disease *n* Disease, disorder, condition, affection, ailment, malady, complaint, distemper, syndrome denote a deranged bodily state usually associated with or amounting to a loss of health. Disease in its usual and broadest use implies an impairment of the normal state of the living body or of one or more of its parts marked by disturbance of vital functions and usually traceable to a specific cause (as a parasite, a toxin, or a dietary deficiency) <his suffering is caused by disease> As used in names of specific abnormal states, disease implies the existence of a regularly occurring identifying group of symptoms and, often, of a known cause <such dreaded diseases as smallpox and plague> <possibly celiac disease is a symptom complex with a multiple etiology rather than a single disease entity—*Yr. Bk. of Endocrinology*> **Disorder** is commonly interchangeable with disease <a nutritional disorder caused by a lack of calcium and phosphorus—*Time*> but typically it stresses the disordered state without regard to cause <a specialist in disorders of the liver> Disease may sometimes be used more narrowly to distinguish an abnormal state resulting from an infective process <disease is conceived as being limited to malfunctioning of the organism initiated and maintained by an infectious process—*Ashley Montagu*> and is then distinguished from or subordinated to disorder <his distinction between disease (morbid change in tissue due to specific microorganisms) and disorder (disturbance in structure or function from any cause) is an artificial one—*Roney*> <diseases and other disorders of turf—*Lukens & Stoddard*> **Condition** and the less common **affection** both imply a particular and usually an abnormal state of the body or more often of one of its parts; neither suggests anything about the cause or severity of such state <pulmonary affections> <a severe heart condition> **Ailment**, **malady**, and **complaint** are used chiefly of human disorders, and all imply a degree of indefiniteness <the pattern of ailments is changing and the “degenerative diseases,” like heart, circulation, and nerve diseases and cancer, are increasing—*New Statesman*> <had suffered from an obscure malady, an injury to the spine—*Glasgow*> <a digestive complaint of long standing> **Ailment** often suggests a trivial or chronic disorder <the pesthouses of the period of our Civil War, in which patients suffering from minor ailments were infected with all manner of diseases—*Morrison*> <constantly complaining of her ailments> **Malady**, on the other hand, usually stresses the mysterious or serious character of a disorder <suspicion in the Oriental is a sort of malignant tumor, a mental malady—*Forster*> <told by his physician that he had a fatal malady—*Cather*> **Complaint** carries no inherent implication about the seriousness of the disorder but in stressing the invalid's point of view may suggest the distress that accompanies ill health <taking all sorts of medicine for vague complaints—*Fishbein*> **Distemper**, which formerly applied to human disorders, is now used almost entirely of diseases of lower animals and more particularly to denote specifically certain severe infectious diseases (as a destructive virus disease of the dog and related

animals, strangles of the horse, or panleucopenia of the cat). **Syndrome** is often used interchangeably with disease to denote a particular disorder, but in precise professional thinking such interchangeability does not imply strict synonymy, since syndrome denotes the group or pattern of signs and symptoms that constitute the evidence of disease and carries no implication about causation; thus, one might use either Ménière's disease or Ménière's syndrome to denote a particular disorder centered in the inner ear; however, one would say that the syndrome (not disease) of recurrent dizziness, ringing in the ears, and deafness suggests the presence of Ménière's disease <a condition characterized by splenomegaly, hypochromic anemia, leukopenia, and icterus . . . this symptom complex may be produced by a variety of pathological states. It is therefore more properly classified as a syndrome than as a disease entity—*W. M. Fowler*>

Certain of these terms also are comparable in other uses and especially as applied to mental, spiritual, or emotional abnormal states. Disease usually connotes evident derangement requiring remedies or a cure <diseases of the body politic> <this strange disease of modern life, with its sick hurry, its divided aims—*Arnold*> **Ailment** implies something wrong that makes for unsoundness, weakness, or loss of well-being <a bodily disease . . . may, after all, be but a symptom of some ailment in the spiritual part—*Hawthorne*> **Malady**, especially as contrasted with disease, implies a deep-seated morbid condition or unwholesome abnormality <how would they be troubled by this beauty, into which the soul with all its maladies had passed—*Pater*> **Distemper** usually harks back to its earlier reference to human ailments and stresses a lack of balance or of a sense of proportion <to seek of God more than we well can find, argues a strong distemper of the mind—*Herrick*> **Syndrome** retains its implication of a group of contributory signs and symptoms <lying is one of a syndrome or constellation of character traits that tend to be found in one another's company—*Garvin*> <partition . . . is no more decisive in the Irish syndrome than emigration or the decline of rural marriage or the fallen state of Irish literature—*Kelleher*>

Ant adorn —*Con* embellish, beautify (see *ADORN*)

disgrace *belch, burp, vomit, regurgitate, spew, throw up

Disgrace, **dishonor**, **disrepute**, **shame**, **infamy**, **ignominy**, **opprobrium**, **obloquy**, **odium** mean the state, condition, character, or less often the cause of suffering disesteem and of enduring reproach or severe censure.

Disgrace may imply no more than a loss of the favor or esteem one has enjoyed <Queen Elizabeth's favorites were constantly in danger of *disgrace* if they offended her in the slightest degree> <he was shut up in an attic . . . and forbidden to speak to his sisters, who were told that he was in *disgrace*—*Russell*>

The term, however, often implies complete humiliation and, sometimes, ostracism <you may find yourself at any moment summoned to serve on a jury and make decisions involving the *disgrace* or vindication . . . of your fellow creatures—*Shaw*>

Dishonor may often be employed in place of *disgrace*, but typically it suggests a previous condition of being honored or of having a high sense of honor; it therefore may imply the loss of the honor that one has enjoyed or the loss of one's self-respect or self-esteem <prefer death to *dishonor*>

<but now mischance hath trod my title down, and with *dishonor* laid me on the ground—*Shak.*> <wouldst thou . . . harp on the deep *dishonor* of our house—*Byron*>

Disrepute stresses either the loss of one's good name or the attribution of a bad name or reputation <the actions of certain of its guests have brought the hotel into *disrepute*>

<the *disrepute* into which this once famous name has now fallen> <the habit of pub-crawling—so much the fashion when I was their age—seems to have happily fallen into *disrepute*—*O'Connor*>

Shame implies particularly humiliating *disgrace* or *disrepute* such as is caused by an illicit union, illegitimate birth, inferior blood, relationship to a traitor or criminal, or commission of a crime <live in *shame*> <a child of *shame*> <"Is it not . . . a pity to live no better life?" "God knows it is a *shame!*"—*Dickens*>

<*shame* is a reaction to other people's criticism. A man is shamed either by being openly ridiculed and rejected or by fantasizing to himself that he has been made ridiculous—*Benedict*>

Infamy usually implies notoriety as well as exceeding shame <men who prefer any load of *infamy*, however great, to any pressure of taxation, however light—*Sydney Smith*>

<I have come, not from obscurity into the momentary notoriety of crime, but from a sort of eternity of fame to a sort of eternity of *infamy*—*Wilde*>

Ignominy, more than *infamy*—which in some ways it closely resembles—stresses the almost unendurable contemptibility or despicability of the *disgrace* or its cause <the *ignominy* he had been compelled to submit to—*Meredith*>

<was she now to endure the *ignominy* of his abandoning her?—*D. H. Lawrence*> <the *ignominy* of returning to Spain, having accomplished nothing, became more obvious the more it was considered—*Froude*>

Opprobrium adds to *disgrace* the implication of being severely reproached or condemned (the *opprobrium* which often attaches itself to the term *politician*) <Spain . . . has been plundered and oppressed, and the *opprobrium* lights on the robbers, not on the robbed—*Buckle*>

<the name "educator," for many intelligent people, has become a term of *opprobrium*—*Grandgent*>

Obloquy (see also *ABUSE* *n*) adds to *disgrace* the implication of being abused or vilified <and undergo the perpetual *obloquy* of having lost a kingdom—*Clarendon*>

<that unmerited *obloquy* had been brought on him by the violence of his minister—*Macaulay*>

Odium applies to the *disgrace* or the *opprobrium* that is attached to the fact or state of being an object

of widespread or universal hatred or intense dislike <whatever *odium* or loss her maneuvers incurred she flung upon her counselors—*J. R. Green*> <as a preliminary Augustus . . . revised the senatorial roll. This was always an invidious task . . . in the end he was compelled to make the nominations himself and face the *odium*—*Buchan*> <many materialists . . . seek to eliminate the *odium* attaching to the word *materialism*, and even to eliminate the word itself—*James*>

Ana degradation, debasement, abasement, humbling, humiliation (see corresponding verbs at *ABASE*): *stigma, brand, blot, stain

Ant respect, esteem —*Con* admiration, *regard: *reverence, awe, fear: honor, repute, glory, renown, *fame

disguise *vb* **Disguise**, **cloak**, **mask**, **dissemble**, **camouflage** are comparable when meaning to assume a dress, an appearance, or an expression that conceals one's identity, intention, or true feeling. **Disguise**, which basically implies an alteration in one's dress and appearance, frequently retains this implication with the added suggestion either of concealment of identity or of the assumption (as on the stage) of another identity <escape captivity *disguised* as a woman> <they *disguise* themselves as Turks for a joke>

The term, however, may apply to a feeling, an intention, or a motive when one's words, expression, or acts imply a contrary reaction <I *disguised* my impatience and suspicion of him and waited—*Hudson*> <however we may *disguise* it by veiling words we do not and cannot carry out the distinction between legislative and executive action with mathematical precision—*Justice Holmes*>

<our author, *disguised* as Jonathan Oldstyle, contributed a series of letters . . . protesting with admirable chivalry against jesting at maiden ladies—*Commins*>

Cloak implies the assumption of something which covers and conceals identity or nature <the appearance of goodwill *cloaked* a sinister intention> <intolerance and public irresponsibility cannot be *cloaked* in the shining armor of rectitude and righteousness—*A. E. Stevenson*>

Mask implies a *disguise*, comparable to a covering for the face or head, which prevents recognition of a thing's true character, quality, or presence <icy spots *masked* by newly fallen snow>

<*masking* with a smile the vain regrets that in their hearts arose—*Morris*> <his pessimism . . . became an obvious pose, an attempt to *mask* his porky complacency—*Hicks*>

Dissemble stresses simulation for the purpose of deceiving as well as *disguising*; it, therefore, is the preferred term when actual deception is achieved <Ross bears, or *dissembles*, his disappointment better than I expected of him—*Gray*>

<the Scripture moveth us . . . to acknowledge and confess our manifold sins and wickedness; and that we should not *dissemble* nor cloak them before the face of Almighty God—*Book of Common Prayer*>

Camouflage in its basic military use implies a *disguising* (as with paint, garnished nets, or foliage) that reduces the visibility or conceals the nature or location of a potential target (as a ship, a factory, or an airfield), and in its common extended use tends to imply a comparable *disguising* quality or element, often specifically one that tends to minimize some undesirable aspect (as of a person or his acts or attributes) <Soulé is five feet five inches tall and . . . inclines to stoutness, but his erect bearing and quick movements tend to *camouflage* this—*Wechsberg*>

<the absolute character of these dictatorships was *camouflaged* somewhat by an elaborate parliamentary system—*C. E. Black & E. C. Helmreich*>

Ana conceal, *hide: *misrepresent, belie, falsify, garble: *assume, pretend, feign, counterfeit, sham, simulate, affect

Con expose, exhibit, display, parade, flaunt (see *SHOW*)

vb): *reveal, disclose, discover, betray

disgust *vb* **Disgust, sicken, nauseate** are comparable when meaning to arouse an extreme distaste in. **Disgust** implies a stomach that is revolted by food offered or taken; in its extended use it implies sensibilities which are revolted by something seen, heard, or otherwise known that creates strong repugnance or aversion (a *disgusting* medicine) (a *disgusting* smell) (disgusted by the vulgarity of men who ate noisily and greedily) (the very thought of such an occupation *disgusted* his fastidious nature) (the majority of women that he meets offend him, repel him, *disgust* him—*Mencken*) **Sicken** usually implies not only the exciting of distaste but of actual physical distress (as faintness or a turning of the stomach); often, however, it is used merely as a more emphatic word for *disgust*, or it may suggest a disgust born of weariness or exhaustion (the smell of certain flowers is *sickening* in its sweetness) (mine eyes did *sicken* at the sight, and could not endure a further view—*Shak.*) (she was *sickened* by the girl's affectations) (for a few evenings it had interested the sisters . . . but they had soon *sickened* of it and loathed it—*Bennett*) (his unctuous morality, which *sickens* later ages—*Lewis & Maude*) **Nauseate** carries a stronger implication than *disgust* or *sicken* of loathsomeness (as to the taste, sight, or mind), and often suggests retching or vomiting (he always finds castor oil *nauseating*) (just now, even the thought of food *nauseates* the patient) (they were all *nauseated* by the foul odor) (nauseating behavior) (we also cannot bring ourselves to deny him that famous, if dangerous, charm of his, *nauseated* as we may be by the excesses into which it so often misled him—*J. M. Brown*)

Ana revolt, repulse, offend (see corresponding adjectives at OFFENSIVE)

Ant charm—**Con** tempt, entice (see LURE): gratify, delight, rejoice, *please

dish *vb* ladle, spoon, *dip, bail, scoop

dishearten *discourage, dispirit, deject

Ana *depress, weigh: despair, despond (see corresponding adjectives at DESPONDENT)

Ant hearten—**Con** *encourage, inspirit, embolden, cheer, nerve, steel

disheveled unkempt, sloppy, *slipshod, slovenly

Ana *negligent, neglectful, lax, slack, remiss: *slatternly, blowsy, frowzy, dowdy

dishonest, deceitful, mendacious, lying, untruthful are comparable especially when applying to persons, their utterances, and their acts and meaning deficient in honesty and unworthy of trust or belief. **Dishonest** may apply to any breach of honesty or trust (as by lying, deceiving, stealing, cheating, or defrauding) (a *dishonest* statement) (a *dishonest* employee) (while it would be *dishonest* to gloss over this weakness, one must understand it in terms of the circumstances that conspired to produce it—*Mumford*) (years ago a few *dishonest* men traveled about the country, saying that they could make rain—*Craig & Urban*) **Deceitful** usually implies the intent to mislead or to impose upon another in order to obscure one's real nature or actual purpose or intention, or the true character of something offered, given, or sold; it therefore usually suggests a false or specious appearance, indulgence in falsehoods, cheating, defrauding, or double-dealing (deceitful propaganda) (deceitful testimony) (she was a *deceitful*, scheming little thing—*Zangwill*) **Mendacious** is typically more formal than, often less derogatory than, but otherwise closely equivalent to **lying**, the ordinary, direct, unequivocal word (silly newspapers and magazines for the circulation of *lying* advertisements—*Shaw*) (a *lying* account of the accident) (go aboard the ships

that caught his interest where the masters . . . set out wine and told him *mendacious* tales of their trade—*Wheelwright*) (while the communication was deceptive and so intended, it was not technically *mendacious*—*S. H. Adams*) As applied to persons *mendacious* more often suggests the habitude of deceit while *lying* suggests guilt in respect to a particular instance; thus, one might describe a person as *mendacious* with primary reference to his character or habit but would ordinarily prefer *lying* when a particular instance is in view (a *mendacious* child is doubted even when telling the truth) (only a *lying* scoundrel would tell such a tale) **Untruthful** is often used in place of *mendacious* or *lying* as a slightly less brutal word; however, the term distinctively implies lack of correspondence between what is said or represented and the facts of the case or the reality, and is often applied to statements, accounts, reports, or descriptions with little stress on dishonesty or intent to deceive (an *untruthful* account of an incident) (the artist's representation of the scene at Versailles was *untruthful* in many of its details)

Ana *crooked, devious, oblique: false, *faithless, perfidious: cheating, cozening, defrauding, swindling (see CHEAT *vb*)

Ant honest—**Con** *upright, honorable, scrupulous, conscientious, just: *straightforward, forthright, above-board: candid, open, *frank, plain

dishonor *n* *disgrace, disrepute, shame, infamy, ignominy, opprobrium, obloquy, odium

Ana humiliation, humbling, debasement, degradation, abasement (see corresponding verbs at ABASE): *stigma, brand, blot, stain

Ant honor—**Con** glory, renown, repute, *fame: reverence, veneration (see under REVERE): prestige, *influence, credit, authority, weight: esteem, respect, *regard, admiration

disillusioned *sophisticated, worldly-wise, worldly, blasé

Ana undeceived (see corresponding affirmative verb at DECEIVE): disenchant (see corresponding affirmative verb at ATTRACT)

disinclined *adj* **Disinclined, indisposed, hesitant, reluctant, loath, averse** mean manifesting neither the will nor the desire to do or to have anything to do with something indicated or understood. **Disinclined** implies a lack of taste or inclination for something for which one has no natural bent or which meets one's disapproval (I should not be *disinclined* to go to London, did I know anybody there—*Richardson*) (disinclined to come to real grips with the vexed question of public control in industry—*Cohen*) (he was preoccupied and *disinclined* for sociability) **Indisposed** implies an unfavorable or often a hostile or unsympathetic attitude (unfit to rule and *indisposed* to please—*Crabbe*) (indisposed to take part in the feasting and dancing—*Hardy*) **Hesitant** suggests a holding back through fear, distaste, uncertainty, or irresolution (she was *hesitant* to accept the invitation) (hesitant in seeking advice) (a *hesitant* suitor) (hesitant about spending the money required to build an experimental plant—*Griffin*) **Reluctant** adds to *hesitant* a definite resistance or sense of unwillingness (I was simply persuading a frightened and *reluctant* girl to do the straight and decent and difficult thing—*Rose Macaulay*) (people were *reluctant* to charge a dead man with an offense from which he could not clear himself—*Wharton*) (reluctant to expose those silent and beautiful places to vulgar curiosity—*Cather*) **Reluctant** is also applied directly to the thing which is done reluctantly or to a thing which seems reluctant (the constant strain of bringing back a *reluctant* and bored attention—*Russell*) (they wring from *reluctant* soil food enough to keep . . . alive—*Repllier*) **Loath** stresses the lack of

harmony between something one anticipates doing and his likes or dislikes, tastes or distastes, or sympathies or antipathies; thus, a tender person may be *loath* to punish a refractory child but a strict disciplinarian would be *loath* to allow that child to go unpunished; one may be *loath* to believe a well-founded report that discredits a friend and equally *loath* to disbelieve a rumor that confirms his bad opinion of a person (*loath* to publish translations of anything except our surefire sex-and-mayhem fiction—*Whyte*) *Averse* suggests a turning away from something distasteful or repugnant (*averse* to all advice) (*his impulses were generous, trustful, averse from cruelty—J. R. Green*)

Ana *antipathetic, unsympathetic: opposing, resisting (see RESIST): balking, shying, bogging, sticking, sticking (see DEMUR): objecting, protesting (see OBJECT *vb*)

disinterested uninterested, detached, aloof, unconcerned, *indifferent, incurious

Ana dispassionate, unbiased, impartial, *fair, just: *neutral, negative

Ant interested: prejudiced, biased

dislike *n* **Dislike, distaste, aversion, disfavor** mean the state of mind of one who is not drawn to or turns from or avoids a person or thing; often these terms imply the manifestation of the state of mind. **Dislike** normally suggests the finding of something unpleasant or repugnant or of a kind one is unwilling to meet or to face (*an aristocratic disdain and dislike of the bourgeoisie—Inge*) *<differentiating between mere aversion and dislike and morbid unreasonable fear or dread—Armstrong>* In itself *dislike* is rather neutral but it is readily intensified by context to the point of suggesting complete detestation (*I was on fire with the same anger, dislike, and contempt that burned in Hobart towards me—Rose Macaulay*) **Distaste**, which implies a lack of taste for, usually stresses a squeamishness or a repugnance but allows a good deal of range in intensity to this squeamishness or repugnance; it may imply such other feelings as fear occasioned by the difficulties involved (*a pronounced distaste for mathematics*) or rebellion at constraint or confinement (*for sheer pity of the repressed . . . distaste on Nettie's face, you . . . drove her down to the movies—Mary Austin*) or simply an unexplained reluctance (*great as was his need of shelter, the Bishop . . . was struck by a reluctance, an extreme distaste for the place—Cather*) **Aversion** suggests a disinclination for someone or something which manifests itself especially in attempts to avoid, evade, or escape. An *aversion* may be temperamental or it may be the result of training; it may or may not suggest an accompanying feeling, but it consistently implies a definite reaction on the part of one manifesting it (*he tried to take hold of her feet with his hands, but she shrank from him with aversion—Hudson*) (*unless we can give them an aversion from cruelty, they will not abstain from it—Russell*) (*the natural human aversion to cold, noise, vibration, . . . and*

the unfriendly and lonesome environment at high altitude—*Armstrong*) **Disfavor**, the weakest of these words, usually suggests no more than a lack of liking or approval but it may imply contempt, lack of confidence, or disdain as motives (*the proposal met with general disfavor*) (*the young prince had fallen into open disfavor at court*) (*Punch . . . eyed the house with disfavor—Kipling*)

Ana hate, hatred, detestation (see under HATE *vb*): disapproval, deprecation (see corresponding verbs at DISAPPROVE)

Ant liking —*Con* affection, *attachment, love: *predilection, partiality

disloyal *faithless, false, perfidious, traitorous, treacherous

Ana disaffected, estranged, alienated (see ESTRANGE): *inconstant, fickle, unstable

Ant loyal —*Con* *faithful, constant, true, staunch, steadfast, resolute

dismal, dreary, cheerless, dispiriting, bleak, desolate are comparable when they mean devoid of all that makes for cheer or comfort. *Dismal* and *dreary* are often interchangeable. **Dismal** may indicate extreme gloominess or somberness utterly depressing and dejecting (*dismal acres of weed-filled cellars and gaping foundations—Felix Morley*) (*rain dripped . . . with a dismal insistence—Costain*) (*the most dismal prophets of calamity—Krutch*) **Dreary** may differ in indicating what discourages or enervates through sustained gloom, dullness, tiresomeness, or futility, and wants any cheering or enlivening characteristic (*the most dreary solitary desert waste I had ever beheld—Bartram*) (*it was a hard dreary winter, and the old minister's heart was often heavy—Deland*) (*had the strength been there, the equipment was lacking. Harding's dreary appreciation of this was part of his tragedy—S. H. Adams*) **Cheerless** stresses absence of anything cheering and is less explicit than but as forceful as the others in suggesting a pervasive disheartening joylessness or hopelessness (*he would like to have done with life and its vanity altogether . . . so cheerless and dreary the prospect seemed to him—Thackeray*) **Dispiriting** refers to anything that disheartens or takes away morale or resolution of spirit (*it was such dispiriting effort. To throw one's whole strength and weight on the oars, and to feel the boat checked in its forward lunge—London*)

Bleak is likely to suggest chill, dull, barren characteristics that dishearten and militate against any notions of cheer, shelter, warmth, comfort, brightness, or ease (*the bleak upland, still famous as a sheepwalk, though a scant herbage scarce veils the whinstone rock—J. R. Green*) (*the sawmill workers of the bleak mountain shack towns—Amer. Guide Series: Calif.*) (*the bleak years of the depression—J. D. Hicks*) **Desolate** applies to what disheartens by being utterly barren, lifeless, uninhabitable or abandoned, and remote from anything cheering, comforting, or pleasant (*a semibarren, rather desolate region, whose long dry seasons stunted its vegetation—Marvel*) (*some desolate polar region of the mind, where woman, even as an ideal, could not hope to survive—Glasgow*)

Ana murky, gloomy, *dark: forlorn, hopeless (see DEPENDENT): barren, *bare

Con gay, *lively, animated: cheerful, joyous (see GLAD)

dismantle divest, *strip, denude, bare

Con *furnish, equip, outfit, appoint

dismay *vb* **Dismay, appall, horrify, daunt** mean to unnerve and check or deter by arousing fear, apprehension, or aversion. **Dismay** suggests a loss of power to proceed either because a prospect is terrifying or disheartening, or, more often, because one is balked and perplexed or at a loss concerning how to deal with a situation (*be not afraid nor dismayed by reason of this great multitude; for*

the battle is not yours, but God's. Tomorrow go ye down against them—2 Chron 20:15-16) <here was an opponent that more than once puzzled Roosevelt, and in the end flatly *dismayed* him—*Muzken*> <who in one lifetime sees all causes lost, herself *dismayed* and helpless—*Rukeyser*> **Appall**, in its most forceful use, implies an overwhelming and paralyzing dread or terror (the sight *appalled* the stoutest hearts) <“Are you a man?” “Ay, and a bold one, that dare look on that which might *appall* the devil!”—*Shak.*> The word more often implies the sense of impotence aroused when one is confronted by something that perturbs, confounds, or shocks, yet is beyond one's power to alter (an *appalling* waste of human life) <*appalling* statistics> <the unpunctuality of the Orient . . . is *appalling* to those who come freshly from a land of fixed mealtimes and regular train services—*Huxley*> <*appalled* by the magnitude of the tragedy—*Bowers*> **Horrify** may emphasize a reaction of horror or of shuddering revulsion from what is ghastly or hideously offensive <to developed sensibilities the facts of war are revolting and *horrifying*—*Huxley*> <this theme—a man ready to prostitute his sister as payment for a debt of honor—is too grotesque even to *horrify* us—*T. S. Eliot*> Often *horrify* comes close to *shock* in meaning and implies momentary agitation occasioned by a surprising breach of the proprieties or decencies <they were *horrified* by his playing golf on Sunday> <she *horrified* London society by pouring hot tea on a gentleman who displeased her—*Amer. Guide Series: Va.*> **Daunt** presupposes an attempt to do something that requires courage and implies therefore a checking or scaring off by someone or something that cowers or subdues <he had been completely *daunted* by what he had found . . . ; the Revolution . . . had been something against which self-assertion had been of no avail—*Mary Austin*> *Daunt* perhaps most often occurs in negative constructions <nothing can *daunt* the man whose last concern is for his own safety> <no adventure *daunted* her and risks stimulated her—*Ellis*>

Ana perplex, confound, bewilder, nonplus, dumbfound, mystify, *puzzle: disconcert, rattle, faze, abash, discomfit, *embarrass: alarm, *frighten, terrify

Ant cheer —*Con* assure, secure, *ensure: pique, quicken, stimulate, galvanize, excite, *provoke

dismay *n* alarm, consternation, panic, *fear, dread, fright, terror, horror, trepidation

Ana perturbing or perturbation, agitation, disquieting or disquietude, discomposing or discomposure, upsetting or upset (see corresponding verbs at DISCOMPOSE): *apprehension, foreboding

Con *confidence, assurance, aplomb, self-possession: *courage, mettle, spirit, resolution

dismiss 1 Dismiss, discharge, cashier, drop, sack, fire, bounce are comparable when they mean to let go from one's employ or service. **Dismiss** basically denotes a giving permission to go <he *dismissed* the assembly—*Acts* 19:41> <*dismissed* the night-watchers from the room, and remained with her alone—*Meredith*> When used in respect to employment it carries apart from the context no suggestion of the reason for the act and is, therefore, often preferred as the softer or as the more comprehensive term <with the letup in business, thousands of employees were *dismissed*> <the new governor *dismissed* the staff that served his predecessor and appointed members of his own party in their places> **Discharge** is usually a harsher term, implying dismissal for cause and little or no likelihood of being called back <*discharge* an employee for insubordination> <she has the habit of *discharging* her servants without notice> <a rich man can *discharge* anyone in his employment who displeases him—*Shaw*> Only

in military and court use does it, when unqualified, carry no implication of dissatisfaction on the part of the employer <the enlisted man will be *discharged* after three years' service> <the three convicted soldiers were dishonorably *discharged*> <the judge *discharged* the jury with thanks> **Cashier** implies a summary or ignominious discharge from a position of trust or from a position that is high in the scale <*cashier* a suspected official> <many a duteous and knee-crooking knave . . . wears out his time, much like his master's ass, for nought but provender, and when he's old, *cashiered*—*Shak.*> <the few sentimental fanatics who . . . proceeded upon the assumption that academic freedom was yet inviolable, and so got themselves *cashiered*—*Mencken*> **Drop, sack, fire, and bounce** are all rather informal. **Drop** is a common and colorless synonym of *dismiss* <many employees were *dropped* when business slackened> **Sack** stresses a being discarded or thrown out of employ <he was *sacked* after long years of service> <Blum had *sacked* him because he wore blue undershirts—*Bennett*> while **fire** stresses a dismissal as sudden and peremptory as the action of firing a gun <he *fired* his clerk one day in a fit of anger, but the next day he called him back> and **bounce**, a kicking out <he *bounced* the boy after one day of unsatisfactory service>

disorder *vb* **Disorder, derange, disarrange, disorganize, unsettle, disturb** are comparable when they mean to undo the fixed or proper order of something. **Disorder** is commonly used in reference to something that depends for its proper functioning or effectiveness upon being properly ordered (see ORDER *vb* 1) or in good order or array <trusses all *disordered*—*Milton*> <too rich a diet will *disorder* his digestive system> **Derange** implies a throwing out of proper arrangement of the parts, or of an important part, of something in which all the parts or elements are ordered with reference to each other or are so carefully adjusted or so closely related to each other that they work together as a unit. The term usually carries a strong implication of resulting confusion or a destruction of normal or healthy conditions <war *deranges* the life of a nation> <fear has *deranged* his mind> <within the power of man irreparably to *derange* the combinations of inorganic matter and organic life—*Lord*> **Disarrange** often implies little more than the changing of a fixed, neat, or perfect order of arrangement and may carry no suggestion of confusion <she . . . would not let his chamber be *disarranged* just at present—*Martineau*> <someone had *disarranged* the papers on his desk> <the wind *disarranged* her hair> **Disorganize** implies usually the destruction of order and functioning in a body or whole all the parts of which have an organic connection with each other or have been so ordered with reference to each other that what affects one part affects every other part; the term therefore usually suggests a disordering that impedes the functioning or impairs the effectiveness of the affected system <subversive methods intended to *disorganize* the internal communications of the enemy's country> <the Whigs . . . though defeated, disheartened, and *disorganized*, did not yield without an effort—*Macaulay*> <an expenditure which would *disorganize* his whole scheme of finance—*Buchan*> **Unsettle** implies a disordering or disarrangement that causes instability, unrest, inability to concentrate, or turbulence <the cold war has

unsettled the minds of men—*Travis*) <constant rumors that keep one *unsettled*> **Disturb** (see also DISCOMPOSE) usually implies a force or combination of forces that *unsettles* or *disarranges*; frequently it also suggests an interruption or interference that affects a settled or orderly course, plan, growth, or progress <the attraction of planets *disturbs* the course of comets> <regulation . . . produces a uniform whole, which is as much *disturbed* and deranged by changing what the regulating power designs to leave untouched, as that on which it has operated—*John Marshall*> <the warps and strains of civilized life . . . seem to *disturb* the wholesome balance of even the humblest elements of the possessive and aesthetic instincts—*Ellis*> **Ant** order —**Con** arrange, marshal, organize, methodize, systematize (see ORDER *vb*): array, align, range, *line, line up; regulate, *adjust, fix

Con *disguise, cloak, mask, dissemble, camouflage: *hide, conceal, secrete

display *n* **Display, parade, array, pomp** are comparable

when denoting a striking or spectacular show or exhibition for the sake of effect. **Display** commonly suggests a spreading out or an unfolding of something that is usually concealed or visible only in the mass or in individual instances, so that the observer is impressed by the extent, the detail, the beauty, or the lavishness of what is revealed to him <a *display* of meteors> <a parvenu's *display* of wealth> <a nation's *display* of military power> <fine editions that make an impressive *display* in an oilman's library—*Green Peyton*>

Parade implies ostentatious or flaunting exhibition; *display* may or may not suggest a conscious endeavor to impress, but *parade* definitely does carry such an implication <Mr. Cruncher could not be restrained from making rather an ostentatious *parade* of his liberality—*Dickens*> <he does not make the least *parade* of his wealth or his gentility—*Snaith*>

Array stresses order and brilliancy in display of or as if of marshaled ranks of armed soldiers and therefore may be used of displays that strike one as beautiful, as terrible, or as merely astonishing <an *array* of tulips> <an *array* of silver on a sideboard> <the terrible *array* of evils around us and dangers in front of us—*Shaw*> <clouds . . . each lost in each, that marvelous *array* of temple, palace, citadel—*Wordsworth*>

Pomp stresses ceremonial grandeur or splendor. Once often but now rarely used of a pageant or solemn procession it still suggests an outward spectacular show of magnificence or glory <it [Independence Day] ought to be solemnized with *pomp* and parade, with . . . bonfires, and illuminations—*Adams*> <pride, *pomp* and circumstance of glorious war—*Shak.*> <lo, all our *pomp* of yesterday is one with Nineveh and Tyre—*Kipling*>

disport *vb* sport, *play, frolic, rollick, romp, gambol
Ana divert, *amuse, recreate, entertain

disposal, **disposition** are frequently used without clear distinction when they mean the act or the power of disposing of something. However, when the emphasis is upon what shall be done with money, property, or possessions, **disposal** tends to imply a getting rid of (as by selling, giving away, assigning to others, or destroying) and **disposition**, a proper or orderly distribution or utilization (the *disposal* of her jewels seemed necessary to pay her debts) (the *disposition* of the intestate's property has been agreed upon by the heirs) (incinerators used for the *disposal* of garbage) (I am happy that the speedy *disposal* of the pictures will enable you . . . to settle this unpleasant affair—*Mitford*) (the donors have stipulated for the future *disposition* . . . of those funds—*John Marshall*) When the idea of arrangement or ordering or of making arrangements is stressed, *disposition*, rather than *disposal*, is the more accurate term (while the *disposition* of the branches is unsymmetrical, balance is maintained—*Binyon*) (a deserter had informed Octavian of the general plan . . . and he made his *dispositions* accordingly—*Buchan*) The idiomatic phrases at *one's disposal* and *at (or in) one's disposition* differ in that, though both imply a placing under one's control, the former suggests use as one sees fit and the latter, subjection to one's direction, arrangement, or command (they put their summer home at the *disposal* of the bridal couple) (had at his *disposition* no inconsiderable sums of money—*Trench*)

Ana destroying or destruction, demolishing or demolition (see corresponding verbs at DESTROY)

disposition 1 *disposal

Ana administering or administration, dispensing or dispensation (see corresponding verbs at ADMINISTER); management, direction, controlling or control, conducting or conduct (see corresponding verbs at CONDUCT); arrangement, ordering (see corresponding verbs at ORDER)

2 **Disposition**, **temperament**, **temper**, **complexion**, **character**, **personality**, **individuality** are comparable when they mean the prevailing and dominant quality or qualities which distinguish or identify a person or group. **Disposition** applies to the predominating bent or constitutional habit of one's mind or spirit (ages of fierceness have overlaid what is naturally kindly in the *dispositions* of ordinary men and women—*Russell*) (the taint of his father's insanity perhaps appeared in his unbalanced *disposition*—*E. S. Bates*) **Temperament** applies to the sum total of characteristics that are innate or inherent and the result of one's physical, emotional, and mental organization (a nervous, bilious *temperament*) (I verily believe that nor you, nor any man of poetical *temperament*, can avoid a strong passion of some kind—*Byron*) (shall I ever be cheerful again, happy again? Yes. And soon. For I know my *temperament*—*Mark Twain*) **Temper** (compare *temper* under MODERATE *vb*) implies a combination of the qualities and especially those acquired through experience which determine the way one (as a person, a people, an age) meets the situations, difficulties, or problems that

confront him (there was a general confidence in her instinctive knowledge of the national *temper*—*J. R. Green*) (the leaders of forlorn hopes are never found among men with dismal minds. There must be a natural resiliency of *temper* which makes them enjoy desperate ventures—*Crothers*) Unlike the foregoing terms *temper* may suggest an acquired or transient state of mind controlling one's acts and decisions (after four years of fighting, the *temper* of the victors was such that they were quite incapable of making a just settlement—*Huxley*) **Complexion** implies some fundamentally distinctive quality based on mood, attitude, and ways of thinking that determines the impression one produces on others (the rationalist mind . . . is of a doctrinaire and authoritative *complexion*: the phrase "must be" is ever on its lips—*James*) (great thinkers of various *complexion*, who, differing in many fundamental points, all alike assert the relativity of truth—*Ellis*) **Character** applies to the aggregate of qualities, especially moral qualities, which distinguish an individual at any one time in his development, which constantly tend to become more or less fixed, and which must be taken as a whole into consideration in any ethical judgment of him (he is a man of *character*) (in his youth his *character* was weak and unstable) (that inexorable law of human souls that we prepare ourselves, for sudden deeds by the reiterated choice of good or evil that determines *character*—*George Eliot*) Often *character* means such an aggregate of qualities brought to a high state of moral excellence by right principles and right choices and by the rejection of anything that weakens or debases (when we say of such and such a man that he has . . . *character*, we generally mean that he has disciplined his temperament, his disposition, into strict obedience to the behests of duty—*Brownell*) **Personality** also applies to the aggregate of qualities which distinguish an individual, but the term differs from *character* in that it implies his being distinguished as a person rather than as a moral being. In general personality may be said to be revealed in unconscious as well as in conscious acts or movements, in physical and emotional as well as in mental and moral behavior, and especially in a person's relations to others; thus, one may know very little about the *character* of an acquaintance, yet have a very definite idea of his *personality*. Therefore *personality* is qualified not as good or bad but by an adjective implying the extent to which it pleases, displeases, or otherwise impresses the observer (there was a pious and good man, but an utterly negligible *personality*—*Mackenzie*) (the mere presence of *personality* in a work of art is not sufficient, because the *personality* revealed may be lacking in charm—*Benson*) Hence *personality* often distinctively means personal magnetism or charm (*personality* is not something that can be sought; it is a radiance that is diffused spontaneously—*Ellis*) **Individuality** implies a personality that distinguishes one from all others; often it connotes the power of impressing one's personality on others (a man of marked *individuality*) (she is a pleasant person but has no *individuality*) (Sophia quietened her by sheer force of *individuality*—*Bennett*) (an *individuality*, a style of its own—*Cather*)

disprove, **refute**, **confute**, **rebut**, **controvert** mean to show or attempt to show by argument that a statement, a claim, a proposition, or a charge is not true. **Disprove** stresses the success of an argument in showing the falsity, erroneousness, or invalidity of what is attacked (he could not *disprove* the major contention of his opponents) (I speak not to *disprove* what Brutus spoke, but here I am to speak what I do know—*Shak.*) (the final values of life, the ultimate meanings of experience, are just those that no man

can prove, and that no man can *disprove* either—*Hedley*) **Refute** stresses the method more than the effect of argument in disproof; it therefore is preferred to *disprove* when one wishes to convey implications of the adducing of evidence, of a bringing forward of witnesses, experts, or authorities, and of close reasoning. It connotes an elaboration of arguments not present in *disprove* <with respect to that other, more weighty accusation, of having injured Mr. Wickham, I can only *refute* it by laying before you the whole of his connection with my family—*Austen*> <there is great force in this argument, and the Court is not satisfied that it has been *refuted*—*John Marshall*> <one can disagree with his views but one can't *refute* them. . . . Every particle of him asseverates the truth which is in him—*Henry Miller*> **Confute** emphasizes a destruction of arguments or a reducing to silence of opponents by clearly revealing the falsity or the untenability of the points which have been made; the term usually implies refutation, but it may also suggest such methods as denunciation and sarcasm <Satan stood . . . *confuted* and convinced of his weak arguing and fallacious drift—*Milton*> <Elijah . . . *confuted* the prophets of Baal in precisely that way, with . . . bitter mockery of their god when he failed to send down fire from heaven—*Shaw*> <hypotheses which may be *confuted* by experience—*Ayer*> **Rebut** differs from *refute*, its closest synonym, in suggesting greater formality of method (as that used in organized debate or in courts of law). Although its aim is disproof of an opponent's contentions, the term does not necessarily imply the achievement of one's end, but it does suggest the offering of argument, evidence, or testimony given in support of the other side <at the end of the formal arguments, each member of the debating team was allowed three minutes for *rebutting* the arguments of his opponents> <the Tractarians were driven to formulate a theory of the Church . . . which should justify the exclusive claim of Anglicanism to be the Church of Christ in these islands, while *rebutting* the arguments of Rome—*Inge*> <the author carefully examined and *rebutted*, point by point, many of the arguments—*Ashley Montagu*> **Controvert** usually carries a dual implication of denying or contradicting a statement, proposition, or doctrine, or a set of these, and of refuting or attempting to refute it. It does not necessarily suggest disproof but it does connote a valiant effort to achieve that end <this doctrine has been *controverted*; it is, however, very ably defended by Mr. Hargrave—*Cruise*> <I am glad that this year we are assembled not to *controvert* the opinions of others, nor even to defend ourselves—*Inge*>

dissimilarity, **unlikeness**, **difference**, **divergence**, **divergency**, **distinction** are comparable when they mean lack of agreement or correspondence (or an instance of such lack) in appearance, in qualities, or in nature brought out by a comparison of two or more things. **Dissimilarity** and **unlikeness**, the most general terms in this group, are often used interchangeably without loss, but when there is little basis for comparison and the contrast is obvious, **dissimilarity** is usually preferred <the effectiveness of a metaphor depends, in part, on the *dissimilarity* of the things which are compared> <the injunction that the most recent comers slough off all the traits of their *dissimilarity* also implied that homogeneity was itself socially desirable—*Handlin*> **Unlikeness** is commonly the preferred term, however, when the things contrasted belong to a common category, and there are fundamental likenesses between them <but he was rich where I was poor, and he supplied my want the more as his *unlikeness* fitted mine—*Tennyson*> <the likenesses among human beings as well as the *unlikenesses*—*Wiggam*> **Difference** suggests notice of a quality or feature which marks one thing as apart from another. The term may imply want of resemblance in one or more particulars <note the *differences* between the first poems of Keats and those written after he had achieved mastery of his art> <there are both resemblances and *differences* in the designs of these two cathedrals> or want of identity <*difference* of opinion is the one crime which kings never forgive—*Emerson*> <*difference* of religion breeds more quarrels than *difference* of politics—*Phillips*> or a disagreement or cause of disagreement which separates individuals or makes them hostile to each other <there have been *differences*

between them for some time) **Divergence** or **divergency** applies to a difference between things or less often persons having the same origin, the same ends, or the same background or belonging to the same type or class; there is usually an implication of a difference that makes for cleavage or increasing unlikeness (an illustration of the *divergences* between countries both highly democratic—*Bryce*) (the greatest *divergence* in the educational value of studies is due to the varying degree to which they require concentration, judgment, observation, and imagination—*Grandgent*) (increasing *divergencies* between British and French policies—*Welles*) **Distinction** usually implies want of resemblance in detail, especially in some minute or not obvious detail; it therefore commonly applies to a difference that is brought out by close observation, study, or analysis or that marks the line of division between two like things (point out the *distinction* in meaning between two close synonyms) (a hairsplitting *distinction* between “original” and “creative” writing) (apprehend the vital *distinction* between religion and criticism—*Arnold*) (so intoxicated with dreams of fortune that he had lost all sense of the *distinction* between reality and illusion—*Brooks*) (this is not a *distinction* without a difference. It is not like the affair of “an old hat cocked” and “a cocked old hat” . . . but there is a difference here in the nature of things—*Sterne*)

dissuade, deter, discourage, divert mean to turn one aside from a purpose, a project, or a plan. **Dissuade** carries the strongest implication of advice, argument, or exhortation; like the affirmative form *persuade*, it usually suggests gentle or effective methods and carries no suggestion of bullying or browbeating, though it equally carries little or no suggestion of coaxing or wheedling (Sir Walter had at first thought more of London; but Mr. Shepherd . . . had been skillful enough to *dissuade* him from it, and make Bath preferred—*Austen*) (wrote a book to *dissuade* people from the use of tobacco—*Scudder*) (Galton was eagerly interested and wanted to experiment on himself, though ultimately *dissuaded* on account of his advanced age—*Ellis*) While **deter** often implies the operation of fear as

the cause of turning aside from the fulfillment of a project, it may suggest no more than a changing of purpose for cause rather than from mere caprice (the fear of reprisals *deterred* them from using poison gas) (he vowed that nothing should *deter* him from his purpose) (the Judge's remark about hanging around the stable did not *deter* Theophilus from playing there all that winter—*Deland*) (Peter for a time abandoned both smoking and alcohol, and was only *deterred* from further abstinences by their impracticability—*H. G. Wells*) (he then hazards the conjecture that Aristotle wrote so obscurely in order that he might *deter* slow-witted and indolent men from reading him—*Babbitt*) In *deterrent* the implication that it is fear which is the cause of holding back is stronger than in the verb. **Discourage** (see also DISCOURAGE) implies a deterring by undermining spirit or enthusiasm or by weakening intent or sense of purpose (discouraged him from prosecuting the inquiry) (the incessant hurry and trivial activity of daily life . . . seem to prevent, or at least *discourage*, quiet and intense thinking—*Eliot*) (I definitely wished to *discourage* his intimacy with my family—*Rose Macaulay*) **Divert** (see also TURN and AMUSE) implies a turning aside, but here the mind or some of its functions is usually the thing diverted or turned aside, and another object of interest or attention is generally expressed or understood as the alternative; in this sense *divert* is often used of the very young, or of the preoccupied or the worried (the children's attention was *diverted* to a more interesting game) (thank God for colonels, thought Mrs. Miniver; sweet creatures, so easily entertained, so biddably *diverted* from senseless controversy into comfortable monologue—*Jan Struther*)

Ana advise, counsel (see under ADVICE *n*): *urge, exhort, prick

Ana persuade —*Con* *induce, prevail, get: influence, touch, *affect

distant, far, faraway, far-off, remote, removed mean not near or close but separated by an obvious interval especially in space or in time. **Distant** carries a stronger reference to the length of the interval (whether long or short) than the other terms; only when it directly qualifies a noun does it necessarily imply that the interval is markedly long (a book held six inches *distant* from the eyes) (the sun is about 93,000,000 miles *distant* from the earth) (a *distant* city) (the other item, on a *distant* page, was cheerfully headed “Food from Sewage”—*Krutch*) (at a *distant* date) (I do not ask to see the *distant* scene,—one step enough for me—*Newman*) **Far**, except for the possible reference to a short distance involved in the question “How far?”, applies (as adverb as well as adjective) only to what is a long way off ([he] took his journey into a *far* country—*Lk* 15:13) (take a *far* view in planning for future needs of the city) (go back in the *far* past to a common origin—*Kroeber*) (across the hills, and *far* away beyond their utmost purple rim—*Tennyson*) **Faraway** and **far-off** not only mean extremely far but are preferred when distance in time is specifically implied (old, unhappy, *far-off* things, and battles long ago—*Wordsworth*) However, both may suggest distance in space (a cheer that started the echo in a *faraway* hill—*Stevenson*) (the *far-off* places in which he had been wandering—*Dickens*) **Remote** suggests a far removal, especially from something (as one's present location, one's point of view, or one's time) regarded as a center or vantage ground (some forlorn and naked hermitage, *remote* from all the pleasures of the world—*Shak.*) (the sands of a *remote* and lonely shore—*Shelley*) (whose nature it was to care more for immediate annoyances than for *remote* consequences—*George Eliot*) **Removed**, which is usually a predicate adjective,

carries a stronger implication of separateness and distinction than *remote*; it therefore usually implies a contrast between two things apart not only in space or in time but in character or quality (an age far *removed* from the present age in its accomplishments and ideals) (he sought a retreat *removed* from all centers of population) (with peace as far *removed* as it had been at the time of his election—*Paxson*)

Figuratively, *distant* implies slightness of connection or aloofness of manner (a *distant* resemblance) (a *distant* nod) *Remote* imputes to the thing so described a foreign or alien character or an inaccessible nature (I told Oliver about your modern monastery; but the thing is too *remote* from his experience to have any interest for him—*Santayana*) (the captain of a ship at sea is a *remote*, inaccessible creature . . . alone of his kind, depending on nobody—*Conrad*) *Removed* stresses difference, often a diametrical or antithetical difference (to Queen Scheherazade the dream might have seemed not far *removed* from commonplace—*Hardy*) (he was not an oracle *removed* from the people, but a real human being—*Bok*) (he accepted the nomination for considerations entirely *removed* from those influencing the average candidate)

Ant constrict —*Con* *contract, shrink, compress, condense, deflate

distinct 1 *Distinct*, *separate*, *several*, *discrete* are comparable when used in reference to two or more things (sometimes persons) and in the sense of not being individually the same. *Distinct* always implies a capacity for being distinguished by the eye or by the mind as apart from the other or others, sometimes in space or in time but more often in character, nature, or identity (I see three *distinct* objects in the distance, but I cannot identify them) (the novel has two related, but nevertheless *distinct*, plots) (there has been endless discussion whether we have a *distinct* faculty for the knowledge of God—*Inge*) (for him the work of literature is not *distinct* or separable from its author—*L. P. Smith*) *Separate* (see also SINGLE) is often used interchangeably with *distinct* and often in combination with it, as if one strengthened the other (the power . . . is given in two *separate* and *distinct* sections of the constitution—*John Marshall*) (these two characteristics were not *separate* and *distinct* . . . they were held together in vital tension—*Ellis*) But *separate* stresses, as *distinct* does not, the lack of a connection between the things considered, usually by reason of the distance in space or time or the difference in identity of the things in question; thus, a drama with two *separate* plots is not the same as one with two *distinct* plots, for *separate* implies no connection (or, often, only a factitious connection) between the plots, while *distinct* suggests only that they

can be distinguished (a nicety and force of touch, which is an endowment *separate* from pictorial genius, though indispensable to its exercise—*Hawthorne*) (the reestablishment of ethics and esthetics as *separate* and autonomous realms—*Krutch*) *Separate* is also often used in preference to *distinct* when an opposition to *common* or *shared* is implied (please give us *separate* rooms) (the children had *separate* toys and *separate* books) *Several* (see also MANY) is somewhat formal or old-fashioned in this sense; it implies an existence, a character, a status, or a location separate or distinct from that of similar items. It may modify a singular noun, especially when "each" precedes, as well as a plural noun (conduct these knights unto their *several* lodgings—*Shak.*) (each individual seeks a *sev'ral* goal—*Pope*) (will call the members . . . for their *several* opinions—*New Republic*) (a network of concrete highways upon the *several* states—*W. H. Hamilton*) *Discrete*, even more than *separate*, implies that the individuals are not the same and are not connected; it is often more precise than *separate* because it stresses numerical distinctness (that is, distinctness as individuals) rather than difference in kind, nature, or goal; thus, *discrete* things may be exactly the same in appearance, nature, or value, but they are not selfsame and are physically disconnected (the dumb creation lives a life made up of *discrete* and mutually irrelevant episodes—*Huxley*) ([the phage] has been identified as existing in *discrete* units, that is, it is a particle like granulated sugar and not a continuum like molasses—*Furnas*) (the conclusion that gases are made up of *discrete* units (molecules)—*Hogben*)

distinguish 1 *Distinguish*, *differentiate*, *discriminate*, *demarcate* are synonymous when they mean to point out or mark the differences between things that are or seem to be much alike or closely related. *Distinguish* presupposes sources of confusion; the things considered may or may not be alike, but if not alike, they are so closely connected, so indissolubly related, so open to misunderstanding that the differences must be noted or marked out if confusion is to be eradicated; hence, maturity of intellect or of judgment is implicit in the power to distinguish (a child under four will hardly *distinguish* between yesterday and a week ago, or between yesterday and six hours ago—*Russell*) (the aesthetic and ethical spheres, in fact, were never sharply *distinguished* by the Greeks—*Dickinson*) *Differ-*

entiate implies either the possession of a distinguishing character or characters, or more commonly capacity to ascertain differences between things susceptible of confusion <we find in Chinese art a strong synthetic power, which *differentiates* it and lifts it beyond the art of Persia and the art of India—*Binyon*> <if poetry is art, it must produce its effects through a medium which *differentiates* it, without divorcing it, from reality—*Lowes*> <we must have classes small enough to enable the teacher to *differentiate* the strong and the willing from the sluggards—*Grandgent*> **Discriminate** involves the idea of perception; it implies the power to perceive or discern differences, often slight differences, between things that are very much alike <*discriminate* synonyms> <irritated by the wasp's inability to *discriminate* a house from a tree—*E. K. Brown*> <whenever you have learned to *discriminate* the birds, or the plants, or the geological features of a country, it is as if new and keener eyes were added—*Burroughs*> <to *discriminate* between true and false Aristotelianism—*Babbitt*> **Demarcate** implies the setting of literal limits or the marking of literal boundaries, but it can be freely used to suggest a distinguishing between things as clear as if there were lines between them <how shall we *demarcate* Reproduction from Growth?—*Lewes*> <only in periods when a common idea of style pervades the whole production of a people does . . . the work of the craftsman merge, with no *demarcating* difference, in the art which expresses thought and emotion—*Binyon*>

Ant collected —**Con** *cool, composed, unruffled, imperturbable, unflappable, nonchalant

distress *n* Distress, suffering, misery, agony, dolor, passion are comparable when denoting the state of one that is in great trouble or in pain of mind or body. **Distress** commonly implies conditions or circumstances that cause physical or mental stress or strain; usually also it connotes the possibility of relief or the need of assistance <to pity *distress* is human; to relieve it is Godlike—*Mann*> The word is applicable to things as well as to persons; thus, a ship in *distress* is helpless and in peril because of some untoward circumstance (as a breakdown in machinery); a community's *distress* may be the result of a disaster or of an event imposing extreme hardships on the people. When used to designate a mental state, *distress* usually implies the stress or strain of fear, anxiety, or shame <the original shock and *distress* that were caused by the first serious work of scholars on the Bible—*Montague*> <it had evidently been a great *distress* to him, to have the days of his imprisonment recalled—*Dickens*> <she therefore dressed exclusively in black, to her husband's vast amusement and her

mother's rumored *distress*—*Wylie*> **Suffering** is used especially in reference to human beings; often it implies conscious awareness of pain or distress and conscious endurance <extreme sensibility to physical *suffering* . . . characterizes modern civilization—*Inge*> <the losses and hardships and *sufferings* entailed by war—*Russell*> **Misery** stresses the unhappy or wretched conditions attending distress or suffering; it often connotes sordidness, or dolefulness, or abjectness <for bleak, unadulterated *misery* that dak bungalow was the worst . . . I had ever set foot in—*Kipling*> <she had . . . cheated and shamed herself . . . exchanged content for *misery* and pride for humiliation—*Bennett*> **Agony** suggests suffering so intense that both body and mind are involved in a struggle to endure the unbearable <fell with a scream of mortal *agony*—*Mason*> <the *agony* of being found wanting and exposed to the disapproval of others—*Mead*> **Dolor** is a somewhat literary word applied chiefly to mental suffering that involves sorrow, somber depression, or grinding anxiety <heaviness is upon them, and *dolor* thickens the air they walk through—*Frank*> **Passion** is now rare in this sense except in reference to the sufferings of Jesus in the garden at Gethsemane and culminating in his crucifixion.

Con *comfort, console, solace: *help, aid, assist: *relieve, alleviate, lighten, mitigate, assuage, allay

distribute, dispense, divide, deal, dole are comparable when they mean to give out, usually in shares, to each member of a group. **Distribute** implies either an apportioning among many by separation of something into parts, units, or amounts, and by assigning each part, unit, or amount to the proper person or place, or a scattering or spreading more or less evenly over an area <*distributed* his possessions among his heirs> <*distribute* fertilizer by spreading or scattering it over a garden> <*distribute* profits among shareholders in the form of dividends> <*distribute* type by returning each piece of used type to its proper compartment in a case> <the old habit of centralizing a strain at one point, and then dividing and subdividing it, and *distributing* it on visible lines of support to a visible foundation—*Henry Adams*> <all modern societies aim . . . to *distribute* impartially to all the burdens and advantages of the state—*Dickinson*> **Dispense** (see also ADMINISTER 1) differs from *distribute* in not usually implying a spreading out that affects a large number or a separation that reduces the size or amount of each part or portion; rather, it suggests the giving of a carefully weighed or measured portion to each of a group as a right or as due, or as accordant to need <*dispense* alms to the needy> <if every just man that now pines with want had but a moderate and beseeching share . . . nature's full blessings would be well-*dispensed*—*Milton*> <let us . . . receive whatever good 'tis given thee to *dispense*—*Wordsworth*> <a pulsating, metallic, fluorescent world, in which Olympian judgments are *dispensed* by worried word fanciers from their thirty-ninth floor cubicles—*Hilton*> **Divide** (see also SEPARATE) stresses the separation of a whole into parts but it implies as the purpose of that

separation a dispensing of those parts to, or a sharing of them by, each of a group; the term usually implies, if the context gives no further information, that the parts are equal (the three partners *divide* the profits of the business, the size of each share depending on the size of the partner's investment) (claimed that his confederates would not *divide* the booty fairly) (of the rent, a large proportion was *divided* among the country gentlemen—*Macaulay*) (if, for example, he is an evildoer, it is a great comfort to him to know that others likewise are evildoers. *Dividing* the blame lightens the load—*Overstreet*) **Deal** (usually followed by *out*) emphasizes the delivery of something piece by piece, or in suitable portions, especially to those who have a right to expect it (deal the cards for a game of bridge) (deal out equipment and supplies to each soldier) (our fellows were very methodical about the death they were *dealing* out. They dispersed it in the firm, tranquil-seeming way of clerks—*Wolfert*) Often, the term carries no suggestion of distribution, and means little more than to give or deliver (dealt his opponent a blow) (should employ one special man whose sole job is to keep inventing fresh phrases of delight to be *dealt* out in regular doses to authors at work—*Dawson & Wilson*) **Dole** (also frequently followed by *out*) may imply a dispensing of alms to the needy (dole out daily one thousand loaves of bread) (a prince *doling* out favors to a servile group of petitioners—*Dreiser*) but since in this sense it usually suggests a carefully measured portion, it often suggests scantiness or niggardliness in the amount dispensed and does not necessarily suggest a charitable intent (this comfort . . . she *doled* out to him in daily portions—*Fielding*) (I can accept what is given in love and affection to me, but I could not accept what is *doled* out grudgingly or with conditions—*Wilde*)

Ana *area, tract, region, zone, belt: section, sector, division, parcel (see *PART n*): *field, province, territory, sphere

distrust *vb* **Distrust, mistrust** are comparable both as verbs meaning to lack trust or confidence in someone or something and as nouns denoting such a lack of trust or confidence. **Distrust**, however, implies far more certitude that something is wrong than **mistrust**; often it suggests conviction of another's guilt, treachery, or weakness (Octavius had imbibed sufficient philosophy to *distrust* the sword as a cure for all ills—*Buchan*) (the same *distrust* and horror of the unnatural forms into which life for the majority of people is being forced—*Day Lewis*) **Mistrust** suggests domination by suspicion and, usually, fear (he took me into a place so wild that a man less accustomed to these things might have *mistrusted* and feared for his life—*Cather*) (something . . . roused in him a suspicion that in the near future he was not going to have matters quite so much his own way. However, he concealed his *mistrust* as well as he could—*MacKenzie*)

dock *wharf, pier, quay, slip, berth, jetty, levee

doctor *vb* *adulterate, sophisticate, load, weight

doctrinaire dogmatic, magisterial, oracular, *dictatorial, authoritarian

doctrine, **dogma**, **tenet** are synonymous only when they mean a principle (usually one of a series or of a body of principles) accepted as authoritative (as by members of a church, a school of philosophers, or a branch of science).

Doctrine is often used in a much broader sense to denote a formulated theory that is supported by evidence, backed by authority, and proposed for acceptance <the *doctrine* of evolution> <Einstein's *doctrine* of relativity> In the narrower sense *doctrine* retains its basic implication of authoritative teaching, but it presupposes acceptance by a body of believers or adherents <a catechism of Christian *doctrines*> <a . . . mathematical *doctrine* of waves which nowadays has almost come to dominate . . . physics—*Darrow*>

Dogma also stresses authoritative teaching but unlike *doctrine* it seldom implies proposal for acceptance. A dogma is not advanced as reasonable and worthy of acceptance but laid down as true and beyond dispute <the *dogmas* of a church are usually stated in a creed or confession> <in 1870 Pope Pius IX defined the *dogma* of papal infallibility> **Dogma** (or especially its derivative *dogmatic*) often connotes insistence, sometimes arrogant insistence, on authority or imposition by authority <the *dogma* that the king can do no wrong> **Tenet** emphasizes acceptance and belief rather than teaching. It is therefore thought of as a principle held or adhered to and implies a body of adherents <the *tenets* of modern Socialism are not in every instance identical with the doctrines of Karl Marx>

Ana teaching, instruction (see corresponding verbs at TEACH): *principle, fundamental

document 1 **Document**, **monument**, **record**, **archive** denote something preserved and serving as evidence (as of an event, a situation, or the thought of its time). **Document** commonly designates something written or printed (as a letter, a charter, a deed, a will, or a book) or something carrying an inscription (as a coin, a tombstone, or

a medal) that has value as evidence because of its contemporaneousness <while the poor little affairs of obscure, industrious men of letters are made the subject of intensive research, the far more romantic, thrilling, and illuminating *documents* about the seekers and makers of great fortunes, are neither gathered nor cherished—*H. G. Wells*> <*The Waste Land* seems to me chiefly important as a social *document*. It gives an authentic impression of the mentality of educated people in the psychological slump that took place immediately after the war—*Day Lewis*> **Monument** is applicable to whatever serves as a memorial of the past; it is usually applied to a building, work of art, or other relic of the past, especially one that serves as a reminder (as of a country's greatness, a nation's triumphs in war, or a period's accomplishments in art) <the French government has taken over many of the ancient cathedrals in order to preserve them as public *monuments*> <the English Church has no literary *monument* equal to that of St. Thomas, no devotional *monument* equal to that of St. John of the Cross—*T. S. Eliot*> **Record** implies the intent to preserve evidence of something; it denotes matter recorded (as by writing or taping) so that exact knowledge of what has occurred will be perpetuated <keep a *record* of a conversation> <the *records* of the trial were destroyed in a fire> <made six motion-picture *records* of his underseas expeditions—*Current Biog.*> <it is not only the right, but it is the judicial duty of the court, to examine the whole case as presented by the *record*—*Taney*> **Archive** (see also MUSEUM) is applicable to a document or record preserved especially throughout a long period <some rotten *archive*, rummaged out of some seldom-explored press—*Lamb*> Its more common plural form **archives** suggests a miscellaneous accumulation, rather than a carefully selected collection, of records and documents <the *archives* of the Vatican are now accessible to scholars> <the *archives* of every city—*Dryden*>

Ana *evidence, testimony

2 instrument, *paper

dodge *vb* **Dodge**, **parry**, **sidestep**, **duck**, **shirk**, **fence**, **ma-linger** are comparable when meaning to avoid or evade by some maneuver or shift. **Dodge** implies quickness of movement or a sudden evasive shift of position (as in avoiding a blow or pursuit) <they ran to the Abbey, *dodged* the Baronet, armed themselves—*Meredith*> <he was able to *dodge* so that the man's knife went through his sleeve, wounding him only slightly—*Heiser*> It may imply artfulness, or craft, or clever deceit in evading not only the attack of an enemy but similarly the thrusts of a debater, or an examiner, or the demands of an authoritative power <some *dodging* casuist with more craft than sincerity—*Milton*> <the trouble . . . is always being *dodged* or minimized by the moralist—*Forster*> <*dodged* the issue again and again> **Parry** does not imply dodging so much as warding off a blow and turning aside the weapon; it suggests skill and adroitness in defending oneself not only from blows with a weapon but from whatever threatens or proves awkward (as a question or demand) <*parry* an argument by shifting the ground> <*parry* a demand for the payment of a claim by making a counterclaim> <*I parried* her questions by the best excuses I could offer—*Wilkie Collins*> **Sidestep** comes very close to *dodge* in its suggestion of a quick maneuver to evade a blow or the facing of an issue; it usually suggests dexterous action in avoiding something imminent but often, on the other hand, suggests not ultimate avoidance but temporary delay or postponement <the boxer neatly *sidestepped* the blow> <*sidestep* the decision

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

of a matter) <he can no longer *sidestep* the issue> **Duck** implies evasion or avoidance by or as if by a sudden bending or stooping <he never once *ducked* at the whiz of a cannonball—*Pope*> <some ministers and teachers have *ducked* the facts of life—*Bundy*> <the way for a reviewer to *duck* such a question—*Newsweek*> **Shirk** implies evasion or avoidance by means that suggest meanness, cowardice, laziness, or sneakiness <*shirked* his duty to his family> <*shirk* a difficult or dangerous task> <that is my duty and I shall not *shirk* it—*Truman*> <a war which must be fought out and not *shirked*—*Moberly*> <he had . . . *shirked* telling her that no marriage would occur that day—*Bennett*> **Fence** suggests a maneuver comparable to one used in fencing; it may connote parrying, or thrusting, or guarding, but it typically implies more dexterity or more boldness in baffling inquiry than skill in warding off what is awkward <*fence* skillfully on the witness stand> <the president showed a new capability for *fencing* with the press—*Time*> **Malinge**r implies, usually, a shirking (as of one's duties or a hard task) through feigning illness or weakness <some were half inclined to suspect that he was, to use a military phrase, *malingering*—*Macaulay*> <the question whether hysteria is an unintentional device or whether it represents a process of *malingering*—*Bagby*> **Ana** evade, avoid, elude, *escape: *slide, slip
Ant face —*Con* brave, dare, defy, beard, challenge (see FACE)

dominant, **predominant**, **paramount**, **preponderant**, **preponderating**, **sovereign** mean superior to all others in power, influence, position, or rank. Something is **dominant** which is thought of as ruling, as commanding, or as uppermost <a *dominant* race> <the idea of beauty and of a human nature perfect on all its sides, which is the *dominant* idea of poetry—*Arnold*> <I will not say that money has ceased to be the *dominant* force in American life—*Lerner*> Something is **predominant** which is for the time being in the ascendant or exerts the most marked influence <the power of . . . modifying a series of thoughts by some one *predominant* thought or feeling—*Coleridge*> <a variety of subjects . . . in which no particular one is *predominant*—*Cowper*> <the painter whose *predominant* aim is moral instruction—*Binyon*> Something is **paramount** which has preeminence or supremacy in importance, order, rank, or jurisdiction <time is of *paramount* importance—*Roosevelt*> <for most American newsmen the ideal of accurate and objective news reports is fundamental and *paramount*—*Mott*> Something is **preponderant** or **preponderating** which outweighs or overbalances every other thing of its kind in power, influence, force, or number; these terms are commonly used without clear distinction in meaning, but *preponderating* sometimes suggests active operation <the *preponderating* tendency> and *preponderant* the actual effect <for several years this political party has been the *preponderant* party in the affairs of the nation> <the *preponderant* influence of a group of banks> <if the net result was beneficial to the university—and this seems to be the *preponderant* opinion around Madison—it was detrimental to La Follette—*Davis*> Something is **sovereign** (see also FREE) when every other comparable thing is subordinate, inferior, or of lower value; the term therefore imputes unquestioned supremacy to the thing so described <the *Sovereign* Ruler of the universe> <the *sovereign* power in the United States of America is vested in the people> <a *sovereign* remedy> <wearing . . . an amulet *sovereign* against all passion—*Browning*> <promote . . . the *sovereign* good of the community—*Grote*> **Ana** *prevailing, prevalent: preeminent, *supreme, transcendent, surpassing: outstanding, salient, signal (see NOTICEABLE): governing, ruling (see GOVERN)

donation, **benefaction**, **contribution**, **alms** are comparable when they denote a gift of money or its equivalent for a charitable, philanthropic, or humanitarian object. **Donation** is freely used for such a gift <broad *donations*> <seeking small *donations* for myriad worthy causes> It may, however, retain in this sense some feeling of its earlier meaning of the act or right (as of a state, a ruler, or a patron) of granting or giving to a subordinate (as a subject or a client) and is, therefore, the normal term to apply to a gift of substantial value, presented more

or less publicly, and usually without reference to other givers or gifts (the endowment funds of the great universities are increased mainly by *donations* and bequests) (a list of the Rockefeller *donations*) **Benefaction** is often used in place of *donation*, especially when there is the intent to compliment the donor and to imply his benevolence or the beneficence of his gift. The latter, however, is the basic implication and the word may be appropriately used of any benefit conferred or received whether it has money value or not (her *benefactions* are remembered by many philanthropic agencies) (the *benefactions* of the American GIs to the . . . children of Korea—*Hartford Times*) (this *benefaction* totals almost \$5 million—*Americana Annual*) **Contribution** implies participation in giving; it is applicable to small as well as large amounts of money; it is the modest term which one may apply to his own gift, though others may rightly call it a *donation* or *benefaction* (please accept my *contribution* to the endowment fund of your institution) (a community chest *contribution*) (but the Government quickly came to the rescue, and, aided by private *contribution*, built a cutoff wall—*Amer. Guide Series: Minn.*) **Alms** implies the aim of relieving poverty either in former times as the fulfillment of a religious obligation or as a practical manifestation of the virtue of charity (the gift without the giver is bare; who gives himself with his *alms* feeds three,—himself, his hungering neighbor, and me [Christ]—*J. R. Lowell*) or in more recent times as an indication of casual benevolence displayed chiefly in the giving of petty sums to beggars or paupers (though poor and forced to live on *alms*—*Wordsworth*) (a few filthy . . . children, waiting for stray tourists, cried for an *alms*—*Harper's*)

door, gate, portal, postern, doorway, gateway are comparable chiefly as meaning an entrance to a place. **Door** applies chiefly to the movable and usually swinging barrier which is set in the opening which serves as an entrance to a building or to a room or apartment in a building (an oak *door*) (the front *door* of a house) Sometimes *door* is used also of the opening (children came running through the *door*) **Gate** may apply to an opening in a wall, fence, or enclosure but it more commonly denotes a movable and often swinging barrier (especially one made of a grating or open frame or a heavy or rough structure) set in such an opening and closed or opened at will (the north *gate* to the campus) (opening the garden *gate*) **Portal** applies usually to an elaborate and stately door or gate, with its surrounding framework (the *portal* to the temple) (the knights were admitted through the *portal* to the palace) **Postern** denotes a private or retired door or gate (as at the back of a castle or fortress). **Doorway** and **gateway** apply not to the structure but to the passage when a door (in a *doorway*) or a gate (in a *gateway*) is opened for ingress or egress (stand in the *doorway* awaiting the postman) (automobiles passed through the *gateway* in constant succession)

In their extended use these words are still more sharply distinguished. **Door** usually applies to what provides opportunity to enter or withdraw or makes possible an entrance or exit (the love of books, the golden key that opens the enchanted *door*—*Lang*) (I know death hath ten thousand several *doors* for men to take their exit—*John Webster*) **Gate** differs from *door* chiefly in its connotations of facility in admission or of entrance into something large, impressive, wide, or even infinite (what sweet contentments doth the soul enjoy by the senses! They are the

gates and windows of its knowledge—*William Drummond*) (to wade through slaughter to a throne and shut the *gates* of mercy on mankind—*Gray*) **Portal** often carries similar connotations, but it usually applies to a definite place or thing which is itself splendid or magnificent and through which something (as the sun at rising and at setting) is admitted or allowed exit (Heaven, that opened wide her blazing *portals*—*Milton*) (since your name will grow with time . . . have I made the name a golden *portal* to my rhyme—*Tennyson*) **Postern**, on the other hand, implies an inconspicuous or even a hidden means of entrance or escape (it finds a readier way to our sympathy through a *postern* which we cannot help leaving sometimes on the latch, than through the ceremonious portal of classical prescription—*J. R. Lowell*) **Gateway** is usually preferred to *doorway* in figurative use because it more strongly suggests a passage through which entrance is gained to something desirable or difficult (the city was once more the *gateway* to half a continent—*Harold Sinclair*) (the senses were regarded as *gateways* or avenues of knowledge—*Dewey*)

Ant certitude: confidence —*Con* *certainty, conviction, assurance: *trust, reliance, dependence, faith

doubtful, dubious, problematic, questionable are comparable when they mean not affording assurance of the worth, soundness, success, or certainty of something or someone. *Doubtful* and *dubious* are sometimes used with little distinction. **Doubtful**, however, is commonly so positive in its implication as almost to impute worthlessness, unsoundness, failure, or uncertainty to the thing in question (it is *doubtful* whether the captain had ever had so much fun—*Steinbeck*) **Dubious** stresses suspicion, mistrust, or hesitation (as in accepting, believing, following, or choosing); thus, a man of *doubtful* repute is by implication more distrusted than one of *dubious* repute; one who is *doubtful* of the outcome of a project has by implication better grounds for fearing its failure than one *dubious* about it, for the latter may imply mere vague suspicions and fears and little evidence (a *doubtful* prospect) (a *dubious* transaction) (a *doubtful* title to an estate) (dubious friends) (whispers and glances were interchanged, accompanied by shrugs and *dubious*

shakes of the head—*Irving*) <she takes me in, telling me there's nobody there. I'm *doubtful*, but she swears she's alone—*Hammett*) **Problematic** is the only one of the terms here considered that is free from a suggestion of a moral judgment or suspicion; it is especially applicable to things whose existence, meaning, fulfillment, or realization is very uncertain, sometimes so uncertain that the probabilities of truth and of falsehood or of success and of failure are nearly equal <the very existence of any such individual [Homer] . . . is more than *problematic*—*Coleridge*) <excellent acoustics, always so *problematic* a quality in halls built for the hearing of music—*Wharton*) <publishing is now in a very *problematic* state—*Farrell*) **Questionable** may imply little more than the existence of doubt respecting the thing so qualified <the legality of this action is *questionable*) <a *questionable* theory) It more commonly suggests doubt about propriety and may imply well-grounded suspicions (as of immorality, crudity, or dishonesty) that for one reason or another need to be expressed in guarded terms; thus, to say that a man is a *questionable* character is to cast a reflection on his honesty or morality; *questionable* dealings suggest underhandedness and dishonesty <women of *questionable* virtue> <the propriety of Lydia's manners was at least *questionable*—*Shaw*) <the illustration is *questionable*, but the notion implied may be sound—*Alexander*)

dough, batter, paste are quasi-synonyms often confused in their modern cookery senses. All denote a mixture of flour, liquid, salt, and supplementary ingredients, but each suggests a difference both in consistency as a result of the variety and proportion of ingredients and in use. **Dough** applies to a mixture with only enough liquid in relation to the flour to bind the ingredients while leaving the mixture sufficiently stiff to knead or to shape before baking. Ordinarily other ingredients (as a leavening agent, fat, and sugar) are included to improve the texture, flavor, and nutritive qualities of the ultimate product which includes such items as bread, biscuit, rolls, and some kinds of cake and cookies. **Batter** applies to a thinner mass in which the proportion of liquid is much greater than in dough; characteristically, also, it contains eggs, and often baking powder, sugar, and fat. It may be used for cakes that are shaped by the pan in which they are baked or for those that are poured in small amounts on a hot griddle or pan and quickly cooked. **Batter** also designates a similar mixture of flour, liquid, and eggs into which raw food (as fish or oysters) are dipped before frying in hot fat. **Paste** applies to a mixture like *dough* in its stiffness and in its admitting of being rolled and shaped but differs in implying the use of a large proportion of fat and a very small proportion of liquid; it names, therefore, the mixture out of which pastries (as pies and tarts) are made.

meaning to furnish or provide with a gift. **Dower** specifically denotes the provision of the dowry which a woman brings to a husband in marriage <a well-*dowered* bride> It may also imply the bestowal of a gift, talent, or good quality <poets *dowered* with genius> <nature had so richly *dowered* him—*Symonds*) **Endow** in its basic sense implies the bestowing of money or property on a person or institution for its support or maintenance <with all my worldly goods I thee *endow*—*Book of Common Prayer*) <erect and *endow* a hospital> <a large bequest sufficient to *endow* the new college> Like *dower* it may be extended to the giving of any good thing, often with a suggestion of enhancing or enriching the recipient <Shakespeare took these words . . . and *endowed* them with new significance—*Kilby*) <a fascinating woman *endowed* with every grace> **Endue** may mean to clothe or invest with something (as a garment, a dignity, a right, or a possession) <a loose gown . . . such as elderly gentlemen loved to *endue* themselves with—*Hawthorne*) <to make him a citizen of the United States, and *endue* him with the full rights of citizenship—*Taney*) <a new and penetrating light descends on the spectacle, *enduing* men and things with a seeming transparency—*Hardy*) **Endue** has become so confused with *endow* in its extended sense of to bestow upon one a faculty, power, or other spiritual or mental gift that it is difficult to trace any differences in meaning between the two words. But *endow* in precise use usually implies a permanent enriching, and *endue* an investing or clothing (either temporarily or permanently) with a specific quality or character <those who are the most richly *endowed* by nature, and accomplished by their own industry—*Spectator*) <finer faculties with which the continued process of evolution may yet *endow* the race—*Montague*) <the Revolution awakened it [French democracy] into consciousness . . . and *endued* it with efficient force—*Brownell*)

downcast, dispirited, dejected, depressed, disconsolate, woebegone mean affected by or showing very low spirits. **Downcast** implies a being overcome by shame, mortification, or loss of hope or confidence; it usually suggests an inability to face others or an utter lack of cheerfulness <his abstraction, and *downcast*, but not melancholy, air—*Meredith*) <she comes into the room very determinedly: the two men, perplexed and *dōwncast*, following her—*Shaw*) **Dispirited** implies extreme low-spiritedness occasioned by failure to accomplish or to get what one wants or to achieve what one wishes to attain; it usually implies discouragement or a being disheartened <he, *dispirited*, left the talking all to her—*Meredith*) <*dispirited* by their futile efforts—*Grandgent*) <sick and *dispirited*, he gave up his Arabian plan and started on the return voyage to Italy—*Buchan*) **Dejected** implies greater prostration of the spirits than either *downcast* or *dispirited* with sudden but often temporary loss of hope, courage, or vigor <Catherine took up her work directly, saying, in a *dejected* voice, that her head did not run upon Bath—much—*Austen*) <I may, as I lie on the sand, be happy, *dejected*, in vacant or in pensive mood—*Lowe*) **Depressed** suggests a sinking under a heavy weight or a burden too great to be borne; it may express a temporary or a chronic mood or reaction and may, unlike the other terms of this group, indicate a serious inability to be normally active and happy <*depressed* by his failures to the point of suicide> <my spirits have been more *depressed* than is common, even with me—*Cowper*) <when nothing happens they become sad and *depressed*—*Anderson*) **Disconsolate** fundamentally implies comfortlessness and carries a strong suggestion

of being inconsolable or exceptionally uncomfortable; it may sometimes suggest no more than a frame of mind in which depression and disappointment are associated with discomfort or grief (the Jews sat *disconsolate* on the poop; they complained much of the cold they had suffered in their exposed situation—*Borrow*) (Adrian hurried after Richard in an extremely *disconsolate* state of mind. Not to be at the breakfast and see the best of the fun, disgusted him—*Meredith*) **Woebegone** usually suggests a frame of mind but it emphasizes the impression of dejection and defeat produced on an observer not only by the facial expression and posture of the one observed but also by his surroundings or quarters: it may imply dejection, depression, or merely discouragement in the persons affected or desolation or dilapidation in their surroundings, but the overall impression is that of a defeated, spiritless condition (it was the most *woebegone* farm I had ever seen) (the *woebegone* expression on the countenances of the little children) (a poor mendicant approached, old and *woebegone*—*Lockhart*)

dramatic, theatrical, dramaturgic, melodramatic, histrionic are not close synonyms although all imply special reference to acts as performed by actors or to the effects which are produced by acted plays. **Dramatic** basically denotes relationship to the drama as written or as produced (a *dramatic critic*) (a *dramatic performance*) It may imply an effect or a combination of effects appropriate to the drama (as a stirring of the imagination and emotions by vivid and expressive action, speech, and gesture, or by the exciting complications of a plot) (the *dramatic* appeal of a great orator) (the *dramatic* storytelling . . . of incidents which have a sympathetic hero—*Russell*) (an idyll of Theocritus . . . is today as much alive as the most *dramatic* passages of the *Iliad*—stirs the reader's feeling quite as much—*Cather*) **Theatrical** denotes relationship to the theater (a *theatrical office*) (a *theatrical agent*) It may imply effects appropriate to the theater as the place where plays are produced, and to the demands which its limitations, its convention, and, often, its need of financial success make both upon a play and its performance; the term therefore usually implies a marked degree of artificiality or conventionality, a direct and sometimes a blatant appeal to the senses and emotions, and often an overdoing or exaggeration in gesture, in speech, or in action (the situations are in the most effective sense *theatrical*, without being in the profounder sense *dramatic*—*T. S. Eliot*) (he had already learned that with this people religion was necessarily *theatrical*—*Cather*) **Dramaturgic**, which stresses the technical aspects of the drama and its presentation, may be used in place of *theatrical* when the more or less derogatory connotations of that word are to be avoided and the emphasis is upon those elements in a play which fit it for repre-

sentation in a theater (poetic plays are often lacking in *dramaturgic* quality) (a play that is said to be "good theater" is both *dramatic* and *dramaturgic* in its character) (every *dramaturgic* practice that subordinates the words to any other medium has trivialized the drama—*Bentley*) **Melodramatic** implies a manner characteristic of melodrama; it, therefore, usually connotes exaggerated emotionalism or inappropriate theatricalism (make a *melodramatic* speech) (employ *melodramatic* gestures) (for the first time in his centuries of debate with the Tozers, he was *melodramatic*). He shook his fist under Bert's nose—*Sinclair Lewis*) (but suppose . . . the most lurid or *melodramatic* solution you like. Suppose the servant really killed the master—*Chesterton*) **Histrionic** is more limited than *theatrical* for it implies reference to the tones of voice, gestures, movements, and appearance characteristic of actors, especially in times before realism was attempted in dramatic performances (good looks are more desired than *histrionic* skill—*Shaw*) (a tall, *histrionic*, dark man with a tossing mane—*S. E. White*)

draw *n* **Draw, tie, stalemate, deadlock, standoff** mean an indecisive ending to a contest or competition or a contest or competition ending indecisively. **Draw** usually implies equally matched contestants who compete (as in fighting, performing, or playing) with equal skill and between whom there can be no clear decision as to the superiority of one or the other (the prizefight ended in a *draw*) (the chess match was a *draw*) **Tie** implies a numerical equality (as in the scores attained by competitors or contestants, or in the votes obtained by candidates for office); usually a tie does not remain indecisive, since provisions are often made (as by law or by the rules of a game) for reaching a decision when a tie occurs (there was a *tie* between the two candidates for governor, which was decided by a vote of the legislature) (when a contest ends in a *tie*, a further match is often played to determine the winner) **Stalemate** is fundamentally a term of chess which designates the position of a player when his king, although not in check, cannot be moved without being placed in check and the game is thereby drawn; in extended use, *stalemate* represents a condition from which neither contestant can derive an advantage (was advised to cut his losses by withdrawing . . . but refused, and expended much precious material there in a costly *stalemate*—*D. N. Rowe*) (they believed that they could hold the triumvirs to a *stalemate* till hunger or sedition broke down their armies—*Buchan*) **Deadlock** implies a counteraction or neutralization of the efforts of contending elements (as parties, forces, or factions) that leads to a stoppage of action; it connotes an immobilization because of the equal power of the opposing elements usually in a situation other than a formal competition or contest (it often happens that one party has a majority in the Senate, another party in the House, and then . . . a *deadlock* results—*Bryce*) (so the *deadlock* continues, and neither side is prepared to yield—*Blanshard*) **Standoff** is an informal term usually for a draw or tie but sometimes for a situation where two opponents counteract or neutralize each other, so evenly are they matched (they fought several hours to a *standoff*) (the availability of the bomb to the two greatest powers may mean a *standoff* as far as atomic war is concerned—*Atlantic*)

droop *vb* **Droop, wilt, flag, sag** are comparable when they mean to sink or to lose in vigor, firmness, or freshness.

Droop stresses a hanging or bending downward (as through exhaustion, discouragement, or lack of nourishment) ⟨some of the watchers were *drooping* from weariness—*Cather*⟩ ⟨he sat down heavily, his shoulders *drooping*, his arms falling between his outspread legs—*Caldwell*⟩ In extended use it implies a languishing or a subsiding of something previously thriving or flourishing ⟨oh, ye so fiercely tended, ye little seeds of hate! I bent above your growing early and noon and late, yet are ye *drooped* and pitiful,—I cannot rear ye straight!—*Millay*⟩

Wilt applies especially to plants and suggests a loss of freshness or firmness in flower, leaves, or stems through lack of water or through excessive heat ⟨most cut flowers *wilt* quickly unless given plenty of fresh water⟩ The term often may be extended to various things that grow flaccid or weak in response to some stress (as fear, exhaustion, boredom, or a physical agent) ⟨collars *wilted* in the damp heat⟩ ⟨the witness *wilted* under the cross-examiner's sarcasm⟩ ⟨nor did I ever see the nation *droop* and *wilt* as we saw it wither under the panic of 1907—*White*⟩ ⟨the romance . . . blossomed for six or seven months and then *wilted*—*Commins*⟩ **Flag** may be used of flexible things that hang loosely and limply and, with reference to plants, may be interchangeable with *droop* (leaves *flagging* in the heat); more often it is used of something that loses in vigor or in force so that it suggests dullness, weariness, or languor ⟨the conversation *flagged*⟩ ⟨*Tristan and Isolde*; it's wonderful beyond words—a sustained ecstasy of love that never *flags* or grows monotonous—*Ellis*⟩ This effect of wearying or boring may be attributed not to the thing which drops in interest or stimulating power but to the energy, spirits, interest, or attention that are concentrated on that thing ⟨for a couple of hours he wrote with energy, and then his energy *flagged*—*H. G. Wells*⟩ (these devices succeed . . . in stimulating our interest afresh just at the moment when it was about to *flag*—*T. S. Eliot*) **Sag** implies a sinking or subsiding, especially at one point, through undue weight, pressure, or improper distribution of stresses ⟨the ceiling shows signs of *sagging*⟩ ⟨the bridge *sagged* under the weight of the truck⟩ In extended uses it implies a loss of firmness, resiliency, or power to stand up against pressure, and a consequent drooping or decline ⟨though it *sags* in the middle, the novel is readable throughout—*Havighurst*⟩ ⟨his heart *sagged* with disappointment—*Mason*⟩ ⟨prices on the market *sagged*⟩

drug *n* **Drug, medicinal, pharmaceutical, biologic, simple** are comparable when they denote a substance used by itself or in a mixture with other substances for the treatment of or in the diagnosis of disease. **Drug** is the ordinary comprehensive term in both general and professional use for such a substance, whether of plant, animal, or mineral origin, or produced synthetically, and in its broadest use denotes any substance used as a medicine or in making medicines. Especially in technical use the term also has certain more specific uses; sometimes it may denote a medicinal substance recognized in an official pharmacopoeia or formulary as distinguished from one used in folk medicine or proprietary remedies; even more specifically it may denote a narcotic and especially an addictive narcotic substance. **Medicinal** is interchangeable with *drug* in the latter's comprehensive sense and is often preferred, especially in commerce, in manufacture, and in law where indication of the ultimate use of the substance is for one reason or another desirable

<exports of *medicinals* to China> <*medicinals* are not contraband> **Pharmaceutical** is also often preferred to *drug* by pharmacists and manufacturers, especially as a designation of drugs (as quinine, cod-liver oil, and aspirin) which are commercially refined or prepared or synthetically manufactured. The term is also used to distinguish strictly therapeutic substances from other substances of similar origin or composition <the company produces *pharmaceuticals*, dyes, and cosmetics> **Biologic** is the increasingly frequent designation for a therapeutic product (as a globulin, serum, vaccine, or antibody) that is ultimately a product of living organisms. **Simple** usually denotes a plant product used for its real or fancied medicinal value especially in primitive or folk medicine <boneset, tansy, and other homely *simples*> It may also be used of a plant drug or medicinal preparation containing only one active ingredient.

Ana medicine, medicament, medication, *remedy, physic, specific, cure

druggist, pharmacist, apothecary, chemist denote one who deals in medicinal drugs. **Druggist** is the broadest of these terms and may designate a seller of drugs or medicinal preparations at wholesale or retail and as owner, manager, or employee of the sales establishment; it may often replace the more precise **pharmacist** to denote one who is skilled in compounding drugs and dispensing medicines prescribed by a physician especially when he is thought of primarily as selling these. **Pharmacist**, however, specifically implies, as **druggist** does not, special training in pharmacy, professional standing, and usually licensing following a test of qualifications. **Apothecary** in early use was distinguished from **druggist**, which then designated one who sold crude drugs (as herbs, roots, and other ingredients of medicines) while **apothecary** designated one who compounded these ingredients or made them up into medicines and was, therefore, equivalent to **pharmacist**. The distinction has tended to disappear and **apothecary** may be interchangeable with either **druggist** or **pharmacist** although it is increasingly rare except in historical situations. In England **chemist** is the preferred term.

drunk, drunken, intoxicated, inebriated, tipsy, tight are comparable when they mean being conspicuously under the influence of intoxicating liquor. **Drunk** and **drunken** are the plainspoken, direct, and inclusive terms <*drunk* as a fiddler> <*drunk* as a lord> <dead *drunk*> <I have seen Sheridan *drunk*, too, with all the world; but his intoxication was that of Bacchus, and Porson's that of Silenus—Byron> **Drunk** and **drunken** differ in that **drunk** is commonly used predicatively or postpositively, while **drunken** is chiefly attributive <front yards littered with empty bottles, and three **drunken** boys sprawling on the grass—Glasgow> **Drunken** frequently suggests habitual drinking to excess; it also applies to whatever pertains to or proceeds from intoxication <Stephano, my **drunken** butler—Shak.> <a **drunken** brawl> **Intoxicated** may be exactly synonymous with **drunk**, though it is generally felt to be a less offensive term and has thus come to be applied often to a person but slightly under the influence of liquor <my friend requested me to add, that he was firmly persuaded you were *intoxicated* during a portion of the evening, and possibly unconscious of the extent of the insult you were guilty of—Dickens> **Inebriated** implies such a state of intoxication that exhilaration or undue excitement results <*inebriated* revelers> All these words are used in a figurative sense as implying excess of emotion <*drunk* with joy> <*drunk* with divine enthusiasm—Shelley> <Spinoza saw no recalcitrancy in the face of the universe and

this led Novalis to characterize him as the God-*intoxicated*—Ginnetti> <*intoxicated* poetry, difficult and dense but flashing sparks of overwhelming insight—Time> <a sweet *inebriated* ecstasy—Crashaw> **Tipsy** implies a degree of intoxication that deprives one of muscular or sometimes of mental control <drinking steadily, until just manageably *tipsy*, he contrived to continue so—Melville> **Tight** usually implies obvious intoxication, but does not suggest loss of power over one's muscles <he was *tight*, and, as was characteristic of him, he soon dropped any professional discretion that he might have been supposed to exercise—Edmund Wilson>

drunkard, inebriate, alcoholic, dipsomaniac, sot, soak, toper, tosspot, tippler designate one who drinks to excess. **Drunkard** and **inebriate** suggest the habitude of intoxication but in themselves imply nothing about the causes or effects of such intoxication. **Alcoholic** and **dipsomaniac** both denote a person with defective ability to control his use of intoxicants. In technical usage **alcoholic** is the usual term and often specifically distinguishes the person physically and mentally impaired by compulsive drinking; in more general and often distinctly derogatory use it may approach **drunkard** and **inebriate** but normally carries at least some suggestion of loss of control. **Dipsomaniac**, once nearly coextensive with **alcoholic**, is now little used except to denote a person subject to periodic bouts of compulsive drinking. **Sot** and **soak** are closely comparable in implying excessive and habitual drinking. **Sot** in addition suggests the dulling of faculties and degradation of habits that accompany such drinking. **Soak**, on the other hand, may stress a spongelike capacity for intoxicants and even carry a hint of wry admiration; like the next two terms but unlike **sot** it may be used as a casual or even friendly epithet without connoting any strong disparagement. **Toper, tosspot, and tippler** all imply habitual drinking but carry no inherent implication of intoxication. **Toper** and **tosspot** commonly stress the conviviality and jovialness of group drinking (as in taverns and bars) and may suggest a capacity for heavy drinking without obvious intoxication. **Tippler** carries the idea of light but constant and often secret drinking.

dry adj 1 **Dry, arid** mean devoid of moisture. **Dry** may suggest freedom from noticeable moisture either as a characteristic or as a desirable state <a *dry* climate> <*dry* clothing> <*dry* land> <*dry* provisions> <*dry* floors> or it may suggest deficiency of moisture or the lack of normal or necessary moisture <*dry* soil> <a *dry* summer> <*dry* seedy berries> or, again, it may suggest exhaustion or dissipation of water or other liquid <a *dry* fountain pen> <*dry* pond> <*dry* well> <*dry* bones> **Arid** implies destitution or deprivation of moisture and therefore extreme rather than relative dryness. In its chief applications to regions or territory, it suggests waste or desert land <*arid* sections of the southwestern United States> <*arid* plains> <an *arid* condition of soil> In extended use, as applied to such matters as subjects, books, or sermons, **dry** suggests the lack of qualities which compel interest or attention <the course is *dry* but useful> <in the *driest* passages of her historical summaries these delightful descriptions come running to the rescue—Payne> **Arid**, on the other hand, connotes absence of all qualities which mark the thing so

qualified as worthwhile, fruitful, or significant <an *arid* treatise on poetry> <the frank elucidation of such a principle . . . might imply only bleak and *arid* results—*Holbrook Jackson*> As applied to persons, their manner, or their words and expressions, *dry* implies a loss of normal or often of youthful human warmth, freshness, responsiveness, or enthusiasm; *arid*, an absence of these qualities or an incapacity for them <his *dry* schoolmaster temperament, the hurdy-gurdy monotony of him—*James*> <some *arid* matron made her rounds at dawn sniffing, peering, causing blue-nosed maids to scour—*Woolf*> Specifically, *dry* often suggests the repression of feeling for the sake of outwardly appearing aloof or unperturbed <a *dry* comic style> <comments which did not seem to be censures because uttered in a *dry* tone of voice> *Arid*, on the other hand, often connotes a deadening of feeling, especially as shown by a loss of fervor or hope <if Shakespeare himself ever had that “dark period” . . . it was at least no darkness like that bleak and *arid* despair which sometimes settles over modern spirits—*Krutch*>

dry vb *Dry*, *desiccate*, *dehydrate*, *bake*, *parch* are comparable when meaning to treat or to affect so as to deprive of moisture. *Dry* is the comprehensive word and may be used whatever the process (as evaporation, absorption, or solidification) or method (as heating, draining, or aerating) by which the result is attained <clothes *dried* in the wind> <*dry* up a ditch> <*dry* dishes with a towel> <*dry* bricks in a kiln> *Desiccate* is narrower in its range of reference and implies a complete deprivation of moisture, especially of vital juices, and often therefore, in its common extended use, a withering or shriveling. It is applicable to animal and vegetable products preserved by thorough drying <*desiccated* fish> or it may be applied to persons or to their attitudes, activities, or expression which have lost all their spiritual or emotional freshness or vitality <analysis is *desiccating* and takes the bloom off things—*Babbitt*> <they were all . . . living on the edge of their nerves, a harsh, angular, *desiccated* existence—*Brooks*> *Dehydrate* implies extraction or elimination of water; it is often preferred to *desiccate*, of which it is a close synonym, when the reference is to foods <*dehydrate* vegetables> It is the usual word when the removal of water (or hydrogen and oxygen in the proportion to form water) is by chemical rather than physical means <*dehydrated* alums> and in extended use suggests a removal of what strengthens, inspires, or makes meaningful or pleasing <touches nothing that he does not *dehydrate*—*Economist*> *Bake* implies not only dehydrating by means of heat, but a hardening or caking of what is dried <sun-baked earth> <*bake* bricks> *Parch* stresses the damaging effect of drying by intense heat or drought; it is preferred to *bake*, therefore, when the restoration of the proper amount of water is necessary or highly desirable <a *parched* throat> <record heat waves which have *parched* mid-America's usually productive plains—*N. due adj *Due*, *rightful*, *condign* are comparable when they mean being in accordance with what is just and appropriate. *Due*, which basically means owed or owing as a debt, carries over in the sense here considered a strong implication that the thing so described is grounded upon an obligation, duty, or debt which should not or cannot be ignored; thus, one who takes *due* precautions uses the care that is required by his obligation to look out for his own or for others' safety or well-being; one who has a *due* sense of another person's rights accords to that person all that belongs to him by natural or moral right; one who has *due* respect for the law observes the individual laws as the duty of a responsible citizen. Often the term implies little more than an accordance with what is right, reasonable, or necessary <the *due* relation of one thing with another—*Galsworthy*> <your *due* and proper portion—*Meredith*> <many noncommissioned officers have a firm belief that without a *due* admixture of curses, an order is inaudible to a private—*Montague*> *Rightful* carries a much stronger and more consistent implication than *due* of a ground in right and justice, and usually suggests a moral or legal claim <the *rightful* heir to the estate> <possess the *rightful* authority> <looked askance, jealous of an encroacher on his *rightful* domain—*Hawthorne*> <the disloyal subject who had fought against his *rightful* sovereign—*Macaulay*> *Condign* applies to something that is distinctly deserved or merited and usually something that neither exceeds nor falls below one's deserts or merits; the term is used chiefly of punishment, often with the implication of severity <he had been brought to *condign* punishment as a traitor—*Macaulay*> <the particular troubles which involved Messrs. due *n* **Due, desert, merit** are comparable when they mean what is justly owed to a person (sometimes a thing), especially as a recompense or compensation. **Due** usually implies a legal or moral right on the part of the person or thing that makes the claim or is in a position to make the claim and suggests a determination of what is owed by strict justice (more is thy *due* than more than all can pay—*Shak.*) (carve to all but just enough, let them neither starve nor stuff, and that you may have your *due*, let your neighbor carve for you—*Swift*) (giving each man his *due* . . . impartial as the rain from Heaven's face—*Lindsay*) **Desert** (often in plural *deserts*) suggests not a legal right but a moral right based upon what one actually deserves, whether it be a reward or a penalty (‘‘My lord, I will use them according to their *desert.*’’ ‘‘God's bodykins, man, much better: use every man after his *desert*, and who should ‘scape whipping?’—*Shak.*) (you have deprived the best years of his life of that independence which was no less his *due* than his *desert*—*Austen*) (any Federal officer, regardless of his *deserts*, has much prestige—*Heiser*) **Merit** is a somewhat complex term, often shifting in its major implication but (see also EXCELLENCE) commonly implying a deserving either of reward or punishment on the ground of what has been accomplished or of commendation, esteem, or acceptance on the ground of intrinsic and usually excellent qualities (no tribute can be paid to them which exceeds their *merit*—*John Marshall*) (deal with every case on its *merits*) (as a pilgrim to the Holy Places I acquire *merit*—*Kipling*)

2 **Dull, blunt, obtuse** are comparable when they mean the reverse of *sharp, keen, and acute*. As used of things, especially of tools, weapons, and instruments, **dull** refers to either an edge or a point that has lost its sharpness by use (a *dull knife*) (a *dull razor*) (a *dull pencil*) **Blunt** refers to an edge or point that through use, nature, or intention, is not sharp or keen (use the *blunt* side of the knife in prying) (an ax is a *blunt* instrument as compared with a razor, but its edge should not be allowed to become dull through use) **Obtuse** applies to the shape of something whose sides converge at an angle that is broader than a right angle or to a thing terminating in a broad blunt point (the *obtuse* apex of a wing) (an *obtuse* leaf)

In the extended senses of these words, **dull** (see also STUPID) is the most widely applicable and the richest as well as the most variable in its connotations. It implies, in general, a lack or the loss of what gives keenness, intensity, or activity (a *dull pain*) (dull red) (a *dull market*) (dull anger) **Blunt** (see BLUFF for application to manners

and utterances) usually implies a lack of edge or point in the figurative senses of these words. Often, it refers to a person's powers of perception or to his sensibilities, which normally should be sharp or keen (she . . . is *blunt* in perception and feeling, and quite destitute of imagination—*Bradley*) (to the age of twelve . . . all my emotions were wholesomely undeveloped and *blunt*, never at any point exasperated into acute sensibility—*Ellis*) It may also apply to matters (as contrasts, critical judgments, and analyses) normally requiring sharp distinction or differentiation and then imply exceptional conciseness and corresponding loss of fine detail (the function of diplomacy, in the *bluntest* analysis, is to get what you want—*Newsweek*) **Obtuse** suggests such bluntness of perception or sensibilities as makes one insensitive to emotions or ideas (there was, one vaguely feels, something a little *obtuse* about Dr. Burney. The eager, kind, busy man, with his head full of music and his desk stuffed with notes, lacked discrimination—*Woolf*) (an *obtuse* insensitivity to the rich and subtle variety of human relations—*Cohen*) **Ant** sharp (*edge, point*): poignant (*sensation, feeling, reaction*): lively (*action or activity*)

3 **Dull, humdrum, dreary, monotonous, pedestrian, stodgy** mean so unvaried and uninteresting as to provoke boredom or tedium. **Dull** (see also STUPID) implies the lack of all that gives brightness, edge, or point to the person or thing; it need not imply inferiority, but it does suggest, from the point of view of one who judges, a want of interesting character (compared with her, other women were . . . *dull*; even the pretty ones seemed lifeless—*Cather*) (for instance, you draw no inference from your facts. It's *dull*. Why not round the thing off into a good article?—*Rose Macaulay*) **Humdrum** implies a commonplace and routine character; it suggests a lack of variation that persists and colors the life or the people who lead that life (a plain, *humdrum* domestic life, with eight hundred a year, and a small house, full of babies—*Trollope*) (they regarded their adversaries as *humdrum* people, slaves to routine, enemies to light—*Arnold*) **Dreary** (see also DISMAL) applies to something that from the writer's or speaker's point of view seems uninteresting and dull; the word may imply an absence of enlivening character in the thing itself but more often it reveals an attitude of mind (I see that many people find the world *dreary*—and, indeed, there must be spaces of dreariness in it for us all—some find it interesting—*Benson*) **Monotonous** implies an irksome sameness (as of what never changes in quality, character, or appearance); it may be widely applied (as to work, to play, to persons, to scenes, or to noises) (incessant recurrence without variety breeds tedium; the overiterated becomes the *monotonous*—*Lowes*) (we may thus bring a little poetry and romance into the *monotonous* lives of our handworkers—*Inge*) (the sky was as full of motion and change as the desert beneath it was *monotonous* and still—*Cather*) **Pedestrian**, which basically means walking on foot, is applied chiefly to something written, especially in verse, that lacks any quality (as originality in thought or freshness in expression or in imagery) which raises the spirits and that, therefore, is monotonous and uninspired; the term may connote a dull prosaic quality and implies the impossibility of lifting the reader's thoughts, emotions, or imagination (who wandering with *pedestrian* muses, contend not with you on the winged steed—*Byron*) (Crane's verse is of a very *pedestrian* order—*Sidney Lee*) **Stodgy**, which also implies the lack of a quality which inspirits or inspires, is wider in its application, for it emphasizes the heaviness, the solidity, or the lumpishness of something (as a person, a book, or an affair) that should be lighter, brighter, or gayer (a

stodgy discussion) <the reception was a *stodgy* affair> <in England, art must be obvious and *stodgy* before people think it's respectable—*Guy Thorne*>

Befool stresses the effect on the victim, that of being made a fool of in his own eyes or in those of others; it does not so strongly suggest a temperamental weakness in the victim as the preceding words, nor so clearly imply an intent to delude on the part of the agent, as most of the words that follow <confess themselves *befooled* by the candidate, his personable appearance, and his promises> <innocent philosophic critics, too easily *befooled* by words—*Ellis*> <pictures supplant one another so swiftly as to *befool* the eye with the illusion of continuity—*S. H. Adams*> **Trick** implies the intent to delude on the part of the agent by means of a stratagem or ruse, by wiles, or by fraud; it suggests the deliberate intent to deceive, but it need not imply a base end. It may, for example, imply illusion as the end <a skillful dramatist *tricks* the spectators into accepting the impossible as probable> <a magician's success depends partly upon his ability to *trick* his audience> It more often suggests deliberate misleading and the use of cunning or craft <-pills are coated with sugar or chocolate in order to *trick* children into taking them> <he was *tricked* out of his savings by the promises of large returns on an investment> <the people felt that they had been *tricked* into approval of the project> <it enables some lawyers to *trick* us into bringing in the wrong verdict—*Reilly*> **Hoax** may imply indulgence in tricking as a sport or for the purpose of proving how gullible a person or persons can be when a skillful imposture or fabrication is presented to them; it more often suggests a fraud intended to deceive even the most skeptical and often, also, to work for one's own profit or personal advantage <after having been *hoaxed* for the past 40 years, British scientists have discovered that the jaw and teeth of the world-famous "Piltdown man" belong to a modern ape—*Farmer's Weekly*> <a get-rich-quick scheme intended to *hoax* the public> <did Mark Twain intend to *hoax* people by his *Personal Recollections of Joan of Arc*, published without his name and as the work of one of her contemporaries?> **Hoodwink** connotes either a deliberate confusing intended to blind the mind of another to the truth, or, less often, self-delusion arising from one's inability to distinguish the false from the true <he will not be *hoodwinked* by sentimental platitudes into doing things that are against reason> <to *hoodwink* everybody by pretending to conform—*Cabell*> <since she'd *hoodwinked* your uncle, she thought she could pull the wool over my eyes, too—*Kenneth Roberts*> **Bamboozle** usually implies the use of such methods as cajolery, humbug, or illusion to dupe or confuse; the word is often used interchangeably with *trick*, *hoax*, or *hoodwink*, but it is less definite or fixed in its implications <*bamboozled* into a belief that he was a great man> <what Oriental tomfoolery is *bamboozling* you?—*Newman*>

dwarf *n* Dwarf, pygmy, midget, manikin, homunculus, runt are comparable when they mean an individual and usually a person of diminutive size. Dwarf is the general term not only for a human being but for any animal or plant that is definitely below the normal size of its kind; often the term suggests stunted development <his [the fool's] value was trebled in the eyes of the king by the fact of his being also a dwarf and a cripple—*Poe*> Pygmy originally was applied to one of a race of fabled dwarfs mentioned by Homer and others; now it is used especially of one of a people of small stature found in central Africa. In general application the term carries a stronger connotation of diminutiveness and a weaker suggestion of arrested development than dwarf; when used in reference to a person, it often implies relative tininess, sometimes in body but more often in intellect <to him all the men I ever knew were pygmies. He was an intellectual giant—*Byron*> Midget stresses abnormal diminutiveness but, unlike dwarf, carries little suggestion

of malformation or deformity; the term is applied usually to a tiny but otherwise more or less normally shaped person exhibited in a circus or employed in place of a child in theatrical performances <P. T. Barnum's famous midget, Tom Thumb> Manikin is often applied not only to a dwarf but to any human being who for one reason or another seems despicably small or weak <can it be fancied that Deity ever vindictively made in his image a manikin merely to madden it?—*Poe*> Often it suggests an animated doll <a bright-eyed little manikin, naked like all his people—*Forester*> Homunculus usually suggests even greater diminutiveness and often greater perfection in form than midget; it is the specific term for an exceedingly small artificial human being such as was supposedly developed by Paracelsus, a famous Renaissance alchemist. Runt, usually a contemptuous designation, applies to a dwarf or undersized person, especially to one who is conspicuously puny or undeveloped <I always did admire a good, sizable, stout man. I hate a runt—*McClure's Mag.*> The term is also applied to an animal, especially a domestic animal, small of its kind; and it is used specifically of the undersized one of a litter (as of pigs).

each *adj* every, *all

each *adv* Each, apiece, severally, individually, respectively are comparable when they refer to every one of the many or several persons or things comprising a group. All imply distribution. Each and apiece usually connote equality in the amount or value of what is distributed unless the context indicates otherwise <he gave the five children a dollar apiece> <the students have a bedroom and study each> Severally stresses the apartness of each of the persons and things involved but at the same time often, especially in legal use, implies that each of them is favored, bound, guilty, or responsible in the same degree as the group as a whole; thus, to try a group of conspirators severally is to try them not jointly, or together, but one at a time and usually on the identical charge; to be bound jointly and severally is to be under obligation as a group and singly as individuals, damages being recoverable from all or from any member of the group. Individually, like severally, implies a distinction between each member of the group, but it goes further in not suggesting equality (as in responsibility, favor, or disfavor); thus, to try a group of conspirators individually is to try each one on a specific charge, usually on the assumption that they are not equally guilty; to greet each member of a visiting delegation individually is to greet him separately and personally. Respectively is used only when the persons or things involved in the distribution follow a given order and what is distributed goes to each in the same order <he gave John, James, and Edward

ten dollars, five dollars, and three dollars respectively> <the suites of offices 101, 102, 103 are assigned respectively to the president, the treasurer, and the secretary of the company>

eager, **avid**, **keen**, **anxious**, **agog**, **athirst** mean actuated by a strong and urgent desire or interest. Eager implies ardor and, often, enthusiasm; it frequently also connotes impatience <it is not a life for fiery and dominant natures, eager to conquer—*Benson*> Avid adds to eager the implication of greed or of unbounded desire <a too avid thirst for pleasure—Æ> <cultivated, excitable, avid of new things—*Buchan*> <he was convivial, bawdy, robustly avid for pleasure—*F. S. Fitzgerald*> Keen suggests intensity of interest and quick responsiveness in action <boys in white flannels—all keen as mustard, and each occupied with his own game, and playing it to the best of his powers—*Quiller-Couch*> <Tories who are as keen on State interference with everything and everybody as the Socialists—*Shaw*> Anxious emphasizes fear lest one's desires be frustrated or one's hopes not realized; it often additionally connotes insistence or perseverance in making one's desires known <visibly anxious to his wife should be on easy terms with us all—*Replier*> <schoolmasters may be pathetically anxious to guide boys right, and to guard them from evil—*Benson*> Agog suggests being caught up in the excitement and bustle attending something interesting about to be begun or an event eagerly awaited <six precious souls, and all agog to dash through thick and thin—

Cowper) <the abrupt announcement . . . left everybody . . . agog—*Cerf*> **Athirst** implies yearning or longing more vividly than the others; it seldom connotes readiness for action <I that forever feel *athirst* for glory—*Keats*> <one or two great souls *athirst* for pure aesthetic rapture—*Clive Bell*>

Ana desiring, coveting, craving (see *DESIRE vb*): longing, yearning, hungering, thirsting (see *LONG vb*): *impatient, restless, restive

Ant listless —**Con** *indifferent, unconcerned, incurious, aloof, uninterested: apathetic, *impassive, stolid

early adv **Early, soon, beforehand, betimes** share the meaning of at or nearly at a given point of time or around the beginning of a specified or implied period of time. **Early** is used chiefly in reference to a period of time (as a day, a lifetime, an age, or a term) and in dating a happening with reference to the beginning of that period. In such use it implies occurrence shortly after the time at which the period is set to begin or is regarded as beginning <crocus blossomed *early* this spring> <migrations took place *early* in the Middle Ages> <*early* to bed and *early* to rise, makes a man healthy, wealthy, and wise—*Franklin*> <Voltaire perceived very *early* in life that to be needy was to be dependent—*John Morley*> Sometimes, especially when the reference is to a point of time, *early* may mean in advance of the time set or expected or of the usual time; thus, a person who arrives *early* at a meeting and leaves *early* comes slightly before (sometimes just at) the time set or noticeably ahead of the others and leaves before the gathering breaks up; winter came *early* (that is, ahead of the expected or normal time) this year. **Soon** usually refers to a definite point of time (as the present or the beginning of a period, a process, or a course), but it commonly implies occurrence after the moment in mind; thus, when a physician tells a patient to come *early*, he by implication asks that patient to come in advance of the time set for the beginning of his office hours so that the patient may be attended to *soon*, or shortly after the office hours begin; on the other hand, when he asks a patient to come *soon*, he by implication requests another visit shortly after the present one. But *soon* carries not only the implication of subsequence to a specified or implied point of time but also, even more strongly, that of quickness or promptness or lack of delay <I called, and he *soon* appeared> <the absconder was apprehended *soon* after his disappearance> <I hope you will find your ring very *soon*> *Soon*, however, is sometimes used in place of *early*, though with greater emphasis on promptness, in poetry, in some idiomatic expressions, and in the comparative and superlative degrees <late and *soon*, getting and spending, we lay waste our powers—*Wordsworth*> <must you go so *soon*?> <excuse my not writing *sooner*> <the spirit . . . may know how *soonest* to accomplish the great end—*Shelley*> **Beforehand** sometimes implies a time in advance of that set or expected or customary <he promised to be here *beforehand*> More often it refers to a time in advance of a possible, probable, or certain occurrence, and it then usually implies anticipation or anticipatory measures <if one knows a thing *beforehand* one can be prepared> <try to be *beforehand* in dealing with an enemy> <had . . . taken unusual pains to inform himself *beforehand* concerning the subject matter—*Dean*> **Betimes** is a somewhat old-fashioned or literary word that may replace either *early* or *soon* <not to be abed after midnight is to be up *betimes*—*Shak.*> <he tires *betimes* that spurs too fast—*Shak.*> More often it implies occurrence at the proper or due time and therefore stresses seasonableness. Something which happens *betimes* is neither too early nor too late <know the art of giving advice *betimes*> <because he had learned his lesson

betimes, he was able to give perfect satisfaction afterwards> <if we had taken steps *betimes* to create an air force half as strong again . . . we should have kept control of the future—*Sir Winston Churchill*>

earnest n token, *pledge, pawn, hostage

earsplitting *loud, stentorian, hoarse, raucous, strident, stertorous

earth n **Earth, world, universe, cosmos, macrocosm** are comparable when they mean the entire area or extent of space in which man thinks of himself and of his fellow men as living and acting. **Earth** applies, however, only to part of what he knows by sight or by faith to exist; the term usually suggests a distinction between the sphere or globe called astronomically the earth, which he knows to be composed of land and water, and the bodies which he sees in the heavens <this goodly frame, the *earth*—*Shak.*> <land is part of *Earth's* surface which stands at a given time above sea level—*Lord*> It may imply a distinction from heaven and hell <Thy will be done in *earth*, as it is in heaven—*Mt* 6:10> <the infinite loftiness of Mary's nature, among the things of *earth*, and above the clamor of kings—*Henry Adams*> **World** is a far less definite term than *earth*. When applied to a physical entity, it may denote all that illimitable area which to man's senses, at least, includes not only the earth and other planets but all the space surrounding the earth and all the bodies contained within it <it is not accident that wherever we point the telescope . . . wherever we look with the microscope there we find beauty. It beats in through every nook and cranny of the mighty *world*—*R. M. Jones*> To persons who accept the account of creation in Genesis the term denotes the entire system that was brought into being by the word of God <God made the *world*> <expect the destruction of the *world*> The term, nevertheless, is usually used as equivalent to *earth*, the globe <a trip around the *world*> <he wanted to visit every corner of the *world*> As applied to an immaterial entity, *world* may imply the sum total of all the inhabitants of earth and of their interests and concerns <all the *world* loves a lover> <the *world* was one in desiring peace> <the doctrine of imperialism which condemns the *world* to endless war—*Willkie*> or that section or part of this larger world which comes within the knowledge of the individual <man's relation to the *world* about him> <his family and his business comprised his *world*> <among the friends of his three *worlds*, the intellectuals, the Concord family circle, and the farmers, he was always a little on edge with the first—*Canby*> or the section or part of the larger world which is devoted to secular, as distinct from religious or spiritual, concerns <retire from the *world*> <the *world*, the flesh, and the devil> <the *world* is too much with us—*Wordsworth*> <I too love the earth and hate the *world*. God made the first, and man . . . has made the second—*Santayana*> **Universe**, in its most precise sense, denotes the entire system of created things or of physical phenomena, regarded as a unit both in its organization and in its operation <ancient and medieval astronomers regarded the earth as the fixed center of the *universe*> <the astronomers of today teach that the *uni-*

verse is finite but that it is constantly expanding) <what was true for the development of man, the microcosm, must have been true for the genesis of the universe as a whole, the macrocosm—S. F. Mason> *Universe*, however, is also used in reference to an entire system of phenomenal things as that system appears to the limited vision of the typical man or of the individual <from the universe as we see it both the Glory of God and the Glory of Man have departed—*Krutch*> <he inhabited a different universe from that of common men—*Huxley*> *Cosmos*, because of its opposition to *chaos*, carries a stronger implication of order and harmony in operation than *universe*, which it otherwise closely resembles in meaning <were it not for the indwelling reason the world would be a chaos and not a *cosmos*—*Blackie*> *Macrocosm* applies to the universe thought of as a great whole characterized by perfect organic unity exhibited elsewhere only in the small whole, the individual man or *microcosm* <the microcosm repeats the macrocosm—T. H. Huxley> <should these ephemera [flying disks] exist in the macrocosm, it is likely . . . that they would be known to . . . observers of the atmosphere—*Mauer*>

earthly, **terrestrial**, **earthly**, **mundane**, **worldly**, **sublunary** are comparable when they mean of, belonging to, or characteristic of the earth. **Earthly** is used chiefly in opposition to *heavenly* <earthly love> <the earthly paradise> <if I have told you earthly things, and ye believe not, how shall ye believe, if I tell you of heavenly things?—*Jn* 3:12> <a peace above all earthly dignities, a still and quiet conscience—*Shak.*> <there could be a new order, based on vital harmony, and the earthly millennium might approach—*Forster*> **Terrestrial** is sometimes used in place of *earthly* as a more sonorous term; frequently, however, it implies an opposition to *celestial* rather than to *heavenly* (see CELESTIAL) <a terrestrial globe> <a terrestrial telescope> or it may imply a distinction of earth from the other planets <terrestrial magnetism> <whose vision is cosmic, not terrestrial—*Lowe*> <carbon dioxide is, of course, of great importance in long-wave terrestrial radiation, but plays a minor role in solar radiation absorption—*Compendium of Meteorology*> or more specifically in astronomy, a distinction of certain planets assumed to be like the earth from others assumed to be unlike the earth <the terrestrial planets are Earth, Mars, Venus, and Mercury> <there are also celestial bodies, and bodies terrestrial: but the glory of the celestial is one, and the glory of the terrestrial is another—*1 Cor* 15:40> <when from under this terrestrial ball he fires the proud tops of the eastern pines—*Shak.*> **Terrestrial** in some use suggests land as a habitat, rather than water or trees <terrestrial reptiles> <terrestrial plants> <they will still obey natural laws and, if manned, they will still be manned by normal, terrestrial airmen—*Time*> **Earthy**, in the historical development of its senses, has stressed a connection with the earth as soil rather than the earth as the abode of men <an earthy smell> Even when it comes close to *earthly* in its meaning, it carries a stronger implication of grossness of substance or of material interests than *earthly* and is opposed more to *spiritual* than to *heavenly* <the first man is of the earth, earthy: the second man is the Lord from heaven—*1 Cor* 15:47> <my anger and disgust at his gross earthy egoism had vanished—*Hudson*> <with much earthy dross in her, she was yet preeminently a creature of "fire and air"—*Buchan*> **Mundane** and **worldly** both imply a relationship to the world thought of as the affairs, concerns, and activities of human beings especially as they are concentrated on practical ends or on immediate pleasures. *Mundane* specifically suggests an opposition to what is eternal and stresses transitoriness or impermanence <*mundane*

glory> <there I quaff the elixir and sweet essence of *mundane* triumph—L. P. Smith> <Tony knew that she did not allow them to talk of *mundane* affairs on these expeditions to and from church—*Archibald Marshall*> <the occupations and distractions of *mundane* life—*Harold Nicolson*> **Worldly**, which is applied chiefly to persons and their interests, specifically implies indifference to things of the spirit and concentration on whatever satisfies one's love of success, one's desire for pleasure, or one's self-esteem <the obvious thing to say of her was that she was worldly; cared too much for rank and society and getting on in the world—*Woolf*> <the most worldly of the eighteenth-century ecclesiastics—*Belloc*> **Sublunary** is a distinctly literary or poetic term variously interchangeable with *earthly*, *mundane*, and *terrestrial* <all things sublunary are subject to change—*Dryden*> <what then would matter the quakes and sublunary conflicts of this negligible earth?—L. P. Smith>

2 **Easy**, **facile**, **simple**, **light**, **effortless**, **smooth** are comparable when meaning not involving undue effort or difficulty (as in doing, making, giving, or understanding). **Easy** is applicable both to persons and things that make demands for physical or mental effort or that impose a task upon a person and to the acts or activities involved in satisfying such demands or in accomplishing such a task <the book was easy to read> <I would like some more easy reading> <our teacher was easy today; her assignment for tomorrow is short and easy> <an easy riddle> <the place is easy to reach> <the place is within easy reach of the city> <it will not be easy for him to understand your breaking of your promise> <take my yoke upon you, and learn of me . . . for my yoke is easy, and my burden is light—*Mt* 11:29-30> <I have been a dreamer and an artist, a great dreamer, for that is easy, not a great artist, for that is hard—*Ellis*> <it was easy to sit on a camel's back without falling off, but very difficult to . . . get the best out of her—*T. chiefly applies to something which comes, or moves, or works, or gains its ends seemingly without effort or at call; it therefore is often used in derogation implying lack of constraint or restraint, undue haste, dexterity rather than meticulousness, or fluency with shallowness (a writer's *facile* pen) (a woman's *facile* tears) (I am not concerned with . . . offering any *facile* solution for so complex a problem—*T. S. Eliot*) (she was a prey to shoddy, *facile* emotions and moods, none of which had power to impel her to any action—*Rose Macaulay*) (Chrétien was a *facile* narrator, with little sense of the significance that might be given to the stories—*H. O. Taylor*) **Simple** stresses ease in apprehending or understanding; it implies freedom from complication, intricacy, elaboration, or other involvements which render a thing difficult to see through (problems in arithmetic too *simple* to hold the interest of pupils of that age) (true poetry, however *simple* it may appear on the surface, accumulates meaning every time it is read—*Day Lewis*) (the English mother or the English nurse has a *simple* job. She must teach her charge to start as few fights as possible and that there are rules—*Mead*) **Light** implies an opposition to *heavy* in nearly all of its senses, but in the one here considered it suggests freedom from burdensomeness or from exactions that make undue or difficult demands on one (a *light* task) (his work is very *light*) (one generation's *light* reading often becomes another's heavy text—*J. D. Hart*) (light punishment) **Effortless**, though it carries many of the connotations characteristic of *facile*, suggests more the appearance of ease than actual absence of effort; often it implies mastery, skill, or artistry, and the attainment of such perfection that the movements or technique seem to involve no strain (the *effortless* dancing of a Pavlova) (that *effortless* grace with which only a true poet can endow his work—*M. O. Smith*) (a natural, *effortless* style) (the swallows . . . glided in an *effortless* way through the busy air—*Jefferies*) **Smooth** suggests an absence of, or the removal of, all difficulties or obstacles that makes a course or a career easy to follow or to pursue (the car sped along over the *smooth* road) (floated over the expanse within, which was *smooth* as a young girl's brow—*Melville*) (making the lives of the needy a little more *smooth*—*Shields*)

Ant hard —**Con** difficult, arduous (see **HARD**): exacting, *onerous, burdensome, oppressive

eat, swallow, ingest, devour, consume mean to take food into the stomach through the mouth and throat. **Eat**, the common and ordinary term, implies the process of chewing as well as of taking into the stomach and therefore distinguishes itself from **swallow**, which implies merely the passing from the mouth through the throat to the stomach. **Eat** is often used, however, without any clear reference to chewing or swallowing (cattle do not *eat* meat) (the worms have *eaten* into the timber) and, especially in extended use, without implying anything but a slow, gradual process that is comparable to the biting or gnawing that precedes eating in that it wastes or wears away the substance (the waves have *eaten* a channel through the rocks) (a knife *eaten* by rust) (the acid *eats* into the metal) In many idiomatic expressions the literal phrasing recalls the implications of the original meaning but nothing more (eat one's heart out (grieve in silence)) (eat one's words (take back what one has said)) **Swallow** basically implies the second part of the eating process (he has difficulty in *swallowing*) (the tablets are to be *swallowed* without chewing) More often it is used of hurried eating without proper mastication of food (he *swallowed* his breakfast and rushed for the train) In extended use it implies a seizing and taking in or a being seized and taken

in (as by engulfment, engrossment, or suppression) (the ship was *swallowed* up by the sea) (swallow one's resentment) **Ingest** is a physiological term that implies a taking in through the mouth and throat into the stomach and is commonly opposed to *egest* (does a man dine well because he *ingests* the requisite number of calories?—*Lippmann*) **Devour** throws the emphasis on greediness; it suggests intense hunger or gluttony in man and voracity in a wild animal (the tramp rapidly *devoured* the food that was set before him) (they saw the tiger rushing on them as if it would *devour* them) In extended use *devour* applies to something (as fire or disease) which destroys or wastes completely (the flames *devoured* the houses one by one) (he that is in the city, famine and pestilence shall *devour* him—*Ezek 7:15*) or to something which preys upon one as insistently as a beast or bird of prey (devoured by fear) Sometimes, however, it approaches *swallow* in its reference to something which engrosses the mind, but it heightens the implications of avidity and zest in taking in (devoured all the books on aviation that he could get) (devoured the scene before him) **Consume** (see also **WASTE, MONOPOLIZE**) usually means little more than *eat* and *drink*, for which it serves as a term including both or either (whoever came late had to start with the course which the captain was then . . . *consuming*—*Heiser*) (after taking a piece of asparagus in her hand, she was deeply mortified at seeing her hostess *consume* the vegetable with the aid of a knife and fork—*Shaw*) Very often, however, it adds to *eat* the implications of using up (my stock of provisions had been so long *consumed* that I had forgotten the flavor of pulse and maize and pumpkins and purple and sweet potatoes—*Hudson*)

Con *common, ordinary, familiar: *usual, customary, habitual: normal, natural, typical, *regular

eccentricity, idiosyncrasy are not always clearly distinguished when they denote an act, a practice, or a characteristic that impresses the observer as strange or singular. **Eccentricity** (compare **STRANGE**) emphasizes the idea of divergence from the usual or customary; **idiosyncrasy** implies a following of one's peculiar temperament or bent especially in trait, trick, or habit; the former often suggests mental aberration, the latter, strong individuality and independence of action (as the country became more thickly settled and its economy more tightly knit, *eccentricity* declined and conformity became a virtue—*Com-mager*) ([his] house . . . had an outer and visible aspect of proud reserve, and appeared to have developed some of the *eccentricities* which come of isolation—*Bierce*) (letters to native princes, telling them . . . to refrain from kidnapping women, or filling offenders with pounded red pepper, and *eccentricities* of that kind—*Kipling*) (this decided love of the slope, or bank above the wall, rather than below it, is one of Turner's most marked *idiosyncrasies*—*Ruskin*) (what I learned of mathematics and science has been . . . of great intrinsic value, as affording subjects of contemplation and reflection, and touchstones of truth in a deceitful world. ecstasy *n* Ecstasy, rapture, transport denote a feeling or a state of intense, sometimes excessive or extreme, mental and emotional exaltation. Ecstasy in its earlier sense, which is now found chiefly in religious and poetical writings, implies a trancelike state in which consciousness of one's surroundings is lost and the mind is intent either on what it contemplates (as does the mystic) or on what it conceives and creates (as does the inspired poet or artist) <like a mad prophet in an *ecstasy*—*Dryden*> <anthems clear, as may with sweetness, through mine ear, dissolve me into *ecstasies*, and bring all Heaven before mine eyes—*Milton*> In later and now general use the term implies overmastering, entrancing joy, or other emotion that exalts the mind and overcomes the senses <men in whom the manual exercise of combat seems to light a wonderful fire in the blood. To them battle brings *ecstasy*. They are ravished above pain and fear—*Montague*> <she loved him with an acute, painful *ecstasy* that made her dizzy and blinded her to all the world besides—*Rose Macaulay*> <their faces were fixed in a calm *ecstasy* of malevolence—*Wylie*> **Rapture** in its early religious use and still occasionally in theology, mysticism, and poetry differs from *ecstasy* in implying a lifting of the mind or soul out of itself by divine power, so that it may see things beyond the reach of human vision; the experiences narrated by the Apostle Paul of being caught up to the third heaven are in this sense *raptures*. In its chief current sense *rapture* merely implies intense bliss or beatitude with or without the connotation of accompanying *ecstasy* or loss of perception of everything else <I drank it in, in a speechless *rapture*—*Mark Twain*> <as a child I first read Pope's Homer with a *rapture* which no subsequent work could ever afford—*Byron*> <she burned again with the same *ecstasy*, the same exaltation. How fine it had been, to live in that state of *rapture*!—*Sackville-West*> <continual ups and downs of *rapture* and depression—*Wharton*> **Transport** applies to any violent or powerful emotion that lifts one out of oneself and, usually, provokes enthusiastic or vehement expression <I mean to . . . support with an even temper, and without any violent *transports* . . . a sudden gust of prosperity—*Fielding*> <*transports* of rage—*Austen*> <what a *transport* of enthusiasm!—*Landor*> <in art, as in poetry, there are the *transports* which lift the artist out of . . . himself—*Pater*> <a periodical that is weekly moved to *transports* of delight

eddy *n* Eddy, whirlpool, maelstrom, vortex mean a swirling mass especially of water. Eddy implies swift circular movement (as in water, wind, dust, or mist) caused by a countercurrent or, more often, by something that obstructs; it is usually thought of less as dangerous than as annoying or confusing <it is blunt tails [of ships] rather than blunt noses that cause *eddies*—*W. H. White*> <a thick brown fog, whirled into *eddies* by the wind . . . abolished the landscape from before our smarting eyes—*Huxley*> **Whirlpool** suggests a more extensive and more violent eddy in water; usually it implies a force of swirling water (as at a meeting of countercurrents) so great as to send whatever enters whirling toward a center where it is sucked down <pass safely through the *whirlpool* of the Niagara River in a barrel> but it may also be extended to other things that draw or suck one in like a swirl of raging water <live in a *whirlpool* of excitement> <Europeans . . . have assumed . . . that public life will draw . . . enough of the highest ability into its *whirlpool*—*Bryce*> **Maelstrom** is basically the name of a very powerful whirlpool off the west coast of Norway which was supposed to suck in all vessels that passed within a wide radius; the term is extended to any great turmoil that resistlessly drags men into it <in one wild *maelstrom* of afflicted men—*J. S. C. Abbott*> <in the *maelstrom* of wild controversy> <the ancient taboos were gone, lost in the *maelstrom* of war—*Coulton Waugh*> **Vortex** usually suggests a mass of liquid (as water) or gas (as air) rapidly circulating around a hollow center; it is visualized principally as something which draws all that become involved in the swirling into its center <the cleansing power of the *vortex* of water in a washing machine> <the noise of the *vortex* of soapy water draining from the bathtub> <conventions are shifting, and undergoing metamorphosis. . . . But it is hard to estimate justly the significance of their contemporary behavior, because we are caught in the *vortex*—*Lowes*> <it is Koestler and Silone, who went deepest into the *vortex* of revolutionary activity, who emerge with the profoundest insights—*Time*> <drawn back into the emotional *vortex* of a youthful love affair—*Geismar*>

edit *vb* Edit, compile, revise, redact, rewrite, adapt, though not strict synonyms, are sometimes confused when used of the preparation of material for publication. Edit covers a wide range of meaning, sometimes stressing one implication, sometimes another. It fundamentally implies preparation for publication of a work, often the work of another or of others; thus, to *edit* a text (as a play of Shakespeare) usually means to present the text as nearly as possible in the form intended by the author, but it often suggests the modernization of spelling, the giving of variant readings, or the addition of comments or glosses; to *edit* a newspaper or magazine means, in general, to become responsible for the contents and policy of the periodical as a whole, sometimes by doing all or most of the work involved but far oftener by supervising the work of a staff, by exercising surveillance of all

outside writers or of the articles they write, and sometimes by writing editorials or leaders; to *edit* a work of reference (as a dictionary or encyclopedia) means to plan and execute a new work or one of its later editions, or, more often, to supervise the work of subordinates charged with the execution of those plans. Because the details of editing vary according to the nature of the work edited, the verb is often used narrowly with a stress on one of these implications; thus, to *edit* often currently implies the cutting out of material for the sake of improvement or to meet limitations of space but often for other reasons that concern the person or the institution involved (<edit a classic for high school use> **Compile** in reference to literary material stresses a gathering together of material, whether written by oneself or obtained from varied sources, to form a collection, an anthology, or a work of reference; often, in addition, it implies the performance of the tasks of an editor, for it suggests need of skill in arrangement, in interpretation, and in dealing with textual problems <Palgrave compiled in the first volume of the Golden Treasury one of the best anthologies of English poetry> <the French Academy . . . took forty years to compile their Dictionary—William Adams> **Revise** (see also CORRECT) implies a review of an earlier draft or edition to see where it can be improved and the actual work of improving <twenty years after Dr. Smith's death his standard work on this subject was revised and brought up-to-date by Dr. Jones> <the society finally decided to revise its bylaws> **Redact** is used mostly by literary and historical scholars, especially in its derivative forms *redaction* and *redactor*, to imply the presentation of something in form for use or for publication. It may imply careful framing of or giving expression to some material <council of ministers . . . engaged in redacting the two proclamations—W. G. Clark> but it more often suggests editing of materials <the redaction of this great work . . . was ultimately confided to Diderot—Jefferies> or even, especially in the form *redactor*, the giving of a new form to an old work (as by revision, rearrangement, or addition) <the visit of Julius Caesar to Egypt in the *Pharsalia* is seized upon by its [medieval] redactor to introduce . . . the liaison between Caesar and Cleopatra—Loves> <whatever delicacy and poignancy the tale has in Ovid's version eludes the Elizabethan redactor—PMLA> **Rewrite** implies a putting into a form suitable for publication of a set of facts or of material gathered by another (as a reporter). The verb often occurs in this sense but is not so common as the noun *rewrite* designating such an article <made a complete rewrite of his earlier draft> <it is this journalist's function to rewrite stories sent in by local representatives in nearby towns> <an old song which Burns has simply rewritten—Kilby> <the reporter at the scene of the catastrophe telephoned his story to a rewrite man in his editorial office> **Adapt** (for fuller treatment see ADAPT) implies a free alteration of the work of someone else to make it suitable for other readers or for another medium <the play was adapted from a French farce> <the book was adapted with success for the stage—J. D. Hart> <the tunes he adapted freely from French vaudeville—Edward Sackville-West & Desmond Shawe-Taylor>

Ana *make, fabricate, fashion, form

edition, impression, reprinting, printing, reissue are capable of being distinguished when used to designate the total number of copies of the same work printed during a stretch of time. **Edition**, as now used by publishers and to some extent by printers, applies to all the books and also to all the newspapers printed from the same type or plates made from it. Terms such as *special edition*,

limited edition, and *anniversary edition* are sometimes used to indicate the particular form or format in which a fixed text is presented; but in United States copyright law a different edition must incorporate some material addition to or revision of the original matter. Hence, when the first edition gives way to the second edition, the second edition to the third edition, and so on, a definite change in content is implied. The work may have been revised in whole or in part, whether by bringing it up-to-date or by varying it (this is especially true of newspapers) to suit a particular clientele, but in all cases there must have been changes involving an entire or partial resetting of type before a work can be said to go into a new edition <the 14th edition of the *Encyclopaedia Britannica*> <you will find it in the city edition of the *New York Times* for January 17th> **Impression** applies to all of the books (also prints or engravings) run off by the press at one time. The standing type or plates are then stored until a later impression (often called a **reprinting**) is needed. It is now the general practice among publishers to speak of the aggregate number of copies of a new book run off from the press in a large number and at one time (or, in technical language, printed in a continuous run from a single makeready) as an *impression* rather than an *edition*, thereby respecting the latter word's implication of substantial changes in content <a work which went through several impressions> **Printing** is often used as practically equivalent to *impression* or *reprinting* but it is sometimes preferred as implying some minor corrections <the book is already in its tenth printing> **Reissue** is used to denote a republication, usually after some time, of a work which is out of print. The reissue may differ in price from the original edition or impression owing to changes in paper or in binding, and it may differ in further ways requiring a resetting of type in whole or in part.

educate train, discipline, school, *teach, instruct

educer, evoke, elicit, extract, extort mean to bring or draw out what is hidden, latent, or reserved. **Educer** usually implies the development and outward manifestation of something potential or latent <Gray, with the qualities of mind and soul of a genuine poet . . . could not fully *educer* and enjoy them—Arnold> <seem to be able to *educer* from common sense a more or less clear reply to the questions raised—Sidgwick> **Evoke** basically suggests the voice or the words of a magician compelling spirits to leave the other world or the dead to arise from their graves <*evoke* a demon> <*evoked* the ghost of his father> In current use the term ordinarily implies the operation of a powerful agency that produces an effect instantly or that serves as a stimulus in arousing an emotion, a passion, or an interest <the delight which growing flowers and blossoming trees *evoke*—Binyon> <it is useless to obtrude moral ideas [upon children] at an age at which they can *evoke* no response—Russell> <all harmonies . . . are latent in the complex mechanism of an organ, but a master's hand is necessary to *evoke* them—Loves> **Elicit** usually implies pains, trouble, or skill in drawing something forth or out; it often implies resistance either in the person or thing that is the object of effort <*elicit* important information from a witness by cross-examination> <it is the trouble we take over our children that *elicits* the stronger forms of parental affection—Russell> **Extract** implies the action of a force (as pressure or suction) <*extract* the juice of an orange> <*extract* a tooth> <to *extract* all the dramatic value possible from the situation—T. S. Eliot> <he had not that faculty of *extracting* the essence from a heap of statements—Dickens> <to make the comparison at all was . . . to return to it

often, to brood upon it, to *extract* from it the last dregs of its interest—*Henry James*) **Extort** implies a wringing or wresting especially from one who is reluctant or resisting <extort money from one's relatives> <extort a promise> <she did at last extort from her father an acknowledgment that the horses were engaged—*Austen*> <whose income is ample enough to extort obsequiousness from the vulgar of all ranks—*Bennett*>

effect *n* 1 **Effect, result, consequence, upshot, aftereffect, aftermath, sequel, issue, outcome, event** are comparable in signifying something, usually a condition, situation, or occurrence, ascribable to a cause or combination of causes. **Effect** is the correlative of the word *cause* and in general use implies something (as a bodily or social condition or a state of mind) necessarily and directly following upon or occurring by reason of a cause <the effect of the medicine was an intermittent dizziness> <tanning is the effect of exposure to sunlight> <low mortality, the effect of excellent social services available in every village—*Petersen*> **Result**, close to *effect* in meaning, implies a direct relationship with an antecedent action or condition, usually suggests an effect that terminates the operation of a cause, and applies more commonly than *effect* to tangible objects <his limp was the result of an automobile accident> <the subsiding flood or surface waters cause mineral deposits and the result is a mound—*Duncan-Kemp*> **Consequence** may suggest a direct but looser or more remote connection with a cause than either *effect* or *result*, sometimes implying an adverse or calamitous effect and often suggesting a chain of intermediate causes or a complexity of effect <one of the consequences of his ill-advised conduct was a loss of prestige> <this refined taste is the consequence of education and habit—*Reynolds*> **Upshot** often implies a climax or conclusion in a series of consequent occurrences or the most conclusive point of a single complex gradual consequence <we spent the time swimming at Glenelg and dancing at the Palais Royal in the city. The upshot was that, before we left . . . we were engaged—*Ingamells*> <they won the battle, and the upshot was a short-lived bourgeois republic—*Lewis & Maude*> <the upshot of the whole matter was that there was no wedding—*Colum*> **Aftereffect** and **aftermath** both usually designate secondary rather than direct or immediate effects. **Aftereffect** besides designating a secondary effect sometimes suggests a side effect but more generally implies an effect ascribable to a previous effect that has become a cause <the aftereffects of an atomic-bomb explosion—*Current Biog.*> <although the pioneer effort had reached a dead end, its aftereffects were all too apparent—*Kohler*> <to the left of the highway the blackened appearance is the aftereffect of a fire that has recently swept across the flat—*G. R. Stewart*> **Aftermath** often suggests a more complex effect or generalized condition than *aftereffect* and usually carries the notion of belated consequences that appear after the effects, especially disastrous effects, seem to have passed <the serious dislocations in the world as an aftermath of war—*U. S. Code*> <the aftermath of the epidemic in Memphis was worse than the dismal days of Recon-

struction—*Amer. Guide Series: Tenn.*> **Sequel** usually signifies a result that follows after an interval <spinal curvature . . . may be a symptom or a sequel to many different diseases—*Fishbein*> <she lay rigid experiencing the sequel to the pain, an ideal terror—*Stafford*> **Issue** adds to *result* the implication of exit or escape (as from difficulties); it therefore usually designates a result that is a solution or a resolution <a contest in which the issue is still the greatest and gravest of all, life or death—*A. C. Ward*> <the war was by then obviously proceeding towards a successful issue—*F. M. Ford*> **Outcome**, though often interchangeable with *result* or *issue*, may put less stress on the notion of finality than does *issue* <the outcome of the presidential election> <the enduring organisms are now the outcome of evolution—*Whitehead*> <one outcome of this report was the formation of the Southern Conference for Human Welfare—*Current Biog.*> **Event**, which is both uncommon and somewhat archaic in this relation, usually carries the notion of an unpredictable or unforeseeable outcome and comes very close to the related *eventuality* in its implication of a possible or contingent effect or result <the happiness of Rome appeared to hang on the event of a race—*Gibbon*> <he employed himself at Edinburgh till the event of the conflict between the court and the Whigs was no longer doubtful—*Macaulay*> <the calm assumption that I should live long enough to carry out my extensive plan at leisure . . . has in the event been justified—*Ellis*>

Ant cause —**Con** determinant, antecedent, reason, occasion (see CAUSE): basis, ground, *base, foundation, groundwork

2 in plural form **effects** *possessions, belongings, means, resources, assets

effect *vb* 1 accomplish, achieve, *perform, execute, discharge, fulfill

Ana *reach, attain, achieve, compass, gain: finish, complete, conclude, end, terminate, *close: implement, *enforce: *realize, actualize
2 *affect

effective, effectual, efficient, efficacious all mean producing or capable of producing a result or results, but they are not freely interchangeable in idiomatic use. **Effective** emphasizes the actual production of an effect or the power to produce a given effect <effective thinking> <an effective speaker> <an effective rebuke> <the law becomes effective on the 1st of next month> <research chemists . . . are actively investigating to learn why particular materials are effective and to make them more so—*Morrison*> <persons who will do nothing unless they get something out of it for themselves are often highly effective persons of action—*Shaw*> **Effectual** suggests the accomplishment of a desired result or the fulfillment of a purpose or intention, so that the term frequently becomes synonymous with *decisive* or *final* and looks backward after the event <an effectual measure> <an effectual refutation> <his recommendation was effectual, and I was . . . chosen—*Gibbon*> <an appeal to the emotions is little likely to be effectual before lunch—*Maugham*> **Efficient** may apply to what is actively operative and producing a result and then comes close to *operant* in meaning <it should be obvious that it is the conditions producing the end effects which must be regarded as the efficient causes of them—*Ashley Montagu*> More often it suggests an acting or a capacity or potential for action or use in such a manner as to minimize the loss or waste of energy in effecting, producing, or functioning <an efficient apparatus> <a setup designed for the efficient production of small parts> <a strong tendency to break up cumbersome estates into small, efficient farms—*Nevins*

& *Commager*) As used of human beings with this denotation *efficient* suggests the exercise of such qualities as skill, pains, and vigilance and often becomes synonymous with *capable* and *competent* (an *efficient* housewife takes care of her equipment) (because pasturage is the best and cheapest feed for dairy cows, the *efficient* dairyman takes the best possible care of his pastures—*R. E. Hodgson & W. J. Sweetman*) (a small seedy village grocer is more *efficient* for the limited task he must perform than a supermarket—*Wiles*) **Efficacious** implies the possession of the quality or virtue that gives a thing the potency or power that makes it effective (quinine is *efficacious* in cases of malaria) (good wishes being so cheap, though possibly not very *efficacious*—*Hawthorne*) (certain formulae of blessing especially *efficacious* against devils—*Wylie*)

effort, exertion, pains, trouble mean the active use or expenditure of physical or mental power in producing or attempting to produce a desired result. **Effort** may suggest either a single action or continued activity, but it usually implies consciousness that one is making an attempt or sometimes, even, is laboring or straining to achieve an end (make a final supreme *effort*) (the constant *effort* of the dreamer to attain his ideal—*Henry Adams*) (utterly absorbed in the writing of a private letter—how you lose count of time and have no sense of disagreeable *effort*—*Montague*) **Exertion** in general stresses the active, often vigorous, exercise of a power or faculty (the continued *exertion* of vigilance) (wearied by *overexertion*) (a . . . man, capable of close application of mind, and great *exertion* of body—*Dickens*) Often, however, especially when not followed by *of*, *exertion* means a laborious effort (his work was done with remarkable grace, but with *exertions* which it was painful to witness; for he had but one leg, and had to use a crutch—*Deland*) **Pains** implies toilsome or solic-

itous effort; **trouble** implies exertion that inconveniences or wastes time and patience (was at *pains* to emphasize the nonpolitical character of the visit—*Morgenthau*) (the Indians had exhaustless patience; upon their blankets and belts and ceremonial robes they lavished their skill and *pains*—*Cather*) (is twenty hundred kisses such a *trouble*?—*Shak.*) (‘‘I feel that I am beginning to get a grip of the people . . .’’ ‘‘I should hope so, after the amount of time and *trouble* you’ve taken’’—*Mackenzie*) **Ana** *work, labor, toil, travail: energy, force, *power, might, puissance: endeavor, essay (see under ATTEMPT *vb*)

Ant modesty —*Con* humility, meekness, lowliness (see corresponding adjectives at HUMBLE): diffidence, bashfulness, shyness (see corresponding adjectives at SHY)

eject *vb* **Eject, expel, oust, evict, dismiss** mean to force or thrust something or someone out. **Eject**, although it is the comprehensive term of this group and is often interchangeable with any of the others, carries the strongest implication of throwing out from within. So emphatic is this suggestion that the term covers actions so far apart as those implied by *dislodge*, *disgorge*, *vomit*, *emit*, *discharge*, and many other terms (the volcano *ejected* lava for three days in succession) (eject an intruder from one’s house) (the chimney *ejected* flames rather than smoke) (he was being *ejected* for taunting the pianist—*Atkinson*) **Expel** stresses a thrusting out or a driving away; it therefore more regularly implies the use of voluntary force or compulsion than does *eject* and indicates more clearly than *eject* an intent to get rid of for all time; thus, the stomach *ejects* (rather than *expels*) material in vomiting since the emphasis is on casting out from within; one *expels* (rather than *ejects*) air from the lungs since in this case a degree of voluntary force and permanent ridding are both implicit (expel

a student from college) <a curse . . . in his blood . . . which no life of purity could *expel*—*Meredith*> <Octavian . . . forbade the practice of certain eastern cults, and *expelled* from Rome Greek and Asiatic magicians—*Buchan*> **Oust** implies a removal or dispossession by the power of the law or, in more general use, by the exercise of force or by the compulsion of necessity <in America . . . a new set of officials *oust* the old ones whenever the Opposition *ousts* the Government—*Shaw*> <insidious attempts to disparage the findings of Reason, or to *oust* it from its proper province—*Inge*> **Evict** means to turn out (as from house or home or one's place of business) by legal or equally effective process, commonly for non-payment of rent <after not paying their rent for six months, they were *evicted* by the sheriff> <the revolutionary artists . . . in the first flush of victory . . . literally *evicted* the members and officers of the Imperial Academy—*Read*> <he volunteered to become foster father to a 400-pot family [of orchids] temporarily *evicted* from a nearby greenhouse—*JAMA*> **Dismiss** (see also DISMISS) stresses a getting rid of something such as a legal case by rejecting a claim or prayer and refusing it further consideration <this court reversed the judgement given in favor of the defendant, and remanded the case with directions to *dismiss* it—*Taney*> or a fear, a grudge, or a hatred by ejecting it from the mind or thoughts <I declare to you . . . that I have long *dismissed* it from my mind—*Dickens*> or an unwelcome subject, duty, or prospect by taking adequate measures to ensure its no longer annoying or confronting one <the Judge was sharply angry . . . because he found himself unable to *dismiss* the whole thing by packing the child off—*Deland*>

Ana *exclude, eliminate, shut out, rule out, debar, disbar: *dismiss, discharge, cashier, fire, sack: *discard, cast, shed: reject, repudiate, spurn (see DECLINE)

élan *vigor, vim, spirit, dash, esprit, verve, punch, drive

elapse *pass, pass away, expire

Ana slip, *slide, glide: end, terminate (see CLOSE)

elastic *adj* 1 **Elastic, resilient, springy, flexible, supple** are comparable when they mean able to endure strain (as extension, compression, twisting, or bending) without being permanently affected or injured. *Elastic* and *resilient* are both general and scientific terms; the scientific senses are later and are in part derived from the earlier meanings. **Elastic** in nontechnical use is applied chiefly to substances or materials that are easy to stretch or expand and that quickly recover their shape or size when the pressure is removed <a rubber band is *elastic*> <*elastic* cord for hats> <a toy balloon is an *elastic* bag which can be blown up greatly beyond its original size> In scientific use *elastic* is applicable to a solid that may be changed in volume or shape, or to a fluid (gas or liquid) that may be changed in volume, when in the course of the deformation of such a solid or fluid forces come into play which tend to make it recover its original volume or shape once the deforming force or forces are removed. The term in such use describes a property (*elasticity*) which a substance possesses up to the point (the *elastic limit*) beyond which it cannot be deformed without permanent injury <a body . . . is *elastic* when, and only when, it tends to recover its initial condition when the distorting force is removed Steel, rubber, air . . . are more or less *elastic*—*Foley*> **Resilient** in nontechnical use is applicable to whatever springs back into place or into shape especially after compression; thus, rising bread dough is said

to be *resilient* because it quickly recovers from a deforming pressure by the hand; a tree's branch may be described as *resilient* when it snaps back into its former position once a pull is released. Scientifically, *resilient* is not the equivalent of *elastic*, but it may be used as its counterpart; *elastic* stresses the capacity for deformation without permanent injury, *resilient* the capacity for recovering shape or position after strain or pressure has been removed; thus, when an *elastic* substance is stretched or compressed, it shows itself *resilient*; as arteries gradually become less *elastic* with age, to the same extent they become less *resilient*. **Springy** is a nontechnical term that carries the meanings and suggestions of both *elastic* and *resilient* and stresses at once the ease with which a thing yields to pressure or strain and the quickness of its return <walk on *springy* turf> <firm, *springy* muscles> <a laughing schoolboy . . . riding the *springy* branches of an elm—*Keats*> **Flexible** is applicable to whatever can be bent or turned without breaking; the term may or may not imply resiliency, or quick recovery of shape <lead pipe is *flexible* and may be bent into shape> <a *flexible* young tree often endures a heavy windstorm better than a rigid, fully developed one> <*flexible* and gracious as the willow—*Binyon*> **Supple** applies to things which are, in general, not as solid or firm in structure as some which may be described as *flexible*; it also implies ease in bending, twisting, or folding or flexing, together with resistance to accompanying injury (as from breaking, cracking, or splitting) <*supple* joints and muscles> <a *supple* leather> <mere manual labor stiffens the limbs, gymnastic exercises render them *supple*—*Jefferies*>

In extended use these words often carry the implications of their literal senses. **Elastic** stresses ease in stretching or expanding beyond the normal or appointed limits <an *elastic* conscience> <some principles there must be, however *elastic*—*Buchan*> <an *elastic* term> **Resilient** implies a tendency to rebound or recover quickly (as in health or spirits) especially after subjection to stress or strain (see ELASTIC 2) <a *resilient* constitution> **Springy**, which is less common in extended use, may suggest youth, freshness, or buoyancy <a *springy* step> **Flexible** implies an adaptable or accommodating quality or, when applied to persons, pliancy or tractability <a *flexible* scheme> <a *flexible* arrangement> <his mind became more *flexible* with age—*Crothers*> **Supple**, in its extended use, is applied chiefly to persons or their utterances. Sometimes it suggests little more than flexibility; at other times it implies obsequiousness or complaisance or a show of these with what is actually astute mastery of a situation <in . . . Bismarck, the *supple* spirit is hidden under an external directness and rough assertion—*Belloc*>

Ana pliable, pliant, ductile, *plastic, malleable: limber, lithe, *supple

Ant rigid —**Con** *stiff, inflexible, tense

2 **Elastic, expansive, resilient, buoyant, volatile, effervescent** are comparable when describing persons, their temperaments, moods, acts, or words and meaning indicative of or characterized by ease or readiness in the stimulation of spirit and especially of high spirits. **Elastic** implies an incapacity for being kept down in spirits; specifically it may suggest an ability to recover quickly from a state of depression <those *elastic* spirits . . . had borne up against defeat—*Macaulay*> or a tendency to moods of exaltation, elation, or optimism <there are times when one's vitality is too high to be clouded, too *elastic* to stay down—*Cather*> <not an *elastic* or optimistic nature —on the contrary, rigid and circumscribed, depressed by a melancholy temperament—*Symonds*> <to him whose *elastic* and vigorous thought keeps pace with the sun,

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

the day is a perpetual morning—*Thoreau*) **Expansive** implies exaltation of spirit that tends to make a person unusually genial, communicative, or sociable (she had an *expansive* temperament, a brilliant personality, a widely sympathetic disposition, troops of friends—*Ellis*) (in an *expansive* and not very sober moment, she had told Tod about her adventure—*Sayers*) (while not *expansive* toward visitors, she received them with courtesy—*Raymond Weeks*) **Resilient** usually implies a return to normal good spirits, which may or may not be high spirits (he was as *resilient* as ever, one day utterly exhausted, and the next day ready for fresh labors) (evidently her *resilient* strength was going; she could no longer react normally to the refreshment of food—*Ellis*) (already the shock and horror of it was fading from her *resilient* mind—*Ruth Park*) **Buoyant** implies such lightness or vivacity of heart or spirits as is either incapable of depression or that readily shakes it off (no such immaterial burden could depress that *buoyant*-hearted young gentleman for many hours together—*George Eliot*) (his *buoyant* spirits were continually breaking out in troublesome frolics—*Prescott*) **Volatile** implies diametrical opposition to all that is serious, sedate, or settled; it therefore suggests lightness, levity, or excessive buoyancy of spirits and often flightiness or instability (as giddy and *volatile* as ever—*Swift*) (he seemed to them so *volatile* and unstable. He was an enigma to which they never secured the key—*Ellis*) **Effervescent** implies liveliness, often boisterousness of spirits; it often suggests the effect of release after restraint and even more than *buoyant* implies the impossibility of suppression so long as the mood or temper lasts (takes off like a rocket—*Joseph*)

Ana *spirited, high-spirited, mettlesome: *lively, vivacious, sprightly, animated, gay

electrify *thrill, enthuse

Ana galvanize, excite, stimulate, quicken, *provoke: *stir, rouse, arouse, rally

elemosynary *charitable, benevolent, humane, humanitarian, philanthropic, altruistic

elegance, grace, dignity are comparable only when they denote an impressive beauty of form, appearance, or behavior. **Elegance** is used in reference to persons chiefly when their grooming, their clothes, and the way they wear them are specifically considered; it then often implies fashionableness and good taste, but it stresses perfection

of detail and exquisiteness or, sometimes, overexquisiteness (as in materials, lines, and ornamentation) (the *elegance* in dress of a Beau Brummell) When used in reference to such things as the furnishings of a home, the details of a dinner, or a literary style, the term also implies the perfection and propriety in detail that indicate excellence of taste, a nice selective instinct, and often a restrained luxuriousness (a very pretty sitting room, lately fitted up with greater *elegance* and lightness than the apartments below—*Austen*) (a cultivated man should express himself by tongue or pen with some accuracy and *elegance*—*Eliot*) **Grace** is more commonly applied to what is inward and native than to what is outward and acquired, especially when used in reference to persons; it always suggests a quality or a harmonious combination of qualities that gives aesthetic pleasure through a natural or simple beauty such as is shown in suppleness or rhythm of movement, in clean-flowing lines or contours, or in spontaneity and felicitousness of manner, mood, expression, or style (a behavior so full of *grace* and sweetness, such easy motions, with an air so majestic, yet free from stiffness or affectation—*Montagu*) (the effect upon the observer of this exquisite little edifice . . . was of an unparagoned lightness and *grace*—*Mackenzie*) (she took the congratulations of her rivals and of the rest of the company with the simplicity that was her crowning *grace*—*Wharton*) **Dignity** applies to what compels respect and honor. The term often suggests stateliness, majesty, and elevation of character or style as the compelling cause (the qualifications which frequently invest the facade of a prison with far more *dignity* than is found in the facade of a palace double its size—*Hardy*) (there was a *dignity* in his Client, an impressiveness in his speech, that silenced remonstrating Reason—*Meredith*) (those who are just beginning to appreciate the idea of lending greater *dignity* to the worship of Almighty God—*Mackenzie*) Very frequently in modern use the term suggests the compulsion of intrinsic worth or merit apart from any superficial characteristics that give it external beauty (the *dignity* of work) (the *dignity* of motherhood) (it matters not how trivial the occupation, if the man or woman be wholly given to it, there will be a natural compelling *dignity* in the figure—*Binyon*)

element, component, constituent, ingredient, factor are comparable when they mean one of the parts, substances, or principles which make up a compound or complex thing. **Element** is, except in its specific sense in science, the most widely applicable of these terms, being referable both to material and immaterial and to tangible and intangible things (the native and foreign *elements* in English) (words are the *elements* of a sentence) (the basic *element* of his character) (his life was gentle, and the *elements* so mixed in him that Nature might stand up and say to all the world "This was a man!"—*Shak.*) Always in its scientific sense, often in its general sense, the term implies irreducible simplicity or, if applied to a substance, incapacity for separation into simpler substances (gold, silver, carbon, lead are among the chemical *elements*, or

ultimate building units of matter) <analyze the *elements* of a situation> <another *element* common to all novels is characterization—*Jacobs*> *Component* and *constituent* are often used interchangeably for any of the substances (whether elements or compounds) which enter into the makeup of a mixed thing or for any of the principles or qualities which comprise an intangible composite. *Component*, however, stresses the separate identity or distinguishable character of the substance; *constituent* stresses its essential and formative character <springs, gears, levers, pivots, and other *components* of a watch mechanism> <hydrogen and oxygen are the *constituents* of water> <the *components* of the typical novel are its plot, its characters, and its setting> <the *components* of knowledge can never be harmonized until all the relevant facts are in—*De Voto*> <break a ray of light into the colors which are its *constituents*> <the *constituents* of a perfume> *Ingredient* applies basically to any of the substances or materials which when combined form a particular mixture (as a drink, a medicine, a food, an alloy, or an amalgam) <the *ingredients* of a cocktail> <iron and carbon are the *ingredients* of steel> The term, however, may be extended to any component or constituent that can be thought of as added or as left out <in this transaction every *ingredient* of a complete and legitimate contract is to be found—*John Marshall*> <two very necessary *ingredients* of the scientific process are curiosity and lack of haste—*Sears*> *Factor* is somewhat remotely synonymous with the foregoing words. The term is applicable to a constituent, element, or component only when the latter exerts an effectuating force enabling the whole of which it is a part to perform a certain kind of work, to produce a specific and definite result, or to move or trend in a particular direction <God . . . is not one of the *factors* for which science has to account—*Inge*> <various *factors* entered the inception of the American enterprise—*Ellis*> <the word *vitamins* was coined to designate these essential food *factors*—*Morrison*>

embarrass, **discomfit**, **abash**, **disconcert**, **rattle**, **faze** mean to balk by confusing or confounding, but each word is capable of expressing precise and distinctive shades of meaning. **Embarrass** characteristically implies some influence which impedes freedom of thought, speech, or action and may be used with reference not only to persons but also to the things they plan or desire to do <a course of legislation . . . which . . . *embarrassed* all transactions between individuals, by dispensing with a faithful performance of engagements—*John Marshall*> When said of persons it commonly implies and often stresses resulting uneasiness or constraint <he had, he knew, a sort of charm—it *embarrassed* him even to admit it—*Mary Austin*> <I was upset . . . and *embarrassed* by the crude and childish manner in which the townspeople were reduced to caricatures—*J. M. Brown*> **Discomfit** in this sense typically retains some of its basic denotation of to put to rout; in such use it implies opposition and the competence with which one opponent routs the other and crushes his self-esteem or self-complacency <an answer that completely *discomfited* the brash young man> or throws him into confusion <Bradley's polemical irony and his obvious zest in using it, his habit of *discomfiting* an opponent with a sudden profession of ignorance, of inability to understand, or of incapacity for abstruse thought—*T. S. discomfited students the designation Stinker Taussig—Lovett) At times *discomfit* is used with much weakened force and then loses its suggestion of active opponency and implies no more than to make uncomfortable or embarrass (it is *discomfiting* to recall the high hopes with which the states that had joined hands to defeat Fascism founded the United Nations—*Sat. Review*) (he drew *discomfited* chuckles from them in response to his garish laughter—*Straight*) (she may heckle the dealer, add a running commentary to the demonstrations, or just assume a *discomfiting* smugness—*Fortune*) **Abash** presupposes self-confidence or self-possession and implies a usually sudden check to that mood by some influence that awakens shyness or a conviction of error or inferiority or, sometimes, of shame (a man whom no denial, no scorn could *abash*—*Fielding*) (*abashed* by the base motives she found herself attributing to Charlotte—*Wharton*) **Disconcert**, like *embarrass*, may be used in reference to actions and plans, but it is more frequently referred to persons. In either case it implies an upsetting or derangement; in the latter it suggests temporary loss of equanimity or of assurance (when she saw him there came that flicker of fun into her eyes that was so *disconcerting* to Mr. Ezra—*Deland*) **Rattle** more than *disconcert* stresses the emotional agitation accompanying the upset and implies a more complete disorganization of one's mental processes (the jeering *rattled* the team and caused them to play badly) (*rattled* by hypothetical eyes spying on her—*Stafford*) **Faze** is found chiefly in negative expressions, where it comes close to *disconcert* but sometimes carries the implications of *abash* and *rattle* (neither rebuffs nor threats *faze* him in the least) (it hit Marciano flush on the right side of the jaw, but it didn't seem to *faze* him a bit—*Liebling*)

emigrant, immigrant are comparable but not interchangeable when denoting a person who leaves one country in order to settle in another. **Emigrant** (so also **emigrate** and **emigration**) is used with reference to the country from which, **immigrant** (so also **immigrate** and **immigration**) with reference to the country into which, migration is made. The former marks the going out from a country; the latter, the entrance into a country (a large crowd of Italian *emigrants* boarded the ship at Naples) (Ireland lost heavily through *emigration* in the middle of the nineteenth century) (our surplus cottage children *emigrate* to Australia and Canada—*H. G. Wells*) (Scandinavian *immigrants* settled large parts of the Middle Western United States) (*immigration* from Europe into the United States has gradually decreased)

emphasis, stress, accent, accentuation denote exerted force by which one thing stands out conspicuously among other things; they also often designate the effect produced or the means used in gaining this effect. **Emphasis** implies effort to bring out what is significant or important (he puts the *emphasis* on discipline in his teaching) (an effective orator knows how to be sparing in his use of *emphasis*) Sometimes it also suggests vigor or intensity of feeling (anyone, however ignorant, can feel the sustained dignity of the sculptor's work, which is asserted with all the *emphasis* he could put into it—*Henry Adams*) **Stress**, though often used interchangeably with *emphasis*, is distinguishable from it both in some of its implications and in its association with particular arts, where it has acquired specific meanings. It rarely loses entirely its original implication of weight that causes pressure or strain, though this is often merely suggested (<"I wouldn't lay too much *stress* on what you have been telling me," I observed quietly—*Conrad*) At times *stress* strongly implies urgency or insistence (Jane secretly approved his discernment. But all she said was, with her cool lack of *stress*, "It's not so bad"—*Rose Macaulay*) In phonetics and prosody *stress* is the general term referring to the prominence given to certain syllables by force of utterance. It may also be used of the natural emphasis on certain words in a sentence. It

may even suggest degree of emphasis <there were volumes of innuendo in the way the "eventually" was spaced, and each syllable given its due stress—*Wharton*> **Accent** implies contrast for the sake of effect, very frequently an aesthetic effect. *Accent* carries no connotation of weight, but it strongly suggests relief in both senses, that of relieving monotony and that of bringing out sharply or into relief <the room was quiet and neutral in coloring, but it was given *accent* by bowls of bright flowers> <sun and sea, the heady fragrance of the plane trees, the tropical *accent* of palms—*Cassidy*> In prosody *accent* is the form of stress characteristic of English verse, akin to the beat in music and involving force in utterance. In English phonetics *accent* and *stress* are commonly used interchangeably. Since force of utterance (*stress*) is the principal means by which a syllable, a word, or a group of words is accented or brought into sharp contrast with the others, one may speak of syllabic *accent* or *stress*, or word *accent* or *stress*. **Accentuation**, though close to *accent* (except in technical senses), often goes beyond it in its emphasis on increased conspicuousness; it also often suggests disagreeableness in the contrast <the essential defect of their polity . . . its excessive *accentuation* of the corporate aspect of life—*Dickinson*>

empty *adj* 1 **Empty, vacant, blank, void, vacuous** mean lacking the contents that could or should be present. Something is **empty** which has nothing in it; something is **vacant** which is without an occupant, incumbent, tenant, inmate, or the person or thing it appropriately contains <an *empty* bucket> <his purse was *empty*> <*empty*-handed> <a *vacant* professorship> <a *vacant* apartment> When qualifying the same nouns the words usually suggest distinctly different ideas; thus, an *empty* house has neither furniture nor occupants; a *vacant* house is without inmates and presumably for rent or for sale; an *empty* chair has no one sitting in it at the time; a *vacant* chair is one that has lost its usual occupant by death or other cause; an *empty* space has nothing in it; a *vacant* space is one left to be filled with what is appropriate <[it] enabled him to fill a place which would else have been *vacant*—*Hawthorne*> Something, especially a surface, is **blank** which is free from writing or marks or which has vacant spaces that are left to be filled in <a *blank* page> <a *blank* application> Something is **void** which is absolutely empty so far as the senses can discover <a conscience *void* of offense> <sandy wilderness, all black and *void*—*Wordsworth*> <the *void*, hollow, universal air—*Shelley*> Something is **vacuous** which exhibits the absolute emptiness of a vacuum <the *vacuous* globe of an incandescent lamp>

In extended use the same distinctions hold: an **empty** mind is destitute of worthwhile ideas or knowledge; a **vacant** mind lacks its usual occupant, the soul or intellect; a **blank** look is without expression; a person is said to be **void** of learning or of common sense when not the slightest evidence of either one can be detected; a **vacuous** mind, look, or expression is so deficient in alertness or spirit as to suggest a vacuum in its inanity <the unthinking mind is not necessarily dull, rude, or impervious; it is probably simply *empty*—*Elliot*> <the loud laugh that spoke the *vacant* mind—*Goldsmith*> <his eyes had that *blank*

fixed gaze . . . that babies' eyes have—*M. E. Freeman*> <it is dull and *void* as a work of art—*Montague*> <there was nothing to be read in the *vacuous* face, blank as a school notice board out of term—*Greene*>

enable, empower are comparable when meaning to make one able to do something. In ordinary usage **enable** implies provision of the means or opportunity, **empower**, the granting of the power or the delegation of the authority, to do something <an income that *enables* him to live with dignity> <a letter *empowering* him to act in his father's behalf> <to give to the Cathedral fund a sum sufficient to *enable* Father Latour to carry out his purpose—*Cather*> <these courts of appeal are also *empowered* to review and enforce orders of federal administrative bodies—*Sayre*>

Ana permit, allow, *let

Con *forbid, prohibit, inhibit: *prevent, preclude

enamored, infatuated are very frequently used interchangeably, though with a loss in precision, in the sense of being passionately in love. **Enamored** usually connotes complete absorption in the passion <Elizabeth-Jane . . . did not fail to perceive that her father . . . and Donald Farfrae became more desperately *enamored* of her friend every day—*Hardy*> **Infatuated**, when applied to lovers and their acts, carries much the same implications as *enamored* but may add the implications of its primary sense (see **FOND** 1) of blind folly and unreasoning ardor <you, Scythrop Glowry, of Nightmare Abbey . . . *infatuated* with such a dancing . . . thoughtless, careless . . . thing as Marionetta—*Peacock*>

Ana bewitched, captivated, fascinated (see **ATTRACT**): fond, devoted, doting, *loving

encircle *surround, environ, circle, encompass, compass, hem, gird, girdle, ring

Ana *enclose, envelop: circumscribe, confine, *limit

enclose *vb* **Enclose, envelop, fence, pen, coop, corral, cage, wall** mean to surround so as to shut in or confine actually or apparently. **Enclose** implies a shutting in by barriers (as walls) or in an enveloping cover (as a case); the term may be used without connotations, or it may suggest protection, defense, privacy, or monastic seclusion <a high hedge *encloses* the garden> <the larger fir copses, when they are *enclosed*, are the resort of all

kinds of birds of prey yet left in the south—*Jefferies*) <you will find *enclosed* our price list> <walked across the *enclosed* porch, knocked, and opened the inside door—*Bradbury*> **Envelop** (see also COVER) implies enclosure in or by something usually yielding or penetrable that surrounds it on all sides and serves to screen it, to protect it, or to separate it from others <each specimen was *enveloped* in cotton and packed in a box> <the heart is *enveloped* by a serous sac, called the pericardium> <clouds *envelop* the mountaintops> <drew off his coat and *enveloped* him in a white robe—*Krey*> **Fence** in this sense is usually followed by *in* or *about* and means only to enclose with or as if with a fence (as by a row of palings, a wall, or a hedge); the term usually connotes a means of barring trespassers, of keeping animals from wandering about or intruding, or of securing privacy <the farm was *fenced* about with a stone wall> <we will have to *fence* in the garden with wire netting to keep out the rabbits> <the chickens were not *fenced* in> <a tall hedge of hemlocks *fenced* in the estate> In extended use the term is a synonym of *enclose* only when that by which a thing is shut in is a man-made limitation <the men themselves were . . . *fenced* by etiquette—*Emerson*> <*fenced* by your careful fathers, ringed by your leaden seas, long did ye wake in quiet and long lie down at ease—*Kipling*> **Pen**, usually followed by *up* or *in*, implies confinement in or as if in an enclosure with narrow limits and suggests irksome restraint <the troops were *penned up* for days in inadequate barracks> <where shepherds *pen* their flocks at eve, in hurdled cotes—*Milton*> <practically the whole of the population is *penned* in on a narrow coastal strip—*W. A. Lewis*> **Coop**, usually followed by *up*, also implies confinement in a limited enclosure but it carries even a stronger implication of cramping limitations <*coop up* the chickens only at night> <they are at present *cooped up* in a very small apartment> <her illness has kept her *cooped* in for a week> **Corral** implies a shutting up in or as if in a strongly fenced enclosure and is used primarily of animals or persons who would scatter, escape, or flee if not securely confined <at night they *corralled* their horses> <here they *corralled* us [prisoners] to the number of seven or eight thousand—*Century*> In extended use *corral* may largely lose its basic notion of shutting up and stress, rather, the difficulty of catching or bringing under control <the vitamins are being *corralled* one by one and the proteins are being brought under control—*Furnas*> **Cage** is often used, especially with *in* or *up*, to imply confinement with severe or humiliating restrictions <I don't stay *caged* in my shop all day—*George Eliot*> <the feeling of *caged* muscular tightness has provoked a fairly widespread desire to emigrate from Britain—*Chamberlain*> **Wall** means enclosed by a wall which may be material or may be made up of harsh or rigid and impenetrable restraints <*walled* round with rocks as an inland island, the ghost of a garden fronts the sea—*Swinburne*> <*walled* in by conventions> *Ana* confine, circumscribe, *limit, restrict: environ, *surround, encircle, circle, encompass, compass, hem

encomium, **eulogy**, **panegyric**, **tribute**, **citation** denote a more or less formal and public expression of praise. **Encomium** implies enthusiasm or warmth in praising a thing or more often a person <*encomium* in old time was poet's work—*Cowper*> <the *encomiums* by my friend pronounced on humble life—*Wordsworth*> <every worthy quality which he had in mind when he rolled out his unctuous *encomiums* of Americanism—*S. H. Adams*> **Eulogy** implies a more studied form than *encomium*; as a rule it applies to a speech (or writing) extolling the virtues and the services of a person; the term is especially

and specifically applied to a funeral oration or sermon of this character <great minds should only criticize the great who have passed beyond the reach of *eulogy* or faultfinding—*Lang*> <I would rather have a plain coffin without a flower, a funeral without a *eulogy*, than a life without . . . love and sympathy—*Childs*> **Panegyric** carries a far stronger implication of elaborate, high-flown, often poetical or rhetorical compliment than either of the preceding terms but it does not now emphasize publicity as much as it once did <but verse, alas! your Majesty disdains; and I'm not used to *panegyric* strains—*Pope*> <all *panegyrics* are mingled with an infusion of poppy—*Swift*> **Tribute** applies not only to spoken or written praise but to any act or situation which can be construed as taking its place <no *tribute* can be paid to them which exceeds their merit—*John Marshall*> <I am appointed sole executor, a confidence I appreciate as a *tribute* to my lifelong friendship—*H. G. Wells*> **Citation** is used in designating either the formal eulogy accompanying the awarding of an honor (as an honorary degree) or the specific mention of a person in military service in an order or dispatch <Columbia's *citation* praised Mr. Rhee as an "indomitable leader, implacable enemy of Communist totalitarianism" and "a scholar and statesman"—*Christian Science Monitor*> <he had received the Croix de Guerre, with a divisional *citation*, for his service in Belgium—*Malcolm Cowley*>

Ana collide, conflict, clash, *bump: brave, beard, defy, challenge (see FACE)

encounter *n* **Encounter**, **skirmish**, **brush**. In their military senses (compare BATTLE), an **encounter** is a sudden hostile meeting that is typically both violent and unexpected; a **skirmish**, a slight and desultory, often preliminary, encounter, commonly between light detachments of troops; a **brush**, a short but brisk skirmish. All three words are used of other than military contests <a sharp *encounter* of wits> <a *skirmish* preliminary to a political campaign> <a *brush* between opposing legal counsel> *Ana* *battle, engagement: *contest, combat, conflict, fight, fray: clash, collision, *impact, impingement

encourage **1** **Encourage**, **inspirit**, **hearten**, **embolden**, **cheer**, **nerve**, **steel** mean to fill with courage or strength of purpose especially in preparation for a hard task or purpose. **Encourage** in its basic and still common sense implies the raising of confidence to such a height that one dares to do or to bear what is difficult; it then usually suggests an external agent or agency stimulating one to action or endurance <the teacher's praise *encouraged* the pupil to try even harder> <whatever appeals to the imagination . . . wonderfully *encourages* and liberates us—*Emerson*> <the treatment should begin by *encouraging* him to utter freely even his most shocking thoughts—*Russell*> Sometimes it may suggest merely an increase in strength of purpose or in responsiveness to advice or inducement fostered by a person or an influence or event <there they listened, and retained what they could remember, for they were not *encouraged* to take notes—*Henry Adams*> *Encourage* is often used with an im-

personal object, sometimes as if the object were a person (<we wish to *encourage* no vice) but often as if it were the object not of *encourage* but of an ellipsis meaning to encourage a person or persons to act (as by doing, making, forming, or using) (<they are donations to education; donations, which any government must be disposed . . . to *encourage*—*John Marshall*) (<if a state sees fit to *encourage* steam laundries and discourage hand laundries, that is its own affair—*Justice Holmes*) **Inspirit** is chiefly literary; it retains its implication of putting spirit into, especially in the sense of life, energy, courage, or vigor, and therefore often comes close to *enliven* or to *animate* in meaning (<those great men, who, by their writings, *inspired* the people to resistance—*Buckle*) (<the early tea which was to *inspire* them for the dance—*George Eliot*) (<how *inspiring* to escape from here and now and wander wildly in a world of lutes and roses—*Woolf*) (<the book is an astonishing and *inspiring* record of what human ingenuity can accomplish—*Basil Davenport*) **Hearten** implies a putting heart into and carries suggestions that are stronger than those carried by either *encourage* or *inspire*. It presupposes a state of low courage, depression, despondency, or indifference and therefore implies a lifting of mind or spirit that rouses one with fresh courage or zeal (<gifts . . . which both strengthen our resources and *hearten* our endeavors—*Conant*) (<people . . . who were merry or wise or comforting or revealing, whose presence either *heartened* the spirit or kindled the mind—*Jan Struther*) **Embolden** implies a giving of boldness to or, more especially, a giving of just enough courage or bravery to do what one wants to do or is expected to do and suggests not brazenness but the overcoming of timidity or reluctance (<she was *emboldened* to descend and meet him under the protection of visitors—*Austen*) (<*emboldened* by the utter stillness pervading the room he addressed himself to Mrs. Fyne—*Conrad*) **Cheer** in its basic sense is very close to *hearten* and implies a renewing of flagging strength of mind, body, or spirit (<drink the cup that *cheers*) (<my royal father, *cheer* these noble lords and hearten those that fight in your defense—*Shak.*) **But cheer** (usually with *on*) may also imply a more vigorous encouraging (as by applause, commendation, or aid) intended not merely to strengthen and refresh but to stimulate to the utmost or sometimes to an ultimate attempt to do, succeed, or conquer (<*cheering* on the home team) (<as to some great adventurous fight this bravo *cheers* these dastards all he can—*Daniel*) **Nerve** comes close to *embolden* in meaning, but it implies a harder task to be performed and the need of summoning all one's powers to accomplish it; the term therefore connotes greater effort or greater impulsion from within than the other words (<the open resistance of the northern barons *nerved* the rest of their order to action—*J. R. Green*) (<*nerving* myself with the thought that if I got crushed by the fall I should probably escape a lingering and far more painful death, I dropped into the cloud of foliage beneath me—*Hudson*) **Steel**, like *nerve*, may imply a great effort or impulsion from within, but it often also suggests an imparting from without, either of which gives a man the power to endure or to accomplish something by making him insensible to pain, suffering, or insults, and by filling him with resolution or determination (<O God of battles, *steel* my soldiers' hearts, possess them not with fear—*Shak.*)

Ana *extreme, extremity

2 **End, termination, ending, terminus** are comparable when opposed to *beginning* or *starting point* and meaning the point or line beyond which a thing does not or cannot go (as in time or space or magnitude). **End** is not only the ordinary but also the most inclusive of these terms, and it may be used of almost any final limit and in such varied applications as time (<the *end* of a period) (<at the *end* of his life) or space (<the *end* of the road) or movement or action (<the *end* of his journey) or magnitude (<there is no *end* to his energy) or range of possibility (<his statement put an *end* to speculation) **Termination** and **ending** apply especially to the end in time or, less often, in space of something that is brought to a close typically as having a set term or bounds or predetermined limits or as being complete, finished, or futile (<the *termination* of a lease) (<the *termination* of the period agreed upon) (<the *termination* of a search) (<a fair beginning but a bad *ending*) (<the maiden sang as if her song could have no *ending*—*Wordsworth*) **Terminus** applies to the end (often in clear opposition to *starting point*) to which a person or a thing moves or progresses. The term usually suggests spatial relations and often indicates a definite point or place (<the *terminus* of his tour) (<New York is the *terminus* of several important railroads) (<an airway *terminus*) (<the object is the starting point, not the *terminus*, of an act of perception—*Jeans*)

enemy, foe denote an individual or body of individuals that is hostile or that manifests hostility to another.

Enemy usually stresses antagonism that arises from a cherished hatred or a desire to harm or destroy, but it may suggest nothing much more than active or evident dislike or a habit of preying upon (a man with many friends and no *enemies*) (the anarchist is the *enemy* of government) (the woodpecker is a natural *enemy* of insects that infest the bark of trees) (let the teacher appear always the ally of the pupil, not his natural *enemy*—*Russell*) (time is at once the *enemy* and the ally of life and of love—*Millett*) **Foe**, on the other hand, implies active warfare (he is the *foe* of all reform measures) (give me the avowed, the erect, the manly *foe*, bold I can meet,—perhaps may turn his blow!—*Canning*) When the reference is to a nation or group of nations with whom a country is at war, *enemy* is preferred in general use, *foe* being used in this sense chiefly in poetry or rhetorical prose (we have met the *enemy*, and they are ours—*O. H. Perry*) (whispering with white lips—“The *foe*! They come!”—*Byron*)

Ant fortify

enforce, implement are comparable when they mean to put something into effect or operation. **Enforce** is used chiefly in reference to laws or statutes. The term suggests the exercise of executive rather than legislative power or the use of the authority and the means given the magistrates and police to maintain order and security in the community (blue laws more often ignored than *enforced*) (enforce traffic laws and regulations strictly) **But enforce** is also used in reference to agreements, contracts, rights, and ends which have legal sanction or a legal character and require the compulsory powers of the government or of the courts to ensure their fulfillment or their protection in case of violation (Congress, as incident to its power to authorize and *enforce* contracts for public works—*Justice Holmes*) (there was no legal process by which a citizen could *enforce* his rights against the state—*Buchan*) **Implement** usually suggests reference to bills or acts which have been passed, proposals or projects which have been accepted, or policies which have been adopted and implies the performance of such acts as are necessary to carry them into effect or ensure their being put into operation (proposed that any further medical aid to the aged be *implemented* by increased Social Security taxation) (he also urged that military equipment be given to the nations of western Europe to *implement* the Brussels pact—*Current Biog.*)

engage pledge, plight, *promise, covenant, contract

Ana bind, *tie: agree, accede, acquiesce, *assent, consent, subscribe

engagement 1 **Engagement, appointment, rendezvous, tryst, assignation, date** mean a promise or an agreement to be in an agreed place at a specified time, usually for a particular purpose. **Engagement** is the general term usable in place of any of the others (he has no business *engagements* for the rest of the week) (an *engagement* to play golf at four o'clock) (the lecturer can make no more *engagements* for the season) **Appointment** is applied chiefly to an engagement with a person who

because of the exigencies of his office, his profession, or his position in life must keep a calendar and apportion his time carefully among those who wish to consult him professionally or confer with him (the governor sees visitors only by *appointment*) (the doctor's secretary said it was impossible to make an *appointment* before Thursday) **Rendezvous** may designate a place agreed upon for the meeting of persons, often a group of persons (the old soldiers made the town hall their *rendezvous*) but it usually connotes a pledge or covenant (often an implicit one) to meet something or someone that cannot be escaped without violation of one's honor (this generation of Americans has a *rendezvous* with destiny—*Roosevelt*) **Tryst** is chiefly poetic; like *rendezvous*, it may designate the place of meeting (which, however, is more often termed *trysting place*) as well as the agreement to meet at a certain place, but the latter is the commoner denotation of *tryst* (a lovers' *tryst*) (hurrying to keep their *tryst* in the wood) **Assignment** usually denotes a lovers' *tryst*, but it commonly conveys a suggestion of an illicit love or of a clandestine meeting (make *assignments* for them with ladies of the street—*Shaw*) **Date** is used especially of casual engagements between friends or of an agreed meeting between a young man and young woman (remembering suddenly he had a riding *date* with Major Thompson's wife at 12:30—*James Jones*)

Con *extricate, disentangle, untangle, disembarass: disengage, *detach

enmity, hostility, antipathy, antagonism, animosity, rancor,

animus mean intense deep-seated dislike or ill will or a manifestation of such a feeling. **Enmity** implies more than the absence of amity or a friendly spirit; it suggests positive hatred which may or may not be dormant or concealed (I will put *enmity* between thee and the woman—*Gen* 3:15) (angry friendship is sometimes as bad as calm *enmity*—*Burke*) **Hostility** suggests strong and usually open enmity manifesting itself actively (as in warfare, in violent attacks, or in ostracism) (the unremitting *hostility* with which . . . [these poems] have each and all been opposed—*Wordsworth*) (if we could read the secret history of our enemies, we should find in each man's life sorrow and suffering enough to disarm all *hostility*—*Longfellow*) **Antipathy** and **antagonism** usually imply a temperamental or constitutional basis for one's hatred

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

or dislike. **Antipathy** suggests aversion or repugnance and often, in consequence, avoidance or repulsion of the person or thing hated (inveterate *antipathies* against particular nations and passionate attachments for others should be excluded—*Washington*) (found it so hard to conceal his *antipathy* that he could not understand the way in which Dayrell went out of his way to cultivate his society—*Mackenzie*) **Antagonism** stresses the clash of temperaments and the quickness with which hostilities are provoked or the spirit of resistance is aroused (Karl Marx believed that the hostility of one nation to another will come to an end when the *antagonism* between classes within these nations vanishes) (some note of viceregal authority must have lingered in her voice for the caretaker's *antagonism* changed to a sort of bedraggled obsequiousness—*Sackville-West*) **Animosity** and **rancor** denote emotions of such intensity or violence that they may, if not given release, provide the ground for active hostility. **Animosity** usually suggests anger, vindictiveness, and sometimes a desire to destroy or injure what one hates (the Bishop had let the parish alone, giving their *animosity* plenty of time to cool—*Cather*) (her hatred of the idea of it was intensified into a violent *animosity*—*Bennett*) **Rancor** stresses bitterness and ill will amounting to malevolence; it often implies the nursing of a grudge or grievance ('tis not my speeches that you do dislike, but 'tis my presence that doth trouble ye. *Rancor* will out: proud prelate, in thy face, I see thy fury—*Shak.*) (small wonder at her feeling an unchristian *rancor* against the nation which had caused his death—*Forester*) **Animus** suggests less emotional violence than *animosity*, but it implies more definitely a prejudice or ill will that seeks to find expression (there was no mistaking his intentions; he had transferred his *animus* to me, convinced I was to blame for his rejection—*Heiser*)

Ana hate, hatred, detestation, abhorrence, loathing (see under **HATE** *vb*): aversion (see **ANTIPATHY**): malignity, malignancy, ill will, malevolence, *malice

Ant amity —**Con** friendliness, amicability (see corresponding adjectives at **AMICABLE**): *friendship, comity, goodwill

ennoble *dignify, honor, glorify

Ana *exalt, magnify: elevate, raise, *lift: heighten, enhance, *intensify

ennui doldrums, boredom, *tedium

Ana depression, dejection, dumps, blues, melancholy, *sadness: listlessness, languidness, languorousness or languor, spiritlessness (see corresponding adjectives at **LANGUID**): satiation or satiety, surfeiting or surfeit, cloying (see corresponding verbs at **SATIATE**)

enormity, **enormousness** both mean the state or the quality of being enormous but are rarely interchangeable in modern usage. **Enormity** imputes an abnormal quality; it applies especially to the state of exceeding all bounds in wickedness or evil, and therefore of being abnormally, monstrously, or outrageously evil (Newson . . . failed to perceive the *enormity* of Henchard's crime—*Hardy*) (the sensation of standing there . . . and wishing her dead, was so strange, so fascinating and overmastering, that its *enormity* did not immediately strike him—*Wharton*) **Enormousness** applies to the state or quality of grossly exceeding comparable things in size or amount (the *enormousness* of a whale) (the *enormousness* of the cost of war) (covers 885 close-printed pages of thin paper. Readers who brave its *enormousness* are likely to emerge both crushed and impressed—*Time*) **Enormity**, but not *enormousness*, may also be used of an instance of what is characterized by enormity or monstrous wickedness

(the *enormities* of which Caligula was guilty)

Ana outrageousness, atrociousness or atrocity, heinousness, monstrousness (see corresponding adjectives at **OUTRAGEOUS**): flagrancy, grossness, rankness (see corresponding adjectives at **FLAGRANT**)

enormous *huge, vast, immense, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian

Ana prodigious, stupendous, tremendous, *monstrous, monumental: inordinate, exorbitant, *excessive, extravagant

enormousness *enormity

Ana immenseness or immensity, hugeness, vastness (see corresponding adjectives at **HUGE**): tremendousness, prodigiousness, stupendousness, monstrousness (see corresponding adjectives at **MONSTROUS**)

enrage infuriate, madden, incense, *anger

Ana exasperate, provoke, aggravate, rile (see **IRRITATE**)

Ant placate —**Con** *pacify, appease, mollify, propitiate, conciliate

enrapture *transport, ravish, entrance

Ana rejoice, delight, gladden, *please, gratify: charm, enchant, captivate, fascinate, *attract

enroll *record, register, list, catalog

Ana *enter (sense 2): insert (see **INTRODUCE**)

ensconce screen, secrete, *hide, conceal, cache, bury

Ana shield, guard, safeguard, protect, *defend: shelter, lodge (see **HARBOR**)

Con expose, exhibit, display, *show

ensign *flag, standard, banner, color, streamer, pennant, pendant, pennon, jack

ensnare snare, entrap, trap, bag, *catch, capture

Ana *lure, entice, inveigle, decoy

ensue *follow, succeed, supervene

Ana issue, emanate, proceed, stem, *spring, derive, originate, rise, arise: pursue, *follow, chase

ensure, **insure**, **assure**, **secure** are comparable because they all carry the underlying meaning to make a person or thing sure. *Ensure*, *insure*, and *assure* all indicate a making of an outcome or event sure, certain, or inevitable as a consequence or concomitant. **Ensure** in such use may come very close to *guarantee* (good farming practices that go far toward *ensuring* good harvests) (certain rules of conduct for the purpose of *ensuring* the safety and victory of the absent warriors—*Frazier*) (for the remainder of his life he so constrained the expression of his thoughts as to *ensure* his safety—*H. O. Taylor*) **Insure** is often interchangeable with *ensure* (shipbuilders, who wished to *insure* a profitable career for their vessels—*Amer. Guide Series: Mich.*) (the structural division of the buildings, with no more than four apartments opening on any hallway, *insures* privacy and quiet—*Amer. Guide Series: N. Y. City*) but it is also the general word for reference to making certain arrangements for indemnification for loss by contingent events (to *insure* the car against theft and fire damage) **Assure** may in its more general use be indistinguishable from *ensure* and *insure* (protected by game laws and reared in state hatcheries, this bird is now *assured* a permanent place among the game birds of the state—*Amer. Guide Series: Tenn.*) (policies and plans for *assuring* the necessary labor force for defense and essential civilian production—*Current Biog.*) but distinctively it more definitely expresses the notion of removal of doubt, uncertainty, or worry from a person's mind (I *assured* him that I was far from advising him to do anything so cruel—*Conrad*) (*assured* the inhabitants that France intended to grant autonomy—*Current Biog.*) **Secure** implies purposive action to ensure safety, protection, or certainty

against adverse contingencies (lock the door to *secure* us from interruption—*Dickens*) (one other battalion moved up to *secure* the first battalion's flank—*Bernstein*) **entangle**, **involve**, **enmesh** are comparable when meaning to catch or to hold as if in a net from which it is difficult to escape. **Entangle** usually carries the implications of impeding and of the difficulty or impossibility of escape; although basically the word implies being caught in a net, a snare, or a maze, it may suggest only a condition that is similar in forming a complication of difficulties (the fly became *entangled* in the spider's web and could not escape) (like a bird *entangled* in a snare) (entangle themselves in the mazes of sophistry) (the firm is *entangled* in financial difficulties) (peace, commerce, and honest friendship with all nations, *entangling* alliances with none—*Jefferson*) (had *entangled* the king in a false marriage with her—*Sitwell*) **Involve** (see also INVOLVE 3; compare *involved* under COMPLEX) implies the addition, often the conscious addition, of ideas, words, or projects which tend to make difficulties (as by confusing or perplexing) for oneself or another (his sentences are *involved* because he tries to express too many ideas) (the controversies . . . moved on in all their ugliness to *involve* others—*J. M. Brown*) (I plead frankly for the theistic hypothesis as *involving* fewer difficulties than any other—*Inge*) **Enmesh** comes very close to *entangle* in meaning but may be preferred when an involvement in or as if in the meshes of a net is strongly felt (declining to haul up the net when the fish were already *enmeshed*—*Grote*) (his eye was *enmeshed* in no tangle of foreground, but was led across great tracts of country to the distant mountains—*Binyon*) **Ana** *hamper, trammel, fetter, clog, hog-tie: *embarrass, discomfit: ensnare, snare, entrap, trap, capture, *catch **Ant** disentangle —**Con** untangle, *extricate: disengage, *detach

entente treaty, pact, compact, concordat, convention, cartel, *contract, bargain

enter 1 **Enter**, **penetrate**, **ierce**, **probe** are comparable when meaning to make way into something so as to reach or pass through the interior. **Enter** (see also ENTER 2) is the most comprehensive of these words and the least explicit in its implications. When the word takes a person for its subject, it often means little more than to go in or to go into (he *entered* the house) (came riding out of Asia on the very first horses to *enter* Africa—*G. W. Murray*) but sometimes it also suggests the beginning of a course of study, a career, or a proceeding (enter college) (enter Parliament) (there are many who are aghast at the type of world which we are now *entering*, in which a war could cause obliteration—*Vannevar Bush*) When *enter* takes a thing for its subject, it implies a making way through some medium and especially a dense or resisting medium (the rain could not *enter* the frozen earth) (the bullet *entered* the body near the heart) (such an idea never *entered* his mind) **Penetrate** (see also PERMEATE) carries a far stronger implication than *enter* of an impelling force or of a compelling power that makes for entrance (the salt rain . . . *penetrates* the thickest coat—*Jefferies*) and it also more often suggests resistance in the medium (Frémont had tried to *penetrate* the Colorado Rockies—*Cather*) (his sight could not *penetrate* the darkness) It may imply either a reaching the center or a passing through and an issuing on the further side (penetrate the depths of a forest) (armor plate so thick that no cannonball can *penetrate* it) **Penetrate**, especially as an intransitive verb, often specifically takes as its subject something that is intangible or at least not objective but that has (in affirmative expressions)

the power of making its way through (the influence of Christianity has *penetrated* to the ends of the earth) (a *penetrating* odor) (a *penetrating* voice) Often also, as distinguished from the other terms, *penetrate* suggests the use of a keen mind or the exercise of powers of intuition or discernment in the understanding of the abstruse or mysterious (we cannot *penetrate* the mind of the Absolute—*Inge*) (in seeking to *penetrate* the essential character of European art—*Binyon*) (Aunt Rosa could *penetrate* certain kinds of hypocrisy, but not all—*Kipling*) **Pierce** in the earliest of its English senses implies a running through with a sharp-pointed instrument (as a sword, a spear, or a knife) (they *pierced* both plate and mail—*Spenser*) In all of its extended senses it carries a far stronger implication than *penetrate* of something that stabs or runs through or of something that cuts into the very center or through to the further side (feel the *piercing* cold in every nerve) (a passion like a sword blade that *pierced* me through and through—*Lindsay*) (how was one to *pierce* such hidebound complacency?—*Mackenzie*) Often the term imputes great poignancy or aesthetic effectiveness beyond what is usual to the thing that pierces (the remembrance of all that made life dear *pierced* me to the core—*Hudson*) (whatever is expressed with art—whether it be a lover's despair or a metaphysical theory—*pierces* the mind and compels assent and acceptance—*Huxley*) **Probe** derives its implications from the earliest of its senses, to explore (as a wound, a cavity, or the earth) with a long slender instrument especially in order to determine depth, condition, or contents. In its extended senses it implies penetration so far as circumstances allow or so far as one's powers or skills permit, and it usually suggests an exploratory or investigatory aim (the bog or peat was ascertained, on *probing* it with an instrument, to be at least fifteen feet thick—*Lyell*) (the only one . . . with whom he cared to *probe* into things a little deeper than the average level of club and chophouse banter—*Wharton*) In some cases *probe* means little more than to investigate thoroughly (as by questioning those in a position to know facts) (a rascally calumny, which I was determined to *probe* to the bottom—*Scott*)

2 **Enter**, **introduce**, **admit** are comparable when they mean to cause or permit to go in or get in. **Enter**, in its causative sense, is used chiefly in idiomatic phrases, though occasionally it is employed in the sense to drive or force in (he could not *enter* the wedge between the layers of rock) In idiomatic use it commonly implies writing down (as in a list, a roll, a catalogue, or a record), but in some of these phrases it also connotes the observance of other formalities; thus, to *enter* a word in a dictionary is to list it in alphabetical order and define its meaning; to *enter* one's son at a private school is to send in his name as a candidate for admission; to *enter* a judgment is to put it upon record in the proper legal form and order (the judge could *enter* a judgment of conviction and send Woodfall to prison—*Chafee*) **Introduce** is often preferred to *enter* when it implies insertion (the painter who was *introducing* a tree into his landscape—*Ellis*) (when a bit of finely filiated platinum is *introduced* into a chamber containing oxygen and sulphur dioxide—*T. S. Eliot*) (Aunt Harriet . . . *introduced* herself through the doorway . . . into the interior of the vehicle—*Bennett*) It is the precise word when used of things not native and brought into a country or locality for the first time (plants *introduced* into America by the

colonists) Sometimes its use connotes an alien character in that whose entrance is effected (<introduce one's own ideas into the interpretation of a poem> Admit in this relation usually means let in; it may imply a human agent (the maid *admitted* the callers to the drawing room) <I wanted to put in more poems by young poets than he was willing to *admit*—Spender> but often a means of getting or passing in (small windows *admit* light to the cell)

enthusiast *n* **Enthusiast, fanatic, zealot, bigot** denote a person who manifests excessive ardor, fervor, or devotion in his attachment to some cause, idea, party, or church.

Enthusiast commonly denotes a person of keen and ardent interests and may carry either favorable or unfavorable connotations (as of mental or spiritual vitality or of a subordination of judgment to enthusiasm) <increasing number of chess *enthusiasts*> <folk-singing *enthusiasts*> <we are a nation of *enthusiasts*—Meeker> In earlier use and still in historical works the term applies particularly to a preacher, a member of a religious sect, or, sometimes, a poet who claims to be immediately inspired or who outwardly manifests signs (as rapture, madness, or intense emotionalism) associated with divine inspiration or possession by a god. In such context the term has been applied more or less contemptuously to a member of one of the strongly evangelical sects that arose in the seventeenth and eighteenth centuries <the visions, voices, revelations of the *enthusiast*—Glanvill> <harmonic twang! . . . such as from lab'ring lungs th' *enthusiast* blows—Pope>

Fanatic, even more than *enthusiast*, carries a hint of madness or irrationality. In contrast to *enthusiast*, however, the term suggests extreme monomaniac devotion and a concentration of attention, sometimes on the end to be gained but, possibly more often, on the chosen means to one's end regardless of the real value of that end. *Fanatic*, therefore, in distinction from *enthusiast*, connotes determination, often silent determination, and an uncompromising temper <a virtuous *fanatic*, narrow, passionate . . . regarding all ways as wrong but his own—Froude> <a *fanatic*, in Santayana's famous definition, is a man who redoubles his efforts after he has forgotten his aims—Waters> <this creature Man, who in his own selfish affairs is a coward to the backbone, will fight for an idea like a hero. He may be abject as a citizen; but he is dangerous as a *fanatic*—Shaw> **Zealot** often implies fanaticism; it suggests ardent devotion, but it distinctively emphasizes vehement activity in the service of one's cause, party, or church. It may or may not connote blinding partisanship, but it usually suggests jealous vigilance in pro-

tecting one's beliefs or institutions <for modes of faith let graceless *zealots* fight—Pope> <a furious *zealot* may think he does God service by persecuting one of a different sect—Gilpin> **Bigot** implies obstinate, often blind, devotion to one's own (especially religious) beliefs or opinions; as compared with *fanatic* and *zealot*, the term implies dogged intolerance and contempt for those who do not agree, rather than enthusiasm or zeal <the hell that *bigots* frame to punish those who err—Shelley> <one of the marks of a *bigot* is that he thinks he does a service to God when he persecutes his fellowmen—Gillis>

entity, being, creature, individual, person are comparable when meaning something which has real and independent existence. **Entity**, the most consistently abstract of these terms, implies such existence not only in the actual world but also in the realm of thought. An *entity* may be seen or heard or it may be invisible, intangible, or imaginary, but it may be thought of as really existing <that *entity* which we call an automobile> <is democracy an *entity*?> <his country is to him an *entity*, a concrete and organic force, with whose work in the world he is extremely proud to be natively associated—Brownell> <I introduce the *entity* called *light* to the readers of this book: as an *entity* consisting of particles—Darrow> <for the good of that mystical *entity*, different from and superior to the mere individuals composing it, the Nation—Huxley> **Being** is for practical purposes definable in much the same terms as *entity*; however, it seldom retains the abstract meaning given to it by philosophers but easily slides into another and related sense, that of something or someone having material or immaterial existence, possessing qualities, properties, and attributes, and exciting thought or feelings <the Supreme *Being*> <a human *being*> <a corporation is an artificial *being*, invisible, intangible, and existing only in contemplation of law—John Marshall> <a period during which there exist in the universe *beings* capable of speculating about the universe and its fluctuations—Eddington> <doing her best to do the extraordinary things required of her, but essentially a *being* of passive dignities, living chiefly for them—H. G. Wells> **Creature**, in its most general sense, is the correlative of *creator*: it refers to any created thing, whether viewed as the creation of God or of natural influences <we are all God's *creatures*> <as a child, I was inordinately fond of grasshoppers. For one of these *creatures*—Grandgent> In this, its usual sense, *creature* is a general term including all living beings, but especially all animals and men. Often, as a modification of this sense, *creature* refers to a human being regarded as an object of pity, scorn, congratulation, or reprobation <Mrs. Long is as good a *creature* as ever lived—Austen> <it was against a *creature* like this that we plotted—Meredith> In a narrower sense *creature* often refers to someone or something that is the creation of some power or influence and that, usually, is subject to it or obedient to its will <he . . . was the Queen Mother's *creature*—Belloc> <the evil in the moral order of the

world is part of that world—and its own *creature*—*Alexander*) (imagination is always the *creature* of desire—*Krutch*) **Individual**, in its fundamental sense, refers to whatever may be regarded as an entity or being, but the term stresses rather its incapacity for being divided and its existence as a unit (an *individual* is that which cannot be divided without ceasing to be what it is—*Archbishop Thomson*) *Individual*, therefore, in ordinary language applies to a single member of a conceivable group, especially of human beings, and is often used in contrast with such general or comprehensive terms as *society*, *race*, or *family* (the *individual* rebelled against restraint; society wanted to do what it pleased—*Henry Adams*) (art . . . tends to reconcile the *individual* with the universal, by exciting in him impersonal emotion—*Galsworthy*) (the equipment of the higher animals . . . is needed less for the good of the *individual* than for the good of the race—*Ellis*) Concretely, *individual* is often used of a person who strikes one as rich in nature and as standing strongly alone or independently (Donne would have been an *individual* at any time and place—*T. S. Eliot*) but occasionally it is used contemptuously to describe one who makes himself unpleasantly conspicuous (as by undue familiarity, blatancy, or general obnoxiousness) (the *individual* who had sat himself down by me produced a little box and offered me a lozenge—*Jefferies*) **Person** in its most common modern use denotes an individual human being without reference to sex, age, or identity (there were five thousand *persons* at the meeting) (he knew but one *person* in the throng) (a commission of inquiry empowered to examine *persons* and papers) *Person* is often found in other and richer senses, most of which involve the idea of the manifestation or the sustaining of a clearly defined character; sometimes it implies an entity distinguished from one's body yet somehow associated with it (we observe . . . to begin with, that our bodies are not we,—not our proper *persons*—*Mozley*) (never needing to assert the dignity of his *person*) and sometimes it implies this character as manifest to others (the boy is becoming a real *person*) (everybody recognized him as a *person*) Sometimes (as in law) *person* may refer not only to a man (a natural *person*) but to a corporate body (an artificial, or juristic, *person*) either of which has rights and duties that are recognized (a state, a church, and a corporation are in the eyes of the law *persons*) Again (as in Christian theology), *person* denotes one of the distinct modes of being in which the Supreme Being manifests Himself to men (one God in three divine *Persons*, the Father, the Son, and the Holy Ghost) Sometimes, also, *person* may refer to the body of a human being or to his appearance, but even in these uses it usually suggests a body informed by a spirit or personality (he suffered injury to his *person* and damage to his property) (Mr. Wickham was . . . far beyond them all in *person*, countenance, air, and walk—*Austen*) (appear in *person*) (England . . . had stolen a kingdom . . . in Africa, and seized the *person* of its king—*Shaw*)

entrance *n* **Entrance**, **entry**, **entrée**, **ingress**, **access** are comparable when meaning the act, fact, or privilege of going in or coming in. All but *entrée* also carry the denotation of a way or means of entering. Their differences are largely in their applications and in their connotations. **Entrance** is the widest in its range of application and the thinnest in its specific implications; it fits in with nearly every context (await the *entrance* of the king) (a season ticket gives you *entrance* to all the events) (the *entrance* is through a gate south of the stadium) (gained their *entrance* to the game through a hole in the fence) **Entry**,

by comparison, typically imputes a formal or ceremonial character to the act of entering (the trumpet will announce the Nuncio's *entry*—*Browning*) When used with reference to a place where one enters, it usually signifies a door, a gate, a portico, or more commonly a vestibule or entrance hall (the postman throws the letters in the *entry*) (I hear a knocking at the south *entry*—*Shak.*) It has largely yielded its meaning of the privilege or right of entrance to **entrée**. The latter word, however, is usually restricted in its application and suggests exclusiveness in those admitting or distinction or social gifts in those admitted (my mother's introductions had procured me the *entrée* of the best French houses—*Lytton*) (commented on the *entrée* which his son had with the president—*New Republic*) **Ingress**, because of legal use, carries more than any of the others the implication either of permission to enter or of encroachment (his deed gives him use of the path with free *ingress* and egress) (we pardon it; and for your *ingress* here upon the skirt and fringe of our fair land—*Tennyson*) (it puts a great strain on an armadillo to open his mouth wide enough to permit the *ingress* of a copper cent edge-wise—*G. S. Perry*) When used concretely it more often suggests a natural passageway than an architectural structure (a narrow gap is the only *ingress* to the valley) **Access**, like *ingress*, implies admission where barriers are imposed, but they may be of many kinds: social, legal, or personal, as well as natural (he is here at the door and importunes *access* to you—*Shak.*) **Access** is distinguished from the other words of this group by its emphasis on approach rather than on entrance (explorers still find the North Pole difficult of *access*, in spite of their use of airplanes) (the *access* to the harbor was through a long narrow channel)

envious, jealous, though not close synonyms, are comparable because both carry as their basic meaning that of grudging another's possession of something desirable. **Envious** stresses a coveting of something (as riches, possessions, or attainments) which belongs to another or of something (as success or good fortune) which has come to another. It may imply either a gnawing, often a malicious, desire to deprive one of what gives him gratification, or a spiteful delight in his dispossession or loss of it (still in thy right hand carry gentle peace, to silence *envious* tongues—*Shak.*) <some *envious* hand has sprinkled ashes just to spoil our slide—*Field*> Frequently, however, the stress is on coveting rather than on a desire to injure <we are all *envious* of your good fortune> <tried to look disappointed and angry but . . . only succeeded in looking *envious*—*Hervey Allen*> **Jealous** often stresses intolerance of a rival for the possession of a thing which one regards as peculiarly one's own or on the winning of which one has set one's heart, but sometimes it merely implies intensely zealous efforts to keep or maintain what one possesses. The term often is used without derogation <thou shalt have no other gods before me . . . for I the Lord thy God am a *jealous* God—*Exod* 20:3-5> <proud of their calling, conscious of their duty, and *jealous* of their honor—*Galsworthy*> However the term usually carries a strong implication of distrust, suspicion, enviousness, or sometimes anger <a *jealous* wife> <he was *jealous* of Carson's fame as an Indian fighter—*Cather*> <stabbed by a *jealous* lover>

epicure, gourmet, gourmand, glutton, bon vivant, gastronome mean one who takes pleasure in eating and drinking. An **epicure** is one who is choice and fastidious while at the same time voluptuous in enjoyment of food and drink; the term is also applied to a connoisseur in an art involving both feasting and delicacy of taste <I am become a perfect *epicure* in reading; plain beef or solid mutton will never do—*Goldsmith*> <an *epicure* in many of the delights of the senses—*Canby*> A **gourmet** is a connoisseur in delicate or exotic dishes, liquors, and wines; the term carries as its distinctive connotation the savoring as of each morsel of food or sip of wine, and the power to distinguish delicate differences in flavor or

quality <the most finished *gourmet* of my acquaintance—*Thackeray*> <eating habits . . . of a determined *gourmet*, verging at times on those of a gourmand—*Kahn*> **Gourmand** implies less fastidiousness and less discernment than *gourmet*, but it suggests a hearty interest in and enjoyment of good food and drink rather than, as **glutton** does, greedy and voracious eating and drinking <I dare say, their table is always good, for the Landgrave is a *gourmand*—*Chesterfield*> <youth is a *gourmand* when it cannot be a gourmet—*McClure's Mag.*> <it would be difficult to determine whether they were most to be distinguished as *gluttons* or epicures; for they were, at once, dainty and voracious, understood the right and the wrong of every dish, and alike emptied the one and the other—*Burney*> **Bon vivant** differs little from *gourmand* except in its stronger connotation of a lively or spirited enjoyment of the pleasures of the table, especially in the company of others <the Major was somewhat of a *bon vivant*, and his wine was excellent—*Scott*> <he was also a *bon vivant*, a diner-out, and a storyteller—*Fraser's Mag.*> **Gastronome** is equivalent to *epicure*, with perhaps greater stress on expert knowledge and appreciation of fine food and wine and of the ritual of preparation and serving of them <a conversation on the mysteries of the table, which . . . a modern *gastronome* might have listened to with pleasure—*Scott*>

equanimity, composure, sangfroid, phlegm mean the mental temper of one who is self-possessed or not easily disturbed or perturbed. **Equanimity** suggests either a proper mental balance or a constitutionally equable temper; it therefore may imply either a delicate adjustment of one's emotional and mental powers that is liable to disturbance only under great strain or a settled attitude of mind which repels all that disturbs <his placidity of demeanor . . . arose from . . . the *equanimity* of a cold disposition rather than of one well ordered by discipline—*Trollope*> <it was some time before Wildevre recovered his *equanimity*—*Hardy*> <stoicism teaches men . . . to

equipment, apparatus, machinery, paraphernalia, outfit, tackle, gear, matériel are comparable when they mean all the things that are used in a given work or are useful in effecting a given end. **Equipment** usually covers everything needed for efficient operation or efficient service except the personnel; thus, the *equipment* for a polar expedition would include not only the vessels, instruments, and implements required but also the sleds, dogs, and supplies (as clothing, food, and medicines) (the *equipment* of furnishings, utensils, and supplies required for setting up housekeeping) Sometimes *equipment* is more limited in its application; thus, in railroading it covers only the rolling stock and not the roadbed and stations. In extended use *equipment* is also employed in reference to persons and covers the qualities and skills necessary to their efficiency or competency in a given kind of work (knowledge, penetration, seriousness, sentiment, humor, Gray had them all; he had the *equipment* and endowment for the office of poet—*Arnold*) (a health officer needed more than technical training . . . It appeared that diplomacy should constitute a major part of his *equipment*—*Heiser*) **Apparatus** usually covers the instruments, tools, machines, and appliances used in a given craft or profession or in a specific operation or the equipment used in a recreation or sport; thus, the *apparatus* of a dentist includes all the mechanical and electrical devices he uses in his professional work; the *apparatus* of a laboratory, as distinguished from its equipment, consists of all the mechanical requisites for carrying on operations or experiments. When used in reference to persons or employments not requiring mechanical devices, *apparatus* denotes all

the external aids useful in prosecuting a particular kind of work; thus, the *apparatus* of a scholar in Old English includes the reference books (as texts, glossaries, and bibliographies) that he finds essential to or helpful in his investigations (formal lectures, with an appalling *apparatus* of specimens, charts, and wall pictures—*Grandgent*) **Machinery** covers all the devices, means, or agencies which permit a thing (as an organism, a government, an institution, or a law) to function or which enable it to accomplish its ends (as a movement, a political party, or propaganda) (the physiological *machinery* of the body is so adjusted that great variations of atmospheric temperature can be supported without detriment—*Heiser*) (public meetings, harangues, resolutions, and the rest of the modern *machinery* of agitation had not yet come into fashion—*Macaulay*) (if the peoples wanted war, no *machinery* could prevent them from having it—*Inge*) **Paraphernalia** usually suggests a collection of the miscellaneous articles or belongings that constitute the usual accompaniments (often the necessary equipment) of a person or group of persons in a particular employment or activity (the *paraphernalia* of a circus) (the *paraphernalia* of a tourist) (little piles of wheels, strips of unworked iron and steel, blocks of wood, the *paraphernalia* of the inventor's trade—*Anderson*) The word may be slightly contemptuous and imply a trivial or worthless character to the items included (clear a boy's room of all its *paraphernalia*) **Outfit** is sometimes interchangeable with *equipment*, but it has a slightly less formal flavor and is preferred when the latter term might seem pretentious (a camper's *outfit*) (a beginner's beekeeping *outfit*, consisting of a bee veil, a pair of bee gloves, and the makings of a first-rate beehive—*New Yorker*) It often specifically suggests wearing apparel and other necessities for a journey, a school year, or a new employment (a bride's *outfit*) (a college girl's *outfit*) (beside this neat, black figure the American business man's *outfit* is as garish as a clown's—*Barbara Beecher*) **Tackle** is also less formal than *apparatus*, which otherwise it closely resembles (fishing *tackle*) (the girl sprucely habited, with her pretty *tackle* on the shining blood [horse] was a glad sight—*Miles Franklin*) **Gear** is variously used, sometimes approaching *equipment* (you've got a good six hours to get your *gear* together—*Conrad*) or sometimes *apparatus* (sportsman's *gear*) or again *outfit*, or *wearing apparel* (servants . . . ready in waiting at Pathankote with a change of *gear*—*Kipling*) It is also occasionally the most general of these terms and equivalent to one's belongings collectively (they are all, as far as worldly *gear* is concerned, much poorer than I—*Shaw*) **Matériel** is used in industry and in military affairs as a comprehensive and unambiguous term that covers everything but the personnel (a heavy drain on both the manpower and *matériel* resources—*N. erase, **expunge**, **cancel**, **efface**, **obliterate**, **blot out**, **delete** mean to strike out something so that it no longer has effect or existence. **Erase** basically implies a scraping or rubbing out of something that is written, engraved, or painted (erase a word) (erase a line of an inscription) In extended use *erase* often refers to something that has been eradicated as if by scraping or rubbing out after it has impressed or imprinted itself on the memory or has become part of an unwritten record (have a few years totally erased me from your memory?—Gray) (the old boyhood notion . . . that a town and a people could remake him and erase from his body the marks of what he thought of as his inferior birth—Anderson) **Expunge** implies, possibly through confusion with *sponge*, so thoroughgoing an erasure that the thing affected is wiped out completely (a woman's history, you know: certain chapters expunged—Meredith) (the most primitive ways of thinking may not yet be wholly expunged—James) Basically **cancel** means to strike out written material (originally with lines crossed latticewise), but it also may apply to an invalidating or nullifying by other means; thus, a postage stamp is *canceled* to prevent reuse, usually with a hand device or a machine that stamps an indelible mark or device on its face; a transportation ticket is similarly *canceled* with a punch that removes a part of it; a will is *canceled* by physically destroying it (the worn or soiled currency declared unfit for further circulation is transferred to our custodians of unfit currency for cancellation on a *canceling* machine which is designed to punch the symbol "L" in each corner of each package of 100 bills, and to simultaneously cut each package in half lengthwise—George Parker) In extended use *cancel* implies an action that completely negatives something, whether by a legal annulling (cancellation consists of any act, such as the surrender or intentional destruction of the instrument, that indicates the intention to *cancel* or renounce the obligation—Fisk & Snapp) or by a revoking or rescinding (cancel a meeting) (the laboratory door does not lock behind him and bar his return any more than it swung shut to imprison Darwin and forever *cancel* his status as a naturalist—Amer. Naturalist) or often by a neutralization of one thing by its opposite (the qualities that in the end nullified his great strength of character and remarkable gifts, just as his irritability *cancelled* out his natural kindness—Osbert Sitwell) (ironies breed before our eyes, *cancel* each other out—Kristol) **Efface**, more strongly than *erase*, implies the complete removal of something impressed or imprinted on a surface (constant use gradually *effaces* the figures and letters on a coin) (*efface* the offensive murals in a public building) As a result,

in its extended use, *efface* often implies destruction of every visible or sensible sign of a thing's existence (while nations have *effaced* nations, and death has gathered to his fold long lines of mighty kings—Wordsworth) (the attempt to *efface* the boundaries between prose and verse—Lowe) Often, especially in reflexive use, it implies an attempt to make inconspicuous or vague (*efface* oneself in the company of others) **Obliterate** and **blot out** both imply rendering a thing undecipherable by smearing it with something which hides its existence (a smear of decisive lead-colored paint had been laid on to *obliterate* Henchard's name—Hardy) (*blot out* with ink a passage in a manuscript) Both terms are more often used, however, with the implication of the removal of every trace of a thing's existence (the falling snow rapidly *obliterated* all signs of approaching spring) (a successful love . . . *obliterated* all other failures—Krutch) (then rose the seed of chaos, and of night, to *blot out* order, and extinguish light—Pope) **Delete** implies marking something in a manuscript or proof for omission from a text that is to be published or distributed (when ever you feel an impulse to perpetrate a piece of exceptionally fine writing, obey it—wholeheartedly—and *delete* it before sending your manuscript to press—Quiller-Couch) But *delete* also often suggests eradication or elimination by the exercise of arbitrary power (the censor *deleted* all the interesting parts of the letter) (a compulsion to make plays out of books, musicals out of plays . . . to insert scenes, *delete* characters, include commentators—Kronenberg)

erotic, **amatory**, **amorous**, **amative**, **aphrodisiac** all involve the idea of love for the opposite sex, but they are not freely interchangeable because of differences in denotation as well as in implications. **Erotic**, though the strongest in its suggestions of love as a violent passion or as a physical appetite, is rarely applied to persons as distinct from their behavior, reactions, or emotions, and it is especially used in characterizing or classifying emotions, motives, or themes in art (*erotic* tendencies) (*erotic* music) (an *erotic* poet) (*erotic* poetry) (it was the persuasion that the deprivation was final that obsessed him with *erotic* imaginations . . . almost to the verge of madness—H. G. Wells) (describes his *erotic* adventures with prostitutes—Sat. Review) **Amatory** is a synonym of *erotic* but weaker in its suggestion of sexual desire; it sometimes connotes little more than ardent admiration; thus, one might more correctly describe the youthful love poems of Tennyson as *amatory* than as *erotic* poetry (Sir Lucius . . . has been deluded into thinking that some *amatory* letters received by him from Mrs. Malaprop are from Lydia—Harvey) **Amorous** is applied chiefly to persons, their words, or their acts especially when they are falling in love or making love (came many a tiptoe, *amorous* cavalier, and back retired . . . her heart was elsewhere—Keats) (yielded, with coy submission, modest pride, and sweet, reluctant, *amorous* delay—Milton) (the shady lawns and thickets along the river give nightly sanctuary to *amorous* couples—Green Peyton) The word often suggests ripeness or eagerness for love (the English . . . are not an *amorous* race. Love with them is more sentimental than passionate—Maugham) In this

sense it is also applied, chiefly in poetry, to animals (the *amorous dove*—*Gilbert*) **Amative** implies merely a disposition to fall in love or a propensity for loving; it is chiefly used in describing temperaments or in analyzing character (that crudely *amative* public to which our modern best sellers appeal—*N. Y. Times*) (he is not normally *amative*) **Aphrodisiac** is applied to things (as drugs or writings) that arouse or tend to arouse sexual desire (the labored unreserve of *aphrodisiac* novels and plays—*Montague*)

error, mistake, blunder, slip, lapse, faux pas, bull, howler, boner are comparable when they denote something (as an act, statement, or belief) that involves a departure from what is, or what is generally held to be, true, right, or proper. **Error** implies a straying from a proper course and suggests such guilt as may lie in failure to take proper advantage of a guide (as a record or manuscript, a rule or set of rules, or a principle, law, or code); thus, a typographical *error* results when a compositor misreads a manuscript; an *error* in addition involves some failure to follow the rules for addition; an *error* in conduct is an infraction of an accepted code of manners or morals (those who, with sincerity and generosity, fight and fall in an evil cause, posterity can only compassionate as victims of a generous but fatal *error*—*Scott*) (without understanding grievous and irreparable *errors* can be made—*Donald Harrington*) **Mistake** implies misconception, misunderstanding, a wrong but not always blameworthy judgment, or inadvertence; it expresses less severe criticism than *error* (he made a serious *mistake* when he chose the law as his profession) (a child makes many *mistakes* in spelling) (there is a medium between truth and falsehood, and (I believe) the word *mistake* expresses it exactly. I will therefore say that you were mistaken—*Cowper*) **Blunder** is harsher than *mistake* or *error*; it commonly implies ignorance or stupidity, sometimes blameworthiness (we usually call our *blunders* mistakes, and our friends style our mistakes *blunders*—*Wheatley*) (one's translation is sure to be full of gross *blunders*, but the supreme *blunder* is that of translating at all when one is trying to catch not a fact but a feeling—*Henry Adams*) **Slip** carries a stronger implication of inadvertence or accident than *mistake* and often, in addition, connotes triviality (the wrong date on the check was a *slip* of the pen) (a social *slip* which makes us feel hot all over—*L. P. Smith*) Often, especially when it implies a transgression against morality, the word is used euphemistically or ironically (let Christian's *slips* before he came hither . . . be a warning to those that come after—*Bunyan*) (the minister . . . comes when people are in extremis, but they don't send for him every time they make a slight moral *slip*—tell a lie, for instance, or smuggle a silk dress through the customhouse—*Holmes*) **Lapse**, though sometimes used interchangeably with *slip*, stresses forgetfulness, weakness, or inattention more than accident; thus, one says a *lapse* of memory or a *slip* of the pen, but not vice versa (writes well, despite occasional *lapses* into polysyllabic humor—*Geographical Jour.*) When used in reference to a moral transgression,

it carries a weaker implication of triviality than *slip* and a stronger one of a fall from grace or from one's own standards (for all his . . . *lapses*, there was in him a real nobility, an even ascetic firmness and purity of character—*Ellis*) **Faux pas** is most frequently applied to a mistake in etiquette (she was carefully instructed so that there was no danger of her making a *faux pas* when she was presented at the Court of St. James's) (John and I, horrified, hustled him out before he could commit any further *faux pas*—*S. H. Adams*) **Bull, howler, and boner** all three are rather informal terms applicable to blunders (and especially to blunders in speech or writing) that typically have an amusing aspect. A **bull** may be a grotesque blunder in language typically characterized by some risible incongruity (the well-known *bull* stating that "one man is just as good as another—and sometimes more so") or it may be a mere stupid or gauche blunder (he really committed a *bull* when he solemnly introduced his new friend to the latter's ex-wife) A **howler** is a gross or ludicrous error based on ignorance or confusion of ideas; the term is used especially of laughable errors in scholastic recitations or examinations (a collection of schoolboy *howlers*) (a *howler* that turns the title "Intimations of Immortality" into "Imitations of Immorality") A **boner** may be a grammatical, logical, or factual blunder in a piece of writing that is usually so extreme as to be funny (a few historical *boners* . . . such as dinosaurs surviving until medieval times—*Coulton Waugh*) or it may be a ridiculous or embarrassing slip of the kind that results from a sudden lapse (as of attention or from tact or decorum) (is the proprietor of a large and varied selection of diplomatic *boners*—*Rosenthal*)

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

when meaning to get away or to keep away from something which one does not wish to incur, endure, or encounter. **Escape** when referred to persons (sometimes to animals) usually implies a threat to their liberty or well-being; in this sense it may not imply running away from or even an effort to miss what threatens, but it does suggest the latter's imminence or likelihood <escape suspicion> <escape discovery> <escape the family tendency to tuberculosis> <escape annoyance> <escape a blow by dodging it> <few fish can escape this net> When extended to things and especially to inanimate or intangible things *escape* connotes something comparable to a net which holds and confines yet permits passage through it <details which escape the mind> <nothing escaped the kind eyes—*Deland*> <the exquisite beauty of this passage, even in translation, will escape no lover of poetry—*Dickinson*> **Avoid**, in contrast with *escape*, suggests a keeping clear of what one does not wish to risk or knows to be a source of danger, rather than a getting away from what actually threatens; thus, one may *escape* suspicion by *avoiding* persons or places that are being watched; one may *avoid* all known sources of contagion yet not *escape* infection <he kept himself somewhat aloof, seeming to *avoid* notice rather than to court it—*Arnold*> *Avoid*, however, is often used interchangeably with *escape*; it may be preferred when a danger is averted by forethought, prudence, or caution <mother and son *avoided* an open rupture by never referring to their differences—*Santayana*> <by pooling our difficulties, we may at least *avoid* the failures which come from conceiving the problems of government to be simpler than they are—*Frankfurter*> **Evade** implies escape or the intent to escape, but it also commonly suggests avoidance by the use of adroit, ingenious, or, sometimes, underhand means; thus, one *evades* suspicion who escapes it by spreading rumors that throw others off the scent; one *evades* a question one does not wish to answer by seeming not to hear it <the exacting life of the sea has this advantage over the life of the earth, that its claims are simple and cannot be *evaded*—*Conrad*> <wisdom consists not in premature surrender but in learning when to *evade*, when to stave off and when to oppose head on—*Howe*> **Elude** comes closer to *escape* than to *avoid* but stresses a slippery or baffling quality in the thing which gets away or cannot be captured <whose secret presence, through creation's veins running quicksilverlike, *eludes* your pains—*FitzGerald*> <for are we not all fated to pursue ideals which seem eternally to *elude* us—*L. P. Smith*> *Elude*, however, is sometimes used in place of *evade* when there is a strong suggestion of shiftiness or unreliability or of the use of stratagems <she is adept in *eluding* her obligations> <in the game of hide-and-seek the players try to *elude* discovery by the one seeking their hiding places> **Shun** differs from *avoid* chiefly in its added implication of an abhorrence or aversion that is sometimes temperamental in its origin but oftentimes rational and dictated by conscience, experience, or sense of prudence <[lepers] *shunned* and rebuffed by the world—*Heiser*> <to *shun* for his health the pleasures of the table—*Quiller-Couch*> <thus have I *shunned* the fire for fear of burning—*Shak.*> <I used to live entirely for pleasure. I *shunned* suffering and sorrow of every kind—*Wilde*> **Eschew** comes very close to *shun* in meaning but tends to stress practical, moral, or prudential rather than temperamental reasons for the avoidance <trained to *eschew* private passions and pursuits—*Mowrer*> <what cannot be *eschewed* must be embraced—*Shak.*> <observers . . . thought that capitalists would *eschew* all connection with what must necessarily be a losing concern—*Macaulay*>

 2 **Essay, article, paper, theme, composition** are comparable when denoting a relatively brief discourse written for others' reading or consideration. **Essay** is the only one of these terms which suggests a literary character or is included in classifications of literary types. It may designate any writing that attempts to cover a subject briefly, competently, and interestingly, whether the attempt is successful or not and whether it is intended for publication or for submission to a teacher or others for criticism. In such usage an essay is often distinguished from a short story or an argument, and though use of the word does not debar the introduction of a narrative or argumentative method, it typically has an expository or descriptive aim. **Article** carries the implication found in all senses of this word: that of membership in a whole without sacrifice of distinctness and individuality. Therefore *article* is appropriately applied only to one of the separate and in itself complete writings which make up a single issue of a journal or a magazine or such a book as a history written by different persons <have you read the *article* on the prospects of war in today's newspaper?> <a writer of *articles* for magazines> <the encyclopedia's *article* at "carpet" will furnish you information concerning Oriental rugs> **Paper** is applied to a writing, chiefly an informative writing, that is intended for reading (as at a meeting of a club or a learned society) or for publication (as in a scientific or learned journal) or as a college exercise especially in a nonliterary course <the most interesting *paper* on the program of the Woman's Club was one on the history of dolls> **Theme** and **composition** are applied to writings that are school exercises and submitted for criticism. Although they are seldom distinguished

in their use, except that *theme* is more often employed in colleges and high schools and *composition* in the lower schools, there can be a real difference in the implications of the words. *Theme* may imply the development and elaboration of a definite subject; its tests are chiefly adequacy, as evinced by its completeness of treatment within limitations, and readability, as evinced by its power to interest those who read it and impress its points on their minds. *Composition*, on the other hand, implies organization of details, facts, and ideas or sometimes of sentences and paragraphs so that the result is a unified and clear piece of writing.

estimate *vb* 1 **Estimate, appraise, evaluate, value, rate, assess, assay** are comparable when meaning to judge a thing with respect to its worth. **Estimate** usually implies a personal and sometimes a reasoned judgment which, whether considered or casual, is by the nature of the case neither thoroughly objective nor definitive (we have first to *estimate* their effects upon complicated social conditions (largely a matter of guesswork)—*Dewey*) (small and manageable numbers of birds must be counted precisely; huge flocks can only be *estimated*—*Time*) (to *estimate* the Frenchwoman's moral nature with any approach to adequacy it is necessary . . . to avoid viewing her from an Anglo-Saxon standpoint—*Brownell*) **Appraise** implies the intent to fix definitely and in the capacity of an expert the monetary worth of the thing in question usually in terms of the price it ought to bring in the market if sold, or in case of its loss (as by fire or theft) the monetary compensation due its owner from an insuring company (appraise the decedent's real estate) (appraise a fire loss) In extended use *appraise*, in contrast to *estimate*, implies an intent to give a final, an accurate, or an expert judgment of a thing's worth; *estimate*, therefore, is often preferred by persons speaking of their own judgments because *appraise* seems presumptuous or pretentious (it is not my business to *appraise*. Appraisements imply censures and it is not one writer's business to censure others—*F. M. Ford*) (this difficulty of *appraising* literature absolutely inheres in your study of it from the beginning—*Quiller-Couch*) The participial adjective **appraising** is often used to qualify *eye, glance, look*; it then suggests close, critical inspection or scrutiny (addressing him with a watchful *appraising* stare of his prominent black eyes—*Conrad*) (the monumental and encyclopedic critic is to be regarded with a carefully *appraising* eye—*T. S. Eliot*) **Evaluate**, like *appraise*, suggests an intent to arrive at a mathematically correct judgment; it seldom suggests, however, an attempt to determine a thing's monetary worth, but rather to find its equivalent in other and more familiar terms (a teacher *evaluates* a student's work by marks in numbers or in letters) (many persons find it impossible to *evaluate* a work of art except in terms of morals) (conventional ethical codes are assumed to be invalid or at least impractical for *evaluating* life as it is—*Walcott*) **Value** (see also APPRECIATE 2) comes very close to *appraise* in that it also implies an intent to determine or fix the market price but differs from *appraise* in that it carries no implication of an authoritative or expert judgment and must depend on the context to make that point if it is essential (the appraiser *valued* at \$10,000 condemned property which had already been *valued* by the owner at \$15,000 and by the city at \$8000) (experts were called in to *appraise* the gems which the alleged smuggler had *valued* at \$1000) In extended use and in

reference to things not marketable, *value* is often found with a negative or with a restrictive word such as *only* (the *values* success only as a stepping-stone) (who *values* his own honor not a straw—*Browning*) (valued himself on his tolerance of heresy in great thinkers—*Frost*) **Rate** often adds to *estimate* the implication of fixing in a scale of values (rate one profession above another in usefulness) (rate one person's qualifications as superior to another's) (we English are capable of rating him far more correctly if we knew him better—*Arnold*) **Assess** implies valuing for the sake of determining the tax to be levied; in extended use it implies a determining of the exact value or extent of a thing prior to judging it or to using it as the ground for a decision (the task of defining that influence or of exactly assessing its amount is one of extraordinary difficulty—*Huxley*) (striving to assess the many elements upon which Rome's future depended—*Buchan*) **Assay** basically implies chemical analysis for the sake of determining a substance's (usually a metal's) quality, quantity, or value; in extended use it implies a critical analysis for the sake of measuring, weighing, and appraising (to assay . . . changes which the great reformers within and without the Catholic Church accomplished—*Randall*)

estimation, **estimate** both mean the act of valuing or appraising, but they are rarely interchangeable. In general, **estimation** implies the manner or measure in which a person or thing is valued or esteemed (the degree in which he is held in *estimation* by scholars cannot be appreciated by the average man) (men's *estimation* follows us according to the company we keep—*Steele*) Often the term comes close to *personal opinion* or *point of view*, especially in respect to a thing's value (in my *estimation* the article, though interesting, is not in keeping with the policies and purposes of this periodical) (the crown . . . in the . . . *estimation* of law . . . had ever been perfectly irresponsible—*Burke*) In general, **estimate** applies to the result of an appraisal or an evaluation (as of a thing's worth, its cost, its size, or its prospects). It may connote an approximation to the truth that has been reached either by guessing or conjecture or as the outcome of careful consideration, expert knowledge, or profound study (his *estimate* of the value of the stolen jewels was \$50,000) (the young man has justified the high *estimate* of his promise expressed some years ago by his teachers) (a scientific *estimate* of the distance between the earth and Saturn) (economic forecasts are at best mere *estimates*) In a technical sense *estimate* implies the sum for which a piece of work (as the erection or repair of a building) can or will be undertaken.

estrangle, **alienate**, **disaffect**, **wean** are comparable when meaning to cause one to break a bond or tie of affection or loyalty. **Estrange** implies separation with consequent indifference or hostility; **alienate** may or may not suggest actual separation, but it does imply loss of affection or interest or withdrawal of support and often connotes a diversion of that affection or interest to another object (a little knowledge often *estranges* men from religion, a deeper knowledge brings them back to it—*Inge*) (the

colossal impudence of his comment on his former and now *alienated* associate—*Lucas*) **Estrange** is preferable when the indifference or hostility is mutual, *alienate* when the blame can be fixed on one person or on a third person (Mr. and Mrs. Brown have been *estranged* for a year) (she *alienated* him by her extravagance) (his affections were *alienated* by another woman) **Disaffect** is more often used with reference to groups from whom loyalty is expected or demanded; it stresses such effects of alienation without separation as unrest, discontent, or rebellion (the workers were *disaffected* by paid agitators) (the disloyalists tried to *disaffect* the militia, preaching treason—*Bowers*) **Wean** implies separation from something which has a strong hold on one or on which one depends in the manner of a nursing on its mother. Unlike the other words, it often suggests merit rather than fault in the person who breaks the bond (wean a person from a bad habit) (to *wean* your minds from hankering after false Germanic standards—*Quiller-Couch*) (low prices of movies may have *weaned* large sections of the public away from the legitimate theater—*Messenger*)

everlasting *adj* Everlasting, endless, interminable, unceasing

are comparable when they mean continuing on and on without end. Unlike *infinite*, *eternal*, and similar words (see INFINITE), these terms do not presuppose the absence of a beginning and therefore usually have reference only to continued extent or duration. However, *everlasting* is often used interchangeably with *eternal*, differing from it only in placing more stress on the fact of enduring throughout time than on the quality of being independent of time or of all similar human limitations (the eternal God is thy refuge, and underneath are the everlasting arms—*Deut* 33:27) (and these shall go away into everlasting punishment: but the righteous into life eternal—*Mt* 25:46) Therefore, in serious use, *everlasting*, rather than *eternal*, is applied to material things or earthly conditions which endure, or seem to endure, forever (see Cromwell damned to everlasting fame—*Pope*) (these mighty gates of everlasting rock—*De Quincey*) (each man dreamed of a square meal, new boots, a full powder horn, an end to the everlasting shortages—*Mason*) In lighter use the word is little more than a hyperbolic term expressing loss of patience or extreme boredom and more often applying to recurrence than to duration or extent (these everlasting headaches) (his everlasting stupidity) **Endless** is applicable not only to things which continue in time but also in extent; the word is used especially when a circular form or construction is implied (endless belt) or it may imply no known or apparent or determinable end (an endless chain of letters) (an endless road through the mountains) (there has been endless discussion whether we have a distinct faculty for the knowledge of God—*Inge*) (endless masses of hills on three sides, endless weald or valley on the fourth—*Jefferies*)

Interminable is somewhat uncommon in its sense of having no end or incapable of being brought to an end or termination (the forest trees above were wild with the wind, but the interminable thickets below were never stirred—*Trollope*) More often it applies to something so extended or prolonged or protracted that it is exceedingly wearisome or exhausts one's patience (the weeks were interminable, and papa and mamma were clean forgotten—*Kipling*) (spleen, chagrin, . . . discontent, misanthropy, and all their interminable train of fretfulness, querulousness, suspicions, jealousies—*Peacock*) **Unceasing**, like *interminable*, suggests undue prolonging or protracting, but it emphasizes the extraordinary capacity for going on and on rather than the psychological effect produced (usually on others) by long-continuing activity or continual recurrence (unceasing effort) (Jules de Goncourt . . . died from the mental exhaustion of his unceasing struggle

to attain an objective style adequate to express the subtle texture of the world as he saw it—*Ellis*)

Ana *exclude, eliminate, shut out: reject, repudiate, spurn (see DECLINE): *dismiss, fire, cashier, discharge

evidence *n* Evidence, testimony, deposition, affidavit are, in their legal senses, closely related but not synonymous terms. The last three designate forms of evidence, or material submitted to a competent legal tribunal as a means of ascertaining where the truth lies in a question of fact. *Evidence* also implies the intention of the side offering the material to use it as a basis for inference and argument and as a medium of proof. **Testimony** is evidence offered by persons (as eyewitnesses or experts) who are in a position to provide pertinent information. It implies declaration under oath or affirmation, usually on the stand in open court. Testimony does not necessarily constitute favorable evidence for the side that calls the witness, for its effect may vary with such matters as inferences that may be drawn from it favorable to the opposition or new aspects and emphases elicited by cross-examination. **Deposition**, though occasionally used interchangeably with *testimony*, is more usually used to designate a form of testimony that replaces testimony in open court or, more often, provides information for pretrial procedures and is given orally in response to questioning by competent officers, taken down in writing, and sworn to or properly affirmed. **Affidavit** designates a written declaration made upon solemn oath before a recognized magistrate or officer. An affidavit may sometimes be used as testimony, but when so used it is as a rule because a witness cannot take the stand. An affidavit submitted as testimony may be distinguished from a deposition; when used specifically and in contrast with *deposition*, *affidavit* always implies that the declaration has been obtained by one side to the dispute and that there has been no cross-examination.

evidence *vb* evince, manifest, demonstrate, *show

Ana *reveal, disclose, betray, divulge: display, exhibit, expose, *show: prove, *indicate, betoken, attest, bespeak

evident, manifest, patent, distinct, obvious, apparent, palpable, plain, clear are comparable when they mean readily perceived or apprehended. **Evident** implies the existence of visible signs, all of which point to the one conclusion; it may be applied to something (as another person's state of mind, a hidden condition, or an imminent event) which is beyond the range of the senses but can be inferred from the outward indications (her evident delight in the gift) (even in his vices the contradiction was evident. His conscience was severe—*Carlos Baker*) (the sustained impartiality and evident learning of his work—*Cheyney*) **Manifest** implies an outward revelation or expression or an open exhibition; it is applied as a rule to something which is displayed so clearly that its recognition seemingly involves no inference (his joy in the prospect of departure from the Five Towns, from her . . . was more manifest than she could bear—*Bennett*) (where the work of such a master [as Milton] is at its best, the greatness of his spirit is most greatly manifest—*L. P. Smith*) **Patent** implies an opposition to what is imperceptible or obscure but existent; it therefore is applied to things (as a cause, an effect, a mistake, or an imperfection) which are not invariably or as a class evident or manifest (the seller is required by law to disclose to the buyer latent as well as patent defects in the article sold) (a man is . . . in jeopardy even when the

error is *patent* on the face of the record, as when he is tried on a defective indictment—*Justice Holmes*) <three very *patent* reasons for the comparatively slow advance of our children—*Grandgent*> **Distinct** (see also **DISTINCT**) implies such sharpness of outline or of definition that the thing requires no effort of the eyes to see or discern <*distinct* features> <his handwriting is unusually *distinct*> or of the ears to hear or interpret <*distinct* utterance> <*distinct* enunciation> or of the mind to apprehend or comprehend without confusion <the course of his reasoning is not only evident, it is *distinct*> <he gave a *distinct* account of everything that occurred> **Obvious** stresses ease in discovery or, sometimes, in accounting for and often connotes conspicuousness in what is discovered or little need of perspicacity in the discoverer; it is therefore often applied to something not successfully concealed or something crudely manifest <*obvious* heirs he had none, any more than he had *obvious* progenitors—*Sackville-West*> <the avidity with which he surrendered himself to her perfectly *obvious* methods—*Mary Austin*> <acting on the conviction of Mr. Justice Holmes that “at this time we need education in the *obvious* more than investigation of the obscure”—*Frankfurter*> **Apparent** (see also **APPARENT 2**) is often so close to *evident* in meaning that the two words are difficult to distinguish. But *evident* usually implies inference directly from visible signs or effects, and *apparent* from evidence plus more or less elaborate reasoning; therefore *apparent* is especially applicable to something which is apprehended through an induction, a deduction, or a similar course of reasoning <the absurdity of their contention is *apparent* to one who knows the effects produced by the same causes in the past> <as experience accumulated it gradually became *apparent* that the oils of any of the trees . . . were equally efficacious—*Heiser*> <deposits of transported material . . . are perhaps the most widely *apparent* results of the glaciation—*Amer. Guide Series: N. H.*> **Palpable** (see also **PERCEPTIBLE**) basically implies perceptibility through the sense of touch; it is often extended to perception by the other senses, excluding sight, or by the mind and typically suggests ease of perception or readiness of interpretation <’tis probable that thou hast never lived, and *palpable* that thou hast never loved—*Garnett*> <yet, despite these precautions, a *palpable* uneasiness persists—*Moorehead*> <beneath it all was a hush, almost *palpable*—*Mailer*> *Plain* and *clear* are less formal and literary than the preceding terms. Both are applied to something that is immediately apprehended or unmistakably understood, but *plain* implies familiarity or distinctness or a lack of intricacy or complexity, while *clear* suggests an absence of whatever confuses or muddles the mind or obscures the issues <a *plain* answer to a direct question—*Crothers*> <yes, that makes much which was dark quite *clear* to me—*Galsworthy*> <proof as sharp and *clear* as anything which is known—*Darrow*>

Ant exemplary: salutary

evil *n* *Evil*, *ill* are comparable when they mean whatever is harmful or disastrous to morals or well-being. *Evil* is the ordinary term capable of use in all contexts and referable not only to deeds and practices actually indulged in or to conditions actually suffered <lead a life of *evil*> <the *evils* of war> <correct the *evils* in a system of government> but also to motivating desires or actuating causes of such deeds, practices, or conditions <think no *evil*> <shun

evil> and to their harmful effects or consequences <the *evil* that men do lives after them—*Shak.*> <*evils* which our own misdeeds have wrought—*Milton*> *Evil* is also the term in general use for the abstract conception of whatever is the reverse of good, especially of the morally good, or as a designation of whatever is thought of as the reverse of a blessing <able to distinguish good from *evil*> <the origin of *evil*> <St. Francis of Assisi accounted poverty a blessing rather than an *evil*> <*evil* no nature hath; the loss of good is that which gives to sin a livelihood—*Herrick*> <*Evil* is not a quality of things as such. It is a quality of our relation to them—*Lippmann*> Although *ill*, like *evil*, may imply an antithesis to *good*, it is seldom used to designate the abstraction except in a poetic context and in direct contrast to *good* <O, yet we trust that somehow good will be the final goal of *ill*—*Tennyson*> Also, it is now rare in the sense of moral evil. In present use, as in the past, *ill* is applied chiefly to whatever is distressing, painful, or injurious and is more often used in reference to what is actually suffered or endured than to what may be inflicted or imposed on one <and makes us rather bear those *ills* we have than fly to others that we know not of—*Shak.*> <they could never in such a Utopian State feel any other *ills* than those which arise from bodily sickness—*Hume*> <there mark what *ills* the scholar’s life assail—toil, envy, want, the patron, and the jail—*Johnson*> <servitude, the worst of *ills*—*Cowper*>

exaggeration, **overstatement**, **hyperbole** all mean an overstepping of the bounds of truth, especially in describing the goodness or badness or the greatness or the smallness of something. **Exaggeration** does not always or even often imply dishonesty or an intent to deceive on the part of one making a statement, a representation, or a claim; it may merely imply an often temperamental unwillingness to be held down by the facts or a bias, whether favorable or unfavorable, so great that one cannot clearly see or accurately estimate the exact state of affairs depicted <men of great conversational powers almost universally practise a sort of lively sophistry and *exaggeration* which deceives for the moment both themselves and their auditors—*Macaulay*> <to say that Mrs. Ralston’s son and daughter were pleased with the idea of Tina’s adoption would be an *exaggeration*—*Wharton*> Unlike *exaggeration*, **overstatement** rarely carries any hint of depreciation; it is therefore often the term chosen by one desiring to stress the fact of exceeding the truth without any additional implications <this . . . is one of those *overstatements* of a true principle,

often met with in Adam Smith—*J. S. Mill*) <if all costs applicable to revenue are charged thereto, *overstatement* of net income . . . is avoided—*Paton & Littleton*) <he invariably avoids *overstatement*; not for him is the heavy underlining of a musical phrase—*N. Y. Times*) **Hyperbole** implies the use of exaggeration as a literary device. Though such use may arise from overpowering emotion, it more often suggests a desire to create a planned impression or particular effect; in either case *hyperbole* implies obvious extravagance in statement often producing a rhetorical effect that could not be gained otherwise <the speaking in a perpetual *hyperbole* is comely in nothing but in love—*Bacon*) <an Arabic interpreter expatiated, in florid *hyperbole*, on the magnanimity and princely qualities of the Spanish king—*Prescott*) <that rather startling “terrible” is not *hyperbole*; it is precisely what Mr. Blackmur means—*Mizener*) *Hyperbole* is often used as the name of a figure of speech that produces its effect by overstatement as its opposite, *litotes*, does by understatement.

Therefore one *exalts* something above another or at the expense of another <Rousseau’s readiness to *exalt* spontaneity even at the expense of rationality—*Babbitt*) <there is a valid reason for not preventing games, but . . . not . . . for *exalting* them into a leading position in the school curriculum—*Russell*) **Magnify** stresses increase in size; it commonly suggests an agency (as an optical device) which affects the vision and causes enlargement of apparent size or one (as a vivid imagination) which affects the judgment and leads to exaggeration <kind, quiet, nearsighted eyes, which his round spectacles *magnified* into lambent moons—*Deland*) <the public opinion which . . . *magnifies* patriotism into a religion—*Brownell*) **Aggrandize** emphasizes increase in greatness or mightiness; it implies efforts, usually selfish efforts, directed to the attainment of power, authority, or worldly eminence <if we *aggrandize* ourselves at the expense of the Maharrattas—*Wellington*) <have we a satisfaction in *aggrandizing* our families . . . ?—*Fielding*) <to those of us who are engaged in constructive research and in invention, there is serious moral risk of *aggrandizing* what we have accomplished—*Wiener*)

excel surpass, transcend, *exceed, outdo, outstrip

excellence, **merit**, **virtue**, **perfection** are comparable when meaning a quality or feature of a person or thing that gives him or it especial worth or value. **Excellence** applies to a quality or feature in which the person or thing excels or surpasses others; since the term carries no implication of absence of fault, defect, or blemish, it is often qualified (as by *particular*, *specific*, or *distinctive*) <the particular *excellence* of this cake is its lightness) <the great *excellence* of the eastern tableland was . . . in

pasture and in forest—*Stanley*) <spoke of the rude health of their children as if it were a result of moral *excellence*—*Conrad*> **Merit** (see also DUE) may be used interchangeably with *excellence*, but it typically carries no suggestion of a surpassing quality; rather, it applies to a quality or feature that has evident worth or value or is highly commendable. It is used especially in critical estimates in which good points (*merits*) are displayed against bad points (*defects* or *faults*) <Mr. Wright's version of the Iliad, repeating in the main the *merits* and defects of Cowper's version—*Arnold*> <the faculty of discerning and using conspicuous *merit* in other people distinguishes the most successful administrators, rulers, and men of business—*Eliot*> **Virtue**, because of the long association of the term with moral goodness (for this sense see GOODNESS) is chiefly applied to a moral excellence or a conspicuous merit of character <one is inclined to ask whether, when the right path is so easy to them, they really have any *virtues*—*Ellis*> <reverence for age and authority, even for law, has disappeared; and in the train of these have gone the *virtues* they engendered and nurtured—*Dickinson*> But the term may also apply to the quality or feature that is the source of a person's or thing's peculiar or distinctive strength, power, or efficacy <the special *virtue* of a newly discovered remedy for pneumonia> <that unsparing impartiality which is his most distinguishing *virtue*—*Macaulay*> **Perfection** suggests an attainment of the ideal and is usually found in less restrained writing or speech than the other terms when it applies to an excellence in the highest degree <but eyes, and ears, and ev'ry thought, were with his sweet *perfections* caught—*Spenser*> <what tongue can her *perfections* tell?—*Sidney*> <Fitzgerald's *perfection* of style and form, as in *The Great Gatsby*, has a way of making something that lies between your stomach and your heart quiver a little—*Thurber*>

Ant deficient —**Con** *meager, scanty, scant, skimpy, exiguous, sparse

exchange *vb* **Exchange, interchange, bandy** mean to give a thing to another in return for another thing from him. **Exchange** may imply a disposing of one thing for another by or as if by the methods of bartering or trading <*exchange* horses> <the hostile forces *exchanged* prisoners of war> <*exchange* farm products for manufactured goods> Sometimes the term specifically implies a substitution of one thing for another without any definite suggestion of bartering or trading <>wedding presents are often *exchanged* by the bride for things of which she has greater need> <well satisfied to *exchange* the stratified suburb of Hyde Park for the amorphous neighborhood of Halsted Street—*Lovett*> or an alternation of things by two, sometimes more, persons <*exchange* letters> <*exchange* a few words with each other> **Interchange** is rarely used in place of *exchange* except when alternation (as in reciprocal giving and receiving) is implied, often with the connotation of a continuous succession <the townspeople and the summer residents *interchanged* courtesies with each other> <there were repeated cheerings and salutations *interchanged* between the shore and the ship—*Irving*> **Bandy** may imply a careless or casual tossing back and forth or from one to another <a firearm is no toy to be *banded* about> and it is often used in place of *interchange* when vigorous, rapid, and more or less prolonged action is implied <*bandy* hasty words> <*bandy* compliments> The term also may imply heated or active discussion or a passing of information from one to another <your name is . . . frequently *banded* at table among us—*Irving*> <the stories they invent . . . and *bandy* from mouth to mouth!—*Dickens*>

excitant *stimulus, stimulant, incitement, impetus

excite *provoke, stimulate, pique, quicken, galvanize **Ana** *stir, rouse, arouse, rally, waken, awaken: agitate, disturb, perturb, *discompose, disquiet: animate, inspire, fire (see INFORM)

Ant soothe, quiet (*persons*): allay (*fears, anxiety*)

exclude, debar, blackball, eliminate, rule out, shut out, disbar, suspend are comparable when meaning to prevent someone or something from forming part of something else as a member, a constituent, or a factor. **Exclude** implies a keeping out of what is already outside; it therefore suggests a prevention of entrance or admission <*exclude* light from a room by closing the shutters> <*exclude* a subject from consideration> <*exclude* a class from certain privileges> **Debar** implies the existence of a barrier which is effectual in excluding someone or something on the outside from entering into a group, body, or system, from enjoying certain privileges, powers, or

privileges, or from doing what those not so restrained do naturally or easily <a high wall *debarred* boys from entering> <the qualifications demanded . . . would be likely to *debar* 99 percent of the secondary school instructors in America—*Grandgent*> <the Japanese designer was *debarred* by instinct and tradition from using the resources of texture and of light and shade—*Binyon*> **Blackball** basically implies exclusion from a club or society by vote of its members (originally by putting a black ball into a ballot box) <he was very nearly *blackballed* at a West End club of which his birth and social position fully entitled him to become a member—*Wilde*> The term has some extended use, but it usually implies a deliberate decision or effort to exclude a person from social, professional, or economic intercourse. **Eliminate** differs from the preceding words in implying a getting rid of, or a removal of what is already in, especially as a constituent element or part <*eliminate* a quantity from an equation> <*eliminate* a subject from a curriculum> <*eliminate* a poison from the system> <it is always wise to *eliminate* the personal equation from our judgments of literature—*J. R. Lowell*> <in most poets there is an intermittent conflict between the poetic self and the rest of the man; and it is by reconciling the two, not by *eliminating* the one, that they can reach their full stature—*Day Lewis*> **Rule out** may imply either exclusion or elimination, but it usually suggests a formal or authoritative decision <*rule* a horse *out* of a race> <*rule out* certain candidates for a position> <*rule* such subjective and moral judgments *out* of our biology—*Kroeber*> **Shut out** may imply exclusion of something by preventing its entrance or admission <close the windows to *shut out* the rain> or, in sports use, to prevent from scoring <the home team was *shut out* in the second game> **Disbar** (often confused with *debar*) implies the elimination by a legal process of a lawyer from the group of those already admitted to practice, thereby depriving him for cause of his status and privileges. **Suspend** implies the elimination of a person who is a member of an organization or a student at a school or college, often for a definite period of time and, usually, because of some offense or serious infraction of the rules; the term seldom if ever implies that the case is closed or that readmission is impossible <*suspend* ten members of a club for nonpayment of dues> <there was but one course: to *suspend* the man from the exercise of all priestly functions—*Cather*>

Ana *hinder, bar, block: preclude, obviate, ward, *prevent: *banish, exile, ostracize, deport

Ant admit (*persons*): include (*things*) —**Con** comprehend, embrace, involve (see INCLUDE)

exclusive *select, elect, picked

Ana excluding, eliminating, debarring, shutting out, ruling out (see EXCLUDE): aristocratic, patrician (see corresponding nouns at GENTLEMAN)

Ant inclusive —**Con** catholic, cosmopolitan, *universal: *common, ordinary, familiar, popular, vulgar

excogitate weigh, *consider, study, contemplate

Ana *ponder, meditate, ruminate, muse: cogitate, reflect, deliberate, speculate, *think

excoriate *abrade, chafe, fret, gall

Ana *strip, divest, denude, bare: flay, *skin: torture, torment, rack (see AFFLICT): tongue-lash, revile, berate (see SCOLD)

excruciating, agonizing, racking mean intensely and, usually, unbearably painful. All are commonly used as strong intensives and applied to pain, suffering, and torture. When used to qualify other things, they mean causing intense pain or suffering. **Excruciating** carries strong suggestions of acute physical torture or of exquisitely

painful sensation (suffered *excruciating* pain from an abscessed tooth) (excruciating noises) (the hearty merrymakings of the population at large were an *excruciating* torment to narrow-minded folk—*Amer. Guide Series: Md.*) **Agonizing** stresses anguish of mind even when it strongly implies physical suffering (an *agonizing* spasm of pain—a memento mori—shot through me and passed away—*W. J. Locke*) (lives there a man so firm, who, while his heart feels all the bitter horror of his crime, can reason down its *agonizing* throbs—*Burns*) **Racking** suggests sensations of pulling and straining and tearing comparable to those suffered by a person on the rack (racking pains in the chest) (a *racking* headache) (racking doubts)

Ana torturing, tormenting, racking (see AFFLICT): *intense, vehement, fierce, exquisite, violent

exculpate, **absolve**, **exonerate**, **acquit**, **vindicate** mean to free from a charge or burden. **Exculpate** implies simply a clearing from blame, often in a matter of small importance (exculpate oneself from a charge of inconsistency) (directly Harding was blameless for what was going on. Indirectly he cannot be wholly *exculpated*—*S. H. Adams*) **Absolve** implies a release, often a formal release, either from obligations or responsibilities that bind the conscience or from the consequences or penalties of their violation (absolve a person from a promise) (society cannot be *absolved* of responsibility for its slums) **Exonerate** implies relief, often in a moral sense, from what is regarded as a load or burden (no reason for *exonerating* him [a judge] from the ordinary duties of a citizen—*Justice Holmes*) In general *exonerate* more frequently suggests such relief from a definite charge that not even the suspicion of wrongdoing remains (exonerate a person charged with theft) **Acquit** implies a decision in one's favor with reference to a specific charge (acquit a suspect of all participation in a crime) (you do *acquit* me then of anything wrong? You are convinced that I never meant to deceive your brother . . . ?—*Austen*) **Vindicate**, unlike the preceding words, may have reference to things as well as to persons that have been subjected to attack, suspicion, censure, or ridicule. As here compared (see also MAINTAIN) it implies a clearing through proof of the injustice or the unfairness of such criticism or blame and the exoneration of the person or the justification of the thing (both his knowledge and his honesty were *vindicated* when the river was discovered—*G. R. Stewart*) (the . . . politicians were *vindicated* on all counts—*Rovere*)

Ana justify, *explain, rationalize: *excuse, condone, pardon, forgive, remit

Ant inculpate: accuse —**Con** blame, denounce, reprehend, reprobate, censure (see CRITICIZE): charge, arraign, indict, incriminate, impeach (see ACCUSE)

excursion trip, jaunt, tour, cruise, *journey, voyage, expedition, pilgrimage

Ana ride, drive (see under RIDE *vb*)

excursion divagation, *digression, episode

excuse *vb* **Excuse**, **condone**, **pardon**, **forgive**, **remit** are comparable when meaning not to exact punishment or redress for (an offense) or from (an offender). In polite use *excuse*, *pardon*, and *forgive* usually suggest a hope that one is not annoyed. Both *excuse* and *condone* imply an overlooking or passing over either without censure or without adequate punishment; distinctively, one may *excuse* specific acts (as faults, omissions, or neglects) especially in social or conventional obligations or the person committing them (please *excuse* my interruption) (the injustice with which he had been treated would have *excused* him if he had resorted to violent methods of

redress—*Macaulay*) but one more often *condones* either a kind of behavior (as dishonesty, folly, or violence) or a course of conduct or an institution especially when constituting a grave breach of the moral code or a violation of law (we *condone* everything in this country—private treason, falsehood, flattery, cruelty at home, roguery, and double-dealing—*Thackeray*) (slavery struck no deep roots in New England soil, perhaps because the nobler half of the New England conscience never *condoned* it—*Replier*) **Pardon** (opposed to *punish*) and *forgive* (opposed to *condemn*) are often employed interchangeably, but their implications may be distinct. One *pardons* when one frees from the penalty due for an offense or refrains from exacting punishment for it (pardon ten prisoners at Christmas) (will you *pardon* my intrusion?) (it became necessary . . . to fly for our lives . . . We could not look to be *pardoned*—*Hudson*) and one *forgives* when one gives up not only all claim to requital or retribution but also all resentment or desire for revenge (to err is human, to *forgive*, divine—*Pope*) (the wrath . . . is past . . . and I, lo, I *forgive* thee, as Eternal God *forgives*!—*Tennyson*) **Remit** is a synonym only in the idiomatic phrase *remit sins*, in which it means to free from the punishment due for one's sins.

Ana justify, *explain, account, rationalize: acquit, vindicate, *exculpate, absolve, exonerate: *palliate, extenuate, glaze, gloss, whitewash

Ant punish —**Con** censure, reprobate, reprehend, blame, *criticize: chastise, castigate, discipline, chasten, correct (see PUNISH)

excuse *n* plea, pretext, *apology, apologia, alibi

Ana explanation, justification, rationalization (see corresponding verbs at EXPLAIN): palliation, extenuation, whitewashing, glossing (see corresponding verbs at PALLIATE)

execrable, **damnable**, **accursed**, **cursed** mean so odious as to deserve cursing or condemning. In actual use they vary little if any in force and only slightly in implications, although usage to a certain extent limits their applications. **Execrable** is applied chiefly to what is bad beyond description (execrable poetry) (an *execrable* performance of Hamlet) (the concurrent possession of great wealth and *execrable* taste—*Wylie*) **Damnable** and **accursed** are applied most often either to persons, their acts, and their vices or to things that excite righteous indignation and strong condemnation (unless that man in there is to be given a chance of expiation in another life, then capital punishment is a *damnable* horror—*Mackenzie*) (accursed tower! *accursed* fatal hand that hath contrived this woeful tragedy!—*Shak.*) **Cursed** varies in dignity, sometimes being applied to what merely excites profanity and sometimes to what is intrinsically worthy of imprecation (merciful powers, restrain in me the *cursed* thoughts that nature gives way to in repose!—*Shak.*)

Ana *outrageous, atrocious, heinous, monstrous: *base, low, vile: loathsome, revolting, repulsive, *offensive, repugnant

execrate, **curse**, **damn**, **anathematize**, **objurgate** are comparable when meaning to denounce violently and indignantly. **Execrate** implies intense loathing or hatred and, usually, a fury of passion (they *execrate* . . . their lot—*Cowper*) (execrated the men who were responsible for their misery) It often suggests acts as well as words which give an outlet to these emotions (for a little while he was *execrated* in Rome; his statues were overthrown, and his name was blotted from the records—*Buchan*) **Curse** in reference to earlier custom may imply an invocation to the Supreme Being to visit deserved punish-

ment upon a person or to afflict him for his sins <he that withholdeth corn, the people shall *curse* him: but blessing shall be upon the head of him that selleth it—*Prov* 11:26> In more general use *curse* and *damn* (see also SENTENCE) do not markedly differ in meaning. Both usually imply angry denunciation by blasphemous oaths or profane imprecations <I heard my brother *damn* the coachman, and *curse* the maids—*Defoe*> **Anathematize** implies solemn denunciation (as of an evil, a heresy, or an injustice). It is used chiefly in reference to the impassioned denunciations of preachers or moralists <*anathematize* the violation of a treaty> <*anathematize* graft in politics> <a quasi idealism which has been *anathematized* by the empirical foundations and purposes of realistic philosophy—*Nemetz*> **Objurgate** implies a vehement decrial or criticism <*objurgated* the custom of garnishing poems with archaisms—*T. R. Weiss*> and often suggests the use of harsh or violent language in the expression of one's views so that it may approach *curse* or *damn* in some of its uses <command all to do their duty. Command, but not *objurgate*—*Taylor*> <violently had he *objurgated* that wretch of a groom—*Vaughan*>

Ana denounce, condemn, reprobate, censure, reprehend (see CRITICIZE): revile, berate, rate (see SCOLD)

Con *commend, applaud, compliment, recommend: *praise, laud, extol, acclaim, eulogize

2 *kill, dispatch, slay, murder, assassinate

exemplar pattern, ideal, beau ideal, example, *model, mirror, standard

Ana apotheosis, *paragon, nonpareil, nonesuch: type, *symbol

exemplify, **illustrate** are comparable when they mean to use in speaking or writing concrete instances or cases to make clear something which is difficult, abstract, general, or remote from experience or to serve as an instance, case, or demonstration of a point or matter under examination. **Exemplify** implies the use of examples for clarification of a general or abstract statement or as aid in revealing the truth of a proposition or assertion <a good preacher usually *exemplifies* each point that he seeks to impress upon his congregation> <the notes of Coleridge *exemplify* Coleridge's fragmentary and fine perceptions—*T. S. Eliot*> <each, in his way, *exemplifies* the peril that besets a highly gifted poetic nature—*Lowe*> **Illustrate** implies the use not only of concrete examples but also sometimes of pictures or sketches and the intent not only to clarify but to make vivid or real what is being explained or to drive home most effectively a point that is being made <the textbook is adequately *illustrated* with photographs and diagrams> <I will *illustrate* the word a little further—*J. R. Lowell*> <the assertion . . . leans for support . . . upon the truth conveyed in those words of Cicero, and wonderfully *illustrates* and confirms them—*Arnold*> <the world was no more made to serve us by *illustrating* our philosophy than we were made to serve the world by licking its boots—*Santayana*>

exemption, **immunity** are comparable when meaning the act or fact of freeing or the state of being free or freed from something burdensome, disagreeable, or painful. **Exemption** is more restricted in its meaning, for it applies usually to a release from some legal or similarly imposed obligation or burden to which others in the same circumstances and not similarly freed are liable <married men with families may apply for *exemption* from military service> <[they] have no vices, but they buy that *exemption*

at a price, for one is inclined to ask whether . . . they really have any virtues—*Ellis*> **Immunity** covers all cases for which an exemption may be given or obtained, but the term carries so strong an implication of privilege and of freedom from certain common restrictions that it is often used in reference to persons or classes of persons especially favored by the law or by nature <entitled to the rights of a citizen, and clothed with all the rights and *immunities* which the Constitution and laws of the State attached to that character—*Taney*> <the question of the *immunities* of the clergy had been publicly raised—*Froude*> <the man of creative imagination pays a ghastly price for all his superiorities and *immunities*—*Mencken*> **exercise** *n* practice, drill (see under PRACTICE *vb*)

Ana *action, act, deed: using or use, employment, utilization, application (see corresponding verbs at USE): operation, functioning, behavior (see corresponding verbs at ACT)

exercise *vb* *practice, drill

Ana *reveal, disclose, discover, divulge: *show, manifest, evidence, evince, demonstrate

Con *suppress, repress: *hide, conceal, secrete, bury

exhibit *n* *exhibition, show, exposition, fair

exhibition, **show**, **exhibit**, **exposition**, **fair** are comparable when meaning a public display of objects of interest. **Exhibition** and, less often in strictly formal use except in art circles, **show** are applicable to any such display of objects of art, manufacture, commerce, or agriculture or to a display (as by pupils, members, or associates) of prowess or skill (as in gymnastics, oratory, or music) <the annual *exhibition* of the Academy of Fine Arts> <an *exhibition* of Navaho blankets> <a one-man *show* of paintings> <a gymnastic *exhibition*> <a cattle *show*> <an industrial *exhibition*> **Exhibit** typically denotes an object or collection displayed by a single person, group, or organization in an *exhibition* <our club had a fine *exhibit* in the school fair> but in some uses it is not clearly distinct from *exhibition* or *show*, since the scope of an *exhibit* may vary from a single object to a collection co-extensive with an exhibition; thus, an artist might present a one-man *show* which would be at once an *exhibition* and an *exhibit* of his work. **Exposition** is the usual term for a very large exhibition, especially one involving the participation of many states and countries <the World's Columbian *Exposition* at Chicago in 1893> <the annual Eastern States *Exposition* at West Springfield, Massachusetts> **Fair** may be equivalent to *exposition* <a world's *fair*> or it may apply to a small exhibition of wares, produce, or stock sometimes for the promotion of sales, sometimes in competition for prizes for excellence; it suggests a variety of kinds of display and entertainment

and usually an outdoor setting <a county fair>

exhort *urge, egg, goad, spur, prod, prick, sic
Ana plead, appeal (see under PRAYER): entreat, implore, beseech (see BEG): stimulate, excite, *provoke: advise, counsel (see under ADVICE *n*)

Ana critical, crucial, *acute: threatening, menacing (see THREATEN): compelling, constraining (see FORCE *vb*)

exiguous *meager, scant, scanty, skimpy, scrimpy, spare, sparse

Ana diminutive, tiny, *small, little: tenuous, slender, slight, *thin: limited, restricted, confined (see LIMIT *vb*)

Ant capacious, ample

exile *vb* *banish, expatriate, ostracize, deport, transport, extradite

Ana proscribe, condemn (see SENTENCE): expel, *eject, oust

exist *be, live, subsist

existence, **being**, **actuality** are closely related in meaning but not always interchangeable. **Existence** is the inclusive term which designates the state or condition of anything regarded as occurring in space or time, as distinct and apart from all other things, and as having a nature or substance of its own <customs that have recently come into *existence*> <a mathematical point has no real *existence*> <wars that threaten the *existence* of civilization> <his misfortunes have *existence* only in his imagination> <concepts . . . are tyrants rather than servants when treated as real *existences*—Cardozo> The opposite of *existence* is its complete negation *nonexistence*. **Being**, when it denotes existence, adds varying implications. Sometimes it implies life, consciousness, or personality <in him we live, and move, and have our *being*—Acts 17:28> Sometimes it implies fullness or completeness of existence and absence of imperfection <everything else is in a state of becoming, God is in a state of *being*—F. W. Robertson> Sometimes it suggests the complex of qualities or characteristics that constitute the nature of a person or a personified thing <all the forces of his *being* were massed behind one imperious resolve—Buchan> **Actuality** as a synonym of *existence* stresses realization or attainment; it usually implies opposition to *possibility* or *potentiality* <ambition is the spur that makes dreams come into *actuality*> <risks which have been seized upon as *actualities* when they have been merely *potentialities*—T. S. Eliot>

Ana *state, condition, situation, status: subsisting or subsistence, living or life (see corresponding verbs at BE)

Ant just (price, charge) —*Con* *fair, equitable: reason-

able, *rational

exordium preamble, preface, *introduction, foreword, prologue, prelude

expand, **amplify**, **swell**, **distend**, **inflate**, **dilate** mean to increase or to cause to increase in size, bulk, or volume.

Expand is the most inclusive term in this group and may often be used interchangeably with any of the others. It distinctively implies enlargement by opening out, unfolding, or spreading and may be used when the enlarging force is either internal or external <tulips *expand* in the sun> <the flag *expanded* in the breeze> <*expand* a sponge by soaking it in water> <*expand* one's chest by breathing deeply> <their business is *expanding*> **Amplify** implies extension of something which is inadequate or obscure (as by filling out with details or by magnifying the volume) <*amplify* a statement by adding details> <devices for *amplifying* sounds> <the author follows the Vulgate narrative closely . . . but *amplifies* and embroiders—*Saintsbury*> **Swell** implies expansion beyond a thing's original circumference or normal limits <warm spring rains cause the leaf buds to *swell*> <the river is *swelling*> <his hand is *swollen*> <gifts to *swell* the endowment fund> Often it implies increase in intensity, force, or volume <the laughter *swelled* to hooting—*Galsworthy*> <Caesar's ambition, which *swelled* so much that it did almost stretch the sides of the world—*Shak.*> or it may imply puffing up or puffing out to the point of bursting <*swollen* veins> <his heart *swelled* with pride> **Distend** implies swelling caused by pressure from within forcing extension outward in all directions. It may presuppose a previous void or flaccid state <a rubber bag *distends* when filled with water> <sails *distended* by the wind> or it may imply an exceeding of normal bounds <a stomach *distended* by gas> <like the flesh of animals *distended* by fear—*Cather*> <the bat's body was so *distended* that it appeared spherical—*Ditmars & Greenhall*> **Inflate** usually implies distention by artificial means (as by the introduction of gas or by puffing up with something as insubstantial or as easily dissipated as gas) <*inflate* a balloon> <*inflate* values> <an *inflated* idea of one's own importance> <poems . . . so *inflated* with metaphor, that they may be compared to the gaudy bubbles blown up from a solution of soap—*Goldsmith*> <the psychological problems of *inflated* national ego, heroic delusions of grandeur, and theories of historical inevitability—*Newhall*> **Dilate** implies expansion in diameter; it therefore suggests a widening out of something circular rather than a puffing up of something globular or spherical <as round a pebble into water thrown *dilates* a ring of light—*Longfellow*> <half-frighted, with *dilated* eyes—*Tennyson*> <some stirring experience . . . may swiftly *dilate* your field of consciousness—*Montague*>

Ana enlarge, *increase, augment: *extend, protract, prolong

Ant contract: abridge (a book, article): circumscribe (a range, a scope, a power)

expanse, **amplitude**, **spread**, **stretch** are comparable when they denote an area or range of considerable or conspicuous extent. **Expanse** is applied chiefly to vast areas open to view and usually uniform in character <pure as the *expanse* of Heaven—*Milton*> <thy mariners explore the wide *expanse*—*Cowper*> <great *expanse* of country spread around and below—*D. H. Lawrence*> **Amplitude** implies in general use an amplexness in what it describes and suggests relative largeness (as in size or range) <with a face dark and proud as a Borgia's, though not cruel; with a figure of noble *amplitude*—*Donn Byrne*> <the *amplitude* of his vision found supreme expression in a style that is meticulous, colorful, and luminous—*Millett*> or great-

ness (as in character or quality) <he displayed a Miltonic *amplitude* of ambition and style—*Bush*> <a red-curtained English inn . . . stood sideways in the road, as if standing aside in the *amplitude* of hospitality—*Chesterton*> but in technical contexts in which the word is specifically applied to the range of a variable (as wavelength or a statistical array) the notion of amplexness has given way to that of magnitude, and *amplitude* means no more than size or extent <the size or extent of the swing is known as the *amplitude* of the pendulum—*Taffel*> <the maximum distance the curve rises above or falls below the horizontal axis . . . is known as its *amplitude*—*F. E. Seymour & P. J. Smith*> **Spread** is applied to an expanse drawn out in all directions <the water . . . a ripply *spread* of sun and sea—*Browning*> <a trackless *spread* of moor—*Blackmore*> <under the immense *spread* of the starry heavens—*Stevenson*> **Stretch** is applied to an expanse in one of its two dimensions <the beach was a narrow *stretch* of sand> <a *stretch* of farmland extending as far as the distant mountains> <the great *stretches* of fields that lay beside the road—*Anderson*>

Ana *range, reach, scope, compass, sweep, orbit: domain, territory, sphere, *field

expansive *elastic, resilient, buoyant, volatile, effervescent

Ana exuberant, luxuriant, lavish, prodigal (see PRO-FUSE): generous, *liberal, bountiful, bounteous, open-handed: exalted, magnified, aggrandized (see EXALT) **Ant** tense: reserved—*Con* *stiff, inflexible, rigid: stern, austere, *severe: taciturn, *silent, reticent

expatriate *discourse, descendant, dilate

Ana *speak, talk, converse: *expand, amplify: *discuss, argue, dispute: expound, *explain: *relate, narrate, recount, recite, rehearse

expatriate *vb* exile, *banish, ostracize, deport, transport, extradite

Ant repatriate

expect, hope, look, await are comparable when they mean to have something in mind as more or less certain to happen or come about. They vary, however, so greatly in their implications and in their constructions that they are seldom interchangeable. **Expect** usually implies a high degree of certainty, but it also involves the idea of anticipation (as by making preparations or by envisioning what will happen, what one will find, or what emotions one will feel) <he told his mother not to *expect* him for dinner> <she had reason to *expect* that the trip would be exciting> <he seems to require and *expect* goodness in his species as we do a sweet taste in grapes and China oranges—*Mandeville*> <what can you *expect* of a girl who was allowed to wear black satin at her coming out ball?—*Wharton*> **Hope** (often with *for*) implies some degree of belief in the idea that one may expect what one desires or longs for; although it seldom implies certainty, it usually connotes confidence and often especially in religious use implies profound assurance <he dared not *hope* that he would succeed in his venture, for he feared disappointment> <what I *hope* for and work for today is for a mess more favorable to artists than is the present one—*Forster*> <encouraged to *hope* for a college education—*Scudder*> **Look** (usually followed by *to* with an infinitive and sometimes also by *to* with a personal object) is less literary than *expect*; it often also suggests more strongly than *expect* a counting upon or a freedom from doubt <they *look* to profit by their investment> <they *looked* to their son to help them in their old age> <I never *look* to have a mistress that I shall love half as well—*Brooke*> With *for*, on the other hand, *look* does not imply as much assurance; it suggests rather an

attitude of expectancy and watchfulness <they are *looking* for news in the next post> <there is no use *looking* for their return tonight> <finality is not to be *looked* for in . . . translation—*Swaim*> **Await** often adds to *look* for the implication of being ready mentally or, sometimes, physically for the event; it also suggests waiting, often patient waiting <we *await* your reply with interest> <the two armies are eager for action, each *awaiting* an attack by the other> <I . . . had known it would happen to me, and now it was there with all the strangeness and dark mystery of an *awaited* thing—*Wolfe*> *Await* also differs from the other words in this group in its capacity for taking as subject the thing expected and as object the person who is expecting <good fortune *awaits* you> <death *awaits* all men>

Ana *foresee, foreknow, anticipate, apprehend, divine **Ant** despair of

expedient *adj* **Expedient, politic, advisable** are comparable when they are used to imply a choice (as of course, action, or method) and to mean dictated by practical wisdom or by motives of prudence. Something is **expedient** from which definite and usually immediate advantages accrue. Originally and still occasionally the word carries no derogatory implication (<it is *expedient* for you that I go away: for if I go not away, the Comforter will not come unto you; but if I depart, I will send him unto you—*Jn* 16:7>) In its sense development *expedient* came to imply determination by immediate conditions and to mean necessary or suitable under present circumstances <there shall be appointed . . . such number of . . . justices of the peace as the president of the United States shall, from time to time, think *expedient*—*John Marshall*> As a result *expedient* now commonly implies opportuneness (sometimes with a strong hint of timeserving) as well as advantageousness <they decided that it was not *expedient* (that is, neither opportune nor of advantage) to interfere now> Very frequently also it connotes such an ulterior motive as self-interest <purely for *expedient* reasons he let the Iroquois alone—*Hervey Allen*> Consequently *expedient* is often opposed to *right*, the former suggesting a choice determined by temporal ends, the latter one determined by ethical principles <too fond of the right to pursue the *expedient*—*Goldsmith*> Something is **politic** which is the judicious course, action, or method from the practical point of view. Though often used interchangeably with *expedient*, *politic* may be applied discriminatively to choices involving tactics or the effective handling of persons, and *expedient* to choices involving strategy, or the gaining of objectives <the move was a *politic* one, for it served to win friends to the cause and to placate its enemies> <community of race . . . is mainly a *politic* fiction, at least in countries of European civilization, in which the races are inextricably mixed up—*Encyc. Brit.*> Like *expedient*, however, *politic* often implies material motives <whether it is not your interest to make them happy . . . Is a *politic* act the worse for being a generous one?—*Burke*> Something is **advisable** which is expedient in the original, underogatory sense of that word. *Advisable* has now nearly lost its original derivative sense and is preferred by writers or speakers who wish to avoid any of the unpleasant implications of *expedient* or of *politic* <I don't think that it's altogether *advisable* to mention Dickens in a sermon . . . Some people might be offended at mentioning a novelist in church—*Mackenzie*> <he was told it was not *advisable* to drive on through the mountains because of the night fogs—*Sylvester*>

experience *vb* Experience, undergo, sustain, suffer are comparable when they mean to pass through the process of actually coming to know or to feel. Experience means little more than this. It implies that something (as a sensation, an emotion, or an occasion) is known not from hearsay but from an actual living through it or going through it (the disgust he had inspired in me before . . . was a weak and transient feeling to what I now experienced—Hudson) (we cannot experience the sweetness of a single molecule of sugar, nor the smell of a single molecule of musk—Jeans) Undergo carries a strong implication of bearing or enduring or of being subjected to that is almost lacking in experience; it frequently takes as an object a distressing experience (as pain, suffering, or hardships) when the subject names a person (undergo great disappointment) (undergo a serious operation) (his fine spirit was broken by the anxieties he had undergone—Martineau) (the search for truth . . . makes men and women content to undergo hardships—Eliot) But when it is used with objects which represent a process which covers years or ages of time, it comes closer to experience in meaning, though it seldom takes an individual as its subject (a man experiences a change of heart, but a race undergoes changes which are not apparent for many generations) Very occasionally, when the idea of submission to or imposition upon is stressed, the subject of undergo in the active voice may be impersonal (the bridge must undergo inspection before it is accepted by the government) Sustain suggests undergoing infliction or imposition without implying as a necessary concomitant courage in resisting or enduring (sustain a great loss through fire) (sustain an injury) (the two dropped supine into chairs at opposite corners of the ring as if they had sustained excessive fatigue—Shaw) (must be prepared to sustain

heavy losses—Bliven b. 1889) Suffer, which is frequently used interchangeably with sustain in this sense, carries a more marked implication of the harm done or injury wrought and is preferable when what is affected is a thing; moreover, suffer may also be used intransitively (all suffered the same fate) (the very language of France has suffered considerable alterations since you were conversant in French books—Burke) (a great author necessarily suffers by translation—Inge) Sometimes suffer loses its distinctive quality and is then nearly equal to experience (Gard suffered an odd impulse to get up and kick his chair over—Mary Austin) (most or all genes suffer mutational changes from time to time—Dobzhansky)

Ana *see, perceive, behold, view, survey

expert *adj* *proficient, adept, skilled, skillful, masterly

Ana practiced, drilled (see PRACTICE *vb*): trained, schooled (see TEACH): *dexterous, deft, adroit

Ant amateurish —**Con** inept, maladroit, *awkward, clumsy

expert *n* Expert, adept, artist, artiste, virtuoso, wizard are comparable when they designate a person who shows mastery in a subject, an art, or a profession or who reveals extraordinary skill in execution, performance, or technique. Expert implies successful experience, broad knowledge of one's subject, and distinguished achievements; it is applied specifically to one who is recognized as an authority in his field (an expert in city planning) (a handwriting expert) (this problem in triangulation was extremely difficult, and an expert in geodesy was brought from the United States—Heiser) (in philosophy he naturally looks for guidance to the experts and professionals—James) Adept connotes understanding of the mysteries of some art or craft or penetration into secrets beyond the reach of exact science (thou art an adept in the difficult lore of Greek and Frank philosophy—Shelley) It tends to imply subtlety or ingenuity (he is an adept in intrigue) (he is an adept at evasion) (an adept at understatement—Buchan) Artist stresses creative imagination and extraordinary skill in execution or in giving outward form to what the mind conceives. More than any other word in this group it stresses skill in performance and the factors (as perfection in workmanship, loving attention to detail, and a feeling for material) that are pertinent thereto (the good craftsman . . . becomes an artist in so far as he treats his materials also for themselves . . . and is perpetually besieged by dreams of beauty in his work—Alexander) (it came to pass that after a time the artist was forgotten, but the work lived—Schreiner) Artiste applies especially to public performers (as actors, singers, and dancers) but may occasionally be applied to workers in crafts where adeptness and taste are indispensable to distinguished achievement (that milliner is an artiste) (groups of artistes rehearsing every kind of act—Bambrick) Virtuoso, though often close to artist in meaning, stresses the outward display of great technical skill or brilliance in execution rather than the inner passion for perfection or beauty. It is applied chiefly to performers on musical instruments and especially to pianists, violinists, and cellists (the compositions of Liszt are the delight of virtuosos) (this precise evocation of forms and colors by the great virtuosos of description—Babbitt) Wizard implies such skill and knowledge or such excellence in performance as seems to border on the magical (a wizard with a billiard cue) (that Sauerbruch, as thoracic surgeon, was a genius and something of a wizard seems to have been generally accepted—Brit. Book News)

Ant amateur —**Con** tyro, dabbler, dilettante (see AMATEUR): *novice, apprentice, probationer

expiate *vb* Expiate, atone mean to make amends or give satisfaction for an offense, a sin, a crime, or a wrong. The same distinctions in implications and connotations are observable in their derivative nouns **expiation** and **atonement**. Expiate and expiation imply an attempt to undo the wrong one has done by suffering a penalty, by doing penance, or by making reparation or redress <let me here, as I deserve, pay on my punishment, and *expiate*, if possible, my crime—*Milton*> <unless that man in there is to be given a chance of *expiation* in another life, then capital punishment is a damnable horror—*Mackenzie*> **Atone** and **atonement** have been greatly colored in their meanings by theological controversies. The basic implication of reconciliation became mixed with and sometimes subordinated to other implications (as appeasement, propitiation, or reparation). In general use *atone* (usually with *for*) and *atonement* emphasize a restoration through some compensation of a balance that has been lost. When the reference is to an offense, sin, or crime the words usually imply expiation, but they stress the rendering of satisfaction for the evil that has been done by acts that are good or meritorious; thus, one *expiates* a sin by doing penance for it, but one *atones* for it by leading a good life afterwards <she hated herself for this movement of envy . . . and tried to *atone* for it by a softened manner and a more anxious regard for Charlotte's feelings—*Wharton*> Sometimes a deficiency or a default rather than an offense may be *atoned* for (as by an excess of something else that is equally desirable) <for those who kneel beside us at altars not Thine own, who lack the lights that guide us, Lord, let their faith *atone!*—*Kipling*>
Ana redress, remedy, rectify, *correct, amend: redeem, deliver, save (see RESCUE)

expiation atonement (see under EXPIATE *vb*)
Ana *penitence, repentance, contrition: *trial, tribulation, cross, visitation
expire *pass, pass away, elapse
Ana end, terminate, *close: cease, discontinue (see STOP)
Con *begin, commence, start

explain 1 **Explain, expound, explicate, elucidate, interpret, construe** are comparable when they mean to make oneself or another understand the meaning of something. **Explain**, the most general term, implies a making of something plain or intelligible to someone by whom it was previously not known or clearly understood <*explain* to a boy the mechanism of an engine> <the teacher *explained* the meanings of the new words in the poem> <a poet whose words intimate rather than define, suggest rather than . . . *explain*—*Edman*> **Expound** implies careful, elaborate, often learned setting forth of a subject in order to explain it (as in a lecture, a book, or a treatise) <a clergyman *expounding* a biblical text> <*expound* a point of law> <Sir A. Eddington in two masterly chapters . . . *expounds* the law of gravitation—*Alexander*> <*expound* the duties of the citizen> **Explicate**, a somewhat learned term, adds to *expound* the idea of development or detailed analysis <the mind of a doctor of the Church who could . . . *explicate* the meaning of a dogma—*T. S. Eliot*> **Elucidate** implies a throwing light upon something obscure (as a subject, a work, or a passage) especially by clear or luminous exposition or illustration <*elucidate* an obscure passage in the text> <the simplicity of the case can be added . . . when the object is to addle and not to *elucidate*—*Shaw*> <the author's linguistic erudition has allowed him to consult the original sources and to *elucidate* and interpret them authentically—*Reinhardt*> **Interpret** implies the making clear to oneself or to another the meaning of something (as a poem, a dream, an abstraction, or a work in a foreign language) which presents more than intellectual

difficulties and requires special knowledge, imagination, or sympathy in the person who would understand it or make it understood <I have tried in this all too hasty sketch to *interpret* . . . the indwelling spirit and ideal of the art of the Far East—*Binyon*> <it is a sophistry to *interpret* experience in terms of illusion—*Sullivan*> <an inscription which no one could understand or rightly *interpret*—*Hudson*> **Construe** is preferred to *interpret* when the difficulties are textual either because of the strangeness of the language (as by being foreign, ancient, dialectal, or technical) or because of ambiguities or equivocations in it. It therefore may suggest either translation involving careful analysis of grammatical structure <*construe* ten lines of Vergil> or a highly individual or particular interpretation <the phrase "every common carrier engaged in trade or commerce" may be *construed* to mean "while engaged in trade or commerce" without violence to the habits of English speech—*Justice Holmes*> <had *construed* the ordinarily polite terms of his letter of engagement into a belief that the Directors had chosen him on account of his special and brilliant talents—*Kipling*>

Ana *analyze, resolve, dissect, break down: *discuss, argue, dispute: *exemplify, illustrate

2 **Explain, account, justify, rationalize** are comparable when they mean to give or tell the cause, reason, nature, or significance of something obscure or questionable. One **explains** what is hard to understand because it is mysterious in its origin or nature or lacks an apparent or sufficient cause or is full of inconsistencies <these sciences have not succeeded in *explaining* the phenomena of life—*Inge*> <this . . . study of Napoleon, which, while free from all desire to defend or admire, yet seems to *explain* Napoleon—*Ellis*> *Explain* often implies an attempt to excuse or to set oneself right with others <one can do almost anything . . . if one does not attempt to *explain* it—*Wharton*> One **accounts** for something, rather than *explains* it, when one shows how it fits into a natural order or a logically consistent pattern <we fail, we are told, to *account* for the world. Well, the world is a solid fact, which we have to accept, not to *account* for—*Inge*> <going about her business as if nothing had happened that needed to be *accounted* for—*Wharton*> <her presence could not be *accounted* for by some temporary catastrophe, such as the Mosaic Flood—*S. F. Mason*> One **justifies** himself or another when he explains certain acts or behavior in an attempt to free himself or another from blame. It may or may not imply consciousness of guilt or a definite accusation <Powell . . . began to *justify* himself. "I couldn't stop him," he whispered shakily. "He was too quick for me"—*Conrad*> <so far is he from feeling the pangs of conscience that he constantly *justifies* his act—*Dickinson*> <in her heart she did not at all *justify* or excuse Cyril—*Bennett*> One **rationalizes** something that is or seems to be contrary to reason when he attempts an explanation that is in accord with scientific principles or with reality as known to the senses <*rationalize* the Greek myths> <*rationalize* the Genesis story of creation> *Rationalize* may come close to *justify* without, however, so strong an implication of blame and with the added implication of self-deception and, at times, of hypocrisy <in other countries the plutocracy has often produced men of reflective and analytical habit, eager to *rationalize* its instincts—*Mencken*> <easy for men of principle to *rationalize* lapses from high standards where the cause seems to them good—*Pimlott*>

Ana *excuse, condone: *exculpate, exonerate, acquit, absolve

explicate *vb* *explain, expound, elucidate, interpret,

explicit, **express**, **specific**, **definite**, **categorical** are comparable when applied to statements, utterances, and language and when meaning perfectly clear in significance or reference. Something is **explicit** which is stated so plainly and distinctly that nothing is left to be inferred or to cause difficulty by being vague, equivocal, or ambiguous (*explicit* directions or promises) (to give an *explicit* and determinate account of what is meant—*Bentham*) Something is **express** which is both explicit and is uttered or expressed with directness, pointedness, or force (an *express* prohibition) (*express* testimony) (the defendant should be enjoined from publishing news obtained from the Associated Press for — hours after publication by the plaintiff unless it gives *express* credit to the Associated Press; the number of hours . . . to be settled by the District Court—*Justice Holmes*) (she sent me the now famous drawings, with the *express* injunction that I was to show them to no one—*Pollitzer*) Something is **specific** which is perfectly precise in its reference to a particular thing or in its statement of the details covered or comprehended (he made two *specific* criticisms of the school, one dealing with its lack of a playground, the other with the defective ventilation of certain rooms) (government workers, by *specific* law, must be fired if they resort to the Fifth Amendment—*Time*) Something is **definite** which leaves no doubt as to its reference or to its details or as to what is excluded; *definite*, far more than *specific*, suggests precise and determinate limitations (he was asked to make a *definite* statement concerning the young man's prospects with the company) (it was a simple, clear, *definite* question—*Sinclair Lewis*) In practice *specific* and *definite* are often used interchangeably without loss; but *specific* may be preferred when the intent is to stress particularization of reference or specification of details, and *definite* when it is to emphasize clear limitations; thus, a worker may be given *specific* instructions about the sequence in which his tasks are to be performed but a *definite* order not to smoke on the job. **Categorical** (see also **ULTIMATE 2**) implies explicitness without the least suggestion of a qualification or condition; thus, a *categorical* answer is demanded of a person testifying in court when he is compelled to answer yes or no; a *categorical* denial is a denial that is complete and contains not the slightest reservations (it is perilous to make *categorical* assertions—*Lowe*)

2 **Exposition**, **exposure**, **exposé** are comparable when they mean a setting forth or laying open of a thing or things hitherto not known or fully understood. **Exposition** (see also **EXHIBITION**) often implies a display of something (as wares, manufactures, or a collection of rarities or

antiquities); more often it implies a setting forth of something which is necessary for the elucidation or explanation of something else such as a theory, a dogma, or the law (you know the law, your *exposition* hath been most sound—*Shak.*) or the events or situations preceding a story or play (the first quarter of the first act is devoted to the *exposition*) In a more general sense, especially in academic use, *exposition* applies to the type of writing which has explanation for its end or aim and is thereby distinguished from other types in which the aim is to describe, to narrate, or to prove a contention. **Exposure** is now preferred to *exposition* as a term implying a laying bare or open especially to detrimental or injurious influences or to reprobation, contempt, or severe censure (fabrics faded by *exposure* to the sun) (*exposure* to a contagious disease) (the *exposure* of a candidate's unsavory past) (the *exposure* of a person's motives) *Exposure* is the term for the time during which the sensitive surface of a photographic film is laid open to the influence of light (an *exposure* of two seconds) **Exposé** is often used in place of *exposure* for a revealing and especially a formal or deliberate revealing of something that is discreditable to a person or group (an *exposé* of an allegedly charitable association) (an *exposé* of the judge's graft)

express *vb* **Express**, **vent**, **utter**, **voice**, **broach**, **air**, **ventilate** are comparable when they mean to let out what one feels or thinks. **Express**, the most comprehensive of these words, implies an impulse to reveal not only thoughts or feelings but also experiences, imaginative conceptions, and personality; it implies revelation not only in words but also in gestures, in action, in dress, or in what one makes or produces, especially as works of art (once again I have to *express* surprise and satisfaction—*Lucas*) (in speaking or writing we have an obligation to put ourselves into the hearer's or reader's place . . . To *express* ourselves is a very small part of the business—*Quiller-Couch*) (there were so many different moods and impressions that he wished to *express* in verse—*Joyce*)

Vent stresses such an inner compulsion to expression as a pent-up emotion that seeks an outlet or a powerful passion that cannot be controlled (he *vented* his spleen in libelous caricatures) (his heart's his mouth: what his breast forges, that his tongue must *vent*—*Shak.*) (by means of ferocious jokes . . . he could *vent* his hatred of pioneer life and all its conditions—*Brooks*) **Utter** stresses the use of voice; it does not, however, always imply speech (utter a yell) (utter one's relief by sobbing) When speech is implied, it is typically both short and significant (utter a command) (his tongue and pen *uttered* heavenly mysteries—*Walton*) and the context may suggest a reason for secrecy as well as for revelation (he was caught up into paradise, and heard unspeakable words, which it is not lawful for a man to *utter*—*2 Cor 12:4*) (begin by encouraging him to *utter*

freely even his most shocking thoughts—*Russell*) **Voice** does not necessarily imply vocal utterance, but it invariably suggests expression in words (I revelled in being able to *voice* my opinions without being regarded as a dangerous lunatic—*Mackenzie*) Very often *voice* suggests that the writer or speaker serves as a spokesman expressing a shared view (the editorial *voices* the universal longing for peace) (one, bolder than the rest, *voiced* their disapproval of the proposal) (Webster contributed a pamphlet . . . which effectively *voiced* the Federalist opposition—*Cole*) **Broach** stresses mention for the first time, especially of something long thought over and awaiting an opportune moment for disclosure (the mayor did not *broach* the project until he felt that public opinion was in its favor) (the idea of religious radio broadcasts was first *broached* in 1923—*Current Biog.*) **Air** implies exposure, often in the desire to parade one's views, sometimes in the hope of attracting attention or sympathy (air one's opinions of the government) (air a grievance) (he did not *air* his politics in the pulpit—*Murdock*) **Ventilate** implies exposure also but usually suggests a desire to get at the truth by discovering the real issues or by weighing the evidence pro and con; it often means to investigate freely, openly, and thoroughly (the question [the future of literature] has thus been *ventilated* from every point of view—*Times Lit. Sup.*)

Ana *speak, talk; pronounce, *articulate, enunciate: *reveal, disclose, divulge, tell: *declare, proclaim, announce
Ant imply —**Con** hint, intimate, *suggest, insinuate

expression *phrase, locution, idiom

expressive, eloquent, significant, meaningful, pregnant, sententious mean clearly conveying or manifesting a thought, idea, or feeling or a combination of these. Something is **expressive** which vividly or strikingly represents the thoughts, feelings, or ideas which it intends to convey or which inform or animate it; the term is applicable not only to language but to works of art, to performances (as of music or drama), and to looks, features, or inarticulate sounds (a forcible and *expressive* word) (an *expressive* face) (he laid great stress on the painting of the eyes, as the most *expressive* and dominating feature—*Binyon*) (a growing emphasis on the element [in beauty] that is described by such epithets as vital, characteristic, picturesque, individual—in short, on the element that may be summed up by the epithet *expressive*—*Babbitt*) Something is **eloquent** (see also VOCAL 2) which reveals with great or impressive force one's thoughts, ideas, or feelings (there was a burst of applause, and a deep silence which was even more *eloquent* than the applause—*Hardy*) (I could scarcely remove my eyes from her *eloquent* countenance: I seemed to read in it relief and gladness mingled with surprise and something like vexation—*Hudson*) or which gives a definite and clear suggestion of a condition, situation, or character (a tremulous little man, in greenish-black broadcloth, *eloquent* of continued depression in some village retail trade—*Quiller-Couch*) (a sidewalk *eloquent* of official neglect—*Brownell*) **Eloquent** is also applicable to words, style, and speech when a power to arouse deep feeling or to evoke images or ideas charged with emotion is implied (words *eloquent* of feeling) (a simple but deeply *eloquent* style) Something is **significant** which is not empty of ideas, thoughts, or purpose but conveys a meaning to the auditor, observer, or reader. The term sometimes is applied to words that express a clearly ascertainable idea as distinguished from those words (as prepositions and conjunctions) that merely express a relation or a connection (his honored client had a meaning and so deep it was, so subtle, that no wonder he experienced a difficulty in giving it fitly *significant* words—

Meredith) (those who lay down that every sentence must end on a *significant* word, never on a preposition—*Ellis*) or to works of art or literature that similarly express a clearly ascertainable idea (as a moral, a lesson, or a thesis) as distinguished from works that exist purely for their beauty or perfection of form and have no obvious purpose or import (art-for-art's-sake men deny that any work of art is necessarily *significant*) More often, *significant* applies to something (as a look, gesture, or act) that suggests a covert or hidden meaning or intention (by many *significant* looks and silent entreaties, did she endeavor to prevent such a proof of complaisance—*Austen*) (she could not feel that there was anything *significant* in his attentions—*Deland*) Something is **meaningful** which is significant in the sense just defined; the term is often preferred when nothing more than the presence of meaning or intention is implied and any hint of the importance or momentousness sometimes associated with *significant* would be confusing (of two close synonyms one word may be more *meaningful* because of its greater richness in connotations than the other) (it was a . . . *meaningful* smile—*Macdonald*) (I suppose the most *meaningful* thing that can be said of her is that she has restored delight (repeat, delight) to poetry—*Charles Jackson*) Something is **pregnant** which conveys its meaning with richness or with weightiness and often with extreme conciseness or power (it is pretty and graceful, but how different from the grave and *pregnant* strokes of Maurice's pencil—*Arnold*) (the *pregnant* maxim of Bacon that the right question is the half of knowledge—*Ellis*) (he had no talent for revealing a character or resuming the significance of an episode in a single *pregnant* phrase—*Maugham*) Something is **sententious** which is full of significance; when applied, as is usual, to expressions, the word basically connotes the force and the pithiness of an aphorism (sententious and oracular brevity—*Gibbon*) (sententious maxims) But even as an aphorism may become hackneyed, so has *sententious* come to often connote platitude, triteness or triteness ("Contentment breeds happiness" . . . a proposition . . . *sententious*, sedate, obviously true—*Quiller-Couch*)

extemporaneous, extempore, extemporary, improvised, impromptu, offhand, unpremeditated mean composed, concocted, devised, or done at the moment rather than beforehand. **Extemporaneous, extempore,** and **extemporary** in their more general applications stress something made necessary by the occasion or situation and may suggest sketchiness or crudity in the thing modified (extemporaneous cover during the snowstorm) (the old woman had erected a clothesline as a sort of *extempore* tent—*Powys*)

⟨there was enthusiasm over the *extemporary* throwing together and dispatching of the United Nations Emergency Force—*Panter-Downes*⟩ The terms may retain this value when applied to modes of expression or to persons as sources of expression ⟨a detective who has had to resort to *extemporaneous* prevarications on numerous occasions to crash police lines—*Gardner*⟩ ⟨the aesthetic horror of *extempore* prayer—*Laski*⟩ but more usually, and in technical context routinely, they imply a well thought-out plan or outline that is given spontaneity in presentation by fresh, unstudied choice of words ⟨*extempore* speaking is a form of prepared speaking on a selected topic in which everything is ready for delivery except the exact words to be used . . . *Extempore* speaking is neither impromptu speech, manuscript reading, nor memorized speech—it is different from all other types and in many ways superior to them—*Holley*⟩ ⟨guided by notes rather than by a regular script, her own comment is largely *extemporaneous* in style—*Current Biog.*⟩ **Improvised** stresses the absence of foreknowledge of what is to be accomplished and therefore the composing, concocting, devising, or constructing of something without advance thought or preparation and often without the necessary tools, instruments, or other equipment ⟨an *improvised* musical accompaniment⟩ ⟨an *improvised* pantomime⟩ ⟨an *improvised* bed for the night in the open⟩ ⟨when an emergency came an army had to be *improvised*—*Buchan*⟩ **Impromptu** stresses the immediate response to a need or suggestion and the spontaneous character of what is composed or concocted on the spur of the moment; thus, an *impromptu* speech is one prepared at a moment's notice and delivered without notes or a preconceived plan; an *impromptu* meal is one prepared from what is available usually at an unusual time or for an unexpected number of people ⟨postponements or changes of plan were always *impromptu*—*Davenport*⟩ **Offhand**, both as adjective and adverb, carries so much stronger an implication of casualness, carelessness, or indifference than any of the preceding terms that at times it loses its suggestion of an impromptu character and means little more than *curt* or *brusque* ⟨an *offhand* comment⟩ ⟨an *offhand* salute⟩ ⟨a father can't make *offhand* remarks to a 4-year-old and have them gently slip into oblivion—*McNulty*⟩ ⟨an *offhand* manner of dealing with strangers⟩ **Unpremeditated** emphasizes less strongly than *extemporaneous* and *impromptu* the immediate stimulus of an occasion, but it usually suggests some strong, often suddenly provoked emotion which drives one to action ⟨[skylark] that from heaven, or near it, pourest thy full heart in profuse strains of *unpremeditated* art—*Shelley*⟩ ⟨*unpremeditated* murder⟩

extend, lengthen, elongate, prolong, protract all mean to draw out or add to so as to increase in length. Both **extend** and **lengthen** (opposed to *shorten*) connote an increase of length either in space or in time, but *extend* is also used to connote increase in range (as of kinds, of influence, or of applicability); thus, a road may be *extended* or *lengthened*; one may *extend* or *lengthen* his stay; the power of a monarch, however, may be *extended* but not *lengthened* ⟨words with *extended* meanings⟩ ⟨delays *lengthened* their trip⟩ **Elongate** (usually opposed to *abbreviate*) denotes to increase in spatial length and has

wider technical than general use ⟨fibers *elongated* by stretching⟩ **Prolong** (opposed to *cut short, arrest*) means to extend in duration beyond usual or normal limits ⟨*prolong* one's childhood⟩ ⟨*prolong* the process of digestion⟩ ⟨exercise *prolongs* life⟩ **Protract** (opposed to *curtail*) adds to the denotation of *prolong* the connotations of indefiniteness, needlessness, or boredom ⟨*protracted* debate⟩ ⟨an unduly *protracted* visit⟩

exterminate, extirpate, eradicate, uproot, deracinate, wipe

are comparable when they mean to effect the destruction or abolition of something. **Exterminate** implies utter extinction; it therefore usually implies a killing off ⟨efforts to *exterminate* such pests as mosquitoes, rats, and ragweed have been only partly successful⟩ ⟨the tribe had been *exterminated*, not here in their stronghold, but in their summer camp . . . across the river—*Cather*⟩ **Extirpate** implies extinction of a group, kind, or growth, but it may carry less an implication of killing off, as *exterminate* carries, than one of the destruction or removal of the things essential to survival and reproduction; thus, wolves might be *exterminated* by hunting in a particular area, but large carnivores in general are *extirpated* by changed conditions in thickly settled regions; a heresy is often *extirpated*, rather than *exterminated*, by the removal of the leaders from a position of influence; a vice cannot easily be *extirpated* so long as the conditions which promote it remain in existence ⟨the ancient Athenians had been *extirpated* by repeated wars and massacres—*Graves*⟩ **Eradicate** stresses the driving out or elimination of something that has taken root or has established itself ⟨diphtheria has been nearly *eradicated* from the United States⟩ ⟨it is difficult to *eradicate* popular superstitions⟩ ⟨he must gradually *eradicate* his settled conviction that the Italians and the French are wrong—*Grandgent*⟩ **Uproot** differs from *eradicate* chiefly in being more definitely figurative and in suggesting forcible and violent methods similar to those of a tempest that tears trees out by their roots ⟨hands . . . red with guiltless blood . . . *uprooting* every germ of truth—*Shelley*⟩ ⟨end forthwith the ruin of a life *uprooted* thus—*Browning*⟩ ⟨refugees from the peoples *uprooted* by war⟩ **Deracinate** basically is very close to *uproot* ⟨disemboweling mountains and *deracinating* pines—*Stevenson*⟩ ⟨he fascinated the young Anderson's intellect and *deracinated* certain convictions—*Benét*⟩ but in much recent use it denotes specifically to separate (as oneself or one's work) from a natural or traditional racial, social, or intellectual group ⟨although the author is himself a Negro, his book is . . . *deracinated*, without any of the lively qualities of the imagination peculiar to his people—*Commentary*⟩ **Wipe** (in this sense used with *out*)

often implies extermination (the entire battery was *wiped* out by shellfire) but it equally often suggests a canceling or obliterating (as by payment, retaliation, or exhaustion of supply) (wipe out a debt) (wipe out an old score) (wipe out a disgrace) (the fall in share prices *wiped* out his margin)

extreme *n* **Extreme**, **extremity** are comparable when they mean the utmost limit or degree of something. **Extreme** usually applies to either of two limits which are diametrically opposed or are as far removed from each other as possible (a climate where *extremes* of heat and cold are unknown) (twist two *extremes* of passion, joy and grief —*Shak.*) (my tendency is to unite *extremes* rather than to go between them—*Ellis*) (he aroused *extremes* of admiration and hostility—*Robert Lawrence*) The term may, however, when used with a verb of motion or one suggesting movement, imply a definite direction and therefore denote the utmost limit or degree in that direction (he is always dressed in the *extreme* of fashion) (carried their enthusiasm to *extremes*) **Extremity**, on the other hand, usually implies the utmost removal from what is reasonable, sane, safe, tolerable, or endurable (the *extremity* of their opinions) (an *extremity* of caution—*H. G. Wells*) (an *extremity* of suffering) Often the term applies concretely to the state or condition of one in extreme pain, grief, anxiety, suffering, or poverty (the queen's in labor, they say, in great *extremity*—*Shak.*) (those . . . who succor heroic minds in their worst *extremities*—*L. P. Smith*) *Ana* antithesis, antipode, contrary (see under OPPOSITE *adj*)

extremity *extreme

Ana *limit, bound, end, confine, term

extricate *vb* **Extricate**, **disentangle**, **untangle**, **disencumber**, **disembarrass** are comparable when meaning to free or release from what binds or holds back. **Extricate**, the most widely useful of these words, implies a situation in which someone or something is so entangled (as in difficulties or perplexities) or so restrained (as from freedom of action or movement) that great force or ingenuity is required to bring about a release (the fly was not able to *extricate* itself from the spider's web) (*extricate* himself from financial difficulties) (*extricate* his car from the mud into which its wheels had sunk) (my success in having *extricated* myself from an awkward predicament—*Heiser*) **Disentangle** adheres far more closely than *extricate* to its basic sense of to free from what entangles; also, it is used typically of things rather than of persons and therefore seldom involves the ideas of difficulty or perplexity except for the person who seeks to free the thing entangled or to unravel what is intricately complicated (*disentangle* a strand from a twisted skein) ([*Seneca* is a dramatist . . . whom the whole of Europe in the Renaissance delighted to honor. It is obviously a task of some difficulty to *disentangle* him from his reputation—*T. S. Eliot*) (I could not then so far analyze all that is roughly lumped together as "religion" as to *disentangle* the essential from the accidental—*Ellis*) **Untangle** is sometimes used in place of *disentangle* with much the same implications (leaned down to *untangle* his foot from a vine in which it was caught) (drank, set down his glass, and *untangled* his legs—*Basso*) **Disencumber** implies a freeing from what weighs down, clogs, or imposes a very heavy burden (he can call a spade a spade, and knows how to *disencumber* ideas of their wordy frippery—*George Eliot*) (the trees, laden heavily with their new and humid leaves, were now suffering more damage than during the highest winds of winter, when the boughs are specially *disencumbered* to do battle with the storm—*Hardy*) **Disembarrass** implies a release from what embarrasses by or as if by impeding, hampering, or hindering (*disembarrass* himself of his companion—*Scott*) (*disembarrass* ourselves of the curse of ignorance and learn to work together—*Alvin Johnson*) (Chamberlain, at several critical junctures, preferred to *disembarrass* himself of trained, expert advisers—*Na-*

extrinsic, extraneous, foreign, alien are comparable when they mean external to something or someone or to the true nature or original character of such thing or person. **Extrinsic** applies to something which is distinctly outside the thing in question or is derived from something apart from it; thus, a ring may have *extrinsic* value because of sentimental or historical associations; such *extrinsic* influences as chance or the assistance of friends may help a man to succeed <[those] who would persuade us . . . that style is something *extrinsic* to the subject, a kind of ornamentation laid on—*Quiller-Couch*> <even life itself might arise from lifeless matter through the influence of favorable *extrinsic* conditions—*Conklin*> **Extraneous**, though often used interchangeably with *extrinsic*, applies more specifically to something which is introduced from outside and may or may not be capable of becoming an integral part of the thing <advance arguments *extraneous* to the real issue> <water is rarely pure and free from *extraneous* matter> <style . . . is not—can never be—*extraneous* ornament—*Quiller-Couch*> <whatever we gain comprehension of, we seize upon and assimilate into our own being . . . ; that which had been *extraneous* is become a part of ourselves—*H. B. Alexander*> **Foreign** applies to

something which is so different from the thing under consideration that it is either inadmissible because repellent or, if admitted, incapable of becoming identified with it, assimilated by it, or related to it <much coal contains *foreign* matter> <inflammation caused by a *foreign* body in the eye> <the mysticism so *foreign* to the French mind and temper—*Brownell*> <look round our world Nothing is *foreign*: parts relate to whole . . . ; all served, all serving: nothing stands alone—*Pope*> **Alien** applies to something which is so foreign that it can never be made an inherent or an integral part of a thing. The word often suggests repugnance or at least incompatibility or irreconcilableness <a voluptuous devotionality . . . totally *alien* to the austerity and penetrating sincerity of the Gospel!—*Inge*> <he would often adopt certain modes of thought that he knew to be really *alien* to his nature—*Wilde*>

face n **Face, countenance, visage, physiognomy, mug, puss** denote the front part of a human or, sometimes, animal head including the mouth, nose, eyes, forehead, and cheeks. **Face** is the simple and direct word <your *face* is dirty> <she struck him in the *face*> <to feel the fog in my throat, the mist in my *face*—*Browning*> <was this the *face* that launched a thousand ships and burnt the topless towers of Ilium?—*Marlowe*> **Countenance** applies especially to the face as it reveals mood, character, or changing emotions <a benign *countenance*> <his face was not the cheerful *countenance* of yesterday—*Cather*> <his *countenance* changed when he heard the news> <something feminine—not effeminate, mind—is discoverable in the *countenances* of all men of genius—*Coleridge*> Especially in the phrases “to keep in *countenance*” (maintain one’s composure) and “to put out of *countenance*” (cause one to lose one’s composure)

the term denotes the normal, composed facial expression of one free from mental distress. Sometimes the word is used in place of *face* when a formal term is desired <that vile representation of the royal *countenance*—*Swift*> Both *face* and *countenance* may be used in personifications when the outward aspect or appearance of anything is denoted <startling transformations in the outward *face* of society are taking place under our very eyes—*Frankfurter*> <beholding the bright *countenance* of truth in the quiet and still air of delightful studies—*Milton*> **Visage** is a more literary term than the preceding words; it often suggests attention to the shape and proportions of the face, but sometimes to the impression it gives or the changes in mood which it reflects <black hair; complexion dark; generally, rather handsome *visage*—*Dickens*> <his *visage* all agrin—*Tennyson*> <the very *visage* of a man in love—*Millay*> **Physiognomy** may be preferred when the reference is to the contours of the face, the shape of the features, and the characteristic expression as indicative of race, character, temperament, or disease <he has the *physiognomy* of an ascetic> <nor is there in the *physiognomy* of the people the slightest indication of the Gaul—*Landor*> The term may be extended to the significant or sharply defined aspect of things <not exactly one of those styles which have a *physiognomy* . . . which stamp an indelible impression of him on the reader’s mind—*Arnold*> <the changing yet abiding *physiognomy* of earth and sky—*Loves*> **Mug**, used in informal context, usually carries a suggestion of an ugly but not necessarily displeasing physiognomy <getting your *mug* in the papers is one of the shameful ways of making a living—*Mailer*> <among all the ugly *mugs* of the world we see now and

then a face made after the divine pattern—*L. P. Smith*) **Puss** sometimes denotes a facial expression (as of anger or pouting) (she put on a very sour *puss* when she saw the priest along with me—*Frank O'Connor*) but it more often denotes the physiognomy (it had the head of a bear, the very head and *puss* of a bear—*Gregory*)

face *vb* 1 *meet, encounter, confront

Ana look, watch (see *SEE*): *gaze, stare, glare: await, look, *expect

2 **Face, brave, challenge, dare, defy, beard** are comparable because all carry the meaning to confront with courage or boldness. **Face** carries no more than this general sense; basically it suggests the confrontation of an enemy or adversary (here we are together *facing* a group of mighty foes—*Sir Winston Churchill*) but in its extended use it implies a recognition of the power of a force, a fact, or a situation which cannot be escaped to harm as well as to help and a willingness to accept the consequences (must *face* the consequences of your own wrongdoing) (strict justice, either on earth or in heaven, was the last thing that society cared to *face*—*Henry Adams*) (like . . . a tailor's bill, something that has to be *faced* as it stands and got rid of—*Montague*) **Brave** may imply a show of courage or bravado in facing or encountering (I must hence to *brave* the Pope, King Louis, and this turbulent priest—*Tennyson*) More often, however, it implies fortitude in facing and in enduring forces which ordinarily would strike the spirit with terror (firemen *braving* danger and death to rescue persons trapped in the blazing hotel) (women . . . for his sake had *braved* all social censure—*Wilde*) (the search for truth . . . makes men and women content to undergo hardships and to *brave* perils—*Eliot*) (if you find yourself in trouble before then, call on your courage and resolution: *brave* out every difficulty—*Kenneth Roberts*) **Challenge** generally implies a confrontation of a person or thing opposed in such a way that one seems an accuser imputing weakness or fault in the one confronted. Often it may lose the feeling of accusation and then may mean no more than to dispute or question (our thoughts and beliefs "pass," so long as nothing *challenges* them—*James*) (that "Testament" the authenticity of which, foolishly *challenged* by Voltaire, is sufficiently established—*Belloc*) or, on the other hand, it may go farther and suggest a bold invitation to a contest (as a duel or other test of rightness or skill) which the one challenged cannot refuse (the degree of courage displayed by Malakai, the best medical practitioner turned out by the School, who once dared to *challenge* the power of the chief of the witch doctors—*Heiser*) or it may suggest bold measures inviting a response or retaliation (challenge criticism) (challenge attention) **Dare** also usually emphasizes boldness rather than fortitude, but it rarely suggests the critical or censorious attitude so frequently evident in *challenge*. Rather, it implies venturesomeness, love of danger, or moral courage and may connote great or especial merit or mere rashness in the action (dare the perils of mountain climbing) (dare to be true: nothing can need a lie—*Herbert*) (and what they *dare* to dream of, *dare* to do—*J. R. Lowell*) (to wrest it from barbarism, to *dare* its solitudes—*Century*) (among the newspapers only the *Irish Times* *dared* to discuss the issue frankly—*Blanshard*) (no American *dared* to be seen reaching for a sandwich by the side of a known Communist—*Sulzberger*) **Defy**, like the others, usually implies a personal agent, but it may be said of things as well. When the idea of challenging is uppermost, the connotation of daring one to test a power which the challenger believes undefeatable or to do what the challenger be-

lieves impossible is usually its accompaniment. In either case there is a stronger implication of certainty in one's belief than there is in *challenge*, and often a clearer suggestion of mockery (from my walls I *defy* the pow'rs of Spain—*Dryden*) (fiend, I *defy* thee! . . . foul tyrant both of gods and humankind, one only being shalt thou not subdue—*Shelley*) (I *defy* the enemies of our constitution to show the contrary—*Burke*) (I *defy* him to find the gate, however well he may think he knows the city—*Kipling*) When the idea of resistance is uppermost, there is a suggestion in *defy* of a power to withstand efforts, opposition, or rules. It is in this sense that a personal agent is most often not implied, for resistance does not always suggest an exercise of will (scenes that *defy* description) (words that *defy* definition) (a wooden seat put together with nails—a flimsy contrivance, which *defies* all rules of gravity and adhesion—*Jefferies*) (the tall erect figure, *defying* age, and the perfectly bald scalp *defying* the weather—*Upton Sinclair*) **Beard**, although it implies defiance, often differs from *defy* in suggesting resolution rather than daring or mockery as its motive; in that way it comes somewhat closer to *face* and to *brave* (what! am I dared and *bearded* to my face?—*Shak.*) (a bold heart yours to *beard* that raging mob!—*Tennyson*) (for years she led the life of a religious tramp, *bearding* bishops and allowing herself many eccentricities—*Coulton*)

failure, neglect, default, miscarriage, dereliction are comparable when they mean an omission on the part of someone or something of what is expected or required of him or of it. **Failure** basically implies a being found wanting; it implies a lack or absence of something that might have been expected to occur or to be accomplished, performed, or effected (there was a general *failure* of crops that year) (a distressing confusion in discussions of the human-interest story has been caused by a common *failure* to define the term—*Mott*) (you will hear a great deal of talk about the *failure* of Christianity; but where in the Holy Gospels . . . do you find any suggestion that Christianity is to be an easy triumph?—*Mackenzie*) **Neglect** (see also NEGLIGENCE) implies carelessness and inattentiveness on the part of a person, so that what is expected or required of him is either left unattended to or is not adequately performed (in wartime a charge of *neglect* of duty is a very serious one) (his *neglect* of his health is a source of much worry to his friends) (the property has become dilapidated through the owner's *neglect*) (we made a nice tidy cleanup . . . If I hadn't done it I ought . . . to have been shot for *neglect*—*H. G. Wells*) **Default** is now chiefly found in legal use, where it implies a failure to perform something required by law (as a failure of a plaintiff or of a defendant to appear at the appointed time to prosecute or defend an action or a proceeding) (in case of *default* on the part of the plaintiff, he may be nonsuited) (in case of *default* on the part of the defendant, he may have a judgment rendered against him, this being called a *judgment by default*) **Default** may also imply a failure to pay one's debts at the appointed time (convicted of *default* in the payment of a fine) or in extended use a failure to perform something required, usually by total omission of pertinent action (betraying by *default* the privileges of citizenship in a democratic society—*Dean*) (lose a tennis match by *default*) **Miscarriage** does not so definitely point the blame for a failure of someone or something to live up to expectations or to accomplish certain ends as do the preceding words; it is often used when there are no definite persons or things to which culpability can be assigned or when for some reason or other there is a desire to avoid casting of blame (there was a serious *miscarriage* of justice in that trial) (the causes of the *miscarriage* of the project were not clear) (we fear . . .

some *miscarriage* in the details of our plan—*Krutch*) (these various *miscarriages* cannot all be ascribed to ill fortune—*Grenfell*) **Dereliction**, of all these terms, carries the strongest implication of a neglect that amounts to an abandonment of, or a departure from, the thing and especially the duty, the principle, or the law that should have been uppermost in a person's mind; ordinarily it implies a morally reprehensible failure rather than one resulting from carelessness and inattention or from mishap (they would be answerable with their lives for any further *dereliction* of duty—*Ainsworth*) (it revealed in him . . . the indisputable signs of a certain *dereliction* from some path of development his nature had commanded him to follow—*Brooks*)

2 **Fair**, just, equitable, impartial, unbiased, dispassionate, uncolored, objective are comparable when they are applied to judgments or to judges or to acts resulting from or involving a judgment and mean free from undue or improper influence. **Fair**, the most general term, implies the disposition or the intention to regard other persons or things without reference to one's own interests, feelings, or prejudices, often even to the point of conceding every reasonable claim of the weaker side or of giving oneself or the stronger side no undue advantage (a *fair* distribution of one's estate) (a *fair* decision by a judge) (a *fair* play) (when we consider how helpless a partridge is . . . it does seem *fairer* that the gunner should have but one chance at the bird—*Jefferies*) (I believe you will find them a *fair* solution of this complicated and difficult problem—*Roosevelt*) **Just** implies no divergence from the standard or measure of what has been determined or is accepted as right, true, or lawful and dealings that are exactly in accordance with those determinations, no matter what one's personal inclinations or interests may be or what considerations in favor of the person or thing judged may be adduced (a *just* judge) (some *juster* prince perhaps had . . . safe restored me to my native land—*Pope*) (how much easier it is to be generous than *just*—*Junius*) (to divert interest from the poet to the poetry . . . would conduce to a *juster* estimation of actual poetry, good and bad—*T. S. Eliot*) **Equitable** implies a freer and less rigid standard than *just*, often the one which guides a court of equity as distinguished from a court of law and which provides relief where rigid adherence to the law would make for unfairness (he has an *equitable* claim to the property) More often the word implies fair and equal treatment of all concerned (a form of society which will provide for an *equitable* distribution of . . . riches—*Krutch*) (it depended wholly on their individual characters whether their terms of office were *equitable* or oppressive—*Buchan*) **Impartial** implies absence of favor for or absence of prejudice against one person, party, or side more than the other (an *impartial* tribunal) (impartial

summing up of evidence) <the law provides for the examination by neutral, *impartial* psychiatric experts of all persons indicted for a capital offense—*Current Biog.*> **Unbiased** expresses even more strongly the absence of all prejudice or prepossession and a disposition to be fair to all <an *unbiased* history> <give an *unbiased* opinion> <presents an able, fair, and singularly *unbiased* picture of the Russian scene—*Marquand*> **Dispassionate** implies freedom from the influence of passion or strong feeling, often also implying great temperateness or even coldness in judgment <a *dispassionate* judgment of the young actor's abilities> <*dispassionate* men, precise in laboratories, with nothing to consider but the facts—*Ciardi*> **Uncolored** (see also **COLORLESS**) implies freedom from influences (as personal feeling or a desire to embellish) that would affect the truth or accuracy of an account, a statement, or a judgment <an *uncolored* story of a battle> <an *uncolored* record of one's experiences> <a statement of facts, *uncolored* by personal prejudice> **Objective** implies a tendency to view events or phenomena as apart from oneself and therefore to be judged on purely factual bases and without reference to one's personal feelings, prejudices, opinions, or interests <nor must we be content with a lazy skepticism, which regards *objective* truth as unattainable—*Russell*> <we shall be like ice when relating passions and adventures . . . we shall be . . . *objective* and impersonal—*Troy*>

faithful *adj* **Faithful**, **loyal**, **true**, **constant**, **staunch**, **steadfast**, **resolute** are comparable when meaning firm in adherence to the person, the country, or the cause to whom or to which one is bound by duty or promise. **Faithful** in its most common sense implies firm and unswerving adherence to a person or thing to whom or to which one is united by some tie (as marriage, friendship, political allegiance, gratitude, or honor) or to the oath, pledge, or promise made when one has accepted a position, an office, or an obligation <a *faithful* husband is *faithful* to his marriage vows> <a *faithful* public servant is *faithful* to his oath of office> <[Cleopatra] was *faithful* to the main policy of her life, the restoration of Egypt to the position which it had held under the first Ptolemies—*Buchan*> The term is also used when only firm adherence to actuality or reality (as in representation or portrayal) is implied; it then comes close to *accurate* or *exact* in meaning <the photograph is a *faithful* likeness> <the *faithful* rendering of the observed facts—*Encounter*> <a *faithful* description

of village life> **Loyal** implies faithfulness to one's pledged word or continued allegiance to the leader, the country, the institution, or the principles to which one feels oneself morally bound; the term suggests not only adherence but resistance to being lured or persuaded away from that adherence <most of the subjects remained *loyal* to their sovereign> <your wife, my lord; your true and *loyal* wife—*Shak.*> <“I've been *loyal* to Arch Gunnard for a long time now,” Lonnie said, “I'd hate to haul off and leave him like that”—*Caldwell*> **True** (see also **REAL**) is somewhat stronger than *loyal* and *faithful* in stressing a personal or emotional quality as well as steadiness in one's allegiance, devotion, or fidelity <a *true* friend> <he is a New England poet, perhaps the New England poet, and reaps all the advantage there is in being *true* to a particular piece of earth—*Mark Van Doren*> **Constant** also stresses firmness or steadiness in attachment, devotion, or allegiance, but it carries a weaker implication of strict adherence to one's vows, pledges, or obligations. Consequently it often implies a state of mind that is the opposite of fickleness rather than a course of action that is the opposite of unfaithfulness and disloyalty <even Rochester, utterly bad and ignoble, was not only a poet and a wit but a loyal husband (*constant* if not *faithful*)—*Replier*> <I never knew a pair of lovers more *constant* than those two—*Millay*> **Staunch** carries far more strongly than *loyal* an implication of one's unwillingness to be turned aside from those to whom one owes allegiance or to whom one has pledged one's troth or from an institution (as a church or political party) to which by conviction one belongs. From its earliest and still current nautical sense of being watertight and sound it retains a suggestion of an inherent imperviousness to all influences that would weaken one's loyalty or steadiness in faith <a *staunch* believer> <a *staunch* Republican> <*staunch* fidelity to law and order—*Montague*> <you, who from a girl have had a strong mind and a *staunch* heart—*Dickens*> **Steadfast** so stresses unwavering or unswerving adherence that the term is applicable not only to persons but to things that maintain a steady course or an unchanging quality or character <which hope we have as an anchor of the soul, both sure and *steadfast*—*Heb* 6:19> <the blue, the *steadfast*, the blazing summer sky—*Woolf*> However its most usual application is to persons or their attachments <therefore, my beloved brethren, be ye *steadfast*, unmoveable—*I Cor* 15:58> <if love . . . survives through all sorrow, and remains *steadfast* with us through all changes—*Thackeray*> <narrow of vision but *steadfast* to principles—*Replier*> **Resolute** implies steadfastness and, often, staunchness, but it throws the emphasis upon a determination which cannot be broken down as a quality of character and may suggest firm adherence to one's own purposes or ends rather than to those of others <not . . . *resolute* and firm, but perverse and obstinate—*Burke*> <she sat there *resolute* and ready for responsibility—*Conrad*> <an earthquake in the midst of the proceedings terrified every prelate but the *resolute* Primate—*J. R. Green*>

Ana devoted, *loving, affectionate: tried, trustworthy, *reliable, dependable

Ant faithless —**Con** disloyal, false, perfidious, traitorous, treacherous (see **FAITHLESS**): fickle, *inconstant, unstable

faithless, **false**, **disloyal**, **traitorous**, **treacherous**, **perfidious** mean untrue to a person, an institution, or a cause that has a right to expect one's fidelity or allegiance. **Faithless** applies to a person, utterance, or act that implies a breach of a vow, a pledge, a sworn obligation, or allegiance. Although often used interchangeably with the

strongest of the terms here discriminated, then implying a betrayal of a person or cause, it is also capable of implying untrustworthiness, unreliability, or loss or neglect of an opportunity to prove one's devotion or faith (<and hopeless, comfortless, I'll mourn a *faithless* woman's broken vow—*Burns*) <the remnant . . . have been abandoned by their *faithless* allies—*Shelley*) <he abandoned one wife and was *faithless* to another—*J. R. Green*) **False** differs from *faithless* in its greater emphasis upon a failure to be true or constant in one's devotion or adherence than upon an actual breach of a vow, pledge, sworn promise, or obligation; however it may, like *faithless*, carry varying connotations with respect to the gravity or heinousness of that failure <betrayed by a *false* friend> <never was Plantagenet *false* of his word—*Marlowe*) <we hope that we can give a reason for the faith that is in us without being *false* to the strictest obligations of intellectual honesty—*Inge*) <the conception of a lordly splendid destiny for the human race, to which we are *false* when we revert to wars and other atavistic follies—*Russell*) **Disloyal** implies lack of faithfulness in thought, in words, or in actions to one (as a friend, superior, sovereign, party, or country) to whom loyalty is owed <a *disloyal* subject> <good party people think such open-mindedness *disloyal*; but in politics there should be no loyalty except to the public good—*Shaw*) <assumed a tone in their correspondence which must have seemed often *disloyal*, and sometimes positively insulting, to the governor—*Motley*) **Traitorous** implies either actual treason or a serious betrayal of trust or confidence <a *traitorous* general> <a *traitorous* act> <*traitorous* breach of confidence> <by the *traitorous* connivance of the Bulgarian King and Government, advance parties of the German Air Force . . . were gradually admitted to Bulgaria—*Sir Winston Churchill*) **Treacherous** is of wider application than *traitorous*; as used of persons it implies readiness, or a disposition, to betray trust or confidence <a *treacherous* ally> and as used of things it suggests aptness to lead on to peril or disaster by false or delusive appearances <*treacherous* sands> <the *treacherous* ocean—*Shelley*) <up steep crags, and over *treacherous* morasses, he moved . . . easily—*Macaulay*) **Perfidious** is a more contemptuous term than *treacherous*; it implies baseness or vileness as well as an incapacity for faithfulness in the person concerned <*perfidious* violation of a treaty> <*perfidious* dealings> <Spain . . . to lavish her resources and her blood in furtherance of the designs of a *perfidious* ally—*Southey*)

fall, drop, sink, slump, subside are comparable when they mean to go or to let go downward freely. They are seldom close synonyms, however, because of various specific and essential implications that tend to separate and distinguish them. **Fall**, which in the relevant sense is intransitive, suggests a descent by the force of gravity

and implies a loss of support opposing gravity; in extended use *fall* may apply to whatever extends downward or gives an effect of going in a downward direction <let a glass *fall* to the ground and shatter> <the supports gone, the structure *fell* in a heap> <the roof had *fallen* in on another speaker—*Cerf*> <hair *falling* over a woman's shoulders> <the birthing *fell* over a 6-month period, then rose> <let *fall* a remark about the weather> **Drop** may suggest a falling drop by drop or bit by bit, but usually it stresses a speed, directness, unexpectedness, or casualness in falling or allowing to fall <*dropped* a coin into a pond> <*dropped* seeds into holes> <*dropping* to the ground at the sound of an air-raid warning> <*dropping* a hint of coming trouble> <income *dropped* during the slow winter season> **Sink** fundamentally implies a gradual descending motion, especially into something, often to the point of total submersion <the ship *sank* gradually into the placid sea> <the float on the fish line *sank* a moment, then bobbed furiously> <the thermometer *sank* to far below zero—*Carruthers*> but in frequent somewhat extended use the stress is so strongly on a slow or gradual falling or descent that the notion of submergence is largely or wholly lost <*sinking* to her knees from exhaustion> <the sun is *sinking* in the west> <his voice *sank* to a whisper> **Slump** usually implies a sudden falling or collapsing (as of someone suddenly powerless or suddenly totally enervated) <*slumping* to the ground unconscious> <*slumped* in his seat> <prices *slumped* badly in the winter> <when a bird falls asleep, it relaxes and *slumps* down until its body rests against the perch—*J. H. Baker*) **Subside** suggests a gradual descent or return to a normal or usual position, action, or condition after an undue rising, expanding, or boiling up; often it can suggest a sinking below a normal or usual level <a wind rising, then *subsiding*> <he lost a quarter of an hour waiting for the flood to *subside*—*Mary Austin*> <the bustle *subsides* and relative calm is resumed—*Amer. Guide Series: N. C.*> <the child's quick temper *subsided* into listlessness—*Replier*> <after the boom prices *subsided* to a level far below normal> <their voices *subsided* to a whisper>

Ana *irrational, unreasonable: *misleading, deceptive, delusive, delusory: equivocal, ambiguous (see OBSCURE)

Ant sound, valid

fallacy, sophism, sophistry, casuistry are comparable when meaning unsound and misleading reasoning or line of argument. The same distinctions in implications and connotations are distinguishable in the corresponding adjectives **fallacious, sophistical, casuistical**. **Fallacy** and **fallacious** in specific logical use imply an error or flaw in reasoning that vitiates an entire argument; thus, a syllogism in which one argues from some accidental character as though it were essential and necessary (as, The food you buy, you eat; you buy raw meat; therefore you eat raw meat) contains a *fallacy* or is *fallacious* <the many *fallacies* that lurk in the generality and equivocal nature of the terms "inadequate representation"—*Burke*> In more general use *fallacy* and *fallacious* apply to a conception, belief, or theory that is erroneous and logically untenable, whether it has been arrived at by reasoning or by conjecture or has been taken over from others <the arguments of the *Federalist* are intended to prove the *fallacy* of these apprehensions—*John Marshall*> <the separatist *fallacy*, the belief that

what may be good for any must be good for all—*Hobson*) <parents . . . console themselves by the American *fallacy* that one can only be young once—*Elizabeth Bowen*) <the contention of some that the debt is not serious because we owe it to ourselves is *fallacious*—*Ogg & Ray*) **Sophism** and **sophistry** and **sophistical** imply, as *fallacy* and *fallacious* do not necessarily imply, either the intent to mislead or deceive by fallacious arguments or indifference to the correctness of one's reasoning provided one's words carry conviction; the terms, therefore, often connote confusingly subtle, equivocal, or specious reasoning. *Sophism*, however, applies usually to a specific argument of this character, *sophistry* often to the type of reasoning employing sophisms <skilled to plead, with a superficial but plausible set of *sophisms*, in favor of . . . contempt of virtue—*Shelley*) <the juggle of *sophistry*—*Coleridge*) <this evil is . . . inexcusable by any *sophistry* that the cleverest landlord can devise—*Shaw*) <Rousseau does not often indulge in such an unblushing *sophism*—*Babbitt*) <the *sophistical* plea that matter is more important than manner—*Montague*) **Casuistry** and **casuistical** imply sophistry only in their extended senses. In their basic senses both have reference to the science that deals with cases of conscience, or the determination of what is right and wrong in particular cases where there is justifiable uncertainty <we now have to lay the foundation of a new *casuistry*, no longer theological and Christian, but naturalistic and scientific—*Ellis*) In their extended use both terms usually imply *sophistical* and often tortuous reasoning in reference to moral, theological, and legal problems <those who hold that a lie is always wrong have to supplement this view by a great deal of *casuistry*—*Russell*) <*casuistical* hairsplitting)

false *adj* 1 **False**, **wrong** mean not in conformity with what is true or right. **False** in all of its senses is colored by its original implication of deceit; the implication of deceiving or of being deceived is strong when the term implies a contrariety between what is said, thought, or concluded and the facts or reality <*false* statements> <thou shalt not bear *false* witness against thy neighbor—*Exod* 20:16> <whether it is a genuine insight into the workings of his own mind or only a *false* explanation of them—*Day Lewis*) <you can take a chessboard as black squares on a white ground, or as white squares on a black ground, and neither conception is a *false* one—*James*) An intent to deceive or a deceptive appearance is implied when the term connotes an opposition to what is real or genuine or authentic <*false* tears> <*false* pearls> <a box with a *false* bottom> <a *false* arch is an architectural member which simulates an arch in appearance but does not have the structure or serve the function of a true arch> The term is applied in vernacular names of plants to a kind related to, resembling, or having properties similar to another kind that commonly bears the unqualified vernacular <the pinkster flower is sometimes called *false* honeysuckle> Even when the word stresses faithlessness (see FAITHLESS) there is usually a hint of a deceptive appearance of faithfulness or loyalty or of self-deception in one's failure to be true <so far as outward appearances went, one could not believe him to be a *false* friend> Only in the sense of incorrect or erroneous <a *false* note> <a *false* policy> is this implication obscured, though there is often a suggestion of being deceived into believing that the thing so described is true or right. **Wrong**, on the other hand, is colored in all of its senses by its original implication of wryness or crookedness; in general it implies a turning from the standard of what is true, right (especially morally right), or correct to its

reverse. In comparison with *false*, *wrong* is simple and forthright in its meaning; thus, a *wrong* conception is one that is the reverse of the truth, but a *false* conception is not only *wrong* but the result of one's being deceived or of one's intent to deceive; a *wrong* answer to a question is merely an erroneous answer, but a *false* answer to a question is one that is both erroneous and lying; *wrong* principles of conduct are the reverse of ethically right principles, but *false* principles of conduct are not only wrong but are bound to lead astray those who accept them <give a person *wrong* advice through bad judgment> <believed that a lie is always *wrong*> <there is something *wrong* about his appearance> <there is something *false* in his courtesy> <he may be *wrong* in his opinions, but he is not *false* to his country in trying to impress them upon others> <the book is a chic little piece . . . often amusing, always arch and clever, and usually *wrong*—*Farrelly*) <the man who, having out of sheer ignorance eaten the *wrong* end of his asparagus, was thenceforth compelled to declare that he preferred that end—*Ellis*)

familiar 1 **Familiar**, intimate, close, confidential, chummy, **thick** are comparable when meaning near to one another because of constant or frequent association, shared interests and activities, or common sympathies, or, when applied to words or acts, indicative of such nearness. **Familiar** suggests relations or manifestations characteristic of or similar to those of a family, where long-continued intercourse makes for freedom, informality, ease of address, and the taking of liberties; consequently *familiar* may apply to the relations, words, and acts of persons actually in such a situation and to the attitude or the style of speaking or writing of persons who assume the freedom and ease of address of those who are <*familiar* essays) <time and intercourse have made us *familiar*—*Johnson*) <a simpler and more *familiar* speech, able to express subtleties or audacities that before seemed inexpressible—*Ellis*) <the *familiar*, if not rude, tone in which people addressed her—*Hawthorne*) <she was a fearless and *familiar* little thing, who asked disconcerting questions—*Wharton*) **Intimate** suggests relations characteristic of those who are in close contact with one another (as through ties of blood, of friendship, or of common interests or aspirations) and who have opened their hearts or their minds to such a degree that they deeply know and understand one another <the *intimate* political relation subsisting between the president of the United States and the heads of departments, necessarily renders any legal investigation of the acts of one of those high officers peculiarly . . . delicate—*John Marshall*) <they establish and maintain . . . more *intimate* and confiding relations with us—*J. R. Lowell*) <though Farfrae must have so far forgiven him as to have no objection to . . . him as a father-in-law, *intimate* they could never be—*Hardy*) **Intimate** may also apply to a connection between a person and a thing, especially something he says, does, wears, or uses; it then implies a very close relation between that thing and his inmost thoughts or feelings or his life in the privacy of his home <official receptions were few, but small, *intimate* teas were frequent in the governor's home) <the indecency of publishing *intimate* letters which were never written to be published—*Ellis*) <her eyes, lively, laughing, *intimate*, nearly always a little mocking—*Cather*) <a shirt-sleeved populace moved . . . with the *intimate* abandon of boarders going down the passage to the bathroom—*Wharton*) As applied directly or indirectly to knowledge, *intimate* differs from *familiar* not only in idiom but also in implying not merely acquaintance but close or deep study <he has an *intimate* knowledge of the situation) <he is *familiar* with the facts pertaining to the situation) <he is *familiar* with the poem in question) <he has gained, through long study, an *intimate* knowledge of the poem) **Close** is often used in place of *intimate* when one wishes to imply an attachment drawing persons together in such a way as to suggest the exclusion of others or a very strong bond of affection between them <*close* friends) <a *close* friendship) <seeing them so tender and so *close*—*Tennyson*) <too *close* to Theodore Roosevelt ever to receive the confidence of Woodrow Wilson—*Paxon*) **Confidential** implies a relationship based upon mutual trust or confidence or upon a willingness to confide intimate matters (as one's hopes, thoughts, or feelings) <the growing harmony and *confidential* friendship which daily manifest themselves between their Majesties—*Chatham*) <he slipped his arm through his father's with a *confidential* pressure—*Wharton*) **Chummy** and **thick** are less formal terms and usually convey some degree of contempt, derision, or envy of a close association. **Chummy** suggests an easy informal inti-

macy (it is an unprecedented thing, I take it, for a captain to be *chummy* with the cook—*London*) **Thick** stresses constant association more than the strength of the attachment (the two former enemies are now as *thick* as thieves) but often it carries a sinister suggestion (a friend of gangsters and rumrunners, very *thick* with people like Jake the Barber—*Bellow*)

famous, **famed**, **renowned**, **celebrated**, **eminent**, **illustrious** are comparable when meaning known far and wide among men. **Famous** and **famed** apply chiefly to men, events, and things that are much talked of or are widely or popularly known throughout a section, a country, a continent, or a cultural tradition; they also imply good repute or a favorable reputation. Normally these terms are applied without qualification only to those persons or things that are still so known or that were so known in the time under consideration (the once *famous* poems of Owen Meredith) (a *famous* American aviator) (some of our most *famous* physicians have had to struggle pitifully against insufficient means until they were forty or fifty—*Shaw*) (time has spiraled them from rebellion to eminence. They are respectably *famous*, and the poet Edith even fashionable—*W. T. Scott*) (a corpulent, jolly fellow, *famed* for humor—*Hawthorne*) **Renowned** implies more glory or honor and more widespread acclamation than either *famous* or *famed*; it is, however, often employed as a stronger or more emphatic term than *famous* with little actual difference in meaning except for a suggestion of greater longevity of fame (royal kings . . . *renowned* for their deeds . . . for Christian service and true chivalry—*Shak.*) (those far-*renowned* brides of ancient song—*Tennyson*) **Celebrated** stresses reception of popular or public notice or attention and frequent mention, especially in print; it may also suggest public admiration or popular honor (the *celebrated* kidnapping of Charley Ross) (the most *celebrated* of the cases pending before the Supreme Court) (Benjamin Franklin's *celebrated* kite) (the greatest, but the least *celebrated*, general in the war) (it is characteristic that in this whole "Notebook" Maugham seldom mentions any of his *celebrated* friends—*Behrman*) **Eminent** implies conspicuousness for outstanding qualities; it is applicable chiefly to persons or things that are recognized as topping others of their kind (the age produced no *eminent* writers) (many *eminent* men of science have been bad mathematicians—*Russell*) (eminent manifestations of this magical power of poetry are very rare and very precious—*Arnold*) **Illustrious** carries a stronger implication of renown than *eminent*; it also imputes to the thing so described a glorioussness or splendor that increases its prestige or influence (illustrious deeds of great heroes) (his right noble mind, illustrious virtue—*Shak.*) (boast the pure blood of an illustrious race—*Pope*)

3 **Fancy**, **fantasy**, **phantasy**, **phantasm**, **vision**, **dream**, **daydream**, **nightmare** are comparable when they denote a vivid idea or image, or a series of such ideas or images, present in the mind but having no concrete or objective reality. **Fancy** (see also IMAGINATION) is applicable to anything which is conceived by the imagination, whether it recombines the elements of reality or is pure invention (surely this great chamber . . . did not exist at all but as a gigantic *fancy* of his own—*Galsworthy*) (the status of archaeological fact and *fancy* in the world today—*W. W. Taylor*)

Fantasy applies to a fancy and especially to an organized series of fancies (as one presented in art) that is the product of an unrestrained imagination freed from the bonds of actuality (Shakespeare's *Midsummer Night's Dream* is a pure *fantasy*) (a thousand *fantasies* begin to throng into my memory, of calling shapes, and beckoning shadows dire, and airy tongues that syllable men's names—*Milton*) **Phantasy**, though sometimes used in place of *fantasy*, both as the power of free inventive imagination and as a product of that power, may apply particularly to the image-making power of the mind, whether the image is the result of sense perception or of the imagination, or to a product of that power and then may be strongly antonymous to *truth* and *reality* (probably in his life, certainly in his poetry, there is no sharp boundary between *phantasy* and *reality*—*Canby*) (phantasies created by the reading of *Kubla Khan*) **Phantasm** may be applied either to a phantasy, the mental image (figures . . . of which the description had produced in you no *phantasm*—*Taylor*) or to a fantasy, especially to one that is hallucinatory (the *phantasms* of a disordered mind) **Vision** often implies an imagining, but it as frequently implies a seeing or a revelation. Specifically, however, the term is applied to something which the mind perceives as clearly or concretely as if revealed to it by a supernatural or mysterious power (see REVELATION), or as if viewed by a kind of spiritual sight or intuition, or as if seen in a dream; *vision* therefore often suggests a sight of something that is actually spiritual in essence or is beyond the range or power of the eyes or mind to grasp as a whole (a whole life . . . devoted to the patient pursuit of a single *vision* seen in youth—*Eliot*) (each word's . . . power of touching springs in the mind and of initiating *visions*—*Montague*) (our *vision* of world law and some sort of worldwide law-enforcement agency—*Sat. Review*)

Dream is the general term for the ideas or images present to the mind in sleep (thus have I had thee, as a *dream* doth flatter, in sleep a king, but waking no such matter—*Shak.*) (your old men shall dream *dreams*, your young men shall see visions—*Joel* 2:28) In extended use *dream*, like *daydream*, suggests vague or idle, commonly happy, imaginings of future events or of nonexistent things (childhood's sunny *dream*—*Shelley*) (a busy person has no time for *daydreams*) **Nightmare** applies to a frightful and oppressive dream which occurs in sleep or, by extension, to a vision or, sometimes, an actual experience which inspires terror or which cannot easily be shaken off (how many of our daydreams would darken into *nightmares*, were there a danger of their coming true!—*L. P. Smith*)

2 **Fantastic, bizarre, grotesque, antic** are comparable when they describe works of art, effects produced by nature or art, ideas, or behavior and mean conceived or made, or seemingly conceived or made, without reference to reality, truth, or common sense. **Fantastic** stresses the exercise of unrestrained imagination or unlicensed fancy. It therefore variously connotes absurd extravagance in conception, remoteness from reality, or merely ingenuity in devising <*fantastic* figures, with bulbous heads, the circumference of a bushel, grinned enormously in his face—*Hawthorne*> <one need not have a very *fantastic* imagination to see spirits there—*Gray*> <he wove *fantastic* stories of the hunting bridle—*Kipling*> **Bizarre** is applied to what is unduly, often sensationally, strange or queer; it suggests the use of violent contrasts (as in color, in sound, or in emotional effects) or of strikingly incongruous combinations (as of the tragic and the comic or of the horrible and the tender) <it was *bizarre* in the extreme. It was as if a judge, wearing the black cap, had suddenly put out his tongue at the condemned—*Powys*> <temple sculpture became *bizarre*—rearing monsters, fiery horses, great pillared halls teeming with sculptures—*Atlantic*> **Grotesque** emphasizes distortion of the natural to the point either of comic absurdity or of aesthetically effective ugliness. Technically the word is applied to a type of painting or sculpture of ancient Roman origin which serves a decorative rather than a pictorial purpose and which employs natural details (as animals, men, flowers, and foliage) and conventional designs and figures (as scrolls, garlands, and satyrs) in unnatural combinations or to the comic exaggerations or distortions of human and animal figures in the sculptured decorations and especially the gargoyles of Gothic architecture. It is from the latter association that the adjective in general use derives its leading implications of ridiculous ugliness or ludicrous caricature <the camel was crouching . . . with his *grotesque* head waving about in dumb protest to the blows—*Hoffman*> <she differed from other comedians. There was nothing about her of the *grotesque*; none of her comic appeal was due to exaggeration—*T. S. Eliot*> Sometimes the word suggests an absurdly irrational combination of incompatibles <the attempts . . . to dress up the Labour movement as a return to the Palestinian Gospel, are little short of *grotesque*—*Inge*> **Antic**, chiefly in literary use, though once indistinguishable from *grotesque*, has come to stress ludicrousness or buffoonery more than unnaturalness or irrationality <he came running to me . . . making a many *antic* gesture—*Defoe*> <an outrageously funny novel . . . basically the product of an *antic* imagination—*Gibbs*> <irrepressibly *antic* and unabashedly outspoken, he affects a brassy impudence that many of his staid associates appear to find refreshing—*Kahn*>

farther, further are often used without distinction though originally different words, **farther** being the comparative of *far* and **further**, in its adverbial form (as an adjective, it is without a positive), being the comparative of *fore* or *forth*. At any rate *farther* basically implies a greater distance from a given point in space or sometimes in time; *further* implies onwardness or an advance or an addition (as in movement or progression) not only in space but in time, quantity, or degree (the *farther* tree is blocking my view) <Germany is *farther* from the United States than England> <move *farther* away from the city> <no *further* steps are necessary> <the incident happened *farther* back than I can remember> <circumstances such as the present . . . render *further* reserve unnecessary—*Shaw*> In spite of this fundamental distinction in meaning, there are many occasions where it is difficult to make a choice, since the ideas of distance from a given point and of advance in movement may both be implied. In such cases either word may be used <to go *further* and fare worse—*Old Proverb*> <my ponies are tired, and I have *further* to go—*Hardy*> <as we climb higher, we can see *further*—*Inge*> <“What! . . . was Pat ever in France?” “Indeed he was,” cries mine host; and Pat adds, “Ay, and *farther*—*Lover*”>

Thus with a kiss I die—*Shak.*> <slow to resolve, but in performance *quick*—*Dryden*> **Speedy**, when applied to persons or their motions or activities, implies extreme quickness and often hurry or haste; when applied to things and their motion or movement, it also often suggests great velocity; in general, it is opposed to *dilatory* <no mode sufficiently *speedy* of obtaining money had ever occurred to me—*De Quincey*> <hope for their *speedy* return> <be *speedy*, darkness—*Keats*> <make *speediest* preparation for the journey!—*Shelley*> **Hasty** suggests hurry or precipitousness rather than speed and often connotes the resulting confusion, disorder, or inattention <gobbled down a *hasty* meal> <we must, this time, have plans ready—instead of waiting to do a *hasty*, inefficient, and ill-considered job at the last moment—*Roosevelt*> **Expeditious** adds to *quick* or *speedy* the implication of efficiency; it therefore implies the absence of waste, bungling, and undue haste <an *expeditious* movement of troops> <there is no *expeditious* road to pack and label men for God, and save them by the barrel load—*Thompson*>

fasten, **fix**, **attach**, **affix** mean to make something stay firmly in place or in an assigned place. All but *fix* (and that sometimes) imply a uniting or joining of one thing to another or of two things together. **Fasten** implies an attempt to keep a thing from moving by uniting it (as by tying, binding, nailing, or cementing) to something else or by restraining it by means of some mechanical device (as a lock, a screw, or a hook and eye) <*fasten* a horse to a post> <*fasten* down the lid of a box> <*fasten* a calendar to a wall> <*fasten* a door> <*fasten* a dress in the back> **Fix** implies an attempt to keep something from falling down or from losing hold; it suggests such operations as driving in or implanting deeply, usually with care and accuracy <*fix* a stake in the ground> <unless their roots are deeply *fixed*, plants will not be strong> It is more common in its extended than in its basic sense, but the implications remain the same <*fix* a face in one’s memory> <*fix* facts in one’s mind> <*fix* a color in a fabric by use of a mordant> In some phrases where *fasten* and *fix* are used interchangeably there may be a distinction in meaning which is subtle but justified; thus, to *fix* one’s affections on someone connotes concentration and fidelity while to *fasten* one’s affections on someone may, and often does, suggest covetousness or an attempt to hold or control; to *fix* the blame upon a person implies solid grounds for the accusation, but to *fasten* the blame upon someone often suggests factitious grounds or selfish motives <his heart is *fixed*, trusting in the Lord—*Ps* 112:7> < society wanted to do what it pleased; all disliked the laws which Church and State were trying to *fasten* on them—*Henry Adams*> **Attach** stresses connection or union in order to keep things together or to prevent their separation; it usually implies a bond, link, or tie <the lid is *attached* to the box by hinges> <*attach* loose sheets by means of a staple> <the collarbone is *attached* to the shoulder blade at one end and to the breastbone at the other> <he *attached* himself to the cause in his youth> <in some countries little odium is *attached* to drunkenness> <*attach* a condition to a promise> <she undertakes to *attach* him to her by strong ties: a child, or marriage—*Parshley*> **Affix** usually implies imposition of one thing upon another; it may convey no further information <*affix* a seal to a document> <Felton *affixed* this bull to the gates of the bishop of London’s palace—*Hallam*> but it more often than not suggests

fate, destiny, lot, portion, doom are comparable when they denote the state, condition, or end which is decreed for one by a higher power. **Fate** presupposes such a determining agent or agency as one of the ancient goddesses called Fates, the Supreme Being, or the law of necessity; the term usually suggests inevitability and, sometimes, immutability <he either fears his *fate* too much, or his deserts are small, that dares not put it to the touch to gain or lose it all—*Montrose*> <let us, then, be up and doing, with a heart for any *fate*—*Longfellow*> <he maintained that the *fate* of the Southern Negro depended on his right to protect himself by voting—*C. There were moments when he wanted to escape from his *destiny*—*Huxley*> **Destiny** may also be applied to whatever one envisions as his end or goal, sometimes retaining a slight implication that it is, or has the inevitability of, the will of God <the intoxication of victory swept Hitler's fears away; they were never voiced again, drowned with cries of defiant belief in his *destiny*—*Times Lit. Sup.*> **Lot** and **portion** carry a strong implication of distribution in the decreeing of one's fate. **Lot** stresses the action of blind chance or as if by determination through the casting of lots, and **portion**, the more or less fair apportioning of good and evil <it was her unhappy *lot* to be made more wretched by the only affection which she could not suspect—*Conrad*> <with whom would she be willing to exchange *lots*?—*Bennett*> <so has my *portion* been meted out to me; and . . . I have . . . been able to comprehend some of the lessons hidden in the heart of pain—*Wilde*> <poverty was his *portion* all his days—*Malone*> **Doom**, more than any of these words, implies a final and usually an unhappy or calamitous award or fate <with the sea approaches lost, her [La Rochelle's] *doom* was certain—*Belloc*> <involution is as much a law of nature as evolution. These differences are seldom apparent, because such measurements are usually taken by similar means, but in extended usage they take on importance and usually determine the specific implications of the words. **Fathom** implies an attempt to get through or beneath the obscuring layers of something mysterious or incomprehensible so as to reveal or comprehend its true nature <the aims of the artist must first be *fathomed*—*Charles Johnson*> <if we can *fathom* the mystery of the structure of the Milky Way, we shall have learned much about the arrangement of the universe—*B. 2 **Fault, failing, frailty, foible, vice** are comparable when they mean an imperfection in character or an ingrained moral weakness. **Fault** implies failure, but not necessarily serious or even culpable failure, to attain a standard of moral perfection in disposition, deed, or habit <have many virtues and few *faults*> <he is all *fault* who hath no *fault* at all—*Tennyson*> <our modern appreciativeness is often only the amiable aspect of a *fault*—an undue tolerance for indeterminate enthusiasms and vapid emotionalism—*Babbitt*> **Failing** is even less censorious than *fault*, for it usually implies a shortcoming, often a

weakness of character for which one is not entirely responsible or of which one may not be aware (pride . . . is a very common *ailing*, I believe—*Austen*) (a knowledge of his family *failings* will help one man in economizing his estate—*Quiller-Couch*) (while in other statesmen these *failings* are usually thought of as sorrowful necessities, in Lloyd George they are commonly held to show his essential nastiness—*Sykes*) **Frailty** often implies a weakness in character which makes one prone to fall when tempted (God knows our *frailty*, pities our weakness—*Locke*) The term therefore often denotes a pardonable or a petty fault (a purely human *frailty*, like a fondness for detective stories—*Lowes*) **Foible** denotes a harmless, sometimes an amiable, sometimes a temperamental, weakness or failing (I can bear very well to hear my *foibles* exposed, though not my *faults*—*Shenstone*) (he had all the *foibles* of the aesthete—*Buchan*) **Vice** (see also OFFENSE 3) is stronger than *law* and *ailing* in its suggestion of violation of the moral law or of giving offense to the moral senses of others, but it does not necessarily imply corruptness or deliberate defiance of the law and may be rather a general term attributable to an imperfection or flaw that impairs the soundness of a character or an ability (knowledge . . . of all the virtues and *vices*, tastes and dislikes of all the people—*Galsworthy*) (she had been proud. She was criminally proud. That was her *vice*—*Bennett*) (as Professor Whitehead has lately said, the intolerant use of abstractions is the major *vice* of the intellect—*Inge*)

Ana token, *pledge, earnest: concession, *allowance: *honor, homage, deference: benefaction, *donation, contribution

favor *vb* 1 **Favor, countenance, encourage** are comparable when they mean to give the support of one's approval to. **Favor** may be used in reference to a well-disposed inclination, an expressed preference, or active support or sometimes to a circumstance or agency conducive to a result (a number of wealthy and influential Newport folk *avored* dramatic performances, although a majority of their fellow citizens continued to condemn them—*Amer. Guide Series: R. I.*) (in general the marshmen *favor* a broad, roomy canoe—*Thesiger*) (we had been *avored* by tail winds and would put down at Idlewild—*Cerf*) (the summer weather at Maudheim *avored* the formation of this type of snow—*Schytt*) **Countenance** may indicate mere toleration; more often it implies a positive favoring (really fail to see why you should *countenance* immorality just to please your father—

Kaye-Smith) (her popularity had been retrieved, grievances against her silenced, her past *countenanced*, and her present irradiated by the family approval—*Wharton*) (several of them appeared at the bar to *countenance* him when he was tried at the Horsham assizes—*Macaulay*) **Encourage** carries the notion of heartening stimulation, inciting or inducing especially by expressions of approval, confidence, liking, or comfort (openly *encouraged* from Germany and Italy, fascist organizations, although from time to time banned, carried on insidious and demoralizing propaganda—*Ogg & Zink*) (encouraged her in her ambition to be an actress—*Current Biog.*)

Ant disapprove —**Con** *decry, depreciate, disparage
2 accommodate, *oblige

Ana *help, aid, assist: *indulge, pamper, humor: *benefit, profit

Con foil, thwart, baffle, circumvent, *frustrate: *inconvenience, incommode, discommode

favorable, benign, auspicious, propitious mean being of good omen or presaging a happy or successful outcome. **Favorable** implies that the persons or circumstances involved tend to assist in attaining one's ends—persons by being kindly disposed or actually helpful and circumstances by being distinctly advantageous or encouraging (lend a *favorable* ear to a request) (it was feared that many of the small countries were *favorable* to the enemy) (a *favorable* breeze) (a hot dry summer, *favorable* to contemplative life out of doors—*Conrad*) (they won't take a chance of battle unless they can feel sure of most *favorable* conditions—*Alexander Forbes*)

Benign (see also KIND) is applicable chiefly to someone or to something that has power to make or mar one's fortunes by his or its aspect and is thought of as looking down with favor on one or of presenting a favorable countenance to one (so shall the World go on, to good malignant, to bad men *benign*—*Milton*) (on whose birth *benign* planets have certainly smiled—*Brontë*) (a *benign* rather than a malevolent phenomenon—*Margaret Halsey*)

Auspicious, like the related *augur* (see under FORETELL), suggests the presence of signs or omens and is applicable to something that is marked by favorable signs or is in itself regarded as a good omen (an *auspicious* beginning of what proved to be a great career) (for sure the milder planets did combine on thy *auspicious* horoscope to shine—*Dryden*) (pay the boy . . . he brought *auspicious* news—*Kipling*)

Propitious suggests an allusion to favoring gods or powers more strongly than *favorable* but not quite so explicitly as *auspicious*; it may therefore be preferred to *favorable* when such a connotation is desired (if the fates are *propitious*, there is no doubt of his success) (they looked upon the present moment as *propitious* for starting their project) (after so *propitious* an opening it seemed that acerbities might be quelled, rivalries mitigated—*S. H. Adams*)

Ana advantageous, *beneficial, profitable: salutary, wholesome, *healthful: benignant, kindly, *kind

Ant unfavorable: antagonistic

favorite *n* sycophant, toady, lickspittle, *parasite, bootlicker, hanger-on, leech, sponge, sponger

fawn *vb* **Fawn, toady, truckle, cringe, cower** are comparable when they mean to act or behave with abjectness in the presence of a superior. **Fawn** implies a courting of favor by such acts of a sycophant as servile flattery and exaggerated deference (they *fawn* on the proud feet that spurn them lying low—*Shelley*) (courtiers who *fawn* on a master while they betray him—*Macaulay*) (they *fawn* and slaver over us—*Jeffers*) (died, still *fawning* like the coward that he had always been—*Pares*) **Toady** carries a strong

implication of a menial as well as of a fawning attitude in an attempt to ingratiate oneself; often also it suggests the close following of a hanger-on or parasite or the vulgarly imitative behavior of a social climber (*toadying* to the rich boys in his school) (her generosity encouraged *toadying* among her neighbors) (he *toadied* and worshipped and worried: he became timid and obsequious, feeling himself to be a flaw, a little scratching cinder among immensities—*Enright*) (in proportion as he submits and *toadies*, he also will dominate and bully—*Mead*) **Truckle** implies subordination of self or submission of one's desires, judgments, or opinions to those of a superior (everybody must defer. A nation must wait upon her decision, a dean and chapter *truckle* to her wishes—*Sackville-West*) (there are people who will always *truckle* to those who have money—*Archibald Marshall*) **Cringe** implies obsequious bowing or crouching as if in awe or fear; it usually connotes abject abasement (we are sneaking and bowing and *cringing* on the one hand, or bullying and scorning on the other—*Thackeray*) (she is very humble and careless of self. "My poor, humble self" . . . is often on her lips; but she never *cringes* or loses dignity—*Symonds*) **Cower** always implies abject fear, often cowardly fear, especially in the presence of those who tyrannize or domineer (the whole family *cowered* under Lady Kew's eyes and nose, and she ruled by force of them—*Thackeray*) (having found . . . every incentive to *cower* and *cringe* and hedge, and no incentive . . . to stand upright as a man—*Brooks*)

Ant perfidy —*Con* perfidiousness, treacherousness or treachery, traitorousness, faithlessness, disloyalty, falseness (see corresponding adjectives at FAITHLESS)

fear *n* 1 **Fear, dread, fright, alarm, dismay, consternation, panic, terror, horror, trepidation** denote the distressing or disordering agitation which overcomes one in the anticipation or in the presence of danger. **Fear** is the most general term; like **dread**, it implies apprehension and anxiety, but it also frequently suggests a loss of courage amounting to cowardice (*fear* came upon me, and trembling—*Job* 4:14) (he had, indeed, an awful *dread* of death, or rather "of something after death"—*Boswell*) (do you know what *fear* is? Not ordinary *fear* of insult, injury or death, but abject, quivering *dread* of something that you cannot see—*Kipling*) (the only thing we have to fear is *fear* itself—*Roosevelt*) **Fright** implies the shock of sudden, startling, and usually short-lived fear; **alarm** suggests the fright which is awakened by sudden awareness of imminent danger (she had taken *fright* at our behavior and turned to the captain pitifully—*Conrad*) (she stared at her husband in *alarm*; her golden-hazel eyes were black with apprehension—*Wylie*) (thou wast born amid the din of arms, and sucked a breast that panted with *alarms*—*Cowper*) **Dismay** implies deprivation of spirit, courage, or initiative, especially by an alarming or disconcerting prospect (the storm prevails, the rampart yields a way, bursts the wild cry of horror and *dismay*!—*Campbell*) **Consternation** heightens the implication of prostration or confusion of the faculties (t'is easy to believe, though not to describe,

the *consternation* they were all in—*Defoe*) **Panic** is overwhelming and unreasoning, often groundless, fear or fright (a blockhead, who was in a perpetual *panic* lest I should expose his ignorance—*De Quincey*) **Terror** suggests the extremity of consternation or dread (the *terror* by night—*Ps* 91:5) (frozen with *terror*—*Beckford*) (soul-chilling *terror*—*Shelley*) **Horror** adds the implication of shuddering abhorrence or aversion, for it usually connotes a sight, activity, or demand rather than a premonition as a cause of fear (the *horror* of supernatural darkness—*Pater*) (shrank from the task with all the *horror* of a well-bred English gentleman—*Woolf*) **Trepidation** adds to *dread* the implication of timidity, especially as manifested by trembling or by marked hesitation (the Stubland aunts were not the ladies to receive a solicitor's letter calmly. They were thrown into a state of extreme *trepidation*—*H. G. Wells*) It is often used for a polite pretense of fear or timidity (I take up with some *trepidation* the subject of program music—*Babbitt*)

Ana *apprehension, foreboding, misgiving, presentiment: anxiety, worry, concern (see CARE)

Ant fearlessness —*Con* boldness, bravery, intrepidity, valiancy (see corresponding adjectives at BRAVE); *courage, mettle, spirit, resolution: *confidence, assurance, aplomb

2 awe, *reverence

Ana veneration, worship, adoration (see under REVERE); admiration, *wonder, amazement: respect, esteem (see REGARD *n*)

Ant contempt

fearful 1 **Fearful, apprehensive, afraid** are comparable when they mean inspired or moved by fear. In such use they are normally followed by *of, that, or lest, afraid* being never and *fearful* and *apprehensive* infrequently used attributively in this sense. **Fearful** carries no suggestion of a formidable cause of fear; it often connotes timorousness, a predisposition to worry, or an active imagination (the child is *fearful* of loud noises) (they were *fearful* that a storm would prevent their excursion) (fearful lest his prize should escape him—*J. R. Green*) **Apprehensive** suggests a state of mind rather than a temperament and grounds for fear that at least seem reasonable. It always implies a presentiment or anticipation of evil or danger (in July 1914 all civilized peoples were *apprehensive* of war) (had driven before them into Italy whole troops of . . . provincials, less *apprehensive* of servitude than of famine—*Gibbon*) **Afraid** may or may not imply sufficient motivation of fears, but it typically connotes weakness or cowardice and regularly implies inhibition of action or utterance (the trained reason is disinterested and fearless. It is not *afraid* of public opinion—*Inge*) (I was too *afraid* of my ears to shudder, too *afraid* of her to put my fingers to my hair—*Conrad*)

Ana *timid, timorous: anxious, worried, concerned (see under CARE *n*); hesitant, reluctant, *disinclined

Ant fearless: intrepid —*Con* bold, audacious, *brave, courageous, dauntless, valiant, unafraid

2 **Fearful, awful, dreadful, frightful, terrible, terrific, horrible, horrific, shocking, appalling** are comparable in that all and especially their adverbs are used informally as intensives meaning little more than *extreme* (or *extremely*), but each term has a definite and distinct value when applied to a thing that stimulates an emotion in which fear or horror is in some degree an element. Something is **fearful** which makes one afraid or alarmed. In literary or formal use the word usually implies a deep and painful emotion and a loss of courage in the face of possible or imminent danger (all torment, trouble, wonder and amazement inhabits here: some heavenly power guide us out of this

fearful country!—*Shak.*) <a sight too *fearful* for the feel of fear—*Keats*) <our *fearful* trip is done, the ship has weathered every rack—*Whitman*) In less formal English *fearful* may not imply apprehension of danger, but it may at least imply that the thing so qualified is a cause of disquiet <the *fearful* tenacity of a memory> <a *fearfully* distressing situation> Something is **awful** which impresses one so profoundly that one acts or feels as if under a spell or in the grip of its influence; the word often implies an emotion such as reverential fear or an overpowering awareness of might, majesty, or sublimity <and wring the *awful* scepter from his fist—*Shak.*) <God of our fathers . . . beneath whose *awful* Hand we hold dominion over palm and pine—*Kipling*) <men living among the glooms and broken lights of the primeval forest, hearing strange noises in the treetops when the thunder crashed, and *awful* voices in the wind—*Buchan*) With somewhat weakened force *awful* may be applied to qualities or conditions which are unduly weighted with significance or which strike one forcibly as far above or beyond the normal <no tribunal can approach such a question without a deep sense . . . of the *awful* responsibility involved in its decision—*John Marshall*) <a moment of *awful* silence before the questions began—*Deland*) <suddenly, with the *awful* clarity and singleness of purpose of the innocent and intelligent, she believed in Captain Remson—*McFee*) Something is **dreadful** from which one shrinks in shuddering fear or in loathing <the *dreadful* prospect of another world war> <cancer is a *dreadful* disease> <she felt her two hands taken, and heard a kind voice. Could it be possible it belonged to the *dreadful* father of her husband?—*Meredith*) <*dreadful* things should not be known to young people until they are old enough to face them with a certain poise—*Russell*) In weakened use *dreadful* is applicable to something from which one shrinks as disagreeable or as unpleasant to contemplate or endure (a *dreadful* necessity) <wouldn't it be *dreadful* to produce that effect on people—*L. P. Smith*) Something is **frightful** which, for the moment at least, paralyzes one with fear or throws one into great alarm or consternation <a *frightful* sound broke the quiet of the night> <a *frightful* tornado> <the Ghost of a Lady . . . a scar on her forehead, and a bloody handkerchief at her breast, *frightful* to behold—*Meredith*) *Frightful* is also often employed without direct implication of fright, but in such use it imputes to the thing so qualified a capacity for startling the observer (as by its enormity, outrageousness, or its shocking quality) <a *frightful* disregard of decency> <a *frightful* scandal> <this *frightful* condition of internal strain and instability—*Shaw*) <the labor of sifting, combining, constructing, expunging, correcting, testing: this *frightful* toil is as much critical as creative—*T. S. Eliot*) Something is **terrible** which causes or is capable of causing extreme and agitating fear or which both induces fright or alarm and prolongs and intensifies it <millions of voices arose. The clamor became *terrible*, and confused the minds of all men—*Anderson*) <one of those *terrible* women produced now and then by the Roman stock, unsexed, implacable, filled with an insane lust of power—*Buchan*) <I have never read a more *terrible* exposure of human weakness—of universal human weakness—than the last great speech of Othello—*T. S. Eliot*) <a human being devoid of hope is the most *terrible* object in the world—*Heiser*) When the word carries no implication of terrifying or of capacity for terrifying, it usually suggests that the thing so described is almost unendurable in its excess (as of force or power) or too painful to be borne without alleviation or mitigation <knowledge . . . is no longer thought to be a secret, precious, rather *terrible* possession—*Benson*) <an evil passion may give great

physical and intellectual powers a *terrible* efficiency—*Eliot*) <Saint-Beuve believed that the truth is always *terrible*—*L. P. Smith*) Something is **terrific** which is fitted or intended to inspire terror (as by its size, appearance, or potency) <eyes and hairy mane *terrific*—*Milton*) <assume a *terrific* expression> <one little tool . . . transforms the spark [of electricity] from a form too brief and bright and *terrific* to be intelligible into one of the most tractable and lucid of the phenomena . . . of Nature—*Darrow*) *Terrific* may be preferred to *terrible* when there is an implication of release of stored-up energy, physical, emotional, or intellectual, and of its stunning effect <a *terrific* explosion> <a *terrific* outburst of rage> <the most admired single phrase that Shakespeare ever wrote—Ripeness is all . . . derives a *terrific* and pure dramatic impact from its context—*Day Lewis*) Something is **horrible** the sight of which induces not only fear or terror but also loathing and aversion; thus, a *fearful* precipice may not be *horrible*; in the practice of the ancient Greek dramatists, murder on the stage was avoided as *horrible* <now that wars are between nations, no longer between governments or armies, they have become far more *horrible*—*Inge*) *Horrible*, like the other words, may be used in a weaker sense; in such cases it seldom suggests horror, but it does suggest hatefulness or hideousness <a *horrible* suspicion arose in his mind> <a *horribly* shrill voice> <a *horrible* taste> *Horrible* emphasizes the effect produced on a person, **horrific** the possession of qualities or properties fitted or intended to produce that effect <that *horrific* yarn [Stevenson's] "The Body-Snatcher"—*Montague*) <his yearning for the *horrific*, the revolting, the transcendent mystery of whatever is not "nice"—*Times Lit. Sup.*) Something is **shocking** which startles or is capable of startling because it is contrary to one's expectations, one's standards of good taste, or one's moral sense <likes to tell *shocking* stories> <find a *shocking* change in a friend's appearance> <the treatment should begin by encouraging him to utter freely even his most *shocking* thoughts—*Russell*) Often in extended use *shocking* does not imply a capacity for startling so much as a blamable or reprehensible character <it is *shocking* of me, but I have to laugh when people are pompous and absurd—*Rose Macaulay*) <a solecism of this kind . . . would have seemed a *shocking* thing to . . . so accurate a scholar—*L. P. Smith*) Something is **appalling** which strikes one with dismay as well as with terror or horror <her overthrow would have been the most *appalling* disaster the Western world had ever known—*Henry Adams*) <the defectives are *appallingly* prolific—*Shaw*) Sometimes *appalling* comes close to *amazing* but then retains the notion of dismaying and carries a stronger suggestion of dumbfounding than of surprising <his *appalling* quickness of mind> <he was squatting in some septic Indian village talking to unwashed old men, and eating the most *appalling* food—*La Farge*)

Ana frightening, terrifying, alarming (see FRIGHTEN); *ghastly, gruesome, grisly, grim, macabre, lurid; *sinister, baleful, malign; sublime (see SPLENDID)

Ana reacting or reaction, behaving or behavior (see corresponding verbs at ACT): responsiveness (see corresponding adjective at TENDER): sensitiveness, susceptibility (see corresponding adjectives at LIABLE)

2 **Feeling, affection, emotion, sentiment, passion.** **Feeling**, the general term, denotes a partly mental and partly physical, but not primarily sensory, reaction or state that is characterized by an emotional response (as pleasure, pain, attraction, or repulsion). Unless it is qualified or a clue is given in the context, *feeling* gives no indication of the nature, the quality, or the intensity of the response (whatever feelings were in Sophia's heart, tenderness was not among them—*Bennett*) (a feeling of sadness and longing—*Longfellow*) Often *feeling* implies a contrast with *judgment* and connotes lack of thought (her humanity was a feeling, not a principle—*Henry Mackenzie*) (she had a feeling that all would be well—*Parker*) **Affection** is applied mainly to such feelings as are also inclinations or likings; the word therefore sometimes suggests desire or striving (the heart . . . we are, by foolish custom . . . impelled to call the seat of the affections—*Rose Macaulay*) (that serene and blessed mood, in which the affections gently lead us on—*Wordsworth*) (music played with affection and understanding—*Kolodin*) **Emotion** usually suggests a condition that involves more of the total mental and physical response than does *feeling* or implies feelings marked by excitement or agitation (eagerness for emotion and adventure—*Sydney Smith*) (means of exciting religious emotion—*Ruskin*) (a sensation of strength, inspired by mighty emotion—*George Eliot*) **Sentiment** connotes a larger intellectual element in the feeling than any of the others; it often is applied specifically to an emotion inspired by an idea (his own anti-slavery sentiments were sincere—*Boatfield*) Commonly the word suggests refined, sometimes romantic, occasionally affected or artificial, feeling (that moral sentiment which exists in every human breast—*Bancroft*) (his opinions are more the result of conviction than of sentiment—*J. R. Lowell*) (Sterne has been called a man overflowing with sentiment on paper but devoid of real feeling)

Passion suggests powerful or controlling emotion; more than *affection*, it implies urgency of desire (as for possession or revenge) (hark! how the sacred calm, that breathes about, bids every fierce tumultuous passion cease—*Gray*) (the ruling passion, be it what it will, the ruling passion conquers reason still—*Pope*) (give me that man that is not passion's slave—*Shak.*)

female *n* **Female, woman, lady** are comparable when meaning a person and especially an adult who belongs to the sex that is the counterpart of the male sex. **Female** (the correlative of *male*) emphasizes the idea of sex; it applies not only to human beings but also to animals and plants. Its ordinary use as a synonym for *woman* was once frequent <three smart-looking *females*—*Austen*> <to please the *females* of our modest age—*Byron*> but this use is now felt as derogatory or contemptuous except in strictly scientific or statistical application, where the term may be employed to designate a person of the female sex whether infant, child, adolescent, or adult <the city's population included 12,115 males and 15,386 *females*> As compared with **woman** (the correlative of *man*), which emphasizes the essential qualities of the adult female, **lady** (the correlative of *gentleman*) connotes basically the added qualities implicit in gentle breeding, gracious nature, and cultivated background. **Woman** is preferred by many whenever the reference is to the person merely as a person <the country expects the help of its *women*> <the following *women* assisted in receiving the guests> <a *woman* of culture> <a *saleswoman*> <working*women*> <society *women*> **Lady**, on the other hand, is preferred when exalted social position or refinement and delicacy

are definitely implied <Alfonso XI at his death left one legitimate son . . . and five bastards by a *lady* of Seville, Doña Leonor de Guzmán—*Altamira y Crevea*> <Miss Nancy . . . had the essential attributes of a *lady*—high veracity, delicate honor in her dealings, deference to others, and refined personal habits—*George Eliot*> but *lady* may also be used informally as a mere courteous synonym for *woman* <please allow these *ladies* to pass> <the *ladies* were the decisive factor in rolling up the Republican landslide—*Priest*> <may I speak to the *lady* of the house?> though its indiscriminate substitution for *woman* (as in wash *lady*, *saleslady*) carries courtesy into travesty <from that hour to this, the *Gazette* has referred to all females as *women* except that police-court characters were always to be designated as *ladies*—*White*>

female *adj* **Female, feminine, womanly, womanlike, womanish, effeminate, ladylike** are comparable when meaning of, characteristic of, or like a female especially of the human species. **Female** (opposed to *male*) applies to animals and plants as well as to human beings and stresses the fact of sex <the *female* bee—*Milton*> <*female* children were excluded from inheritance> **Feminine** (opposed to *masculine*) alone of these words may imply grammatical gender <*feminine* nouns and pronouns> but it characteristically applies to features, attributes, or qualities which belong to women rather than to men; it has practically displaced all except the more strictly physiological senses of *female* <her heavenly form angelic, but more soft and *feminine*—*Milton*> <the domestic virtues, which are especially *feminine*—*Lecky*> <the strangely *feminine* jealousies and religiousness—*Steinbeck*> **Womanly** (often opposed to *girlish* or, from another point of view, to *manly*) is used to qualify whatever evidences the qualities of a fully developed woman <*womanly* virtues> It often specifically suggests qualities (as tenderness, sympathy, moral strength, and fortitude) which especially befit a woman and make her attractive especially in her functions as a wife and mother, or it may merely suggest the absence of such mannish qualities as aggressiveness <'twas just a *womanly* presence, an influence unexpressed—*J. R. Lowell*> <all will spy in thy face a blushing, *womanly*, discovering grace—*Donne*> **Womanlike** (opposed to *manlike*) is more apt to suggest characteristically feminine faults or foibles <*womanlike*, taking revenge too deep for a transient wrong done but in thought to your beauty—*Tennyson*> **Womanish** (compare *mannish, childish*) is a term of contempt, especially when applied to what should be virile or masculine <art thou a man? Thy form cries out thou art; thy tears are *womanish*—*Shak.*> <*womanish* or wailing grief—*Cowper*> **Effeminate** emphasizes the idea of unmanly delicacy, luxuriousness, or enervation <a woman impudent and mannish grown is not more loathed than an *effeminate* man in time of action—*Shak.*> <an *effeminate* and unmanly foppery—*Hurd*> <something feminine—not *effeminate*, mind—is discoverable in the countenances of all men of genius—*Coleridge*> **Ladylike** is sometimes used sarcastically, especially of men, to imply a dainty and finical affectation of the proprieties <fops at all corners, *ladylike* in mien—*Cowper*> <that *ladylike* quality which is the curse of Southern literature—*Leech*> As applied to girls and women or to their conduct, habits, or manners, *ladylike* implies conformity to a standard appropriate to a lady <your daughter may be better paid, better dressed, more gently spoken, more *ladylike* than you were in the old mill—*Shaw*>

fertile, **fecund**, **fruitful**, **prolific** mean having or manifesting the power to produce fruit or offspring. The same distinctions in implications and connotations are observable in their corresponding nouns **fertility**, **fecundity**, **fruitfulness**, **prolificacy**. **Fertile** (opposed to *sterile*, *infertile*) applies particularly to something in which seeds take root and grow or may take root and grow because it contains the elements essential to their life and development <fertile soil> <fertility of alluvial land> <past fields where the wheat was high . . . ; it was a fertile country—S. V. Benét> Consequently the term often applies to something in which ideas take root and thrive <a fertile mind> <in the heath's barrenness to the farmer lay its fertility to the historian—Hardy> <in him were united a most logical head with a most fertile imagination—Boswell> **Fertile** is also applicable to something which has in itself the elements essential to its growth and development <a fertile egg> <fertile seed> <a fertile idea> or to a person or animal or pair that is able to produce normal living young <a fertile husband> <a fertile couple> **Fecund** (opposed to *barren*) applies especially to something which actually yields in abundance or with rapidity fruits, offspring or, by extension, projects, inventions, or works of art; thus, one speaks of the *fecundity* of a mother if one wishes to imply that she has a large family, but of her *fertility* if the intent is to indicate that she is not sterile; so, by extension, a *fecund* rather than a *fertile* inventive genius <a good part of these inventions came to birth—or were further nourished—in the *fecund* mind of Leonardo da Vinci—Mumford> <if you had been born a Dumas—I am speaking of *fecundity* . . . and of nothing else . . . and could rattle off a romance in a fortnight—Quiller-Couch> **Fruitful** may be preferred to *fecund* when the reference is to plants and may replace *fertile* in reference to soil or land, but it is especially applicable to something that promotes fertility or fecundity <a fruitful rain> In its extended sense it is applicable to whatever bears results, especially useful or profitable results <the time has always come, and the season is never unripe, for the announcement of the fruitful idea—John Morley> <the enormously fruitful discovery that pitch of sound depends upon the length of the vibrating chord—Ellis> <Darwinism . . . is a fruitful theory of the means by which nature works—Inge> <the poet . . . is apt to lack the detachment which alone makes fruitful criticism possible—Lowes> **Prolific** is often interchangeable with *fecund*, but it often suggests

even greater rapidity in reproduction and is therefore more frequently used than the latter term in disparagement or derogation especially when applied to types or kinds of things or beings <the starling is so prolific that the flocks become immense—Jefferies> <uncultivated, defective people . . . are appallingly prolific—Shaw> <the flabby pseudoreligions in which the modern world is so prolific—Krutch>

fetish, **talisman**, **charm**, **amulet** are comparable when they designate an object believed to be endowed with the virtue of averting evil or of bringing good fortune. **Fetish** is applied to an object, either natural (as a snake or an animal's tooth or claw) or artificial (as a piece of carved wood or bone), which is held sacred in the belief that a supernatural spirit has entered into it and invested it with the power to bring success, luck, and freedom from evil to its owner or worshiper. In its basic sense the word is always connected with the religion of primitive or barbarous peoples <the Ashanti fertility *fetish*, carried on the backs of pregnant women to help make their children beautiful—Time> In extended use it may be applied to whatever is unreasonably or irrationally regarded as sacred or sacrosanct <make a *fetish* of the Constitution> <the mediocre was repellent to them; cant and sentiment made them sick; they made a *fetish* of hard truth—Rose Macaulay> **Talisman**, unlike *fetish*, presupposes a degree of enlightenment, a knowledge of astrology and other occult sciences, and a belief in magical powers. Primarily it is applied to a cut, incised, or engraved figure or image of a heavenly constellation or planet or to its sign, or to a

gem or a piece of metal so cut, incised, or engraved. By virtue of this representation it is supposed to be endowed with the same occult influence as what it represents <he had stolen from Henry . . . a *talisman*, which rendered its wearer invulnerable—*Stubbs*> In extended use it may be applied to an object felt to exert a magical, extraordinary, and usually happy influence <the little circle of the schoolboy's copper coin . . . had proven a *talisman*, fragrant with good, and deserving to be set in gold and worn next her heart—*Hawthorne*> <the mere touch of a leaf was a *talisman* to bring me under the enchantment—*Jefferies*> <there is no *talisman* in the word *parent* which can generate miracles of affection—*Butler* d. 1902> <if their hearts had been opened, there would have been found, engraved within, the *talisman* Education—*Brooks*> **Charm** basically applies to something believed to work a spell repelling evil spirits or malign influences or attracting favorable ones. It may be used in reference to an incantation, a word, or a form of words as well as to an object; thus, fetishes and talismans were often carried as *charms* <the gallant little Abruzzi cob was decorated with . . . a panoply of *charms* against the evil eye—*Mackenzie*> In its extended application to a quality in persons or in things it connotes a power to attract or allure that is suggestive of spell working <she has great *charm*> <did you feel the *charm* of the painting?> <one of the great *charms* of Lawrence . . . was that he could never be bored—*Huxley*> **Amulet** is usually applied to something worn or carried on the person because of its supposed magical power to preserve one in danger or to protect one from evil and especially from disease <the French traveler Coudreau . . . expressly states that collars made of jaguars' or bush hogs' teeth, worn round the neck by small children, are *amulets* intended to protect them, when they grow bigger, against the attack of ferocious beasts—*Karsten*> In its rare extended use the word still implies protection <righteousness will give you love . . . but it will not give you an invincible *amulet* against misfortune—*Farrar*>

Ant constant, true —**Con** *faithful, loyal, staunch, steadfast

fiction, figment, fabrication, fable are comparable when meaning a story, an account, an explanation, or a conception which is an invention of the human mind. **Fiction** so strongly implies the use of the imagination that it serves as the class name for all prose or poetic writings which deal with imagined characters and situations or with actual characters or situations with less concern for the historicity of the details than for the telling of an interesting, coherent story. In the sense here particularly considered, a *fiction* is something that is made up without reference to and often in defiance of fact or reality or truth, typically for some such reason as to avoid telling an unpleasant or inconvenient truth <Adrian . . . was at a loss what to invent to detain him, beyond the stale *fiction* that his father was

coming tomorrow—*Meredith*> or to describe or explain someone or something about whom or which practically nothing is known <Karl Joël . . . spent fifteen of the best years of his life over the Xenophontic Socrates, to discover that the figure was just as much a *fiction* as the Platonic Socrates—*Ellis*> or to impose upon others an interpretation or an assumption that serves one's own ends or that satisfies the unthinking because of its accord with outward appearances <the notion that a business is clothed with a public interest and has been devoted to the public use is little more than a *fiction* intended to beautify what is disagreeable to the sufferers—*Justice Holmes*> <few of the usual *fictions* on which society rested had ever required such defiance of facts—*Henry Adams*> or, especially in legal or scientific use, to provide a convenient assumption or method whereby one can deal with what is beyond the range of rational or objective proof <the Linnæan and similar classificatory systems are *fictions* . . . having their value simply as pictures, as forms of representation—*Ellis*> **Fiction** may apply to something which appears to be or is believed to be true or which accords with some higher form of truth (as "poetic truth," "philosophical truth," or "spiritual truth") or with the demands of reason when these come into conflict with fact or with the world as apprehended by the senses; *figment* and *fabrication*, on the other hand, carry no implication of justification and typically suggest a defiance of truth of whatever kind or degree. **Figment** usually suggests the operation of fancy or of unlicensed imagination and neglect of fact <the rude, unvarnished gibes with which he demolished every *figment* of defense—*Stevenson*> <a sense of unreality was creeping over him. Surely this great Chamber . . . did not exist at all but as a gigantic fancy of his own! And all these figures were *figments* of his brain!—*Galsworthy*> **Fabrication** applies to something that is made up with artifice and usually with the intent to deceive; consequently it is often used of a fiction that is a deliberate and complete falsehood <the common account of his disappearance is a *fabrication*> <the legend, though some of its details are obviously fictitious, cannot be dismissed as a pure *fabrication*> (it is evidence—fact, not *fabrication*—*Partridge*) <the Government story was not a complete *fabrication* but a careful distortion—*Devlin*> **Fable** (see also ALLEGORY 2) applies to a fictitious narrative that is obviously unconcerned with fact, usually because it deals with events or situations that are marvelous, impossible, preposterous, or incredible <if we may take the story of Job for a history, not a *fable*—*Defoe*> <nothing but whispered suspicions, old wives' tales, *fables* invented by men who had nothing to do but loaf in the drugstore and make up stories—*Anderson*>

Ana narrative, *story, tale, anecdote, yarn

fictitious, fabulous, legendary, mythical, apocryphal mean having the character of something invented or imagined as opposed to something true or genuine. **Fictitious** commonly implies fabrication and, therefore, more often suggests artificiality or contrivance than intent to deceive or deliberate falsification <many authors prefer to assume a *fictitious* name> <he was a novelist: his amours and his characters were *fictitious*—*Gogarty*> In an extended sense *fictitious* definitely connotes falseness when applied to value, worth, or significance and suggests its determination by other than the right standards <the furore created by this incident gives it a *fictitious* importance> <in booms and in panics the market value of a security is often *fictitious*> **Fabulous** stresses the marvelousness or incredibility of what is so described; only at times, however, does the adjective imply a thing's impossibility or nonexistence <the *fabulous* mill which

ground old people young—*Dickens*) <the company paid *fabulous* dividends> <[Lincoln] grows vaguer and more *fabulous* as year follows year—*Mencken*> Often it is little more than a vague intensive <a house with a *fabulous* view of the mountains> <we had a *fabulous* vacation trip> **Legendary** usually suggests popular tradition and popular susceptibility to elaboration of details or distortion of historical facts as the basis for a thing's fictitious or fabulous character <the *legendary* deeds of William Tell> <the Tarquins, *legendary* kings of ancient Rome> <Bradford's *John Henry* . . . took a famous *legendary* Negro for its hero—*Van Doren*> **Mythical**, like *legendary*, usually presupposes the working of the popular imagination, but it distinctively implies a purely fanciful explanation of facts or the creation of purely imaginary beings and events especially in accounting for natural phenomena. Therefore, *mythical* in its wider use is nearly equivalent to *imaginary* and implies nonexistence <the *mythical* beings called nymphs> <these ancestors are not creations of the *mythical* fancy but were once men of flesh and blood—*Frazier*> **Apocryphal** typically attributes dubiety to the source of something (as a story or account) and especially suggests that the source is other than it is believed or claimed to be <this . . . epigram, has a certain fame in its own right. It too has been attributed to Ariosto, though it is evidently *apocryphal*—*Morby*> <the *apocryphal* work attributed to Chaucer in the 16th century—*Philip Williams*> In such use it does not necessarily imply that the matter is in itself untrue, but it stresses the lack of a known responsible source. Sometimes, however, *apocryphal* loses its stress on source and then may imply dubiety or inaccuracy of the thing itself <taking to themselves the upper rooms formerly belonging to the *apocryphal* invisible lodger—*Dickens*> <tales, possibly *apocryphal* and certainly embroidered, of his feats of intelligence work in the eastern Mediterranean—*Firth*> **Ana** invented, created (see INVENT): *imaginary, fanciful, fantastic: fabricated, fashioned (see MAKE)

Ant historical —*Con* *real, true, actual: *authentic, veritable: veracious, truthful, verisimilar (see corresponding nouns at TRUTH)

fidelity, **allegiance**, **fealty**, **loyalty**, **devotion**, **piety** denote faithfulness to something to which one is bound by a pledge or duty. **Fidelity** implies strict adherence to what is a matter of faith or of keeping faith; it presupposes an obligation, sometimes natural, sometimes imposed as a trust, and sometimes voluntarily accepted or chosen <*fidelity* to one's word> <*fidelity* in the performance of one's duties> <*fidelity* to one's friends> Sometimes, even when unqualified, it implies marital faithfulness <with close *fidelity* and love unfeigned to keep the matrimonial bond unstained—*Cowper*> Sometimes it implies faithfulness to the original (as in representation, portrayal, or quotation) <the Russian . . . finds relief to his sensitiveness in letting his perceptions have perfectly free play, and in recording their reports with perfect *fidelity*—*Arnold*> **Allegiance** implies adherence to something objective which one serves or follows as a vassal follows his lord and which demands unswerving fidelity when conflicting obligations dispute its preeminence <secret societies that exact the *allegiance* of every member> <but he [the critic] owes no *allegiance* to anything but to Truth; all other fidelities he must disregard when that is in question—*L. P. Smith*> **Fealty**, like *allegiance*, implies a supreme obligation to be faithful, but unlike the latter it stresses the compelling power of one's sense of duty or of consciousness of one's pledged word <when I do forget the least of these unspeakable deserts, Romans, forget your *fealty* to me—*Shak.*> <the extent to which we are accurate in our thoughts, words,

and deeds is a rough measure of our *fealty* to truth—*Bal-lard*> **Loyalty** may imply more emotion and closer personal attachment than either *fidelity* or *fealty*; it usually connotes steadfastness, sometimes in the face of attempts to alienate one's affections or of a temptation to ignore or renounce one's obligation <I will follow thee, to the last gasp, with truth and *loyalty*—*Shak.*> but in some contexts it may be taken to imply no more than absence of anything treasonable or subversive <there are the *loyalty* programs . . . which undertake to exclude Communists and other disloyal persons from the government payrolls—*Cushman*> Unlike *fidelity*, *loyalty* sometimes suggests a personal and emotional attachment often without rational basis <her chief offering, however, was a blind *loyalty* which stood every test, including the party's purge of her husband—*Time*> <we can draw a portrait of Jesus that does not offend our rationalism, but it is done at the expense of our *loyalty* to the textual authority—*Jung*> <indeed, in public life it is generally considered a kind of treachery to change, because people value what they call *loyalty* above truth—*Benson*> **Devotion** stresses zeal in service often amounting to self-dedication; it usually also implies ardent attachment <he set out to prove the loyalty of his nature by *devotion* to the Queen who had advanced him—*Belloc*> <there is . . . something outside of the artist to which he owes allegiance, a *devotion* to which he must surrender and sacrifice himself—*T. S. Eliot*> **Piety** emphasizes fidelity to obligations regarded as natural or fundamental (as reverence for one's parents, one's race, one's traditions, one's country, or one's God) and observance of all the duties which such fidelity requires <filial *piety* inspires respect for the wishes of parents> <religious *piety* is manifest in faithful and reverent worship> <having matured in the surroundings and under the special conditions of sea life, I have a special *piety* toward that form of my past . . . I have tried with an almost filial regard to render the vibration of life in the great world of waters—*Conrad*>

fidgety restless, restive, uneasy, jumpy, jittery, *impatient, nervous, unquiet

field, **domain**, **province**, **sphere**, **territory**, **bailiwick** are comparable when they denote the limits in which a person, an institution, or a department of knowledge, of art, or of human endeavor appropriately or necessarily confines his or its activity or influence and outside of which by implication he or it may not or should not go. **Field** implies restriction by choice or by necessity, but it seldom suggests permanent limitation <a European war narrows the *field* of commerce for neutral American nations> <he chose the development of industries in the South as his *field* of investigation> <the philosopher and the practical man . . . each is in his own *field*, supreme—*Buckle*> <a writer whose reputation . . . has been pretty much confined to the whodunit *field*—*Kelly*> **Domain** is used chiefly in reference to departments of knowledge, of art, and of human endeavor viewed abstractly; it implies exclusive possession and control of a clearly defined field and a title to regard all outside interference or all intrusion into that field as trespass or invasion <the *domain* of science> <the *domain* of the spiritual> <what is the difference between the legitimate music of verse and the music it attains by trespassing on the *domain* of a sister art?—*Babbitt*> <those who believe in the reality of a world of the spirit—the poet, the artist, the mystic—are at one in believing

that there are other *domains* than that of physics—*Jeans*) **Province** is used in reference not only to the arts and sciences, each of which may be said to have its own domain, but also to a person or institution that because of his or its office, aims, or special character can be said to have jurisdiction, competence, power, or influence within clearly defined limits (it is within the *province* of a parent rather than of a teacher to discipline a pupil for misconduct out of school) (it is often stated that art goes beyond its *province* when it attempts to teach morals) (the almost impertinently realistic explorations into behavior which are the *province* of the psychiatrist—*Sapir*) *Province* is also used in the sense of function (see also FUNCTION *n* 1) and in the sense of a part of a larger domain (I should like the reader to accept engineering as a *province* of physics: so that the feats of the one may serve as credentials for the discoveries of the other—*Darrow*) **Sphere**, even more than *domain*, throws emphasis on clear circumscription of limits; it therefore suggests apartness rather than fundamental differences and carries no hint of danger of trespass or interference (the aesthetic and ethical *spheres* . . . were never sharply distinguished by the Greeks—*Dickinson*) (in the *sphere* of morals we must often be content to wait until our activity is completed to appreciate its beauty or its ugliness—*Ellis*) (in the life of a man whose circumstances and talents are not very exceptional there should be a large *sphere* where what is vaguely termed “herd instinct” dominates, and a small *sphere* into which it does not penetrate—*Russell*) (a long and profound process of social change . . . but this time in the economic *sphere*—*Strachey*) **Territory** comes very close to *domain* in implying a field possessed and controlled and regarded as one’s own; it does not, however, carry the implications so strong in *domain* of rightful ownership, of sovereignty, and of the title to inviolability; it may even suggest that the field has been usurped or taken over by the science, art, or activity in question (prose has preempted a lion’s share of the *territory* once held, either in sovereignty or on equal terms, by poetry—*Lowe*) (if passageways connect the domain of physics with the domains of life or of spirit, physics ought in time to discover these passageways, for they start from her own *territory*—*Jeans*) **Bailiwick**, basically the jurisdiction of a bailiff, is increasingly used in an extended and playful sense in reference to an individual and the special and limited province or domain in which he may or does exercise authority. It often also carries a connotation of petty yet despotic display of power (a politician whose influence does not extend beyond his own *bailiwick*) (he will not get along with others until he learns to keep within his own *bailiwick*) (we may neither be angry nor gay in the presence of the moon, nor may we dare to think in her *bailiwick*—*Stephens*) (the largest problems are in the *bailiwick* of the social scientist—*Street*) *Ana* limits, bounds, confines (see singular nouns at LIMIT): extent, area, *size, magnitude

fiendish, devilish, diabolical, diabolic, demoniac, demonic are comparable when they mean having or manifesting the qualities associated with infernal or hellish beings called devils, demons, and fiends. **Fiendish** usually implies excessive cruelty or malignity (fiendish tortures) (the fiendish joy that illumined his usually stolid countenance sent a sudden disgust and horror through me—*Hudson*) **Devilish** frequently suggests abnormal wickedness (devilish orgies) (devilish treachery) but it often also suggests superhuman or satanic ingenuity or craft or capacity for destruction (showed no compunction in planning devilish engines of military destruction—*Ellis*) The term is often used as an intensive that substitutes for profanity (devilish

good dinner—*Dickens*) **Diabolical** often and *devilish* sometimes connote colder and more calculating malevolence than *fiendish* (diabolical cruelty) (diabolical ingenuity) (a diabolical sneer) (people suffering from the paranoia of persecution often imagine that they are the victims of a diabolical secret society—*Huxley*) **Diabolic** is often used interchangeably with *diabolical*, but the former term may be preferred when the reference is to devils as individuals of a given character or origin rather than to their malign qualities (the difference between the angelic and the diabolic temperament—*Shaw*) ([the heroic age’s] heroes were doughty men to whom diabolic visitors were no more unusual than angelic ones—*Krutch*) **Demoniac** and **demonic** often suggest frenzy or excesses (as of one possessed) (demoniac strength) (demonic laughter) More frequently they suggest the inexplicable or superhuman element in life or, especially, in genius (in the solidest kingdom of routine and the senses, he [Goethe] showed the lurking demonic power—*Emerson*) (the rapt, demonic features of the Magic Muse—*Hewlett*) (he rode swift horses; he fought duels; he had burning love affairs; he traveled with demoniac restlessness throughout Europe—*Hight*)

Ana hellish, *infernal: malign, malefic, maleficent, baleful, *sinister: malignant, malevolent, *malicious

fierce 1 **Fierce, truculent, ferocious, barbarous, savage, inhuman, cruel, fell** are comparable when they mean displaying fury or malignity in looks or in actions. **Fierce** is applied to men or to animals that inspire terror because of their menacing aspect or their unrestrained fury in attack (the other Shape . . . black it stood as night, fierce as ten Furies, terrible as Hell, and shook a dreadful dart—*Milton*) (no bandit fierce, no tyrant mad with pride—*Pope*) **Truculent**, though it implies fierceness, especially of aspect, suggests the intent to inspire terror or to threaten rather than the achievement of that intention. Consequently it often implies a bullying attitude or pose. It is applied chiefly to persons, groups of persons, and nations (a group of truculent schoolboys) (he must . . . worry them toward the fold like a truculent sheep dog—*J. R. Lowell*) (the America that [Theodore] Roosevelt dreamed of was always a sort of swollen Prussia, truculent without and regimented within—*Mencken*) **Ferocious** not only connotes extreme fierceness but it implies actions suggestive of a wild beast on a rampage or in an attack on its prey; it therefore usually implies unrestrained violence, extreme fury, and wanton brutality (a ferocious bayonet charge) (take a ferocious revenge) (a particularly ferocious dog) (two bloodthirsty men, more cruel than the most ferocious brutes—*Frazier*) **Barbarous** (see also BARBARIAN) in its extended sense applies only to civilized persons or their actions; it implies a harshness, a brutality, and, often, a ferocity thought of as unworthy of human beings in an advanced state of culture (the barbarous pleasures of the chase—*John Morley*) (barbarous treatment of prisoners) (barbarous methods of warfare) (you have been wantonly attacked by a ruthless and barbarous aggressor. Your capital has been bombed, your women and children brutally murdered—*Sir Winston Churchill*) **Savage** (see also BARBARIAN) implies an absence of the restraints imposed by civilization or of the inhibitions characteristic of civilized man when dealing with those whom he hates or fears or when filled with rage, lust, or other violent passion (a savage desire for revenge) (savage punishment of a disobedient child) (a savage criticism of a book) (lashed out with all the oratorical fury and savage invective at his command—*Sidney Warren*) (the savage wars of religion

—*Inge*) **Inhuman** is even stronger than *savage*, for it suggests not so much undue violence or lack of restraint as absence of all feeling that normally characterizes a human being: on the one hand it may suggest wanton brutality, or on the other hand it may imply absence of all capacity for love, kindness, or pity (an *inhuman* mother) (thy deed, *inhuman* and unnatural—*Shak.*) **Cruel** implies indifference to the suffering of others and even a positive pleasure in witnessing it or in inflicting it (her mouth *crueler* than a tiger's, colder than a snake's, and beautiful beyond a woman's—*Swinburne*) (as *cruel* as a schoolboy ere he grows to pity—*Tennyson*) **Fell**, which is chiefly rhetorical or poetic, connotes dire or baleful cruelty (unsex me here, and fill me from the crown to the toe topful of direst cruelty! . . . stop up the access and passage to remorse, that no uncompassionate visitings of nature shake my *fell* purpose—*Shak.*) (sinister men with . . . their own *fell* ends—*T. I. Cook*)

Ana *outline, contour, profile, silhouette: *character, symbol, sign, mark

3 **Figure, pattern, design, motif, device** are comparable when they mean a unit in a decorative composition (as in an ornamented textile or fabric) consisting of a representation of a natural, conventionalized, or geometrical shape or a combination of such representations. **Figure** commonly refers to a small, simple unit which is repeated or is one of those repeated over an entire surface. A figure may be one of the outlines associated with geometry (as a triangle, diamond, pentagon, or circle) or such an outline filled in with color, lines, or a representation of another kind; it may, however, be a natural or conventionalized representation of a natural form (as a leaf, flower, or animal) (an Oriental rug with geometrical figures in blue and red) (a silk print with a small figure) (the wallpaper has a well-spaced figure of a spray of rosebuds) (carved with figures strange and sweet, all made out of the carver's brain—*Coleridge*) **Pattern** may be used in place of figure (arranged in a series of simple and pleasing patterns—diamonds, quincunxes, hexagons—*Huxley*) but figure is not interchangeable with the more inclusive senses of pattern. The latter term is applicable not only

to the simplest repeated unit, or figure, or to a larger repeated unit involving several related figures but also to the whole plan of decoration or adornment (the pattern of a lace tablecloth) (the pattern of a rug) Also, pattern may be used of other things than those which are visible, objective works of art and craftsmanship but which nevertheless can be viewed or studied as having diverse parts or elements brought together so as to present an intelligible and distinctive whole (the true pattern of the campaign revealed itself after the first week) (when he said pattern, he did not mean the pattern on a wallpaper; he meant the pattern of life—*Sackville-West*) (as skepticism grows, the pattern of human conduct inevitably changes—*Krutch*) (the nearness of friends in those days, the familiar, unchanging streets, the convivial clubs, the constant companionship helped to knit the strands of life into a close and well-defined pattern—*Replier*) **Design** (see also **PLAN, INTENTION**) emphasizes drawing and arrangement and attention to line and the handling of figures and colors; it often specifically denotes a single unit (figure or pattern) which reveals these qualities (branches and leaves were disposed, not as combinations of color in mass, but as designs in line—*Binyon*) (your golden filaments in fair design across my duller fiber—*Millay*) **Motif** (see also **SUBJECT** 2) is frequently used in the decorative arts for a figure or a design which stands out not necessarily as the only one but as the leading one which gives the distinctive character of the whole (in lace for ecclesiastical use a sheaf of wheat is often the motif of the pattern) **Device** applies usually to a figure that bears no likeness to anything in nature but is the result of imagination or fancy. Unlike the other terms, it does not exclusively apply to a decorative unit, though it occurs frequently in that application (set in the close-grained wood were quaint devices; patterns in ambers, and in the clouded green of jades—*Lowell*)

financial, monetary, pecuniary, fiscal are comparable when meaning of or relating to the possession, the making, the borrowing and lending, or the expenditure of money. **Financial** implies a relation to money matters in general, especially as conducted on a large scale (the financial concerns of the company are attended to by the treasurer) (the financial position of the bank is sound) (the financial interests of the country) (the city is in financial difficulties) **Monetary** implies a much more direct reference to money as such and therefore often connotes the coinage, distribution, and circulation of money (the monetary unit) (the monetary systems of Europe) (the monetary standard) (monetary gifts) **Pecuniary** suggests a reference to the practical uses of money; it is

often employed in preference to *financial* when money matters that are personal or on a small scale are being considered <to ask for *pecuniary* aid> <he is always in *pecuniary* difficulties> <he works only for *pecuniary* motives> **Fiscal** implies reference to the financial affairs of a state, a sovereign, a corporation, or an institution whose concerns with revenue and expenditures are managed by a treasurer or treasury department <the *fiscal* year in the United States ends on June 30> <a *fiscal* officer of the crown>

Ant daunt —**Con** *dismay, appall

3 discharge, *dismiss, cashier, drop, sack, bounce

Ana *eject, oust, expel: *discard

firm *adj* **Firm, hard, solid** are comparable chiefly as meaning having a texture or consistency that markedly resists deformation by external force. **Firm** (opposed to *loose, flabby*) suggests such closeness or compactness of texture or a consistency so heavy or substantial that the substance or material quickly returns to shape or is difficult to pull, distort, cut, or displace <*firm* cloth>

<*firm* flesh> <*firm* jellies> <*firm* ground> **Hard** (opposed to *soft*; see also HARD 2) implies impenetrability or relatively complete resistance to pressure or tension but, unlike *firm*, *hard* rarely implies elasticity (<*hard* as adamant> <*hard* as steel> <diamond is one of the *hardest* substances known>) **Solid** (opposed to *fluid*) implies such density and coherence in the mass as enable a thing to maintain a fixed form in spite of external deforming forces <*solid* mineral matter> As opposed to *flimsy*, the term implies a structure or construction that makes a thing sound, strong, or stable <*solid* furniture> <a *solid* foundation> <the bungalow was a very *solid* one—*Kipling*> As opposed to *hollow*, it implies the absence of empty spaces within the structure or mass and, usually, the same or similar density and hardness of material throughout <a *solid* rubber tire> <a *solid* wall>

In extended use *firm* implies stability, fixedness, or resolution <a *firm* purpose> <a *firm* belief> <guide with a *firm* hand> <a *firm* and even tough diplomacy—*Gaitskell*> **Hard** implies obduracy or lack of feeling <a *hard* master> <she was *firm*, but she was not *hard*—*Archibald Marshall*> <a sort of scoutmaster to a *hard* gang of boys—*Lovett*> **Solid** usually implies substantiality or genuineness <a *solid* meal> <*solid* facts> <*solid* virtues> <*solid* attainments> <money, the great solvent of the *solid* fabric of the old society, the great generator of illusion—*Trilling*> but it may imply absolute reliability or seriousness of purpose <*solid* banks> <a *solid* character> <his scholarship was *solid* and sound—*McGiffert*> or unbroken continuity (as in time, group feeling, or opinion) <put in a *solid* week on a piece of work> <the *solid* vote of the members>

Ana compact, *close, dense, thick: tough, tenacious, *strong: *stiff, rigid, inflexible

Ant loose, flabby —**Con** flaccid, *limp, floppy, flimsy, sleazy

fiscal *financial, monetary, pecuniary

fish *vb* **Fish, angle** mean to attempt to catch fish. **Fish** implies the use of some apparatus and suggests nothing about the reason; **angle**, which is chiefly literary except in the derivative *angler*, implies the use of hook, bait, line, and rod and sport as the reason for the activity. Both words are used, without perceptible distinction, in the extended sense to seek to obtain or win by artifice <*fish* for a compliment> <modesty is the only sure bait, when you *angle* for praise—*Chesterfield*> <the first woman who *fishes* for him, hooks him—*Thackeray*> <she knew her distance and did *angle* for me, madding my eagerness with her restraint—*Shak.*>

fissure *crack, cleft, crevasse, crevice, cranny, chink

Ana *break, gap: *breach, split, rent, rupture, rift

fit *n* **Fit, attack, access, accession, paroxysm, spasm, convulsion** are comparable when they denote a sudden seizure or spell resulting from an abnormal condition of body or mind. The last three are too specific in their technical medical senses to be synonyms of the others (except of *fit* in its narrower significations), but in their extended senses they are frequently closely parallel. **Fit** is often used narrowly: sometimes to designate a sudden seizure of a disorder (as epilepsy or apoplexy) characterized by such symptoms as violent muscular contractions or unconsciousness <fall in a *fit*> or sometimes to designate a period in which there is a marked increase of a physical disturbance characteristic of a disease <hysteria often reveals itself in *fits* of alternate laughing and weeping> In its wider application, *fit* still may imply suddenness and violence, but it emphasizes temporariness <a *fit* of the blues> <he works only by *fits* and starts> Occasionally it suggests nothing more than the un-

usual and passing character of the condition and is applied to things as well as to persons (enjoy a *fit* of laziness) (a *fit* of bad weather) **Attack** always implies a sudden and often violent onslaught but carries no suggestion of length of duration (frequent *attacks* of pain) (an *attack* of melancholy) (a prolonged *attack* of bronchitis) (we have a second *attack* of hot weather—*Whitman*) **Access** and **accession**, though often interchangeable with *attack*, distinctively imply the initiation of an attack or fit and often come close in meaning to *outbreak* or *outburst* (now and then an *access* of . . . sudden fury . . . would lay hold on a man—*Kipling*) (one of his sudden sharp *accessions* of impatience at the leisurely motions of the Trujillo boy—*Mary Austin*) Occasionally they also connote intensification (as of a mood or state of mind) to the point where control is lost or nearly lost (her evident, but inexplicable, *access* of misery—*Meredith*) In their technical medical senses *paroxysm*, *spasm*, and *convulsion* are sudden and usually short attacks especially characteristic of certain diseases. The distinguishing marks of a **paroxysm** are sudden occurrence or intensification of a symptom (as coughing) and recurrence of attacks; those of **spasm** are sudden involuntary muscular contraction, in some cases producing rigidity of the body or constriction of a passage and in others producing alternate contractions and relaxations of the muscles; those of **convulsion** are of repeated spasms of the latter kind affecting the whole or a large part of the body and producing violent contortions of the muscles and distortion of features. The implications of these technical senses are usually carried over into the extended senses. *Paroxysm* commonly occurs in the plural and suggests recurrent, violent attacks (the girls went into *paroxysms* of laughter) (throughout the night he suffered *paroxysms* of fear) *Spasm*, especially when used of emotional disturbances, often implies possession by something that for a moment grips and paralyzes (she could scarcely even look at the wall without a *spasm* of fear—*Bennett*) When used in the plural, it usually suggests the more or less rapid alternation of contrasting moods or states of mind (he worked only by *spasms*) *Convulsion* implies definite physical effects accompanying the mood or state of mind and closely resembling those symptomatic of disease (the ragged crew actually laughed at me . . . some of them literally throwing themselves down on the ground in *convulsions* of unholy mirth—*Kipling*)

fit *adj* **Fit, suitable, meet, proper, appropriate, fitting, apt, happy, felicitous** are comparable when they mean right with respect to the nature, condition, circumstances, or use of the thing qualified. Something is *fit* which is adapted or adaptable to the end in view, the use proposed, or the work to be done (food *fit* for a king) (but when to mischief mortals bent their will, how soon they find *fit* instruments of ill!—*Pope*) (never even in the most perfect days of my development as an artist could I have found words *fit* to bear so august a burden—*Wilde*) (a wooden image, movable and *fit* to be carried in procession—*Santayana*) Sometimes, in addition, *fit* connotes competence or the possession of the required qualifications (men *fit* to command) (he is not a *fit* father for his children) (they do not know what the boy is *fit* for) Other times it suggests readiness (as in condition, state of health, mood, or inclination) (the vessel is now *fit* for service) (he played tennis to keep *fit*) Something is **suitable** which answers the requirements or demands of the occasion, the circumstances, or the conditions or suggests no incongruity with them (behavior *suitable* to his age and station in life) (will begin instinctively to arrange these institutions into *suitable* conventional categories—*Marquand*) (clothes *suitable* for the occasion . . . tennis outfits, hiking outfits,

cycling outfits—*Laver*) Something is **meet** which is not only suitable but nicely adapted to the particular situation, need, or circumstances; the word usually suggests rightness or justness rather than an absence of incongruity; thus, a punishment of a childish offense may be *suitable* if it is in accord with the years and mentality of the child, but it is not *meet* unless it suggests due proportion between the offense and its penalty (it is very *meet*, right, and our bounden duty, that we should at all times and in all places, give thanks unto thee, O Lord—*Book of Common Prayer*) (Sabbath was made a solemn day, *meet* only for preaching, praying, and Bible reading—*Charles & Mary Beard*) Something is **proper** (see also **DECOROUS**) which belongs to a thing on some justifiable grounds (as by nature, by custom, or by right reason) (water is the *proper* element for fish) (the *proper* observance of Memorial Day) (the article brought only half its *proper* price) When, as often happens, fitness or suitability is stressed rather than natural or rightful association, **proper** then implies determination of fitness or suitability by logic, reasonableness, or good judgment (the *proper* study of mankind is man—*Pope*) (according to Aristotle the thing to aim at is to be angry "on the *proper* occasions and with the *proper* people in the *proper* manner and for the *proper* length of time"—*Dickinson*) Something is **appropriate** which is so eminently fit or suitable that it seems to belong peculiarly or distinctively to the person or thing with which it is associated, sometimes giving him or it a distinguishing grace or charm through its very congruity (an excitement in which we can discriminate two sorts of elements, the passions *appropriate* to the subject and the passion *proper* to the artist—*Alexander*) (the eighteenth-century gentleman spoke with a refined accent, quoted the classics on *appropriate* occasions—*Russell*) (we have agreed that our writing should be *appropriate* . . . that it should rise and fall with the subject, be grave where that is serious, where it is light not afraid of what Stevenson . . . calls "a little judicious levity"—*Quiller-Couch*) Something is **fitting** which is in harmony with the spirit, the tone, the mood, or the purpose (news *fitting* to the night, black, fearful, comfortless and horrible—*Shak.*) (it is a *fitting* paradox that he should live today . . . chiefly by those writings which contradict everything he believed—*Stewart*) Something is **apt** (see also **APT** 2; **QUICK** 2) which is nicely fitted by its nature or construction to attain the end desired, to accomplish the purpose in view, or to achieve the results contemplated (it was recognized that while one style was suited to one set of themes, another was *apter* for another set—*Binyon*) (Fourier . . . invented a mathematical process which was not only suitable for handling his problem, but proved to be so universally *apt* that there is hardly a field of science or of engineering which it has not penetrated—*Darrow*) Something is **happy** (see also **GLAD**, **LUCKY**) which is singularly appropriate and apt and therefore brilliantly successful or effective considered in its relation to the situation, the conditions, or other important factors (a *happy* choice of words, nicely expressing the subtlety of his thought) (whether a composite language like the English is not a *happier* instrument of expression than a homogeneous one like the German—*Coleridge*) (of all writers he perhaps best combines in his style a felicitous elegance with a *happy* vernacular—*Van Doren*) Something is **felicitous** which is most opportunely, tellingly, or gracefully happy (I do not like mottoes but where they are singularly *felicitous*—*Lamb*) (some of the most *felicitous* turns of thought and phrase in poetry are the result of a flash of inspiration under the happy guidance of a rhyme—*Lowes*) (let us inquire . . . whether the relation of the figures to

each other and of groups to the space they occupy is a *felicitous* one—*Binyon*)

Ana adapted or adaptable, adjusted or adjustable, conformed or conformable (see corresponding verbs at ADAPT): qualified, capable, *able, competent

Ant unfit

fit *vb* *prepare, qualify, condition, ready

Ana endure, endure (see DOWER): furnish, *provide, supply

fitful, **spasmodic**, **convulsive** are comparable when they mean lacking steadiness or regularity in course, movement, or succession (as of acts or efforts). **Fitful** stresses variability and intermittency; it implies an irregular succession characterized by fits and starts (after life's *fitful* fever he sleeps well—*Shak.*) <the *fitful* gloom and sudden lamencies of the room by firelight—*De Quincey*> <a *fitful*, undecided rain—*Kipling*> <a *fitful* wind swept the cheerless waste—*Conrad*> <hitherto I've been gloomy, moody, *fitful*—*Gilbert*> **Spasmodic** implies fitfulness, but it further suggests marked alternations (as of violent activity and inactivity or of great effort and of negligible effort or of zeal or enthusiasm and lack of interest); it therefore implies, even more than *fitful*, an opposition to what is sustained at a high pitch <*spasmodic* efforts to reform municipal government> <*spasmodic* energy> <a continuous discussion of international affairs, not *spasmodic* action at times of crisis—*Attlee*> <a *spasmodic* movement of despair—*S. S. Van Dine*> <*spasmodic* industry> **Convulsive** differs from the preceding terms in not implying intermittency and in stressing unsteadiness, strain or overstrain, and the lack of such regular rhythm as is the sign of control and especially of muscular, mental, or spiritual control <*convulsive* rise and fall of the breast> <the *convulsive* movement of the earth characteristic of an earthquake> <he had a *convulsive* drive, a boundless and explosive fervor—*Behrman*> <a *convulsive* little hug—*Turnbull*>

Ana *intermittent, periodic, recurrent: desultory, hit-or-miss, *random, haphazard

Ant constant (sense 3) —**Con** *steady, uniform, even, equable: regular, methodical, systematic, *orderly

fitting *adj* appropriate, proper, meet, suitable, *fit, apt, happy, felicitous

Ant firm —**Con** hard, solid (see FIRM): *tight, taut, tense: tough, tenacious, sturdy, *strong: plucky, gritty (see corresponding nouns at FORTITUDE)

flaccid flabby, floppy, *limp, flimsy, sleazy

Ana slack, relaxed, lax, *loose: unnerved, enervated, emasculated (see UNNERVE): weakened, debilitated, enfeebled, sapped (see WEAKEN)

Ant resilient —**Con** *elastic, springy, flexible, supple: limber, lithe (see SUPPLE): *vigorous, energetic, lusty, nervous

flag *n* **Flag**, **ensign**, **standard**, **banner**, **color**, **streamer**, **pennant**, **pendant**, **pennon**, **jack** are not always clearly distinguished. **Flag**, the comprehensive term, is applied to a piece of cloth that typically is rectangular, is attached to a staff, mast, halyard, or line, and carries an arrangement of colors, an emblematic figure, or a motto. The purpose of a flag is primarily to serve as a sign or symbol of a nation, a branch of the service, an organization, or an office, but it may also serve as a signal (as in military or naval operations) or in giving information (as of a weather change or the approach of a train) <the *flag* of England> <the admiral's *flag*> <a *flag* of truce> <a trainman's *flag*> **Ensign** is applied chiefly to a flag that indicates nationality and specifically to one flown by ships at sea <the Stars and Stripes is the national *ensign* of the United States> <of the three *ensigns* of Great Britain, the white *ensign* is flown by ships of the Royal Navy and by naval barracks, the red *ensign* by British merchant vessels, and the blue *ensign* by some vessels commanded by officers of the Royal Naval Reserve and by some classes of government vessels not part of the navy> **Standard** and **banner** are more or less literary terms for the flag (as of a country, a party, or a religious, civic, or patriotic organization) thought of as a rallying point or as something to be followed. **Standard** especially suggests the former because the term originally designated and still often designates a flag or a sculptured figure raised on a pole so as to be a gathering point for all who belong under it <as armies at the call of trumpet . . . troop to the *standard*—*Milton*> **Banner** basically applies to a flag (often hung downward from a crosspiece instead of flying from a staff) of an individual (as an emperor, king, lord, or military leader) which was formerly flown from windows or doors or carried aloft at the head of a procession (as of troops marching to war) <hang out your *banners* on the outward walls; the cry is still "They come"—*Shak.*> <terrible as an army with *banners*—*Song of Solomon* 6:4> **Color** (most frequently found in the plural colors) may apply to a national flag, to a flag emblematic of affiliation or partisanship, or to a flag of most military units; the term is particularly likely to suggest military activity or display <call to the *colors*> <hoist the *colors*> <troop the *colors*> <the British *colors* were planted on the summit of the breach—*Wellington*> The remaining terms are highly specific and definite in implications. **Streamer** applies to a long narrow flag (as on the masthead of a government ship) that floats in the wind; **pennant** and **pendant**, the latter more English than American, apply to a streamer that is long, narrow, and tapering. **Pennant** even more often applies to a narrow flag, typically triangular, which is flown by ships, which is used in signaling and in decorating, or which is exhibited (as by a baseball club) as a sign of championship. **Pennon** may apply to a narrower flag or a small streamer suitable for attaching to a lance. **Jack** denotes a small oblong flag indicating nationality which is hoisted on a staff at the bow or bowsprit cap of a ship or

one used in signaling.

flag *vb* *droop, wilt, sag

Ana *fall, subside, slump, sink, drop: ebb, wane, *abate
flagitious nefarious, infamous, iniquitous, villainous, *vicious, corrupt, degenerate

Ana scandalous, criminal, sinful (see corresponding nouns at OFFENSE): shameful, disgraceful (see corresponding nouns at DISGRACE): *flagrant, gross, glaring

flagrant, **glaring**, **gross**, **rank** are comparable as derogatory intensives meaning conspicuously or outstandingly bad or unpleasant. **Flagrant** usually applies to offenses, transgressions, or errors which are so bad that they cannot escape notice or be condoned (his treatise is marked by several *flagrant* errors) (a *flagrant* abuse of the executive power) (flagrant injustice) (open and *flagrant* mutiny—Kipling) (in *flagrant* violation of all the New York properties—Wharton) **Glaring** carries an even stronger implication of obtrusiveness than *flagrant*; the term is often applied to something which is so evidently or so conspicuously wrong, improper, or faulty as to inflict such distress or pain upon the observer as might too vivid a color or too harsh a light (a *glaring* fault in a design) (a *glaring* inconsistency in his argument) (his second novel is in *glaring* contrast to his first novel) (this evil is so *glaring*, so inexcusable—Shaw) (glaring imperfections which go far beyond a mere lack of verbal felicity—Krutch) **Gross** (see also COARSE; WHOLE 2) is even more derogatory than *flagrant* or *glaring* because it suggests a magnitude or degree of badness that is beyond all bounds and wholly inexcusable or unpardonable. However, the term is not so often referred to evil acts or serious offenses as it is to human attitudes, qualities, or faults that merit severe condemnation (gross carelessness) (gross stupidity) (gross superstition) (Elizabethan and Jacobean poetry . . . had serious defects, even *gross* faults—T. S. Eliot) (the hero is as *gross* an imposture as the heroine—Shaw) (they must read as the *grossest* impropriety and rankest treason—Sperry) (even illness cannot excuse such unfilial behavior and such *gross* folly—Graves) **Rank** (see also RANK 1) applies chiefly to nouns that are terms of reproach; it implies that the person or thing described by such a term is extremely, utterly, or violently whatever he or it is declared to be (O, my offense is *rank*, it smells to heaven—Shak.) (till she looked less of a *rank* lunatic—Meredith) (it was hatred, simple hatred, that *rank* poison fatal to Mr. Hazard's health, which now plagued his veins—Wylie) (rank heresy) (rank nonsense) (it would be *rank* madness to attempt such a journey in this weather) **Ana** heinous, *outrageous, atrocious, monstrous: nefarious, flagitious, infamous (see VICIOUS)

flash *vb* Flash, gleam, glance, glint, sparkle, glitter, glisten, scintillate, coruscate, twinkle mean to shoot forth light (as in rays or sparks). **Flash** implies a sudden and transient outburst of light or a sudden display of something that brilliantly reflects light or seems lighted up (the headlights . . . *flashed* into barnyards where fowls slept—Anderson) (flashed all their sabers bare—Tennyson) (his *flashing* eyes, his floating hair—Coleridge) **Gleam** implies a ray which shines through an intervening medium or against a background of relative darkness (I see the lights of the village *gleam* through the rain and mist—Longfellow) (a light *gleamed* through the chinks in the wall—Dickens) (his dislike of me *gleamed* in his blue eyes and in his supercilious cold smile—Rose Macaulay) **Glance** implies darting or obliquely reflected light; **glint** implies quickly glancing or gleaming light (besides the *glancing* tears . . . some diamonds . . . *glanced* on the bride's hand—Dickens) (an insane light *glanced* in her heavy black eyes—Stowe) (specks of sail that *glinted* in the sunlight far at sea—Dickens) (when the first sunshine through their dewdrops *glints*—J. R. Lowell) (the large brass scales near the flour bins *glinted*—Bennett) **Sparkle** suggests quick, bright, brief, and innumerable small flashes of light; **glitter** connotes greater brilliancy or showiness than *sparkle*, sometimes with the implication of something sinister (the fireflies . . . *sparkled* most vividly in the darkest places—Irving) (the *sparkling* waves—Wordsworth) (everything *sparkled* like a garden after a shower—Cather) (eyes *sparkling* with amusement) (eyes *glittering* with greed) (glittering rings) (the sunshine sifted down . . . and the yellow flower . . . caught it, and *glittered* like a topaz—Deland) **Glisten** implies a more or less subdued sparkle, glitter, or gleaming that suggests the lustrous shining quality of a moist surface (dew *glistening* in the soft morning light) (snowy mountains *glistening* through a summer atmosphere—Irving) (eyes *glistening* with heavenly tears—Carlyle) **Scintillate** implies the emission of sparks in a steady stream or a sparkling suggestive of such an emission; **coruscate** the emission of a brilliant flash or succession of flashes; both words have extended as well as literal use (a night so clear that the stars seem to *scintillate*) (an ornate style that *coruscated* with verbal epigrams—Huxley) (coruscating wit) **Twinkle** suggests a soft and intermittent sparkling, often wavering and lustrous (twinkle, twinkle, little star . . . like a diamond in the sky—Jane & Ann Taylor) (sunbeams . . . *twinkled* on the glass and silver of the sideboard—Cather) (he looked at her and his eyes *twinkled*—Anderson)

Con *moral, ethical, noble, virtuous: spiritual, divine, religious (see HOLY): intellectual, psychic, *mental

fleshy, fat, stout, portly, plump, rotund, chubby, corpulent, obese mean thick and heavy in body because of superfluous fat. **Fleshy** and **fat** are not clearly discriminated in use, although **fleshy** may imply overabundance of muscular tissue and **fat**, of adipose tissue; when a derogatory connotation is intended **fat** is usually preferred (the unreasonably **fat** woman with legs like tree trunks—*K. A. Porter*)

⟨my appetite is plenty good enough, and I am about as **fleshy** as I was in Brooklyn—*Whitman*) ⟨a **fleshy**, jolly man⟩ ⟨a dowdy **fat** woman⟩ **Stout** implies a thickset, bulky figure *or* build, but it is often merely a euphemistic substitute for **fat**; **portly** adds to **stout** the implication of a more or less dignified and imposing appearance ⟨a very **stout**, puffy man, in buckskins and Hessian boots—*Thackeray*) ⟨one very **stout** gentleman, whose body and legs looked like half a gigantic roll of flannel, elevated on a couple of inflated pillowcases—*Dickens*) ⟨a large **portly** figure . . . the very beau ideal of an old abbot—*J. W. Carlyle*) ⟨an elderly gentleman, large and **portly**, and of remarkably dignified demeanor—*Hawthorne*) **Plump** implies a pleasing fullness of figure and well-rounded curves ⟨the **plump** goddesses of Renaissance paintings⟩ ⟨she became **plump** at forty⟩ ⟨his wife was . . . **plump** where he was spare—*Sayers*) **Rotund** suggests the shape of a sphere; it often, in addition, connotes shortness or squatness ⟨this pink-faced **rotund** specimen of prosperity—*George Eliot*) **Chubby** applies chiefly to children or to very short persons who are otherwise describable as **rotund** ⟨a **chubby** cherub of a baby⟩ **Corpulent** and **obese** imply a disfiguring excess of flesh or of fat ⟨Mrs. Byron . . . was a short and **corpulent** person and rolled considerably in her gait—*Thomas Moore*) ⟨a woman of robust frame, square-shouldered . . . and though **stout**, not **obese**—*Brontë*)

Ant skinny, scrawny —**Con** *lean, lank, lanky, gaunt, rawboned, angular, spare: *thin, slim, slender, slight

flex *vb* **Flex, crook, bow, buckle** mean to bend, but because of special implications and applications they are not freely interchangeable. **Flex** is used chiefly of the bending of a bodily joint especially between bones of a limb by which the angle between the bones is diminished, or it may apply to the contraction of muscles by which the bending is accomplished; in either case the word is usually opposed to *extend* ⟨**flex** the arm at the elbow⟩ ⟨**flex** the leg at the hip joint⟩ ⟨he has grown so old and stiff that he cannot easily **flex** his knees⟩ ⟨the world . . . would jeer at any eccentric who should **flex** his mental muscles in public—*Barzun*) **Crook** may replace **flex** (the air was so full of rheumatism that no man could **crook** his arm to write a sermon—*Blackmore*) ⟨John, snickering, **crooked** his wicked thumb—*Browning*) but it is also used to convey an implication of circuitousness and hence of contortion or distortion ⟨God knows, my son, by what bypaths and indirect **crook'd** ways I met this crown—*Shak.*) ⟨forward then, but still remember how the course of time will swerve, **crook** and turn upon itself in many a backward streaming curve—*Tennyson*) **Bow** (see also YIELD) may denote to bend as in reverence *or* submission (at the name of Jesus every knee should **bow**—*Phil* 2:10) but it often means explicitly to incline downward the head and usually the part of the body above the waist, especially as a gesture of greeting, of recognition, or of reverence ⟨**bow** pleasantly to acquaintances⟩ ⟨**bow** reverently before a shrine⟩ ⟨grasses that now were swaying and **bowing** like living things in happy dance—*Idriess*) In a related use **bow** retains some suggestion of submission and implies a bending under something (as a heavy weight) that wears or oppresses ⟨trees **bowed** down with ice⟩ ⟨an old man **bowed** with years⟩ **Buckle** implies a bending under stress (as from undue pressure, weight, heat, or fright) that loosens or weakens what supports and that brings on collapse, often to the point of permanent distortion (noticed the **buckling** of the girder of the bridge) ⟨the freight train **buckled** as it left the track and fell over the embankment⟩ ⟨the wall **buckled** under the heat of the fire⟩ ⟨his knees **buckled**

and he fell down on the floor—*Chandler*) <the bulkhead had *buckled*; he had actually seen it coming forward—*Crofts*>

Ana *play, sport, disport: *caress, fondle, pet

flit *vb* Flit, flutter, flitter, flicker, hover suggest the movements of a bird or other flying or floating thing and mean to move in a manner like or reminiscent of such movements

Flit implies a light and swift passing from place to place or point to point <birds flitted from tree to tree> <the talk flitting from one subject to another and never dropping so long as the meal lasts—*Arnold*> <seemed to pass the whole of his life flitting in and out of bedrooms—*Bennett*> <Clare Potter, flushed and gallantly gay, flitting about from person to person—*Rose Macaulay*> Flutter implies the movement of a bird rapidly beating its wings or the restless flitting of a moth about a light; it especially implies unsteadiness and agitation <till she felt the heart within her fall and flutter tremulously—*Tennyson*> <gay moods and mysterious, moth-like meditations hover in my imagination . . . but always the rarest, those freaked with azure and the deepest crimson, flutter away beyond my reach—*L. P. Smith*> <a little dark shadow fluttered from the wall across the floor—*Cather*> <her eyes . . . timidly fluttering over the depths of his—*Meredith*> Flitter implies the lightness and quickness of movement suggested by flit but usually also suggests the uneasiness or uncer-

tainty connoted by flutter <the poor silly fluttering woman> <children fluttering here and there> <when he was pressed and irritated to condemn the Cardinal, his eyes flittered uncomfortably—*Hackett*> <flared and flittered around them like light gone mad—*Rölvaa*> Flicker implies a light fluttering or a fitfully wavering movement <translucent flickering wings between the sun and me—*Stevenson*> <thou small flame, which, as a dying pulse rises and falls, still flickerest up and down—*Shelley*> <fireflies flicker in the tops of trees—*Lowell*> Hover implies a hanging suspended over something like a bird maintaining its position in the air by an even usually slow movement of the wings; the word frequently connotes irresolution, sometimes menace, sometimes solicitude <vultures hovering over a battlefield> <behold him perched in ecstasies, yet seeming still to hover—*Wordsworth*> <your servant . . . has been hovering about us and looking at you anxiously for some minutes—*Shaw*> <the shark was still hovering about—*Birtles*>

Ana glide, *slide, slip: *flit, hover, flitter

flood *n* 1 *flow, stream, current, tide, flux

Ana *excess, superfluity, surplus: incursion, *invasion

2 **Flood, deluge, inundation, torrent, spate, cataract** are comparable when they mean a great or overwhelming flow of or as if of water. Flood basically implies the flowing of water, often in great abundance, over land not usually submerged; it therefore suggests usually something (as a stream) that exceeds or breaks its normal bounds, but it carries in itself no clear implication of the ultimate cause <the disastrous Mississippi river floods of 1936> <his home was washed away by the flood> <a flood of advertising was sent through the mail> <messages of sympathy came in a flood> <the rising flood of students is very much like the barbarian invasions—*Bush*> Deluge may apply to a flood that destroys or drowns but especially to a tremendous and continuous downpour of rain; the term seldom suggests a flood which results from a melting of snows, a rising river, or a tidal wave. In its extended uses it implies, sometimes hyperbolically, a power that, through force of numbers, of volume, or of quantity cannot be resisted or that sweeps one away <the rain descended in a deluge> <the waters have not yet abated from the deluge> <the memorable deluge of the thirteenth century out of which the Zuyder Zee was born—*Motley*> <a deluge of criticisms fell on him from all sides> <the frightful deluge of spoken and printed palaver—*Sat. Review*> <she becomes lost in the overflow—a formless, unending deluge of realistic detail—*Robert Humphrey*> Inundation implies a flood caused by a stream, lake, or exceptionally high tide overflowing adjacent land; it therefore stresses something that overspreads and extends far and wide <the annual inundation of Egypt by the Nile> <the threat of inundation by the sea—*Mumford*> <his tears were not drops but a little inundation down his cheeks—*Wescott*> <an inundation of Italy by barbarians> Torrent implies an impetuous rushing or surging of waters (as of a river in flood or of a stream that follows a steep course). It stresses the violence and rapid movement of the stream rather than its destructiveness or its capacity for spreading far and wide, and in extended use may be applied to something that comes forth with the same suddenness, the same violence, and the same clear direction <a torrent of water swept down the hillside> <he used to say that the mountain torrents were the first road builders, and that wherever they found a way, he could find one—*Cather*> <pouring

forth that *torrent* of stinging invective—*Hudson*) <philosophy . . . provided a foothold for man above the *torrent* of circumstance—*Buchan*) **Spate** refers literally to a stream that has suddenly become full, agitated, and turbulent under the influence of a spring freshet or violent rains; hence in its extended applications it suggests a sudden swelling or outpouring of what usually flows in a quiet stream <when you are a big man, and fish such a stream as that, you will hardly care . . . whether she be roaring down in full *spate*—*Kingsley*> <he had hardly sat down when he began to talk full *spate*—about the war, the war of 1914—*Henry Miller*> <the *spate* of books on conservatism and liberalism in America—*Niebuhr*> <a *spate* of inventions in the early years of the century> **Cataract** denotes a waterfall or a steep rapids characterized by a great volume of water descending precipitously or headlong; it is sometimes applied to something (as a deluge of rain or of words) that suggests such a waterfall or rapids in its overwhelming downpour or rush <blow, winds, and crack your cheeks! rage! blow! You *cataracts* and hurricanoes, spout—*Shak.*> <the *cataract* of nastiness which he poured alike on Piso and Clodius and Gabinius—*Froude*> <no doubt flaming *cataracts* of lava rushed down the sides of Vesuvius on that terrible day—*Lucas*>

flow *vb* issue, emanate, proceed, stem, derive, *spring, arise, rise, originate

Ana emerge, *appear, loom: start, *begin, commence

flow *n* **Flow, stream, current, flood, tide, flux** are comparable when meaning something issuing or moving in a manner like or suggestive of running water. **Flow** may apply to the issuing or moving mass or to the kind of motion which characterizes it, but in either case it implies the type of motion characteristic of the movement of a fluid; the term may suggest either a gentle or a rapid pace and either a copious or a meager supply, but it consistently implies an unbroken continuity of the particles or parts <the *flow* of his ideas exceeded his capacity for setting them down in writing> <she expressed herself in a *flow* of words> <the hardly perceptible *flow* of a mountain glacier> <the thought of never ceasing life as it expresses itself in the *flow* of the seasons—*Anderson*> <she would tell you what

she thought about the world and its ways in a *flow* of racy comment—*Rose Macaulay*> **Stream** implies a flow characteristic of a body of running water (as a river) or of water pouring forth from a source or outlet (as a fountain or a faucet). The term places emphasis more upon the volume, the duration, and the constant succession and change of particles than upon the type of motion <for weeks after the surrender a *stream* of refugees crossed the country's border> <music, acting, poetry proceed in the one mighty *stream*; sculpture, painting, all the arts of design, in the other—*Ellis*> <novelists who present their characters not in action, but through the *stream* of consciousness of each> <let loose a *stream* of commentary and discussion—*Southern*> **Current** differs from *stream* in laying greater stress on the direction or course of the movement implied and in carrying stronger suggestions of its force or velocity <*streams* of people passed him in either direction, but he was finally caught by the *current* of those moving south> <he could not maintain his position against the *current* of opposition> <*currents* of cold air swept in from the north> <he might drift some distance with the democratic *current* of the age, and then, with Gladstone, grow affrighted—*Kirk*> <Olds might have won Ford's success had his mind been more sealed against the *currents* to which it was exposed—*Burlingame*> **Flood** is often used in place of *flow* or *stream* to imply extreme copiousness in the supply or to attribute to it an overwhelming or torrential power <it is not, he then feels with a sudden *flood* of emotion, that America is home, but that home is America—*Brownell*> <this poem called forth *floods* of abuse—*Day Lewis*> **Tide** applies to something that flows or courses like an ocean tide and suggests either an alternation of directions <swayed by the sweeping of the *tides* of air—*Bryant*> or a power to suck one into its course by the force of its outward or inward pull <Stanley was caught in the *tide* of war fervor—*Rose Macaulay*> **Flux**, more specifically than *stream*, stresses the unceasing change in the parts, particles, or elements and, sometimes, in the direction of what flows <for this and that way swings the *flux* of mortal things though moving inly to one far-set goal—*Arnold*> <how idle is it to commiserate them for their instability, when not stability but *flux* is their ideal!—*Brownell*> *Flux* often specifically applies to the outward aspect or appearance which is constantly changing in contrast to its real and abiding nature <to distinguish between the transient, unsatisfying *flux* of things, and the permanent, satisfying reality which lies behind it—*Inge*>

P. Smith*> **Skim** in its extended use implies a passing lightly and swiftly over the surface of something, sometimes darting into it, sometimes floating above it; often it suggests a light touching of the surface without real physical or mental penetration <skim through an assignment> <some lightly o'er the current skim—*Gray*> <down the road skims an eave swallow, swift as an arrow—*Jefferies*> <she had skimmed gracefully over life's surface like a swallow, dipping her pretty wings in the shallows—*Rose Macaulay*> <the habit of skimming volumes in bookshops—*Times Lit. Sup.*> **Scud** implies light, rapid movement (as of a hare pursued by hounds, of a sailboat driven over the surface of the water by a high wind, or of clouds driven by

an approaching hurricane); often, also, it connotes swiftness so great that the surface is barely touched by the speeding object <the yacht scuds before the wind> <the scudding rain which drives in gusts over the . . . great shining river—*Thackeray*> <crisp foam-flakes scud along the level sand—*Tennyson*> <freezing weather that sent the delegates and their briefcases scudding—*Panther-Downes*> **Shoot** differs from **dart**, its nearest synonym, in throwing less emphasis upon the suddenness of start and, often, in more definitely suggesting continuous or extended movement <the lambent lightnings shoot across the sky—*Thomson*> <the automobile shot around the corner> <a wild idea shot into her mind—*Glasgow*> **Sail** differs from its nearest synonym **float** in more frequently implying power, ostentation as if of spread sails, or steadiness and directness of course <hope . . . set free from earth . . . on steady wing sails through the immense abyss—*Cowper*> <but who is this? . . . female of sex it seems—that, so bedecked, ornate, and gay, comes this way sailing—*Milton*> <held the door for us and we sailed through—*Deutschman*>

foam *n* **Foam**, **froth**, **spume**, **scum**, **lather**, **suds**, **yeast** are comparable when they denote either a mass of bubbles gathering in or on the surface of a liquid or something as insubstantial as such a mass. **Foam** is the most comprehensive of these terms but is not interchangeable with all; it implies an aggregation of small bubbles such as rises to the top of a fermenting liquor or an effervescing or boiling liquid, or appears on the surface of the sea when agitated by high winds or covered with breaking waves; the term is also applicable to a bubbly slaver dribbling from the mouth of one in a rage or in great excitement or to the clotted sweat of an animal driven to exhaustion or suffering from intense heat <the rider from the château, and the horse in a foam, clattered away through the village—*Dickens*> Of all these words **foam** commonly has the most pleasant associations, usually connoting in poetry whiteness, delicacy, and grace <Idalian Aphrodite beautiful, fresh as the foam—*Tennyson*> <the foam that looks so sunbright when the wind is kicking up the breakers—*Warren*> **Froth** is applicable to any foam, but it carries a stronger implication of insubstantiality, worthlessness, or, when there is direct or indirect reference to persons or animals, of mad excitement than **foam** carries <your glass of beer is half froth> <froth forming at the mouth of a mad dog> <his speech had no logical substance, being mostly froth> <in all the froth and ferment between capital and labor—*Furnas*> **Spume** is applicable where **foam** or **froth** might also be employed <they dart forth polypus-antennae, to blister with their poison spume the wanderer—*Shelley*> but the term is chiefly used to denote the foam arising on an agitated body of water <all the billows green tossed up the silver spume against the clouds—*Keats*> <as when a sandbar breaks in clotted spume and spray—*Kipling*> <shore encumbered by rain-washed boulders and ruffed with sea spume—*Han Suyin*> **Scum** distinctively applies to the bubbly film that rises on boiling liquids, especially those containing organic matter <scum on boiling currant juice> or to a similar film which forms on molten metals <the scum or scoria of iron> or on the surface of a body of stagnant water <the ditch is covered with a green scum> Such scums ordinarily constitute impurities that are removed (as from broth or molten metal) or that constitute a contamination impairing the usability (as of stagnant

water); this notion of worthlessness or obnoxiousness is carried over into extended use especially as applied to a class or body of persons (the social *scum*, the passively rotting mass of people who lie at the bottom of the social scale—*Geismar*) *Lather* and *suds* both apply to the foam produced by agitating water impregnated with soap or detergent. *Lather*, however, usually suggests a less frothy condition than *suds* and a heavier aggregation of small soapy bubbles (hard water does not produce a good *lather* for shaving) *Suds*, on the other hand, often denotes water so covered with a soapy foam that it is usable for laundering clothes (the laundress likes the soap because it gives her plenty of *suds*) (soak the cloth in hot *suds*) *Lather*, rather than *suds*, may be preferred when the foam induced by intense sweating or emotional excitement is denoted (a hard-ridden horse working up a *lather*) (he was in a *lather* of rage) but *suds* is more usual when the reference is to something that suggests the appearance of suds in a laundry tub or washing machine (another [medicine man] whips up a mixture of water and meal into frothy *suds* symbolic of clouds—*Frazer*) *Yeast* basically applies to a froth or sediment composed of an aggregate of small fungal cells and found in saccharine liquids (as fruit juices and malt worts) in which it induces fermentation. The same substance is used as a leavening agent in bread; from this stems one line of its extended use in which it suggests a sign of activity, vitality, or agitation (seething with the *yeast* of revolt—*Dobie*) But because yeast often appears as a froth on liquids and is accompanied by fermentation, the term has another line of extended use in which it is applied to a similar froth, foam, or spume, especially one appearing on the surface of an agitated sea (the ship . . . swallowed with *yeast* and froth—*Shak.*) (they melt into thy *yeast* of waves—*Byron*)

follow *vb* 1 **Follow**, **succeed**, **ensue**, **supervene** mean to come after someone or, more often, something. Although all of these verbs occur as transitives and intransitives, *ensue* and *supervene* are more commonly intransitive verbs. **Follow** is the general term and may imply a coming after in time, in sequence, in pursuit (see FOLLOW 2), in logic,

or in understanding (the singing of "America" by the audience will *follow* the introductory prayer) (Queen Victoria *followed* William IV as British sovereign) (the driving force in education should be the pupil's wish to learn, not the master's authority; but it does not *follow* that education should be soft and easy and pleasant at every stage—*Russell*) **Succeed** commonly implies an order (as one determined by descent, inheritance, election, or rank) by which one person or thing comes after another (son *succeeded* father as head of the business for many generations) (the eldest son *succeeds* to the title) (the person who will *succeed* the late congressman will be appointed by the governor of the state) **Succeed** is often used when the idea of a fixed order is lost, but it still usually retains the idea of taking the place of someone or something (the link dissolves, each seeks a fresh embrace, another love *succeeds*, another race—*Pope*) (the anxieties of common life began soon to *succeed* to the alarms of romance—*Austen*) (simplicity of concept *succeeds* complexity of calculation—*Bell*) **Ensue** usually implies some logical connection or the operation of some such principle of sequence as that of necessity (that such a consequence . . . should *ensue* . . . was far enough from my thoughts—*Austen*) (each knowing the other, a conversation *ensues* under the hypothesis that each to the other is unknown . . . a very silly source of equivoque—*Poe*) **Supervene** suggests a following by something added or conjoined and often unforeseen or unpredictable (two worlds, two antagonistic ideals, here in evidence before him. Could a third condition *supervene*, to mend their discord?—*Pater*) (it was not acute rheumatism, but a *supervening* pericarditis that . . . killed her—*Bennett*) (it is in the philosophy that *supervened* upon the popular creed . . . that we shall find the highest . . . reaches of their thought—*Dickinson*)

2 **Follow**, **pursue**, **chase**, **trail**, **tag**, **tail** are comparable when meaning to go immediately or shortly after someone or something. **Follow** is the comprehensive term; it usually implies the lead or, sometimes, guidance of someone or something (the detective *followed* the boys to their hiding place) (hangers-on who *follow* the circus) (the vengeance that *follows* crime—*Dickinson*) (follow up a clue) (follow a trade) (he should not desire to steer his own course, but *follow* the line that the talk happens to take—*Benson*) (not one of the many people I know who *followed* the hearings thought that the television reporting was slanted or unfair—*Seldes*) **Pursue** in its earliest sense implies a following as an enemy or hunter (pursue a fox) (pursuing rebels in flight) (pursue happiness) The term therefore usually suggests an attempt to overtake, to reach, or to attain, and commonly in its extended senses, even when the implications of hostility or of a desire to capture are absent, it connotes eagerness, persistence, or inflexibility of purpose in following one's thoughts, ends, or desires (ye who . . . *pursue* with eagerness the phantoms of hope—*Johnson*) (thrice happy man! enabled to *pursue* what all so wish, but want the pow'r to do!—*Pope*) (pursuing the game of high ambition with a masterly coolness—*Buchan*) (pursue the career of a diplomat) **Chase** implies fast pursuit in order to or as if to catch a fleeing object or to drive away or turn to flight an oncoming thing (chase the fleeing thieves) (the boys *chased* the intruder out of the school yard) (we were *chased* by two pirates, who soon overtook us—*Swift*) (if to dance all night, and dress all day . . . *chased* old age away . . . who would learn one earthly thing of use?—*Pope*) **Trail** implies a following in someone's tracks (trail a fugitive to his hiding place) (trail a lost child to the edge of a creek) (not daring to accost him . . . she had *trailed* him to the railroad station—*Chidsey*) **Tag** implies a persistent,

annoying following or accompanying <complained that his little sister was always *tagging* after him> <two unarmed launches *tagged* behind—*Millard*> **Tail** specifically implies close following and surveillance <he employed detectives to *tail* the suspect>

follower, adherent, disciple, sectary, partisan, henchman, satellite are comparable when denoting one who attaches himself to another. **Follower** is the inclusive term, denoting a person who attaches himself to the person or opinions of another <the *followers* of Jesus> <*followers* of Karl Marx> <they are creatures of the Devil, vowed to idolatry, and *followers* of Mithras—*Nevil Shute*> Its synonyms divide themselves into two groups, the first three designating a follower through choice or conviction and the last three a follower in whom personal devotion overshadows or eclipses the critical faculty. **Adherent** connotes closer and more persistent attachment than *follower*; it may be used without any implication of the personality of the teacher or leader <a doctrine that gained many *adherents*> <the candidate lost many *adherents* when he announced his views on reform> <*adherents* to the Communist party—*Conant*> **Disciple** typically presupposes a master or teacher and implies personal, often devoted, adherence to his views or doctrines <though . . . an enthusiastic student of Fourier . . . he was never a mere *disciple*—the individualistic stamp was too strong—*Rosenzweig*> but it may also imply similar adherence to a school of thought or governing principle <there is no angler, not even the most aesthetic *disciple* of the dry fly—*Alexander MacDonald*> <during the war years the *disciples* of the extreme Left sounded very much like the worst of the Negro-hating Southerners—*Current Biog.*> **Sectary** (see also HERETIC) usually implies the acceptance of the doctrines of a teacher or body <*sectaries* of Mohammed> <there dwelt, unchanged, the spirit of the Puritans and the Friends, the stiff-necked *sectaries* of Cromwell's army—*Brooks*> <Aristotle . . . has suffered from the adherence of persons who must be regarded less as his disciples than as his *sectaries*—*T. S. Eliot*> **Partisan** suggests such devotion to the person or opinions of another or to a party, a creed, or a school of thought that there is incapacity for seeing from any other point of view. It often, therefore, connotes bigotry or prejudice <Laura was always a passionate *partisan* of her young brother—*Mary Austin*> <a few *partisans* argued for him—*Mencken*> **Henchman** is commonly applied to a subservient follower of a political leader or boss; in extended use it connotes abject submission to the will of a dominating and, usually, unscrupulous leader or group <the cat's-paw of corrupt functionaries and the *henchman* of ambitious humbugs—*Shaw*> **Satellite**, more than any of the others, suggests devotion to the person of the leader and constant obsequious attendance on him <Boswell was . . . made happy by an introduction to Johnson, of whom he became the obsequious *satellite*—*Irving*>

following *n* **Following, clientele, public, audience** are comparable when they denote the body of persons who attach themselves to another especially as disciples, patrons, or admirers. **Following** is the most comprehensive term, applicable to a group that follows either

as a physical train or retinue or as the adherents of a leader, the disciples of a philosopher, the customers of a salesman, the admirers of a young woman, or the fans of an actor <such a man, with a great name in the country and a strong *following* in Parliament—*Macaulay*> <he unconsciously enrolls a *following* of like-minded persons—*Montague*> **Clientele** is chiefly used of the persons, collectively, who go habitually for services to a professional man (as a lawyer or physician) or who give their patronage to a business establishment (as a hotel, a restaurant, or a shop) <Dr. Doe has among his *clientele* all the leading families in the town> <summer hotels usually send out circulars to their *clientele* in the spring> **Public** basically denotes a group of people with a common interest and may come close to *following* in many of its applications (as to adherents, disciples, customers, and admirers); often, however, it distinctively conveys the notion of a group making active demands rather than one passively or admiringly following <a novelist's *public*, in fact, is people who read everything he writes even when they hate it—*Cary*> <a public relations program must be concerned with the policies of the institution, their interpretation and announcement to the college's various *publics*—*Brecht*> <protecting movie stars from their *publics*—*New Yorker*> <these two books on Spain are different in purpose, different in scope, and aimed at different *publics*—*Bergin*> **Audience** is applicable to a following that listens with attention to what a person has to say whenever he addresses them (as in a speech or a book) <still govern thou my song, Urania, and fit *audience* find, though few—*Milton*> <the stricken poet [Leopardi] . . . had no country, for an Italy in his day did not exist, he had no *audience*, no celebrity—*Arnold*> **Audience**, rather than *spectators* (see SPECTATOR), is also the usual term for designating the body of persons attending a lecture, a play, or a concert on the assumption that they are there primarily to hear, only secondarily to see <the *audience* at the opera packed the house>

fond *adj* 1 **Fond, infatuated, besotted, insensate** are comparable when they mean made blindly or stupidly foolish (as by passion or drink). **Fond** implies a judgment misled by credulity, undue optimism, or excessive affection <Cowper's characterization of the *Biographia Britannica*: "Oh, *fond* attempt to give a deathless lot to names ignoble, born to be forgot!"> <grant I may never prove so *fond*, to trust man on his oath or bond—*Shak.*> <how are we to rid ourselves of our *fond* prejudices and open our minds?—*James Ford*> **Infatuated** implies a weakening rather than the absence of judgment, especially under the influence of violent passion or unreasoning emotion; it is therefore correctly applied to the acts or qualities of men from whom sagacity or self-control might have been expected <what the *infatuated* ministry may do, I know not; but our *infatuated* House of Commons . . . have begun a new war in America—*Burke*> <your people are so shortsighted, so jealous and selfish, and so curiously *infatuated* with things that are not . . . good—*Jefferies*> **Besotted** adds to *infatuated* the implications of a stupefying or intoxicating influence that destroys the capacity to think clearly and sometimes makes its victim disgusting or repulsive <men *besotted* by drink> <are these so far *besotted* that they fail to see this fair wife-worship cloaks a secret shame?—*Tennyson*> <seemed

food 1 **Food, feed, victuals, viands, provisions, comestibles, provender, fodder, forage** are comparable when meaning things that are edible for human beings or animals. **Food** is the most general of these terms and is typically applicable to all substances which satisfy hunger and build up or repair waste in the body of men or animals (conserve a nation's supply of *food*) (refrigerators that keep *food* fresh) It is sometimes distinguished from *drink* (there was no lack of *food* or *drink* during their sojourn on the island) or applied specifically to human needs and then distinguished from *feed*, which normally denotes food for domestic animals (he needed *food* for his family and *feed* for his livestock—*Gustafson*) *Victuals* and *viands* basically denote food for human beings, especially food that is prepared and ready for eating. *Victuals* is a racy or pungent word used for special effect (I worked hard enough to earn my passage and my *victuals*—*Shaw*) (when I bear in mind how elegantly we eat our *victuals*—*L. P. Smith*) *Viands* is bookish or affected and occurs chiefly where daintiness, rarity, or an especially fine quality is to be suggested (all the dainties and *viands* that could be wanted for a feast—*Wilde*) (he dashed the wine on the earth and scattered about the other *viands*—*Milman*) **Provisions** applies to food in general as offered for sale in a market or kept in store as supplies (a country store stocked with all sorts of staples and *provisions*) (there were not enough *provisions* in the hotel to care for the weekend influx of guests) (a basket of *provisions*) **Comestibles**, which stresses edibility, is now found chiefly in playful use for *victuals* or *provisions* (he resolved upon having a strong reinforcement of *comestibles*—*Hook*) (bills are also discussed, and butchers and groceries, and the price of *comestibles*—*Rose Macaulay*) The remaining three terms, *provender*, *fodder*, and *forage*, basically denote feed for animals, but all may occasionally be used, typically derogatorily, of human food. **Provender** in its basic use applies to food (as hay, oats, or corn) for horses, mules, or asses (they must be dieted like mules and have their *provender* tied to their mouths—*Shak.*) **Fodder** applies to food for domestic cattle and especially to coarse food (as hay, silage, and straw) that is harvested and fed out, as distinguished from **forage**, food consumed by grazing or browsing.

2 **Food, aliment, pabulum, nutriment, nourishment, sustenance, pap** are comparable especially when they denote material which feeds and supports the mind or the spirit. **Food** is applicable to whatever is taken in and assimilated to enlarge the mind or spirit or to contribute to its vitality and growth (praise was her favorite *food*—*Phillpotts*) (those books that provide *food* for the imagination) **Aliment** and **pabulum** are not always distinguishable from each other, but **aliment** is more often applied to what nourishes or builds one's mind and nature (mischief,

love, and contradiction, are the natural *aliments* of a woman—*Richardson*) (the *aliments* nurturing our nobler part, the mind, thought, dreams, passions, and aims . . . at length are made our mind itself—*Lytton*) and **pabulum** to something, and often something overfed, bland, or worthless, which serves as an article or sometimes as the substance of one's mental diet (many motion pictures provide poor *pabulum* for the adolescent mind) (where every man's hand is out for *pabulum*, and virile creativeness has given place to the patronizing favor of swollen bureaucracy—*Vannevar Bush*) **Nutriment** and **nourishment** are both applied to what is needed for healthy growth (as of the body, the mind, or an institution) (the central sources of the ideology, the abundant larder from which the *nutriment* of ideology is being drawn—*A. A. Cohen*) (self-esteem, one of the properties of the ego, is first regulated by the supply of *nourishment* from the outside—*Blum*) but **nourishment** in addition suggests, as *nutriment* does not, the nourishing effect produced (Professor Perry's conclusion: "The chief source of spiritual *nourishment* for any nation, must be its own past, perpetually rediscovered and renewed"—*Time*) (lacking the *nourishment* which enthusiasm or imagination can give, their writing is unlikely to be either robust or vivid—*Gloag*) **Sustenance** stresses the supporting and maintaining rather than the upbuilding aspect of nutriment (the blossoms of Beaumont and Fletcher's imagination draw no *sustenance* from the soil, but are cut and slightly withered flowers stuck into sand—*T. S. Eliot*) **Pap** is found chiefly in contemptuous or ironical use and applies in its extended sense to nourishment that is as slight, as diluted, and as innocuous as soft bland food for an infant or invalid (college courses that are mere intellectual *pap*) (a preacher whose sermons are nothing more than *pap*)

fool, idiot, imbecile, moron, simpleton, natural are often used popularly and interchangeably of one regarded as lacking sense or good judgment but each can be more precisely applied to someone mentally deficient in a given degree. **Fool**, the most general, can apply to anyone mentally deranged as well as mentally deficient, implying lack or loss of reason or intelligence; it may be used as an extremely offensive term of contempt (*fools* rush in where angels fear to tread—*Pope*) (he was a *fool* and liable, as such, under the stress of bodily or mental disturbance, to spasmodic fits of abject fright which he mistook for religion—*Norman Douglas*) (I was a *fool*, if you like, and certainly I was going to do a foolish, overbold act—*Stevenson*) (act like a *fool*) **Idiot, imbecile, and moron** are technical designations for one mentally deficient. An **idiot** is incapable of connected speech or of avoiding the common dangers of life and needs constant attendance. An **imbecile** is incapable of earning a living but can be educated to attend to simple wants or avoid most ordinary dangers. A **moron** can learn a simple trade but requires constant supervision in his work or recreation. In more general and nontechnical use *idiot* implies utter feeble-mindedness, *imbecile* implies half-wittedness, and *moron* implies general stupidity (comes like an *idiot*, babbling and strewing flowers—*Millay*) (actually there never is a status quo, except in the minds of political *imbeciles*—*Henry Miller*) (even *morons* get college degrees—*Warfel*) All three, however, may imply no more than often mild derogation or disapprobation of a person or his conduct (got a little high at the reunion and made a complete *idiot* of himself) (how could he have been such a careless *imbecile* as to mislay his manuscript?—*Mackenzie*) (the telephone call was a fake . . . and Peeps climbed up into the guard

chair, mumbling about the brains of certain *morons*—*Boys' Life* > **Simpleton**, a term of indulgent contempt, implies silliness or lack of sophistication (a sweet-natured *simpleton* who wrote lovely songs for children—*Damon*) (in spite of her experience of his lying, she had never suspected that that particular statement was a lie. What a *simpleton* she was!—*Bennett*) **Natural**, which persists chiefly in historical context, may designate any congenitally feebleminded person (the man is not a *natural*; he has a very quick sense, though very slow understanding—*Steele*) (with the vacant grin of a *natural*—*Charles Gibbon*)

foolhardy daring, daredevil, rash, reckless, *adventurous, venturesome

Con *intelligent, clever, quick-witted, bright, smart

2 **Foolish, silly, absurd, preposterous**, as applied to a person, his acts, behavior, and utterances, mean ridiculous because not exhibiting good sense. Something is **foolish** which does not commend itself to the judgment of others as wise or sensible or judicious (a *foolish* investment) (courageous behavior is easier for a man who fails to apprehend dangers, but such courage may often be *foolish*—*Russell*) (only a *foolish* optimist can deny the dark realities of the moment—*Roosevelt*) Something is **silly** which seems witless, pointless, or futile (a *silly* dispute) (a *silly* sacrifice) (how *silly* an ardent and unsuccessful wooer can be, especially if he's getting on in years—*Hammett*) Something is **absurd** which is inconsistent with accepted ideas, common sense, or sound reason; the word is applied, therefore, to ideas and projects considered impersonally as well as to persons and their acts (the *absurd* . . . dogma that the king can do no wrong—*Shaw*) (the *absurd* predicament of seeming to argue that virtue is highly desirable but intensely unpleasant—*Lippmann*) Something is **preposterous** which is glaringly absurd (if a man cannot see a church, it is *preposterous* to take his opinion about its altarpiece or painted window—*T. H. Huxley*) or sometimes merely highly unsuitable or ridiculously out of keeping (as with a particular character or situation) (he put on his *preposterous* old flowered cashmere dressing gown—*Deland*)

fop *n* **Fop, dandy, beau, coxcomb, exquisite, dude, buck** are comparable when denoting a man who is conspicuously fashionable or elegant in dress or manners. **Fop** is applied to a man who is preposterously concerned with fashionableness, elegance, and refinement not only in respect to dress and manners but in respect to such matters as literary or artistic taste (his tightened waist, his stiff stock . . . denoted the military *fop*—*Disraeli*) (I might have taken him for a *fop*, for he wore white lace at throat and wrists—*Kenneth Roberts*) (his love of good clothes and good living gave Bennett a reputation as a *fop*—*Time*) **Dandy** carries a weaker implication of affectation and overrefinement than *fop* and a stronger suggestion of concern for stylish or striking apparel and a spruce or dapper appearance (that he had the tastes of a *dandy*, we learn from a letter of the time describing his "smart white hat, kid gloves, brown frock coat, yellow

cashmere waistcoat, gray duck trousers, and blue silk handkerchief carelessly secured in front by a silver pin"—*Walsh*) (this character, one of the most comical in Stendhal, should . . . figure very high, in the list of his *dandies*. He never smiles, never thinks, and belongs to the Jockey Club—*Girard*) **Beau** suggests as much attention to details of personal appearance as does *fop* (a *beau* is one who, with the nicest care, in parted locks divides his curling hair; one who with balm and cinnamon smells sweet—*Elton*) **Coxcomb**, like *fop*, is applicable to a beau as a term of contempt; it often stresses fatuousness and pretentiousness as much as or more than foppishness (of all the fools that pride can boast, a *coxcomb* claims distinction most—*Gay*) (the young *coxcombs* of the Life Guards—*Emerson*) **Exquisite** is a somewhat old-fashioned designation of a dandy who manifests the extreme delicacy and refinement of taste characteristic of a fop (the particular styles. . . he affected had their marked influence on the young *exquisites* of the Mayfair balls and Pall Mall club windows—*Wilde*) **Dude** applies chiefly to a man who makes himself conspicuously different in dress or manners from the ordinary man; it is therefore the rough man's term for the carefully dressed and groomed man, the quiet gentleman's term for the obvious dandy, or a Western American's term for an Easterner or a city-bred man (her father told her he would not allow her to marry a *dude*) (the boys jeer at every young man wearing a high hat and call him a *dude*) (they were all mountain-wise, range-broken men, picked . . . for diplomacy in handling *dudes*—*Scribner's Mag.*) (the *dudes* ogled the ladies, stroking their mustaches, adjusting their ties and scooting their shoe toes up their calves to restore the shine—*Berrigan*) **Buck** applies usually to a dashing fellow, a dandy in dress, but not conspicuously, or necessarily, a gentleman in manners (the dashing young *buck*, driving his own equipage—*Irving*) (I remember you a *buck* of *bucks* when that coat first came out to Calcutta—*Thackeray*)

Ant vindictiveness: anger

forbearing, tolerant, clement, merciful, lenient, indulgent mean disinclined by nature, disposition, or circumstances to be severe or rigorous. The same differences in implications and connotations are observable in their corresponding nouns **forbearance, tolerance, clemency, mercifulness, leniency, indulgence** and adverbs **forbearingly, tolerantly, clemently, mercifully, leniently, indulgently**. **Forbearing, forbearance, and forbearingly** imply patience under provocation and deliberate abstention from judging harshly, exacting punishment, or seeking vengeance or revenge (Madame Beck was . . . *forbearing* with all the world—*Bronië*) (he thought of old days: of his father's *forbearance*, his own wilfulness—*Meredith*) (spoke *forbearingly* of the lack of facilities that handicapped his work) **Tolerant, tolerance, and tolerantly** imply both

a freedom from bias or bigotry and a liberal attitude to opinions, especially to religious, philosophical, and political doctrines, other than one's own that keep one from severity or rigor in judging others who hold such opinions or doctrines or from wanting to impose restrictions upon their freedom to think as they will [Anatole] France, as usual, professed a very *tolerant* attitude. One must gratify whatever tastes one has and seek whatever happiness one may be able to find—*Krutch* <of all kinds of human energy, art is surely the most free, the least parochial; and demands of us an essential *tolerance* of all its forms—*Galsworthy*> **Clement, clemency** (see also *MERCY*), and **clemently** suggest a temperament or nature that is mild and gentle, especially in judging offenders, and is slow to exact their punishment if a pardon or forgiveness will satisfy the purpose <a *clement* ruler> <a judge known far and wide for his *clemency*> <he was *clement* whenever he could be clement with safety, and he began to pardon the proscribed—*Buchan*> **Merciful, mercifulness, and mercifully** imply both compassionate and forbearing treatment, especially of those who have offended or of those who merit severity or are defenseless against it <good my lord, be good to me; your honor is accounted a *merciful* man—*Shak.*> <like a perfect nightmare, it was *mercifully* short—*W. J. Locke*> **Lenient** (see also *SOFT*), **leniency, and leniently** differ from *clement* in suggesting usually softness rather than gentleness of temper, and a relaxation of discipline or rigor <a too *lenient* parent> <I would ask you, dearest, to be . . . very *lenient* on his faults when he is not by—*Dickens*> <she could not show the slightest *leniency* towards the romantic impulses of her elder daughter—*Bennett*> <no matter how *leniently* you may try to put it, in the end we have . . . a struggle between men—*Wister*> **Indulgent, indulgence, and indulgently** usually imply compliancy as well as leniency; they imply, even more strongly than *lenient, leniency, and leniently*, concessions made out of charity or the exercise of clemency in the treatment of those who offend or who are under one's government or control <that one congenial friend . . . more *indulgent* of his shortcomings, and, in all respects, closer and kinder than a brother—*Hawthorne*> <*indulgently* dismisses them as basically nice boys—*P. D. Whitney*> <before her children reached school age. . . her treatment alternated spasmodically between excessive *indulgence* and petulant severity—*Gorer*>

Ana gentle, mild (see *SOFT*): patient, long-suffering, longanimous (see corresponding nouns at *PATIENCE*)

Ant unrelenting —*Con* implacable, merciless, relentless, *grim: *impatient, nervous, restive

forbearingly tolerantly, clemently, mercifully, leniently, indulgently (see under *FORBEARING*)

forbid, prohibit, enjoin, interdict, inhibit, ban are comparable when meaning to debar a person from using, doing, or entering or to order something not be used, done, or entered. **Forbid** is the more direct and familiar, **prohibit**, the more formal or official; they do not widely differ in their essential implications, for they both imply the exercise of authority or the existence of conditions which prevent with similar imperativeness. However, *forbid* carries so strong a connotation of expected obedience that it is preferred when the order is that of one in authority (as a parent, a master, an employer, or a physician) <*forbid* a child to leave the house> <smoking is *forbidden* on these premises> <suffer the little children to come unto me, and *forbid* them not—*Mk* 10:14> <the whole attraction of such knowledge consists in the fact that it is *forbidden*—*Russell*> When circumstances absolutely debar, *forbid* is also preferred <his health *forbade* the use of tobacco>

Prohibit has been used for so long in reference to laws, statutes, and regulations that it tends to connote a less despotic exercise of authority and to suggest restraints imposed for the good of all or for the sake of orderly procedure <*prohibit* the manufacture and sale of intoxicating liquors> <the powers not delegated to the United States by the Constitution, nor *prohibited* by it to the States—*U. S. Constitution*> <the act was wrong in the sense that it was *prohibited* by law—*Cardozo*> **Enjoin** (see also *COMMAND*) is a legal term implying a judicial order forbidding a particular action <by the decision of the Court the defendant should be *enjoined* from publishing news obtained from the Associated Press for — [a certain number of] hours after publication by the plaintiff—*Justice Holmes*> **Interdict** implies prohibition by authority, usually civil or ecclesiastical authority, typically for a given time and for a salutary purpose (as the maintenance of neutrality or the prevention of the spread of disease) or as an exemplary punishment <*interdict* trade with belligerents> <*interdict* the administration of the sacraments in a rebellious diocese> <Sunday . . . until two o'clock, was a solemn interval, during which all the usual books and plays were *interdicted*—*Mary Austin*> **Inhibit** implies the imposition of restraints or restrictions that amount to prohibitions, not only by authority but also by the exigencies of the time or situation (a clause was . . . inserted which *inhibited* the Bank from advancing money to the Crown without authority from Parliament—*Macaulay*) <the peril that besets a highly gifted poetic nature, when at bad moments thought *inhibits* imagination—*Loves*> In psychological use *inhibit* suggests the restraints imposed by inner psychological impediments and conflicts or by the interaction of human will with cultural and social factors of the environment which cause one to suppress certain thoughts or desires before they can find full expression <*inhibited* from bold speculation by his personal loyalties and interests—*Parrington*> <he is *inhibited*, he *inhibits* himself, even from seeking on his own account that vital experience which is the stuff of the creative life—*Brooks*> **Ban** carries an implication of legal or social pressure as the source of prohibition and with it a strong connotation of condemnation or disapproval <*ban* all obscene magazines> <*ban* profane language> <categories of persons *banned* from Federal employment—*Ginzburg*> <more and more landlords were *banning* tenants with children—*Wecter*>

Ant permit: bid —*Con* *let, allow, suffer: *authorize, license: *approve, sanction, endorse: order, *command, enjoin

force *n* 1 *power, energy, strength, might, puissance **Ana** *stress, strain, pressure, tension: *speed, velocity, momentum, impetus, headway

2 **Force, violence, compulsion, coercion, duress, constraint, restraint** denote the exercise or the exertion of power in order to impose one's will on a person or to have one's will with a thing. *Force* and *violence* ordinarily apply to physical powers used upon either persons or things; *compulsion, coercion, duress, constraint, restraint* apply to either physical or moral power used upon personal agents except in certain figurative uses—*compulsion, coercion, and duress* usually implying exercise of such power upon others than oneself, *constraint* or *restraint* upon oneself or others. **Force** (see also *POWER* 1) applies to an exercise of physical strength or of power comparable to physical strength by means of which an agent imposes his will upon another against that person's will or causes a thing to move as desired in spite of its resistance <rude fishermen . . .

by *force* took Dromio—*Shak.*) <to work in close design, by fraud or guile, what *force* effected not—*Milton*) <move a huge boulder by main *force*) <the skeptical criticism that “justice” is merely another name for *force*—*Dickinson*) <*force* used by attendants in an asylum . . . *force* used by the police when they control a crowd . . . *force* used in war—*Huxley*) *Violence* is often used in place of *force*, then commonly implying a greater display of power or fury and often connoting the infliction of injury or cruelty <they will by *violence* tear him from your palace—*Shak.*) <the rest of the party kept off the crowd by mingled persuasion and *violence*—*Shaw*) *Violence* often implies a violation of another’s legal rights or property, or it may imply a corruption or abuse of someone or something entitled to respect, observance, or security (a burglar in entering a house by forcing a door enters it by *violence*) <do *violence* to no man—*Lk* 3:14) <all these many and varied powers had been acquired without doing *violence* to republican sentiment—*Buchan*) <the phrase “every common carrier engaged in trade or commerce” may be construed to mean “while engaged in trade or commerce” without *violence* to the habits of English speech—*Justice Holmes*) *Compulsion* and, still more, *coercion* imply the application of physical force or of moral pressure or the exercise of one’s authority in order to control the action of a voluntary agent and to make him obedient to one’s will <I would give no man a reason upon *compulsion*—*Shak.*) <*coercion* by threat or intimidation) <masterpieces I read under *compulsion* without the faintest interest—*Russell*) <solutions forced upon a most practical mind by the stern *compulsion* of facts—*Buchan*) <in the submissive way of one long accustomed to obey under *coercion*—*Dickens*) <some form of *coercion*, overt or covert, which encroaches upon the natural freedom of individuals—*Dewey*) *Duress* implies compulsion to do or forbear some act by means that are illegal (as by imprisonment or threats to imprison or by violence) <a person is not guilty of *duress* when he does or threatens to do something he has a legal right to do—*Fisk & Snapp*) It may also imply compulsion or coercion through fear of a penalty that will or may be exacted <a false declaration of love by the heroine under *duress*—*Dyneley Hussey*) <we must eliminate the condition of economic *duress* under which so many human beings are unjustly forced to live—*Ashley Montagu*) *Constraint* and *restraint* may imply the exercise of physical or moral power either by an active agent or by the force of circumstances; *constraint* sometimes implies an urging or driving to action but more frequently implies its forcible restriction or confinement, whereas *restraint* suggests its actual hindrance or curbing <the . . . lion . . . roared with sharp *constraint* of hunger—*Shak.*) <prose is memorable speech set down without the *constraint* of meter—*Quiller-Couch*) <absolute liberty is absence of *restraint*; responsibility is *restraint*; therefore, the ideally free individual is responsible only to himself—*Henry Adams*) <the emotion . . . was the deeper and the sweeter for the *restraint* that he had put upon himself—*Archibald Marshall*)

Ana intensity, vehemence, fierceness (see corresponding adjectives at INTENSE): *effort, exertion, pains, trouble

force *vb* **Force, compel, coerce, constrain, oblige** are comparable when meaning to make a person or thing yield to the will of a person or to the strength or power of a thing. **Force**, the ordinary and most general word in this group, implies the exertion of strength, typically physical strength, or the working of something (as circumstances or logical necessity) analogous in moving power or effectiveness to such strength <*force* slaves to labor> <*force* food upon

a child> <he said hunger *forced* him to steal the food> <his conscience *forced* him into repaying what he had stolen> <*force* himself to smile> <the man could not be *forced* from the position he had taken> Sometimes the term takes a simple object, naming the person forced or the thing brought about by force; in such cases the verb often carries additional implications acquired from its idiomatic use in a particular phrase; thus, to *force* a woman is to rape her; to *force* a door is to break it open; to *force* laughter or a smile or tears is to make oneself laugh or smile or cry against one’s will; to *force* bulbs is to hasten their development by artificial means <*forced* language> <a *forced* style> **Compel** differs from *force* chiefly in typically requiring a personal object; any other type of object such as a reaction or response is possible only in extended or poetic language when the specific connotations of *compel* (as the exertion of irresistible power or force or a victory over resistance) are to be carried by the verb <she always *compels* admiration> <an argument that *compels* assent> or a concrete thing <such a breeze *compelled* thy canvas—*Tennyson*) **Compel** commonly implies the exercise of authority, the exertion of great effort or driving force, or the impossibility for one reason or another of doing anything else <[they] submit because they are *compelled*; but they would resist, and finally resist effectively, if they were not cowards—*Shaw*) <we see nothing in the Constitution that *compels* the Government to sit by while a food supply is cut off and the protectors of our forest and our crops are destroyed—*Justice Holmes*) <there is no possible method of *compelling* a child to feel sympathy or affection—*Russell*) <the westerling sun at length *compelled* me to quit the wood—*Hudson*) **Coerce** suggests more severity in the methods employed than *compel* does; commonly it connotes the exertion of violence or duress or the use of threats or intimidation <there are more ways of *coercing* a man than by pointing a gun at his head—*Inge*) <Charles the First signed his own death warrant when he undertook to *coerce* that stubborn will [of Londoners]—*Replier*) **Constrain** stresses more than does *compel*, its closest synonym, the force exerted by what presses or binds; it usually suggests the influence of restrictions, self-imposed or placed upon one by force, by nature, by necessity, or by circumstances, that compel one to do a stated or implied thing, live a stated or implied way, or think certain thoughts <I describe everything exactly as it took place, *constraining* my mind not to wander from the task—*Dickens*) <causes which he loathed in his heart but which he was *constrained* to consider just—*Brooks*) <tied him to the wall, where he was *constrained* to stay till a kind passerby released him—*Galsworthy*) **Oblige** usually implies the constraint of necessity, sometimes physical necessity <a sharp pain *obliged* him to close his eyelids quickly—*Hardy*) but equally often moral or intellectual necessity <he is *obliged*, in conscience, to undo the harm he has done to a man’s good name> <even the so-called laws of nature are only instruments to be used . . . we are not *obliged* to believe them—*Inge*) The term also is used with reference to a person or thing which is regarded as authoritative or as having the right to determine one’s course or acts <the discipline of their great School . . . *obliges* them to bring up a weekly essay to their tutor—*Quiller-Couch*) <the convention which *obliged* a satirist to be scathing—*Inge*) <she is *obliged* to learn by heart a multitude of songs—*Hearn*)

Ana impel, drive, *move: *command, order, enjoin: exact, *demand, require

forced, labored, strained, farfetched are comparable when

they mean produced or kept up through effort and, therefore, neither natural nor easy nor spontaneous. **Forced** is the widest in range of application of any of these terms, being referred not only to what is brought about by compulsion (works of a kind which had normally been performed in antiquity by the *forced* labor of slaves—*Farrington*) or to what is accomplished by exerting force beyond the usual limit (a *forced* march) (many women talk excitedly at a *forced* pitch for long periods and finish a conversation almost exhausted—*Hewitt*) but also to what seems artificial because not natural, logical, or spontaneous or because constrained or affected (his . . . resolute rejection of *forced* and fantastic interpretation of Holy Scripture—*Fosbroke*) (the old man was grinning. It was a little *forced* and a little painful, but it was a grin—*Irwin Shaw*) **Labored** carries a stronger connotation of heaviness or of ponderousness or, sometimes, of tediousness as a result of great effort (a *labored* style) (suggests that the woman loves the man because he alone can give her the baby that fulfills her femininity . . . These explanations are ingenious, if *labored*—*La Barre*) (uncomfortably aware of his men behind him; of their cushioned footsteps and *labored* breathing—*Hervey*) **Strained** adds to these an implication of tenseness or of a result that is unnaturally or distortedly labored (*strained* attention) (a *strained* comparison) (in the style of each there is at times evidence of *strained* composition, a lack of verbal ease or elegance—*Arnold Chapman*) (a *strained* air of reasonableness prevails, with a good deal of nervous anxiety showing through on both sides—*Bendiner*) (three patients were sitting, with *strained* expectant eyes—*Glasgow*) **Farfetched** applies especially to an expression, an idea, an argument, or an explanation which has been carefully sought out so that it seems unduly strained and not quite naturally used (his ideas were always *farfetched*) (a *farfetched* comparison) (these methods of interpretation . . . seem gratuitously *farfetched*, fantastic—*Edmund Wilson*)

forerunner, precursor, harbinger, herald are comparable

when they denote someone or something that comes before another person or thing and in some way indicates his or its future appearance. **Forerunner** may denote a messenger that goes before a personage (as a king, prince, or lord) to warn others of his approach (there is a *forerunner* come from . . . the Prince of Morocco, who brings word the prince his master will be here tonight—*Shak.*)

(there should also be one or more *forerunners* to visit each town before the company arrives, to speak . . . upon the plays—*Masefield*) but more often the term is applicable to something that serves as a sign, presage, or warning of something to follow (a coma is often the *forerunner* of death) (a black sky and a sudden squall are the usual *forerunners* of a thunderstorm) (the increase is a *forerunner* to a general rise in interest rates—*New Republic*)

Precursor commonly carries an implication of making ready or of paving the way for the success or accomplishments of another person or thing rather than, as *forerunner*, one of serving as an announcement or prediction of what is to come (the medieval sects which Dr. Rufus Jones describes as *precursors* of Quakerism—*Inge*) (Kepler, more than any man, was the *precursor* of Newton—*Ellis*) (a long period of [chemical analysis] . . . was an essential *precursor* of the present period of synthesis which has been so fruitful of good to mankind—*Morrison*)

Harbinger occurs chiefly in an extended sense, sometimes applying to a person or thing that announces something which is coming and for which one must be prepared (make all our trumpets speak; give them all breath, those clamorous *harbingers* of blood and death—*Shak.*) (the sinister white owl . . . the *harbinger* of destruction—*Moorehead*) and sometimes applying to one which goes before as a pioneer or initiator (the great legal *harbinger* of the New Deal revolution—*Time*) (the *harbingers* of peace to a hitherto distracted . . . people—*Livingstone*)

Herald basically denotes an official who makes a solemn and stately proclamation or announcement (as of war or peace or the birth of an heir to the throne); in extended use it is applied to something which similarly announces or proclaims (it was the lark, the *herald* of the morn—*Shak.*) (revolutions . . . were the *heralds* of social changes—*R. W. Livingstone*)

Ana anticipator (see corresponding verb at PREVENT): announcer or announcement, advertiser or advertisement (see corresponding verbs at DECLARE): portent, prognostic, omen, *foretoken, presage, augury: forewarning, warning (see WARN)

foresee, foreknow, divine, apprehend, anticipate can mean to know or expect that something will happen or come into existence in advance of its occurrence or advent or to have knowledge that something exists before it is manifested or expressed. **Foresee** apart from its context gives no hint of how this knowledge is derived, whether through presentiment, inspiration, imagination, or one's ability to draw inferences (it's certainly unwise to admit any

sort of responsibility for our actions, whose consequences we are never able to *foresee*—*Conrad*) <nobody can *foresee* how the necessary restriction of the population will be effected—*Shaw*> <the kindly-earnest, brave, *foreseeing* man—*J. R. Lowell*> **Foreknow** usually implies supernatural powers or the assistance of supernatural powers (as through revelation) <if thou art privy to thy country's fate, which, happily, *foreknowing* may avoid, O, speak—*Shak.*> <they themselves decreed their own revolt, not I [God]. If I *foreknew*, foreknowledge had no influence on their fault—*Milton*> <he cannot, however, *foreknow* how his opponent . . . will behave in action—*Toynbee*> **Divine** is not always clearly distinguishable from *foresee*, but it often suggests a gift or a special power or sometimes unusual sagacity or discernment <to Rima has been given this quickness of mind and power to *divine* distant things—*Hudson*> <in all the years of his traveling to and fro through Europe he *divined* hardly one of the social tendencies that had so spectacular a denouement within four years of his death—*Brooks*> **Apprehend** conveys less of a sense of the certainty of what is foreseen than any of the preceding words, but it carries a far stronger implication of the emotional effects of advance knowledge. In general, where one *apprehends* an evil, one is filled with fear, anxiety, or dread <they agree with me in *apprehending* that this false step in one daughter will be injurious to the fortunes of all the others—*Austen*> <almost every evening he saw Lucy. The inexperienced little wife *apprehended* no harm in his visits—*Meredith*> <his lips quivered, and she *apprehended* rather than heard what he said—*Glasgow*> **Anticipate** is a more complex term than any of its synonyms. Thus a critic may *foresee* the verdict of posterity on a literary work, but he *anticipates* it only when he formulates a judgment which is either accepted by posterity or is pronounced by it as though the verdict were new. One may *foreknow* one's destiny or *apprehend* a danger, but one *anticipates* one's destiny or a danger only when, through the appropriate advance enjoyment or suffering, one also has a foretaste of that destiny or that danger. One may *divine* a friend's wish in advance of its expression, but one *anticipates* it only when one also gratifies it in advance of its expression <colleges and universities are expected to pay close attention to, and even *anticipate*, the many voices heard from outside the campus—*Hacker*> **Anticipate** is also used as an alternative to *expect* and, more distinctively, in the sense of to look forward to (something expected) with a foretaste of the pleasure or pain it promises <I must know what is in the minds of these people. I must *anticipate* revolt—*Steinbeck*> <pleasure not known beforehand is half wasted; to *anticipate* it is to double it—*Hardy*>

foretell, **predict**, **forecast**, **prophesy**, **prognosticate**, **augur**, **presage**, **portend**, **forebode** are comparable when meaning to tell something before it happens through special knowledge or occult power. *Foretell* and *predict* are frequently interchangeable, but *foretell* stresses the announcement of coming events and does not, apart from a context, indicate the nature of the agent's power or the source of his information (some sorcerer . . . had *foretold*, dying, that none of all our blood should know the shadow from the substance—*Tennyson*) <the marvelous exactness with which eclipses are *foretold*—*Darrow*> **Predict** commonly implies inference from facts or accepted laws of nature; it often connotes scientific accuracy in foretelling <Mr. Brooke's conclusions were as difficult to *predict* as the weather—*George Eliot*> <an astronomer *predicts* the return of a comet> <Gamow *predicted* that the explanation of the sun's heat, light, and energy would be found to lie in thermonuclear reactions—*Current Biog.*> **Forecast** may occasionally imply taking forethought of the future (as by anticipation, conjecture of possible eventualities, and provision for one's needs) <a prudent builder should *forecast* how long the stuff is like to last—*Swift*> More often it implies prediction, but it still retains the implication of anticipated eventualities <*forecast* the weather> <since hurricanes have been *forecast*, losses in life and property have dwindled> <when the votes began to be counted . . . the return of the Republicans was *forecast*—*Paxson*> **Prophecy** either connotes inspired or mystic knowledge or implies great assurance in prediction <ancestral voices *propheying* war—*Coleridge*> <wrinkled benchers often talked of him approvingly, and *prophesied* his rise—*Tennyson*> **Prognosticate** implies prediction based upon signs or symptoms <a skillful physician can *prognosticate* the course of most diseases> <for the last three hundred years the relation of Church to State has been constantly undergoing change . . . I am not concerned with *prognosticating* their future relations—*T. S. Eliot*> **Prognosticate** and the following words also are comparable in the related sense of to betoken or foreshow future events or conditions <everything seems to *prognosticate* a hard winter—*Cobbett*> **Augur** implies a divining or a foreshadowing of something pleasant or unpleasant often through interpretation of omens or signs <the morrow brought a very sober-looking morning . . . Catherine *augured* from it everything most favorable to her wishes—*Austen*> **Presage** and **portend** more often imply foreshowing than foretelling, though both senses are found. Both also typically suggest occult power or an ability to interpret signs and omens as a basis for prediction, but **presage** may be used of neutral or of favorable as well as unfavorable prognostications, whereas **portend** regularly suggests a threat of evil or disaster <lands he could measure, terms and tides *presage*—*Goldsmith*> <the yellow and vapory sunset . . . had *presaged* change—*Hardy*> <some great misfortune to *portend*, no enemy can match a friend—*Swift*> <his sign in the high heavens *portended* war—*Kipling*> **Forebode** implies unfavorable prognostication based especially upon premonitions, presentiments, or dreams <oppressed by a *foreboding* of evil>

foretold *n* Foretold, presage, prognostic, omen, augury, portent are comparable when meaning something (as an event, a phenomenon, or a condition) that serves as a sign of future happenings. **Foretold**, the general term, is applicable to anything observable which may be the basis of a prediction or forecast (the usual *foretold*s of a thunderstorm, intense sultriness, a heavily overcast sky, and suddenly arising winds) **Presage** is applied chiefly to indications which inspire such emotions as fear or hope, dread or longing, and confidence or despair and therefore give rise to presentiments rather than serve as a basis for prediction (three times, while crossing the ocean, he sees a lunar rainbow and each time he takes it as a *presage* of good fortune—*Brooks*) **Prognostic** applies to an advance indication or symptom from which a skilled person can infer what is coming; it is used in medicine of a symptom or sign useful to a physician in predicting the course or the termination of an illness (prognostics do not always prove prophecies, at least the wisest prophets make sure of the event first—*Walpole*) (prognostics are those circumstances on which a prognosis is based—*Flint*) **Omen** is applicable chiefly to an extraordinary event or circumstance which one feels, especially under the influence of superstition, to be a promise of something to come (nay I have had some omens: I got out of bed backwards too this morning, without premeditation; pretty good that too; but then I stumbled coming downstairs, and met a weasel; bad omens those: some bad, some good, our lives are checkered—*Congreve*) Consequently, an event of ill omen or of good omen is one that is felt to be a presage of ill or of good. **Augury** and *omen* are often interchangeable, but *augury* is applicable to ordinary as well as to phenomenal circumstances, and it usually suggests discernment rather than superstition in determining whether it presages good or evil (achievements that he regarded as *auguries* of a successful career for his son) (I had felt there was a mysterious meaning in that moment, and in that flight of dim-seen birds an *augury* of ill-omen for my life—*L. P. Smith*) **Portent** is applicable chiefly to prodigies or marvels (as an eclipse, a comet, or an earthquake) which are interpreted as forewarnings or supernatural intimations of evil to come (what plagues and what *portents*, what mutiny, what raging of the sea, shaking of earth, commotion in the winds—*Shak.*) (the interest in eclipses began in seeing them as *portents* that might be avoided—*Kroeber*)

Ana *beat, pound: produce, turn out (see BEAR): counterfeit, simulate (see ASSUME): *copy, imitate

forget overlook, ignore, disregard, *neglect, omit, slight

Ant remember —*Con* recollect, recall, bethink, mind (see REMEMBER)

forgetful, **oblivious**, **unmindful** are comparable when they mean losing or letting go from one's mind something once known or learned. **Forgetful** usually implies a propensity not to remember or a defective memory (bear with me, good boy, I am much *forgetful*—*Shak.*) (she is growing *forgetful*) Sometimes it implies a not keeping in mind something which should be remembered; it then connotes negligence or heedlessness rather than a poor memory (he should not be *forgetful* of his social obligations) (be not *forgetful* to entertain strangers—*Heb* 13:2) **Oblivious** stresses forgetfulness, but it rarely suggests a poor memory. Rather, it suggests a failure to remember, either because one has been robbed of remembrance by conditions beyond one's control (the accident made him for a few hours *oblivious* of all that weighed upon his mind) or because one has deliberately put something out of one's mind (a government *oblivious* of the rights of the governed) or because one has considered something too slight or trivial to note and remember it (a people so long unused to aggression as to be *oblivious* of its dangers) In some instances *oblivious* is employed without a clear connotation of forgetfulness, and in a sense close to *unconscious*, *unaware*, and *insensible* (walking along whistling, *oblivious* of the passing crowds) (those who hope to render themselves, through absorption in the mere habit and technique of writing poetry, *oblivious* to the harsh interruptions of reality—*Day Lewis*) (*oblivious* of the laws and conditions of trespass—*Meredith*) *Oblivious* also is sometimes used attributively and without a succeeding *of* or *to* in the sense of causing oblivion (she lay in deep, *oblivious* slumber—*Longfellow*) **Unmindful** is a close synonym of *forgetful* in the sense of not keeping in mind, but it may imply a deliberate consignment to oblivion as well as inattention, heedlessness, or negligence (a mother, solicitous of the health of every member of her family but *unmindful* of her own) (every person was willing to save himself, *unmindful* of others—*Goldsmith*) (for at her silver voice came death and life, *unmindful* each of their accustomed strife—*Shelley*) (totally *unmindful* of their mutual dependence—*Amer. Guide Series: Minn.*)

Ana remiss, *negligent, neglectful, lax, slack: heedless, thoughtless, *careless

Con conscious, *aware, cognizant, sensible, alive, awake: *thoughtful, considerate, attentive

forgive pardon, remit, *excuse, condone

Ana absolve, *exculpate, acquit, exonerate, vindicate

forgo, **forbear**, **abnegate**, **eschew**, **sacrifice** are comparable when they denote to deny oneself something for the sake of an end. One *forges* for the sake of policy, expediency, or the welfare of others something already enjoyed or indulged in, or within reach (he agreed . . . to *forgo* all remuneration until his apprenticeship was completed—*Brooks*) Often the word implies surrender or abandonment (in electing this peculiar freedom of its own, vers libre . . . has *forgone* the great harmonic, orchestral effects of the older verse—*Lowes*) One *forbears*, through motives of prudence, kindness, or charity, doing or saying something one wishes or is tempted to do or say. *Forbear* usually implies self-restraint (although . . . I do not get much help from general propositions in a case of this sort, I cannot *forbear* quoting what seems to me applicable here—*Justice Holmes*) One *abnegates* what is intrinsically good but not consistent with one's aims, principles, or limitations (to treat English poetry as though it had died with Tennyson . . . is to *abnegate* high hope for the sake of a barren convenience—*Quiller-Couch*) Often

abnegate implies renunciation or self-effacement, but this distinction is not as commonly maintained in the verb as in the derivative noun *abnegation* <communities dedicated to the living of a humble and self-*abnegating* life—*Mumford*> One *eschews* (see also ESCAPE 2) something tempting, sometimes on moral or aesthetic grounds but more often because abstention or self-restraint is necessary for the achievement of a more significant desire or end <to work within these strict limits, *eschewing* all the helps to illusion that modeling and shadow give, was doubtless an exercise of incomparable service to the artist—*Binyon*> <some of the millionaires *eschewed* palatial magnificence—*F. L. Allen*> One *sacrifices* something highly desirable or in itself of great value for the sake of a person, ideal, or end dearer to one than the thing or person involved; the term typically connotes renunciation and self-denial and a religious or ethical motive comparable to that of self-immolation <*sacrificed* a college education for the sake of supporting his mother> <*sacrificed* his life in defense of his country> <I do not mean that the well-to-do should . . . forgo educational opportunities which . . . are not open to all. To do that would be to *sacrifice* civilization to justice—*Russell*> <*sacrificed* their fortune in the world for theology's sake—*H. O. Taylor*>

Ana waive, *relinquish, surrender, abandon: renounce, resign, *abdicate

forlorn 1 lorn, lone, desolate, lonesome, lonely, *alone, solitary

Ana separated, parted, divorced, severed, sundered (see SEPARATE *vb*): forsaken, deserted, abandoned (see ABANDON *vb*): wretched, *miserable: depressed, weighed down, oppressed (see DEPRESS)

2 hopeless, *despondent, despairing, desperate

Ana pessimistic, *cynical: *futile, vain, fruitless

Con *elastic, resilient, buoyant, expansive, volatile: optimistic, *hopeful, roseate, rose-colored

forlornness hopelessness, despondency, despair, desperation (see under DESPONDENT)

Ana dejection, depression, gloom, melancholy, blues, dumps, *sadness

form *n* 1 **Form, figure, shape, conformation, configuration** are comparable when they denote the disposition or arrangement of content that gives a particular aspect or appearance to a thing as distinguished from the substance of which that thing is made. **Form** is not only the most widely applicable of these terms, but it is also the least definitely fixed in its meaning, largely because of its being assigned various denotations in philosophy and aesthetics and because of its frequent use in reference to literature, music, and thought, where more is involved than the disposition or arrangement of content as immediately perceived by the senses. In general, *form* more than any of the other words implies reference to internal structure and disposition of details as well as to boundary lines and suggests unity in the whole <the earth was without *form*, and void—*Gen* 1:2> <a sense of interdependence and interrelated unity that gave *form* to intellectual stirrings that had been previously inchoate—*Dewey*> <you might go in for building . . . you've got a feeling for *form*—*Mary Austin*> **Figure** applies usually to the form as determined by the lines which bound or enclose a thing <flowers have all exquisite *figures*—*Bacon*> The term also may often suggest the lines or sometimes the visible form characteristic of a kind or type <Christ painted under the *figure* of a lamb> <because of the darkness it was hard to say whether the person had the *figure* of a man or of a woman> or the lines which follow a more or less conventional pattern rather than represent something

actual <cut *figures* on the ice in skating> <decorate the border with *figures* of scrolls, circles, and crescents> <a rug design in geometrical *figures*> **Shape**, like *figure*, suggests reference to the boundary lines, but it carries a stronger implication of a mass or of a body than does *figure* and is therefore precisely applicable to something that is shown in its bulk rather than in its lines; thus, one draws the *figure* rather than the *shape* of a circle or a triangle, but one forms a mass of clay in the *shape* in preference to the *figure* of a ball or of a man <the color of his beard, the *shape* of his leg—*Shak.*> Often, *shape* applies to outlines that have been given to a mass (as by molding, carving, or pressure) <Brooke is a very good fellow, but pulpy; he will run into any mold, but he won't keep *shape*—*George Eliot*> <it is the business of the sensitive artist in life to accept his own nature as it is, not to try to force it into another *shape*—*Huxley*> **Form, figure, and shape** are also used in reference to the bodies of living creatures, especially of men and women. **Form** is perhaps the most shadowy of these terms; it is applied chiefly to persons or animals identified but not clearly seen or noted in detail <the reddleman watched his *form* as it diminished to a speck on the road—*Hardy*> <busy *forms* bent over intolerable tasks, whizzing wheels, dark gleaming machinery—*Benson*> **Figure** usually suggests closer vision than *form* and some perception of details but stresses lines, carriage, and posture <here and there a *figure* . . . leaned on the rail—*Conrad*> <they watched her white *figure* drifting along the edge of the grove—*Cather*> **Shape** differs little from *figure* except in its clearer suggestion of flesh and body <some human *shapes* appearing mysteriously, as if they had sprung up from the dark ground—*Conrad*> <and the shade under the ash trees became deserted, save by the tall dark figure of a man, and a woman's white *shape*—*Galsworthy*> **Conformation** stresses the structure of something as composed or fashioned of related or carefully adjusted parts or as constituting a harmonious whole; it carries only a slight suggestion of reference to the outer lines or shape <beef steers of excellent *conformation*> <the *conformation* of the vocal organs> **Configuration** emphasizes the disposition or arrangement of parts and the pattern that they form especially over an extent of space or territory <the *configuration* of the county is represented in this relief map> <the remarkable *configuration* of the Atlantic seabed—*T. H. Huxley*> <in every province there was a network of roads following the *configuration* of the country—*Buchan*>

Ana contour, *outline, profile, silhouette: *structure, anatomy, framework, skeleton: organism, *system, economy, scheme

2 **Form, formality, ceremony, ceremonial, rite, ritual, liturgy** mean an established or fixed method of procedure especially as enjoined by law, the customs of social intercourse, or the church. **Form** is the comprehensive term applicable to a recognized way of doing things in accordance with rule or prescription <observing the *forms* of polite society> <nothing could be worse *form* . . . than any display of temper in a public place—*Wharton*> <a transfer of property made in due *form*> <the occasional exercise of a beautiful *form* of worship—*Irving*> **Form** often implies show without substance or suggests an outward shell devoid of its life or spirit <for who would keep an ancient *form* through which the spirit breathes no more?—*Tennyson*> **Formality** applies to some more or less perfunctory or conventional procedure required by law, custom, or etiquette <there was now and then the *formality* of saying a lesson—*Lamb*> <Mr. Critchlow entered without any *formalities*, as usual—*Bennett*> The

term often implies endless detail or red tape (Outland was delayed by the *formalities* of securing his patent—*Cather*) **Ceremony** is more specific than *form* and implies certain outward acts, usually of an impressive or dignified character, associated with some religious, public, or state occasion or, collectively, with a church or a court (the marriage *ceremony*) (the *ceremonies* attending the coronation of a king) *Ceremony* also applies to the conventional usages of civility (the appurtenance of welcome is . . . *ceremony*—*Shak.*) (you need not stand on *ceremony*) (the beauty of an inherited courtesy of manners, of a thousand little *ceremonies* flowering out of the most ordinary relations and observances of life—*Binyon*) (after the death of a king, a solemn *ceremony* of purification was performed by a princess—*Frazer*) **Ceremonial** (compare CEREMONIAL *adj*) is occasionally used in place of *ceremony* in its concrete applications; more often it is a collective noun applied to an entire system of ceremonies prescribed by a court or a church (the gorgeous *ceremonial* of the Burgundian court—*Prescott*) The last three terms of this group refer primarily to religious ceremonies and only secondarily to the ceremonies or forms of civil life. A **rite** is the form prescribed by a church or other organization for conducting one of its ceremonies or, in the case of a church, for administering one of its sacraments, giving not only the words to be uttered but the acts to be performed (the marriage *rite* of the Church of England) (the *rite* for the ordination of priests) **Ritual** is, in effect, a collective noun applied either to all the rites that make up an elaborate religious service or to all the rites or all the ceremonies of a particular church, religion, or organization; it is, however, applicable to a rite when that represents the one form in use in the specific religion or body (the *ritual* of the Roman Catholic Church is traditionally in Latin) (sacrifices, dances, mimetic games, processions, plays, ordeals, and feasting may enter into the *ritual* of primitive religions) (the *ritual* of a lodge) Consequently, in extended use, *rite* and *ritual* both refer to the customary or established order of procedure for conducting not only a ceremony or a series of ceremonial acts, but all kinds of formalities or forms (Archer . . . went conscientiously through all the *rites* appertaining to a weekend at Highbank—*Wharton*) (he knew well enough how it would be at the Hondo; the black-shawled women sitting against the wall, the *ritual* of bereavement, impressive in its poverty—*Mary Austin*) **Liturgy** applies primarily to the Eucharistic service, especially that of the Orthodox and the Uniate churches (specifically called “Divine *Liturgy*” in many of these) and of the Roman Catholic Church (specifically called the “Mass” in the Latin Church). In the Anglican Communion *liturgy* applies to the Book of Common Prayer, the service book of that church. It is applied also to a strictly religious rite or ritual, but this is confusing because *rite* and *ritual* stress the form to be followed and *liturgy* the complete service as followed in a particular church; thus, the Roman *rite* is now generally followed in the *liturgy* of that branch of the Roman Catholic Church called the Latin Church (he insisted on . . . the maintenance of full ritual in the *liturgy*—*Belloc*)

Ana proceeding, procedure, *process: practice, usage, custom, *habit: rule, regulation, precept, *law, canon: *method, mode: *decorum, propriety, etiquette

3 Form, usage, convention, convenience are comparable when they mean a fixed or accepted way of doing or sometimes of expressing something. **Form** can apply to a prescribed or approved way of behaving, method of procedure, or technique in any sphere of activity where correctness or uniformity of method or manner is thought

essential (the *forms* of good conduct) (the *forms* of worship) (good *form* in swimming) (a *form* of address) **Usage** implies the sanction of precedent or tradition and often designates a form preserved out of respect for a class, profession, or religion (descriptions of *usages* presuppose descriptions of uses, that is, ways or techniques of doing the thing, the more or less widely prevailing practice of doing which constitutes the *usage*—*Ryle*) (to bury in the first furrow certain fruits of a particular structure, such as figs, pomegranates, and locust beans, is a *usage* frequently observed—*Frazer*) **Convention** often replaces *form* especially in application to social behavior, where it stresses general agreement and therefore applies to some set way of doing or saying something that is sanctioned or believed to be sanctioned by general unquestioning acceptance (this music followed *conventions* perfectly understood by the contemporaries—*P. H. Lang*) (certain parliamentary *conventions* which exist to supplement the rules of procedure—*May*) (this genius who was too wild and elemental ever to conform to any aesthetic *convention*—*Ledig-Rowohl*) **Convenience** is a somewhat literary word applied to social conventions especially regarded as essential to propriety or decorum (disregarding the social *conveniences*, continued to chatter on—*Richard Hull*) (the *conveniences* of life—*Benson*)

former prior, previous, *preceding, antecedent, precedent, foregoing, anterior

Ant latter —*Con* following, succeeding, ensuing, supervening (see FOLLOW)

formless, unformed, shapeless are comparable when they mean having no definite or recognizable form. Something is **formless** which is so fluid or so shifting in its outlines, structure, or character that it does not assume, or is incapable of assuming, a fixed or determinate form (the rising world of waters . . . won from the void and *formless* infinite—*Milton*) (sprang from the billows of the *formless* flood—*Shelley*) (a *formless* fear) (the *formless* welter of his prose works—*Saintsbury*) Something is **unformed** which has existence but has not yet attained the form or character proper to it when it has reached the height of its possible growth or development (an *unformed* girl of twelve) (an *unformed* mind) (unformed genius) Often it suggests crudeness or callousness (very clever in some ways—and very *unformed*—childish almost—in others—*Ward*) (this *unformed* government is the “legitimate” one—*Gorrell*) Something is **shapeless** which lacks or has lost the clear-cut outline or contour that is regarded as proper to a thing or essential to its beauty (a *shapeless* old woman) (beat a silver dish into a *shapeless* mass) (conversation, which before had a beginning and an end, now grew *shapeless* and interminable—*Richard Hughes*)

fort, **fortress**, **citadel**, **stronghold**, **fastness** denote in common a structure or place offering resistance to a hostile force. A **fort** is an enclosed, fortified structure occupied by troops. A **fortress** is a large fort of strong construction intended for long-term occupancy (as on the border of a hostile country). A **citadel** is a fortification, usually on an eminence, that protects a city or keeps it in subjection. A **stronghold** is a strongly fortified place whose resistance to attack or siege affords protection to its occupants <here . . . a famous robber had his *stronghold*—*Ritchie*> A **fastness** is a place whose inaccessibility or remoteness makes for security. It may or may not be fortified <a strong and almost inaccessible *fastness*—*H. H. Wilson*>

These terms often have extended use. In such use a **fort** is something that by its very nature resists attack <oft breaking down the pales and *forts* of reason—*Shak.*> and a **fortress** is something that gives a feeling of security <my rock and *fortress* is the Lord—*John Wesley*> **Citadel** and **stronghold** are very similar in their extended uses, both being applied to a place where or, sometimes, to a class or group in which something prevails or persists in spite of attacks or encroachment <the very headquarters, the very *citadel* of smuggling, the Isle of Man—*Burke*> <the scientific world has been the very *citadel* of stupidity and cruelty—*Shaw*> <the South of Somersetshire, one of the *strongholds* . . . of the Anglo-Saxon dialect—*Jennings*> **Fastness** characteristically suggests impenetrability or inaccessibility <in the impregnable *fastness* of his great rich nature he [the Roman] defies us—*J. R. Lowell*>

forth forward, *onward

forthright *adj* 1 also *adv* **Forthright**, **downright** are comparable because they agree in their basic sense of moving or in the habit of moving straight to the mark. **Forthright** (see also STRAIGHTFORWARD) applies to whatever gets its effect by a straight thrust as if of a sword driven by the arm of one person into the breast of another; it therefore usually connotes dexterity, directness, straightforwardness, or a deadly effectiveness <reach the good man your hand, my girl: *forthright* from the shoulder, like a brave boxer—*Meredith*> <the home thrust of a *forthright* word—*J. R. Lowell*> <the practical, *forthright*, nonargumentative turn of his mind—*Farrar*> **Downright**, on the other hand, suggests a falling down or descending with the straightness and swiftness of one who leaps from a cliff or of a weapon that delivers a crushing blow. The word, therefore, usually implies crude force rather than dexterity, and concern for the effect produced rather than the point reached; often, in addition, when applied to persons or things it connotes plainness, bluntness, flat-footedness, or an out-and-out quality <he . . . shot to the black abyss, and plunged *downright*—*Pope*> <sculling against a swift current is work—*downright* work—*Jefferies*> <you seem a pretty . . . *downright* sort of a young woman—*Shaw*> <a baby. What a coarse, *downright* word for the little creature—*Rose Macaulay*> <this admirably *downright*, if not highly sophisticated, ukase has been cited in almost every trade-secrets case . . . since—*John Brooks*>

fortitude, **grit**, **backbone**, **pluck**, **guts**, **sand** denote a quality of character combining courage and staying power. **Fortitude** stresses strength of mind and firmness of purpose; it implies endurance, often prolonged endurance, of physical or mental hardships or suffering without giving way under the strain <the man's courage is loved by the woman, whose *fortitude* again is coveted by the man—*Coleridge*> <for years he led a life of unremitting physical toil and mental anxiety combined with miserable health—no small test of *fortitude*—*Buchan*> **Grit** also implies strength and firmness of mind, but it stresses an incapacity for being downed by difficulties or hardships and usually also suggests both a willingness to suffer the privation and pain necessary to the attainment of one's ends and the fortitude to bear them <it is *grit* that tells in the long run> <instances of men rising from the lower ranks of society into the most highly remunerated positions in the business world are sufficiently numerous to support the belief that brains and *grit* can always "make good"—*Hobson*> **Backbone** emphasizes resoluteness of character; it implies either the ability to stand up in the face of opposition for one's principles or one's chosen objectives, or determination and independence that require no support from without <in spite of all his gifts, he did not have the *backbone* necessary to a good statesman> <when mob hysteria prevails, then, if ever, *backbone* is needed in our legislators> <like conscience-stricken dogs they lost *backbone*, and visibly were in a condition to submit to anything—*Kenneth Roberts*> **Pluck** implies a willingness to fight or continue fighting against odds; thus, it is *pluck* that keeps a sick person at work; it is *pluck* that keeps soldiers from retreating in the face of disaster <the energy, fortitude, and dogged perseverance that we technically style *pluck*—*Lytton*> <decay of English spirit, decay of manly *pluck*—*Thackeray*> **Guts**, which is often considered expressive but not entirely polite and is therefore sometimes facetiously replaced by *intestinal fortitude*, stresses possession of the physical and mental vigor essential both to facing something which repels or frightens one and to putting up with the hardships it imposes <he hasn't the *guts* to be a successful surgeon> <they used men with *guts* for the East African missions> <what bothered him was not the superzealot attackers so much as the lack of plain old-fashioned *guts* on the part of the people who give in to them—*Davis*> **Sand** comes close to *grit* in its meaning, but since it often carries a suggestion of pluck or of the ability to fight against odds, it does not so strongly as *grit* connote triumph over difficulties <no more pride than a tramp, no more *sand* than a rabbit—*Mark Twain*>

2 **Found**, **establish**, **institute**, **organize** are comparable when meaning to set going or to bring into existence something (as a business, a colony, or an institution).

Found implies nothing more than a taking of the first steps or measures to bring into existence something that requires building up. Just what these steps and measures are vary in usage; thus, a person who provides the funds for a new educational institution may be said to have *founded* it, and those who first devised the project and won his support may also be said to have *founded* it, as may also those who took the next steps (such as the choice of a site, the erection of buildings on that site, and the selection of the staff) <*found* a parish in a new section of a city> <the Pilgrims in 1620 *founded* Plymouth Colony in what is now the state of Massachusetts> <a school of philosophy *founded* by Plato> **Establish** (see also *SET*) is often employed in the sense of *found*; however, it may imply not only the laying of the foundations but also a bringing into enduring existence; thus, Brook Farm was *founded* (not *established*, because its existence was short) by George Ripley and others as an experiment in communistic living; Vassar College was not *established* until some years after the date of its *founding* <the . . . Sisters of Loretto, who came to found the Academy of

Our Lady of Light. The school was now well *established* —*Cather*> **Institute** stresses an origination or an introduction; like *found*, it implies the taking of the first steps and like *establish*, the actual bringing into existence, but it differs from both words in its far wider range of application and in being referable to things (as a method, a study, or an investigation) which do not have a continuous life or a permanent existence <*institute* a new society> <*institute* a new method of accountancy> <*institute* an inquiry into an official's conduct of his office> **Organize** (see also *ORDER vb* 1) may imply founding, but it usually implies the taking of the steps whereby an organization (as a business, an institution, or a government) is set up so that it functions properly, with its departments clearly distinguished and governed by a responsible head and with a supervisory staff responsible for the working of the whole <Smith College was founded by Sophia Smith but was *organized* by its first president and board of trustees> <the company sent him to Germany to *organize* its new branch there>

fragile 1 **Fragile**, **frangible**, **brittle**, **crisp**, **short**, **friable** mean easily broken. They are, however, not often interchangeable. **Fragile** (see also *WEAK*) is applicable to whatever must be handled or treated carefully lest it be broken <a *fragile* antique chair> <a *fragile* dish> <a *fragile* flower> <I found the skeleton, or, at all events, the larger bones, rendered so *fragile* by the fierce heat they had been subjected to, that they fell to pieces when handled —*Hudson*> <this nation, molded in the heat of battle against tyranny . . . is not a *fragile* thing—*W. Frangible stresses susceptibility to being broken rather than positive weakness or delicacy of material or construction <*frangible* stone> <avoid using *frangible* materials in ship construction> <using the buttresses of intellect and imagination to shore up the trembling pillars of our *frangible* era—*Fadiman*> **Brittle** implies hardness plus frangibility because of the inflexibility of, or lack of elasticity in, the substance of which a thing is made; it also suggests susceptibility to quick snapping or fracture when subjected to pressure or strain <glass is especially *brittle*> <as a person ages, his bones grow more *brittle*> <*brittle* sticks of candy> The term is often extended to things that are dangerously lacking in elasticity or flexibility <he would take no risks with a thing so *brittle* as the Roman polity, on which depended the fate of forty-four

millions of men—*Buchan*) **Crisp** usually suggests a good quality which makes a thing firm and brittle yet delicate and easily broken or crushed, especially between the teeth (<*crisp toast*) (<*crisp lettuce*) In extended use it implies freshness, briskness, cleanness of cut, incisiveness, or other qualities that suggest the opposite of limpness, languor, or slackness (<a *crisp morning*) (<a *crisp style*) (<a *crisp answer*) (<a languorous work . . . with occasional interludes of *crisp* brilliance—*Anthony West*) **Short** implies a tendency to crumble or break readily and is applicable to several kinds of substance (<a *short biscuit* is rich in butter or other fat and is crisp and crumbly when eaten) (<*short mortar* is difficult to spread because of oversanding) (<*short timber* is desiccated wood) (<*short* (or hot-*short*) steel is brittle when heated beyond a certain point because of an excess of sulfur) **Friable** is applicable to substances that are easily crumbled or pulverized (<*friable soil*) (<*friable sandstone*) (<*friable blackboard chalk*) (<particles of shale, mica, or other *friable* and unsound minerals—*Bateman*)

fragrance, perfume, incense, redolence, bouquet are comparable when denoting a sweet or pleasant odor. **Fragrance** usually suggests the odor diffused by flowers or other growing things, though it is applicable to odors that merely suggest the presence of flowers (<*fragrance* after showers—*Milton*) (<flowers laugh before thee on their beds and *fragrance* in thy footing treads—*Wordsworth*) (<through the open doors . . . the soft wind . . . brought in the garden *fragrance*—*Stark Young*) (<a *fragrance* such as never clings to aught save happy living things—*Millay*) **Perfume** originally applied either to the pleasantly odorous smoke emitted by some burning things (as various spices, gums, or leaves) (three *April perfumes* in three hot *Junes* burned since first I saw you—*Shak.*) or to some natural or prepared substance which emits a pleasant odor. The latter sense predominates in current use, especially in reference to a preparation in liquid form, also called a *scent* (for full treatment of this term see SMELL), that contains the essence of fragrant flowers or is a synthetic concoction (<rose like a steam of rich distilled *perfumes*—*Milton*) (<a *perfume* redolent of the odor of violets) When applied to an odor rather than to a preparation, *perfume* differs little from *fragrance* except that it usually, when unqualified, suggests a heavier and more redolent odor, or at least a less delicate one (<the *perfume* of lilies had overcome the scent of books—*Galsworthy*) (<a gigantic rose tree which clambered over the house . . . filling the air with the *perfume* of its sweetness—*L. P. Smith*) **Incense** is usually used in place of *perfume* for the agreeably odorous smoke emitted by burning spices and gums (<the church was filled with the odor of *incense*) The term, from association with the use of incense in religious ceremonial, tends to apply to odors or things comparable to odors that are not only pleasant but grateful to the senses or that for some cause uplift or are mentally or spiritually exalting (<the breezy call of *incense-breathing* Morn—*Gray*) (<grateful the *incense* from the lime-tree flower—*Keats*) (<love wraps his wings on either side the heart . . . absorbing all the *incense* of sweet thoughts so that they pass not to the shrine of sound—*Tennyson*) (<this is that *incense* of the heart, whose

fragrance smells to heaven—*Cotton*) **Redolence** usually implies a mixture of fragrant, often pungently agreeable, odors (<*redolence* of a forest after a rain) (<the fascinating *redolence* and toughness of New Orleans' red-lighted Storyville, where jazz was born—*Time*) (<the *redolence* of a garden in spring) **Bouquet** applies especially to the distinctive fragrance of a good wine, which is perceptible when one inhales the delicate and agreeable odor (<lifting his glass to his lips, [he] voluptuously inhaled its *bouquet*—*Lytton*) but it may be extended to other delicate and distinctive odors (as of cooking food) that suggest the excellent savory character of the source of the odor (<the grateful smell of cooking pork grew every moment more perfect in *bouquet*—*Ethel Anderson*)

frank *adj* **Frank, candid, open, plain** are comparable when they mean showing in speech, looks, and manners the willingness to tell what one feels or thinks. **Frank** stresses lack of reserve or of reticence in the expression of one's thoughts or feelings; it therefore usually connotes freedom from such restraints as fear, shyness, inarticulateness, secretiveness, or tact (<this, to Anne, was a decided imperfection . . . she prized the *frank*, the openhearted, the eager character beyond all others—*Austen*) (<things were as she had suspected: she had been *frank* in her questions and Polly had been *frank* in her answers—*Joyce*) (<the child who has been treated wisely and kindly has a *frank* look in the eyes, and a fearless demeanor even with strangers—*Russell*) **Candid** is often used interchangeably with *frank*; it may distinctively imply a fundamental honesty and fairness that make evasion impossible and suggest a refusal to dodge an issue or to be governed by bias or fear (<I have tried to be as *candid* as possible, to follow out every thought as far as I could without caring where it would lead and without tempering any conclusions out of consideration to either my own sensibilities or those of any one else—*Krutch*) (<I am sure that he was *candid* with me. I am certain that he had no guile—*White*) **Open** implies both frankness and candor, but it often suggests more naturalness or artlessness than *frank* and less conscientiousness than *candid* (<Mr. Elliot was rational, discreet, polished, but he was not *open*. There was never any burst of feeling, any warmth of indignation or delight, at the evil or good of others—*Austen*) (<for the white man to put himself mentally on their level is not more impossible than for these aborigines to be perfectly *open*, as children are, towards the white—*Hudson*) **Plain** comes closer to *candid* than to *frank*, but it suggests outspokenness, downright-

ness, and freedom from affectation more than fairness of mind (I am no orator, as Brutus is; but, as you know me all, a plain blunt man—*Shak.*) (the difference between ordinary phraseology that makes its meaning plain and legal phraseology that makes its meaning certain—*Gowers*)

free *adj* **Free, independent, sovereign, autonomous, autarchic, autarkic** are comparable when they mean not subject to the rule or control of another. The same differences in implications and connotations are found in their corresponding nouns **freedom, independence, sovereignty, autonomy, autarchy, autarky** when they denote the state or condition of not being subject to external rule or control. **Free** and **freedom** (see also **FREEDOM** 2) stress the absence of external compulsion or determination and not the absence of restraint. For **free** as applied to a state, a people, a person, or the will implies self-government and therefore the right to determine one's own acts, one's own laws, and one's own restraints or to accept or reject those that are proposed from without (for liberty is to be **free** from restraint and violence from others, which cannot be where there is no law—*Locke*) (freedom makes man to choose what he likes; that is, makes him **free**—*Quiller-Couch*)

Independent and **independence** have for their fundamental implication lack of relatedness to anyone or anything else; therefore **independent** implies that the person or thing so described stands alone (words have a meaning **independent** of the pattern in which they are arranged—*Huxley*) When applied to a state or government, it implies not complete detachment from other states or governments and a refusal to have allies or dominions, but a lack of connection with a state or government that has the power to interfere with one's liberty of action (the Thirteen Colonies sacrificed their **independence**, but not their freedom, when they joined the federation that became the United States of America) When applied to a person or his acts and opinions, it implies either a disposition to stand alone and apart from others, or refusal to accept another's judgments, or self-reliance amounting almost to a fault; thus, a person who is **independent** in politics is attached

to no political party; one might wish that a person he is trying vainly to help were less **independent** (an economist should form an **independent** judgment on currency questions, but an ordinary mortal had better follow authority—*Russell*) **Sovereign** (see also **DOMINANT**) and **sovereignty** stress the absence of a superior power and imply the supremacy within its own domain or sphere of what is so described or so designated. As applied to a state or government, these words usually involve the ideas both of political independence and of the possession of original and undivided power (for many years before the Civil War it was debated whether the federal government was **sovereign**) (the powers of the general government, it has been said, are delegated by the States, who alone are truly **sovereign** . . . It would be difficult to sustain this proposition—*John Marshall*) (although it [the government of the United States] is **sovereign** and supreme in its appropriate sphere of action, yet it does not possess all the powers which usually belong to the **sovereignty** of a nation—*Taney*) When used in reference to a thing, both words impute to that thing unquestioned supremacy and imply that everything within its sphere of influence is subject to it (noble and most **sovereign** reason—*Shak.*) (the **sovereignty** of man lieth hid in knowledge; wherein many things are reserved that kings with their treasure cannot buy, nor with their force command—*Bacon*)

Autonomous and **autonomy** may imply independence combined with freedom. The terms are much used in philosophy to describe or designate a theoretical or ideal freedom in which the individual is absolutely self-governing and acknowledges no claim of another to interference or control (the question is often asked whether an **autonomous** state and an **autonomous** church can exist side by side) (if this preeminence and **autonomy** of the spiritual be not granted, it is misleading to use the word God at all—*Inge*) In political use the words seldom imply such absolute independence and freedom, for they are employed largely in reference to states which belong to an empire, a federation, or a commonwealth of nations. In reference to such states **autonomy** and **autonomous** commonly imply independence from the central power only in matters pertaining to self-government but recognition of the central governmental sovereignty in matters (as foreign policy) affecting the empire, federation, or commonwealth of nations as a whole. When a state is granted **autonomy** or become **autonomous**, the terms of such a grant are usually precisely stated (the Imperial Conference of 1926 defined the Dominions as "**autonomous** communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations"—*Statesman's Year-Book*) **Autarchic** and **autarchy** historically implied absolute sovereignty or absolute or autocratic rule, but they have become interchangeable with **autarkic** and **autarky**, and both pairs of words imply economic and especially national economic self-sufficiency; the words are used in reference to states or governments that favor isolation through a policy of rigidly and arbitrarily planned economic self-sufficiency as a means of maintaining their independence (the totalitarian countries . . . have created a self-encirclement by their abnormal economic policy, their costly and unnatural **autarky**—*Manchester Guardian*) (each community in Old China was cell-like, largely **autonomous** and **autarkic**—*Linebarger*) (the issue today is, therefore, whether a policy aimed at economic nationalism—self-sufficiency—**autarchy**—creates an environment favorable to the recon-

struction of a peaceful, tranquil, confident world—*Lewis Douglas*) <a network of more or less closed, *autarchic* economies, each trying to the best of its ability to exist on a self-sufficient basis—*Dean*)

Ana liberated, emancipated, delivered, freed, released, enfranchised (see *FREE vb*)

Ant bond —*Con* compelled, coerced, forced, constrained, obliged (see *FORCE vb*)

free vb Free, release, liberate, emancipate, manumit, deliver, discharge, enfranchise are comparable when meaning to set loose from whatever ties or binds or to make clear of whatever encumbers or holds back. Free is the ordinary general term interchangeable with many of the succeeding terms; it may be used not only in reference to persons that are in bondage or in a state of dependence or oppression or under restraint or constraint <*free* one's slaves> <*free* an oppressed people> <*free* a person from prison or from a charge> <*free* one from the necessity of speaking against a proposal> but also in reference to things that are confined, entangled, or encumbered and may therefore be unfastened, unloosed, disentangled, or disengaged <*free* a squirrel from a trap> <*free* her hair from a net> <flower scents, that only nighttime *frees*—*Lowell*> Release carries a stronger implication of loosing or of setting loose from confinement, restraint, or obligation <*release* a prisoner> <*release* a person from a promise> <*release* me from my bands with the help of your good hands—*Shak.*> <activities that *released* his stored-up energy> <death has *released* him from his sufferings> <only by indulging a deep impulse towards sermonizing could he *release* those other impulses which made him the great writer he was—*Sykes*> Liberate, a very close synonym of the preceding word, differs from them chiefly in carrying a stronger suggestion of resulting liberty. The term may therefore connote, as do the others, emergence from some more or less disagreeable bondage or restraint <*liberate* all slaves by a proclamation> or it may merely suggest a cutting of a tie, relationship, or connection without regard to the power of another thing or things to restrain or restrict, thereby approaching *separate*, *disengage*, or *detach* in meaning <oxygen is *liberated* when potassium chlorate is heated> <an electric current will decompose water, *liberating* hydrogen> <the poet draws life . . . from the community . . . to cut himself off from this source of life is much more likely to cripple than to *liberate* him—*Day Lewis*> <*liberate* a certain group of individuals . . . from shackles inherited from feudalism—*Dewey*> Emancipate basically means to free one person from subjection to another (as a child from subjection to his parent or a slave from subjection to his master) <little more hope than had the son of an Athenian slave to be *emancipated*—*Quiller-Couch*> but the term is more frequently found in an extended sense, implying a liberation of someone or something from what controls or dominates; it usually also suggests a freedom by which one's own judgment or conscience or intelligence decrees the course to be taken or the principles to be followed (if we can imagine the various County Councils of England *emancipated* from the control of Parliament and set free to make their own laws—*Dickinson*) <all the philanthropic and humanitarian movements to which the Quakers, now *emancipated* from the notion that all initiative in such matters is an attempt to force the hand of the Almighty, devoted themselves in the nineteenth century—*Inge*> Manumit differs from *emancipate* in its historical sense in always implying liberation from slavery or servitude; it is therefore sometimes preferred as the more definite term <*Darnall* . . . was the son of a white man by one of his slaves, and his father executed certain instruments to

manumit him—*Taney*> Deliver is comparatively rare as a close synonym of *free*. But in all of its many extended senses the idea of freeing is the basic, though not the strongest, implication. It is specifically a synonym of *rescue* (see *RESCUE*) when it implies release from peril, danger, or other evil <and lead us not into temptation, but *deliver* us from evil—*Mt* 6:13> It comes close to *transfer* or *convey* when it implies a disburdening of oneself of something which belongs to another or is intended for him <*deliver* a letter to the addressee> <*deliver* a package to the purchaser> or to *utter* or *pronounce* when it implies a relieving oneself of something one must say or is charged by oneself or another with saying <*deliver* a message over the telephone> <*deliver* a speech> The term may denote the disburdening of a woman of offspring at the time of its birth (the queen was safely *delivered* of a son and heir) or the freeing of all prisoners confined in a prison <*deliver* a jail> Discharge (see also *DISMISS 1*; *PERFORM*) implies the release of someone or something that is held in confinement or under restraint or within the bounds of a thing; it may suggest liberation <*discharge* a prisoner> <*discharge* a hospital patient> but often it implies an ejection <*discharge* a shot> <*discharge* an arrow> or an emission <*discharge* passengers from a train> <*discharge* a cargo> or a pouring forth through an outlet or vent <the smoke is *discharged* through a very large chimney> <the stream *discharges* its waters into the Hudson river> or a payment or settlement (as of an obligation) <*discharged* his debts> Often *discharge* differs from *release* in carrying a stronger connotation of force or violence <many creative writers have a critical activity which is not all *discharged* into their work—*T. S. Eliot*> <all his accumulated nervous agitation was *discharged* on Maud like a thunderbolt—*Bennett*> Enfranchise basically implies a freeing from subjection (the nobles desired . . . to *enfranchise* themselves . . . from the power of the king—*Belloc*) but in its commonest sense it specifically implies the removal of political disabilities and admission to full political rights as a freeman or as a citizen <slaves were emancipated by the proclamation of President Lincoln on January 1, 1863, but were not *enfranchised* until the fifteenth amendment went into effect in 1870>

Ant bondage —*Con* *servitude, slavery

2 **Freedom, liberty, license** are comparable when meaning the state or condition of one who can think, believe, or act as he wishes. **Freedom** (see also under *FREE adj*) is the term of widest application; in philosophy, for example, it often implies a state or condition in which there is not only total absence of restraint but release even from the compulsion of necessity; at the other extreme, in ordinary casual use, *freedom* merely implies the absence of any awareness of being restrained, repressed, or hampered; between these two extremes the term may imply the absence of a definite restraint or of compulsion from a particular power or agency <me this unchartered *freedom* tires—*Wordsworth*> <the *freedom* of the press> <he was not affected by her reserve, and talked to her with the same *freedom* as to anybody else—*Archibald Marshall*> <who would not say, with Huxley, "Let me be wound up every day like a watch, to go right fatally, and I ask no

better *freedom*"—James) **Liberty** is often used interchangeably with *freedom*, but it often carries one of two implications which are not so marked in the use of *freedom*. The first of these implications is the power to choose what one wishes to do, say, believe, or support as distinguished from the state of being uninhibited in doing or thinking (had the *liberty* to come and go as he pleased) (in totalitarian states there is no *liberty* of expression for writers and no *liberty* of choice for their readers—Huxley) (freedom in thought, the *liberty* to try and err, the right to be his own man—Mencken) The second of these implications is deliverance or release from restraint or compulsion (set a slave at *liberty*) (the prisoners were willing to fight for their *liberty*) (from bondage freed, at *liberty* to serve as you loved best—Baring) **License** often implies the liberty to disobey the rules or regulations imposed on the many, but not necessarily governing all, when a great advantage is to be gained by disobedience (poetic *license*) (sometimes, with truly medieval *license*, singing to the sacred music . . . songs from the street—Pater) (a general must be allowed considerable *license* in the field) (has little truck with those who have taken literary *license*—Homer) More often, however, the term implies an abuse of liberty in the sense of the power to do exactly what one pleases (license they mean when they cry Liberty—Milton) (many persons think that freedom of the press and liberty of free speech often degenerate into *license*) (Caesar's legions . . . were enjoying their victory in the *license* which is miscalled liberty—Froude)

friend, **acquaintance**, **intimate**, **confidant** are comparable when they designate a person, especially not related by blood, with whom one is on good and, usually, familiar terms. **Friend**, in its application, ranges from a person who is not hostile or is a well-wisher to a person whose society one seeks or accepts with pleasure because of liking, respect, or affection. **Acquaintance** is applied to a person with whom one is on speaking terms. However, when these words are used in contrast, both imply a degree of familiarity, *friend* distinctively connoting close bonds of love and affection and *acquaintance*, comparative infrequency of contact and less close personal interest (you understand that I am not their *friend*. I am only a holiday *acquaintance*—*Conrad*) (a companion loves some agreeable qualities which a man may possess, but a *friend* loves the man himself—*Boswell*) This distinction is not invariably observed, especially when *acquaintance* is used as a collective plural (he has a wide circle of *friends*; he has a large *acquaintance*) (he never speaks much, unless among his intimate *acquaintance*—*Austen*) **Intimate** adds to *friend* the implications of a depth of affection and a closeness of association that tend to preclude reserve (only his *intimates* were aware of his plans) **Confidant** usually designates that intimate who actually is entrusted with one's secrets or is admitted to confidential discussions.

Ant unfriendly: belligerent —*Con* hostile, antagonistic, antipathetic (see corresponding nouns at ENMITY)

friendship, **amity**, **comity**, **goodwill** are comparable when they denote the relation (or, in the first three instances, the alliance) existing between persons, communities, states, or peoples that are in accord and in sympathy with each other. **Friendship** is the strongest of these terms in its implications of sentiment in the relation and of closeness of attachment (the *friendship* between me and you I will not compare to a chain; for that the rains might rust, or the falling tree might break—*Penn*) Sometimes it suggests an alliance; at other times it excludes that suggestion (peace, commerce, and honest *friendship* with all nations—entangling alliances with none—*Jefferson*) (friendship, that exquisite sense of a mutual sympathy of heart and mind which occasionally arises between independent individuals—*Cecil*) **Amity** implies the absence of enmity or discord. Positively, it may imply nothing more than amicable relations (the colonists and the Indians seldom lived together in *amity*) or it may suggest reciprocal friendliness (on his arrival he found *amity* instead of enmity awaiting him. Father Vaillant had already endeared himself to the people—*Cather*) Often the term suggests benevolent understanding and mutual tolerance of potentially antagonistic aims or views (the *amity* that wisdom knits not, folly may easily untie—*Shak.*) (the less we have to do with the *amities* or enmities of Europe, the better—*Jefferson*) **Comity** has come to imply comradeship based either upon an interchange of courtesies or upon a similarity of interests and aims. The word often denotes a group bound together by friendship or by common interests but without implying loss of independence by members of the group or transference of sovereignty from the members to the group (outside the *comity* of the empire, beyond the border provinces and client-kingdoms, lay the unknown lands and the

strange peoples—*Buchan*) <a Europe which pretends to have founded its *comity* upon brotherhood—*La Barre*> **Goodwill** derives its chief implication of a benevolent attitude or of reciprocal good feeling largely from the Authorized Version's translation of the Angelic Hymn <glory to God in the highest, and on earth peace, *goodwill* toward men—*Lk* 2:14> The term is often used in international diplomacy to designate a reciprocal friendliness which constitutes an informal bond between nations and works to the advantage of all concerned <*goodwill* is the mightiest practical force in the universe—*Dole*> <to promote the exchange of intellectual ideas and *goodwill* between Belgium and America—*School and Society*> <be assured that none of us have anything but *goodwill* toward you personally—*Ellison*>

fright *vb* *frighten, scare, alarm, terrify, terrorize, startle, affray, affright

Ana see those at FRIGHTEN

frighten, **fright**, **scare**, **alarm**, **terrify**, **terrorize**, **startle**, **affray**, **affright** mean to strike or to fill with fear or dread.

Frighten is perhaps the most frequent in use; it is the most inclusive, for it may range in implication from a momentary reaction to a stimulus to a state of mind in which fear or dread prevails. Typically, however, it implies a more or less paralyzing fear affecting either the body or the will <the silence of the house . . . *frightened* Clara—*Anderson*> <in the world too *frightened* to be honest—*T. S. Eliot*>

Fright is an older and chiefly literary or dialect form of *frighten* <you have death perpetually before your eyes, only so far removed as to compose the mind without *frighting* it—*Gray*> In informal and conversational use **scare** is often equivalent to *frighten*; in more formal use it usually implies fear that causes one to run, shy, or tremble <sour visages, enough to *scare* ye—*Gray*> <a noise did *scare* me from the tomb—*Shak.*> <earth shakes beneath them, and heaven roars above; but nothing *scares* them from the course they love—*Cowper*> **Alarm** in the relevant sense (compare ALARM *n* 1) nearly always stresses apprehension or anxiety <they are *alarmed* for his safety> <the girl was . . . *alarmed* by the altogether unknown expression in the woman's face—*Conrad*>

Terrify emphasizes intensity of fear and agitation; it usually suggests a state of mind in which self-control or self-direction is impossible <they were *terrified* out of their wits> <the dread of failure *terrified* them> <something in his face and in his voice *terrified* her heart—*Hichens*>

Terrorize, in distinction from *terrify*, implies the effect of an intention and therefore is used in reference to voluntary agents; thus, one may say that gangs *terrorized* the neighborhood by their constant depredations and that the depredations of the gangs *terrified* the neighborhood. **Terrorize** often implies coercion or intimidation <*terrorize* a people into submission> <he delighted in *terrorizing* the guests by his bullying—*Burkholder*> **Startle** implies surprise and a sudden shock that causes one to jump or flinch; occasionally its suggestion of fright is very weak <one learns in parish work not to start, however much one may be *startled*—*Rose Macaulay*> <investigations of scientists . . . sprung on a public shocked and *startled* by the revelation that

facts which they were accustomed to revere were conspicuously at fault—*Galsworthy*> **Affray** and **affright** are uncommon in modern use, the former, as a rule, coming close to *terrify* and the latter, to *frighten*.

frown *vb* **Frown**, **scowl**, **glower**, **lower**, **gloom** are comparable when they mean to put on a dark or malignant countenance or aspect. **Frown** commonly implies a stern face and contracted brows that express displeasure, disapprobation, anger, or contempt <that Stonehenge circle of elderly disapproving faces—faces of the uncles, and schoolmasters and the tutors who *frowned* on my youth—*L. P. Smith*> **Scowl** carries an implication of wrinkled drawn-down brows that express ill humor, sullenness, or discontent <a spinner that would not rebel, nor mutter, nor *scowl*, nor strike for wages—*Emerson*> **Glower** implies a more direct stare or gaze than *frown* or *scowl* and carries a stronger connotation of anger, contempt, or defiance <the steward . . . *glowered* at Powell, that newcomer, that ignoramus, that stranger without right or privileges—*Conrad*> <he . . . stood *glowering* from a distance at her, as she sat bowed over the child—*D. H. Lawrence*> **Lower** implies a menacing darkness and sullenness of face or of aspect; the term is used in reference not only to persons but to skies that give promise of a storm <wandering from chamber to chamber . . . all distinguishable by the same *lowering*

gloom—*Beckford*) <up behind the Sangre de Cristo, gathered great thunderheads, *lowering* as they came, fringed threateningly with light—*Mary Austin*> **Gloom** ordinarily carries a much stronger implication of gloominess or dejection and a much weaker (often nonexistent) suggestion of threatening than does *lower* (they may be wise in not *gloom*ing over what is inevitable—*Cabell*) <Skiddaw [a mountain] *gloomed* solemnly overhead—*Dowden*>

Ant fruitful —**Con** *effective, effectual, efficacious, efficient: *fertile, fecund, prolific

frustrate, **thwart**, **foil**, **baffle**, **balk**, **circumvent**, **outwit** mean either to defeat a person attempting or hoping to achieve an end or satisfy a desire or, in some cases, to defeat another's desire. To **frustrate** is to make vain or ineffectual all efforts, however feeble or however vigorous, to fulfill one's intention or desire <whatever nature . . . purposes to herself, she never suffers any reason, design, or accident to *frustrate*—*Fielding*> <my good intentions towards you . . . are continually *frustrated*—*Cowper*> <nature . . . supports as well as *frustrates* our lofty aspirations—*Muller*> To **thwart** is to frustrate especially by crossing or running counter to someone or something making headway <others had thrust themselves into his life and *thwarted* his purposes—*George Eliot*> <public enforcement of hygienic practices is *thwarted* by a really obstructive neglect of the rules of health by her peasantry—*Hobson*> **Foil** commonly implies a blocking or turning aside that makes further effort difficult or destroys one's inclination to proceed further <his attempts to replace ambition by love had been as fully *foiled* as his ambition itself—*Hardy*> <intelligence as a means to *foil* brute force—*Hearn*> To **baffle** is to frustrate especially by confusing or puzzling; to **balk**, by interposing obstacles or hindrances (such knotty problems of

alleys, such enigmatical entries, and such sphinx's riddles of streets without thoroughfares as must, I conceive, *baffle* the audacity of porters and confound the intellects of hackney coachmen—*De Quincey*> <I like reading my Bible without being *baffled* by unmeaningness—*Arnold*> <when an affection as intense as that is *balked* in its direct path and repressed it usually, as we know, finds an indirect outlet—*Brooks*> (his inclination to dreams, *balked* by the persistent holding of his mind to definite things—*Anderson*) **Circumvent** implies frustration by stratagem; **outwit**, by craft or cunning <immigration laws had been growing more and more effective . . . But . . . the rejected aliens soon learned a method of *circumventing* them—*Heiser*> <the skill with which she [Elizabeth I] had hoodwinked and *outwitted* every statesman in Europe—*J. R. Green*>

full, **complete**, **plenary**, **replete** are not interchangeable with each other, but the last three are interchangeable with the most comprehensive term, *full*, in at least one of its senses. **Full** implies the presence or inclusion of everything that is wanted or required by something or that can be held, contained, or attained by it; thus, a *full* year numbers 365 days or, in leap years, 366 days; a *full* basket is one that can hold nothing more; a *full* mind is stocked to the point of overflowing with knowledge or ideas; a *full* moon has reached the height of its illumination by the sun; a *full* stomach is one that can contain no more food with comfort or is completely satisfied; a *full* meal is one lacking in none of the courses or sometimes in none of the elements to make a satisfying or balanced meal; a sponge *full* of water has absorbed all the water it can hold. **Complete** comes into comparison and close synonymy with *full* when the latter implies the entirety that is needed to the perfection, consummation, integrity, or realization of a thing; thus, a fire in which the fuel is quite consumed may be described as involving either *full* or *complete* combustion; a *complete* meal is the same as a *full* meal; a teacher should have *complete*, or *full*, control of his class (if you consider the ritual of the Church during the cycle of the year, you have the *complete* drama represented. The Mass is a small drama, having all the unities; but in the Church year you have represented the full drama of creation—*T. S. Eliot*) <the panorama of today's events is not an accurate or *complete* picture, for history will supply posterity with much evidence which is hidden from the eyes of contemporaries—*Eliot*> **Plenary** comes into comparison with *full* when *full* implies the absence of every qualification or even suggestion of qualification as to a thing's completeness. *Plenary*, however, heightens the force of *full* in this sense and carries a stronger sug-

gestion of absoluteness; thus, to give *plenary* powers is to give full power without the slightest qualification; a *plenary* indulgence implies the remission of the entire temporal punishment due for one's sins (by this word "miracle" I meant to suggest to you a something like *plenary* inspiration in these . . . men; an inspiration at once supernatural and so authoritative that it were sacrilege now to alter their text by one jot or tittle—*Quiller-Couch*) **Replete** (*with*), the more bookish term, as compared with *full* (*of*), heightens the implication of abundant supply or of being filled to the brim with something (he is quick, unaffected, *replete* with anecdote—*Hazlitt*) (an anxious captain, who has suddenly got news, *replete* with importance for him—*Henry James*) Often, however, the term implies fullness to satiety or to the point of being surfeited (right reading makes a full man in a sense even better than Bacon's; not *replete*, but complete rather, to the pattern for which Heaven designed him—*Quiller-Couch*) (replete with hard and book-learned words, impressively sonorous—*Southern Ana* including or inclusive, comprehending or comprehensive (see corresponding verbs at INCLUDE); teeming, abounding (see TEEM): glutted, cloyed, gorged, surfeited, sated (see SATIATE)

Ant empty —**Con** void, vacant, blank (see EMPTY): *bare, barren: stripped, dismantled, divested, denuded (see STRIP)

fulsome, oily, unctuous, oleaginous, slick, soapy are comparable when they mean too obviously extravagant or ingratiating to be accepted as genuine or sincere. **Fulsome** stresses a surfeit of something which in proper measure is not displeasing but which in abundance is cloyingly extravagant and offensive. Typically the term is applied to praise, flattery, and compliments, with the intent to suggest that they exceed the bounds of good taste and are lacking in truth and sincerity (fulsome flattery) (he was bedaubing one of those worthies with the most fulsome praise—*Smollett*) (the fulsome strains of courtly adulation—*Edgeworth*) (he could never be made ridiculous, for he was always ready to laugh at himself and to prick the bladder of fulsome praise—*Buchan*) Oily and unctuous both suggest the smoothness and blandness of oil. Oily, as applied to persons and their utterances and acts, carries a strong implication of an offensively ingratiating quality and sometimes suggests a suavity, a benevolence, or a kindness that is assumed as a mask for evil or dubious ends (an oily scoundrel) (oily manners) (oily smugness) (only oily and commonplace evasion—*Stevenson*) (an oily, sycophantic press agent—*Rogow*) **Unctuous**, on the other hand, suggests the assumption, often in hypocrisy, of the tone or manner of one who is grave, devout, or spiritual (the unctuous grandiloquence of Dickens's Chadband) (the look was, perhaps, unctuous, rather than spiritual, and had, so to speak, a kind of fleshy effulgence . . . He . . . smiled with more unctuous benignity than ever—*Hawthorne*) (Mark Twain writes those words with an almost unctuous gravity of conviction—*Brooks*) (the devastating portrait of the unctuous literary opportunist—*Cordell*) **Oleaginous** is sometimes used in place of oily or unctuous when pomposity is connoted or a mocking note is desired (the lank party who snuffles the responses with such oleaginous sanctimony—*Farrar*) **Slick** may suggest the assumption of a smooth, ingratiating manner, but it usually stresses the speciousness of that appearance and often imputes sly wily trickiness to the person who assumes it (this slick type of youngster anticipates exactly how adults will react to him and plays on their sensibilities—*Meyer*) (a pair of slick operators

had given the district a bad name by salting a barren claim—*Oscar Lewis*) **Soapy** comes close to *unctuous* in its extended sense, but it carries almost no suggestion of hypocrisy: rather it connotes an unduly soft, bland, or ingratiating manner (soapy supplications for unity—*New Republic*)

Ana lavish, *profuse, exuberant: *excessive, extravagant: cloying, satiating, sating (see SATIATE): bombastic, grandiloquent, magniloquent (see RHETORICAL)

fumble *vb* *botch, bungle, muff, cobble

Ana blunder, flounder, *stumble

fumigate disinfect, sanitize, *sterilize

fun, **jest**, **sport**, **game**, **play** are comparable when they denote something (as an activity, an utterance, or a form of expression) that provides diversion or amusement or is intended to arouse laughter. **Fun** implies amusement or an engagement in what interests as an end in itself, or it may apply to what provides this amusement or interest and then often additionally implies a propensity for laughing or for finding a usually genial cause for laughter or amusement (had such a zest for everything and thought it all such fun—*Röhlvaag*) (make living more fun, life more complete—*Printers' Ink*) (a man full of fun) **Jest** (see also JOKE) is comparable to *fun* chiefly in fixed phrases (as in *jest*) or when applied to activity or utterance not to be taken seriously. In such uses, however, *jest* commonly carries a stronger implication of ridicule or hoaxing (a man given to making his most significant remarks in *jest*) (make *jest* of very serious problems) **Sport** (see also under PLAY *vb* 1) is often interchangeable with *fun* (there is a good deal of *sport* in many serious activities) or *jest* (play a trick on a friend for the *sport* of it) But its most common use is in certain idiomatic phrases (as *make sport* and *in sport*) in which it suggests an intent to induce amusement or provoke laughter by putting someone or something up to gentle or malicious ridicule (make *sport* of a suggestion) (make a good deal of *sport* out of his friend's misfortune) (teasing begun in *sport* ended in an ugly brawl) **Game** as a close synonym of *fun* survives chiefly in the phrase to *make game* of where, like *sport* in the corresponding idiom, it usually carries a suggestion of mischief or malice and implies a certain ridicule (make *game* of an unfortunate rival) In more general related use *game* (see also *games* under ATHLETICS) may apply to an activity carried on in a spirit of fun (there have been few poets more successful . . . in having fun with poetry. To Mr. Frost it is a pleasant *game*—*Leary*) **Play**, which stresses in all senses an opposition to *earnest*, may replace *fun* or *sport* or *jest* when a thoroughly innocuous implication of lack of earnestness or seriousness is desired (pretend to spank a child in *play*)

Ana amusement, diversion, recreation, entertainment (see under AMUSE): merriment, jocundity, blitheness, joviality (see corresponding adjectives at MERRY): *mirth, glee, hilarity, jollity

function *n* 1 **Function**, **office**, **duty**, **province** are comparable when they mean the act, acts, activities, or operations expected of a person or thing by virtue of his or its nature, structure, status, or position. **Function** is the most comprehensive of these terms, capable of referring not only to a living thing or to a part or member of a living thing but to anything in nature (as the sun, the stars, or the earth) or in art (as poetry, painting, music, or an example of one of these) or to anything constructed that serves a definite end or purpose or is intended to perform a particular kind of work (fulfill one's *function* as a mother) (the *function* of the stomach is to digest food sufficiently to enable it to pass into the intestine) (the

function of language is twofold: to communicate emotion and to give information—*Huxley*) <the *function* of the leaves of a plant> <the *function* of criticism> <what after all . . . is the true *function* of religion?—*Dickinson*> **Office** applies usually to the function of or the work to be performed by a person as a result of his trade, profession, employment, or position with relation to others; in this sense it refers to a service that is expected of one or to a charge that is laid upon one <O, pardon me for bringing these ill news, since you did leave it for my *office*, sir—*Shak.*> <to suppose she would shrink . . . from the *office* of a friend—*Austen*> <they exercise the *offices* of the judge, the priest, the counsellor—*Gladstone*> **Duty** (see also **TASK**) applies not only to the tasks expected or required to be performed in the course of occupation or employment <the *duties* of a cook> <the *duties* of a hotel porter> but to the offices associated with status, rank, or calling and generally regarded as inherent in that status, rank, or calling and as imposing an obligation upon the person so stationed <a man and wife fulfill their biological function when they produce children, but they must still perform their *duties* as parents in rearing, protecting, and educating those children> <the governor regarded it as his *duty* to warn the citizens of the dangers ahead> <it is not only the right, but it is the judicial *duty* of the court, to examine the whole case as presented by the record—*Taney*> <it is in large part because of our failure to discharge our peacetime responsibilities as citizens that we must do our grim *duty* in war or perish—*Lodge*> **Province** (see also **FIELD**) denotes a function, office, or duty which comes within one's range of jurisdiction, powers, competence, or customary practice <nursing does not belong to a man; it is not his *province*—*Austen*> <it is emphatically the *province* and duty of the judicial department to say what the law is—*John Marshall*>

Ana end, goal, object, objective, purpose (see **INTENTION**): business, concern, *affair: *task, job

2 *power, faculty

Ana *ability, capacity, capability: action, behavior, operation (see corresponding verbs at **ACT**)

function *vb* operate, work, *act, behave, react

fundamental *adj* 1 **Fundamental**, **basic**, **basal**, **underlying**, **radical** are comparable when they mean forming or affecting the groundwork, roots, or lowest part of something. **Fundamental** is used chiefly in reference to immaterial things or to abstractions, whether they are thought of as built up on a foundation or as having their origins in roots <the *fundamental* rules of poetry> <a *fundamental* change in his attitude to life> <the *fundamental* rock in a geological formation> <the *fundamental* absurdity of the plot . . . remains—*FitzGerald*> <fatigue nor worry nor professorism could extinguish his *fundamental* gaiety—*J. M. Brown*> **Basic** is often used interchangeably with *fundamental* when the latter implies reference to a substructure <the *fundamental* or *basic* argument> But *basic* is preferred to *fundamental* when the reference is to a definite or concrete groundwork, bottom, or starting point <the *basic* stone of a pillar> <a *basic* wage in the electrical industry> <the distinction between *basic* scientific research and applied research—*News Front*> **Basal** differs from *basic* chiefly in not being used as often in reference to immaterial things and in more often implying reference to the bottom or to the lowest point or regions of a thing <geologizing the *basal* parts of the Andes—*Darwin*> <the *basal* plane of a crystal> <*basal* leaves on a stem> **Underlying** may be used to suggest nothing more than extension beneath something else <*underlying* rock strata> <the *underlying* layer of

tissue> However, especially when the reference is to something immaterial, the term frequently comes close to *fundamental*, differing from it chiefly in suggesting a depth that removes the thing from one's range of vision or a remoteness that demands study or research on the part of one who would detect it <the *underlying* motive for his act> <the *underlying* causes of World War I> <*underlying* differences between Communism and socialism> <the social transformation now demanded of us by our *underlying* technical, economic and social development—*Strachey*> **Radical** (see also **LIBERAL** 2) implies reference to the root or origin or ultimate source of a thing; thus, a *radical* change is one that is so thoroughgoing that it affects the fundamental character of the thing involved; a *radical* error touches the very center and source of a thing's life <actual differences distinguishing the different races of mankind—differences that may be ascribed to *radical* peculiarities of mind—*Bridges*>

Con *serious, solemn, grave, sober: *melancholy, plaintive, doleful, dolorous, lugubrious

furious, **frantic**, **frenzied**, **wild**, **frenetic**, **delirious**, **rabid** are comparable when they mean possessed with uncontrollable excitement especially under the stress of a powerful emotion. **Furious** implies strong excitement or violence that characterizes the movements or activities of one aroused by a powerful emotion; it may be applied to the activities or to the emotion <he was in a *furious* rage> <she worked with *furious* zeal while the mood lasted> <she was now entering into that stage of *furious* activity which represented the exalted phase of the mental circular state—*Ellis*> **Furious** may also mean nothing more than intensely angry with or without an outward display of excitement <beneath her calm she was *furious* against her favorite—*Bennett*> **Frantic** implies actions or words that indicate temporary mental disturbance under the stress of a powerful emotion (as grief, worry, anxiety, fear, or rage); it usually suggests, especially when applied to actions or behavior, a situation from which it is almost impossible to escape <his *frantic* efforts to free himself resulted only in his becoming worse entangled> <there was a full moon at the time, and . . . every dog near my tent was baying it. The brutes . . . drove me *frantic*—*Kipling*> <a *frantic* beating of wings—*Cather*> <my father, *frantic* with anxiety over my safety—*Heiser*> **Frenzied** suggests uncontrollable excitement under the sway of an emotion, often one not explicitly designated, but it differs from *frantic* in carrying no clear suggestion of a desperate situation <a *frenzied* welcome by the populace> <why do we let these abstractions and implacable dogmatisms take possession of us . . . and fight their futile, *frenzied* conflicts in our persons?—*L. P. Smith*> <could hear the prosecutor's *frenzied* denunciations of the accused—*H. W. Carter*> <ignoring the *frenzied* nervous attempts of an unprepared city to make some semblance of defense—*Gardner*>

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Wild comes close to *frantic* in its meaning but stresses a distracted rather than a nearly deranged state of mind; it therefore may be used with reference not only to the effect of a violent emotion but to the effect produced by any undue strain on the nerves or the mind (she is *wild* with grief) (wild screams of anguish) (the news drove the people *wild* with joy) (these are but *wild* and whirling words, my lord—*Shak.*) (wild with hatred and insane with baffled desire—*Thackeray*) **Frenetic** suggests a loss of balance, especially a tendency to be affected by extreme excitement under the stress of religious or partisan emotions (some of the more *frenetic* of the franc-tireurs of liberalism—*Pall Mall Gazette*) (when inspired, their [the sacred writers'] individuality was intact. They were never . . . *frenetic*—*J. P. Newman*) **Delirious**, like *frenzied*, implies uncontrollable excitement, but it more specifically suggests symptoms (as lightheadedness, incoherence, and wandering) typically associated with delirium (the children were *delirious* with joy over their Christmas presents) (the end of the war was hailed with *delirious* excitement) (the *delirious* applause of the audience—*Edmund Wilson*) **Rabid** applies to persons or to the actions, opinions, or utterances of persons who are possessed by fixed ideas and express them with violence often to the exclusion of all others (he is very *rabid* on this subject) (a *rabid* partisan) (a *rabid* Communist) (burning with a *rabid* ambition to be ranked the equal of her elders in vice—*Poe*)

2 **Furnish, equip, outfit, appoint, accouter, arm** are comparable when they mean to supply a person or something used by him with the adjuncts necessary or appropriate to his daily living or his occupation. **Furnish** stresses the provision of all essentials; thus, a house is *furnished* when it is supplied with all the necessary conveniences that make it ready for use as a home. **Equip** stresses the provision of things or occasionally of a single thing making for efficiency in action or in use; thus, a poorly *furnished* kitchen may be short in tables or chairs, but a poorly *equipped* kitchen is not adequately provided with the utensils or appliances needed for cooking and other work carried on there; one *equips*, rather than *furnishes*, an automobile with a four-wheel drive. **Outfit** stresses provision for a journey, an expedition, or a special kind of activity (as work); it is used chiefly with reference to necessary clothes, tools, utensils, and accessories and so is narrower in its range of applications than *furnish* and broader than *equip* (it took several days to *outfit* me for my journey to Washington—*Cather*) **Appoint**, which is somewhat bookish in this sense, suggests complete and often elegant furnishings or equipment (well-*appointed* drawing rooms) (the Bristol mail is the best *appointed* in the kingdom—*De Quincey*) **Accouter** stresses provision of dress, array, or personal equipment, usually for a particular activity (as military service) (soldiers *accoutered* for the conflict) (he . . . was *accoutered* in a riding dress—*Dickens*) (the fully *accoutered* members of a Wild West show—*Sat. Review*) **Arm** stresses provision for effective action or operation; it is used chiefly with reference to equipment necessary for offense or defense (arm a battleship) (armed to the teeth) but it may imply no more than provision of a means of preparation for added strength or security (arm the

hilt of a sword with a plate) (armed with rubbers and umbrella)

In their extended senses the words in this group retain their respective implications but refer to mental, moral, or physical qualifications rather than to things (such education as the local schools could *furnish*—*Smythe*) (thus *equipped* with a philosophy Emerson was prepared to begin his work as a critic—*Parrington*) (required . . . the judge to *outfit* him legally—*Hackett*) (one weeps to see Fowler [*Modern English Usage*] stripped and *reaccoutered* by an unskilled hand for ends which he would repudiate—*Barzun*) (he *armed* himself with patience, as was needful, having so much to endure—*Norton*)

futile, vain, fruitless, bootless, abortive all denote barren of result. *Futile* and *vain* parallel each other only when they imply failure to realize an immediate aim (it was equally in *vain*, and he soon wearied of his *futile* vigilance—*Stevenson*) **Vain** (see also **VAIN** 1) usually implies little more than simple failure; **futile** may connote the completeness of the failure or the un wisdom of the undertaking (all literature, art, and science are *vain* . . . if they do not enable you to be glad—*Ruskin*) (opposition . . . had been so *futile* that surrender seemed the only course open—*Jones*) Though both *vain* and *futile*

may be applied to something contemplated but not yet tried, *vain* more often suggests a judgment based on previous experience and *fruitless*, one based on reasoning from self-evident principles (but it is *vain* to talk of form and symmetry to the pure expansionist—*Babbitt*) (it is *fruitless* to ask which [Shakespeare or Dante] undertook the more difficult job—*T. S. Eliot*) **Fruitless** is often interchangeable with *vain*. But its basic meaning makes it especially applicable to undertakings that entail long, patient, arduous effort and severe disappointment (whom he had long time sought with *fruitless* suit—*Spenser*) (he nursed a grievance and, with Scotch persistence, kept up for years his *fruitless* efforts at reinstatement—*Ashley*) **Bootless**, chiefly poetic, is especially applied to petitions or efforts to obtain relief (they would not

pity me, yet plead I must; and *bootless* unto them—*Shak.*) (no guides were to be found, and in the next summer the young man returned from his *bootless* errand—*Parkman*) **Abortive** implies failure before plans are matured or activities begun (an *abortive* conspiracy) (an *abortive* attempt to break jail) (he had stirred up the Maronites to attack us . . . had I not brought up unexpectedly so many Arabs as rendered the scheme *abortive*—*Scott*) (some of them would play a considerable part in the *abortive* renaissance of the 1890's—*Malcolm Cowley*) *Ana* *vain, idle, otiose, nugatory: *ineffective, ineffectual, inefficacious

gather vb 1 **Gather, collect, assemble, congregate** mean to come or to bring together so as to form a group, a mass, or a unit. The same distinctions in applications and in implications characterize their derivative nouns **gathering, collection, assemblage** (which see) or **assembly, congregation**. **Gather** is the most widely applicable of these words; it may be used in reference not only to persons and objects but to intangible things (a crowd *gathers* wherever there is excitement) (gather the boys and girls of the neighborhood for a picnic) (leaves *gather* in heaps on windy days) (gather the leaves for burning) (beads of moisture *gathered* on his brow) (gather *ing* his ideas together before planning his speech) In certain phrases *gather* acquires additional specific connotations; thus, *gathering* flowers or crops implies plucking and culling as well as bringing together; *gathering* a ruffle implies a drawing together or into folds on a thread; *gathering* one's wits connotes an effort at concentration or at mustering or rallying mental forces. **Collect** is often used in place of *gather* with no intended difference in meaning (collect leaves) (leaves *collect*) (beads of moisture *collected* on his brow) But *collect* may convey, as *gather* does not, the ideas of careful selection or a principle of selection, of orderly arrangement, or of a definitely understood though not always expressed end in view; thus, to *collect* butterflies implies a selection of specimens and, usually, their cataloguing; to *collect* books (as in book *collector*) implies a choice of books with regard to some such principle as rarity, beauty of binding, or authorship. There is a subtle difference between to *gather* one's thoughts, which often merely implies previous scattering, and to *collect* one's thoughts, which implies their organization; there is also a difference between to *gather* money, which may mean merely to accumulate it, and to *collect* money, which usually suggests either raising a fund by gifts, subscriptions, and contributions or taking action to obtain possession of money due. **Collect** and **collection** are often preferred to *gather* and *gathering* when various things are brought together; thus, a jumble or an omnium-gatherum is a miscellaneous *collection* rather than a *gathering*; *collect* rather than *gather* enough chairs for all the guests to sit down. **Assemble** stresses more emphatically than either *gather* or *collect* a close union of individuals and a conscious or a definite end in their coming or in their being brought together. It is used chiefly in reference to persons who gather together, either of their own will or at the call of another, so as to form a group or body that will unite in action or join in counsel or discussion (the democratic rights of free speech and free *assembly*) (the most renowned experts on the history, geography, economics, and politics of all the nations of the world . . . *assembled* under one roof—*Alsop & Braden*) (even after a new crew had . . . been *assembled*, I had qualms about setting forth over the treacherous waters of

the China Sea—*Heiser*) In reference to things *assemble* implies an agent who collects them in order to unite them into a single body or structure or into a distinct and isolated group; thus, the *assembly* department of an automobile plant is the department in which the workmen build the cars by *assembling* the component parts made in other departments or in other factories (it took twenty years to *assemble* this collection of musical instruments) **Congregate** implies a flocking together into a crowd, a huddle, or a mass (cattle *congregate* during a storm) (pass laws forbidding persons to *congregate* on the streets) (congregations of atoms excited and lucent, mingled with free electricity—*Darrow*) **Congregation** is specifically applied to an assembly meeting for religious worship, but it usually retains the suggestion of a crowd that has flocked together.

gaudy, tawdry, garish, flashy, meretricious are comparable when meaning vulgar or cheap in its showiness. Something is **gaudy** which uses gay colors and conspicuous ornaments or ornamentation lavishly, ostentatiously, and tastelessly (gaudy floral prints) (false eloquence, like the prismatic glass, its *gaudy* colors spreads on ev'ry place—*Pope*) (another attendant, *gaudy* with jingling chains and brass buttons, led us along a corridor—*Kenneth Roberts*) Something is **tawdry** which is not only *gaudy* but cheap and sleazy (beneath the lamp her *tawdry* ribbons glare—*Gay*) (a fancy . . . fruitful, yet not wanton, and gay without being *tawdry*—*Cowper*) (he saw nothing else; the *tawdry* scenery, the soiled cotton velvet and flimsy crumpled satin, the reek of vulgarity, never touched his innocent mind—*Deland*) Something is **garish** which is distressingly or offensively bright (hide me from day's *garish* eye—*Milton*) (for this week he would produce a bunch [of flowers] as *garish* as a gypsy, all blue and purple and orange, but next week a bunch discreet as a pastel, all rose and gray with a dash of yellow—*Sackville-West*) Something is **flashy** which dazzles for a moment but then reveals itself as shallow or vulgar display (Tom Paine was considered for the time as a Tom Fool to him, Paley an old woman, Edmund Burke a *flashy* sophist—*Hazlitt*) (the *flashy* rich boy in public school, buying toadyism—*La Farge*) (<"what the public wants" is being translated into the *flashy*, the gadgety, the spectacular—*Loewy*) Something is **meretricious** which allures by false or deceitful show (as of worth, value, or brilliancy) (the jewels in the crisped hair, the diadem on the polished brow, are thought *meretricious*, theatrical, vulgar—*Hazlitt*) (the false taste, the showy and *meretricious* element . . . invading the social life of the period and supplanting the severe elegance, the instinctive grace of the eighteenth century—*Binyon*) (if a writer's attitude toward his characters and his scene is as vulgar as a showman's, as mercenary as an auctioneer's, vulgar and *meretricious* will his product for ever remain—*Cather*)

gaze *vb* **Gaze, gape, stare, glare, peer, gloat** are comparable when meaning to look at long and attentively, but they vary greatly in their implications of attitude and motive. **Gaze** implies fixed and prolonged attention (as in admiration, curiosity, or wonder) <and still they gazed, and still the wonder grew, that one small head could carry all he knew—*Goldsmith*> <the black-marble Egyptian gazing with unwavering eyes into the sky—*Shaw*> **Gape** adds to gaze the implication of stupid and openmouthed wonder or indecision <a yokel gaping at the sights on his first visit to the city> <the Gurkhas . . . hitched their kukris well to hand, and gaped expectantly at their officers—*Kipling*> <depicts man lost and blindly gaping amidst the chaos—*Gwyn*> **Stare** implies a fixed and direct gazing at a person or object; it may connote curiosity, astonishment, insolence, or vacant fixedness <or like stout Cortez when with eagle eyes he stared at the Pacific—and all his men looked at each other with a wild surmise—silent, upon a peak in Darien—*Keats*> <staring at each other as if a bet were depending on the first man who winked—*George Eliot*> <she tried not to stare at Mr. Scales, but her gaze would not leave him—*Bennett*> **Glare** adds to stare the implication of fierceness or anger <all . . . with countenance grim glared on him passing—*Milton*> <neither Clem nor Lonnie replied. Arch glared at them for not answering—*Caldwell*> **Peer** suggests a looking narrowly, especially with or as if with partly closed eyes, or curiously, especially through or from behind something <Mrs. Cary kept peering uneasily out of the window at her husband—*M. E. Freeman*> <his pale, nearsighted eyes had always the look of peering into distance—*Cather*> **Gloat** usually implies prolonged or frequent gazing upon something, especially in secret, often with profound, usually malignant or unhallowed, satisfaction <a miser gloating over his hoard> <to gaze and gloat with his hungry eye on jewels that gleamed like a glow-worm's spark—*Longfellow*> Sometimes the implication of malignant satisfaction is so emphasized that the implication of gazing is obscured or lost <in vengeance gloating on another's pain—*Byron*>

generate *vb* **Generate, engender, breed, beget, get, sire,**

procreate, propagate, reproduce are comparable when they mean to give life or origin to or to bring into existence by or as if by natural processes. **Generate**, which means no more than this, is used rarely in reference to human beings, seldom in reference to animals or plants (mushrooms are not *generated* from seeds) but is the technical term in reference to electricity (<generate an electric current>) and is used commonly in reference to ideas, emotions, passions, moods, or conditions that have a traceable cause or source <a habit of thought . . . only to be *generated* by intimate knowledge of good literature—*Russell*> <I do not think religious feeling is ever aroused, except by ideas of objective truth and value; but these ideas are certainly not *generated* by feeling—*Inge*> <the mood *generated* in me by the intellectual convictions current in my time—*Krutch*> **Engender**, like *generate*, is chiefly found in extended use, where it more often suggests an originating or a sudden or immediate birth than a gradual bringing into fullness of life or being <to hunger for the hope and happiness which . . . the dance seemed to *engender* within them—*Hardy*> <a sudden spontaneous illumination . . . *engendered* in the course of writing a poem—*Day Lewis*> <the strike, during which three men had been killed and ill-feeling *engendered* in hundreds of silent workers—*Anderson*> **Breed** basically means to produce offspring by hatching or gestation <yet every mother *breeds* not sons alike—*Shak.*> Often the term carries a less specific meaning and suggests merely the production of offspring <mankind will in every country *breed* up to a certain point—*Paley*> sometimes by parental action but more often by the activity of those who determine the parentage, the time of mating, and the number of offspring <specialists who *breed* horses for racing> <cattle *bred* for milk production> <the notion of a Government department trying to make out how many different types were necessary, and how many persons of each type, and proceeding to *breed* them by appropriate marriages, is amusing but not practicable—*Shaw*> Sometimes *breed* adds the implication of nurturing or rearing to that of producing offspring and may so stress this that there is no reference to the life processes involved in generation <he was *bred* in a manner befitting the son of a king> <he was born and *bred* in your house—*Jowett*> In its extended sense *breed* usually implies a gradual or continuous process of coming into being; it may specifically suggest a period of latency or quiescence before breaking out <an iniquitous government *breeds* despair in men's souls—*John Morley*> <the yoke a man creates for himself by wrongdoing will *breed* hate in the kindest nature—*George Eliot*> <incessant recurrence without variety *breeds* tedium—*Lowes*> **Beget, get, and sire** imply the procreating act of the male parent; usually *beget* is preferred in reference to men and *get* and *sire* in reference to animals <he that *begetteth* a fool doeth it to his sorrow—*Prov 17:21*> <a bull may be unable to *get* calves—*Diseases of Cattle*> <a Thoroughbred *sired* by a famous stallion> Only *beget* and *sire* have extended use derived from their basic meaning. In such use there is very little difference between *beget, sire, and engender*, the terms often being employed interchangeably without loss <motion picture industry, *sired* and nourished by private enterprise—*Hays*> though *beget* sometimes stresses a calling into being on the spur of the moment or without any previous preparation or expectation <beauty that *begets* wonder and admiration> <stories . . . spring from the fillip of some suggestion, and one *begets* another—*Lowes*> **Procreate**, a somewhat formal word, comes close in meaning to *breed* in the sense of to produce offspring. Though sometimes used as a synonym of *beget*, it more

often refers to sexual acts involved in a mating and their results in the production of children (the time-honored presumption that a child born to a married woman during coverture was *procreated* by her husband—*JAMA*) Unlike the foregoing terms, *propagate* carries no inherent implication of sexual activity but rather stresses the preserving and increasing of a kind of living being, be it plant, animal, or human, whether by generating, by breeding, or by growing (as from seeds, grafts, cuttings, or bulbs) (the rabbit *propagates* itself with great rapidity) (from cuttings . . . he *propagated* what he first named the Tokay but later the Catawba grape—*Jenkins*) In its extended use *propagate* implies not only giving rise to something or bringing it into existence but often also a continuation of that existence or the widespread dissemination of the thing that is brought into existence ("Oh! does patience beget patience?" said Adrian. "I was not aware it was a *propagating* virtue"—*Meredith*) (the Rights of Man, rights which the French Revolution had *propagated*—*Barr*) **Reproduce**, like *propagate*, may be used in reference to any living thing capable of bringing into existence one or more of its kind and is applicable whether the means is sexual or asexual (the tribe was dying out; infant mortality was heavy, and the young couples did not *reproduce* freely—the life-force seemed low—*Cather*) (the residents of the urban places probably did not *reproduce* themselves—*Oscar Handlin*)

gentleman *patrician, aristocrat* are comparable when they denote a person of good or noble birth. **Gentleman** basically implies descent from good family, the right to bear a coat of arms, and social rank just below that of the noble and above that of the yeoman. The term has been widely

extended in its application and has acquired connotations which have little or nothing to do directly with lineage or heraldic rights but suggest only such outward marks of good birth as elegance of person and of manners and a life of leisure (a *gentleman* . . . I'll be sworn thou art; thy tongue, thy face, thy limbs, actions and spirit, do give thee five-fold blazon—*Shak.*) (somebody has said that a king may make a nobleman, but he cannot make a *gentleman*—*Burke*) (the *gentleman* may be a drunkard, a gambler, a debauchee . . .; he may be a man of spotless life, able and honest; but he must on no account be a man with broad palms, a workman amongst workmen—*Tom Collins*) **Patrician** derives its implications from its historical applications but chiefly from its earliest reference to a Roman citizen who belonged to one of the original families of ancient Rome which, after the growth of the plebeian order, kept power and authority in their own hands. In reference to present-day persons the word suggests a distinguished ancestry, superior culture, and aloofness from what is common or vulgar; it is applied chiefly to descendants of established and influential families when they constitute a social caste, especially one marked by exclusiveness and pride in birth (the merchant-*patricians* [of Boston], like those of Holland and Flanders, in times gone by, wished to perpetuate their names and glorify their capital not only in the elegance of their mansions but also in churches, parks and public buildings—*Brooks*) **Aristocrat** carries fewer suggestions of inbred physical characteristics than *gentleman* or *patrician*, but it suggests a sympathy with the point of view common to them. In historical use it commonly implies an opposition to *democrat* and is applicable to a person who believes in government by superior persons or by the class which includes such persons; in more general use it is commonly applied to a person who by reason of birth, breeding, title, wealth, or outlook is accorded recognition as a member of the highest caste and especially to one who holds himself somewhat aloof from the ordinary forms and observances of social life (two kinds of *aristocrats*: one that assumes the right to govern without the consent of the people; the other that assumes the privilege of an exclusive private life—*Charles Beard*) (a genuine *aristocrat*, he was at home in all walks of life—*Smelser & Kirwin*)

germ, *microbe, bacterium, bacillus, virus*, though not strict synonyms, are comparable because all denote organisms invisible to the naked eye, including organisms that are the causative agents of various diseases. **Germ** and *microbe* are the ordinary nonscientific names for such an organism and especially for one that causes disease. *Bacteria*, the plural of *bacterium* and the form commonly in general use, is often employed as the equivalent of *germs* and *microbes*. Technically, it is the scientific designation of a large group of prokaryotic microbes which are found widely distributed in water, air, soil, living things, and dead organic matter, which have structural and biological characteristics distinguishing them from other unicellular microorganisms (as protozoans), and

only some of which are instrumental in producing disease in man, animals, and plants. In addition to the pathogenic or disease-causing bacteria there are the saprophytic bacteria which live upon dead or decaying organic matter and which, for the most part, are beneficial in their effects which include many natural chemical processes (as fermentation, oxidation, and nitrification). **Bacillus** is often employed as though it designated any of the pathogenic bacteria. In technical scientific usage it denotes any of a genus of bacteria which originally included all or most rod-shaped forms and is now restricted to a group of mostly soil-inhabiting, aerobic, and saprophytic forms that produce endospores. However, it is often used of rod-shaped bacteria in general, especially as distinguished from those which are globe-shaped (the coccus form, of which the streptococcus is an example) and those which are spiral (the spirillum form, of which the vibrio which causes Asiatic cholera is an example, and the spirochete form, exemplified by the treponema of syphilis). It is common, especially in medical usage, to speak of the *bacilli* of such diseases as typhoid, diphtheria, and tetanus, though none of these are true bacilli in the restricted taxonomic sense. **Virus**, in earlier use, was an imperceptible infectious principle of unknown nature occurring in the body of a diseased individual and held to be involved in the transfer of infectious diseases. In this sense it has been applied to most germs or microbes while their specific nature remained unknown, as well as to bodily fluids and discharges containing such infective agents <by [virus] is understood a principle, unknown in its nature and inappreciable by the senses, which is the agent for the transmission of infectious diseases. Thus we speak of the *variolic*, *vaccine*, and *syphilitic viruses*—*Dunghison*> A vestige of this meaning persists in immunologic usage with respect to materials (as vaccine lymph) that are antigenic but not usually infective <when the doctors inoculate you . . . they give you an infinitesimally attenuated dose. If they gave you the *virus* at full strength it would overcome your resistance and produce its direct effect—*Shaw*> In general modern usage *virus* is equivalent to filterable *virus* and is restricted to a variety of parasitic and infective agents which are able in nature to multiply only in living tissues, are so small that they pass through the pores of bacteriological filters, and are generally invisible with the ordinary light microscope. They include noncellular microbes (as herpesviruses, poliovirus, and tobacco mosaic virus) that lie on the border between the living and nonliving, may consist of a single macromolecule of DNA or RNA in a protein case, and are capable on the one hand of existing in the crystalline state and on the other, when introduced into suitable cells, of multiplying like a true organism <it appears that energy for *virus* synthesis is provided by enzyme systems already present in the normal host cell. . . . Investigations carried out thus far have not detected any biochemical activity by the virus. However, if the assumption is made that the *virus* simply stimulates its own production by the host cell, it would appear that it is a very inefficient parasite—*Weiss*>

gesticulation *gesture

gesture *n* **Gesture**, **gesticulation** are comparable when meaning an expressive movement or motion of the body or limbs or the use of such a movement or motion. **Gesture** is the more inclusive term; it may imply any such movement or motion intended to express what words cannot, or to increase the effectiveness or poignancy of words that are being uttered, or to take the place of words when for some reason or other they are unnecessary or impossible <the right [hand of Niobe] is drawing up her daughter to her; and with that instinctive *gesture* . . . is encouraging the child to believe that it can give security—*Shelley*> <he had permitted himself his very first and last *gesture* in all these days, raising a hard-clenched fist above his head—*Conrad*> <the *gesture* with which he threw away the cigar-end struck her as very distinguished—*Bennett*> **Gesticulation**, on the other hand, is applicable only when there is implication of unrestrained excitement, or the loss or absence of grace or dignity, or a determined effort to attract attention <his human figures are sometimes "o'er-informed" with . . . feeling. Their actions have too much *gesticulation*—*Hazlitt*> <making various savage *gesticulations*—*Livingstone*> <the nineteenth-century reaction against post-Raphaelite painting . . . the twentieth-century exclusive zeal for purely formal elements in pictures, both reflect our lack of sympathy with *gesticulation*—the word itself is pejorative—*Chandler*>

get 1 **Get, obtain, procure, secure, acquire, gain, win** are comparable and often interchangeable when they mean to come into possession of. **Get** is very general in its meaning and simple and familiar in its use. Thus, one may *get* something by fetching <*get* a book from the table>, by extracting <*get* gold from ore>, by receiving <*get* a present>, or as a return <*get* interest on a loan> **Obtain** is likewise rather general. It may suggest that the thing sought has been long desired or that it has come into possession only after the expenditure of considerable effort or the lapse of considerable time <the satisfaction *obtained* by the sentiment of communion with others, of the breaking down of barriers—*Dewey*> <in western New York, where her early education was *obtained*—*Knott*> **Procure** is likely to suggest planning and contriving over a period of time and the use of unspecified or sometimes questionable means <the Duma laid claim to full power . . . and on March 15 *procured* the abdication of the frightened and despondent Nicholas II—*Ogg & Zink*> <some gifted spirit on our side *procured* (probably by larceny) a length of mine fuse—*H. G. Wells*> **Secure** may suggest safe lasting possession or control <the large income and fortune which a prospering business *secures* for him is of his own making—*Hobson*> or it may suggest the gaining of what is hard to come by (as by reason of rarity or competition for possession); thus, one *secures*, rather than *gets* or *acquires*, a rare stamp by offering a higher price than other interested persons will pay <almost absolute safety against infection could be *secured* by the simple precaution of using safe, potable water—*Heiser*> **Acquire** may suggest devious acquisition <the destruction of that ship by a Confederate cruiser, although it had *acquired* a British registry in order to avoid capture—*Knott*> It may also indicate continued, sustained, or cumulative acquisition <the habit of any virtue, moral or intellectual, cannot be assumed at once, but must be *acquired* by practice—*Grandgent*> **Gain** often implies competition in acquiring something of value <if a London merchant, however, can buy at Canton for half an ounce of silver, a commodity which he can afterwards sell at London for an ounce, he *gains* a hundred percent—*Smith*> <few men are placed in such fortunate circumstances as

to be able to *gain* office—*Oliver* > *Win*, though often interchangeable with *gain*, may suggest, as *gain* does not, favorable qualities leading naturally to the acquisition of something desired despite competition or obstacles <the errors of his time were connected with his labors to remedy them, and *win* a firmer knowledge than dialectic could supply—*H. O. Taylor*> <Mrs. Woolf's fiction is too negligent of the requirements of the common reader to *win* a wide following—*Millet*>

ghastly, **grisly**, **gruesome**, **macabre**, **grim**, **lurid** are comparable when they mean horrifying and repellent in appearance or aspect. **Ghastly** suggests the terrifying aspects of death or bloodshed <the dying man's *ghastly* pallor> <death grinned horrible a *ghastly* smile—*Milton*> <the image of a hideous—of a *ghastly* thing—of the gallows!—*Poe*> The term is also used as a strong intensive equivalent to *hideous* or *horrifying* <the growing conviction that the defeat was the result of a *ghastly* and unnecessary blunder> <detail is heaped upon *ghastly* detail with a kind of stolid objectivity until the cumulative picture is one of madness and chaos—*Edmund Fuller*> **Grisly** and **gruesome** imply an appearance that inspires shuddering or uncanny horror <so spake the *grisly* Terror—*Milton*> <look down, and see a *grisly* sight; a vault where the bodies are buried upright!—*Wordsworth*> <the thick 566-page text is literally horrible. It is filled with *gruesome* details of murder and torture—*Bliven* b. 1916> <many readers find Keats's *Isabella* too *gruesome* for enjoyment> **Macabre** may imply marked or excessive preoccupation with the horrors especially of death <a *macabre* tale> <weirdly masked, *macabre* figures that in time became . . . the hallmark of his painting—*Coates*> or it may come close to *ghastly* in its implication of a hideous or horrifying quality <in a *macabre* climax, a substantial portion of Berlin was blown up by the Germans themselves—*Wechsberg*> **Grim** suggests a fierce and forbidding aspect <so should a murderer look, so dead, so *grim*—*Shak.*> <with countenance *grim* glared on him passing—*Milton*> <an unused, airless attic, a place the reader soon begins to think of as no less *grim* than a chamber of horrors—*Stern*> <the *grim* hows and not the difficult whys of battle—*McCarten*> **Lurid** comes into comparison with *ghastly* as referring to light or color; it suggests either a *ghastly* pallor or coloring reminiscent of death <death . . . pale as yonder wan and horned moon, with lips of *lurid* blue—*Shelley*> or more frequently a sinister and murky glow <he caught the color of what was passing about him but mixed with the *lurid* and portentous hue—*Hawthorne*> <no *lurid* fire of hell or human passion illumines their scenes—*Eliot*> Sometimes *lurid* differs little from *gruesome* except, possibly, in its stronger suggestion of sensationalism <reporters who like to give all the *lurid* details of a catastrophe> <the detective story may be described as *lurid* rather than as mysterious>

gibber *vb* prate, chatter, *chat, gab, patter, prattle, babble, gabble, jabber

gibberish, **mummery**, **hocus-pocus**, **abracadabra** are comparable as terms of contempt applied to something which is in itself unintelligible or meaningless to the person concerned. They are often used interchangeably but are not true synonyms. **Gibberish** suggests language; it is applied especially to inarticulate but expressive sounds or attempts at speech <a baby's *gibberish*> When applied to articulate but unintelligible utterance it may imply a low-grade or disordered intelligence in the speaker, or it may suggest *jargon*. One or more of these implications is carried over when the word is used to express contempt <I have often warned you not to talk the court *gibberish* to me—*Fielding*> <I've endured just about enough *gibberish* about the modern woman, how she complicates her life, has sacrificed her femininity and competes in a man's world—*McAuliffe*> **Mummery** suggests not language but actions uninterpreted by words (as in the old dumb shows). As a term of derogation, however, it is applied chiefly to rites, proceedings, and performances which, whether or not accompanied by words, appear theatrical and ridiculous as well as meaningless to the observer <it was hardly worthwhile for a Protestant to have stripped off the *mummings* of Rome in order to fall a victim to an agile young man in a ten-foot mask—*Graves*> <the *mummery* and ceremonial of modern life—*W. P. Webb*> **Hocus-pocus** suggests jugglery and incantations. Sometimes, in its extended use, the stress is placed upon tricks intended to mystify or confuse, sometimes upon empty but impressive-sounding words <the potency of movies depends upon the quality of their dramatic articulation, not upon the working of *hocus-pocus* on the eyes—*Crowther*> <denounced dialectics—that curious heritage from Hegelian philosophy which Marx adopted and adapted for his own thought—as meaningless *hocus-pocus*—*A. G. Meyer*> **Abracadabra** basically applies to a magical formula or a mystical figure and in extended use is applied chiefly to discourse and implies not only its unintelligibility and formulism but its complete unfitness for the ends it proposes to achieve <psychology is either true knowledge concerning the spiritual nature of man' or it is moonshine and *abracadabra*—*Murry*>

gibe *vb* *scoff, jeer, sneer, flout, gird, f leer

Ana *ridicule, deride, mock, taunt, twit, rally

giddy, **dizzy**, **vertiginous**, **swimming**, **dazzled** are comparable when meaning affected by or producing a sensation of being whirled about or around and consequently confused. *Giddy* and *dizzy* are often used interchangeably with one another but **giddy** is sometimes preferred for stressing the mental confusion which results and **dizzy** for emphasizing the physical quality of the sensation <I am *giddy*; expectation whirls me round. The imaginary relish is so sweet that it enchants my sense—*Shak.*> <this universe of astronomical whirligigs makes me a little *giddy*—*L. P. Smith*> <how fearful and *dizzy* 'tis to cast one's eyes so low! The crows and choughs that wing the midway air show scarce so gross as beetles—*Shak.*> <with my heart beating and my head quite *dizzy*—*J. W. Carlyle*> Both *giddy* and *dizzy* are also used in an extended sense implying a lack of balance in persons or in things and, usually, an undue lack of steadiness or seriousness <*giddy* girls> <I got a bifocal slant on this world which was now making me *giddy* with names, dates, legends—*Henry Miller*> <prices rising at a *dizzy* rate> <the *dizzy* multitude—*Milton*> **Vertiginous** retains in its extended

uses much of the connotation implicit in its basic relation to *vertigo*; it may come close to *dizzy* in its suggestion of lack of steadfastness and constancy (inconstant they are in all their actions, *vertiginous*, restless, unapt to resolve of any business—*Burton*) (his *vertiginous*, and apparently unconscious, changes of subject make heavy going after a few pages—*Corke*) or may attribute a dizzying effect to the thing qualified (events occur at *vertiginous* speed, whole civilizations are summed up in a few words, and long processes are reduced to a paragraph if not to a sentence—*Krutch*) (the delicious *vertiginous* sense of human destinies hanging by slender threads—*R. W. Brown*) or it may stress a confusing effect like that of *vertigo* (that *vertiginous* bewilderment which comes to creatures of mere routine when they face the unfamiliar—*Cohen*) (the reader . . . is inspired with the conviction that of these writers only Austin Dobson, James Russell Lowell, and Miss Godden were really sane, that the rest of them were either actually mendacious or possibly *vertiginous*—*Yale Review*) **Swimming** is applied especially to the head, brain, or eyes of a person suffering from dizziness; when so used, it suggests the physical sensations of swift, unimpeded, yet uncontrollable movement (my head is *swimming*) (and slowly by his *swimming* eyes was seen a lovely female face—*Byron*) (she yielded, and was borne with *swimming* brain and airy joy, along the mountainside—*Bridges*) **Dazzled** applies to the physical, mental, or spiritual vision when overpowered and confused by or as if by a blinding light; it connotes, therefore, an effect suggestive of dizziness but without the sensation of being about to fall (the sun's rays tapered into a luminous cone . . . a hypnotizing focal point for *dazzled* eyes—*Beebe*) (one knew that the sun-dazzled summer world would soon open about one again—*Edmund Wilson*) (the solicitations of the *dazzled* swains of Cambria for the honor of the two first dances—*Peacock*) (dazzled by the prospect of a brilliant future)

Ana whirling, reeling (see REEL): confusing, adding, fuddling, muddling (see CONFUSE): bewildering, distracting, mystifying (see PUZZLE vb): frivolous, flighty (see corresponding nouns at LIGHTNESS)

gift *n* 1 **Gift, present, gratuity, favor, boon, largess** are comparable when they denote something, often of value but not necessarily material, given freely to another for his benefit or pleasure. **Gift** is the most inclusive term, but it is not interchangeable with some of the others, for apart from the context the term carries no hint of remuneration for something done or received and excludes all suggestion of return (a birthday *gift*) (a *gift* to a museum) (gifts to the poor) (fear the Greeks bearing *gifts*) (every good *gift* and every perfect *gift* is from above—*Jas* 1:17) **Present** is ordinarily applied to something tangible which is offered as a compliment or expression of goodwill (she used to define a *present*, "That it was a gift to a friend of something he wanted or was fond of, and which could not be easily gotten for money"—*Swift*) (flowers and fruits are always fit *presents*—*Emerson*) (little odd *presents* of game, fruits, perhaps wine—*Lamb*) **Gratuity** implies voluntary compensation, usually in money, for some service for which there is no fixed charge or for special attention or service over and beyond what is normally included in a charge (he distributed *gratuities* so generously that he received more attention than any other guest of the hotel) (pays five or six dollars for his dinner in a smart Mayfair club and then distributes another dollar or so in *gratuities*—*Joseph*) **Favor** applies to something given or granted to another as a token of one's affection, regard, or partiality or as an indulgence or concession. The term is often intentionally vague, especially when

what is given is not a concrete thing (he said he did not deserve so many *favours* from his party) (queen's *favours* might be fatal gifts, but they were much more fatal to reject than to accept—*Henry Adams*) Concretely the term applies to various small things (as a ribbon, a cockade, or a lady's glove) given to a lover or admirer as a token or to some knickknack or other trifle given to guests (as at a wedding, a dance, or a party). **Favor**, rather than *gift*, is used in requests for something that can be had only from the person addressed (ask the *favor* of a prompt reply) (begging the *favor* of a copy of his beautiful book—*Meredith*) **Boon** applies to any gift or favor either as petitioned for or prayed for as something much desired or needed yet not necessarily regarded as a right (high emperor, upon my feeble knee I beg this *boon*, with tears not lightly shed—*Shak.*) (if you mean to please any people, you must give them the *boon* which they ask—*Burke*) (I ask justice from you, and no *boon*—*Sheridan*) or as given gratuitously and bringing with it such benefits or advantages that it is regarded as a blessing or cause for gratitude (our forefathers have given us the *boon* of freedom) (the *boon* of free and unbought justice was a *boon* for all—*J. R. Green*) (Corinth was given certain *boons*, since it was a Julian colony, but Athens . . . was left to academic decay—*Buchan*) **Largess** is a somewhat pompous term for a bountiful gift (as of money or of food and drink) or a liberal gratuity; it usually suggests an ostentatious bestowal (the newly consecrated king bestowed *largesses* on all the heralds and minstrels) (contrasting his [Anthony's] meager bounty with the *largess* of Octavius—*Buchan*) (dependent for her livelihood on the *largess* of a moody Danish lover—*Jean Stafford*)

Ana *donation, benefaction, contribution, alms

2 **Gift, faculty, aptitude, genius, talent, knack, bent, turn** are comparable when they mean a special ability or a capacity for a definite kind of activity or achievement. **Gift** applies not only to an ability but also to a quality; it suggests an origin not easily explainable by natural laws and often implies that the recipient is favored by God, by nature, or by fortune. It is, therefore, precisely applied to an innate ability, capacity, or quality, especially to one not commonly found and not possible of acquirement (a *gift* of humor) (she has a real *gift* for arranging flowers—*Wharton*) (men have always revered prodigious inborn *gifts*, and always will—*Eliot*) (an artist is the sort of artist he is, because he happens to possess certain *gifts*—*Huxley*) **Faculty** (see also POWER 2) applies to either an innate or acquired ability or capacity; it does not apart from the context impute an extraordinary value or rarity to that power, but it does usually imply distinction or distinctiveness in its quality and skill or facility in its exercise (he had not that *faculty* of extracting the essence from a heap of statements—*Dickens*) (she seemed to have lost her *faculty* of discrimination; her power of easily and graciously keeping everyone in his proper place—*Cather*) **Aptitude** usually implies a natural liking and taste for a particular activity or pursuit as well as a native capacity for it and the ability to master its details or technique (there are all sorts of people today who write from all sorts of motives other than a genuine *aptitude* for writing—*Ellis*) (at fourteen education should begin to be more or less specialized, according to the tastes and *aptitudes* of the pupil—*Russell*) **Genius**, when it applies to ability or capacity rather than to a person who possesses that ability or capacity, suggests an inborn gift of impressive character or a combination of such gifts. Further than this the implications of the term are various and shifting, for the word is tied up in use with psychological, aesthetic, and critical explanations of the nature of genius; however, the

word often retains its original implication of a controlling spirit and may denote an inner driving energy which compels utterance or performance, often of a lofty or transcendent quality (the claim to possess a style must be conceded to many writers—Carlyle is one—who take no care to put listeners at their ease, but rely rather on native force of *genius* to shock and astound—*Quiller-Couch*) (in the contemporary novel *genius* is hard to find, talent is abundant—*Brit. Book News*) The word is often employed in current English in the sense of *gift*, usually with a connotation of transcendence or of uniqueness (she made her drawing room a sort of meeting place; she had a *genius* for it—*Woolf*) (Mr. G. K. Chesterton has a *genius* for saying new and surprising things about old subjects—*Huxley*) In ironic use the connotation of transcendence is especially strong, but that of supreme unawareness is also usually evident (he has a *genius* for ineptness of remark) (the *genius* for illogicality of the English people—*Inge*) **Talent** comes very close in its meaning to *gift* when the latter term denotes a native capacity or an innate ability. *Talent*, however, often carries the implication, derived from the Scriptural parable of the servants' use of the talents (pieces of money) entrusted them by their master, that the gift is a trust and that its possessor has an obligation to develop it and put it to profitable use (it is quite probable that many . . . who would make the best doctors are too poor to take the course. This involves a deplorable waste of *talent*—*Russell*) (was he to leave such *talents* lying idle (and that after chafing for eight years to employ them)?—*Belloc*) This basic implication in *talent* has led inevitably to another implication: that the gift is under the control of its possessor because its proper exercise depends on industry and the acquirement of necessary knowledge and skill. *Talent* is sometimes opposed to *genius* in the most exalted sense of that word as a lesser kind of power, capable of development through study and industry, completely under the control of the will, and tending to facile, agreeable, and effective, rather than exalted, performance or utterance (while *talent* gives the notion of power in a man's performance, *genius* gives rather the notion of felicity and perfection in it—*Arnold*) (to achieve conspicuous mundane success in literature, a certain degree of good fortune is almost more important than *genius*, or even than *talent*—*Benson*) **Knack** stresses ease and dexterity in performance, though it usually implies an aptitude (she has, certainly, something of a *knack* at characters—*Burney*) (an uncommon *knack* in Latin verse—*Eliot*) (improvisation was his *knack* and forte; he wrote rapidly and much—sometimes an entire novel in a month—*Van Doren*) **Bent** usually implies a natural inclination or taste; it often carries the same implications as *aptitude* and is sometimes preferred in general use because of technical use of *aptitude* in educational psychology (it doesn't seem to me that you've shown any great *bent* towards a scholastic life—*Archibald Marshall*) (the *bent* thus revealed for precise observation and classification—*Babbitt*) **Turn** not only implies a bent but its actual proof in performance and often suggests skill or proficiency (he had a *turn* for mechanics; had invented a plow in his district, had ordered wheelbarrows from England—*Woolf*) (must possess . . . artistic sensibility and a *turn* for clear thinking—*Clive Bell*)

give, present, donate, bestow, confer, afford are comparable when meaning to convey something or make something over or available to another as his possession. **Give** is the general term meaning to pass over, deliver, or transmit something which becomes the receiver's to own, to use, to enjoy, or to dispose of (it is more blessed to *give* than to receive—*Acts* 20:35) (give my love to your mother and sisters—*Keats*) **Present** is more formal or ceremonious (on Saturday Colonel Bellingham is going to address the lads of the Brigade and *present* them with six drums—*Mackenzie*) (pray, *present* my respects to Lady Scott—*Byron*) **Donate** usually implies publicity attending the giving or a public cause or charity as the recipient of the gift (donate a piano to an orphanage) **Bestow** implies the settling of something on one as a gift (large gifts have I *bestowed* on learned clerks—*Shak.*) (what nature wants commodiously gold *bestows*—*Pope*) To **confer** is to give graciously or as a favor or honor (the Queen *confers* her titles and degrees—*Pope*) To **afford** is to give or bestow especially as a natural or legitimate consequence of the character of what gives (this fine day *affords* us some hope—*Cowper*) (do the laws of his country *afford* him a remedy?—*John Marshall*)

glad, happy, cheerful, lighthearted, joyful, joyous are comparable when meaning characterized by or expressing the mood, temper, or state of mind of a person who is pleased or delighted with something or with things in general. **Glad** may be used in opposition to *sorry* to convey polite conventional expressions of pleasure or gratification (I am *glad* to hear of your recovery) (I shall be *glad* to have the opportunity to meet you) It may also be used in opposition to *sad*, and then connotes actual delight and a lift of spirits and sometimes elation (wine that maketh *glad* the heart of man—*Ps* 104:15) (glad did I live and gladly die—*Stevenson*) (a child's kiss set on thy sighing lips shall make thee *glad*—*E. B. Browning*) (his entire saintly life was *glad* with an invincible gaiety of spirit—*H. O. Taylor*) **Happy** may also be used in polite conventional phrases in which its content can hardly be distinguished from that of *glad*. In more meaningful use, however, it distinctively implies a sense of contentment and well-being or a realization either of one's good fortune or of the fulfillment of one's desires (he will never be *happy* until he finds work which utilizes all his talents) (with the tension of an unachieved task no longer felt . . . I can say with truth that the last phase of my life has been the *happiest*—*Ellis*) (is my girl *happy*, that I thought hard to leave, and has she tired of weeping as she lies down at eve?—*Housman*) **Cheerful** suggests a strong and, often, a

spontaneous flow of good spirits either as a result of feeling glad or happy or as a result of an equable disposition or of a naturally sanguine temperament <suicidal thoughts . . . could not enter the *cheerful*, sanguine, courageous scheme of life, which was in part natural to her and in part slowly built up—*Ellis*> <time went by as we drank and talked in a world that was rosy, *cheerful*, and full of fellowship and peace on earth—*Hammett*> **Lighthearted** stresses freedom from care, worry, and discontent. Since it also implies high spirits, vivacity, or gaiety, it commonly suggests in addition youth or an easygoing and somewhat volatile temperament <he whistles as he goes, *lighthearted* wretch, cold and yet cheerful—*Cowper*> <why, man, I was *lighthearted* in my prime, I am *lighthearted* now; what would you have?—*Browning*> *Joyful* and *joyous* imply keen gladness or happiness with resulting elation; they are often used as though they were equivalent terms. However, *joyful* usually suggests a mood or an emotional reaction to an event or situation, and it implies rejoicing <in the day of prosperity be *joyful*—*Eccles* 7:14> <and *joyful* nations join in leagues of peace—*Pope*> <a *joyful* countenance> <a bright and happy Christian, a romping optimist who laughed away sin and doubt, a *joyful* puritan—*Sinclair Lewis*> *Joyous*, on the other hand, applies more to something which by its nature or character is filled with joy or is a cause of joy <all that ever was *joyous*, and clear, and fresh, thy music doth surpass—*Shelley*> <the happy and *joyous* temper, which characterizes a fresh and confident faith—*Inge*> <that *joyous* serenity we think belongs to a better world than this—*Sir Winston Churchill*> *Ana* pleased, delighted, gratified, tickled, rejoiced (see PLEASE): blithe, jocund, *merry, jolly, jovial: gleeful, mirthful, hilarious (see corresponding nouns at MIRTH) *Ant* sad —*Con* depressed, dejected, melancholy (see corresponding nouns at SADNESS)

go *vb* 1 *Go, leave, depart, quit, withdraw, retire* are comparable when they mean to move out of or away from the place where one is. Of these terms, *go* is the most general and the least explicit in its implications; it often is used merely as the opposite of *come* (he came here yesterday and *went* this morning before I was up) (go, baffled coward, lest I run upon thee—*Milton*) (he would not let her *go* before he had obtained her promise to sell him the property) (the men *go* and cut bamboos in the jungle and bring them to the beach—*Fraser*) *Leave* (see also RELINQUISH, LET 2) so strongly implies a separation from someone or something that the verb in this sense is more often used transitively than intransitively; in its intransitive use the term commonly implies a more formal or a more conspicuous act than *go* implies and often requires a statement of the means of going (he plans to *leave* by the noon train) (we shall be sorry to have him *leave*) (Archipenko left Russia to enroll at the École des Beaux Arts in Paris—*Current Biog.*) (do not *leave* the place until I return) (her servants always *leave* her after a few days in her employ) *Depart* (see also SWERVE) is rarely transitive except in a few idiomatic phrases (depart this life) As an intransitive verb it not only carries a stronger implication of separation from a person, place, or status than *leave* carries, but it is somewhat more formal, especially when it is used as the opposite of *arrive* (depart on a trip to Europe) (“You will not leave me yet, Richard?” . . . He had no thought of *departing*—*Meredith*) (a goddess of gone days, *departed* long ago—*Millay*) *Quit* (see also STOP 1, BEHAVE 1), like *leave*, is more often transitive than intransitive and carries a strong implication of separation from a person or thing. Unlike *leave*, it stresses a getting free or being rid of what holds, en-

tangles, or burdens, (the distinction [knighthood] . . . had given him a disgust to his business, and to his residence in a small market town; and, *quitting* them both, he had removed with his family—*Austen*) (he *quitted* London to take refuge among the mountains—*Meredith*) (he *quitted* Cambridge in January 1643, before being formally ejected by the Puritans—*Bush*) **Withdraw** stresses more than *quit* a deliberate removal for reasons that seem justifiable to the person concerned or acceptable to the reader; the term therefore seldom carries (as *quit* often carries) a suggestion of cowardice, weakness, or instability; thus, one *quits* a trying job, but one *withdraws* from an insecure position. Frequently *withdraw* implies such a motive as courtesy, a sense of propriety, or a grievance (the women *withdrew* from the room when the men were ready to discuss business) (the visitors *withdrew* when the doctor entered) (the perfect lyric is a poem from which the author has *withdrawn* once he has set it in motion—*Day Lewis*) (a hermit *withdrewn* from a wicked world—*Conrad*) **Retire** is often used interchangeably with *withdraw*, but it is especially appropriate when the removal also implies a renunciation, a permanent relinquishing (as of a position), a retreat, or a recession (retire from the world into a monastery) (when he dies or *retires*, a new manager must be found—*Shaw*) (after the Captain’s terrible fall . . . which broke him so that he could no longer build railroads, he and his wife *retired* to the house on the hill—*Cather*) Often *retire* carries the specific sense of to withdraw to one’s bedroom and to one’s bed for the night (retire early)

good *adj* **Good, right** are comparable when they mean in accordance with one’s standard of what is satisfactory. **Good** (as opposed to *bad*) implies full approval or commendation of someone or something in the respect under consideration (as excellence of workmanship, excellence of condition, beneficial properties, competence, agreeableness, purity, or freshness) (and God saw every thing that he had made, and, behold, it was very *good*—*Gen* 1:31) (good food) (a good light) (a good book for children) (good news) (a good neighbor) (they are very good men, the monks, very pious men—*Joyce*) **Good** (as opposed to *poor*) does not imply hearty approval, but it does not suggest dissatisfaction; it implies that the person or thing so described measures up to a point which is regarded as satisfactory or possesses the qualities neces-

sary to a thing of its kind <a *good* crop> <*good* soil> <*good*, but not excellent, work> <the business for the past year was *good*> <a *good* return on an investment> <a *good* play> <the more general history . . . is less *good*. Partly, that is because the sources . . . are too narrow for the weight of the conclusions—*Laski*> <between *good* workmanship and design and that touch of rareness which makes not merely *good* but fine and lovely—*Alexander*> Often the difference in meaning between these two senses of *good* is apparent only in the inflection or through the medium of a context. **Right** (see also **CORRECT**) often implies that the thing so described is fitting, proper, or appropriate with respect to the circumstances; thus, a book one knows to be *good* may not be the *right* book to give to a person who is unable to understand it; the *right* light for a picture may be quite different from a *good* light for reading <she always does the *right* thing at the *right* time> <the scene in Julius Caesar is *right* because the object of our attention is not the speech of Antony . . . but the effect of his speech upon the mob—*T. S. Eliot*> **Right** may also imply the absence of anything wrong in the person or thing so described <God's in his heaven—all's *right* with the world!—*Browning*> <marry when she has found the *right* chap—*Reid*>

goodness, **virtue**, **rectitude**, **morality** are comparable and very general terms denoting moral excellence. **Goodness** is the broadest of these terms; it suggests an excellence so deeply established that it is often felt as inherent or innate rather than acquired or instilled. Of all these terms it is the only one applied to God (the Lord God, merciful and gracious, long-suffering, and abundant in *goodness* and truth—*Exod* 34:6) When applied to persons it usually suggests such appealing qualities as kindness, generosity, helpfulness, and deep sympathy <the need I have of thee thine own *goodness* hath made—*Shak.*> <she has more *goodness* in her little finger than he has in his whole body—*Swift*> <he taught that evil was a transient thing, *goodness* eternal—*Samuel*> **Virtue** (see also **EXCELLENCE**), though often coupled with *goodness* as its close synonym, is distinguishable as suggesting acquired rather than native moral excellence and, often, a greater consciousness of it as a possession; usually the term implies either close conformity to the moral law or persistent choice of good and persistent rejection of evil <*virtue* is its own reward> <*virtue* may be assailed, but never hurt, surprised by unjust force, but not enthralled—*Milton*> <the highest proof of *virtue* is to possess boundless power without abusing it—*Macaulay*> <*virtue* is not to be considered in the light of mere innocence, or abstaining from harm, but as the exertion of our faculties in doing good—*Bp. Butler*> Since *virtue* often specifically implies chastity or fidelity in marriage, **rectitude** is frequently employed in its place when moral excellence acquired through obedience to the moral law and self-discipline is implied. But **rectitude** differs from *virtue* in often having reference to motives, intentions, and habits and not merely to character, and sometimes also in placing greater stress on such stern qualities as

uprightness, integrity, and probity <no one can question the *rectitude* of his purpose> <for various reasons all having to do with the delicate *rectitude* of his nature, Roderick Anthony . . . was frightened—*Conrad*> <so society is, after all, a recreation and a delight, and ought to be sought for with pleasurable motives, not with a consciousness of *rectitude* and justice—*Benson*> All of the preceding words refer directly or indirectly to the moral excellence involved in character. **Morality** may come close to *virtue* and *rectitude* in denoting a quality of character <the will to be good and to do good—that is the simplest definition of what the world has always meant by *morality*—*Read*> In this sense the term often specifically suggests a moral excellence that arises from fidelity to ethical principles as distinguished from one that arises from obedience to the divine law or the moral laws enforced by religious teachings <evil must come upon us headlong, if *morality* tries to get on without religion—*Tennyson*> But *morality*, unlike the other terms, commonly denotes a code of conduct <ethical problems involved in the new *morality*> <a highly erotic people with a strict *morality*, which was always violated, a pious people who sinned with passion—*Fergusson*> <what do we mean by *morality*? Generally we mean those rules of conduct that appeal to people as generally conducive to a decent human life—*Cohen*> From this sense derive applications, on the one hand, to behavior, whether morally excellent in terms of ordinary ethical standards or quite the reverse, that accords with such a code <his behavior constituted a new low in political *morality*> <in Christian love and forgiveness lay some reversal of Saxon *morality*, for instance of the duty of revenge—*H. O. Taylor*> and, on the other hand, to the propriety of behavior as weighed by such a code <the point at issue was the *morality* of Wise's studiously ambiguous use of the term "a few copies" in connection with the issue of . . . a facsimile edition—*Altick*> <our chief failure in dealing with the Communist revolution in China has been to underestimate the vigor of Chinese moral sentiment . . . and to pay too little attention to the *morality* of our own position in the eyes of the Chinese—*Atlantic Monthly*>

To **gossip** is to communicate or exchange in conversation remarks, often uncomplimentary or damaging and of questionable veracity, about the private affairs of others, especially acquaintances or neighbors <*gossip* about the squabbles of the family next door> <Tat always got furious when people *gossiped* about her—*Pinckney*> <must see that none of these reporters get into the Castle, and that nobody from the Castle *gossips* with them—*Buchan*> To **blab** is to disclose something private or secret that has been confided to one or that has come to one's knowledge <if he sees cards and actual money

passing, he will be sure to *blab*, and it will be all over the town in no time—*Conrad*) <confessions made to him are . . . rarely *blabbed*—*Morley*> **Tattle** sometimes is more closely akin to *gossip*, sometimes to *blab*, or it may combine the implications of the two. It suggests loose and loquacious gossip, or unsolicited revelation to one having power of discipline or punishment of some trivial misdeed on the part of another, or blabbing gossip that is usually a betrayal of confidence <Mary always *tattled* to the teacher when a classmate threw a spitball> <so that no discovery . . . might be made by any *tattling* amongst the servants—*Hook*>

govern, rule are comparable when they mean to exercise power or authority in controlling or directing another or others, often specifically those persons who comprise a state or nation. **Govern** may imply power, whether despotic or constitutional, or authority, whether assumed by force, acquired by inheritance or through election, or granted by due processes of law, but it usually connotes as its end the keeping of the one or ones directed or controlled in a straight course or in smooth operation, where perils are avoided and the good of the individual or of the whole is achieved <parents who cannot *govern* their children> <*govern* one's emotions> <every prince should *govern* as he would desire to be *governed* if he were a subject—*Temple*> <[the Roman] Senate was more than a modern constitutional monarch, reigning and not *governing*; it had a substantial amount of *governing* to its share—*Buchan*> <formulating the principles which should *govern* the creation of proletarian literature—*Glücksberg*> <as Matthew Arnold pointed out . . . educated mankind is *governed* by two passions—one the passion for pure knowledge, the other the passion for being of service or doing good—*Eliot*> **Rule** is not always clearly distinguished from *govern* <the territory is *ruled* by a high commissioner—*Americana Annual*> Often it implies the power to lay down laws which shall determine the action of others or to issue commands which must be obeyed; it therefore commonly suggests the exercise of arbitrary power and is not ordinarily used of one that exercises authority over the people as an elected official <resolved to ruin or to *rule* the state—*Dryden*> <the country is *ruled* but not *governed*; there is little administration and much lawlessness—*Puckle*> <it's damnable to have to hurt the people we love—but, after all, we can't let our parents *rule* our lives—*Rose Macaulay*>

gracious, cordial, affable, genial, sociable are used to describe persons or their words or acts who or which are

markedly pleasant and easy in social intercourse. **Gracious** implies kindness and courtesy especially to inferiors. When it carries the latter implication, it more often suggests kindly consideration than condescension <*gracious* to everyone, but known to a very few—*Cather*> <heartened by her *gracious* reception of a nervous bow—*Shaw*> **Cordial** stresses warmth and heartiness <a *cordial* welcome> <a *cordial* handclasp> <be on *cordial* terms> <they gave us a *cordial* reception, and a hearty supper—*Melville*> **Affable** implies approachability and readiness to talk in the person conversed with or addressed; when applied to a social superior, it sometimes connotes condescending familiarity but more often a gracious willingness to be friendly <I don't find . . . that his wealth has made him arrogant and inaccessible; on the contrary, he takes great pains to appear *affable* and *gracious*—*Smollett*> <his father was an excellent man . . . his son will be just like him—just as *affable* to the poor—*Austen*> <easy of approach and *affable* in conversation. He was *genial*, social, even convivial—*Goldwin Smith*> **Sociable** implies a genuine liking for the companionship of others and readiness to engage in social intercourse even with strangers or inferiors <was *genial* and *sociable*, approachable at all times and fond of social intercourse—*Reeves*> **Ana** obliging, complaisant, *amiable: benignant, benign, kindly, *kind: courteous, courtly, chivalrous (see **CIVIL**) **Ant** ungracious —**Con** churlish, boorish (see under **BOOR**): brusque, curt, crusty, blunt, gruff (see **BLUFF**): surly, crabbed, *sullen

Ana *order, arrange: divide, *separate: classify, *assort, sort: differentiate, discriminate, demarcate, *distinguish

gradation, shade, nuance are comparable when they mean the difference or variation between two things that are nearly alike. **Gradation** in the singular implies a small difference or variation of this kind, but the term is used more frequently in the plural, so that it usually implies the successive steps by which a thing passes from one type or kind into something else of a different type or kind; thus, if we take the primary colors of the spectrum as blue, yellow, and red, the *gradations* between these are not the colors green, orange, purple, which are clearly seen, but all of the intermediate colors by which blue gradually passes into green, and green into yellow, and yellow into orange, and so on; therefore the word is often modified by some adjective (as *sensible, apparent, perceptible, or imperceptible*) <the *gradations* between prose and verse are fine but perceptible> <by insensible *gradations* shale becomes slate> <by imperceptible *gradations* her love was transformed into pity> **Shade** implies a minute or barely perceptible degree of difference (as in thought, belief, meaning, or position) <every *shade* of religious and political opinion—*Macaulay*> <discover fine *shades* of meaning in synonyms> **Shade** is also often used adverbially in this sense with comparatives of adjectives or adverbs to imply a degree of difference that is barely noticeable <he drew his chair a *shade* nearer> <his second attempt was a *shade* better than his first> **Nuance**, though often interchangeable with *shade*, tends to stress even more the slightness or delicacy of the difference (as between musical tones, tints of color, or feelings) <I . . . think that there is a *shade, a nuance* of expression . . . which does imply this; but, I confess, the only person who can really settle such a question is M.

Renan himself—*Arnold*) <a faint . . . nuance of assent in Cousin Lydia's voice seemed to admit the . . . comment—*Mary Austin*) <nuances that might have passed unperceived break startlingly upon one's consciousness—*Millan*)

grand *adj* **Grand, magnificent, imposing, stately, majestic, august, noble, grandiose** are comparable when they mean large, handsome, dignified, and impressive. They vary somewhat in the emphasis which they respectively place on these qualities, and they differ somewhat also in their additional implications and connotations. **Grand** emphasizes magnitude or greatness of dimensions; often, however, it is not physical largeness that is implied, but a spiritual, intellectual, or aesthetic greatness that makes the thing so described preeminent among its kind. It is distinguishable, however, from other words meaning very large (as *big, huge, and colossal*) by its implications of handsomeness, dignity, and impressiveness <the *grand* view from the summit> <the *grandest* of Gothic cathedrals> <a *grand* production of Parsifal> <the *grand* style arises in poetry, when a noble nature, poetically gifted, treats with simplicity or with severity a serious subject—*Arnold*> <the castle was considered *grand* by the illiterate; but architects . . . condemned it as a nondescript mixture of styles in the worst possible taste—*Shaw*> **Magnificent** also may or may not imply actual physical largeness, but it always suggests an impressive largeness proportionate to the thing's scale, without sacrifice of dignity or violation of the canons of good taste. The term was originally and is still in historical use applied to certain rulers, notable for their great deeds, the sumptuousness of their way of living, and the munificence of their gifts <Lorenzo de' Medici was known as Lorenzo the *Magnificent*> In current general use it is often applied to ways of living or to the things (as houses, furnishings, clothes, and jewels) that contribute to a sumptuous and handsome way of living <the drawing room, which was a truly *magnificent* apartment—*Bennett*> It is also applicable to many other things which are felt to be superior (as in beauty, elegance, or worth) often as contrasted with what may be described as *plain* or *insignificant* <*magnificent* clothes> <a *magnificent* theme> <so ostentatiously *magnificent* a name as Gabriele d'Annunzio—*Ellis*> <a *magnificent* performance of *Hamlet*> <much of Dryden's unique merit consists in his ability to make . . . the prosaic into the poetic, the trivial into the *magnificent*—*T. S. Eliot*> **Imposing** stresses impressiveness because of size and dignity or sometimes because of magnificence <though tall and heavily built, he was not *imposing*—*Mackenzie*> <it is between the town and the suburb, that midway habitation which fringes every American city, and which is *imposing* or squalid according to the incomes of suburbanites—*Replier*> **Stately** usually emphasizes dignity, but there is an almost equal stress placed on handsomeness and impressiveness, and there is often an implication of larger than usual size <*stately* ships under full sail> <solid and *stately* furniture—*Bennett*> <I like to think of the obscure and yet dignified lives that have been lived in these quaint and *stately* chambers—*Benson*> **Majestic** combines the implications of *imposing* and *stately*, but it

adds a strong connotation of solemn grandeur; it is applicable not only to tangible things (as persons, buildings, interiors, and furniture) but also to intangible things or to things that produce an aesthetic effect <his *majestic* personality and striking physical appearance—*Jack*> <twilight combined with the scenery of Egdon Heath to evolve a thing *majestic* without severity, impressive without showiness—*Hardy*> <the clash and fall of empires is a *majestic* theme when it is handled by an imaginative historian—*Bruun*> <the full moon shone high in the blue vault, *majestic, lonely, benign*—*Cather*> **August** implies impressiveness so strongly as to impute to the thing so described a power to inspire awe, veneration, or, in ironic use, abashment and dread. But it also ascribes a lofty or exalted character to whatever it qualifies <so glorious is our nature, so *august*—*Browning*> <how can you look round at these *august* hills, look up at this divine sky . . . and then talk like a literary hack . . .?—*Shaw*> <no assemblage of academic duennas, however *august*—*Montague*> <for in the eternal city . . . a Power *august, benignant* and supreme shall then absolve thee of all farther duties—*Poe*> **Noble** in this relation (see also MORAL) carries no suggestion of a moral quality or of a social status; rather it implies a commanding grandeur or the power to impress the imagination, emotions, or the intellect as incomparably great or excellent <now see that *noble* and most sovereign reason, like sweet bells jangled, out of tune and harsh—*Shak.*> <the Vandals of our isle . . . have burnt to dust a *nobler* pile than ever Roman saw!—*Cowper*> **Grandiose** often implies an almost preposterous pretentiousness or pomposity <the *grandiose* manner of the stage—*Irving*> <the *grandiose* aggressive schizophrenic patient is typically a disorganized self-assertive person whose dominant delusions are those of grandeur—*Cameron*> but it may also be used without derogation to imply a more than usual largeness of plan or scope or a grandeur or majesty exceeding that of life or experience <things painted by a Rubens . . . all better, all more *grandiose* than the life—*Browning*> <tend to make us forget what more *grandiose, noble, or beautiful* character properly belongs to religious constructions—*Arnold*> <contemplating the *grandiose* complexities of the Universe—*Krutch*>

grant *vb* 1 **Grant, concede, vouchsafe, accord, award** denote to give as a favor or as a right. One **grants**, usually to a claimant or a petitioner and often a subordinate, as an act of justice or indulgence, something that is requested or demanded and that could be withheld <the governor *granted* the condemned man a week's respite> <he begged the Lord to *grant* him his prayer> <any political rights which the dominant race might . . . withhold or *grant* at their pleasure—*Taney*> <save . . . every drop of rain the heavens *grant*—*Lord*> One **concedes** something claimed or expected as a right, prerogative, or possession when one yields it with reluctance and, usually, in response to some compelling force in the claim or the claimant <if we mean to conciliate and *concede*, let us see of what nature the

concession ought to be—*Burke* <as an instrument of mind-training, and even of liberal education, it [science] seems to me to have a far higher value than is usually conceded to it by humanists—*Inge* <even his harshest critics concede him a rocklike integrity—*Time* > One vouchsafes something prayed for, begged for, or expected as a courtesy, when one grants it to a person inferior in dignity or station. The word is often found in supplications where it implies humility in the suppliant <*vouchsafe*, O Lord: to keep us this day without sin—*Book of Common Prayer* > Often it is ironical and then usually suggests absurd condescension <he vouchsafed no reply to our question > <the occasional answers that Stalin used to vouchsafe to inquiries from American correspondents—*Davis* > One accords to another something admittedly his due or in keeping with his character or status <he treated bishops with the superficial deference that a sergeant major accords to a junior subaltern—*Mackenzie* > <children . . . will readily accord to others what others accord to them—*Russell* > One awards something that is deserved or merited; the word usually implies determination by legal adjudication or by judges in a contest or competition <the plaintiff was awarded heavy damages > <award a prize for the best story > <his victory was duly acclaimed by Senate and People; he was given the title of Emperor and awarded a triumph—*Buchan* > *Ana* bestow, confer, *give, present, donate: *allot, assign, apportion, allocate: cede, yield, surrender, *relinquish

2 Grant, concede, allow are comparable when they mean to admit something in question, especially a point or contention of one's opponent in an argument. **Grant** usually implies voluntary acceptance in advance of proof in order to clarify the issues or to center attention on what are regarded as the main issues <I grant there is no obvious motive > <let us take his goodwill for granted > <the consistency of arithmetic being granted, that of projective geometry follows—*Sawyer* > **Concede** implies reluctant acceptance either before or after proofs have been advanced; it usually suggests the strength of the opponent's contention <he was unwilling to concede the supremacy of any group > <still less does he concede that the British have any claim to the gratitude of the inhabitants—*Michael Clark* > **Allow** implies acceptance, but usually a somewhat qualified acceptance; it often suggests admission on the ground of apparent truth, logical validity, or reasonableness <even Wickham had allowed him merit as a brother—*Austen* > <if one allows that it is impossible to define God in intelligible terms, then one is allowing that it is impossible for a sentence both to be significant and to be about God—*Ayer* > <allowing that Harding was her first lover—*S. graphic, vivid, picturesque, pictorial are comparable when they mean having or manifesting a quality or character that produces a strong, clear impression, especially a visual impression. All of these words apply particularly but not exclusively to works of art and especially of literature. Something **graphic** has the power to evoke a strikingly clear-cut, lifelike picture; the term categorizes such arts as painting, drawing, engraving, and etching (the *graphic* arts), the object of each of which is to present a picture, but it is also meaningfully applied to a representation of

things in words <a *graphic* description of the face of a young Hindu at the sight of castor oil—*Darwin* > <it is also one of the best-written works on the subject, enlivened by a keen sense of humor and a witty and *graphic* style—*Ullmann* > Something **vivid** is so vigorously alive that it is felt, seen, heard, or otherwise apprehended with a sense of its intense reality. The term may apply to what actually exists and impresses itself with such sharp force on the imagination that the memory retains the sight, sound, or other impression <a *vivid* sensation of fear > <figures so *vivid* that they seem to breathe and speak before us—*L. P. Smith* > <how sights fix themselves upon the mind! For example, the *vivid* green moss—*Woolf* > The term may also apply to a mental state or process of which one is oneself intensely aware <Ripton awoke . . . to the *vivid* consciousness of hunger—*Meredith* > <my sense of right or wrong—of individual responsibility—was more *vivid* than at any other period of my life—*Hudson* > <those for whom the belief in immortality is most *vivid*—*Krutch* > or which defines its content clearly and sharply <a man of wide and *vivid* interests—*Russell* > <a *vivid* realization of approaching danger > <all three had kept a *vivid* . . . recollection . . . of what they had seen—*Wharton* > Frequently the term applies to whatever represents life or one's imaginative conceptions (as a picture, or a play, or a story) or to matters (as style, colors, language, or situations) which are involved in such a representation; then the implication is of a power, either in the representation itself or in the means of representation, to evoke clearly defined pictures and to give a strong sense of their distinct quality and of their living force <moving pictures are only less *vivid* than reflections from a mirror—*Justice Holmes* > <in his odes, with their thunder of place-names, he [Horace] makes *vivid* the territorial immensity of the empire—*Buchan* > Something **picturesque** has, in general, the qualities or the character which one believes essential to a striking or effective picture. The term is applicable to a place, a person, or a building or other construction <a *picturesque* costume > <Scott's Meg Merrilies is a *picturesque* character > <a *picturesque* ruin > as well as to a work of *graphic*, literary, or plastic art <a *picturesque* landscape > <*picturesque* details > and to a style or manner (as in writing or painting) <the *picturesque* force of his style—*Hawthorne* > and it carries in every use an implication that the thing has been observed and judged with regard for its form, color, atmosphere, striking or unfamiliar detail, or sharp contrasts rather than for qualities which are not perceptible to the eye or that do not draw the eye because they are lacking in distinctness and charm. Sometimes *picturesque* specifically implies a kind of wild, rugged beauty associated with untouched or undisciplined nature or with things being reclaimed by nature <wide prospects of startling beauty, rugged mountains, steep gorges, great falls of water—all the things that are supposed to be *picturesque*—*Benson* > <a venerable family mansion, in a highly *picturesque* state of semidelapidation—*Peacock* > In still other contexts the term implies a charm arising rather from remoteness, strangeness, quaintness, informality, or diversity <though the upper part of Durnover was mainly composed of a curious congeries of barns and farmsteads, there was a less *picturesque* side to the parish—*Hardy* > <the Square is rather *picturesque*, but it's such a poor, poor little thing!—*Bennett* > <the most *picturesque* Mediterranean craft, with colored sails and lazy evolutions—*Brownell* > Something **pictorial** presents or aims to present a *vivid* picture; thus, the *pictorial* arts are the same as the *graphic* arts, but the emphasis is upon the objective rather than upon the medium; a *pictorial* style of poetry uses words as though they were

colors or pigments by which a vivid representation is produced <she has evidently been very anxious to maintain the tradition of picturesqueness in biography that Strachey founded, and in many places is more than picturesque, is in fact *pictorial*—*Times Lit. Sup.*> <he made *pictorial* drama out of the most commonplace intimacies of French bourgeois home life—*Soby*>

greet salute, hail, *address, accost

greeting, **salutation**, **salute** denote the ceremonial words or acts of one who meets, welcomes, or formally addresses another. **Greeting** is the ordinary term which carries no suggestion of formality and no implication of inferiority in the one who greets or of superiority in the one who is greeted. On the contrary, the term usually suggests friendliness or goodwill or lack of concern for social or official inequalities <O, to what purpose dost thou hoard thy words, that thou return'st no *greeting* to thy friends?—*Shak.*> <why meet we on the bridge of Time to 'change one *greeting* and to part?—*R. F. Burton*> **Salutation** applies to a more or less formal phrase, gesture, or ceremonial act whereby one greets another; specifically it applies to such phrases as the conventional "How do you do" or the familiar "Hello," or to the words of a letter with which the writer first directly addresses his correspondent, or to such acts as a kiss, an embrace, or a bow. **Salute** is the only one of these words that applies only to gestures determined by convention or to ceremonial acts; though it seldom applies to a speech, it may be used when to the gesture or act a word or two is added <waved a *salute* to the friends awaiting his arrival> <the presidential *salute* of twenty-one guns> <the officer returned his subordinate's *salute*> <Sir Austin bent forward, and put his lips to her forehead. Carola received the *salute* with the stolidity of a naughty doll—*Meredith*>

Ana mourning, grieving, sorrowing (see GRIEVE): lamenting or lamentation, bewailing, bemoaning, deploring (see corresponding verbs at DEPLORE)

Con comforting or comfort, solacing or solace, consolation (see corresponding verbs at COMFORT)

grievance wrong, *injustice, injury

Ana hardship, rigor (see DIFFICULTY): *trial, tribulation, affliction, cross

grieve, mourn, sorrow mean to feel or express one's sorrow or grief. Grieve implies actual mental suffering, whether it is shown outwardly or not; the term often also connotes the concentration of one's mind on one's loss, trouble, or cause of distress <after so many years, she still grieves for her dead child> <he grieved, like an honest lad, to see his comrade left to face calamity alone—*Meredith*> <my days are passed in work, lest I should grieve for her, and undo habits used to earn her praise—*Lowell*> **Mourn** may or may not imply as much sincerity as *grieve* usually implies, but it does suggest a specific cause (as the death of a relative, friend, sovereign, or national hero) and carries a much stronger implication of the outward expression of grief (as in weeping, lamenting, or the wearing of black garments) <we wept after her hearse, and yet we mourn—*Shak.*> <fix a period of national mourning for a dead sovereign> <grieve for an hour, perhaps, then mourn a year and bear about the mockery of woe to midnight dances, and the public show—*Pope*> <mourn not for Adonais.—Thou young Dawn turn all thy dew to splendor, for from thee the spirit thou lamentest is not gone—*Shelley*> **Sorrow** may imply grieving or mourning and be used in place of either term when sincere mental distress is implied; in distinctive use, however, it carries a stronger implication of regret or of deep sadness than either of its close synonyms <so send them [Adam and Eve from Eden] forth, though sorrowing, yet in peace—*Milton*> <I desire no man to sorrow for me—*Hayward*> <heed not the tear that dims this aged eye! . . . Though I sorrow, 'tis for myself, Aline, and not for thee—*Gilbert*>

Ana suffer, *bear, endure: lament, bemoan, bewail, *deplore: *cry, weep, wail, keen

Ant rejoice

grim 1 **Grim, implacable, relentless, unrelenting, merciless** are comparable when they mean so inexorable or obdurate as to repel or bar any effort to move one from one's purpose or course. **Grim** (see also GHASTLY) usually implies tenacity of purpose and stern determination which show themselves outwardly in a forbidding aspect or in a formidable appearance; the term is applicable not only to persons or their words; acts, and looks but to things which reflect or reveal the grimness of persons <*grim* Death> <*grim* necessity> <the Florentines . . . prepared to do *grim* battle for their liberties—*Oliphant*> **Implacable** implies the impossibility of placating, pacifying, or appeasing and is used in reference to men or to higher beings <in friendship false, *implacable* in hate—*Dryden*> <he [an African god] is utterly and absolutely *implacable*; no prayers, no human sacrifices can ever for one moment appease his cold, malignant rage—*L. P. Smith*> However, the term is increasingly used to imply an inflexibly uncompromising character or an incapacity for yielding or making concessions, and, in this sense, it is applicable not only to persons but to things <when the true scholar gets thoroughly to work, his logic is remorseless, his art is *implacable*—*Henry Adams*> <I wanted truth presented to me as it is, arduous and honest and *implacable*—*Ellis*> **Relentless** and **unrelenting** differ mainly in that the former suggests a character and the latter a mood governing action; both imply an absence of pity or of any feeling that would cause

one to relent and to restrain through compassion the fury or violence of one's rage, hatred, hostility, or vengeance <*relentless* critics> <woe to thee, rash and *unrelenting* chief!—*Byron*> Both terms often carry so strong an implication of indefinite duration or of unremitting activity that they are frequently used to describe something which promises not the slightest abatement in severity, violence, or intensity as long as life or strength lasts <*relentless* pursuit> <the *relentless* vigilance of the secret service men> <the *unrelenting* fury of a storm> <with unwearied, unscrupulous and *unrelenting* ambition—*Macaulay*> <everywhere I went in town, the people knew about them, and said nothing . . . I found this final, closed, *relentless* silence everywhere—*Wolfe*> **Merciless** differs from *relentless* and *unrelenting* mainly in stressing an innate capacity for inflicting cruelty without qualms or an unparalleled fierceness or savagery; otherwise it carries much the same implications <a *merciless* whipping> <harder than any man could be—quite *merciless*—*Cloete*> **Ana** inexorable, obdurate, adamant, *inflexible: inevitable, *certain: *fierce, ferocious, cruel, fell: malignant, malevolent (see MALICIOUS)

group *n* **Group**, **cluster**, **bunch**, **parcel**, **lot** mean a collection or assemblage of persons or of things. **Group** implies some unifying relationship, however tenuous (as a similarity of activity, of purpose, or of nature), and ordinarily a degree of physical closeness (a *group* waiting for the bus) (the *group* of workers unloading the cargo) (a *group* of partisans) (a *group* of soldiers in the picture) (man can only make progress in cooperative *groups*—*Bagehot*) (a *group* of statues in the museum) (a *group* of islands) (an ethnic *group*) **Cluster** basically refers to a group of things (as fruits or flowers) growing closely together (a *cluster* of grapes) (climbing roses producing *clusters* of flowers) In extended use the term may be applied to persons or things that form distinguishable groups and especially smaller groups within larger masses (the people at the reception gathered in *clusters*) (clusters of small yachts in the harbor) (cataloging the *clusters* of stars) (Clem Henry's house was in a *cluster* of Negro cabins below Arch's big house—*Caldwell*) **Bunch** (see also BUNDLE) often replaces *cluster* in referring to natural groups of certain edible fruits (as grapes or bananas). In its extended uses it implies a natural or homogeneous association of like persons or things and carries a weaker implication of a common origin or point of growth than *cluster* usually does (Clara is by far the best swimmer of the *bunch*) (a *bunch* of keys) (girls with *bunches* of streamers which they flicked in your face as you passed—*Bennett*) (a piece about a *bunch* of hillbillies in the South, each one almost precisely as crazy and lovable as the next—*Gibbs*) **Parcel** and **lot** refer to a separate or detached collection of persons or things. **Parcel** in this sense (see also PART, BUNDLE) usually carries some implication of disapproval of the thing so grouped (a *parcel* of lies) (became merely a . . . *parcel* of tricks—*Binyon*) (lessons to a *parcel* of young girls thumping out scales with their thick fingers—*Galsworthy*) (a *parcel* of giddy young kids—*Mark Twain*) **Lot** applies to persons or things that are associated or shared for one reason or another be thought of or treated as a whole (the auctioneer sold the books in *lots*) (the men in this battalion are an interesting *lot*) (the future generation of scientists will be a sorry *lot* if the best teachers leave the academic circles—*Rabi*) (till you have read a good *lot* of the Fathers—*Keble*) (I could ignore the fuzzy doings on the screen, knowing that if you have slept through one you've slept through the *lot*—*Malcolm*) When the plural is used, the idea of grouping is lost or obscured and the implication of numbers or quantity increases (I have *lots* of time for that) (there were *lots* and *lots* of children there)

Con *suave, urbane, bland, smooth: unctuous, oily, slick, soapy, *fulsome

guarantee *n* **Guarantee**, **guaranty**, **surety**, **security**, **bond**,

bail are comparable when they mean either something that is given or pledged as assurance of one's responsibility (as for the payment of a debt, the fulfillment of a promise or obligation, or the performance of a duty) or the person who accepts such responsibility and gives or pledges something by way of assurance. *Guarantee* and *guaranty* generally imply acceptance and especially contractual acceptance of this responsibility for another in case of his default; they may, however, imply an agreement to ensure for another the possession or enjoyment of a right, privilege, or prerogative. The words may be used interchangeably not only of something given as a pledge or of the person making the pledge but also of the contract or promise accepting the responsibility or obligation. In idiomatic use, however, they are often distinguished, *guarantee* being more often applied to the person and *guaranty* the preferred term for the contract or promise; either word is acceptable as a designation for what is given or pledged (stand *guarantee*) (the small nations begged for *guaranties* against invasion) (his parents gave a *guaranty* for his good behavior) (he even threatened the King of England with interdict, if, as *guarantee* of the treaty, he should enforce its forfeitures—*Milman*) (many laws which it would be vain to ask the Court to overthrow could be shown, easily enough, to transgress a scholastic interpretation of one or another of the great *guaranties* in the Bill of Rights—*Justice Holmes*) *Surety* and *security* stress provision for the protection of a person who is in a position to lose by the default of another. Both words are employable as designating either the person who accepts the responsibility or the money or property turned over to be forfeited in case of default. However, *surety* is the usual term for the person or corporation that serves as guarantee or guarantor for another, and *security* for the money, property, or certificates of ownership turned over to a creditor, beneficiary, or obligee or hypothecated for a loan and forfeitable in the case of one's own or another's default (every employee handling money is obliged to find a *surety*) (a contractor provides a *surety* (as an insurance corporation) for his performance of a job according to the terms of the contract, but he gives *security* to the bank that loans him money to begin the job) (unsecured debts are those for which no *security* has been given to the creditors) Though *guarantee* and *surety* usually imply a legal status and documentary proof of that status, they are also subject to more general use in which no such proof is implied, and they come close to *certainty* or *assurance* in

meaning <devoted exclusively to clocks, watches, and the telling of time . . . a museum has a virtual *guarantee* of popularity—*Kirby*> <modern men have the additional *surety* of Christ the mediator—*Bush*> **Bond** implies documentary proof of one's acceptance of an obligation and a legally binding promise to repay the holder of that document a sum of money due him on one's own account or in case of the default of another for whom one serves as surety. *Bond*, therefore, is used either of the document which is given as a pledge <government *bonds*> <give a *bond* as proof of one's suretyship> <his word is as good as his *bond*> or for the person or corporation that serves as a legally bound surety <go *bond* for another> <the King of England shall be *bond* for him—*Pepys*> **Bail** implies responsibility for the sure appearance, at the time prescribed by the court, of a prisoner who has been released from jail pending his trial. The term is applicable to the security given and forfeitable if the prisoner does not return <the court asked \$5000 as *bail*> <the prisoner was not released because the *bail* was not forthcoming> or to the person serving as surety and providing the security <sirrah, call in my sons to be my *bail*—*Shak.*> <his *bail* produced him in court at the appointed time> or to the state of being out of prison and in the custody of a surety <admit to *bail*> <be out on *bail*>

guide *vb* **Guide, lead, steer, pilot, engineer** are comparable when meaning to direct a person or thing in his or its course or to show the way which he or it should follow. **Guide** usually implies assistance either by means of a person with intimate knowledge of the course or way and of all its difficulties and dangers <some heavenly power *guide* us out of this fearful country—*Shak.*> <how shall I tread . . . the dark descent, and who shall *guide* the way?—*Pope*> <men who *guide* the plough—*Crabbe*> <the teacher, the parent, or the friend can often do much . . . to *guide* the pupil into an enjoyment of thinking—*Eliot*> or by means of something (as a light, the stars, a principle, or a device on a machine) which prevents a person or thing from getting off course or going astray <the fine taste which has *guided* the vast expenditure—*Disraeli*> <a vehement gloomy being, who had quitted the ways of vulgar men, without light to *guide* him on a better way—*Hardy*> **Lead** stresses the idea of going in advance to show the way and, often, to keep those that follow in order or under control <a band *led* each division of the procession> <the flagship *led* the fleet> <he longed . . . to *lead* his men on to victory—*Marryat*> <this influence should rather *lead* than drive—*Eliot*> Often, especially in idiomatic phrases, *lead* implies the taking of the initiative, the giving of example, or the assumption of the role of leader,

director, or guide <he . . . allured to brighter worlds, and *led* the way—*Goldsmith*> <*lead* people astray by giving them a bad example> <*led* the van in solving problems "susceptible of certain knowledge"—*Sellery*> **Steer** stresses the guidance by one able to control the mechanism which determines the course or direction (as of a boat, an automobile, an airplane); it carries a stronger implication of governing or maneuvering than any of the preceding terms <*steer* a ship safely through a narrow channel> <fortune brings in some boats that are not *steered*—*Shak.*> <I eagerly desire to *steer* clear of metaphysics—*Loves*> <secure in the faith that his reasoned intelligence will *steer* him correctly at all times—*H. N. Maclean*> **Pilot** implies the assistance of a person competent to steer a vessel safely through unknown or difficult waters (as into or out of a port) <*pilot* a vessel through Ambrose Channel into New York harbor> In its extended use it implies guidance over a course where one may easily lose one's way because of its intricacy or may run afoul of various obstacles or dangers <their room steward *piloted* them to the ship's dining room> <we know not where we go, or what sweet dream may *pilot* us through caverns strange and fair of far and pathless passion—*Shelley*> <*piloting* important bills through the Senate—*Current Biog.*>

Engineer means to lay out and manage the construction of some project (as a tunnel under a river, a highway, or a bridge <a firm of experts was called upon to *engineer* the irrigation project> but in its more common extended sense it means to serve as a manager in carrying through something which requires contrivance and maneuvering <*engineer* a resolution through the House of Representatives> <*engineer* an elaborate fraud> <the corner in grain *engineered* by parties in Chicago—*Gould*> <the coup d'état was *engineered* by high-ranking army officers> *Ana* conduct, convoy, escort, chaperon, *accompany: direct, manage, control, *conduct

gulf, chasm, abysm, abyss basically denote a hollow place of vast width and depth in the earth. *Gulf* and *chasm* suggest a depth which, though vast, is still measurable; *abysm* and *abyss* suggest immeasurable depth. **Gulf** is the most general term and may properly be used of any wide and deep hollow place <slippery cliffs arise close to deep *gulfs*—*Bryant*> In its extended use *gulf* suggests separation by a great, often unbridgeable distance <the broad and deep *gulf* which . . . divides the living from the dead—*Inge*> <a mere physical *gulf* they could bridge . . . but the *gulf* of dislike is impassable and eternal—*Shaw*> **Chasm** adds the implication of a deep and sometimes wide breach in a formerly solid surface <the *chasm* of the Grand Canyon, worn by the Colorado river> <the brink of a precipice, of a *chasm* in the earth over two hundred feet deep, the sides sheer cliffs—*Cather*> In extended use *chasm* still stresses a sharp break in continuity <those *chasms* of

momentary indifference and boredom which gape from time to time between even the most ardent lovers—*Huxley* > *Abysm* and *abyss* may designate the bottomless gulf or cavity of ancient cosmogonies and both have been applied to hell when thought of as a bottomless pit; in other applications they usually connote not only fathomlessness but also darkness and horror. *Abysm* is somewhat old-fashioned <when my good stars . . . have empty left their orbs, and shot their fires into the *abysm* of hell—*Shak.*> <what seest thou else in the dark backward and *abysm* of time?—*Shak.*> *Abysm* is commoner in general modern use <the *abyss* of Tartarus, fast secured with iron gates—*Thirlwall*> and, like *abyss*, it carries over into its extended uses the notion of vast, immeasurable void <the respectability and prosperity of the propertied and middle classes who grew rich on sweated labor covered an *abyss* of horror—*Shaw*>

habit *n* 1 **Habit, habitude, practice, usage, custom, use, wont** are comparable when they mean a way of behaving, doing, or proceeding that has become fixed by constant repetition. These words may be used also as collective or abstract nouns denoting habits, usages, or customs, considered as a directing or impelling force. **Habit** refers more often to the way of an individual than to the way of a community or other group; the term applies to a way of behaving (as in acting or thinking) which has become so natural to one through repetition that it is done unconsciously or without premeditation <he has formed the *habit* of fingering a coat button when he speaks in public> <break a bad *habit*> <*habits* acquired very early feel, in later life, just like instincts; they have the same profound grip—*Russell*> <it was her *habit* to write chatty letters to a number of politicians . . . discussing with them the maneuvers of politics—*R. P. Randall*> <we have two opinions: one private . . . and another one—the one we use—which we force ourselves to wear to please Mrs. Grundy, until *habit* makes us comfortable in it—*Mark Twain*> **Habitude** more often suggests an habitual or usual state of mind or attitude than an habitual response to a given stimulus <I think, Pericles, you who are so sincere with me are never quite sincere with others. You have contracted this bad *habitude* from your custom of addressing the people—*Landor*> <the sense of fitness and proportion that comes with years of *habitude* in the practice of an art—*Cardozo*> **Practice** (see also *practice n* under PRACTICE *vb*) applies to a habit which is by its nature an act or a method which is followed regularly and often by choice <it is his *practice* to rise early each morning and take a walk before breakfast> <it is the *practice* of this surgeon to give local anesthetics wherever possible> <the team made a *practice* of leaving their scenarios unfinished until actual production—*Current Biog.*> **Usage** (see also FORM 3) applies mainly to a practice that has been so long continued and has been adopted so generally that it serves to guide or determine the action or choice of others <it is the

usage in certain European countries to breakfast on a roll and a cup of coffee> <the . . . inveterate *usages* of our country, growing out of the prejudice of ages—*Burke*> <makes it difficult . . . to earn a living in a business community without yielding to its *usages*—*W. H. Hamilton*> Specifically, in reference to the meanings of words, grammatical constructions, and idiomatic forms where there is a difference of opinion, *usage* implies the long-continued and established practice of the best writers and speakers as the determining factor <all senses of all words are founded upon *usage*, and nothing else—*Paley*> **Custom** applies to a habit, practice, or usage that has come to be associated with an individual or a group by reason of its long continuance, its uniformity of character, and, sometimes, its compulsory nature <it is his *custom* to smoke each evening after dinner> <in contemporary society it is not a fashion that men wear trousers; it is the *custom*—*Sapir*> <is it the *custom* in your church for the minister to greet each member of his congregation?> <it is not the *custom* to speak from the floor before being recognized by the presiding officer> Often *custom* denotes an established practice or usage or the body of established practices and usages of a community or of a people that has the force of unwritten law; thus, the English common law is based upon *custom* rather than upon legislation <the answer, "It is the *custom*," is final for the savage, as for the lady of fashion. There is no other reason why they behave in a certain way—*Inge*> Consequently, *custom* when used as a collective or abstract noun commonly implies a force as strong, as binding, and as difficult to escape as that exerted by those who enforce the law of the land <and *custom* lie upon thee with a weight, heavy as frost, and deep almost as life—*Wordsworth*> Use (see also USE *n* 1) commonly denotes an action, manner, rite, or practice that is customary to an individual or a particular group and distinguishes him or it from others <more haste than is his *use*—*Shak.*> <it had been a family *use* . . . to make a point of saving for him anything which he might possibly eat—*Mary*

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

Austin) <change and turmoil . . . are surface phenomena, while, underneath, life is an affair of *use* and *wont* and persists substantially unchanged—*Moberly*> *Wont* usually applies to a habitual manner, method, or practice distinguishing an individual or group; it not only differs little from *use* except in its narrower range of application but is often coupled with *use* as a term of equivalent content <the painter followed the religious *use* and *wont* of his time—*Oliphant*> <sad beyond his *wont*—*Tennyson*> <Renan . . . begins after the romantic *wont* by an outburst of sympathy and comprehension for the Parthenon and the Athenians and Pallas Athene—*Babbitt*>

habitat, **biotype**, **range**, **station** are comparable in their technical biological senses in which they agree in denoting the place in which a particular kind of organism lives or grows. **Habitat** refers especially to the kind of environment (as desert, seacoast, grassland, marsh, or forest) in which a kind of plant or animal is normally found. **Biotype** stresses the uniformity of an environment or habitat type and the consequent uniformity of its living population. **Range** distinctively applies to the geographical extent of a habitat or biotype or to the region in which a plant or animal naturally grows or lives and throughout which it is distributed. **Station** may be used in place of *habitat* or *range*, but it is often restricted to the most typical part or to the one at which a given specimen has been collected.

habitation, **dwelling**, **abode**, **residence**, **domicile**, **home**, **house** are comparable when they mean the place where one lives. All may apply to an actual structure or part of a structure in which one lives, and all but the last also may apply to the place (as a farm, a village, or a nation) where such a structure is situated. **Habitation** suggests permanency of occupancy and may apply to a building or to an inhabited place <the properties are much smaller than they are in the pastoral region, and the *habitations* are scattered—*P. E. James*> <Shakespeare . . . chose Verona for her *habitation* because of its agreeably sounding name—*Bennett*> <what did it matter where the body found itself so long as the soul had its serene *habitations*—*W. J. Locke*> **Dwelling** typically refers to a building or shelter for a single family or individual, often as opposed to a building used in business <laboriously dug a cave for his *dwelling* and built a floating garden of logs upon which he raised vegetables—*Amer. Guide Series: Me.*> <joy of heav'n, to earth come down; fix in us Thy humble *dwelling*, all Thy faithful mercies crown—*Wesley*> **Abode** may apply to a building, but more often it designates a place as a seat or center of occupancy <the view that other planets may be the *abode* of life> <Tara, the *abode* of the high king of Ireland—*H. O. Taylor*> <her home ever to a certain extent had been an *abode* of the arts—*Osbert Sitwell*> Distinctively, *abode* may stress transience <the traveler reached his night *abode* and was ascending the stairs—*Upton Sinclair*> **Residence** in reference to a building may be somewhat formal and convey a suggestion of dignity and substance <the architects . . . devoting their talents to designing homes for the people as well as *residences* for the rich—*Canadian Jour. of Economics & Political Science*> <the houses are too superior to be called villas; the house agents call them *residences*—*Susan Gillespie*> But *residence* also may refer to an area or place (as a town or state) where one lives and in such use carries specific legal implications (as of actual occupancy or intention to remain) <no one may vote in a given election in more

than one place; and this place must be the voter's legal *residence*, however little of his time he may actually spend there—*Ogg & Ray*> <the term "*residence*" means the place of general abode; the place of general abode of a person means his principal, actual dwelling place in fact, without regard to intent—*U. S. Code*> **Domicile** in reference to a building carries no special connotations <grandfather's *domicile* was considered an architectural curiosity; it was an oversized log cabin with a second story reached by an outside staircase—*Barkley*> In wider reference to a place it may be quite neutral <with the advance of astronomy, the *domicile* of the Deity had been transposed to the unknown center of the universe—*S. F. Mason*> or it may have very definite legal implications (as of being the seat of one's principal and permanent home and therefore the place where one has a settled connection for such important legal purposes as determination of civil status and jurisdiction to impose personal judgments and taxes) in which it is often specifically contrasted with *residence* <the term "*domicile*" has been defined by the courts of one state as follows: "The *domicile* of a person is where he has his permanent home and principal establishment, to which, whenever he is absent, he intends to return—*Ackerman*" <*domicile* is not to be confused with *residence*. It is of a far more permanent nature, as where a man establishes a home in a jurisdiction with the intention of remaining there more or less permanently. The six weeks' *residence* in Reno, with which we are all familiar, does not establish legal *domicile* if the *residence* is solely for the purpose of obtaining a divorce—*Payton*> **Home**, like the foregoing terms, is used either of a structure or a place of residence or sometimes of origin <had lived in New York for years but still thought of Georgia as his *home*> <built a *home* in the new section of town> but of all these terms *home* distinctively conveys the notion of one's dwelling as the seat and center of family life and the focus of domestic affections <without hearts there is no *home*—*Byron*> <some women can make a truer *home* of a shanty than others can of a mansion> Unlike the other terms *house* is not used of a place as distinct from a structure; basically it applies to a building used or intended for use as a dwelling place and, especially as compared with *home*, is a very general and neutral term; thus, a landlord's *house* may become the *home* of a tenant <a speculative builder of *houses*>

Ant occasional —*Con* *infrequent, sporadic, rare, uncommon

habituat, **accustom**, **addict**, **inure** mean to make used to something. **Habituat** distinctively implies the formation of habit through repetition <by constant practice she *habituat*ed herself to accurate observation> <to *habituat*e ourselves, therefore, to approve . . . things that are really excellent, is of the highest importance—*Arnold*> <language blunter than the protected executive ears were *habituat*ed to—*S. H. Adams*> <a generation *habituat*ed to regard properly inscribed paper as the principal, if not the only, symbol of wealth—*G. W. Johnson*> **Accustom** implies adjustment to something by frequent or prolonged experience or by constant exposure <*accustom* oneself to cold> <*accustom* students to severe criticism> <this opportunity to *accustom* the girl to sea life by a comparatively short trip—*Conrad*> To *accustom* oneself to nagging is to become inured to nagging by another person; to *habituat*e oneself to nagging is to form the habit of nagging others. Sometimes *accustom* also connotes reconciliation by

overcoming one's resistance or distaste <gradually *accustomed* his ears to the din of the factory> **Addict**, which is used chiefly in a reflexive construction or in the passive, adds to *habituate* the implication of overindulgence or surrender to inclination <the Japanese as a nation are *addicted* to sight-seeing—*Faubion Bowers*> <*addicted* to study> <he has always . . . been *addicted* to prefacing his poems with quotations and echoing passages from other poets—*Edmund Wilson*> and frequently refers to bad habits <*addicted* to gambling> <a man gross . . . and *addicted* to low company—*Macaulay*> <Hugh tried to protest and to explain that he was not *addicted* to the habit of drinking—*Anderson*> and specifically to compulsive use of habit-forming drugs. **Inure** is a somewhat formal word that is a close synonym of *accustom* <a man *inured* to hard physical labor—*G. W. Johnson*> but distinctively it may suggest a becoming callous or indifferent as a result of repeated exposure <for men's minds have been *inured* to situations of measurable and surmountable danger—*Romulo*> <afraid that reality could not be endured unless the mind had been gradually *inured* to it—*Krutch*>

handle *vb* 1 **Handle, manipulate, wield, swing, ply** are comparable when they mean to deal with or manage with or as if with the hands typically in an easy, skillful, or dexterous manner. **Handle** implies the acquirement of skill sufficient to accomplish one's ends (a child can be taught early to *handle* a spoon, but it takes longer to teach him to *handle* a knife and fork) (tools to be *handled* with care—*T. S. Eliot*) (he knows how to *handle* men so as to get what he wants out of them) (Richelieu sent Charnacé out to *handle* that situation—*Belloc*) **Manipulate** implies dexterity and adroitness in handling. Especially in its basic use the term suggests mechanical or technical skill (able to *manipulate* the most delicate scientific apparatus) (the kind of courage required for mountaineering, for *manipulating* an airplane, or for managing a small ship in a gale—*Russell*) In its extended sense the term often specifically implies crafty or artful and sometimes fraudulent handling for the attainment of one's own ends (a small group of men by *manipulating* the convention were able to procure the nomination of their candidate) (agencies by which some human beings *manipulate* other human beings for their own advantage—*Dewey*) **Wield** in its most common sense implies mastery and vigor in the handling of an implement (as a tool or weapon) (he knows how to *wield* an axe) (*wield* a sword) (navvies *wielding* their hammers in the streets—*Ellis*) **Wield** also may be employed with reference to such an instrument as a writer's pen, an artist's brush, or a king's scepter to imply not the vigorous movement of the implement itself but its effectiveness as a tool in producing a desired result or as a symbol of power; thus, to *wield* a scepter means to exercise sovereign power or to hold sway (of Wu Tao-tzu it is said that it seemed as if a god possessed him and *wielded* the brush in his hand—*Binyon*) The term may also take for its object such words as authority, influence, or power when their masterful exercise is implied (a great editorial writer *wields* a tremendous influence over the minds of men) (her newborn power was *wielded* . . . by unprincipled and ambitious men—*De Quincey*) **Swing** may be used in place of *wield* when a flourishing with a sweep is also suggested (he *swings* his golf club with great effectiveness) In extended and often informal use it may mean to handle successfully, often in spite of great difficulties (can *swing* 20,000 workers behind the Party line—*Arke*) (the corporation was able to *swing* its bond issue) (he could not *swing* the deal) **Ply** may be used in place of *handle* or *wield* when great diligence or industry are also suggested (go *ply* thy needle; meddle not—*Shak.*) (plying patiently the chisel and mallet—*Montague*) (plied his oars) The term may also be used when constant and diligent employment (as of a power or faculty or at a trade) is also suggested (the housewife *plied* her own peculiar work—*Wordsworth*) (plying his trade as a bookseller) *Ana* *swing, flourish, brandish, shake, wave: *direct, aim, point, level, train, lay

hang *vb* 1 **Hang, suspend, sling, dangle** mean to place or be placed so as to be supported at one point or on one side, usually a point or side at the top. **Hang** typically implies a fastening to an elevated point or line so as to allow motion to what falls from such a point or line (hang the washing on a line) (hundreds of plums *hang* from the tree's branches) (hang curtains) (carcasses of lamb were *hung* in the butcher's window) (hang out a flag from a window) In extended use *hang* often implies a position or a relation suggestive of hanging, such as that of something poised or seemingly poised in the air (a dim, oblong patch of light *hanging* slantwise in the darkness—*O'Flaherty*) (just above its [the poplar's] pointed tip, *hung* the hollow, silver winter moon—*Cather*) or of one thing dependent upon another (a good deal . . . *hangs* on the meaning . . . of this short word—*T. S. Eliot*) or of something clinging or adhering to something else (she *hangs* on his arm) (thereby *hangs* a tale—*Shak.*) (most heavily remorse *hangs* at my heart!—*Shelley*) **Suspend** is preferred to *hang* (or *hung*) when support from a point above suggests flexibility, free motion or movement, or a display of skill (hams, tongues, and flitches of bacon were *suspended* from the ceiling—*Irving*) (others [of the rebels] were *suspended* from the boughs of the oak—*Keightley*) *Suspend* is also employed more often than *hang* when a floating in a fluid (as air or water) is suggested (see SUSPENDED) (wasplike flies barred with yellow *suspended* themselves in the air—*Jefferies*) **Sling** basically implies the use of a sling for hoisting or lowering heavy or bulky articles with ease. Sometimes the term implies a hanging over the shoulder, or arm, or similar support (as for ease in carrying) (slung a basket on her arm) (sling a scaffold from a roof) **Dangle** implies a hanging loosely in such a manner as to swing or sway or twist to and fro (dangled his cane from a finger) (the children sat on the high wall, their legs *dangling*) (for all might see the bottlenecks still *dangling* at his waist—*Cowper*) In extended use *dangle* usually implies dependence on someone, often a loose dependence or connection, in hope of a reward for attentions or services (she keeps several suitors *dangling*) (dangling to them the lures of levity and life—*Beerbohm*)

happen *vb* **Happen, chance, occur, befall, betide, transpire** are comparable when they mean to come to pass or to come about. **Happen** is the ordinary and general term and may imply either obvious causation or seeming accident, either design or an absence of design; in its simplest use the term takes the event, situation, or circumstance as its subject (the incident *happened* two weeks ago) but it may take the impersonal *it* or the anticipatory *there* as its subject (it *happened* that at Dante's time thought was orderly and strong and beautiful—*T. S. Eliot*) (there *happened* to be no visitors that day) In still other phrases *happen* may take a person as the subject, especially when the verb implies a coming upon someone or something, or a coming into a place more or less casually or accidentally, rather than a coming to pass (the miners *happened* upon a vein of gold) (I go nowhere on purpose: I *happen* by—*Frost*) (happened on a cottage almost hidden in elm tree boughs—*Times Lit. Sup.*) (happened upon a remarkable and neglected volume—*Laird*) (hoping that no wayfarer would *happen* along the lane for the next hour or so—*Conrad*) **Chance** is closer to *happen* in its idiomatic uses than any of the other words, and it too is found occasionally with the event as the subject; however, it differs from *happen* in uniformly implying absence of design or apparent lack of causation (if a bird's nest *chance* to be before thee—*Deut* 22:6) (whenever it *chanced* that the feelings of people were roused—*Kinglake*) (things they themselves *chance* to know—*Replier*) **Occur** in distinctive use carries an implication of presenting itself (as to sight, to consciousness, or to one's thoughts); it is, in general, interchangeable with *happen* only when a definite event or incident or something that actually takes place is the subject (the accident *happened* yesterday) (the bombing raids on the city *occurred* early in the war) (it is necessary for the physicist to arrange the situation so that phenomena shall *occur* in which . . . the underlying simplicity will come to light—*Darrow*) Consequently *occur* is preferable to *happen* in negative expressions when the idea of presentation in the realm of fact is uppermost (a naturalistic optimism which regarded an actual event as . . . of superior value to an event which did not *occur*—*Inge*) (this is possible in theory, but, actually, never seemed to *occur*—*Heiser*) This fundamental implication of presentation to sight or mind allows *occur*, unlike *happen*, to be used to suggest a coming to one's mind (that characters deteriorate in time of need possibly did not *occur* to Henchard—*Hardy*) or a meeting one's eyes or ears (as in print or speech) (the word seldom *occurs* except in poetry) or a turning up or appearing (another instance of this disease may not *occur* for several years) (corundum *occurs* in crystals, masses, and grains) **Befall** and the less common **betide** are used in preference to any of the preceding words, especially in poetry or in literary prose, when there is an implication of a superior power determining events or of the lack of human power to foreknow or forestall them (anxiety lest mischief should *befall* her—*Wordsworth*) (a conscienceless opening of one's hands for all that may *betide* under benign sun or watchful arrowy moon—*Times Lit. Sup.*) (the fate which Beria meted out to so many should now have *befallen* him—*Muggeridge*) **Transpire**, which basically means to give off or escape in the form of a vapor, retains this notion in much of its extended use, in which it implies a leaking out so as to become known or

apparent (it soon *transpired* that there were two . . . conceptions of this problem—*Malik*) (it had just *transpired* that he had left gaming debts behind him—*Austen*) but through a semantic shift the term has developed a value, disapproved by some rigorous purists, in which it is interchangeable with *happen* or *occur* (I gave an honest account of what *transpired*—*Michener*) (all memorable events . . . *transpire* in morning time and in a morning atmosphere—*Thoreau*)

happiness, felicity, beatitude, blessedness, bliss all denote the enjoyment or pleasurable satisfaction that goes with well-being. **Happiness** is the generic term applicable to almost any state of enjoyment or pleasurable satisfaction especially as based on one's well-being, security, effective accomplishments, or satisfied wishes. **Felicity**, denoting intense happiness is suited chiefly to formal expressions (as of congratulation) or dignified description. **Beatitude** is supreme felicity (to understand by honorable love romance and beauty and *happiness* in the possession of beautiful, refined, delicate, affectionate women—*Shaw*) (I know no one more entitled by unpretending merit, or better prepared by habitual suffering, to receive and enjoy *felicity*—*Austen*) (we may fancy in the happy mother's breast a feeling somewhat akin to that angelic *felicity*, that joy which angels feel in heaven for a sinner repentant—*Thackeray*) (about him all the Sanctities of Heaven stood thick as stars, and from his sight received *beatitude* past utterance—*Milton*) (a sense of deep *beatitude*—a strange sweet foretaste of Nirvana—*Beerbohm*) **Blessedness** implies a feeling of being highly favored, especially by the Supreme Being, and often, a deep joy arising from the purest domestic, benevolent, or religious affections; **bliss** adds to *blessedness* a suggestion of exalted or ecstatic felicity; both *blessedness* and *bliss*, like *beatitude*, often refer to the joys of heaven (thrice blest whose lives are faithful prayers, whose loves in higher love endure; what souls possess themselves so pure, or is there *blessedness* like theirs?—*Tennyson*) (*bliss* was it in that dawn to be alive, but to be young was very Heaven!—*Wordsworth*)

Ana contentedness or content, satisfiedness or satisfaction (see participial adjectives at SATISFY): *pleasure, enjoyment, delight, delectation, joy, fruition

Ant unhappiness —*Con* despondency, despair, desperation, hopelessness, forlornness (see under DESPONDENT): *distress, misery

happy 1 fortunate, *lucky, providential

Ana *accidental, incidental, fortuitous, casual: *favorable, auspicious, propitious, benign: opportune, timely (see SEASONABLE)

Ant unhappy

Ana *effective, efficacious, efficient, effectual: telling, cogent, convincing (see VALID): pat, *seasonable, well-timed: right, *correct, nice

Ant unhappy

3 cheerful, *glad, lighthearted, joyful, joyous

Ana contented, satisfied (see under SATISFY): gratified, delighted, pleased, gladdened, rejoiced (see PLEASE)

Ant unhappy: disconsolate —*Con* depressed, weighed down, oppressed (see DEPRESS): *despondent, despairing, desperate, forlorn, hopeless

happy-go-lucky *random, haphazard, hit-or-miss, chance, chancy, casual, desultory

harangue *n* oration, *speech, address, lecture, talk, sermon, homily

Ana rant,rodomontade, *bombast

harass *harry*, *worry, annoy, plague, pester, tease, tantalize

Ana *bait, badger, hound, ride, hector, chivy, heckle: vex, irk, bother (see ANNOY)

Con *comfort, solace, console: *relieve, assuage, alleviate
harbinger *forerunner, precursor, herald

harbor *n* **Harbor, haven, port** are comparable because they have at one time or another meant a place where ships may ride secure from storms. **Harbor** applies to a portion of a large body of water (as the sea) that is partially or almost wholly enclosed so that ships or boats may enter it for safety from storms or may be anchored or moored there in security (two promontories whose points come near together enclose the harbor) (the great natural harbor at Sydney, Australia) In extended uses *harbor* carries over the notion of quiet and safety inherent in its basic use (the beauty and the harbor of a snug house—*Le Sueur*) **Haven** is chiefly literary or occurs in names of towns and cities where a natural harbor (as a bay, an inlet, or a river mouth) exists and where boats may go for safety during a storm (Milford Haven in south Wales) (a blessed haven into which convoys could slip from the submarine-infested Atlantic—*Stewart Beach*) More than the other words here considered, it connotes a refuge or place of quiet in the midst of storms (my . . . only haven . . . is in the arms of death—*Carlyle*) (the Colony acquired an unsavory reputation for providing a friendly haven for pirates—*Amer. Guide Series: R.I.*) **Port** denotes both a place of security for ships and one suitable for landing men or goods (to set me safe ashore in the first port where we arrived—*Swift*) Consequently, in extended use, it suggests a destination or goal (me . . . always from port withheld, always distressed—*Cowper*) In commercial use *port* applies to a place, sometimes a harbor, sometimes, especially in place-names, a city or town and its harbor, but still more often in the case of the great ports of transatlantic and transpacific shipping all the approaches, all the inlets, all the facilities (as docks, wharves, and offices) involved in the business of loading and unloading ships or of embarking and disembarking passengers (the ports of New York, Cherbourg, and Southampton)

harbor *vb* **Harbor, shelter, entertain, lodge, house, board** are comparable when they mean to provide a place (as in one's home, quarters, or confines) where someone or something may stay or be kept for a time. **Harbor** usually implies provision of a place of refuge especially for a person or an animal that is evil or hunted or noxious (harbor thieves) (cellars that harbor rats and cockroaches) (deportation . . . is simply a refusal by the Government to harbor persons whom it does not want—*Justice Holmes*) (what good is he? Who else will harbor him at his age for the little he can do?—*Frost*) In its extended sense the term suggests the receiving into and cherishing in one's mind of thoughts, wishes, or designs and especially of those that are evil or harmful (nothing is more astonishing to me than that people . . . should be capable of harboring such weak superstition—*Pope*) (I did not wish him to know that I had suspected him of harboring any sinister designs—*Hudson*) **Shelter**, more often than *harbor*, takes for its subject the place or the thing that affords (as distinguished from the person that supplies) protection or a place of retreat; it also distinctively suggests a threat to one's comfort or safety (as by the elements, by pursuers or attackers, or by a bombardment); the term further suggests, as *harbor* does not, a covering or screening (in such a season born, when scarce a shed could be obtained to shelter him or me from the bleak air—*Milton*) (in Craven's Wilds is many a den, to shelter persecuted men—*Wordsworth*) (sycamore trees sheltered the old place from the north and west—*Gogarty*) (wouldn't you like to shelter somebody in danger, or attempt a rescue, or do something

heroic?—*Black*) **Entertain** basically implies the giving of hospitality to a person as a guest at one's table or in one's home. The term often suggests special efforts to provide for his pleasure and comfort (be not forgetful to entertain strangers: for thereby some have entertained angels unawares—*Heb 13:2*) In its extended sense *entertain*, like *harbor*, implies admission into the mind, and consequent consideration, of ideas, notions, and fears, but unlike *harbor*, apart from the context it carries no connotations of their good or evil, benign or noxious, character, or of any prolonged dwelling upon them, or even of deep and serious consideration (it had been Eudora's idea that jealousy had gone out. It wasn't entertained by smart people; it was bourgeois—*Mary Austin*) (no proposal having for its object the readmission of Master Byron to the academy could be entertained—*Shaw*) (her brothers and sister privately entertained a theory that their mother was rather a simpleton—*Sackville-West*) **Lodge** (see also RESIDE) implies the supplying or affording a habitation, often a temporary habitation; often it suggests provision merely of a place to sleep and carries no implications of feeding or entertaining (Mrs. Brown will lodge three of the party for the weekend) (every house was proud to lodge a knight—*Dryden*) In the extended use of this sense *lodge* may imply reception as if of a guest or denizen, not only, like *harbor*, into the mind but into anything thought of as a receptacle or as a place where a thing may be deposited or imbedded (the isolated, small family unit of the patriarchal type, with formal authority lodged in the father—*Dollard*) (so fair a form lodged not a mind so ill—*Shak.*) (a song . . . had lodged in his memory like a cork stuck fast from the tide in the cleft of shore rock—*Victor Canning*) **House** usually implies the shelter of a building with a roof and side walls that affords protection from the weather (he could find no place in the village to house his family suitably) (the rich man has fed himself, and dressed himself, and housed himself as sumptuously as possible—*Shaw*) (house gardening implements in a shed) (house an art collection in the new library building) *House* is somewhat rare in extended use, but it usually implies enclosing or confining in a particular place (the universal does not attract us until housed in an individual—*Emerson*) (so timorous a soul housed in so impressive a body—*Long*) **Board** may mean to provide a person with meals at one's table (we cannot lodge and board a dozen or fourteen gentlewomen—*Shak.*) (the question is, will she board as well as lodge her guest?—*Clara Morris*) but often it implies provision of both room and meals for compensation (Mrs. Jones boards four teachers at her home) (four teachers board at Mrs. Jones's)

Ana foster, cherish, nurture, *nurse: *hide, conceal, secrete: protect, shield (see DEFEND)

Con *eject, expel, oust, evict: *banish, exile, deport: *exclude, eliminate, shut out

hard **I** solid, *firm

Ana compact, dense, *close: consolidated, compacted, concentrated (see COMPACT *vb*): *hardened, indurated, callous

Ant soft —*Con* fluid, *liquid: flabby, flaccid, *limp: pliant, pliable, *plastic: flexible, *elastic, supple, resilient, springy

2 Hard, difficult, arduous are comparable when applied to tasks for mind or body to mean demanding great toil or effort in reaching the appointed or the desired end. **Hard** is the simpler, blunter, and more general term; it implies the opposite of all that is implied by *easy*, but usually suggests nothing more specific (a hard lesson) (a hard job) (a hard book to understand) (your easy reading,

Sheridan said, is "damned *hard* writing"—*Montague* > (the American habit of tipping . . . is a *hard* one to break—*Joseph*) **Difficult** commonly implies the presence of obstacles to be surmounted or of complications to be removed; it therefore suggests the necessity for skill, ingenuity, sagacity, or courage > ([the tutor] armed for a work too *difficult* for thee; prepared by taste, by learning, and true worth, to form thy son, to strike his genius forth—*Cowper*) > (men like fly-fishing, because it is *difficult*; they will not shoot a bird sitting, because it is *easy*—*Russell*) *Difficult* is more widely applicable than *hard*, because it often means specifically hard to understand because abstruse, intricate, or abstract, or hard to deal with because thorny, knotty, cumbersome, delicate, or exacting > (he is a very *difficult* writer—*Inge*) > (the *difficult* beauty of many passages . . . of *Winter's Tale* or *Coriolanus*—*Alexander*) > (I do not propose . . . to enter upon the *difficult* question of Disestablishment—*T. S. Eliot*) > (it was a *difficult* design and had to be executed exactly right—*Roark Bradford*) **Arduous** stresses the need of laborious effort, of perseverance, and persistent exertion; thus, one may find a task *difficult*, but not *arduous*, because one has no sense of being kept at it against one's inclination; an ascent of a mountain may be *arduous*, but not especially *difficult* > (the *arduous* task of formulating legislation necessary to the country's welfare—*Roosevelt*) > (determined to save him from a life of *arduous* toil—*Cole*)

Ana *onerous, burdensome, oppressive, exacting: intricate, knotty, complicated, involved, *complex: exhausting, fatiguing, wearying, tiring (see **TIRE** *vb*)

Ant easy —**Con** facile, light, simple, effortless (see **EASY**)

harden **1** **Harden**, **solidify**, **indurate**, **petrify**, **cake** are comparable when they mean to make or to become physically hard or solid. **Harden** usually expresses an opposition to *soften* and therefore may be as often used of the process as of the effect. The term suggests a change in degree with an approach toward a state of firm consistency or texture, though it need not imply impenetrability or resistance to efforts to break, cut, pierce, or bend > (lava as it cools *hardens* into rock) > (*harden* candy by chilling it) **Solidify**, although differing little from *harden*, usually expresses an opposition to *liquefy* and places more stress upon the effect produced than upon the process involved; the term, therefore, suggests a change in quality rather than in degree and is more often applied to a mass subject to compacting or consolidation > (lava becomes rock when it is *solidified*) > (water *solidifies* into ice) **Indurate**, which means to make very hard or very compact, implies usually the making of something that is firm in texture still harder > (heat *indurates* clay) > (surgeons . . . spend raptures upon perfect specimens of *indurated* veins, distorted joints—*E. B. Browning*) **Petrify** implies a making or becoming stone or stonelike in hardness; the word is used of organic bodies that by a process (called *petrification*) of infiltration by water containing mineral deposits (as silica, calcium carbonate) and the replacement, particle by particle, of the organic matter by the introduced mineral become replaced by stony mineral while the original form is more or less perfectly retained. **Cake** implies the formation into a firm, hard, or solid mass (as by baking, fusing, or congealing) > ([a barrel of gunpowder] had taken water, and the powder was *caked* as hard as a stone—*Defoe*) > (the salt had *caked* in the shakers and did not flow)

Ana *compact, consolidate, concentrate: compress, condense, *contract

Ant soften —**Con** *liquefy, melt

2 Harden, **season**, **acclimatize**, **acclimate** denote to make (as a person) proof against hardship, strain, or exposure.

All imply a becoming accustomed or adapted by time or experience. **Harden** implies habituation that toughens one and makes one insensible of one's own pain or discomfort or callous and insensitive to others' misery > (*hardened* to the rigors of arctic exploration) > (I could . . . hear faint echoes of their grief. It was an experience to which I never became *hardened*—*Heiser*) > (its influence did not *harden* him; he has always risen above cynicism—*Triebel*) **Season** implies a gradual bringing into mature, sound, efficient condition; it does not, when referred to persons, necessarily imply that what is to be undergone is un congenial > (a *seasoned* marathon runner) > (a *seasoned* actor) > (with much less compass of muscle than his foe, that which he had was more *seasoned*—iron and compact—*Lytton*) **Acclimatize** and **acclimate** imply adaptation to a new and adverse climate or, by extension, to new and strange surroundings in general. Some writers have distinguished *acclimatize* from *acclimate* by restricting the first to adaptation by human agency, but this distinction is not commonly observed > (a race . . . well seated in a region, fixed to the soil by agriculture, *acclimatized* by natural selection—*Ripley*) > (I have not been long enough at this table to get well *acclimated*—*Holmes*)

Ana *habituate, accustom, inure: *adapt, adjust, accommodate

Ant soften —**Con** enervate, emasculate (see **UNNERVE**): *weaken, debilitate, enfeeble, sap, undermine

hardened, **indurated**, **callous** mean grown or become hard. These terms are comparable in both literal (compare **HARDEN** 1) and extended use. **Hardened** is the most inclusive because it is applicable to any substance, whether originally fluid or solid, or loose or firm in texture, or elastic or inelastic, that has become solid and firmer and increasingly resistant to efforts to cut, pierce, or bend > (*hardened* soap) > (*hardened* lava) > (*hardened* steel) Consequently, in extended use *hardened* usually implies a fixing or setting with loss of qualities (as flexibility, elasticity, pliancy, susceptibility, and impressionableness) indicative of a capacity for change > (*hardened* beliefs) > (*hardened* distrust) > (a *hardened* criminal) > (a *hardened* heart) > (a *hardened* little reprobate—*Thackeray*) **Indurated** is common in geological and in medical use with the implication of an increase of hardness or compactness usually in something already firm or hard and sometimes to the point of abnormality > (*indurated* clay) > (*indurated* sandstone) > (an *indurated* abscess) In its extended use it usually stresses abnormal or excessive hardness or stoniness that repels all efforts to penetrate or to soften > (*indurated* stoic as I am—*Adams*) > (her husband's *indurated* conscience—*Henry James*) **Callous**, in its earliest and still common sense, implies a hardening and thickening of the skin by constant pressure or friction and a consequent loss of sensibility in the part affected > (a *callous* spot on the sole of his foot) > (a *callous* fingertip) In extended use it usually also implies a loss of sensibility or an insensitivity that results from constant experience > (he has grown *callous* to such appeals) > (now *callous* to criticism) > (the tiresome and *callous* repetition of old motives which marked the decadence of the classic tradition—*Binyon*) > (piety . . . is made *callous* and inactive by kneeling too much—*Landor*) but sometimes *callous* means simply unfeeling and carries little implication of the process of hardening > (a *callous* answer)

Ana consolidated, compacted, concentrated (see **COMPACT** *vb*)

Ant softened —**Con** liquefied, melted, thawed, fused (see **LIQUEFY**): weakened, enfeebled, debilitated (see **WEAKEN**)

hardihood *temerity, audacity, effrontery, nerve, cheek,

gall

Ana boldness, intrepidity (see corresponding adjectives at BRAVE); brazenness, impudence, brashness (see corresponding adjectives at SHAMELESS); guts, sand, grit, pluck, *fortitude

hardship rigor, vicissitude, *difficulty

Ana adversity, *misfortune, mischance: peril, *danger, jeopardy, hazard: *trial, tribulation, affliction: toil, travail, drudgery (see WORK)

Con ease, comfort (see REST)

harm *n* damage, *injury, hurt, mischief

Ana detrimentalness or detriment, deleteriousness, perniciousness, noxiousness (see corresponding adjectives at PERNICIOUS); *misfortune, mischance, mishap: impairing or impairment, marring (see corresponding verbs at INJURE)

Ant benefit

harm *vb* *injure, impair, hurt, damage, mar, spoil

Ana *abuse, maltreat, mistreat, misuse: *ruin, dilapidate: discommode, incommode (see INCONVENIENCE); sap, undermine (see WEAKEN)

Ant benefit —*Con* *improve, better, ameliorate: profit, avail (see BENEFIT); *help, aid, assist

harmless, innocuous, innocent, inoffensive, unoffending are

comparable when meaning not having hurtful or injurious qualities. **Harmless** may be applied to whatever seems incapable of doing harm <poor *harmless* fly—*Shak.*> <be ye therefore wise as serpents, and *harmless* as doves—*Mt* 10:16> or to what in comparison with others of its kind or with members of other kinds is free from all power to hurt or injure <his death eclipsed the gaiety of nations, and impoverished the public stock of *harmless* pleasure—*Johnson*> <content with *harmless* sport and simple food—*Lowe*> <he comes of the Brahmin caste of New England. This is the *harmless* . . . untitled aristocracy—*Holmes*>

Innocuous differs almost imperceptibly from *harmless* in meaning <*innocuous* pleasures> <*innocuous* occupations> It is, however, the term preferred in technical use to specify the absence of the properties or substances in some members of a group that render other members of the same group harmful or dangerous <*innocuous* snakes> <*innocuous* chemicals> <replacing these by *innocuous* sodium compounds—*Morrison*> In extended use, therefore, it is often applied to something that seems harmless only by comparison <dynamite was milky and *innocuous* beside that report of C.25—*Kipling*> <an apple orchard infested with snipers, who, a colonel informed me, were *innocuous* if you kept moving—*Liebling*> or that is harmless to such a degree as to merit contempt <seconded him as often as not in these *innocuous*, infantile ventures—*Brooks*> <where the *innocuous* virtues of respectability receive unquestioning homage—*Cohen*>

Innocent fundamentally implies guiltlessness and suggests an accusation which can be or has been disproved, but the term has become applicable to actions and qualities and, in this sense, carries the implication of absence of all potential evil especially in intention or in capacity to do harm <I think no pleasure *innocent*, that is to man hurtful—*Franklin*> <much of the religiosity which unwise parents delight to observe in their children is pure imitation or *innocent* hypocrisy—*Inge*> <[Cicero's] *innocent* vanity, his lack of realism—*Buchan*> <competitiveness is natural to man and must find some outlet, which can hardly be more *innocent* than games and athletic contests—*Russell*> **Inoffensive** implies harmlessness in a degree that is almost excessive or pitiful; it is usually applied to persons and animals <I could not have tormented a being as *inoffensive* as a shadow—*Brontë*> <a poor simple *inoffensive* old man> Sometimes it suggests an incapacity for offending and in this

sense equals **unoffending**, particularly when it is applied to inanimate things <he lost his temper when he stubbed his toe, and kicked the *unoffending* object> <an *inoffensive* odor> <a refreshing, *inoffensive* . . . stimulant—*Americas*> *Ant* harmful —*Con* injuring or injurious, hurtful, damaging (see corresponding verbs at INJURE)

harmonize 1 accord, *agree, correspond, square, conform, tally, jibe

Ana reconcile, adjust, *adapt, accommodate: *match, equal, approach, touch, rival

Ant clash: conflict

2 **Harmonize, tune, attune** mean to bring things into accord with each other. **Harmonize** stresses as its end the combination of two or more things so that they go together without loss of individual identities yet constitute a frictionless or pleasing whole <*harmonize* the conflicting colors in a room by an emphasis on blue> <their religion is a mixture of Greek, Latin, and Hebrew elements which refuse to be *harmonized*—*Inge*> <*harmonize* its practices . . . with its professed ideals—*Dean*> **Tune** implies the adjustment of one thing to another or of several things to each other so that they will conform to each other or work in harmony with each other; thus, to *tune* a piano is to adjust its strings so that the tones produced will conform to a standard pitch or to a predetermined temperament; to *tune* up the instruments of an orchestra is to adjust the instruments so that they will produce harmonious tones; to *tune* up an engine is to make all the finer adjustments of its parts necessary to smooth operation. In literary use *tune* still implies adjustment (as of expression to a mood or of mood to a situation or need) <for now to sorrow must I *tune* my song—*Milton*> <a mind well strung and *tuned* to contemplation—*Cowper*> <she was not *tuned* to a mood of self-reproach—*Wouk*> **Attune** stresses the attainment of aesthetic harmony more than *harmonize* does, and it seldom suggests the idea of mechanical operation or effect often so strong in *tune* <riding, walking, gardening, driving about the level Essex lands, she, *attuned* to the soil on which she lived, was happy and serene—*Rose Macaulay*> <how by mastering rhythm, our prose . . . *attuned* itself to rival its twin instrument, verse—*Quiller-Couch*>

Ana adjust, reconcile (see ADAPT)

harmony 1 **Harmony, consonance, accord, concord** all designate the result attained or the effect produced when different things come together without clashing or disagreement. **Harmony** basically denotes the unity, order, and absence of friction produced by the perfect articulation and interrelation of distinct parts in a complex whole <to heavenliest *harmony* reduce the seeming chaos—*Southey*> <the scientific view of the world . . . seeks to find law, *harmony*, uniformity in nature—*Inge*> Largely because of its associations with music the term often suggests beauty of effect, whether achieved by order in a whole or by agreeable blending or arrangement (as of tones, colors, and features) <a *harmony* of life, a fine balance of all the forces of the human spirit—*Binyon*> <like hues and *harmonies* of evening—*Shelley*> **Consonance** may denote the blending of two or more simultaneous sounds so as to produce an agreeable effect and is then opposed to *dissonance*. More often it names the fact or the means whereas *harmony* names the result <notes in *consonance* constitute *harmony*, as notes in succession constitute melody—*Chambers*> In extended application *consonance* commonly retains these implications of coincidence and concurrence. Sometimes the pleasurable effect is still suggested <in good poetry there always is this *consonance* of thought and song—*Alexander*> Very often there is no hint of a pleasurable effect but a strong implication of consistency or congruity <this was an unprecedented act, but it was in *consonance*

with Roman tradition—*Buchan*) **Accord** is often interchangeable with *consonance* without loss (it was in *accord* with Roman tradition) However, it can imply, as *consonance* cannot, personal agreement or goodwill or, often, absence of ill will or friction (for your father's remembrance, be at *accord*—*Shak.*) (engineers have reached a certain *accord* in regard to ethical principles—*Wagner*) Hence the phrase “with one *accord*” suggests unanimity (with one *accord* they gave a cheer) **Concord**, like *accord*, often stresses agreement between persons but is more positive in its implications, for it suggests peace with amity rather than absence or suppression of ill will (how comes this gentle *concord* in the world?—*Shak.*) (till heart with heart in *concord* beats—*Wordsworth*) *Concord* also, when applied to sounds, comes close to *harmony* in its implications. However it seldom except in a technical sense in music connotes consonance of tones, but usually the pleasant succession of tones that is the quality of melody (the man that hath no music in himself, nor is not moved with *concord* of sweet sounds—*Shak.*) (the casual poetry of her gestures and the musical *concord* of her voice—*Wylie*)

Ana integration, articulation, concatenation (see under INTEGRATE): congruousness or congruity, consonance, compatibility (see corresponding adjectives at CONSONANT): concurrence, agreement (see corresponding verbs at AGREE)

Ant conflict —**Con** *discord, strife, contention, difference, variance, dissension

2 *symmetry, proportion, balance

Ana grace, *elegance, dignity: *unity, integrity

harry harass, *worry, annoy, plague, pester, tease, tantalize

Ana torment, torture, rack, *afflict, try: *trouble, distress: *bait, badger, hound, ride, hector: fret, gall, chafe (see ABRABE)

Con *comfort, solace, console: *relieve, assuage, alleviate, allay

harsh *rough, rugged, scabrous, uneven

Ana repellent, *repugnant, distasteful, abhorrent, obnoxious: *coarse, gross: strident, *vociferous, blatant: rigorous, strict, stringent, *rigid

Ant pleasant: mild —**Con** pleasing, agreeable, grateful, gratifying (see PLEASANT): *soft, gentle, bland, smooth, lenient, balmy

harvest *vb* *reap, glean, gather, garner

Ana collect, assemble (see GATHER): *accumulate, amass, hoard

haste *n* **Haste, hurry, speed, expedition, dispatch** are comparable when meaning quickness or swiftness in movement or in action. **Haste** implies quickness or swiftness in persons rather than in machines, vehicles, or methods of transportation; thus, a business that requires *haste* demands that the persons concerned move or act swiftly (she came in straightway with *haste* unto the king—*Mk* 6:25) (“Why this mad *haste*, Eusoff?” I asked. “Bandits,” he shouted—*W. O. Douglas*) But *haste* may imply other goads than urgency or pressure for time; it may imply intense eagerness (his tongue, all impatient to speak . . . did stumble with *haste*—*Shak.*) (I feel no *haste* and no reluctance to depart—*Millay*) or lack of due reflection and precipitancy in decision (marry in *haste* and repent at leisure—*Old Proverb*) or the impulsion of anger (I said in my *haste*, all men are liars—*Ps* 116:11) **Hurry**, though often used in place of *haste* as the simpler term, distinctively carries a stronger implication of confusion, agitation, and bustle (whoever is in a *hurry*, shows that the thing he is about is too big for him. *Haste* and *hurry* are very different things—*Chesterfield*) (the incessant *hurry* . . . of daily

life—*Eliot*) and more frequently refers to the things which are operated or the actions which are performed with haste than to the persons concerned; thus, one makes *haste* in the preparation of a report needed immediately, but the *hurry* of its preparation may result in several errors being overlooked. Also, *hurry* may imply the state of mind or the need of one who demands haste as well as of the one who makes haste (I am in a great *hurry* for the articles ordered) (you need not be in a *hurry* to fill my order) **Speed** (see also SPEED *n* 2) usually implies mere swiftness or rapidity, primarily in motion or movement but secondarily in action, performance, or accomplishment. Unlike *haste* and *hurry*, the term, which may be used in reference to things as well as to persons, carries no connotations of precipitancy, urgency, or agitation, although it may carry a suggestion of success (the more haste the less *speed*—*Old Proverb*) (five dark albatrosses . . . clearly took pride as well as pleasure in a performance which had the beauty of *speed* uncontaminated by haste—*Harper's*) (many an adult reader with trained habits of attention and concentration will absorb the contents of a book with a *speed* . . . no child can approach—*Eliot*) *Expedition* and *dispatch* imply both speed and efficiency especially in business or affairs, but *dispatch* carries a stronger suggestion of promptness in bringing matters to a conclusion, and *expedition* more often carries a hint of ease or efficiency of performance (they made their plans with *expedition*) (Sophia put her things on with remarkable *expedition*—*Bennett*) (serious business, craving quick *dispatch*—*Shak.*) (there is nothing more requisite in business than *dispatch*—*Addison*) (to do everything when it ought to be done is the soul of *expedition*—*Scott*) (the soul of *dispatch* is decision—*Hazlitt*) (to move with reasonable *expedition* along the narrow pavements of Rotting Hill is impossible—*Wyndham Lewis*)

2 **Hate, hatred** are not always interchangeable although they both denote intense, settled dislike for a person or thing that causes one either to avoid him or it scrupulously or to be his or its bitter enemy. **Hate** is the preferable term when the emotion is thought of in the abstract as the diametrical opposite of *love* or when the term is

used without reference to particular individuals (love you cannot help, and *hate* you cannot help; but contempt is—for you—the sovereign idiocy—*Galsworthy*) (it takes a very remarkable poet, like Pope . . . to elevate malice into *hate*—*Day Lewis*) In concrete use *hate* is seldom found outside of poetry except when contrasted with *love*, also in concrete use; it then denotes the object of one's hate (the scum of men, the *hate* and scourge of God—*Marlowe*) (a generation whose finest *hate* had been big business—*Paxson*) **Hatred** is the preferable term when the emotion referred to is actually experienced and is therefore personal and individual in character; *hate* is definable because men are in agreement concerning its distinguishing marks, but *hatred* escapes exact definition because its implications, other than that of intense dislike, can be gathered only from the context or with reference to its object. Usually it implies in addition one or more such emotions as antipathy, aversion, rancor, vindictiveness, resentment, or fear (he had a deep-seated *hatred* of aristocrats) (a violent *hatred* of restrictions on his freedom) (a healthy *hatred* of scoundrels—*Carlyle*) (his special type of satire had its roots not in *hated* but in sympathy. His wrath was an inverted love—*Perry*) (hatred is the coward's revenge for being intimidated—*Shaw*) *Hatred* also is often used in reference to its effect on the one who is hated; in such cases the nature of the emotion is not stressed, but its power to harm (he sowed doubtful speeches, and reaped plain, unequivocal *hatred*—*Lamb*) (battered by *hatred*, seared by ridicule—*Flecker*) In concrete use *hatred* usually denotes a particular instance (as of obsession by the emotion of hatred or of suffering as a result of another's hatred) (given to violent *hatreds*) (the victim of human *hatreds*) (a family famous for its *hatreds*—*Disraeli*) (the human race lives in a welter of organized *hatreds* and threats of mutual extermination—*Russell*)

hate *vb* **Hate, detest, abhor, abominate, loathe.** **Hate**, the general term, implies extreme aversion especially as coupled with enmity or malice (she did not *hate* him; she rather despised him, and just suffered him—*Thackeray*) (whom we fear more than love, we are not far from *hating*—*Richardson*) (he *hates* Lucy Wales. I don't mean dislike, or find distasteful, or have an aversion for; I mean *hate*—*Basso*) **Detest** connotes violent or intense antipathy or dislike but usually lacks the active hostility and malevolence associated with *hate* (the mob is a monster I never could abide . . . I *detest* the whole of it, as a mass of ignorance, presumption, malice, and brutality—*Smollett*) (I mortally *detest* cards—*Fielding*) **Abhor** suggests profound, shuddering repugnance (swelling from tears and supplications to a scene, of all things *abhorred* by him the most—*Meredith*) (Rome had made herself *abhorred* throughout the world by the violence and avarice of her generals—*Froude*) **Abominate** suggests strong detestation (as of something ill-omened or shameful) (the Egyptians . . . lived only on the fruits of the earth, and *abominated* flesh eaters—*Newton*) **Loathe** implies utter disgust or intolerance (except when I am listening to their music I *loathe* the whole race; great stupid, brutal, immoral, sentimental savages—*Rose Macaulay*) The same distinctions in implications and connotations are evident in the derivative nouns **hate, hatred** (for a distinction between these terms see **HATE** *n* 2), **detestation, abhorrence, abomination, loathing.**

sometimes used with little distinction. But **hateful** more frequently applies to something which excites actual hatred; **odious**, to something which is excessively disagreeable or which gives offense or arouses repugnance (why shouldn't we hate what is *hateful* in people, and scorn what is mean?—*Thackeray*) (between these two natures, so antipathetic, so *hateful* to each other, there was depending an unpardonable affront—*Stevenson*) (our blind poet, who in his later day stood almost single, uttering *odious* truth—*Wordsworth*) (it was an *odious* face—crafty, vicious, malignant, with shifty, light gray eyes—*Doyle*) Something is **abhorrent** which outrages one's sense of what is just, right, honorable, or decent (she [his wife] was his property . . . To me it is a view that has always been *abhorrent*—*Galsworthy*) Something is **detestable** which deserves scorn or contempt (hypocrisy is more *detestable* than shamelessness) (I think you're *detestable*. You're the most loathsome beast that it's ever been my misfortune to meet—*Maugham*) Something is **abominable** which is so abhorrent as to deserve execration (on board ship ready to sail away from this *abominable* world of treacheries, and scorns and envies and lies—*Conrad*) (all the living conditions were *abominable*—*Cather*)

have, hold, own, possess, enjoy are comparable when they mean to keep, control, retain, or experience as one's own. **Have** is the most general term and in itself carries no implication of a cause or reason for regarding the thing had as one's own (he *has* considerable property) (they *have* five children) (we *have* no cow at present) (they *have* opinions on a subject) (she *has* many friends) (they are going to *have* a baby) (he *has* no French) (we shall have some trouble with it) **Hold** implies stronger control over than *have* and usually suggests a grasp upon, an occupancy of, or a bond between; thus, "to *have* friends" implies a mere amicable relationship, but "to *hold* one's friends" implies either the reducing of them to subjection or the retaining of their affection; "to *have* an opinion" implies merely the existence of that opinion, whereas "to *hold* an opinion" usually suggests its assertion (hold extensive properties in New York State) (once did she *hold* the gorgeous East in fee—*Wordsworth*) (the Breton seized more than he could *have*; the Norman took less than he would have liked—*Henry Adams*) (the receptive imagination . . . *holds* fast the visions genius creates—*Eliot*) **Own** implies a natural

or legal right to hold as one's property and under one's full control <own a house> <own several horses> <when a child is old enough, he should . . . be allowed to own books—Russell> <some parents treat their children as if they owned them> Possess is preferred in law to own as implying one's having full title and right to a particular property to the exclusion of everyone else; thus, a husband and wife might say that they own a piece of land when legally only the husband possesses it. In general use possess differs from own in being referable to other things than property (as a characteristic, a quality, a power, or a faculty) <possess contentment> <the States possessed the power to exclude or admit them [slaves]—John Marshall> <that astonishingly retentive memory which we possessed as little boys—Inge> <the great medicinal value possessed by this water—Heiser> Enjoy (see also LIKE) implies the having of something as one's own or for one's use with all its benefits and advantages; in this sense there is no necessary connotation of pleasure or delight in having or using, but, except in law, the word often does carry a hint if not a definite suggestion of it <during his lifetime he enjoyed a distinguished reputation for the excellence of his sermons—T. S. Eliot> <while man enjoyed . . . an unlimited freedom to be wicked—Henry Adams> <classes that enjoy certain rights and privileges>

haze *n* Haze, mist, fog, smog denote an atmospheric condition which deprives the air near the earth of its transparency. Haze applies to such a condition as is caused by the diffusion of smoke, dust, or a light vapor through the air in such a way as to impede but not obstruct the vision and to convey little or no impression of dampness <the early morning haze on a warm day in autumn> <there is haze today because the wind carries the smoke from the railroad yards> Mist applies to a condition where water is held in suspension in fine particles in the air, floating or slowly falling in minute drops. A fog differs from a mist only in its greater density and its greater power to cut off the vision and differs from a cloud in being near to the ground <not the thin glassy mist of twenty minutes ago, but a thick, dense, blinding fog that hemmed in like walls of wadding on every side—Hugh Walpole> Smog applies to a fog made heavier and darker by the smoke of an industrial area <a Los Angeles smog>

In extended use haze suggests vagueness or lack of clear definition of thought or feeling <looking back through the haze of years—Allen Johnson> Mist applies to what can be only dimly apprehended because of its remoteness <its origins are lost in the mists of antiquity—Coulton> or to something which prevents exact knowledge or clear

understanding <times . . . half shrouded in the mist of legend—Freeman> Fog implies an obscuring of the mental or spiritual vision or of whatever can be detected only by such vision <the fog of ignorance in which so many live> <life and its few years—a wisp of fog betwixt us and the sun—Reese> <the subject is wrapped in fogs of vague thinking—Overstreet>

healthful, healthy, wholesome, salubrious, salutary, hygienic, sanitary are comparable when they mean conducive or beneficial to the health or soundness of body or mind. Healthful is more common than healthy as the term carrying this sense (see also HEALTHY 2), but the two are often interchangeable <a healthful climate> <one of the healthiest climates in England—Bennett> <healthful recreation>

<the French boy gets healthy recreation—Grandgent> <sound sleep is healthful> <all mothers wish their children to sleep, because it is . . . healthy—Russell> <the second fruit of friendship is healthful and sovereign for the understanding—Bacon> Wholesome (see also HEALTHY 2) is a more homely word than healthful that is typically perfectly interchangeable with the latter <provide wholesome, well-balanced meals> <books that are wholesome reading> <mathematics . . . is a wholesome discipline because it requires a high degree of concentration and because it shows so inexorably the difference between right and wrong—Grandgent> but wholesome is the one of these words that may also be used in a much weakened sense to mean not detrimental to health or well-being <some sausages may contain wholesome filler as well as meat and seasonings> <reexamining our idea of a wholesome food, particularly from the point of view of its freedom from chemical additives which may be harmful to the consumer—JAMA>

Salubrious applies chiefly to climate or to air that is pleasantly invigorating yet devoid of harshness or extremes <the salubrious mountain air and water—C. B. Davis> Salutary implies a tonic, corrective, or similarly beneficial effectiveness; often it is applied to something that is in itself unpleasant <salutary advice> <idle ladies and gentlemen are treated with salutary contempt—Shaw> <the use of force in education should be very rare. But for the conquest of fear it is, I think, sometimes salutary—Russell> Hygienic suggests reference to the means and the rules of promoting physical or mental health, especially of the public. The term therefore commonly implies use of approved means or obedience to approved rules because they are conducive to health <instruct children in the hygienic care of mouth and teeth> <stuffy schoolrooms are not hygienic> <provision is made . . . for safe and hygienic working conditions—Amer. Guide Series: Mich.> Sanitary implies reference to measures taken or that can be taken to guard against infections or conditions that promote disease. The term therefore usually implies the promotion of health, especially public health, through interference with causes that bring about disease or epidemics <sanitary plumbing> <sanitary regulations> <the

sanitary care of foods) <drainage of swamps and similar sanitary measures> *Sanitary* is sometimes used in place of *healthful* but with a stronger emphasis upon effectiveness <solitary communion with nature does not seem to have been *sanitary* or sweetening in its influence on Thoreau's character—*J. R. Lowell*>

2 **Healthy, sound, wholesome, robust, hale, well** are comparable when meaning having or manifesting health of mind or body or indicative of such health. **Healthy** may imply the possession of full vigor and strength of body or mind or it may merely imply freedom from signs of disease or abnormality <a *healthy* body> <a *healthy* boy> <during a *healthy* and active life—*Eliot*> Often the term applies not to one having health but to what manifests one's health or vigor or serves as a sign of it <he had a *healthy* color in his cheeks—*Dickens*> <she has a *healthy* appetite> <a *healthy* craving for the sap and savor of a more personal, national art—*Binyon*> <in *healthy* reaction to the romantic fustian of the . . . nineteenth century—*Christopher Fry*>

Sound even more strongly implies the possession of perfect health or the absence of all defects and therefore suggests not even the slightest sign of disease or of physical weakness or defect <a *sound* mind in a *sound* body> <that child is . . . much too emotional to be ever really *sound*—*Conrad*> <his tastes were *healthy*, his wits *sound*—*Rose Macaulay*> **Wholesome** (see also HEALTHFUL) implies a healthiness that impresses others favorably, especially as indicative of a person's physical, mental, and moral soundness or often more specifically of a person's balance or equilibrium <thankful . . . that he had his mother, so sane and *wholesome*—*D. H. Lawrence*> <such studies . . . promote . . . a *wholesome* dislike of sophistry and rhetoric—*Inge*> <her eyes shining, her face aglow, looking oddly *wholesome* in a smeared white painter's smock—*Wouk*> **Robust** implies the antithesis of all that is delicate; it usually connotes manifest vigor of health as shown in muscularity, fresh color, a strong voice, and an ability to work long and hard <exercise tends to develop *robust* boys and girls> <a hearty, *robust* man in his middle sixties—*Mannix*> <he is in *robust* health> <speaking in a *robust* voice> **Hale**, which is a close synonym of *sound*, is applied chiefly to elderly or aged persons who not only show no signs of infirmity or senility but manifest qualities of men in their prime <he is *hale* and hearty at 85> <Pete Gurney was a lusty cock turned sixty-three, but bright and *hale*—*Masefield*> **Well**, which is commoner as a predicative than as an attributive adjective, is a rather noncommittal term; it implies freedom from disease or illness but does not necessarily suggest soundness or robustness <is your father *well*?> <he is always *well*> <she has never been a *well* person> <however ill one has been, he can (usually) get better, and keep getting better—he can get *well*—*Menninger*>

heap *n* pile, stack, shock, cock, mass, bank (see under HEAP *vb*)

Ana *aggregate, aggregation, conglomerate, conglomeration: collection, assemblage (see under GATHER)

heap *vb* **Heap, pile, stack, shock, cock, mass, bank** are com-

parable as verbs when they mean to bring together into a more or less compact group or collection a number of things and as nouns when they denote the group or collection so assembled. **Heap** is the least definite in its implications; it usually implies a moundlike shape and more or less careless or fortuitous arrangement; it may or may not imply a personal agent, an assemblage of like things, close packing, or a large quantity <throw all the discarded clothes into a *heap*> <*heap* the sand in this corner of the lot> <the miser gloated over his *heaps* of coins> <the wind *heaps* the leaves under the garden wall> <stacks of firewood were *heaped* all about the stove—*Mason*> **Pile** distinctively implies the laying of one thing or one layer on top of another in a more or less orderly formation; it usually implies a personal agent and an assembling of like things or things of approximately the same size or shape <*pile* magazines according to their sizes> <a *pile* of letters on a desk> <*pile* logs> <a *pile* of bricks> **Stack** more strongly implies orderly and compact arrangement and the assembling of like things; it almost invariably suggests personal agency and a particular shape or form, and it has a distinctly restricted range of idiomatic reference. Thus, one *stacks* hay, straw, or grain in the sheaf into conical or a four-sided, round-cornered formation designed to shed rain; one *stacks* firewood by arranging the pieces neatly into a rectangular pile; one *stacks* arms when one sets up rifles so that they form a pyramid; one *stacks* lumber by so arranging it in a pile that air may circulate and warping be minimized <hay curing in the *stack*> <a *stack* of lumber> So strongly does *stack* suggest care in arrangement that it carries specific connotations in some of its applications; thus, to *stack* cards is to arrange them secretly for cheating; a *stack* is in Great Britain a measure of stacked coal or firewood equal to four cubic yards. **Shock** and **cock** are the narrowest of these terms. **Shock** is used primarily of sheaves of grain (as wheat, rye, or oats) or of stalks of Indian corn which are stacked upright with butt ends resting on the ground <when the frost is on the punkin and the fodder's in the *shock*—*Riley*> Occasionally it, like **cock**, is used with reference to hay stacked in a conical pile <*cock* up the hay from the windrow> **Mass** (see also *mass* *n* under BULK) usually suggests amorphousness; it also implies either a capacity in the things which are brought together for cohering with or adhering to each other so as to form a blended or fused whole or a highly compact or dense agglomerate, or an external process which forces them to cohere or adhere; thus, a pasty substance used in making up pills and troches is called a *mass* by pharmacists; some flowers (as violets) tend to grow in *masses* or to *mass* themselves in growing; to *mass* colors in a painting or in stained-glass windows is to combine the various colors used in any one significant portion of the whole so that they seem to flow into each other and give a unitary effect when the painting or window is viewed in perspective. *Mass*, therefore, usually implies integration, but it may be a physical, a spiritual, an emotional, an intellectual, or a purely aesthetic integration <*massed* his arguments> <compounding the American people into one common *mass*—*John Marshall*> <dense *masses* of smoke hung amid the darting snakes of fire—*Meredith*> <a vine, remarkable for its tendency, not to spread and ramble, but to *mass* and mount—*Cather*> **Bank** (the verb is often followed by *up*) is used chiefly in reference to substances which when affected by moisture, freezing, or pressure form, or seem to form, into compact masses <*bank* up the snow on each side of the path> <*bank* up a sandpile> <build a *snowbank*> <cloud *banks*> <the wisser heads in Rome, seeing the clouds *banking* in the North, had clamored for the employment of the ablest of Roman com-

manders—*Buchan*)

hearing, audience, audition all mean a formal opportunity to be heard by persons having authority to question or the power of decision. **Hearing** is not only the general word applicable to such an opportunity not only to be literally heard but to demonstrate worth or qualities in any rational manner (a new trend which is struggling for a *hearing*—*Sapir*) but is also a technical term. In legal use it designates a formal listening by a judge or tribunal to the arguments and proofs offered either in interlocutory proceedings or in a preliminary examination in a criminal case; however, only in equity practice is it applicable to a trial. It is also used in government and politics for a formal opportunity offered to citizens to state their views on proposed legislation or administrative action, or to present their objections to assessments on property, or to give evidence in a legislative or other investigation. **Audience** is more often used of a hearing that is granted as a favor or mark of esteem than of one that can be demanded as a right; therefore it is used particularly in reference to interviews by appointment granted by a sovereign, a high-ranking ecclesiastic (as a pope), or a diplomatic representative of high standing (the French ambassador upon that instant craved *audience*; and the hour, I think, is come to give him hearing—*Shak.*) (I had an *audience* . . . with the Spanish Minister—*Disraeli*) **Audition** is applicable to a hearing by expert judges of a performer (as a singer, a musician, a public speaker, an actor, or a dancer) in order to test the merits of his performance with, usually, a view to his possible engagement (operatic *auditions*)

height, **altitude**, **elevation** mean the distance a thing rises above the level on which it stands, or the vertical distance between a given level taken as a base and a thing that is above it. **Height** may be used with reference to whatever can be so measured, whether high or low by a standard of comparison (letters not more than one-twentieth of an inch in *height*) (the tree rises to a *height* of one hundred feet) It may be used interchangeably with any of the other words, but it is not so explicit. While *altitude* and *elevation* are often interchangeable, **altitude** may be preferred in referring to vertical distance above the surface of the earth or above sea level or to the vertical distance above the horizon in angular measurement (an airplane flying at an *altitude* of 12,000 feet) (the *altitude* of a cloud) (the *altitude* of a star) **Elevation** is used especially in reference to vertical height above sea level on the surface of the earth; thus, one would speak of the *altitude* rather than the *elevation* of a balloon; a village situated at an *elevation*, preferable to *altitude*, of 2000 feet (atmospheric pressure depends on *elevation*) (Pike's Peak has an *elevation* of 14,110 feet)

help *vb* 1 **Help**, **aid**, **assist** and their corresponding nouns

help, **aid**, **assistance** are often used with little distinction as meaning (for the verbs) to furnish another person or thing with what is needed (as for the accomplishment of work or the attainment of an end) or (for the nouns) the support so furnished. All usually imply cooperation or a combination of effort. **Help**, however, carries a stronger implication of advance toward the end or objective than do the others (every little bit *helps*) (you are hindering rather than *helping*) (a drug that *helps* one to sleep) (please *help* me over the fence) **Aid** strongly suggests the need of help or relief and therefore sometimes imputes weakness to the one aided and strength to the one aiding (but this she knows . . . that saints will *aid* if men will call—*Coleridge*) (cannonballs may *aid* the truth but thought's a weapon stronger; we'll win our battles by their *aid*—*Mackay*) (his undergraduate work . . . was *aided* by tuition grants—*Current Biog.*) **Assist**, which seldom loses its original implication of standing by, distinctively suggests a secondary role in the assistant or a subordinate character in the assistance; thus, a deputy *assists* rather than *aids* his superior; a good light *assists* the eyes in reading (every additional proof that the world is a closely interwoven system . . . *assists* religious belief—*Inge*) (moves through the streets at a clip that suggests they have been called to *assist* at a rather serious fire—*Panter-Downes*)

heretic *n* **Heretic**, **schismatic**, **sectarian**, **sectary**, **dissenter**, **nonconformist** are comparable when denoting a person who from the point of view of a particular church or religious faith is not orthodox in his beliefs. **Heretic** applies to one who teaches and maintains doctrines that are contrary to those which are actually taught by the church or faith to which he belongs or has belonged (the precursors of Luther were for the most part regarded as *heretics*) (he drew a circle that shut me out—*heretic*, rebel, a thing to flout—*Markham*) (to delete from history its *heretics* and its radicals would be to deprive it of that rare quality known as independence of mind—*Neff*) **Schismatic** applies to one who separates from or provokes division in a church or communion usually by differing on a minor point or points of doctrine; thus, from the point of view of the Roman Catholic Church, those Eastern Christians who seceded to form the Orthodox Church are *schismatics*, whereas Luther, Calvin, Cranmer, and other leaders of the Reformation are *heretics*: to the Church of England, the early Puritans and Quakers were *schismatics* (it was difficult to get any bishop to run the risk of ordaining men whom Rome regarded as *schismatics*—*Moss*) **Sectarian** may be applied to a member of a religious denomination or sect, often neutrally but sometimes with the implication of a rigorous and bigoted adherence. **Sectary**, which is chiefly historical, more than *sectarian*, implies membership in a sect that is relatively small and composed of ardent and often by connotation narrow-minded and bigoted partisans (the passing of the bill by Parliament was advocated both by churchmen and by *sectarians*) (collectivist movements within Christianity have proceeded almost entirely from the Anabaptists and other *sectaries*—*Inge*) **Dissenter**, which basically means one who dissents, in the present connection, applies to a person who separates himself from and worships in a communion other than an established church (as the Church of England); **nonconformist** is ordinarily synonymous with *dissenter*, but the term has been specifically applied in England to persons who refused to accept certain religious doctrines or to follow certain religious practices imposed by the established church; thus, many of the 2000 clergymen who refused to subscribe to the Act of Uniformity in 1662 were regarded as *nonconformists*; Roman Catholics in England (as a class) have been held to be *nonconformists* rather than *dissenters*, since they did not accept the Church of England at any time. Nevertheless the terms are often used interchangeably (Wesley was not a schismatic, or even, in the doctrinal sense, a *dissenter*. He desired, not to secede from the Established Church, but to fill it with new life—*Atlantic*) (the English and Scotch *Nonconformists* have a great horror of establishments

heritage, inheritance, patrimony, birthright denote something which one receives or is entitled to receive by succession (as from a parent or predecessor). **Heritage** is the most widely applicable of these words, for it may apply to anything (as a tradition, a right, a trade, or the effect of a cause) that is passed on not only to one's heir or heirs but to the generation or generations that succeed ([Livy] made the average Roman realize the grandeur of the past and the magnitude of his *heritage*—*Buchan*) (our neglect of the magnificent spiritual *heritage* which we possess in our own history and literature—*Inge*) (but the war had left its *heritage* of poverty . . . of disease, of misery, of discontent—*Rose Macaulay*) (a . . . party whose *heritage* is vision and boldness—*Straight*) **Inheritance** applies to what passes from parent to children, whether it be money, property, or traits of character (my father's blessing, and this little coin is my *inheritance*—*Beaumont & Fletcher*) but the term may be used in place of *heritage* when such descent is implied (a good man leaveth an *inheritance* to his children's children—*Prov* 13:22) *Inheritance*, but not *heritage*, may also apply to the fact of inheriting or to the means by which something passes into one's possession (come into possession of a property by *inheritance*) (the power of regulating the devolution of property by *inheritance* or will upon the death of the owner—*Justice Holmes*) **Patrimony** applies basically to the money or property inherited from one's father, but is also used in the more general sense of ancestral inheritance (to leave the orphan of his *patrimony*—*Shak.*) (content . . . to leave his *patrimony* not worse but something better than he found it—*Quiller-Couch*) (a most important part of the intellectual *patrimony* of Italy—*R. A. Hall*) **Birthright** is now more often used in its extended sense (see RIGHT) than in its original sense of the property, goods, privileges, or rank which belong to one by reason of one's birth. But in this sense *birthright* is often more specific than *inheritance*, because it usually applies only to what belongs to the firstborn son by the law of primogeniture (and Jacob said, Sell me this day thy *birthright*. And Esau said, Behold, I am at the point to die: and what profit shall this *birthright* do to me? . . . and he sold his *birthright* unto Jacob—*Gen* 25:31-33) (a race which . . . has taught its children to struggle on though despair be their *birthright*—*Gerald Beaumont*)

heroism, valor, prowess, gallantry are comparable when they mean conspicuous courage or bravery in conduct or behavior especially during conflict. **Heroism**, the strongest term, distinctively implies superlative, often transcendent, courage or bravery not only as exhibited by daring deeds in the presence of danger (as in a battle, a fire, or a wreck at sea) but in carrying through without submitting or yielding an eminently arduous but exalted enterprise (as an exploration) or in the same spirit fulfilling a superhumanly high purpose (as the conquest of self or the institution of a great moral reform) where the odds are against one (acts of *heroism* are in the very essence of them but rare: for if they were common they would not be acts of *heroism*—*Bentham*) (the characteristic of genuine *heroism* is its persistency. All men have wandering impulses, fits and starts of generosity . . . The

heroic cannot be the common, nor the common the heroic—*Emerson*) **Valor** has been applied to the quality of mind of one ready to meet dangers or hazards with courage and gallantry (my *valor* is certainly going . . . I feel it oozing out—*Sheridan*) but far more often it implies both the possession of a high degree of sometimes moral, sometimes physical courage and the exhibition of that quality under stress (as in battle) (awarded a medal for *valor* in action) In contrast with *heroism*, *valor* implies illustrious rather than superlative courage or bravery; it carries a far weaker implication of a persistent struggle against odds but a stronger one of fearlessness and audacity in conflict with a powerful enemy (real *valor* consists not in being insensible to danger, but in being prompt to confront and disarm it—*Scott*) (the stupid *valor* of the Englishman never knows when it is beaten; and, sometimes, . . . succeeds in not being beaten after all—*Kingsley*) (must men conscientiously risk their careers only for principles which hindsight declares to be correct, in order for posterity to honor them for their *valor*?—*Kennedy*) **Prowess** has become essentially a literary term in its original sense, in which it differs from *valor* chiefly in its greater emphasis upon brilliant achievements or exploits in arms (how insignificant a thing . . . does personal *prowess* appear compared with the fortitude of patience and heroic martyrdom—*Wordsworth*) (warfare was a means of demonstrating tribal *prowess* and superiority to other tribes—*Fathauer*) Often *prowess* loses its basic implication of distinguished skill and bravery in arms and means little more than success in competition typically as based on the possession of manly skills (as in athletics or hunting) (among male animals, the human male is . . . (at least for constancy if not for *prowess*) without doubt the best mammal in the business—*La Barre*) (power derived from . . . technical *prowess*—*Aron*) **Gallantry** more than *valor*, its close synonym, stresses mettle and spirit as well as courage and an almost gay indifference to danger or hardship (few augured the possibility that the encounter could terminate well for . . . the Disinherited Knight, yet his courage and *gallantry* secured the general good wishes of the spectators—*Scott*) (the desperate *gallantry* of our naval task forces—*Marshall*)

hesitate, waver, vacillate, falter all mean to show irresolution or uncertainty. **Hesitate**, the general term, usually implies a pause or other sign of indecision before one makes up one's mind what to do, say, or choose (I have for many months *hesitated* about the propriety of allowing . . . any part of my narrative to come before the public eye—*De Quincey*) (when delivering a speech to pour it out in a copious stream, without pausing to take breath or *hesitating* over a word—*Hudson*) **Waver** (see also SWING 2) implies hesitation after a decision has been

reached and so usually connotes weakness or retreat <let us hold fast . . . without *wavering*—*Heb* 10:23> <the front line which had been advancing rapidly *wavered* under the heavy fire> <you *waver* in your convictions—*Jefferies*> **Vacillate** implies prolonged hesitation resulting from one's inability to reach a fixed or final decision; the term connotes alternate decision and indecision or a shifting (as in opinions, choices, or loyalties) <he may pause, but he must not hesitate—and tremble, but he must not *vacillate*—*Ruskin*> <he had *vacillated* between various substitutes for Oswald up to the very moment when he named the four upon whom he decided finally—*H. or grows high as compared with others of its kind, especially when its breadth or diameter is small in proportion to its height; thus, in idiomatic use one would ordinarily refer to a *high hill* but a *tall man* (a *tall tree*) **Lofty** is often poetical for *high*, but it usually implies even greater and more imposing altitude (lofty mountain peaks) (a lofty perch) (the loftiest star of unascended heaven—*Shelley*) *High* alone of these words is used to express degree or intensity (high speed) (high power) (high color) (high seasoning) (a high wind) (a high fever)

hinder *vb* **Hinder, impede, obstruct, block, bar, dam** all mean to put obstacles in the way of a person or thing or of his or its action. To **hinder** is to check or hold back someone or something in action or about to act, move, or start; the term usually stresses harmful or annoying delay or interference with progress (from your affairs I hinder you too long—*Shak.*) ([the artist's] education is . . . hindered rather than helped by the ordinary processes of society which constitute education for the ordinary man—*T. S. Eliot*) Sometimes, however, *hinder* definitely implies prevention (the rain hindered their going) (machines are sometimes hindered by speed from delivering their best performance—*Diehl*) To **impede** is to impose upon a person or thing that is moving or in action or in progress something that slows him or it up (as by clogging, hampering, or fettering); the term seldom suggests the stopping of movement or progress, but it commonly implies difficulties so great that movement or action are painfully slow or seriously impaired (around their tattooed limbs they often wore coiled brass rings or bands, which in time became so tight that they impeded the circulation—*Heiser*) (the teaching of mathematics is . . . impeded by the use of Roman symbols—*Grandgent*) (he . . . placed his hand on hers, impeding the rapidity of her embroidery needle—*Rose Macaulay*) To **obstruct** is to hinder free or easy passage; the word implies interference with something in motion or in progress or obstacles in the path or channel (highways obstructed by fallen trees after a storm) (the

tall building obstructed the light from the west) (the view was obstructed by billboards) (the restriction of the power of the House of Lords to obstruct legislation—*Plummer*) To **block** (often with *up*) is to obstruct so effectively as to close all means of egress or ingress and to prevent all passage (shifting sand blocked the entrance to the channel) (his nose was blocked up by a cold) (in these wild places . . . a snowstorm . . . does not block the King's highways and paralyze traffic as [in] London—*Jefferies*) To **bar** is to block or to prohibit passage, ingress, or egress (a long freight train . . . barred the passage along the road—*Anderson*) (that route is barred to steamers—*Kipling*) Sometimes the implication of prohibition is so strong that there is no hint of blocking (the law of arms doth bar the use of venom shot in war—*Butler* d. 1680) To **dam** (often with *up*) is to obstruct with obstacles that prevent a continued flow (as of water, speech, or emotion) and so provide no outlet or exit (fallen trees dammed up the brook) (the strait pass was dammed with dead men—*Shak.*) (trembling with dammed-up emotion)

hire *vb* **Hire, let, lease, rent, charter** are comparable when they mean to take or engage something or grant the use of something for a stipulated price or rate. Because some of these words are referable only to the act of the owner and some only to the act of the one who engages, and because they vary in their applications, they are not always true synonyms. In their narrowest use *hire* and *let* are complementary terms, *hire* meaning to engage the use or occupancy of something at a price or rate, and *let* meaning to grant its use or occupancy for a stipulated return (we hired a house for the summer after having some difficulty in persuading the owner to let it) Nevertheless *hire*, especially when used of persons or, by implication, their services, may be employed in either sense (hire a servant) (hire oneself (often with out) as a servant) (hire workers by the day) (men willing to hire themselves out at any wage) In distinctive use *lease* means to let on a contract by which the owner conveys to another for a set term, and usually at a fixed rate, land, buildings, or similar property (the lands in America [in Colonial days] . . . are in general not tenanted nor leased out to farmers—*Smith*) But *lease* may also be employed in the sense of to hire on a lease (they have leased the house where they live for three years) **Rent** implies payment in money (or in kind) for the use of land and the buildings thereon. As long as this idea is stressed, the verb may denote either to hire or to let a property (rent their house from the college) (the college rents these houses only to professors) *Rent* (in the sense of either *hire* or *let*) is also employed in reference to various commodities other than real property (rent books from a circulating library) (rent an automobile for the summer) **Charter** means to hire by a contract (charter party) similar to a lease whereby the use of a ship is given for a certain time and the safe delivery of its cargo

is promised (it was impossible to *charter* a ship for the purpose—*Irving*) The word is often extended to other means of transportation (as buses or airplanes) and then usually implies to reserve by hiring or leasing the exclusive use of a vehicle that is normally available to the general public (charter a bus for a club picnic)

historic, historical are sometimes distinguished in meaning. **Historic** is used when the idea of association with history in the sense of being celebrated, well-known, or deserving to be well-known is stressed (we shall visit many *historic* spots on our trip) (this is *historic* ground on which we are standing) (the incident became *historic* in the Square—*Bennett*) (the *historic* conference in 1948, when Lysenko announced his formal endorsement by the Communist Government—*Martin Gardner*) **Historical**, on the other hand, implies use of or dependence on or relation to history, especially of facts or events; thus, an *historic* event is one that is important or famous, while an *historical* event is one that is supported by the evidence of history (he is conducting an *historical* investigation of the Pelagian heresy) (an *historical* novel) (we doubt the *historical* truth of his conclusions) (a *historical* phenomenon as deeply rooted as English snobbery is not to be swept away in a night—*Brogan*) (the author examines his own background and the *historical* accident which caused him to reverse the emigration of his ancestors from England to America—*R. B. West*)

history, chronicle, annals mean a written record of events important in the life or career of a race, a nation, an institution, or a region. A **history** is more than a mere recital of what has occurred; in the modern conception, at least, it requires order and purpose in narration, but not necessarily a strictly chronological order nor a common definitely defined purpose. Usually, also, it is thought of as an interpretation of events especially in their causal relationships. It may exhibit fullness and completeness or, on the other hand, selection of details, especially when a single aspect is considered or a thesis is to be proved. A **chronicle** is a recital of events in chronological order without interpretation (the Anglo-Saxon *Chronicle*) (Holinshed's *Chronicles* of England, Scotland, and Ireland) **Annals** is not always clearly distinguishable from *chronicle* except in its emphasis upon the progress or succession of events from year to year. The term need not imply a discursive treatment or a continued narrative, for some of the ancient annals are merely records of important events in each year of the time covered. However, in the selection of titles for modern historical works these distinctions are not always observed, for *chronicle* and *annals* are sometimes chosen as less formal or pretentious than *history* or because *chronicle* stresses narrative quality and *annals* the selection of noteworthy events (in the earlier Middle Ages, history was written chiefly in the form of *annals*, that is, the enumeration of the notable events of each year, or of *chronicles*, in which happenings were recorded in somewhat more continuous, but still strictly chronological and unanalytical form—*R. A. Hall*)

In their extended senses only *history* and *annals* are closely comparable. Both of these words designate more or less shifting abstractions. **History** usually signifies the known past, or the sum total of events that are remembered because recorded by historians or evidenced by documents, monuments, and remains (nothing like this has happened hitherto in the *history* of man) (a land without

ruins is a land without memories—a land without memories is a land without *history*—*Ryan*) **Annals** most often signifies the sum total of events, with their dates, that have become fixed in the mind because of the momentousness, often tragic momentousness, of those events (the short and simple *annals* of the poor—*Gray*) (happy the people whose *annals* are blank—*Carlyle*) **Chronicle**, on the other hand, is often applied to something concrete (as a person or thing) that records, relates, or manifests events as they happen (pitch upon the veriest camp follower of the New Poetry as the abstract and brief *chronicle* of its procedure—*Loves*) (the neighborhood . . . was one of those highly favored places which abound with *chronicle* and great men—*Irving*)

Ana control, direct, manage, *conduct

hold *n* **Hold, grip, grasp, clutch** are comparable when they denote the power of getting or of keeping something in possession or under control. **Hold** is the most comprehensive of these terms, for it may apply to material, immaterial, or intangible matters and may imply mere possession or control or possession and control securely maintained (lay *hold* on the deserters) (lost his *hold* on the side of the boat) (keep his *hold* on the property in dispute) (kept a *hold* on himself) (afraid they may lose their *hold* on the domestic market—*Sydney Bulletin*) (the *hold* of the public school upon the middle-class mind has not weakened—*Lewis & Maude*) **Grip** primarily implies the power of taking hold of by the hand, but in its secondary senses it definitely suggests a firm and tenacious hold (as on a country by an oppressor, on a person's system by a disease, or on a body of facts or principles by an eager mind) (he clutched Father Joseph's hand with a *grip* surprisingly strong—*Cather*) and (the country was on the verge of bankruptcy and in the *grip* of a series of . . . insurrections—*London Calling*) (his interest . . . has been to strengthen the

voters' *grip* on governmental machinery—*A. D. H. Smith*) <moreover habits acquired very early feel, in later life, just like instincts; they have the same profound *grip*—*Russell*) **Grasp** implies the power to reach out and get possession or control of something; in its basic applications it may be distinguished with difficulty from *grip* <did not expect to feel his hand snatched away from her *grasp* as if from a burn—*Conrad*) but in its now more common extended applications especially to what can be possessed by the mind it frequently distinctively connotes remarkable powers of comprehension on the one hand or outstanding range of mastery on the other <ah, but a man's reach should exceed his *grasp*, or what's a heaven for?—*Browning*) <his *grasp* of the singular entirety of medieval civilization—*Cram*) <what competent person supposes that he understands a grain of sand? That is as much beyond our *grasp* as man—*Justice Holmes*) <Gray and Collins were masters, but they had lost that hold on human values, that firm *grasp* of human experience, which is a formidable achievement of the Elizabethan and Jacobean poets—*T. S. Eliot*) **Clutch** basically implies a seizing and holding with the avidity or rapacity of or as if of a bird of prey <a rabbit in the *clutch* of an owl) In its extended use it stresses, far more than any of the preceding nouns, the notion of control as distinguished from possession <fell into a usurer's *clutches*) <in the *clutch* of a great fear) <in the fell *clutch* of circumstance I have not winced nor cried aloud—*Henry*) or that of the act or fact of grasping with violence, with effort, or with frantic determination (as under the impulsion of terror) <in the *clutches* of a desperate infatuation—*Schwartz*) <the *clutch* of a drowning man at a straw) <I can't hold on ten seconds more . . . my *clutch* is going now—*Marryat*) <in the dry, womanless *clutch* of the army—*Irwin Shaw*)

Ana possession, ownership (see corresponding verbs at HAVE): control, command, *power, authority

hold back hold, withhold, reserve, detain, retain, *keep, keep back, keep out

hole *n* **Hole, hollow, cavity, pocket, void, vacuum** are comparable when they mean an open or unfilled space in a thing. **Hole** may apply to an opening in a solid body that is or that suggests a depression or an excavation <those *holes* where eyes did once inhabit—*Shak.*) <a gopher lives in a *hole* in the ground) or to one that passes through the material from surface to surface <look through a *hole* in the wall) <a *hole* in a garment) **Hollow**, which specifically implies opposition to *solid*, basically suggests an unfilled space within a solid object, usually one that has a surface opening <a cave is a *hollow* in a rock) <a nest in the *hollow* of a tree trunk) The term, however, is often applied to a depression in a surface <the ground was not quite smooth, but had many little heights and *hollows*) or to a deep and narrow valley (as a gully or ravine) <I hate the dreadful *hollow* behind the little wood—*Tennyson*) **Cavity** is a somewhat more learned word than *hollow* with much the same implications as the latter in its basic sense <an old *cavity* excavated by a woodpecker—*Burroughs*) The words are often used interchangeably, but *cavity* is preferred in technical use <a *cavity* in a tooth) <the abdominal *cavity*) **Pocket** is often employed in place of *cavity* for an abnormal or irregular space (as a bubble-like one in a substance or a sacklike one in a body). It is particularly referred to one that is a source of danger, especially in possessing the tendency to hold or to collect a foreign substance (as dirt, air, or pus) <a pus *pocket* in the lungs) <a *pocket* in an iron casting) <an air *pocket* in a pipe carrying a liquid interferes with the flow) <we found many persons at work . . . searching for veins and *pockets* of gold—*Bayard Taylor*) **Void** applies to an apparently

empty space, especially one of marked extent or of conspicuous duration, whether in a thing that is normally continuous <the air-filled *voids* of the soil—*A. M. Bateman*) or between things that are normally separate <the American planner will have . . . to give up his opaque passion for the transparent wall and go back to the alternation of solid and *void* that is characteristic of the Japanese house—*Mumford*) <the immense *void* between the earth and the nearest of the planets) <we suffer when we have time to spare and no printed matter with which to plug the *void*—*Huxley*) **Vacuum** basically and especially in technical use applies to space entirely devoid of matter; more often, however, it is applied to the space within an enclosed vessel in which by mechanical means the air has been practically, though seldom completely, exhausted. In its extended use the term applies to a condition or situation which resembles a true vacuum in its emptiness of all that normally should fill it or exert influence on anyone or anything that remains in it <you are not asked, as you are by so many novelists, to concern yourself with the fortunes of two or three people who live in a *vacuum* . . . but with the fortunes of all the sorts and conditions of men who make up the world in which we all live—*Maugham*) <he felt a sort of emptiness, almost like a *vacuum* in his soul—*D. H. Lawrence*)

Ana *aperture, orifice, interstice: perforation, puncture, bore, prick (see corresponding verbs at PERFORATE): slit, slash, cut (see CUT *vb*)

holiness, sanctity are often used without distinction to mean either the state or the character of one who is spiritually perfect or of something which is sacred or hallowed.

Holiness more often implies spiritual perfection, whether intrinsic and essential <the *holiness* of the Lord) or acquired by effort <the *holiness* of a saint) than it does sacredness, although the latter implication is not uncommon <and an highway shall be there, and a way, and it shall be called the way of *holiness*; the unclean shall not pass over it—*Isa* 35:8) **Sanctity** may be used either as denoting saintliness or the holiness attained by a saint <die in the odor of *sanctity*) <men of eminent *sanctity*—*Burke*) or the quality of being sacred or by law and especially by natural or divine law immune from violation <the sense of the dignity of human nature is an even more civilized feeling than the sense of the *sanctity* of human life—*Brownell*) <there is no greater *sanctity* in the right to combine than in the right to make other contracts—*Justice Holmes*)

Ana excavation, digging (see corresponding verbs at DIG): *gulf, chasm, abyss: orifice, *aperture

holocaust *fire, conflagration

holy, sacred, divine, spiritual, religious, blessed are comparable chiefly as epithets applied to persons or things associated with religion or worship and therefore either regarded with special reverence or veneration or thought of as having a character apart from what is material or

secular. Their choice is often a matter of idiom rather than of meaning inherent in the term. **Holy** (compare **HOLINESS**) usually implies some quality or some attribute in the thing itself which makes it either suitable for use in worship or an object of veneration. As the strongest of these terms in its suggestion of a claim upon one's reverence, it is the only one directly applied to the Supreme Being in praise or laudation (*holy, holy, holy*, Lord God Almighty—*Rev* 4:8) It also forms a part of some titles of the godhead or of a person of the Trinity (*the Holy Spirit*) It is also applied to some persons or group of persons as a mark of highest reverence or esteem; thus, the *Holy Family* consists of Mary, Joseph, and Jesus; the *Holy Father* is a frequent designation of the Pope; the *Holy Synod* is the governing body in some Orthodox churches. The term is comparably applied to particular things with a similar implication of reverence and esteem; thus, the central Eucharistic service of Christian churches is often called *Holy Communion*; Palestine is known as the *Holy Land*; water blessed for use in religious services is *holy water*; *Holy Week* is a week set apart for especially pious observances. In more general use *holy* is often the word chosen when one wishes to impute to what is so described some inherent character that dissociates it from what is mundane, material, or transitory (so *holy* and so perfect is my love—*Shak.*) (all is *holy* where devotion kneels—*Holmes*) (some words are considered so *holy* they must never be spoken aloud, such as the ancient Hebrew word for God—*Chase*) **Sacred** (see also **SACRED** 2) differs from *holy* chiefly in implying a character given to a thing by blessing, dedication, consecration to religion or worship or to the uses of religion or worship, or by its being devoted wholly to such ends or uses; the term therefore usually suggests an opposition to what is profane or exists for profane uses; thus, the vessels used in a Eucharistic service are preferably called *sacred vessels*; *sacred* as opposed to *profane* history is biblical history or history dealing with biblical characters or biblical events; *sacred* as opposed to *profane* literature may denote any or all of the books of the Bible or sometimes any or all writings (as the Bible, the Talmud, and the Koran) which are regarded by various religions as sources of revealed truth (*Sacred Writ*) (*sacred music*) (in its appointed compartment in the synagogue rested the *sacred Torah*—*Time*) In more general use *sacred* applies chiefly to what one treasures as a thing apart, not to be violated or contaminated by being put to vulgar or low uses or associated with vulgar or low ends (when they saw all that was *sacred* to them laid waste, the Navajos lost heart. They did not surrender; they simply ceased to fight—*Cather*) (nothing is at last *sacred* but the integrity of our own mind—*Emerson*) **Divine** in its oldest and most definite sense implies either the character of deity or an origin from or an association with deity; thus, "*divine being*" implies both a difference from "human being" and from "angelic being" and the possession of the nature or essence of deity (the belief that Christ is both human and *divine*) (a *divine* right is one that comes from God) (*divine* service is a service having for its end the worship of God) In its weaker senses *divine* may suggest a supernatural or a superhuman character or origin or, in hyperbolic use, a perfection that is above that which is found on earth (the great mystics declare that their experiences have some kind of cosmic and *divine* significance—*Jour. of Religion*) (that mighty orb of song, the *divine* Milton—*Wordsworth*) (the strains . . . of *divinest* music—*Farrar*) (by what magic was it that this *divine* sweet creature could be allied with that old churl!—*Meredith*) **Spiritual** implies an opposition in character or in quality to what

is bodily, material, earthy, or mundane; it may suggest incorporeal existence (angels are conceived of as *spiritual* beings) (the *spiritual* part of man) or independence from the merely physical or sensible (a *spiritual* marriage) (the leaders of Islam saw its *spiritual* foundations endangered by the subtle infidelities of pure rationalism—*Gibb*) or a definite relation to the soul or spirit in its aspiration toward or dependence on a higher power or in its perception of eternal values (the responsibility of human nature, not merely on the moral side, but equally on the *spiritual* side—*Mackenzie*) (the *spiritual* richness, the subtle emotional qualities, which illumined the great styles of the past—*Belluschi*) (our Declaration of Independence was written by men whose minds reached the *spiritual* level of eternal principles—*McGranery*) *Spiritual* in some chiefly technical legal and theological uses is more or less equivalent to *ecclesiastical* and then usually implies an opposition to *temporal* or *civil* (a *spiritual* lord, or lord *spiritual*, is a bishop or archbishop of the Church of England who has a right to sit in the House of Lords) (the boundary between lay and *spiritual* authority was never defined in pre-Conquest England—*Stenton*) **Religious** (for the application of this term to persons, see **DEVOUT**) implies an opposition to *secular* and a relation of some kind to religion; thus, *religious* history is the history of a religion or religions; *religious* literature is not the same as sacred literature but has a character that is determined by religion or by religious belief or feeling; *religious* music, unlike sacred music, is not necessarily suitable for use in services or prayer, for, although it includes sacred music, the term may also apply to music not composed for church use but animated by feeling or prompted by themes associated with religion (he stated that his discourses to people were to be sometimes secular, and sometimes *religious*, but never dogmatic—*Hardy*) (except for the nominal subjects of the legends, one sees nothing *religious* about them; the medallions, when studied . . . turn out to be less *religious* than decorative—*Henry Adams*) **Blessed** basically means consecrated (the *Blessed* Sacrament) and usually also suggests a supremely sacred character (our *Blessed* Lord) (the *Blessed* Virgin) In its derived senses *blessed* means beatified and supremely happy because enjoying the sight of God in heaven (the *blessed* spirits in heaven) In general use *blessed* may mean no more than enjoyable, pleasant, or satisfying (that extra *blessed* quarter hour in bed—*Spectorsky*) (we have no green vegetables here in winter, and no one seems ever to have heard of that *blessed* plant, the lettuce—*Cather*)

Ant dishonest —**Con** mendacious, lying, untruthful, deceitful (see DISHONEST)

honesty, honor, integrity, probity are comparable when meaning uprightness as evidenced in character and actions. **Honesty** implies refusal to lie, steal, defraud, or deceive (you can rely on his *honesty*) (he is a man of scrupulous *honesty*) (this crisis will be surmounted if the Church has the faith and courage, and, above all, the common *honesty*, to face it candidly—*Inge*) (was not greatly pleased with Lincoln, though admitting his *honesty* and fair capability—*W. C. Ford*) **Honor** (see also FAME) adds to *honesty* the implication of high-mindedness or a nice sense of allegiance to the standards of one's profession, calling, or position (business *honor* is the foundation of trade) (I could not love thee, dear, so much, loved I not *honor* more—*Lovelace*) (the fourth generation of Ralstons had nothing left in the way of convictions save an acute sense of *honor* in private and business matters—*Wharton*) (a national administration of such integrity . . . that its *honor* at home will ensure respect abroad—*Eisenhower*) **Integrity** implies such rectitude that one is incorruptible or incapable of being false to a trust or a responsibility or to one's own standards (his unimpeachable *integrity* as treasurer of a widows' and orphans' fund—*Hawthorne*) (the poet's sense of responsibility to nothing but his own inner voice, is perhaps his only way of preserving poetic *integrity* against the influences of a perverse generation—*Day Lewis*) **Probity** stresses tried or proved honesty or integrity (that sort of *probity* which such men as Bailey possess—*Keats*) (probity in domestic policy and wise judgment in foreign policy—*A. E. Stevenson*)

Ana veracity, *truth, verity: uprightness, justness, conscientiousness, scrupulousness (see corresponding adjectives at UPRIGHT): candidness or candor, openness, plainness, frankness (see corresponding adjectives at FRANK): reliability, trustworthiness, dependability (see corresponding adjectives at RELIABLE): rectitude, virtue, *goodness

Ant dishonor —**Con** *disgrace, disrepute, shame, ignominy, infamy

2 **Honor, homage, reverence, deference, obeisance** all mean respect or esteem shown another as his due or claimed by him as a right. **Honor** may apply to the recognition of one's title to great respect or esteem or to an expression or manifestation of such respect and esteem (hold every good and conscientious man in high *honor*) (he declined the *honor* that was offered him) (they feel deeply the *honor* of belonging to the Senate, and the necessity of protecting the Senate against dishonorable men—*New Republic*) **Homage** adds to *honor* implications of accompanying praise or tributes of esteem especially from those who owe allegiance or service (all these are . . . thy gentle ministers, who come to pay thee *homage*, and acknowledge thee their Lord—*Milton*) In its extended use the term carries a stronger implication of a worshipful attitude than *honor* carries (to the poetry of Byron the world has ardently paid *homage*—*Arnold*) (They say I'm hand-

some." "You're lovely, Bella!" She drank in his *homage*—*Meredith*) **Reverence** (see also REVERENCE) implies profound respect mingled with love or devotion (in general those parents have the most *reverence* who deserve it—*Johnson*) (it behooves those of us who cherish the past to study Alfred's life and works with a special *reverence*—*Malone*) **Deference** implies such respect for the person or his position or such reverence for his personality or such honor for his years or achievements that one courteously yields or submits one's own judgment, opinion, or preference to his (the arrangements for the flower show were altered out of *deference* to the wishes of the duchess) (a certain *deference*, not to say servility, to the heads of colleges is perhaps necessary to a physician that means to establish himself here—*Gray*) (looked like a great man . . . deriving dignity from a carriage which, while it indicated *deference* to the court, indicated also habitual self-possession and self-respect—*Macaulay*) (an attitude of hostility to aristocracy because it was aristocracy, was as incomprehensible to him as an attitude of *deference*—*Galsworthy*) **Obeisance** implies a show of honor or reverence by some act or gesture (as bowing or kneeling) that indicates submission, humility, or acknowledgment of defeat (the Spanish prince was welcomed . . . by a goodly company of English lords, assembled to pay him their *obeisance*—*Prescott*) Sometimes the term is used in place of one of the other words in this group to suggest abject humiliation on the part of the one who pays honor or reverence (a throne to which conquered nations yielded *obeisance*—*Steele*) (continually making humble *obeisance* to supercilious superiors—*Wier*)

Ana recognition, acknowledgment (see corresponding verbs at ACKNOWLEDGE): adulation, *compliment: tribute, panegyric, eulogy, *encomium

Con contempt, disdain, scorn, despite (see under DESPISE)

3 *honesty, integrity, probity

Ana uprightness, justness, honorableness, scrupulousness, conscientiousness (see corresponding adjectives at UPRIGHT): *truth, veracity: straightforwardness, forthrightness (see corresponding adjectives at STRAIGHTFORWARD): rectitude, virtue (see GOODNESS)

honor *vb* *dignify, ennoble, glorify

Ana *exalt, magnify, aggrandize: extol, laud, acclaim (see PRAISE): reverence, *revere, venerate

honorable 1 **Honorable, honorary** are sometimes not clearly distinguished. **Honorable** commonly applies to something which is worthy of honor (as in being noble, high-minded, or highly commendable) (an *honorable* calling) (*honorable* service) It is also used as a prefix to the names of some persons of distinction (as members of Congress or of Parliament, mayors, and certain scions of the nobility) and as a merely courteous appellation in speaking of an opponent in a debate or controversy (my *honorable* colleague says . . .) **Honorary** regularly and *honorable* occasionally apply to what is conferred, awarded, or given as an honor (an *honorary* degree) (*honorable* mention) (an *honorary* title) *Honorary*, but not *honorable*, is also used before a title of an office which is held without emolument or without responsibility for services (the *honorary* president of a society) (an *honorary* pallbearer)

Ant despair (*of*): despond

hopeful, **optimistic**, **roseate**, **rose-colored** are comparable when they mean having or showing confidence that the end or outcome will be favorable or for the best. **Hopeful**, which is often used in distinction from *sanguine* (see CONFIDENT), usually implies some ground, and often reasonably good grounds, for one's having hope; it therefore typically suggests confidence in which there is little or no self-deception or which may be the result of a realistic consideration of the possibilities <the air of youth, *hopeful* and cheerful—*Milton*> <I am *hopeful* of purification [in politics], but not *sanguine*—*J. R. Lowell*> <the vitamins of idealistic romance have been important in the expansive, the *hopeful* view of life—*Canby*> **Optimistic** usually implies a temperamental confidence that all will turn out for the best; unlike *hopeful*, it often suggests a failure to consider things closely and realistically or, even, a willingness to be guided by illusions rather than by facts <the *optimistic* or sentimental hypothesis that wickedness always fares ill in the world—*John Morley*> <the barren *optimistic* sophistries of comfortable moles—*Arnold*> Sometimes, however, the term carries a suggestion not of weakness but of a fundamental faith in the triumph of good or right <there is a species of discontent which is more fervently *optimistic* than all the cheerfulness the world can boast—*Replier*> **Roseate** and **rose-colored** in their relevant extended senses imply the optimism of an abounding cheerful temperament which enables one to see persons, events, or situations in their most attractive and alluring aspects. The terms definitely imply illusion or delusion and therefore connote an element of falsity, though not necessarily intentional falsity <a persuasive person who could depict the merits of his scheme with *roseate* but delusive eloquence—*Goldwin Smith*> <a *rose-colored* view of the world's future> <delivers a final . . . talk, capping the *rose-colored* impression of life in this particular branch of the services—*Christian Science Monitor*>

huge, vast, immense, enormous, elephantine, mammoth, giant, gigantic, gigantean, colossal, gargantuan, Herculean, cyclopean, titanic, Brobdingnagian are comparable when meaning exceedingly or excessively large. **Huge** is a rather general term indicating extreme largeness, usually in size, bulk, or capacity (an enormous volume of heavy, inky vapor, coiling and pouring upward in a *huge* and ebony cumulus cloud—*H. G. Wells*) (the Texan question and Mexican War made *huge* annexations of Southwestern territory certain—*Nevins & Commager*) **Vast** denotes extreme largeness or broadness, especially of extent or range (the Great Valley of California, a *vast* elliptical bowl averaging 50 miles in width and more than 400 miles long—*Amer. Guide Series: Calif.*) (consider the *vast* varieties of religions ancient and modern—*Cohen*) **Immense** suggests size far in excess of ordinary measurements or accustomed concepts (an *immense* quill, plucked from a distended albatross' wing—*Melville*) (found the balloon at an *immense* height indeed, and the earth's convexity had now become strikingly manifest—*Poe*) (the *immense* waste of war—*Brogan*) **Enormous** also indicates a size or degree exceeding accustomed bounds or norms (heavy wagons, *enormous* loads, scarcely any less than three tons—*Amer. Guide Series: Calif.*) (the princes of the Renaissance lavished upon private luxury and display *enormous* amounts of money—*Mumford*) **Elephantine** suggests the cumbersome or ponderous largeness of the elephant

(similar *elephantine* bones were being displayed . . . as relics of the "giants" mentioned in the Bible—*R. W. Murray*) (elephantine grain elevators—*Amer. Guide Series: N. Y.*) **Mammoth** is similar to *elephantine* (her parties were . . . *mammoth*—she rarely invited fewer than 100 people—*Time*) (a *mammoth* cyclotron—*Whicher*) **Giant** indicates unusual size or scope (loaded with a typical unit of *giant* industrial equipment, the new car weighs more than a million pounds—*Pa. Railroad Annual Report (1952)*) (his *giant* intellect) **Gigantic** and the uncommon **gigantean** are close synonyms of *giant* perhaps more likely to be used in metaphorical extensions (gigantic jewels that a hundred Negroes could not carry—*Chesterton*) (a justice of the Supreme Court . . . however *gigantic* his learning and his juridic rectitude—*Mencken*) **Colossal** may suggest vast proportion (three sets of *colossal* figures of men and animals . . . the largest man is 167 feet long—*Amer. Guide Series: Calif.*) (the sun blazed down . . . the heat was *colossal*—*Forester*) **Gargantuan** suggests the hugeness of Rabelais's Gargantua and is often used in reference to appetites and similar physical matters (gargantuan breakfasts . . . pigs' knuckles and sauerkraut, liver and bacon, ham and eggs, beef stew—*Ferber*) **Herculean** suggests the superhuman power of the Greek hero Hercules or the superhuman difficulties of his famous labors (a *Herculean* task confronted them. Some 1700 miles of track had to be laid through a wilderness—*Nevins & Commager*) **Cyclopean** suggests the superhuman size and strength of the Cyclops of Greek mythology (of *cyclopean* masonry, consisting of very large blocks of stone—*Scientific American*) **Titanic** suggests colossal size and, often, primitive earth-shaking strength (titanic water frosts speedily choked both those rivers—*H. G. Wells*) (it was his *titanic* energy that broke the fetters of medievalism—*Cohen*) **Brobdingnagian** suggests the hugeness of the inhabitants of the Brobdingnag of *Gulliver's Travels* (a brand-new *Brobdingnagian* hotel—*Disraeli*) **Ana** stupendous, tremendous, prodigious, monumental, *monstrous: big, great, *large

hullabaloo *din, uproar, pandemonium, babel, hubbub, clamor, racket

humanitarian humane, benevolent, philanthropic, eleemosynary, *charitable, altruistic

humble *adj* **Humble**, meek, modest, lowly are comparable when they mean lacking all signs of pride, aggressiveness, or self-assertiveness either in spirit or in outward show. All are applicable to persons and their attitudes and manners, and all but *meek* may also be applied to homes, occupations, interests, and ways of life. **Humble** may suggest a virtue that consists in the absence of pride in oneself or in one's achievements and, in religious use, a consciousness of one's weakness and a disposition to ascribe to the Supreme Being all credit for whatever one is or does that is meritorious (God resisteth the proud, but giveth grace unto the *humble*—*Jas 4:6*) (Knowledge is proud that he has learned so much; Wisdom is *humble* that he knows no more—*Cowper*) Often *humble* connotes undue self-depreciation or humiliation sometimes verging on abjectness (she is *humble* to abjectness—*De Quincey*) As applied to a person's circumstances, *humble* suggests low social rank, poverty, or insignificance (a man of *humble*

extraction) <a *humble* Mexican family—*Cather*> <he regarded no task as too *humble* for him to undertake—*Huxley*> **Meek** also, especially in Christian use, may imply a virtue evident not only in the absence of passion or wrath but in a consistent mildness or gentleness of temper <a *meek* and quiet spirit, which is in the sight of God of great price—*1 Pet 3:4*> In more general use, however, the term so often additionally suggests spiritlessness or undue submissiveness that even when it is employed without derogation these ideas are often connoted <Stephen's face grew serious . . . "I'm sorry I upset you." Oh, so he was going to be *meek* and Christian! Tony wasn't going to stand that either—*Archibald Marshall*> <*meek*, humble, timid persons, who accept things as they are—*Benson*> **Modest** is often preferred to *humble* in describing a person who takes no credit to himself for what he is or for what he does; the term usually connotes a lack of boastfulness or show of conceit, but it does not necessarily imply, as *humble* often does imply, a deep conviction of one's unworthiness or inferiority <the model of an eighteenth-century parish priest . . . just, *modest* . . . loved and esteemed by all—*Ellis*> <Taft was so certain he was right he could be rather charmingly simple and *modest*—*New Republic*> As applied to such things as a home, a position, or a price, *modest* suggests neither extreme lowness nor the opposite, but a reasonable and often unobtrusive medium between extremes <live in *modest* circumstances> <my own hotel was *modest* enough, but it was magnificent in comparison with this—*Maugham*> **Lowly** is often indistinguishable from *humble* except in its lack of derogatory connotations such as abjectness or sense of inferiority <surely he scorneth the scorners: but he giveth grace unto the *lowly*—*Prov 3:34*> <thy heart the *lowliest* duties on herself did lay—*Wordsworth*> <men . . . of *lowly* station—hatters, carriers, tanners, dyers, and the like—*Motley*>

hypocrisy, **sanctimony**, **pharisaism**, **cant** mean the pretense or affectation of being more virtuous or more religious than one actually is. The same differences in implications and connotations are found in their corresponding adjectives, **hypocritical**, **sanctimonious**, **pharisaical**, **canting**. **Hypocrisy** and **hypocritical**, the most inclusive of these terms, imply an assumption of goodness, sincerity, or piety by one who is either not good, sincere, or pious or is actually corrupt, dishonest, or irreligious <I thought where all thy circling wiles would end—in feigned religion, smooth *hypocrisy*—*Milton*> <be *hypocritical*, be cautious, be not what you seem but always what you see—*Byron*> <Archer's New York tolerated *hypocrisy* in private relations; but in business matters it exacted a limpid and impeccable honesty—*Wharton*> <much of the religiosity which unwise parents delight to observe in their children is . . . innocent *hypocrisy*—*Inge*> <the passing stranger who took such a vitriolic joy in exposing their pretensions and their *hypocrisy*—*Brooks*> **Sanctimony** and **sanctimonious** are terms of opprobrium implying an affectation or merely outward pretense of holiness or of piety <he took pleasure in comparing the sanctity of the early Christians with the *sanctimony* of many modern churchgoers> <the preacher urged his flock to seek holiness but to take care lest they fall into *sanctimony*> <*sanctimonious* professions of faith> <a woman who was religious without being

sanctimonious—Stokes > **Pharisaism** and **pharisaical** imply a stern and censorious attitude to the manners and morals of others or a conviction of one's own moral superiority, or both; the terms frequently suggest sanctimony or, less often, out-and-out hypocrisy <*pharisaism*, stupidity, and despotism reign not in merchants' houses and prisons alone—*Farrell*> <the assured, the positive, the *pharisaical* temper, that believes itself to be impregnable in the right and its opponents indubitably in the wrong—*Benson*> **Cant** (see also **DIALECT**) and **canting** imply the use of religious or pietistic language or phraseology in such a way as to suggest sanctimony or hypocrisy rather than genuine holiness or deep religiousness; often, however, the terms suggest reference not only to such outward indications of sanctimony and hypocrisy but to the state of mind or the attitude of one who is so pharisaical, or so deeply convinced of his righteousness or holiness, that he is unaware that he is displaying his religion in a mechanical or perfunctory rather than in a sincere manner and in a spirit of arrogance rather than of humility <a *canting* moralist> <a *canting* assumption of his righteousness> <the whole spiritual atmosphere was saturated with *cant* . . . an affectation of high principle which had ceased to touch the conduct, and flowed on in . . . insincere and unreal speech—*Froude*> <one of those rare artists . . . who, by virtue of some inward grace, constantly flowing through the intellect, purge the mind of *cant*—*Brooks*>

hypothesis, theory, law are often interchangeable in general use. In their technical senses they are usually discriminated by the scientists and philosophers who employ them. In general the terms denote an inference from data that is offered as a formula to explain the abstract and general principle that lies behind the data and determines their cause, their method of operation, or their relation to other phenomena. In such usage **hypothesis** implies tentativeness in the reference because of insufficient evidence and applies to a well-founded conjecture that serves as a point of departure for scientific discussion or as a tentative guide for further investigation or as the most reasonable explanation of an imperfectly comprehended phenomenon <a scientist says in effect—"Observation shows that the following facts are true; I find that a certain *hypothesis* as to their origin is consistent with them all"—*Jeans*> <the resemblance to electric polarization is very close; it is in fact so close that it would not be foolish at all to make the *hypothesis* that the iron contains not only

electrons but also tiny corpuscles of some subtle magnetic fluid—*Darrow*> <in the last chapter I proposed the *hypothesis* that a pure poetry exists, employing the term "lyric" to describe poems which "consist of poetry and nothing else"—*Day Lewis*> **Theory**, in general use, often means little more than *hypothesis* or *conjecture* <"Let us sit quiet, and hear the echoes about which you have your *theory*." "Not a *theory*; it was a fancy"—*Dickens*> <in the course of my work in Egypt, I had formulated certain *theories* of my own about plague, and could not reconcile them to the findings of the Commission—*Heiser*> but in precise technical use it presupposes more supporting evidence than *hypothesis* does, a wider range of application, and greater likelihood of truth. It is not always obvious when *hypothesis* and when *theory* should be used; in comparable applications *hypothesis* is preferred by some scientists as the more modest in its claims, *theory* being preferred by others as suggesting such confidence in the reliability of the inference and its supporting evidence as to imply that it deserves acceptance <the Darwinian explanation of the origin of species is regarded by some as a *hypothesis*, but is more often designated as the *theory* of evolution> <that exact verbal expression of as much as we know of the facts, and no more, which constitutes a perfect scientific *theory*—*T. H. Huxley*> <in 1905 Einstein crystallized these concepts and hypotheses in his *theory* of light quanta, according to which all radiation consisted of discrete bullet-like units—*Jeans*> <there was also a nascent *theory* of sound waves; and out of it there grew . . . a tremendous mathematical doctrine of waves which nowadays has almost come to dominate the physics of these times—*Darrow*> **Law** (for fuller treatment see **PRINCIPLE**) emphasizes certainty and proof and therefore applies to a statement of an order or relation in phenomena that has been found to be invariable under the same conditions <in philology, Grimm's *law* is a statement of the regular changes which the stops, or mute consonants, of the primitive Indo-European consonant system have undergone in the Germanic languages> However, since such laws are subject to correction or alteration by the discovery of contradictory or additional evidence, the term is often changed in the course of time to *theory*; thus, what has long been known as Newton's *law* of gravitation is currently being revised as a result of Einstein's discoveries and is sometimes designated as Newton's mathematical *theory* of universal gravitation.

idea, concept, conception, thought, notion, impression mean what exists in the mind as a representation of something that it apprehends or comprehends or as a formulation of an opinion, a plan, or a design. **Idea** is the most comprehensive and widely applicable of these terms; it may be used of an image of something at one time or another actually perceived through the senses, or of something never perceived but visualized from bits of information <described his *idea* of a penthouse> <his *idea* of heaven does not correspond to that of most persons> <our *ideas* of a good time aren't the same, and never will be—*Rose Macaulay*> or of something that is the clearly or vaguely defined product of fancy, imagination, or inventive power <he . . . invented a new kind of buoy which was found by the authorities to be excellent in *idea*, but impracticable—*Ellis*> <the *idea* of holiness has its history, like other religious *ideas*, and the history is not edifying—*Inge*> <one of those accepted *ideas*, which are always wrong, that China is and was a country of immovable and unchanging traditions—*Binyon*> It may denote a mere supposition <I had no *idea* that the law had been so great a slavery—*Austen*> or a good or practical solution or suggestion <a very clever point that . . . You are really full of *ideas*—*Shaw*> or a ridiculous or preposterous suggestion <Mr. Elton in love with me! What an *idea!*—*Austen*>

Concept applies in logic to the idea of a thing which the mind conceives after knowing many instances of the category to which it belongs and which is devoid of all details except those that are typical or generic <the *concept* of "horse," "table," "mountain"> <the author of *Mein Kampf* has abolished the whole *concept* of the citizen as we have known it from the days of Pericles—*Dorothy Thompson*> In more general use the term applies to a formulated and widely accepted idea of what a thing should be <we find among the Greeks germinal *concepts* which are a vital part of modern thought—*Buchan*> <thus the popular *concept* of what news was came more and more to be formed upon what news was printed—*Mott*> **Conception** is often used in place of *concept* in this latter sense; in fact it is sometimes preferred by those who wish to keep *concept* as a technical term of logic. However *conception* so strongly suggests the activity of the mental power of bringing into existence an idea of something not yet realized or not yet given outward form that it often implies not only the exercise of the reflective powers but of the imagination as colored by feeling; the term therefore more often applies to a peculiar or an individual idea than to one held by men as a whole or by an entire class, profession, or group <compare Poe's *conception* of poetry as "the rhythmical creation of beauty" with the Aristotelian *conception* of it as the imitation of human actions "according to probability and necessity"> <what I needed was . . . some clear *conception* of the meaning of existence—*L. P. Smith*> **Conception** is also, especially in literary and art criticism, the usual term for the idea or design conceived by the writer or artist in advance of or in company with his giving it expression or form <Dante's boldness of *conception*> <the dramatist's power to express his *conception* with frankness and daring> <the *conception* comes

through the actual execution—*Alexander*> **Thought** applies either to an expressed or to an unexpressed idea, especially one that comes into the mind as a result of meditation, reasoning, or contemplation <a child's *thoughts* about God> <he had not a *thought* of disaster> <have to wait for the occasional genius, or the occasional lucky *thought*—*Whitehead*> <his mind ran over the great cities . . . Of them all, only New York was as it had always been, and he was angered at the *thought*—*Buck*> **Notion** often adds to *idea*'s implication of vagueness the suggestion of caprice or whim or of half-formed or tentative purpose or intention <her *notion* of a delta was a lot of channels and islands—*Forester*> <one never does form a just idea of anybody beforehand. One takes up a *notion*, and runs away with it—*Austen*> <modest, sober, cured of all her *notions* hyperbolic—*Cowper*> but *notion* may also come close to *concept* in suggesting a general or universal concept <arriving at the *notion* of law—*Babbitt*> or to *conception* in denoting the meaning content assigned by the mind to a term <have no adequate *notion* of what we mean by causation—*Sapir*> **Impression** (see also IMPRESSION 1) usually suggests an idea which comes into the mind as the result of an external stimulus <I should like to know your first *impressions* of this book> <poetry . . . aims at the transmission . . . of *impressions*, not facts—*Lowe*> <looking out over the steep hills, the first *impression* is of an immense void like the sea—*Jefferies*>

identify, incorporate, embody, assimilate are comparable when they mean to bring (one or more things) into union with another thing. **Identify** involves the idea of a union of things that are or are thought of as identical, or the same; it may imply the actual making of a thing or things the same as another <every precaution is taken to *identify* the interests of the people and of the rulers—*Ramsay*> <it is the writer's business to *identify* words with things, emotion with thought—*Muller*> or it may refer to the mental apprehension of a real or imagined identity between things <Min was *identified* with Horus the son of Isis—*Mercer*> <should make us wary toward those who . . . have *identified* Americanism with a partisan policy in behalf of concealed economic aims—*Dewey*> This latter use may

connote confusion in thought or self-deception (it is easy to *identify* cynicism with honesty and hence with truthfulness—*Hamburger*) **Incorporate** implies a union of one or more things with another, or of different things, so that when blended, fused, or otherwise united they constitute a uniform substance, a single body, or an integral whole (fertilizers should, in general, be *incorporated* with the soil) (what is learned is of no value until it is *incorporated* into one's stock of knowledge) (what he does is to *incorporate* verbatim a good many of Leonardo's notes into a narrative that is entirely his own—*William Murray*) **Embody** (see also REALIZE 1) is more restricted in its range of application than *incorporate* because it can be used only when one or more things are made part of another thing that is an ordered whole (as an organized structure, a group, or a system) (yet so much of these treaties has been *embodied* into the general law of Europe—*Mackintosh*) (a recognized scholar, whose discussion . . . *embodies* the finest fruits of contemporary opinion and research—*E. H. Swift*) **Assimilate** (see also ABSORB 1) falls short of *identify* because it does not always imply the actual fusion or blending or, when self-deception is connoted, the actual confusion, of two things. Like *identify*, however, *assimilate* implies the making of two or more things exactly alike, either actually or in thought; thus, to *assimilate* one's beliefs to those of another is to change them so that they become the same as his; to *identify* one's beliefs with those of another is to make them one and indistinguishable as well as the same; the *d* of the Latin prefix *ad-* is often *assimilated* to a following consonant as in *affectus* for *adfectus* (our manufacturing class was *assimilated* in no time to the conservative classes—*H. G. Wells*)

idle *vb* **Idle, loaf, lounge, loll, laze** mean to spend time not in work but in idleness. **Idle** may be used with reference to persons or to things that move lazily or without purpose; it may also be employed to connote either strong censure or a pleasant or justifiable action (why do you *idle* away all your days?) (it is impossible to enjoy *idling* thoroughly unless one has plenty of work to do—*Jerome*) (the brook *idles* through the pasture) (her fingers *idled* over the keys) (it is pleasant to saunter out in the morning sun and *idle* along the summer streets with no purpose—*L. P. Smith*) **Loaf** suggests either a resting or a wandering about as though there were nothing to do; it does not necessarily imply contempt, although its agent noun *loafer* when used seriously nearly always carries that implication and has often affected the meaning of the verb (Tennyson does

the greater part of his literary work . . . between breakfast and lunch, and *loafs* the rest of the day—*Boston Journal*) (I *loaf* and invite my soul, I lean and *loaf* at my ease observing a spear of summer grass—*Whitman*) (the idea of the university as a place of leisure where rich young men *loaf* for three or four years is dying—*Russell*) (men who came into the shop to *loaf* during winter afternoons—*Anderson*) **Lounge**, though occasionally used as equal to *idle* or to *loaf*, typically conveys an additional implication of lazily resting or reclining against a support or of physical comfort and ease in relaxation (he stood . . . *lounging* with his elbow against the bar—*Dickens*) (against the sunny sides of the houses, men *lounged*, or played at duck on a rock—*Mary Austin*) The agent noun *lounger* is, however, usually derogatory, though slightly less so than *loafer* (he is not a *loafer*, but he is a *lounger* on street corners during his free hours) (the *loungers* at the bar were beginning to show signs of leaving—*MacFall*) **Loll** also carries an implication of a posture similar to that of *lounge*, but it places greater stress upon an indolent or relaxed attitude (there were not yet any jaded people *lolling* supine in carriages—*Shaw*) (on Sunday afternoons . . . when a crowd was there to *loll* on the front porch and swap stories—*Caldwell*) **Laze** usually implies the relaxation of a busy person enjoying a vacation or his moments of leisure (I had a very pleasant time, sailing, fishing, and *lazing* about—*J. ignorant, illiterate, unlettered, uneducated, untaught, untutored, unlearned mean not having knowledge. One is **ignorant** who is without knowledge, whether in general or of some particular thing (a very superficial, *ignorant*, unweighing fellow—*Shak.*) (the disputants on both sides were *ignorant* of the matter they were disputing about—*Ellis*) One is **illiterate** who is without the necessary rudiments of education; the term may imply a failure to attain a standard set for the educated or cultivated man (you might read all the books in the British Museum (if you

could live long enough) and remain an utterly *illiterate*, uneducated person—*Ruskin*) but when directly applied to a person it usually implies inability to read or write (*illiterate* in the sense that they could not read or write, or . . . functionally *illiterate* in the sense that they were unable to understand what they read—*Kandel*) (*illiterate voters*) When applied to words or alterations of words or grammatical constructions, it implies violation of the usage of educated men or a status below that of the standard English of the day; thus, most teachers would stigmatize the expression “I seen it” as *illiterate*. The word, however, is often used merely as a contemptuous description of one (as a person, an utterance, or a letter) that shows little evidence of education or cultivation (his speech is positively *illiterate*) or shows inability to read and understand (it is common knowledge that our professional students and candidates for the Ph.D. are *illiterate*. One thing you learn very quickly in teaching students at the loftiest levels of education is that they cannot read—*Hutchins*) One is *unlettered* who is without the learning that is to be gained through the knowledge of books. Often it implies being able to read and write, but with no facility in either reading or writing (*unlettered* peasants) but sometimes it implies general ignorance or illiteracy (his addiction was to courses vain, his companies [companions] *unlettered*, rude and shallow—*Shak.*) One is *uneducated, untaught, untutored, or unlearned* who either has had no training in the schools or under teachers or whose ignorance, or crudeness, or general lack of intelligence suggests such a lack; none of the words, however, is used with great precision or in a strict sense (beliefs common among *uneducated men*) (lo, the poor Indian! whose *untutored* mind sees God in clouds, or hears him in the wind—*Pope*) (experiences of an *unlearned* man in the search for truth and understanding—*Brit. Book News*) (taught so many flat lies that their false knowledge is more dangerous than the *untutored* natural wit of savages—*Shaw*)

illiberal *adj* *Illiberal, narrow-minded, narrow, intolerant, bigoted, hidebound* mean so lacking in breadth of mind or experience as to be unwilling or unable to understand the point of view of others. *Illiberal* implies a lack of freedom

of spirit, mind, or thought that prevents one from entering into sympathy with the aims, beliefs, policies, or attitudes of others; it usually suggests an ungenerous or grudging mind (the *illiberal* or fanatically intolerant spirit which war psychology always engenders—*Cohen*) *Narrow-minded* and *narrow* stress an ingrained temperament that is incompatible with breadth of mind; they usually suggest an inability to see and understand others' beliefs or aims owing to such determining circumstances as birth, breeding, or environment (the American Puritans are frequently described as *narrow-minded*) (there was nothing *narrow* or *illiberal* in his early training—*J. R. Green*) (he shows to the full their *narrow-minded* hatred of the preceding century—*Stephen*) *Intolerant* may imply illiberality or narrow-mindedness or it may imply an avoidance of weak permissiveness, but it emphasizes unwillingness to tolerate ideas contrary to one's own or to those accepted either generally or in accord with some standard (*intolerant* refusal to listen to an opponent . . . has no business in such a representative nineteenth-century drawing room—*Shaw*) (what force, what fury drove us into saying the stupid, *intolerant*, denunciatory things we said—*L. Smith*) (always *intolerant* of loose thinking and of verbosity, he compressed into the masterly introductory essays . . . his entire theory—*Bidwell*) *Bigoted* implies complete satisfaction with one's religious or social creed and unwillingness to admit truth in others; it usually suggests unreasonableness, obstinacy, and narrow-mindedness (<“The heart has its reasons which the intellect knows not of.” How often have these words of Pascal been abused to justify a temper too indolent to inquire, too *bigoted* to doubt—*Inge*) (in spite of his wide outlook and interests, he could be narrow and *bigoted* in theoretical views and general prejudices—*Malinowski*) *Hidebound* implies the strong restraint of custom, tradition, or habit and aversion to change. There is less suggestion in this word of antagonism to those who hold other opinions, but a strong suggestion of unwillingness to be moved (small-town persons, *hidebound* in their beliefs and conventions) (a nature sometimes *hidebound* and selfish and narrow to the last degree—*Coulton*)

illuminate, illumine, light, lighten, enlighten, illustrate are comparable when meaning to fill with light or to throw light upon. *Illuminate* implies the use of a bright light or of something comparable to it in such a way that what

is dark is made bright or what is complicated, obscure, or vague is made clear <the oblique band of sunlight . . . *illuminated* her as her presence *illuminated* the heath—*Hardy*> <the greatest truths are perhaps those which being simple in themselves *illuminate* a large and complex body of knowledge—*Alexander*> <he longed . . . to hear more about the life of which her careless words had given him so *illuminating* a glimpse—*Wharton*> **Illumine** is chiefly literary or poetical for *illuminate* <what in me is dark *illumine*—*Milton*> <no lurid fire of hell or human passion *illumines* their scenes—*Eliot*> *Light*, *lighten*, and *enlighten* carry a stronger implication of providing with light for clear seeing than of throwing a light upon. **Light** is the most consistently literal of these terms, though it often carries a suggestion of brightening the way of one who otherwise might stumble or go astray <the room was brilliantly *lighted*> <all our yesterdays have *lighted* fools the way to dusty death—*Shak.*> <seas roll to waft me, suns to *light* me rise—*Pope*> <the old man scratched a match, the spark *lit* up the keyhole of a door—*Lowell*> **Lighten**, like *light*, basically implies a making brighter or a lessening of darkness, but it has more extended and poetic use <*lighten* our darkness, we beseech thee, O Lord—*Book of Common Prayer*> <I would not convey the thought that an opinion is the worse for being *lightened* by a smile—*Cardozo*> **Enlighten**, which has almost wholly lost its basic meaning of to make physically light or bright, is common when filling with intellectual or spiritual light is implied <the Chinese philosopher . . . needed no discovery of science to *enlighten* him; that enlightenment was part of his philosophy, his religion—*Binyon*> Sometimes the term implies that one has been supplied with information necessary to the understanding of something <in her simplicity she did not know what it [her mistake] was, till a hint from a nodding acquaintance *enlightened* her—*Hardy*> and sometimes it implies sufficient education and experience to enable one to meet all needs and, especially in the adjective *enlightened*, to remove or overcome superstition, prejudice, or intolerance <the civilized and *enlightened* portions of the world at the time of the Declaration of Independence—*Taney*> **Illustrate** (see also EXEMPLIFY) is somewhat rare in a sense which approaches that of *illuminate* and in which it suggests the shedding of luster rather than of light, embellishment rather than elucidation, and distinct exhibition rather than a bringing into view <the poet or philosopher *illustrates* his age and country by the efforts of a single mind—*Gibbon*> <narrow of vision but steadfast to principles, they fronted life resolutely, honoring and *illustrating* the supreme worth of freedom—*Replier*>

image 1 **Image**, **effigy**, **statue**, **icon**, **portrait**, **photograph**, **mask** all mean a lifelike representation especially of a living being. **Image** (see also SENSATION 1) in its earliest English sense denotes a sculptured, cast, or modeled representation (as of a god or a sacred or saintly person) especially when intended for the veneration of the people. The term is also applicable to a representation of a person made in wax, clay, or other plastic substance (as for use in a museum or exhibit or by a sorcerer who wishes to injure or destroy the person through attack on his image).

Effigy is commonly limited to images sculptured, especially on sepulchral monuments (as in medieval cathedrals), or engraved, especially on coins, except in the idiomatic phrase “to burn (or hang) in *effigy*.” In the latter use *effigy* often implies a crude simulacrum in clothes similar to those worn by the original which serves merely as an object on which is inflicted the sort of punishment which he is supposed to deserve <in some parts of England Guy Fawkes is burned in *effigy* each fifth of November>

Statue applies not only to an image for use in a church but to a sculptured, cast, or modeled representation of the entire figure, especially as distinguished from a *bust* or *head*, of a living or dead person <a colossal *statue* of Christ on the peak of a high mountain overlooking the harbor> <an equestrian *statue* of Washington>

Icon specifically designates the type of representation of Christ, the Virgin Mary, or a saint used in Orthodox churches and homes. Because of a literal interpretation of the Second Commandment forbidding the making of graven images an icon is never a statue but is a painting, a mosaic, or a bas-relief <the walls were studded with little *icons* of saints, each one with its guttering lamp before it—*Buchan*>

Portrait implies pictorial representation, especially of the figure or of the face of a person; it may be used of such a representation as is executed by drawing, photographing, engraving, or, in its now common specific sense, by painting <the Gilbert Stuart *portraits* of Washington> <the latest *portrait* of the chief justice of the Supreme Court>

Photograph applies only to a portrait that is made by means of a camera and sensitive plates or films. **Mask** applies primarily to a molded copy of a face made in wax or plaster; thus, a death *mask* is a copy made very soon after a person has died, especially a cast or impression taken directly from the face of the dead person.

imaginary *adj* 1 **Imaginary, fanciful, visionary, fantastic, chimerical, quixotic** are comparable when they are applied to conceptions or to the persons who form the conceptions and mean unreal or unbelievable and out of keeping with things as they are or conceiving such unreal or unbelievable things. Something is **imaginary** which is fictitious and purely the product of an active or an excited imagination (*imaginary* ills and fancied tortures—*Addison*) <those nervous persons who may be terrified by *imaginary* dangers are often courageous in the face of real danger—*Ellis*> Something is *or*, less often, one is **fanciful** which or who indicates a giving rein to the power of conceiving or producing things that have no real counterpart in nature or in fact (in Wales he found a cottage perfectly roofed with fern . . . Had a painter put this in a picture, many would have exclaimed: "How *fanciful!*"—*Jefferies*) <*Rousseau's fanciful* image of primitive man, uncontaminated by science or art, undepraved by thought—*Grandgent*> Something is **visionary** which, although it seems real and practical to the one who conceives it, is usually the product of a dream or vision or of an unrestrained imagination and is incapable of realization (<*visionary* schemes for world conquest) <*Goldsmith* had long a *visionary* project, that . . . he would go to *Aleppo*, in order to acquire a knowledge . . . of any arts peculiar to the East, and introduce them into Britain—*Boswell*> <this was a *visionary* scheme . . . a project far above his skill—*Swift*> One is *visionary* who is given to such dreams, visions, and fancies and inspired by the hopes they arouse (if a man happens not to succeed in such an enquiry, he will be thought weak and *visionary*—*Burke*) <planning, as his *visionary* father might have done, to go to *Brazil* to pick up a fortune—*Van Doren*> Something is **fantastic** (see also FANTASTIC 2) which is *or*, more often, seems extravagantly fanciful or queer and hence incapable of belief or, sometimes, approval (in words, as fashions, the same rule will hold; alike *fantastic*, if too new, or old—*Pope*) <his strange coming, his strange story, his devotion, his early death and post-humous fame—it was all *fantastic*—*Cather*> <a *fantastic* world inhabited by monsters of iron and steel—*Bromfield*> Something is **chimerical** which is wildly or fantastically visionary or unreal (an universal institutional church is as *chimerical* an idea as an universal empire—*Inge*) <the defeat was more complete, more humiliating . . . the hopes of revival more *chimerical*—*Times Lit. Sup.*> Something is *or* one is **quixotic** which or who is motivated by extravagantly chivalrous devotion to visionary ideals (<*quixotic* as a restoration of medieval knighthood—*Cohen*> <to insist upon clemency in the circumstances would . . . have required *quixotic* courage—*Buchan*> <the economic notion that our present population . . . can live on this island and produce by their work a real income that will give them a rising standard of comfort and leisure, is utterly *quixotic*—*Hobson*>

2 *imaginative, imaginal, imaginable

imagination, fancy, fantasy are comparable when denoting either the power or the function of the mind by which mental images of things are formed or the exercise of that power especially as manifested in poetry or other works of art. The meanings of all of these terms have been greatly influenced by changing psychological and aesthetic theories, with the result that in the past they have often

carried implications or connotations and sometimes denotations not observable in modern use. **Imagination** is not only the most inclusive of these terms but the freest from derogatory connotations. As an inclusive term it may apply either to the power of forming images of things once known but now absent (our simple apprehension of corporeal objects, if present, is sense; if absent, is *imagination*—*Glanvill*) or to the power of forming images of things not seen, or actually nonexistent, or incapable of actual existence (one feels that a livelier melodic *imagination* would serve the needs of classical opera better—*Evet*) In the first instance the term suggests the use of memory as well as of the image-making power (recall the past in one's *imagination*) <her face haunted his *imagination*> In the second it usually suggests either a new combination of elements found in one's experience or an ability to conceive of something, seen only fragmentarily or superficially, as a complete, perfected, and integral whole (a man of no *imagination* is less likely to feel physical fear) <with *imagination* enough to see the possible consequences) <and as *imagination* bodies forth the forms of things unknown, the poet's pen turns them to shapes and gives to airy nothing a local habitation and a name—*Shak.*> <it is only through *imagination* that men become aware of what the world might be—*Russell*> <facts . . . give us wherewithal to think straight and they stimulate the *imagination*; for *imagination*, like reason, cannot run without the gasoline of knowledge—*Grandgent*> **Fancy** (see also FANCY 3) usually means the power to conceive and give expression to images that are far removed from reality or that represent purely imaginary things (she saw, with the creative eye of *fancy*, the streets of that gay bathing place covered with officers—*Austen*) <the world which any consciousness inhabits is a world made up in part of experience and in part of *fancy*—*Krutch*> In aesthetic use there is a tendency to make *imagination* and *fancy* antithetical. *Imagination* is often used to designate the power of representing the real or what gives an illusion of reality in its entirety and organic unity and, usually, in its ideal or universal character; *fancy*, the power of inventing the novel and unreal by recombining the elements found in reality. So interpreted, *imagination* represents men not only in their outward but in their inward life, and produces a Hamlet; *fancy* presents them in alien surroundings, or essentially changed in their natural physical and mental constitution, and produces centaurs and Broddingnagians (the *imagination*, or shaping or modifying power; the *fancy*, or the aggregative and associative power—*Coleridge*) <Martians, the little green men of popular *fancy*> <Mendelssohn's *fancy* gives additional soaring power to the poet's—*Kolodin*> **Fantasy** often takes the place of *fancy* in naming the power of unrestrained and often extravagant or delusive fancy or its exhibition in art (<readers . . . live a compensatory life of *fantasy* between the lines of print—*Huxley*> <this mechanical man or robot idea has been decidedly overdone in the writings of *fantasy*—*Furnas*>

Ana invention, creation (see corresponding verbs at INVENT): conceiving or conception, realizing or realization (see corresponding verbs at THINK)

imaginative, imaginal, imaginable, imaginary, though not synonymous, are sometimes confused because of their verbal likeness. **Imaginative** applies to something which is the product of the imagination or has a character indicating the exercise or the power of the imagination; thus, *imaginative* writings are often distinguished from such factual writings as historical, expository, and argumentative; an *imaginative* poet is one whose imagination

heightens his perception of people and things (it is a common fallacy that a writer . . . can achieve this poignant quality by improving upon his subject matter, by using his "imagination" upon it and twisting it to suit his purpose. The truth is that by such a process (which is not *imaginative* at all!) he can at best produce only a brilliant sham—*Cather*) (workaday scientists) . . . are prone to identify the poetical with the impractical, the *imaginative* with the imaginary, the fictional with the false—*Muller*) **Imaginational**, meaning of the imagination or within the conceptive powers of the imagination, has been used, especially by psychologists, to fill the need for an adjective which refers to the imagination only as a function of the mind rather than as a creative power or to images as the mental representations which follow a sensation; thus, a person belongs to one *imaginational* type rather than to another because of his tendency to have sensory images of a particular kind (as visual, tactile, or auditory) (perhaps they owe their *imaginational* coloration to some childhood experience—*Cutsforth*) **Imaginable** often means little more than *conceivable*, but more precisely it may imply that the thing so qualified can be seen or apprehended in a clear mental image (St. Thomas was perhaps of all the apostles the one most easily *imaginable* in the present—*Mackenzie*) **Imaginary** (for fuller treatment see IMAGINARY 1) implies existence only in the imagination (imaginary woes) (Imaginary Conversations, a book by Walter Savage Landor giving *imaginary* dialogues and *imaginary* letters between famous persons of long ago) (the vague unrest of a husband whose infidelities are *imaginary*—*Glasgow*)

immaterial, spiritual, incorporeal are comparable when meaning not composed of matter. **Immaterial** is the most comprehensive of these terms because it makes the line of cleavage between itself and its opposite, *material*, not only clear and sharp but not open to confusion. If, therefore, one wishes a word to carry no other possible implication *immaterial* is the appropriate term; it may then apply to things believed to have real but not actual (compare REAL) or phenomenal existence or to things that are purely mental or intellectual constructions (immaterial beings) (you feel like a disembodied spirit, *immaterial*—*Maugham*) (immaterial forces) (immaterial objects of thought) (in making mind purely *immaterial* . . . the body ceases to be living—*Dewey*) **Spiritual** (see also HOLY) may imply the absence of the material or tangible (millions of *spiritual* creatures walk the earth unseen—*Milton*) The term, however, so often applies to some-

thing which has another side or nature variously spoken of as *material, animal, physical, or bodily* that the word is frequently used, not to describe the character of a whole (a man, all creatures, a belief, or the world), but to distinguish the part which has the nature of a spirit or soul from the part which has not. In distinction from *immaterial* it frequently, therefore, connotes a supernatural, an intellectual, or a moral character (it is the *spiritual* always which determines the material—*Carlyle*) (great men are they who see that *spiritual* is stronger than any material force, that thoughts rule the world—*Emerson*) **Incorporeal** basically denies the possession or presence of a body or material form; in general use it usually suggests invisibility (incorporeal intelligences) (the supposed activities and transactions of putative *incorporeal* beings—*Flew*) but, especially in legal use, it may imply intangibility or impalpability (the second group of intangibles . . . are *incorporeal* rights which do not diminish the rights of others in material things. Such rights as patents, royalties, trademarks, goodwill, and franchises fall into this category—*W. H. Anderson*)

immoral, unmoral, nonmoral, amoral are all briefly definable as not moral, yet they are not often interchangeable and are frequently confused, largely because the implications and connotations of the second element are not the

same in each compound. **Immoral**, which implies an active opposition to what is *moral*, may designate whatever is discordant with accepted ethical principles or the dictates of conscience (morality cannot be legislated but . . . legislation can be *immoral*—*Gallagher*) (in the way in which he conceded the smaller points in order to win the important objectives and mastered the political game without yielding his own integrity, Roosevelt symbolized the moral man confronted by the dilemmas that an *immoral* society creates—*Link*) and then indicates that what is so designated is fundamentally wrong, unjustifiable, or sinful. But, like *moral*, *immoral* may often base its values not on principle but on custom and then may imply no more than discordance with accepted social custom or the general practice (refusal to acknowledge the boundaries set by convention is the source of frequent denunciations of objects of art as *immoral*—*Dewey*) (for a farm settler to start out with a decent home, efficiently produced, still seems *immoral* in many quarters—*New Republic*) In its frequent specific application to sexual and, especially, irregular sexual matters *immoral* tends to fluctuate between the two extremes of its usage range according to the concurrent rigidity of the social outlook. It may in the former case come close to *licentious* or *lewd* in pejorative quality and in the second lose most of its pejorative force and mean little more than *improper* or *immodest* (lead an *immoral* life) (immoral people) *Unmoral, nonmoral, and amoral* all, in contrast to *immoral*, imply in one way or another a passive negation of what is moral especially as indicated by absence of or freedom from a code that ought to prevail and the evasion of which constitutes wrongdoing. In its most typical use **unmoral** implies a lack of moral perception and ethical awareness and is appropriately applied to persons or to their behavior when these exhibit such a lack; thus, an infant or an idiot may be described as *unmoral* because in neither case is there a capacity to distinguish right from wrong (a man so purely primitive that he was of the type that came into the world before the development of the moral nature. He was not immoral, but merely *unmoral*—*London*) (Gertrude Stein's discussions reflect primitiveness also in the attitude taken towards sex, for the characters are depicted as being like savages, innocently *unmoral*—*Braddy*) But *unmoral* may sometimes imply a mere disregard of or failure to be guided by moral principles and is then close to *conscienceless* (the great *unmoral* power of the modern industrial revolution—*F. L. Wright*) and occasionally it may, along with *nonmoral* and *amoral*, imply that what is so qualified cannot be appraised in terms of morality since it is not a fit subject for ethical judgment (it [*moral*] is used as the opposite of *unmoral* (or *amoral*) to refer to acts that come within the sphere of moral (or ethical?) consideration as opposed to those to which moral distinctions do not appropriately apply—*Garvin*) While *nonmoral* and *amoral* are frequently interchangeable (make religion *nonmoral*, a matter of inner experience and personal attitude—*Randall*) (science as such is completely *amoral*—*W. S. Thompson*) **nonmoral** may be preferred when the thing so described is patently outside the sphere in which moral distinctions or judgments are applicable, while **amoral** may be applied discriminatively to something not customarily or universally exempted from moral judgment; thus, life in the abstract is a *nonmoral* concept although a particular personal life may well be *amoral*; perspective is a *nonmoral* aspect of painting (even those who assign art a moral function must recognize that nonrepresentational painting is best judged by *amoral* standards) (for the most part there are no special benefits for doing good, nor any great penalties for being bad. The supernatural power of

Melanesian religion is simply *amoral*—*Nida*)

immortal, deathless, undying, unfading mean not subject to death or decay and, hence, everlasting. With the exception of *immortal*, all of these words are chiefly in poetic use and are distinguishable especially in their connotations and applications. Basically **immortal** implies little more than exemption from liability to death and is usually applied to the soul or spirit of man (such harmony is in *immortal* souls; but whilst this muddy vesture of decay doth grossly close it in, we cannot hear it—*Shak.*) Sometimes *immortal* equals *eternal* (the first to express the belief that the soul was divine and *immortal* in duration—*Hesel*) but more frequently it keeps close to the basic sense in being applied to something comparable to the soul in that it lives on in fullness of vigor after its maker or possessor has died (the *immortal* epics of Homer) ('tis verse that gives *immortal* youth to mortal maids—*Landor*) (Oh may I join the choir invisible of those *immortal* dead who live again in minds made better by their presence—*George Eliot*) (the single *immortal* act of John Wilkes Booth in snuffing out the life of a beloved president—*Miers*) **Deathless** also implies incapacity for death; it is seldom applied to the soul but rather to immaterial things that transcend the limitations of mortal existence (art's *deathless* dreams—*Shelley*) (virtue crowned with glory's *deathless* meed—*Wordsworth*) **Undying** is applied chiefly to emotions or passions marked by such intensity or vitality as to be or to seem incapable of extinction while life lasts (undying love) (undying hatred) (a patriot's heart, warm with undying fire—*Wordsworth*) (Lawrence's undying conviction of the necessity for . . . harmonization—*Millett*) **Unfading** often comes close to *undying* in meaning but connotes persistence of brightness or bloom rather than of intensity (unfading recollections) (true charity . . . thrives against hope, and in the rudest scene, storms but enliven its unfading green—*Cowper*)

impact *n* **Impact, impingement, collision, clash, shock, concussion, percussion, jar, jolt** mean a forcible or enforced contact between two or more things, especially a contact so violent as to affect seriously one or the other or all of the persons or things involved. **Impact**, though it often means this and no more, may be used more generally to imply contact between two things, one of which at least is driven or impelled in the direction of the other and produces a definite effect on it, though not necessarily a physical effect or one that results in injury (the *impact* of a hammer upon a nail) (a target constructed to resist the *impact* of a bullet) (live in an age where every mind feels the *impact* of new ideas) (it is not electricity which we see, it is the air rendered incandescent by the vehemence of the *impacts* of the electrons against its molecules—

Darrow <the *impact* of world war on the lives of countless millions—*R. H. Jackson*> **Impingement** often means little more than *impact*, but distinctively it may imply a sharper or more forcible contact than *impact* <each little *impingement* of sound struck on her consciousness—*Langley*> or may carry, as *impact* does not, a suggestion of encroachment <the *impingement* of scientific theories upon religious beliefs> **Collision** implies the coming together of two or sometimes more things with such force that both or all are more or less damaged or their progress is seriously impeded <a *collision* has occurred when any part of the automobile comes in contact with another object, whether moving or stationary—*Gee*> <his uneasiness grew by the recollection of the forty tons of dynamite in the body of the *Ferndale*; not the sort of cargo one thinks of with equanimity in connection with a threatened *collision*—*Conrad*> *Collision* may be used when the things which come together so as to seriously affect one another are immaterial rather than physical entities <discrepancies between ideas and *collisions* between beliefs had to be reconciled and mediated—*De Kiewiet*> <the *collision* of contrary false principles—*Warburton*> **Clash** primarily applies to the sharp discordant sounds produced by an impact or series of impacts between two or more bodies, especially metallic bodies; it is often used in preference to *collision* when two or more things come into contact with one another in such a manner that noises of crashing and jangling are more apparent than the destruction or ruin wrought <the *clash* of swords in battle> <the *clash* of cymbals, and the rolling of drums—*Macaulay*> *Clash*, also, is used more often of immaterial things (as beliefs, theories, and ideas) which are irreconcilable or incompatible and lead to violent conflict or controversy <a *clash* of creeds> <in *Le Misanthrope* . . . there is . . . a *clash* . . . between the high-strung demands of Alceste and the unbending reasonableness of the social standard—*Alexander*> <an appeal to the workers and employers to be good boys and not paralyze the industry of the nation by the *clash* of their quite irreconcilable interests—*Shaw*> **Shock** denotes the effect (as shaking, rocking, agitating, or stunning) produced by an impact or collision. It may imply a physical, mental, or emotional effect, but in every case it carries a strong suggestion of something that strikes or hits with force and often with violence <he stood the *shock* of a whole host of foes—*Addison*> <the *shock* of cataract seas that snap the three-decker's oaken spine—*Tennyson*> <the soft *shock* of wizened apples falling . . . upon the hilly rock—*Millay*> <for strong emotion, however, the *shock* of sudden external stimulus is necessary—*Ellis*> **Concussion**, found more often than *shock* in learned and technical use, may mean a blow or collision but more often suggests the shattering or disrupting effects of a collision or explosion or the stunning weakening effects of a heavy blow <the air seemed rent apart by a *concussion* like the firing of a great cannon—*Chippendale*> <was so careful lest his descent should shake the earth and awake the doctor, that his feet shrank from the *concussion*—*Shaw*> <*concussion* of the brain is actually a paralysis of the functions of the brain—*Fishbein*> **Percussion** implies a deliberate or intentional striking, knocking, or tapping for the sake of something (as a sound, an explosion, or a vibration) produced by the impact of such a stroke, knock, or tap; thus, *percussion* instruments in an orchestra are those played by striking (as a drum, a gong, cymbals, bells, or a tambourine); a *percussion* bullet contains a substance that is exploded by *percussion*; a doctor by *percussion* (that is, by tapping or striking the chest or abdomen) discovers by the sounds produced the condition of a patient's lungs or abdominal organs. **Jar** applies to the

painful and disturbing but not necessarily injurious shaking suffered as a result of a collision, clash, shock, or concussion <the fall gave him a *jar*, but nothing worse> <we felt only the *jar* of the earthquake> <the howl of the wind and the crash and *jar* of seas striking the ship's hull—*Crofts*> <must have suffered some rude *jars* during the long years in which she had observed her husband coarsen—*Ingamells*> **Jolt** carries a stronger implication of jerking out of place than of shaking and therefore carries a clearer suggestion of loss or near-loss of balance <received a *jolt* when the car ran over a hole in the road> <the stern criticism gave him the first *jolt* he had ever had> <lenses should also be protected from jars and jolts—*Kodak Reference Handbook*>

impassable, **impenetrable**, **impervious**, **impermeable** are comparable when they mean not allowing passage through.

Impassable applies chiefly to stretches of land or water which cannot be passed over or crossed because of some insuperable difficulty or obstruction <the river is *impassable* in the rainy season> <the road between here and the city is *impassable* since the storm blew down the trees> <this ocean of snow, which after October is *impassable*—*Evelyn*> <the gulf is the difference between the angelic and the diabolic temperament. What more *impassable* gulf could you have?—*Shaw*> **Impenetrable** applies chiefly to something which is so dense or so thick that not even the thinnest shaft (as of light or air) can find its way through <*impenetrable* fog> <*impenetrable* darkness> <this gentleman was *impenetrable* to ideas—*Colum*> <Professor Murray has . . . interposed between Euripides and ourselves a barrier more *impenetrable* than the Greek language—*T. S. Eliot*> Often, however, *impenetrable* is preferred to *impassable* when implying an exceedingly dense growth that prevents passage <an *impenetrable* thicket> <an *impenetrable* forest> **Impervious**, which implies impenetrability, applies basically to substances or materials which have been so finished or treated as to make them impenetrable (as to air, water, or sound waves) <no surface coating has ever been found which is *impervious* to sun, wind and rain—*Furnas*> When applied to persons or their minds or hearts, *impervious* usually implies complete resistance to anything that would affect them for better or worse <*impervious* to threats or prayers or tears—*Hewlett*> <we become *impervious* to new truth both from habit and from desire—*Russell*> <so soaked

with the preserve "good form" that we are *impervious* to the claims and clamor of that ill-bred creature—life!—*Galsworthy*) **Impermeable** implies impenetrability, whether natural or artificially acquired, by a liquid or a gas and incapacity for becoming soaked or permeated; the term applies chiefly to substances (as some clays) which do not absorb water, to cloths treated so as to be rainproof, or to materials which do not admit the passage of air, light, gas, or water (cosmo-regulation in the eel is achieved by an *impermeable* outer covering of slime—*Dowdeswell*) (impermeable rocks) (gas pipes should be made of an *impermeable* metal) (impermeable roofing) (he was not drunk, since the resilient composition of which his nerves were made was almost *impermeable* to alcohol—*West*) **Ant** passable

impassible insensitive, *insensible, anesthetic

impassioned, **passionate**, **ardent**, **fervent**, **fervid**, **perfervid** mean actuated by or showing intense feeling. **Impassioned**, though applicable to persons, is more often found in reference to utterance or artistic expression or to the mood or mental state which evokes such utterance or expression. The word usually implies intensity without violence and feeling of such depth, sincerity, and potency that it passes naturally and inevitably from the person into his expression (poetry is the breath and finer spirit of all knowledge; it is the *impassioned* expression which is in the countenance of all science—*Wordsworth*) (the letters. . . are written by this master of *impassioned* recollection in a style so musical, so magical and moving, that the experiences he recounts become our own—*L. P. Smith*) (as his *impassioned* language did its work the multitude rose into fury—*Froude*) **Passionate**, on the other hand, implies vehemence and, often, violence of emotion; when the latter idea is suggested, the word also may connote loss of rational guidance or wasteful diffusion or misdirection of emotional power (a *passionate* denunciation) (a *passionate* reformer) (passionate partisanship) (passionate feeling is desirable, provided it is not destructive—*Russell*) (to match mere good, sound reasons, against the *passionate* conclusions of love is a waste of intellect bordering on the absurd—*Conrad*) (the *passionate* and uncompromisingly ruthless war spirit, common to Communists and Fascists—*Cohen*) **Ardent** differs from *passionate* largely in its freedom from derogatory implications and in its connotations of qualities suggestive of flame or fire. It is especially appropriate when vehemence is implied and the intense feeling expresses itself in eagerness, zeal, enthusiasm, or acts of devotion (an *ardent* desire for the truth) (an *ardent* supporter of liberal ideas) (an *ardent* lover) (heredity in man is hardly the simple thing that many of the *ardent* eugenists would have us believe—*Furnas*) (gave constant proofs of his *ardent* longing for an education—*Merriman*) **Fervent** also implies a quality of fire, but it suggests a fire that glows rather than one that bursts into flame. Hence, though it implies strength and depth of feeling, it more often suggests steadiness than vehemence and inward quiet rather than outward activity. It is applicable especially to wishes, prayers, or hopes that are heartfelt or devout, but it is also applied to an emotion, or to a person feeling such an emotion, that is free from turbulence (fervent thanks) (fervent good wishes) (a fervent Christian) (fervent prayers) (Jane's feelings, though fervent, were little displayed—*Austen*) (the gods approve the depth, and not the tumult, of the soul; a *fervent*, not ungovernable, love—*Wordsworth*) **Fervid**, like *impassioned*; is applied more to moods and expressions than to persons; in contrast to *impassioned*, however, it sometimes suggests more obvious, more warmly expressed, and, often, more spontaneous emotion (who could help

liking her? her generous nature, her gift for appreciation, her wholehearted, *fervid* enthusiasm?—*L. P. Smith*) Frequently it carries a strong suggestion of feverishness which distinguishes it sharply from *fervent*; thus, *fervent* thanks suggest the depth and sincerity of the emotion which prompts them; *fervid* thanks suggest profuseness or an overwrought state of mind (his *fervid* manner of love-making offended her—*Bennett*) **Perfervid** carries an implication of too great emotional excitement or of overwrought feelings; more than *fervid*, it casts doubt upon the sincerity of the emotion that is displayed with vehemence (to court their own discomfiture by love is a common instinct with certain *perfervid* women—*Hardy*) (in his *perfervid* flag-waving moments—*S. H. Adams*)

impassive, **stoic**, **phlegmatic**, **apathetic**, **stolid** are comparable when they mean slightly if at all responsive to something that might be expected to excite emotion or interest or to produce a sensation. The distinctions to be drawn between these adjectives hold true also of their corresponding nouns, **impassivity** or **impassiveness**, **stoicism**, **phlegm**, **apathy**, **stolidity**. One is **impassive** who feels or shows no emotion or sensation, without necessary implication of insusceptibility (his majestic *impassivity* contrasting with the overt astonishment with which a row of savagely ugly attendant chiefs grinned and gaped—*Shaw*) (under their *impassive* exterior they preserve . . . emotions of burning intensity—*Lathrop*) One is **stoic** who is indifferent to pleasure or pain; the word frequently suggests unflinching fortitude (not only the cataclysm of a world, but also the *stoic* and indomitable temper that endures it—*Lowe*) (a *stoic* atmosphere of fortitude in adversity—*Orville Prescott*) **Phlegmatic** implies a temperament or constitution in which emotion is hard to arouse or, when aroused, is moderate or restrained (cold and *phlegmatic* must he be who is not warmed into admiration by the surrounding scenery—*Waterton*) (a lofty *phlegm*, a detachment in the midst of action, a capacity for watching in silence—*Edmund Wilson*) **Apathetic** usually implies either a remiss and culpable indifference or such a preoccupation with a particular depressing emotion (as care, grief, or despair) or bodily pain as makes one insensible to other emotion or pain and deficient in or devoid of the usual human interests (there is only one alarming aspect of our national debt . . . the *apathy* and ignorance of the American public with regard to it. The common attitude is . . . why should an ordinary citizen add the national debt to his other workaday worries—*Scherman*) (the row of stolid, dull, vacant plowboys, ungainly in build, uncomely in face, lifeless, *apathetic*—*Butler* d. 1902) (an uncomplaining *apathy* displaced this anguish; and, indifferent to delight, to aim and purpose, he consumed his days, to private interest dead, and public care—*Wordsworth*) **Stolid** implies heavy, dull, obtuse impassivity or apathy or utter blankness of countenance mirroring or suggesting such quality; often, specifically, it suggests impassive, mechanical, plodding, unquestioning, unresourceful adherence to routine (stolid Saxon rustics, in whom the temperature of religious zeal was little . . . above absolute zero—*Huxley*) (the *stolidest* mask ever given to man—*Meredith*)

impatient, nervous, unquiet, restless, restive, uneasy, fidgety, jumpy, jittery are comparable when they mean manifesting signs of unrest or an inability to keep still or quiet. **Impatient** implies an inability to bear some trial (as delay, opposition, discomfort, or stupidity) with composure; it therefore connotes, as a rule, not physical but mental or emotional unrest and may suggest unrestrained reactions (as of eagerness, irritableness, brusqueness, testiness, or intolerance) (so tedious is this day as is the night before some festival to an *impatient* child that hath new robes—*Shak.*) (cease your contention, which has been too long; I grow *impatient*—*Pope*) (when we pursue the ulterior significance of the colors into yet wider regions . . . I fear the august common sense of the Occident becomes affronted and *impatient*—*Binyon*) (the temper of the youth of his country is violent, *impatient*, and revolutionary—*Fischer*) **Nervous** implies unsteadiness of nerves and a proneness to excitability (a *nervous*, fretful woman) (you and I, whose ordinary daily talk maintains its slow or hurried, *nervous* or phlegmatic . . . but always pedestrian gait—*Loves*) (becoming more *nervous* as the gloom increased—*Hudson*) **Unquiet**, though basically meaning no more than not quiet, is usually used with a strong implication of prolonged or conspicuous agitation or of troubling or disturbing distractions that hinder one's peace of mind or spirit or prevent concentration; the word is applicable both to the person and to the thing which troubles him (these *unquiet* times) (*unquiet* meals make ill digestions—*Shak.*) (they have not the restless *unquiet* temperament associated with the Anglo-Saxon race—*Alfred Buchanan*) **Restless** usually implies constant and more or less aimless motion or activity; often, specifically, it connotes mental agitation (our heart is *restless*, until it repose in Thee—*Pusey*) (undoubtedly not happy . . . *restless* and disquieted, his disquietude sometimes amounting to agony—*Arnold*) or eagerness to change (he was *restless* and dissatisfied with his life—*Anderson*) or continuous or unceasing movements to and fro or back and forth (the *restless* sea) (a *restless* crowd) (he was as *restless* as a hyena—*De Quincey*) **Restive** (see also CONTRARY 2), which once meant unwilling to move, has gradually become a synonym of *restless*. In this sense it implies impatience under attempts to restrain, to control, or, especially, to keep attentive and suggests either inability to keep still or to persist in what one is doing (they were all becoming *restive* under the monotonous persistence of the missionary—*Cather*) (as *restive* and dissatisfied as a party of 7 bridge players—*Eddington*) **Uneasy** usually implies restlessness born of anxiety, doubt, uncertainty, or insecurity (he is *uneasy* over business conditions) (an *uneasy* conscience) (an *uneasy* sense that all was not well with his family) (*uneasy* lies the head that wears a crown—*Shak.*) (so we come down, *uneasy*, to look, uneasily pacing the beach. These are the dikes our fathers made: we have never known a breach—*Kipling*) (the first *uneasy* stir of the sleeper—*Mumford*) **Fidgety** implies restless movements resulting from nervousness, boredom, or uneasiness of mind; it usually suggests an inability to keep one's hands, feet, or body still or to settle down to a task or occupation (toward the end of the day the pupils become *fidgety*) (he declared if I was *fidgety* he should have no comfort—*Burney*) (he perhaps did not realize . . . that the persons who felt *fidgety* or disquieted about the matter were not likely to write in about it, lest they appear irreverent—*E. B. White*) **Jumpy** and **jittery** imply extreme nervousness that exhibits itself in tremulous, uncertain movements. **Jumpy**, however, usually suggests a fearful or apprehensive mood and lack of control over one's temper

as well as over one's muscles (if you didn't drink so much, you wouldn't be so *jumpy*—*Barnaby Conrad*) **Jittery** suggests domination not only by fears but by recollections that destroy one's nervous control and impair one's mental stability (soldiers still *jittery* from their experiences under heavy fire) (the chief factor in making children *jittery* is *jittery* parents—*Time*)

Ana fretful, querulous, *irritable, snappish, waspish: *eager, anxious, avid, keen: impetuous, *precipitate, headlong, hasty, sudden, abrupt

Con *exculpate, vindicate, exonerate, acquit, absolve **impeccable**, faultless, flawless, errorless are comparable when they mean absolutely correct and beyond criticism.

Impeccable usually applies to something with which no fault can be found or which is irreproachably correct (the only *impeccable* writers are those that never wrote—*Hazlitt*) (her logical process is *impeccable*—*Grandgent*) (an *impeccable* figure in trim dinner jacket and starched shirt—*Capote*) **Faultless** is often used in place of *impeccable* without loss, but it is sometimes preferred when the emphasis is upon the absence of defect or blemish rather than upon technical correctness (whoever thinks a *faultless* piece to see, thinks what ne'er was, nor is, nor e'er shall be—*Pope*) (in *faultless* English and with merciless logic, lashed all the miners' socialistic theories—*Collis*)

Its distinctive implication, however, is often that of insipidity or tediousness (faultily *faultless*, icily regular, splendidly null, dead perfection, no more—*Tennyson*) **Flawless** applies especially to natural products in which no cracks, blemishes, or imperfections can be detected (a *flawless* diamond) or to character or reputation which is admirably excellent (destroyed his *flawless* reputation by a single act) or to a work of art or its execution when comparably fine (a *flawless* lyric) (the *flawless* technique of the pianist) (a *flawless* story published in 1895 . . . somewhat forecasts James's final type—*Van Doren*) **Errorless** usually implies absence of all mistakes, especially of such mistakes as are technically regarded as errors; thus, an *errorless* baseball game may not involve *flawless* playing.

impending, imminent are comparable when they mean very likely to occur soon or without further warning. Both retain in this sense some feeling of now rare or disused

senses in which they essentially denote being physically elevated and hanging over or projecting as if about to fall and, as a result, tend to convey an ominous or portentous note (*impending doom*) (*imminent disaster*) Occasionally this feeling may be lacking and the words imply no more than the near futurity of the thing qualified (the look of anticipation, of sweet, *impending triumph*—*Weston*) (the mounting heat of June warned us . . . that our departure was *imminent*—*Replier*) Distinctively **impending** suggests that the thing likely to occur is foreshadowed far enough ahead to allow one time for worry and suspense or for aversive action (at the sound of thunder we hurried in to avoid the *impending storm*) (worrying over his position in the *impending reorganization of the company*) (the country must swiftly prepare to defend itself against this *impending economic rape*—*Walinsky*) **Imminent** usually implies greater immediacy and may suggest that the thing is on the point of happening (thrown into sweats of suspicion that discovery was *imminent*—*Meredith*) (we were in *imminent danger* of being swamped by the white-caps—*London*) but *imminent*, unlike *impending*, may lose much or all of its suggestion of futurity and then attributes nearness in some other than temporal relation to the thing qualified (they could hear the city, evocative and strange, *imminent* and remote; threat and promise both—*Faulkner*) (in matters where the national importance is *imminent* and direct even where Congress has been silent, the States may not act at all—*Justice Holmes*) (all that we had ever thought or felt for home was real again, made *imminent* and present by the arrival of the Fortresses—*Skidmore*)

Imperfection, **deficiency**, **shortcoming**, **fault** mean a failure in persons or in things to reach a standard of excellence or perfection. **Imperfection** is the most general of these words; it usually does not imply a great departure from perfection and is usually replaceable by a more specific term (as *flaw*, *blemish*, *defect*, *failing*, *frailty*, or *foible*) which emphasizes its slightness rather than its enormity (the statue has one *imperfection*) (the early Christians followed the Stoics: property was a result of man's *imperfection*. It should be accepted regretfully, and society should take care that too much did not collect in too few hands—*Agar*) (coffee is graded by the number of *imperfections* in the sample—*Ukers*) **Deficiency** carries a clear implication of lack or of inadequacy, whether moral or mental, physical or spiritual; it applies particularly to persons, but it may refer also to an inadequacy in things which affects the persons involved. Unlike *imperfection*, it often implies a great departure from a standard of perfection or sufficiency (Mr. Collins was not a sensible man, and the *deficiency* of nature had been but little assisted by education or society—*Austen*) (the disastrous want and weakness of Shelley . . .—his utter *deficiency* in humor—*Arnold*) (another food *deficiency* was responsible for one of the most debilitating and crippling diseases of the Orient—*Heiser*) **Shortcoming** implies deficiency but is seldom used in quite the same sense. Often it implies a standard of perfection or of excellence which is hard to reach and then suggests not so much the degree of imperfection or deficiency as (the doer's) sense of failure to reach the standard or (the critic's or judge's) unwillingness to use a harsher or more direct term (the *shortcomings* of representative government) (my book has many *shortcomings*, I fear) (do not let them, as poor people, make everyone else suffer for their *shortcomings*—*Shaw*) (let him only preach well, and all his *shortcomings* as a curate would be forgiven—*Mackenzie*) (management *shortcomings* in one form or another cause most business failures—*Nation's Business*) **Fault** (see also FAULT) is more direct and clear-cut in statement than any of the others; it usually implies personal culpability for the failing in a person or direct blameworthiness for the shortcoming or defect in a thing; often, also, it permits description of the failing or defect (he has . . . the *fault* of defective mantelpiece clocks, of suddenly stopping in the very fullness of the tick—*Conrad*) (Sophia observed a *fault* in the daily conduct of the house—*Bennett*)

impersonator *actor, player, mummer, mime, mimic, performer, thespian, trouper

impertinent, officious, meddlesome, intrusive, obtrusive are applied to persons and their acts and utterances and mean exceeding or tending to exceed the bounds of propriety regarding the interposition of oneself in another person's affairs. **Impertinent** (see also RELEVANT) implies a concerning oneself more or less offensively with things which are another's business or, at least, not in any sense one's own business <I should have liked to ask the girl for a word which would give my imagination its line. But how was one to venture so far? I can be rough sometimes but I am not naturally *impertinent*—*Conrad*> <approach complete strangers, ask them a battery of *impertinent* questions—*S. L. Payne*> <when he became hot and vulgar, she turned grande dame, so that he felt like an *impertinent* servant—*Sinclair Lewis*> **Officious** implies the offering, often well-meant, of services, attentions, or assistance that are not needed or that are unwelcome or offensive <'twas but the *officious* zeal of a well-meaning creature for my honor—*Sterne*> <I cannot walk home from office, but some *officious* friend offers his unwelcome courtesies to accompany me—*Lamb*> <the foremen grew more *officious* in manner and shouted their orders—*Bromfield*> **Meddlesome** carries a stronger implication of annoying interference in other people's affairs than the preceding terms; it may imply the qualities of character suggested by any of the other words, but it usually also connotes a prying or inquisitive nature <a *meddlesome* old man> <the people found the government unduly *meddlesome*> <it was in no way from any desire to interfere in other people's affairs . . . he had none of my own *meddlesome* quality—*Hugh Walpole*> **Intrusive** applies largely to persons, actions, or words that reveal a disposition to thrust oneself into other people's affairs or society or to be unduly curious about what is not one's concern <Navajo hospitality is not *intrusive*. Eusabio made the Bishop understand that he was glad to have him there, and let him alone—*Cather*> **Obtrusive** is applicable like *intrusive* and often carries very similar implications. Distinctively, however, it connotes objectionable actions more than an objectionable disposition and so stresses a thrusting forward of oneself, as into a position where one can harm more often than help or where one is unduly or improperly conspicuous <rebels against a social order that has no genuine need of them and is disposed to tolerate them only when they are not *obtrusive*—*Menc-ken*>

impious, profane, blasphemous, sacrilegious mean showing marked irreverence for what is sacred or divine. **Impious** usually implies extreme disrespect for God or the laws of God or for those endowed with God-given authority particularly as shown positively in thought or in actions <against the throne and monarchy of God, raised *impious* war in Heaven—*Milton*> <when vice prevails, and *impious* men bear sway, the post of honor is a private station—*Addison*> <who is there more *impious* than a backsliding priest—*Steinbeck*> **Profane** (see PROFANE 1) applies to men and to words and acts that manifest not only impiety but defilement or desecration, sometimes thoughtless and sometimes intentional, of what is worthy of highest reverence or respect <shall I . . . add a greater sin by prostituting holy things to idols . . . what act more execrably unclean, *profane*?—*Milton*> <then speech *profane*, and manners profligate, were rarely found—*Cowper*> **Blasphemous** (compare BLASPHEMY) adds to *profane* the implication of indignity, either deliberate or inadvertent, offered directly or indirectly to the Supreme Being <it is *blasphemous* because it attributes to God purposes which we would not respect even in an earthly parent—*Pike*> <we have heard him speak *blasphemous* words against Moses, and against God—*Acts* 6:11> **Sacrilegious** basically implies the commission of a sacrilege (see PROFANATION), but in its more usual extended sense it implies the defilement of what is holy or sacred (as by acts of depredation, disrespect, or contempt <*sacrilegious* despoilers of ancient churches> <a most *sacrilegious* breach of trust—*Bolingbroke*> <she saw that it was a terrible, a *sacrilegious* thing to interfere with another's destiny, to lay the tenderest touch upon any human being's right to love and suffer after his own fashion—*Wharton*>

Con yielding, submitting, capitulating (see YIELD): merciful, lenient, clement, *forbearing, indulgent, tolerant

implant, inculcate, instill are comparable when they mean to introduce into the mind. **Implant** usually implies teach-

ing, and it stresses the fixedness or permanency of what has been taught (the teacher, the parent, or the friend can often do much to *implant* this conviction—*Eliot*) (implanting in their minds doubts of the political realism of their American friends—*Brogan*) *Inculcate* implies persistent or repeated endeavor with the intent to impress firmly on the mind (had sedulously *inculcated* into the mind of her son . . . maxims of worldly wisdom—*Edgeworth*) (skillful, conscientious schoolmistresses whose lives were spent in trying to *inculcate* real knowledge—*Grandgent*) (whatever happened, Newland would continue to *inculcate* in Dallas the same principles and prejudices which had shaped his parents' lives—*Wharton*) *Instill* carries the implication of a gradual and gentle method of imparting knowledge; it usually suggests either a teaching that extends over a long period of time (as from infancy to adolescence) or a pupil that cannot, because of age, lack of background, or the like, take in at once what is taught (those principles my parents *instilled* into my unwary understanding—*Browne*) (the Viceroy plumed himself on the way in which he had *instilled* notions of reticence into his staff—*Kipling*) (it would be useless, in early years, to attempt to *instill* a stoic contempt for death—*Russell*)

Ana *infuse, imbue, inoculate, ingrain, leaven: impregnate, saturate, impenetrate, penetrate, *permeate, pervade

implement *n* **Implement, tool, instrument, appliance, utensil** mean a relatively simple device for performing a mechanical or manual operation. Nearly all of these words (the distinct exception is *appliance*) are interchangeable in their general senses, but custom and usage have greatly restricted them in their specific and most common applications. An **implement**, in general, is anything that is requisite to effecting the end one has in view or to performing the work one undertakes (the *implements* of modern warfare consist of all the weapons necessary to a well-equipped army, navy, and air force) (mathematics is still the necessary *implement* for the manipulation of nature—*Russell*) In specific use *implement* is the usual term when the reference is to a contrivance for tilling the soil (as a spade, a plow, a harrow, or a cultivator) (farming *implements*) (gardening *implements*) Historically it is the preferred term for any of the articles which are essential to the performance of a religious service (the *implements* of the Mass include vestments as well as chalice, paten, and altar stone) It is also the usual term for the devices made especially from stone or wood by primitive peoples as weapons or for use in digging, carrying, or lifting or in making clothing and equipment. A **tool**, in general, is anything that facilitates the accomplishment of the end one has in view; it is therefore something particularly adapted in its nature or by its construction to make possible or relatively easy the work one is doing (it's difficult to be a good cook without the proper *tools*) (a scholar needs foreign languages as *tools*) (comparison and analysis . . . are the chief *tools* of the critic—*T. S. Eliot*) In specific use *tool* is the preferred term when reference is made to the implements used by artisans (as carpenters and mechanics) or craftsmen in accomplishing a particular kind of work (as sawing, boring, piercing, or chipping) (a saw, a gimlet, an awl, a chisel are *tools*) Ordinarily *tool* suggests manipulation by the hand, but some machines for doing work that may be accomplished more slowly by manual labor and tools are called *machine tools* (as the lathe). An **instrument** (see also MEAN *n* 2, PAPER 1) is in general a delicately constructed device by means of which work (not exclusively a mechanical operation) may be accomplished with precision. Many *instruments* are by definition *tools*, but *instrument* is the preferred term among

persons (as surgeons, dentists, draftsmen, surveyors, and artists) whose technique requires delicate tools and expertness and finesse in their manipulation. Some instruments, however, are not tools, but implements in the larger sense, for they are requisite to the achieving of definite purposes but do not necessarily facilitate any manual operations (a thermometer and a barometer are recording *instruments* essential to the meteorologist) (a telescope is an astronomical *instrument*) (a piano, a violin, a cello are musical *instruments* by means of which a performer evokes musical sounds) (language is the essential *instrument* for the acquirement and communication of ideas—*Shehan*) An **appliance** may be a device that adapts a tool or machine to a special purpose usually under the guidance of a hand; thus, a dentist's drill may be called an *appliance* when it is attached to a dental engine; in industry an *appliance* is often distinguished from a *tool*, though they may both do the same kind of work, in that a *tool* is manipulated by hand and an *appliance* is moved and regulated by machinery. Additionally, an *appliance* may be a device or apparatus designed for a particular use and especially one (as a mechanical refrigerator or a vacuum cleaner) that utilizes an external power supply, especially an electric current. A **utensil** is in general anything that is useful in accomplishing work (as cooking and cleaning) associated with the household; it may be applied to tools (as egg-beaters, graters, rolling pins, brooms, and mops) used in cookery and other household work, but it is most commonly applied to containers (as pots, pans, pails, and jars), especially those which form part of the kitchen, dairy, or bedroom equipment. Consequently *utensil*, in other than household use, often means a vessel (sacred *utensils* of a church)

implication, inference are often interchangeable, but they may be distinguished when they specifically refer to something that is hinted at but not explicitly stated. **Implication** applies to what is hinted, whether the writer or speaker is aware of it or not or whether the reader or hearer recognizes it or not (speak of their own language with at least an *implication* of disparagement—*Sampson*) When, however, the reader or hearer recognizes what is implied and gathers from it its full significance or makes an explicit statement of it, he has drawn or made an **inference** (he said no more, waiting for someone to draw the desired *inference* from this utterance—*Wister*) (you misunderstood the implications of his speech, so that your *inferences* misrepresent his point of view) (by *implication* you are arguing that this is the only possible solution) (by *inference* from what you leave unsaid, I know you believe this the only possible solution) (he did not perceive the *implications* of his remark) (the *inferences* to be drawn from his remark are inescapable)

Ana hinting or hint, suggestion, intimation (see corresponding verbs at SUGGEST): *insinuation, innuendo **implicit, virtual, constructive** mean being such by correct or justifiable inference rather than by direct statement or proof. Something is **implicit** (as opposed to *explicit*) which is implied (as by the words, acts, appearance, character, or methods of the person or thing concerned) but is not definitely stated or expressed (a good present behavior is an *implicit* repentance for any miscarriage in what is past—

Spectator > (the distinction between poetry and drama, which Mr. Archer makes explicit, is *implicit* in the view of Swinburne—*T. S. Eliot*) Something is *virtual* (as opposed to *actual*) which exists in essence or effect but is not actually designated or recognized or put forward or regarded as such (his statement is a *virtual* confession) > (the *virtual* abdication of parents from their role as educators—*Barclay*) > (the dictator's constant associate and his *virtual* chief of staff—*Buchan*) Something is *constructive* (as opposed to *manifest*) which is inferred from a text, from known acts, or known conditions and which rests therefore on an interpretation of this text, these acts, or these conditions rather than upon direct statement or direct evidence < (if the law explicitly gives a governor the right of removal of certain officials, he may claim the right to control and direct their official acts as a *constructive* power) > (a mere failure to obey the orders of the court may be interpreted by the judge as *constructive* contempt) > (an employer who confronts a foreman with an option of demotion or withdrawal from a foreman's union is guilty of a *constructive* discharge—*B. F. Tucker*) *Ana* implied, suggested, intimated, hinted (see SUGGEST): inferred, deduced, gathered (see INFER)

2 significance, *importance, consequence, moment, weight *Ana* *worth, value: purpose, intent, design, object, objective (see INTENTION): *emphasis, stress

importance, consequence, moment, weight, significance, import are comparable when they denote the quality or the character or the state of someone or something that impresses others as of great or sometimes eminent worth, value, or influence. **Importance**, probably the most inclusive of these terms, implies a judgment of the mind

by which superior value or influence is ascribed to a person or thing < (there are no cities of *importance* in this state) > (he always attaches *importance* to what seem to others trivial events) < (tradition gives *importance* to the study of the classics) > (hence flowers come to assume [in Oriental art] . . . an *importance* equal to that of figure painting with us—*Binyon*) < (issues which, whilst not of major significance, have some *importance*—*Current History*) > **Consequence** (see also EFFECT) is often used interchangeably with *importance* especially in implying superior social rank or distinction < (men of *consequence*) > but it usually implies importance because of the thing's possible or probable outcome, effects, or results (he . . . was eager to have the Cathedral begun; but whether it was Midi Romanesque or Ohio German in style, seemed to him of little *consequence*—*Cather*) < (to marry one of the right people . . . is of the greatest *consequence* for a happy life—*Rose Macaulay*) > (to cultivate the love of truth, it is of the utmost *consequence* that children should study things as well as words, external nature as well as books—*Eliot*) < (I cannot think of a single poet of *consequence* whose work does not . . . condemn modern civilization—*Auden*) > **Moment** implies conspicuous or self-evident consequence < (enterprises of great pith and *moment*—*Shak.*) > (a mistake of no very great *moment*—in fine, a mere slip—*Barham*) **Weight** implies a judgment of the relatively great importance or of the particular moment of the thing under consideration < (the judge gave great *weight* to the testimony of the accused man) > (in such a point of *weight*, so near mine honor—*Shak.*) < (I looked for you at dinner time; I forget now what for; but then 'twas a matter of more *weight* than laying siege to a city—*Millay*) > **Significance** and **import** are often used as though they were indistinguishable in meaning from *importance* or *consequence*, but they typically imply a quality or character in a person or thing which ought to mark it as of importance or consequence but which may or may not be recognized; thus, one may miss the *significance* of an occurrence; one may recognize the *import* of a piece of testimony < (a widespread recognition of the *significance* of that achievement—*Ellis*) > (the book was invested with a *significance* . . . which its intrinsic literary and philosophical merits could not justify—*Huxley*) < (a fear that the spectator might lose, in the shock of crude sensation, the spiritual *import* of the catastrophe—*Binyon*) >

Ant unimposing —**Con** *contemptible, despicable, sorry, cheap, scurvy, pitiable, beggarly, shabby

impostor, faker, quack, mountebank, charlatan denote a person who makes pretensions to being someone or something that he is not or of being able to do something he cannot really do. **Impostor** applies especially to one who passes himself off for someone else (there is an *impostor* abroad, who takes upon him the name of this young gentleman, and would willingly pass for him—*Addison*) However the word often serves as a general term for anyone who assumes a title, character, or profession that is not his own (charged that Kim Il Sung was an *impostor* trading on the name of a legendary Korean resistance leader—*Time*) **Faker** applies to one who gives himself the appearance of being what, in character or in profession, he is not (the accused man is not insane, he is merely a clever *faker*) (a hypocrite is a moral or religious *faker*) (he is essentially a *faker* with a large contempt for the ignorance and gullibility of the American voter—*Current History*) **Quack** is the popular and contemptuous term for an ignorant, untrained, or unscrupulous practitioner of medicine or law or seller of remedies or treatments, and usually carries a strong implication of fraud or self-delusion (dishonesty is the raw material not of *quacks* only, but also, in great part, of dupes—*Carlyle*) (one of the most notorious cancer-cure *quacks* of the day—*JAMA*) **Mountebank** sometimes suggests quackery, but it regularly suggests cheap and undignified efforts to win attention (political *mountebanks*) (our Sabbaths, closed with mummery and buffoon; preaching and pranks will share the motley scene . . . God's worship and the *mountebank* between—*Cowper*) **Charlatan** applies to a writer, speaker, preacher, professor, or expert who covers his ignorance or lack of skill by pretentious, flashy, or magniloquent display (insolent, pretentious, and given to that reckless innovation for the sake of noise and show which was the essence of the *charlatan*—*George Eliot*) (replaced by the *charlatans* and the rogues—by those without learning, without scruples, or both—*Asher Moore*)

Ana cheat, fraud, fake, humbug (see IMPOSTURE): deceiver, beguiler, misleader (see corresponding verbs at DECEIVE)

imposture, cheat, fraud, sham, fake, humbug, deceit, deception, counterfeit all mean something which pretends to be one thing in its nature, character, or quality but is really another. **Imposture** applies not only to an object but to an act or practice which is passed off to another as genuine, authentic, or bona fide (several of the gallery's paintings reputed to be the work of Rubens and Rembrandt were *impostures*) (the hero is as gross an *imposture* as the heroine—*Shaw*) (its values . . . are an *imposture*: pretending to honor and distinction, it accepts all that is vulgar and base—*Edmund Wilson*) **Cheat** applies chiefly to something or sometimes to someone that wins one's belief in its or his genuineness, either because one is deliberately misled or imposed upon by another or is the victim of illusion or delusion (when I consider life, 'tis all a *cheat*. Yet fooled with hope, men favor the deceit—*Dryden*) (what . . . man . . . shall prove (what argument could never yet) the Bible an imposture and a *cheat*?—*Cowper*) (hence, pageant history! hence, gilded *cheat*!—*Keats*) (if I passed myself off on Miss Carew as a gentleman, I should deserve to be exposed as a *cheat*—*Shaw*) **Fraud** applies to a deliberate, often criminal, perversion of the truth (many persons persisted in believing that his supposed suicide was but another *fraud*—*M'Carthy*) (we may take it as undisputed that Swinburne . . . did something

that had not been done before, and that what he did will not turn out to be a *fraud*—*T. S. Eliot*) Applied to a person it may be less condemnatory and suggest pretense and hypocrisy (the pious *fraud* who freely indulges in the sins against which he eloquently preaches—*La Farge*) **Sham** applies to a close copy of a thing, especially to one that is more or less obviously a fraudulent imitation (a strong living soul in him, and sincerity there; a reality, not an artificiality, not a *sham*!—*Carlyle*) (he smiled, in his worldliest manner. But the smile was a *sham*—*Bennett*) **Fake** applies either to a person that represents himself as someone he is not or, more often, to a worthless thing that is represented as being something that it is not; *fake* differs from *fraud* in not necessarily implying dishonesty in these representations, for a *fake* may be a joke or a theatrical device, or it may be a clear fraud (this testimonial is clearly a *fake*) (one of the great *fakes* of all time was the Cardiff Giant) (actors using *fakes* instead of real swords on the stage) (he pretends everything is what it is not, he is a *fake*—*K. A. Porter*) **Humbug** applies to a person or sometimes a thing that pretends or is pretended to be other and usually more important than he or it is, not necessarily because of a desire on the part of the person involved to deceive others but often because he is self-deceived (you will take to politics, where you will become . . . the henchman of ambitious *humbugs*—*Shaw*) (what *humbugs* we are, who pretend to live for beauty, and never see the dawn!—*L. P. Smith*) **Deceit** and **deception** both apply to something that misleads one or deludes one into taking it for what it is not. **Deceit**, however, usually suggests the work of a deceiver or of one that misleads or leads astray (the *deceits* of the world, the flesh, and the devil—*Book of Common Prayer*) (they [Indians] held that the basest trickery or *deceit* was not dishonorable if directed against a foe—*Amer. Guide Series: R.I.*) **Deception**, on the other hand, often suggests a quality or character in the thing which causes one to mistake it or frankly to take it as other than it really is (the rising and the setting of the sun are pure *deceptions*) **Counterfeit** applies to a close imitation or copy of a thing (as a coin, a banknote, or a bond) that depends upon pictorial devices or engraved designs for assurance of its genuineness; the term usually also implies the passing or circulation of such an imitation as if it were genuine (the city is being flooded with *counterfeits* of five-dollar bills) The term is also applicable to a thing or, less often, to a person that passes for something other than it actually or truly is (his newly purchased painting by Raphael was proved to be a clever *counterfeit*) (she had the illusion that she was not really a married woman and a housemistress, but only a kind of *counterfeit*—*Bennett*)

impressible *sentient, sensitive, impressionable, responsive, susceptible

Ana subject, exposed, open, *liable, prone: predisposed, disposed, inclined (see INCLINE)

impression 1 **Impression, impress, imprint, print, stamp** are comparable when denoting the perceptible trace or traces left by pressure. **Impression** is the most widely applicable of these terms. It may be used with reference to a mark or trace or a series or combination of marks or traces which are produced by the physical pressure of one thing on another (as of a seal upon wax, of a foot upon mud, or of inked type or an etched plate upon paper) (in general, the first impressions made from an etcher's plate are the most valuable) (the detectives found a clear impression of fingertips on the handle of the door) (the dentist must get a plaster of paris impression of the jaw before he can make a denture) But **impression** may also be used of a definite or distinct trace or traces left on the mind, spirit, character, or memory by the impact of sensation or experience (the shock has left its impression on her nerves) (his first impression of Paris still remains clear in his memory) (the incident made no impression on his mind) **Impress** is often used in place of **impression** especially when the reference is to a clear trace left on the character or the personality by some influence (his father's uprightness has left a lasting impress on his character) (he reveals the impress of Keats's influence in every poem he writes) (the dusting of the white paper . . . is a symbol of the sweeping clear from the mind of all accumulated prejudice that it may receive the impress of beauty in all its freshness and power—*Binyon*) **Imprint** carries a strong implication of sharpness, clearness, or permanence in outline. It may be used in reference to an impression left on a plastic substance (the imprint of a heel in the soil) (the children left imprints of their feet on the fresh cement of the walk) The term specifically applies to the printed name of the publisher or, sometimes, of the printer and place and date of publication at the foot of a book's title page (this book bears the imprint of the G. & C. Merriam Company) **Print** is often interchangeable with **imprint** in the general sense of that word but is more likely to be used when the trace is considered with reference to its retention of every line or characteristic detail of the original (the clear print of a fingertip) It is the preferred term in combinations (footprints in the sand) (hoofprints) **Stamp** applies to an impression produced by or as if by a tool or machine which strikes so hard that it leaves a distinct imprint, often one that serves to authenticate or to approve what is so imprinted, to indicate its origin, or to authorize its passage through the mails. Hence, in extended use, **stamp** designates a marked or conspicuous impress which wins almost immediate recognition (we do wish as many sons of this

university as may be to carry forth that lifelong stamp from her precincts—*Quiller-Couch*) (these works have the "classic" stamp upon them, and have been to the artists of the Far East what Greek marbles have been to us—*Binyon*)

imprison, incarcerate, jail, immure, intern mean to confine closely so that escape is impossible or unlikely. The first three words *imprison, incarcerate, jail* imply a shutting up in or as if in a prison, *imprison* being the general term, *incarcerate* the bookish or journalistic term, and *jail* the common word. Distinctively, **imprison** implies seizure and detention in custody and is applicable even when the one confined is not in a prison or jail or suffering a penalty (deftly and with one arm only, he imprisoned her—*Ertz*) (the tremendous forces imprisoned in minute particles of matter—*Inge*) **Incarcerate** implies a shutting up in or as if in a prison cell (he easily obtained bail and will, in all probability, not be incarcerated before his trial) (we got the bride and bridegroom quietly away . . . having incarcerated all the newspaper reporters in the little drawing room—*Sayers*) **Jail** may be preferred to *incarcerate* as a simpler and more generally intelligible term (risked being jailed for life) Often, however, *jail*, the verb, following *jail*, the noun, in its accepted sense connotes imprisonment in a building in which persons are held for short periods, either paying the penalty for minor offenses or for the purpose of awaiting legal proceedings. **Immure** is a literary rather than technical term. When it implies punishment for a crime, it may connote burial alive within a wall; usually, however, the term suggests restriction to closely confined quarters typically as a captive or a devotee to duty or to religion (Constance was now immured with her father, it being her "turn" to nurse—*Bennett*) (a convent of nuns vowed to contemplation, who were immured there for life, and never went outside the convent walls—*L. P. Smith*) **Intern** is used chiefly of military or wartime conditions; it seldom implies incarceration and usually suggests a keeping within prescribed limits (as in a guarded camp) and under severe restraints (<intern all enemy aliens for the duration of a war> (<intern all the war refugees entering a neutral country> (<the plane was landed safely and the crew was interned—*Lawson*)

Ant proper —*Con* right, *correct: *decorous, decent, seemly, nice

improve 1 **Improve, better, help, ameliorate** are comparable when denoting to mend or correct in part or in some degree. **Improve**, the general term, and **better**, more vigorous and homely, apply both to objects and to states or conditions that are not of necessity bad (the faculties of the mind are *improved* by exercise—*Locke*) (striving to *better*, oft we mar what's well—*Shak.*) With a reflexive pronoun *improve* implies a change for the better within oneself, *better* a change for the better in one's social or financial status (had from her youth *improved* herself by reading—*Fordyce*) (girls marry merely to "better themselves," to borrow a significant vulgar phrase—*Wollstonecraft*) To **help** is to improve while still leaving something to be desired (a coat of paint would *help* that house) **Ameliorate** is used chiefly in reference to conditions that are hard to bear or that cause suffering and implies partial relief or changes that make them tolerable (there is no hope whatever of *ameliorating* his condition—*Peacock*) (abolish feudalism or *ameliorate* its vices—*W. O. Douglas*)

Ana *benefit, profit: amend, *correct, rectify, reform, revise: enhance, heighten (see INTENSIFY)

Ant impair: worsen —*Con* corrupt, pervert, vitiate, *debase, deprave: *injure, harm, damage, mar

2 **Improve, recover, recuperate, convalesce, gain** are comparable as intransitive verbs with the meaning to grow or become better (as in health or well-being). **Improve**, although often employed in respect to health, is also applicable to situations or conditions and indirectly to persons (business is *improving*) (the prospects for peace *improved* that year) (he *improves* on acquaintance) (the general principle that as the mental equipment of the human race *improves*, its physical qualities . . . deteriorate—*Rose Macaulay*) In reference to health *improve* implies nothing more than a getting better; it connotes hope but no certainty of continued progress or of final achievement of full health (her health *improves* slowly) (he will not *improve* until the crisis is past) (this acute condition usually persists for from 5 to 15 minutes and then gradually *improves*—*Armstrong*) **Recover** usually implies a return to or the regaining of some former or normal state (as of health); the word may, especially with reference to health, imply certainty and not merely hope (will he *recover*?) (when she *recovered* from her faint) (the market quickly *recovered* from the sell-off) (King Paul was stricken with typhoid fever . . . but *recovered* shortly afterward—*Current Biog.*) (many of the older partisans had been Bryanites, and had not *recovered* from it—*Paxson*) **Recuperate** comes very close to *recover* in its implication of getting back what has been lost and is perhaps more common in reference to losses of money or energy (sleep gives us an opportunity to *recuperate* from the fatigues of the

day) (give the business a chance and it will *recuperate*) In respect to health it especially implies restoration through such influences as climate and rest (she will *recuperate* in a warm climate) (one may *recuperate* quickly from a mild attack of influenza) (the animals . . . would not *recuperate* until they got water—*Cather*) **Convalesce** fundamentally implies a growing stronger; the term usually applies to the period between the subsidence of a confining illness and full recovery, when the patient, more or less gradually, gathers strength and regains the use of powers lost or depleted through serious illness, a serious operation, or a serious wound (convalesce after a long illness) (he is so busy that he will not take the time he needs to *convalesce* after his operation) (a man *convalescing* from a great grief—*Thoreau*) (was advised by his doctor to remain in the West where he had gone to *convalesce*—*Martin Gardner*) **Gain** simply means to make progress especially, but not always, in health. The term is used typically in periodic reports of condition and like *improve* carries no implication of whether or not progress will continue or result in permanent recovery (the doctor thinks he is *gaining*) (he *gains* very slowly)

improved unpremeditated, impromptu, offhand, *extemporaneous, extempore, extemporary

inability, disability are sometimes confused because of their verbal likeness. Although both denote a lack of ability to perform a given act or to follow a given trade or profession, they are otherwise clearly distinguished. **Inability** implies lack of power to perform; it may suggest mental deficiency or temperamental unfitness, but more often it suggests a limiting factor (as lack of means, lack of health, or lack of training) (an *inability* to laugh—*Lucas*) (an *inability* to see—*Huxley*) (the *inability* of the economic system to effect a cure—*Hobson*) **Disability** implies the loss or the deprivation of such power (as by accident, illness, or disqualification); the term is applicable not only to the resulting inability but to whatever it is that makes one unable to do a certain thing or hold a certain office or position

⟨because of *disabilities* many of the soldiers could not return to their former occupations when the war ended⟩
 ⟨if these people [American Indians] were not to be counted colored, with all the *disabilities* that designation involved—*Handlin*⟩
 ⟨one may be ineligible to office on account of some legal *disability* such as foreign birth⟩

Ana incapability, incompetence, unqualifiedness (see corresponding adjectives at INCAPABLE); unfitness, unsuitability (see corresponding adjectives at UNFIT)

Ant ability —**Con** capacity, capability (see ABILITY)

inactive, **idle**, **inert**, **passive**, **supine** mean not engaged in work or activity. **Inactive** is applicable to anyone or to anything that for any reason is not currently in action, in operation, in use, or at work (⟨*inactive* machines⟩) (⟨delicate children are usually *inactive*⟩) (⟨an *inactive* charge account⟩) (⟨in winter, when . . . mosquitoes, exceptionally large, numerous, and aggressive in this section, are *inactive*—*Amer. Guide Series: La.*⟩) **Idle** (see also VAIN 1) applies chiefly to persons who are without occupation or not busy at the moment, but it is also applicable to their powers or to the implements they use (⟨why stand ye here all the day *idle*? They say unto him, Because no man hath hired us—*Mt* 20:6–7⟩) (⟨though his pen was now *idle*, his tongue was active—*Macaulay*⟩) (⟨is a field *idle* when it is fallow?—*Shaw*⟩) (⟨every *idle* miner directly and individually is obstructing our war effort—*Roosevelt*⟩) **Inert** as applied to a thing (as matter, a substance, or a drug) implies inherent lack of power to set itself in motion or by itself to produce a given or understood effect (⟨comets were now shown to be mere chunks of *inert* matter, driven to describe paths round the sun by exactly the same forces as prescribed the orderly motions of the planets—*Jeanes*⟩) (⟨commercial fertilizers consist of three to five hundred pounds of available plant food . . . extended with harmless *inert* materials to make a ton of product—*Morrison*⟩) As applied to persons or their activities, *inert* suggests inherent or habitual indisposition to activity or extreme difficulty in stimulating or setting in motion (⟨*inert* citizens are not easily aroused to action by evidence of graft or waste⟩) (⟨many students are too *inert* to derive much stimulation from the books they read⟩) (⟨the *inert* were roused, and lively natures rapt away!—*Wordsworth*⟩) **Passive** implies immobility or a lack of a positive reaction when subjected to external driving or impelling forces or to provocation (⟨the mind is wholly *passive* in the reception of all its simple ideas—*Locke*⟩) (⟨to sit as a *passive* bucket and be pumped into . . . can in the long run be exhilarating to no creature—*Carlyle*⟩) (⟨deprecated . . . the *passive* reception of everything that comes from a foreign press—*Warfel*⟩) In an extended sense *passive* often implies submissiveness without such positive responsiveness as would help the person or side that attacks or seeks to impose its will (⟨*passive* obedience⟩) but it still more often implies a failure to be provoked to action or resistance (⟨to be *passive* in calamity is the province of no woman—*Meredith*⟩) **Supine** implies abject or cowardly inertia or passivity usually as a result of apathy or indolence (⟨it is impossible to remain *supine* when war threatens⟩) (⟨condition of static lethargy and *supine* incuriousness—*Huxley*⟩)

Ana imprint, print, stamp, impress (see corresponding nouns at IMPRESSION): depict, delineate, limn (see REPRESENT)

incisive, **trenchant**, **clear-cut**, **cutting**, **biting**, **crisp** are applied to utterances, thoughts, style, or mentalities and mean having or manifesting the qualities associated with sharpness, keenness, and acuteness, especially of mind. **Incisive** usually implies not only qualities in the thing so described which give it the power to penetrate, pierce, or cut through but also the production of such an effect upon the person impressed; thus, an *incisive* voice or tone of voice is one that is not only sharply clear and edged but one that affects the nerves of the ear as though it were cutting into them; an *incisive* command is so sharply imperative and direct that it can neither be misunderstood nor disobeyed (Bismarck's will had not that *incisive*, rapier quality, that quality of highly tempered steel—flexible, unbreakable, of mortal effect, decisive . . . which had Richelieu's—*Belloc*) (when finally pushed into a corner, he would be more *incisive*, more deadly, than any man seated foursquare and full of importance at a governmental desk—*Sackville-West*) (the clear, *incisive* genius which could state in a flash the exact point at issue—*Whitehead*) **Trenchant** carries a stronger implication than does *incisive* of cutting so as to define differences, categories, or classes with sharpness and perfect clearness or of probing deeply into the inmost nature of a thing so as to reveal what is hidden or concealed (a *trenchant* analysis) (when roused by indignation or moral enthusiasm, how *trenchant* are our reflections!—*James*) (the *trenchant* divisions between right and wrong, honest and dishonest, respectable and the reverse, had left so little scope for the unforeseen—*Wharton*) (no one . . . was more *trenchant* than he in his criticism of the popular faith—*Dickinson*) (a most *trenchant* defender of civil rights—*Chafee*) **Clear-cut** is applied chiefly to the effect of the qualities which make for penetration, incisiveness, trenchancy, or accuracy; it suggests sharp chiseling, clear definition, or distinct outlines, and the absence of all soft edges, hazi-

ness, or confusion in the thing or things so described (clear-cut features) (clear-cut utterance) (clear-cut distinctions) (the demands of Communism are too imperative, too *clear-cut* for the writer who wants only the cessation of mental pain and a private peace in his own time—*Day Lewis*) (his description of this condition was so *clear-cut* that others readily recognized it—*Blumer*) **Cutting** is often used in place of *incisive* when a less pleasant or less agreeable quality or effect is to be connoted; the term frequently suggests sarcasm, acrimony, asperity, or harshness that wounds or hurts, but it sometimes carries a hint, at least, of such mental qualities as penetrating truthfulness and acute discernment (eloquence, smooth and *cutting*, is like a razor whetted with oil—*Swift*) (he can say the driest, most *cutting* things in the quietest of tones—*Brontë*) ("I suppose you'd leave me here without money or anything?" she said in a cold, *cutting* voice—*Bennett*) **Biting**, when it is applied to utterances, expressed ideas, or style, suggests a power to grip and deeply impress itself on the mind or memory; it therefore often suggests a caustic or mordant quality (biting epigrams) (her *biting* words) (domineering and censorious of any that stood in his way, with a *biting* wit—*T. D. Bacon*) **Crisp** (see also FRAGILE 1) suggests not only incisiveness but either vigorous terseness of expression or a bracing, invigorating quality (the blithe, *crisp* sentence, decisive as a child's expression of its needs—*Pater*) (it is a relief to come to a diction that is frequently *crisp*, and incisive, and terse—*Lowe*) (a languorous work . . . with occasional interludes of *crisp* brilliance—*Anthony West*)

Ana terse, succinct, laconic, *concise: poignant, *pungent, piquant

Con prolix, diffuse, verbose, *wordy: *loose, lax, slack: unctuous, *fulsome

incite, **instigate**, **abet**, **foment** are comparable when they mean to spur on to action or to excite into activity. **Incite** stresses stirring up and urging on; frequently it implies active prompting (the riot was *incited* by paid agitators) (it was just like Lady Pinkerton . . . to have gone round to Hobart *inciting* him to drag Jane from my office—*Rose Macaulay*) **Instigate**, in contrast with *incite*, unequivocally implies prompting and responsibility for the initiation of the action; it also commonly connotes underhandedness and evil intention; thus, one may be *incited* but not *instigated* to the performance of a good act; one may be *incited* or *instigated* to the commission of a crime (the early persecutions were . . . *instigated* . . . by the government as a safety valve for popular discontent—*Inge*) (his peculiar tastes had *instigated* him to boldness in some directions—*Edmund Wilson*) **Abet** tends to lose its original implication of baiting or hounding on and to emphasize its acquired implications of seconding, supporting, and encouraging (unthinkingly, I have laid myself open to the charge of aiding and *abetting* the seal cutter in obtaining money under false pretenses—*Kipling*) (Mr. Howells . . . seconded him as often as not in these innocuous, infantile ventures, *abetting* him in the production of . . . plays of an abysmal foolishness—*Brooks*) **Foment** stresses persistence in goading; thus, one who *incites* rebellion may provide only the initial stimulus; one who *foments* rebellion keeps the rebellious spirit alive by supplying fresh incitements (the apparent moral certainties of the mid-thirties—such as the notion that wars are *fomented* by munitions makers—*F. L. Allen*)

Ana stimulate, excite, *provoke, pique, galvanize: arouse, rouse, *stir

Ant restrain —*Con* curb, check, inhibit (see RESTRAIN): *frustrate, thwart, foil, circumvent, baffle, balk, outwit

incitement *stimulus, stimulant, excitant, impetus

Ana spur, goad, incentive, inducement, impulse, *motive, spring: provoking or provocation, excitement, stimulation, piquing (see corresponding verbs at PROVOKE); motivation, activation, actuation (see corresponding verbs at ACTIVATE)

Ant restraint: inhibition

incline *vb* 1 lean, *slant, slope

Ana bend, *curve: *swerve, veer, deviate: deflect, *turn

2 **Incline**, **bias**, **dispose**, **predispose** mean to influence one to take a stated or implied attitude to something or to someone or to have such an attitude as a result of prior influences. **Incline** (see also SLANT) implies that the mind or the feelings have been so affected that one is already leaning toward one of two or more possible conclusions, projects, decisions, or objects (as of affection). The word suggests no more than the tipping of the balance toward one and therefore connotes merely a tendency to favor one more than the other or others (such considerations are not supposed to be entertained by judges, except as *inclining* them to one of two interpretations—*Justice Holmes*) (the vast majority of people do not *incline* to be drunkards—*Fishbein*) (Mr. Owen *inclines* to cover up Lloyd George's odious treatment of King George V—*Sykes*) (on this visit I found Australia generally *inclined* to be inimical—*Heiser*) **Bias** implies a stronger and more settled leaning than *incline*; it usually connotes a prejudice for or against (it would be mortifying to . . . many ladies could they . . . understand how little the heart of man is affected by what is costly or new in their attire; how little it is *biased* by the texture of their muslin—*Austen*) (she was unfairly *biased* towards the Liberal party in the state, and too apt to approve of the measures they passed—*Rose Macaulay*) **Dispose** differs from *incline* in stressing the implication of putting one into a frame of mind that is proper or necessary for the end in view or that makes one ready or willing to do something or to take some stand; therefore it often connotes the sway of one's disposition, mood, temper, or attitude (his open face *disposes* one to believe him innocent) (the depression *disposed* many persons to become more thrifty) (a thinker so little *disposed* to treat the names of these religious philosophers with respect—*Inge*) (those *disposed* to violate or evade the decrees of the sovereign—*Cohen*) **Predispose** differs from *dispose* in implying the existence of the frame of mind or of the proper disposition in advance of the opportunity to manifest itself in action (circumstances are *predisposing* men to accept principles which they attacked a few years ago) (if she is flattered and indulged, she will be *predisposed* to be favorable to him) (we are much influenced in youth by sleepless nights; they disarm, they *predispose* us to submit to soft occasion—*Meredith*) **Predispose** is also used of a physical tendency or condition which makes one susceptible to a given infection or disease (*predisposed* to tuberculosis) (the coldness and dampness . . . *predispose* the miner to rheumatism—*Mumford*)

Ana influence, *affect, sway: *move, drive, impel

Ant disincline, indispose

include, **comprehend**, **embrace**, **involve**, **imply**, **subsume** are comparable when meaning basically to contain something within as a part or portion of a whole. **Include** suggests that the thing included forms a constituent, component, or subordinate part (the genus *Viola* *includes* the pansy as well as various violets) (the collection will not *include* any examples of the artist's earlier paintings) (an edition of the Bible which *includes* the Apocrypha) (it would not be argued today that the power to regulate does not *include* the power to prohibit—*Justice Holmes*) (few of the great men of our

early national history extended their humanitarianism to *include* the Indian tribes—*Hyman*) **Comprehend** suggests that within the scope or range of the whole under consideration (as the content of a term, a concept, a conception, or a view) the thing comprehended is held or enclosed even though it may or may not be clearly distinguished or actually distinguishable (it was not tolerance; it was something greater that *comprehended* tolerance but went far beyond it—*G. W. Johnson*) (for philosophy's scope *comprehends* the truth of everything which man may understand—*H. O. Taylor*) **Embrace** (see also ADOPT) suggests a reaching out to gather the thing embraced within the whole (as the content of a mind or of a course of study or a construction or interpretation of a law) (the scene before the reddleman's eyes . . . *embraced* hillocks, pits, ridges, acclivities, one behind the other—*Hardy*) (by Baudelaire's time it was no longer necessary for a man to *embrace* such varied interests in order to have the sense of the age—*T. S. Eliot*) (whatever disagreement there may be as to the scope of the phrase "due process of law," there can be no doubt that it *embraces* the fundamental conception of a fair trial—*Justice Holmes*) **Involve** suggests inclusion by virtue of the nature of the whole, whether by being its natural or inevitable consequence (surrender *involves* submission) (it is quite probable that many of those who would make the best doctors are too poor to take the course. This *involves* a deplorable waste of talent—*Russell*) or one of its antecedent conditions (clerkship did not necessarily *involve* even minor orders—*Quiller-Couch*) (I should . . . supply the humanistic elements of education in ways not *involving* a great apparatus of learning—*Russell*) or one of the parts or elements which comprise it by necessity or definition (that fusion of public and private life which was *involved* in the ideal of the Greek citizen—*Dickinson*) **Imply** is very close to *involve* in meaning but stresses a thing's inclusion not, as *involve* does, by the nature or constitution of the whole but as something which can be inferred because hinted at (see also SUGGEST 1) (the tone of the book was *implied* by shrewd advertisements featuring the author's open, smiling face—*J. D. Hart*) or because normally or customarily part of its content especially by definition (embrace *implies* a reaching out to gather to oneself or within one's grasp) (emergency and crisis *imply* conflict—*Langfeld*) or because invariably associated with the thing under consideration as its cause or its effect or as its maker or its product (a watch *implies* a watchmaker) For this reason *imply* may, in comparison with *involve*, suggest a degree of uncertainty; thus, silence is often said to *imply* consent, but it would be rash to say that it *involves* consent. **Subsume**, a technical term in logic, philosophy, and the classificatory sciences, implies inclusion within a class or category (as an individual in a species or a species in a genus) or a being comprehended by a general principle or proposition (absolute generic unity would obtain if there were one sum-mum genus under which all things without exception could be eventually *subsumed*—*James*)

Ant congruous —*Con* fitting, suitable, appropriate, meet, *fit: *consonant, compatible, congenial, consistent

inconsistent *inconsonant, incompatible, incongruous, uncongenial, unsympathetic, discordant, discrepant

Ana divergent, disparate, diverse, *different: irreconcilable (see corresponding affirmative verb at ADAPT)

Ant consistent —*Con* *consonant, compatible, congruous: according or accordant, agreeing, tallying, jibing, corresponding or correspondent (see corresponding verbs at AGREE)

inconsonant, inconsistent, incompatible, incongruous, uncongenial, unsympathetic, discordant, discrepant mean

not in agreement with one another or not agreeable one to the other. Except for this denial of reciprocal agreement or agreeableness, the first six words correspond to the affirmative adjectives as discriminated at CONSONANT especially in regard to their specific implications. **Discordant** is more common than *inconsonant* when applied, in the sense of devoid of harmony, to things coming into contact or comparison with each other (<*discordant* voices> <the *discordant* views of cabinet officers>). **Discrepant** is often preferred to *inconsistent* in attributive use especially when a wide variance between details of two things that should be alike or consistent is to be suggested; thus, "two *discrepant* accounts of an accident" suggests more obvious differences in details than "their accounts are *inconsistent*." *Inconsistent* is more frequent in predicative use.

Ant consonant —*Con* congruous, compatible, consistent, congenial (see CONSONANT): harmonized or harmonious, attuned (see corresponding verbs at HARMONIZE)

inconstant, fickle, capricious, mercurial, unstable mean

lacking or showing lack of firmness or steadiness in purpose, attachment, or devotion. **Inconstant**, usually applied to persons though sometimes to things, suggests an inherent or constitutional tendency to change frequently; it commonly implies an incapacity for fixity or steadiness (as in one's affections, aspirations, or course) (swear not by the moon, the *inconstant* moon, that monthly changes in her circled orb—*Shak.*) <people seldom know what they would be at, young men especially, they are so amazingly changeable and *inconstant*—*Austen*> <Spanish assistance from the sea was *inconstant*, almost accidental—*Jones*> **Fickle** retains only a hint of its basic implication of deceitfulness or treacherousness, but its basic implications of instability and unreliability are colored by the suggestion of an incapacity for being true, steadfast, or

certain <Fortune, Fortune! all men call thee *fickle*—*Shak.*>

<bitter experience soon taught him that lordly patrons are *fickle* and their favor not to be relied on—*Huxley*> <she is *fickle*! How she turns from one face to another face—and smiles into them all!—*Millay*> **Capricious** suggests

qualities which manifest or seem to manifest a lack of guidance by a power (as law, authority, or reason) that

tends to regularize movements or acts. When used in reference to persons, it suggests guidance by whim, mood,

freak, or sudden impulse <Louis XIII . . . a boy of eight at his accession . . . grows up *capricious*, restricted and cold,

hardly normal—*Belloc*> <he judged her to be *capricious*,

and easily wearied of the pleasure of the moment—*Wharton*> When used in reference to things, it implies an irregularity, an uncertainty, or a variability that seems incom-

patible with the operation of law (a *capricious* climate) <the *capricious* hues of the sea—*Lamb*> <the *capricious* uncertain lease on which you and I hold life—*Quiller-Couch*>

<the olive is slow-growing, *capricious* in its yield—*Huxley*> **Mercurial** is a synonym of the other words

here discriminated only when it carries a strong implication of resemblance to the metal mercury and its fluctua-

tions when subjected to an external influence. The word, however, also carries implications (as of swiftness, elo-

quence, cleverness, and volatility) derived from its earlier association with the god Mercury. Consequently when it

applies to persons, their temperaments, or their natures, it usually suggests a pleasing even if baffling variability,

an amazing succession of gifts capable of being displayed at will or at need, and such other qualities as sprightliness,

restlessness, flashing wit, and elusive charm <the gay, gallant, *mercurial* Frenchman—*Disraeli*> <I was ardent in my temperament; quick, *mercurial*, impetuous—*Irving*>

<it seems impossible that her bright and *mercurial* figure is no longer among us, that she will delight us no more with the keen precision and stabbing brilliance of that jewelled brain—*New Republic*>

Unstable, which is applicable to persons as well as to things, implies a constitutional incapacity for remaining in a fixed position mentally or emo-

tionally as well as physically; it suggests, therefore, such fluctuations in behavior as frequent and often unjustified

changes in occupation or in residence or sudden and startling changes of faith or of interests <*unstable* as water, thou shalt not excel—*Gen* 49:4> <his nature, lamentably

unstable, was not ignoble—*Macaulay*> <woman's love . . . is volatile, insoluble, *unstable*—*M. L. Anderson*> <an

unstable world economy . . . subjected to periods of wars, inflation, and depression—*Farmer's Weekly*>

Ana *changeable, changeful, variable, protean, mutable: *faithless, disloyal, false, treacherous, traitorous, perfidious: volatile, frivolous, light, light-minded (see corresponding nouns at LIGHTNESS)

Ant constant —*Con* *reliable, dependable, trustworthy, trusty: true, loyal, staunch, steadfast, *faithful

inconvenience *vb* **Inconvenience, incommode, discommode, trouble** are comparable when they mean to subject to disturbance or annoyance. **Inconvenience** usually suggests little more than interference with one's plans, one's comfort, or one's freedom of action; it seldom carries sugges-

tions of more than a temporary or slight disturbance or annoyance <I hope the new arrangement will not *inconvenience* you> <do not *inconvenience* him by intruding upon him while he is writing> <she was frequently *incon-*

venienced by the strong scent of tobacco which the fresh breeze conveyed through the porthole—*Wylie*> **Incom-**

mode and, even more, **discommode** carry a somewhat heightened suggestion of disturbance or annoyance, but not enough to imply actual suffering or injury; rather, they connote some mental agitation (as embarrassment or

vexation) or more or less disagreeable interference with one's comfort or plans <Lucian was soon *incommoded* by the attention his cousin attracted—*Shaw*> <“passenger disservice”—all the things which go to delay flights or otherwise to *incommodate* the passenger—*R. P. Cooke*> <it could not *discommodate* you to receive any of his Grace's visitors or mine—*Scott*> <finding herself and the younger children *discommoded* in the boat—*Galt*> **Trouble** is often used in polite intercourse in a sense close to that of *inconvenience*, when it suggests even less effort or disturbance <may I *trouble* you to pass the salt> <will it *trouble* you to drop this letter in the box when you are passing?> It is, however, also used to imply serious disturbance or annoyance (as worry, deep concern, or great pain); in this sense and sometimes in the lighter sense, it is frequently reflexive <men *troubled* themselves about pain and death much as healthy bears did—*Henry Adams*> <an artist who does not *trouble* about the philosophy of things, but just obeys the dim promptings of instinct—*Montague*>

Ana disturb, *discompose: interfere, intermeddle, *meddle

incorporate *vb* embody, assimilate, *identify

Ana merge, blend, fuse, coalesce (see MIX): *unite, combine, conjoin: consolidate, unify, *compact

incorporeal *immaterial, spiritual

Ant corporeal —*Con* *material, physical, sensible, objective

increase *vb* Increase, enlarge, augment, multiply mean to become or cause to become greater or more numerous. **Increase** distinctively carries the idea of progressive growth; sometimes it means nothing more than this <Jesus *increased* in wisdom and stature, and in favor with God and man—*Lk* 2:52> <Miss Anderson's reputation as an artist *increased*—*Current Biog.*> Sometimes it implies growth in numbers by natural propagation <Abou Ben Adhem (may his tribe *increase!*)—*Hunt*> or growth in size, amount, or quantity (as by increments or accretions) <their salaries *increase* annually by one hundred dollars> <his strength will *increase* when his health improves> or growth in intensity, especially by degrees or in proportion to something else <the darkness *increases* the further we advance into the forest> <your misery *increase* with your age!—*Shak.*> <a series of several situations which progressively *increase* in humorous possibilities—*Kilby*> In transitive use *increase* may or may not imply progressive growth; often it so stresses the operation or the effectiveness of a cause that it loses the connotation of natural or regular progression <the trustees *increased* all salaries> <a rich diet *increased* her weight> <the depression *increased* his misery> <the girl's actions *increased* his suspicions> <good teaching *increases* one's desire for knowledge> <many facts unearthed by psychological research and abnormal psychology *increase* the credibility of some of the more miraculous parts of the gospel narratives—*Flew*> **Enlarge** stresses expansion or extension so that whatever is affected is greater in some or all of its dimensions or in its size or capacity <he *enlarged* his farm by the purchase of one hundred adjoining acres> <*enlarge* a hotel by building a new wing> In extended use *enlarge* is applicable primarily to what may be thought of as capable of being made larger or smaller in extent or size; thus, one does not *enlarge* one's interests or one's activities but the field of one's interests, or the scope of one's activities <*enlarge* the circle of one's acquaintances> <*enlarge* one's capacity for enjoyment> Nevertheless field, scope, or capacity may be merely implied [its [a constitutional clause's] terms purport to *enlarge* . . . the powers vested in the government—*John*

Marshall] <*enlarging* our personality by establishing new affinities and sympathies with our fellowmen, with nature, and with God—*Inge*> <the abundant opportunities which the aesthetic realm provides to *enlarge* our experience—*Hunter Mead*> **Augment**, like *increase*, basically implies growth; it rarely, however, carries the implication of progressive growth or growth by degrees, which is often so strong in *increase*. It differs from *increase* chiefly in being used in reference to things already well grown or well developed; thus, when one says “the team's confidence *increases* with every victory” one implies that its confidence was originally not strong; on the other hand, when one says “the team's confidence *augments* with every victory” one implies that its confidence was never weak. Consequently the distinctive implication of *augment* is a growing greater, more numerous, larger, or more intense <even an increase of fame served only to *augment* their industry—*Reynolds*> <to fret over unavoidable evils, or *augment* them by anxiety—*Austen*> **Multiply** implies an increase in number especially by natural generation <every species of animals naturally *multiplies* in proportion to the means of their subsistence, and no species can ever *multiply* beyond it—*Smith*> Sometimes, however, the word implies increase in numbers by indefinite repetition of things of the same kind [if there were space, we might *multiply* illustrative citations] <philosophers who propose to solve certain intellectual problems by *multiplying* abstractions—*Holmer*> <commerce *multiplied* wealth and comfort—*Barr*>

Ana *intensify, aggravate, heighten, enhance: *expand, swell, amplify, dilate, distend, inflate: *extend, lengthen, elongate, prolong, protract

Ant decrease —*Con* diminish, lessen, reduce, abate, dwindle (see DECREASE): *shorten, abridge, abbreviate, curtail, retrench: *contract, condense, shrink, deflate

incredulity disbelief, *unbelief

Ana doubt, dubiety, dubiousity, skepticism, *uncertainty

Ant credulity —*Con* certitude, *certainty, assurance, conviction: positiveness, cocksureness, sureness (see corresponding adjectives at SURE)

increment accretion, *addition, accession

incriminate impeach, indict, *accuse, charge, arraign

Ana *involve, implicate

Con *exculpate, exonerate, absolve, acquit, vindicate

inculcate *implant, instill

Ana *infuse, inoculate, imbue, leaven: *teach, instruct, educate: impart, *communicate

incur, **contract**, **catch** are comparable when they mean to bring upon oneself something unpleasant, onerous, or injurious. **Incur** may or may not imply foreknowledge of what is to happen <*incur* a debt> <*incur* criticism> but it usually implies responsibility for the acts which bring about what is incurred <he simply couldn't bring himself to *incur* the loss of face involved in admitting that he didn't know enough English—*Durbin*> <an environment containing all the classic elements for *incurring* mental fatigue—*Armstrong*> **Contract** carries a stronger implication than *incur* of acquirement, but it is equally inexplicit in its lack of clear suggestion as to whether the acquisition derives from intention or accident <had *contracted* considerable debts in granting loans to the king—*Cruikshanks*> <*contract* a disease> <*contract* bad habits> But *contract* often distinctively implies a meeting between two things that permits either an interchange of qualities <each from each *contract* new strength and light—*Pope*> or a transmission of something from one to the other <they say that sherry ought to live for a while in an old brandy cask, so as to *contract* a certain convincing quality from the cask's genial timbers—*Montague*> **Catch**, the least

literary and most ordinary of these terms, usually implies infection or something analogous to it <catch a heavy cold> <religion, in point of fact, is seldom taught at all; it is caught, by contact with someone who has it—Inge>

Ana *get, obtain, acquire

Con *escape, elude, evade, avoid, shun, eschew: avert, ward, *prevent

incurious unconcerned, *indifferent, aloof, detached, uninterested, disinterested

Ana *abstracted, preoccupied, absent, absentminded, distraught

Ant curious, inquisitive —*Con* prying, snoop, nosy (see **CURIOS**): intrusive, meddling, *impertinent: observing or observant, remarking, noticing, noting (see corresponding verbs at **SEE**)

incurSION *invasion, raid, inroad

indebtedness *debt, debit, obligation, liability, arrear

indecent unseemly, indelicate, improper, *indecorous, unbecoming

Ana obscene, ribald, *coarse, gross, vulgar: lewd, lascivious, *licentious: *immoral: *offensive, revolting, repulsive, repugnant, loathsome

Ant decent —*Con* *chaste, pure, modest: virtuous, *moral, ethical

indecorous, **improper**, **unseemly**, **indecent**, **unbecoming**, **indelicate** are comparable when meaning not in conformity with the accepted standard of what is right or fitting or is regarded as good form. The first four words are in general the diametrical opposites of *decorous*, *proper*, *seemly*, *decent* (see **DECOROUS**), but the negative terms are often more sharply distinguished from each other than the affirmative terms. Something is **indecorous** which transgresses the conventions of polite society or its notions of what constitutes good form or good manners <*indecorous* behavior at a funeral> <they regarded argument in public as *indecorous*> <a generation of critical circles has maintained an *indecorous* silence, not so much discreet as unbecoming, concerning John Masfield—*Salomon*> Something is **improper** which violates an accepted standard of what is right, correct, or fitting, especially in etiquette, in language, in aesthetics, or in morals <I am sure if I had known it to be *improper* I would not have gone with Mr. Thorpe at all—*Austen*> <he was telling her a funny story, probably an *improper* one, for it brought out her naughtiest laugh—*Cather*> Something is **unseemly** which is not only indecorous or improper but also offensive to persons of good taste or to strict followers of the conventions <I consider it very *unseemly* to talk in this loose fashion before young men—*Cather*> <Maurice disgraced Amy and himself by joining in an *unseemly* fracas with the police—*Rose Macaulay*> <we were in no danger of being betrayed into any *unseemly* manifestations of religious fervor—*L. P. Smith*> Something is **indecent** which is grossly offensive to those who observe the proprieties or, in a frequent stronger sense of the word, which violates or outrages accepted standards or morals, modesty, or propriety <*indecent* plays> <*indecent* behavior> <why do we regard it as *indecent* to tuck the napkin between the waistcoat buttons—*Mencen*> <buried him with *indecent* haste and without the proper rites—*A. M. Young*> <these dances, though to the eyes of Johnston . . . “grossly *indecent*” . . . are “danced reverently”—*Ellis*> Something is **unbecoming** which does not befit one's character or standing or is not in accordance with one's own standards <had a . . . look in her eye that was *unbecoming* in a menial position—*H. G. Wells*> <charged with conduct *unbecoming* to a soldier—*James Jones*> Something is **indelicate** which verges upon immodesty or which betrays lack of tact or of sensi-

tive perceptions <she had visions, so startling that she half repudiated them as *indelicate*, of coarse masculine belongings strewn about in endless litter—*M. E. Freeman*> <think no more of the matter. It is very *indelicate* for a young lady to dwell on such subjects—*Deland*>

Ana unfitting, inappropriate, unsuitable, *unfit: incongruous, *inconsonant: *rude, ill-mannered, uncivil, discourteous, impolite: *coarse, vulgar, gross

Ant decorous —*Con* decent, nice (see **DECOROUS**): ceremonious, formal, conventional (see **CEREMONIAL**)

indefatigable, **tireless**, **weariless**, **untiring**, **unwearying**, **unwearied**, **unflagging** are comparable in their basic meaning of not feeling or manifesting fatigue, but they are closer synonyms in their extended sense of capable of prolonged and arduous effort. **Indefatigable** implies being incapable of being fatigued, but in its actual use it usually suggests persistent and unremitting activity or effort <the *indefatigable* pursuit of an unattainable perfection—*L. P. Smith*> <the strenuous, persevering, and absolutely *indefatigable* champion of every victim of oppression—*John Morley*> **Tireless** and **weariless** are sometimes employed with little distinction from *indefatigable*; frequently, however, they connote less busyness and even greater or more remarkable power of continuance <the *tireless* sweep of the eagle's flight> <a man of distinguished presence and *tireless* industry—*H. U. Faulkner*> <was not Arnold the *tireless* critic of his country and his age, the lifelong arraigner of British limitedness and complacency?—*Montague*> <a sturdy Dissenter, a *weariless* promoter of godliness—*Times Lit. Sup.*> **Untiring** and **unwearying** differ from *tireless* in carrying a stronger implication of uninterrupted activity; often they specifically suggest an extraordinary ability to go on continuously and without a break while *tireless* and *weariless*, by contrast, often imply repeated returns over a very long course of time <an *untiring* search for a lost child> <*tireless* efforts to attract attention> <*untiring* devotion to a cause> <the *tireless* reiteration of a call> <the *unwearying* pursuit of an ideal> <to the end of his life he was an *untiring* worker—*McGiffert*> **Unwearied** differs little from *untiring* in its meaning, but it is more often applied directly to the person or thing concerned than to the activity engaged in <I, so long a worshipper of nature, hither came *unwearied* in that service—*Wordsworth*> <the *unwearied* and disinterested seeker after truth—*Jowett*> <men who recalled the days of the Armada did not feel proud over James's *unwearied* appeasement of Spain—*Bush*> **Unflagging** differs little from *tireless*, for it too stresses a display of power to continue without signs of weariness; but it also stresses no diminution of activity, and it applies to a person's powers rather than to the person himself <*unflagging* attention> <a purpose . . . which he pursued with *unflagging* energy—*Froude*> <such a hold on the imaginations of scholars . . . that they pursued it with *unflagging* zeal—*Southern*>

indescribable *unutterable, inexpressible, ineffable, unspeakable, indefinable

indicate, betoken, attest, bespeak, argue, prove can all mean to give evidence of or to serve as ground for a valid or reasonable inference. One thing **indicates** another when the former serves as a symptom or a sign pointing to the latter as a justifiable or necessary conclusion, treatment, or remedy (the facts revealed by the auditor's investigation *indicate* that the speculations were not confined to one person) (conflicting findings *indicate* further neurological research—*Collier's Yr. Bk.*) (such symptoms *indicate* an operation) (the results . . . are believed to be the first to *indicate* a possible magnetic effect directly attributable to a solar eclipse—*Harradon*) One thing **betokens** another when the former serves as visible or sensible evidence or, more narrowly, as a presage or portent of the latter (his appearance *betokened* complete security—*Meredith*) (the black clouds *betoken* a storm) (like a red morn, that ever yet *betokened* wreck to the seaman, tempest to the field—*Shak.*) (towering business buildings, great warehouses, and numerous factories *betoken* its importance—*Amer. Guide Series: N. C.*) One thing **attests** another when the former serves as indisputable evidence of the latter and has the force though not necessarily the character of legal testimony or documentary proof (the great seal . . . *attests* . . . the verity of the presidential signature—*John Marshall*) (their success is *attested* by the marvelous exactness with which eclipses are foretold—*Darrow*) One thing **bespeaks** another when the former leads to the inference that it is the outward manifestation of the latter (to Him whose works *bespeak* his nature—*Cowper*) (the large abstention from voting in our elections must certainly *bespeak* an indifference not without meaning—*Frankfurter*) (a glint of pride in her eyes that *bespoke* her new dignity—*Lasswell*) One thing **argues** another when the former gives good reason for belief in the existence, the reality, or the presence of the latter (his evasion, of course, was the height of insolence, but it *argued* unlimited resource and verve—*Kipling*) (to the grub under the bark the exquisite fitness of the woodpecker's organism to extract him would certainly *argue* a diabolical designer—*James*) (a becoming deference *argues* deficiency in self-respect—*Whitehead*) One thing **proves** another when the former serves to demonstrate or manifest the truth of the latter (your language *proves* you still the child—*Tennyson*) (to become a writer was, however, in Thoreau's mind; his verses *prove* it, his journal *proves* it—*Canby*)

Ana intimate, hint, *suggest: evince, evidence, demonstrate, manifest, *show: import, signify, denote, *mean

Con *exculpate, absolve, exonerate, acquit, vindicate

indifferent 1 **Indifferent, unconcerned, incurious, aloof, detached, uninterested, disinterested** mean not feeling or showing interest, especially natural or normal interest. **Indifferent** is often used in place of the other and more specific terms. It may imply neutrality of attitude arising either from a lack of bias, prejudice, or predilection when two or more persons or things are considered or from a lack of feeling for or against a particular person or thing (it is impossible to remain *indifferent* to political parties when great issues are at stake) (he was . . . exceedingly difficult to please, not . . . because he was hypercritical and exacting, but because he was *indifferent*—*Bennett*) (nature had no sympathy with our hopes and fears, and was completely *indifferent* to our fate—*L. P. Smith*) **Unconcerned** implies indifference such as arises from unconsciousness, insensitivity, or selfishness which prevents one from being moved, worried, or made solicitous (convincing the *unconcerned*, the apathetic, and the downright hostile—*Fine*) (readers *unconcerned* with style and philosophical illumination—*Cordell*) **Incurious** implies indifference arising from a lack of intellectual interest or normal curiosity; it often suggests incapacity because of temperament or state of mind (why . . . are we, as a race, so *incurious*, irresponsive and insensitive—*Woolf*) (the *incurious* ignorance of the poor about the diseases among which they live—*Edmund Wilson*) **Aloof** and especially its derivative *aloofness* stress indifference that is the natural result of feeling apart or at a distance from someone or something (as from temperamental reserve, a sense of superiority, or an aversion to the inferior) (young people . . . tend to become arrogant and hard, ignorant of the problems of adult life, and quite *aloof* from their parents—*Russell*) (it nerved him to break through the awe-inspiring *aloofness* of his captain—*Conrad*) **Detached** often implies a commendable aloofness which is the result of freedom from prejudices or of selfish concern for one's personal interests (the . . . frigid and *detached* spirit which leads to success in the study of astronomy or botany—*Chesterton*) Sometimes it distinctively suggests a point of view or way of looking at persons or things as though they bear no relation to one's own life (Rome contemplated the spectacle with the *detached*, intelligent amusement of the . . . theatergoer—*Rose Macaulay*) (he had been *detached* and impersonal about the great facts of life—*Webb*) **Uninterested** is the most neutral of these terms and in itself suggests nothing beyond the fact of a lack of interest (aware of nature as *uninterested* in him, yet able to feed or crush him—*Kelman*) **Disinterested** though increasingly interchangeable with *uninterested*, in its more discriminative use suggests a freedom from thought of personal advantage or interest that permits one to detect the truth, to tell the truth, or to judge truly (a *disinterested* observer) (will teach that one *disinterested* deed of hope and faith may crown a brief and broken life with deathless fame—*Eliot*) (although there are many things in which I am uninterested, I cannot be *disinterested* about the things in which I am interested—*Lowrie*) (a *disinterested* historian)

Ana impartial, unbiased, dispassionate, *fair: apathetic, *impassive, phlegmatic: *cool, nonchalant

indigent *adj* *poor, needy, destitute, penniless, impecunious, poverty-stricken, necessitous

Ant opulent —*Con* *rich, wealthy, affluent

indignant *angry, irate, wrathful, wrath, acrimonious, mad

Ana incensed, infuriated, enraged, angered, maddened (see ANGER *vb*): exasperated, riled, provoked, nettled (see IRRITATE): roused, aroused, stirred (see STIR)

Con *complacent, smug, self-satisfied: *indifferent, unconcerned, aloof

indignation wrath, *anger, ire, rage, fury

Ana resentment,udgeon, *offense: *passion

indignity *affront, insult

Ana injury, wrong, *injustice, grievance: offending or offense, outraging or outrage (see corresponding verbs at OFFEND)

indirect, **circuitous**, **roundabout** are comparable when applied to ways, routes, or means with the meaning not leading by a straight path to a destination or goal. **Indirect** basically implies departure from the straight and short line between two points (by what bypaths and *indirect* crooked ways I met this crown—*Shak.*) In its extended uses *indirect* implies following a course that is not plain, obvious, explicit, or straightforward (Jane's mother was making *indirect* but perfectly legitimate inquiries into his prospects—*Mary Austin*) (*indirect* taxation) (we have seen grow up . . . a whole new family of subtle, *indirect* influences—*Kefauver*) (man's possible development from non-Homo stock, must be based upon *indirect* evidence—*R. W. Murray*) **Circuitous** implies not only indirection but usually a winding and, because of its length, slow way or course (they were forced to take a *circuitous* route on account of the floods) (two lines possible—the one direct by sea, the other *circuitous* through Gaul—*Mahan*) (paths . . . more *circuitous*, but not less sure duty to reach the point marked out by Heaven—*Wordsworth*) (in speech and in action most Japanese are indirect and *circuitous*—*Buchanan*)

Roundabout may be used interchangeably with *circuitous*, but specifically it implies a following of a more or less circular or semicircular course from one point to another; the term more often than *indirect* or *circuitous*, especially in its extended use, implies deliberate, often blameworthy evasion or avoidance of the direct course or way (take a *roundabout* course to one's destination) (a *roundabout* explanation) (the *roundabout*, diffident appeal for pity—*Day Lewis*) (she declared that she would have nothing to do with any *roundabout* ways, but go openly and instantly to law—*Burney*)

Ana devious, oblique, *crooked: *winding, sinuous, tortuous

Ant direct: forthright, straightforward

indiscriminate, **wholesale**, **sweeping** are comparable when they mean including all or nearly all within the range of choice, operation, or effectiveness. Something is **indiscriminate** which does not distinguish the deserving from the undeserving but acts (as in giving, treating, selecting, or including) regardless of individual deserts or merits (*indiscriminate* charity) (*indiscriminate* praise) (the critic does a wrong who brings them under his *indiscriminate* censure—*Quiller-Couch*) (an *indiscriminate* lavish Irish meal, sausages, eggs, bacon, all together on one

plate—*O'Flaherty*) **Wholesale** often implies indiscriminateness, but sometimes it carries almost no such suggestion; however, it regularly stresses extensiveness, usually suggesting that no person or thing within the range of choice, operation, or effectiveness has escaped (the *wholesale* vaccination of a community) (communism can spread only . . . as a development of existing economic civilization and not by a sudden *wholesale* overthrow of it—*Shaw*) (the continuous battle of this generation against *wholesale* character assassination through the application of indiscriminate labels—*Roy*) **Sweeping** implies a reaching out in or as if in a wide circle to draw in everyone or everything within range; it usually carries a stronger suggestion of indiscriminateness than *wholesale* and often specifically implies exceeding the bounds of right, justice, or jurisdiction or suggests generality rather than a concrete, specific character (*sweeping* reforms) (*sweeping* accusations) (a *sweeping* and consummate vengeance for the indignity alone should satisfy him—*Meredith*) (the statute is of a very *sweeping* and general character—*Justice Holmes*)

Ant industrious —*Con* *busy, diligent, assiduous, sedulous: energetic, strenuous, *vigorous

indomitable *invincible, unconquerable, impregnable, inexpugnable, unassailable, invulnerable

Ana stubborn, dogged, pertinacious (see OBSTINATE); resolute, staunch, steadfast (see FAITHFUL); undaunted, dauntless, intrepid, doughty (see BRAVE)

induce, **persuade**, **prevail**, **get** are comparable when meaning to move another by arguments, entreaties, or promises to do or agree to something or to follow a recommended course. **Induce** usually implies overcoming indifference, hesitation, or opposition especially by offering for consideration persuasive advantages or gains that depend upon the desired decision being made; the term usually suggests that the decision is outwardly at least made by the one induced rather than forced upon him by the one that induces (only those . . . doctors who were possessed of superior courage and capable of supreme self-sacrifice could be *induced* to continue at the work—*Heiser*) (the

object is to *induce* the child to lend of his own free will; so long as authority is required, the end aimed at has not been achieved—*Russell* <conditions which had *induced* many persons to emigrate from the old country—*Dewey*> **Persuade** implies a winning over by an appeal, entreaty, or expostulation addressed as much to feelings as to reason; it usually implies that the one persuaded is more or less won over by the one that persuades (it is not very difficult to *persuade* people to do what they are all longing to do—*Huxley*) <deputed by the firm of lawyers . . . to *persuade* her to resume her married life—*Powell*> **Prevail**, usually with *on* or *upon*, may be employed in place of either *induce* or *persuade*, but it usually carries a stronger implication of opposition to be faced or of good arguments to be overcome (he had never before supposed that, could Wickham be *prevailed* on to marry his daughter, it would be done with so little inconvenience to himself as by the present arrangement—*Austen*) <I will go now and try to *prevail* on my mother to let me stay with you—*Shaw*> <*prevailed* upon the men in the sloop to sail up the river again, to rescue any survivors—*M. S. Douglas*> **Get** in this relation (see also GET 1) is a much more neutral term than the others discriminated and it may replace any of them when the method by which a favorable decision is brought about is irrelevant or, sometimes, is deliberately not stressed <finally *got* the boy to do his homework> <tried to *get* the union to accept arbitration> <succeeded in *getting* the Russians to relinquish certain claims for war damages—*Americana Annual*>

induct inaugurate, install, *initiate, invest

induction *deduction

Ana *inference, ratiocination

inductive deductive (see under DEDUCTION)

Ana ratiocinative, inferential (see under INFERENCE)

indulge, pamper, humor, spoil, baby, mollycoddle mean to show undue favor or attention to a person or his desires.

Indulge implies weakness or compliance in gratifying another's wishes or desires, especially those which have no claim to fulfillment or which ought to be kept under control <I would *indulge* her every whim—*Hardy*> <pasty-faced languid creatures . . . *indulged* in food and disciplined in play—*Russell*> <when schoolboys were less *indulged* with pocket money—*Archibald Marshall*> **Pamper** carries an implication of inordinate gratification of an appetite or taste especially for what is luxurious or dainty and, therefore, softening in its physical, mental, or moral effects <rich though they were, they refused to *pamper* their children> <he preserved without an effort the supremacy of character and mind over the flesh he neither starved nor *pampered*—*Dickinson*> <no country can afford to *pamper* snobbery—*Shaw*> **Humor** stresses either attention to or an easy yielding to whim, caprice, or changing desires; it therefore often suggests accommodation to the moods of another <*humoring* a pet fawn which had a predilection for soap and cigarette butts—*Corsini*> <the tone of your voice . . . is too gentle, as if you were *humoring* the vagaries of a blind man's mind—*Hecht*> **Spoil** stresses the injurious effect on the character or disposition of one who is indulged, pampered, humored, or otherwise made the recipient of special attention; however the word

is often used to imply attentions that are likely to have this effect (<"She talks a great deal, sir," Elizabeth apologized. "She's our only little girl, and I'm afraid we *spoil* her"—*Deland*> **Baby** implies excessive attentions, especially of the kind given to those who are unable to care for themselves and need the constant assistance of a mother or nurse; it also carries a strong implication of humoring or pampering <*babying* Americans, telling them what they should read and should not read—*Sokolsky*> <Lydia had two methods of taking men down: *babying* them and harping on their faults—*Edmund Wilson*> **Mollycoddle** usually implies babying; it distinctively suggests inordinate attention to another's health or physical comfort or undue efforts to relieve another of strain or hardship. It often also connotes, as the effect or danger of such treatment, effeminateness or infantilism <schools where grown boys and girls are *mollycoddled*> <look here, mother dear: I'm as well as ever I was, and I'm not going to be *mollycoddled* any more—*Braddon*>

Ana favor, accommodate, *oblige: gratify, *please, regale, delight

Ant dynamic: animated —*Con* *active, operative, live: alert, vigilant, *watchful

inescapable *inevitable, ineluctable, unescapable, unavoidable

Ana *certain, necessary: inexorable, *inflexible

Ant escapable

inevitable 1 Inevitable, ineluctable, inescapable, unescapable, unavoidable are comparable when meaning incapable

of being shunned or evaded. Inevitable (see also CERTAIN) implies that causes are already in operation or that the conditions (as of one's existence, one's work, or one's temperament) are such that the thing so described is bound to occur <life is full of perils, but the wise man ignores those that are inevitable—Russell> <as soon as one lays down a rule . . . one has to face the inevitable exception—Montague> <she was winding up all sorts of affairs, with the inevitable result that she was encountering all sorts of urgent expenses which she was unable to meet—Ellis> Ineluctable adds to inevitable the suggestions that struggle or defiance is futile and that no way out is possible <the dangers that beset the world as the result of . . . the ineluctable increase in the human population—Hutchinson> <by chance or ineluctable destiny—Dwight Macdonald> <the pain was deep,

deep and ineluctable—A. S. Paton> Inescapable and unescapable carry a stronger suggestion than either inevitable or ineluctable that the person concerned would, if he could, avoid what must be but is convinced of its inexorable character <his inescapable fate> <continuity in design appears to be inescapable—Gloag> <the unescapable expansion of the nation's foreign policy—D. S. Freeman> Unavoidable carries a weaker implication of necessary occurrence than the other terms, but it does imply that the exercise of foresight or care has not enabled one to escape what has occurred <unavoidable delays> <an unavoidable accident>

Ana *certain, necessary: determined, settled, decided (see DECIDE): inexorable, *inflexible

Ant evitable —*Con* escapable, avoidable, eludible, evadable (see corresponding verbs at ESCAPE): preventable (see corresponding verb at PREVENT)

2 *certain, necessary

Ana *infallible, inerrant, unerring: *perfect, entire, whole: definitive, determinative, decisive, *conclusive

inexorable obdurate, adamant, adamantine, *inflexible

Ana *rigid, rigorous, strict: resolute, steadfast (see FAITHFUL): *immovable, immobile: implacable, unrelenting, relentless, merciless, *grim

Ant exorable —*Con* compassionate, responsive, sympathetic, *tender: merciful, clement, lenient, indulgent, *forbearing

inexpressible *unutterable, ineffable, unspeakable, indescribable, indefinable

Ana tenuous, rare (see THIN): *infinite, boundless, illimitable

Ant expressible

inexpugnable unassailable, impregnable, *invincible, unconquerable, invulnerable, indomitable

Ana uncombatable, irresistible, unopposable (see corresponding affirmative verbs at RESIST)

Ant expugnable —*Con* assailable, attackable, stormable (see corresponding verbs at ATTACK)

infallible, inerrable, inerrant, unerring are comparable when they mean incapable, or manifesting incapability, of making mistakes or errors. Infallible occurs in this narrow sense chiefly in reference to something (as a person, institution, or book) that is accepted as the divinely inspired medium for the revelation of moral or spiritual truth <the pope is held by Roman Catholics to be infallible only when he speaks ex cathedra and defines a doctrine or a rule of morals held by the church> <believed in an infallible Bible—Sweet> <no mathematician is infallible; he may make mistakes; but he must not hedge—Eddington> Inerrable and inerrant are erudite synonyms of infallible and may be preferable to the latter when it is desired to avoid connotations associated with the notion of papal infallibility <decision from the inerrable and requisite conditions of sense—Browne> <not an inerrable text—Gladstone> but inerrant may imply not so much the incapacity for making mistakes or errors as the fact of their absence <an inerrant account of the battle> <the Church was ubiquitous, omniscient, theoretically inerrant and omniscient—Coulton> <the inerrant literary sense which gave us the Prayer Book Collects—Sperry> Unerring implies inerrancy, but it stresses reliability, sureness, exactness, or accuracy (as of aim or observation) <a marksman of unerring aim> <an unerring eye for fleeting expression of the moral features of character—J. R. Lowell> <a man is infallible, whose words are always true; a rule is infallible, if it is unerring in all its possible applications—Newman> <a man's language is an unerring index of his nature—Binyon>

Ana *certain, inevitable, necessary: *impeccable, flaw-

less, faultless

Ant fallible —*Con* questionable, dubious, *doubtful
infamous nefarious, flagitious, iniquitous, *vicious, villainous, corrupt, degenerate

Ana ignominious, disgraceful, disreputable, shameful (see corresponding nouns at DISGRACE)

Ant illustrious —*Con* glorious, *splendid, sublime

infamy ignominy, shame, *disgrace, dishonor, disrepute, opprobrium, obloquy, odium

Ana notoriety (see FAME): degradation, humiliation, debasement, abasement (see corresponding verbs at ABASE)

Con honor, glory, renown, celebrity, *fame, repute; prestige, authority, *influence, credit, weight

infancy, minority, nonage denote the state or period of being under the age established by law for the attainment of one's full civil rights and independence of guardianship.

Infancy is seldom used in this denotation outside of legal documents and court reports; in these it is especially likely to be chosen when reference is made to the condition or status of the person who is not of age (the defendant pleaded *infancy* at the time the lease was made) **Minority** is widely used in general as well as in legal writing and is the word most often chosen when reference is made to the period or term of being under age (he inherited the title during his *minority*) **Nonage** is the equivalent of *infancy* and *minority* in their legal senses, but it is often distinguishable from them in its acquired connotations and by its greater susceptibility to literary and extended use. *Nonage* may suggest mere immaturity (an adolescent Parisienne . . . bored with the *nonage* of her contemporaries—*Newsweek*) Not infrequently it suggests adolescence and its weaknesses and strengths and may be thought of as the opposite of *dotage*, or *senility* (the brook we leaped so nimbly in our *nonage* is a mere ditch or too wide for our tonnage—*Hillyer*) (a world which is still after all young and has plenty of time to make good the mistakes of its *nonage*—*Times Lit. Sup.*)

infatuated 1 *fond, besotted, insensate

Ana deluded, deceived, beguiled, misled (see DECEIVE): duped, gulled, befooled (see DUPE): foolish, silly, fatuous, asinine (see SIMPLE)

Con sensible, prudent, sane, judicious, *wise: *rational, reasonable

2 *enamored

infectious 1 **Infectious, contagious, communicable, catching** in their basic use as applied to diseases are distinguishable though closely similar in meaning. **Infectious** designates a disease resulting from the invasion of and multiplication in the body by germs (as bacteria, protozoans, or viruses) that produce toxins or destroy or injure tissues. **Contagious** more precisely designates an infectious disease caused by receiving living germs directly from a person afflicted with it or by contact with a secretion of his or some object he has touched. **Communicable** in this relation is nearly equivalent to *infectious*, but it emphasizes the transmissibility of the disease rather than the method by which it is acquired. **Catching**, a less formal term, is close in meaning to *contagious*, but it implies even more the dangers of contact.

Infectious, contagious, and catching all have extended use but in such use the fine distinctions exhibited in their technical senses are not carried over with the result that they are nearly exact synonyms meaning rapidly imparted to others; thus, one may speak of *contagious*, or *infectious*, enthusiasm or of enthusiasm that is *catching* (what a bad temper! I hope it's not *catching*) (fear is exceedingly *infectious*: children catch it from their elders even when their elders are not aware of having shown it—*Russell*)
Ana toxic, mephitic, pestilent, pestilential, virulent,

*poisonous

2 **Infectious, infective** as applied to agents related to the causing of disease may be interchangeable and then mean capable of infecting or tending to infect. **Infectious**, however, is more often restricted to the technical and figurative senses expounded in the preceding article. **Infective** may be distinctively applied to matter and means potentially infectious (an *infective* secretion) (an *infective* wart) In extended use it preserves the implication of corruption, strong in *infect* but often absent in *infectious* (infective doctrines)

infective *infectious

Ana contaminating, tainting, polluting, defiling (see CONTAMINATE): corrupting, vitiating (see DEBASE): *poisonous, virulent, toxic, mephitic

Con salutary, hygienic, *healthful, wholesome

infelicitous unhappy, inapt, inappropriate, unfitting, *unfit, unsuitable, improper

Ana unbecoming, unseemly, *indecorous, improper, indelicate, indecent: inept, maladroit, gauche, *awkward

Ant felicitous —*Con* happy, apt, appropriate, fitting (see FIT *adj*): apposite, apropos, germane, pertinent, *relevant

infer, deduce, conclude, judge, gather are comparable when they mean to arrive at by reasoning from evidence or from premises. All except *gather* are so clearly differentiated in logical use that these distinctions tend to be retained in general use. The derivative nouns **inference, deduction, conclusion, judgment**, especially as applied to the propositions or mental formulations derived by reasoning, are even more precisely fixed in usage. **Infer** basically implies a formulating (as of an opinion, a principle, a fact, or a probability) from evidence presented or premises accepted. In general use the term often connotes slightness in the evidence and so comes close to *surmise*; in logic, however, it and **inference** convey no suggestion of weakness or strength ("I see motion," said Thomas: "I *infer* a motor!" This reasoning . . . is . . . stronger than some more modern *inferences* of science—*Henry Adams*) ("Oh, well, don't worry. Jane hasn't got any complexes." From which Gard . . . *inferred* she thought he [Gard] had—*Mary Austin*) **Deduce**, in nontechnical language, usually means to *infer*, with added implications of very definite grounds for the inference; in strict logical use, it means to derive an inference from a general principle; that is, to make a **deduction** as opposed to an *induction* (see DEDUCTION 3). This distinction, an important one to logicians and philosophers, is nearly lost in general use (what a man is as an end perishes when he dies; what he produces as a means continues to the end of time. We cannot deny this, but we can deny the consequences *deduced* from it—*Russell*) (the last entry was in pencil, three weeks previous as to date, and had been written by someone with a very unsteady hand. I *deduced* from this that the management was not overparticular—*Chandler*) **Conclude** is often employed as an equivalent of *deduce* in its general sense. More precisely used, it means to draw the inference that is the necessary consequence of preceding propositions whether these propositions are the premises of a syllogism or the members of a series of previously drawn inferences constituting an unbroken chain of reasoning. A **conclusion** is therefore either the third proposition of a syllogism or the final, summarizing proposition in a rational process. In general use *conclude* and *conclusion* frequently preserve the implication of logical necessity in the inference (do not *conclude* that all State activities will be State monopolies—*Shaw*) (the more one scans the later pages of Mark Twain's history the more one is forced to the *conclusion* that there was something gravely amiss with

his inner life—*Brooks*) <on the basis of years of intensive work . . . [he] *concludes* that comic books are a profound "anti-educational" influence—*Mills*) **Judge** and **judgment** are nearly equivalent to *conclude* and *conclusion* but usually connote careful examination of evidence or critical testing of premises and the fitness of the conclusion for affirmation <an economist should form an independent *judgment* on currency questions, but an ordinary mortal had better follow authority—*Russell*) <his career will inevitably be *judged* by the achievements or failures of his Government as a whole—*Wills*) <most of the tribes of Southern Iraq, *judged* by their physical characteristics, are of very mixed origin—*Thesiger*) To **gather** is to conclude, but it connotes reflection rather than careful reasoning, and the putting of two and two together <thereby he may *gather* the ground of your ill will—*Shak.*> <from Thomasin's words and manner he had plainly *gathered* that Wildeva neglected her—*Hardy*>

Ana reason, speculate, *think: surmise, *conjecture, guess

inference 1 deduction, conclusion, judgment (see under INFER)

2 **Inference**, **ratiocination** denote the process of arriving at conclusions from data or premises. **Inference** often connotes guesswork based on trivial or inadequate data or premises; in technical logical use it names the process of inferring (see INFER) but does not in itself suggest care in reasoning or in deduction. **Ratiocination** adds the implication of exactitude and of an extended process or the passing by steps from one inference to another. It often carries the connotation of tediousness or of hairsplitting. The same distinctions in implications are observable in the corresponding adjectives **inferential** and **ratiocinative**. *Ana* deduction, conclusion, judgment (see under INFER): reasoning, thinking, speculation, cogitation (see corresponding verbs at THINK): surmise, conjecture (see under CONJECTURE *vb*)

Con intuition, understanding (see REASON): assumption, presumption, presupposition (see under PRESUPPOSE)

3 *implication

inferential ratiocinative (see under INFERENCE 2)

Ana hypothetical, putative, purported, conjectural, supposititious, *supposed: *theoretical, speculative, academic: *implicit, constructive, virtual

Con *explicit, express, definite, categorical: intuitive, *instinctive: proved, demonstrated, tried, tested (see PROVE)

inferior *n* **Inferior**, **underling**, **subordinate** mean one, usually a person, who is lower than another. **Inferior**, the most inclusive of these terms, may be applied to anyone that is lower in some significant matter (as rank, station, quality, or value) than another; the term suggests, explicitly or by implication, a comparison, sometimes with those obviously and individually higher or superior but sometimes with those merely belonging to a level felt as higher <that an *inferior* should punish a superior, is against nature—*Locke*> <he would be judged by his peers, and safeguarded against the obtuse hostility of his *inferiors*—*Mencken*> <Napoleon was his equal or superior in the first, gravely his *inferior* in the second—*Belloc*> <they are gracious to equals, abrupt to *inferiors*—*Temple Fielding*> **Underling** routinely implies subjection to the will or wishes of another; it may apply to a condition from that of a slave or servant to that of one who is just below the master but ordinarily it implies some degree of contempt <the fault, dear Brutus, is not in our stars, but in ourselves, that we are *underlings*—*Shak.*> <the disconsidered *underling* was in danger of becoming his master—*Buchan*> <scientists need to be used not as lackeys

or *underlings*—*Vannevar Bush*) **Subordinate** likewise suggests subjection but has an entirely different flavor from *underling*. The term implies a being in subjection to the will or wishes of another but seldom carries a suggestion of disdain and usually expresses no more than relative position in a hierarchy <his tendency to meddle and give orders to Welles and his *subordinates* annoyed Welles—*Beale*> <marked in the eyes of his young *subordinate* a subtle light—*Guy Fowler*> <matters . . . talked over endlessly by . . . Captain Anthony's faithful *subordinates*—*Conrad*>

Ana dependent, subject (see corresponding adjectives at SUBORDINATE)

Ant superior —*Con* *chief, head, master, leader

infernal, **chthonian**, **hellish**, **Hadean**, **Tartarean**, **stygian** mean of or characteristic of the abode of the dead. **Infernal** basically denotes of or characteristic of the underworld regions once held to be inhabited by the earth gods and spirits of the dead. Through confusion of pagan conceptions of the underworld with Jewish and Christian conceptions of hell as the abode of devils and a place of torment for the souls of the damned *infernal* has acquired connotations of horror, torturing fiends, and unendurable suffering through fire, which nearly always blur and sometimes blot out its original subterranean implications <from the *infernal* Gods, 'mid shades forlorn—*Wordsworth*> <the most abhorred fiend in the *infernal* regions is sent to torment me—*Scott*> When the classical conception of the underworld must be suggested without an admixture of alien connotations, **chthonian** is sometimes used <but the worship of the dead . . . and of the *chthonian* gods, was marked off by broad lines from that of the Olympian gods—*Hastings*'> **Hellish** comes close to the current meaning of *infernal* but carries so strong an implication of devilishness that it more nearly approaches *fiendish* in its meaning <heavenly love shall outdo *hellish* hate—*Milton*> <burned them both with *hellish* mockery—*Shelley*> **Hadean**, **Tartarean**, and **stygian** are used in poetry in place of *infernal*, sometimes without any reference to the conception of Hades, Tartarus, and the Styx in classic mythology. Very frequently **Hadean** is a loose equivalent for *chthonian*, **Tartarean** suggests darkness and remoteness, **stygian** connotes bounds with no outlet for escape, but all three are without fixed content.

Ana *fiendish, devilish, diabolical, demonic: damnable, accursed, cursed, *execrable: nefarious, flagitious, iniquitous, villainous, *vicious

Ant supernal

infertile *sterile, barren, impotent, unfruitful

Ana *dry, arid: impoverished, exhausted, drained, depleted (see DEplete)

Ant fertile —*Con* fecund, fruitful, prolific (see FERTILE): producing or productive, bearing, yielding (see corresponding verbs at BEAR): reproducing, propagating, breeding, generating (see GENERATE)

infest, **overrun**, **beset** are comparable when they refer to disagreeable or noxious things and mean to make trouble because of their presence in swarms. Although **infest** carries only by suggestion the idea of annoyance or repugnance, since idiom does not require reference to the person so affected, the term is always derogatory <wild pigs invade the airfields: Crocodiles *infest* the rivers—*Michener*> <to poison vermin that *infest* his plants—*Cowper*> <the idle rich who at present *infest* the older universities—*Russell*> <police agents and provocateurs who *infested* the revolutionary movement—*Rolo*> **Overrun** is often interchangeable with *infest*, especially in the passive, but because it usually retains the implications of its basic sense it is the precise word when the idea of

running or spreading is to be conveyed (the cellar is *overrun* with mice) (the garden is *overrun* with weeds) (heavily wooded and *overrun* with flowers—*Amer. Guide Series: Mich.*) (conformity of belief has . . . *overrun* whole populations like a plague—*MacLeish*) (he found the East already *overrun* with refugee conductors—*Green Peyton*) *Beset* has usually the meaning to trouble through frequency and persistence, and often connotes assailing or attacking (he was *beset* by enemies on every side) (she hurried at his words, *beset* with fears—*Keats*) (the road is *beset* with dragons and evil magicians—*Costain*) (subject to none of the pressures that *beset* American and English papers—*Mott*)
Ana *teem, swarm, abound: harass, harry, pester, plague, *worry, annoy

infinite, **eternal**, **sempiternal**, **boundless**, **illimitable**, **uncircumscribed** mean having neither beginning nor end or being without known limits. **Infinite** especially as applied to God or his attributes implies immeasurability or an incapacity for being estimated in any conceivable respect (as duration or extent) (great is our Lord, and of great power: his understanding is *infinite*—*Ps* 147:5) (great are thy works, Jehovah! *infinite* thy power! what thought can measure thee, or tongue relate thee—*Milton*) In mathematical and scientific use the term usually stresses indeterminateness; often it implies that no limits can be set to which a thing does or may extend, or that no point at which it ends can be discerned; thus, the number of positive integers is *infinite* since no one can set a limit to the number that can be indicated; an *infinite* decimal is one (as a repeating decimal) that cannot be brought to a termination (the total number of stars is supposed, even by those who reject the idea of *infinite* extension, to run into thousands of millions—*Inge*) In more general use, *infinite* usually implies not only exceeding greatness or vastness but indefiniteness or seeming endlessness of extent (Chinese landscape [painting] is certainly pre-eminent . . . in suggesting *infinite* horizons, the look of mountains . . . melting away into remote sky—*Binyon*) (the Truth . . . is of necessity *infinite* and so is not for any poor finite creature like man—*Babbitt*) (the *infinite* ingenuity of man—*Webb*) **Eternal**, in its earliest and still prevailing sense, implies having neither beginning nor end in time; it is therefore applied chiefly to God, in the sense of being uncaused or uncreated and unending (the *eternal* God is thy refuge—*Deut* 33:27) But it may be applied with essentially the same meaning to things and especially to abstractions and concepts for which no beginning is known or under present conditions is discoverable, and for which no end can be foreseen or predicted (argue that matter is *eternal*) (the idea that the world is *eternal* is now seldom advanced) (the consideration of the general flux of events leads to this analysis into an underlying *eternal* energy—*Whitehead*) (the tradition that nature is ruled by hard, *eternal*, immutable laws—*Cohen*) In more general use *eternal* may be indistinguishable in meaning from *endless* and is then applied to things with a known or evident beginning but no ending or an ending infinitely remote or completely indeterminable (the Christian's hope of *eternal* life) (no *eternal* historical trend toward economic equality can be discovered—*Sorokin*) This sense is frequent in hyperbolic use in which it may imply either endless duration or constant recurrence often to the point of weariness or disgust (the *eternal* effort to discover cheap and agreeable substitutes for hard work—*Justice Holmes*) (the staircase door opened with

its *eternal* creak—*Bennett*) but it also applies to something which, though it changes in appearance, form, or method, never dies out (Macaulay, who has a special affinity for the *eternal* schoolboy—*Inge*) (princes were mortal, but the commonwealth *eternal*—*Graves*) **Sempiternal**, a bookish word, is an intensive of *eternal* with somewhat greater emphasis upon the continuity of the thing so described (all truth is from the *sempiternal* source of Light Divine—*Cowper*) (he did not really believe that infinity was infinite or that the eternal was also *sempiternal*—*Shaw*) but it is chiefly a hyperbolic term (dull dinners . . . with the *sempiternal* saddle of mutton—*Jekyll*) (the oldest, deepest (and seemingly *sempiternal*) controversy involves the definition of itself—*Hentoff*) **Boundless** implies little more than an apparent lack of restrictions or bounds, or a capacity for extending, expanding, or increasing indefinitely; it often applies to something which so far exceeds in range, measure, or amount what is usual for a thing of its kind that it staggers the mind (boundless wealth) (boundless impudence) (my bounty is as *boundless* as the sea—*Shak.*) (a *boundless* command of the rhetoric in which the vulgar express hatred and contempt—*Macaulay*) (this long and sure-set liking, this *boundless* will to please—*Housman*) In mathematical and scientific usage, *boundless* applies specifically to a surface or a space (as a closed curved line or a spherical surface) which has the property of permitting an object starting from any point in the space and proceeding by one mathematical law to return to the same point without being interrupted (the surface of a sphere is *boundless* but not infinite) **Illimitable** also stresses a lack of bounds or limits, and may be used in place of *boundless* (an *illimitable* appetite—*Stephen*) but it is often applied specifically to something (as a distance) that can theoretically be measured in extent but in actuality exceeds the capacity of human ingenuity or of human instruments for measurement or determination of extent (the heavens' *illimitable* height—*Spenser*) (the *illimitable* distances between the earth and the stars) **Uncircumscribed** implies the lack of a determinable limit in any conceivable direction; it applies to something that extends or expands or seems to extend or expand in all directions in the manner of radii from the center of a circle (*uncircumscribed* freedom) (so arbitrary and *uncircumscribed* a Power—*Charles I*) (the lighthouse symbol penetrates the novel with *uncircumscribed* power—*Robert Humphrey*)

inflated, **flatulent**, **tumid**, **turgid** mean filled with some-

thing insubstantial (as air or vapor). **Inflated** implies expansion by the introduction of something (as a gas) lacking in substance to the point where the walls are stretched taut or tension is evident <an *inflated* tire> <an *inflated* balloon> In its extended use *inflated* implies a stretching or expanding, often by artificial or questionable means, to a point not justified by reality or truth; thus, currency is said to be *inflated* when the amount in circulation far exceeds the amount normally necessary to meet the demands of trade and commerce; one's ego is said to be *inflated* when one is puffed up with self-confidence and pride not warranted by one's ability or achievements; a style may be described as *inflated* when it is far more pretentious or imposing than its subject matter warrants <a pretentious and *inflated* tract on feminism—*Menninger*> <caricaturing the *inflated* elegance of Eastern culture as represented in its refined fiction—*J. D. Hart*> **Flatulent** applies basically to persons or their organs when gases generating in the alimentary canal cause distention of stomach or bowels. In its extended use *flatulent* usually implies emptiness with the appearance of fullness or a lack of pith or substance <*flatulent* with fumes of self-applause—*Young*> <a score or two of poems, each more feeble and more *flatulent* than the last—*Swinburne*> <enthusiasts who read into him all sorts of *flatulent* bombast—*Mencken*> **Tumid** implies noticeable enlargement by swelling or bloating, especially as a result of an abnormal condition <my thighs grow very *tumid*—*Johnson*> <his face looked damp, pale under the tan, and slightly *tumid*—*Cozzens*> In its extended use *tumid* implies an abnormal or conspicuous increase in volume without a proportionate increase in substance and often suggests pretentiousness or bombast <to compare, in thy *tumid* pride, with me?—*Shelley*> <while Shakespeare, using great words on the lowlier subject, contrives to make them appropriate, with Burke, writing on the loftier subject, the same or similar words have become *tumid*—*Quiller-Couch*> **Turgid** is not always distinguishable from *tumid*; however, it is more often used when normal distention as distinct from morbid bloating is implied <healthy living cells are *turgid*> <woody tissue *turgid* with sap> Consequently, in extended use, especially as applied to literary expression or style, *turgid* often adds to *tumid* the connotation of unrestrained vitality or of undisciplined emotion, especially as manifest in bombast, rant, or rhapsody (see BOMBAST) <the effects . . . already . . . show in French architecture—which is growing repulsive—and in French prose—which is growing *turgid*—*Belloc*> In general, however, *turgid* may be used to describe anything that is not measured or restrained and perfectly in keeping with orderly thought <the *turgid* intricacies the modern foundation gets itself into in its efforts to spend its millions—*Dwight Macdonald*> <football . . . a *turgid* struggle of monolithic masses—*Thurber*>

inflection, intonation, accent are comparable when they designate a particular manner of employing the tones of the voice in speech. **Inflection** implies change in pitch or tone; it often suggests a variation expressive of emotion or sentiment, and, usually, a momentary mood <it was not her words, but her *inflection*, that hurt> <a slight *inflection* made one feel that one had received a great compliment—*Cather*> **Intonation** is often individual but it is seldom

thought of as the result of a mood; it is applied to the rise and fall in pitch that constitutes what is called "speech melody" and that distinguishes the utterance of one individual or group from another <a ministerial *intonation*> <we still write . . . for the actors, reckon upon their *intonations*, their gestures—*Quiller-Couch*> <that peculiar and pleasant *intonation* that marks the speech of the Hebridean—*Black*> In some languages (as Chinese), called "tone languages," fixed pitch, or *intonation*, distinguishes the various meanings of single words. In a more specific sense, *intonation* often (as *intone* always) implies reciting or speaking religious matter (as a psalm or a prayer) in a singing voice, usually in monotone <*intonation* of that majestic iambic verse whose measure would have been obscured by a rapid and conversational delivery—*Dickinson*> **Accent** denotes such manner or quality of utterance or tone as may distinguish a particular variety of speech (as one peculiar to a person, race, district, or class) <a Southern *accent*> <a Parisian *accent*> <speak with a refined *accent*> Like the other terms in this group, it often suggests, and sometimes indicates, the speaker's feelings <a different *accent* was notable in Joseph's voice when he spoke of Azariah—*George Moore*>

2 **Inflexible, inexorable, obdurate, adamant, adamantine** mean not to be moved from or changed in a predetermined course or purpose. All are applicable to persons, decisions, laws, and principles; otherwise, they vary in their applications. **Inflexible** usually implies firmly established principles rigidly adhered to; sometimes it connotes resolute steadfastness, sometimes slavish conformity, sometimes mere pigheadedness <society's attitude toward drink and dishonesty was still *inflexible*—*Wharton*> <a morality that is rigid and *inflexible* and dead—*Ellis*> <arbitrary and *inflexible* rulings of bureaucracy—*Shils*> **Inexorable**, when applied to persons, stresses deafness to entreaty <more fierce and more *inexorable* far than empty tigers or the roaring sea—*Shak.*> <our guide was *inexorable*, saying he never spared the life of a rattlesnake, and killed him—*Mark Van Doren*> When applied to decisions, rules, laws, and their enforcement, it often connotes relentlessness, ruthlessness, and finality beyond question <nature *inexorably* ordains that the human race shall perish of famine if it stops working—*Shaw*> It is also often applied to what exists or happens of necessity or cannot be avoided or evaded <*inexorable* limitations of human nature> <*inexorable* destiny> <you and I must see the cold *inexorable* necessity of saying to these inhuman, unrestrained seekers of world conquest . . . "You shall go no further"—*Roosevelt*> **Obdurate** is applicable chiefly to persons and almost invariably implies hardness of heart or insensitiveness to such external influences as divine grace or to appeals for mercy, forgiveness, or assistance <if when you make your prayers, God should be so *obdurate* as yourselves, how would it fare with your departed souls?—*Shak.*> <the *obdurate* philistine materialism of bourgeois society—*Connolly*> **Adamant** and **adamantine** usually imply extraordinary strength of will or impenetrability to temptation or entreaty <Cromwell's *adamantine* courage was shown on many a field of battle—*Goldwin Smith*> <when Eve upon the first of men the apple pressed with specious cant, O, what a thousand

influence *n* **Influence, authority, prestige, weight, credit** are comparable when they mean power exerted over the minds or acts of others either without apparent effort or as the result of the qualities, the position, or the reputation of the person or thing that exerts this power. **Influence** suggests a flowing from one thing into another of something imperceptible or impalpable; this connotation is retained when the word implies the effect or effects which one person or thing insensibly has on another or the ascendancy which one person or thing similarly acquires over another (he was not strong enough to resist the *influence* of bad companions) (we find primitive men thinking that almost everything . . . can exert *influence* of some sort—*James*) (as provost of the Swedish clergymen he exercised a quickening *influence* over all the Swedish congregations—*Genzmer*) However *influence* often loses this implication of insensible or unconscious operation and suggests instead the conscious use of personal power or, sometimes, of underhanded means to determine the acts of another; in this sense it often follows the verb *use* or one of its synonyms (use undue *influence* over a person making a will) (used his *influence* in getting a bill through a legislature) **Authority** originally was applied to one (as a preacher, teacher, or writer) or to writings or utterances having the power to compel belief or to win acceptance. In such cases the word usually imputed great learning, great wisdom, or divine inspiration to the person or his work (by turning o'er *authorities*, I have . . . made familiar to me . . . the best infusions that dwell in vegetables, in metals, stones—*Shak.*) This sense persists and *authority* is still applicable to a person or publication that is able or qualified to gain credence or to inspire belief in its authoritativeness (do not cite this historian; he is not an *authority*) (an economist should form an independent judgment on currency questions but an ordinary mortal had better follow *authority*—*Russell*) (scholars who held that Cicero was an unchallengeable "*authority*"—*Hight*) From this use mainly, but also from its other sense (see POWER 3), *authority* has come to be applied also to the power resident in a person or thing that is able because of his or its inherent qualities to win the devotion or allegiance of men and to gain rather than exact their obedience and belief (a book of manifest *authority*) (that personal *authority*, which, far more than any legal or constitutional device, was the true secret of his later power—*Buchan*) (a doctrine that has acquired *authority* in our own time—*Alexander*) (some of the new philosophies undermine the *authority* of science, as some of the older systems undermined the *authority* of religion—*Inge*) (to face a good orchestra with inward and outward *authority* and assurance—*Burk*) **Prestige**, in contrast with *authority*, implies the power to gain ascendancy over the minds of men and to command their admiration for distinguished and superior performance, or for conspicuous excellence in its kind (nothing more affects the *prestige* of a power than its dramatic and rapid defeat in the field—*Belloc*) (the almost magical *prestige* that had belonged to the original humanists—*Huxley*) (such lustre—or *prestige* or mana—as individual writers possess—*Times Lit. Sup.*) **Weight** denotes measurable influence, especially in deter-

mining the acts of others (Mrs. Hawthorne's authoritative air was beginning to have some *weight* with him—*Archibald Marshall*) (men who take the lead, and whose opinions and wishes have great *weight* with the others—*Frazer*) **Credit** (see also BELIEF 1) denotes influence that arises from one's reputation for inspiring confidence or admiration (Buckingham . . . resolved to employ all his *credit* in order to prevent the marriage—*Hume*) (as it [the ballet] declined as an art, so also it declined in *credit* and in popularity; it became scarcely respectable even to admire dancing—*Ellis*)

inform *vb* 1 **Inform, animate, inspire, fire** are comparable when they mean to infuse (a person or thing) with something (as a spirit, a principle, an idea, or a passion) that gives him or it effective power or an urge to action or activity. Sometimes, especially in the last three words, the idea of driving or actuating is so strong that it becomes their common denotation and the idea of infusion is merely a common connotation. To **inform** is to give character or essence to or to so permeate as to become the characteristic, peculiar, essential, and often abiding, quality of (the inspiration of religion passed on to *inform* and subtly to perfume an art nominally concerned with the aspects of earth and sky, wild creatures and wild flowers—*Binyon*) (everything that is made from without and by dead rules, and does not spring from within through some spirit *informing* it—*Wilde*) (sentimental, Protestant ethos that has always *informed* his writing—*Fiedler*) To **animate** is to endow with life, a vital principle, or an impulse to action. Although *animate* is often used where *inform* is also possible, it suggests, far more than *inform*, vitality and living energy (religion . . . which is *animated* . . . by faith and hope—*Johnson*) When what is affected is a person or when motivation of action or transiency of impulse is to be implied, *animate* is the more precise word (he was *animated* with love for all men) (when the community is *animated* with anger against some heinous offence—*Alexander*) (his hatred of restraint *animated* his resistance to authority) To **inspire** is to communicate to a person, as if by breathing into him, power or energy in excess of what he believes to be his own. The word usually implies both the operation of a supernatural power or of some inexplicable agency and such an effect as a spiritual illumination, or a quickening of intellectual or imaginative activity, or an exaltation of feeling (great artists know or believe that they are *inspired* from something outside themselves—*Alexander*) (that sublimated language used by the finest minds in their *inspired* moments—*Hudson*) (we climb the mountains for their views and the sense of grandeur they *inspire*—*Jefferies*) *Inspire* may also imply indirect rather than inexplicable influence, methods, or source (as in imparting knowledge or arousing a feeling (teachers should *inspire* their pupils to work hard) (today's editorial on the mayor's policy was certainly *inspired*; it does not represent the editor's views but those of someone in power) To **fire** is to animate or inspire so powerfully that one is inflamed with passion, ardor, or enthusiasm (one step beyond the boundary of the laws *fires* him at once in Freedom's glorious cause—*Cowper*) (O how they *fire* the heart devout—*Burns*)

2 Inform, acquaint, apprise, advise, notify are comparable when meaning to make (one) aware or cognizant of something. One **informs** a person of something when one imparts knowledge, particularly of occurrences or of facts necessary to the understanding of a situation (*inform* a person of his success in a competition) (the radio announcer *informed* his audience of the accident) (kept the staff *informed* of Chinese public opinion concerning the American military action there—*Current Biog.*) Also, one *informs* oneself when by study or investigation one gathers the pertinent facts (his obligation as a citizen is to *inform* himself . . . regarding the controversial issues—*Houston*) **Inform** in one specific use also carries the implication of talebearing or accusation (I shall not *inform* upon you. It is not my business—*Wilde*) One **acquaints** a person with something when by introducing him to the experience of it or by imparting information concerning it one makes him familiar with it (in the first meeting of the class, the teacher *acquainted* his pupils with the program of study) (to *acquaint* people with information instead of just telling it to them—*Gowers*) Familiarity is even more strongly implied in the participial adjective *acquainted* (the explanation . . . is clear enough to anyone *acquainted* with the history of Puritan thought—*Parrington*) (a man of sorrows, and *acquainted* with grief—*Isa* 53:3) One **apprises** a person of something when by a message or sign one communicates it to him (he has *apprised* his employer of his intention to resign) (I made up my mind to send the waiter to . . . *apprise* him that I was there—*Mary Austin*) One **advises** a person of something when one gives him information about it, especially of a kind that is important to him (as in making a decision, determining a policy, or arranging plans) (the president asked to be kept *advised* of changes in public sentiment) (consulted the wine card and *advised* me that the wine I had chosen had no special merit—*Lovett*) Often there is a suggestion of forewarning or counsel (see also *advise* under ADVICE 1) (the passengers were *advised* of the risk before the vessel left New York) (against which a solemn trespass board *advised* us—*Mary Austin*) One **notifies** a person of something when one sends a notice or formal communication concerning it, usually as a matter requiring his attention (*notify* students of a change in the date of opening college) (the court clerk promised to *notify* the witnesses when to appear) In commercial use, *advise* is used in preference to *notify* when information is given by letter, telegram, or cable (please *advise* us when the shipment is made)

infrequent, uncommon, scarce, rare, occasional, sporadic are comparable when they mean appearing, happening, or met with so seldom as to attract attention. Something is **infrequent** which does not occur often, especially within a given period of time, or which does not recur except at very wide intervals of time or of space (tornadoes are *infrequent* in New England) (far from being *infrequent*, the crystalline state is almost universal among solids—*Darrow*) (*infrequent* pines dot the forest) (though it was

inhabitant, denizen, resident, citizen are comparable when meaning one whose home or dwelling place is in a definite location. **Inhabitant**, the least specific word, implies nothing more than an abode in a given place <in 1940 the city had 243,718 *inhabitants*> <certain disagreeable *inhabitants* of open impounded water supplies, known as algae—*Morrison*> **Denizen** denotes one that belongs by birth or naturalization to a given locality <*denizens* of the deep> <winged *denizens* of the crag—*Scott*> <as if the old *denizens* of the forest had been felled with an axe—*Maury*> Even when substituted in literary use for *inhabitant*, *denizen* retains something of its own flavor of belonging to the locality by birth or naturalization <jaded and oversophisticated *denizens* of towns—*Lowes*> **Resident** is not always clearly distinguished from *inhabitant*, especially when a town or city, as distinguished from a state or country, is in question. Often the term implies nothing more than tenancy of a room, an apartment, a house, or a locality for a considerable length of time <the summer *residents* of Bar Harbor> Often, in the case of a person who has several residences or who lives mainly in a place other than the one regarded as his home, the term suggests not permanent inhabitation but legal recognition of one of these places as his domicile, and as the seat of his fundamental legal rights (as of voting) and responsibilities (as of paying income tax) <proof that the multimillionaire was a *resident* of Massachusetts brought several million dollars in inheritance taxes to that state> <are the students at this college considered *residents* of the town and entitled to vote in town matters?> In reference to a country, *resident* is more usual than *inhabitant* as a designation of an alien living in that country for a time and regarded as subject to certain taxes (an alien actually present in the United States who is not a mere transient or sojourner is a *resident* of the United States for purposes of the income tax—*Income Tax Regulations, U. S.*) **Citizen** when denoting a person that is an inhabitant is rarely wholly free from its political sense (see CITIZEN 2); hence, it usually carries some suggestion of membership in, as distinct from mere presence in, a community and of possession of the privileges and obligations inherent in such membership. It is particularly applicable to an adult and substantial resident of a city or town <no mere pedant, but a leading *citizen* of the town, serving as justice of the peace and as its first postmaster—*Starr*> <the body of *citizens* or those who were members of the

city and entitled to take part in its political life—*Sabine*)
inherent, **ingrained**, **intrinsic**, **essential**, **constitutional** mean being a part, element, or quality of a thing's internal character or inmost being. Something is **inherent** which is so deeply infixed in a thing that it is apparently part of its very nature or essence (certain *inherent* and indestructible qualities of the human mind—*Wordsworth*) (is the inferiority of the modern to the ancient languages, as a means of mental discipline, *inherent* in these tongues, or does it arise from causes that can be overcome?—*Grandgent*) Something is **ingrained** which seems to be wrought into the fiber or texture of a person's being (ingrained prejudice) (attributable rather to the ingrained law-abidingness of the people than to the perfection of the Paris police system—*Brownell*) (her deeply ingrained habit of never letting herself go—*H. G. Wells*) Something is **intrinsic** which belongs to or is a property of a thing itself, as considered apart from all the external relations, connections, or conditions that affect its usefulness, value, or significance (when the subject has no *intrinsic* dignity, it must necessarily owe its attractions to artificial embellishments—*Johnson*) (the knowledge of geographical facts is useful, but without *intrinsic* intellectual value—*Russell*) Something is **essential** (see also **ESSENTIAL** 2, **NEEDFUL**) which is an element of a thing's essence and therefore indissolubly involved in its very nature or being (certain *essential* differences between verse and prose—*Quiller-Couch*) (that *essential* sweetness of the moor, born of the heather roots and the southwest wind—*Galsworthy*) (has not shown that the merits of puritan thought are *essential* and the defects accidental—*M. G. White*) Something is **constitutional** which is inherent in the fundamental makeup of the body or mind (a *constitutional* infirmity) (his vigor is *constitutional*) (thoughtful ones will assure you that happiness and unhappiness are *constitutional*, and have nothing to do with money—*Shaw*) (a *constitutional* optimist, emotionally addicted to the view that any adventure into the unknown is worth the risk—*Garvin*)

initial *adj* **Initial**, **original**, **primordial** can all mean existing at or constituting the beginning or start of a thing, especially of a thing that gradually assumes shape or form or that manifests itself in many ways. Nevertheless, in spite of this agreement in meaning, the words are rarely interchangeable, usually because of additional and differing implications, but often also because of the determination of their use by idiom. **Initial**, in general, is used in reference to things seen as a whole, often in fact but sometimes in thought; the term, therefore, usually implies an end or completion (the *initial* letter of a word) (the *initial* stage of a disease) (an aggressor nation would always have the *initial* advantage—*Dean*) (the great incentive to effort, all through life, is experience of success after *initial* difficulties—*Russell*) **Original** (see also **NEW**) is used especially with reference to what is the very first in order or constitutes the ultimate beginning or source; in this sense it usually connotes the idea of being underived or unimitated and implies that there is nothing from which the *original* thing has sprung. A court that has *original* jurisdiction has the right to try a cause to determine both the facts and the application of the law to them, as distinguished from a court with appellate jurisdiction. "*Original sin*" was committed by Adam and Eve as the first human beings but, in theological use, the phrase also means that sin as its leaves its traces upon every human being (great books are *original* communications. Their authors are communicating what they themselves have discovered—*Adler*) Sometimes, however, *original* means something more specific; thus, the *original* owner of a piece of land would strictly be the one who first held it by a natural or legal right, but in legal interpretation the phrase may be used of an earlier owner when successive owners are mentioned; an author's *original* work may be the work first produced by him, but more often it means (without regard to order of writing) a work independently conceived and executed by him (an *original* print is not, of course, *original* in the same sense as a painting. With a painting there is only one true original, whereas there may be as many as 50 or 75 originals of a given print—*Cain*) **Primordial** (see also **PRIMARY**) is comparable with *initial* and *original* through its implied reference to what forms the actual beginning or starting point or the earliest form taken by something that follows a course, an evolution, a progression, or an unfolding (speculate on the nature of the *primordial* universe) (the *primordial* mind) (the new discoveries . . . strongly support the theory that the universe has been expanding ever since a *primordial* explosion in which it was born—*Walter Sullivan*)

—*T. H. Huxley* <initiate a new reporter into the secrets of successful news gathering> **Induct** may often be used in place of *initiate*, especially when introduction under guidance is also implied <induct a person into the duties of a new position> <induct a draftee into the army> But *induct*, as well as *inaugurate*, *install*, and *invest*, may imply a formal or ceremonious endowing of a person with the powers and prerogatives of an office or post <induct the new governor of a colony> *Induct* is used technically of clergymen who are put in possession of a benefice or living, or of officials who are established in their office with appropriate rites or ceremonies <induct the new rector of a parish> <the new superintendent of schools was inducted into office at last night's meeting of the board of education> **Inaugurate** (see also **BEGIN**) usually implies more formal and dignified ceremonies and much more publicity than *induct* <inaugurate the president of the United States> <inaugurate the new president of the university> **Install** implies induction into an office associated with a seat <install the officers of a society> <install a bishop as the archbishop of his new diocese> The term also may be used in reference to persons who are formally or comfortably seated <install the guest of honor in the most comfortable chair> <install the tottering old lady in a chair by the fireside> It is also the only one of these terms which may be used in reference to things as well as to persons <install new machinery in a factory> <install electric light fixtures> **Invest** usually suggests a clothing with the robes or other insignia of an office and, by extension, with the powers of that office. injure, harm, hurt, damage, impair, mar, spoil all mean to affect someone or something so as to rob it of soundness, strength, or perfection or to reduce its value, usefulness, or effectiveness. **Injure** in its earliest and still frequent sense means to do an injustice to or to wrong another (as by robbing him of his good name or of a rightful possession); in this sense it often suggests intent or knowledge on the part of one that injures <when have I injured thee? when done thee wrong?—*Shak.*> <another injured burgher speaking of their forfeited rights—*Cloete*> The verb may also imply the infliction not of injustice but of something detrimental to one's appearance, health, success, or comfort <a bullet injured his eye> <industrialism has been very injurious to art; may it not have injured religion also?—*Inge*> <has to withhold information the release of which might injure the national security—*Mott*> **Harm** is more specific than *injure* in stressing the infliction

The inexperienced little wife apprehended no *harm* in his visits—*Meredith*> <the men were terrified of Yusuf's cruelty, and wanted to retreat out of *harm's* way—*Forester*> **Mischief** carries a stronger reference to the person or thing that works harm or is capable of inflicting injury; it applies either to the harm or injury that results from an agent or agency <one failure led to another, suspicion became general, and the *mischief* was done—*Todd*> <that's the *mischief* of the Modernists . . . injustice, injury, wrong, grievance are comparable when they denote an act that inflicts undeserved damage, loss, or hardship on a person. **Injustice** is the general term applicable not only to an act which involves unfairness to another or a violation of his rights <class privileges which make *injustices* easy—*Spencer*> <the *injustices* that angered him were never quite genuine—*Mailer*> but, as a collective noun, to all acts which come under this description <he flamed out against *injustice* because he was a lover of justice—*Perry*> <the appropriate attitude toward prejudice and *injustice* and cruelty is indignation—*Hicks*> **Injury** applies to an injustice to a person for which the law allows an action to recover compensation or specific property, or both <every person who suffers damage to his person, his property, or his reputation as a result of an infringement of the law suffers a legal *injury*—*Rubinstein*> **Wrong** is, in law, a more general term than *injury* for it applies not only to all injuries as just defined (*private wrongs*) but to all misdemeanors or crimes which affect the community (*public wrongs*) and which are punishable

according to the criminal code. But in general use *wrong* differs little from *injustice*, except in carrying a stronger connotation of flagrancy or of seriousness <we are . . . steel to the very back, yet wrung with *wrongs* more than our backs can bear—*Shak.*> <so many were the *wrongs* that were to be righted, the grievances to be redressed—*Muggeridge*> **Grievance** applies to a circumstance or condition that, in the opinion of those affected, constitutes a wrong or that gives one just grounds for complaint <they sent to the king a statement of their *grievances*—*Keightley*> <in an early state of society any kind of taxation is apt to be looked on as a *grievance*—*Freeman*> **Ana** damage, hurt, harm, mischief, *injury; infringement, trespass, transgression, violation, infraction, *breach; unfairness, inequitableness (see affirmative adjectives at FAIR)

innate, inborn, inbred, congenital, hereditary, inherited are comparable but not wholly synonymous terms that refer to qualities which either are or seem to be derived from one's inheritance or from conditions attending one's birth or origin. **Innate** and **inborn** are often used without distinction. But **innate** (opposed to **acquired**) is frequently synonymous with **inherent, essential, or constitutional**, and then tends to apply to qualities, characters, or elements that are not inherited but belong as part of the nature or essence to something imbued with life <**innate** ideas exist in the mind as a result of its constitution and are therefore found wherever a mind exists> <I do not believe that a sense of justice is **innate**, but I have been astonished to see how quickly it can be created—*Russell*> <this stubbornness has been explained as being **innate** in the Germans, as a natural racial cussedness. But some of the stubbornness is not **innate** but **acquired**—*Wood*> **Innate** also may apply to elements or qualities (as virtues or defects) which arise out of the very nature or character of a thing that has no life and therefore literally no birth <the **innate** defect of this plan> <the **innate** magnetism of the proton—*Davis*> <the **innate** tendency of a dictatorship to overreach itself> On the other hand, **inborn**, which is frequently synonymous with **natural** or **native**, retains more specific reference to what is actually born in one or is so deep-seated as to seem to have been born in one; the term is therefore usually applied to qualities or characters that are peculiar or distinctive, sometimes to the type, often to the individual <**inborn** aptitudes> <the tendency towards schizophrenia was **inborn**—*N. Y. Times*> <his **inborn** ability to sing> <an **inborn** love of country life> **Inbred** implies reference to breeding, or to the processes concerned with the generation, nourishment, and rearing of offspring; the term therefore is more readily applied to what is deeply rooted or ingrained as a result of one's immediate parentage or the circumstances attending one's earliest education or training than to what is constitutional or merely natural <an **inbred** love of freedom> <an **inbred** feeling of superiority> <those **inbred** sentiments which are . . . the true supporters of all liberal and manly morals—*Burke*> <a methodical man, an **inbred** Yankee—*White*> **Congenital** applies chiefly to something which dates from the birth or inception of the individual concerned <**congenital** hip disease> <**congenital** blindness> <the theory that what was acquired habit in the ancestor may become **congenital** tendency in the offspring—*James*> <yet art for art's sake suffers from a **congenital** disease; it professes to create substance out of form, which is physically impossible—*Santayana*> Both **hereditary** and **inherited** apply to a result of natural heredity <an **inherited** hearing defect> <unless he had the **hereditary** dispositions which he has, he would not behave the way he does—*Pap*> or some-

times of social heredity <the reciter who might graft on to an *inherited* body of literature a few embellishments of his own—*Lerner & Mims*> <several *hereditary* enemies of the Olivares brothers—*Cather*> In technical biological use *congenital* and *hereditary* are clearly distinguishable, for *congenital* implies presence at birth (as of a disease or an organic defect) from whatever cause and *hereditary* implies transmission (as of a tendency, a weakness, or a quality) from an ancestor through the chromosomal mechanism and DNA <a birthmark is a *congenital* blemish of the skin> <the color of the eyes is *hereditary*> *Ana* constitutional, *inherent, intrinsic, essential, ingrained: *instinctive, intuitive: natural, typical, *regular, normal: *native, indigenous

inner, **inward**, **inside**, **interior**, **internal**, **intestine** are comparable when they mean being or placed within something. Although in many cases interchangeable, they are more or less restricted in their applications and therefore clearly distinguished in their implications. **Inner** typically applies to something far within or near the center <thrust them into the *inner* prison—*Acts* 16:24> <an *inner* room> <the *inner* bark of a tree> while **inward** typically applies to something directed within or toward the center <the *inward* curve of a scroll> Both words apply also to the mental or spiritual, frequently with the added implication of something intimate, secret, or inaccessible <the sense by which thy *inner* nature was apprised of outward shows—*Shelley*> <outer events only interest me here insofar as they affected my *inner* life—*Ellis*> <with an *inward* smile she remembered Spandrell's summary—*Huxley*> <the *inward* struggle of the heroes to find their own truth—*Rees*> **Inside** is used chiefly of spatial relations <an *inside* seat> <the *inside* track> but it may be used with reference to persons who are so placed in their work or who have such contacts that they may be said to be figuratively *inside* a place or group; thus, *inside* work implies a contrast with field or road work; *inside* knowledge of a negotiation implies participation to some extent in that negotiation <have *inside* information of what is going on in a club> **Interior** and **internal** usually suggest more abstract or technical and less intimate relations than **inner** and **inward**. **Interior** frequently implies contrast with the outer limits of the thing itself; thus, the **interior** features of a country are by implication opposed to those of the coast or boundaries; **interior** decoration deals with the decoration and furnishing of the inside of a house or other building rather than with its outside; one's **interior** life is one's life as expressed in thoughts and aspirations rather than in outward activities. **Internal** implies contrast with something beyond or outside of the outer limits of a thing; thus, **internal** evidence of a poem's authorship is gained from a study of the poem itself rather than from outside sources; the **internal** affairs of a country are its domestic, as opposed to its foreign, affairs; **internal** medicine is that branch of medicine dealing with the diagnosis and treatment of diseases affecting the internal organs (as the heart, lungs, stomach, and liver). **Intestine** is a close synonym of **internal** used specifically of what may otherwise be described as *domestic* or *civil* (as opposed to *foreign*) with, however, the connotation of an evil or mischievous origin or nature <misgovernment and foreign and *intestine* war occasioned the neglect . . . of these works—*Lord*> <a coalition . . . was paralyzed from the start by *intestine* quarrels—*Current History*>

inquiry, **inquisition**, **investigation**, **inquest**, **probe**, **research** all mean a search for truth, knowledge, or information. **Inquiry** is the most general of these terms, applicable to such search regardless of the means (as questioning, observation, or experimentation) used or of the end in view <make *inquiries* about a sick friend> <the passion for pure knowledge is to be gratified only through the scientific method of *inquiry*—*Eliot*> <witnesses convicted of contempt of Congressional *inquiries*—*Current Biog.*> <legislative *inquiry* into the acts of a man or group of men—*Thomas*> <a primitive but effective police *inquiry*—*T. down of something that one hopes to discover or needs to know (a strong movement to make American universities centers of scholarly work and scientific *investigation*—*Conant*) (an *investigation* of the causes of the prolonged depression) (the bank never employs a clerk or teller without an *investigation* of his habits and record) **Inquest** applies chiefly to a judicial or official inquiry or examination especially before a jury, and specifically to one conducted by a coroner and jury in order to determine the cause of a death (when the rumors of murder became rife, the body was exhumed and an *inquest* held) In more general use, the term usually applies to an investigation that has some of the characteristics of a coroner's inquest (as the exploration of the grounds for an accusation or suspicion in relation to some disastrous or troubling event) (an *inquest* on the fall of Singapore and the sinking of H. M. S. *Repulse* and H. M. S. *Prince of Wales*—*New Yorker*) **Probe** applies to an investigation that searches deeply and extensively with the intent to determine the presence or absence of wrongdoing; it suggests methods of exploration comparable to a surgeon's probing for a bullet (a legislative *probe* of banking activities) (another *probe* would result merely in a reshuffle in police and political circles—*Newsweek*) **Research** applies chiefly to an inquiry or investigation which requires prolonged and careful study, especially of actual conditions or of primary sources of information. It is especially applicable to scholarly and creative inquiries or investigations (as by scientists, historians, or linguists) especially for the sake of uncovering new knowledge, of getting at the facts when these are not known, or of discovering laws of nature (basic *research* in science is concerned with understanding the laws of nature—*Grainger*) (<*research* is a creative activity engaged in by talented human beings—*Leedy*) but it may sometimes be used for a study leading to the writing of a résumé of facts or laws already known (<*research* has shown and practice has established the futility of the charge that it was a usurpation when this Court undertook to declare an Act of Congress unconstitutional—*Justice Holmes*) or even for quite casual or trivial investigations (I . . . managed to get involved in a highway accident. insane, mad, crazy, crazed, demented, deranged, lunatic, maniac, non compos mentis are comparable in their general or nontechnical senses (for senses of corresponding nouns used technically see INSANITY) and as meaning afflicted by or manifesting unsoundness of mind or an inability to control one's rational processes. **Insane** as applied to persons usually implies such unsoundness of mind that one is unable to function safely and competently in ordinary human relations, usually does not recognize one's own condition, and is not responsible for one's

actions (adjudged *insane* after a period of observation) (an extreme antisocial, perverted personality whose reactions differ widely from the normal, but are not necessarily to be classified as *insane*—*Foulkes*) In more general use *insane* implies utter folly or irrationality; the person or the act or utterance so described is, by implication, governed by blind passion or senselessness (the *insane* ambition and insatiable appetite which have caused this vast . . . war—*Sir Winston Churchill*) (dumbfounded by the *insane* assault—*Al Newman*) (now that wars . . . have become far more horrible and . . . *insane*—*Inge*) **Mad** usually implies more frenzy than *insane* and therefore carries a stronger suggestion of wildness, rabidness, raving, or complete loss of self-control (O, let me not be *mad*, not *mad*, sweet heaven! Keep me in temper: I would not be *mad*!—*Shak.*) (he's *mad*. He always was. But he's worse than *mad* now. He's possessed—*Graves*) (he has fallen in love . . . with a stupid cocotte who has begun by driving him *mad* with jealousy—*Edmund Wilson*) **Crazy** often suggests such mental breakdown as may result from illness or old age (he has gone *crazy*) (we will bestow you in some better place, fitter for sickness and for *crazy* age—*Shak.*) (<"Stuff!" exploded the Doctor. "You're not *crazy* and you never were and you're not going to be, unless you keep on making such a commotion about nothing"—*Nancy Hale*) or it may suggest a distraught or wild state of mind induced by some intense emotion (as anxiety, grief, joy, desire, or excitement) (works fine, but goes *crazy* if she hears Murdoch's voice—just sweats and trembles all over—*Gerald Beaumont*) (she was *crazy* with desire for sleep—*Ruth Park*) (somebody had shot a squirrel and he took on about it as though he had lost a child. I said then he was *crazy*—*Anderson*) As applied to such things as schemes, projects, or notions *crazy* usually suggests that they are the product of a disordered or ill-balanced mind (no educated Socialist believes such *crazy* nonsense—*Shaw*) (who would pay such a *crazy* price for a book) **Crazed** is often used in place of *crazy* when a temporary disorder, usually with a specific cause, is implied (crazed with grief) (they were *crazed* by the famine and pestilence of that last bitter winter—*Amer. Guide Series: Wash.*) **Demented and deranged** are more formal than the preceding words and less rich in connotations; both terms, moreover, imply a change from mental soundness to unsoundness, *demented* usually suggesting clear signs (as profound apathy or incoherence in thought, speech, or action) which indicate deterioration of the mental powers (there was now no doubt that the sick man was *demented*) (the great part of the German army in the early stage of the war was really an army of *demented* civilians—*H. G. Wells*) (apparently not clearly *demented* until after 1818, he was for years dangerously near the border of insanity—*Amer. Guide Series: Va.*) and *deranged* (compare *derangement* under ABERRATION 2) suggesting a loss of mental balance or a state of mental disorder resulting from a functional disturbance of the brain or nervous system (he was temporarily *deranged* by the shock) (in our culture a person who falls sick, hears voices, communicates with shadows, and acquires special abilities from them is inevitably classed as *deranged*—*Kroeber*) **Lunatic** is approximately the equivalent of *insane* but is less frequently applied to persons and may imply no more than extreme folly (consuming with *lunatic* speed the assets of the earth—*Agar*) **Maniac** comes closer to *mad*, for it commonly connotes violence, fury, or raving (the *maniac* rage of the multitude) (the *maniac* dreamer; cruel . . . is he with fear—*Shelley*) **Non compos mentis** (Latin for "not sound of mind") is a legal term which specifies a state, but does not

define the particular condition or kind, of mental unsoundness. It is often used, especially in its shortened form *non compos*, more generally with similar indefiniteness (Baron's *non compos*. Lear controls him completely—*Kenneth Roberts*)

Ant sane —**Con** sensible, judicious, *wise, sapient, prudent

insanity, lunacy, psychosis, mania, dementia are the leading general terms denoting serious mental disorder. **Insanity** as a technical term belongs to law rather than to medicine. It is used to cover a wide variety of mental disorders, all of which have in common one characteristic—an unfitting of the afflicted individual to manage his own affairs or perform his social duties. Mental deficiency and delirious conditions are usually excluded, the former as in-born and not acquired, the latter as temporary and not long-lasting. Since in law a person's sanity or insanity becomes an issue when he is charged with a crime or when his legal capacity to make a will or contract or to transfer property is questioned, proof of insanity is tantamount to proof of his inability to act rationally and to understand the nature of his act and its natural consequences in affecting his rights, obligations, and liabilities. In general use *insanity* is commonly distinguished from *mental deficiency* and from *neuroses* and is applied to disorders involving unsoundness or derangement of mind. **Lunacy** in general use often applies to insanity manifested in spells of madness and fury or interrupted by intervals of lucidity (Cervantes's hero was led into amiable but disastrous *lunacy* by a belated obsession with the literature of chivalry—*Muggeridge*) (it's the tangle of good and badness; it's the *lunacy* linked with sanity makes up, and mocks, humanity!—*Stringer*) **Lunacy** sometimes is used interchangeably with *insanity* in law (a *lunacy* commission) (filed a *lunacy* petition against the attorney general so that a court could pass on his mental condition—*Time*) **Psychosis** is the psychiatric term for a profound disorganization of mind, personality, or behavior resulting from an individual's inability to cope with his environment. Though in content often coextensive with *insanity* or *lunacy* it carries none of the special implications of these two terms. **Mania** (for fuller treatment see MANIA 2) denotes a phase marked by sustained and exaggerated elation, excessive activity (as in emotional expression or physical action), or delusions of greatness that characterizes certain psychoses. **Dementia** implies a marked decline from a former level of intellectual capacity often accompanied by emotional apathy and is applicable to most psychoses that involve organic deterioration, not only those manifesting themselves in spells of excitement but those manifesting themselves in apathy, depression, flightiness, or personality disintegration.

inscription, legend, caption are comparable when they mean something written, printed, or engraved (as on a coin or a medal or under or over a picture) to indicate or describe the purpose or the nature of the thing. **Inscription** may apply to something written or printed, but it more often applies to something engraved, incised, or impressed on some hard surface (as stone, bronze, or silver); the word often carries an implication of durability or of permanence that is lacking, usually, in the others, and therefore often suggests a statement that has been framed or selected with care (the *inscription* on a monument) (the bronze tablet has the following *inscription*) (some god direct my judg-

ment! Let me see; I will survey the *inscriptions* back again. What says this leaden casket? "Who chooseth me must give and hazard all he hath"—*Shak.*) A **legend** (see also MYTH) is basically a very short inscription (as on a coin, a medal, or a heraldic shield) that is a motto or a statement of an aim, an ideal, or a guiding principle (the *legend* "In God we trust" is found on all coins of the United States of America) (the *legend* on the Victoria Cross is "For Valour") The term is also used for the printed statement giving the title or a brief description or explanation of an illustration or diagram (as in a textbook or a work of reference) (according to the *legend*, this illustration is that of "A Roman legionary") **Caption** basically applies to a heading or title (as of a document, an article, a chapter, or a section) (an editorial under the *caption* "Where are we headed?") (the stories have appeared in a running series under the *caption* of "The Adventures of Brigadier Gerard"—*N. Y. Evening Post*) But the implication of a catching or arresting quality in the title is often evident, and *caption* may refer to a title or name given a story, an article, or an illustration that is designed to seize the attention of the reader (delighting the readers of the *Athenaeum* with the treasures of his . . . reading, under the *caption*, "A Budget of Paradoxes"—*Grosart*) The term *caption* is also used interchangeably with *legend* for the printed statement describing or explaining a picture or illustration (a diagram of a motor with all the working parts explained in the *caption*) (under each [picture] was an appropriate *caption*, such as Surprise, Grief—*S. E. White*) **Caption** is also used in motion pictures for any of the brief statements or bits of dialogue thrown on the screen to explain the scenes of a silent motion picture or of a sound motion picture in which the actors speak in a foreign language.

insensible 1 **Insensible, insensitive, impassible, anesthetic** mean unresponsive to stimuli or to external influences. **Insensible** usually implies total unresponsiveness, and therefore unawareness or unconsciousness such as may result from blunted powers of sensation, obtuseness of mind, apathy, or complete absorption in something else (he also warned me against X, a local professor of history, as a man full of prejudice and quite *insensible* to evidence—*Laski*) (so engrossed in his work that he was *insensible* of the flight of time) (men have a keener relish for privileges and honors than for equality, and are not *insensible* to rewards—*Sédillot*) **Insensitive** implies sluggishness in response or less than normal susceptibility; more specifically, it suggests dullness rather than acuteness of sensation or perception, thickness rather than thinness of skin, callousness rather than sympathy or compassion (an ear *insensitive* to changes of pitch) (he was *insensitive* to all kinds of discourtesy—*Joyce*) (insensitive to the misery of others) (many . . . Europeans still think Americans are soulless and *insensitive* machines, a raw society of mass-produced healthy extroverts—*Viereck*) **Impassible** basically and historically implies absence of response because of incapacity for feeling or suffering,

but is often used synonymously with *impassive* or in reference to persons who by discipline have conquered the normal human susceptibility to pain or suffering <the Hindu striving for Nirvana renders himself *impassible*> or in reference to things in contrast with persons or creatures thought of as beings who through necessity of nature suffer pain or are susceptible to injury <the language of strategy and politics is designed . . . to make it appear as though wars were not fought by individuals . . . but either by impersonal and therefore wholly nonmoral and *impassible* forces, or else by personified abstractions—*Huxley*> <Svengali was sitting, quite *impassible*, gazing at Monsieur J—, and smiling a ghastly, sardonic smile—*du Maurier*> **Anesthetic** implies a deadening of the mind or senses by or as if by such a drug as ether and therefore an induced rather than a natural insensitiveness <the intelligentsia . . . neither as *anesthetic* to ideas as the plutocracy on the one hand nor as much the slaves of emotion as the proletariat on the other—*Mencken*> <all except the young girls are in a state of possession, blind, deaf and *anesthetic*—*Cary*> **Ana** obtuse, *dull, blunt: *impassive, apathetic, phlegmatic, stolid, stoic: *hardened, indurated, callous: engrossed, absorbed, *intent, rapt

insinuation, innuendo mean covert suggestion or a covert allusion to something. **Insinuation** applies chiefly to a

remark, comment, or question which conveys or seems to convey a hint or implication, often one that is discreditable to the person at whom it is aimed <by tacit agreement they ignored the remarks and *insinuations* of their acquaintances—*D. H. Lawrence*> <we reject any *insinuation* that one race or another, one people or another is in any sense inferior or expendable—*Eisenhower*> **Innuendo** more often applies to the method of covert suggestion than does *insinuation*, and when it applies to a definite instance, it is referable to meaningful smiles, glances, inflections, as well as to remarks; in both cases the term definitely implies a suggestion of something that is injurious to the reputation of the person concerned <I prefer the most disagreeable certainties to hints and *innuendos*—*Byron*> <in this play Middleton shows his interest . . . in *innuendo* and double meanings—*T. S. insipid, vapid, flat, jejune, banal, wishy-washy, inane mean devoid of qualities which give spirit, character, or substance to a thing. Something *insipid* is without taste, or savor, or pungency; the term is applied not only to food and drink which are so tasteless as to give no pleasure or stimulation to the palate <*insipid* substitutes for coffee> but also to persons and their utterances and ideas which strike one as thin, weak, and characterless and leave one completely indifferent <the tepid quality of the expatriate American novel, which has escaped vulgarity to become *insipid* instead—*Connolly*> <happiness is a wine of the rarest vintage, and seems *insipid* to a vulgar taste—*L. It often connotes barrenness, aridity, or meagerness in addition to its basic implications <read through the sermon once more. It seemed more *jejune* than ever—*Mackenzie*> <literary history without evaluative criteria becomes *jejune* and sterile—*Glicksberg*> Something *banal* is so commonplace or so trite that it lacks all freshness or power to stimulate or appeal. carries one or more of such various connotations as tastelessness, pedestrianism, triviality, or platitudinousness (a simple person marvelously protected from vulgarity and the *banal*—*T. E. Brown*) (the “poor working girl” of the *banal* songs of the period—*Farrell*) (the average man, doomed to some *banal* and sordid drudgery all his life long—*Mencken*) Something *wishy-washy* has the essential or characteristic qualities so weak or diluted that it strikes one as extremely insipid or vapid (she is too *wishy-washy* to attract interesting friends) (his courage in expressing opinions that are always judicious but never *wishy-washy*—*W. inspiration, afflatus, fury, frenzy, especially when qualified by *divine* or *poetic*, all designate the seemingly involuntary element in the arts of expression for which the artist often holds a power outside himself responsible.

Inspiration may distinctively imply a preternatural enlightening and quickening of the mind and connote, especially when used by religious persons, the intervention of or as if of such a supernatural influence as the Holy Spirit (among such men there remains a . . . belief in what is vaguely called *inspiration*. They know by hard experience that there are days when their ideas flow freely and clearly, and days when they are dammed up damnably—*Mencken*) Often, from its use in connection with the authorship of the Scriptures, *inspiration* implies supernatural or supranatural communication of knowledge (has the highest aspect of Greek religion ever been better expressed than by Wordsworth himself, to whom . . . it came by *inspiration* and not from books?—*Inge*)

Afflatus distinctively applies to the inspiring influence rather than to the process or its effects (the artists and poets who but once in their lives had known the divine

afflatus, and touched the high level of the best—*Henry James*) (we imagine that a great speech is caused by some mysterious *afflatus* that descends into a man from on high—*Eastman*) but it also may name a quality rather than an influence or an operation (he never again achieved that delicate balance of cold, scientific investigation and imaginative *afflatus*—*Scalia*) **Fury** and **frenzy** emphasize the emotional excitement that attends artistic creation and the tendency of the artist to be carried out of himself. **Fury** found most often in the phrases “poetic fury” and “divine fury,” does not in ordinary use imply extreme agitation; it characteristically connotes profound ecstasy induced by the poet’s vision or conception (they are so beloved of the Gods, that whatsoever they write, proceeds of a divine *fury*—*Sidney*) (in an age of formalism, poetic *fury* itself became a formal requirement—*Babbitt*) **Frenzy** usually implies agitation rather than rapture, and stresses the imaginative or inventive element in creation, sometimes to the exclusion of any extraneous influence (does he compose in a *frenzy* of mystical exaltation or does he work out his lines slowly and even laboriously?—*Kilby*) (caught the first fire of the writer’s *frenzy* in the classroom when a long dead poet was being discussed—*Dock Leaves*) (Mencken and his *Mercury* were anything but cold. instant *n* **Instant, moment, minute, second, flash, jiffy, twinkling, split second** are comparable when they mean a particular point of time or a stretch of time of almost imperceptible duration. *Instant* and *moment* are often used interchangeably <to us . . . the *moment* 8.17 A.M. means something . . . very important, if it happens to be the starting time of our daily train. To our ancestors, such an odd eccentric *instant* was without significance—did not even exist—Huxley> but *instant* carries so much stronger a suggestion of infinitely small duration that it is better fitted than *moment* for contexts that imply urgency, extreme transiency, or inconceivable swiftness <to trace the visionary company of love, its voice an *instant* in the wind (I know not whither hurled)—Hart Crane> <come this *instant*> <he was not an *instant* too soon> <it passed in an *instant*> **Moment**, on the other hand, is particularly serviceable when the word or the context carries the implication of a definitely apprehended, even though extremely brief, point of time <wait a *moment*> <a *moment* of dreadful suspense—Greene> <it was the finest *moment* of her life> <I haven't had a *moment* to attend to it> *Minute* and *second* technically apply to measured fractions of an hour, but in the present relation *minute*, even more than *moment*, suggests an appreciable though short duration of time, and *second*, quite as much as *instant*, suggests its imperceptible duration <who buys a *minute's* mirth to wail a week?—Shak.> <the train will start in a *minute*> <I was gone only a *minute*> <standing in the middle of the street he would blow, and in a *minute* boys would come swarming to him—John Reed> <they showed a *second* or two of hesitation, and then plunged off the road—Ingamells> <I'll get it this *second*> **Flash** suggests duration comparable to that of a flash of lightning; the term is therefore often used when incredible speed in movement, action, or thought is implied <the secret of the poor wretch's death was plain to me in a *flash*—Kipling> <eyes that in a *flash* could pick out a friend . . . from a throng—Cather> **Jiffy** is found chiefly in the phrase in a *jiffy*, equivalent to very quickly or directly <she could have tossed off an article for *The Times* in a *jiffy*—Nicolson> <the fisherman raises the submerged net in a *jiffy*—Nat'l Geog. Mag.> <I'll be there in a *jiffy*> **Twinkling**, often with an added "of the eye," suggests the quickness of a wink or blink <his patient would be carried off by meningitis in the *twinkling* of an eye—Stafford> <the kettle will boil in a *twinkling*

—Punch> **Split second**, basically denoting a fractional part of a second, heightens the implication of brevity as expressed by *second* <Mr. Moon stood for one *split second* astonished—Chesterion> <one *split second* of surprise—Sharp>

instinctive 1 **Instinctive, intuitive** both mean not involving, based on, or determined by the ordinary processes of reasoning, but as applied to human mentation they are not normally interchangeable because of consistent differences in connotation. **Instinctive** in this connection (see also SPONTANEOUS) implies a relation to **instinct**, the more or less automatic and unreasoned reactive behavior characteristic of a natural group (as a species) rather than of the individual; as applied to human mental activity and behavior *instinctive* stresses sometimes the automatic quality of the reaction, sometimes the fact that it takes place below the level of conscious reasoning and volition whether as a true expression of **instinct** or as being through habitude as deeply ingrained as **instinct** <a baby may be born with a fear of a loud, sudden noise and a fear of falling. Those things we call *instinctive*—Fishbein> <while yet a boy he was a thorough little man of the world, and did well rather upon principles which he had tested . . . and recognized as principles, than from those profounder convictions which in his father were so *instinctive* that he could give no account concerning them—Butler d. 1902> <some of our most inevitable and *instinctive* sentiments . . . cannot be brought directly under logical laws—Coulton> **Intuitive**, correspondingly, indicates relationship to **intuition**, the highly personal intellectual capacity for passing directly from stimulus to response (as from problem to solution or from observation to comprehension) without the intervention of reasoning or inferring; as applied to the human mind and to products of its activities *intuitive* suggests activity above and beyond the level of conscious reasoning <God's thought obviously differs in its character from that of man. The latter . . . proceeds in step-by-step fashion from premise to conclusion; God's thought is entirely *intuitive* . . . it grasps its object by a single flash of insight—Thilly> <every scientific generalization is *intuitive*, for while the scientist may see a phenomenon just by looking, as at Newton's apple, he must use creative imagination and intuition to relate this apple to the moon and so discover the universal law—G. R. Harrison> <an *intuitive* mind, passionate in its attempt to capture a great truth in a few words, but impatient of logical sequences—Canby>

insubordinate, rebellious, mutinous, seditious, factious, contumacious mean having or showing defiance or indifference to constituted authority. **Insubordinate** is used

primarily in reference to a person whose status is that of a subordinate and especially of a member of an organized group (as a force, a crew, or a staff) under the control of a head (as a military or naval officer, a chief, or a master) who is responsible for their service as individuals and their discipline as a group; the term implies disobedience to orders or infraction of rules either as a particular instance or as a habit (*insubordinate* sailors are confined in the warship's brig) (*insubordination* . . . may consist simply in a persistent and concerted refusal or omission to obey orders, or to do duty, with an *insubordinate* intent—*Manual for Courts-Martial*)

Rebellious implies disaffection and insubordination; it may refer to a state of mind or to a temperamental tendency (*temperamentally rebellious*, instinctively disliking externally imposed authority—*Biddle*) but more often it suggests active or organized resistance (*rebellious* troops) (*an outlaw'd desperate man, the chief of a rebellious clan—Scott*) (*the sword his grandsire bore in the rebellious days of yore—Longfellow*)

Mutinous is a stronger and more derogatory term than *rebellious* which may imply justifiable resistance, for it suggests the refusal to obey the lawful demands or commands of an officer in charge, especially a military, naval, or ship's officer, with the result that there is no longer discipline and efficiency in the group or, if the mutiny is successful, that a new and usually unlawful control is set up (*the master ordered the mutinous sailors put into irons*) (*the mutinous members of the crew finally gained the upper hand*) (*each one . . . gave him to understand, roughly and roundly, that to go to sea in her they would not. In the midst of this mutinous uproar, the alarmed consul stood fast—Melville*) **Mutinous** is also frequently applied to active forces (as passions, winds, or waters) that are exceedingly turbulent or uncontrollable (*I have . . . called forth the mutinous winds—Shak.*) (*mutinous* passions, and conflicting fears—*Shelley*) **Seditious** implies treasonable activities and often specifically a stirring up of discontent or of opposition to or rebellion against the government (*seditious* societies) (*seditious* writings) (*seditious* factionalism went on a rampage and began to wreck our foreign policy—*Ascoli*) (*revolutions that were not made in Boston, by Boston gentlemen, were quite certain to be wicked and seditious—Parrington*) **Factious** stresses the contentious, perverse, or turbulent provocation of party spirit or a tendency to break up into

embittered and irreconcilable factions. Only when it implies as a result the destruction of peace in the group as a whole does it suggest indifference to or defiance of constituted authority; very frequently it suggests the opposition of legislative groups or blocs to the government (*a quarrelsome, factious race*) (*the government's plan to entertain the proposals for peace aroused the factious spirit of the parliament*) (*Florence . . . sowing the wind and reaping the whirlwind, wearing her soul out by factious struggles—Oliphant*) (*the Opposition will be vigilant but not factious. We shall not oppose merely for the sake of opposition—Attlee*) **Contumacious** is found chiefly in legal and ecclesiastical use. It implies persistent, willful, or open disobedience of the orders of a court or of one's superiors; often, it specifically suggests contempt of court by a bold refusal to obey a summons or subpoena, or open and stubborn defiance of laws or orders that are seldom disobeyed (*on her refusal to appear in person or by her attorney, she was pronounced contumacious—Lingard*) (*magistrates and populace were incensed at a refusal of customary marks of courtesy and respect for the laws, which in their eyes was purely contumacious—Inge*)

Con *obedient, amenable, docile, tractable, biddable: submissive, subdued, *tame

insular, provincial, parochial, local, small-town are comparable when they mean having or indicating the limited or restricted point of view considered characteristic of the geographically isolated. **Insular** is usually applied to people or the ideas of people who are in one way or another isolated, so that they become or are regarded as self-contained or self-sufficient and disinterested in matters remote from their own concerns. The term implies an aloofness that proceeds from this isolation, but it usually also connotes narrowness of attitude, circumscription of interests, or prejudices in favor of one's own people or one's own kind (as of customs, literature, and art) (*much of the impetus for international thinking and planning has come from our schools and our colleges, and the pressures for insular chauvinism have come from self-seeking groups of adults—Brown*) (*Bradley was fighting for a European and ripened and wise philosophy, against an insular and immature and cranky one—T. S. Eliot*) **Provincial** sometimes applies to what is characteristic of outlying districts as in opposition to what is characteristic of such metropolitan centers as London or New York (*a provincial accent*) (*provincial* theaters) (*provincial* fashions) but the word tends to connote narrowness of view or of interest as opposed to what is cosmopolitan or catholic (*he replaced a philosophy which was crude and raw and provincial by one which was, in comparison, catholic, civilized, and universal—T. S. Eliot*) (*firm commitment to a given ideal is not equivalent to provincial intolerance towards other forms of excellence—Nagel*) (*Stalin, a provincial, Victorian philistine, fancied himself as an infallible connoisseur—Willets*) **Parochial**, with its reference to a parish, a local unit of administration in the church or, in some regions, in the state, implies confinement to views and interests of a particular place and connotes extreme narrowness and, often, intolerance (*of all kinds of human energy, Art is surely the most free, the least parochial; and demands of us an essential tolerance of all its forms—Galsworthy*) (*even so great a historian as Pirenne is parochial compared with Mr. Toynbee, who has literally taken the world . . . as his province—Brogan*) (*small wonder that the news is often out-of-date, and that it is mostly political polemics or parochial gossip—Kim-*

ble) **Local** comes very close to *parochial* in meaning, but it carries a less distinct suggestion of narrowness or of intolerance; it rather implies the strong impress produced by the place in which one lives on one's speech, one's customs, or one's interests and is distinguished from *broad* or *general* (the *local* and even *parochial* Concord mind . . . proved to be . . . national—*Brooks*) (the affair was only of *local* interest) **Small-town** implies a relation to smaller towns as opposed to larger, or metropolitan, centers and thus comes close to *provincial* and *local*; distinctively, it often stresses the dullness or gaucheness or philistinism felt to characterize such an environment (small-town gossip) (small-town society) (it needn't be much to look big to a small-town girl—*S. R. L.*) (the small-town mind is as formidable a factor in Irish as in American life—*New Statesman*) (people get married beneath them every day, and I don't see any sign of the world coming to an end. Don't be so small-town—*Welty*) **Ana** isolated, insulated, secluded (see **ISOLATE**): circumscribed, limited, restricted, confined (see **LIMIT** *vb*): narrow, narrow-minded, *illiberal: aloof, unconcerned, *indifferent

integrate, **articulate**, **concatenate** are comparable when they mean to bring or join together a number of distinct things so that they move, operate, or function as a unit. The implications of these senses are probably more often found in the participial adjectives **integrated**, **articulated**, **concatenated** and in the derived nouns **integration**, **articulation**, **concatenation** than in the finite verbs. **Integrate** implies that the things (as parts, elements, factors, or details) combined are brought into such intimate connection with each other that a perfect whole results. Usually it suggests a complete fusion or coalescence of particulars

with loss therefore of their separate identities (a customs union that . . . would *integrate* the economies of the two countries—*Current Biog.*) (cartels or other forms of highly *integrated* organization—*J. S. Martin*) (he relies heavily upon the researches of others, and his condensation and *integration* of their findings perhaps form his main contribution—*Angoff*) **Articulate** also implies as its result a perfect whole, but it differs from *integrate* in implying no loss of identity or of distinctness of the things (as parts, branches, and departments) combined and in suggesting a connection between them that is found in its perfection in the skeletons of vertebrate animals. For *articulate* implies organization in which each part fits into another in a manner comparable to the fitting into each other of two bones at a movable joint and a structure is built up that functions as a whole yet without loss of flexibility or distinctness in any of its component units or without any conflict between them (hard put to it to devise ways of participation for children, and means of *articulating* their school life with the rest of life—*Mead*) (few people have definitely *articulated* philosophies of their own—*James*) (the two ideas have been transferred from a conglomerate to an *articulated* unity—*Weaver*) (in four years the principate had scarcely begun that process of *articulation* which was to make it one of the most complex and yet smooth-running systems of government known to history—*Buchan*) **Concatenate** suggests neither fusion nor organization but a linking together of smaller units until figuratively a powerful chain is forged. It implies addition of one thing to another with cumulative effect (not one cause brings about war, but a *concatenation* of causes) (the present work comprises five essays nicely *concatenated*—*Hocking*) (the theory of the state is developed in a closely *concatenated* line of thought—*Sabine*) (could not help thinking that the *concatenation* of events this evening had produced was the scheme of some sinister intelligence bent on punishing him—*Hardy*) **Ana** *unite, combine, conjoin: unify, consolidate, concentrate, *compact: fuse, blend, merge, coalesce (see **MIX**): organize, systematize (see **ORDER**) **Ant** disintegrate —**Con** crumble, decompose (see **DECAY**): dissipate, disperse, *scatter: *analyze, resolve, break down

integrated articulated, concatenated (see under **INTEGRATE** *vb*)

2 *news, tidings, advice

intelligent 1 Intellectual, *mental, cerebral, psychic
 2 **Intelligent, clever, alert, quick-witted, bright, smart, knowing, brilliant** are comparable when they mean mentally quick or keen. **Intelligent** implies greater than average power to use one's mind successfully when demands are made upon it (as in understanding the new or abstruse or in meeting and solving problems) <Puritanism presupposed an *intelligent* clergy capable of interpreting Scripture—*Amer. Guide Series: Mass.*> <the vigor of his quick and lucid mind, keenly *intelligent* rather than deeply intellectual—*Lustgarten*> **Clever** implies resourcefulness or aptness more strongly than *intelligent*, and it emphasizes quickness in apprehension rather than fullness of comprehension, and dexterity or adroitness, rather than soundness, in the mental processes <the poor girl liked to be thought *clever*, but she hated to be thought bookish—*Henry James*> <he could deal competently with effects, but he was not *clever* at assigning causes—*Sinclair*> Often the word suggests a contrast with higher or more substantial qualities <be good, sweet maid, and let who will be *clever*—*Kingsley*> <a *clever* boy trains for an examination as he trains for a race; and goes out of training as fast as possible when it is over—*Inge*> **Alert** stresses quickness in the mental processes, especially in comprehending a situation <she seemed more feeble in body . . . but her mind was still *alert*—*L. P. Smith*> <after Munich *alert* observers urged more forcefully that our country must hurry to develop its military power—*Feis*> **Quick-witted** also implies quickness in thinking but in addition it suggests promptness in action in an emergency, in response to a challenge, in conversation, or in debate <we are not a *quick-witted* race; and we have succeeded . . . by dint of a kind of instinct for improvising the right course of action—*Inge*> **Bright** and **smart** are more often applied to young or promising persons than to those who are proficient or of proved intelligence. **Bright** suggests cleverness that is manifested especially in liveliness of mind or in liveliness of talk or manner <how they could, who had once been so eager and *bright*, be so stodgy now—*Edman*> <*bright* young fellows with a charming literary swagger, they aspired to be wits—*Parrington*> **Smart**, too, implies cleverness but it also suggests alertness or quick-wittedness that enables one to get ahead <I wish I was *smart* enough to invent something and maybe get rich—*Anderson*> <the master said he was the *smartest* lad in the school—*D. H. Lawrence*> <the race is no longer to the strong, but to the *smart*—*Drake*> Both words are used ironically, *bright* then implying dullness or stupidity and *smart*, pertness, facetiousness, or sometimes trickery or duplicity <a *smart* aleck> <given to making *smart* retorts> <other *bright* ideas—some showing a superb neglect of practical feasibility, as well as of the welfare of any unfortunates who might happen to be in the experiment area—include the scattering of concentrated sulphuric acid—*The Countryman*> <I do not want . . . to be converted by a *smart* syllogism—*Birrell*> <the *smart* work is hidden in the wording of the Monroe doctrine—*Emporia Gazette*> **Knowing** carries a stronger implication

than any of the preceding terms of the possession of information or knowledge that is necessary or useful under given circumstances <the *knowing* collectors of records—*Sat. Review*> <partisanship, as a *knowing* Republican politician once remarked, is a fine thing—between elections—*Collins*> Occasionally the term further suggests a less agreeable quality such as sophistication, secretiveness, or the possession of knowledge of others' secrets <a *knowing* wink> <a face so mean, so *knowing*—*Thackeray*> <his work has a distasteful air of pretentious smartness, of being altogether too *knowing*—*Read*> **Brilliant** adds to *intelligent* the implication of unusual and outstanding keenness of intellect that manifests itself so openly or effectively as to excite admiration; the term usually suggests an opposition to qualities that characterize one whose mind works more slowly or cautiously <a *brilliant* mathematician> <John Todhunter was esteemed a shrewd sensible man—only not *brilliant*—*Meredith*> <Einstein's *brilliant* solution of the . . . puzzle—*Zinsser*> <the *brilliant* anthropologist whom de Gaulle wished to place in charge of a combined intelligence service—*Funk*>

Ana *sharp, keen, acute: *shrewd, sagacious, perspicacious, astute: cunning, ingenious, adroit, *clever

Ant unintelligent —*Con* foolish, idiotic, imbecilic, moronic (see corresponding nouns at FOOL): *stupid, slow, dull, dense, crass, dumb: *irrational, unreasonable

intend, mean, design, propose, purpose signify to have in mind as an aim, end, or function. **Intend** implies that the mind is directed to some definite accomplishment or to the achievement of a definite end <if one earnestly *intends* a conspiracy, one does not commence with a series of public readings—*Kristol*> <*intended* twenty-four books, sketched fourteen, but left only four—*Hight*> or is bent upon some person or thing (as an invention or a writing) serving a certain purpose or use, or fulfilling a certain destiny <a play, *intended* for great Theseus' nuptial day—*Shak.*> <a strong suspicion that the new instrument with which Einstein has presented the mathematicians is being put to uses for which it was never *intended*—*Inge*> <a man set aside and *intended* by nature to lead a blameless life—*Anderson*> **Intend** often implies an aim to express a definite idea by a given word or phrase <just what the framers of the constitution *intended* by the phrase "to be twice put in jeopardy" is still a matter of some doubt> <he caught the phrase as it dropped from his lips with a feeling that it said more than he *intended*—*H. G. Wells*> **Mean** often carries a denotation close to that of *intend* <those organ tones of his were *meant* to fill cathedrals or the most exalted of tribunals—*Cardozo*> but it does not convey so clear an implication of determination to effect one's end as does *intend* and, sometimes, it implies little more than volition or decision <he always *means* to work harder> <a book that I *mean* to get when I reach Beverly—*Justice Holmes*> <I don't *mean* to defend Charles' errors, but before I form my judgment of either of them I intend to make a trial of their hearts—*Sheridan*> <he shouldn't have done it, of course; but he was thoughtless. And he *meant* to pay the money back—*Deland*> **Design** (see also under PLAN *n*) usually stresses forethought and deliberation in arriving at an intention <the American people . . . did not *design* to make their government dependent on the States—*John Marshall*> <we wanted absolute surrender and we wanted it within a matter of hours, and the bomb of Nagasaki was *designed* to achieve just that, which it did—*Cousins*> Often, the term also implies scheming or contriving, especially by underhand means, in an attempt to effect what is designed <your father and sister, in their civilities and invitations, were

designing a match between the heir and the young lady—*Austen*) <ah! Friend! to dazzle let the vain *design*; to raise the thought, and touch the heart be thine!—*Pope*) **Propose** implies a declaration of one's intention or a setting it clearly before oneself or others. It therefore usually connotes clear definition or open avowal <what do you *propose* to do when your funds run out?> <I *propose* to describe the circumstances under which Richelieu worked when he produced and realized the centralized nation of today—*Belloc*> <to China, where she *proposed* to spend some time with her friends—*Salisbury*> <what is reached in the end may be better or worse than what was *proposed*—*James*> <I, for one, do not *propose* to adjust my ethics to the values of a bloodstained despotism—*A. E. Stevenson*> **Purpose** differs little from *propose* except in carrying a somewhat stronger implication of determination to effect or achieve one's intention <I *purpose* to write the history of England from the accession of King James the Second—*Macaulay*> <a promise to send her picture postcards from the Cathedral cities which he *purposed* visiting—*Hewlett*> and in occasionally connoting clearer definition in one's own mind <thy brother Esau, as touching thee, doth comfort himself, *purposing* to kill thee—*Gen* 27:42)>

Ana *aim, aspire: *attempt, try, endeavor, strive, essay: plan, design, scheme, plot (see under **PLAN** n)

intense, vehement, fierce, exquisite, violent are comparable when meaning extreme in degree, power, or effect. Although several of them often are used interchangeably without clear distinction, they can be employed in ways that reveal many differences in implications and applications. **Intense** is especially appropriate when the idea of great depth (as in quality, reach, or effect) is to be implied. In such use *intense* may apply to thoughts or thinking, to feeling or emotion, to such an outstanding quality or character as color, brilliancy, or tone, or to something that suggests a straining or a being strained (as in the attainment of an end or effect) <*intense* concentration> <*intense* hatred> <*intense* silence> <work so *intense* that it takes the last inch out of the workers—*Shaw*> <he was in such an *intense* mood that humor was entirely barred out—*M. E. Freeman*> <one of the inspired moments that come to *intense* natures, working intensely, had come to him—*Anderson*> **Vehement** and **fierce** (see also **FERCE**) suggest a manifestation of abundant energy or force, and connote, *fierce* to a greater degree than *vehement*, ardency, impetuosity, or urgency <jealousy is cruel as the grave: the coals thereof are coals of fire, which hath a most *vehement* flame—*Song of Sol* 8:6> <the temper of monists has been so *vehement*, as almost at times to be convulsive—*James*> <if *vehement* assertions on the one side have driven me into too *vehement* dissent on the other, I crave pardon—*Quiller-Couch*> <she burns with a *fierce* pietistic suspiciousness of all the arts—*Trilling*> <so *fierce* were the passions that had been aroused, that again he was in danger of violence—*Froude*> **Exquisite** (see also **CHOICE**) raises the implications of *intense* to a point suggesting an extreme near to consummateness or completeness. In this sense it has been applied indifferently to things good or bad but often with the result that, when applied to such things as cleanliness, some feelings, judgment, or color which may be called good, its meaning is taken as equal to that of *exquisite* at **CHOICE**; thus, although *exquisite* cleanliness may mean cleanliness so extreme that it suggests immoderateness, it is usually thought of as cleanliness so perfect that it gives joy to the fastidious. Consequently, *exquisite* in this sense is more often applied to what is felt or apprehended keenly or acutely <with a brilliant mind, nervous temperament, intense susceptibil-

ity to artistic and spiritual impressions . . . [she] was attuned to *exquisite* pleasure and *exquisite* pain—*Hanscom*> <subject a person to *exquisite* torture> **Violent** (for senses of acting with or caused by violence compare *violence* under **FORCE**) implies immoderate strength or force and, usually, the exceeding of normal bounds even in something that is strong or forcible; the term need not impute a disagreeable quality to that to which it is applied, but the possibility of this implication is more frequent than in the other terms <*violent* heat> <his *intense* faith and his *violent* spiritual agonies are experiences which few of us today are able to share—*Day Lewis*> <an unreasoning passion of despair descended upon them both, *violent* yet essentially slight—*Wylie*>

Ana intensified, enhanced, heightened, aggravated (see **INTENSIFY**): accentuated, emphasized, stressed (see corresponding nouns at **EMPHASIS**)

Ant subdued (*colors, lights, emotions*)

intensify, aggravate, heighten, enhance mean to increase markedly in degree or measure. **Intensify** implies a deepening or strengthening of a thing or especially of its characteristic quality <a clear atmosphere *intensifies* the blue of the sky> <an unfortunate atmosphere . . . that *intensifies* the suspicions with which the hardheaded and skeptical naturally approach such revolutionary claims—*Flew*> <historical circumstances of recent years have conspired to *intensify* nationalism—*Huxley*> **Aggravate** implies a manifest increase in the seriousness of a situation or condition that is already unpleasant or difficult <false rumors that *aggravate* racial animosities> <truth and frankness dispel difficulties, but the attempt at repressive moral discipline only *aggravates* them—*Russell*> <these considerable defects in a parish priest were *aggravated* rather than offset by his talents as an orator—*Anthony West*> **Heighten** and **enhance** both imply a lifting or raising; **heighten**, however, tends to imply a lifting above the ordinary, the trite, or the commonplace, and a consequent increase in sharpness and poignancy, and **enhance** a lifting above the norm or the average in desirability or attractiveness by the addition of something that increases the value, charm, or prestige of the thing enhanced <a dramatist *heightens* the effect of his scenes by rapidity of the action and he *enhances* his dialogue by the addition of witty repartee> <had *heightened* his appreciation of the more austere pleasures of the afternoon—*Archibald Marshall*> <a painter discards many trivial points of exactness, in order to *heighten* the truthfulness of a few fundamentals—*Montague*> <Augustus sought . . . in every way to *enhance* its [the Roman Senate's] prestige and dignity—*Buchan*>

Ant accident —*Con* *chance, hap, luck, fortune, hazard
intent adj **Intent, engrossed, absorbed, rapt** mean having one's mind or attention deeply fixed on something. **Intent** implies that one's mind, one's desires, or one's energies are eagerly bent on something; it therefore suggests a directing of the entire attention toward a particular end or thing <persons whose hearts are wholly bent toward pleasure, or *intent* upon gain—*Spectator*> <the wise author *intent* on getting at truth—*Quiller-Couch*> <for all its hideous scars is no dead city, but one grimly *intent* on survival—*Cassidy*> **Engrossed** implies monopolization of one's

attention either by a driving purpose or emotion or an eager interest or by the force or urgency of circumstances beyond one's control <he appears to have been so engrossed by domestic issues as to have given little attention to foreign problems—*W. L. Langer*> <Sieveking was naturally engrossed in the musical problem, which was perplexing enough—*Hilton*> <these constitutional changes . . . were pushed through during and after the war by a group of busybodies who were not too much engrossed by the agony of their country to conduct a raging agitation in all parts of England—*Inge*> **Absorbed** often differs little from *engrossed* in this sense <the point is that Broch is never engrossed in, and never permits the reader to become absorbed by, the story itself—*Arendt*> but it may carry a stronger suggestion of the power of the thing on which the attention is fixed to capture one's attention and to hold it firmly so that there is difficulty in distracting it <wholly absorbed in his preparations for saving souls in the gold camps—blind to everything else—*Cather*> <human beings are prone to become absorbed in themselves, unable to be interested in what they see and hear or in anything outside their own skies—*Russell*> <already they had read *Farthest North*. Imogen, at eight years old, had read it, absorbed, breathless, intent, tongue clenched between teeth—*Rose Macaulay*> **Rapt** implies both extreme intentness and complete absorption, as though one were taken out of oneself or were in an ecstatic trance <*rapt* in adoring contemplation—*Farrar*> <expounded the ultimate meaning of existence to the white, *rapt* faces of Humanity—*L. P. Smith*> <in openmouthed wonder the lama turned to this and that, and finally checked in *rapt* attention before a large alto-relief representing a coronation or apotheosis of the Lord Buddha—*Kipling*>

intention, intent, purpose, design, aim, end, object, objective, goal are comparable when meaning what one proposes to accomplish or to attain by doing or making something, in distinction from what prompts one (the *motive*), or from the activity itself (the *means*), or from the actual or envisioned outcome (the *effect*). The first four of these words stress the clearly defined will to do or make something. **Intention**, however, often denotes little more than what one has in mind to do or to bring about <she had not had an *intention* or a thought of going home—*Dickens*> <she had divined the *intention* behind her mother's tolerance—*Joyce*> <announced its *intention* to divide its Indian Empire into two dominions—*Current Biog.*> **Intent** suggests clearer formulation and greater deliberateness than *intention* <they become enamored of official declarations of *intent*, though not much is said about the machinery to translate *intent* into action—*Cousins*> <behind my look you saw such unmistakable *intent*—*Millay*> **Purpose** implies more settled determination or more resolution than *intention* <have a *purpose* in life> <the missionary was here for a *purpose*, and he pressed his point—*Cather*> <there lie youth and irresolution: here manhood and *purpose*—*Meredith*> **Design** carries further the notion of deliberateness and purposiveness in formulating an intention; in this sense it is not always clearly distinguishable from *design* denoting plan (see under PLAN n), for it retains the implications of careful ordering of details, of calculation, and sometimes of scheming <a great man by accident rather than *design*—*Laski*> <I had suspected him of harboring . . . sinister *designs*—*Hudson*> <the United States has no ulterior *designs* against any of its neighbors—*Vandenberg*> **Aim** implies a clear definition of something

that one hopes to effect and a direction of one's efforts or energies to its attainment; thus, one who proposes to make the best of his powers and of his opportunities may be said to have a *purpose* in life: one who has clearly defined the mark he hopes to reach and determines his actions by it may be said to have an *aim* in life <her steadiness and courage in the pursuit of her *aims*—*J. R. Green*> <the *aim* of the Elizabethans was to attain complete realism—*T. S. Eliot*> The remaining words of this group, like *aim*, imply that what one does is affected by what one hopes to accomplish or attain. **End** in this relation retains some of the suggestion of remoteness and finality inherent in some of its other senses (see LIMIT, END 2) and therefore is appropriately applied to an aim or purpose which takes its nature from principle or logical necessity and of which the attainment requires a definite and planned course of action leading to the modification of existent reality <holding that the good of the *end* justified all the evil of the means> <the relation between means and *ends* is clearly bound up with a temporal view. *Ends* are in the future, means in the present. We do control means, we do not control *ends*. Hence the foolishness of conceiving *ends* apart from means. On the contrary, *ends* must be judged, and evaluated, in the light of the means available for their attainment—*Visalberghi*> <provide the safeguard we need against the abuse of mankind's scientific genius for destructive *ends*—*Dean*> <the end of law was to bring about the widest possible abstract individual liberty—*Roscoe Pound*> <it is commonly said and commonly believed that science is completely neutral and indifferent as to the *ends* and values which move men to act: that at most it only provides more efficient means for realization of *ends* that are and must be due to wants and desires completely independent of science—*Dewey*> **Object** and *objective* apply to an end as being that toward which effort or action or emotion (as hope) is directed <the *object* is to gather data that can be taken only during a total solar blackout—*Cowen*> <one of the important *objectives* of public education has been and will always be to inspire in youth a deep appreciation of the basic spiritual and religious values which give meaning to existence—*Current Biog.*> Distinctively, **object** may suggest an end based on more individually determined desires, needs, or intentions <Colonel Belgrave, who is bent on abducting Amanda . . . pursues his *object* with a pertinacity and ingenuity that does credit to his understanding—*Crothers*> <the *object* of a legislator, he declares, is to make not a great but a happy city—*Dickinson*> <we call a man cruel who takes pleasure in the suffering of others and inflicts it with that *object*—*Belloc*> while **objective** may suggest one which is concrete and immediately attainable or at least one which involves no obviously insurmountable problems <the *objectives* of the Guild are to promote and advance the spiritual, social, educational and recreational welfare of the blind persons in the Diocese—*Hamrah*> <Columbia included among its earliest stated *objectives* the instruction of youth in surveying, navigation, husbandry, commerce, government, and manufacture—*Eurich*> **Goal** often evokes the image of one running a race; usually it implies struggle and endurance of hardships and cessation of effort at attainment <the Good, which is the *goal* of all moral endeavor—*Inge*> <in the average man's mind leisure is . . . a *goal* to strive for—*Furnas*> <equality is, of course, a *goal* or ideal rather than an immediately attainable objective—*Gallagher*>

intercourse, commerce, traffic, dealings, communication, communion, conversation, converse, correspondence are comparable when meaning the connection established between persons or peoples through a medium that permits interchange (as of information, of opinions, of ideas, or of goods). **Intercourse** usually means little more than this and requires a qualifying adjective to indicate the things interchanged or the medium permitting interchange (<business intercourse> <trade intercourse> <sexual intercourse> <social intercourse>). In ordinary use, when employed without qualification, *intercourse* means *social intercourse* or the normal interchange of such things as ideas, opinions, news, and civilities between one person or group and another with whom there are more or less intimate relations (<the truth was, he could not be happy for long without human intercourse—*Cather*> <the keen and animated intercourse with its exchange of disputable convictions—*Replier*> <he welcomes extra-class intercourse with students and encourages them to think critically—*G. H. White*> <if nations are to cooperate, the first condition must be that they have social and political intercourse—*E. B. White*>). **Commerce**, which applies primarily to the interchange of goods by buying and selling (for this sense, see BUSINESS 3) also is used in the more general sense of *intercourse* (<commerce with the world has made him wiser—*Macaulay*> <I was less and less disposed to commerce with my kind, I who never was given to social functioning—*Weygandt*>). The word tends to be restricted in its application to intercourse, through the spirit or mind, that involves an interchange of ideas or influences without a necessary interchange of words (<re-establish intellectual commerce among them in such a way as to enable them to get on with the attack against the common enemy—*P. B. Rice*> <how is poetry born in us? There is, I think, some commerce between the outer and an inner being—*E*> though it is occasionally used of sexual intercourse. **Traffic** (see also BUSINESS 3) is used chiefly when such connotations derived from its commercial senses are to be suggested as the interchange of goods, especially of tangible or material goods, or a rapid passing to and from the persons or things concerned (<years and the traffic of the mind with men and books did not affect you in the least—*Woolf*> <the State can have no traffic or relationship with the Church considered as a purely spiritual society—*Times Lit. Sup.*>). **Dealings** usually implies a closer connection and one with more familiarity or less formality or one having for its object mutual or personal gain (<they suspected that he was having dealings with the enemy> <being a woman is a terribly difficult trade since it consists principally of dealings with men—*Conrad*> <if a kid gets her way, she has to take some advice. That is part of the unwritten code which governs the dealings between generations—*Robertson Davies*>). Traditionally **communication** is less general than any of the preceding terms because it implies intercourse based on an exchange of symbols and especially words (<there had been no communication with the island since the storm> <I can try to get to know Negroes here to establish communication

—*Collie*> <communication is a process by which a person refers to something, either by pointing to it or using a symbol for it, in such a way as to lead another person to have a more or less similar experience of it. *Communication*, in this sense, presupposes frames of reference which are shared by the communicating persons, so that similar meanings are shared by them—*Newcomb*> but *communication* suggests, as the preceding terms do not, mutuality and the shared background of experience that has given rise to a comprehensible set of symbols; it therefore is appropriately used of nonhuman interactions (<communication is a type of behavior between living creatures characterized by mutuality, rooted in biological heredity, and constituting one of the general manifestations of life—*Révész*> or of the process or art of effectively interchanging symbols (<in order to develop and maintain that basic consensus of values, beliefs, and institutional behavior upon which its existence must rest . . . a society must maintain effective communication among its parts Indeed, the effectiveness of the communication process is a measure of the social integration of a society—*Cottrell*> <Lilly was not expert in communication, and did not try to draw Mr. Sprockett out although it would have been easy—*Ethel Wilson*> or, in the plural, of the means by which spatially or temporally separated individuals or groups engage in such exchanges (<communications were disrupted by the storm> <there is . . . no conclusive evidence that the organized life of any Romano-British town survived the severance of its communications in the troubles of the fifth century—*Stenton*> <the poor communications that exist in many factories between the front office and the men at the workbenches—*Purtell*>). **Communion** usually implies intercourse between those who are close in love or sympathy or in mutual understanding; it often suggests rather than implies spiritual intercourse or the absence of words (<the consummation of communion with God coincides with the final resolution of the sense of estrangement from Him—*Inge*> <Delia sat down beside her, and their clasped hands lay upon the coverlet. They did not say much . . . their communion had no need of words—*Wharton*> <most of the time my father was buried in his religious books, and my mother recognized it as her function to keep this communion undisturbed—*Behrman*>). **Conversation** has a use, chiefly in the phrase *criminal conversation*, in which it is equivalent to *sexual intercourse*, and **converse** has a poetic sense in which it approaches *communion* (<to hold fit converse with the spiritual world—*Wordsworth*> <spend in pure converse our eternal day—*Rupert Brooke*>). In general use, however, both terms usually imply free and often lively oral interchange of opinions, comments, or news between two or more persons; *conversation* often applies specifically to the act of interchanging opinions, ideas, and information in talk, and *converse*, to the ideas, gossip, and opinions involved in such conversation (<an important general . . . deep in converse with the wealthiest of all the astrologers of those war years—*Han Suyin*> <give a freedom to resolve difference by converse—*Oppenheimer*> <we had talk enough, but no conversation; there was nothing discussed—*Johnson*> <genuine conversation—by which I mean something distinguishable from disputation, lamentation, and joke telling—*Krutch*>). **Correspondence** implies intercourse through an interchange of letters (<there has been no letup in their correspondence for fifty years> <the business was conducted by correspondence>).

interesting, **engrossing**, **absorbing**, **intriguing** mean having a quality or qualities that secure attention and hold it for a length of time. **Interesting** implies a power in a person or thing to awaken such a mental or emotional reaction involving attention as curiosity, sympathy, a desire to know or understand, or enthusiasm, but unless the adjective is qualified or there is a fuller explanation in the context, the degree or the cause of interest is not clear (after a month of visiting Mark decided that there was not one *interesting* human creature in the whole parish—*Mackenzie*) (Jane seemed to me to be increasingly *interesting*; she was acquiring new subtleties, complexities, and comprehensions—*Rose Macaulay*) (I see that many people find the world dreary . . . some find it *interesting*—*Benson*) As applied to a book, a play, or a narrative the word usually means entertaining, diverting (compare verbs at AMUSE), exciting, stimulating, or provocative (compare verbs at PROVOKE), but if the context provides no real clue as to the precise implication, the word may fail to hit the mark. **Engrossing** (see also MONOPOLIZE) suggests the power to grip the attention so as to exclude everything else, but it may or may not imply a power to please, divert, or entertain, and it refers almost always to things rather than persons; thus, an *engrossing* book may seize the whole attention from such dissimilar causes as that it requires deep study or serious reflection or that it is challenging or provocative (the *engrossing* nature of his task made the time pass quickly) (the conditions were ideal—not too much money, *engrossing* work to be done, and a sense of purpose and progress in the world—*Whitehead*) (synonymy books in which differences are analyzed, *engrossing* as they may have been to the active party, the analyst, offer to the passive party, the reader, nothing but boredom—*Fowler*) **Absorbing** does not differ materially from *engrossing*, but its underlying notion is not the same, for it suggests in the thing that holds one's attention a power to draw one in, as if by suction; thus, a pursuit may be *engrossing*, but not *absorbing*, when it occupies one's attention to the exclusion of everything else; a book may be *absorbing*, rather than *engrossing*, when its attraction is strong enough to draw one away from attention to one's surroundings (he loved the woman with a love as *absorbing* as the hatred he later felt for all women—*Anderson*) (the difficult and *absorbing* question of how poetry and the other arts at their best, though human creations, put us into relation with the universe of reality—*Alexander*) **Intriguing**, sometimes used in the sense of *interesting*, more specifically applies to something that attracts attention by arousing one's curiosity, by baffling one's understanding, or by leading one to (an *intriguing* smile) (one facet of one of the most *intriguing* and baffling mysteries of the Cold War—*Drew Middleton*) (there is an *intriguing* unknowingness about The Age of Reason—*Hardwick*) *Ana* stimulating, exciting, provoking, quickening (see PROVOKE): stirring, rousing, awakening (see STIR *vb*): thrilling, electrifying (see THRILL *vb*): amusing, diverting, entertaining (see AMUSE): inspiring, animating (see INFORM *vb*)

intermittent, **recurrent**, **periodic**, **alternate** mean recurring or reappearing more or less regularly but in interrupted sequence. Something is **intermittent** which from time to time is omitted or disappears but always returns (an *intermittent* fever) (an *intermittent* correspondence) (in most poets there is an *intermittent* conflict between the poetic self and the rest of the man—*Day Lewis*) Something is **recurrent** which returns or has the habit of returning after omission or disappearance. In contrast, *intermittent* stresses breaks in continuity and *recurrent* stresses repetition (intermittent attacks of appendicitis) (recurrent shortages) (an *intermittent* buzzing) (a recurrent knocking) (an endlessly recurrent set of problems—*Richards*) Something is **periodic** which is known to be recurrent at more or less fixed intervals over a long period of time and which, therefore, can be fairly accurately forecast (periodic epidemics) (periodic appearances of a comet) (brought about periodic inspection of the markets, hotels, and restaurants—*G. M. Lewis*) Something is **alternate** which is both intermittent and recurrent, each in turn with something else. When applied to two contrasted or different things, *alternate* implies a succession of one after the other (alternate smiles and tears) (alternate work and play) (alternate stripes of orange and green) (a dismal day of alternate calms and black squalls—*Nordhoff & Hall*) When applied to things of the same kind or description that follow each other in serial order, *alternate* means every other one (the class meets on alternate days of the week, beginning Tuesday) (the alternate stripes are narrow and white) (each of the others are active on alternate weeks, leaving half their time available for their customary private work—*Wagley*)

2 **Introduce**, insert, insinuate, interpolate, intercalate, interpose, interject mean to put something or someone in a place among or between other things or persons. **Introduce**

(see also ENTER 2) implies a bringing forward of someone or something not already in company with the other persons or things, but it also suggests as the aim of such an act the placing of the person or thing in the midst of that

group or collection so as to form a part of it (introduce a new subject into the conversation) (introduce several amendments into a bill before the legislature) (domestic science was introduced into the high school curriculum—

Current Biog.) **Insert** implies a setting of a thing in a fixed place between or among other things; thus, to insert

lace in a garment is to put it between two pieces of the material which forms the garment; to insert leaves in a book is to put leaves into their proper places (as by the use of glue) (insert additional words in a statement)

(nowhere else, surely, can there be such a compulsion to make plays out of books, musicals out of plays . . .

to insert scenes, delete characters—*Kronenberger*) **Insinuate** (see also SUGGEST) implies a slow, careful, often gentle or artful introduction (as into or through a narrow or winding passage) by pushing or worming its or one's way (the dog liked to insinuate his nose into his master's closed hand) (slang . . . has to insinuate itself into the language; it cannot pressure or push its way in—*Sat. Review*) (trees which insinuate their roots into the fissures of nearby rocks) (slowly but surely they insinuated themselves through the crowd to the edge of the pavement)

(he couldn't quite insinuate the Huntingtons into American society, but he did pretty well for them in England—*Behrman*) **Interpolate** implies the insertion of something that does not belong to and requires to be distinguished from the original, whether because it is extraneous to the subject under discussion or because it is spurious or simply because it is in fact not part of the original (although here and there, I omit some passages, and shorten others and disguise names, I have interpolated nothing—*Le Fanu*) (he has interpolated editorial and critical comments of his own—*Redman*) **Intercalate** primarily implies an insertion in the calendar (as of a day or month) (since the calendar year contained only 355 days, an extra month was occasionally intercalated—*R. H. Baker*) but in its extended sense it implies insertion into a sequence or series, then often also connoting intrusion (lava beds intercalated between sedimentary layers of rock) (some of these discrepancies . . . are obviously due to the fact that Chaucer is intercalating stories previously written—*H. S. Bennett*) **Interpose** (see also INTERPOSE 2) differs from interpolate mainly in its implication that what is inserted serves as an obstacle, obstruction, or cause of delay or postponement (she actually interposed her body between him and the street door then, as though physically to prevent him from going—*Ferber*) (the early Church fought against the tendency to interpose objects of worship between God and man—*Inge*) (Professor Murray has simply interposed between Euripides and ourselves a barrier more impenetrable than the Greek language—*T.S. Eliot*) Of all of these words, interject carries the strongest implication of abrupt or forced introduction (he remained silent for the most part but occasionally interjected a question) (as they chewed on bones and roots, they paused to interject grunts of encouragement for the narrator—*Mott*) The word is often employed in place of said in introducing a remark, statement, or ques-

tion that comes more or less as an interruption or addition <when he was talking about philosophers, I *interjected* what I feel confident was a tactful remark—*Henderson*> *Ant* withdraw: abstract —*Con* *eject, oust, evict: eliminate, *exclude

introduction, prologue, prelude, preface, foreword, exordium, preamble are comparable when denoting something that serves as a preliminary or as an antecedent to an extended treatment, development, discussion, or presentation (as in an exposition, a dramatic or musical work, or a poem). In their extended senses many of these terms are interchangeable, but in the special or technical senses in which they are here chiefly considered they tend to be mutually exclusive. **Introduction**, the ordinary term of this group, and the comprehensive one, specifically applies to that part of a work (as a discourse, treatise, play, or musical composition) which prepares the reader or auditor for the body of the work, especially by giving him material necessary for his understanding of what follows <he always writes the body of his treatise first and then adds the *introduction* and conclusion> **Prologue** applies specifically to the initial and distinct part of a poetic or dramatic work which may serve the purposes of an introduction (as by describing the characters or expounding the situations in which they find themselves) <Chaucer's *Prologue* to the *Canterbury Tales*> or which may be a discourse preceding the opening of a play, by a character of the play or by an actor who serves as a mouthpiece for the author, and giving a hint of the author's purposes or methods or attempting to attract the auditors' attention to or interest in the play to come <the *Prologue* to Shakespeare's *Troilus and Cressida* and to each act of his *King Henry V*> <in his *prologue*, which contains some of the finest poetry-in-prose writing of our day, Dr. MacIver explores the meaning of time —*Donald Harrington*> In its extended use, therefore, *prologue* often suggests an action or an event that sets the stage or paves the way for a series of exploits, achievements, or significant events <this as a *prologue* to her own later dazzling history—*Hugh Walpole*> **Prelude** applies in its general sense to something (as a series of events, actions, or natural phenomena) which constitute figuratively a short play or performance and serve as a sign or indication of or a preparation for what is to follow <functional changes in glands often serve as a *prelude* to structural changes> <that was the *prelude* to a stormy afternoon—*H. G. Wells*> As a technical term in music *prelude* applies sometimes to an opening voluntary in a religious service but more often, and more specifically, to an introductory piece forming a section or a movement, especially of a fugue or a suite but sometimes of an oratorio or of an opera, and serving usually to introduce the theme or chief subject of the work. In this sense *prelude* applies sometimes to musical, or occasionally other, works which have something of the character of an introductory section or movement but are so constructed that they have intrinsic and independent value <Wordsworth's poem "The *Prelude*"> In ecclesiastical use *preface* applies to the prayer of exhortation to thanksgiving and of divine praise which opens the important part of a solemn Eucharistic service where the consecration of the bread and wine occurs. In its more common general sense *preface* applies specifically to a short discourse which is distinct from the literary work (as a treatise, a novel, a poem or collection of poems) which follows, is written usually by the author but sometimes by an editor or a friend, and has for its main purpose either to put the reader into the right frame of mind for the understanding or appreciation of the work he is about to read or to supply him with information that

may be necessary to his proper understanding or use of it. When, however, a work is preceded by both a preface and an introduction, *preface* is usually applied to the introductory discourse written, and often also signed, by the author or editor, and *introduction* to the one which is definitely informative rather than personal in its character and usually carries no signature. In extended use *preface* may apply to something which serves as an introduction or prelude (as an introductory work on or a more or less tentative treatment of a subject) <Walter Lippmann's book entitled *A Preface to Morals*> or to an act or speech, or series of acts or speeches, which has no other purpose than to prepare the way for what is to follow <they walked in the rose garden. "Do you read Utopias?" said Mr. Dirck, cutting any *preface*, in the English manner—*H. G. Wells*> <we fight for lost causes because we know that our defeat and dismay may be the *preface* to our successor's victory—*T. S. Eliot*> **Foreword** when used in place of *preface* in reference to front matter of a book may suggest simplicity and brevity of treatment and more often than not applies to material prepared by someone other than the author. **Exordium**, a technical term of rhetoric, applies to a formal beginning, especially of an oration but sometimes of a written exposition or argument, in which the speaker or writer makes an approach to his subject by remarks intended to awaken the interest of his auditors or readers and to pave the way for their understanding of what he is to say or for their acceptance of his conclusions. **Preamble** applies to a formal introduction, often only an introductory paragraph (as in a statute, a constitution, a treaty, a deed, or a set of resolutions) which states the grounds, purposes, or guiding principles of what follows. It is sometimes used as a designation of a long monotonous preface.

intrude, obtrude, interlope, butt in are comparable when meaning to thrust oneself or something in without invitation or authorization. **Intrude** both transitively and intransitively carries a strong implication of forcing someone or something in without leave, without right, or against the will of others; it often connotes rudeness, officiousness, or invasion of another's property, time, or personal privacy <this court always had disavowed the right to *intrude* its judgment upon questions of policy or morals—*Justice Holmes*> <Sergeant Lumley, unfairly *intruding* his official superiority into this theological discussion —*Sayers*> <I stood there, feeling very abashed at *intruding* on all these busy people—*Mannix*> **Obtrude** in this relation retains much of its basic notion of pushing or extending something into view; it may imply nothing beyond this fact <I intended plain prose, but a rhyme *obtruded* itself and I became poetical—*Cowper*> or it may suggest the impropriety and objectionableness of the act or the disagreeableness of the offense <the first sin against style as against good manners is to *obtrude* or exploit personality—*Quiller-Couch*> **Interlope** implies an interposition of oneself in a place or position which has an injurious effect on one or both of the persons or things concerned <he regarded her new acquaintance as an *interloping* rival for her hand> <he dealt with the Communists as a Groton football coach with a bunch of *interloping* ruffians who don't know the rules of the game—*Time*> **Butt in** implies an abrupt or offensive intrusion suggestive of the manner in which a horned animal attacks its enemy; in this sense the term usually suggests absence of ceremony, a sense of propriety, or decent restraint (it's a thankless job to *butt in* and tell a man that in your important opinion his wife is a vampire bat—*Sinclair Lewis*)

⟨he left behind a big, white turkey gobbler. It would *butt in* when we fed the horses and was a general nuisance—*Siberis*⟩

invasion, incursion, raid, inroad are comparable when meaning an entrance effected by force or strategy. **Invasion** basically implies entrance upon another's territory with such hostile intentions as conquest, plunder, or use as a basis of operations ⟨the Roman *invasion* of Britain⟩ ⟨in a well-planned Hitlerian *invasion* there is at first no shooting save by those who are taking their own lives—*New Republic*⟩ In nonmilitary use it may imply encroachment, trespass, or an intrusion that involves an aggressive or hostile purpose ⟨I was forced by my duty to the Constitution to refuse to answer on the grounds that it was an *invasion* of a citizen's basic rights—*Driscoll*⟩ ⟨the alarmist takes every sound as an *invasion* by burglars—*Fishbein*⟩ Sometimes it implies no more than entrance with or as if with a rush by a horde or crowd ⟨the annual *invasion* of the Connecticut suburbs by what its victims call "the summer people" is complete—*Weidman*⟩ **Incursion**, especially in military use, carries a stronger connotation of suddenness, unexpectedness, or haste than *invasion*; it often also suggests an immediate end and a quick withdrawal when the end is achieved ⟨the American colonists were in constant fear of *incursions* by the Indians⟩ ⟨English intruders landed at Golfo Dulce in 1684, made an *incursion* inland, and retired—*Jones*⟩ In its extended sense *incursion* applies chiefly to an invasion in large numbers of something dreaded or harmful, undesirable, but not necessarily inimical ⟨the peace of the neighborhood was frequently broken by *incursions* of gangs of small boys⟩ ⟨the barrier should have been sufficient to protect the adjoining owner against the *incursions*, not of all pigs, but of pigs of "average vigor and obstinacy"—*Cardozo*⟩ **Raid**, frequent in military use for a swift, sud-

den invasion (as of cavalry or of air forces) may or may not suggest more preparation, more strategy, and more fury in attack than *incursion*, its close synonym ⟨the *raids* in the Shenandoah Valley by Forrest's Confederate cavalry during 1863⟩ ⟨nightly bombing *raids* on London⟩ In international law, however, *raid* is applicable specifically to an incursion of armed forces that are unauthorized or unrecognized by any state into a country that is at peace; thus, an *incursion* of armed persons on one side of a border or boundary line into the adjoining country for a predatory or hostile purpose is technically a *raid*. In its extended use *raid* applies to a sudden descent or a flurry of activity intended usually to obtain the use, control, or possession of something; thus, officers of the law conduct a *raid* upon a gambling resort or a place where liquor is illicitly made or sold to obtain evidence and arrest offenders ⟨the *raids* of government and industry on college personnel, especially in the fields of science—*J. R. Butler*⟩ ⟨before the last *raid* on the railroads by the various unions—*Arden*⟩ **Inroad** may apply to a sudden hostile incursion or a forcible entering ⟨aggressive war, as distinguished from mere plundering *inroads*—*Freeman*⟩ ⟨protecting their crops of barley from the *inroads* of sparrows—*Frazer*⟩ but the term is also applied to an invasion that involves encroachment or advance especially at the expense of someone or something ⟨foil and plastic are making *inroads* where glass once held undisputed sway—*Ericson*⟩ ⟨activities that make *inroads* upon his time and his health⟩

Ana aggression, *attack, offense, offensive: trespass, violation, transgression, infringement, infraction, *breach: intruding or intrusion, interloping, butting in, obtruding or obtrusion (see corresponding verbs at INTRUDE): encroachment, entrenchment (see corresponding verbs at TRESPASS)

Ana initiate, inaugurate (see BEGIN): institute, *found, establish

2 **Invent, create, discover** are comparable terms frequently confused in the sense of to bring into being something new. **Invent** (see also CONTRIVE) may stress fabrication of something new through the exercise of the imagination ⟨a poet is a maker, as the word signifies: and he who cannot make, that is, *invent*, hath his name for nothing—*Dryden*⟩ ⟨his fund of knowledge seemed inexhaustible, for what he didn't know he *invented*—*Alvin Redman*⟩ ⟨the little stories she had *invented* for her two small daughters—*Current Biog.*⟩ or it may stress the fabrication of something new and often useful as a result of study and thought; the word therefore often presupposes labor and ingenuity rather than inspiration ⟨if the Semitic letters were not derived from Egypt they must have been *invented* by the Phoenicians—*Clodd*⟩ However, *invent* often stresses the finding, as well as the bringing into being, of something new or hitherto unknown as the result of mental effort ⟨physicists had to save the laws of conservation of energy and conservation of angular momentum . . . a new particle had to be *invented*—*Marshak*⟩ ⟨she was tired of *inventing* means for making the days and nights pleasant and capriciously variable for

others—*Van Vechten*) **Create** stresses a causing of something to exist; it not only implies previous nonexistence but it often suggests an evoking of something into being out of, or as if out of, nothing (as by fiat, by an act of the will, or by inspiration) <God *created* the heaven and the earth—*Gen 1:1*> <the law *creates* rights> <the king *created* an earldom for his favorite> <to this strange force within him, to this power that *created* his works of art, there was nothing to do but submit—*Huxley*> <I do not believe that a sense of justice is innate, but I have been astonished to see how quickly it can be *created*—*Russell*> <modern science, which *created* this dilemma, is also capable of solving it—*Bliven* b. 1889> **Discover** (see also DISCOVER 2; REVEAL) presupposes both the existence of and a lack of knowledge about something; the term therefore implies the finding of such a thing, often as the result of mental or physical effort (as by exploration, investigation, or experiment) <remains of this Belgic culture have often been *discovered*—*Jacquetta & Christopher Hawkes*> <men who were fighting Communism long before McCarthy ever *discovered* it—*Davis*> <William Harvey *discovered* the circulation of the blood> Thus, in discriminative use one *invents* processes or ways of doing something, as well as instruments, tools, implements, or machines, but one *discovers* things which exist but have not yet been known (as lands, stars, or natural laws) <Newton *invented* the differential and the integral calculus . . . and *discovered* the laws of motion—*Darrow*>

inveterate, confirmed, chronic, deep-seated, deep-rooted are comparable when meaning so firmly established or settled that change is almost impossible. **Inveterate** applies especially to something which has persisted so long and so obstinately that it has become a fixed habit or an almost unalterable custom or tradition <the growing infirmities of age manifest themselves in nothing more strongly than in an *inveterate* dislike of interruption—*Lamb*> <supported by precedent so *inveterate* that the chance of abandonment is small—*Cardozo*> When applied to a person, the term implies the formation of a seemingly ineradicable habit, attitude, or way of acting or behaving <an *inveterate* smoker> <an *inveterate* and formidable foe—*Peacock*> **Confirmed** applies chiefly to something which has grown stronger or firmer with time until it resists all attack or assault or attempts to uproot it <a *confirmed* belief in God> <a *confirmed* hatred of a person> <not so easy to say that a *confirmed* anti-American mood has settled on the British people—*Barbara Ward*> Like *inveterate*, it may also apply to a person who is such as he is described in the noun by the strengthening or crystallization of a taste, a vice or virtue, or an attitude <a *confirmed* bache-

lor> <a *confirmed* invalid> <*confirmed* do-gooders always end by doing good by coercion—*Mortimer Smith*> **Chronic** also implies long duration, but it applies either to diseases, habits, or conditions which persist without marked interruption in spite of attempts to alleviate or to cure them or to the persons who are afflicted or affected by such diseases, habits, or conditions <his *chronic* state of mental restlessness—*George Eliot*> <*chronic* bronchitis> <hysterical with failure and repeated disappointment and *chronic* poverty—*Huxley*> <the working scientist . . . must steer a middle course between *chronic* indecision and precipitant judgment—*Eddington*> <a *chronic* faultfinder> **Deep-seated** and **deep-rooted** in their extended senses emphasize rather the extent to which something has entered into the structure or texture of the thing (as a person's body or mind or a people's nature) in which it becomes fixed or embedded <the old, dependent, chaotic, haphazard pioneer instinct of his childhood [was] so *deep-seated*, that . . . he slipped back into the boy he had been before—*Brooks*> <a *deep-rooted* reverence for truth—*John Morley*> <Wagner's bond with this woman was much stronger, more *deep-rooted* and lasting than one had thought—*Heller*>

invincible, unconquerable, indomitable, impregnable, impugnable, unassailable, invulnerable mean proof against attack or defeat. A person or thing is *invincible* or *unconquerable* that presents insuperable difficulties to his or its being overcome or displaced; **invincible**, however, usually implies a quality or character in the person or thing which makes him or it actually or seemingly incapable of being vanquished; **unconquerable** implies rather the fact of having successfully resisted all attempts at subdual or mastery <a resolute, yet not *invincible*, skepticism—*Flew*> <is He still mythologically *invincible*? If He is bound to take up the Devil's challenge, is He equally bound to win the ensuing battle?—*Toynbee*> <he made plan after plan; but each one was discarded because he saw it would encounter *invincible* selfishness, or *invincible* self-sacrifice—*Deland*> <seems to create *unconquerable* difficulties in man's life—*Salisbury*> <the iron face of those men of empire and *unconquerable* will, those Caesars and Napoleons—*L. P. —*H. O. Taylor*) Something material (as a fortress) or intangible (as virtue) is **impregnable** when it is strong enough or sufficiently guarded to repel all attacks or assaults (there is no such thing as *impregnable* defense against powerful aggressors who sneak up in the dark and strike without warning—*Roosevelt*) (Cato . . . was a fanatic, *impregnable* to argument, and not to be influenced by temptation—*Froude*) (there was always a traitor in the citadel; and after he (or generally she) had surrendered the keys, what was the use of pretending that it was *impregnable*?—*Wharton*) A thing is **inexpugnable** or **unassailable** either because it is impregnable or because it offers no point at which it can be attacked or no occasion or reason (as a weakness or a defect) for attacking or impugning (castles were often built at the tops of craggy mountains in the hope that they might be *inexpugnable*) (that we are conscious, sentient, evaluating and thinking creatures . . . is an *inexpugnable* fact of existence—*Nagel*) (nothing but an *unassailable* alibi would save them—*Stong*) (an argument so logical and convincing that it is *unassailable*) A person or thing is **invulnerable** that cannot be wounded or penetrated by a destructive weapon or piercing instrument (they had lived through the Nazi plague and, having survived, were henceforth *invulnerable* to its poison—*Dean*) (ironclad warships were once believed to be *invulnerable*) (how was one to pierce such hidebound complacency? It was *invulnerable* except to the Grace of God—*Mackenzie*)

invite, bid, solicit, court, woo are comparable when they mean to request or encourage a person or a thing to come to one or to fall in with one's plans or desires. **Invite** in its ordinary and usual sense implies a courteous request to go somewhere, do something, or give some assistance which it is assumed will be agreeable or at least not disagreeable to the person invited (invite a few friends to dinner) (invite an acquaintance to spend the night) (invite an audience to express their opinions) (he had *invited* all the girls, including Miss Tolman, to go out with him on various occasions, but . . . everyone declined his offer—*Woodfin*) In this sense the word usually implies providing an opening for those who otherwise might hesitate to go, or do, or give without such a request. Consequently, in its extended sense *invite* implies providing an opening by such means as a seductive manner or a challenging statement or policy that serves as an encouragement or temptation to another (dress so conspicuously as to *invite* unwelcome attentions) (fairly imminent collisions *invited* by the Captain's inept conning—*Heggen*) (the writer who brings a new revelation is not necessarily called upon to *invite* the execration of the herd—*Ellis*) **Bid** (see also COMMAND *vb*) is increasingly uncommon in the sense of to request the presence of (as at a feast or great occasion) (as many as ye shall find, *bid* to the marriage—*Mt* 22:9) but *bid* (usually with *for*), from its sense to offer a price for something up for sale, has developed an extended use in which it means to make an effort to win or attract or an appeal (as for sympathy) and in this use sometimes comes close to *invite* in conveying the notion of offering a tempting opening

for something (in his difficult position he could not *bid* for their affection; he wanted only their obedience—*Douglas*) (stood for Congress in this virgin district, *bidding* for the support of labor—*Green Peyton*) **Solicit** (see also ASK 2) differs from *invite* in stressing urgency or need rather than courtesy in requesting or encouraging (we may come to feel a little impatient at having our pity so continually *solicited*—*Edmund Wilson*) (moral utterances which *solicit* the obedience of children—*Melden*) **Court** basically implies an endeavor to win the favor of a person (as by flattery, attentions, or making love). Only in its extended sense does it imply a providing of a favorable opportunity by tempting or encouraging something to come to one or to happen to one (he kept himself somewhat aloof, seeming to avoid notice rather than *court* it—*Arnold*) (so long as a scientific textbook is obsolete in a decade or less, to poetize science is to *court* mortality—*Lowe*) **Woo** basically implies amorous courting; consequently, in its extended sense it frequently stresses a drawing to or upon one by allurements, blandishments, and extravagant promises (Herodotus in search of a public . . . found a favorable "pitch," as we should say, and *wooed* an audience to him—*Quiller-Couch*) (the young author trying to *woo* his reader, via heavy humor—*Keene*) Occasionally the word is very close to *court* and scarcely distinguishable from it (you . . . *woo* your own destruction—*Shak.*)

3 **Involve, implicate** mean to bring a person or thing into circumstances or a situation from which he or it is not easily freed. **Involve** (see also INCLUDE) need not impute disgrace to the circumstances or situation but it usually implies complication or entangling and often suggests extreme embarrassment (the war may not end until every nation in Europe is *involved* in it) (the case of a judge *involved* by the exigencies of his office in a strong conflict between public duty and private interest or affection—*Colvin*) (had been *involved* in some affair that made it uncomfortable for him to return to live in that city—*Anderson*) (the controversies . . . moved on in all their ugliness to *involve* others—*J. M. Brown*) **Implicate** usually implies a disgraceful connection or one that casts a reflection on a person's reputation; it may even imply definite proof of association with a crime (the detectives discovered that an uncle of the child was *implicated* in its kidnapping) (they were unable to *implicate* any of the suspected political leaders in the conspiracy to defraud the city) (all men, even the most virtuous and wise, are *implicated* in historic evil—*Niebuhr*)

irascible, choleric, splenetic, testy, touchy, cranky, cross mean easily angered or enraged. **Irascible** implies the possession of a fiery or inflammable temper or a tendency to flare up at the slightest provocation (the *irascible* but kindhearted deity who indulges in copious curses to ease his feelings—*Cohen*) (a peppery and *irascible* old gentleman) **Choleric** implies excitability of temper, unreasonableness in anger, and usually an impatient and uniformly irritable frame of mind (that in the captain's but a *choleric* word, which in the soldier is flat blasphemy—*Shak.*) (a testy and *choleric* gentleman easily wrought into passion—*Cooper*) **Splenetic** implies a similar temperament, but one especially given to moroseness and fits of bad temper which exhibit themselves in angry, sullen, or intensely peevish moods, words, or acts (that *splenetic* temper, which seems to grudge brightness to the flames of hell—*Landor*) (he was not *splenetic*: nay, he proved in the offending volume he could be civil, courteous, chivalrous—*Meredith*) **Testy** implies irascibility occasioned by small annoyances (the *testy* major was in fume to find no hunter standing waiting—*Masefield*) (he raged . . . he was ever more autocratic, more *testy*—*Sinclair Lewis*) **Touchy** suggests readiness to take offense; it often connotes undue irritability or oversensitiveness (I am not *touchy* under criticism—*Stevenson*) (touchy about their own sacred symbols and alert to interpret any slight as an insult—*Blanshard*) **Cranky** and **cross** often mean little more than irritable and difficult to please. But **cranky** may carry an implication of the possession of set notions, fixed ideas, or unvarying standards which predispose one to anger or a show of temper when others (as in their speech, conduct, requests, or work) do not conform to these standards (a *cranky* critic) (a *cranky* employer) (a *cranky* teacher) (old age seemed to settle on me; I grew nervous, *cranky* and thin, I quarreled with the travelers—*Rosenfeld*) **Cross**, on the other hand, may imply a being out of sorts that results in irascibility or irritability but only for the duration of one's mood (sometimes, when I am *cross* and cannot sleep, I engage in angry contests with the opinions I object to—*L. P. Smith*) (the attempts to persuade the Intelligent Woman that she is having a glorious treat when she is in fact being . . . bored and tired out and sent home *cross* and miserable—*Shaw*)

irksome, tiresome, wearisome, tedious, boring mean burdensome because tiring or boring or both. A person or thing is **irksome** that inspires distaste, reluctance, or impatience because of its demand for effort not made easy by interest (the difficulty of grasping abstract statements made learning very *irksome* to me—*Symonds*) (I did not feel any longer . . . the restless and *irksome* desire to contrive skimpy rendezvous—*Edmund Wilson*) (he laid down his *irksome* editorial duties and spent the next fifteen years in farming—*F. H. Chase*) A person or thing is **tiresome** that is dull and unenlivening and therefore is either intensely boring or soon productive of fatigue (it is *tiresome* to be funny for a whole evening—*Scott*) (the second curate was Chator, who was so good as sometimes to be nearly *tiresome*—*Mackenzie*) (we think of rain as *tiresome* and uncomfortable—*Binyon*) (the importunity of the little boys was *tiresome* when one wanted to be alone—*Huxley*) A person or, especially, a thing is **wearisome** that exhausts one's strength or patience through long-continued or constant call for effort, exertion, or attention, or through tiresome uniformity of character (these high wild hills and rough uneven ways draws out our miles, and makes them *wearisome*—*Shak.*) (the same *wearisome* round of stereotyped habits—*Wilde*) (the acquisition of exact knowledge is apt to be *wearisome*, but it is essential to every kind of excellence—*Russell*) A person or thing is **tedious** that is tiresomely monotonous, slow, or prolix (life is as *tedious* as a twice-told tale vexing the dull ear of a drowsy man—*Shak.*) (they had no longer any surprises for me . . . I knew pretty well what they would say; even their love affairs had a *tedious* banality—*Maugham*) A person or thing is **boring** that causes boredom; the term is perhaps the most positive of the group since it implies an active depressing, wearying, or annoying (the story is badly cluttered by unnecessary and *boring* wordiness—*New Yorker*) (he's so *boring* . . . I hate *boring* people. I'm out for a good time—*Lowry*)

irrational, unreasonable are comparable when meaning not governed or guided by reason. Both terms have been used occasionally in the sense of not having the power to reason (nothing has a greater effect on all plants and *irrational* animals—*Hume*) (whilst his fellowman . . . must as the *unreasonable* beast drag on a life of labor—*Southey*) Except in technical senses (as in mathematics) both words apply usually to men, their acts, utterances, feelings, policies, and demands. **Irrational** may imply a lack of usual or normal mental control and powers (the patient was *irrational* during the course of his fever) but more often it suggests a lack of control or guidance by the reason, or direct conflict with reason's dictates; it therefore comes close to *absurd, illogical, foolish, preposterous, senseless, or fantastic* (governed by an *irrational* fear) (irrational beliefs) (an *irrational* policy) (his temperamental impulse to energetic practical action

... and the reserve, passivity, and isolation which myopia enforced, seemed to him absolutely *irrational*—*Ellis*) (though normal and very intelligent in most respects Mrs. Lincoln was *irrational* on one subject: she could not think straight in matters that pertained to money—*R. P. Randall*) **Unreasonable** implies guidance or control by some force (as self-will, passion, ambition, greed, or stubbornness) which makes one deficient in judgment or good sense. As applied to one's acts or utterances, it suggests lack of justification by reason; the term therefore comes close to *inequitable*, *immoderate*, *excessive*, *unfair*, or *extravagant* (you will not be so *unreasonable* as to send your child out in this storm) (his demands are *unreasonable*) (obstinate and *unreasonable* pertinacity) (an *unreasonable* price for beef) (the earnings . . . were found materially in excess of a fair return, and the general level of their rates was found unjust and *unreasonable*—*J. C. Nelson*) (it is a little *unreasonable* to find fault with his maxims because they do not apply to all times and places—*A. M. Young*)

Ant rational —*Con* reasonable (see **RATIONAL**): *wise, judicious, sage, sapient, prudent, sane, sensible: *logical

irregular, **anomalous**, **unnatural** mean outside the sphere of what conforms to or is explainable by law, rule, custom, or principle. **Irregular** implies failure to conform to a rule, a law, or a pattern, especially to one imposed for the sake of uniformity in method, practice, or conduct; thus, an *irregular* marriage is one that does not conform to the regulations of church or state; an *irregular* verse does not correspond to an accepted metrical pattern for its type; guerrilla warfare is called *irregular* because it does not accord with the practice of civilized nations or conventional military theory; *irregular* conduct may or may not be morally reprehensible, but it defies the code or standard of the community or class (there are always *irregular* fluctuations of the seasonal weather—*Ellis*) (made a strong appeal for the highest standards of medical education in an effort to combat *irregular* practitioners—*Viets*) (the chicanery was gross, the forgery patent, the procedure *irregular* and illegal—*Woodward*) **Anomalous** stresses lack of conformity to what might be expected of a thing because of the class or type to which it belongs, the laws which govern its existence, or the environment in which it is found (all seven of us . . . appeared on the show under pseudonyms. Which may sound highly *anomalous*, considering that we're the children of vaudevillians, a sect not usually antipathetic to publicity—*Salinger*) Sometimes it specifically implies inconsistency or a conflict of principles (acts so *anomalous*, in such startling contradiction to all our usual ways and accepted notions of life and its value—*L. P. Smith*) and sometimes it specifically means unclassifiable or indefinable (anomalous literary works such as Holmes's *Autocrat of the Breakfast Table*) (anomalous emotions) Again, it suggests the absence of the character or of the characteristics essential to a thing of its kind (a few judges find in her last book new support for the *anomalous* opinion that its author was a great artist, but insignificant—*Beck*) or it suggests a contradiction between the professed aims or intentions of a person or institution and the conditions in which that person or institution exists or finds himself or itself at a given time (the *anomalous* position of the free Negro in the slave states—*E. T. Price*) (President Wilson found himself in an *anomalous* position when Congress rejected his proposal that the United States enter the League of Nations) **Unnatural** is the strongest of these words in its implication of censure, especially

when it implies a violation of natural law or of principles accepted by all civilized men as based on reason and essential to the well-being of society. In such cases it often specifically connotes moral perversion (an *unnatural* practice) (she had been vicious and *unnatural*; she had thriven on hatred—*S. S. Van Dine*) or abnormal indifference or cruelty (an *unnatural* parent) Sometimes the word merely means contrary to what is received as *natural*, either because it is not in accordance with the normal course of nature (snow in May is *unnatural* in this region) or because it is not in keeping with what one regards as normal, balanced, proper, or fitting under the circumstances (an *unnatural* appetite for acid foods) (a poetic language which appears natural to one age will appear *unnatural* or artificial to another—*Day Lewis*) (thy deed, inhuman and *unnatural* provokes this deluge most *unnatural*—*Shak.*) (a daughter who left her father was an *unnatural* daughter; her womanhood was suspect—*Woolf*) **Ana** aberrant, *abnormal, atypical: *exceptional: singular, unique, *strange, peculiar, odd, queer
Ant regular —*Con* natural, normal, typical (see **REGULAR**): *usual, customary, wonted, accustomed, habitual: licit, legitimate, legal, *lawful

irreligious, **unreligious**, **nonreligious**, **ungodly**, **godless** mean not religious or not devoted to the ends of religion. **Irreligious** is not only the most common of the negative forms of *religious* but the most clearly defined in meaning, for it implies not merely lack of religion but hostility to religion or courses in opposition to it or in violation of its precepts (that non-churchgoers are not necessarily *irreligious*—*Streit*) (It may even suggest impiety, immorality, or blasphemy (it is unworthy a religious man to view an *irreligious* one either with alarm or aversion—*Carlyle*) (they are so *irreligious* that they exploit popular religion for professional purposes without delicacy or scruple—*Shaw*) **Unreligious**, a somewhat uncommon term, implies nothing more than lack of religion; it therefore applies aptly to men, their utterances, or their works and suggests merely the absence of religion or of religious training or religious ideas (the popular poetry . . . became . . . *unreligious* . . . in some parts *irreligious*—*Milman*) **Nonreligious** applies not so much to persons as to institutions, activities, projects, and themes for art that are outside the sphere or province of religion or not under the control of a religious body; it therefore comes close in meaning to *secular* (see under **PROFANE** 1) (*nonreligious* education) (*nonreligious* charitable societies) (made it hard for them to trust a *nonreligious* institution, such as the State University—*Amer. Guide Series: Ind.*) **Ungodly** often comes close to *irreligious*, but it carries a stronger suggestion of disobedience to or defiance of divine law (blessed is the man that walketh not in the counsel of the *ungodly*—*Pss* 1:1) (they decided to leave so *ungodly* a land—*Usher*) **Godless** commonly implies atheism or agnosticism and often definitely implies rejection of religion (*godless* philosophers) (*godless* teachings) (here were decent *godless* people: their only monument the asphalt road—*T. S. Eliot*) (fiercely predicting the end of Lorenzo and all his *godless* court—*Moorehead*)

irritable, **fractious**, **peevish**, **snappish**, **waspish**, **petulant**, **pettish**, **huffy**, **fretful**, **querulous** apply to persons or to their moods or dispositions in the sense of showing impatience or anger without due or sufficient cause. **Irritable** implies extreme excitability of temperament, often associated with or arising from fatigue or physical or mental

distress, that makes one exceedingly easy to annoy or difficult to please (mental work brings on . . . an *irritable* and nervous disgust—*Arnold*) (a hot day and the clerk in the store was *irritable* . . . had not slept much the night before and he had a headache—*Saxon*) *Fractious* carries a stronger implication of willfulness or of unruliness than *irritable*, and although it also implies extreme excitability, it suggests even greater loss of self-control; the term is often applied to animals as well as to persons (those who are spoilt and *fractious*, who must have everything their own way—*Swinerton*) (he was *fractious* in the saddling paddock and slow leaving the starting gate—*Audax Minor*) *Peevish* implies childish irritability and a tendency to give expression to petty complaints or ill-humored trivial criticisms (peevish because he called her and she did not come, and he threw his bowl of tea on the ground like a willful child—*Buck*) (I have heard some London wits, rather *peevish* at Macaulay's superiority, complain that he occupied too much of the talk—*Thackeray*) *Snappish* implies irritability or sometimes peevishness that manifests itself in sharp, cutting questions, comments, or objections that discourage conversation or sociability (an extremely unlikable, *snappish* old fellow) (an obligato of bickering and *snappish* comment—*Bester*) *Waspish* stresses testiness rather than irritability, but it implies a readiness to sting or hurt others without warrant or without sufficient warrant (beware of his *waspish* temper) (her comments may be amusing but they are always *waspish*) (a little *waspish* woman who . . . snapped out at a man who seemed to be with her—*C. S. Lewis*) *Petulant* usually suggests the sulkiness of a spoiled child as well as peevishness and capricious impatience (as he had no means of confuting his nephew, all he could do . . . was to utter *petulant* remarks on his powerlessness to appear at the dinner table that day—*Meredith*) (in his youth the spoiled child of Boston, in middle life he was *petulant* and irritable, inclined to sulk when his will was crossed—*Parrington*) *Pettish* implies sulky or childish ill humor (as of one who is slighted or offended) (said many careless, many foolish, many merely *pettish* things—*Fadiman*) (Stephen's resistance was but the *pettish* outburst of a ruined man—*J. R. Green*) *Huffy* also implies a tendency to take offense without due cause, but it suggests more of a display of injured pride than *pettish* (when he is reproved, he is *huffy* for the rest of the day) (I bear no grudge at all against you. I am not *huffy* and crabbed—*Gregory*) *Fretful* implies irritability and restlessness that may manifest itself in complaints or in a complaining tone of voice (a *fretful* child) but often is merely suggested by a lack of ease and repose (all the *fretful* doubts and perturbations of the conscience most men know—*Wolfe*) (the air, breathed many times and spent, was *fretful* with a whispering discontent—*Millay*) (weary days of *fretful* argument—*Charles & Mary Beard*) *Querulous* implies an often habitual discontent that manifests itself in whining complaints or in fretfulness of temper; it often also suggests petulance (her *querulous* and never-ending complaints—*Gaskell*) (the man himself grew old and *querulous* and hysterical with failure and repeated disappointment and chronic poverty—*Huxley*) *Ana* cranky, cross, testy, touchy, choleric, splenetic, *irascible

Ant easygoing —*Con* *amiable, good-natured, complaisant, obliging: genial, sociable, affable, cordial, *gracious

irritate, **exasperate**, **nettle**, **provoke**, **aggravate**, **rile**, **peeve** are comparable when meaning to excite a feeling of angry annoyance in a person. Something which **irritates** greatly displeases or offends and evokes a display of feeling rang-

ing from momentary impatience to an outburst of rage (the chattering crowd, with their rude jokes . . . *irritated* him sharply—*Anderson*) (her intensity, which would leave no emotion on a normal plane, *irritated* the youth into a frenzy—*D. H. Lawrence*) Something which **exasperates** arouses bitter or intense irritation. The word, however, sometimes expresses nothing more than keen vexation or annoyance (an opportunity to . . . aggravate his poor patient wife, and *exasperate* his children, and make himself generally obnoxious—*Simeon Ford*) (though she could *exasperate* she could never offend—*H. G. Wells*) Something which **nettles** irritates sharply but momentarily and stings or piques more than angers (a touch of light scorn in her voice *nettled* me—*W. J. Locke*) Something which **provokes** awakens strong annoyance or vexation and often incites to action (a Tory resident who *provoked* local animosities and was charged with high treason—*Amer. Guide Series: Conn.*) (they were definitely *provoked* to extremity before they did this deed—*Ingamells*) (he is *provoked* with me for not talking more—*Burney*) Something which **aggravates** (see also INTENSIFY) arouses displeasure, impatience, or anger often through prolonged or repeated action (nothing so *aggravates* an earnest person as a passive resistance—*Melville*) (it is *aggravating* to have you talking about so small a business—*Shaw*) Something which **riles** disturbs one's serenity or peace and agitates as well as angers (with raucous taunting and ribald remarks to *rile* up the proprietor—*White*) Something which **peeves** excites often petty or querulous fretfulness or a tendency to be easily irritated (he is easily *peevied* after a restless night) (when she ventured to criticize it, even mildly, he was *peevied*—*Auchincloss*)

Ana *annoy, vex, irk, bother: incense, *anger, madden, enrage, infuriate: *offend, affront: fret, chafe (see ABRABE) *Con* appease, mollify, conciliate, propitiate, placate, *pacify: gratify, *please, gladden, delight

isolate, **segregate**, **seclude**, **insulate**, **sequester** are comparable when they mean to separate from the usual or natural environment, but they are rarely interchangeable because their other and differentiating implications are often stressed. **Isolate** implies a detachment of someone or something from his or its usual environment so that he or it will not affect or be affected by others. The word is sufficiently general that it may be employed in reference either to an actual separation or to a separation that is merely virtual, arbitrary, or speculative (several villages were *isolated* by the storm) (find an *isolated* spot in which to live) (isolate scarlet fever patients) (under present conditions no country can remain *isolated*) (he was singularly *isolated*, untouched by the interest or the gossip or the knowledge of the life about him—*Deland*) (we must remember that religion, like some chemical substance, is never found pure, and it is not at all easy to *isolate* it in order to learn its properties—*Inge*) **Segregate** also applies to both persons and things and usually refers to them as a group separated from the mass or main body; its secondary implication is often, therefore, a collection in one place, one class, or one mass and it may in addition imply a holding incommunicado (segregate lepers from the rest of the population) (segregate hardened criminals from first offenders in prisons) (that innate instinct which ever aimed at uniting, not *segregating* groups of Christians—*D. P. Hughes*) **Seclude** implies a removal or withdrawal from external influences; it is therefore often used reflexively or at least in such a way as to imply acceptance of the protection afforded by such removal or withdrawal (secluded in their childhood from all evil influences) (so she sat hard and close at her writing

table from half past nine to twelve every morning, *secluded* and defended from all the world—*H. G. Wells*) <if we are to get the most and the best out of life, we must not *seclude* ourselves from these things—*Benson*> *Insulate* means to isolate, especially by something which serves as a barrier to the escape of what is within or the entrance of what is without. Consequently it implies retention of some power in a condition approaching fullness or purity <none of us can touch his later work . . . , it is . . . too *insulated* to allow an easy communication of its powers—*Day Lewis*> <one touch of Comedy would destroy any tragedy (unless . . . , as is the case with Shakespeare, the comic scenes were kept *insulated* from instead of integrated with the others)—*Krutch*> *Insulate* is employed technically to imply the use of something to cut off free passage (as of electricity or heat or sound) <electric wires should be *insulated* with a nonconducting substance> <the house was *insulated* by interlining the walls with rock wool> Basically *sequester* implies a setting apart (as from others or for a particular purpose) and in itself, as apart from context, ordinarily conveys no more than this <the period when all copper was *sequestered* for war use—*Science*> <a confederate who had boarded the train at a previous stop to hold down the seats we were to occupy. When the train pulled in we rushed it in valiant formation and dropped panting in our nobly *sequestered* seats—*Cassidy*> Colored by context it may take the place of *isolate* (no crusading idealist in history ever thought it right to *sequester* himself in an estate comprising more than 300,000 acres with exclusive possession of fifty miles of California shore—*Thomas*) or of *segregate* <most schools . . . have *sequestered* the slow, average and quick students of both races and let each group progress at its own pace—*J. B. Martin*> or of *seclude* <this typical Connecticut hill town, *sequestered* from the rush of modern traffic, retains much of its old-time charm—*Amer. Guide Series: Conn.*> Sometimes, however, it may imply a setting apart by taking into one's possession <the divorced wife of painter André Derain, . . . had *sequestered* Derain's studio—*Time*> or by confiscating <the police continued to uncover and *sequester* large amounts of arms and ammunition—*Woolbert*> In legal use *sequester* implies a separation, usually for the time being, of property or income from the owner until some claim or obligation has been satisfied <the bishop *sequestered* the profits of the vacant benefice for use by the next incumbent> <*sequester* a debtor's estate>

item, detail, particular are comparable when meaning one of the things, either separate and distinct or considered so, which constitute a whole. **Item** applies mainly to each thing that is put down in a list (as of things needed, things to be done, or things to be seen) or in an account, a record, or an inventory; sometimes the term applies to the actual

thing as apart from the list <the bill has ten *items*> <each separate *item* of income—*Hobson*> <the dog too went: the most noble-looking *item* in the beggarly assets—*Conrad*> <a mere *item* in the year's publishing list—*Brogan*> **Detail** (see also **PART**) applies to each separate thing which enters into the building or construction of some such thing as a house, a painting, or a narrative or enters into such an activity as the performance of a task or job, the pursuit of a career, or the living of a life; often, in this sense, *detail* is contrasted with *structure, outline, design, or plan* <while . . . laboring indefatigably in the *details* of domestic life on a farm, her outlook was large—*Ellis*> <alike in its large outlines and its small *details*, Chinese life is always the art of balancing an aesthetic temperament and guarding against its excesses—*Ellis*> Often the singular form in this sense is used as a collective noun <the poet's chief aim . . . is to communicate not the exact *detail* of an experience, but its tone and rhythm—*Day Lewis*> <report an incident in *detail*> **Particular** may imply a relation to something general or universal <it foolishly derides the universal, saying that it chooses to consider the *particular* as more important—*Quiller-Couch*> but more often it implies a relation to a whole and stresses that relationship more than *item* or *detail*; in this sense *particular* emphasizes the smallness and the singleness and concreteness of each item or detail; thus, in law, a bill of *particulars* is a statement of the items of a plaintiff's claim or a defendant's counterclaim <I do not care to go into the *particulars* of the agreement> <the real question is what is the world . . . and that can be revealed only by the study of all nature's *particulars*—*James*> <praised the party accomplishment, and came to *particulars* in an attack upon the . . . opposition—*Paxson*> <we know nothing of their language and only . . . minor *particulars* of their social customs and religion—*R. itinerant *adj* **Itinerant, peripatetic, ambulatory, ambulant, nomadic, vagrant** mean having no fixed or settled station but moving from place to place. **Itinerant** is applicable chiefly to individuals or to groups whose calling or office requires travel along a circuit or route <an *itinerant* player> <an *itinerant* merchant> <an advantage *itinerant* preachers have over those who are stationary, the latter cannot well improve their delivery of a sermon by so many rehearsals—*Franklin*> <a parcel of shabby, *itinerant* tattooers, who . . . stroll unmolested from one hostile bay to another—*Melville*> <a lazy, vagabondish, *itinerant* farmer, moving from one failure to another—*Hendrick*> **Peripatetic** may be applied to activities carried on while walking or moving about <*peripatetic* teaching> <*peripatetic* habits, favorable to meditation—*Carlyle*> or to persons moving about on foot <they demand a *peripatetic* spectator; one must see this group from all angles to realize the purpose of the sculptor—*Upjohn*> or more often traveling from place to place <that *peripatetic* digester of continents, John Gunther, has at last come home—*Fadiman*> <he was a *peripatetic* firebrand. He had to be. Any area in which Mann was active was soon, for various reasons, too hot to hold him—*Mallon*> Sometimes, and often with a light or whimsical note, the word suggests restlessness or an unsettled state or being constantly on the go <his camera is never aimlessly *peripatetic*: either there is some important action that must be observed or

Bedouins are a *nomadic* tribe found in the deserts of Arabia, Syria, and North Africa> <a system that compels a large segment of labor to be *nomadic*, trailing endlessly from end to end of the country—*G. W. Johnson*> **Vagrant** (see also *vagrant n* under VAGABOND) as applied to human beings stresses lack of a fixed place of residence but unlike *nomadic* is applicable typically to individuals rather than to groups; in this use it commonly lacks the pejorative quality of the corresponding noun <the humility with which this *vagrant* and utterly original genius turned to them for wisdom—*Sinclair Lewis*> <I must go down to the seas again, to the *vagrant* gypsy life—*Masefield*> But in its more common application to things *vagrant* usually stresses the slight, fleeting, ephemeral quality of what is vaguely wandering rather than either firmly fixed or following a fixed course <to catch *vagrant* currents of air, door and window flaps were propped open—*Heiser*> <nature itself in its *vagrant* moods and infinite variety—*Schlesinger* d. 1965> <her mind, called *vagrant*, is like a butterfly, seemingly fragile and even awkward in erratic flight—*Beck*> <tasks too *vagrant* or too taxing ever to have been accomplished—*Hilton*> <the great increase in numbers of *vagrant* boys during the depression> **Ana** wandering, roving, rambling, straying, roaming, ranging (see WANDER): moving, shifting (see MOVE vb)

jeremiad *tirade, diatribe, philippic

jerk, snap, twitch, yank mean to make a sudden sharp quick movement. **Jerk** implies especially such a movement that is graceless, forceful, and abrupt <thought the train would never start, but at last the whistle blew and the carriages *jerked* forward—*Carter*> < *jerked* her head back as if she'd been struck in the face—*Dorothy Baker*> **Snap** may imply a quite quick action abruptly terminated (as a biting or trying to bite sharply or a seizing, clutching,

snatching, locking, or breaking suddenly) (the hounds were fine beasts . . . lank and swift as they bent over the food to *snap* it into their jaws and swallow it quickly—*Roberts*) or a taking of possession with avidity (the syndicate *snapping* up land as soon as it is for sale) or sometimes specifically an uttering with the brisk sharpness of a bite (*snapped* at her because Theophilus did not eat enough—*Deland*) *Twitch* may imply quick, sometimes spasmodic, and often light action combining tugging and jerking (shrunk body continued to jerk and quiver, fingers *twitching* at his gray beard—*Gerald Beaumont*) (one Pan ready to *twitch* the nymph's last garment off—*Browning*) (put out his hand to *twitch* off a twig as he passed—*Cather*) *Yank* implies a quick and heavy tugging and pulling (watches her two-year-old stand passive while another child *yanks* his toy out of his hand—*Mead*) (she *yanked* the corset strings viciously—*Chidsey*) (by means of long blocks and tackle they set to *yanking* out logs—*S. E. White*)

join, **conjoin**, **combine**, **unite**, **connect**, **link**, **associate**, **relate** are comparable when meaning to attach or fasten one thing

to another or several things to each other or to become so attached or fastened. **Join** stresses the bringing or coming together into contact or conjunction of two or more clearly discrete things (join two pieces of wood by dovetailing them) (join skirt lengths by seams) (join hands) (join a man and woman in matrimony) (where the Mohawk river joins the Hudson) (the opponents of the proposal decided to join forces) **Join** is the specific term when one becomes a member of a group or enters into the company of others as an equal (join a society) (join a church) (join a group at a reception) (join the army) **Conjoin** usually emphasizes both the separateness and distinctness of the items to be joined and the unity that results from their being joined (from inborn indolence, conjoined with avarice, pride, and lust of power, had sprung slavery in all its protean forms—*Henry Wilson*) (Death Valley probably received the discharge of both the Amargosa and Mohave rivers, whose conjoined waters entered from the south—*Jour. of Geology*) **Combine** in this relation (see also **UNITE** 2) adds to join the implications of a mingling or blending and may stress more heavily the idea of a common purpose or end; it is therefore used of two or more, often immaterial, things that may lose or seem to lose their identities and become merged in each other (combine the ingredients for a cake) (a gift for combining, for fusing into a single phrase, two or more diverse impressions—*T. S. Eliot*) (with this quality of temperance was combined in Socrates a rare measure of independence and moral courage—*Dickinson*) (combined literary distinction with a high degree of historical objectivity—*Van Alstyne*) **Unite**, like **combine**, implies a blending that effects the loss of individual identity of the elements, but, like **conjoin**, **unite** stresses the singleness of the result (unite two pieces of metal by welding) (our peace will, like a broken limb united, grow stronger for the breaking—*Shak.*) (particles which can unite to form a new compound—*T. S. Eliot*) (in France the whole people saw at once what was upon them; the single word *patrie* was enough to unite them in a common enthusiasm and stern determination—*Inge*) **Connect** implies a loose or, at least, an obvious attachment of things to each other and the preservation not only of each thing's identity but also of the evidence of its physical or logical separateness; in this way it is distinguishable from **join** when physical attachment is implied; thus, a wall is built up of bricks joined, rather than connected, together by cement but a chain is made by connecting a succession of steel links; often **connect** implies an intervening element or medium which permits joint movement and intercommunication (connect two railway coaches by means of a coupler) (connect two islands with a bridge) (ligaments serve to connect bones at a joint) (a minor road which connects highways) When the idea of logical attachment is uppermost, **connect** usually implies that the ideas, events, or things whether material or immaterial have a bearing on each other (as of cause and effect, generic likeness, or reference to the same person or thing) (the two incidents were connected) (the police have now sufficient evidence to connect the suspect with the bombing) (she could not connect her mother's meanness with the magnitude of what had happened—*Auchincloss*) (anything connected with Napoleon is of interest to them) **Connect**, especially in the passive, is preferable to **join** when used in reference to organizations or groups and looseness of attachment, impermanence, or subordination is implied (nobody connected with the paper ever makes a public appearance without being challenged—*Bliven* b. 1889) **Link**, with its underlying reference to one of the parts of a chain, is usually more emphatic than **connect** in implying firmness

of attachment; it is therefore the more precise word when one wishes to preserve the basic implications of *connect* and yet to avoid its common connotations of a weak or severable attachment; thus, to *link* a person with a crime is, by implication, to have ample evidence of his involvement with it (Augustus set himself to revive the state religion . . . as part of his policy of *linking* up past and present, and as an instrument in securing the restoration of the old morality—*Buchan*) (none of the subjects that *linked* us together could be talked about in a bar—*Nevil Shute*) (mobilize civilian science and *link* it effectively with the war effort—*Baxter*) *Associate* primarily implies a joining with another usually in an amiable relationship and on terms of equality (a group of men *associated* in business) (when bad men combine, good men must *associate*—*Burke*) (my father's conviction that they were too lowly to *associate* with me, when it was so clear that I was too poor to *associate* with them, may have had some sort of imaginary validity for him; but for me it was snobbish nonsense—*Shaw*) In its extended use as referred to things, the implication of companionship on equal terms gives way to the implication of a connection in logic or in thought which comes naturally or involuntarily to the mind of the observer either because the things traditionally go together, or naturally or rightfully belong together, or for some reason have come to be linked together in one's thoughts (for the artist life is always a discipline, and no discipline can be without pain. That is so even of dancing, which of all the arts is most *associated* in the popular mind with pleasure—*Ellis*) (sur-realism has been *associated* with psychological and intellectual atmosphere common to periods of war—*Bernard Smith*) (a fir tree is not a flower, and yet it is *associated* in my mind with primroses—*Jefferies*) *Relate* implies a connection, or an attempt to show a connection, between two or more persons or things. In reference to persons it implies a connection through a common ancestor or through marriage (John and James are remotely *related* to each other) In reference to things or to persons objectively regarded, it implies that each has some bearing on the other and often indicates the existence of a real or presumed logical connection (*related* his misfortunes to events which preceded them) (the two circumstances are not *related*) (their ability to *relate* what they observe to what they know or have previously observed—*Hildreth*)

Ana conjoin, *unite, combine, cooperate, concur: articulate, concatenate, *integrate: attach, affix, *fasten: knit, *weave: *tie, bind

Ant disjoin: part —*Con* *separate, sever, sunder: *detach, disengage: disentangle, untangle, disembarass (see EXTRICATE)

joint, **articulation**, **suture** denote a place where two things are united or the mechanism by which they are united. **Joint** is the most inclusive of these terms and is freely usable in reference both to anatomical and mechanical structures. In anatomical reference it applies to a junction whether rigidly fixed or capable of more or less complex movements of two skeletal parts (as vertebrate bones or cartilages or molluscan shell valves) and is the one of these terms that is equally applicable to the bodily region or part at which there is such a junction (the knee *joint*) (the *joint* at the elbow is flexible) (he aches in every *joint*) Similarly, in mechanical reference, *joint* applies to a junction between two parts that serves as a coupling and may be rigid (a dovetail *joint* at the corner of a drawer) (a *joint* in a gas pipe) (mortar *joints* between bricks carefully finished to shed water) or may form a flexible union (a swivel *joint*) (the ball *joints* . . . have a

lateral as well as up-and-down action, thus cushioning against bumps—*Ford Times*) or even (as in a universal joint) one through which motion is transmitted from one part to the other. **Articulation** is chiefly an anatomical term, though it has some extended use (see under INTEGRATE). Anatomically *articulation* is applicable to the same parts of the skeleton as *joint* but distinctively it implies, as *joint* does not, the fitting together or adjustment of two parts or bones with relation not only to each other but to the entire structure and its function and is therefore not applicable, as *joint* is, to the bodily region or part where a joint occurs. It is especially appropriate when the mechanism of a joint or the elements entering into its formation are under consideration (ball-and-socket structure of a movable *articulation*) (various *articulations* are supported by ligaments) (the synovial membrane reduces friction at an *articulation*) The word may also denote the process of joining or the adjustment in joining (in the flat bones the *articulations* usually take place at the edges—*Henry Gray*) **Suture** is used of a joint or articulation that suggests a seam or that has been brought about by sewing (the joints of the two parts of a pea pod are called respectively the ventral and dorsal *sutures*) (the form of articulation observable in the skull where two flat bones meet in a line is called a *suture*) *Suture* is used in surgery of a seam, especially of one whereby two edges of an incision are brought together so that they may ultimately unite.

joke, **jest**, **jape**, **quip**, **witticism**, **wisecrack**, **crack**, **gag** are comparable when they mean a remark, story, or action intended to evoke laughter. **Joke**, when applied to a story or remark, suggests something designed to promote good humor and especially an anecdote with a humorous twist at the end; when applied to an action, it often signifies a practical joke, usually suggesting a fooling or deceiving of someone at his expense, generally though not necessarily good humored in intent (everyone knows the old *joke*, that "black horses eat more than white horses," a puzzling condition which is finally cleared up by the statement that "there are more black horses"—*Reilly*) (issues had become a hopeless muddle and national politics a biennial *joke*—*Wecter*) (a child hiding mother's pocketbook as a *joke*) (the whole tale turns out to be a monstrous *joke*, a deception of matchless cruelty—*Redman*) **Jest** may connote raillery or ridicule but more generally suggests humor that is light and sportive (continually . . . making a *jest* of his ignorance—*J. D. Beresford*) (won fame by *jest*s at the foibles of his time, but . . . his pen was more playful than caustic—*Williams & Pollard*) **Jape** is identical with *jest* or *joke* (the merry *japes* of fundamentally irresponsible young men—*Edmund Fuller*) (the *japes* about sex still strike me as being prurient rather than funny—*McCarten*) **Quip** suggests a quick, neatly turned, witty remark (full of wise saws and homely illustrations, the epigram, the *quip*, the jest—*Cardozo*) (many *quips* at the expense of individuals and their villages—*Mead*) (enlivened their reviews with *quips*—*Dunham*) **Witticism**, **wisecrack**, and **crack** all apply to a clever or witty, especially a biting or sarcastic, remark, generally serving as a retort (all the charming *witticisms* of English lecturers—*Severid*) (a vicious *witticism* at the expense of a political opponent) (merely strolls by, makes a goofy *wisecrack* or screwball suggestion—*Hugh Humphrey*) (though the gravity of the situation forbade their utterance, I was thinking of at least three priceless *cracks* I could make—*Wodehouse*) **Gag**, which in this relation basically signifies an interpolated joke or laugh-provoking piece of business, more generally applies to a remark, story, or piece of business considered

funny, especially one written into a theatrical, movie, radio, or television script. Sometimes the word has extended its meaning to signify a trick whether funny or not but usually one considered foolish <*gags* grown venerable in the service of the music halls—*Times Lit. Sup.*> <the *gag* was not meant to be entirely funny—*Newsweek*> <gave a party the other night and pulled a really constructive *gag* . . . had every guest in the place vaccinated against smallpox—*Hollywood Reporter*> <a frivolous person, given to *gags* and foolishness>

journal, periodical, newspaper, magazine, review, organ are comparable when denoting a publication which appears regularly at stated times. Basically, a **journal** is a publication which is issued daily and gives an account of matters of interest occurring during the preceding twenty-four hours. Continued use, however, has made it an acceptable designation both of a publication that appears less often (as a weekly, a monthly, or a quarterly) <[the *Hibbert Journal*] appeared every three months and called itself a *journal*—*Mackenzie*> and of one that is the official publication of some special group <the *Journal* of the American Medical Association> **Periodical** applies to a publication appearing at regular intervals and especially to weeklies, biweeklies, monthlies, and quarterlies <the *periodicals* are assembled in a special room of the library> **Newspaper** is the usual term for a sheet or group of sheets of which the main function is to provide the news of the day and which is usually issued daily; such a publication is called a *journal* only in formal speech or writing, although those whose profession is writing for newspapers are often termed *journalists* and although the language and style believed to be typical of the newspaper is commonly called *journalese*. **Magazine** applies chiefly to a periodical, often illustrated, that offers a miscellaneous collection of articles, fiction, poetry, descriptive sketches, and commentary. **Review** applies to a periodical that emphasizes critical writings or articles commenting on

important events and significant questions of the day. **Organ** usually applies to a publication by an organization (as a political party, church, business, or institution) that gives news of interest to its members or adherents or presents its particular principles and views authoritatively <*Science* is the official *organ* of the American Association for the Advancement of Science>

journey, voyage, tour, trip, jaunt, excursion, cruise, expedition, pilgrimage mean travel or a passage from one place to another. **Journey**, the most comprehensive term in general use, carries no particular implications of the distance, duration, destination, purpose, or mode of transportation involved <plans a *journey* to California> <wished him a happy *journey* home> <the *journey* to Italy will not take more than two months> <a *journey* of twenty-five miles in Britain will often afford . . . much variety of scenery—*Stamp*> <the sound film took four years to make the *journey* from Hollywood to Rome—*Jarratt*> **Voyage** normally implies a journey of some length over water, especially a sea or ocean <with a fair sea *voyage*, and a fair land journey, you will be soon at his dear side—*Dickens*> <Gordon made the *voyage* from San Francisco around the Horn on a big full-rigged Glasgow sailing ship—*Current Biog.*> but sometimes it may indicate a journey through air or space <through the long 109-day, 180,000,000 mile *voyage*, Mariner was precisely controlled—*Christian Science Monitor*> **Tour** applies to a somewhat circular journey from place to place that ends when one reaches one's starting point <set out on a walking *tour*> <*tour* of Western Europe> <penologists made a *tour* of all the prisons in the state> <my next design was to make a *tour* round the island—*Defoe*> <left in September for a seven-week goodwill *tour* of northern and western Europe—*Current Biog.*> **Trip** is the preferable word when referring to a relatively short journey, especially one for business or pleasure <his new position requires frequent *trips* to New York> <the English came over in droves on the day *trips*—*A. V. Davis*> <surveys revealed that 59 percent of city-driver *trips* . . . were made for purposes of making a living—*Americana Annual*> The term is also used in place of *journey* to refer to more extensive travels <conclusions I had reached on my *trip* around the world—*Willkie*> <a *trip* through western Pennsylvania, then down the Ohio—*L. M. Sears*> **Jaunt** carries a stronger implication of casualness and informality than any of the others and is especially applicable to a short trip away from one's home or one's business, usually for pleasure or recreation <they are off for a day's *jaunt*> <a *jaunt* to the shore or the hills—*F. L. Allen*> <lip service is paid . . . to the idea of Congressional travel but the general tone throughout runs: They're off again on their *jaunts* at public expense—*H. A. Williams*> **Excursion** applies to a brief pleasure trip, usually no more than a day in length <the rural neighborhood of Sneyd, where they had been making an afternoon *excursion*—*Bennett*> **Excursion** is the preferred term, especially in railroad and steamship use, for a round trip at reduced rates to a point of interest (as a resort or an exposition or a metropolis) <the Minneapolis, Northfield & Southern Ry. runs *excursions* to Bush Lake on tournament days—*Amer. Guide Series: Minn.*> When the excursion involves a voyage of some days or weeks and, often, a sight-seeing tour with frequent stops during which the participants use the ship as their living quarters, **cruise** is the usual term <a Mediterranean *cruise*> <the steamship lines are featuring winter *cruises* through the Caribbean Sea> <their yacht is off with a party on a *cruise*> **Expedition** applies to a journey intended to further a definite purpose <he called this trip frankly a begging

expedition—Cather <he made a special *expedition* to the city to try to straighten out the difficulty> <had charge of the *expedition* to observe the transit of Venus in China—*Rufus*> <an archaeological *expedition*> **Pilgrimage** applies primarily to an expedition to a place hallowed by religious associations but is sometimes applied also to a journey to a place of historical or sentimental association <Arabs make *pilgrimages* to worship at his tomb—*Hichens*> <an excited conference at Niagara Falls in 1905 and the fervid *pilgrimage* to Harpers Ferry . . . were tokens of the Negroes' obdurate consciousness of their identity—*Handlin*> Often it implies an arduous journey or slow and difficult passage <Chaucer's *Canterbury Tales* is a collection of stories told by men and women on a *pilgrimage* to the tomb of St. Thomas à Becket at Canterbury>

jovial jolly, jocund, *merry, blithe

Ana jocular, jocose, facetious, humorous, *witty; genial, sociable, affable (see GRACIOUS); good-natured, *amiable; bantering, chaffing, jollying, joshing (see BANTER *vb*)

joyful joyous, cheerful, happy, *glad, lighthearted

Ana blithe, jocund, *merry, jolly: buoyant, effervescent, expansive (see ELASTIC)

Ant joyless —*Con* *despondent, despairing, desperate, forlorn, hopeless: depressed, weighed down, oppressed (see DEPRESS)

joyous joyful, happy, *glad, cheerful, lighthearted

Ana blithe, jocund, *merry: rapturous, ecstatic, transported (see corresponding nouns at ECSTASY)

Ant lugubrious —*Con* dolorous, doleful, *melancholy: *miserable, wretched

judge *vb* 1 **Judge, adjudge, adjudicate, arbitrate** mean to decide something in dispute or controversy upon its merits and upon evidence. All these words imply the existence of a competent legal tribunal or of its equivalent. **Judge** implies mainly the investigation of evidence on both sides, a comparison of the merits of each case, and a decision as to where the truth lies <the court must *judge* between the claimants> <the matter is to be *judged* on the facts as they appeared then—*Justice Holmes*> **Adjudge** stresses decision by a court either at the end of a trial or during a legal process <the evidence was *adjudged* inadmissible> <the court *adjudged* the will void> <the district court *adjudged* the 1946 agreement void—*Harvard Law Review*> **Adjudicate**, on the other hand, stresses formal deliberate determination of an issue by or as if by a court and often the pronouncing of a judgment, sentence, or decree <the court proceeded to *adjudicate* the rights and interests of the parties> <it is useless to reargue a seemingly *adjudicated* case—*Lowes*> <a bitter dispute that was not *adjudicated* until 1782—*Amer. Guide Series: Conn.*> <all former WW II POWs whose claims were *adjudicated* by the commission—*The Naval Reservist*> **Arbitrate** implies deliberate determination of a matter in dispute by one or more persons who constitute a tribunal that may or may not be legally recognized and who are usually acceptable to both sides to the controversy <the strikers and the employers finally agreed on a group of three men to *arbitrate* their differences> <litigation has virtually ceased: it is possible, of course, that the elders are *arbitrating* these cases out of court—*Gunn*>

Ana determine, *decide, settle, rule

2 conclude, deduce, *infer, gather

Ana *prove, demonstrate, try, test

judge *n* **Judge, arbiter, arbitrator, referee, umpire** are comparable when they denote a person who decides or helps to decide questions or issues that are unsettled or in controversy. **Judge** implies the assumption or the possession both of superior knowledge, experience, or wisdom, and of the power to determine the truth by weighing critically and impartially the merits of a case <it doth appear you are a worthy *judge*; you know the law, your exposition hath been most sound—*Shak.*> <the polls in each district or precinct are in charge of . . . two *judges*, who help decide disputes—*Ogg & Ray*> <the question is whether in language the results justify the quibble. Well, the public is here the best *judge*—*Barzun*> **Arbiter** stresses authoritativeness of decision and is applied to one, whether or not a professed judge, whose word or example is accepted as final and indisputable <the *arbiter* of taste . . . the persuasive exponent of a reasonable life, the clear, sad thinker who led no man astray—*Replier*> <they were the *arbiters* of fashion, the Court of last Appeal, and they knew it—*Wharton*> <that "common consent of mankind" which certain moralists make the *arbiter* in ethics—*Brownell*> **Arbitrator, referee, and umpire** are applied to persons to whom a dispute is referred for decision. **Arbitrator**, though sometimes interchangeable with *arbiter*, usually is applied to a person chosen by the parties to a controversy or appointed under statutory authority to resolve the differences between the parties and to formulate a fair solution <the governor appointed as *arbitrators* two persons recommended by the striking miners, two recommended by the mineowners, and one person agreed upon by both sides> In legal use **referee** is applied to an attorney-at-law appointed either to determine a case or to report on it to the court which he serves as an officer. It is therefore clearly distinguishable from *arbitrator*. **Umpire**, on the other hand, is applied to the person selected to make a final decision when arbitrators have disagreed or are tied. In sports and games both *umpire* and *referee* are technical terms applied to the official or officials charged with the regulation and supervision of a contest (as by enforcement of rules of a game, making decisions on plays, and determining penalties for faults). In most sports either one term or the other is used; thus, these officials in baseball, cricket, and tennis are designated *umpires*, while in boxing, basketball, football, and ice hockey they are designated *referees*. In nontechnical use *referee* usually is applied to one to whom disputants have recourse when agreement seems impossible, *umpire* to one who enters in and arbitrarily ends the struggle or dispute <clear-sighted, unprejudiced, sagacious . . . he was the universal *referee*—*Disraeli*> <just death, kind *umpire* of men's miseries—*Shak.*>

judgment 1 conclusion, deduction, inference (see under INFER)

Ana decision, determination, ruling (see corresponding verbs at DECIDE): *opinion, conviction, persuasion, view, belief

2 *sense, wisdom, gumption

Ana intelligence, wit, brain, *mind: sagaciousness or sagacity, perspicaciousness or perspicacity, shrewdness, astuteness (see corresponding adjectives at SHREWD); acumen, *discernment, insight, penetration: *prudence, discretion

judicial, judiciary, juridical, juristic are comparable because of verbal confusion and because all imply some connection with courts of law. **Judicial**, by far the most common of these adjectives both in legal and in general use, often implies a direct reference to the courts of justice, the judge who presides over a court of justice, or the

judges who form such a court (a *judicial* decision) (a *judicial* duty) (a *judicial* proceeding) (I am told at times by friends that a *judicial* opinion has no business to be literature—*Cardozo*) The term is also used in distinction from *executive*, *legislative* when applied to that one of the powers, departments, or functions of the government which is associated with a court (as the United States Supreme Court), which gives definitive decisions on questions of law or interprets the constitution or basic law (the executive, legislative, and *judicial* branches of the government) (government analyzes into three main functions . . . legislative, executive, and *judicial* activities—*Ogg & Ray*) In extended use *judicial* is applied especially to a type of mind, mental activity, or manner suggestive of that of a judge (as in detachment or fair-mindedness) or appropriate to a judge or court of justice (as in orderliness and seriousness of procedure) (to a strictly *judicial* mind . . . the quality of age or of novelty would carry no necessary implication of value—*Grandgent*) (the review made an evident effort to be *judicial* . . . and so exhibiting both the good and bad points of the novel it alternated favorable and unfavorable judgments—*McCloskey*) **Judiciary** is occasionally used in place of *judicial*, especially when it suggests reference to the courts in general and to the administration of justice as a whole (the appointment of more women to higher *judiciary* positions—*Current Biog.*) In current usage, however, *judiciary* occurs predominantly as a substantive, with *judicial* its corresponding adjective. The two words *juridical* and *juristic* imply a connection with the law, especially as it is administered in the courts, rather than with the judges or those who settle questions of law. Often these terms come close to *legal* in meaning (ordered . . . to grant *juridical* recognition to the Assemblies of God churches in Italy—*Time*) but in learned use they are more restricted in significance. Both terms, but especially *juridical*, imply a reference to the law as it appears to learned lawyers and judges—that is, as a highly complex and involved body of principles, statutes, decisions, and precedents requiring vast knowledge, skill in interpretation, and a keen logical mind in those who put it to use; therefore, the term often means characteristic of, determinable by, or useful to a person with such knowledge and skill (Eden is clearly working for the *juridical* separation of Formosa and the Pescadores from the mainland—*Healey*) (high time that we act on the *juridical* principle that aggressive war-making is illegal and criminal—*R. H. Jackson*) **Juristic** implies rather a reference to the science of law (set forth with all the circumstance of philosophical and *juristic* scholarship—*Veblen*) (laws and *juristic* compilations of the Norman period—*Stenton*) ([Justice] Holmes had struck in 1905 in his dissent in *Lochner v. N.Y.* the high pitch of American *juristic* thought—*New Republic*)

jump *vb* **Jump, leap, spring, bound, vault** are comparable as verbs meaning to move suddenly through space by or as if by muscular action and as nouns designating an instance of such movement through space. All of these terms apply primarily to the movements of men or lower animals, but they also may be used of similar movements

of inanimate things. **Jump**, the most general term, basically implies a projection of the body that results in reaching a spot which is to some extent distant, whether below, above, or on the same plane (she *jumped* from a second-story window) (jump over a fence) (jump from the ground to the top of a low wall) (a *jump* across a ditch) Since *jump* usually implies a rise and descent in a curve and a landing away from the point of origin, it is often applicable to things as well that follow a similar curve or seem to have a similar objective ([the fire] then *jumped* Essex Street and burned the house of Samuel Prince—*J. D. Phillips*) *Jump* may be extended to various sudden or sharp movements whether physical or not (his heart *jumped* with fright) (prices *jumped* when war was declared) (the children *jumped* with joy) **Leap** usually implies greater muscular effort than *jump*, though it otherwise often agrees with it in implications; it may or may not suggest suddenness, swiftness, a forward or a backward motion, or an upward or a downward motion, but it usually includes one or more of these connotations in its meaning (the chamois *leaps* from crag to crag) (a *leap* from a window) (leapt over a wall) In extended use *leap* goes further than *jump* in suggesting suddenness or intensity (as of change, response, surprise, or exaltation of thoughts) (my heart would have *leaped* at sight of him—*Kenneth Roberts*) (ashes am I of all that once I seemed. In me all's sunk that *leapt*, and all that dreamed is wakeful for alarm—*Millay*) **Spring** implies a jumping or leaping, but both as verb and as noun it additionally suggests ideas not involved in *jump* and only occasionally involved in *leap*, such as resiliency, elasticity, grace of movement, and emergence by issuing or flowing. The emphasis is often upon the action itself rather than upon the fact of movement to or over (spring from the bed) (the *spring* of a cat on a bird) (I *sprang* to my feet, for anger had overtaken me—*Edita Morris*) (sprang across the stream, inviting those who shared his views to follow him—*Amer. Guide Series: Me.*) **Bound** (see also SKIP) comes very close to *spring* in its emphasis upon the action itself, but it carries an implication of vigor and strength not apparent in *spring*, so that it often connotes a plunging or a lunging forward (he *bounded* forward in order to catch the ball) (with a *bound*, he was at her side) (there were great kangaroos that . . . would descend the hillslopes in large, slow, gracious *bounds*—*Ellis*) Although **vault** is often used specifically in respect to leaping as a physical exercise with the aid of a long pole as a fulcrum, it may also apply to a leap or a leaping upward with the aid of a support or a leap over an object often with a hand laid on the object (unperturbed by the tumble he *vaulted* back into the saddle) (an acrobat . . . was *vaulting* over chair backs—*Deland*) (put his hand on the counter and *vaulted* over, landing heavily on the other side—*J. W. Johnson*)

junction, confluence, concourse are comparable when meaning the act, state, or place of meeting or uniting. **Junction**, the most general of these words, applies to the meeting or uniting usually of material things (as roads, rivers, lines, or railroads) (at all the street *junctions* along the coronation procession route, traffic is slowed—*Panther-Downes*) (Brattleboro spreads along the Connecticut from its *junction* with the West river—*Amer. Guide Series: Vt.*) (electricity produced by the *junction* of two dissimilar metals—*S. F. Mason*) or less often of immaterial things (the *junction* of the Senecan influence with the native tradition—*T. S. Eliot*) (a fairly close

junction of interest between Brady and the so-called Standard Oil group—*H. P. Willis*) and only occasionally of persons or groups of persons (another small force of Frenchmen, reinforced by Ethiopian natives, moved westward, seeking *junction* with [Major] Marchand—*Lengyel*) (there he proposed to effect his *junction* with the man who should make all the difference to this new civil war—*Belloc*) **Confluence** suggests a flowing movement that brings things together. It is applicable to two or more things or persons viewed as things which flow or seem to flow toward a point where they merge and mingle (the *confluence* of cowboys, cattle traders, and railroad men gave Dodge City a lively homicidal character—*Life*) It specifically applies to the place at which streams unite, often to form a larger stream or body of water (the Ohio river is formed by the *confluence* of the Monongahela and Allegheny rivers) (this river, which is formed by the *confluence* of the historic Tigris and Euphrates rivers—*Boschen*) **Concourse** places the emphasis on a running or flocking together of great numbers of persons or things (the . . . frame of the universe was not the product of chance, or fortuitous *concourse* of particles of matter—*Hale*) It is commonly used of a place, sometimes out of doors but sometimes in such a great building as a railroad terminal, in which there is an endless flow of persons or things passing through (just off the waiting room is the passenger *concourse*, a 24 x 1200-foot “bon voyage deck” where passengers of the *Lurline* arrive and depart and their friends greet them or wave them on their way—*Ships and the Sea*)

junction, **pass**, **exigency**, **emergency**, **contingency**, **pinch**, **strait**, **crisis** denote a critical or crucial time or state of affairs (as in the life of a person or institution or the history of a country). **Juncture** emphasizes the significant concurrence or convergence of events and usually indicates a discernible turning point (we *may* now be at a vital *junction* where the ideals of liberalism can best be achieved through separate institutions and not the omniscient state—*Kurtz*) (the Church of England is at the present *junction* the one church upon which the duty of working towards reunion most devolves—*T. S. Eliot*) **Pass** implies a concurrence or convergence of events or a condition induced by such that is evil, distressing, or sometimes utterly confusing (have his daughters brought him to this *pass*?—*Shak.*) (Constance, after . . . reflection on the frightful *pass* to which destiny had brought her, had said that she supposed she would have to manage with a charwoman until Rose’s advent—*Bennett*) (things have come to a pretty *pass* when a professional informer . . . is himself under investigation—*New Republic*) **Exigency** (see also **NEED**) strongly emphasizes the pressure or restrictions of necessity or the urgency of the demands created by a juncture or pass (it would have been an unwise attempt to provide, by immutable rules, for *exigencies* which, if foreseen at all, must have been seen dimly and which can be best provided for as they occur—*John Marshall*) (regret that the *exigencies* of party politics should deprive our government of so much talent—*Altschul*) **Emergency** implies a sudden or unforeseen juncture that necessitates immediate action to avoid disaster; the term need not imply that what constitutes an emergency has also the quality of an *exigency*, for the latter term is far stronger in its suggestion of extreme difficulty (it was a special provision . . . to meet a present *emergency*, and nothing more—*Taney*) (a presence of mind which no *emergency* can perturb—*Eliot*) **Contingency** is used of a prospective event or concurrence of events that is fortuitous and is uncertain in respect to either or both the time and the fact of occurrence but that, if it should come to pass,

would constitute an exigency or emergency (having thus devised a plan for use in a *contingency*, Calhoun sought in various ways to prevent the *contingency* from coming—*U. B. Phillips*) (every citizen must have a stake in his country adequate to justify in his eyes the sacrifices that any *contingency* may entail—*W. O. Douglas*) (to be dug out now and then in the winter is a *contingency* the mail driver reckons as part of his daily life—*Jefferies*) **Pinch** suggests pressure and the need for action but without the same intensity as *emergency* or *exigency*; it is particularly appropriate for use of a juncture in personal affairs (I could always in a *pinch* pawn my microscope for three pounds—*Maugham*) (ready in a *pinch* to ride roughshod over opposition—*Power*) (this—the great *pinch* of his life—*Hawthorne*) **Strait**, often in its plural *straits*, applies to a situation from which the person involved finds it difficult to escape, so hampered or fettered is he by some given or implied set of circumstances (he was in great *straits* for lack of money) (this disagreeable companion had, of his own free will, assisted him in the *strait* of the day—*Dickens*) (he was at a loss what to invent to detain him . . . He rendered homage to the genius of woman in these *straits*. “My Aunt,” he thought, “would have the lie ready”—*Meredith*) (the army’s truly desperate *straits*—*Mason*) **Crisis** applies to a juncture or pass whose outcome will make a decisive difference, for good or ill, in a life or a history or a disease. The term usually connotes suspense, but need not imply either evil in the situation or a particular outcome (the pneumonia patient has passed the *crisis*) (Tiberius gave one million pounds out of his own pocket to relieve the agrarian *crisis* of A.D. 33—*Buchan*) (Father finally . . . brought the matter to a *crisis*. He said, after all, the boy had a right to choose—*Mary Austin*) (her adolescence had passed without the trace of a religious *crisis*—*Huxley*)

justice, **equity** are comparable primarily in their legal uses and when they denote the act, practice, or obligation of giving or rendering to a person or thing what is his or its due (as in conformity with right, truth, or the dictates of reason). **Justice** is by far the wider-ranging term, for it may apply to an abstraction which represents an ideal (he flamed out against injustice because he was a lover of *justice*—*Perry*) or to a quality of mind which exhibits adherence to this ideal (nothing escaped the kind eyes, the far-seeing love, that punished and praised with that calm *justice* which children so keenly appreciate—*Deland*)

or to a quality in a thing which never departs from the truth in the slightest degree (he painted a psychological portrait of himself which for its serenely impartial *justice*, its subtle gradations . . . has all the qualities of the finest Velázquez—*Ellis*) or to the treatment accorded one who has transgressed a law, whether a divine law, a natural law, or the law of a state, or who seeks relief when wronged or protection when his rights are threatened (at the present time . . . there is more danger that criminals will escape *justice* than that they will be subjected to tyranny—*Justice Holmes*) or to the system of courts of law whereby the rights of an individual or his innocence or guilt are determined in accordance with the laws of the state (in the modern state . . . *Justice* and administration are directly connected with whatever governs—*Belloc*) **Equity** differs from *justice* chiefly in being more restricted in its denotation, for it usually implies a justice that transcends the strict letter of the law and is in keeping with what is reasonable rather than what is merely legal. It is in this sense that a court of equity is, theoretically at least, distinguished from a court of law. To the former go for adjudication and settlement the unusual cases where abstract justice might not be dealt out according to the limitations of the written law while to the latter go the vast majority of cases where the determination of facts is of first importance and where the law, once the facts are established, provides the treatment to be accorded the person or parties involved (in informal terms, a law case is one where the courts have only to decide who is right; an *equity* case is one where the courts have to decide not only who is right, but go on to say what must be done—*Science*) But *equity* in nonlegal use implies a justice based upon a strictly impartial meting out of what is due (as rewards and punishments or praise and blame) (that noble word *liberal*, which in America has become dissociated from its essential humanism and sense of *equity*—*Ustinov*) (the union claimed that the lower wages paid to aliens were not in keeping with any principle of *equity*)

3 Justify, warrant are comparable when meaning to be the thing (as evidence, a circumstance, a situation, or a state of affairs) that constitutes sufficient grounds for doing, saying, using, or believing something. **Justify** may be preferred when the stress is on providing grounds that satisfy conscience as well as reason, and usually refers to an action that, unjustified, would be looked upon with disapproval (no consideration on earth *justifies* a parent in telling lies to his child—*Russell*) (I remember a very tenderhearted judge being of opinion that closing a hatch to stop a fire and the destruction of a cargo was *justified* even if it was known that doing so would stifle a man below—*Justice Holmes*) (Locke *justified* the right of revolution—*W. S. Myers*) (Batista *justified* his seizure of power on the grounds of an alleged conspiracy by the government to control the elections—*Americana Annual*) **Warrant** is especially appropriate (see also ASSERT 1) when the emphasis is on something that requires an explanation or reason rather than an excuse and suggests support by authority, precedent, experience, or logic (the deposits contain too high a percentage of sulfur to *warrant* development—*Wythe*) (the history and appearance clearly *warrant* such assumption—*Armstrong*) (a shorter course is designed for students whose graduate study and experience *warrant* it—*Smith College: The President's Report 1952-1953*)

keep *vb* 1 **Keep, observe, celebrate, solemnize, commemorate** are comparable when they mean to pay proper attention or honor to something prescribed, obligatory, or demanded (as by one's nationality, religion, or rank), but they vary widely in their range of reference or applica-

tion. *Keep* and *observe* are closely synonymous terms, especially when they imply heed of what is prescribed or obligatory, but they differ fundamentally in their connotations. **Keep** implies opposition to *break*, and emphasizes the idea of not neglecting or violating; thus, one *keeps*, rather than *observes*, a promise (*keep the peace*) (<*keep* the commandments) **Observe** carries such positive implications as punctiliousness in performance of required acts and rites and a spirit of respect or reverence for what one heeds or honors; when these more appropriate ideas are definitely to be suggested *observe* is the more appropriate term, even though *keep* would otherwise be possible; thus, few persons *observe*, rather than *keep*, the Sabbath in the manner of the early Puritans (<*observed* Passover with the utmost strictness) (<he *observes* the letter of the law) *Celebrate* and *solemnize* are also close synonyms because they may take as their objects not only a day, a season, or an occasion which for religious, political, or

other significant reasons is observed with pomp and ceremony but also a ceremony or rite, usually a religious ceremony or rite, that is marked with unusual dignity and splendor. **Celebrate**, however, except in certain idiomatic phrases (as *celebrate* the Eucharist, *celebrate* a marriage, *celebrate* Mass) in which the gravity and forms of religion are implicit, suggests demonstrations of joy or festivity (as by singing, shouting, speechmaking, and feasting) (<*celebrate* Independence Day) (<*celebrated* their golden wedding) (<the family decided to *celebrate* the occasion by a large dinner party) **Solemnize** as applied to occasions of joy and festivity stresses their grave, ceremonious, or solemn aspects and usually suggests greater formality in observance and greater dignity and splendor of ceremony than does *celebrate* (<Harvard each June *solemnizes* the award of degrees to students . . . of the University—*Official Register of Harvard Univ.*) (<*solemnize* this sorrowing natal day to prove our loyal truth—*Burns*) The term is often specifically used of the celebrating of marriage especially with the fullest applicable religious ceremonial; thus, in the Roman Catholic Church a marriage is *solemnized* only when administration of the sacrament of matrimony is followed by a nuptial Mass and a special blessing (<Catholics may marry but their marriages may not be *solemnized* during Lent) **Commemorate** implies remembrance and suggests observances that tend to call to mind what the occasion (as the day, the season, or the ceremony) stands for; thus, one *celebrates* Christmas by religious ceremonies that *commemorate* the birth of Christ; the people of the United States *commemorate* the birth of their independence on the 4th of July; the French people *commemorate* the fall of the Bastille on the 14th of July.

2 Keep, keep back, keep out, retain, detain, withhold, reserve, hold, hold back are comparable in meaning not to let go from one's possession, custody, or control. **Keep** is the most general of these terms, often carrying no further implications (<*keep* this until I ask for it) When, however, it positively denotes a holding securely in one's possession, custody, or control, *keep*, or more often **keep back**, is synonymous with one or another of the remaining terms. **Keep out** specifically implies a keeping back of a portion of something (<*kept out* a part of his salary for emergency expenses) **Retain** implies continued keeping, especially as against threatened seizure or forced loss (<Germany was unable to *retain* her colonies after the first World War) (<the conception of one who . . . poor, sickly, and a slave perhaps, or even in prison or on the rack, should nevertheless *retain* unimpaired the dignity of manhood—*Dickinson*) **Detain** (see also ARREST *2*) implies a keeping (as in a place, in conversation, or in one's possession or control) through a delay in letting go that may be based on selfishness or caprice or on entirely acceptable grounds (<*detain* a ship in quarantine) (<much consideration has been given to the practice of *detaining* children away from home for the sole purpose of diagnostic study—*Service to Youth*) (<[the cat] let the rat run about his legs, but made no effort to *detain* him there—*Grahame*) **Withhold** implies restraint in letting go or a refusal to let go. Sometimes it is interchangeable with *keep*, or *keep back*, especially when hindrance is also implied (<timidity caused him to *withhold* the advice he longed to give) Sometimes, *keep* and *withhold* are widely different in meaning; thus, to *withhold* one's promise is to refuse to give one's promise; to *keep* (see KEEP *1*) one's

promise is to fulfill what has been promised. **Reserve** implies either a keeping in store for other or for future use (<the runner *reserved* some of his energy for the final sprint) (<*reserve* some of the milk for breakfast) or a withholding from present or from others' use or enjoyment (<the force of will which had enabled her to *reserve* the fund intact—*Bennett*) (<*reserved* his judgment) **Hold** and **hold back** are often used in place of *withhold* or *keep back* and sometimes in place of *detain* and *reserve* when restraint in letting go, whether self-imposed or imposed by others, is implied (<*hold back* a portion of each week's wages for group insurance) (<*held back* the truth in giving his testimony)

kill vb **Kill, slay, murder, assassinate, dispatch, execute** are comparable in meaning to deprive of life or to put to death. **Kill** is so general that it merely states the fact and does not, except in special phrases (as "Thou shalt not *kill*"), suggest human agency or the means of death or the conditions attending the putting to death. Also, the object of the action may be not only a person or other living thing but also an inanimate or immaterial thing with qualities suggestive of life (<*kill* snails in the garden) (<a boy *killed* by a fall) (<vegetation *killed* by frost) (<the president *killed* the project when he vetoed the bill making an appropriation for it) (<*kill* a friend's love by indifference) (<he believed at that time that the League of Nations was going to *kill* war, that the Labour Party were going to *kill* industrial inequity—*Rose Macaulay*) **Slay** implies killing by force or in wantonness; it is rare in spoken English, but it often occurs in written English where it may convey a dramatic quality whether in poetic or elevated writing or in journalese (<though he *slay* me, yet will I trust in him—*Job* 13:15) (<the *slain* man has not yet been identified) In its extended uses *slay* usually suggests wanton or deliberate destruction or annihilation (<to *slay* the reverence living in the minds of men—*Shelley*) (<never had she greatly loved before; never would she greatly love again; and the great love she now had she was *slaying*—*Rose Macaulay*) **Murder** definitely implies a motive and, often, premeditation and imputes to the act a criminal character; it is the exact word to use in reference to one person killing another either in passion or in cold blood (<*Macbeth murdered* Duncan) (<Thomas à

Becket, archbishop of Canterbury, was *murdered* in his own cathedral) It is sometimes used in place of *kill* as more expressive or in place of *slay* as more brutally direct and condemnatory, both in literal and extended use (Glamis hath *murdered* sleep, and therefore Cawdor shall sleep no more; Macbeth shall sleep no more—*Shak.*) (the language of strategy and politics is designed . . . to make it appear as though wars were not fought by individuals drilled to *murder* one another in cold blood—*Huxley*) *Assassinate* implies murder especially of a person in governmental or political power by stealth or treachery and often by an agent or hireling of an opposition. It usually suggests an attempt to get rid of a person who is believed to be an obstacle to the safety of a tyrant, the welfare of a people, the liberty of a nation, or the success of a design (Marat was *assassinated* by Charlotte Corday) (at least two attempts were made to *assassinate* William of Orange) *Dispatch* also suggests an attempt to get rid of a person by killing him, but it is far more colorless than *assassinate* (and the company shall stone them with stones, and *dispatch* them with their swords—*Ezek 23:47*) Because it nearly always implies taking direct means of killing (as by shooting or stabbing) and so sometimes connotes expedition or speed in killing or in ending suffering, it is applicable, as most of the other terms are not, to killing (as of a sick or injured animal) for humane reasons (the policeman *dispatched* the rabid dog with a single shot) Often *dispatch* is merely a euphemism for another of the terms of this group when quick killing or a sudden end is implied (reached up, caught Wright by the coat, . . . and at one stab *dispatched* him—*Amer. Guide Series: La.*) *Execute* is the term for putting to death one who has been condemned to such a fate by a legal or military process, or sometimes by summary action of a group (execute a convicted assassin)

kind *n* *type, sort, stripe, kidney, ilk, description, nature, character

kind *adj* **Kind, kindly, benign, benignant** mean having or exhibiting a nature that is gentle, considerate, and inclined to benevolent or beneficent actions and are comparable especially as applied to persons and to their acts and utterances. *Kind* and *kindly* both imply possession of qualities (as interest in others' welfare, sympathy, and humaneness) appropriate to man as a rational, sensitive, and social being. The two words are often used interchangeably without loss, but they may be used distinctively, *kind* then implying reference to a disposition to be sympathetic and helpful, and *kindly* to the expression of a benevolent, sympathetic, or helpful nature, mood, or impulse; thus, he has a *kind*, rather than *kindly*, heart; he takes a *kindly*, rather than *kind*, interest in ambitious boys (be *kind* to animals) (the *kindly* ministrations of a nurse) (kindly words of advice) (the *kindest* man, the best-conditioned and unwearied spirit in doing courtesies—*Shak.*) (ring in the valiant man and free, the larger heart, the *kindlier* hand!—*Tennyson*) **Benign** (see also FAVORABLE) and **benignant** stress mildness, serenity, and mercifulness more than do *kind* and *kindly*; they also often imply graciousness and therefore are more frequently applied to superiors than to equals, when they are used to describe persons or their acts, utterances, or policies (a *benign* master) (the transformation of a *benign* personality into a belligerent one—*Mumford*) (a *benignant* influence) (strange peace and rest fell on me from the presence of a *benignant* Spirit standing near—*Sill*) *Ana* benevolent, *charitable, humane, altruistic, philanthropic, eleemosynary, humanitarian; sympathetic, warm, warmhearted, responsive, *tender, compassionate; clement, lenient, indulgent, merciful, *forbearing, tolerant;

kingly, regal, royal, queenly, imperial, princely are comparable when meaning of, relating to, or befitting one who occupies a throne. *Kingly, regal,* and *royal* are often interchanged, especially when used in reference to a monarch who is called *king*; thus, *kingly, regal,* or *royal* power are equally appropriate and idiomatic. However, usage shows a degree of preference for **kingly** when the reference is to the personal or ideal character of a king or to his feelings, disposition, aims, or actions (*kingly* courtesy) (*kingly* condescension) (leave *kingly* backs to cope with *kingly* cares—*Cowper*) or for **regal** when the reference is to the king's office or the state or pomp which accompanies the exercise of his powers (*regal* ceremonies) (*regal* splendor) (ascend your throne majestically . . . sit *regal* and erect—*Auden*) and for **royal** when the reference is to persons or things associated with the king either as a person or as a monarch, but not necessarily involving magnificence or display (the *royal* family) (the *royal* residences) (a *royal* society is one under the patronage of a king or members of his family) In extended use *kingly* carries the strongest implication of dignity and nobility (*kingly* pride) (I am far better born than is the king, more like a king, more *kingly* in my thoughts—*Shak.*) while *regal* suggests magnificence or majestic character (a *regal* feast) (her rather *regal* conception of the behavior to be expected of a whorehouse madam may have a comic value—*Gibbs*) (“Just tell me what you would like to eat; you can have anything you want.” . . . It had a *regal* ring—*Henry Miller*) and *royal*, fitness or suitability for a king especially in superlative excellence (a *royal* welcome) (had a *royal* time) (was treated with the *royal* acclaim of a visiting statesman—*White*) **Queenly** is used in place of *kingly* when the reference is directly to a person who is a female sovereign in her own right or is the consort of a king (*queenly* courtesy) (*queenly* prerogatives) But when the reference is to the office, the family of the queen, or anything to which *regal* and *royal* are normally applied, the latter adjectives are used without reference to the sex of the sovereign. **Imperial** suggests reference to a monarch who is called *emperor* or *empress* (His *Imperial* Majesty) (an *imperial* court) (the *imperial* power) In extended use *imperial* implies fitness or suitability for an emperor or empress and typically suggests a more awe-inspiring quality than *kingly* and more pomp and grandeur than *regal* or *royal* (I have seen New York grow from the little old town of the nineties to the *imperial* city that stands there now—*White*) (she was *imperial* rather than rude—*Wylie*) **Princely** implies reference to one who is called a *prince* and especially to one who is so called as the monarch of a principality, as the heir to a royal throne, or as a male member of the immediate royal family (the representative of the *princely* power—*Sarah Austin*) (among the *princely* houses of Western Europe—*Free-*

knowledge, science, learning, erudition, scholarship, information, lore are comparable when they mean what is known or can be known, usually by an individual but sometimes by human beings in general. **Knowledge** applies not only to a body of facts gathered by study, investigation, observation, or experience but also to a body of ideas acquired by inference from such facts or accepted on good grounds as truths <his *knowledge* is both extensive and accurate> <the advantage of gaining a *knowledge* of French literature> <strength and bustle build up a firm. But judgment and *knowledge* are what keep it established—*Hardy*> <the inventor of the radio . . . had the advantage of accumulated *knowledge*—*Krutch*> **Science** (see also ART 3) is occasionally employed as a close synonym of *knowledge* but ordinarily it applies only to a body of systematized knowledge dealing with facts gathered over a long period and by numerous persons as a result of observation and experiment and with the general truths or laws derived by inference from such facts. The term usually connotes more exactness and more rigorous testing of conclusions than *knowledge* does and therefore is often used to denote knowledge whose certainty cannot be questioned <the art of feeding preceded the *science* of nutrition by many centuries—*Hadley*> <the defense of nations had become a *science* and a calling—*Macaulay*> <perhaps all the *science* that is not at bottom physical *science* is only pretentious nescience—*Shaw*> **Learning** specifically applies to knowledge gained by long and close study not only in the schools or universities but by indi-

vidual research and investigation; it may be used of those who are engaged in the study of science, but it is more often employed in reference to those who devote themselves to the study of the humanities (as languages, literature, history, and philosophy) <he is a man . . . of deep *learning*—*Burney*> <a man of good education and *learning*, of an excellent understanding, and an exact taste—*Swift*> <*learning* commonly connotes organized lore outside of any scientific area. It is an end in itself, it has been so honored by the world for centuries—*H. M. Jones*> **Erudition** carries a stronger implication of the possession of profound, recondite, or bookish knowledge than does *learning* <all the encyclopedic *erudition* of the middle ages—*Lowes*> but often the terms are employed as if they were equivalent in meaning <I arrived at Oxford with a stock of *erudition*, that might have puzzled a doctor—*Gibbon*> <it does not seem to me fitting . . . that one layman, with no special *erudition* in that subject, should publicly express his views—*T. S. Eliot*> **Scholarship** implies the possession of the learning characteristic of the trained scholar; the term usually suggests mastery in detail of a field of study or investigation, the exhibition of such qualities as accuracy and skill in carrying on research intended to extend knowledge in that field, and the display of powers of critical analysis in the interpretation of the material that is gathered <never fulfilled the promise of *scholarship* given by his great and precocious intellectual power and his even greater erudition—*Economist*> <what *scholarship* represents is a change in the temper of the human mind, in the focus of its attention and in the quality of the things it cherishes—*Frankel*> **Information** usually denotes a kind or items of knowledge gathered from various sources (as observation, other persons, or books) and accepted as truth; the term carries no specific implication regarding the extent, character, or soundness of that knowledge; often it suggests no more than a collection of data or facts either discrete or integrated into a body of knowledge <seeking *information* about her ancestors> <his sources of *information* are not always reliable> <the adult, with trained powers, has an immense advantage over the child in the acquisition of *information*—*Eliot*> <a full, rich, human book, packed with *information* lightly dispensed and fortified with learning easily worn—*Tracy*> **Lore** is occasionally used in place of *learning*, but ordinarily it applies to a body of special or out-of-the-way knowledge concerning a particular subject possessed by an individual or by a group and is primarily traditional and anecdotal rather than scientific in character <sacred *lore*> <folk, or popular, etymology does not usually create words, but it provides *lore* about words which is as pleasant as it is unreliable—*Laird*> <a *lore* composed of beliefs, customs, crafts, anecdotes . . . bearing in its content and terminology the unmistakable stamp of the backwoods—*Amer. lack *n* **Lack, want, dearth, absence, defect, privation** are comparable when denoting the fact or state of being without something. **Lack** is somewhat ambiguous in scope since it may imply either a total or a partial failure of something that in the circumstances might be expected to be present and often requires qualification to make its intent unequivocal (with a complete *lack* of bloodshed, the republic was proclaimed—*William Tate*) (the comparative *lack* of simian fossils—*R. W. Murray*) (there is a slackening, a *lack* of faith in the pioneer dream that everyone may be rich, free, and powerful—*Lord*) **Want** (see also POVERTY) may imply either a partial or a complete lack but its range of application is far narrower than that of *lack* since it specifically applies to deficiencies of what is essential or at least needed or desirable; thus, one may exhibit either a *want* or a *lack* of tact; there may be a complete *lack*, rather than *want*, of pain immediately

after some injuries (showed a certain *want* of courtesy) (war production occasionally suffered from *want* of hands to tend the machines or harvest the crops—*Handlin*) (an utter and radical *want* of the adapting or constructive power which the drama so imperatively demands—*Poe*) **Dearth** implies an often distressingly inadequate supply rather than a complete lack (her vanity, *dearth* of brains, and excessive sentimentality were compensated by her kindness—*Simmons*) (there were six seasons of *dearth* approaching famine—*Van Valkenburg & Huntington*) (there is no *dearth* of simple violence in San Antonio—*Green Peyton*) **Absence** is perhaps the most unequivocal of these terms; when not qualified it denotes the complete lack of something (the prolonged *absence* of rain) or that something or occasionally someone is not present (in the *absence* of his father the boy managed the farm) (the general *absence* of undergrowth was understood . . . to have resulted from repeated Indian-set fires—*R. H. Brown*) (the confusion resulting from the *absence* of a critical discriminating attitude in the discussion of religion—*Cohen*) **Defect** (see also BLEMISH) implies the absence or lack of something required for completeness (as in form) or effectiveness (as in function) (be mine the privilege to supplement *defect*, give dumbness voice—*Browning*) (defect in a work [of art] is always troubling ultimately to an excess on one side or the other, injuring the integration of matter and form—*Dewey*) (there are certain obvious and superficial defects in this poem . . . But merit easily outweighs *defect*—*Day Lewis*) **Privation** in the sense pertinent here (see also POVERTY) is used primarily in certain philosophical definitions of negative qualities or states as absences of the corresponding positives (cold is the *privation* of heat) (St. Thomas regards evil as *privation*. In so far as a thing acts according to its nature, which is good, it cannot cause evil—*Thilly*) (dialectical terms . . . are terms standing for concepts, which are defined by their negatives or their *privations*—*R. language 1 **Language, dialect, tongue, speech, idiom** are comparable when they denote a body or system of words and phrases used by a large community (as of a region) or by a people, a nation, or a group of nations. **Language** may be used as a general term for a body of communicative symbols whether it is made up of words, or of sounds, gestures, and facial expressions, or of visual signals (as a code of lights, smoke, or flags), or of electrical impulses in a computer. However, in its ordinary and specific sense the term refers to a body of words that by long use by the population of a widespread territory has become the means whereby the ideas or feelings of the individual members of that population are communicated or expressed. The term suggests some degree of stability in behavior (as in vocabulary, pronunciation, and grammaticality); it usually connotes the existence of a standard determined by the usage of educated writers and speakers (English and French are *languages*, that is to say they are systems of habits of speech, exactly like Eskimo or Hottentot or any other *language*—*R. A. Hall*) (dead *languages* such as classical Latin and ancient Greek) But *language* is also applied to a body of words and phrases that is peculiar to an art, a science, a profession, or a class and that, however well understood by others of the community, is not generally adopted by them (in economic *language* the “marginal saver” determines the price—*Hobson*) (it took the three of us, representing economics, sociology, and political science, about six weeks to learn each other’s *language*—*Kerwin*) **Dialect** (see also DIALECT 1) may denote a form of language which is clearly distinguishable from other forms by marked differences and an identity of its own. More often it refers to a variant of a recognized language, restricted to a limited area and not entirely unintelligible to speakers of the language of which it is a phase (Venetian and

Sicilian are equally *dialects* of Italian, although as far as mutual intelligibility is concerned these two might as well be called independent languages—*Sapir*) (the perennial controversy as to whether Scots is a language or a *dialect*) *Tongue* and *speech* both call attention to the spoken rather than written communication. **Tongue** differs from *language* chiefly in its being applicable to a dialect, a patois, an argot (for these terms, see DIALECT 1) as well as to the standard form of a language (there is no poet in any *tongue*—not even in Latin or Greek—who stands so firmly as a model for all poets—*T. S. Eliot*) (translated the Bible into an Indian *tongue*—*Suckow*) (he is a New England poet . . . true to its landscape, its climate, its history, its morality, its *tongue*—*Mark Van Doren*) **Speech**, with rare exceptions, means spoken language, or (as in modern technical use) language as it is spoken (people of a strange *speech*—*Ezek 3:6*) (there are at least two sounds in the Anglo-Saxon which are unknown in our present *speech*—*Whitney*) **Idiom** suggests reference to a country or sometimes to a province or section of a country with its own peculiar and distinctive tongue (part of the difficulty lies in the English *idiom* which is unfamiliar to the American reader—*Stead*) (on the spot I read . . . the classics of the Tuscan *idiom*—*Gibbon*) **Idiom** also may apply to private or peculiar language (as of a particular writer, class, literary school, or group) (the eminently personal *idiom* of Swinburne—*T. S. Eliot*) (the medieval poetic *idiom* came after a while to seem a jargon—*Lowes*) (I have read very little *Runyon*, whose *idiom* I always suspected—wrongfully, I’m sure—of being more or less synthetic—*Gibbs*)

2 **Language, vocabulary, phraseology, phrasing, diction, style** are comparable rather than synonymous terms when they mean oral or written expression or a quality of such expression that is dependent on the variety, or arrangement, or expressiveness of words. **Language** applies primarily to verbal expression with reference to the words employed. It may call attention to excellence or ineptness in the use of words, to their dignity or their vulgarity, to their fitness or lack of fitness, to their sonority or their stridency, or to any of the qualities which speech or writing may derive from the choice and arrangement of words (he avoided harsh *language* in dealing with his children) (*language*, grave and majestic, but of vague and uncertain import—*Macaulay*) (when I read Shakespeare I am struck with wonder that such trivial people should muse and thunder in such lovely *language*—*D. H. Lawrence*) **Vocabulary** calls attention chiefly to the extent or variety of the writer’s or speaker’s stock of words or to the sources from which such a stock is derived (the constant play and contrast in English poetry between the Latin and the Anglo-Saxon *vocabularies*—*Bottrall*) (German, famous for its polysyllabic *vocabulary*—*G. A. Miller*) (even the *vocabulary* of renunciation, and its conventional gestures, were unfamiliar to him—*Wharton*) **Phraseology** or **phrasing** is sometimes used in place of *vocabulary* when the reader’s attention is called especially to its idiomatic or peculiar character (eccentricities of *phraseology*) (awkward *phrasing*) (the exquisite *phrasing* in which we feel that every word is in its place—*Edmund Wilson*) but **phraseology** in particular stresses the grouping of words as much as their choice (he can say in the *phraseology* of the sentimentalist that he “loves nature”) (the *phraseology*, rather than the vocabulary, of Donne offers difficulty to the inexperienced reader) (the gaudiness and inane *phraseology* of many modern writers—*Wordsworth*) (this cryptic and involved

phraseology, obscure to the uninitiated, permeates all communist publications—*Report of Special Committee on Communist Tactics*) **Diction** calls attention to the choice and arrangement of words with reference to their expression of ideas or emotions. The term is used commonly of considered language (as of poetry, literary prose, or oratory) and it usually, therefore, implies selection or arrangement with reference to such ends as impressiveness, elegance, and beauty of sound (he was in a high fever while he was writing, and the blood-and-thunder magazine *diction* he adopted did not calm him—*Kipling*) (his choice of forceful picturesque *diction* in speech and writing—*Lawrason Brown*) (a poet cannot help being of his age, the *diction* and the idiom see to that—*Gogarty*) **Style** denotes a mode or manner of expressing one's thoughts or emotions or imaginative conceptions in words, as distinct from or as distinguishable from the thoughts or emotions or conceptions expressed. It is sometimes thought of as a structure and diction peculiar to an age or a literary type and found in each representative work of that time and type (the Renaissance epic *style* is based upon that of Vergil) (a poem written in the *style* of the ode) but perhaps more often it is thought of as a manner of expression which in structure and diction involves artistry but is individual and characteristic of its author (*style* . . . is a peculiar recasting and heightening, under a certain condition of spiritual excitement, of what a man has to say, in such a manner as to add dignity and distinction to it—*Arnold*) (what he believed in was *style*: that is to say, a certain absolute and unique manner of expressing a thing, in all its intensity and color—*Pater*) (this then is *Style*. As technically manifested in literature it is the power to touch with ease, grace, precision, any note in the gamut of human thought or emotion—*Quiller-Couch*)

languid, **languishing**, **languorous**, **lackadaisical**, **listless**, **spiritless**, **enervated** are comparable when they mean lacking in vim or energy or, when applied to things, the appearance of it. **Languid** usually implies an unwillingness or an inability to exert oneself owing to fatigue, exhaustion, or physical weakness (struck by something *languid* and inelastic in her attitude, and wondered if the deadly monotony of their lives had laid its weight on her also—*Wharton*) (walked from the room with *languid* deliberate steps; . . . she moved as though she were intolerably weary—*Wylie*) **Languishing** may suggest delicate indolence, often accompanying boredom or futilely wistful pensiveness and often connotes an affected rather than a real state (a *languishing* gaze) (with their *languishing*, sorrowful melodies . . . with their high-flown sentimentalism, these ballads reflected . . . stale romanticism—*Mooney*) **Languorous** carries a suggestion of languidness and delicacy acquired through soft living, through shrinking from exertion, or through sentimentalism or overindulgence in tender or amorous emotions (sought out rich words with which to re-create the *languorous*, stilling beauty of the Old South—*Springfield Republican*) (a poignant perfume, soft and *languorous*, all-enveloping and heart-stirring—*Kenneth Roberts*) (her shaded lids . . . were *languorous* from my kisses, and gave . . . an inebriating love-bemused and longing-solemn look—*Edmund Wilson*) **Lackadaisical** implies a carefree or indifferent attitude that either forbids exertion or makes for futile, piddling, or halfhearted and indolent efforts (at the terrific tempo of mechanized war, *lackadaisical* men, lacking in self-confidence and slow to obey are lost—*G. S. Patton*) (a *lackadaisical* river town that tolerated a generous amount of vice—*T. D. Clark*) **Listless** need not imply physical weakness, but it almost invariably implies either

a lack of interest in what is going on around one or in what one is doing, or a languid appearance that may be the result either of boredom or ennui or of fatigue or disease (the child has grown thin, white, and *listless* within the past two months) (suddenly relaxed into a *listless* attitude of sullen tractability—*S. S. Van Dine*) (they were effete, weary, burnt-out revolutionists, whose *listless* voices slid sleepily over their melodies—*Mooney*) **Spiritless** implies the loss or the absence of the animation or fire that gives life or dash to a person or to his words and acts (a *spiritless* performance of a play) (dominated the starving, *spiritless* wretches under him with savage enjoyment—*Mason*) (no courage can repel the dire assault; distracted, *spiritless*, benumbed, and blind, whole legions sink—*Wordsworth*) **Enervated** implies a destruction of qualities or powers essential to the vigorous exercise of the will and the intellect. Often it suggests the influence of luxury or of sloth but it may imply the operation of other causes, even of those that in themselves are not evil but may have deleterious effects (the *enervated* and sickly habits of the literary class—*Emerson*) (society in Rome, *enervated* as it was by vicious pleasures, craved continually for new excitements—*Froude*) (that *enervated*, run-down condition that is commonly known as Southern gentility—*Basso*)

lapse *vb* **Lapse, relapse, backslide** and their corresponding nouns, **lapse, relapse, backsliding**, are comparable when they mean to fall back into a state or condition from which one has raised oneself or has been raised, or the act or state of one who has so fallen back. As distinguished from *decline, degenerate, and deteriorate*, these verbs do not necessarily imply the reversion of a process or development or the gradual losing and the inevitable loss of a valuable quality (as strength, power, or influence) but they do distinctively imply a failure to continue without break a course of improvement and a return, often quickly effected but not always irreparable, to an earlier bad or lower state or condition. Both *lapse* and *relapse* basically imply a sliding or slipping but they are increasingly divergent in their applications and connotations. **Lapse** usually presupposes reformation in manners, morals, or habits, or the acceptance of a high standard (as of rectitude, accuracy, or accomplishment). It need not imply culpability or weakness, for it often suggests no more than a sudden failure of the memory or the influence of habit or tradition or the pressure of an overwhelming emotion (it is easy for the person who has acquired good manners by effort to *lapse* into old ways when he is not on guard) (only when she was strongly moved did she *lapse* into the dialect she spoke in her youth) (the moment his attention is relaxed . . . he will *lapse* into bad Shakespearean verse—*T. S. Eliot*) (whatever rhythmical or technical *lapses* they may contain, the conception is throughout that of a great musician—*Edward Sackville-West*) When culpability is strongly implied, the word still, in comparison to the other terms in the group, often connotes extenuating circumstances; it is therefore the fitting choice when the context indicates such circumstances (he constantly fought his tendency to *lapse* into easygoing ways) (the natives *lapsed* back into accustomed vices—*Billington*) (in estimating a man's place in the scale of perfection . . . the moral judgment, not withholding condemnation of a particular *lapse*, may not condemn the man wholly for it—*Alexander*) **Relapse** presupposes definite improvement or an advance (as toward health or toward a higher physical, moral, or intellectual state) and it implies a complete and often dangerous reversal of direction; thus, one whose improvement in a serious illness has been marked may be said to *relapse*, or suffer a *relapse*, when his condition becomes definitely worse; a reformed thief is said to *relapse* when he returns to his old life (the Arabs were once the continuators of the Greek tradition; they produced men of science. They have *relapsed* . . . into pre-scientific fatalism, with its attendant incuriosity and apathy—*Huxley*) (man's eternal tendency to *relapse* into apathy and atavism—*Stewart*) (his firmness of mind soon *relapsed* into a cankerous intolerance—*Cranston*) (the corruptions and vices which accompany the horribly swift *relapse* of a culture into barbarism—*Edmund Fuller*) **Backslide** and **backsliding** also imply a reversal in direction of one who has been going forward, but unlike *relapse*, which is in many ways their close synonym, they are restricted in their reference largely to moral and religious lapses. They therefore often suggest unfaithfulness to one's duty or allegiance or to principles once professed (did not I . . . *backslide* into intemperance and folly—*Marryat*) (this is not to say that *backslidings* fail to occur; on the contrary *backslidings* normally follow any strenuous moral experience—*G. W. Allport*)

large, big, great mean above the average of its kind in magnitude, especially physical magnitude. **Large** may be preferred when the dimensions, or extent, or capacity, or quantity, or amount is being considered (a *large* lot) (a *large* hall) (a *large* basket) (a *large* meal) (a *large* allowance) (large crevasses and huge tunnels in many of them [icebergs] bore witness to a long voyage—*Schytt*) **Big**, on the other hand, is especially appropriate when the emphasis is on bulk, or mass, or weight, or volume (a *big* book) (a *big* pile) (the box is too *big* to carry) (a *big* voice) (so *big* already—so enormous in fact—that we named him Monstro, and he padded about like a furry whale—*Atlantic*) As applied to material objects, **great** has been practically displaced by *large* or *big*. Where **great** is used to denote physical magnitude, it now regularly connotes some impression (as of wonder, surprise, amusement, or annoyance) associated with the size (the *great* head that seemed so weighted down with thought and study—*The Nation*) (the *great* size of these figures—the largest man is 167 feet long . . . prevented their character from being recognized—*Amer. Guide Series: Calif.*) (his eyes were *great* and hollow, as a famished man forlorn—*Morris*) **Great** alone, in standard English, expresses degree (he was listened to with respect and, when aroused, with nearly as *great* fear—*W. C. Ford*) (great kindness) (great heat) In extended use, **great** suggests eminence, distinction, or supremacy (if we win men's hearts throughout the world, it will not be because we are a big country but because we are a *great* country. Bigness is imposing. But greatness is enduring—*A. E. Stevenson*) while **large** suggests breadth, comprehensiveness, or generosity (in intellect and humanity he is the *largest* type I have come across. Other greater men in my time were great in some one thing, not *large* in their very texture—*Ricketts*) and **big** carries over the implication of mass or bulk but often suggests impressiveness or importance rather than solidity or great worth (so-called *big* names, which are still *big* and still have great readership value, command high prices—*Baldwin*) (he didn't expect to work here all his life . . . pretty soon he'd have a new job and would be a *big* man—*Granite*)

the air force) **Mainly** is often used interchangeably with *chiefly*, but not where preeminence is implied; rather it connotes greatest importance among a number of things, but not exclusive value (be sure to take along with you all that you will need, but *mainly* informal clothes) (the cause depends *mainly* on the validity of this act—*John Marshall*) (the Pickwickian Christmas did very little to stimulate consumption; it was *mainly* a gratuitous festivity—*Huxley*) **Principally** carries an idea of primary importance rather than outstanding or relative importance; the difference is not great between it and *chiefly* or *mainly* except when the idea of being first or primary is emphasized (they wholly mistake the nature of criticism, who think its business is *principally* to find fault—*Dryden*) (his support comes *principally* from the income of invested money) (the cash crops are *principally* wheat and rye) **Generally** stresses reference to the majority of persons, instances, or cases involved (the people, not universally, but *generally*, were animated by a true spirit of sacrifice—*Froude*) (the news was *generally* received with joy) (the land breezes here are *generally* hot and dry)

last *adj* Last, latest, final, terminal, concluding, eventual, ultimate are comparable when they mean following all the others in time or order or in importance. What is last comes at the end of a series, especially of things of the same kind or class; the term usually implies that no more will follow or have followed (the last page of a book) (their last child is now ten years of age) (fairest of stars, last in the train of night—*Milton*) but it may imply only that the thing so qualified is or was the most recent or is the closest or nearest with respect to the present or a given time or period (his last book is his best so far) (their last visit to us was in December) In this latter sense latest may be preferred as less ambiguous; thus, "his latest book" is clearer than "his last book" since the latter wording might suggest the author's ensuing death (the latest number of a current magazine) (the latest news is that all is well) (vetoed the latest version of Norris's . . . bill—*Lepawsky*) What is final definitely closes a series or process not only because it is the last in order of individuals or details (the final day of school) (the final float in the procession) (the final event on a program) but because it is decisive or conclusive (the final answer to this question is still to be found) (a final decree of divorce) (judgment that is final, that settles a matter—*Dewey*) (a genuinely popular ballad can have no fixed and final form, no sole authentic version—*Child*) What is terminal comes at the end of something and marks the limit of its extension, its growth, or its completion as a series or process (the terminal point of a railroad) (the Tamiami Trail, a name compounded of the syllables from the names of its terminal cities, Tampa and Miami—*Amer. Guide Series: Fla.*)

(little newsboys crying their wares in correct Bostonese, down to broad a's and softened terminal r's—*Price*) What is concluding brings something (as a speech, a book, a program, a celebration) to an end or marks its finish (the concluding address was delivered by the chairman) (provoked comparison by making their concluding paragraphs almost identical—*R. G. Davis*) What is eventual is bound to follow as the final effect of causes already in operation or of causes that will be operative if a given or understood contingency occurs (the silent decay and eventual overthrow of her natural defenses—*Gladstone*) (it is his object to point out the necessity . . . for a deliberate and purposive art of eugenics, if we would prevent the eventual shipwreck of civilization—*Ellis*) What is ultimate (see also ULTIMATE 2) is the last, final, or terminal element in a series or process (this ultimate book of my autobiography—*Osbert Sitwell*) (the ultimate stage in a process of descent—*Ellis*) or is the final outcome or end to which a person or thing is moving or working (the ultimate effect of a drug) (when I think of the earth's refrigeration, and the ultimate collapse of our solar system—*L. P. Smith*) or is the most remote in time, either past or future, or most important in a scale of values (the ultimate effect of a war) (that word comes into English from French, but its ultimate source is Sanskrit) (its utopianism interferes with an interest in proximate, rather than ultimate, goals—*Niebuhr*)

Ant first

lasting, permanent, perdurable, durable, stable, perpetual mean enduring for so long as to seem fixed or established. Lasting may imply long continuance with no end in sight; in this sense, it may be close in connotation to everlasting (who . . . sings his soul and body to their lasting rest—*Shak.*) More typically, however, it does not imply endlessness, but rather a surprising capacity to continue indefinitely (the anger of slow, mild, loving people has a lasting quality that mere bad-tempered folk cannot understand—*Deland*) (an excellent mind, shrewd wit, and an amazing capacity for developing lasting friendships—*Douglas*) **Permanent** applies chiefly to things which are not temporary, tentative, transitory, or fluctuating but which continue or are likely or expected to continue indefinitely or as long as relevant; thus, a permanent position may be expected to continue on the one hand until death or retirement removes the employee holding it or, on the other, until fundamental changes in or termination of the business of the employer renders it superfluous; permanent damage to an object is damage that will remain as long as the object persists (settled down and made a permanent home for his family) (the stimulation of violent emotions may leave permanent traces on the mind—*Inge*) (much of the current literature on this subject, both ephemeral and of permanent value, comes out of Russia—*Sokolsky*) **Perdurable** carries a stronger implication than does lasting in its typical use of endlessness of existence; but it suggests endless or apparently endless existence especially from the point of view of human remembrance or human history (makes him one of the few perdurable figures of our Civil War and secures him a sainthood that slander has not been able to violate—*Cargill*) (our literature is going to be our most perdurable claim on man's remembrance—*Quiller-Couch*) **Durable** implies power of resistance to destructive agencies; it usually suggests a capacity for lasting that exceeds that of other things of the same kind or sort (a durable pavement) (durable color) (more durable than brass—*Junius*) (many writers have longed for durable renown—*L. P. Smith*) **Stable** applies to what is so firmly or solidly established that it cannot be moved or changed; the term therefore is applicable to things that

are lasting or durable because they are deeply rooted, or finely balanced, or infixed and not subject or likely to be subject to fluctuations (a *stable* foundation) (a *stable* form of government) (stable institutions) (the *stable* earth and the changing day—*George Eliot*) (men as steady as . . . wheels upon their axles, sane men, obedient men, *stable* in contentment—*Huxley*) (a relatively *stable* society . . . where the individual remains, both physically and socially, in the place in which he was born—*Cheek*) **Perpetual** (see also CONTINUAL) is in many respects closer to *permanent* than to the remaining terms but it differs from it signally in the absence of any notion of relevance and may approach *everlasting* in its suggestion of an endless course or a going on without a prospect of something intervening to bring about an end; thus, the furnace has a *permanent*, not a *perpetual*, place in the cellar since the cellar itself will ultimately crumble away; *perpetual*, rather than *permanent*, motion is considered impossible because of the inevitable interference of friction (a dark, a colorless, a tasteless, a perfumeless, as well as a shapeless world: the leaden landscape of a *perpetual* winter—*Mumford*) (the song of the minstrel moved through a *perpetual* Maytime—*J. R. Green*) (a *perpetual* embargo was the annihilation, and not the regulation of commerce—*John Marshall*)

latent, dormant, quiescent, potential, abeyant are comparable when meaning not now manifest or not evincing signs of existence or activity. **Latent** implies concealment and is applied to what is present without showing itself (latent energy) (a latent infection) (his sinister qualities, formerly *latent*, quickened into life—*Hardy*) (it remained possible that by further development, *latent* contradictions might have been revealed—*Russell*) **Dormant** usually suggests sleeping and is applied to something which has once been active but now is inactive though not incapable of future activity (a *dormant* plant) (a *dormant* volcano) (which power can never be exercised by the people themselves, but must be placed in the hands of agents, or lie *dormant*—*John Marshall*) (she pursued him with attentions, and when his passion was *dormant* sought to excite it—*Maugham*) **Quiescent** emphasizes the fact of inactivity without necessary implications either of causes or of past or future activity (with the increase of their wealth . . . they sank into *quiescent* Tories—*Meredith*) Sometimes it connotes immobility (if only we could persuade ourselves to remain *quiescent* when we are happy!—*Jefferies*) **Potential** applies to something which at a time in question does not possess such being, nature, or effect as is expressed but which is likely to have or capable of having such being, nature, or effect at some future time (potential energy) (disaffected citizens who are a *potential* danger to the nation) (this eye for a *potential* and achievable best—*Mumford*) (it [an infant] must from the very first be viewed seriously, as a *potential* adult—*Russell*) **Abeyant** (more often, predicatively, in *abeyance*) implies a suspension of activity or active existence (in Mr. Brooke the hereditary strain of Puritan energy was clearly in *abey-*

ance—*George Eliot*) It usually connotes expectancy of revival (nothing seemed left . . . of . . . the former Lewis Raycie, save a lurking and *abeyant* fear of Mr. Raycie senior—*Wharton*) (until all danger of counterrevolution should have been removed, personal rights and liberties would have to be kept strictly in *abeyance*—*Ogg & Zink*) *Ana* hidden, concealed (see HIDE *vb*): *inactive, inert, idle: unripe, unmaturing, *immature

laughable, risible, ludicrous, ridiculous, comic, comical, farcical, droll, funny are comparable when they mean provoking or evoking laughter or mirth. **Laughable** is the general term for whatever is fit to provoke laughter (modern audiences do not find *Shylock* a *laughable* character) (a *laughable* incident) (the lower classes aped the rigid decorum of their "betters" with *laughable* results—*Harrison Smith*) **Risible** is a close synonym of *laughable* and in this sense, like the former, carries no special connotations (a *risible* account of their difficulties) (*risible* courtroom antics—*Hatch*) **Ludicrous** applies to what induces usually scornful laughter because of its absurdity, incongruity, or preposterousness (the *ludicrous* mistakes called schoolboy howlers) (had friendships, one after another, so violent as to be often *ludicrous*—*Belloc*) (some of the best public school teachers in the last century were hot-tempered men whose disciplinary performances were *ludicrous*—*Inge*) (buildings of different materials and styles . . . thrown together in a way at times fairly *ludicrous*—*A. O. White*) **Ridiculous** applies to what excites derision because of extreme absurdity, foolishness, or contemptibility (good manners at the court are as *ridiculous* in the country as the behavior of the country is most mockable at the court—*Shak.*) (to be always harping on nationality is to convert what should be a recognition of natural conditions into a *ridiculous* pride in one's own oddities—*Santayana*) **Comic** and **comical** are becoming distinct in implications and in applications, although they are sometimes interchangeable. **Comic** is applicable especially to something that partakes of the spirit of comedy and particularly of the literary form which aims to present life in a way that does not leave a painful impression and that does evoke smiles or laughter, especially thoughtful laughter, or amused reflection (it is *comic* to see poor little nonentities like Frank Potter caught in it [Christianity], tangled up in it, and trying to get free and carry on as though it wasn't there—*Rose Macaulay*) (has the unerring instinct for things . . . recognized all the world over as *comic*. Green vegetables are always funny, and bad poets, and winter underwear, and feet—*Morley*) **Comical** applies not so much to the character of what induces laughter as to the impression it produces upon the observer; hence, it aptly describes something which arouses spontaneous and unrestrained laughter (the abrupt transition of her features from assured pride to ludicrous astonishment and alarm was *comical* enough to have sent into wild uncharitable laughter any creature less humane than Constance—*Bennett*) (I'm just beginning to get along with them so they don't think I'm quite so *comical*, and my wife comes

sailing in . . . and orders me out—*Faith McNulty*) **Farcical** is often used interchangeably with *comical* but it is especially appropriate when what creates amusement is, like dramatic farce, dependent upon extravagance, nonsense, practical jokes, or burlesque for the effect it produces (boys are like monkeys . . . the gravest actors of *farcical* nonsense that the world possesses—*Meredith*) (almost *farcical* to suppose that Henry, as a Norman prince, could not talk his own language to his Norman bride—*Empson*) **Droll** and **funny** usually impute oddity or strangeness to what makes a thing laughable, but **droll** ordinarily carries a stronger implication of unfamiliarity, quaintness, absurdity, or intentional humorousness (Thackeray's names, though often ludicrous, are always happy, and often imitatively *droll*—*Athenaeum*) (the habit of trying to marshal all the facts, weigh them, and think things through . . . is sometimes regarded as *droll*—*Bunche*) and **funny** of queerness or curiousness (the night mail set me down at Marwar Junction, where a *funny* little happy-go-lucky native-managed railway runs to Jodhpore—*Kipling*) (children thought he was a very *funny* old Chinaman, as children always think anything old and strange is *funny*—*Steinbeck*) **Funny** is, however, the ordinary informal term interchangeable with any other word of the group (a *funny* story) (he could rarely risk being *funny* and lightening his deadly seriousness with comedy—*Anthony West*)

law 1 **Law, rule, regulation, precept, statute, ordinance, canon** all designate a principle laid down or accepted as governing conduct, action, or procedure. *Law, rule,* and *precept* are also used as collective nouns to denote a body of laws, rules, or precepts (obey the law) (work by rule) (teach by precept) *Law* and *precept* are often used abstractly (the world demanded peace and law, not liberties and privileges—*Buchan*) (the poet's business is not with precept—*Lowes*) **Law** (see also HYPOTHESIS) primarily implies imposition by a sovereign authority and the obligation of obedience on the part of those governed (churches are taking the lead in their own Communion as being not under the law of states but under the law of God—*Graham*) In more restricted use, however, it implies a will to maintain peace and justice in the community or group governed and the expression of that will in concrete injunctions or prohibitions. Laws may be written or unwritten: when unwritten they indicate derivation from established custom; when written they commonly indicate enactment by a legislative body or power (the laws of New York State) (beginning with the definition of law in the lawyer's sense as a statement of the circumstances in which the public force will be brought to bear upon a man through the courts—*Justice Holmes*) **Rule**, in contrast with law, suggests closer relation to individual conduct and method, or a desire for order and discipline in the group. Sometimes it implies restriction, whether prescribed or self-imposed, for the sake of an immediate end (as unity in action, uni-

formity in procedure, or conformity to a standard of practice) (the rules of a game) (the rules of a school) (the rules of good writing) Sometimes *rule* does not imply ordering and prohibiting but suggests a positive way of thinking or acting in order to get desired or concrete results (the rule of three) (like many old-time craftsmen he worked strictly by rule of thumb) **Regulation** often equals *rule*, but distinctively it connotes prescription by authority for the control or management of an organization or system (military regulations) (regulations respecting interstate commerce) (factory regulations) (we, the artists, are individualists . . . what right have you to circumscribe us with petty rules and regulations?—*Hartford*) (this regulation establishes ceiling prices for producers (brewers) of domestic malt beverages—*Disalle*) **Precept**, like law, usually implies generality and lack of detail in the statement and an authoritative origin; like rule, however, it implies closer reference to individual conduct than to government (he really was the one child to whom the "spare-the-rod" precept did not apply—*Deland*) Often *precept* is applied to what is enjoined by teaching; it commonly suggests counsel or advice, and is opposed in its abstract use to *practice* or *example* (by precept and by practice he proclaimed the lofty solitude of the individual soul—*Ellis*) (observe the sixth commandment, not as a precept of divine law but as a counsel of profitable prudence—*Sullivan*) **Statute, ordinance, and canon** all come under the general class of law. A **statute** is a written law, formally enacted by a legislative body. An **ordinance** is a local law, especially one enacted by a municipal government. A **canon**, basically, is a law of a church binding upon all of its members. In extended use *canon* is applied to such laws of ethics, of society, of criticism, and of the practice of the arts, as have the sanction of accepted authority and are enforced by one's moral, social, or artistic conscience (are we witnessing a violent reaction against accepted canons of decency in life?—*Grandgent*) **Ana** mandate, dictate, *command

lawful, legal, legitimate, licit mean permitted, sanctioned, or recognized by law or the law. **Lawful** differs from the others in implying a reference to various sorts of law (as divine law, natural law, or the law of the land, or as civil law, common law, or canon law). Consequently, the term often comes close in meaning to *allowable* or *permissible* (all things are lawful unto me, but all things are not expedient—1 Cor 6:12) (tell me, which knave is lawful game, which not? Must great offenders, once escaped the Crown, like royal harts, be never more run down?—*Pope*) or sometimes to *rightful* or *proper* (the lawful heir) (a lawful prize) (the lawful sovereign) (that man was not Hannah's lawful husband—*Ingamells*) (William desired to reign not as a conqueror but as a lawful king—*J. R. Green*) **Legal** implies a reference to the law as it appears on the statute books or is administered in the courts; thus, the *lawful* heir is also the *legal* heir; the *lawful* owner of a piece of property is one whose *legal* right to it is certain; a moneylender is entitled only to *legal* interest on his loans. *Legal* is used more often in the sense of sanctioned by law, or in conformity with the law, or not contrary to the law, than in the sense of allowable by the terms of the law (a legal marriage) (the legal period for the payment of a debt) (the capture of the neutral ship carrying contraband was held to be legal) (she became the virtual head of our family, supplanting . . . my Uncle Tiberius (the legal

head)—*Graves*) <the Vichy regime he considers as illegitimate, although, at first at least, it was outwardly *legal*—*Guérard*) **Legitimate**, which basically applies to a child born of legally married parents, also has been used to describe the person who has legal title (as to a throne, an inheritance, or a property) <the *legitimate* monarch> <the *legitimate* heir of an estate> The word may also imply not merely recognition by law but recognition or acceptance by custom, tradition, or the proper authorities or logical admissibility <a lie may be considered *legitimate* if a patient's restoration to health depends on it> <Jane's mother was making indirect but perfectly *legitimate* inquiries into his prospects—*Mary Austin*> <*legitimate* to claim that much of our truly wonderful prodigality of talent is due to the work of gifted teachers—*Michener*> <in the light of the parallels which I have adduced the hypothesis appears *legitimate*, if not probable—*Frazier*> **Licit** usually implies strict conformity to the provisions of the law respecting the way in which something should be performed or carried on; the term therefore is used especially of what is regulated by law; thus, a *licit* marriage, from the point of view of canon law, is one in which all prerequisites and all conditions attached to the performance of the ceremony have been attended to; *licit* liquor traffic is such traffic as obeys strictly the terms of the law; since dealings in the stock market have come under the control of the government, many deals once regarded as *lawful* are no longer *licit* <the state is given its right to determine what is *licit* and illicit for property owners in the use of their possessions—*Commonweal*> **Ana** rightful, *due, condign: allowed or allowable, permitted or permissible (see corresponding verbs at **LET**): justified or justifiable, warranted or warrantable (see corresponding verbs at **JUSTIFY**) **Ant** unlawful —**Con** iniquitous, nefarious, flagitious (see **VICIOUS**)

lawyer, counselor, barrister, counsel, advocate, attorney, solicitor. Lawyer is the general term designating a person versed in the principles of law and authorized to practice law in the courts or to serve clients in the capacity of legal agent or adviser. *Counselor, barrister, counsel, and advocate* name a lawyer who has acquired the right to plead causes in open court or whose specialty is conducting and arguing court cases. **Counselor** is the usual designation in the United States for a lawyer who accepts court cases and gives advice on legal problems. The corresponding British term is **barrister**, with, however, special emphasis on court pleading. **Counsel** may be used as the equivalent of *counselor*; it, but not *counselor*, is also used collectively <a brilliant array of *counsel*> **Advocate** is in its implications the equivalent of *barrister* and *counselor*, but it is used as a designation in countries (as Scotland) in which the legal system is based on Roman law and in a few special courts. **Attorney** and **solicitor** are applied chiefly to a lawyer who serves as a legal agent for clients, transacting their business in specific courts (as probate court). Other powers vary with the law of the state or country. **Attorney** is often used in the United States as equivalent to *lawyer*, but the term may be used more precisely to denote a legal agent who acts for a client (as in conveying property, settling wills, or defending or prosecuting a case in court) <the *attorney* for the executors of the will> <the State's *attorney*> In England, the term *attorney* has been supplanted by *solicitor*, with, however, emphasis on the trans-

action of legal business for a client and the preparation of cases for trial as distinct from actual court pleading.

All mean not easily aroused to action or activity. **Lazy** especially when applied to persons suggests a disinclination or aversion to effort or work and usually connotes idleness or dawdling, even when one is supposedly at work; the term is commonly derogatory <rubbing their sleepy eyes with *lazy* wrists—*Keats*> <Una, now twenty-three, grandly beautiful, alternately *lazy* and amazingly energetic—*Rose Macaulay*> <we were too *lazy* . . . We passed our indolent days leaving everything to somebody else—*H. G. Wells*> **Indolent** implies an habitual love of ease and a settled dislike of movement or activity <the stretching, *indolent* ease that the flesh and the spirit of this creature invariably seemed to move with—*Wister*> <he was so good-natured, and so *indolent*, that I lost more than I got by him; for he made me as idle as himself—*Cowper*> **Slothful** suggests the temper or indolence of one who is inactive when he knows he should be active or who moves or acts with excessive slowness when speed is essential <be not *slothful*, but followers of them who through faith and patience inherit the promises—*Heb* 6:12> <not dependency, not *slothful* anguish, is what you now require, —but effort—*Hawthorne*> <he would . . . jog a *slothful* conscience and marshal its forces—*Parrington*> **Faineant** implies both a slothful temper and a disposition to remain idly indifferent in spite of pressure or urgency <he does not abandon hope in the masses . . . or see the people animated only by a *faineant* desire to be ruled—*New Republic*> <carpet-knight . . . is used as a term of reproach for a soldier who stays at home, and avoids active service and its hardships, with a particular reference to the carpet of a lady's chamber, in which such a *faineant* soldier lingers—*Encyc. Brit.*>

lean *vb* *slant, slope, incline

Ana bend, *curve: *turn, deflect, divert, sheer

lean *adj* *Lean, spare, lank, lanky, gaunt, rawboned, angular, scrawny, skinny* mean thin because of absence of superfluous flesh. *Lean* stresses the lack of fat and therefore of rounded contours <lean as a greyhound—*Thackeray*> <a small, lean, wiry man with sunk cheeks weathered to a tan—*Masefield*> *Spare* often suggests abstemiousness or sinewy strength <he had the spare form . . . which became a student—*George Eliot*> <the spare, alert and jaunty figure that one often finds in army men—*Wolfe*> *Lank* suggests tallness or length as well as leanness; often also it implies wasting <meager and lank with fasting grown, and nothing left but skin and bone—*Swift*> <a pack of lank hounds, sore-footed and sore-eared—*H. L. Davis*> *Lanky* adds the suggestions of awkwardness and loose-jointedness <a lanky youth, all arms and legs> <lanky men and women . . . so tall and attenuated that they seem at times to approach the one-dimensional—*Coates*> *Gaunt* stresses want of sufficient flesh to conceal the bones; it often connotes overwork or undernourishment <her bony visage—*gaunt* and deadly wan—*Wordsworth*> <this one with the passing of the years had grown lean and gaunt and the rocklike bones of her face stood forth and her eyes were sunken—*Buck*> *Rawboned* often equals *gaunt*, but it is applied particularly to persons of large, ungainly frame and it seldom implies undernourishment <a long, gawky, rawboned Yorkshireman—*Kipling*> *Angular* implies not only absence of curves, but jerkiness or stiffness in movement <sudden retirement of the angular female in oxydated bombazine—*Holmes*> *Scrawny* and *skinny* imply extreme thinness but *scrawny* may additionally suggest slightness or a shrunken meager quality <lank scrawny chickens> <a barren slope covered with scrawny vegetation> <the scrawniest, wretchedest horse I had ever seen—*Kalischer*> while *skinny* suggests a stringy fleshless condition such as is associated with a deficiency of vitality or strength <skinny children> <the skinniest human being I ever saw. He had not enough flesh on his bones to make a decent-sized chicken—*Lynd*>

Ana slender, slim, *thin, slight: cadaverous, wasted, pinched, *haggard

Ant fleshy —*Con* brawny, *muscular, sinewy, burly, husky: stout, *strong, sturdy, stalwart: plump, portly, rotund, fat, obese, corpulent (see FLESHY)

leaning *n* *Leaning, propensity, proclivity, penchant, flair* mean a strong instinct or liking for something or sometimes someone. One has a leaning toward something (as a church, a party, or a school of philosophy) when one definitely inclines to attachment to it or to follow it as a pursuit, a profession, or a course of action. *Leaning*, however, indicates only the direction in which one is being drawn by the force of attraction; it carries no implication of one's final course or destination <the king was suspected by many of a leaning towards Rome—*Macaulay*> <he had a leaning toward the law, but his father urged him to study medicine> <a reformer with radical leanings, for years he edited a weekly paper called the *Anti-Monopolist*—*Martin Gardner*> One has a propensity (as toward or for something or to do something) when one has an innate or in-

herent and often uncontrollable longing or is driven by a natural appetite <study the propensities of a group of children> <the inveterate propensity of their husbands to linger about the village tavern—*Irving*> <such vehement propensities as drove Romeo, Antony, Coriolanus, to their doom—*Bradley*> <his propensity for sweeping authoritative statement was so supported by bravura passages of description that the gaps in his knowledge were overlooked—*Ferguson*> One has a proclivity (as for or towards something or to do something) when one is prone to something not only by natural inclination but also by habitual indulgence or by the peculiarities of one's constitution or temperament <the vesper sparrow, whose special proclivity for singing at twilight gave it its name—*W. P. Smith*> <curb a proclivity to lying> <the cow pony often maintained the pitching proclivities of a bronco—*Dobie*> *Proclivity* often implies a tendency toward evil; when it is used without this implication, it still implies a stronger and less controllable urge than the other words here considered <it [the American national genius] is nourished and sustained by ancient traditions and strong racial proclivities—*Sherman*> <the American proclivity for red tape and disoriented activity—*W. A. Noyes*> One has a penchant usually for something when it has an irresistible attraction for him or when he has a decided taste for it <Punjabi peasants have a penchant for a strong yellow that leans towards orange—*Rand*> <authors of medical articles exhibit on occasion an unusual penchant for extravagant terms, inelegant phrasing—*Holman*> One has a flair for something when one has such an instinct for it as leads one to it as if by the very nature of one's being <had a flair for finding bargains> <reporters with a flair for news> <that marvellous flair for detecting vital mechanism in every field—*Ellis*> Often, especially in extended use, *flair* implies acumen and an innate power of discernment that results in an ability to distinguish the genuine from the counterfeit, the valuable from the valueless, and the significant from the insignificant <a collector with a flair for the genuine antique> <as an editor he had superlative courage, and a flair for new writers—*Replier*> Sometimes, the notion of "to do" is substituted for that of "to distinguish" and *flair* becomes a close synonym of *knack, aptitude, or talent* <she hasn't a flair for writing>

Ana bias, *predilection, partiality, prepossession, prejudice: inclining or inclination, predisposition (see corresponding verbs at INCLINE): bent, turn, aptitude, faculty, *gift

Ant distaste —*Con* *antipathy, aversion: repugnance, abhorrence, repellency or repulsion (see corresponding adjectives at REPUGNANT)

Ana *rise, arise, mount, soar, ascend

Con *fall, drop, sink, slump

leap *n* jump, spring, bound, vault (see under JUMP *vb*)

learn ascertain, *discover, determine, unearth

learned, scholarly, erudite are comparable when they mean possessing or manifesting unusually wide and deep knowledge. *Learned* implies the possession of knowledge gained by study and research; it usually implies wider and deeper knowledge than do such words as *educated, cultivated, and cultured*, and is usually applied to those who are conspicuous in their class or profession for learning, to associations composed of such persons, to books or articles written by them, and to periodicals edited by them or publishing articles by them <the learned professions> <learned journals> <colloquialisms which I should not indulge in, were I reading a formal paper before a learned society—*Lowe*> <he is, in the true sense of the term,

learned. He reads Greek and Latin easily. He can recite poetry in seven languages—*Book-of-the-Month Club News*) **Scholarly** also implies learning, but it is applied particularly to persons or to the utterances, ideas, and writings of persons who have attained mastery in a field of study or investigation, who have to a greater or lesser extent advanced knowledge in that field, and who have exhibited consistently high standards in the appraisal of their own and others' discoveries (never academic—still less pedantic—but always *scholarly*; with the effect of profound learning ever so lightly worn—*Storrs*) Often, more narrowly, the term implies great care for accuracy or exactness (a *scholarly* study of the causes of the war) (scholarly pursuits) (this biography . . . is *scholarly* to the point of being unreadable, with footnotes covering half the space—*New Yorker*) **Erudite**, though often employed as an equivalent of *learned* or *scholarly*, usually implies a love of learning for its own sake, a taste for what is out-of-the-way or remote from the interests of the average well-read man, and often an inordinately wide range of knowledge (the point of view of a profound and *erudite* student, with a deep belief in the efficacy of useless knowledge—*Benson*) (that excellent critic, the late Mr. Walkley, was often spoken of as *erudite*, because his charming quotations gave so many readers a feeling of having to do with a man who had all literature at his command—*Montague*)

Ant stern: exacting —**Con** *rigid, rigorous, stringent: *severe, austere

leniently forbearingly, tolerantly, clemently, mercifully, indulgently (see under FORBEARING)

lenity clemency, *mercy, charity, grace

Ana leniency, indulgence, clemency, mercifulness, forbearance, tolerance (see under FORBEARING): benignity,

benignancy, kindness, kindness (see corresponding adjectives at KIND): compassionateness or compassion, tenderness (see corresponding adjectives at TENDER): benevolence, humaneness, charitableness (see corresponding adjectives at CHARITABLE): laxity (see corresponding adjective at NEGLIGENT)

Ant severity —*Con* strictness, rigorousness, rigidity, stringency (see corresponding adjectives at RIGID): sternness, austerity (see corresponding adjectives at SEVERE)

lesion *wound, trauma, traumatism, bruise, contusion

Ana *injury, hurt, damage

less *adj* Less, lesser, smaller, fewer are comparable terms that approach each other in meaning but are not synonyms and are rarely interchangeable. Less means not as much, especially in degree, value, or amount, and its opposite is usually *more*. It applies chiefly to collective nouns or nouns denoting a mass or abstract whole (the moon yields *less* light than the sun) (John has *less* money than James) (please make *less* noise) (humility has *less* appeal to men of today than other virtues) Lesser means not as great, as important, or as significant as that with which the thing so qualified is compared and implies opposition to *greater* or *major* (God made . . . the *lesser* light to rule the night—*Gen* 1:16) (humility is not, in Christian ethics, regarded as a *lesser* virtue) (<*lesser* breaches of the law—*Locke*) In vernacular names *lesser* implies that the kind of plant or animal so designated is distinguished from a very similar one carrying the same name chiefly by its comparative smallness of size (the *lesser* celandine) (the *lesser* snipe) **Smaller** means not as large as that with which the thing so qualified is compared (as in size, dimensions, or quantity) (the *smaller* of two rooms) (give her the *smaller* table for it will take up less room) **Fewer** means not as many and implies a difference in number of individuals or units; the term therefore modifies a plural noun (he has *fewer* pupils than he had last year) (give her *fewer* lumps of sugar) (no *fewer* than fifty were present)

Ant more

lessen *decrease, diminish, reduce, abate, dwindle

Ana *shorten, curtail, retrench, abridge, abbreviate: shrink, *contract: lighten, mitigate, alleviate (see RELIEVE): *thin, dilute, attenuate

lesser smaller, *less, fewer

Ant major

let 1 lease, rent, *hire, charter

2 **Let, allow, permit, suffer, leave** denote to refrain from preventing, or to fail to prevent, or to indicate an intention not to prevent. *Let, allow, and permit*, though frequently used with little distinction of meaning, are capable of discrimination. **Let** is the most informal (her mother wouldn't *let* her go) (she didn't go because her mother wouldn't *let* her) Sometimes *let* implies failure to prevent through awkwardness, inadvertence, negligence, or inaction (the third baseman *let* the ball get through him) (this dismal sketch of the future of countries that *let* themselves become dependent on the labor of other countries—*Shaw*) (he is usually very particular not to *let* his beasts stray—*F. D. Smith & Barbara Wilcox*) and sometimes it implies failure to prevent through lack of power or inclination (he'll have to be a good deal tougher than his dad, who *lets* himself be pushed around—*Mead*) *Allow* and *permit* imply power or authority to prohibit or prevent. But *allow* may imply little more than acquiescence or lack of prohibition, whereas *permit* implies express signification of willingness (the freedom of conscience *allowed* dissenters, the tolerance extended to all creeds—*Billington*) (a business or profession which *allows* you to get away when you want to—*Joseph*) (I blush for the weakness that *allows* me to cherish such a passion—*Gilbert*) (he *permitted*

none but Quaker preachers to smoke or drink in his home—*Starr*) (we do not give gifts, throw parties or pay bonuses at Christmas time. We do *permit* our employes to gather in the lobby and sing carols on Christmas Eve—*Wall Street Jour.*) **Suffer** (somewhat bookish in this sense) is often a mere synonym for *allow* in the narrowest implication of that word (suffer little children to come unto me—*Lk* 18:16) (suffer me to take your hand. Death comes in a day or two—*Millay*) but it may imply indifference or reluctance (the eagle *suffers* little birds to sing—*Shak.*) (she *suffered* herself to be led to the tiny enclosure where . . . other generations had been buried—*S. E. White*) (perhaps the whole business . . . of the death penalty will seem . . . an anachronism too discordant to be *suffered*, mocking with grim reproach—*Cardozo*) **Leave** (see also GO 1) as used with the implication of letting, allowing, or permitting is not clearly distinct from the use discriminated at *relinquish*, but it tends to stress strongly the implication of noninterference; often it also suggests the departure of the person who might interfere (leave the choice of games to be settled by the guests) (the defendant's attorney *left* him free to tell his story as he wished) (we must *leave* the children to settle their affairs for themselves—*Rose Macaulay*)

Ana sanction, endorse, *approve, accredit, certify: *authorize, license, commission

Con *forbid, prohibit, interdict, enjoin, ban, inhibit: *hinder, impede, obstruct, block, bar: thwart, *frustrate, foil, circumvent

lethal *deadly, fatal, mortal

Ana destroying or destructive (see corresponding verb at DESTROY): killing, slaying (see KILL): *pernicious, baneful, noxious: *poisonous, virulent, venomous, toxic

Con salutary, wholesome, hygienic, *healthful: renewing, restoring or restorative (see corresponding verbs at RENEW)

lethargic, sluggish, torpid, comatose are comparable when they mean being by constitution or condition physically and often mentally inert or inactive. **Lethargic** usually implies either a constitutional or a temporary or pathological state of sleepiness or drowsiness that makes for slowness in reactions, responses, or movements, or for temperamental apathy (bullfrogs, in a recent shipment, were quite *lethargic* . . . and reacted only when they were strongly stimulated—*Giese*) (gone is the *lethargic* atmosphere of an apathetic people, hopeless and helpless to direct their own destinies—*Atlantic*) (not all the industry of a Hercules will suffice to awaken the *lethargic* brain—*Mencken*) (but it was no *lethargic* calm; my brain was more active than ever—*Hudson*) **Sluggish** applies not only to persons but to whatever by its nature moves, acts, or functions; the term implies conditions which create stagnation, inertia, indolence, or inability to proceed at a normal or usual pace (sluggish attention) (a *sluggish* pond) (a *sluggish* circulation) (a *sluggish* market for securities) (I want no *sluggish* languor, no bovine complacency. A phenobarbital philosophy does not appeal to me—*Warren Weaver*) (England has become unenterprising and *sluggish* because England has been so prosperous and comfortable—*H. G. Wells*) **Torpid** suggests the loss of power of feeling and of exertion; basically it implies the numb or benumbed state of a hibernating animal, but in its more common extended sense it implies a lack of the energy, vigor, and responsiveness that one associates with healthy, vital, active beings (memory was not so utterly *torpid* in Silas that it could not be awakened by these words—*George Eliot*) (still Richard was *torpid*; could not think or move—*Woolf*) (Oxford was *torpid* also, droning along in its eighteenth-century grooves—

Brooks > **Comatose** basically implies a being in the state of profound insensibility called coma that results from a disease (as diabetes or uremia) which spreads poisons through the system or from severe injury <the almost *comatose* condition which had first supervened never developed into a fatal diabetic coma—*Ellis*> In extended use *comatose* implies the stultification of extreme lethargy <tales . . . guaranteed to shake the most *comatose* of readers out of the deepest lethargy—*adv.*>

Ana inert, idle, *inactive, supine, passive: phlegmatic, stolid, *impassive, apathetic: *languid, languorous, lackadaisical, listless: *slow, dilatory, laggard

Ant energetic, vigorous —**Con** alert, quick-witted, *intelligent: *quick, ready, prompt, apt: responsive (see **TENDER**): *spirited, gingery, peppery

lethargy, languor, lassitude, stupor, torpor, torpidity are comparable when meaning physical and mental inertness. **Lethargy** implies a state marked by an aversion to activity which may be constitutional but is typically induced by disease, extreme fatigue or exhaustion, overeating or overdrinking, or constant frustration and which exhibits itself in drowsiness or apathy <what means this heaviness that hangs upon me? This *lethargy* that creeps through all my senses? Nature, oppressed and harassed out with care, sinks down to rest—*Addison*> <the state of apathy and *lethargy* into which they had been thrust by their stunning defeat—*Political Science Quarterly*> **Languor** (compare **LANGUID**) has nearly lost its basic application to a condition of weakness, faintness, or delicacy of constitution induced by illness and serving as a bar to exertion or effort <I nearly sank to the ground through *languor* and extreme weakness—*M. W. Shelley*> and has come to imply an inertia such as results from soft living, from an enervating climate, or from amorous emotion <intervals of repose, which though agreeable for a moment, yet if prolonged beget a *languor* and lethargy that destroy all enjoyment—*Hume*> <she is characterized essentially by *languor*. Her most familiar posture is on a bed or divan—*Fowlie*> <instead of the *languor* of the tropics, they seem to have acquired . . . a good deal of our energy and enthusiasm—*Eleanor Roosevelt*> **Lassitude** implies such a listless seedy mental or physical condition as may result from strain, overwork, poor health, or intense worry; it usually connotes an inertia of mind or body which one has not the strength to fight <the results of overstrained energies are feebleness and *lassitude*—*Borrow*> <she sat for twenty minutes or more ere she could summon resolution to go down to the door, her courage being lowered to zero by her physical *lassitude*—*Hardy*> <an overpowering *lassitude*, an extreme desire simply to sit and dream—*Moorehead*> **Stupor** implies a state of heaviness when the mind is deadened (as by extreme drowsiness, intoxication, narcotic poisoning, or the coma of illness); the term may imply any state from a dreamy trance-like condition to almost complete unconsciousness <there is . . . something almost narcotic in such medieval poetry; one is lulled into a pleasing *stupor*—*Lowes*> <was in a *stupor* of mental weariness—*Anderson*> <had collapsed for the moment in a *stupor* of pain—*Steen*> **Torpor** and **torpidity** basically suggest the condition of a hibernating animal which has lost all power of exertion or of feeling <a poorwill found during the winter . . . which was in a state of profound *torpidity*—*F. C. Lincoln*> Both terms, especially when employed in reference to persons, usually imply extreme sluggishness and inertness (as in some forms of insanity); **torpidity**, however, probably more often applies to a physical condition and **torpor** to a mental state <blunt the discriminating powers of the mind, and . . . reduce it to a state of almost savage *torpor*—*Wordsworth*> <a deathlike

torpor has succeeded to her former intellectual activity—*Prescott*> <in a world of *torpidities* any rapid moving thing is hailed—*Birrell*> <the *torpidity* which the last solitary tourist, flying with the yellow leaves . . . had left them to enjoy till the returning spring—*Peacock*>

Ana sluggishness, comatoseness (see corresponding adjectives at **LETHARGIC**): indolence, slothfulness or sloth, laziness (see corresponding adjectives at **LAZY**): inertness or inertia, inactivity, idleness, passiveness, supineness (see corresponding adjectives at **INACTIVE**): apathy, phlegm, impassivity (see under **IMPASSIVE**)

Ant vigor —**Con** quickness, readiness, promptness, aptness (see corresponding adjectives at **QUICK**): alertness, quick-wittedness (see corresponding adjectives at **INTELLIGENT**)

letter, epistle, missive, note, message, dispatch, report, memorandum are comparable when they mean a communication sent or transmitted as distinct from one conveyed directly from source to recipient (as by oral utterance). **Letter** is the ordinary term for a written, typed, or printed communication sent by one person or group to another most often by mail; the term carries no implications about the nature of the communication and no hint as to whether it deals with personal or business matters or with affairs of public concern <she received a *letter* from her husband yesterday> <all *letters* sent out from the belligerent countries are censored> <he addressed an open *letter* (i.e., one given out for publication) to his constituents> **Epistle** applies especially to a letter intended to be made public (as one of the scriptural letters of advice and counsel attributed to the Apostles) <the First *Epistle* to Timothy> <the Second *Epistle* to the Corinthians> or to a composition in prose or poetry taking the form of an open letter <Pope's "*Epistle* to Dr. Arbuthnot"> As applied to a private letter, *epistle* is an overformal word typically used with some degree of humorous or ironic implication <forced to defend his praise of James Jones's *Eternity* against a barrage of indignant *epistles*—*Geismar*> <the amiable *epistle* of a son-in-law anxious to be a little more than correct—*Bennett*> **Missive**, too, is a somewhat formal term and as applied to a personal letter may be somewhat ironic or whimsical in implication <many of their *missives* were illiterate, and the more violent of them were unsigned—*Merriman*> **Note** in general use applies to a letter that is brief and pointed, whether it is formal or informal <send a *note* of condolence> <write a *note* of acceptance> In diplomatic usage *note* is applied to a formal communication sent by one government to another <the Porte . . . acknowledged the validity of the Latin claims in a formal *note*—*Kinglake*> **Message** differs from the preceding terms in being applicable not only to a written, typed, or printed communication but to one that is orally transmitted (as over the telephone or by a messenger or servant) or is telegraphed, cabled, or radioed <sent a *message* to his mother that he had been called out of town> <but his citizens hated him, and sent a *message* after him, saying, We will not have this man to reign over us—*Lk* 19:14> In official and especially governmental use *message* applies to a formal communication from the head of a state (as one sent by the president of the United States to Congress or by a governor to the law-making body of his state) <President Wilson broke tradition by delivering his *messages* to Congress personally> **Dispatch** applies to a usually brief message that is sent post-haste (as by telegraph, cable, or radiotelegraph). In more technical use *dispatch* applies to such messages sent by an authorized correspondent to a newspaper or news association; it also specifically applies to an official message, often one in cipher, sent by or to a government to

or by a diplomatic, military, or naval officer in its service. **Report** (see also ACCOUNT 2) applies particularly to a communication sent by an official (as a diplomat) to his own government. The term is also applicable to an official communication giving a detailed statement of facts, proceedings, or recommendations (the committee on foreign affairs is ready to make a *report* to Congress) (the school sends a monthly *report* of each student's work to his parents) **Memorandum** is used chiefly in business for an informal communication sent to an executive or employee, conveying instructions or directions.

levee *wharf, dock, pier, quay, slip, berth, jetty

level *vb* point, train, *direct, aim, lay

level *adj* **Level, flat, plane, plain, even, smooth, flush** are comparable chiefly as applied to surfaces and as meaning having a surface comparable to that of a perfectly calm body of water with no part higher than another. Something is **level** whose surface, from every point of view, lies on a line corresponding to or parallel with that of the horizon (the top of the table is not perfectly *level*) (the prairies are vast stretches of nearly *level* land) (a plot of ground made *level* by grading) But *level* is also applicable to an adjacent surface lying in exactly the same plane (in the spring, the river's surface is often *level* with its banks) (buildings whose roofs are *level* with one another) In extended use *level* implies an equality of parts, or of one thing with another, so that there are no manifest fluctuations or irregularities; thus, to speak in a *level* voice is to speak without the variations in pitch or voice volume that indicate imperfect self-control; to keep a *level* head is to keep free from distracting excitement. Something is **flat** (see also INSIPID) which is marked by absence of noticeable curvatures, prominences, or depressions, whether it lies in a horizontal plane or not (there is no *flat* ground hereabouts) (the *flat* face of a cliff) (the sides of a pyramid are all *flat*) But *flat* may apply to something that lies directly upon or against a flat surface (flat feet) (lay the map *flat* on the table) (the chairs have their backs *flat* against the wall) (lie *flat* on the ground) In extended use *flat* applies sometimes to what is so lacking in variation or variety as to be monotonous (a *flat* speech delivered by the new president) (a *flat* entertainment) or to what gives no ground for doubt or for difference in description because direct, pure, complete, or unqualified (a *flat* question) (a belief that is *flat* heresy) (a *flat* failure) or to what is fixed or absolutely exact (ask a *flat* price) (he ran the race in a *flat* ten seconds) Something is **plane** or **plain** which is flat and usually level. **Plane** is more usual in technical and mathematical use and more often applies to angles, curves, or figures (as triangles, rectangles, and pentagons) all points of which lie in the same real or imaginary surface so that if any two points be taken within the boundary lines of the angle, curve, or figure, the straight line joining them lies wholly within that surface; thus, **plane** geometry, which deals with **plane** angles, curves, and figures, is distinguished from **solid** geometry (the **plane** sides of a crystal) **Plain** is much less frequent in adjectival use and applies chiefly to the ground (I recovered some strength, so as to be able to walk a little on *plain* ground—*John Wesley*) Something is **even** (see also STEADY) which exhibits a uniformity of all the points either of a plane surface or of a line so that the surface's flatness or levelness or the line's straightness is observable (he trimmed the top of the hedge to make it *even*) (the hem of your skirt is not *even*) (the frigate was on an *even* keel—*Marryat*) Something is **smooth** that exhibits perfect evenness of surface, as though polished, rolled, or planed free from the slightest traces of roughness or unevenness (the *smooth* surface of a

rubbed and polished table) (a *smooth* lawn) (the tall bamboo and the long moss threw farther shadows . . . over the *smooth* bayou—*Stark Young*) A surface or a line is **flush** that is in the same horizontal or vertical plane or forms a continuous surface or line with another surface or line (the front of the house is *flush* with the front boundary line) (the river's surface is now *flush* with that of its banks) (a *flush* panel) (in the ordinary printed page, all lines are *flush* except those in titles or headings or those that are indented for paragraphing)

Ana parallel, uniform, *like, alike, akin, identical, similar: *same, equivalent, equal

Con undulating, fluctuating, swaying (see SWING *vb*): varying, changing (see CHANGE *vb*)

levitate *rise, arise, ascend, mount, soar, tower, rocket, surge

Ant gravitate, sink

levity *lightness, light-mindedness, frivolity, flippancy, volatality, flightiness

Ana foolishness or folly, silliness, absurdity (see corresponding adjectives at FOOLISH); gaiety, liveliness, sprightliness, vivaciousness or vivacity (see corresponding adjectives at LIVELY)

Ant gravity —**Con** seriousness, soberness or sobriety, earnestness, solemnity, somberness (see corresponding adjectives at SERIOUS); severity, sternness, austerity, asceticism (see corresponding adjectives at SEVERE)

lewd lustful, lascivious, libidinous, lecherous, wanton, *licentious, libertine

Ana *immoral, unnormal, amoral: gross, *coarse, obscene: indecent, indelicate (see INDECOROUS)

Ant chaste —**Con** decent, pure, modest (see CHASTE): *moral, virtuous: continent, temperate (see SOBER)

liability *debt, indebtedness, obligation, debit, arrear

Ant asset (or plural assets)

liable 1 amenable, answerable, *responsible, accountable **Ana** obliged, constrained, compelled (see FORCE *vb*): bound, tied (see TIE *vb*)

Con exempt, immune (see corresponding nouns at EXEMPTION): *free, independent

2 **Liable, open, exposed, subject, prone, susceptible, sensitive** are used with reference to persons or things and mean being by nature or situation in a position where something stated or implied may happen. **Liable** (see also APT 2; RESPONSIBLE) is used particularly when the thing one incurs or may incur is the result of his obligation to authority, of his state in life, or of submission to forces beyond his control (one of the most horrible diseases to which mankind is *liable*—*Eliot*) (literature is *liable* to obsolescence, not only because language changes and gradually becomes less intelligible, but because the ideas, the interests, the conception of life it expresses, the very form of the thought, the experiences which arouse emotion, all become obsolete—*Aldington*) (liable to be burned at the stake for . . . heresy—*Replier*) **Open** suggests lack of barriers or ease of access (standing thus alone . . . open to all the criticism which descends on the lone operator—*Catton*) (another modern tendency in education . . . somewhat more open to question—I mean the tendency to make education useful rather than ornamental—*Russell*) **Exposed** presupposes the same conditions as *open*, but it is more restricted in application because it implies a position or state of peril or a lack of protection or of resistance (infant mortality is high because the piglets are *exposed* to diseases the sow carries—*Farmer's Weekly*) (Germans never tire of explaining that their *exposed* position in Central Europe has forced them to follow a policy of expansion—*Bullock*) **Subject** and **prone** (see also PRONE 2) both suggest greater likelihood

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

of incurring or suffering than *liable* and even less resistance than *exposed*; they may both connote the position of being under the sway or control of a superior power, but otherwise they differ in implications. **Subject** implies openness to something which must be suffered, borne, or undergone for a reason (as a state in life or a social, economic, or political status or a quality of temperament or nature) (the French people would have stood permanently weak, open to invasion and *subject* to continual interference—*Belloc*) (both were *subject* to constant criticism from men and bodies of men whose minds were as acute and whose learning was as great as their own—*Henry Adams*) (Paul was rather a delicate boy, *subject* to bronchitis—*D. H. Lawrence*) (the cycles to which all civilizations are *subject*—*Ellis*) (the constitution was strictly an unwritten one, and was avowedly *subject* to revision in the light of new developments—*Buchan*) **Prone**, on the other hand, usually implies that the person, or less often the thing, concerned is more or less governed by a propensity or predisposition to something which makes him or it almost certain to incur or to do that thing when conditions are favorable (you may well warn me against such an evil. Human nature is so *prone* to fall into it!—*Austen*) (I think that girls are less *prone* than boys to punish oddity by serious physical cruelty—*Russell*) (in those industries that are most *prone* to periods of depression and unemployment—*Hobson*) (our painters are *prone* to acquiesce in the colors of nature as they find them, rather than to use colors expressive of the mood evoked in themselves—*Binyon*) **Susceptible** carries a stronger implication than the preceding terms, with the exception of *prone*, of something in the person's or thing's nature, character, constitution, or temperament that makes him or it unresistant or liable to a thing and especially to a deleterious thing or a thing that exerts a deleterious influence (wheat tends to be very *susceptible* to smut—*Furnas*) (a mind enormously more *susceptible* to tragic impressions than your own—*Montague*) (a natural-born actor, who was, in childhood, *susceptible* not only to somnambulism but to mesmeric control—*Brooks*) When used attributively the word often implies a readiness to fall in love (a very *susceptible* young man) Sometimes, however, *susceptible* stresses openness by reason of one's nature, character, or constitution, rather than liability, and when followed by *of* is equivalent to *admitting* or *allowing* (a theory *susceptible* of proof) (today's pedagogical theory asserts that memory cannot be cultivated: it is inborn, full-grown at the start, and not *susceptible* of increase—*Grandgent*) **Sensitive** differs from *susceptible* chiefly in implying a physical or emotional condition that predisposes one to certain impressions or certain reactions (she was too *sensitive* to abuse and calumny—*Macaulay*) (she discovered that with the clarification of her complexion and the birth of pink cheeks her skin had grown more *sensitive* to the sun's rays—*Hardy*) (she was extremely *sensitive* to neglect, to disagreeable impressions, to want of intelligence in her surroundings—*Henry Adams*) (the eye is much more *sensitive* to light than the hand or the balance to weight—*Darrow*)

Ant exempt, immune

3 likely, *apt

liaison intrigue, *amour, affair

libel *n* **Libel, skit, squib, lampoon, pasquinade** mean a public and often satirical presentation of faults or weaknesses, especially those of an individual. **Libel** (compare *libel* *vb* under **MALIGN**) is the legal term for statement or representation (as a cartoon) published or circulated without just cause or excuse, which tends to expose a

person to public contempt, hatred, or ridicule (cheap senseless *libels* were scattered about the city—*Clarendon*) **Skit** applies to an amusing satire typically in the form of a dramatic sketch or story that may be more humorous or ironical than satirical and is usually of no very great weight or seriousness; the term seldom connotes malice, bitterness, or abusiveness, but it often suggests the infliction of a sting (he did not deserve your *skit* about his "Finsbury Circus gentility"—*FitzGerald*) (the first of the one-act plays was a *skit* more or less obviously dealing with the prime minister's attempt to forestall war) **Squib** applies to a short and clever often malicious piece of satirical writing that makes its point with a sharp thrust and evokes laughter or amusement (no one was more faithful to his early friends . . . particularly if they could write a *squib*—*Disraeli*) **Lampoon** suggests more virulence and abusiveness and a coarser humor than *skit* or *squib* (a lust to misapply, make satire a *lampoon*, and fiction, lie—*Pope*) (on his master at Twyford he had already exercised his poetry in a *lampoon*—*Johnson*) **Pasquinade** is preferred to *lampoon* when such circumstances as anonymity, public posting, political character, or extreme scurrility are implied (the white walls of the barracks were covered with . . . *pasquinades* leveled at Cortez—*Prescott*)

Ana scurrility, invective, vituperation, *abuse: burlesque, travesty (see **CARICATURE** *n*)

libel *vb* defame, slander, *malign, traduce, asperse, vilify, calumniate

Ana revile, vituperate (see **SCOLD**): *decry, disparage, derogate, detract: caricature, travesty, burlesque (see under **CARICATURE** *n*)

liberal *adj* 1 **Liberal, generous, bountiful, bounteous, openhanded, munificent, handsome** are applied to a person or to his deeds or utterances and mean showing or revealing a spirit of giving freely and without stint. **Liberal** suggests openhandedness or lack of closeness or meanness in the giver and largeness in the thing that is given (make a *liberal* provision for a son at college) (a *liberal* offer for a house) (liberal in praise) (about three thousand New Hampshire men were engaged in privateering . . . receiving *liberal* rewards for the risks they took—*Amer. Guide Series: N. H.*) (opium smokers included the upper crust of the underworld, as well as a *liberal* representation from the socialite class—*Maurer & Vogel*) **Generous** usually emphasizes some positive quality of heart and mind (as warmhearted readiness to give, forgetfulness of self, or magnanimity) that prompts the giver or the gift more than the size or importance of the gift (made a *generous* provision for his servants in his will) (rejected a friend's *generous* offer of assistance) (she was *generous* beyond the dreary bounds of common sense—*Osbert Sitwell*) (boys "not manly enough nor brave enough" to do a *generous* action where there was a chance that it could get them into trouble?—*Brooks*) **Bountiful** suggests lavish or unremitting generosity in providing or giving (he is a worthy gentleman . . . as *bountiful* as mines of India—*Shak.*) (even the *bountiful* Queen of Berengaria had overlooked him when she distributed honors—*Glasgow*) **Bounteous** carries much the same suggestions as *bountiful* but is less often applied to a person (the *bounteous* yields of [crops] . . . for which the state is noted—*Amer. Guide Series: Ariz.*) (caused them to . . . be very *bounteous* in their avowals of interest—*Hawthorne*) **Openhanded** emphasizes generosity in giving and may further suggest freedom from all taint of self-interest and sometimes of forethought in the giving (compare *close-fisted* at **STINGY**) (he was free and *openhanded* and gruded her nothing—*McCrone*) (a curious mixture of

openhanded generosity and miserly penny-pinching—*Newsweek*) **Munificent** stresses splendid or princely liberality (a *munificent* endowment) (Caesar had been most *munificent* to his soldiers. He had doubled their ordinary pay. He had shared the spoils of his conquests with them—*Froude*) **Handsome** (for application to a person see BEAUTIFUL) is often a close synonym of *liberal* and may carry a suggestion of astonishing largeness when applied to a gift, an offer, or a salary (in the case of the king and other public dignitaries we have arranged that they shall have *handsome* incomes—*Shaw*) (assuredly the archbishop . . . leaves something *handsome* for the servants—*Borrow*) or it may be a close synonym of *generous* especially when applied to an act or deed that evokes admiration for its unexpected magnanimity or graciousness (I should like you to think of our house as your home, Tony." . . . This was *handsome*, if it was meant, and there seemed no reason why it shouldn't be—*Archibald Marshall*)

Ana lavish, prodigal, *profuse, exuberant: benevolent, philanthropic, eleemosynary, *charitable

Ant close (sense 5) —**Con** *stingy, niggardly, close-fisted, tight, tightfisted, penurious, miserly, parsimonious: *meager, scanty

2 Liberal, progressive, advanced, radical are comparable when used of a person or thing (as an idea, a writing, or an organization) to denote being freed from or opposed to what is orthodox, established, or conservative. **Liberal** implies emancipation from what binds the mind or will and connotes either indifference to tradition, convention, dogmas, or laws or the rejection of one or more of these. It therefore may suggest tolerance and broad-mindedness on the one hand, or unorthodoxy, laxness, or even lawlessness, on the other (a *liberal* Christian) (a *liberal* Republican) (some people who themselves hold *liberal* views are willing that their children shall first acquire conventional morals—*Russell*) **Progressive** is commonly a relative term, because it usually implies a comparison with what is reactionary or backward and a willingness to forsake old and seek out fresh methods and beliefs in the search for betterment (one *progressive* publisher is now experimenting with plastic bindings—*Third Degree*) (progressive economic and social legislation designed to benefit the masses—*A. C. Gordon*) (mentally so *progressive* that they were agitating for schools and the vote—*Heiser*) The term seldom suggests the espousal of extreme policies (a *progressive* businessman) (progressive ideas in education) **Advanced** is usually applied to men or to ideas and discoveries that are, or are believed to be, ahead of their time. It can favorably suggest liberalism or progressiveness and distinctively connote mental daring or it can unfavorably suggest an extreme of foolhardiness and experimental impracticality (the economic interests of the *advanced* and backward peoples—*Hobson*) (an interdependent and technologically highly *advanced* world—*Wirth*) (endeavoring . . . with the aid of the most *advanced* scientific discoveries, not only to injure but also to destroy fellow beings—*Gilroy*) **Radical** often is employed in place of *advanced*, but discriminatively it may imply a willingness to root up and destroy the institutions which conserve or propagate the ideas or policies condemned; it is often therefore virtually interchangeable with *revolutionary* (radical ideas let loose by the American Revolution, the French Revolution, the revolutionary movements of 1848, have slowly but profoundly affected men's desires and their demands upon governments—*Frankfurter*) All of these words are capable of being used disparagingly especially as applied to politically active individuals or their works, often with

little thought of their meaning content in more general applications.

Ana tolerant, *forbearing, indulgent, lenient

Ant authoritarian —**Con** strict, stringent, *rigid, rigorous: dogmatic, doctrinaire, *dictatorial, oracular

liberate release, *free, emancipate, manumit, deliver, discharge, enfranchise

Con *imprison, incarcerate, immure, intern: confine, circumscribe, restrict, *limit: *tie, bind: ensnare, snare, entrap, trap (see CATCH)

libertine *licentious, lewd, wanton, lustful, lascivious, libidinous, lecherous

Ana debauched, corrupted or corrupt (see under DEBASE): *abandoned, dissolute, profligate, reprobate: *immoral, un-moral, amoral

Ant straitlaced —**Con** *moral, virtuous, ethical: continent, *sober, temperate: *chaste, decent

liberty *freedom, license

Ana independence, autonomy (see under FREE *adj*): *exemption, immunity: liberation, emancipation, enfranchisement, delivery (see corresponding verbs at FREE): scope, *range, compass, sweep

Ant restraint —**Con** constraint, compulsion, duress, coercion (see FORCE *n*): confinement, restriction, limitation, circumscription (see corresponding verbs at LIMIT)

libidinous lecherous, lustful, lascivious, lewd, wanton, libertine, *licentious

Ana sensual, animal, *carnal: *immoral: gross, obscene, *coarse: dissolute, *abandoned, profligate, reprobate

library *museum, archives, treasury, gallery

license *n* liberty, *freedom

Ana *exemption, immunity: looseness, laxity, slackness, relaxedness or relaxation (see corresponding adjectives at LOOSE): privilege, prerogative (see RIGHT)

Ant decorum —**Con** *obligation, duty: decency, propriety (see DECORUM): restraint, constraint, compulsion (see FORCE): continence, *temperance, sobriety

license *vb* *authorize, commission, accredit

Ana permit, *let, allow, suffer: *approve, endorse, sanction, certify: empower, *enable

Ant ban —**Con** interdict, inhibit, enjoin, prohibit, *forbid: *restrain, curb, check

licentious, libertine, lewd, wanton, lustful, lascivious, libidinous, lecherous all suggest unchaste habits, especially in being given to or indicative of immorality in sex relations. **Licentious** basically implies disregard of the restraints imposed by law or custom for the enforcement of chastity; the term stresses looseness of life and of habits rather than the imperiousness of one's desires (licentious living) (licentious morals) (the precept that enjoins him abstinence forbids him none but the *licentious* joy, whose fruit, though fair, tempts only to destroy—*Cooper*) (an irreligious and *licentious* age had abetted depravity—*Glasgow*) **Libertine** suggests a more open and a more habitual disregard of moral laws, especially those pertaining to the sex relations of men and women (the frank *libertine* wit of their old stage—*Gibbon*) (he castigated the *libertine* lives of many of his generation) (by merely living together a couple is practicing *libertine* love—and the mere repetition doesn't, in some mysterious way, make it legal—*Stone*) **Lewd** often carries strong connotations of grossness, vileness, and vulgarity which color its other implications of sensuality, dissoluteness, and unconcern for chastity. As a result it is applied less often than the preceding terms to persons, or to the manners, thoughts, and acts of persons, who retain in their im-

morality evidence of breeding, refinement, or gentility <seen in the company of *lewd* women> <*lewd* songs> <*lewd* actions in public> <where dowdy women whispered *lewd* invitations from behind wooden shutters—*Baum*> <the whiskey had filled his body with a rosy sense of complete well-being, and vague *lewd* sensual images stroked his mind—*Mailer*> **Wanton** (see also SUPEREROGATORY) implies moral irresponsibility or a disposition or way of life marked by indifference to moral restraints; it often suggests freedom from restraint comparable to that of animals, thereby connoting lightness, incapacity for faithfulness or seriousness, or a generally unmoral attitude <*wanton* little creatures without character or depth of feeling—*Nordhoff & Hall*> <all this was done with a gay, and, as I said, a *wanton* disregard of the ill effects—*Sir Winston Churchill*> <so *wanton*, light and false, my love, are you, I am most faithless when I most am true—*Millay*> **Lustful** implies the influence or the frequent incitement of desires, especially of strong and often unlawful sexual desires <she took the greatest care of his health and comfort, and was faithful to him, not being naturally *lustful* except of power—*Graves*> **Lascivious**, like *lewd*, definitely suggests sensuality, but it carries a clearer implication of an inclination to lustfulness or of a capacity for inciting lust <*lascivious* desires> <*lascivious* thoughts> <*lascivious* glances> <*lascivious* dress> <tales that . . . are Rabelaisian in their coarseness and not . . . *lascivious*—*Sellery*> <I have seen a nanny goat repel a *lascivious* and impatient old billy goat who was making advances—*Putnam*> **Libidinous** and **lecherous** are the strongest of all these terms in their implications of deeply ingrained lustfulness and of debauchery. **Libidinous** distinctively suggests a complete surrender to one's sexual desires <a *lewd* youth . . . advances by degrees into a *libidinous* old man—*Addison*> <the Gauls indulged in *libidinous* orgies, in which sodomy played a part—*Putnam*> **Lecherous** clearly implies habitual indulgence of one's lust, the term often being used when any of the others would seem too weak to express one's contempt <remorseless, treacherous, *lecherous*, kindless villain!—*Shak.*> <boasted of his pornographic publications and his pornographic "library" and his own *lecherous* fornications—*Shirer*>

Ana profligate, reprobate, dissolute, *abandoned; debauched, depraved, corrupted or corrupt (see under DEBASE); lax, *loose, relaxed; *immoral, unmoral, amoral
Ant continent —**Con** *chaste, decent, pure; *moral, virtuous; strict, *rigid; austere, ascetic, *severe

licit *lawful, legitimate, legal

Ana permitted, allowed (see LET); sanctioned, approved (see APPROVE); authorized, licensed (see AUTHORIZE); regulated (see ADJUST)

Ant illicit —**Con** forbidden, prohibited, interdicted, inhibited, banned (see FORBID)

lick *vb* beat, defeat, *conquer, vanquish, subdue, subjugate, reduce, overcome, surmount, overthrow, rout

lickspittle *parasite, sycophant, toady, bootlicker, hanger-on, leech, sponge, sponger, favorite

lie *vb* **Lie, prevaricate, equivocate, palter, fib** mean to tell an untruth directly or indirectly. **Lie** is the straightforward word, flatly imputing dishonesty to the speaker <he *lies*, and he knows he *lies*—*Johnson*> <the article . . . has deliberately *lied* and distorted facts—*Nation's Business*> **Prevaricate** is often used in place of *lie* as a more formal or less offensive term; distinctively, it can imply evasion of the truth (as by quibbling, dodging the real point, or confusing the issue) <he could *prevaricate* no longer, and, confessing to the gambling, told her the truth—*Hardy*> <"Even if it was so, which I don't say it is!"—"Don't *prevaricate*," said Mr. Lorry—*Dickens*> **Equivocate** implies saying one

thing and meaning another; it usually suggests the use of words that carry more than one sense in the hope that the sense which gives the incorrect impression may be the one accepted by the hearer <by *equivocating*, hesitating, and giving ambiguous answers, she effected her purpose—*Martineau*> <he was wholly in sympathy with Congregationalism, and had no mind to conceal or *equivocate* concerning its democratic tendencies—*Parrington*> **Palter** implies a playing fast and loose, not only in statements but in dealings; it often specifically implies prevarication, equivocation, or the making of promises one does not intend to keep <and be these juggling fiends no more believed that *palter* with us in a double sense—*Shak.*> <Caroline, don't go back—don't *palter* with us—abide by your own words—*Edgeworth*> **Fib** (see also LIE *n*) may be used as a euphemism for *lie*, but it more often implies the telling of an untruth that is trivial either in matter or in significance <she was given to *fibbing* about her admirers> <the child *fibbs* when he thinks he can gain something by it> <he didn't like Janet. She *fibbed*, he said, and was a telltale—*Glasgow*>

Ana *deceive, delude, mislead, beguile

lie *n* **Lie, falsehood, untruth, fib, misrepresentation, story** are comparable when they mean a statement or declaration that does not conform to the truth. **Lie** is usually felt to be a term of extreme opprobrium because it implies a flat and unquestioned contradiction of the truth and deliberate intent to deceive or mislead <you told a *lie*; an odious, damned *lie*—*Shak.*> <his decent reticence is branded as hypocrisy, his circumlocutions are roundly called *lies*—*Maugham*> **Falsehood** may be both less censorious than *lie* and wider in its range of application. The term need not imply sinfulness or criminality, for it applies not only to lies <told two flat *falsehoods* about what had happened in secret session—*Davis*> but to such fictions as literary fictions, polite fictions, and legal fictions and then contrasts most directly with *fact* <a man's entire life may be a *falsehood*, while with his lips he may not once directly falsify—*F. N. Scott & J. V. Denney*> Like *lie*, the term implies known nonconformity to the truth, but unlike *lie*, it does not invariably suggest a desire to pass off as true something known to be untrue <*falsehoods* which we spurn today were the truths of long ago—*Whittier*> **Untruth** is often euphemistic for *lie* or *falsehood* and may carry similar derogatory implications <his report was riddled with inaccuracies and *untruths*> or it may be selected because of mitigating circumstances <told you *untruths* yesterday morning merely to cheer you up—*Bennett*> Sometimes, however, *untruth* may apply to an untrue statement made as a result of ignorance or a misconception of the truth <so far as he knew he had never told an *untruth*> <the traditions and the *untruths* our cultural fathers have sometimes told us—*La Barre*> **Fib** is an informal or childish term for a trivial falsehood; it is often applied to one told to save one's own or another's face <not that I couldn't tell a downright *fib* if I had to . . . but a lie is to me just as silly a performance when it is about marriage or work as about the law of gravitation—*Mary Austin*> <the trade in drama seems to be prosecuted in a world of perfunctory *fibbs* which no one believes—*Montague*> **Misrepresentation** applies to a misleading and usually an intentionally or deliberately misleading statement which gives an impression that is contrary to the truth; the term implies glossing over defects or weaknesses (as in something offered for sale) or placing the emphasis upon details that highlight a character, an occurrence, or a train of events rather than on those that in reality marked it <our guides deceived us with *misrepresentations*—*Addison*> <his duty to further the in-

terest of his client does not require him to employ any sort of trickery, chicanery, deceit, or *misrepresentation*—*Drinker*) **Story** (see also ACCOUNT 2) in the sense relevant to this discussion is an informal term used chiefly by or with reference to children in place of any of the preceding terms, especially *falsehood*, *untruth*, and *fib* (boys who tell stories are likely to be caught)

Ana prevarication, equivocation, fibbing or fib (see corresponding verbs at LIE): mendaciousness or mendacity, untruthfulness, dishonesty, deceitfulness (see corresponding adjectives at DISHONEST)

Ant truth —*Con* veracity, verity, verisimilitude (see TRUTH)

life *biography, memoir, autobiography, confessions

lifeless inanimate, *dead, defunct, deceased, departed, late **Ana** inert, *inactive, passive: *stiff, rigid, stark, wooden, inflexible; torpid (see LETHARGIC)

Ant living —*Con* alive, animate, animated, vital (see LIVING): *active, operative, dynamic, live

lift *vb* 1 **Lift**, raise, rear, elevate, hoist, heave, boost are comparable when meaning to move from a lower to a higher place or position. **Lift** often carries an implication of effort exerted to overcome the resistance of weight (lift a large stone) (lift a pail of water from the ground) (lift a child to one's shoulders) but it may be extended to whatever rises high by natural or artificial means or processes (high lifted up were many lofty towers—*Spenser*) (a high conical peak . . . lifted some four thousand feet into the sky—*Kyne*) or to something immaterial that rises or is made to rise (as in spirit, in feeling, or in aspiration) (the news lifted a weight from his mind) (he was lifted by his simple love of all creatures . . . far above right and wrong—*Webb*) **Raise** may suggest less effort than *lift*, but it carries a stronger implication of bringing something to the vertical or to a high position for which it is fitted by nature or intended function; thus, one raises a pole by setting it on end, but one lifts it by picking it up; a flag is raised to the top of its staff, but it is lifted when held high enough to be seen (those arts which were destined to raise our Gothic cathedrals—*Coulton*) In extended use *raise* may imply a lifting to a higher level (as of worth, efficiency, or accomplishment) (the most wholehearted attempt ever made to raise the individual to his highest power—*Day Lewis*) **Rear** is often used in place of *raise* (the mast we rear—*Pope*) (the maypole was reared—*Irving*) but, unlike *raise*, it can be used intransitively with the meaning to raise itself or, in the case of a horse, to raise its forelegs (the . . . storm clouds reared on high—*Millay*) (horses, rearing and prancing—*Anderson*) **Elevate** may be used in place of *lift* or *raise* in certain collocations where it does not seem unduly formal or pretentious (an eagle rising with wings elevated—*Fox-Davies*) (mobile field pieces . . . were elevated for range in even more slow and primitive ways—*Wintringham*) but, in general, the word suggests exaltation, uplifting, or enhancing (elevate a priest to a bishopric) (elevate one's standards of literary taste) (his renown soared still higher. He had elevated the white man's name in Africa again—*James Cameron*) **Hoist** implies raising something heavy aloft, often by such mechanical means as a tackle (hoist a cargo into a ship) (hoist a sail) (Mrs. Malins was helped down the front steps by her son and Mr. Browne and, after many maneuvers, hoisted into the cab—*Joyce*) (it takes five power winches to hoist this mammoth expanse of canvas—*Monsanto Mag.*) **Heave** implies a lifting upward or onward with strain or effort usually by impulsion from without (a boat heaved high by a wave) (nature's way of creating a mountain peak—first the heaving up of some blunt monstrous bulk of

rumpled rock—*Montague*) **Boost** implies lifting by or as if by means of a push or other help from below, usually without the suggestion of strain or effort found in *hoist* and *heave* (boost prices) (friendly critics boosted the sales of his books) (no matter how depressed he might be, a few cocktails always boosted his spirits) (David tenderly boosted Elimelech up the steps and through the door—*Douglas*)

light *vb* 1 **Light**, kindle, ignite, fire basically mean to set something burning or on fire. **Light** (see also ILLUMINATE), when it takes as its subject the agent or agency, usually implies such an end of the action as illumination (she lighted the lamps) or heating (he will light a fire in the fireplace) or smoking (he lit his cigar) **Kindle** often connotes difficulty or slowness in setting combustible materials (as wood, straw, or paper) afire; it is therefore the appropriate word when what is to burn requires special preparation or does not at once burst into flame (using kerosene to kindle the damp wood) (a carelessly thrown match kindled one of the worst forest fires in the state's history) (bonfires were kindled on the top of every hill) **Ignite** is not only much more common in technical than in popular use but usually shows a difference in meaning. In technical use *ignite* sometimes implies heating of a substance until it glows or becomes incandescent (when the electric current is turned on, it ignites the tungsten filaments in the bulb) but it more often implies the placing of a small flame or spark (as an electric spark) in direct or indirect contact with a flammable substance (as gasoline, fuel oil, or gunpowder) so as to produce its combustion (ignite the mixture in the cylinder of an internal-combustion engine) In more general use, *ignite* varies little from *kindle* except in being more frequently employed in reference to explosives or highly flammable substances. **Fire** suggests blazing and rapid combustion of what is set on fire; it is typically used in respect to something that lights easily and burns fiercely (a lighted match was sufficient to fire the haystack) (the turnkey fired the little pile, which blazed high and hot—*Dickens*)

All of these words have extended use. **Light** in such use is purely a figure of speech (a quick animation lit her face—*C. F. Cushman*) while **kindle** implies an exciting, arousing, or stimulating (real intellectual interest . . . can be kindled . . . by a master who really loves and believes in his subject—*Inge*) (armies cannot be raised by nations or parties unless the rage of the people is first kindled by lies and name-calling—*Kenneth Roberts*) and **ignite** implies a stirring up into activity (that genius for igniting others essential to all great teachers—*J. M. Brown*) (the idea of the rising, of Irish freedom, of freedom everywhere ignites him and begins to consume him—*S. R. L.*) **Fire** implies an inspiring with strong passion, ardent desire, or intense zeal and is usually chosen when the agent or agency enables or induces energetic activity (the nations of Europe were fired with boundless expectation—*Johnson*) (the subject . . . had fired her imagination—*Jan Struther*)

J. Goodman*) The term may further imply instability (there is a *lightness* about the feminine mind—a touch and go—*George Eliot*) or carefree heedlessness (looked at her perplexedly, wondering if it were *lightness* or dissimulation that enabled her to touch so easily on the past—*Wharton*) or indifference to the seriousness of a situation (treating with *lightness* what is matter of life and death—*Arnold*)**Light-mindedness**, even more than *lightness*, suggests a temperamental lack of seriousness or stability (women are often unjustly accused of *light-mindedness*) **Levity** usually suggests more specifically trifling or unseasonable gaiety (her *levity*, her frivolous laughter, her unwomanly jests—*J. R. Green*) (Molière and his audience were accustomed to regard conjugal infidelity with *levity* when it did not touch themselves—*Alexander*) **Frivolity** adds to *lightness* the implication of empty or idle speech or conduct; the term often carries a strong connotation of triviality or of pettiness (the extraordinary *frivolity* of much which passes for religious interest—*Inge*) (tried to suggest . . . that intellectual curiosity was not necessarily a form of sin or even *frivolity*—*Time*) but its most frequent implication is that of such indulgence in meaningless gaieties that serious employments are disregarded (people . . . whose idleness and *frivolity* and extravagance set a most corrupting moral example—*Shaw*) (every form of human *frivolity* from bingo to short bathing suits on Sunday—*Coons*)**Flippancy** applies especially to unbecoming levity or pertness in speaking of or in dealing with serious things (modest, and without anything like *flippancy*, yet without any obsequiousness—*Arthur Young*) (the *flippancy* with which my requests for information are treated—*Kipling*) **Volatility** implies such lightness or fickleness of disposition as precludes long or serious dwelling upon any one idea or plan (volatility of character evinces no capabilities for great affections—*Shelley*) (another current characteristic . . . observed is the *volatility* of the public mind at this time—*M. W. Little things filled her thoughts—*Glasgow*)**Ana** buoyancy, resiliency, elasticity, effervescence, expansiveness (see corresponding adjectives at ELASTIC): gaiety, liveliness, vivaciousness or vivacity (see corresponding adjectives at LIVELY): lightheartedness, cheerfulness (see corresponding adjectives at GLAD)**Ant** seriousness —**Con** graveness or gravity, earnestness, soberness, sedateness, staidness, somberness (see corresponding adjectives at SERIOUS)**like** *vb* Like, love, enjoy, relish, fancy, dote are comparable when meaning to be so attracted to a person or thing as to regard him or it with favor. Like (opposed to *dislike*), the most general and, especially when unqualified, the most colorless of these words, means merely to regard with favor or without the slightest aversion. Therefore, it is chiefly used in reference to persons or things that are pleasing but evoke no great warmth of feeling or urgency of desire (Summer whom I admire and dislike; and Shaw of Dunfermline whom I like but do not admire—*Laski*) (Arnold, having been poor, *liked* money and knew the value of it—*Osbert Sitwell*) (Hawthorne *liked* to sit in barrooms; Thoreau would have enjoyed doing so, and *liked* inns, and farmers, and loafers on the river—*Canby*) **Love** (opposed to *hate*) implies not only strong liking but ardent attachment and is therefore used with reference to persons or things that arouse the deeper or higher emotions; thus, one *likes* his neighbors but *loves* his family; one *likes* the open country but *loves* his native land (I *like* a church; I *like* a cowl; I *love* a prophet of the soul—*Emerson*) (this peculiar, brooding woman, who *loved* best in life the sorrow and high seriousness of things—*Balliett*) **Love** also is often used with reference to trivial objects as an informal intensive of *like* (I *love* ice cream) (old Sarah Battle . . . *loved* a good game of whist—*Lamb*) **Enjoy** implies a liking or loving that awakens deep satisfaction and keen delight which may be sensuous or intellectual or often a mingling of the two (we had written our first stories together . . . and together *enjoyed* the first sweets of success—*Rose Macaulay*) (no one but Molny and the Bishop had ever seemed to *enjoy* the beautiful site of that building,—perhaps no one ever would. But these two had spent many an hour admiring it—*Cather*) (it is this specific quality, the power of *enjoying* things without being reduced to the need of possessing them, which differentiates the aesthetic instinct from other instincts—*Ellis*) **Relish** implies a liking, or sometimes an enjoyment, that arises because the thing relished meets one's approval, satisfies one's taste, or gives one peculiar gratification (his fine taste taught him to *relish* the beauties of Virgil and Cicero—*Hallam*) (a few hundred (not more) choice-loving connoisseurs *relish* him as the most perfect opportunist in prose—*Morley*) **Fancy** (see also THINK 1) implies a liking for something that corresponds to one's imaginative conception or sometimes one's ideal of what it should be (I never yet beheld that special face which I could *fancy* more than any other—*Shak.*) (he should have yachts, horses, whatever he *fancied*—*Meredith*) or for something that appeals to one's taste or one's eye especially at the moment (while she was ill, she *fancied* only the most delicate of foods) **Dote**, with *on* or *upon*, implies an infatuation or a foolish excessive liking or fondness (you *dote* on her that cares not for your love—*Shak.*) (he *doted* on his daughter Mary; she could do no wrong—*Havighurst*) **Like** (love it may be used as an informal intensive of *like* (two peoples, both of whom love palaver and *dote* on uproar—*Monroe*) (he *dotes* on bland horrors in food—*Liebling*)**Ana** prefer, *choose, select, elect: admire, esteem, respect, regard (see under REGARD *n*): *approve, endorse:

like *adj* Like, alike, similar, analogous, comparable, akin, parallel, uniform, identical are comparable though seldom strictly synonymous terms which describe the relation between things or persons that closely resemble each other. **Like** is a general word indicating resemblance or similarity ranging from virtual identity in all characteristics to a chance resemblance in only one (the children were very like) (his finest intuitions may . . . prove convincing only to himself, or to a limited circle of like minds—*Times Lit. Sup.*) **Alike** is similar to **like** but is less likely to be used for the chance, farfetched resemblance and is generally limited to use in a predicate or postposed situation after a compounded substantive modified (their resemblance as brother and sister . . . they looked utterly alike—*Sinclair Lewis*) (they were strikingly alike in gifts and tastes—*Starr*) **Similar** often stresses the likenesses between different things, implying that differences may be overlooked or ignored for a time (Virginia creeper or the deceptively similar poison ivy—*Amer. Guide Series: Md.*) (regard the attraction which illusion has for us as similar to that which a flame at night has for a moth—*Cohen*) (this is not to say that the quarterlies are all alike. But they are as similar as the generation of young writers who contribute to them—*R. B. West*) **Analogous** calls attention to the presence of some likeness which makes it feasible or permissible to draw from it an analogy, a sustained or appropriate comparison (the two new states would have a position analogous to that of British Dominions—*Manchester Guardian*) (quite analogous to the emotionalizing of Christian art is the example afforded by the evolution of the Latin hymn—*H. O. Taylor*) **Comparable** implies a likeness on one point or a limited number of points which permits a limited or casual comparison or matching together (the Syrians . . . with Arabian coffee, served thick and strong in tiny cups, as a national drink comparable to the Englishman's tea—*Amer. Guide Series: R.I.*) The word is especially likely to be used in connection with considerations of merit, standing, rank, or power (neither in military nor industrial terms is China comparable to the other three great powers—*Dean*) **Akin**, limited to use in postpositive situations, indicates an essential likeness, often of the sort of likeness found in kinship or suggestive of common descent from an original ancestor, prototype, or ancestral stock (the Mongols of Outer Mongolia . . . are akin to those of the neighboring Buryat-Mongol A.S.S.R.—*Foreign Affairs*) (real nursery tales, akin to Brer Rabbit—*Times Lit. Sup.*) (science . . . is akin to democracy in its faith in human intelligence and cooperative effort—*Muller*) **Parallel** stresses the fact of similarities over a course of development throughout a history or account or the fact of resemblances or likenesses permitting a setting or bracketing together as though side by side (the almost parallel growth of the Twin Cities—*Amer. Guide Series: Minn.*) (parallel to the classic and academic Italian school was one with a more distinctive native feeling—*Manship*) (parallel to the powers of the king were the powers of the father in the individual household—*Linton*) **Uniform** suggests a likeness and similarity throughout and a lack of noticeable variation wherever things in question occur or operate (one of the most fundamental social interests is that law shall be uniform and impartial—*Cardozo*) (schools . . . no longer expect all children to learn to read at a uniform rate—*Education Digest*) **Identical** indicates either the fact of being the same person or thing or, in connection with things copied,

reproduced, or repeated, an exact correspondence without detectable or significant difference (George Eliot and Mary Ann Evans were identical) (the interests of workers and their employers were not altogether identical—*Cohen*) (his home life and his life as a man of letters are never identical—*Canby*)

likeness, similarity, resemblance, similitude, analogy, affinity are comparable when they denote agreement or correspondence or an instance of agreement or correspondence in details (as of appearance, structure, or qualities) brought out by a comparison of two or more things. **Likeness** commonly implies closer correspondence than **similarity**, which often applies to things which are merely somewhat alike (thou shalt not make thee any graven image, or any likeness of any thing that is in heaven above—*Deut 5:8*) (yes, I should have known you anywhere from your likeness to your father—*Archibald Marshall*) (Zaza is an old woman, while you, princess, still have youth and beauty. Nevertheless, the likeness is positively amazing—*Robert Standish*) (certain insects escape danger by their similarity to plants—*Lubbock*) (great works of art have a decided similarity to great human beings—they are both three-dimensional—*Hartford*) **Resemblance** suggests especially similarity in appearance or in superficial or external qualities (it would be as difficult to discover any resemblance between the two situations as between the appearance of the persons concerned—*Wharton*) **Similitude**, which is somewhat infrequent and bookish, is occasionally preferred to **likeness** or **similarity** when an abstract term is desired (the law which reconciles similitude and dissimilitude, the harmony of contrast—*Reed*) (all medieval variances of thought show common similitudes—*H. O. Taylor*) **Analogy** distinctively implies comparison of things which are unlike, not only specifically or generically, but often even in substance or essence, and it more often draws attention to likeness or parallelism in relations rather than in appearances or qualities. Philosophically, it suggests such assumptions as that similar causes will produce similar effects or that what is true in one order of existence must be true in another (three principal types [of ants] offering a curious analogy to . . . the hunting, pastoral, and agricultural stages in the history of human development—*Lubbock*) (such senile efforts to penetrate . . . the mystery of religion . . . have a real analogy to that final effort of the emotionally starved to grasp at love which has been called "old maid's insanity"—*Ellis*) **Affinity** adds to **resemblance** the implications of such a relationship as natural kinship, temperamental sympathy, similar experience, or historical influence, which is responsible for the likeness (in Keats, there are . . . phrases and paradoxes that have surprising affinities with Taoist thought—*Binyon*) (his face . . . had a curious affinity to the faces of old sailors or fishermen who have lived a simple, practical life in the light of an overmastering tradition—*Galsworthy*)

limit *n* **Limit, bound, confine, end, term** are comparable when they mean an actual or imaginary line beyond which a thing does not or cannot extend. **Limit** is the most inclusive of these terms because it carries no necessary implication of number, that always being suggested by the context; thus, a thing (as a man's strength, the extent of his authority, or the reach of his arm) may be said to have a *limit*, implying one only; some other thing (as a race course, a lifetime, or a period of time) may be said to have its *limits*, but since linear extent and duration are specifically implied, these limits are by implication two in number (the *limits* of a room are usually its four walls) (nightingales will not pass their *limits*; they seem to have a marked-out range as strictly defined as the lines of a geological map—*Jefferies*) Also, *limit* may be applied to a line which is fixed by nature or inner necessity, established by authority, or determined by agreement (within the *limits* of human reason) (the *limit* of the fisherman's catch is determined by the state game laws) (lives within the *limits* of his income) (determine the *limits* for the treatment of a topic) (the *limits* of Santayana as a poet . . . are the restraints of an academic habit—*Edman*) **Bound and confine**, on the other hand, are applicable to only one of the limits that comprise the real or imaginary boundaries of a thing. Both terms are used chiefly in the plural, even when the boundary line is continuous and forms a circle or only one side; the same is true of a bounding surface that forms a sphere (within the *bounds* of the earth) (thirty bonfires could be counted within the whole *bounds* of the district—*Hardy*) (the western *confines* of China) (within the *confines* of our subject) (the furthest *confines* of the family property—*Menen*) The distinctions between these two words are not always apparent; however, **bounds** usually indicates a point of view from within and suggests restriction, and **confines** indicates a point of view either from within or without and suggests enclosure (the book passes beyond the *bounds* of decency) (how they behaved in their spare time, nobody cared, and few knew . . . They had no *bounds* to respect—*Fforde*) (strain the *confines* of formal monogamous marriage—*La Barre*) **End** (see also **END 2**; INTENTION) applies usually to one of the two uttermost limits or extremes of a thing; this use is chiefly found in idiomatic phrases (travel to the *ends* of the earth) but it occurs also in reference to either extreme in an ascending or descending scale, or in a series that progresses from one extreme to its diametrical opposite (at one *end* of the social scale there is the outcast or the pariah; at the other *end*, the elite) (admired from one *end* of Europe to the other—*Andrews*) **Term** applies usually to a limit in duration (neither history nor archaeology has yet put a *term* to Roman civilization in London—*William Page*) *Ana* limitation, restriction, circumscription, confinement (see corresponding verbs at **LIMIT**): *border, margin, verge, edge, rim, brim, brink

limit *vb* **Limit, restrict, circumscribe, confine** mean to set or prescribe the bounds for a person or thing. **Limit**

usually implies the predetermination of a point (as in time, in space, in quantity, in capacity, or in production) beyond which the person or thing concerned cannot go or is not permitted to go without suffering a penalty or incurring undesirable consequences (limit the speed of automobiles to 45 miles an hour outside of towns and cities) (limit the time allowed for the erection of a building to one year from the date of the signing of the contract) (limit the acreage planted with potatoes) (limit a day's work to five hours) (the great point . . . on these sacred occasions was for each man to strictly *limit* himself to half-a-pint of liquor—*Hardy*) (the Constitution *limits* his functions in the law-making process to the recommending . . . and the vetoing of laws—*Current History*) But *limit* may also be used with reference to a bound or bounds not predetermined but inherent in a situation or in the nature or constitution of a thing (the poor soil *limited* their crops) (a lonely young girl *limited* . . . by the absence of companionship—*Handlin*) or brought about as desirable by conscious effort or by full choice (medical science knows how to *limit* these evils—*Eliot*) (*limited* his aspirations to the search for the attainable) **Restrict**, in contrast to *limit*, suggests a boundary that encircles and encloses rather than a point that ends; the term therefore often applies to something which can be thought of in the terms of the space, territory, or field that it covers. The word often also connotes a narrowing or tightening (restrict the powers of a court) (restrict the freedom of the press) (restricted his diet on orders from his physician) (the bureau was dismembered, its staff dispersed, and its appropriations for research *restricted* almost to the vanishing point—*Heiser*) (combinations have arisen which *restrict* the very freedom that Bentham sought to attain—*Justice Holmes*) **Circumscribe** differs from *restrict* in that its implication of an encircling or enclosing boundary is always clear; consequently, it is often preferred to *restrict* when the idea of being kept within too small an extent or range is to be stressed (people . . . think that the emotional range, and the realistic truth, of drama is limited and *circumscribed* by verse—*T. S. Eliot*) or when there is the intent to suggest a distinct, complete, but limited whole and its apartness from all that surrounds it (to undertake here to inquire into the degree of its necessity, would be to pass the line which *circumscribes* the judicial department—*John Marshall*) (the world to which they belonged and for which they worked was strictly *circumscribed* and complete within itself—*Binyon*) **Confine** may imply limitation, restriction, or circumscription, but it usually emphasizes the bounds which must not or cannot be passed; consequently, it often suggests severe restraint or restraints and carries connotations such as those of cramping, fettering, hampering, or bottling up that are not often present in the other words (now I am cabined, cribbed, *confined*, bound in to saucy doubts and fears—*Shak.*) (the distinction between a government with limited and unlimited powers is abolished, if those limits do not *confine* the persons on whom they are imposed—*John Marshall*) (it is not desirable to *confine* knowledge to whatever can be put into a useful shape for examinations, drawing rooms, or the still more pretentious modes of publicity—*T. S. Eliot*) (we are *confined* to our senses for perceiving the world—*Darrow*)

line *vb* *Line*, *line up*, *align*, *range*, *array* mean to arrange in a line or in lines. *Line*, or more often *line up*, implies setting in single file or in parallel rows <*line up* prisoners for identification> <*line up* troops for inspection> <four or five men were *lined up* at the bar—*Basso*> *Align* stresses the bringing of points or parts that should be in a straight line into correct adjustment or into correspondence <*align* the lenses of a telescope> <*align* the front and rear wheels of an automobile> <*align* type in printing> <the tents were *aligned* in two rows—*Mailer*> *Range* stresses orderly or correct disposition, sometimes merely in straight or parallel lines, but more often with the added implication of separation into groups or classes according to some plan or design <oaken benches *ranged* in seemly rows—*Wordsworth*> *Array* implies actual formation in order, especially battle order, and therefore suggests full equipment and readiness for action <there is a great Field-Marshal, my friend, who *arrays* our battalions; let us to Providence trust, and abide and work in our stations—*Clough*> <scarcely had time to *array* his men at the townward wall before arrows, stones, and heavy javelins . . . began to fall upon them—*A. These words also are comparable in extended use. *Line up* stresses organization for unity or singleness of effort <*line up* the opponents of a measure to achieve its defeat> <*line up* public opinion in favor of a proposal> <*lined up* on the side of those who oppose even attempting to set up peaceful coexistence with Russia is the FBI—*Newsweek*> *Align* is commonly used reflexively in this connection and implies falling into line or into a lineup <at the beginning of World War I France, England, and Belgium *aligned* themselves with Serbia> <so long as the symptoms failed to *align* themselves with any known disorder, they were supposed to be amenable to neighborly advice—*Mary Austin*> *Range* implies putting or falling precisely into a group (as a class, party, rank, or category); it may suggest alignment but more often connotes partisanship or alliance or, when used of things, susceptibility of classification <'tis better to be lowly born, and *range* with humble lovers in content—*Shak.*> <they differed violently and *ranged* themselves into distinct schools of thought—*Dinsmore*> *Array* in its extended use retains its implication of

lineal, linear share the basic meaning of or relating to a line or lines, but they are clearly distinguished in their specific senses. **Lineal** is more often applied to a direct line of succession from or to a common ancestor either physical or spiritual, and is often distinguished from *collateral*; thus, the *lineal* descendants of a man would include all his sons and daughters, all his grandsons and granddaughters, all his great-grandsons and great-granddaughters, etc. <George Washington had no *lineal* kinsmen to inherit his property, for he had no children> <these men, the *lineal* descendants of the mystics, found the source of certainty in inner experience, in feeling and instinct—*Thilly*> **Linear** tends to lay the stress on a relation to a line other than a line of succession, either in fact or in likeness; often it suggests a relation to something having or felt as having one dimension only, usually length, especially in contrast to what has two or more dimensions <*linear* measures such as the inch, foot, yard, and rod are used in measuring lengths (as of cloth, rope, poles, wire, and edges or bounds)> <from the *linear* dimensions of a room we can compute the square feet of floor to be covered> <a conductor of electricity (as a wire) which is very small or negligible in two of its dimensions, is called a *linear* conductor> <atoms which are so small that it takes one hundred millions of them lying side by side to extend one *linear* inch—*Darrow*> <the longest *linear* structural features on the earth's surface are the east-west fracture zones of the northeast Pacific Ocean—*Malahoff, Strange & Wollard*>

liquefy, melt, deliquesce, fuse, thaw are comparable when they mean to convert or to become converted to a liquid state. **Liquefy**, the general term, is applicable not only to solids but also to gases <*liquefy* oxygen and nitrogen> <*liquefy* a solid mass of ice> <*jellies liquefy* if exposed to the air in a warm room> **Melt** basically implies slow liquefaction, usually through heat; the term commonly suggests a softening, a loss of shape, and a running consistency <*butter melts* in a warm room> <*melt* wax in a candle flame> In its frequent extended use *melt* is applied to masses that are gradually dispersed or grow thinner or more tenuous and finally disappear <mountains beyond mountains *melting* away into remote sky—*Binyon*> or to persons or their emotions or reactions that grow softer, gentler, or more tender <one whose subdued eyes, albeit unused to the *melting* mood, drop tears as fast as the Arabian trees their medicinal gum—*Shak.*> <in

Romeo and Juliet the profounder dramatist shows his lovers *melting* into unconsciousness of their isolated selves—*T. S. Eliot*> <I cannot look up to your face. You *melt* my strength—*Lowell*> or to tones, colors, and sounds that have a liquid quality and merge imperceptibly with others <snow-light cadences *melting* to silence—*Keats*> <substance and shadow *melted* into each other and into the vastness of space—*Glasgow*> **Deliquesce** implies a disappearing by or as if by melting away and applies especially to gradual liquefying through exposure to the air and the absorption of moisture from it <hygroscopic salts that *deliquesce* in moist air> or to plant structures (as mushrooms) that liquefy in their decay <a great display of specimens [of fungi] that presently dried up or *deliquesced* and stank—*H. G. Wells*> In its extended use *deliquesce* stresses loss of coherence rather than disappearance <Flaubert's instincts were less epical than lyrical, and drama itself was *deliquescing* into indeterminate forms—*Levin*> <their lives tended to *deliquesce* into a murmuring indefiniteness of language—*Matthiessen*> **Fuse** (see also **MIX**) may sometimes replace *liquefy* or *melt* <thunderstorm had *fused* the electric mains—*Finlay*> but more often it stresses union (as of two or more metals into an alloy) by or as if by the action of intense heat <foundries which *fuse* zinc and copper into hard, bright brass—*Newsweek*> In its extended use, too, *fuse* stresses union <a ship, itself a little community in which people of various backgrounds are temporarily *fused*—*Felix Morley*> <the strata *fused* together by heat—*Livingstone*> **Thaw** may specifically replace *melt* in reference to something (as ice or snow) that is frozen or in extended use to something (as a cold heart, a cold disposition, or extreme reserve) equally stiff or rigid <the midday sun has *thawed* the ice on the roads> <a lady . . . whose very looks would *thaw* a man more frozen than the Alps—*Shirley*> <a native reserve being *thawed* by this genial consciousness—*Hawthorne*>

liquid *adj* **Liquid, fluid** are comparable both as adjectives meaning composed of particles that move easily and flowingly and change their relative position without any perceptible break in their continuity and as nouns implying a substance composed of such particles. Both terms imply an opposition to *solid*, but **liquid** is the more restricted in its application, for the term implies the flow characteristic of water and refers only to substances which, like water, have a definite volume but no independent form except such as is temporarily given by their container <such potable *liquids* as water, milk, and wines> <blood does not remain *liquid* long after removal from the blood vessels> **Fluid**, on the other hand, implies flow of any sort and is applicable not only to all liquids but also to gases, which, unlike liquids, have neither independent volume nor shape <air whether in the gaseous or liquid state is a *fluid*> <*fluid* blood> *Fluid* is especially appropriate for referring to a substance that is highly viscous <molasses is a *fluid* substance> or to one liquefied (as by melting, dissolving, or saturating with water) <*fluid* rock> <*fluid* wax> <mud is *fluid* earth>

In extended use **fluid** is opposed to *rigid, fixed, unchangeable* <"open societies" of which the boundaries are *fluid* or indefinite, such as humanity or even the League of Nations—*Alexander*> <emotion, formless, chaotic, *fluid* in itself—*Lowes*> <in London all values and all meanings were *fluid*—*Rose Macaulay*> **Liquid**, on the other hand, often implies an opposition to *harshness* <*liquid* tones> <thy *liquid* notes that close the eye of day—*Milton*> but it sometimes implies transparency or extreme softness or both <his *liquid* glance—*Wharton*> <with what *liquid* tenderness she turned and looked back—

Bennett > In financial circles, where both terms are used, *fluid* may distinctively apply to money or funds that are not permanently invested or that are constantly in circulation (<the *fluid* gold of international trade>) but more often the terms are used interchangeably to imply the quality or condition of assets that are in the form of money or are easily convertible into money and are therefore readily available for another use.

list *n* List, table, catalog, schedule, register, roll, roster, inventory denote a series of names or of items written down or printed as a memorandum, a record, or a source of information, but, because of wide differences in their range of application, they are not freely interchangeable. **List** is the most comprehensive and the most widely applicable of these terms since it may or may not imply methodical arrangement (as in alphabetical or chronological order) and it may itemize units of various kinds (as persons or objects or facts or words or figures) <a grocery list> <a list of invited guests> <price list> <an engagement list> **Table** is also widely applicable, but it distinctively implies arrangement in an order that will assist the person who makes use of it in quickly finding the information he desires; consequently, it usually suggests presentation of items in columns, often, when the items are related or associated with each other, in parallel columns; thus, a *table* of weights may give in the first column an alphabetical list of the weights of all countries and add in the following columns, directly on a line with each of these names, the place in which it is used, its equivalent in American or British weights, and its equivalent in metric weight <a table of contents of a book> <a table of logarithms> <annuity tables> <a timetable of trains> **Catalog** basically applies to a complete list or enumeration of all instances of a kind <a catalog of the Lepidoptera of Michigan> <a catalog of the popes> The term is used more often of an informative itemized descriptive list (as of the books in a library, the works of art in a museum, the courses given in a university or college, or the articles for sale by a company). Because business, educational, and art catalogs often contain much other information of value, the term often loses its essential meaning of *list*, although these catalogs have usually for their main object the presentation of complete lists. **Schedule** (see also PROGRAM) applies especially to an itemized statement of particulars, whether it is appended to a document (as a bill or statute) to provide supplementary details <Schedule D of the tariff bill> or is separate <a schedule of a bankrupt's debts> <a schedule of assets and liabilities> **Register** is applicable primarily to the official book, parchments, or papers in which are entered from time to time names or items of a specific character, together with pertinent details, for the sake of maintaining a record <a register of births> <a register of marriages> <a register of seamen> Since, however, these entries constitute not only a record but also a list or catalog, the term often more strongly suggests an official listing or enumeration than a series of entries (his name is not in the register of voters) **Roll** is applicable to a list and especially an official list of the names of those who belong to a certain group or force; thus, a muster *roll* includes the names of all the officers and men of a military body or of a ship's company present or accounted for on the day of muster; a class *roll* is a list of all students belonging to a class. **Roster**, which is chiefly a military term, applies basically to a table containing a roll of officers and men

or sometimes of units and specifying such matters as the order of their rotation in duties or their special assignments. **Inventory** is a catalog of the goods and chattels, and sometimes the real estate held by a person or a corporation at a particular time (as at the person's death or at the stocktaking of the corporation) <the merchant makes an *inventory* of his stock annually on January 15th> In extended use the term often refers to a list similar in its details to those of a true inventory <nothing short of an authentic passion for concrete detail . . . can give the saving gusto and animation which carry off safely the long *inventories* of utensils and articles of food and attire in Scott and Defoe—Montague>

living *adj* **Living, alive, animate, animated, vital** mean endowed with or manifesting life. In their primary senses where *life* means that character or quality which is peculiar to things that are capable of growth, reproduction, and, often, motion and which is lost by death, they come very close to each other. **Living** and **alive** are opposed to *dead* and, therefore, are applied to organic bodies which have life as distinguished from those from which life has departed; they are distinguishable chiefly by the fact that *alive* follows the noun it modifies either directly or as a predicative adjective (among *living* men) <among men still *alive*> <all *living* things> <of all it ever was my lot to read, of critics now *alive*, or long since dead—*Cowper*> <our appreciations of *living* or dead writers—*T. S. Eliot*> **Animate** is opposed to *inanimate* and is applied to living organic bodies as contrasted with dead organic bodies or, more often, with inorganic bodies having no capacity for life <those who ignore the natural world around, *animate* and *inanimate*—*Spencer*> **Animated** (see also LIVELY; compare *animate* under QUICKEN *vb*) is opposed to *lifeless* or *inert*, and may apply to something which, once devoid of life, becomes alive <viruses that may behave as *animated* bodies or as *lifeless* crystals> or may be used to perfect a comparison of something by its nature *lifeless* with something *living* <a large Australian phasmid popularly known as the *animated* stick> <the moral relativism engendered by the notion that man is nothing more than an *animated* machine—*Nagel*> **Vital** is applied chiefly to qualities (as power, force, energy, or motion) which result naturally from or are associated with life in distinction from qualities which result from purely physical or chemical causes <*vital* functions> <it derived its growth and movement from its internal *vital* force, not from external sources of energy—*S. F. Mason*>

When these words are applied to things which have not life in the sense defined, they form other groupings. All, however, stress qualities suggestive of life. **Living** usually suggests continued or continuous existence with no diminution of activity or efficacy <a *living* principle> <a *living* force> <ballet as an art form was *living* and not dead—*Coleman*> **Alive** and **vital** are very close in their emphasis on abundance of vigor, on capacity for development, or on powers of endurance; both are applicable to persons as well as to things <we are not sufficiently *alive* to feel the tang of sense nor yet to be moved by thought—*Dewey*> <Queen Victoria remains . . . one of the most absorbing figures of her time. Obviously she is still *alive* enough to be condemned—*Times Lit. ive of life, especially motion <*animated* pictures> <an *animated* doll> <the *animated* signs that blink, bubble, and bedazzle visitors to Times Square—*Fixx*>

living *n* **Living, livelihood, subsistence, sustenance, maintenance, support, keep, bread, bread and butter** are comparable when they denote the means, especially the amount of money or goods, required to keep one supplied with the necessities of life (as food, housing, and clothing) and sometimes also the nonessentials that with the necessities supply the needs of a full life. **Living** is perhaps the most general term since it may denote either the necessities and provisions with which one supports life or the income with which these may be obtained <had undertaken to work as a manager in return for a *living* and a share of the crops—*Glasgow*> <many of his other customers had gone . . . so that his own poor *living* was cut in impossible half—*Malamud*> <an industrial community, in which *livings* are insecure, incomes are inadequate—*W. H. Hamilton*> Typically it is used in a few simple idioms; thus, a man usually earns or makes or gets a or his *living*; he does something (as writing, spinning, or farming) for a or his *living*; someone or something owes or provides him a *living* <I am quite pleased to make my *living* by what I write, but the attempt to write for my *living* would be hopeless, for I can write nothing that is not in itself a pleasure to me to write—*Ellis*> <men who start out with the notion that the world owes them a *living*—*Sumner*> **Livelihood** may be indistinguishable in meaning from *living* <the population derives its *livelihood* from farming—*Americana Annual*> <the *livelihood* of the people of Malaya has always been uncertain because of the narrow base of their economy—*Langdon*> <the profession is of necessity a means of *livelihood* or of financial reward—*MacIver*> but unlike the latter it may apply specifically to the means (as a trade, profession, or craft) by which one earns a *living* <education is a preparation for life, not merely for a *livelihood*, for living not for a *living*—*Sampson*> <it is their profession and *livelihood* to get their living by practices for which they deserve to forfeit their lives—*South*> <had a low opinion of politics as a *livelihood*—*White*> **Subsistence** may be a close synonym of *living* <Harbor Springs relies for its *subsistence* chiefly on the summer vacationist trade—*Amer. Guide Series: Mich.*> <between disappointment and expectation, is soon disgusted, and returns to pursue his more legitimate means of *subsistence*—*Burroughs*> but often it more specifically denotes means sufficient merely to maintain life and implies an amount of money or supply of goods that provides a person or his family with no more than basic necessities (as of housing, food, and clothing) <the question whether people on relief shall be provided only with *subsistence*> <only in the meanest and most limited sense is *subsistence* a standard of living—*Harper's*> **Sustenance** is often used in place of *living* when the emphasis is upon the food that is necessary not only to one's existence but to one's well-being <he was able to wring only a bare *sustenance* from his farm> <that thin layer of topsoil that . . . provides *sustenance* for our growing population—*K. D. White*> But it is also often used to imply all the necessities of life <it was the fur trade . . . which gave early *sustenance* and vitality to the great Canadian provinces—*Irving*> **Maintenance** usually denotes either a complex of necessities such as food, lodging, and laundry, and sometimes clothing or the amount needed to supply such a complex <advertised . . . for a general resident doctor at \$300 a

month and *maintenance*—*Greer Williams*) <enough to give him books, and a moderate *maintenance*—*Cibber*> <at least half of them are living parasitically on the other half instead of producing *maintenance* for themselves—*Shaw*> **Support** applies not only to the amount of money that provides maintenance but to the person who provides the means by which others are maintained <he is the sole *support* of his family> <they look for their *support* to him> <each son was expected to contribute to his own *support*—*C. L. Thompson*> **Keep** is a less dignified synonym of *maintenance* and is applicable not only to men but to animals <the horse is scarcely worth his *keep*> <hired men could no longer be had for ten or fifteen dollars a month and *keep*—*White*> **Bread** and **bread and butter** are synecdoches for *living* or *sustenance*, partly as a result of the use of the former in the Lord's Prayer "Give us this day our daily *bread*" <he is a fine poet, but he makes his *bread* and *butter* selling insurance>

load *n* **Load**, **burden**, **freight**, **cargo**, **lading** are comparable when they mean something which is carried, conveyed, or transported from one place to another. **Load** is the most comprehensive of these terms, being applicable to whatever is carried (as by a man, animal, vehicle, ship, running water, or conducting wire) <the peddler carries a heavy *load*> <the truckman will deliver a *load* of wood tomorrow> *Load* is also applicable to the quantity or amount carried (as by a wagon, a truck, or a freight car) <a *shipload* of coal> **Burden** may take the place of *load* <a young man . . . bearing a *burden* of fruit—*Edmunds*> but in both primary and extended use it ordinarily takes on some of the notions of the cognate verb (see **BURDEN** *vb*) and suggests a load that weighs one down (as from heaviness, unpleasantness, or unwieldiness) <[the river] carried an odorous *burden* from the houses, shacks, small mills and refuse heaps along its banks—*Amer. Guide Series: N.Y.*> <bear ye one another's *burdens*—*Gal* 6:2> <his chief *burden* was a racking doubt of his own legitimacy—*Wyndham Lewis*> <a woeful *burden* of debts that plagued her—*R. P. locality, **district**, **vicinity**, **neighborhood** denote a more or less definitely circumscribed place or region, especially from the point of view of those who live in it. **Locality** applies to a region of undefined boundaries, but it usually suggests an area round a center (as the place where the speaker or writer lives) <he no longer resides in this *locality*> or round a place remarkable for some event or landmark <the deliverer is to be sought in the *locality* nearest to the chief scene of the invasion—*Stanley*>

District usually applies to a locality that has clearly defined boundaries determined (as by the nation, state, or town) for such purposes as for administrative and electoral use

<representative of the Fifth Congressional *District*> <federal judicial *districts*> <police *district*> <postal *district*>

In a less specific but in this instance more pertinent sense *district* is often applied to a locality with reference to some of its most obvious or clearly defined characteristics rather than to the exact area it covers

<the agricultural *districts* of the United States> <the Lake *District* of England> <the mining *district* of Pennsylvania>

<the theater *district* of a city> **Vicinity** never loses its basic implication of nearness but, since it suggests a distinct point of view, it applies only to the locality that is very near from that point of view <there are no ponds in this *vicinity*>

Neighborhood usually carries an implied reference to one's neighbors and it may be preferred to *vicinity*, which it closely resembles in denotation, when the emphasis is on the inhabitants rather than on the locality referred to <there is no one of that name in this *neighborhood*>

<lived in a good *neighborhood*> <she is on good terms with the entire *neighborhood*> However, it is frequently interchangeable with *vicinity* when the emphasis is on proximity; thus, a man might live in the *neighborhood* or the *vicinity* of a school <the country must be on guard against the establishment of hostile bases in its *neighborhood*>

logical, **analytical**, **subtle** are comparable when they are applied to persons, their minds, their mental habits, or products of their reasoning and mean having or showing skill in thinking or reasoning. They are often used interchangeably or without clear distinction, but it is possible to employ them distinctively and with precision. **Logical** may imply the power to think according to the rules of logic and therefore in an orderly fashion; more often, however, it suggests the power to impress others that clearness of thought, soundness of reasoning, and freedom from bias underlie one's arguments, one's decisions, or one's policies (<he had . . . the *logical* as opposed to the intuitive temper. He distrusted emotion for which he could not find a rational basis—*Montague*) <Keats . . . was a perfectly *logical*, straightforward, and unprejudiced thinker. His emotions might run away with him; his ideas, never—*Lowell*) **Analytical** stresses the power to simplify either what is complex or complicated (as by separating it into its constituent parts) or what is chaotic or confused (as by reorganization that shows the relation of the details to each other and the whole). In derogatory use it may imply a tendency to multiply subdivisions but in favorable or neutral use it connotes a power to systematize, clarify, and interpret, as distinguished from the power to create or invent (<if a man is being purely *analytical* . . . the thing is then something to be classified, related to other things by cause and effect, or broken down into elements—*Pepper*) <his mind was *analytical* rather than constructive—*Scudder*) **Subtle** stresses the power to penetrate below the surface and to perceive fine distinctions and delicate, almost imperceptible, relations (<John Donne . . . one of the most *subtle* . . . intellects that ever, before or since, expressed itself through the medium of verse—*Lowes*) When applied to arguments its use may imply a criticism, such as being hard to follow because of being overrefined (<it is a *subtle* and urbane, but none the less complacent, begging of all the serious questions in the case—*Cohen*) <a *subtle* and intricate book which does not readily yield its full implications—*Canad. Forum*) Usually, however, it connotes extraordinary skill in reasoning or in analysis (<that is a point of view which . . . would hardly have escaped the *subtle* intellect of the Greeks—*Dickinson*) <the actual facts have required for . . . their interpretation the most *subtle* speculations of modern science—*Justice Holmes*) <for *subtle*, acute analysis they cannot be matched in any earlier period—*Muller*)

long *vb* **Long**, **yearn**, **hanker**, **pine**, **hunger**, **thirst** mean to have a strong and urgent desire for something. One **longs** when one wishes for something, and especially something remote or not readily attainable, with one's whole heart or with great earnestness (<socialists who *long* to see the world a better place—*Woodrow Wyatt*) <ever have I *longed* to slake my thirst for the world's praises—*Keats*) <wretched sensitive beings like ourselves *longing* to escape—*Powys*) <in the midst of the finesse, and the artistry . . . one *longs* at times, not for less refinement but for more virility—*Lowes*) One **yearns** when one regards or desires something with eager, restless, often tender or passionate longing (<but Enoch *yearned* to see her face again—*Tennyson*) <she gazed into his faded blue eyes as if *yearning* to be understood—*Conrad*) <dreamers who *yearned* for things that are not, for things to come or things that have been—*Norman Douglas*)

One **hankers** when one is possessed with or made uneasy by a desire because of the urgency of a physical appetite (<*hanker* for fresh fruit in the wintertime) or because of such a passion as greed, lust, ambition, or covetousness (<she . . . still *hankered*, with a natural hankering, after her money—*Trollope*) <*hankering* from the start after the office of tribune—*Buchan*) or for something beyond one's reach or one's powers even if only for the moment (<to wean your minds from *hankering* after false Germanic standards—*Quiller-Couch*) <too long a siege of the familiar . . . sets us *hankering* after the strange—*Lowes*)

But often **hanker** is weakened to the point that it means little if any more than **want** (<although collectors still *hanker* after the period pieces, the trend is for simplicity—*Tomkinson*) <one *hankers* after one's own order of comfort in advancing age—*de la Mare*)

One **pires** when one languishes or grows weak through longing for something or gives oneself up to fruitless longing for it (<we look before and after, and *pine* for what is not—*Shelley*) <Harry Temple was wise enough to give up *pinning* after what he could not get—*Besant & Rice*)

Basically one **hungers** for food to satisfy an urgent craving for nourishment or for a particular kind of food essential to satisfy appetite, and similarly one **thirsts** for drink to satisfy an urgent need for liquid or for a particular kind of drink essential to satisfy appetite (<*hunger* for fresh vegetables) <*thirst* for cool fresh water)

In their extended senses one **hungers** or **thirsts** when one longs for something with the full force of one's being (<blessed are they which do *hunger* and *thirst* after righteousness: for they shall be filled—*Mt* 5:6) <she *hungered* for a new environment in which to expand her new powers—*Ellis*) <East Florida was a pawn in world conflict, a strategic bait for which many nations *hungered*—*Hyman*) <a savage, unprincipled brute who naturally *thirsted* to overturn a society—*Plumb*)

look *n* 1 **Look, sight, view, glance, glimpse, peep, peek** are comparable when meaning both the act of seeing something and the thing that is seen. **Look** implies the directing of one's eyes to a thing or the use of one's power of vision (let me have a *look* at the patient) (one *dying look* he upward cast—*Scott*) (darted a quick *look* at me—*Kenneth Roberts*) When applied to the thing seen (see also APPEARANCE), the impression produced tends to be stressed (judging by the *look* of his rash, he has scarlet fever) (the *look* of his face as he spoke was by no means pleasant—*Trollope*) **Sight**, on the other hand, so strongly implies reference to the object that is seen that it suggests reception of an image by the visual powers or presentation to the sense of sight rather than a conscious use of that sense. When the term denotes the act or the power of seeing, one takes a *look* at something which catches his *sight*; one has far *sight* who sees things at a great distance (the litter is set down stage in full *sight* of the audience—*Millay*) (I was out of *sight* of the rest of them—*L. A. Viereck*) When the term denotes the thing that is seen, qualifying words or phrases are usually necessary to suggest its character, appearance, or the effect it produces (there is no *sight* in the world equal to it) (a disagreeable *sight*) (the blossoming of a cherry orchard . . . is a *sight* eagerly awaited—*Amer. Guide Series: Mich.*) (the earth, and every common *sight*—*Wordsworth*) **View**, especially when it denotes the act of seeing, implies chiefly the exercise of the mental rather than the physical vision or an attempt to comprehend something beyond the range of the physical vision (bring the buried ages back to *view*—*Gray*) (the scientific *view* of the world is not indifferent to quality or value. It seeks to find law, harmony, uniformity in nature—*Inge*) (Unitarianism with its more cheerful *view* of human nature—*Sperry*) Often, when seeing through the eyes is suggested, *view* takes the place of *sight* in either sense, with, however, a stronger implication of a directed or fixed gaze (thy dales, and hills, are fading from my *view*—*Keats*) (a house that affords a *view* of the ocean) (trees that intercept the *view*) **Glance** may denote something which is seen as a sudden flash or gleam, or the presence or movement of which is recognized by a swift sudden flash (with winged expedition swift as the lightning *glance*—*Milton*) (each sword's bright *glance*, seemed summons from their fate—*Stirling*) It is in this sense that "a *glance* from the eye" is often to be interpreted, especially in older writings (dart not scornful *glances* from those eyes, to wound thy lord—*Shak.*), but the transition in sense from the flash that is seen to the quick look that is given is not clearly marked (lift our heads to heaven, and never more abase our sight so low as to vouchsafe one *glance* unto the ground—*Shak.*) (a *glance* satisfied him of the hopelessness of the struggle—*J. R. Green*) **Glimpse** also may apply to something seen as a flash or a gleam (no dear *glimpse* of the sun's lovely face, strikes through the solid dark-

ness of the place—*Cowley*) (a *glimpse* of the moon showed the dark and huge tower—*Scott*), but more commonly implies a brief view of a thing or, even more often, as much of it as may be taken in at a glance (I did indeed for a brief evening obtain a *glimpse* of the richness and still beauty of an English harvest—*Jefferies*) (you remember I had a *glimpse* of him once—*Conrad*) (it was in one of these laboratories that I had my first and only *glimpse* of the fabulous plutonium—*Douglas Brown*) **Peep** and **peek** are not clearly distinguishable in meaning, but the former is generally regarded as more dignified or less childish. When they denote the act of looking, both terms imply an attempt to see what is hidden or concealed, or what can be only furtively watched (as through a hole or a crevice or through half-shut eyes (take a *peek* through a keyhole) When, however, they denote something which is seen by peeping or peeking, *peep* seems to be the favored word (you've only seen a *peep* through the curtain—*Stowe*) (none of these men has so far written a popular book of *peeps* into the fairyland of reality—*T. S. Eliot*)

loose *adj* **Loose, relaxed, slack, lax** are comparable when meaning not tightly bound, held, restrained, or stretched. **Loose** is the widest of these terms in its range of application. It is referable, for example, to persons or things that are free from a usual or a temporary restraint, whether that restraint is material (as a rope, a bond, a fetter, or a prison) or immaterial (as a rule, a principle, or a law) (we found the boat *loose* after the storm) (the bull is *loose* in the field) (finally he worked his hand *loose*) (some sheets of this book are *loose*) (loose thinking, unrestrained by concern for logic or accuracy) (loose talk that pays scant attention to its consequences or the truth of its statements) (loose habits) (loose living) **Loose** is also applicable to what is not firmly or tightly held by, attached to, connected with, or fitted to something that supports or guides, or something that it is intended to cover (drive with *loose* reins) (a *loose* belt) (a *loose* coat) (loose joints) (a *loose* sense of a word) Often the word applies to a substance or fabric having particles or filaments which are not close or compact in arrangement (loose soil) (a *loose* weave) **Relaxed** implies a loss of some tightness, tension, strictness, or rigidity, rather than total freedom from restraint or considerable departure from a normal state (as of discipline, fitness, or firmness); not only does it not suggest wildness, lawlessness, or immorality, but it rarely suggests anything worse than an easing up, a mitigation, an alleviation of strain, or a softening (relaxed discipline) (relaxed nerves) (Augustus during these months was suffering from the relaxed and surfeited mood which always attends success—*Buchan*) (White House family life had been easy and relaxed . . . but it had maintained the standards of gentleness—*S. H. Adams*) (the relaxed attitude of the British toward the sedition expressed every day in Hyde Park—*R. K. Carr*) **Slack** (see also NEGLIGENT) comes close to relaxed in its limitations and implications but it may stress lack of firmness or steadiness rather than a release from strain or severity; thus, a *slack* rope is one that is not taut, usually one that is not as taut as is necessary or de-

sirable; a *slack* hold is a weak, unsteady hold (the tired arms lie with every sinew *slack*—*Quiller-Couch*) (a pair of sly, keen eyes are dancing in his *slack*, clown's face—*New Yorker*) (the rhythms often are indistinguishable from those of prose and the effect is often flat and *slack*—*Drew*) *Slack* is applied both to business or work that is subject to periods of lessened activity and to the periods or seasons when business is dull or work is hard to find (it'll be play to me after I've done my day's work, or any odd bits o' time when the work's *slack*—*George Eliot*) (the *slack* season for carpenters) Like *slack*, *lax* usually stresses lack of steadiness, firmness, and tone (felt the *lax* droop of her shoulder against his arm—*Wylie*) (sat there in one of those loose *lax* poses that came to her naturally—*Woolf*) In application to nonmaterial things it is not always clearly distinguishable from other senses in which its primary stress is on lack of necessary strictness, severity, or precision (see *lax* under NEGLIGENT) (his laws were in advance of general public opinion, an opinion which grew *laxer* as the years passed—*Buchan*) (the old unity . . . has been replaced by a new unity based on the principles of chivalry and courtly love . . . This unity is relatively *lax* and slight—*R. A. Hall*)

loud, stentorian, earsplitting, hoarse, raucous, strident, stertorous are comparable when they apply to sounds and mean great in volume or unpleasant in effect. **Loud** suggests a volume above normal and sometimes implies undue vehemence or obtrusiveness (a *loud* cry) (a *loud* blast on a trumpet) (*loud* demands for reform) (a *loud* and unpleasant person) **Stentorian**, chiefly applying to voices, implies exceedingly great power and range (a *stentorian* voice, husky from much bawling of orders—*Jesse*) (a few words, rendered either completely inaudible or painfully *stentorian* according to the whim of the microphone—*Times Lit. Sup.*) (blowing his nose in *stentorian* tones—*Rölvaaq*) **Earsplitting** adds the idea of a physically oppressive loudness, especially shrillness (as of screams or shrieks) (suddenly he trumpeted, an *ear-splitting* sound in the close stall—*W. V. T. Clark*) (an *ear-splitting* cry of terror) **Hoarse** implies harshness, huskiness, or roughness of tone, sometimes suggesting an accompanying or causal loudness (the *hoarse* growling of the mob—*Kenneth Roberts*) (voice came to my ears . . . tense and *hoarse* with an overmastering rage—*London*) (the *hoarse* bellow of the bull whistle—*Amer. Guide Series: N. Y. City*) (a sort of a *strident*, metallic quality about her, revealed in the high pitch of her voice—*Sterling & Ascoli*) (her vocal attack often sounds *strident* and explosive—*Newsweek*) **Stertorous**, usually not applied to sounds made by the voice, suggests the loud snoring, or sounds like snoring made in breathing, especially when it is difficult, by persons or animals in sleep, in a coma, or with marked asthmatic difficulties (the *stertorous* breathing of the owl—*Osbert Sitwell*) (the horse is trembling . . . its breathing *stertorous* like groaning—*Faulkner*)

loving, affectionate, devoted, fond, doting are comparable when they mean feeling or showing love or strong liking. **Loving** stresses the inward emotion and usually implies sincerity and depth of feeling (<a loving father> <loving friends> <looking at it with eyes at once critical and loving>, as if recalling the glow with which he had created it—*Galsworthy*) <so we'll go no more a roving so late into the night, though the heart be still as loving, and the moon be still as bright—*Byron*> **Affectionate** often stresses demonstrativeness <she is a very affectionate child> <he had an affectionate heart. He must love somebody—*Austen*> or implies the need for or fact of outward expression of inward feeling <his affectionate care for his people was winning him love—*Buchan*> **Devoted** emphasizes attentiveness, sometimes implying little more than assiduousness, sometimes connoting self-dedication or active loyalty to the person or thing one loves or likes <devoted lover> <devoted disciple> <I did everything for him that the most devoted mother could do—*Shaw*> **Fond** implies affectionate attachment and often connotes foolish tenderness <a loving husband is a very amiable character. A fond one I think is not so—*John Wesley*> <her preoccupation with petty things of no importance whatever was worthy of the finest traditions of fond motherhood—*Bennett*> When *fond* (of) and *devoted* (to) imply a strong predilection or addiction, they are not often clearly distinguished. However, one is *fond* of the theater who welcomes every opportunity to see a play; one is *devoted* to the theater who spends much of his time in seeing plays or in efforts to further the development of the drama. One may be *fond* of the country and yet not go there often, but if one is *devoted* to it, one prefers to spend most of one's time there. **Doting** implies excessive fondness that leads to overindulgence in parents or fatuousness in lovers <doting mothers end by ruining their children—*Hallam Tennyson*>

lucky, fortunate, happy, providential all mean meeting with or producing a favorable outcome or an unforeseen or unpredictable success. **Lucky** implies that the person or persons involved have been favored by chance and that the success has not been the result of merit or merits (<a lucky gambler> <said he was a lucky fellow not to be sent to school—*Meredith*> <it was a lucky day for him when he met the girl who later became his wife> **Fortunate**, although it is often indistinguishable from *lucky* in its implications, is more formal and more likely to suggest an unanticipated absence of all handicaps and mischances or presence of such favorable circumstances as might argue the intervention of a higher power (compare *fortune* under CHANCE *n* 1) that watches over one (<in friendships I had been most fortunate—*Shelley*> <we are aware, too, that the critical discrimination which comes so hardly to us has in more fortunate men flashed in the very heat of creation—*T. S. Eliot*> <it took a very fortunate conjunction of events to bring about the rapid spread and seemingly complete victory of democracy—*Dewey*> **Happy** differs from the preceding words chiefly in its combining the meaning of *lucky* or *fortunate* with that of its more common sense of being blessed or made glad (see GLAD); thus, a *happy* outcome is not only one that is fortunate but one that makes the person affected feel happy; a *happy* accident is an accidental event or circumstance that brings to light something that proves a treasure <giving them patience under their sufferings, and a happy issue out of all their afflictions—*Book of Common Prayer*> <*Homo sapiens* is among the safest of all animals, because he is omnivorous. His heredity is a mixture of happy accidents—*La Barre*> **Providential** often carries an implication of good fortune resulting from the help or interference of Providence (<a providential escape> <I thought to myself, this can't be chance. Indeed it seemed providential—*de la Mare*> Often, however, the word carries no trace of this implication and means little more than *lucky* or *fortunate* <it was providential: the sisters had made no remark that the Critchlaws might not hear—*Bennett*> <it was certainly most providential that I looked up at that instant, as the monster would probably, in less than a minute, have seized and dragged me into the river—*Bartram*>

lure *n* **Lure, bait, decoy, snare, trap** all denote something that leads an animal or a person into a particular place or situation from which escape is difficult. **Lure** suggests something that always attracts and often deceives (threw out all the *lures* of her beauty . . . to make a prize of his heart—*Peacock*) yet does not necessarily lead one into evil or into danger (how many have with a smile made small account of beauty and her *lures* . . . on worthier things intent!—*Milton*) Often the connotation of deception is subordinated or lost and that of drawing power or seductiveness is correspondingly heightened (how can they resist . . . the *lure* of so adventurous, so enchanting an invitation?—*L. P. Smith*) (the *lure* of the simple life—*Buchan*) **Bait** basically applies to a morsel of food by which a fish or other animal is enticed into a situation where it can be caught. In extended use it is applied to something, often in itself relatively insignificant, which is held out as a temptation or as a suggestion of an inviting prospect in the hope or with the result of inveigling someone into a desired act, position, or situation (shop windows filled with *baits* to shoppers) (in spite of her shyness, the girl's beauty was sufficient *bait* to attract many suitors) (the Festival has . . . signed a big-name movie star to act as *bait* for those who must have a pinch of glamour added to their culture—*Sat. Review*) (the *bait* may be reunification of East and West Germany, which all Germans are loudly demanding—*A. E. Stevenson*) **Decoy** may apply

to a wildfowl or the likeness of one which is used to lure other wildfowl into shooting range or into a net. In extended use it is applied to a person or sometimes to a thing that leads one to go somewhere or to do something that exposes one to the danger of being entrapped (as in the commission of crime, in compromising or unpleasant circumstances, or into being used to further another person's ends) (pretty young girls were the unconscious *decoys* by means of which she assembled numbers of men at her receptions) (the troops were led into ambush by a *decoy*) (are said to have lured ships onto the dangerous Brigantine shoals in order to plunder them. The *decoy* was a lantern hanging from a pole lashed to a jack-ass—*Amer. Guide Series: N. J.*) (wealthy department stores had the idea of using their book sections as *decoys* to draw the public into their doors by offering the latest big-selling books at heavily cut prices—*Times Lit. Sup.*) **Snare** basically applies to a line with a running noose for catching a bird or animal. In extended use it is applicable to a danger one may run into accidentally or unexpectedly or through lack of caution or wariness and from which, once involved, one cannot easily extricate oneself (the path to bliss abounds with many a *snare*—*Cowper*) (thou know'st the *snare*s on ev'ry hand, guide thou their steps away—*Burns*) (the wish for perfect security is one of those *snare*s we are always falling into—*Russell*) (led years before into the *snare* of matrimony with him, in consequence of which she was encumbered with the bringing up of six children—*Stowe*) (she meant to weave me a *snare* . . . to entangle me when we met—*Tennyson*) (gin's but a *snare* of Old Nick the deluder—*Barham*) **Trap** basically applies to a device that shuts with a spring for capturing animals. In extended use it is, like *snare*, applied to what is a danger to the unwary or incautious. The two words are often used interchangeably as though they were indistinguishable in meaning; however, *trap* is preferred to *snare* when disastrous effects, or deliberate setting for the purposes of capture, or trickery beyond detection are implied (the army feared a *trap* but rather than retreat, they advanced into it) (a *trap* for speeders) (knowing the examiner's methods, he was certain that there would be a *trap* set for him but he could discover none) (they accused the Western Powers of setting a *trap* for Italy so that she would be irrevocably tied to them—*Collier's Yr. Bk.*) (with *traps* and obstacles and hazards confronting us on every hand, only blindness or indifference will fail to turn . . . for guidance or for warning, to the study of examples—*Cardozo*)

lure *vb* **Lure, entice, inveigle, decoy, tempt, seduce** are comparable when they mean to draw one from a situation or a course (as of action or behavior) typically felt as right, desirable, or usual or into one felt as wrong, undesirable, or unusual. **Lure** implies the action of a strong or irresistible influence which may be baneful (sensationalism that had *lured* new readers to the yellow journals during the circulation wars of the 1890's—*H. L. Smith*) or perfectly innocuous or even desirable (stretches of woodland dotted with lakes where hunting and fishing *lure* sportsmen from many distant points—*American Guide Series: Me.*) (the essential thing is to *lure* into classroom instruction the finest type of trained men and women—*Fuess*) **Entice** adds to *lure* a strong suggestion of artfulness and adroitness (with her . . . high-mindedness she *enticed* him into a sphere of spirituality that was not his native realm—*Stahl*) (she appeared to be playing with the bird, possibly amusing herself by trying to *entice* it on to her hand—*Hudson*) **Inveigle** implies the use of wiles and often of deceit and flattery (with patience and diplomacy, she can eventually *inveigle* him into marrying

her—*Maher*) Distinctively, it may apply to the coaxing of something from someone by such means (although he used the most subtle means to *inveigle* the author into the office to read the press notices, he never succeeded—*Bok*) (over gin and water we *inveigled* from him a pack of well-worn cards—*Beaglehole*) **Decoy** may mean to entrap or lead (as into danger) by artifice and especially by false appearances (the islanders had been living in relative opulence from the wreckage of ships which they had skillfully *decoyed* to destruction on the reefs—*Barbour*) (the female bird . . . practiced the same arts upon us to *decoy* us away—*Burroughs*) **Tempt** historically meant and still may mean to entice into evil through hope of pleasure or gain ([weak] . . . nations *tempt* others to prey upon them—*Richards*) In more general use it may carry a suggestion of exerting such an attraction as inclines one to act against one's better judgment or higher principles (the receipt of remuneration from patents or copyrights *tempts* the owners thereof to retard or inhibit research or to restrict the benefits derivable therefrom—*W. T. & Barbara Fitts*) but more often implies an attracting or inducing that is morally perfectly neutral (the decision to *tempt* women away from their gray flannel suits . . . with a kaleidoscope of color—*Americana Annual*) (had a personality that could *tempt* a female ichthyologist's interests away from fish—*Current Biog.*) **Seduce** usually means to lead astray (as from the course of rectitude, propriety, or duty) by overcoming scruples (the hideous beast whose craft had *seduced* me into murder—*Poe*) and even in its most favorable senses in which it implies a moving or turning into a new course it commonly suggests some degree of deluding or misleading as the method employed (words when used with the gift of magic can *seduce* a reader into belief that has no roots in reality—*Feld*) (knew how to *seduce* the interest of his pupils; he did not drive, he led—*Anspacher*)

lurk *vb* **Lurk, skulk, slink, sneak** do not share a common denotation, but they are comparable because the major implication of each word is furtive action intended to escape the attention of others. To **lurk** is to lie in wait (as in an ambush); the term sometimes implies only a place of concealment (his faithful Tom . . . with his young master's mare . . . was *lurking* in a plantation of firs—*Meredith*) (around the ends cluster women and children, and outside *lurk* the boys and girls who are not participating in the dancing—*Mead*) but it often also suggests an evil intention, or quiet, stealthy movements, or a readiness to spring upon a victim (there . . . ugly treasurers *lurk* —*Shak.*) (if the thought of Rufus-and-Richard-slayers *lurking* behind trees doesn't bother you—*Joseph*) (in the lingering shadows of the great war and the unhappy peace some unseen, alien enemy still *lurked* —*Handlin*) To **skulk** is usually to move furtively but sometimes to lurk; the word carries a stronger implication than the preceding word either of a sinister intention or of cowardice or fear (disdainful Anger, pallid Fear, and Shame that *skulks* behind—*Gray*) (Death . . . is a scavenger, *skulks* in charnels, and is the dirtiest of fighters—*Sullivan*) (there, *skulking* like a shadow through the trees, silent as a burglar, came the trim and handsome Cooper's hawk—*Peattie*) To **slink** is to move stealthily or slyly in order not to attract atten-

tion (like beasts of prey *slinking* about a campfire—*Conrad*) (after a while I *slunk* away out of the great circle of firelight into the thick darkness beyond—*Hudson*) To **sneak** is to get out of or into a place by slinking, or out of a difficulty by methods lacking in straightforwardness or definitely underhanded (he *sneaked* out of the house after his parents had gone to bed) (rustlers had a way of *sneaking* onto ranges and dabbing their own brand on unbranded calves—*S. E. Fletcher*) (meanly to *sneak* out of difficulties into which they had proudly strutted—*Burke*)

luster, sheen, gloss, glaze are comparable when they denote a smooth shining surface that is the natural property of a thing or is given to it by some such process as polishing, burnishing, or coating. **Luster** basically and in technical use regularly implies a giving off of often iridescent reflected light (the satiny *luster* of fine pearls) (the soft *luster* of polished wood) (cut a piece of lead or of zinc, and observe the *luster* of its fresh surface—*T. H. Huxley*) (the *luster* of minerals can be divided into two types, metallic and nonmetallic—*Hurlbut*) In literary and extended use *luster* is often used to imply radiance or brilliance (see BRIGHT 1) (the sun was shining with uncommon *luster* —*Dickens*) **Sheen** applies to a lustrous surface (as of a textile) or a surface luster (as of a mineral cleavage surface or a dark feather) that may be dull or bright and may be a simple shining or marked by richly iridescent or metallic tones (repeated scrubbings have given the wood a silvery *sheen* —*Amer. Guide Series: Mich.*) (the flashing *sheen* on the bird's plume—*Sitwell*) (the *sheen* of their spears was like stars on the sea—*Byron*) (the *sheen* of his poplin and velvet—*Cather*) In extended use *sheen* may stress richness and brilliance (an amazing *sheen* over the orchestral sound, a definition of textures and effects not to be heard even in the concert hall—*Robert Lawrence*) or it may stress a superficiality suggestive of a surface luster (daughters with a *sheen* of drawing-room accomplishments upon them—*Bell*) **Gloss** stresses superficiality more than *luster* or *sheen* and is appropriately applied to something that shines because coated with a shining substance (the *gloss* of a newly varnished floor) or because well polished (buffed the leather to a high *gloss*) or specially finished (the *gloss* on this chintz will wash off) In extended use, *gloss* often implies superficial attractiveness or plausibility (Mr. France plans to put the same *gloss* . . . on the place as he does on the fancy Collins Avenue hotels—*Friedlander*) (writes with his usual agreeable *gloss* , but it may be that the ingredients are wearing just a bit thin—*New Yorker*) **Glaze** applies particularly to a glasslike coating which provides a smooth impervious lustrous surface on ceramic wares, but it is also applicable to such comparable coatings as one made on cooked meats by pouring over them broth thickened by boiling or by

addition of gelatin, or on baked goods by beaten egg or syrup, or as one formed on terrestrial surfaces <walks covered with a *glaze* of ice> <a porcelain bowl with a thick bubbly celadon *glaze*> The term also is sometimes applied to the material from which such a glaze is made <new carrots dressed with a *glaze* of brown sugar and butter> *Glaze* is the least common of these terms in extended usage and in such use is typically metaphorical <we whites have a color *glaze* on our imaginations that makes it hard to feel with the people we have segregated ourselves from—*Lillian Smith*> <her skin had the healthy *glaze* that comes from sunshine and ten hours of sleep a night—*Brodkey*>

machine, mechanism, machinery, apparatus, engine, motor are comparable especially when they denote a device or system by which energy can be converted into useful work. **Machine** is at once the most fundamental of these terms and the most varied in its applications. Basically it denotes an assemblage of parts that transmit forces, motion, and energy from one to another in a predetermined manner and to a desired end (as sewing a seam, hoisting a load, printing a book, or maintaining an electric current) <a drilling *machine*> <*machines* that convert rags to paper> <a washing *machine*> But it also may apply

specifically to any of the six *simple machines* (the lever, the wheel and axle, the pulley, the inclined plane, the wedge, and the screw) that together contain the elements of which all other machines are composed. Again, it may apply to a machine in the basic sense together with its power-generating unit and sometimes with supplementary equipment (as for moving the whole complex) <road-building *machines*> or it may apply specifically to a conveyance and especially an automobile <the term "*machine*" as used in the patent statute includes every mechanical device or combination of mechanical powers and devices to perform some function and produce a certain effect or result—*Toulmin*> <only an organism has its own internal purposes which belong to it intrinsically and . . . a *machine*, so far as we know, is merely an extension of the specific purpose of organisms, men—*La Barre*> <gears are modified *simple machines* such as the lever, pulley, wheel-and-axle, and inclined plane. nisms—*Heitner*) <man uses *machines* to transform energy, transfer energy, multiply force, multiply speed, or change the direction of a force—*C. E. Dull, H. C. Metcalfe, & J. E. Williams*> and *machine* is the only term of this group that is freely used collectively of machines as a class or abstractly of the technology and technological society associated with their use <when I use the word *machines* hereafter I shall refer to specific objects like the printing press or the power loom. When I use the term “the *machine*” I shall employ it as a shorthand reference to the entire technological complex—*Mumford*> <the domination of our cultural and collective life by the *machine*—*Glicksberg*> <the liberty of choice allowed to the craftsman who worked by hand has almost vanished with the general use of the *machine*—*Dewey*> **Mechanism** may come close to the basic sense of *machine* when it denotes an assemblage of working parts functioning together to produce an effect, but more often than not it applies to relatively simple straightforward mechanical linkages such as make up a complex machine; thus, a sewing *machine* is made up of several *mechanisms* (as one to advance the thread, another to convey the cloth, another to determine the length of the stitch, and still another to wind the bobbins) <the real mechanic understands the construction of his machine; he knows the names and uses of the parts and the principles underlying the operation of the *mechanisms*—*Burghardt & Axelrod*> <the economic machine that provides for our everyday needs is so intricate that it is hard to see the purpose of particular cogs in its *mechanism*—*W. T. C. King*> Sometimes, however, *mechanism* suggests not merely the physical parts but the various steps that lead to the final result of the process <the propeller is the source of an intense sound but the exact *mechanism* by which this sound is produced is not clearly understood—*Armstrong*> **Machinery** (see also EQUIPMENT) may apply to machines collectively <the mill sold its old *machinery* and bought more efficient machines> <*machinery* for making shoes> <the term *machinery* is very much more comprehensive in scope than the word *machine*. . . . Unquestionably, the term is broad enough to include a number of machines and their connecting appurtenances which are operated as a unit for a given purpose—*U.S. Treasury Decisions*> but it may also replace *mechanism* to denote an assemblage of working parts performing a function <a strange, quiet boy, interested much less in booklearning than in what was to be learned from rusty automobiles on the junkheap or from the thousand *machineries* all around him—*Kerouac*> <men who are temperamentally unsuited to fiddling with the adjustment *machinery* put in the backs of most bow ties—*New Yorker*> **Apparatus** (see also EQUIPMENT) basically denotes an assemblage of parts for attaining some end or doing some thing, but in itself it implies nothing about the complexity or simplicity, the efficiency or inefficiency, or the precision or crudity of the assemblage; thus, chimpanzees have been reported to put sticks together into a crude *apparatus* for reaching fruit that is beyond the reach of their hand <modern heating and refrigerating *apparatuses* raise the temperature during the winter and lower it during the summer—*Carrel*> <the *apparatus* which took the photographs and reproduced them . . . are more sensitive and truthful than the human eye—*Day Lewis*> *Engine* and *motor* in their basic relevant sense both denote a machine for converting energy (as heat, chemical, or nuclear energy) into mechanical force or motion, but in many situations they are not at all interchangeable, choice between them being firmly fixed by idiom. **Engine** is the more general term in

this relation and is applicable to such machines whether large or small, simple or complex <an internal-combustion *engine*> or it may apply both to a power-generating unit and a working unit that depends upon this <these *engines* were built to pump out mines—*Kettering & Orth*> and sometimes specifically designates certain automotive units (as a locomotive or fire engine) <sent *engines*, hose carts, and ladder trucks to the fire> <a long freight train drawn by two *engines*> From an earlier general use *engine* is still specifically applied to a few kinds of machines <rose *engine*> and it is the idiomatically appropriate term to designate the power plant of an aircraft <with either turbojet or rocket *engines* these research airplanes would have sufficient power to permit the maximum speed aerodynamically possible—*Bonney*> **Motor** is applicable to a small or light engine <an outboard *motor*> <a spit worked by a small clockwork *motor*> or to a gasoline or other internal-combustion engine; thus, one may speak of the *motor* or *engine* of an automobile; diesel *engines* or *motors* power many modern locomotives <the finest machine in the world is useless without a *motor* to drive it—*Furnas*> *Motor* is the specific term for a rotating machine that transforms electrical energy into mechanical energy <household appliances run by electric *motors*> <a *motor* is a machine for transforming electrical energy into mechanical energy or power—*Cloud*> Like *machine*, *motor* also applies specifically to an automotive vehicle (as an automobile or truck) <we want a truck battalion of at least four companies. . . . The vehicles for this unit would be obtained by drawing on excess *motors* in various division units—*Combat Forces Jour.*> <the taxpayer did not then provide Ministers with carriages and coachmen as he now provides them with *motors* and chauffeurs—*Collis*>

magic *n* **Magic**, sorcery, witchcraft, witchery, wizardry, alchemy, thaumaturgy are comparable rather than synonymous in their basic senses. In extended use they are sometimes employed indifferently without regard to the implications of their primary senses and with little distinction from the most inclusive term, *magic*, but all are capable of being used discriminately and with quite distinctive implications. **Magic** primarily denotes one of the arts or the body of arts whose practitioners claim supernatural

or occult powers (as in calling spirits to their assistance, in performing miracles, in divining the future, and in fixing the destinies of men). In extended use the word denotes a power or influence that produces effects akin to or suggestive of those of magic. Usually it stresses the power to call forth an image, an emotion, or a response from or as if from a void (his *magic* was not far to seek—he was so human! . . . where'er he met a stranger, there he left a friend—*J. R. Lowell*) (the faint significance of words . . . for a common dullard, or their evocative *magic* for a Keats—*Montague*) Less often it is applied to an art or an artist transcending the natural or explainable (but Shakespeare's *magic* could not copied be; within that circle none durst walk but he—*Dryden*) **Sorcery** is the form of magic practiced by those who use incantations and charms and cast spells in order to work their usually harmful ends. In extended use it is especially appropriate to suggest an attempt to overpower or enthrall by glamour or artful enchantment (to fence my ear against thy *sorceries*—*Milton*) (the old evocative themes recur . . . and they are still touched with that verbal and metrical *sorcery* whose secret his younger contemporaries seem to have lost—*New Yorker*) **Witchcraft**, *witchery*, and *wizardry* in their primary senses suggest powers derived from evil spirits or the use of human beings as the instruments for the accomplishment of Satanic ends, the only difference being that the first two are chiefly applied to the work of women, and the last to that of men. In extended use, however, they often vary in implications. **Witchcraft** is sometimes indistinguishable from *sorcery*, but it more often suggests guile rather than enchantment and wiles rather than spells (there is something more than *witchcraft* in them [women], that masters even the wisest of us all—*Rowe*) **Witchery**, on the other hand, occasionally implies either sorcery or guile (thus has a bit of *witchery* crept into certain methods of plague control in the past—*Hubbs*) but usually stresses a winning grace or an alluring loveliness (the soft blue sky did never melt into his heart; he never felt the *witchery* of the soft blue sky!—*Wordsworth*) (the *witchery* of legend and romance—*Riker*) **Wizardry** suggests a more virile and compelling power to enchant and usually connotes exceptional skill, talent, or creative power in the person who exerts such an influence (that white-winged legion through whom we had plowed our way were not, could never be, to me just gulls . . .; there was the *wizardry* of my past wonder, the enchantment of romance—*Galsworthy*) (his playing had a grandeur that one often misses in the work of younger and more meticulous artists, and there were moments when his *wizardry* held me spellbound—*Sargeant*) **Alchemy** is properly classed with *magic* only because its practitioners claimed mastery of secret forces in nature and the power to work such miracles as the changing of base into precious metals. In discriminative extended use, therefore, it implies transmutation or sometimes transfiguration (gilding pale streams with heavenly *alchemy*—*Shak.*) (by happy *alchemy* of mind they turn to pleasure all they find—*Green*) (the vast majority of those who write verse are unendowed with the assimilating *alchemy* of genius—*Loves*) **Thaumaturgy** basically is applied to performing of miracles and wonders or to the art of wonder-workers (as conjurers or those who profess the power to work miracles) (a world of miracles wherein all fabled or authentic *thaumaturgy* and feats of magic were outdone—*Carlyle*) In extended use it is applied to what mystifies and dazzles or is designed to mislead or confuse.

maim, **cripple**, **mutilate**, **batter**, **mangle** are comparable when they mean to injure the body or an object so severely as to leave permanent or long-lasting effects. **Maim** implies the loss of a limb or member or the destruction of its usefulness usually through violence (as by war, accident, or the deliberate act of oneself or another) (automobiles *maim* large numbers of persons every year) (maybe I wouldn't have to kill you . . . I could just *maim* you —so you couldn't keep me from turning back—*Edison Marshall*) (seems to have been *maimed* psychologically by a brutal father—*N. Y. maintain, **assert**, **defend**, **vindicate**, **justify** are comparable when they mean to uphold as true, right, just, valid, or worthy of notice or acceptance in the face of opposition or indifference. **Maintain** implies a firmness of conviction. When this implication is the only one, *maintain* usually means to argue in the spirit of one who does not admit any weakness in his contention (the artisan, for example, ranks no doubt lower than the professional man; but no one *maintains* that he is a different kind of being—*Dickinson*) (there is . . . a Philosophic Doctrine— . . . I know that many serious people believe it—which *maintains* that all men, in spite of appearances and pretensions . . . live alike for pleasure—*L. P. Smith*) Often, however, the term additionally implies persistency or insistency in upholding in defiance of all opposition (before this court ought to intervene the case should be of serious magnitude clearly and fully proved, and the principle to be applied should be one which the court is prepared deliberately to *maintain* against all considerations on the other side—*Justice Holmes*) **Assert** (see also **ASSERT** 1) so strongly implies a determination to make others accept or recognize what one puts forward as the truth, or as a claim, or as a right, that it often suggests aggressiveness or obtrusiveness (the provision of the constitution never has been understood to embrace other contracts, than those which . . . confer rights which may be *asserted* in a court of justice—*John Marshall*) But *assert* does not always imply the use of argument to force conviction or recognition (anyone . . . can feel the sustained dignity of the sculptor's work, which is *asserted* with all the emphasis he could put into it—*Henry Adams*) (on the whole New Zealand was lavish with money and attention, and used force only to *assert* her sovereignty—*Heiser*) **Defend** implies a maintaining in the face of attack with the intention of demonstrating the truth, rightness, or propriety of what is questioned; thus, one *defends* a thesis who, as a candidate for a degree, submits himself to examiners who assail the weak or dubious points of his argument (the independence of the Supreme Court of the United States should be *defended* at all costs—*Lippmann*) *Defend*, in this sense, does not imply, as it so often implies in its more common sense (see **DEFEND** 1), that the defender is in a weak or dubious position; however it seldom suggests as much aggressiveness as does *assert* and often connotes the aim of an apologist (I have not adopted my faith in order to *defend* my views of conduct—*T. S. Eliot*) **Vindicate** (see also **EXCULATE**) implies an attempt, usually a successful attempt, at defense or assertion. It presupposes that whatever is being defended or asserted has been or is capable of being challenged, questioned, denied, or contemned. When the emphasis is on defense, then argument or something which has the force of argument is usually implied, and an aim not only to make one's point but to confute and confound one's opponents is often connoted (writers who *vindicated* our hereditary House of Lords against a certain Parliament Act—*Quiller-Couch*) (the view of the informed and disinterested men turned out to be almost completely wrong, while the relatively uninformed . . . were *vindicated* on all counts—*Rovere*) When the emphasis is upon assertion, *vindicate* usually implies an effort to resist triumphantly the force of encroachment or interference or to overwhelm those who deny or doubt, not so much by argument as

by appropriate action (arise, and *vindicate* Thy Glory; free thy people from their yoke!—*Milton*) (what was it that stood in his way? His unfortunate timidity! He wished to *vindicate* himself in some way, to assert his manhood—*Joyce*) **Justify** (see also **EXPLAIN** 2, **JUSTIFY** 3) implies that the thing concerned can no longer be opposed or ignored because it has been conclusively shown to be true, valid, or proper by irrefutable arguments or on inescapable grounds, such as its consequences or its successful operation (if the Germans are to *justify* the high claims they make for Lessing as a critic, they must rest them on other grounds than his intellectual originality—*Babbitt*) (fate persists in *justifying* the harsh generalizations of Puritan morals—*Bennett*) (it isn't by the materials you use that your claim to originality will stand *justified* or condemned; it is solely by the thing you do with them—*Loves*)

majority, **plurality** are arbitrarily defined in the United States, especially by statute, when they refer to an excess of votes as determining an election. Both imply an excess of votes over the next highest candidate. The distinction between the two words applies when there are three or more candidates; then the person who is elected by a **majority** has more votes than the other candidates combined, that is, his vote is in excess of half of the total number of votes cast, and his *majority* is the number of votes cast for him in excess of one half of the total number of votes. A person is elected by a **plurality** when he has more votes than any other candidate, whether he has a *majority* of the total or not. Thus, if a total of 290,000 votes are cast in an election contested by three candidates, with candidate A polling 200,000 votes, candidate B polling 75,000, and candidate C polling 15,000, candidate A wins the election by a *majority* of 55,000, and by a *plurality* of 125,000 over candidate B, and by a *plurality* of 185,000 over candidate C. Sometimes, where the successful candidate has a vote that exceeds the total of votes cast for all opposing candidates, the term *plurality* is applied to this excess; thus, in the example given, while candidate A's *majority* is 55,000, his *plurality* over candidates B and C together is 110,000.

make *vb* **Make**, **form**, **shape**, **fashion**, **fabricate**, **manufacture**, **forge** can all mean to cause something to come into being or existence. This is the underlying meaning of **make**, the most general and the most widely applicable of these terms. *Make* may imply the operation either of an intelligent agent or of a blind agency, and either material or immaterial existence (make a chair) (make a poem) (make a choice) (this factory makes bicycles) (he is unable to make friends) (God made the world) (the spider makes webs) (the liver makes bile) **Form** adds to *make* the implication that the thing brought into being has a definite outline, design, or structure (a sculptor who forms hands with exquisite delicacy) (we are ready to form a plan) (form a federation of states) (character

A colon (:) separates groups of words discriminated. An asterisk (*) indicates place of treatment of each group.

is partly *formed* by training) **Shape**, though often interchangeable with *form*, is much more restricted in its application because it characteristically connotes an external agent that physically or figuratively impresses a particular form upon something (as by molding, beating, carving, or cutting) (the blacksmith *shapes* a horseshoe on his anvil) (shape a hat on a block) (events that *shaped* his career) (every life is a work of art *shaped* by the man who lives it—*Dickinson*) **Fashion** means to form, but it implies an intelligent and sometimes a purposeful agency and more or less inventive power or ingenuity (he *fashioned* a lamp out of an old churn) (legislative committees often *fashion* strange bills out of miscellaneous suggestions) (intelligent creatures, *fashioned* by the hand and in the image of an all-wise God—*Hambly*) **Fabricate** stresses a making that unites many parts or materials into a whole (Dr. Hitchings and his associates alone have *fabricated* more than 500 compounds resembling one or another of the simpler chemicals out of which D. N. A. (an enormously complex substance) is *fashioned* in the cell—*Engel*) and it usually connotes either a making according to a standardized pattern (fabricate doors, windows, and other parts of a house) or skillfulness in construction (fabricate a good plot for a novel) (fabricated a creed fitted to meet the sordid misery of real human life—*Woolf*) Very commonly *fabricate* implies an imaginative making or inventing of something false (the particulars of that genealogy, embellished with every detail that memory had handed down or fancy *fabricated*—*Stevenson*) (his feats of legerdemain sounded so improbable that many people considered his experiences *fabricated*—*Heiser*) **Manufacture** emphasizes the making of something by labor, originally by hand but now more often by machinery. The term is applied to a making in which raw materials are used and a definite process or series of processes is followed (manufacture cloth) (manufacture kitchen utensils) (manufacture automobiles) In extended use *manufacture* often is preferred to the preceding words when laboriousness or the knowledge of the mechanics of a process, rather than skill or ingenuity, is connoted (manufacture paintings by the dozen) (the strain of manufacturing conversation for at least ten minutes—*Fienburgh*) **Forge** basically suggests the operation of a smith who heats metal and beats or hammers it into shape (forge a horseshoe) (forge a chain) In its extended sense it carries a strong implication of devising or concocting by physical or mental effort so as to give the appearance of truth or reality (the proud have *forged* a lie against me: but I will keep thy precepts with my whole heart—*Ps* 119:69) (whate'er I *forge* to feed his brainsick fits, do you uphold and maintain in your speeches—*Shak.*) (however feeling may render plastic the stuff of poetry, the poem, if it be worthy of the name, is *forged* in the brain—*Lowes*) In specific use, both legal and ordinary, *forge* implies the making of a counterfeit, especially by imitating the handwriting of an original or of a supposed maker; thus, one *forges* a document, such as a will, deed, or check, by making or signing it in imitation of another's handwriting or by making alterations in a genuine document by the same means.

maker n **Maker, creator, author** denote one who brings something into being or existence. When written with an initial capital letter, all three terms designate God or the Supreme Being; without the capital they ascribe similar but not equivalent powers or effects to a person. **Maker** typically implies a close and immediate relationship

between the one who makes and the thing that is made. It implies the physical or figurative handling of material and individual or personal responsibility for what is turned out; hence, in religious use (as in hymns and prayers) God is usually called one's **Maker** (every soul, insisted Luther, stands in naked confrontation before its **Maker**—*Bainton*) **Maker** in such terms as *kingmaker*, a *maker* of men, a *maker* of phrases, a *maker* of poems, suggests the use of persons, words, or ideas as instruments by which one brings something into existence through one's own labor or effort (in every creative writer there is a touch of the poet, the *maker*, even if his medium is prose—*Forster*) **Creator**, on the other hand, seldom suggests either literal or figurative use or handling of materials; its leading implication is that of bringing into existence what the mind conceives and the will, as the mind's instrument, carries out. As applied to God, the term usually evokes the picture of Creation as presented in Genesis; the term is used, therefore, rather than **Maker**, when His omnipotence and the greatness of His works are stressed (and touched their golden harps, and hymning praised God and his works; **Creator** him they sung—*Milton*) In the same way *creator* is used of a man who brings into being something new, which has form in his mind or imagination before he gives it objective existence (a conservator, call me, if you please, not a *creator* nor destroyer—*Browning*) (they are genuine *creators*: they do not describe nor interpret reality as much as construct it—*Howard Moss*) **Author** is applied to one who originates and who, therefore, is not only the source, or ultimate source, but the one responsible for a person's or thing's existence. It is applied to God chiefly in the phrase "the *Author* of one's being" when the reference is to the gift of life or its attendant circumstances (then casting up my eyes, thanked the *Author* of my being for the gift of that wild forest, those green mansions where I had found so great a happiness—*Hudson*) In reference to persons it is not only applied to a writer (see **WRITER**) but also to one (as a founder, an inventor, or an initiator) who brings something into existence (the policy of which he was principally the *author*—*Belloc*) (the gay and bewitching . . . coquette Célimène who is the *author* of all Alceste's woes—*Alexander*)

male adj **Male, masculine, manly, manlike, mannish, manful, virile** are comparable when meaning of, characteristic of, or like a male, especially of the human species. **Male** (opposed to *female*) applies to animals and plants as well as to human beings and stresses the fact of sex (a *male* tiger) (a *male* willow tree) (male children) (a *male* choir) **Masculine** (opposed to *feminine*) alone of these words may imply grammatical gender (masculine nouns and pronouns) but it characteristically applies to features, attributes, or qualities which belong to men rather than to women (he was a big, active, *masculine* creature—*DeLand*) (the *masculine* character lying behind the lofty idealism of Sung painting—*Binyon*) (his poetry is *masculine*, plain, concentrated, and energetic—*Landor*) (it's a *masculine* sort of town . . . with solidity rather than

S. Scott*) Often *manlike* suggests reference to man in the more general sense of the word and therefore means little more than human or like human beings (there were a dozen or more of the hairy manlike creatures upon the ground—*Blue Book*) **Mannish** (often contrasted with *womanish* or *effeminate*) applies chiefly to women or their dress, gait, and manners, when they suggest masculinity rather than femininity (a woman impudent and mannish grown—*Shak.*) (a mannish costume) (those who dislike . . . mannish headgear, might try his simple but feminine small hats—*Lois Long*) **Manful** differs from *manly* chiefly in its greater stress on sturdiness and resoluteness (a manful effort to gain self-control) (his life has been one manful struggle against poverty—*Trollope*) **Virile** (a stronger word than *masculine* and opposed to *puerile* or, in specific sense, to *impotent*) suggests such qualities of fully developed manhood as aggressiveness, masterfulness, forcefulness, and in a specific sense, procreancy. It differs from *manly* and *manful* in being applied only to mature men (virile controversialists—*Inge*) (a virile style) (ye chiefly, virile both to think and feel, deep-chested Chapman and firm-footed Ben—*J. malice, ill will, malevolence, spite, despite, malignity, malignancy, spleen, grudge denote a feeling or a state of mind which leads one to desire that another or others should suffer pain or injury. **Malice** usually implies a deep-seated and, often, an unjustified or unexplainable desire; it frequently carries an implication of an innate pleasure in

doing evil, in inflicting injury, in seeing others suffer, or in wanton destruction (with *malice* toward none; with charity for all . . . let us . . . bind up the nation's wounds—*Lincoln*) (there are people in the world with that degree of . . . malice in them that they can't bear to allow a good man his merits—*Shaw*) (man, with his usual monkey-like malice, took pleasure in pulling down what he had built up—*Henry Adams*) (argues that Dreyfus' court-martial and imprisonment . . . were mostly a tragedy of honest errors, not a conspiracy of racial malice—*Time*) Often, however, it may imply mischievousness or impishness rather than a hardened, vindictive nature (she was clever, witty, brilliant, and sparkling beyond most of her kind; but possessed of many devils of malice and mischievousness—*Kipling*) (we get far too little good conversation and artistic malice in life or art—*Coxe*) In law *malice* applies to the state of mind of one who willfully commits wrong, whether in full deliberation (malice aforethought) or out of hatred and a desire to inflict injury on another (malice in fact) or out of the depravity of his nature (implied malice) *Ill will* and *malevolence* both imply an unfriendly attitude or state of mind that is rarely without some basis, real or fancied, and that need not, as *malice* so often does, lead to overt action. *Ill will* applies to an attitude or state that is definite but measured and rarely involves any marked upheaval of mind (proposal to defend Formosa for Chiang and invite the ill will of all the rest of Asia—*Progressive*) (could not believe it possible that any injury or any misfortune could provoke such ill will against a person not connected, or, at least, not supposed to be connected with it—*Austen*) **Malevolence** applies primarily to a bitter and rancorous ill will that affects the whole outlook of one possessed by it and that is both more persistent and more likely to seek outlet in malicious conduct than is ill will (their society is organized by a permanent, universal animosity and malevolence; sullen suspicion and resentment are their chief motives—*Muller*) (the frigid malevolence with which Wilson denied this strong man's plea, made in what Wilson, being sensitive and wise, knew was excruciating abasement—*White*) **Spite** suggests petty ill will and mean envy and resentment that often manifests itself in trivial harassments (a man full of the secret spite of dullness, who interrupted from time to time, and always to check or disorder thought—*Yeats*) (it is, indeed, a little shabby, a little insignificant: not really hate at all, but spite—*Day Lewis*) **Despite** (see also under DESPISE) in this sense is a rather uncommon or literary term that may imply more pride and disdain and less pettiness than *spite* (not in *despite* but softly, as men smile about the dead—*Chesterton*) (if you will imagine a glint of moonlight running up the blade of a rapier, you may know the chill flame of spite and *despite* that bickered in her eyes then as she spoke—*Quiller-Couch*) **Malignity** and **malignancy** imply deep passion and relentless driving force (he is cruel with the cruelty of petrified feeling, to his poor heroine; he pursues her without pity or pause, as with malignity—*Arnold*) (blinded by malignancy against the class of manual worker—*Sprigge*) **Spleen** implies deep-seated rancor combined with bad temper; it usually suggests wrathful release of latent spite or persistent malice and the wish to harm (his countrymen vented their spleen at his failure . . . by sending the unfortunate naval commander into exile—*Toynbee*) (his just fame was long obscured by partisan spleen—*Parrington*) **Grudge** applies to cherished ill will against an individual which seeks satisfaction; it usually suggests deep resentment for some real or fancied slight or affront and, often, a determination to get even (I will feed fat the ancient grudge I bear him—*Shak.*)

All imply calumny, but they differ from *calumniate* mainly in their emphasis on the positive damaging effect of the lies. **Defame**, both in legal and in literary use, suggests an actual injury to one's good name or a definite loss of repute or reputation ⟨*defaming* and *defacing*, till she left not even Lancelot brave nor Galahad clean—*Tennyson*⟩ ⟨Captain Basil Hall . . . was publicly accused of being an agent of the British government on a special mission to blacken and *defame* this country—*Brooks*⟩ To **slander**, in legal use, is to defame orally; in general use it covers both written and printed as well as oral calumny. Noisome is applicable chiefly to what emits a poisonously or unwholesomely offensive odor <four sewers emptied into these twenty-five acres of swamp and morass—stagnant, *noisome*, and crawling with huge snakes—*Heiser*>

Putrid is applicable primarily to organic matter in such a state of decomposition that it is loathsomely malodorous <a bloated, *putrid*, noisome carcass—*Burke*> <the whole was *putrid* with fish corpses—*Semon*>

Rank (see also RANK 1; FLAGRANT) applies to an odor or to a thing which emits an odor that is exceedingly strong and unpleasing yet not necessarily loathsome <the *rank* smell of a sunflower> <O, my offence is *rank*, it smells to heaven—*Shak.*> <wreathed in smoke from a *rank* cigar—*Ralph Watson*>

Rancid usually suggests an offensive taste as well as an offensive smell that is indicative of a loss of freshness; it is used especially of fatty substances (as oil or butter) that have undergone a chemical change or decomposition <*rancid* bacon> **Fusty** and **musty** both suggest lack of ventilation and sunlight, but of the two

words **fusty** carries the stronger implication of age and prolonged uncleanness or an accumulation of dust and dirt, and **musty**, the stronger implication of moldiness or of the effects of darkness or dampness <the ill-ventilated schoolroom full of boys smelled . . . *fusty*—*Ellis*> <the department had moved from its *fusty* old headquarters . . . to a shiny new home—*Time*> <the *musty* odor of a damp cellar> <there was an acrid, *musty* smell; the raw air was close with breathing—*Rose Macaulay*>

2 **Mandate**, **initiative**, **referendum**, **plebiscite** are comparable when meaning a political action or procedure whereby a constituency instructs or gives information of its desires to its legislature or legislators. **Mandate**, the most general of these terms, applies to instruction delivered by the people (as by a general vote or by a choice in an election) that makes their wishes clear not only to their representatives in a legislature but also to those who hold the executive power, or, in an extended sense, to those who represent them in any way or who by the nature of their office or duties are necessarily responsive to the will of the people <the president of the United States, reelected by an enormous majority, declared that he had a *mandate* from the people to continue his policies>

Initiative often denotes a right, but when it denotes a procedure, it implies recognition of the right of a group of voters or, more often, of a clearly defined number of voters, to propose a new measure or a constitutional amendment to a legislature <the *initiative*, both as a right and as a procedure, is legally recognized in many of the states of the United States of America>

Referendum applies to the practice, adopted by some states and cities in the United States, of sending measures that have been considered by or proposed to the legislative body to the voters for approval or rejection or for an expression of their wishes. **Plebiscite** basically applies to a vote of the people usually by universal suffrage on some measure submitted to them by the group or the body having the initiative. Sometimes *plebiscite* implies a vote of the population of a territorial unit that testifies to their wishes especially as to the form of government they will accept, or their choice in a proposed merger with either of two nations.

2 **Mania, delirium, frenzy, hysteria** are comparable when they mean a state of mind in which there is loss of control over emotional, nervous, or mental processes. **Mania** (see also INSANITY) definitely implies madness or insanity; the term may designate a type of madness in which the patient manifests extreme excitability or, more precisely, the phase of manic-depressive insanity in which the patient loses control over his powers of thought, of speech, and of movement through violent excitement or excessive emotion [(George III) suffered a third attack of *mania*—*William Hunt*] **Delirium** implies extreme mental disturbance that may be associated with or induced by toxic factors (as of disease or drugs) or occur episodically in a prolonged mental disorder and that is characterized by raving, hallucinations, delusions, and extreme restlessness (a raging fever accompanied with *delirium*—*Dickens*) (by pain reduced to a state approaching *delirium*) But *delirium* also, in nontechnical use, applies to a state of intense emotional excitement that manifests itself in an individual or in a group and robs him or them of self-control (in a *delirium* of joy) (the *delirium* of popular enthusiasm—*Lecky*) **Frenzy** (see also INSPIRATION) suggests wilder or more violent agitation or disorder than *delirium* but no less emotional excitement; it is applicable both to a state bordering on a mania (an act done in the . . . *frenzy* of despair—*Freeman*) and to one in which for the time being all self-control is lost (his hands released her . . . and went up to his white hair, which they tore in a *frenzy*—*Dickens*) (her intensity, which would leave no emotion on a normal plane, irritated the youth into a *frenzy*—*D. H. Lawrence*) **Hysteria** applies strictly to a psychoneurosis simulating organic disease and manifesting such symptoms as disturbance of sensation, motion, and visceral functions expressed typically in functional paralysis, nausea, and emotional excitability (a structurally normal arm paralyzed by *hysteria*) In ordinary nontechnical language *hysteria* implies extreme emotional instability that may show itself in swift transitions of mood or from laughing to crying (she laughed and cried together . . . in a *hysteria* which she could not control—*Bennett*) (they were gradually worked up to complaisance and then to enthusiasm and then to *hysteria* and then to acute mania—*Mencken*)

many, several, sundry, various, divers, numerous, multifarious mean consisting of a large number or comprising a large group. **Many** implies a likeness between the individuals or units in class, category, kind, or sort; except that it vaguely implies more than a few, the term gives no explicit suggestion as to how large the number is (of the eleven poets who accepted (representing, in *many* cases, a second choice on the part of the committee . . . —*Mary McCarthy*) (*many* inventions which we now see to be precursors of the second industrial revolution—*Wiener*) **Several** (see also DISTINCT 1) is almost as vague as *many* in its implication of number. In law the term is construed as meaning more than one; thus, the *several* counts of an indictment may be two or more counts. In more general use it is usually construed as meaning at least three (the journey will take *several* days) (they saw *several* strangers on the road) (there are *several* reasons why you should not go) Sometimes the term means both more than a few and different each from the other; in such use, *several* is often preceded by a possessive adjective (a review of our denominational theologians . . . There have been many of them; they have served their *several* causes well—*Sperry*) (her *several* thoughts . . . as signaled by the changes on her face—*Hardy*) (chosen every second year by the people of the *several* States—*U. S. Constitution*) **Sundry** also implies an indefinite number, but it carries regularly a stronger implication of the difference of each from the others than does *several*; thus, there are *several*, rather than *sundry*, eggs left; there are *sundry*, more explicit than *several*, aspects of the problem that have not been considered (she differed . . . in *sundry* important features—*Quiller-Couch*) (all their *sundry* emotions of a moment ago were one now in a sense of submissive, unquestioning reverence—*Tasaki*) **Various** (see also DIFFERENT) is often used to mean an indefinite number, with a more or less attenuated implication of difference in identity of each from each (various persons spoke to me about it) (the *various* social layers of the American population—*Packard*) **Divers** (compare *diverse* under DIFFERENT) also has come to imply a vague number, often meaning little more than *many* or *several*, but often retaining some of its originally strong impli-

cation of difference among the individuals <he told his story to *divers* persons> <*divers* styles of musical expression—*Virgil Thomson*> **Numerous** may qualify plural nouns or singular nouns that designate a collection or assembly of units or individuals. In each case the term implies the existence of a noticeably large number of units or individuals; sometimes, in fact, it connotes a crowding or thronging <every president has *numerous* letters from *numerous* persons> <I have contracted a *numerous* acquaintance among the best sort of people—*Steele*> <the commoners who had been summoned . . . formed a *numerous* assembly—*Macaulay*> **Multifarious** adds to the implications of *many* that of great diversity and often incongruity in the units, individuals, or elements involved <in many of the *multifarious* activities he undertook—*Ellis*> <the *multifarious* Italian dialects—*Heiser*> <the large desk on which *multifarious* files and papers were ranged—*Bennett*> <the *multifarious* sufferings of the refugees>

2 **Marine, maritime, nautical, naval** are not closely synonymous terms but they are so interrelated that they are sometimes a cause of confusion. *Marine* and *maritime* both imply a connection with the sea. *Marine* is the appropriate term when what is qualified is produced by or is found in the sea or in a body of salt water (for this sense see **AQUATIC**) or is intended for use at sea <*marine* barometer> <*marine* chronometer> or deals with the sea or with vessels that ply the sea or other large bodies of water <*marine* painting> <*marine* engineers> *Marine* is sometimes used also when there is an actual or implied reference to seamen <at that time the *Marine* Board examinations took place at the St. Katherine's Dock House on Tower Hill—*Conrad*> <the *marine* hospital system long maintained by the United States for the care of sick and disabled merchant seamen> and the term commonly applies to soldiers who serve at sea (the *Marine* Corps) **Maritime** is the appropriate term when the reference is to countries, climates, or peoples on the borders of a sea <the *Maritime* Provinces of Canada are on its eastern coast> <*maritime* races> or to the navigation of or commerce on the seas <*maritime* pursuits such as fishing or whaling> <*maritime* laws> <*maritime* perils> <in the whole of British genius . . . I have estimated the *maritime* ancestry as 1.9, less than any other class—*Ellis*> But *maritime* and *marine* are sometimes used interchangeably, especially in reference to law and insurance. *Nautical* and *naval*, on the other hand, imply a connection with ships and shipping, and therefore only indirectly with the

sea. **Nautical**, however, is the usual term in applications where a relationship to sailors or seamen or the sailing of ships or boats is distinctly implied <*nautical* pursuits such as yachting> <*nautical* skill> <a man of *nautical* interests is never satisfied until he owns some sort of boat> <*nautical* clothes> <no one rows, very few sail . . . ; Brighton . . . is the least *nautical* of seaside places—*Jefferies*> *Nautical* is usually the preferred term when reference to the art or profession of navigation is implied <*nautical* charts> <*nautical* tables> <*nautical* astronomy> <a *nautical* mile> **Naval** usually implies reference to a navy as distinguished from a merchant marine and as composed not only of ships, but of men, supplies, and armaments; at times, only from the context can a reader be sure whether ship or naval force is referred to <*naval* stores> <a *naval* architect> <a *naval* engagement> <he belongs to the *naval* reserve>

mariner, sailor, seaman, tar, gob, bluejacket all denote a person engaged in sailing or handling a ship. In non-technical use **mariner** generally refers to those directly involved in the navigation and operation of the ship but in legal use it is applicable to a person employed aboard a ship in any capacity and then includes not only the navigators and operators but such persons as those concerned with the ship's business and housekeeping; thus, a ship's master, officers, engineers, and stewardesses all are in this sense *mariners*. *Mariner* is not so common as the other terms, but it is very common in literary use <ye *mariners* of England that guard our native seas—*Campbell*> **Sailor** still so strongly retains its original implication of concern with the management of boats or ships that are propelled by sails that it is the appropriate term whenever this idea is specifically suggested. However the term is also applicable to a person engaged in the actual navigation or operation of a vessel regardless of the power which drives it. In ordinary use it applies especially to one more technically called a **seaman**, one of the working force sometimes including or sometimes excluding officers employed on a ship. The term *seaman* alone is not ordinarily applied to apprentices, for it suggests skill and craft in operation and guidance of a vessel. **Tar** is a familiar, often poetic, designation of a sailor; **gob** designates informally a sailor belonging to the navy and is not applied to an officer, whether commissioned or noncommissioned. **Bluejacket** is commonly applied to an enlisted man in the British or American navy; the term originally referred to the distinguishing uniform of such a seaman; it is often employed in distinguishing a sailor in the navy from a marine or a sailor in the merchant marine.
