ana deliquesce, *liquefy, melt

decorate ornament, embellish, beautify, *adorn, deck, bedeck, garnish

Ana enhance, heighten, *intensify

decorous, decent, seemly, proper, nice apply to persons, their utterances, and their behavior, and mean conforming to an accepted standard of what is right or fitting or is regarded as good form. Something is **decorous** when it is marked by observance of the proprieties; the term usually implies a dignified, sometimes ceremonious, sometimes prim, formality <the *decorous* platitudes of the last century—*J. R. Lowell*> <done something strange and extravagant and broken the monotony of a *decorous* age—*Emerson*> <on Sunday mornings the whole school went to church; in the afternoon it had a *decorous* walk—*H. G. Wells*> Something is **decent** (for other sense, see CHASTE) when it keeps within the bounds of what is appropriate or fitting to its kind or class, not only from the points of view of morality or social propriety but also from those of good taste or the exigencies of a situation <to praise a man's self, cannot be *decent*, except it be in rare cases—*Bacon*> <he cast only one glance at the dead face on the pillow, which Dolly had smoothed with *decent* care—*George Eliot*> <his *decent* reticence is branded as hypocrisy—*Maugham*> Something is **seemly** when it is not only decorous or decent, but also pleasing to the eye, ear, or mind of the observer <to make a *seemly* answer—*Shak.*> <a *seemly* display of enthusiasm> <it was not *seemly* that one so old should go out of his way to see beauty, especially in a woman—*Galsworthy*> <the safety of human society lies in the assumption that every individual composing it, in a given situation, will act in a manner hitherto approved as *seemly*—*Mencken*> Something is **proper** when it is exactly what it should be according to accepted ethical or social standards or conventions <Henchard's creed was that *proper* young girls wrote ladies'-hand—nay, he believed that bristling characters were as innate and inseparable a part of refined womanhood as sex itself—*Hardy*> <a few pages back I was expressing a *proper* diffidence about any conclusions in view, and here I am, almost shouting in favor of one—*Montague*> Something is **nice** (see also NICE 1; CORRECT)

when it satisfies a somewhat fastidious taste in behavior, manners, or speech <his conduct is not always so *nice*> <it is not enough for the knight of romance that you agree that his lady is a very *nice* girl—*Justice Holmes*> <the undergraduate literary club, whose membership included all *nice* boys with literary pretensions—*Marquand*> *Ana* formal, conventional, ceremonious, *ceremonial: dignified, elegant (see corresponding nouns at ELEGANCE) *Ant* indecorous; blatant

decorticate *skin, peel, pare, flay

decorum, **decency**, **propriety**, **dignity**, **etiquette** are comparable either when they mean a code of rules respecting what is right, fitting, or honorable in behavior or, more often, when they mean the quality or character of rightness, fitness, or honorableness in behavior resulting from the observance of such a code. The first three words are somewhat literary; the last two are the most common in speech. Both *decorum* and *decency* imply that the code is based upon the nature of things or the circumstances which attend them, and therefore the rules which it embodies have their basis in nature or sound reason. **Decorum** especially suggests a code of rigid rules or laws governing the behavior of civilized men under given or understood conditions (if gentlemen of that profession [the army] were at least obliged to some external *decorum* in their conduct—*Swift*) <that continual breach of . . . *decorum* which, in exposing his wife to the contempt of her own children, was so highly reprehensible—*Austen*> <he enjoyed a distinguished reputation for the excellence of his sermons, for the conduct of his diocese . . . and for the *decorum* and devotion of his private life—*T. S. Eliot*> The term may suggest also order, moderation, and a high degree of intelligibility as a basis of literary or artistic beauty <that *decorum* and orderliness without which all written speech must be ineffective and obscure—*Ellis*> **Decency** often stresses a freedom from immodesty or obscenity <*decency* in dress> <*decency* in conduct> It may imply a seemliness or appropriateness that is based upon the right relation of one thing to another (as of a person to his profession, rank, or condition in life or of a thing to its use or end) <for himself, Father Joseph was scarcely acquisitive to the point of *decency*. He owned nothing in the world but his mule—*Cather*> <there are those . . . for whom St. Paul's [in London], in comparison with St. Peter's [in Rome], is not lacking in *decency*—*T. S. Eliot*> <there were May [his wife], and habit, and honor, and all the old *decencies* that he and his people had always believed in—*Wharton*> **Propriety** stresses conformity to a standard of what is proper or correct. When used in reference to language, it implies a regard for the established meanings of words and a refusal to accept what is not countenanced by good usage <the severe *propriety* of his diction> More often the word refers to social matters and implies adherence or conformity to a code respecting conduct or manners accepted as correct, proper, and essential by either the generality or a particular class of society (my whole life has been at variance with *propriety*, not to say *decency*—*Byron*) <in the reign of James I the conduct of ladies and gentlemen was not marked by the same prim *propriety* as in the reign of the highly respectable Victoria—*Ellis*> <with characteristic independence she had made her reception rooms upstairs and established herself (in flagrant violation of all the New York *proprieties*) on the ground floor of her house—*Wharton*> **Propriety** is sometimes preferred to *decency* when merely seemly or fitting correctness (and not conformity to convention) is implied <the *propriety* and necessity of preventing interference with the course of justice—*Justice Holmes*> **Dignity** (see also

ELEGANCE) seldom applies directly to a code or a rule but it does often denote a state of being that arises from obedience to what one, one's class, or one's profession regards as elevated, noble, or in full accordance with his rank, status, or position, and thereby it implies governance by a code or by forces which often correspond to the decencies or proprieties <lost his *dignity*> <not in accord with the *dignity* of man as a son of God> <I had half a mind to save my *dignity* by telling him that—*Conrad*> <it is of the essence of real *dignity* to be self-sustained, and no man's *dignity* can be asserted without being impaired—*Henry Taylor*> **Etiquette** is the usual term for the code of manners and behavior governing one's conduct in society or in particular circumstances (as in a court or legislature). It may replace *propriety*, for the conventional observance of these rules <trained in the complex *etiquette* and protocol of the Diplomatic Corps> <unaware of the *etiquette* governing the setting of a table for a formal dinner> <the pompous *etiquette* of the court—*Prescott*> <Augustus had kept to the strict constitutional *etiquette*, indicating his preference but leaving the choice of his successor to the Senate—*Buchan*>

Ana formality, conventionality, ceremoniousness, solemnity (see corresponding adjectives at CEREMONIAL): *form, convention, convenience, usage
Ant indecorum; license

decoy *n* *lure, bait, snare, trap

decoy *vb* *lure, entice, inveigle, tempt, seduce

Ana snare, ensnare, trap, entrap, capture, *catch, bag; beguile, delude, *deceive, mislead

decrease *vb* **Decrease**, **lessen**, **diminish**, **reduce**, **abate**, **dwindle** denote to make or grow less, but they are not freely interchangeable. *Decrease* and *lessen* are often employed in place of any of the others. **Decrease** normally retains, even in the transitive, an implication of the process of growing less, and suggests progressive decline <forces that *decrease* the population> <his temperature *decreases*> <his fears *decreased* as dawn approached> <the rise of the public high school . . . *decreased* the number and lessened the importance of the academies—*Amer. Guide Series: VI.*> **Lessen** is a close synonym of *decrease* but the latter is to be preferred in contexts employing specific numbers; thus, it is idiomatic to say that a fever has *lessened* or that it has *decreased* from 101° to 99° <I hoped to obtain your forgiveness, to *lessen* your ill opinion—*Austen*> **Diminish** is a more precise word when the ideas of taking away or subtraction by an agent and of resultant perceptible loss are to be emphasized <their funds were greatly *diminished* by their extravagance> <his sense of personal initiative is cultivated instead of being *diminished*—*Russell*> **Reduce** adds to *diminish* the implication of bringing down, or lowering; it suggests more than any of the others the operation of a personal agent <*reduce* the time needed for an operation> <prices were *reduced* to below cost> <*reduce* budget estimates drastically> **Reduce** also is applicable to lowering in rank, status, or condition <*reduce* a sergeant to the ranks> <suddenly *reduced* from riches to absolute penury—*Conrad*> **Abate** differs from *diminish* and *reduce* in its presupposition of something excessive in force, intensity, or amount and in its strong implication of moderation or, especially when referred to taxes or imposts, of deduction <physically weakened by a stomach disorder that will not *abate*—*Alpert*> **Dwindle**, like *decrease*, implies progressive lessening, but is more often applied to things capable of growing visibly smaller. It specifically connotes approach to a vanishing point <hull down—hull down and under—she *dwindles* to a speck—*Kipling*>

Ana curtail, *shorten, retrench, abridge, abbreviate: *contract, shrink

Ant increase —*Con* augment, multiply, enlarge (see INCREASE): *extend, protract, prolong, lengthen, elongate: *expand, amplify, swell, dilate, distend

decree *vb* *dictate, prescribe, ordain, impose

Ana *command, order, enjoin, charge, direct: constrain, oblige, compel, *force

decrepit infirm, feeble, *weak, frail, fragile

Ana worn, wasted, *haggard: *aged, superannuated, old: tottering, quavering, shaking (see SHAKE)

Ant sturdy —*Con* *strong, stalwart, stout, tough, tenacious: *vigorous, lusty, energetic

decry, depreciate, disparage, derogate, detract, belittle,

minimize mean to write, speak, or otherwise indicate one's feeling in regard to something in such a way as to reveal one's low opinion of it. *Decry* implies open or public condemnation or censure with the intent to discredit or run down someone or something (there seems almost a general wish of *decrying* the capacity and undervaluing the labor of the novelist—*Austen*) <you've had a Western education . . . but you're *decrying* everything Western science has contributed to the world—*Heiser*> *Depreciate* implies a representation of a person or thing as of smaller worth than that usually ascribed to it <to prove that the Americans ought not to be free, we are obliged to *depreciate* the value of freedom itself—*Burke*> <he seems to me to *depreciate* Shakespeare for the wrong reasons—*T. S. Eliot*> <shocked to learn that professional art critics today *depreciate* his works—*Mary McCarthy*> *Disparage* implies depreciation by more subtle or indirect methods (as slighting, invidious reference, or faint praise) <the critic . . . is generally *disparaged* as an artist who has failed—*L. P. Smith*> <cities . . . which they sometimes pretended to *disparage*, but of which they were secretly and inordinately proud—*Replier*> *Derogate* and *detract* (both with *from*) stress the idea of taking away, positively and injuriously, especially from reputation or merit; *derogate from* may be used with an impersonal subject only, *detract from* with either a personal or an impersonal subject <a few instances of inaccuracy or mediocrity can never *derogate from* the superlative merit of Homer and Vergil—*Goldsmith*> <far am I from *detracting from* the merit of some gentlemen . . . on that occasion—*Burke*> <the advocates of pure poetry are apt to take the line that any admixture of logical, of "prose" meaning *detracts from* the value of a poem—*Day Lewis*> *Belittle* and *minimize* both imply depreciation, but *belittle* suggests an effort to make a thing contemptibly small, and *minimize* to reduce it to a minimum or to make it seem either disparagingly or defensively as small as possible <he was inclined to *belittle* the assistance he had received from others> <he *minimized* the dangers of the task> <let there be no *belittling* of such qualities as Archer's—his coherent thinking, his sense of the worth of order and workmanship—*Montague*> <always delighted at a pretext for *belittling* a distinguished contemporary—*Edmund Wilson*> <"Don't think that I am trying to *minimize* your excellent work among the hop pickers this year," he told his curate—*Mackenzie*>

Ana *disapprove, deprecate: *criticize, denounce, reprehend, censure, reprobate, condemn

Ant extol —*Con* acclaim, laud, eulogize, *praise: *exalt, magnify

dedicate consecrate, hallow, *devote

Ana devote, *direct, address, apply

deduce *infer, gather, conclude, judge

Ana reason, cogitate, *think, speculate

deduct, subtract mean to take away one quantity from another. *Deduct* usually is used in reference to amounts

(as of costs, payments, or credits) while *subtract* is used in reference to numbers or to figures obtained by a computation or calculation <*deduct* the cost of transportation from the profits> <*deduct* the price of the returned article from his bill> <*subtract* five from nine> <*deduct* five percent of the receipts for his commission> <*subtract* the area of the triangular northeast section from the area of the whole plot of ground>

Ant add

deduction 1 *Deduction*, abatement, rebate, discount are comparable when they mean an amount subtracted from a gross sum. *Deduction* is interchangeable with any of the others but not without some loss in precision. An *abatement* is a deduction from a levied tax or impost <an *abatement* of the duties levied at the customhouse> A *rebate* is an amount deducted and returned after payment either in adjustment of an overcharge or to gain a competitive advantage <a *rebate* on an income tax> <a *rebate* on an insurance premium> A *discount* is a deduction from an amount owed or a price asked in consideration of a cash or prompt payment <this bill is subject to 2 percent *discount* if paid within thirty days> It also may denote an advance deduction of the amount of interest payable on a loan or note from the time the loan is made or the note purchased until the due date <the bank credited his account with the proceeds of the note less the *discount*>

2 inference, conclusion, judgment (see under INFER)

3 *Deduction*, *induction* and their corresponding adjectives *deductive*, *inductive* are comparable as used in logic to designate forms of reasoning. *Deduction* and *deductive* imply reasoning from premises or propositions antecedently proved or assumed as true or certain and procedure from the general or universal to a particular conclusion; thus, the conclusion that one must die someday is based on the premises that all men are mortal and that one is a man; therefore one infers by *deduction* or *deductive* reasoning that one must necessarily be mortal. *Induction* and *inductive* imply reasoning from particular facts to a conclusion that is general or universal in its nature. In its simplest form *induction* implies a knowledge of every particular and a generalization from these; thus, the conclusion that all of a certain man's books have red bindings is reached by *induction* or *inductive* reasoning when one has surveyed his library and has found no exception to this rule. In its more complicated forms, since knowledge of every particular is usually impossible, *induction* often implies the use of postulates or assumptions which are generally accepted (as the uniformity of nature), more or less tentative conclusions, and constant observation and experiment and reexamination of the evidence. In this sense many of the laws of nature stated in the various sciences are derived by *induction*, but when these laws are used as premises and become the bases for further inferences, the reasoning becomes *deductive*.

deductive inductive (see under DEDUCTION 3)

Ana inferential, ratiocinative (see under INFERENCE)

deed *n* *action, act

Ana exploit, *feat, achievement

deed *vb* *transfer, convey, alienate

deem *consider, regard, account, reckon

Ana conclude, gather, *infer

deep 1 *Deep*, *profound*, *abysmal*. *Deep* and *profound* denote extended either downward from a surface or, less often, backward or inward from a front or outer part. *Deep* is the most general term <a *deep* pond> <a slope cut by *deep* gullies> As applied to persons or to mental states or processes, *deep* implies the presence or a necessity for the exercise of penetration or subtlety, some-

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

times of craft <a *deep* politician> <*deep* plots> <a little knowledge often estranges men from religion, a *deeper* knowledge brings them back to it—*Inge*> <a *deep* study of the inner meaning of the work—*Braithwaite*> **Profound** connotes exceedingly great depth <a gulf *profound* as that Serbonian bog . . . where armies whole have sunk—*Milton*> <canyons more *profound* than our deepest mountain gorges—*Cather*> It may imply the presence or need of thoroughness <a *profound* thinker> <a *profound* treatise> <are, in their meditative depths, among the few *profound* poems of our day—*Untermeyer*> As expressing intensity, *profound* is commonly stronger than *deep* <motherhood, this queer, sensuous, cherishing love . . . an emotion more *profound* than most—*Rose Macaulay*> **Abysmal** carries the idea of *abyss*, infinite depth, and implies fathomless distance downward, backward, or inward from a surface <mountain roads . . . within a few inches of *abysmal* precipices—*W. R. Arnold*> It may imply measureless degree and is then used with words denoting a lack of something <*abysmal* ignorance> <*abysmal* darkness> <plays of an *abysmal* foolishness—*Brooks*>

Con shallow, *superficial: flat, plane, plain, *level
2 *broad, wide

deep-rooted deep-seated, chronic, confirmed, *inveterate

Ana established, fixed, set, settled (see SET *vb*)

Con eradicated, extirpated, uprooted, wiped out (see EXTERMINATE)

deep-seated chronic, deep-rooted, confirmed, *inveterate

Ana ingrained, constitutional, *inherent: profound, *deep

deface, disfigure mean to mar the appearance of a thing. **Deface** usually suggests a marring of the face or external appearance of something; it frequently implies the effacement, obliteration, or removal of some part or detail <earth has yet a little gilding left, not quite rubbed off, dishonored, and *defaced*—*Hazlitt*> <a door *defaced* by innumerable incised inscriptions—*Shaw*> <bad poets *deface* what they take [from others], and good poets make it into something better—*T. S. Eliot*> **Disfigure**, as applied to a surface, implies deeper or more permanent injury than *deface*; as applied to figure or conformation, it frequently suggests such impairing of beauty or attractiveness as results from other than structural injury <a book *disfigured* by many serious faults> <the smallpox . . . fell foul of poor little Oliver's face . . . and left him scarred and *disfigured* for his life—*Thackeray*> <where trees, *disfigured* by no gaudy lanterns, offered the refreshment of their darkness and serenity—*Galsworthy*> <in the midst of the political investigations which *disfigure* our time—*Sat. Review*>

Ana *injure, damage, mar: *deform, distort, contort: mutilate, batter, mangle (see MAIM)

defame vilify, calumniate, *malign, traduce, asperse, slander, libel

Ana vituperate, revile (see SCOLD): *decry, disparage, detract, derogate

Con *praise, laud, eulogize, extol, acclaim

default *n* *failure, neglect, miscarriage, dereliction

Ana absence, *lack, want, privation: *imperfection, deficiency, shortcoming, fault

defeat *vb* beat, *conquer, vanquish, lick, subdue, subjugate, reduce, overcome, surmount, overthrow, rout
Ana *frustrate, thwart, foil, baffle, balk, circumvent, outwit

Con *yield, submit, capitulate, succumb, cave, bow, defer

defect 1 *lack, want, dearth, absence, privation

Ana deficiency, defectiveness (see corresponding adjectives at DEFICIENT): *need, necessity, exigency

2 flaw, *blemish

Ana *fault, failing, frailty, foible

Con *excellence, perfection, virtue, merit

defection, desertion, apostasy mean an abandonment that involves the breaking of a moral or legal bond or tie and that is highly culpable from the point of view of the person, cause, or party abandoned. **Defection** emphasizes both the fact of one's falling away and the loss that is sustained by his failure to adhere to his allegiance; in itself as apart from the context it commonly gives no certain indication of motive, though at times disaffection or loss of confidence is connoted <the conversions are probably balanced by the *defections* and in some countries the Church seems even to be losing ground—*Times Lit. Sup.*> <the news of the *defection* of Lepidus caused the Senate to declare him a public enemy—*Buchan*> <a single *defection* would throw the Senate into a deadlock of 48 to 48—*Neuberger*> **Desertion** (see also under ABANDON) presupposes an oath of allegiance or a duty or an obligation to guard, protect, or support, the violation of which constitutes a crime or a distinctly blameworthy act. It also suggests a base motive (as cowardly fear or a desire to shirk) <the penalty for *desertion* from an army in time of war is usually death> <many persons considered Wordsworth's *defection* from the liberal cause a *desertion*> <the crisis of our times is not such as to justify *desertion* of basic traditions—*Chapman*> **Apostasy** implies a repudiation of something one has formerly and voluntarily professed; it connotes therefore a retreat (as in weakness) from a position or stand one has taken. The term is used chiefly with reference to a repudiation of religious beliefs, but it is employed also when moral, philosophical, or other principles are involved <when Raphael . . . had forewarned Adam, by dire example, to beware *apostasy*—*Milton*> <marriage is to me *apostasy* . . . sale of my birthright, shameful surrender—*Shaw*> <my political *apostasy* . . . was attended with no diminution of reverence for that great citizen army that defended and saved the Union—*Nicholson*>

Ana disaffection, alienation, estrangement (see corresponding verbs at ESTRANGE): abandonment, forsaking (see corresponding verbs at ABANDON)

Con faithfulness, loyalty, constancy (see corresponding adjectives at FAITHFUL): allegiance, *fidelity, fealty

defective *deficient

Ana impaired, damaged, injured, marred (see INJURE): vitiated, corrupted, debased (see under DEBASE): deranged, disordered (see DISORDER)

Ant intact —**Con** *perfect, entire, whole: complete, *full, plenary: sound, *healthy

defend 1 **Defend, protect, shield, guard, safeguard** mean to keep secure from danger or against attack. **Defend** implies the use of means to ward off something that actually threatens or to repel something that actually attacks <raise a large army to *defend* the country from aggression> <guns used in *defending* the explorers against hostile incursions of the natives> <the independence of the Supreme Court of the United States should be *defended* at all costs—*Lippmann*> **Protect** implies the use of a covering as a bar to the admission or impact of what may injure or destroy <*protect* one's estate from intruders by a high wall> <*protect* one's eyes from the sun by dark glasses> <*protect* one's family by ample insurance> <*protect* tobacco plants by a cheesecloth screen> <the ring of old forts which so far had *protected* the city successfully—*P. W. Thompson*> **Shield** differs from *protect*

especially in its suggestion of a protective intervention comparable to a medieval warrior's shield before one exposed to imminent danger or actual attack <Heavens shield Lysander, if they mean a fray!—*Shak.*> <I could scarcely believe that she would wish to shield her husband's murderer, if he were that—*Rose Macaulay*> **Guard** implies a standing watch at or over for the sake of defense; it usually connotes vigilance <the entrances to the palace are well *guarded*> <the president is always *guarded* by secret service men> <the accumulation of private wealth in Boston, thriftily *guarded* by the canny Whigs—*Brooks*> <inmates of a fortress are defended by its guns, protected by its walls, and *guarded* by sentries against surprise> **Safeguard**, much more strongly than any of the preceding words, implies use of protective measures where merely potential danger exists <*safeguard* children who play on the streets> <*safeguard* our shores from attack> <in all this he was more than worldly-wise. He was *safeguarding* his own self-respect—*Replier*>

Ana ward, avert, *prevent: oppose, *resist, withstand: fight, battle, war, *contend

Ant combat: attack —*Con* assault, assail, bombard, storm (see **ATTACK**): submit, cave, *yield, capitulate

2 assert, *maintain, justify, vindicate

Ana voice, vent, utter, *express, air: *explain, account, justify, rationalize: *support, champion, uphold, back

defer, postpone, intermit, suspend, stay mean to cause a delay in an action, activity, or proceeding. **Defer** suggests little more than a putting off till a later time; ordinarily it implies an intentional delaying <*defer* a discussion of a proposal until more members are present> <*defer* payment on a note> <he *deferred* giving his son needed advice until he found the boy in a less refractory mood> It may imply a delay in fulfillment, attainment, or fruition that is occasioned by conditions beyond one's control <hope *deferred* maketh the heart sick—*Prov* 13:12> <reluctantly, he made up his mind to *defer* the more exacting examinations until another time—*Cronin*> **Postpone** implies an intentional deferring, commonly until a definite time <*postpone* a meeting for a week> <her dentist was willing to *postpone* her appointment until Saturday> <I think that we had better *postpone* our look round the church until after lunch—*Mackenzie*> **Intermit** implies a stopping for a time, usually as a measure of relief, and typically with an expectation of starting again after an interval <pray to the gods to *intermit* the plague—*Shak.*> <when seriously urged to *intermit* his application [to study], and allow himself a holiday—*Pattison*> **Suspend** denotes a stopping or making inoperative for a time and usually for a reason (as personal desire or a legal restriction) that is implicit or explicit in the context <Eleanor's work was *suspended* while she gazed with increasing astonishment—*Austen*> <*suspend* trolley service during the parade> <Henchard gave orders that the proceedings were to be *suspended*—*Hardy*> <Congress has authorized the president to *suspend* the operation of a statute—*Justice Holmes*> <*suspend* one's judgment of a person charged with a crime> **Stay** implies the interposition of an obstacle to something that is in progress; it may suggest bringing it to a complete stop, but more often it suggests an intermitting or suspending or a slackening of pace <two spectators started forward, but she *stayed* them with a motion of her hand—*Dickens*> <they couldn't *stay* the flow of her ideas by reminding her how much the alteration would cost—*Mary Austin*> <when his mind fails to *stay* the pace set by its inventions, madness must ensue—*Day Lewis*>

Ana *delay, retard, slow

Con hasten, hurry, *speed, accelerate

defer bow, *yield, submit, cave, capitulate, succumb, relent

Ana accede, acquiesce, *assent, agree: conform, accommodate, *adapt, adjust: truckle, *fawn, cringe

deference reverence, homage, *honor, obeisance

Ana veneration, worship, adoration (see under **REVERE**): respect, esteem, admiration, *regard

Ant disrespect —*Con* disdain, scorn, contempt, despite (see under **DESPISE**)

deficiency *imperfection, shortcoming, fault

Ana *lack, want, dearth, defect: flaw, *blemish: *failure, neglect, default, miscarriage, dereliction

Ant excess

deficient *adj* **Deficient**, **defective** mean showing lack of something necessary. The words are sometimes used interchangeably though they tend to diverge in their meanings. **Deficient** typically implies a falling short in the amount, quantity, or force considered essential to adequacy or sufficiency; **defective** on the other hand typically implies existence of some definite fault, injury, or flaw that impairs the completeness or efficiency of something; thus, a person is *deficient* in courage when he has not sufficient courage to meet his difficulties; he is mentally *deficient* when he has not sufficient intelligence to enable him to take care of himself; he is mentally *defective* (or a mental *defective*) when some fault or defect in his nervous system impairs his ability to think coherently; he suffers from *defective* hearing when by disease or injury the organ of hearing has become *defective* <*deficient* sympathies> <a *deficient* supply of food> <a *defective* crystal> <a *defective* mechanism>

Ana *meager, scanty, scant, sparse, exiguous: scarce, rare, *infrequent, uncommon

Ant sufficient, adequate: excessive —*Con* *plentiful, plenteous, ample, abundant: *excessive, inordinate, immoderate, extravagant

defile pollute, taint, *contaminate, attain

Ana *debase, vitiate, deprave, corrupt, pervert, debauch: profane, desecrate (see corresponding nouns at **PROFANATION**)

Ant cleanse: purify —*Con* hallow, consecrate (see **DEVOTE**)

define *vb* *prescribe, assign

Ana *limit, circumscribe: fix, *set, establish

Con *mix, merge, mingle: *mistake, confuse, confound

definite **1** **Definite**, **definitive** are sometimes confused. What is **definite** (see also **EXPLICIT**) has limits so clearly fixed or defined or so unambiguously stated that there can be no doubt concerning the scope or the meaning of something so qualified <he has very *definite* opinions on the matter> <*definite* accomplishments> <appointments are made for *definite* periods of time> What is **definitive** (for fuller treatment see **CONCLUSIVE**) fixes or settles something else and therefore is final or decisive <a *definitive* statement of a doctrine> <a *definitive* judicial decision by the highest court of the land> <a *definitive* biography>

Ana defined, prescribed, assigned (see **PRESCRIBE**): limited, restricted, circumscribed (see **LIMIT** *vb*): determined, settled, decided (see **DECIDE**)

Ant vague: loose —*Con* *obscure, ambiguous, equivocal

2 *explicit, express, specific, categorical

Ana clear, plain, distinct (see **EVIDENT**): *full, complete: downright, *forthright: precise, exact (see **CORRECT** *adj*): clear-cut, *incisive

Ant indefinite: equivocal —*Con* *doubtful, dubious, questionable

definitive 1 determinative, decisive, *conclusive

Ana settling, deciding, determining (see DECIDE): final, concluding, *last, terminal, ultimate

Ant tentative, provisional

2 *definite

Ana, Ant see those at DEFINITIVE 1

deflate compress, shrink, *contract, condense, constrict
Ana reduce, *decrease, lessen: exhaust, *deplete, drain: puncture, prick (see PERFORATE): attenuate, extenuate (see THIN)

Ant inflate —*Con* distend, *expand, dilate, swell

deflect *turn, divert, avert, sheer

Ana deviate, depart, diverge, *swerve, veer, digress: bend, *curve, twist

deflection *deviation, aberration, divergence

Ana bending, curving, twisting (see CURVE): swerving or swerve, veering or veer, departing or departure (see corresponding verbs at SWERVE)

deform, **distort**, **contort**, **warp** mean to mar or spoil a person's or thing's appearance, character, true nature, or development by or as if by twisting. **Deform** is the least specific of these terms in its implications; sometimes, it carries no significance other than that expressed above; sometimes, however, it suggests a loss of some particular excellence or essential (as comeliness, perfection of line, or attractiveness) < soul-killing witches that *deform* the body—*Shak.* > < to *deform* thy gentle brow with frowns—*Rowe* > < I suspect Mr. Babbitt at times of an instinctive dread of organized religion, a dread that it should cramp and *deform* the free operations of his own mind—*T. S. Eliot* > < with the best intentions in the world, Mr. Imam is incessantly at work to *deform* and degrade the content of poetry—*Times Lit. Sup.* > **Distort** usually carries a clear implication of twisting or wresting away from or out of the natural, regular, or true shape, posture, or direction; the term, however, is used not only in reference to physical or material things, but also in reference to minds, judgments, facts, or statements that may be twisted by conditions, circumstances, or, when a personal agent is involved, a dominating purpose or intent < *distorted* as a living thing by pain—*Wilde* > < the upward slant of the candlelight *distorted* Mary Adeline's mild features, twisting them into a frightened grin—*Wharton* > < there is an element of truth in what you say, grossly as you may *distort* it to gratify your malicious humor—*Shaw* > < some accident of immediate overwhelming interest which appeals to the feelings and *distorts* the judgment—*Justice Holmes* > **Contort** implies a more involved or continuous twisting together or upon itself; it therefore differs from *distort* in suggesting a grotesque or a painful effect rather than a departure from the natural, the true, or the normal < that most perverse of scowls *contorting* her brow—*Hawthorne* > < the baby's face muscles *contorted* in a manner that only Mammy Clo could have interpreted as an expression of merriment—*Roark Bradford* > < one generation of fearless women could transform the world, by bringing into it a generation of fearless children, not *contorted* into unnatural shapes, but straight and candid, generous, affectionate, and free—*Russell* > **Warp** denotes a twisting or bending or drawing out of a flat plane by some force (as drying and shrinking) < the covers of the book are *warped* > < the back of the chair is *warped* > It often may imply the operation of a force that twists or wrests a thing so as to give it a bias, a wrong slant, an abnormal direction, or a distorted significance < cares have *warped* her mind > < *warped* opinions > < so they [trees] slowly come to full growth, until *warped*, stunted, or risen to fair and gracious height, they stand open to all the winds—*Galsworthy* > < to cut me off from all natural

Ana analogous words

Ant antonyms

Con contrasted words

See also explanatory notes facing page 1

and unconstrained relations with the rest of my fellow creatures would narrow and *warp* me if I submitted to it—*Shaw* > < I'm sure you are disinterested . . . but, frankly, I think your judgment has been *warped* by events—*Cather* > < their lives and minds have been *warped*, twisted, and soured—*Lardner* >

Ana *maim, cripple, mutilate, mangle, batter: disfigure, *deface: *injure, mar, damage, impair

defraud swindle, overreach, *cheat, cozen

Ana trick, bamboozle, hoax, gull, *dupe, befool: outwit, circumvent, foil (see FRUSTRATE)

deft *dexterous, adroit, handy

Ana nimble, *agile, brisk: *quick, ready, apt, prompt: skillful, skilled, adept, *proficient: sure, assured, *confident

Ant awkward —*Con* clumsy, maladroit, inept, gauche (see AWKWARD)

defunct deceased, departed, late, *dead, lifeless, inanimate

Ant alive: live

defy *face, brave, challenge, dare, beard

Ana mock, deride, *ridicule: flout (see SCOFF): withstand, *resist, oppose, fight: confront, encounter, *meet

Ant recoil from

degenerate *adj* corrupt, infamous, *vicious, villainous, iniquitous, nefarious, flagitious

Ana degraded, demeaned (see ABASE): debased, depraved, debauched, perverted (see under DEBASE): disolute, *abandoned, reprobate, profligate

degeneration devolution, decadence, *deterioration, decline, declension

Ana retrogressiveness or retrogression, regressiveness or regression (see corresponding adjectives at BACKWARD): debasement, degradation (see corresponding verbs at ABASE)

degradation see under *degrade* at ABASE

degrade 1 **Degrade**, **demote**, **reduce**, **declass**, **disrate** mean to lower in station, rank, or grade. **Degrade** may be used of any such lowering < babies . . . *degrade* one to the state of anxious, fawning suppliants for a smile—*Wallace* > < turkeys not in prime condition are *degraded* on the market > < that the Duke of York should have concurred in the design of *degrading* that crown which it was probable that he would himself . . . wear—*Macaulay* > It usually implies a real or presumed fault in what is acted on and often adds to the basic meaning a suggestion of humiliation (see *degrade* under ABASE) < ridiculed and *degraded* for his ideas, he maintained his integrity in the prison cell—*D. M. Wolfe & E. M. Geyer* > < the world is weary of statesmen whom democracy has *degraded* into politicians—*Disraeli* > It sometimes denotes a formal or ceremonial stripping (as of a priest or a military officer) of outward evidences of station or rank < Dreyfus is *degraded* before the Army, January 5, 1895—*Guérard* > **Demote** in itself and as distinct from its context does not imply fault or humiliation of the one *demoted* < he returns a captain (temporary), is promoted and *demoted* in the same order, made first lieutenant (permanent)—*Mailer* > < the secretaryship was *demoted* to a subordinate bureau in the Department of the Interior—*Neill* > **Reduce** (see also DECREASE and CONQUER) never wholly loses its basic sense of to make less or smaller; it denotes a lessening in status or dignity whether involving an actual lowering in rank or not < a sergeant *reduced* to the ranks > < people in *reduced* circumstances > < an old crusader . . . *reduced* to menial work—*Costain* > **Declass** is typically used with respect to social classes; it may imply a loss of social position especially as a result of one's own actions < even today a woman may *declass* herself by acts tolerated

of her brothers) Perhaps more frequently it may imply an altering of or a freeing from the restrictions of social status (the growing masses of modern society that stand outside all class-strata. These *declassed* groups, composed . . . of individuals from all strata of society—*Arendt*) (a younger generation which feels that the writer ought to be at least a spiritual vagabond, a *declassed* mind—*The Dial*) (members of the *declassed* intelligentsia—*Ridgely Cummings*) **Disrate** implies a reduction in military and more especially in naval or nautical rank and is used chiefly with reference to petty or noncommissioned officers (the witness had been chief mate . . . but had been *disrated* . . . for drunkenness—*Mercantile Marine Mag.*)

Ana humble, humiliate, *abase, debase: disbar, rule out (see EXCLUDE)

Ant elevate

2 debase, demean, humble, *abase, humiliate

Ana *debase, deprave, debauch, pervert, corrupt, vitiate

Ant uplift —**Con** *exalt, magnify, aggrandize

dehydrate *vb* desiccate, *dry, parch, bake

deign condescend, *stoop

Ana vouchsafe, accord, concede, *grant, award

deist freethinker, *atheist, agnostic, unbeliever, infidel

deject *vb* *discourage, dishearten, dispirit

Ana *depress, weigh, oppress: distress, *trouble

Ant exhilarate: cheer

dejected depressed, dispirited, *downcast, disconsolate, woebegone

Ana weighed down, oppressed (see DEPRESS): *despondent, forlorn, hopeless: morose, glum, gloomy (see SULLEN)

dejection depression, melancholy, melancholia, gloom, *sadness, blues, dumps

Ana despondency, hopelessness, forlornness, despair, desperation (see under DESPONDENT)

Ant exhilaration

delay *vb* 1 **Delay, retard, slow, slacken, detain** are not always close synonyms, but they carry the same basic meaning: to cause someone or something to be behind in his or its schedule or usual rate of movement or progress. **Delay** implies the operation, usually the interference, of something that keeps back or impedes, especially from completion or arrival at a set or given time (a plague upon that villain Somerset, that thus *delays* my promised supply—*Shak.*) (a criminal court jury . . . *delayed* a verdict all afternoon—*C. G. Jameson*) **Retard** applies especially to motion, movement, or progress and implies something which causes it to reduce its speed (retard the revolution of a wheel) (the snow *retards* our progress) (children *retarded* in development) (mental evolution has perhaps *retarded* the progress of physical changes—*Inge*) (the rate of decay [of radioactive substances] cannot be expedited or *retarded* by any known physical process—*Jeanes*) **Slow** (often followed by *up* or *down*) and **slacken** also imply a reduction in speed or rate of progress, but *slow* usually implies deliberation or intention and *slacken*, an easing or letting up or a relaxation of some sort (the engineer *slowed* down the train as he approached the city) (the doctor administered digitalis to *slow* up his pulse) (as we turned into Compton Street together he *slowed* his step—*Brace*) (he *slackened* his pace to a walk) (having never *slackened* her . . . search for your father—*Dickens*) **Detain** (see also ARREST 2) implies a being held back beyond an appointed time, often with resulting delay in arrival or departure or in accomplishment of what one has in mind (I had been *detained* by unexpected business in the neighborhood—*Conrad*) (tell him that as I have a headache I

won't *detain* him today—*Hardy*) (you will not thank me for *detaining* you from the bewitching converse of that young lady—*Austen*) (I slipped my arm around her slender body to *detain* her—*Hudson*)

Ana impede, obstruct, *hinder, block: *defer, postpone, stay, suspend, intermit

Ant expedite: hasten —**Con** *speed, hasten, hurry, accelerate, quicken, precipitate

2 **Delay, procrastinate, lag, loiter, dawdle** mean to move or act slowly so that progress is hindered or work remains undone or unfinished. **Delay** (for transitive sense see DELAY 1) usually carries an implication of putting off something (as departure, initiation of an action or activity, or accomplishment of necessary work) (when he had his instructions, he did not *delay* an instant) (time and again were we warned of the dykes, time and again we *delayed*—*Kipling*) **Procrastinate** implies blameworthy or inexcusable delay usually resulting from laziness, indifference, hesitation, or the habit of putting off until tomorrow what should be done today (the less one has to do, the less time one finds to do it in. One yawns, one *procrastinates*, one can do it when one will, and therefore one seldom does it at all—*Chesterfield*) (a timid, unsystematic, *procrastinating* ministry—*Burke*) (to fumble, to vacillate, to *procrastinate* and so let war come creeping upon us almost unawares—*White*) **Lag** implies a failure to maintain a speed or pace, either one set by and therefore in comparison with that of another or one requisite to some end or goal (after an hour's brisk walk, two of the hikers *lagged* behind the rest) (it was a time of great men, but our learning and scholarship *lagged* far behind those of Germany—*Inge*) (military preparation does *lag* at a shameful rate—*Carlyle*) (the production of certain parts necessary for airplanes is *lagging*) **Loiter** implies delay while in progress, commonly while one is walking but sometimes while one is trying to accomplish a piece of work; it also suggests lingering or aimless sauntering or lagging behind (very little remained to be done. Catherine had not *loitered*; she was almost dressed, and her packing almost finished—*Austen*) (the caravan has to go on; to *loiter* at any distance behind is to court extinction—*Montague*) (the children sauntered down Sloane Street, *loitering* at the closed shop windows, clinking their shillings in their pockets—*Rose Macaulay*) **Dawdle** carries a slighter implication of delay in progress (especially in walking) than *loiter* but an even stronger connotation of idleness, aimlessness, or of a wandering mind; consequently it usually implies a wasting of time or a taking of more time than is warranted (dawdle through four years of college) (the new maid *dawdles* over her work) (I did not hurry the rest of the way home; but neither did I *dawdle*—*Heiser*) (the sun *dawdles* intolerably on the threshold like a tedious guest—*Jan Struther*)

Ana linger, tarry, wait (see STAY): *hesitate, falter, vacillate, waver

Ant hasten, hurry

delectable *delightful, delicious, luscious

Ana gratifying, grateful, agreeable, pleasing, welcome, *pleasant: exquisite, rare, delicate, dainty, *choice: *palatable, savory, sapid, toothsome

Con *offensive, repulsive, revolting, loathsome: repellent, *repugnant, distasteful, abhorrent, obnoxious

delectation enjoyment, delight, *pleasure, joy, fruition
Ana amusement, diversion, entertainment (see under AMUSE): gratifying or gratification, regaling or regalement (see corresponding verbs at PLEASE)

delegate *n* Delegate, deputy, representative designate a person who stands in place of another or others. It is not

always possible to distinguish these words, for they are all used in different places or at different times to designate persons whose offices and functions are much the same. Nevertheless there are broad or general differences in meaning which may be observed, although they will not always afford a clue as to why this person or that is called a *delegate*, a *deputy*, or a *representative*. **Delegate** applies to a person who is sent or is thought of as being sent with a commission to transact business for another or for others; it often specifically designates a person who is sent by an organized or unorganized body (as a branch of a larger organization or a group of employees) to a meeting where questions pertaining to the welfare of the entire organization or industry will be discussed and voted upon. *Delegate* usually implies powers that are not plenary but are somewhat modified (as by the delegate's own power to influence or convince others and by the need of his bowing to the will of the majority) (a lay *delegate* to a Protestant Episcopal synod) (each branch of the American Legion sends two *delegates* to the national convention) (the workers and the employers each sent three *delegates* to the conference) **Deputy** applies to a person who is given authority to act for another or for others as a substitute or as an agent; it is particularly applicable to a person who has been chosen to perform a part or the whole of an official's duties (the sheriff of each county appoints one or more *deputies*) (since he could not be present at the conference, he sent a *deputy*) **Representative** applies fundamentally to a person who takes the place of one or more persons in a situation where for some reason the latter cannot be. It may be used of a person engaged to do or to transact business for another or others (the firm's legal *representative*) (the king's *representative* at the peace conference) However it is more often employed in reference to one who takes the place of a larger group (as the electorate of a particular region) and thereby belongs to a body of men who as a whole are charged with making the laws for the state or nation (even in a democracy the people as a whole cannot make the laws but assign that work to their *representatives* in Congress or in Parliament) (the elected became true *representatives* of the electors—*Steele*) The terms are often used to imply the same or very similar functions in different places; thus, approximately the same body is called the House of *Representatives* in the United States and the Chamber of *Deputies* in the Republic of France; there is little difference except in voting powers between a *representative* from a state in the United States Congress and a *delegate* from a territory.

delete cancel, efface, obliterate, blot out, expunge, *erase
Ana eliminate, *exclude, rule out: omit (see NEGLECT *vb*)

deleterious detrimental, *pernicious, baneful, noxious
Ana injuring or injurious, harming or harmful, hurting or hurtful (see corresponding verbs at INJURE): destroying or destructive (see corresponding verb DESTROY): ruining or ruinous (see corresponding verb RUIN)

Ant salutary —*Con* *beneficial, advantageous, profitable; wholesome, *healthful, healthy

deliberate *adj* 1 willful, intentional, *voluntary, willing
Ana purposed, intended (see INTEND): conscious, cognizant, *aware; mortal, *deadly

Ant impulsive —*Con* inadvertent, *careless, heedless, thoughtless

2 **Deliberate, considered, advised, premeditated, designed, studied** are comparable when applied to a person's acts, words, or accomplishments with the meaning thought out in advance. **Deliberate** implies full awareness of the nature of what one says or does and often a careful and unhurried calculation of the intended effect or of the

probable consequences (a *deliberate* lie) (a *deliberate* snub) (Poe's consummate and *deliberate* technique—*Lowes*) (the *deliberate* insertion into a lyrical context of pieces of slang and "prosaic" words—*Day Lewis*) (the tone of most comment, whether casual or *deliberate*, implies that ineptitude and inadequacy are the chief characteristics of government—*Frankfurter*) **Considered**, unlike *deliberate*, which it closely resembles in meaning, is seldom applied to questionable acts or practices; it suggests careful study from all angles rather than calculation and often, therefore, connotes soundness or maturity of judgment (there was no time for a *considered* reply) (the committee had before it many half-baked and a few *considered* proposals) (it [the press] is against Democrats, so far as I can see, not after a sober and *considered* review of the alternatives, but automatically, as dogs are against cats—*A. E. Stevenson*) (he saw no reason to parade his *considered* and decided loyalty—*Wylie*) **Advised** mostly is used with deprecatory or intensifying adverbial modifiers and denotes so well thought out and considered that possible criticisms and objections have been reviewed and answers to them prepared (she felt well *advised* to visit him before deciding to be his wife—*Forster*) (the public is well *advised* to leave methodological decisions to members of the medical profession—*Woodring*) Its related adverb *advisedly* is often used to carry the implications of *considered* (which has no adverb) (he told them he used the offending word *advisedly*) (everything in this difficult situation has been done *advisedly*) (I often say that one must permit oneself, and that quite *advisedly* and deliberately, a certain margin of misstatement—*Cardozo*) **Premeditated** emphasizes forethought and planning but often falls far short of *deliberate* in implying careful calculation and awareness of consequences (certain self-conscious preciosities in his *premeditated* style—*Powys*) It is applied especially to things (as crimes or insults) which are morally or socially unacceptable and for which only overwhelming impulse or overmastering passion (as of fear or rage) could reasonably be offered as extenuating circumstances; in such relation, then, *premeditated* implies wrongdoing unmitigated by circumstances (a *premeditated* murder) (plain that Thady's presence on the scene at the moment was accidental and that the attack could not have been *premeditated*—*Trollope*) **Designed** and its adverb *designedly* are often applied to what has the appearance of being accidental, spontaneous, or natural but which is actually the result of intention (the *designed* failure of a project) (useless to seek to know whether he has been for years overlooked, or always *designedly* held prisoner—*Dickens*) **Studied** is applied chiefly to effects gained or qualities achieved as a result of painstaking effort or careful attention to detail; it connotes absence of spontaneity (a rather *studied* performance of a Beethoven symphony) (the *studied* dignity and anxious courtesy of the actor-manager—*Shaw*) It is also applied to offensive acts committed with cool deliberation and with attention to their probable effect (treat the opposition with *studied* discourtesy)

Ana planned, schemed, projected (see corresponding verbs under PLAN *n*): calculated (see CALCULATE): *careful, meticulous, scrupulous

Ant casual —*Con* haphazard, *random, hit-or-miss, desultory, happy-go-lucky, chance, chancy

3 leisurely, *slow, dilatory, laggard
Ana *cautious, circumspect, wary, chary, calculating: *cool, collected, composed, imperturbable

Ant precipitate, abrupt —*Con* impetuous, headlong, sudden, hasty (see PRECIPITATE)

deliberate *vb* reflect, cogitate, *think, reason, speculate

Ana *ponder, meditate, ruminate, muse

delicate exquisite, dainty, rare, *choice, recherché, elegant

Ana delectable, *delightful, delicious: *soft, gentle, mild, lenient, balmy: ethereal, *airy, aerial

Ant gross —*Con* *coarse, vulgar: rank, rancid, *malodorous

delicious delectable, luscious, *delightful

Ana *palatable, sapid, savory, toothsome, appetizing:

delicate, dainty, exquisite, *choice, rare

Con distasteful, obnoxious, *repugnant, repellent: *insipid, vapid, flat, wishy-washy, inane, jejune, banal

delight *n* *pleasure, delectation, enjoyment, joy, fruition

Ana glee, *mirth, jollity, hilarity: rapture, transport, *ecstasy: satisfaction, contentment (see corresponding verbs at SATISFY)

Ant disappointment: discontent

delight *vb* gratify, *please, rejoice, gladden, tickle, regale

Ana *satisfy, content: divert, *amuse, entertain: charm, enchant, fascinate, allure, *attract

Ant distress: bore —*Con* *trouble: *afflict, try: *grieve: *annoy, vex, irk, bother

delightful, **delicious**, **delectable**, **luscious** mean extremely pleasing or gratifying to the senses or to aesthetic taste.

Delightful, the least restricted in its application of these words, may refer to anything that affords keen, lively pleasure and stirs the emotions agreeably, whether the direct appeal is to the mind, the heart, or the senses <a *delightful* view> <a *delightful* talk> <a *delightful* companion> <my ears were never better fed with such *delightful* pleasing harmony—*Shak.*> <the experience of overcoming fear is extraordinarily *delightful*—*Russell*> <the most charming and *delightful* book I have read in many a day—*Canby*> **Delicious** commonly refers to sensuous pleasures, especially those of taste and smell <*delicious* food> <a *delicious* sense of warmth> but may be applied to anything which is so delightful that one dwells upon it with sensuous gratification <her gestures *delicious* in their modest and sensitive grace—*Bennett*> <I am not staying here, but with the Blenkers, in their *delicious* solitude at Portsmouth—*Wharton*> <there are people whose society I find *delicious*—*L. P. Smith*>

Delectable in its implications is often indistinguishable from *delightful* and especially from *delicious*, though it often suggests more refined or discriminating enjoyment <the trees of God, *delectable* both to behold and taste—*Milton*> <a *delectable* tale> <the *delectable* fragrance of freesia> <its scoring is *delectable*, with the subtlest of balances, mixed colors and shifting sonorities—*Musical America*> The term is more often used than either *delightful* or *delicious* with a humorous or ironical connotation <the spoken word of some *delectable* Sarah Gamp—*Montague*> **Luscious** adds to *delicious* an implication of richness (as of flavor, fragrance, coloring, or sound) <*luscious* music> As applied to fruits, it suggests fullness of flavor and rich ripe juiciness <*luscious* sun-warmed peaches> Like *delectable* it may be used humorously or ironically, but it then commonly adds the implication of extravagance, exaggeration, or, more specifically, voluptuousness <*luscious* passages of description> <those Don Juans, those melting beauties . . . those *luscious* adventuresses—*Huxley*>

Ana enchanting, charming, fascinating, alluring, attractive (see under ATTRACT): lovely, fair, *beautiful: ineffable (see UNUTTERABLE)

Ant distressing: boring: horrid —*Con* *miserable, wretched: distasteful, obnoxious, repellent, *repugnant

delineate 1 trace, outline, *sketch, diagram, draft, plot, blueprint

Ana describe, *relate: design, plan (see under PLAN *n*)

2 *represent, depict, portray, picture, limn

Ana see those at DELINEATE 1

delineation tracing, outline, sketch, diagram, plot, blueprint (see under SKETCH *vb*)

Ana map, *chart, graph: design, *plan

delinquent *n* *criminal, felon, convict, malefactor, culprit

deliquesce *liquefy, melt, fuse, thaw

Ana *decay, decompose, disintegrate

delirious *furious, frantic, frenzied, wild, frenetic, rabid

Ana excited, stimulated (see PROVOKE): enthusiastic, fanatic (see corresponding nouns at ENTHUSIAST): ecstatic, rapturous, transported (see corresponding nouns at ECSTASY)

delirium frenzy, hysteria, *mania

deliver 1 *free, release, liberate, discharge, emancipate, manumit, enfranchise

Ana *escape, elude, evade: *extricate, disencumber,

disentangle: voice, utter, vent, *express

Con confine, circumscribe, restrict, *limit

2 *rescue, redeem, save, ransom, reclaim

Con *imprison, incarcerate, jail, immer, intern: *catch, capture, trap, snare, entrap, ensnare

delude beguile, *deceive, mislead, betray, double-cross

Ana *dupe, gull, hoodwink, befool, bamboozle, hoax, trick: *cheat, cozen, overreach

Ant enlighten

deluge *n* *flood, inundation, torrent, spate, cataract

Ana *flow, stream, current, flux, tide

delusion, **illusion**, **hallucination**, **mirage** denote something which is believed to be or is accepted as being true or real but which is actually false or unreal. **Delusion** in general implies self-deception or deception by others; it may connote a disordered state of mind, extreme gullibility, or merely an inability to distinguish between what only seems to be and what actually is true or real <suffer from *delusions* of persecution> <he recovered consciousness slowly, unwilling to let go of a pleasing *delusion* that he was in Rome—*Cather*> <old Nuflo, lately so miserable, now happy in his *delusions*—*Hudson*> <she labored under the *delusion* that the constitution and social condition of her country were . . . on the upward plane—*Rose Macaulay*> <wild oats were to be sown early under the common *delusion* that they would not have to be sown again—*Simmons*> **Illusion** seldom implies mental derangement or even the inability to distinguish between the true and the false; rather it implies an ascription of truth or reality to what only seems to be true or real, especially to the eyes <an optical *illusion*> or to the imagination <artistic *illusion*> or to one's mind as influenced by one's feelings or sentiments <a lover's *illusions*> <during a quake, when I used to . . . observe the houses swaying toward one another, I would have the *illusion* that they were actually bumping heads—*Heiser*> <nature, we know, first taught the architect to produce by long colonnades the *illusion* of distance—*Hudson*> <if you have built up an immunity against the *illusion* that you know the whole truth—*Lippmann*> <most modern great men are mere *illusions* sprung out of a national hunger for greatness—*Anderson*> **Hallucination** implies the perception of visual images or, less often, of other sensory impressions (as sounds or odors) that have no reality but are the product of disordered sensory organs, nerves, or mind or are associated with particular disorders (as delirium tremens or intense fever) <the burglar in her room was only a *hallucination*> <the flying-saucer *hallucination* may be attributed, in part, to the public's conviction that all sorts of strange objects are flying through the sky—*Leonard*> <suffers from the *hallucination*

that he is being pursued) <he had *hallucinations* as a child. Mediaeval figures from the *Faerie Queene* had walked beside him on his way to school—*Brooks*> *Mirage* is comparable with the preceding terms only in its extended sense in which it usually applies to a vision, dream, hope, or aim which one takes as a guide, not realizing that it is merely an illusion <this hope to find your people . . . is a *mirage*, a delusion, which will lead to destruction if you will not abandon it—*Hudson*>

Ana *deception, trickery, chicanery, chicanery: *imposture, counterfeit, cheat, fraud, sham, fake, humbug, deceit: fantasy, vision, dream, daydream, *fancy

delusive, delusory deceptive, *misleading

Ana fantastic, chimerical, visionary, *imaginary, fanciful, quixotic: fallacious, sophistical, casuistical (see under FALLACY): illusory, seeming, ostensible, *apparent

delve *dig, spade, grub, excavate

demand *vb* **Demand, claim, require, exact** are comparable not as close synonyms but as sharing the basic meaning to ask or call for something as due or as necessary or as strongly desired. **Demand** strongly implies peremptoriness or insistence; if the subject is a person or sometimes an expression of his will (as a law), it usually implies that he possesses or believes he possesses the right or the authority not only to issue a peremptory request but also to expect its being regarded as a command <the physician *demanding* payment of his bill> <the court *demanding* fair treatment of the accused by the prosecutor> <the father *demanding* knowledge of what had occurred during his absence from home> <can he [the keeper of a public record] refuse a copy thereof to a person *demanding* it on the terms prescribed by law?—*John Marshall*> <instincts which the conventions of good manners and the imperatives of morality *demand* that they should repress—*Huxley*> If the subject of the verb is a thing, the verb implies the call of necessity or of imperative need <the fire that the cool evenings of early spring *demand*—*Mary Austin*> <the mind and body of a child *demand* a great deal of play—*Russell*> <he is best in his plays when dealing with situations which do not *demand* great emotional concentration—*T. S. Eliot*> **Claim** implies a demanding either of the delivery or concession of something due one as one's own, one's right, or one's prerogative or of the admission or recognition of something which one asserts or affirms; thus, one who *claims* a piece of property *demanding* its delivery to him as his own; one who *claims* that he has solved a problem *demanding* recognition of the truth of his assertion (there is no right to freedom or life. But each man does *claim* such freedom—*Alexander*) <a genius, say his detractors, can be perverse, and they *claim* the right to tell this genius when and where and why he is perverse—*Read*> **Require** is often used interchangeably with *demand*, but it usually distinctively implies imperativeness such as arises from inner necessity <consecutive thinking absolutely *requires* personal initiative—*Eliot*> or the compulsion of law or regulation <*require* that every member of the bank's staff be bonded> or the exigencies of the situation <I shall not go away till you have given me the assurance I *require*—*Austen*> **Exact** implies not only demanding something but getting what one demands <*exact* payment of overdue rent> <*exact* a promise from a friend> <she . . . kept a keen eye on her Court, and *exacted* prompt and willing obedience from king and archbishops—*Henry Adams*> <the mistake of *exacting* reparations in money and then lending Germany the money with which to pay—*Truman*>

Ana request, *ask, solicit: order, *command, charge, enjoin, direct, bid: call, *summon, summons, cite

Con waive, resign, *relinquish: concede, allow, *grant

Ana analogous words

Ant antonyms

Con contrasted words

2 *prove, try, test

Ana argue, debate (see DISCUSS): substantiate, verify, authenticate, *confirm, corroborate, validate

demonstration proof, trial, test (see under PROVE)

Ana substantiation, confirming or confirmation, corroboration, verification (see corresponding verbs at CONFIRM)

demote *degrade, reduce, declass, disrate

Ant promote (in rank, grade)

demur *vb* **Demur, scruple, balk, jib, shy, boggle, stick, stickle, strain** are comparable when they mean to hesitate or show reluctance because of difficulties in the way. One *demurs to* or *at* something when one raises objections to it, casts doubt upon it, or takes exception to it, thereby interposing obstacles which delay action, procedure, or decision <our colleagues in the university who *demur* on academic grounds to the inclusion of theology—*Moberly*> In older use the stress was on delay <notwithstanding he hoped that matters would have been long since brought to an issue, the fair one still *demurs*—*Spectator*> In modern use the emphasis is commonly on objection <Jerry . . . proposed that . . . we stretch a point by going to supper at Reeves's. Sarah and I *demurred* as women will at such a proposal from a man whose family exigencies are known to them—*Mary Austin*> <it would seem hazardous to *demur* to a proposition which is so widely accepted—*Alexander*> One *scruples to do* or *at doing* something when he is reluctant because his conscience bothers or because he is doubtful of the propriety, expediency, or morality of the action; the word is increasingly common in a negative construction <*scruple* to accept any gift that might seem a bribe> <he does not *scruple* to ask the most abominable things of you—*Meredith*> <Greece and in particular Athens was overrun by philosophers, who . . . did not *scruple* to question the foundations of social and moral obligation—*Dickinson*> One *balks* (often *at* something) when he stops short and obstinately refuses to go further in his course because he has reached

the limit of strength, courage, credulity, or tolerance (the horse *balked* at the leap) (he never *balks* at any task no matter how difficult it is) (there is the opposite case of the man who yields his poetic faith too readily, who does not *balk* at any improbability—*Babbitt*) (one rather *balks* at the idea of synthetic roughage—excelsior, wood chips, or whatever may be at hand—*Furnas*) One *jibs* (often at something) when he balks like a horse and backs away or out (I had settled to finish the review, when, behold . . . I *jibbed*—*Scott*) (he *jibbed* at alliance with the Catholic League—*Belloc*) (his soldiers, many of whom had served with Antony, *jibbed* at the attack on their old leader—*Buchan*) One *shies at, away from, or off from* something when like a suddenly frightened horse he recoils or swerves aside in alarm or distaste or suspicion and is unable to proceed or act (shy at the sight of blood) (these turns of speech . . . have the old virtue in them; you see the old temperament of the race still evincing itself; still *shying* away from the long abstract word—*Montague*) One *boggles at, over, or about* something from which he by temperament, instinct, or training shies away. In addition, *boggle* often implies scrupling or fussing (when a native begins perjury he perjures himself thoroughly. He does not *boggle* over details—*Kipling*) (we [lovers of poetry] do not *balk* at the sea-wave washing the rim of the sun, which we know it does not do, any more than we *boggle* at blackberries that are red when they are green—*Loves*) (it was in the essence a snobbish pleasure; why should I *boggle* at the word?—*L. P. Smith*) One *sticks at* something to which he demurs because of scruples, especially scruples of conscience; the term is used frequently in the idiom “*stick at nothing*,” which is another way of saying he absolutely unscrupulous (was in a hole and would *stick* at little to get out of it—*Buchan*) One *stickles at, about, or over* something to which he demurs or raises objections because it is offensive, distasteful, or contrary to his principles (the purist *stickles* at using clipped words such as *gas* for *gasoline*, *phone* for *telephone*, *exam* for *examination*) (there is no time in a serious emergency to *stickle* over means if they achieve the desired ends) (presumably that is his method—so the reader, eager to get good things where he can, will not *stickle* at it—*K. D. Burke*) One *strains at* something when he demurs to it as beyond his power to believe, accept, understand, or do. This usage is chiefly dependent on the scriptural passage “ye blind guides, which *strain* at a gnat, and swallow a camel.” The object of *at* is commonly something which might without real difficulty be believed, accepted, understood, or done (persons who *strain* at the truth yet accept every wild rumor without question) (I do not *strain* at the position,—it is familiar,—but at the author’s drift—*Shak.*)

Ana *hesitate, falter, vacillate, waver: oppose, *resist, combat, fight: *object, remonstrate: *disapprove, deprecate

Ant accede —**Con** accept, admit, *receive, take: acquiesce, agree, *assent, consent, subscribe

demur n *qualm, compunction, scruple

Ana *hesitation, hesitancy: reluctance, loathness, aversion, disinclination (see corresponding adjectives at DISINCLINED): objection, remonstrance (see corresponding verbs at OBJECT)

Con readiness, promptness, quickness (see corresponding adjectives at QUICK)

denizen *inhabitant, resident, citizen

denomination 1 *name, designation, appellation, title, style

2 *class, category, genus, species, genre

3 sect, communion, *religion, faith, creed, cult, persuasion,

church

denotation connotation (see under DENOTE)

Ana *meaning, signification, significance, sense, acceptance, import

denote 1 signify, *mean, import

Ana betoken, bespeak, *indicate, attest, argue, prove: *intend, mean: *suggest, imply, hint, intimate, insinuate

2 **Denote, connote** and their corresponding nouns **denotation, connotation** are complementary rather than synonymous. Taken together, the verbs as used in reference to terms equal *mean* (see MEAN *vb* 2). Taken singly, a term **denotes** or has as its **denotation** whatever is expressed in its definition: in a noun the thing or the definable class of things or ideas which it names, in a verb the act or state which is affirmed. A term **connotes** or has as its **connotation** the ideas or emotions that are added to it and cling to it, often as a result of experience but sometimes as a result of something extraneous (as a poet’s effective use of the term, or its constant association with another term or idea, or a connection between it and some historical event); thus, “home” *denotes* the place where one lives with one’s family, but it *connotes* comforts, intimacy, and privacy. What a term *denotes* (or the *denotation* of a term) can be definitely fixed; what a term *connotes* (or its *connotation*) often depends upon the experience or background of the person using it (I have used the term “post-war poets” to *denote* those who did not begin to write verse till after the war—*Day Lewis*) (there is no word that has more sinister and terrible *connotations* in our snobbish society than the word *promiscuity*—*Shaw*)

In logic *denote* and *connote*, though still complementary and still predicated of terms, carry very different implications. They are dependent on two highly technical terms, both collective nouns, *denotation* and *connotation*. A term **denotes** (or bears as **denotation**) the entire number of things or instances covered by it; thus, “plant” *denotes* the aggregate of all things that come under the definition of that word; the *denotation* of “shrub” is far more inclusive than the *denotation* of “shrub.” A term **connotes** (or bears as **connotation**) the sum total of the qualities or characteristics that are implied by it and are necessarily or commonly associated with it; thus, “plant” *connotes* (or bears as *connotation*) life, growth and decay, lack of power of locomotion, and, commonly, roots and cellular structure invested with a cellulose wall.

denounce condemn, censure, reprobate, reprehend, blame, *criticize

Ana *accuse, charge, arraign, impeach, incriminate, indict: *decry, disparage, depreciate: revile, vituperate (see SCOLD)

Ant eulogize —**Con** *commend, applaud, compliment, recommend: *praise, extol, laud, acclaim

dense 1 compact, *close, thick

Ana consolidated, concentrated, compacted (see COMPACT *vb*): compressed, condensed (see CONTRACT *vb*): massed, heaped, piled, stacked (see HEAP *vb*)

Ant sparse (of population, forests): tenuous (of clouds, air, masses) —**Con** scattered, dispersed, dissipated (see SCATTER): *thin, rare: *meager, scanty, scant, exiguous

2 crass, *stupid, slow, dull, dumb

Ana obtuse, *dull: stolid, phlegmatic, *impassive

Ant subtle: bright —**Con** *intelligent, brilliant, clever, alert, quick-witted

denude bare, *strip, divest, dismantle

Ant clothe

deny, gainsay, contradict, negative, traverse, impugn, contravene are comparable as meaning, when they refer to an act, to declare something untrue, untenable, or unworthy of consideration or, when they refer to a condition, to go

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

counter to what is true or to the facts as they are. **Deny** commonly implies a refusal and usually a firm or outspoken refusal to accept as true, to grant or concede, or to acknowledge the existence or claims of <deny the report that the British ambassador has resigned> <he is no vulgar and stupid cynic who *denies* the existence . . . of any feelings higher than the merely physical—*Huxley*> <deny citizenship to certain applicants> <deny a request for more books> <for he's a jolly good fellow, which nobody can *deny*!> <the necessities of his own life . . . not any longer to be *denied*—*Mary Austin*> <it would seem that I was *denying* God—*Meredith*> In the reflexive form *deny* usually implies abstinence or renunciation often, but not necessarily, for religious or moral reasons <she *denied* herself all luxuries> <he resolved to *deny* himself the pleasure of smoking> (compare *self-denial* at RENUNCIATION). **Gainsay** is somewhat formal or literary; it implies opposition, usually by way of disputing the truth of what another has said <facts which cannot be *gainsaid*> <but she's a fine woman—that nobody can *gainsay*—*Meredith*> <his mother, whom he could not *gainsay*, was unconsciously but inflexibly set against his genius—*Brooks*> <no one would *gainsay* the right of anyone, the royal American right, to protest—*White*> **Contradict** differs from *gainsay* not only in usually implying a more open or a flatter denial of the truth of an assertion but also in commonly suggesting that the contrary of the assertion is true or that the statement is utterly devoid of truth; thus, “to *contradict* a rumor” is a stronger expression than “to *deny* a rumor”; one may *contradict* (never in this sense *deny*) a person, whereas one may *deny* or *contradict* (the stronger term) an assertion of his <a report which highly incensed Mrs. Bennet, and which she never failed to *contradict* as a most scandalous falsehood—*Austen*> <“Nobody *contradicts* me now,” wrote Queen Victoria after her husband's death, “and the salt has gone out of my life”—*Ellis*> *Contradict* is also used without implication of a spoken or written denial: it then suggests that an assertion, a doctrine, or a teaching runs counter to something else, and therefore either it cannot be true or the other must be false <all the protestations of the employers that they would be ruined by the Factory Acts were *contradicted* by experience—*Shaw*> <they insisted on teaching and enforcing an ideal that *contradicted* the realities—*Henry Adams*> **Negative** is usually a much milder term than those which precede; often it implies merely a refusal to assent to something (as a suggestion, a proposition, a nomination, or a bill) <the senate *negatived* the proposed taxation> <after a polite request that Elizabeth would lead the way, which the other as politely . . . *negatived*—*Austen*> <Beaufort stood, hat in hand, saying something which his companion seemed to *negatived*—*Wharton*> When the idea of going counter to is uppermost, *negative* usually implies disproof <the omission or infrequency of such recitals does not *negative* the existence of miracles—*Paley*> **Traverse** occurs chiefly in legal use and implies a formal denial (as of the truth of an allegation or the justice of an indictment) <it *traverses* the theory of the Court—*Corwin*> **Impugn** usually retains much of its basic implication of attacking and carries the strongest suggestion of any of these terms of directly disputing or questioning or of forcefully contradicting a statement, proposition, or less often a person; it sometimes connotes prolonged argument in an attempt to refute or confute <the idealists . . . took up the challenge, but their reply was to disparage the significance, and even to *impugn* the reality, of the world as known to science—*Inge*> <the morality of our Restoration drama cannot be *impugned*. It assumes orthodox Christian morality, and laughs (in its

comedy) at human nature for not living up to it—*T. S. Eliot*> <no one cares to *impugn* a fool; no one dares to *impugn* a captain of industry—*Brooks*> **Contravene** implies strongly a coming into conflict but less strongly than the other terms an intentional opposition, suggesting rather some inherent incompatibility <no state law may *contravene* the United States Constitution or federal laws enacted under its authority—*Fitzsimmons*> <steps toward the mitigation of racial segregation and discrimination are often forestalled, since . . . these *contravene* the dicta of Southern customs and tradition—*R. E. Jackson*>

Ana *decline, refuse, reject, repudiate: controvert, refute, rebut, confute, *disprove

Ant confirm: concede —**Con** aver, affirm, *assert: *acknowledge

depart 1 leave, withdraw, retire, *go, quit

Ant arrive: remain, abide —**Con** *stay, tarry, linger, wait: *come

2 digress, deviate, *swerve, diverge, veer

Ana forsake, *abandon, desert: reject, repudiate (see DECLINE *vb*): *discard, cast

departed deceased, late, *dead, defunct, lifeless, inanimate

depend 1 *rely, trust, count, reckon, bank

Ana lean, incline (see SLANT *vb*)

2 **Depend**, **hinge**, **hang**, **turn** are comparable when they mean to rest or, especially, to be contingent upon something uncertain or variable or indeterminable. All are normally followed by *on* or *upon*. **Depend**, which literally means to hang or be suspended, suggests an element of mental suspense which makes forecasting impossible. It often suggests uncertainty of a thing with reference to circumstances yet to take place, facts not yet known, or a decision yet to be made <our trip *depends* upon the weather> <his going to college will *depend* on his ability to earn enough money to cover his living expenses> <another motive is the conviction that winning the best satisfaction of later life will *depend* on possessing this power to think—*Eliot*> It may suggest also a variability that rests upon a difference in attitude or point of view <the sterling morale of strikers. This may mean either a staunch fidelity to law and order, or willingness to overturn a motor bus in the street. . . . It *depends* on who is speaking—*Montague*> **Hinge** is sometimes used interchangeably with *depend*; it may retain much of its literal suggestion of a movable part (as a door or a gate) that opens or closes upon hinges and then usually implies the cardinal (see under ESSENTIAL 2) point upon which a decision, a controversy, or an outcome ultimately rests. In such use it suggests not so much mental suspense as uncertainty tempered by the certainty that the matter will go one way or the other <the outcome of the war *hinges* on the ability of our forces to outmove every strategic move of the enemy> <the point on which the decision must finally *hinge*—*Thirlwall*> <the whole case being built up by Mr. Kennon was going to *hinge* in large part upon a single issue—was Clifford under the influence of liquor—*Basso*> **Hang** likewise may interchange with *depend*, but more precisely it suggests a point of support such as is characteristic of the literal action of hanging; the term therefore stresses not so much the uncertainty of the event as the weakness or the strength of what gives validity, authority, or credibility to something (as a doctrine, a belief, or a course of action) or of what points the way to fulfillment or successful performance <the truth of the testimony *hangs* on his word only> <the election *hangs* on a single vote> <a good deal . . . *hangs* on the meaning, if any, of this short word *full*—*T. S. Eliot*> **Turn** often comes close to *hinge* in its meaning <great

events often *turn* upon very small circumstances—*Swift*) It as often differs from *hinge* in suggesting a rotation or pivoting rather than a going one way or the other and, therefore, in implying a dependence upon something that may be variable or casual (the action of the play *turns* upon a secret marriage) (his plots *turn* on the vicissitudes of climbing the success-ladder—*Fadiman*) (the great anxiety of each disputant seemed to *turn* upon striking the first blow—*Thorp*)

dependable *reliable, trustworthy, trusty, tried

Ana sure, assured, *confident: *responsible: staunch, steadfast, constant, *faithful

Con *doubtful, questionable, dubious: capricious, fickle, unstable, *inconstant, mercurial

dependence reliance, *trust, confidence, faith

dependent *adj* 1 **Dependent, contingent, conditional, relative** mean having its existence or nature determined by something else. Something is **dependent** which cannot exist or come into existence by itself quite without aid or support (we are all *dependent* on one another, every soul of us on earth—*Shaw*) (the color of the skin is *dependent* on an adequate supply of blood—*Fishbein*) What is **contingent** takes its character from something that already exists or may exist and therefore is limited or qualified by something extraneous or is incapable of existence apart from it (a person's conception of love is *contingent* both on his past experience and on the nature of that experience) (if propriety should die, there could be no impropriety, inasmuch as the continuance of the latter is wholly *contingent* on the presence of the former—*Grandgent*) (war is *contingent*; even dictatorship is *contingent*. Both depend on . . . ignorance—*Pound*) Something is **conditional** which depends for its realization, fulfillment, execution, or expression on what may or may not occur or on the performance or observance of certain terms or conditions. *Conditional* and *contingent* are often interchangeable, but the former is preferred when eventualities are in the power of the human will (the pardon is *conditional* on his behavior during probation) (while the validity of *conditional* recognition is a matter of debate, it would be entirely novel . . . if the conditions for recognition were set forth by a new government—*I-Kua Chou*) Something is **relative** which cannot be known, considered, or determined apart from its reference to something else and which therefore is affected by the limitations, the instability, or the imperfections of the other thing (market values are always, *relative* to the demand) (the idea of civilization is *relative* . . . any community and any age has its own civilization and its own ideals of civilization—*Ellis*)

Ana subject, *liable, open, exposed, susceptible

Ant absolute: infinite: original —*Con* *ultimate, categorical: uncircumscribed, boundless, eternal, illimitable (see INFINITE); underived (see affirmative verb at SPRING)

2 subject, tributary, *subordinate, secondary, collateral
Ana relying, depending, trusting, reckoning, counting (see RELY); subsidiary, subservient, *auxiliary: abased, humbled, debased (see ABASE)

Ant independent

depict *represent, portray, delineate, picture, limn

Ana describe, narrate, *relate: *sketch, draft, outline, trace

deplete *vb* **Deplete, drain, exhaust, impoverish, bankrupt** are comparable when they mean to deprive a thing in whole or in part of what is essential or necessary to its existence or potency. **Deplete** is often used as though it implied merely a reduction in numbers, in quantity, or in mass or volume; it may be used specifically to suggest the potential harm of such a reduction or the impossibility of restoring what has been lost before such consequences

are evident; thus, bloodletting *depletes* the system, not only by reducing the quantity of blood but by depriving the system of elements essential to its vitality and vigor: an epidemic *depletes* an army when it reduces the army not only in size but in effective strength, especially at a time when that strength is needed (he would have us fill up our *depleted* curriculum with subjects whose worth has not even been tried—*Grandgent*) (cattle herds *depleted* by the heavy slaughter last year—*Time*) **Drain** when precisely employed retains its basic implications of slow withdrawal of liquid (as by straining, seepage, or suction) until the substance which is drained becomes dry or the container which holds the liquid is emptied; hence it connotes a gradual depletion and ultimate deprivation of the figurative lifeblood of a thing or the essential element of its existence or well-being (the Thirty Years' War nearly *drained* Germany of men and materials) (their country's wealth our mightier misers *drain*—*Pope*) (a burden of arms *draining* the wealth and labor of all peoples—*Eisenhower*) **Exhaust** (see also TIRE) is very close to *drain*, but it stresses emptying or evacuation rather than gradual depletion. Unlike *drain*, which usually implies loss without compensating gain, *exhaust* need not suggest ultimate loss of what is removed; thus, a mine is *exhausted* when all its ore has been removed for refining; a soil is *exhausted*, or *drained* of nutrients, by growing crops on it without adequate fertilizing; but, a person is *drained* of vitality when overwork or illness reduces him to a weak or ineffective state (exhaust a subject by treating it so fully that nothing more can be said about it) (molasses is *exhausted* when no further sugar can be extracted from it) (the theme of mother and child has proved a theme which no age has ever *exhausted* or ever will *exhaust*—*Binyon*) (evidently the old ideas had been *exhausted* and the time was ripe for new ideologies—*R. W. Murray*) (seven hundred years of glorious and incessant creation seem to have *exhausted* the constructive genius of Europe—*Clive Bell*) **Impoverish** implies a depletion or a draining of something as essential to a thing as money or its equivalent is to a human being; it stresses the deprivation of qualities essential to a thing's strength, richness, or productiveness (impoverish the body by too meager a diet) (a brilliant sun scorched the *impoverished* trees and sucked energy from the frail breezes—*Farrell*) **Bankrupt** stresses such impoverishment of a thing that it is destitute of qualities essential to its continued existence or productiveness; it connotes a complete or imminent collapse or breaking down (argued that science by inattention to immaterial phenomena is *bankrupting* itself) (dainty bits make rich the ribs, but *bankrupt* quite the wits—*Shak.*)

Ana undermine, sap, debilitate, *weaken, enfeeble, cripple, disable: reduce, diminish, *decrease, lessen

Con augment, *increase, enlarge

deplore, lament, bewail, bemoan mean to manifest grief or sorrow for something. All carry an implication of weeping or crying which is commonly purely figurative. **Deplore** implies keen and profound regret especially for what is regarded as irreparable, calamitous, or destructive of something good or worth keeping (ev'n rival wits did Voiture's death *deplore*—*Pope*) (deplore a quarrel between friends) (they *deplore* the divorce between the language as spoken and the language as written—*T. S. Eliot*) **Lament** commonly implies a strong or demonstrative expression of sorrow or mourning. In contrast to *deplore*, it usually does imply utterance, sometimes passionate, sometimes fulsome (yet I *lament* what long has ceased to be—*Shelley*) (he made the newly returned actress a tempting offer, instigating some journalist friends

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

of his at the same time to *lament* over the decay of the grand school of acting—*Shaw*) **Bewail** and **bemoan** imply poignant sorrow finding an outlet in words or cries, *bewail* commonly suggesting the louder, *bemoan*, the more lugubrious expression of grief or, often, of a mere grievance or a complaint (the valet *bewailing* the loss of his wages—*Alexander*) (even at the time when our prose speech was as near to perfection as it is ever likely to be, its critics were *bemoaning* its corruption—*Ellis*) (and all wept, and *bewailed* her—*Lk* 8:52) (the silver swans her hapless fate *bemoan*, in notes more sad than when they sing their own—*Pope*)

Ana deprecate, *disapprove: *grieve, mourn, sorrow: weep, wail, *cry

Con vaunt, crow, *boast, brag

deport 1 demean, comport, *behave, conduct, acquit, quit

Ana see those at Demean

2 transport, *banish, exile, expatriate, ostracize, extradite

deportment 1 *behavior, conduct

Ana see those at BEHAVIOR

2 demeanor, *bearing, mien, port, presence

Ana *form, formality, ceremony, ceremonial, ritual: *culture, cultivation, breeding, refinement: dignity, grace, *elegance

deposit *n* **Deposit**, **precipitate**, **sediment**, **dregs**, **lees**, **grounds** mean matter which settles to the bottom of or is let fall from suspension in a fluid (as air or water). **Deposit**, the most comprehensive term, refers to matter let fall by a natural or mechanical process to remain where it settles until there is a visible layer or accumulation (a *deposit* of soot in a chimney) (a *deposit* of gravel on the bed of a river) (rich *deposits* of coal) (the walls of the houses are clean and less discolored by the *deposit* of carbon than usual in most towns—*Jefferies*) **Precipitate** denotes a usually solid substance separated from a solution or suspension by some chemical interaction or by some physical force (as heat, cold, or centrifugal force) (camphor may be obtained as a *precipitate* from an alcoholic solution by addition of water) (some finely divided *precipitates* (as silver chloride and zinc sulfide) coalesce into amorphous, curdy, or flocculent masses that remain suspended near the surface of the liquid) **Sediment** applies to matter that settles to the bottom of a liquid (sharp rocks hidden by *sediment* spoiled the cove for diving) The word may be used of other matters with emphasis on a foreign element that disturbs the clarity or purity of something (the poetry of all these men contained a deep *sediment* of prose meaning—*Day Lewis*) **Dregs** and **lees** typically apply to the sediment found at the bottom of a cask or a bottle of some alcoholic or fermenting liquor, but the terms may be used of other things that, like a sediment, suggest that something now fair has been formerly turbid, foul, or offensive, or that imply the worthlessness of what lies at the bottom or is left over (destined to drain the cup of bitterness, even to its *dregs*—*Southey*) (the very *dregs* of the population—*C. M. Davies*) (I will drink life to the *lees*—*Tennyson*) (the angler . . . has left for his day's work only the *lees* of his nervous energy—*Kingsley*) (the sonnet became . . . a thing of frigid conceits worn bare by iteration; of servile borrowings; of artificial sentiment, flat as the *lees* and *dregs* of wine—*Lowe*) **Grounds** is used of the small particles left after serving or drinking a beverage (as coffee); usually the term carries no implication of a disagreeable sediment but simply of one from which all the flavor has been exhausted.

Ana falling, dropping, sinking, subsiding (see FALL)

deposition affidavit, testimony, *evidence

Ana *account, report, version

deprave *debase, vitiate, corrupt, debauch, pervert

Ana defile, pollute, taint, *contaminate: *injure, impair, damage, spoil

Con *improve, better, ameliorate: *exalt, magnify

depraved debased, vitiated, corrupted, corrupt, debauched, perverted (see under DEBASE)

Ana dissolute, *abandoned, reprobate, profligate: degenerate, infamous, villainous, *vicious: degraded, debased (see ABASE)

deprecate *disapprove

Ana *deplore, lament, bewail, bemoan: reprobate, reprehend, condemn (see CRITICIZE)

Ant endorse —**Con** *approve, sanction: *commend, applaud

depreciate *decry, disparage, derogate, detract, belittle, minimize

Ana underestimate, undervalue, underrate (see base words at ESTIMATE): asperse, *malign

Ant appreciate —**Con** prize, cherish, treasure, value (see APPRECIATE): *understand, comprehend

depreciative, depreciatory *derogatory, disparaging, slighting, pejorative

Ana decrying, belittling, minimizing (see DECRY): aspersing, maligning (see MALIGN *vb*): underrating, underestimating, undervaluing (see base words at ESTIMATE)

depress, weigh, oppress mean to put such pressure or such a load upon a thing or person as to cause it or him to sink under the weight. **Depress** implies a lowering of something by the exertion of pressure or by an overburdening; it most commonly implies a lowering of spirits by physical or mental causes (the long dull evenings in these dull lodgings when one is weary with work *depress* one sadly—*J. R. Green*) (the mere volume of work was enough to crush the most diligent of rulers and *depress* the most vital—*Buchan*) (he was *depressed* by his failure—*Anderson*) It may suggest lowering of bodily vigor or the power of certain organs to function (as by a drug, a disease, or an external condition) (the drug aconite *depresses* heart action) In reference to other things (as market prices or social or cultural states) *depress* often suggests a lowering in activity, intensity, or vigor (the first effect of the World War was greatly to *depress* the prices of stocks) (a grain market *depressed* by the existence of a large surplus) (to *depress* the culture of the minority below the point at which a full understanding of poetry becomes possible—*Day Lewis*) **Weigh** in this relation is used with *down, on, or upon* and carries a weaker implication of the result or lowering than *depress* but a stronger implication of the difficulty or burdens imposed upon a person or thing (he is *weighed down* with cares) (the responsibility *weighs* heavily *upon* him) (Walter's mind had cleared itself of the depression which had *weighed on* him so heavily—*Costain*) (a melancholy damp . . . to *weigh* thy spirits *down*—*Milton*) Like *weigh, oppress* stresses the burden which is borne or is imposed and, like *depress*, the consequent ill effects (as the lowering of spirits or of power to function) or in its more common sense (see WRONG), a trampling down, a harassing, or a subjection to heavy penalties (the weary world of waters between us *oppresses* the imagination—*Lamb*) (the butler, *oppressed* by the heat . . . was in a state of abstraction bordering on slumber—*Shaw*) (she is so *oppressed* by fear that she may lose her mind)

Ana distress, *trouble, ail: *afflict, try, torment: *tire, weary, fatigue, exhaust, fag, jade, tucker

Ant elate: cheer —**Con** gladden, rejoice, delight, gratify, *please

depressed dejected, dispirited, *downcast, disconsolate, woebegone

Ana gloomy, glum, morose (see SULLEN): discouraged, disheartened (see DISCOURAGE): *melancholy, lugubrious
depression dejection, gloom, blues, dumps, *sadness, melancholy, melancholia

Ana despondency, forlornness, hopelessness, despair, desperation (see under DESPONDENT): doldrums, boredom, ennui, *tedium

Ant buoyancy —*Con* cheerfulness, lightheartedness, gladness, joyousness (see corresponding adjectives at GLAD): *mirth, hilarity, glee

deputy 1 attorney, *agent, factor, proxy

Ana substitute, surrogate (see RESOURCE)

2 *delegate, representative

deracinate uproot, eradicate, extirpate, *exterminate, wipe
Ana *abolish, extinguish, annihilate, abate: *destroy, demolish

derange disarrange, unsettle, *disorder, disturb, disorganize

Ana upset, *discompose, perturb: discommode, incommode, *inconvenience

Ant arrange (a scheme, plan, system): adjust

deranged demented, non compos mentis, crazed, crazy, *insane, mad, lunatic, maniac

derangement *aberration, alienation

derelict *n* *outcast, castaway, reprobate, pariah, untouchable

Ana *vagabond, vagrant, tramp, hobo

dereliction *failure, neglect, default, miscarriage

Ana abuse, misuse, outrage (see ABUSE *vb*)

deride *ridicule, mock, taunt, twit, rally

Ana *scoff, jeer, gibe, flout, sneer, gird, flect: chaff, *banter, kid, rag, jolly, rib

derive originate, arise, rise, *spring, emanate, issue, stem, flow, proceed

dernier cri *fashion, style, mode, vogue, fad, rage, craze, cry

derogate disparage, detract, belittle, minimize, depreciate, *decry

Ana reduce, lessen, *decrease, diminish

Con enhance, heighten, *intensify

derogatory, **depreciatory**, **depreciative**, **disparaging**, **slighting**, **pejorative** mean designed or tending to belittle. **Derogatory** may be used of one's own action or activity that tends to detract from his reputation or to lower him in the estimation of others (though it was supposed to be proper for them to have an occupation, the crude fact of money-making was still regarded as *derogatory*—*Wharton*) (will grub in a garden all day, or wash dogs or rid them of vermin . . . without considering the dirt involved in these jobs in the least *derogatory* to their dignity—*Shaw*) More often the term is applied to expressions or modes of expression (as choice of words or tone of voice) and then implies an intent to detract or belittle by suggesting something that is discreditable (the *derogatory* use of the term *politician*) (he makes remarks about miracles, quite *derogatory* remarks—*H. G. Wells*) (there is no one so situated that he cannot refrain from telling race jokes and using *derogatory* names—*Lillian Smith*) **Depreciatory** and **depreciative** are used chiefly of something written or spoken that tends to lower a thing in value or in status (a *depreciatory* comparison of man's mortal nature with the persistence of cosmic phenomena—*Lowie*) They often also describe words or modes of using words that bear connotations tending to discredit or to bring into discredit the person or thing referred to (what people might refer to, slightly, as being mere subjective feelings . . . have more significance than that *depreciatory* way of speaking about them—*Hendel*) (in the classic world of antiquity they called outsiders . . . "barbarians"—a

denomination which took on an increasingly *depreciative* sense—*Ellis*) **Disparaging** definitely implies an intent to depreciate usually by the use of oblique and indirect methods. The term suggests an attempt to make little of or to discourage by belittling and often carries a clearer implication of intentional detraction than *derogatory* and of resulting undervaluing than *depreciatory* or *depreciative* (a *disparaging* review of a book) (criticism is in many cases just a calling of laudatory or *disparaging* names—*Huxley*) (nothing can be further from the truth than to call the Greeks "intellectualists" in the *disparaging* sense in which the word is now often used—*Inge*) **Slighting** applies to anything that may convey or imply a slight or indicate the little respect in which one is held by the speaker; it sometimes implies disparagement but, more often, indifference or disdain (to hear yourself . . . glanced at in a few *slighting* terms—*Ben Jonson*) (a *slighting* allusion to his book) (the constable felt the full effect of this *slighting* reception—*Scott*) (her chief complaint is my *slighting* reference to Henry James—*J. D. Adams*) **Pejorative** is nearly equal to *depreciatory* or *depreciative* in meaning (it might be argued, without any *pejorative* implication, whether Gide's is essentially a religious temperament or whether . . . he has found in the traditions and doctrines of Christianity . . . an adequate and sympathetic psychology—*Farrelly*) (the Grand Jury . . . is here put in a *pejorative* light—*Stein*) It is used especially in reference to words which have acquired a later and baser meaning or to derogatory words formed from another word or root by the addition of a suffix or prefix that gives them a derogatory twist (the earlier meaning of "imp"—a child—has now given way to its *pejorative* meaning of a mischievous child, or rogue) (it was drifting, all right, but not drifting in any nasty *pejorative* sense, like . . . a cake of soap in the gray water before you pull the plug in the bathtub—*Warren*) (euphemism . . . is the motive force behind many *pejorative* developments. If a euphemistic substitute ceases to be felt as such . . . this will result in a permanent depreciation of its meaning—*Ullmann*) (resort to *pejorative* epithets as their argument—*Cohen*) (poetaster is the *pejorative* word for poet) (*pseudo-* is often used in English with *pejorative* force)

Ana belittling, minimizing, decrying (see DECRY): aspersing, maligning (see MALIGN)

descant *vb* 1 *sing, troll, carol, warble, trill, hymn, chant, intone

2 *discourse, expatiate, dilate

descend, **dismount**, **alight** mean to get or come down from a height. One **descends** when one climbs down a slope (as of a hill or mountain), a ladder, a step, a stair, a wall, or a tree; one **dismounts** when one gets down from a horse or from a bicycle or motorcycle; one **alights** when one comes down from a perch or out of a vehicle (as a carriage, a car, or an airplane) with a spring or especially with lightness and grace.

Ant ascend, climb

descendant *offspring, young, progeny, issue, posterity

describe *relate, narrate, state, report, rehearse, recite, recount

Ana delineate, *sketch, outline

description kind, sort, *type, character, nature, stripe, kidney, ilk

descrie espy, *see, behold, observe, notice, remark, note, perceive, discern, view, survey, contemplate

desecration *profanation, sacrilege, blasphemy

Ana defilement, pollution (see corresponding verbs at CONTAMINATE)

desert *n* *waste, badlands, wilderness

desert *n* *due, merit

Ana meed, guerdon, reward (see PREMIUM); punishment, chastisement, chastening, disciplining or discipline (see corresponding verbs at PUNISH)

desert *vb* forsake, *abandon

Ana leave, quit, depart (see GO)

Ant stick to, cleave to

deserter see under *desert* at ABANDON *vb*

desertion 1 *defection, apostasy

Ana perfidiousness or perfidy, treacherousness or treachery, disloyalty, faithlessness (see corresponding adjectives at FAITHLESS)

2 see under *desert* at ABANDON *vb*

deserve, **merit**, **earn**, **rate** mean to be or become worthy of something as recompense whether by way of reward or punishment. **Deserve** implies a just claim which entitles one to something good or evil, usually on the ground of actions done or qualities shown; it does not necessarily imply that the claim has been won or recognized <when at your hands did I *deserve* this scorn?—*Shak.*> <that he should be supported at the public expense as one who had *deserved* well of his country—*Dickinson*> <it is largely owing to his insight and enthusiasm, as well as to his editorial toil, that the Tudor translators have become recognized as they *deserve*—*T. S. Eliot*> **Merit** is so close a synonym of *deserve* that it is often used interchangeably with it without loss. Even so, slight differences in meaning may be detected. *Merit*, although it implies a just claim, seldom suggests that the claim has been urged by oneself or another, a connotation that is not essential to but may often be found in *deserve*; *merit* also more often implies qualities of character, of life, or of action that entitle one to reward or punishment <give him the words of praise that he *merits*> <he *merited* a reproof, but he did not *deserve* dismissal> <a compliment . . . to the grandeur of the family, *merited* by the manner in which the family has sustained its grandeur—*Dickens*> **Earn** may suggest a due correspondence between the efforts exerted or the time or energy spent and the recompense that ensues; it fundamentally implies a deserving or meriting as well as a getting and therefore may suggest a return in evil as well as in good <“Indeed, he hath an excellent good name.” “His excellence did *earn* it, ere he had it”—*Shak.*> <an active, ardent mind . . . a generous spirit, and a body strong . . . had *earned* for him sure welcome—*Wordsworth*> <his devotion to self-interest has *earned* for him nothing but contempt> **Rate** implies recognition of deserts or merits usually upon a carefully calculated basis, but it does not carry any suggestion of whether what is deserved or merited has been given <he *rates* a promotion> <the magazine *rates* our support>

Ana gain, win, *get: evaluate, value, *estimate: claim, *demand

desiccate *vb* *dry, dehydrate, parch, bake

design *vb* 1 mean, *intend, propose, purpose

Ana *aim, aspire

2 plan, plot, scheme, project (see under PLAN *n*)

Ana *sketch, outline, diagram, delineate, blueprint, draft: *invent, create

Con execute, fulfill, effect, accomplish, achieve, *perform

design *n* 1 *plan, plot, scheme, project

Ana delineation, sketch, draft, outline, tracing, diagram (see under SKETCH *vb*): conception, *idea

Con execution, fulfillment, accomplishment, achievement, performance (see corresponding verbs at PERFORM) 2 *intention, intent, purpose, aim, end, object, objective, goal

Ana *will, volition, conation: deliberation, reflection, thinking or thought (see corresponding verbs at THINK): intrigue, machination, *plot

Ant accident —*Con* impulse (see MOTIVE)

3 *figure, pattern, motif, device

designate, **name**, **nominate**, **elect**, **appoint** are comparable in the sense to declare a person one's choice for incumbency of an office, position, post, or benefice. **Designate** implies selection by the person or body having the power to choose an incumbent or to detail a person to a certain post; it often connotes selection well in advance of incumbency <Harold contended that he had been *designated* by Edward the Confessor as the latter's successor to the English throne> <a clergyman who has been *designated* by the proper ecclesiastical authority as the incumbent of an episcopacy is usually called bishop-designate until he has been consecrated or has been installed> **Name** varies little in meaning from *designate* except that it stresses announcement rather than selection; it is more informal, however, and is usually preferred when the reference is to a political or government office within the gift of an executive or of an executive body <the mayor has not yet *named* the commissioner of public safety> <only one member of the incoming president's cabinet remains to be *named*> **Nominate**, though etymologically the equivalent of *name*, is rarely used as its equivalent in meaning <the House of Commons was crowded with members *nominated* by the Royal Council—*J. R. Green*> Usually it implies merely the presentation of the name of one's choice for an office for approval or rejection by others who have the final say; thus, a person from the floor at a convention may *nominate* his choice for a particular office; a state convention of a political party meets to *nominate* the party's candidates for governor and other state officers. Either *nominate* or *name* may be used when the executive's choice must be confirmed by a body having that power. **Elect**, as distinguished from *nominate*, implies a final selection (as by the electorate) from the candidates who have been previously nominated <all the liberal candidates were *elected*> <not one person on the nominating committee's slate was *elected* at today's meeting> **Appoint** always implies that the selection is determined without a general vote (as of an electorate) and represents the choice of the person or the body in whom such power is legally vested. *Appoint* may be used even when confirmation (as by the U. S. Senate) has been necessary to make the designation valid <three justices of the Supreme Court have been *appointed* by the president within twelve months> <he [the president] shall *nominate*, and by and with the advice and consent of the Senate, shall *appoint* ambassadors, other public ministers and consuls, judges of the Supreme Court—*U. S. Constitution*>

Ana *choose, select, single, opt, pick

designation *name, denomination, appellation, title, style

Ana identification, *recognition: classification, pigeon-holing or pigeonhole (see corresponding verbs at ASSORT)

designed premeditated, *deliberate, considered, advised, studied

Ana intentional, *voluntary, willful, deliberate, willing: purposed, intended (see INTEND): resolved, determined, decided (see DECIDE)

Ant accidental —*Con* fortuitous, casual (see ACCIDENTAL): *spontaneous, impulsive: natural, normal, *regular, typical

desire *vb* **Desire**, **wish**, **want**, **crave**, **covet** mean having a longing for something. *Desire*, *wish*, and *want* are often used with identical intent though in such situations (usually everyday ones) that the degree of intensity of longing or need is not at issue <help *wanted*> <we can order whichever model you *wish*> In such use *desire* is often felt as more formal and dignified, and it may

even be decidedly pompous in effect (cleaning lady *desires* situation) *Desire* in more general use, however, emphasizes the strength or ardor of feeling and often implies strong intention or aim (more than any other thing on earth *desired* to fight for his country—*White*) (unions which *desired* to avail themselves of the benefits of the law—*Collier's Yr. Bk.*) *Wish* is less strong, often suggesting a not usually intense longing for an object unattained, unattainable, or questionably attainable (Newton's law of gravitation could not be *wished* into existence—*Overstreet*) (not to have property, if one *wished* it, was almost a certain sign of shiftlessness—*Brooks*) *Want* (see also LACK) is a less formal term than *wish* and so is often interchangeable with it in situations where dignity of the subject or respectfulness is not at issue, though generally *want* implies that the longing is for something the attainment of which would fill a real need and which is actively hoped for (those who *wanted* to live long—*Fishbein*) (the French *wanted* European unity—*N. Y. Times*) *Crave* implies strongly the force of physical or mental appetite or need (as of hunger, thirst, love, or ambition) (crave peace and security after war) (that eternal *craving* for amusement—*Donn Byrne*) (what he *craved* was books of poetry and chivalry—*Weeks*) *Covet* implies a strong, eager desire, often inordinate and envious and often for what belongs to another (where water is the most *coveted* and essential resource because its supply is limited—*Amer. Guide Series: Texas*) (we hate no people, and *covet* no people's land—*Willkie*)

Ana *long, yearn, hanker, pine, hunger, thirst: aspire, pant, *aim

Con abhor, abominate, loathe, detest, *hate: spurn, repudiate, reject, refuse, *decline

desire *n* Desire, appetite, lust, passion, urge are comparable as meaning a longing for something regarded as essential to one's well-being or happiness or as meaning an impulse originating in a man's nature and driving him toward the object or the experience which promises him enjoyment or satisfaction in its attainment. *Desire* may be used of every conceivable longing that stirs one emotionally, whether that longing originates in man's physical or in his spiritual nature, whether it is natural and normal or unnatural and perverted, whether it is generally regarded as low or high in the scale of moral or spiritual values (the *desire* for food) (the *desire* for an education) (a *desire* for change) (the *desire* for peace) (his physical *desire* to sit in the sun and do nothing—*Anderson*) (the keen *desire* . . . to pay their debts—*Replier*) (nothing dies harder than the *desire* to think well of oneself—*T. S. Eliot*) (Congreve's characters have inclinations, not *desires*; habits, not ecstasies—*J. M. Brown*) It may be used specifically to denote sexual longing, but it does not always convey derogatory connotations when so restricted in meaning (like the flesh of animals distended by fear or *desire*—*Cather*) *Desire* is often used in implicit contrast to *will* or *volution*, for in itself it carries no implication of a determination or effort to possess or attain (she had the *desire* to do something which she objected to doing—*Bennett*) (guiltless even of a *desire* for any private possession or advantage of their own—*Dickinson*) *Appetite* is almost as extensive in its range of application as *desire*, and it invariably implies an imperative demand for satisfaction. It is specifically applied to the longings (as hunger, thirst, and sexual desire) which arise out of man's physical nature and which may be thwarted only by circumstances beyond one's control or by deliberate self-control (a slave to his *appetite* for drink) (the child is losing his *appetite* and

only picks at his food) (impose restraints upon one's physical *appetites*) (he collected guns and women and his sexual *appetite* was awesome—*E. D. Radin*) The word may be applied also to equally exacting longings which drive one to their satisfaction, whether they originate in his nature or are acquired (man's distinguishing characteristic is the *appetite* for happiness) (an insatiable *appetite* for news) (almost pathological in his *appetite* for activity—*Mencken*) *Lust* combines the specific denotation of *desire* as a longing that stirs emotion and that of *appetite* as a longing that exacts satisfaction; often it implies domination by the emotion or insatiability of the appetite (Jansen . . . utterly condemned, as abominable concupiscence, not only sensuality (the *lust* of the flesh) but scientific curiosity (the *lust* of knowing) and ambition (the *lust* of power)—*Preserved Smith*) (whose ruling passion was the *lust* of praise—*Pope*) When used specifically to denote sexual longing, *lust* unlike *desire* automatically carries derogatory connotations (in his morning litany he could pray to be kept from lasciviousness, but when night came *lust* might come with it—*Van Doren*) *Passion* is applied to any intense and preoccupying emotion which gives one's mind its particular bent or which serves as an outlet for and gives direction to one's energies. Though it comes close to *lust* in suggesting the energizing of desire by the vehemence of the emotions, *passion* is the better choice when personal predilection is implied; thus, he, too, knew the *lust* (better than *passion*) for power; but, his work reveals a *passion* (better than *lust*) for perfection (avarice, he assured them, was the one *passion* that grew stronger and sweeter in old age. He had the *lust* for money as *Martinez* had for women—*Cather*) (the dream, the ambition, the *passion* of Mr. Raycie's life was (as his son knew) to found a Family—*Wharton*) *Urge*, which basically means a force or motive which drives one to action, often more specifically denotes a strong, persistent, and compelling desire that has its origin in one's physical nature or one's peculiar temperament. The word is sometimes applied to the physical appetites (the sexual appetite is often called "the biological *urge*"), but it is more often used of a desire so strong and insistent that it must be satisfied or a sense of frustration ensues (an *urge* to travel) (an *urge* to marry) (that almost mystic *urge* to climb can dominate your whole life—*Vaughan-Thomas*)

Ana longing, yearning, hankering, pining, hungering or hunger, thirsting or thirst (see LONG vb): *cupidity, greed, avarice, rapacity

Ant distaste —*Con* repugnance, repellency or repulsion, abhorrence (see corresponding adjectives at REPUGNANT)

desist discontinue, cease, *stop, quit

Ana *refrain, abstain, forbear: *relinquish, yield, abandon, resign

Ant persist —*Con* *continue: *persevere

desolate 1 forlorn, lorn, lonesome, lone, solitary, lonely, *alone

Ana deserted, forsaken, abandoned (see ABANDON): *miserable, wretched

Con cheerful, lighthearted, joyful, joyous, happy, *glad 2 *dismal, dreary, cheerless, dispiriting, bleak

Ana *bare, barren, bald: destitute, poverty-stricken, *poor

despair *n* hopelessness, desperation, despondency, forlornness (see under DESPONDENT *adj*)

Ana dejection, melancholy, *sadness, gloom, depression

Ant hope: optimism: beatitude —*Con* rapture, trans-

port, *ecstasy

despairing *adj* hopeless, desperate, *despondent, forlorn
Ana melancholy, *melancholic, atrabilious: pessimistic, misanthropic, *cynical: depressed, weighed down (see DEPRESS)

Ant hopeful —*Con* optimistic, roseate, rose-colored (see HOPEFUL): sanguine, *confident, assured, sure

desperate hopeless, despairing, *despondent, forlorn
Ana reckless, rash, foolhardy, venturesome (see ADVENTUROUS): *precipitate, headlong: thwarted, foiled, frustrated, outwitted, circumvented, baffled, balked (see FRUSTRATE)

Con *cool, collected, composed, nonchalant: sanguine, assured, *confident, sure

desperation hopelessness, despair, despondency, forlornness (see under DESPONDENT *adj*)

Ana fury, frenzy (see INSPIRATION): grit, pluck, guts, sand, *fortitude: recklessness, rashness, foolhardiness (see corresponding adjectives at ADVENTUROUS): *temerity, audacity

Con *confidence, assurance, aplomb: *equanimity, composure, sangfroid, phlegm

despicable *contemptible, pitiable, sorry, scurvy, cheap, beggarly, shabby

Ana *base, low, vile: ignominious, infamous, disgraceful (see corresponding nouns at DISGRACE): ignoble, *mean, abject, sordid

Ant praiseworthy, laudable

despise, *contemn*, *scorn*, *disdain*, *scout* mean to regard a person or thing as beneath one's notice or as unworthy of one's attention or interest. The same differences in implications and connotations are observable in the corresponding nouns *despite*, *contempt*, *scorn*, *disdain* when they denote such an attitude toward or such treatment of a person or thing. **Despise** and **despite** may imply an emotional reaction from strong disfavor to loathing, but in precise use it stresses a looking down upon a thing and its evaluation as mean, petty, weak, or worthless (he must learn, however, to *despise* petty adversaries. No good sportsman ought to shoot at crows—*Scott*) (bird and beast *despised* my snares, which took me so many waking hours at night to invent—*Hudson*) (receive thy friend, who, scorning flight, goes to meet danger with *despite*—*Longfellow*) (the *despite* in which cunners are held is a convention—*Yale Review*) **Contemn** and **contempt** imply even a harsher judgment than *despise* or *despite*, for *despise* and *despite* may connote mere derision, whereas *contemn* and especially *contempt* usually suggest vehement, though not necessarily vocal, condemnation of the person or thing as low, vile, feeble, or ignominious (I *contemn* their low images of love—*Steele*) (his own early drawings of moss roses and picturesque castles—things that he now mercilessly *contemned*—*Bennett*) (and in *contempt* of hell and heaven, dies rather than bear some yoke of priests or kings—*Masefield*) (it was to proclaim their utter *contempt* for the public and popular conceptions of art, that the Dadaists launched into a series of outrageous practical jokes—*Day Lewis*) **Scorn** implies quick, indignant, or profound contempt (instructed from her early years to *scorn* the art of female tears—*Swift*) (I knew he'd *scorn* me. He hates frumps—*Meredith*) (Voltaire, with his quick intellectual *scorn* and eager malice of the brain—*Dowden*) (common sense, rejecting with *scorn* all that can be called mysticism—*Inge*) **Disdain** suggests a visible manifestation of pride and arrogance or of aversion to what is base (a great mind *disdains* to hold anything by courtesy—*Johnson*) (the psychiatric patient is *disdained* and ridiculed by his fellow inmates—*Banay*) (his *disdain*

of affectation and prudery was magnificent—*Mencken*) **Scout** stresses not only derision but a refusal to consider the person or thing concerned as of any value, efficacy, or truth. It therefore suggests rejection or dismissal (many great philosophers have not only been *scouted* while they were living, but forgotten as soon as they were dead—*Hazlitt*) (Alice would have *scouted* . . . any suggestion that her parent was more selfish than saintly—*Shaw*)

Ana abominate, loathe, abhor, detest, *hate: spurn, repudiate (see DECLINE)

Ant appreciate —*Con* admire, esteem, respect (see under REGARD *n*): value, prize, cherish, treasure (see APPRECIATE)

despite *n* *In* spite, ill will, malevolence, spleen, grudge, *malice, malignity, malignancy

Ana contempt, scorn, disdain (see under DESPISE): abhorrence, loathing, detestation, abomination, hatred, hate (see under HATE *vb*)

Ant appreciation: regard —*Con* admiration, esteem, respect (see REGARD *n*): *reverence, awe, fear

2 contempt, scorn, disdain (see under DESPISE)

despite *prep* *In* spite of, *notwithstanding

despoil *ravage, devastate, waste, sack, pillage, spoliolate

Ana plunder, *rob, rifle, loot: *strip, bare, denude

despondency despair, desperation, hopelessness, forlornness (see under DESPONDENT *adj*)

Ana dejection, depression, melancholy, melancholia, *sadness, blues, dumps

Ant lightheartedness —*Con* cheerfulness, gladness, happiness, joyfulness, joyousness (see corresponding adjectives at GLAD)

despondent *adj* **Despondent**, **despairing**, **desperate**, **hopeless**, **forlorn** mean having lost all or practically all hope. The same distinctions in implications and connotations are to be found in their corresponding nouns **despondency**, **despair**, **desperation**, **hopelessness**, **forlornness** when they denote the state or feeling of a person who has lost hope. **Despondent** and **despondency** imply disheartenment or deep dejection arising out of a conviction that there is no longer any justification of hope or that further efforts are useless (a *despondent* lover) (whenever . . . the repressed spirit of the artist . . . perceived . . . the full extent of its debacle, Mark Twain was filled with a *despondent* desire, a momentary purpose even, to stop writing altogether—*Brooks*) (we poets in our youth begin in gladness; but thereof come in the end *despondency* and madness—*Wordsworth*) (England, they said, was wont to take her defeats without *despondency*, and her victories without elation—*Replier*) **Despairing** and **despair** imply sometimes the passing of hope, sometimes the utter loss of hope, and often accompanying despondency (the author . . . ended with a *despairing* appeal to the democracy when his jeremiads evoked no response from the upper class . . . or from the middle class—*Inge*) (to fortify ourselves against the ultimate disaster—which is *despair*—*Times Lit. Sup.*) (despair of her ever understanding either the terms of a contract or the nature of working conditions—*Mary Austin*) (the bitter weariness of a fathomless resignation and *despair*—*Wolfe*) **Desperate** and **desperation** imply despair but not the cessation of effort; rather, they often suggest violence and recklessness as a last resource especially in the face of anticipated defeat or frustration (the bitter, *desperate* striving unto death of the oppressed race, the damned *desperation* of the rebel—*Rose Macaulay*) (a *desperate* determination that nothing should interfere with her marriage with Hugh had taken possession of her—*Anderson*) (he was fighting a fight of *desperation*, and knew it—*Meredith*) (not knowing . . . how near my

pursuer might be, I turned in *desperation* to meet him—*Hudson* > **Hopeless** and **hopelessness** imply both the complete loss of hope and the cessation of effort (the *hopeless* look in the faces of the doomed men) > The words do not necessarily suggest despondency, dejection, or gloom, for sometimes they imply acceptance or resignation (<“Why should you say such desperate things?” “No, they are not desperate. They are only *hopeless*”—*Hardy*) > (not that Dr. Lavendar was *hopeless*; he was never *hopeless* of anybody . . . but he was wise; so he was deeply discouraged—*Deland*) > (the little *hopeless* community of beaten men and yellow defeated women—*Anderson*) > **Forlorn** (see also ALONE 1) and **forlornness** stress utter hopelessness, but they differ from *hopeless* and *hopelessness* in implying hopelessness even in the act of undertaking something because its failure is all but certain ([we] sit down in a *forlorn* skepticism—*Berkeley*) > (poor prince, *forlorn* he steps . . . and proud in his despair—*Keats*) > *Desperate*, *hopeless*, and *forlorn* and their corresponding nouns are applicable not only to men, their moods, words, and acts, but to the things which make men despairing or hopeless (<*desperate* straits) > (the *hopeless* situation of a beleaguered garrison) > (*desperate* grime and greasiness—*McFee*) > (all the high ardor and imaginative force which the Celt has ever thrown into a *forlorn* and failing cause—*Cyril Robinson*)

Ana grieving, mourning, sorrowing (see GRIEVE): depressed, dejected, melancholy, sad (see corresponding nouns at SADNESS)

Ant lighthearted —*Con* cheerful, joyful, joyous, happy, *glad; buoyant, volatile, resilient, *elastic

despotic tyrannical, tyrannous, arbitrary, autocratic, *absolute

Ana domineering, imperious, *masterful, imperative: *dictatorial, authoritarian, magisterial

destiny *fate, lot, doom, portion

Ana *end, termination, terminus, ending: goal, objective (see INTENTION)

destitute 1 *devoid, void

Ana lacking, wanting (see LACK *vb*): *deficient: *empty: barren, *bare: depleted, drained, exhausted, bankrupted or bankrupt (see corresponding verbs at DEplete)

Con *full, replete, complete

2 *poor, indigent, needy, penniless, impecunious, poverty-stricken, necessitous

Ant opulent

destitution want, indigence, *poverty, penury, privation

Ana *need, necessity, exigency: *lack, absence, want, privation, dearth: adversity, *misfortune: strait (see JUNCTURE)

Ant opulence

destroy, **demolish**, **raze** mean to pull or tear down. **Destroy** is so general in its application that it may imply the operation of any force that wrecks, kills, crushes, or annihilates (<*destroy* a nest of caterpillars) > (<*destroy* affection) > (<a building *destroyed* by fire) > (<grinding poverty that *destroys* vitality) > Its opposition to *construct* is often apparent (<it is proverbially easier to *destroy* than to *construct*—*T. S. Eliot*) > (<very few established institutions, governments and constitutions . . . are ever *destroyed* by their enemies until they have been corrupted and weakened by their friends—*Lippmann*) > **Demolish** implies a pulling or smashing to pieces; when used in reference to buildings or other complex structures (as of wood, stone, or steel), it implies complete wreckage and often a heap of ruins (<houses *demolished* by a hurricane) > (<the automobile was *demolished* in a collision with the train) > The term implies the destruction of all coherency or integrity in a nonmaterial thing and, consequently, of all its usefulness

> (<*demolish* an opponent's argument) > (<people are inclined to believe that what Bradley did was to *demolish* the logic of Mill and the psychology of Bain—*T. S. Eliot*) > (<his research has been painstaking, and he *demolishes* a good many legends—*Pratt*) > **Raze** implies a bringing to the level of the ground; it may or may not imply an orderly process with no destruction of usable parts (<several buildings were *razed* to make room for the new city hall) > (in 1865 a Gulf hurricane *razed* the town—*Amer. Guide Series: Texas*) > The term may imply obliteration or effacement, more, however, with reference to the implication of scraping than to the sense of pulling or tearing down (<canst thou not minister to a mind diseased . . . *raze* out the written troubles of the brain . . .?—*Shak.*)

Ana *ruin, wreck, dilapidate: *abolish, extinguish, annihilate: *ravage, devastate, sack

Con *found, establish, institute, organize: *make, form, shape, fashion, fabricate, forge, manufacture: preserve, conserve, *save

destruction *ruin, havoc, devastation

Ana demolishing or demolition, razing (see corresponding verbs at DESTROY): annihilation, extinction (see corresponding verbs at ABOLISH)

desultory casual, hit-or-miss, haphazard, *random, happy-go-lucky, chance, chancy

Ana *fitful, spasmodic: unsystematic, unmethodical, disorderly (see affirmative adjectives at ORDERLY): capricious, mercurial, *inconstant, fickle

Ant assiduous (*study, search, or other activity*): methodical (*something designed, planned, constructed*)

detach, **disengage**, **abstract** mean to remove one thing from another with which it is in union or association. One **detaches** something when one breaks a literal or figurative connection, tie, or bond and thereby isolates it or makes it independent (<*detach* sheets from a loose-leaf book) > (<*detach* a ship from a fleet) > (<*detach* oneself from one's prejudices) > (<the mature critic whose loyalties quietly *detached* themselves from the gods of his generation—*Parrington*) > One **disengages** something that is held by or involved with something else and thereby sets it free (<she *disengaged* her hand) > (<it is hard for the mind to *disengage* itself from depressing thoughts) > (<I could not rest satisfied until I . . . had *disengaged* . . . his good work from the inferior work joined with it—*Arnold*) > One **abstracts** something by withdrawing it from the place where it belongs or by separating it from a mass of like things so as to put it in another place or another relation (<a vast cigar-shaped body of gas was raised and eventually *abstracted* from the surface of the sun—*Swinton*) > (<*abstract* papers from a file) > (*Abstract* may imply furtiveness and theft (<*abstract* eggs from a nest) > (<*abstract* money from a till) > It may imply an intention of shortening (<*abstract* the essential points from an argument) > or of concentrating elsewhere (<*abstract* one's attention from one's surroundings) > (see also ABSTRACT *adj*)

Ana *separate, part, sever, sunder, divorce: disjoin, disconnect, disunite (see affirmative verbs at JOIN)

Ant attach, affix —*Con* *fasten, fix: *tie, bind: *unite, combine, conjoin

detached aloof, uninterested, disinterested, *indifferent, unconcerned, incurious

Ana impartial, dispassionate, objective, unbiased, *fair: altruistic (see CHARITABLE)

Ant interested: selfish —*Con* *mercenary: concerned (see under CARE)

detail *n* 1 *item, particular

Con *structure, framework, anatomy, skeleton: whole, aggregate, total, *sum: mass, *bulk: design, scheme, *plan, plot

2 *part, portion, piece, parcel, member, division, segment, sector, fraction, fragment

detailed itemized, particularized, *circumstantial, minute, particular

Ana *full, complete, replete: copious, abundant (see PLENTIFUL): exhausting or exhaustive (see corresponding verb at DEplete)

detail 1 *arrest, apprehend, attach

Ana *catch, capture: seize, *take: *imprison, incarcerate, intern, jail

2 withhold, hold, hold back, keep back, keep out, retain, reserve, *keep

3 *delay, retard, slow, slacken

Ana *curb, check, *restrain, inhibit: *arrest, interrupt: *defer, suspend, stay

Con *advance, promote, forward, further: *speed, hasten, hurry

detention arrest, apprehension, attachment (see under ARREST *vb*)

Ana imprisonment, internment, incarceration (see corresponding verbs at IMPRISON)

deter *dissuade, discourage, divert

Ana *prevent (sense 2): *hinder, impede, obstruct, block: debar, shut out (see EXCLUDE): *frighten, scare: *restrain, inhibit

Ant abet: actuate, motivate —*Con* *incite, instigate: stimulate, excite, *provoke

deterioration, degeneration, devolution, decadence, decline, declension are comparable as meaning either the process of falling from a higher to a lower level or the state of a thing when such a falling has occurred. **Deterioration** is the least specific of these terms and applies to any process or condition in which there are signs of impairment in quality, in character, or in value (chemicals that reduce the *deterioration* of rubber in aging) (the *deterioration* of his memory is marked in recent years) (man the toolmaker has made "inanimate instruments". . . do his manual work for him; he is now trying to make them do his mental work . . . The price may be the progressive *deterioration* of our faculties—*Inge*) (to promise that warfare will be nuclear . . . is to assure the further *deterioration* of our position throughout Asia—*Straight*) **Degeneration** usually implies retrogression and a return to a simpler or more primitive state or condition; when used in reference to plants, animals, or their parts, it usually suggests changes in physical structure, but it may imply a progressive deterioration in structure and function resulting from disease (the sea squirt in its adult stage evidences *degeneration* through the loss of the vertebrate characters apparent in its larval stage) (fatty *degeneration* of the heart) When applied to persons in groups or as individuals or to states or empires, it suggests physical, intellectual, and often moral degradation and a reversion toward barbarism or, in the case of individuals, bestiality (the *degeneration* of the American Indians confined to reservations) (the *degeneration* of the ancient Roman Empire) (of all the dangers that confront a nation at war, this *degeneration* of national purpose . . . is the greatest—*New Republic*) **Devolution** in technical use may take the place of *degeneration* (the *devolution* of the sea squirt) but in general use it carries even a stronger implication of opposition to *evolution* (the process of human evolution is nothing more than a process of sifting, and where that sifting ceases evolution ceases, becomes, indeed, *devolution*—*Ellis*) **Decadence** presupposes a previous maturing and usually a high degree of excellence; it implies that the falling takes place after a thing (as a people, a literature or other form of art, or

a branch of knowledge) has reached the peak of its development (there seems to be no more pronounced mark of the *decadence* of a people and its literature than a servile and rigid subserviency to rule—*Ellis*) (a sharply falling rate of population growth, an abnormally high death rate, extensive illness and the like, are an indication of social *decadence* and ample cause for alarm on the part of political leaders—*Roucek*) In reference to matters of art *decadence* may imply no more than excessive refinement and studied attention to esthetic detail (at the turn of the century we all thought we knew what *decadence* meant—overripeness, overcivilization, a preoccupation with refined sensations . . . the essence of *decadence* is an excessive subjectivism—*Times Lit. Sup.*) (Van Vechten produced a kind of mock *decadence* unique in American literature. His novels are hyperaesthetic, perverse, and often devoted to esoteric or archaic lore—*Lueders*) **Decline** is often interchangeable with *decadence* because it, too, suggests a falling after the peak has been reached in power, prosperity, excellence, or achievement, but it usually suggests more momentum, more obvious evidences of deterioration, and less hope of a return to the earlier state (the rise and *decline* of the imperial power) (he is in the *decline* of life) (the association so often noted between the flowering of the intellect and the *decline* of national vigor—*Krutch*) **Declension** differs from *decline* only in connoting less precipitancy or a slower or more gradual falling toward extinction or destruction (seems to mark a *declension* in his career as an illustrator—*Mather*) (the moral change, the sad *declension* from the ancient proud spirit . . . was painfully depressing —*Bennett*)

Ana impairment, spoiling (see corresponding verbs at INJURE): decaying or decay, decomposition, disintegration, rotting, crumbling (see corresponding verbs at DECAY): debasement, degradation (see corresponding verbs at ABASE)

Ant improvement, amelioration

determinant antecedent, *cause, reason, occasion

Ana factor (see ELEMENT): *influence, weight, authority

determinative *conclusive, decisive, definitive

Ana determining, deciding, settling (see DECIDE): influencing, affecting (see AFFECT): shaping, fashioning, forming or formative (see corresponding verbs at MAKE)

Con *ineffective, ineffectual, inefficacious, inefficient

determine 1 settle, rule, *decide, resolve

Ana fix, *set, establish: dispose, predispose, *incline, bias: drive, impel, *move, actuate: *induce, persuade

2 ascertain, *discover, unearth, learn

detest *hate, abhor, abominate, loathe

Ana *despise, contemn, scorn, disdain: spurn, repudiate, reject (see DECLINE *vb*)

Ant adore (sense 2) —*Con* love, *like, dote, fancy, relish: cherish, prize, treasure, value, *appreciate

detestable odious, *hateful, abominable, abhorrent

Ana *contemptible, despicable, sorry, scurvy: atrocious, *outrageous, monstrous, heinous: *execrable, damnable, accursed

detestation hate, hatred, abomination, abhorrence, loathing (see under HATE *vb*)

Ana *antipathy, aversion: despise, contempt, scorn, disdain (see under DESPISE)

Con admiration, esteem, respect, *regard: love, affection, *attachment: tolerance, indulgence, forbearance (see under FORBEARING)

detract belittle, minimize, disparage, derogate, *decry, depreciate

Ana asperse, *malign, traduce, defame, vilify, calumni-

ate, slander, libel: reduce, lessen, diminish, *decrease
Con enhance, heighten, *intensify: magnify, aggrandize, *exalt

detraction, backbiting, calumny, slander, scandal are comparable when they denote either the offense of one who defames another or casts aspersions upon him or what is uttered by way of defamation or aspersion. **Detraction** stresses the injurious effect of what is said and the loss through it of something (as the esteem of others or his credit, his deserts, or even his good name) precious to the person affected <bring candid eyes unto the perusal of men's works, and let not . . . *detract*ion blast well-intended labors—*Browne*> <to listen to *detract*ion is as much an act of *detract*ion as to speak it—*Manning*> **Backbiting** imputes both furtiveness and spitefulness to the one who asperses or defames; it suggests an unfair, mean, and cowardly attack when the victim is absent and unable to defend himself <refrain your tongue from *backbiting*: for there is no word so secret, that shall go for nought—*Wisdom of Solomon* 1:11> <jealousy and intrigue and *backbiting*, producing a poisonous atmosphere—*Russell*> **Calumny** stresses malicious misrepresentation; it therefore implies that the detractor is a liar and that his intent is to blacken another's name <be thou as chaste as ice, as pure as snow, thou shalt not escape *calumny*—*Shak.*> <*calumny* differs from most other injuries in this dreadful circumstance: he who commits it can never repair it—*Johnson*> <to persevere in one's duty and be silent is the best answer to *calumny*—*Washington*> **Slander** (for legal use, see MALIGN) stresses the dissemination of calumnies, especially those of a highly defamatory character; thus, a person who is given to *calumny* is prone to malicious misrepresentation of the acts, the motives, or the character of others; a person who is given to *slander* is prone to repeat calumnies or defamatory reports without ascertaining or with complete indifference to their truth or falsehood <who spake no *slander*, no, nor listened to it—*Tennyson*> <this charge cannot be excused as a reckless *slander*. It was a deliberate falsehood, a lie—*New Republic*> **Scandal** (see also OFFENSE, DISGRACE) usually suggests the activity of a gossip, especially of an idle, irresponsible gossip (a scandalmonger), who spreads abroad shocking details, whether true or untrue, that reflect discredit on another or that tend to tarnish or blacken his reputation <it is difficult for a man to remain long in public life untouched by *scandal*> <her tea she sweetens, as she sips, with *scandal*—*Rogers*> <the reappearance of the priest upon the scene cut short further *scandal*—*Cather*>

Ana *injury, damage, harm, hurt: *injustice, injury, wrong: defaming or defamation, aspersion, maligning, traducing, slandering or slander, calumny, vilification, libeling or libel (see corresponding verbs at MALIGN)

detriment *disadvantage, handicap, drawback

Ana damage, *injury, harm, hurt: impairment, spoiling, marring (see corresponding verbs at INJURE)

Ant advantage, benefit

detrimental deleterious, noxious, *pernicious, baneful
Ana harming or harmful, hurting or hurtful, injuring or injurious, damaging, impairing (see corresponding verbs at INJURE)

Ant beneficial —**Con** advantageous, profitable (see BENEFICIAL): helping or helpful, aiding (see corresponding verbs at HELP)

devastate waste, *ravage, sack, pillage, despoil, spoliolate
Ana *destroy, demolish, raze: *ruin, wreck: plunder, loot, *rob, rifle

devastation *ruin, havoc, destruction

Ana demolition, razing (see corresponding verbs at DESTROY): ravaging, sacking, pillaging, despoliation (see corresponding verbs at RAVAGE)

develop 1 *unfold, evolve, elaborate, perfect

Ana actualize, *realize, materialize: attain, achieve, compass, *reach

2 *mature, ripen, age

Ana *advance, progress: *expand, dilate

Con *wither, shrivel, wizen

development, evolution are comparable when they mean growth from a lower to a higher state. **Development** stresses the bringing out of the hidden or latent possibilities in a thing whether through growth and differentiation and therefore through a series of natural stages <*development* of a seed into a plant> <*development* of a human being from the embryo> or through the exercise of human energy, ingenuity, or art <the *development* of an industry> <*development* of a tract of land> <*development* of an argument> **Evolution**, on the other hand, stresses an orderly succession of events or of living things, each growing out of the preceding yet marked by changes which transform it and give it a particular identity and usually a more elaborate or more advanced character <the *evolution* of species> <the *evolution* of the drama> *Development* is appropriately used when the emphasis is on the realization of the full possibilities of a particular thing through natural or artificial means, and *evolution* when the stress is on transformations which occur in a type, class, or order of things, the individual instances of which retain a likeness to the parent but manifest differences especially in the direction of complexity and progress <the Aristotelian canon that the "nature" of a thing must be sought in its completed *development*, its final form—*Inge*> <no, "revolution" is not the proper word! What is happening in modern physics is a tremendously rapid *evolution*—*Darrow*>

Con decline, declension, decadence, devolution, *deterioration, degeneration

deviate digress, diverge, *swerve, veer, depart

Ana deflect, *turn, divert, avert, sheer: stray, *wander, rove

deviation, aberration, divergence, deflection denote departure or an instance of departure from a straight course or procedure or from a norm or standard. **Deviation**, the term of widest application, usually requires qualification or a context to complete its meaning <no *deviation* from traditional methods was permitted> <there were many *deviations* from fact in his account> <the road proceeds without any *deviation* for two miles> **Aberration** adds to *deviation* definite implications of error, fault, or abnormality and therefore has highly technical significations in some of the sciences. In general use it commonly implies transgression of the moral law or the social code and is often used euphemistically for a reprehensible act or reprehensible behavior <the *aberrations* of his youth had long been forgotten> **Divergence** is sometimes used interchangeably with *deviation*, but ordinarily it denotes deviation point proceed in different directions <an angle is formed by the *divergence* of two lines> <at no point in the discussion was there *divergence* of opinion on this question> **Deflection** adds to *deviation* the implication of bending or curving <*deflection* of rays of light passing through a prism>

device 1 **Device, contrivance, gadget, contraption** mean something usually of a mechanical character which is invented as a means of doing a particular piece of work or of effecting a given end. **Device** is the most widely

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

applicable of these terms; it may be used of a thing that serves as a tool or instrument or as an effective part of a machine, especially one which shows some ingenuity in invention (a *device* for controlling the speed of a car) (he invented several handy household *devices* including one for whipping cream and one for hulling strawberries) It may be used also of an artifice or stratagem concocted as a means of accomplishing an end (her *device* for keeping the children quiet) (he will . . . entrap thee by some treacherous *device*—*Shak.*) or of a pattern or design that shows the play of fancy, especially of one that proves useful to the less inventive (first-person narrative is a common literary *device*) (that old stale and dull *device* [in painting] of a rustic bridge spanning a shallow stream—*Jefferies*) **Contrivance** stresses skill and dexterity in the adaptation of means and especially of the means at hand to an end; it sometimes carries a suggestion of crudity of or of contempt for the resulting device or system (a *contrivance* for frightening birds that were eating his corn) (all sorts of *contrivances* for saving more time and labor—*Shaw*) (he would look at none of the *contrivances* for his comfort—*Conrad*) **Gadget** is sometimes used of a device for which one does not know the name; more often it applies to a small and novel device and especially to an accessory or an appliance intended to add to a person's comfort, convenience, or pleasure (the garden tools and *gadgets* which make gardening so much more fun—*Van der Spuy*) (their new car has all the latest *gadgets*) **Contraption** is usually more depreciative than *contrivance* or *gadget* and often suggests a clumsy substitute rather than an ingenious invention (he has rigged up a *contraption* which he calls a radio) (her husband's little perch-in-the-sun . . . is a simple enough *contraption*—a wooden stump with the seat of an old kitchen chair nailed across the top of it—*Glover*) It also may denote something viewed with skepticism or mistrust primarily because new, unfamiliar, or untried (the *contraption* ran so well that the Detroit Common Council was forced to pass the city's first motor traffic regulation—*Amer. Guide Series: Mich.*) (a seventy-two-foot-long, eleven-ton finless rocket . . . In the nose of this *contraption*—*Daniel Lang*)

Ana instrument, tool, *implement, appliance, utensil; apparatus, *machine, mechanism; expedient, *resource, shift, makeshift, resort: invention, creation (see corresponding verbs at INVENT): artifice, ruse, *trick, gambit, ploy

2 *figure, design, motif, pattern

Ana *symbol, emblem, attribute, type

devilish diabolical, diabolic, *fiendish, demoniac, demonic
Ana *infernal, hellish: nefarious, iniquitous, villainous, *vicious

Ant angelic

devious *crooked, oblique

Ana deviating, diverging, digressing (see SWERVE): aberrant, *abnormal: tricky, crafty, artful, cunning, foxy, insidious, *sly

Ant straightforward —**Con** downright, *forthright

devise 1 *contrive, invent, frame, concoct

Ana create, discover (see INVENT): fashion, forge, fabricate, shape, form, *make: design, plan, scheme, plot (see under PLAN *n*)

2 *will, bequeath, leave, legate

devoid, **void**, **destitute** are comparable when they are followed by *of* and mean showing entire want or lack. **Devoid** stresses the absence or the nonpossession of a particular quality, character, or tendency (I was not *devoid* of capacity or application—*Gibbon*) (they will steal from you before your very face, so *devoid* are they

of all shame—*Hudson*) (a human being *devoid* of hope is the most terrible object in the world—*Heiser*) **Void** (see also EMPTY 1) usually implies freedom from the slightest trace, vestige, tinge, or taint of something (a man *void* of honor) (a conscience *void* of offence—*Acts* 24:16) (a drama which, with all its preoccupation with sex, is really *void* of sexual interest—*Shaw*) **Destitute** stresses deprivation or privation; it therefore is seldom used with reference to what is evil or undesirable (a domestic life *destitute* of any hallowing charm—*George Eliot*) (men of genius . . . wholly *destitute* of any proper sense of form—*J. R. Lowell*) (no woman . . . so totally *destitute* of the sentiment of religion—*J. R. Green*)

Ana barren, *bare: lacking, wanting (see LACK *vb*): *empty

devolution decadence, decline, declension, *deterioration, degeneration

Ana retrogressiveness or retrogression, regressiveness or regression (see corresponding adjectives at BACKWARD); receding or recession, retrograding or retrogradation (see corresponding verbs at RECEDE)

Ant evolution —**Con** *development: *progress, progression

devote 1 **Devote**, **dedicate**, **consecrate**, **hallow** mean to set apart something or less often someone for a particular use or end. **Devote** often implies a giving up or setting apart because of motives almost as impelling as those that demand a vow (devotes her full time to the care of the unfortunate) (the administrative work . . . deprived him of the time and energy which he longed to devote to historical research—*Callender*) (eloquence, erudition, and philosophy . . . were humbly devoted to the service of religion—*Gibbon*) (he cared too little for diplomacy to devote himself to it—*Commins*) **Dedicate** implies solemn and exclusive devotion and often a ceremonial setting apart for a serious and often a sacred use (dedicate a memorial) (I will dedicate all the actions of my life to that one end—*Belloc*) (I had devoted the labor of my whole life, and had dedicated my intellect . . . to the slow and elaborate toil of constructing one single work—*De Quincey*) **Consecrate** implies the giving of a sacred or exalted character (his effect was to consecrate the Prussian State and to enshrine bureaucratic absolutism—*Dewey*) especially by rites (as those by which a building is set apart for the service or worship of God or by which a bishop or king is elevated to his throne or by which ground is set apart as a burial place of the dead) (kings of England are consecrated in Westminster Abbey) (the right of burial in consecrated ground) In more general applications consecrate while not implying such rites does carry a stronger connotation of almost religious devotion than *dedicate* (a night of memories and of sighs I consecrate to thee—*Landor*) **Hallow** is a still stronger term, partly because of its use in the Lord's Prayer ("Our Father which art in heaven, hallowed be thy name") and partly because it often implies an ascription of intrinsic sanctity. Unlike the foregoing terms *hallow* is not normally used of oneself; thus, one may *devote* or *dedicate* or occasionally *consecrate* oneself to something (as a duty, a responsibility, or an interest), but one *hallows* something or more rarely someone (his marriage was hallowed and made permanent by the Church—*Barr*) (but in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground—*Lincoln*) *Hallow* may also be used to imply a mere respecting or making respectable (as by reason of age or custom) without suggesting a sacred character (you justify everything, hallow everything—*Elizabeth Taylor*)

<dirty yellow varnish no longer interposes here its *hal-
lowing* influence between the spectator and the artist's
original creation—*Fry*>

Ana *commit, consign, confide, entrust: assign, *allot:
*sentence, doom

2 apply, *direct, address

Ana endeavor, strive, struggle, try, *attempt

devoted *loving, affectionate, fond, doting

Ana *faithful, loyal, true, constant: attentive, considerate,
*thoughtful

devotee votary, *addict, habitué

Ana *enthusiast, zealot, fanatic

devotion loyalty, fealty, *fidelity, piety, allegiance

Ana fervor, ardor, zeal, enthusiasm, *passion: love, affec-
tion, *attachment: dedication, consecration (see correspond-
ing verbs at DEVOTE)

devour *eat, swallow, ingest, consume

Ana *waste, squander, dissipate: *destroy, demolish:
wreck, *ruin

devout, pious, religious, pietistic, sanctimonious apply
mainly to persons, their acts, and their words and mean
showing fervor and reverence in the practice of religion.

Devout stresses an attitude of mind or a feeling that leads
one to such fervor and reverence (<a *devout* man, and one
that feared God—*Acts* 10:2) <all those various "offices"
which, in Pontifical, Missal, and Breviary, *devout* imagina-
tion had elaborated from age to age—*Pater*> **Pious** empha-
sizes rather the faithful and dutiful performance of one's
religious obligations; although often used interchangeably
with *devout* it tends to suggest outward acts which imply
faithfulness and fervor rather than, as does *devout*, an
attitude or feeling which can only be inferred (<*pious*
churchmen) <happy, as a *pious* man is happy when after a
long illness, he goes once more to church—*Hichens*>
<were *pious* Christians, taking their Faith devoutly. But
such religious emotion as was theirs, was reflected rather
than spontaneous—*H. O. Taylor*> The term often, how-
ever, carries a hint of depreciation, sometimes of hypocri-
sery (<the saying that we are members one of another is not
a mere *pious* formula to be repeated in church without any
meaning—*Shaw*> <a hypocrite—a thing all *pious* words
and uncharitable deeds—*Reade*> **Religious** may and
usually does imply both devoutness and piety, but it
stresses faith in a God or gods and adherence to a way of
life believed in consonance with that faith (<a man may be
moral without being *religious*, but he cannot be *religious*
without being moral—*Myers*> <they are not *religious*:
they are only pew renters—*Shaw*> In its basic meaning

pietistic stresses the emotional rather than the intellectual
aspects of religion (<in the Catholic Church it [use of the
Bible] is threefold, doctrinal, liturgical, and *pietistic*—
New Catholic Dict.> <while probably a very late psalm,
it brings to a kind of spiritual climax the *pietistic* utterances
found in earlier parts of the Bible—*Baab*> <an emotional
person with *pietistic* inclinations that nearly carried him
over at different times to the Plymouth Brethren—*H. G.*
Wells> Often this opposition of the emotional to the intel-
lectual is overlooked and *pietistic* is used derogatorily
of someone or something felt to display overly sentimental
or unduly emotional piety (<Gibbon's analysis of the causes
of the growth of Christianity was very valuable, because
he redressed the balance against a heavy weight of *pietis-
tic* flapdoodle that passed for ecclesiastical history—
Trevelyan> **Sanctimonious** has entirely lost its original
implication of a holy or sacred character and implies a
mere pretension to or appearance of holiness or piety
<a *sanctimonious* hypocrite) <*sanctimonious* phrases>
Often it connotes a hypocritical aloofness or superiority
of manner (<if it only takes some of the *sanctimonious*

conceit out of one of those pious scalawags—*Frost*>
Ana fervent, fervid, ardent (see IMPASSIONED): worship-
ing, adoring, venerating (see REVERE)

dexterity facility, ease, *readiness

Ana dexterousness, adroitness, deftness (see correspond-
ing adjectives at DEXTEROUS): expertness, adeptness,
skillfulness, proficiency (see corresponding adjectives at
PROFICIENT)

Ant clumsiness —**Con** awkwardness, ineptness or inepti-
tude, maladroitness (see corresponding adjectives at
AWKWARD)

dexterous, adroit, deft, handy mean having or showing
readiness and skill in the use of one's hands, limbs, or body
and may also imply physical or mental readiness or skill.

Dexterous implies expertness with consequent facility and
agility in manipulation or movement (<seized one corner
of the blanket, and with a *dexterous* twist and throw un-
rolled it—*C. G. D. Roberts*> <one of the most *dexterous*
novelists now writing, with an enviable command of styles
—*Bellow*> **Adroit** is only occasionally used with refer-
ence to physical skill. It more commonly implies resourceful-
ness or artfulness and ability to cope effectively or
cleverly with situations; thus, an *adroit* fencer or an
adroit magician is, by implication, not only *dexterous* in
his manipulations but able to cope quickly and without
bungling with every situation that arises (<a daring but
consummately *adroit* transference of conventions—
Lowes> **Deft** stresses lightness, neatness, and sureness
of touch or handling (<a *deft* watch repairer) <*deft* in every
cunning, save the dealings of the sword—*Morris*> <waltzed
off with the prettiest girl, sliding, swinging, *deft*—*Sinclair*
Lewis> **Handy** usually implies lack of formal or pro-
fessional training but a degree of skill in doing small jobs
(as of carpentry, plumbing, or repairing) (<some men are
what is known as "handy around the house." They can,
if need be, fix a dripping faucet, plane off a door that
sticks, put up a hook in the back hall—*Rorick*> It is
sometimes applied to a jack-of-all-trades.

Ana nimble, *agile: skilled, skillful, expert, masterly,
adept, *proficient: *easy, effortless, smooth, facile

Ant clumsy —**Con** *awkward, maladroitness, inept, gauche

diabolical, diabolic devilish, *fiendish, demoniac, de-
monic

Ana & **Ant** see those at DEVILISH

diagnosis, prognosis should perhaps be called near syn-
onyms; but they can be confused because both are em-
ployed in a specific medical sense with clear, sharp
implications that are often carried over into their general
and extended use. **Diagnosis** applies to the act or art of
recognizing or of identifying a disease or diseased condi-
tion by analysis of such factors as the history of the case,
its subjective symptoms, and its objective signs as re-
vealed by observation or by special laboratory tests (as
a count of the blood cells or an X-ray examination) (<if
a physician is not confident of his own *diagnosis*, he should
call in another who has had much experience in similar
cases) (<operates an experimental auto *diagnosis* and
repair center—*Wall Street Jour.*> <heat-flow measure-
ments in the earth can aid in our *diagnosis* of the earth's
condition—*Benfield*> <if he cannot find the cure at least
he can help in the *diagnosis* of our social ills—*Firth*>

Prognosis applies to the act or art of foretelling the course
and the termination of a disease; the term usually implies
a correct diagnosis and knowledge of how the disease will
affect the patient as it runs its course and of how it will
end (<the physician was so confident of his patient's powers
of resistance that he could give a favorable *prognosis*
in the case) <a *prognosis* is based on observation and
analysis, and consists of the application to particular in-

stances of generalizations about the actual and hypothetical connections between facts and events—*Streeten* <in my opinion the book *Breve New World* is no longer a *prognosis*, but a *diagnosis*—*Peerman*>

diagram *n* outline, draft, tracing, sketch, delineation, plot, blueprint (see under **SKETCH** *vb*)

Ana design, *plan, plot, scheme

diagram *vb* outline, plot, blueprint, draft, trace, *sketch, delineate

Ana design, plan, plot, scheme (see under **PLAN** *n*)

dialect *n* 1 **Dialect**, vernacular, patois, lingo, jargon, cant, argot, slang denote a form of language or a style of speech which varies from that accepted as the literary standard. **Dialect** (see also **LANGUAGE** 1) is applied ordinarily to a form of a language that is confined to a locality or to a group, that differs from the standard form of the same language in peculiarities of vocabulary, pronunciation, usage, and morphology, and that persists for generations or even centuries. It may represent an independent development from the same origin as the standard form (as the Sussex *dialect*) or a survival (as the *dialect* of the Kentucky mountaineers). It is sometimes applied to any form of language differing from the standard (a Babylonish *dialect* which learned pedants much affect—*Butler* d. 1680) **Vernacular** (usually *the vernacular*) has several applications, though it always denotes the form of language spoken by the people in contrast with that employed by learned or literary men. In the Middle Ages when the language of the church, of the universities, and of learned writings was Latin, the *vernacular* was the native language of the people whatever it might be in the locality in question (translate the Bible into the *vernacular*) (the first Christian missionaries from Rome did not teach their converts to pray and give praise in the *vernacular*—*Quiller-Couch*) When a contrast with the literary language rather than with Latin is implied, *the vernacular* is an underogatory designation for the spoken language, the language that represents the speech of the people as a whole, that is colloquial but not inherently vulgar, and that is marked chiefly by the spontaneous choice of familiar, often native as opposed to exotic words and phrases (Pope . . . is absolute master of the raciest, most familiar, most cogent and telling elements of the *vernacular*—*Lowes*) *Vernacular* often implies a contrast with scientific nomenclature (taxonomic and *vernacular* names for flowers) **Patois** is often used as if it were the equivalent of *dialect*. It tends, however, to be restricted especially in North America to designating a form of speech used by the uneducated people in a bilingual section or country; the word often specifically refers to the hybrid language (of mingled English and Canadian French) spoken in some parts of Canada. **Lingo** is a term of contempt applied to any language that is not easily or readily understood. It is applicable to a strange foreign language, a dialect, or a patois or to the peculiar speech of a class, cult, or group (I have often warned you not to talk the court gibberish to me. I tell you, I don't understand the *lingo*—*Fielding*) **Jargon**, which may be applied to an unintelligible or meaningless speech (as in a foreign tongue or a patois), is used chiefly in reference to the technical or esoteric language of a subject, a class, a profession, or a cult and usually expresses the point of view of one unfamiliar with it and confused or baffled by it (cockets, and dockets, and drawbacks, and other *jargon* words of the customhouse—*Swift*) (Whitman . . . has a somewhat vulgar inclination for technical talk and the *jargon* of philosophy—*Stevenson*) **Cant**, related to *chant*, seems to have been applied first to the whining speech of beggars. It has been applied more or less specifically to several different forms of language (as the secret language of gypsies

and thieves, the technical language of a trade or profession, and the peculiar phraseology of a religious sect or of its preachers). From the last of these applications a new sense has been developed (see **HYPOCRISY**). When referring to the peculiar language of a subject or profession *cant* usually suggests the hackneyed use of set words or phrases, often in a specialized sense, and, unlike *jargon*, does not usually imply unintelligibility; thus, the language of sportswriters is a *cant* rather than a *jargon*; the scientific nomenclature used by physicians in official reports may be called medical *jargon* rather than *cant* by those who do not understand it; a person who repeatedly calls an investigation a "probe," a large book a "tome," a preacher a "parson," or his wife "my better half" may be said to be given to *cant*. **Argot** is applicable chiefly to the cant of the underworld; it is now sometimes used of any form of peculiar language adopted by a clique, a set, or other closely knit group. **Slang** does not as often denote a form of language or a type of speech as it does a class of recently coined words or phrases or the type of word which belongs to that class (in the *slang* of college students a drudge is a "grind") (the characteristic differences between American *slang* and British *slang*) *Slang* implies comparatively recent invention, the appeal of the words or phrases to popular fancy because of their aptness, picturesqueness, grotesqueness, or humor-ousness, and usually an ephemeral character.

2 *language, tongue, speech, idiom

dialectic *argumentation, disputation, debate, forensic

diaphanous limpid, pellucid, transparent, translucent, *clear, lucid

diatribe *n* *tirade, jeremiad, philippic

Ana invective, vituperation, obloquy, *abuse

dictate *vb* **Dictate**, prescribe, ordain, decree, impose mean to lay down expressly something to be followed, observed, obeyed, or accepted. **Dictate** implies an authoritative direction by or as if by the spoken word which serves in governing or guiding one's course of action (they *dictated* the conditions of peace—*Gibbon*) (a man and woman who love each other and their children ought to be able to act spontaneously as the heart *dictates*—*Russell*) (all the other papers had traditions; their past principles *dictated* their future policy—*Rose Macaulay*) **Prescribe** (see also **PRESCRIBE**) implies a formulated rule, law, or order; it suggests an authoritative pronouncement which is clear, definite, and cannot be gainsaid (my teachers should have *prescribed* to me, 1st, sincerity; 2d, sincerity; 3d, sincerity—*Thoreau*) (establishments maintained by general taxation and filled with children whose presence is *prescribed* by law—*Grandgent*) **Ordain** implies institution, establishment, or enactment by a supreme or unquestioned authority or power; usually it suggests an inalterable settlement of a problem or question (we still accept, in theory at all events, the Mosaic conception of morality as a code of rigid and inflexible rules, arbitrarily *ordained*, and to be blindly obeyed—*Ellis*) (a blessed custom of my infancy *ordained* that every living room should be dominated by a good-sized center table—*Replier*) (nature inexorably *ordains* that the human race shall perish of famine if it stops working—*Shaw*) **Decree** implies a decision made and formally pronounced by absolute authority or by a power whose edicts are received with the same attention. It is used particularly of ecclesiastical, civil, or judicial power, whether absolute or limited in its scope, or more broadly of anything whose authoritative pronouncements are blindly obeyed (the king *decreed* that all foreigners should be excluded from the state) (fashion *decrees* that skirts be shorter and jackets somewhat longer than last year) (if statues were *decreed* in Britain, as in ancient Greece and Rome, to public benefactors—*Dickens*) (the

old man was used to the order of his monastery, and though he slept on the ground, as the Rule *decrees*, preferred a decency in these things—*Kipling*) **Impose** implies a subjecting to what must be borne, endured, or submitted to. It may suggest infliction by a paramount authority (each time I attempted to speak he *imposed* silence—*Hudson*) (the ever more stringent regulations we found it necessary to *impose*—*Heiser*) More often it suggests limitations intended to make for order, beauty, or efficiency (patience and industry . . . could only be secured . . . by the enforcement of good habits *imposed* by external authority—*Russell*) (when the language, the stresses, the very structure of the sentences are *imposed* upon the writer by the special mood of the piece—*Cather*)

Ana direct, control, manage (see CONDUCT): *guide, lead: *govern, rule: tell, utter, *say

dictate *n* behest, bidding, injunction, *command, order, mandate

Ana *law, rule, precept, canon, ordinance, statute, regulation

dictatorial, **magisterial**, **authoritarian**, **dogmatic**, **doctrinaire**, **oracular** are comparable in the sense of imposing or having the manner or disposition of one who imposes his will or his opinions upon others. **Dictatorial** implies the powers of a dictator, but it has acquired so strong an implication of the assumption of such power that it often stresses autocratic or high-handed methods and a domineering, overbearing temper (a captain who has been entrusted with *dictatorial* power—*Macaulay*) (he is . . . very learned, very *dictatorial*, very knock-me-down—*Mitford*) **Magisterial** derives its chief implications from its reference to a magistrate or, more often, to a schoolmaster. It seldom implies an assumption of power, high-handedness, or a bad temper but does suggest excessive use or display of the powers or prerogatives associated with the offices of a magistrate or schoolmaster (as in controlling and disciplining or in enforcing the acceptance of one's opinions) (we are not *magisterial* in opinions, nor . . . obtrude our notions on any man—*Browne*) **Magisterial** is applied also to opinions or ideas which are so deeply impressed on the mind, especially the popular mind, that they cannot easily be eradicated (the "possible," as something less than the actual and more than the wholly unreal, is another of these *magisterial* notions of common sense—*James*) **Authoritarian** is used chiefly in reference to states or governments (for this use see TOTALITARIAN), to churches, to bodies, persons, or their policies or attitudes. It implies assumption of one's own (or another's) power to exact obedience or of the right to determine what others should believe or do; often it suggests an opposition to *liberal* or *libertarian* and sometimes to *anarchic* or *anarchistic* (authoritarian system of education) (the *authoritarian* type of mind) (the decline of *authoritarian* control and the rapid changes in our ways of living have made changes in our education imperative—*Christian Century*) (in an *authoritarian* regime, on the other hand, it is usual to impose stringent tests of partisanship—*Robson*) **Dogmatic** implies the attitude of an authoritative or authoritarian teacher or preacher and the laying down of principles or dogmas as true and beyond dispute (art is never *dogmatic*: holds no brief for itself—you may take it or you may leave it—*Galsworthy*) (now physics is, or should be, *undogmatic*; mathematics is, and must be, *dogmatic*. No mathematician is infallible; he may make mistakes; but he must not hedge. Even in this age which dislikes dogma, there is no demand for an *undogmatic* edition of Euclid—*Eddington*) **Dogmatic** may imply depreciatively an assertive and sometimes an arrogant attitude that discourages if it does not inhibit debate (Mr. Raycie made no pretence to book-

learning. . . . But on matters of art he was *dogmatic* and explicit, prepared to justify his opinions—*Wharton*) **Doctrinaire** usually implies a dogmatic disposition; it typically suggests an opposition to *practical*, for it emphasizes a disposition to be guided by one's theories or the doctrines of one's school of thought in teaching, in framing laws, or in policies or decisions, especially those affecting others (the rationalist mind . . . is of a *doctrinaire* and authoritative complexion: the phrase "must be" is ever on its lips—*James*) (the most profound contribution to political thought in America, namely, the *Federalist*, was not the work of *doctrinaire* thinkers but of men of affairs—*Frankfurter*) **Oracular**, with its implied reference to an ancient oracle, suggests the possession of hidden knowledge and the manner of one who delivers his opinions or views in cryptic phrases or with pompous dogmatism (his habit of *oracular* utterance when and possibly whenever he had a conviction—*Pound*)

Ana *masterful, domineering, imperatival, imperious, peremptory: despotic, tyrannical, arbitrary, autocratic, *absolute

diction *language, vocabulary, phraseology, phrasing, style

Ana speech, tongue, idiom, *language: enunciation, pronunciation, articulation (see corresponding verbs at ARTICULATE)

dido *prank, caper, antic, monkeyshine

differ, **vary**, **disagree**, **dissent** mean to be unlike or out of harmony. **Differ** stresses the fact of unlikeness in kind or nature or in opinion but does not indicate except through the context the extent or degree of divergence (the houses in the row *differ* only in small details) (minds *differ*, as rivers *differ*—*Macaulay*) (they *differed* sharply about the college to which their son should be sent) **Vary** (see also CHANGE) though often interchangeable with *differ* may call attention to readily apparent differences and sometimes suggests a range of differences. The term commonly introduces a statement of the points, the ways, or the degree in which the things or the persons under discussion differ (the two editions *vary* only in small particulars) (the northern and southern races *vary* chiefly in size) (the strength and direction of sea currents *vary* considerably at different times of the year—*Dowdeswell*) **Disagree** emphasizes lack of agreement and not only may imply differences between things or variance between persons or opinions, but often may suggest incompatibility, unfitness, or disharmony (the two accounts *disagree* in important details) (the verb should not *disagree* with the subject noun either in person or number) (who shall decide when Doctors *disagree*?—*Pope*) (one can *disagree* with his views, but one can't refute them—*Henry Miller*) Of the words here compared only *disagree* is used in reference to lack of harmony between a thing and a person that results in mental or physical disorder of the latter (the climate *disagreed* with him) (fried foods *disagree* with many people) **Dissent** denotes a difference in opinion between persons or groups; it may imply refusal to assent to or the withholding of consent from something that is proposed or offered (dissenting to the most outrageous invasion of private right ever set forth as a decision of the court—*Boyd*) (it has . . . taken on the worst intolerance of ignorance and stupidity All who *dissent* from its orthodox doctrines are scoundrels—*Mencken*) or it may imply the expression of a difference in opinion from a person or persons holding an opposite view (a great number of people in England would *dissent* from that judgment—*C. L. R. James*)

Ana diverge, deviate, depart (see SWERVE)

Ant agree

difference 1 unlikeness, *dissimilarity, divergence, divergency, distinction

Ana discrepancy, inconsistency, inconsonance, discordance (see corresponding adjectives at INCONSONANT); variation, modification (see under CHANGE *vb*): disparity, diversity (see corresponding adjectives at DIFFERENT) *Ant* resemblance —*Con* similarity, *likeness, similitude, analogy, affinity

2 *discord, strife, conflict, contention, dissension, variance

different, **diverse**, **divergent**, **disparate**, **various** are comparable when they are used to qualify plural nouns and mean not identical or alike in kind or character. **Different** often implies little more than distinctness or separateness (four *different* persons told me the same story) Sometimes, however, it implies contrast or contrariness (they approached the subject from *different* points of view) (vastly *different* in size than it was twenty-five years ago—*N. M. Pusey*) **Diverse** is stronger and implies marked difference and decided contrast (I obtained from three cultivated Englishmen at different times three *diverse* pronunciations of a single word—*J. R. Lowell*) (a curious fusion of *diverse* elements—*Van Vechten*) **Divergent** implies movement apart or along different courses and usually connotes the impossibility of an ultimate meeting, combination, or reconciliation (they took *divergent* paths) (he was bothered very much by *divergent* strands in his own intellectual composition—*H. G. Wells*) (he recognized that labor and capital have *divergent* interests—*Cohen*) **Disparate** implies absolute or essential difference, often as between incongruous or incompatible elements (two *divergent*, yet not wholly *disparate* emotions—*Myers*) (for if men are so *diverse*, not less *disparate* are the many men who keep discordant company within each one of us—*Pater*) **Variou**s (see also **MANY**) commonly lays stress on the number of sorts or kinds (in *various* shapes of parsons, critics, beaux—*Pope*) (an exuberant energy which displayed itself in *various* fields—*Ellis*) *Ana* *distinct, separate, several: *single, particular: various, sundry, divers (see **MANY**)

Ant identical, alike, same —*Con* similar, *like, uniform, akin, analogous, comparable

differentiate *distinguish, discriminate, demarcate

Ana *separate, divide, part: *detach, disengage

Ant confuse —*Con* confound, *mistake

difficult *hard, arduous

Ana perplexing, puzzling, mystifying (see **PUZZLE**): intricate, involved, complicated, *complex, knotty: *obscure, enigmatic, cryptic: exacting, *onerous, burdensome *Ant* simple —*Con* *easy, facile, light, effortless, smooth: *clear, perspicuous, lucid

difficulty, **hardship**, **rigor**, **vicissitude** are synonyms only when they mean something which demands effort and endurance if it is to be overcome or one's end achieved. **Difficulty**, the most widely applicable of these terms, applies to any condition, situation, experience, or task which presents a problem extremely hard to solve or which is seemingly beyond one's ability to suffer or surmount; it does not imply insolubility or insurmountability or even intolerableness, but it does suggest the need of skill and perseverance or patience (the wise gods have put *difficulty* between man and everything that is worth having—*J. R. Lowell*) (ten thousand *difficulties* do not make one doubt, as I understand the subject; *difficulty* and doubt are incommensurate—*Newman*) (the simplest way out of the *difficulty* was to do nothing and dismiss the matter as no concern of theirs—*Conrad*) **Hardship** stresses suffering, toil, or privation that is almost beyond endurance or is extremely hard to bear; it does not necessarily imply any effort to overcome or any patience in enduring (men to

much misery and *hardship* born—*Milton*) (the *hardships* of life in a slum area) However, it is so frequently applied to the suffering, toil, and privation encountered in an attempt to accomplish an end that it often comes very close to *difficulty* in its implications (the search for truth . . . makes men and women content to undergo *hardships* and to brave perils—*Eliot*) (they had practically overcome the worst *hardships* that primitive man had to fear—*Cather*) **Rigor** usually applies to a hardship that is imposed upon one, sometimes by oneself (as through asceticism or ambition) but more often by an austere religion, a tyrannical government or other power, a trying climate, or an extremely exacting enterprise or undertaking (to undergo much pain, many hardships, and other *rigors*—*Burnet*) (the *rigors* of an explorer's life) (a vast deal of sympathy has been lavished upon the Puritan settlers because of the *rigors* of their religion—*Replier*) (a European custom which nowhere survived the *rigors* of the frontier—*W. P. Webb*) (the *rigors* of an arctic winter) **Vicissitude** (see also CHANGE *n* 2) applies to a difficulty or hardship incident to a way of life especially as it is subjected to extraneous influences, to a career, or to a course of action; it usually suggests reference to something that demands effort and endurance if it is to be overcome (the fierce *vicissitudes* of deadly combat—*Lecky*) (it is the work he performed during these years, often in illness, danger, and *vicissitudes*, that should earn him particular gratitude from his Church—*T. S. Eliot*) (the dwarfing *vicissitudes* of poverty—*Hackett*)

Ana *obstacle, impediment, snag, obstruction: *predicament, dilemma, quandary, plight, scrape, fix, jam, pickle: pinch, strait, emergency, exigency, pass (see **JUNCTURE**)

diffident modest, bashful, *shy, coy

Ana shrinking, flinching, blenching (see **RECOIL**): hesitant, reluctant (see **DISINCLINED**): timorous, *timid

Ant confident —*Con* assured, sure, sanguine, presumptuous (see **CONFIDENT**): self-confident, self-assured, self-possessed (see corresponding nouns at **CONFIDENCE**): brazen, impudent, *shameless

diffuse *adj* prolix, redundant, verbose, *wordy

Ana *profuse, lavish, exuberant: desultory, casual, *random: copious (see **PLENTIFUL**): *loose, relaxed, slack, lax *Ant* succinct —*Con* *concise, terse, laconic, pithy, summary: compact, *close

diffuse *vb* *spread, circulate, disseminate, propagate, radiate

Ana disperse, dissipate (see **SCATTER**): *extend: *expand *Ant* concentrate —*Con* *compact, consolidate: focus, *center, centralize

dig *vb* **Dig**, **delve**, **spade**, **grub**, **excavate** mean to use a spade or similar utensil in breaking up the ground to a point below the surface and in turning or removing the earth or bringing to the surface of something below it. **Dig**, the commonest word, implies a loosening of the earth around or under something so as to bring it to the surface, or a disturbing of the earth by such loosening (*dig* in the ruins of Pompeii) (*dig* for gold) (*dig* potatoes) **Dig** may imply also a result comparable to that obtained by spading (the woodchuck *dug* a burrow in the field) or a bringing to the surface or out of concealment (*dig* up a man's past) or prolonged laborious effort as in study or research (Laurie *dug* to some purpose that year, for he graduated with honor—*Alcott*) **Delve** implies the use of a spade or more often of efforts comparable to the use of a spade and carries a stronger connotation of laboriousness and depth of penetration (as in the work of a gardener or of one who cultivates an interest) (eleven, twelve, dig and *delve*—*Old Nursery Rhyme*) (a smug and spectacled best scholar, spending . . . time *delving* among the chronicles . . . in

the reading room of the British Museum—*Rose Macaulay*) **Spade** is often interchangeable with *dig* but even more frequently than the latter is applied to a turning of the earth in manual (as opposed to mechanical) preparation of soil for planting (<*spade* up a garden) (<she had *spaded* a pit in the backyard for barbecues—*Joseph Mitchell*) (<has spent her writing career (28 years, eleven books) *spading* up the New England past—*Time*) **Grub** may denote a digging and turning of soil but more often implies a clearing of soil by digging out something (as roots, stumps, and stones); often it suggests the hard, dirty, exhausting nature of such work and with this feeling may be used of various tasks, labors, or duties (<women and children helped to *grub* the land—*Collis*) (<surviving on roots he *grubbed* from the soil) (<shuffled among the ruins of their cities, and *grubbed* in the countryside for food and fuel—*The Lamp*) (<fortunes were made in a day of *grubbing* and lost in a night of faro or red dog—*Billington*) In some cases *grub* reflects the disorder of the land-clearing process and denotes a haphazard and laborious rummaging (<I *grubbed* in the dark alone, groping among shoes and boots . . . painfully garnering the scattered pictures—*Phelan*) (<rag-pickers . . . *grubbing* about among a pile of human refuse—*Times Lit. Sup.*) (<*grubbing* around cemeteries) **Excavate** suggests making a hollow in or through something (as the ground, a mass of rock, or a mountainside) by or as if by means of a spade or shovel or a machine which performs the operations of spading and shoveling (<*excavate* the ground for a cellar) (<*excavate* a tomb) (<*excavate* a tunnel) (<archaeologists engaged in *excavating* the site of an ancient city)

Ana pierce, penetrate, probe, *enter

digest *n* *compendium, syllabus, pandect, survey, sketch, précis, aperçu

Ana collection, assemblage, gathering (see under GATHER): *abridgment, conspectus, abstract, brief, synopsis, epitome

digit *n* *number, numeral, figure, integer

dignify, **ennoble**, **honor**, **glorify** mean to invest a person or thing with something that elevates or uplifts his or its character or raises him or it in human estimation. **Dignify** distinctively implies the addition of something that adds to the worth of a person or thing or, more often, to the estimation in which he or it is held or should be held (<from lowest place when virtuous things proceed, the place is *dignified* by the doer's deed—*Shak.*) (<'tis true, no turbot *dignify* my boards, but gudgeons, flounders, what my Thames affords—*Pope*) (<*dignify* crude verses by calling them poetry) (<this "tea-party" diplomacy, if it may be *dignified* with that name—*Salisbury*) **Ennoble**, though closely akin to *dignify*, does not so much suggest an added grace or dignity as a grace or dignity that comes as a natural result; literally it denotes a raising to the nobility (<the activities of the merely rich or the merely *ennobled*—*Huxley*) but typically it implies a raising in moral character or in moral esteem or in qualities that rid the person or thing of all suspicion of pettiness, meanness, or selfishness and exalt him or it above ordinary status (<the Christian religion *ennobleth* and enlargeth the mind—*Berkeley*) (<a confirmed realist who *ennobled* his prose by his breadth of style and dignity—*Mereness*) **Honor** may imply the giving of reverence or of deep respect to that to which it is due (<*honor* thy father and thy mother—*Exod* 20:12) (<*honor* a man for his steadfastness of principle) It may imply also the giving of something to a person or sometimes a thing that increases the distinction or the esteem in which he or it is held; in neither sense, however, is there any suggestion of an effect that touches the one honored except in externals

(<our feast shall be much *honored* in your marriage—*Shak.*) (<several soldiers were *honored* by the president when he presented them with medals for bravery) (<we that had loved him so, followed him, *honored* him—*Browning*) **Glorify** rarely except in religious use carries its basic implication of exalting a man to heavenly beatitude or of advancing the glory of God through prayer or good works (Jesus was not yet *glorified*—*Jn* 7:39) but it retains the suggestions of casting a transfiguring light upon or of honoring in such a way as to increase a person's or thing's glory. In general, it implies investing with a splendor or with a glory that lifts above the ugly, the commonplace, the ordinary, or, often, the true (<in old days it was possible to *glorify* it [war] as a school of chivalry, courage, and self-sacrifice—*Inge*) (<poetical truth becoming here . . . the servant of common honesty . . . so far from being cramped and degraded, is enlarged and *glorified*—*Day Lewis*) (<knowing that the talent that had made them rich is but a secondary talent . . . they employ men to *glorify* it—*Anderson*)

Ana *excellence, virtue, merit, perfection: nobleness or nobility, morality, ethicalness or ethics (see corresponding adjectives at MORAL)

2 *elegance, grace

Ana *worth, value: beautifulness or beauty, loveliness, comeliness (see corresponding adjectives at BEAUTIFUL): grandness or grandeur, magnificence, stateliness, nobleness or nobility, majesty, augustness (see corresponding adjectives at GRAND)

digress deviate, diverge, depart, *swerve, veer

Ana *wander, stray

digression, **episode**, **excursus**, **divagation** are comparable when they denote a departure from the main course of development, especially of a narrative, a drama, or an exposition. **Digression** applies to a deviation, especially if at the expense of unity of effect, from the main subject of a discourse; it may or may not suggest intention or design (<in this long *digression* which I was accidentally led into—*Sterne*) (<a word of *digression* may be pardoned, however, for the two subjects are allied—*Cardozo*) **Episode** (see also OCCURRENCE) usually applies to an incidental narrative which, though separable from the main subject, arises naturally from it; sometimes an episode is definitely a purposeful digression (as for giving variety to the narration, heightening the illusion of reality, or elucidating a motive); thus, in *Paradise Lost* Raphael's account of the war in heaven is in this sense an *episode* because it breaks the chronological order of the poem and reverts to events which occurred prior to those told in the first book (<descriptive poetry . . . may be interspersed with dramatic *episodes*—*Alexander*) **Episode** is used not only of a literary work but of other art forms or of life in reference to something that seems apart from the main subject or course of a thing (<delight in the virginal beauty of fresh blossoms, in the dewy green of water-meadows . . . is evident in numberless pictures of the earlier schools of Europe; but there these amenities of nature are but an *episode*—*Binyon*) (<Miss Dix's biographer . . . considers her war work an *episode*, not equal in quality to her lifework—*Baker*) **Excursus** applies to an avowed and usually formal digression elucidating at some length an incidental point (<this started an ethnological *excursus* on swineherds, and drew from Pincoffin long tables showing the proportion per thousand of the caste in the Derajat

—Kipling) **Divagation** is often used in preference to *digression* when aimless wandering from the main course or inattentiveness to logic is implied (Froissart's style of poetry invites the widest . . . liberty of *divagation*, of dragging in anything that really interested him—*Saintsbury*) (the author of it would need to keep an extremely clear head, reject stuffing and *divagation*—*Swinerton*)

din *n* **Din**, uproar, pandemonium, hullabaloo, babel, hubbub, clamor, racket mean a disturbing or confusing welter of sounds or a scene or situation marked by such a welter of sounds. **Din** emphasizes the distress suffered by the ears and the completely distracting effect of the noise as a whole; it often suggests prolonged and deafening clangor or insistent ear-splitting metallic sounds (the *din* of a machine shop) (escape the *din* of heavy traffic) (the *din* of a New Year's Eve party) (think you a little *din* can daunt mine ears? . . . Have I not heard great ordnance in the field, and heaven's artillery thunder in the skies?—*Shak.*) (the general had forbidden the tolling of funeral bells so that the incessant mournful *din* might not pound perpetually at our ears—*Kenneth Roberts*) **Uproar** and **pandemonium** both imply tumult or wild disorder, typically of a crowd of persons but often among wild animals or in the elements; when the reference is to men, *uproar* usually suggests the sound of a multitude vociferously, sometimes riotously, protesting, arguing, or defying and *pandemonium*, the *din* produced when a group or crowd usually under discipline breaks bounds and runs riot or becomes uncontrollably boisterous (often throw the parliamentary debates into an *uproar*—*Blanshard*) (pandemonium followed the announcement of the armistice) (draw not the sword; 'twould make an *uproar*, Duke, you would not hear the end of—*Keats*) (the modern parent . . . does not want a fictitious Sabbath calm while he is watching, succeeded by *pandemonium* as soon as he turns his back—*Russell*) **Hullabaloo** is often interchangeable with *din* or *uproar* especially in a construction following *make*, but it seldom carries the suggestions of piercing, earsplitting noise or of vociferation and turmoil which are respectively so strong in *din* and *uproar*. When it refers to a welter of sounds, it suggests great excitement and an interruption of peace or quiet (the *hullabaloo* made by hunters and hounds in the chase) (the children are making a great *hullabaloo* at their party) When it refers to a situation, it suggests a storm of protest, an outburst of passion or wrath, or a torrent of comment or sensational gossip (the current political *hullabaloo*—*New Republic*) (the project was not again brought before the public until the *hullabaloo* about it had died down) (the music stopped and the familiar *hullabaloo* was reestablished in the room—*Stafford*) **Babel** stresses the confusion of sounds that results from a mingling of languages and vocal qualities and the seeming meaningless or purposeless quality of the sound (young and old, fat and thin, all laughed and shouted in a *babel* of tongues—*Bambrick*) (must we fall into the jabber and *babel* of discord—*Sir Winston Churchill*) **Hubbub** denotes the confusing mixture of sounds characteristic of activities and business; it implies incessant movement or bustle rather than turmoil (a sound heard above the *hubbub* of the city streets) (strollers on the common could hear, at certain hours, a *hubbub* of voices and racing footsteps from within the boundary wall—*Shaw*) **Clamor** and **racket**, like *din*, stress the psychological effect of noises more than their character or origin. They usually imply annoyance or disturbance rather than distress and distraction and are applicable to any combination of sounds or any scene that strikes one as excessively or inordinately noisy (the *clamor* was such that votes could not be taken until at last the shouting subsided—*W. P. Webb*) (the crow began to shriek . . . In a few seconds the *clamor* had attracted the attention of a bevy of wild crows—*Kipling*) (we wanted quiet, not *racket*—*Steele*) (something like forty feet of chain and wire rope, mixed up with a few heavy iron blocks, had crashed down

from aloft on the poop with a terrifying *racket*—*Conrad*) *Ana* clamorousness, stridency, boisterousness, blatancy (see corresponding adjectives at VOCIFEROUS): clash, percussion (see IMPACT)

Ant quiet

Con *bright, luminous, brilliant: fresh, *new: *clean, cleanly

dinner, banquet, feast are comparable when denoting an elaborate meal that is served to guests or to a group (as of members of a club or association) and that often marks some special occasion (as an anniversary) or honors a particular person. **Dinner** which basically means the chief meal of the day is the most general of these terms; it is appropriately used of any elaborate and formal meal served to guests or to a group and is the preferred term for use in invitations and in colorless reference to such an affair (popular as a speaker at public *diners*) (planned a birthday *dinner* for her cousin) (worn out by state *diners* and receptions) Typically, **banquet** suggests the sumptuousness of the meal, the magnificence of its setting, and often the ceremonial character of the occasion and entertainment (a certain rigid decorum between guest and geisha is invariably preserved at a Japanese *banquet*—*Hearn*) (entreating him, his captains, and brave knights, to grace a *banquet*—*Keats*) It may stress the excellence and elaborateness of food and service (the widows and other women prepare a special dinner, which may be so elaborate as to become a *banquet*—*Amer. Guide Series: Ariz.*) or especially in popular use it may imply no more than a formal dinner held elsewhere than in a private home (not so long ago the word “*banquet*” evoked pictures of barons of beef, turtle soup, boar’s heads and ten courses served on solid gold plate . . . “*banquet*” today has become the generic word for any meal served in a private room in a hotel—*Britannia & Eve*) (father’s club gave a *banquet* at the hotel—*L. E. Billington*) **Feast** is often interchangeable with *banquet* but it may carry over a feeling of its other meaning of a festival of rejoicing and then stresses the shared enjoyment and pleasure in the occasion that gives rise to the meal (a white cat purring its way gracefully among the wine cups at a *feast* given in honor of Apuleius—*Replier*) (to share our marriage *feast* and nuptial mirth?—*Keats*) (it is not the quantity of the meat, but the cheerfulness of the guests, which makes the *feast*—*Clarendon*) Unlike the other terms of this group *feast* has frequent extended use with the notion of a source of, often shared, enjoyment (treasures his memories of that . . . visit, with vegetarian meals and a *feast* of conversation—*Fogg*) (human beings have always loved these perceptual *feasts* of sensuous satisfaction—*Hunter Mead*)

dip *vb* 1 **Dip, immerse, submerge, duck, souse, dunk** are comparable when meaning to plunge a person or thing into or as if into liquid. **Dip** implies a momentary or partial plunging into a liquid or a slight or cursory entrance into a subject (the priest shall *dip* his finger in the blood—*Lev* 4:6) (dip a dress in cleansing fluid) (dip into a book) (she had *dipped* in the wells of blissful oblivion—*Meredith*) **Immerse** implies that the person or thing is covered by the liquid or buried or engrossed in something (immerse the persons being baptized) (immerse a dress in boiling dye for several minutes) (immerse oneself in thought) (I am at present wholly immersed in country business—*Addison*) **Submerge** implies complete and often prolonged immersion (as

in an inundation) or a being overwhelmed or, sometimes, overpowered and made helpless (the submarine *submerged*) (several houses were completely *submerged* by the flood) (the last and most violent religious rebellion . . . seemed likely to *submerge* that monarchy—*Belloc*) It may suggest a sinking to the lowest state, grade, or status (personality had been *submerged* by organization—*W. P. Webb*) (almost unheard of for such a girl to enter into relations with a man of that *submerged* class—*Mencken*) **Duck** implies a sudden plunging and an almost immediate withdrawal (I say, *duck* her in the lock, and then we will see whether she is witch or not—*Scott*) (ducked into a doorway to avoid a bore) **Souse** adds to *duck* the suggestion of more prolonged immersion and often of a thorough soaking (the boy was *soused* before he was freed from his captors) (a blazing caldron in which Beelzebub is *sousing* the damned—*Arnold*) (after being *soused* in the Atlantic ocean—*Aldrich*) *Souse* sometimes implies steeping of meat, fish, or other food in a pickle or tart liquid for the sake of preserving and flavoring it (soused mackerel) It may often imply not only immersion but a being saturated and, hence, after liquor drinking a becoming intoxicated (came home night after night thoroughly *soused*) **Dunk** in its basic use means to dip and soak something (as bread or a doughnut) in coffee, tea, or milk before eating it, but in many contexts it is equivalent to *duck* or *immerse* (men dangling from lines, being *dunked* in the cold sea as the ship rolled—*Cronk*)

2 **Dip, bail, scoop, ladle, spoon, dish** mean to remove a liquid or a loose or soft substance from a container by means of an implement (as a pail, spoon, or scoop). They are often followed by *up* or *out*. **Dip** suggests the process of plunging the utensil (usually called a *dipper*) into the substance and lifting it out fully; it is the preferred word when the labor involved is to be implied or the action is described (dip drinking water from a spring) (dip into one’s memory for facts one has nearly forgotten) **Bail** is used chiefly in reference to something (as a boat) in which water has accumulated or is accumulating; it implies emptying or an attempt to empty by means of repeated dipping (bail the water out of a rowboat) (by the help of a small bucket and our hats we *bailed* her [a boat] out—*Dana*) *Scoop, ladle, spoon* throw the emphasis on the kind of implement employed in an operation consisting usually of dipping, conveying, and pouring. **Scoop** suggests a shovellike implement, either a small kitchen utensil for dipping out loose dry material (as flour, sugar, or coffee beans) or for gouging out pieces of a soft substance (as cheese) or a much larger and heavier implement used in digging or excavating operations or in the removal of a heap of things from one place to another (scoop out three cups of sugar) (scoop up the catch of fish into barrels) (scooping gravel from the pit into waiting trucks) **Ladle** implies the use of a ladle, or long-handled implement with a bowl-shaped end and often a pouring lip; it is especially used of substances which are liable to be spilled (ladle soup into bowls) (ladle out the punch) The term sometimes implies the use of a mechanical device for removing and conveying liquid (as molten metal) from one container to another. **Spoon** implies the use of a spoon in lifting and depositing something (as food or medicine) (the girl who spoons out vegetables in the cafeteria) (slowly spooning up the hot soup) **Dish** implies transference to the individual plate or dish of a portion of food (as by ladling or spooning) (dish out the vegetables) (dish up the ice cream)

diplomatic politic, smooth, bland, *suave, urbane
Ana astute, *shrewd: courteous, courtly, polite (see

CIVIL): artful, wily, guileful, crafty (see *SLY*): tactful, poised (see corresponding nouns at *TACT*)

dipsomaniac alcoholic, inebriate, *drunkard, sot, soak, toper, tosspot, tippler

direct *vb* 1 **Direct, address, devote, apply** are comparable when used reflexively with the meaning to turn or bend one's attention, energies, or abilities to something or when meaning to turn, bend, or point (as one's attention, thoughts, or efforts) to a certain object or objective. Between **direct** and **address** there is often no perceptible difference; thus, one *directs* or *addresses* oneself to a task, or to his work, or to the study of a problem; one *directs* or *addresses* one's attention to a certain thing, his remarks to a given person, his book to a special type of reader; also, one *directs* or *addresses* a letter when he writes on the envelope the name of the recipient and the place of delivery. There is, however, a tendency to prefer *direct* when an intent or aim is implied or indicated and *address* when an appeal to the mind or feelings is expressed or understood (the Democratic members *directed* their energies to the defeat of the measure) (a demagogue *addresses* his arguments to the least intelligent in his audience) (sat by the breakfast table . . . her eyes listlessly *directed* towards the open door—*Hardy*) (a story *addressed* . . . to his sense of honor and humanity—*Lee*) (asked myself to what purpose I should *direct* my energies—*Cohen*) **Devote** often adds to *direct* and *address* the implication of persistence; thus, one *devotes* himself to a task, a work, or the study of a problem when he resolutely continues towards its completion; one *directs* his attention to a problem but *devotes* his energies to its solution. Quite as often, and in distinction from the other words, *devote* implies dedication or setting apart for a certain end or use (devote himself to the public good) (devote his leisure to charity) (small farms devoted to fruit and berry raising—*Anderson*) **Apply** distinctively suggests concentration. One *applies* himself to a task or to his work when he gives his entire attention to what he has directed or addressed himself. In idiomatic use *apply oneself* and *apply one's mind* often equal "concentrate" or "give one's entire attention" (he learned early to *apply himself*) (an anxious person cannot *apply his mind* to the task in hand) (he cannot *apply himself* to study—*Garnett*) Sometimes *apply* comes very close to *direct* and *address* with, however, the additional implication of employment (that they may sample several kinds of knowledge . . . and have a chance to determine wisely in what direction their own individual mental powers can be best *applied*—*Eliot*)

Ana bend (see *CURVE*): *set, fix, settle: endeavor, strive, try, *attempt

Con divert, deflect, *turn: digress, diverge, deviate, *swerve

2 **Direct, aim, point, level, train, lay** are comparable when they mean to turn something toward its appointed or intended mark or goal. One *directs* something or someone to its or his destination or objective when he heads it or him toward the proper course or guides it or him along that course (directed his eyes to the door) (direct a stranger to the railroad station) (direct a searchlight to the opposite shore) ('tis heav'n each passion sends, and diff'rent men *directs* to diff'rent ends—*Pope*) One aims a weapon or something used as a weapon when he by careful calculation or estimation of counterinfluences turns it toward the exact spot or the object he designs to hit (aim a pistol at a burglar) (aim a blow at a man's stomach) (a law aimed at tax evaders) One **points** something at or less often to or toward a person

or thing when he turns its point or tip toward a particular spot (as in indicating or directing) (point your finger at your choice) (point a sword at an opponent's breast) (point a boat to shore) One **levels** a weapon (as a spear, a lance, or a rifle) or something which serves as a weapon at or against something when he brings it to the position or line (often a horizontal position or line) where it will do its most deadly or most effective work (level a spear at a foe) (level a rifle at a deer) (level a charge against the mine owners) (like an arrow shot from a well-experienced archer hits the mark his eye doth level at—*Shak.*) One **trains** or lays a firearm (as a cannon) when he sets it in a position pointed directly at its mark (kept their guns trained on the enemy cruiser) One **trains** something (as a telescope or a camera) but rarely if ever lays other things than firearms (the distinguished visitors could go nowhere without finding a battery of cameras trained upon them) (lay a gun for a shot)

Ana steer, pilot, *guide, lead, engineer

Ant misdirect

3 manage, control, *conduct

Ana *govern, rule: lead, *guide

4 *command, order, bid, enjoin, instruct, charge

Ana *prescribe, assign, define

direct *adj* **Direct, immediate**, as applied to relations and as meaning marked by the absence of interruption (as between the cause and the effect, the source and the issue, or the beginning and the end), are frequently used with little distinction, although their connotations may be quite dissimilar. **Direct** suggests unbroken connection between one and the other or a straight bearing of one upon the other, while **immediate** suggests the absence of any intervening medium or influence; thus, *direct* knowledge is knowledge gained firsthand, but *immediate* knowledge is that attained by intuition or insight rather than through inference from facts or premises; *direct* contact stresses the bearing of one thing upon the other, but *immediate* contact implies the coherence or cohesion of one and the other; *direct* descent implies descent in a straight line from an ancestor; one's *immediate* family is composed only of those who are the nearest in relation, or one's father, mother, brothers, and sisters; a *direct* cause leads straight to its effect, but an *immediate* cause (which may or may not be the *direct* cause) is the one which serves as the last link in a chain of causes and brings about a result.

directly *presently, shortly, soon

dirty *adj* **Dirty, filthy, foul, nasty, squalid** mean conspicuously unclean or impure. **Dirty** is the general term for what is sullied or defiled with dirt of any kind (dirty hands) (dirty linen) (dirty streets) (he was dirty and bloodstained and his clothes were bedaubed with mud and weeds—*Sayers*) **Filthy** is a much stronger term than *dirty* in its suggestion of offensiveness; it often suggests gradually accumulated dirt which besmears or begrimes rather than merely soils (he was constantly drunk, filthy beyond all powers of decent expression—*Stephen*) (a filthy hovel) **Foul** carries a still stronger implication of revolting offensiveness; it often implies an unwholesome or malodorous state resulting from the decay of putrescible matter (a foul sewer) (a foul dungeon) (a foul pond) (the Arabs explained that the Turks had thrown dead camels into the pool to make the water foul—*T. E. Lawrence*) It may come near to *loathsome* or *disgusting* (a foul sight) **Nasty** applies chiefly to what is repugnant to a person who is fastidious about cleanliness (a nasty ship) (a nasty odor) (the care of pigs is nasty work) Sometimes *nasty* is softened to a mere synonym for "objectionable, disagreeable" (a nasty

fall) <a *nasty* temper> <be *nasty* to someone> **Squalid** adds to the idea of dirtiness or filth that of extreme slovenliness or neglect <*squalid* poverty> <the East, so *squalid* and splendid, so pestilent and so poetic—*Wharton*>

All of these terms may imply moral uncleanness or baseness or obscenity. **Dirty**, however, stresses meanness or despicability <the creature's at his *dirty* work again—*Pope*> **Filthy** and **foul** imply disgusting obscenity, *filthy* stressing the presence of obscenity and *foul*, its ugliness <*filthy* talk> <a *foul* jest> **Nasty** implies a peculiarly offensive unpleasantness <a *nasty* mind> <he hated it as a gentleman hates to hear a *nasty* story—*E. E. Hale*> <squandered all their virile energy on greasy slave girls and *nasty* Asiatic-Greek prostitutes—*Graves*> **Squalid** implies sordidness as well as baseness <the *squalid* scenes and situations through which Thackeray portrays the malign motives and unclean soul of Becky Sharp—*Eliot*> The first four terms are used also of weather, meaning the opposite of clear and thereby implying rainy, snowy, stormy, or foggy weather.

Ant clean

Ana *free, liberate, release: enlighten, *illuminate

Con mislead, delude, *deceive: *dupe, gull

disadvantage *n* **Disadvantage**, **detriment**, **handicap**, **drawback** mean something which interferes with the success or well-being of a person or thing. **Disadvantage** often implies an act, circumstance, or condition which threatens to affect or does actually affect a person or thing unfavorably or injuriously <the best-known area of *disadvantage* is the transitional zone, or deteriorated area, adjacent to the main business district of growing American cities—*Carr*> It may therefore suggest a mere deprivation of advantage <working at a *disadvantage* because the narrow space prevented complete freedom of movement> <I was brought here under the *disadvantage* of being unknown by sight to any of you—*Burke*> or, more positively, an appreciable loss or injury <his attempts to reach his enemy's face were greatly to the *disadvantage* of his own—*Shaw*> <spread rumors to a candidate's *disadvantage*> **Detriment** usually implies a suffering of harm or a sustaining of damage or a cause of harm or damage but carries no direct indication of the extent of actual or probable harm or damage; it is therefore often used in the negative phrase "without detriment" assuring safety with regard either to the past or to the future <the physiological machinery of the body is so adjusted that great variations of atmospheric temperature can be supported without *detriment*—*Heiser*> <rotation of farm crops . . . may very well be a benefit rather than a *detriment*—*Furnas*> <it is not unfashionable to pit one form . . . against another—holding up the naturalistic to the disadvantage of the epic . . . the fantastic to the *detriment* of the naturalistic—*Galsworthy*> **Handicap** retains a suggestion of its application to a competitive struggle (see **ADVANTAGE**) but greatly extends that application to include various struggles into which an ordinary individual may be pushed by inclination or circumstances; it also refers to a disadvantage under which the person so placed must live or work <his lame-

ness was a lifelong *handicap*> <his inability to master mathematics proved to be a serious *handicap* to him after his school years> <the *handicap* under which the student and lawyer labored at that time . . . the lack of a dictionary containing legal information—*Rose*> <truthfulness is . . . a *handicap* in a hypocritical society, but the *handicap* is more than outweighed by the advantages of fearlessness—*Russell*> **Drawback** applies especially to a disadvantage that serves to retard a person's or thing's progress or advance in any way <one of the *drawbacks* of French agriculture is the scarcity of farm labor—*Van Valkenburg & Huntington*> Often, however, it means no more than an objectionable feature of a person or thing that constitutes a disadvantage from some point of view usually implicit in the context <there is always some alloying ingredient in the cup, some *drawback* upon the triumphs, of grown people—*Bagehot*> <all the *drawbacks* of town life—*Jefferies*> **Ana** *obstacle, impediment, bar: barrier (see **BAR**): hindrance, blocking (see corresponding verbs at **HINDER**) **Ant** advantage —**Con** help, aid, assistance (see under **HELP** *vb*): service (see **USE**)

disaffect alienate, *estrangle, wean

Ana upset, agitate, *discompose, disquiet, disturb: sever, sunder, divorce (see **SEPARATE**)

Ant win (*men to a cause, allegiance*)

disagree *differ, vary, dissent

Ana *object, protest: *demur, balk, jib: *disapprove, deprecate: conflict, clash (see **BUMP**)

Ant agree —**Con** accord, harmonize (see **AGREE**): concur, coincide (see **AGREE**): *assent, acquiesce

disallow *vb* *disclaim, disavow, repudiate, disown

Ana reject, refuse, spurn (see **DECLINE**): *deny, gain-say, traverse: debar, shut out, *exclude

Ant allow —**Con** *grant, concede: acquiesce, accede, *assent

disappear *vanish, evanesce, evaporate, fade

Ana depart, leave (see **GO**)

Ant appear —**Con** emerge, loom (see **APPEAR**): *come, arrive: issue, emanate (see **SPRING**)

disapprove, **deprecate** mean to feel or to express an objection to or condemnation of a person or thing. **Disapprove** implies an attitude of dislike or distaste on any good grounds (as social, ethical, or intellectual) and an unwillingness to accept or to praise; the word may sometimes connote rejection or the expression of condemnation <Gard loved his sister, but there were times when he wished for a way of making her understand how thoroughly he *disapproved* of her—*Mary Austin*> <*disapproved* of too much knowledge, on the score that it diminished men's sense of wonder—*Huxley*> **Deprecate** stresses the implication of regret, frequently profound, occasionally diffident or apologetic <shaping the plays to modern taste by the very excisions which scholars will most *deprecate*—*FitzGerald*> <Wallace earnestly *deprecates* the modern tendency to disparage reason—*Inge*> <there is nothing I more *deprecate* than the use of the Fourteenth Amendment . . . to prevent the making of social experiments—*Justice Holmes*>

Ana reprehend, reprobate, censure, *criticize: *decry, disparage

Ant approve —**Con** *commend, recommend, applaud, compliment: endorse, sanction (see **APPROVE**)

disarrange derange, disorganize, *disorder, unsettle, disturb

Ana *misplace, mislay: displace, *replace: upset, *overturn

Ant arrange —**Con** *order, systematize, methodize

disarray disorder, chaos, *confusion, jumble, clutter,

snarl, muddle

Con *method, system: ordering or order, arrangement, marshaling, organization (see corresponding verbs at ORDER)

disaster, **calamity**, **catastrophe**, **cataclysm** are comparable when they denote an event or situation that is regarded as a terrible misfortune. A **disaster** is an unforeseen mischance or misadventure (as a shipwreck, a serious railroad accident, or the failure of a great enterprise) which happens either through culpable lack of foresight or through adverse external agency and brings with it destruction (as of life and property) or ruin (as of projects, careers, or great hopes) (such a war would be the final and supreme *disaster* to the world—*MacLeish*) **Calamity** is a grievous misfortune, particularly one which involves a great or far-reaching personal or public loss or which produces profound, often widespread distress; thus, the rout at Bull Run was a *disaster* for the North but the assassination of President Lincoln was a *calamity*; the wreck of the *Don Juan* was a *disaster* and, as involving the loss of Shelley, it was a *calamity* (we have heard of his decision . . . It is a disaster—for me a *calamity*—*Galsworthy*) (Hamlet's bloody stage is now our world, and we are beginning to trace our own *calamity* back to its sources—*Battenhouse*) **Catastrophe** is used of a disastrous conclusion; it often emphasizes the idea of finality (the captain's folly hastened the *catastrophe*) (what had become of them [the inhabitants of a deserted village]? What *catastrophe* had overwhelmed them?—*Cather*) **Cataclysm** is often used of an event or situation that brings with it an overwhelming of the old order or a violent social or political upheaval (in the general upheaval of doctrine . . . during the Reformation *cataclysm*—*Blunt*) (a thought so imperishably phrased that it sums up not only the *cataclysm* of a world, but also the stoic and indomitable temper that endures it—*Lowes*)

Ana mishap, *accident, casualty: adversity, *misfortune, mischance

disastrous *unlucky, ill-starred, ill-fated, unfortunate, calamitous, luckless, hapless

Ana malign, *sinister, baleful: unpropitious, inauspicious, *ominous, portentous, fateful

disavow *disclaim, repudiate, disown, disallow

Ana deny, gainsay, traverse: *disapprove, deprecate: reject, refuse (see DECLINE)

Ant avow —**Con** *maintain, assert, justify: *express, voice: *declare, proclaim

disbar shut out, eliminate, rule out, suspend, debar, *exclude, blackball

disbelief *unbelief, incredulity

Ana atheism, deism (compare nouns at ATHEIST): rejection, repudiation, spurning (see corresponding verbs at DECLINE)

Ant belief —**Con** faith, credence, credit (see BELIEF)

disburse *spend, expend

Ana *distribute, dispense: apportion, *allot, allocate: *pay

discard *vb* Discard, cast, shed, molt, slough, scrap, junk mean to get rid of as of no further use, value, or service. Discard literally denotes the getting rid of a card from one's hand in a card game, usually because they are worthless or can be replaced by better cards; in its more common general sense, it implies a getting rid of something which one can no longer use to advantage or which has become a burden, an annoyance, or an interference (he sorted and re-sorted his cargo, always finding a more necessary article for which a less necessary had to be discarded—*Cather*) (modern research, which discards

obsolete hypotheses without scruple or sentiment—*Inge*) (in portrait painting, where a painter discards many trivial points of exactness, in order to heighten the truth of a few fundamentals—*Montague*) Cast (see also THROW) may imply a seasonal process of discarding (as the throwing off of skin by a reptile) (creatures that cast their skin are the snake, the viper—*Bacon*) Especially when followed by *off*, *away*, or *out*, it more frequently implies a discarding, a rejection, a discharging, or a repudiation (his wife was casting him off, half regretfully, but relentlessly—*D. H. Lawrence*) (an Englishman like an Ethiopian cannot change his skin any more than a leopard can cast off his spots—*Cloete*) Shed is the ordinary, general term for the seasonal or periodic casting of skin, hair, antlers, or leaves (deciduous trees shed their leaves every autumn) (male deer shed their antlers annually) The term is used also to imply a throwing off or discarding of anything that is a burden to carry, that represents a past stage in one's development, or that is no longer useful or comfortable (found it warm enough to shed his overcoat) (statesmen may try to shed their responsibility by treating the situation as a natural phenomenon—*Hobson*) (Jane . . . was acquiring new subtleties, complexities, and comprehensions, and shedding crudities—*Rose Macaulay*) Molt is the specific term for the periodic shedding of feathers, skin, shells, hair, or horns by various animals and the growth of new corresponding parts. It often suggests a process of a change in plumage including the shedding of feathers and their renewal (the eagle when he molts is sickly—*Carlyle*) (while hens are molting they do not lay eggs) In general use molt even more often than shed implies change, flux, or transition (England is molting. Opinions . . . are . . . in a state of flux—*Goldwin Smith*) (belief . . . that society can molt its outer covering and become new in shape and spirit—*J. D. Hart*) Slough implies the shedding of tissue (as the skin by a reptile or, especially in intransitive use, of necrotic or cicatricial tissue from the surface of a sore or wound) (the snake often sloughs its skin in mid-September) (the scab is sloughing off from the sore) The term is also common in the sense of to discard or throw off what has become objectionable, burdensome, or useless (slough a bad habit) (this talented author has sloughed off most of her more irritating sentimentalities—*Times Lit. Sup.*) (as though her gaunt and worldly air had been only a mockery she began to slough it off—*Bromfield*) The last two words, *scrap* and *junk*, have literal reference to the throwing away of fragments, parts, or pieces that are useless to the owner or can no longer be used by him. Scrap suggests a discarding as rubbish or refuse, but it may carry an implication of some use to another (as a processor or a dealer in parts or accessories) (scrap out-of-date machinery) (scrap a plan as impractical) (all the old ideas of combat had to be scrapped) (the English language that Shakespeare was born to had used up and scrapped a good deal of the English of Chaucer—*Montague*) Junk differs little from scrap except in stressing a throwing away and in carrying little implication of value to a second-hand dealer or to a processor of waste (junk all their old furniture before moving into their new home) (in its astonishing quest for perfection, can junk an entire system of ideas almost overnight—*Davidson*)

Ana *abandon, forsake, desert: reject, repudiate, spurn (see DECLINE *vb*): dismiss, *eject, oust

Con *adopt, embrace, espouse: utilize, employ, *use: retain, *keep, hold, hold back

discern perceive, descry, observe, notice, remark, note, spy, behold, *see, view, survey, contemplate
Ana *discover, ascertain: divine, apprehend, anticipate, *foresee: pierce, penetrate, probe (see ENTER)

discernment, **discrimination**, **perception**, **penetration**, **insight**, **acumen** are comparable when they denote keen intellectual vision. All imply power to see below the surface and to understand what is not evident to the average mind. **Discernment** stresses accuracy (as in reading character or motives or in appreciation of art) <she had not had the *discernment* to discover the caliber of this young favorite—*Belloc*> **Discrimination** emphasizes the power to distinguish and select the excellent, the appropriate, or the true (there was a time when schools attempted . . . to cultivate *discrimination* and to furnish the material on which selection can be founded—*Grandgent*) <nobody should reproach them for reading indiscriminately. Only by so doing can they learn *discrimination*—*Times Lit. Sup.*> **Perception** implies quick discernment and delicate feeling <of a temperament to feel keenly the presence of subtleties; a man of clumsier *perceptions* would not have felt as he did—*George Eliot*> <persecutors were ordinary, reasonably well-intentioned people lacking in keen *perception*—*Sykes*> **Penetration** implies a searching mind and power to enter deeply into something beyond the reach of the senses <it did not require any great *penetration* to discover that what they wished was that their letters should be as kind as was consistent with proper maidenly pride—*De Quincey*> <good little novels, full of Gallic irony and *penetration*—*Time*> **Insight** emphasizes depth of discernment or of sympathetic understanding <throughout the years he has used . . . techniques or *insights* provided by abstract art, to express better his statements about men and the world—*Current Biog.*> **Acumen** suggests characteristic penetration and keenness and soundness of judgment <a paradox which your natural *acumen*, sharpened by habits of logical attention, will enable you to reconcile in a moment—*Cowper*>

Ana intuition, understanding, *reason: perspicaciousness or perspicacity, sagaciousness or sagacity, shrewdness, astuteness (see corresponding adjectives at SHREWD)
Con stupidity, slowness, dullness, density, crassness (see corresponding adjectives at STUPID): blindness (see corresponding adjective BLIND)

discharge *vb* 1 *free, release, liberate, deliver, emancipate, manumit, enfranchise

Ana *eject, expel, oust, dismiss; eliminate, *exclude

2 *dismiss, cashier, drop, sack, fire, bounce

Ana displace, supplant, supersede, *replace

3 *perform, execute, accomplish, achieve, effect, fulfill

Ana finish, complete, *close, end, terminate

disciple adherent, *follower, henchman, satellite, sectary, partisan

Ana votary, devotee (see ADDICT *n*): *enthusiast, zealot, fanatic

discipline *n* *morale, esprit de corps

Ana self-control, self-command (see base words at POWER): self-confidence, self-possession (see CONFIDENCE): nerving, steeling (see ENCOURAGE)

Ant anarchy, lawlessness —**Con** enervation (see corresponding verb at UNNERVE): disorganization, disorder (see corresponding verbs at DISORDER)

discipline *vb* 1 train, educate, *teach, instruct, school

Ana lead, *guide: control, manage, direct, *conduct: drill, exercise, *practice

2 *punish, chastise, castigate, chasten, correct

Ana subdue, overcome, reduce, subjugate (see CONQUER): *restrain, curb, bridle, check, inhibit

disclaim, **disavow**, **repudiate**, **disown**, **disallow** mean to refuse to admit, accept, or approve. **Disclaim** implies refusal to admit or accept a claim, but it may apply specifically to a legal claim one has upon property or to a title <the son *disclaimed* all right to his father's small estate>

or to the claim or imputation of something evil made by another to one's chagrin or dismay <this court *disclaims* all pretensions to such a power—*John Marshall*> <I entirely *disclaim* the hatred and hostility to Turks . . . which you ascribe to me—*Gladstone*> or, even more frequently, to the implied or expressed praise of oneself by another <Mark was embarrassed by the Rector's talking like this; but if he *disclaimed* the virtues attributed to him he should . . . give an impression of false modesty—*Mackenzie*> **Disavow** often comes close to *disclaim* in meaning, but it much less often implies reference to a legal claim and fastens the attention upon a vigorous denial either of personal responsibility for something or personal acceptance or approval of something <Melfort never *disavowed* these papers—*Macaulay*> <the boys *disavowed* any intention to set the stable on fire> <this Court always had *disavowed* the right to intrude its judgment upon questions of policy or morals—*Justice Holmes*> **Repudiate** originally applied to a casting away of one's wife (see also *repudiate* under DECLINE); it may also imply a casting off or a denial of responsibility for something that has been previously acknowledged, recognized, or accepted <they *repudiated* their heresies> <the state has *repudiated* its debts> <a law which everyone recognizes in fact, though everyone *repudiates* it in theory—*Dickinson*> <the liberal mind . . . had *repudiated* the doctrine of original sin—*Straight*> **Disown** usually stresses a repudiation or renunciation and often applies to something that has stood in close relationship to the person disowning; it may specifically imply disinheritance or abjuration <*disowned* his son> <*disowned* his allegiance to the country of his birth> <the prince . . . was . . . required to *disown* . . . the obligations contracted in his name—*Froude*> **Disallow** implies the withholding of sanction or approval and sometimes suggests complete rejection or condemnation <*disallowed* the jockey's claim of a foul> <*disallow* a bill for the entertainment of the officers> <it was known that the most eminent of those who professed his own principles, publicly *disallowed* his proceedings—*Swift*> <your claim upon her hand is already *disallowed*—*G. P. R. James*>

Ana *deny, gainsay, traverse, contradict: reject, refuse, spurn (see DECLINE): deprecate (see DISAPPROVE): belittle, minimize, disparage (see DECRY)

Ant claim

disclose *reveal, divulge, tell, discover, betray

Ana confess, admit, own, *acknowledge, avow: *declare, proclaim, announce, publish, broadcast, advertise

Con conceal, *hide: cloak, mask, dissemble, *disguise, camouflage

discomfit disconcert, *embarrass, faze, abash, rattle

Ana *annoy, vex, irk, bother: perturb, *discompose, agitate, upset, disturb: check, *arrest, interrupt

discommode incommode, *inconvenience, trouble

Ana disturb, perturb, upset, fluster, flurry, *discompose: vex, irk, bother (see ANNOY)

discompose, **disquiet**, **disturb**, **perturb**, **agitate**, **upset**, **fluster**, **flurry** are comparable when they mean to excite one so as to destroy one's capacity for clear or collected thought or prompt action. **Discompose** is sometimes only slightly more suggestive of mental confusion than *disconcert* or *discomfit*; usually, however, it implies greater emotional stress and an actual loss of self-control or self-confidence <he was still *discomposed* by the girl's bitter and sudden retort. It had cast a gloom over him—*Joyce*>

Disquiet stresses the loss, not of composure, but of something deeper (as one's sense of security or of well-being or one's peace of mind) <why art thou cast down, O my soul? and why art thou *disquieted* within me?—*Ps* 42:11>

<he was indubitably not happy at bottom, restless and

disquieted, his disquietude sometimes amounting to agony—*Arnold* <why should we *disquiet* ourselves in vain in the attempt to direct our destiny—*Crothers*> **Disturb**, unlike the preceding words, carries no implication of a loss of one's balance or of an excess of emotion; usually it implies marked interference with one's mental processes (as by worry, perplexity, disappointment, or interruption) <profoundly *disturbed* by the prospective dissolution of a bond which dated from the seventies—*Bennett*> <nothing is more *disturbing* than the upsetting of a preconceived idea—*Conrad*> **Perturb** implies deep disturbance and unsettlement of mind; it usually connotes a cause for disquietude or alarm <in this *perturbed* state of mind, with thoughts that could rest on nothing, she walked on—*Austen*> <*perturbed* by excursions into verbal coquetry, and later into political arguments—*Hillyer*> **Agitate** emphasizes the loss of calmness and self-control and implies obvious signs of nervous or emotional excitement. It does not, however, always suggest distress of mind or a cause of worry <so *agitated* that she was incoherent—*Deland*> <growing more and more irritated, more and more *agitated*—*Woolf*> <it was a happiness that *agitated* rather than soothed her—*Crothers*> **Upset**, like *agitate*, implies a nervous reaction, but it usually presupposes a cause that brings disappointment or distress or sorrow <they wouldn't have believed they could be so *upset* by a hurt woodpecker—*Cather*> <what *upset* me in the . . . trial was not the conviction, but the methods of the defense—*Laski*> **Fluster** may carry a suggestion of the excitement and confusion induced by drinking intoxicants <*flustered* with new wine—*Tennyson*> but it usually suggests the agitation, bewilderment, and sometimes fright induced by sudden and often unexpected demands, commands, needs, or crises <the aged housekeeper was no less *flustered* and hurried in obeying the numerous . . . commands of her mistress—*Scott*> **Flurry** suggests the excitement, commotion, and confusion induced by great haste or alarm <they reached the station, hot and *flurried*, just as the train pulled out> <thoughts, with their attendant visions, which . . . *flurried* her too much to leave her any power of observation—*Austen*> <he recognized her and sat down immediately, *flurried* and confused by his display of excitement—*O'Flaherty*>

Ana discomfit, disconcert, rattle, faze, *embarrass: vex, irk, bother, *annoy: *worry, harass, plague, pester
Con appease, *pacify, conciliate, mollify, placate, propitiate

disconcert rattle, faze, discomfit, *embarrass, abash

Ana bewilder, nonplus, perplex, *puzzle: *discompose, fluster, flurry, disturb, perturb

disconsolate woebegone, *downcast, dejected, depressed, dispirited

Ana inconsolable, comfortless (see affirmative verbs at COMFORT): sorrowful, woeful (see corresponding nouns at SORROW): *melancholy, doleful

discontinue desist, cease, *stop, quit

Ana suspend, intermit, stay (see DEFER): *arrest, check, interrupt

Ant continue

discord *n* **Discord, strife, conflict, contention, dissension, difference, variance** mean a state or condition marked by disagreement and lack of harmony or the acts or circumstances which manifest such a state or condition. **Discord** implies not only a want of harmony or of concord between persons or between things but also, usually, a positive clashing which manifests itself in personal relations by quarreling, factiousness, or antagonism, in relations between sounds by a resulting dissonance or unpleasant noise, and in relations between other things that are incon-

gruous or incompatible by creating unpleasant impressions or mental disturbance <they were firm and understanding friends. I know of but one approach to *discord* in their relations—*Replier*> <in this state of enlightenment there is no more *discord* between the will, the intellect, and the feelings, and the objects of our reverence—*Inge*> <the seeker after truth . . . must disclaim responsibility for the way in which his discoveries fit into the general scheme of things. For the moment they may seem to produce *discord* rather than harmony—*Crothers*> **Strife** throws the emphasis on a struggle for superiority rather than on the incongruity or incompatibility of the persons or things that disagree. It applies chiefly to relations between persons, and when used in reference to things it is nearly always figurative. Also, the term may imply any of widely different motives for the struggle (as rivalry, emulation, difference in opinion, disagreement, deep antagonism, or violent hostility) <domestic fury and fierce civil *strife*—*Shak.*> <yet live in hatred, enmity, and *strife* among themselves—*Milton*> <I strove with none, for none was worth my *strife*—*Landor*> <a face in which a strange *strife* of wishes, for and against, was apparent—*Hardy*> <the crowd swells, laughing and pushing toward the quays in friendly *strife*—*Lowell*> **Conflict** (see also CONTEST) implies a clashing and a struggle, but it stresses not the aim or end but the process, the uncertainty of the outcome, or the trials, difficulties, or torments it involves. In this sense the term may apply to actual battles or wars, but usually it applies to a mental, moral, or spiritual state of a person or group of persons or to its outward manifestations <pale with *conflict* of contending hopes and fears—*Cowper*> <no more for him life's stormy *conflicts*—*Whitman*> <the *conflict* of passion, temper, or appetite with the external duties—*T. S. Eliot*> The term is also used in a milder sense to imply an incompatibility between or the impossibility of reconciling two things which come together at the same time or upon the one person <a *conflict* of engagements> <a *conflict* of duties> **Contention** may be used in place of *strife* in any of the senses of the latter word; more often it applies to strife that manifests itself in quarreling, disputing, or controversy; it may even be applied to a condition of affairs marked by altercations or brawls <cast out the scorer, and *contention* shall go out; yea, strife and reproach shall cease—*Prov* 22:10> <let the long *contention* cease! Geese are swans, and swans are geese, let them have it how they will—*Arnold*> <we were never friends. There was always a certain *contention* between us—*Max Peacock*> **Dissension** may imply discord or strife between persons or parties, but it lays greater stress on a breach between them than do any of the preceding words; thus, to say that there is *dissension* in a church or political party is to imply that it is broken up into contentious or discordant factions <France, torn by religious *dissensions*, was never a formidable opponent—*Macaulay*> <left the seeds of philosophic *dissension* vigorous in French soil—*Belloc*> **Difference** (often in the plural) and **variance** usually imply a clash between persons or things owing to dissimilarity in opinion, character, or nature that makes for discord or strife. The terms may also suggest apparent or actual incompatibility or impossibility of reconciliation <nationalists have always used force to settle their *differences*—*Fowler*> <I might very possibly have quarreled and skirmished with anyone of less unvarying kindness and good temper. As it is, we have never had a word or thought of *difference*—*Henning*> <to remain at *variance* with his wife seemed to him . . . almost a disaster—*Conrad*> <I never saw a child with such an instinct for preventing *variance*, or so full of tact—*Yonge*> <sectarian *variances* in the town had delayed the erection of a house

of worship—*Amer. Guide Series: Vt.*)

Ana incompatibility, incongruity, inconsonance, inconsistency, ungeniality, discrepancy (see corresponding adjectives at INCONSONANT): antagonism, hostility, *enmity, rancor, animosity, antipathy

Con *harmony, consonance, accord

discordant *inconsonant, incongruous, ungenial, unsympathetic, incompatible, inconsistent, discrepant
Con *consonant, congruous, congenial, sympathetic, compatible: harmonizing or harmonious, according or accordant, agreeing (see corresponding verbs at AGREE)

discout *deduction, rebate, abatement

discourage *vb* 1. **Discourage, dishearten, dispirit, deject** mean to weaken in qualities that maintain interest, zeal, activity, or power to continue or to resist. **Discourage** implies not only the loss of courage and confidence but the entrance of fear and the marked diminution of all power to summon up one's forces (the long winter and the lack of fuel *discouraged* the settlers) (his failure had completely *discouraged* his wife) **Dishearten** differs little from *discourage*, but it stresses not so much a mood or a state of mind as a loss of heart or will to accomplish a purpose or to achieve an end (the slight response to their appeal *disheartened* the promoters of the fund) (his answers were at the same time so vague and equivocal, that her mother, though often *disheartened*, had never yet despaired of succeeding at last—*Austen*) **Dispirit** distinctively implies the loss of cheerfulness or hopefulness; it often suggests a prevailing gloom that casts a blight upon a gathering, a project, or whatever depends for its success upon the spirits of those who enter into it. It may also, more strongly than *discourage*, suggest the way an individual or group affects others (in quelling a local Armenian revolt he was badly wounded. Sick and *dispirited*, he gave up his Arabian plan—*Buchan*) (*dispirited* by their futile efforts—*Grandgent*) (the shabby, *dispiriting* spectacle of Versailles, with its base greeds and timidities—*Montague*) **Deject**, even more strongly than *dispirit*, implies a casting down, with resulting loss of cheerfulness or hopefulness, but, unlike *dispirit*, it refers usually to the individual alone (she has been much *dejected* lately) (nothing *dejects* a trader like the interruption of his profits—*Johnson*)

Ana *depress, weigh; try, *afflict: vex, bother, irk (see ANNOY)

Ant encourage —*Con* inspirit, hearten, embolden, nerve, steel (see ENCOURAGE)

2 deter, *dissuade, divert

Ana *restrain, inhibit: *prevent (sense 2): *frighten, scare

discourse *n* **Discourse, treatise, disquisition, dissertation, thesis, monograph** designate in common a systematic, serious, and often learned consideration of a subject or topic. **Discourse**, the widest of these terms, may refer to something written or spoken but, since it fundamentally implies a passing from one link in a chain of reasoning to another, always suggests a careful formulation and usually a plan made in advance of expression (read a *discourse* on the fundamental causes of war before the Foreign Policy Association) (his *discourses* from the pulpit were always long remembered) **Treatise** implies a written work and suggests a formal, methodical, and more or less extended treatment, usually expository but sometimes argumentative or narrative; it often differs from *discourse* in not emphasizing reasoning and in referring to a lengthy work (Turretin's history . . . (a dry, heavy, barren *treatise*)—*John Wesley*) (a *treatise* on insects) (a philosophical *treatise*) **Disquisition** stresses limitation of a subject and its investigation and discussion in writing; it carries no

suggestion of failure or of success but throws its emphasis upon the exploratory nature of the discussion (for . . . grave *disquisition* he was not well qualified—*Macaulay*) (in his initial *disquisition*, he tells how he has searched many books—*S. R. L.*) **Dissertation** presupposes examination and often independent examination of a subject and its discussion at length, usually in writing; it often denotes a treatise dependent on individual research by a candidate for a higher academic degree (the sermon is a *dissertation*, and does violence to nature in the effort to be like a speech—*Gladstone*) (Lamb's playful "*Dissertation upon Roast Pig*") (present a *dissertation* upon "The Pedant as a stock character in the Elizabethan Drama" for the doctor of philosophy degree) **Thesis** basically denotes a proposition which a person (as a candidate for an academic degree) advances and offers to maintain but is also often used interchangeably with *dissertation* (it is my *thesis* that people are growing not worse but better) (write a doctoral *thesis* on Chaucer's minor poems) although some restrict it to a dissertation or other work (as one incorporating the results of a series of experiments) intended to maintain or prove a proposition laid down or clearly stated. In practice, however, it may be difficult to tell whether the proposition or its treatment is in the user's mind, so inextricably are the two notions intertwined (a *thesis* maintaining that man's economic condition can be closely correlated with weather records) (Miss Lynch's extremely suggestive *thesis* is that the transition from Elizabethan-Jacobean to later Caroline comedy is primarily economic—*T. S. Eliot*) **Monograph** implies a learned treatise on a single topic (as a particular biological species, a clearly restricted literary genre, or an author). It typically refers to a work of this character published in a learned journal or as a pamphlet or small book (a *monograph* on "The Ballade in England") (a *monograph* on the catfishes of the Great Lakes region)

Ana paper, article, *essay: *speech, lecture, talk, sermon

discourse *vb* **Discourse, expatiate, dilate, descant** are comparable when meaning to talk or sometimes write more or less formally and at length upon a subject. **Discourse** frequently implies the manner or attitude of the lecturer, the monologist, or the preacher; it may suggest detailed or logical and sometimes profound, witty, or brilliant discussion (Jonson is a real figure—our imagination plays about him *discursing* at the Mermaid, or laying down the law to Drummond of Hawthornden—*T. S. Eliot*) (we talk in the bosom of our family in a way different from that in which we *discourse* on state occasions—*Lowe*) **Expatriate** implies ranging without restraint or wandering at will over a subject; it connotes more copiousness than *discourse* and often carries a hint of long-windedness (we will *expatiate* freely over the wide and varied field before us—*Landor*) (the promoter of the raffle . . . was *expatiating* upon the value of the fabric as material for a summer dress—*Hardy*) (in another lecture I shall *expatiate* on the idea—*James*) **Dilate** implies a discoursing that enlarges the possibilities of a subject (as by dwelling on each small detail) (she proceeded to *dilate* upon the perfections of Miss Nickleby—*Dickens*) (those joys on which Stevenson *dilates* in that famous little essay in *Virginibus Puerisque*—*Quiller-Couch*) (he reverted to his conversation of the night before, and *dilated* upon the same subject with an easy mastery of his theme—*Wylie*) **Descant** stresses free comment, but it often also connotes delight or pleasure in this free expression of one's opinions or observations (to praise his stable, and *descant* upon his claret and cookery—*Goldsmith*) (he *descanted* to his heart's content on his favorite topic of the [prize] ring—*Shaw*)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Ana *discuss, argue, dispute: converse, talk, *speak: lecture, harangue, orate, sermonize (see corresponding nouns at SPEECH)

discourteous impolite, uncivil, ungracious, *rude, ill-mannered

Ana brusque, curt, crusty, gruff, blunt (see BLUFF): boorish, churlish (see under BOOR)

Ant courteous —*Con* *civil, polite, courtly, gallant, chivalrous

discover 1 *reveal, disclose, divulge, tell, betray

Ana impart, *communicate: *declare, announce, publish, advertise, proclaim

2 **Discover, ascertain, determine, unearth, learn** mean to find out something not previously known to one. **Discover** may presuppose investigation or exploration, or it may presuppose accident, but it always implies that the thing existed, either actually or potentially, in fact or in principle but had not been hitherto seen or known or brought into view, action, use, or actual existence <discover an island> <discover a new writer> <discover uses for a weed> <discover the laws of heredity> <those rules of old discovered, not devised—Pope> <the historian of our times . . . will surely discover that the word reality is of central importance in his understanding of us—Trilling> <he was fifteen and beginning to become solid. This fall he'd discovered football—La Farge> **Ascertain** seldom if ever implies accidental discovery; it usually presupposes an awareness of one's ignorance or uncertainty and conscious efforts (as by study, investigation, observation, and experiment) to find the truth or discover the facts <old paintings were compared to ascertain the dresses of the period—Shaw> <it has been ascertained by test borings that salt extends for 2200 feet below the surface—Amer. Guide Series: La.> **Determine** (see also DECIDE) differs from **ascertain** only in its greater emphasis upon the intent to establish the facts or the truth or to decide a dispute or controversy. Its use is largely legal and scientific <experts were called to determine the presence or absence of poison in the vital organs> <if the site of his birthplace can be determined, the memorial will be erected there> <determine the degree of reaction when ragweed pollen is injected beneath the skin> <the executor must assemble all available records to determine the decedent's assets and liabilities—Gehman> **Unearth** is freely used in the sense of to bring to light or out into the open something that has been hidden, forgotten, or lost or that is exceedingly difficult to trace. Frequently it also suggests intensive or prolonged investigation preceding discovery <unearth old records> <unearth the evidence necessary for a conviction> <accurate scholarship can unearth the whole offense from Luther until now that has driven a culture mad—Auden> <an early-nineteenth-century globe that Dinah had unearthed in one of the basement rooms—Basso> **Learn** implies acquirement of knowledge; it commonly suggests little or no effort on the part of the one who discovers <it was only today that I learned his name> <Judy learned that the ayah must be left behind—Kipling> <they have not yet even learnt that "science" is not the accumulation of knowledge . . . but the active organization of knowledge—Ellis>

Ana discern, observe, perceive, espy (see SEE)

3 *invent, create

discreet prudent, forethoughtful, foresighted, provident (see under PRUDENCE)

Ana *cautious, circumspect, wary: politic, diplomatic (see SUAVE)

Ant indiscreet —*Con* rash, reckless, foolhardy (see

ADVENTUROUS): foolish, fatuous, asinine, *simple **discrepant** inconsistent, *inconsonant, discordant, incompatible, incongruous, uncongenial, unsympathetic

Ana divergent, disparate, *different, diverse

Ant identical (as accounts, explanations) —*Con* agreeing, squaring, conforming, corresponding, jibing, tallying (see AGREE): uniform, parallel, alike, *like, similar

discrete separate, *distinct, several

Ana individual, distinctive, peculiar (see CHARACTERISTIC)

Con blended, merged, fused, mingled (see MIX)

discretion *prudence, forethought, foresight, providence

Ana caution, circumspection, wariness (see under CAUTIOUS): judgment, *sense, wisdom, gumption

Ant indiscretion —*Con* foolishness, fatuousness, asininity, simplicity (see corresponding adjectives at SIMPLE): rashness, recklessness, foolhardiness (see corresponding adjectives at ADVENTUROUS)

discriminate *vb* *distinguish, differentiate, demarcate

Ana *compare, contrast, collate: *separate, divide, part: *detach, disengage

Ant confound —*Con* confuse, *mistake

discrimination penetration, insight, *discernment, perception, acumen

Ana wisdom, judgment, *sense: subtlety, logicalness or logic (see corresponding adjectives at LOGICAL)

Con crassness, density, dullness, slowness, stupidity (see corresponding adjectives at STUPID)

discuss, argue, debate, dispute, agitate mean to discourse about something in order to arrive at the truth or to convince others. **Discuss** implies an attempt to sift or examine especially by presenting considerations pro and con; it often suggests an interchange of opinion for the sake of clarifying issues and testing the strength of each side <Hobart couldn't discuss. He could talk; he could assert . . . but he couldn't meet or answer arguments—Rose Macaulay> <not even the loon, in whose voice there is a human note, means to discuss the weather. You are living in a world almost devoid of communication—Laird> **Argue** usually implies conviction and the adducing of evidence or reasons in support of one's cause or position <Agrippa advised a republican restoration and Maecenas argued for a principate—Buchan> <deep-seated preferences cannot be argued about—you cannot argue a man into liking a glass of beer—Justice Holmes> **Debate** stresses formal or public argument between opposing parties <they had gathered a wise council to them of every realm, that did debate this business—Shak.> **Dispute**, in the sense of *discuss* or *debate*, is somewhat uncommon <[Paul] spake boldly for the space of three months, disputing and persuading the things concerning the kingdom of God—Acts 19:8> It more usually implies contentious or heated argument (compare *dispute n* at ARGUMENT). **Agitate** stresses both vigorous argument and a practical objective; it usually implies active propaganda and a determination to bring about a change <when workers working ten hours a day agitate for an eight-hour day, what they really want is . . . sixteen hours off duty instead of fourteen—Shaw> <if you really expect success, agitate, agitate, agitate—Page!>

Ana *explain, expound, interpret, elucidate, explicate: *discourse, expatiate, dilate, descant

disdain *n* scorn, despite, contempt (see under DESPISE)

Ana aversion, *antipathy: insolence, superciliousness, arrogance (see corresponding adjectives at PROUD)

Con *regard, admiration, respect, esteem: *reverence, awe, fear

disdain *vb* scorn, scout, *despise, contemn

Ana spurn, repudiate, reject (see DECLINE *vb*)
